SIS10 Sport, Fitness and Recreation Training Package

Release: 1.3

CONTENTS

Training Guidelines **28**
Imprint Page **29**
History **30**
Preliminary Information **30**
Summary of AQF Qualifications in SIS10 ..... **32**
List of All Units in SIS10 Training Package **33**
Imported Units in SIS10 Training Package **68**
Mapping to Previous Training Package **80**
Overview **219**
Introduction to the Industry **225**
Qualifications Framework **230**
Skill Sets in this Training Package **237**
Qualification Pathways **242**
Industry Requirements for Employability Skills **247**
Whole of Industry Qualification Information **252**
Assessment Guidelines **255**
Competency Standards **277**
Suggested AQF Packaging of Units of Competency **285**
SIS10110 Certificate I in Sport and Recreation **326**
SIS20110 Certificate II in Community Activities **330**
SIS20210 Certificate II in Outdoor Recreation **334**
SIS20310 Certificate II in Sport and Recreation **341**
SIS20410 Certificate II in Sport Career Oriented Participation **346**
SIS20510 Certificate II in Sport Coaching **351**
SIS30110 Certificate III in Aquatics **357**
SIS30210 Certificate III in Community Activity Programs **362**
SIS30310 Certificate III in Fitness **367**
SIS30410 Certificate III in Outdoor Recreation **372**
SIS30510 Certificate III in Sport and Recreation **388**
SIS30610 Certificate III in Sport Career Oriented Participation **393**
SIS30710 Certificate III in Sport Coaching **399**
SIS30810 Certificate III in Sports Trainer **408**
SIS40110 Certificate IV in Community Recreation **412**
SIS40210 Certificate IV in Fitness **417**
SIS40310 Certificate IV in Outdoor Recreation **423**
SIS40410 Certificate IV in Sport and Recreation **446**
SIS40510 Certificate IV in Sport Coaching **451**
SIS40610 Certificate IV in Sport Development **458**
SIS50110 Diploma of Facility Management **463**
SIS50210 Diploma of Fitness **468**
SIS50310 Diploma of Outdoor Recreation **474**
SIS50410 Diploma of Sport and Recreation Administration **489**
SIS50510 Diploma of Sport Coaching **494**
SIS50610 Diploma of Sport Development **500**
SISSS00078 Pool Lifeguard **505**
SISSS00095 Swimming and Water Safety Teacher **507**
SISSS00011 Aquatic Technical Operator **509**
SISSS00001 Abseiling Guide Multi Pitch (Natural Surfaces) **511**
SISSS00003 Abseiling Guide Single Pitch (Artificial Surfaces) **513**

© Commonwealth of Australia, 2025 HumanAbility

SISSS00002 Abseiling Guide Single Pitch (Natural Surfaces)....515
SISSS00004 Abseiling Instructor Multi Pitch (Artificial Surfaces)....517
SISSS00005 Abseiling Instructor Multi Pitch (Natural Surfaces)....519
SISSS00006 Abseiling Instructor Single Pitch (Artificial Surfaces) 521
SISSS00007 Abseiling Instructor Single Pitch (Natural Surfaces)....523
SISSS00015 Bushwalking Guide Controlled Environments....525
SISSS00017 Bushwalking Guide Intermediate Environment....527
SISSS00016 Bushwalking Guide Uncontrolled Environment 529
SISSS00012 Bushwalk Specialist - Alpine....531
SISSS00013 Bushwalk Specialist - Arid....533
SISSS00014 Bushwalk Specialist - Tropical 535
SISSS00024 Canyoning Guide (Multi Pitch)....537
SISSS00025 Canyoning Guide (Single Pitch) 539
SISSS00026 Canyoning Instructor (Single and Multi Pitch) 541
SISSS00018 Canoeing Guide Flat Water....543
SISSS00019 Canoeing Guide White Water Grade 2 545
SISSS00020 Canoeing Guide White Water Grade 3 547
SISSS00021 Canoeing Instructor Flat Water....549
SISSS00022 Canoeing Instructor White Water Grade 2 551
SISSS00023 Canoeing Instructor White Water Grade 3 553
SISSS00028 Caving Guide - Single Pitch....555
SISSS00027 Caving Guide - Multi Pitch....557
SISSS00029 Caving Instructor - Multi Pitch....560
SISSS00031 Caving Instructor - Vertical Single Pitch 562
SISSS00032 Challenge Ropes Course Conductor (High Ropes)....564
SISSS00033 Challenge Ropes Course Conductor (Low Ropes)....566
SISSS00034 Challenge Ropes Course Manager (High Ropes)....568
SISSS00035 Challenge Ropes Course Manager (Low Ropes) 570
SISSS00036 Challenge Ropes Course Supervisor (High Ropes) 572
SISSS00037 Challenge Ropes Course Supervisor (Low Ropes) 574
SISSS00042 Climbing Guide (Natural Surfaces) Top Rope....576
SISSS00040 Climbing Guide (Natural Surfaces) Multi Pitch Lead 578
SISSS00039 Climbing Guide (Artificial Surfaces) Top Rope 580
SISSS00043 Climbing Instruct (Natural Surfaces) Single Top Rope....582
SISSS00038 Climbing Guide (Artificial Surfaces) Single Pitch Lead 584
SISSS00041 Climbing Guide (Natural Surfaces) Single Pitch Lead 586
SISSS00045 Climbing Instructor (Artificial Surfaces) Multi Pitch Lead....588
SISSS00047 Climbing Instructor (Natural Surfaces) Multi Pitch Lead 590
SISSS00049 Climbing Instructor (Natural Surfaces) Top Rope 592
SISSS00044 Climbing Instructor (Artificial Surfaces) Single pitch lead 594
SISSS00052 Cycle Tour Guide On-Road (Day Tours) 596
SISSS00053 Cycle Tour Guide On-Road (Overnight and Extended Tours)....598
SISSS00054 Cycle Tour Instructor On-Road (Overnight and Extended Tours)....600
SISSS00055 Four Wheel Driving Guide 602
SISSS00056 Four Wheel Driving Guide Advanced 604
SISSS00059 Horse Program Manager 606
SISSS00060 Horse Riding Assistant Instructor 609
SISSS00061 Horse Riding Instructor....611
SISSS00062 Horse Riding Instructor - Senior....613
SISSS00064 Kayaking Guide Flat Water 615
SISSS00066 Kayaking Guide White Water Grade 2 617
SISSS00065 Kayaking Guide White Water Grade 3 619
SISSS00067 Kayaking Instructor Flat Water 621

© Commonwealth of Australia, 2025 HumanAbility

SISSS00068 Kayaking Instructor White Water Grade 2 623
SISSS00069 Kayaking Instructor White Water Grade 3 625
SISSS00070 Mountain Bike Guide (Controlled to Intermediate Environment) 627
SISSS00071 Mountain Bike Guide (Intermediate Environment) 629
SISSS00072 Mountain Bike Instructor (Intermediate Environment) 631
SISSS00080 Sea Kayaking Guide Easy to Moderate Conditions 633
SISSS00082 Sea Kayaking Instructor Easy to Moderate Conditions 635
SISSS00081 Sea Kayaking Guide Moderate to Difficult Conditions 637
SISSS00083 Sea Kayaking Instructor Moderate to Difficult Conditions 639
SISSS00089 Skiing Instructor Cross Country Intermediate Environments 641
SISSS00086 Skiing Downhill Instructor 643
SISSS00090 Skiing Instructor Downhill Telemarking 645
SISSS00088 Skiing Guide Overnight Ski Touring 647
SISSS00091 Skiing Ski Touring Guide Overnight Intermediate 649
SISSS00084 Skiing Cross Country Instructor Advanced 651
SISSS00085 Skiing Cross Country Instructor Intermediate 653
SISSS00100 Trail Bike Guide - Overnight Rides 655
SISSS00099 Trail Bike Guide - Day Rides 657
SISSS00101 Trail Bike Riding Instruct Advanced Skills 659
SISSS00102 Trail Boss 661
SISSS00104 Trail Boss - Overnight Rides 663
SISSS00105 Trail Guide Assistant 666
SISSS00106 Trail Guide - Day Rides 668
SISSS00107 Trail Guide - Overnight Rides 670
SISSS00096 Tennis Australia Junior Development Coach 672
SISSS00092 Sports Medicine Australia Level 1 Sports Trainer 674
SISSS00079 Rugby Union Officiating 676
SISSS00094 Surf Life Saving Officiating 678
SISSS00058 Golf Officiating 680
SISSS00097 Tennis Officiating 682
SISSS00057 General Officiating 684
SISCAQU201A Monitor pool water quality 686
SISCAQU202A Perform basic water rescues 691
SISCAQU303A Operate aquatic facility plant and equipment 698
SISCAQU304A Maintain pool water quality 704
SISCAQU305A Implement aquatic facility plant and equipment maintenance program 710
SISCAQU306A Supervise clients at an aquatic facility or environment 716
SISCAQU307A Perform advanced water rescues 723
SISCAQU308A Instruct water familiarisation, buoyancy and mobility skills 730
SISCAQU309A Instruct clients in water safety and survival skills 737
SISCAQU310A Instruct swimming strokes 744
SISCAQU311A Foster the development of infants and toddlers in an aquatic environment 751
SISCAQU312A Assist participants with a disability during aquatic activities 757
SISCAQU313A Develop an aquatics career plan 763
SISCAQU414A Develop pool water maintenance procedures 768
SISCAQU415A Develop aquatic facility maintenance procedures 774
SISCAQU416A Coordinate lifeguard service at an aquatic facility 781
SISCAQU417A Operate self-contained breathing apparatus in an aquatic facility 787
SISCCRD301A Facilitate community development through recreational activities 792
SISCCRD302A Recruit and manage volunteers 798
SISCCRD303A Facilitate inclusion for people with a disability 804
SISCCRD304A Work with key stakeholders 810
SISCCRO301A Assist with recreation games not requiring equipment 815

© Commonwealth of Australia, 2025 HumanAbility

SISCCRO302A Apply legal and ethical instructional skills....821
SISCCRO303A Plan and conduct recreation programs for older persons....827
SISCCRO304A Plan and conduct disability recreation programs....835
SISCCRO305A Develop a budget for a recreation initiative....843
SISCCRO306A Organise participant travel....848
SISCDAN301A Teach recreational dance....854
SISCSDF301A Instruct the basic skills of unarmed self-defence....861
SISCSDF302A Instruct the intermediate skills of unarmed self-defence....870
SISFFIT301A Provide fitness orientation and health screening....879
SISFFIT302A Provide quality service in the fitness industry....885
SISFFIT303A Develop and apply an awareness of specific populations to exercise delivery895
SISFFIT304A Instruct and monitor fitness programs....903
SISFFIT305A Apply anatomy and physiology principles in a fitness context....912
SISFFIT306A Provide healthy eating information to clients in accordance with recommended guidelines....921
SISFFIT307A Undertake client health assessment....931
SISFFIT308A Plan and deliver gym programs....940
SISFFIT309A Plan and deliver group exercise sessions....954
SISFFIT310A Plan and deliver water based fitness activities....965
SISFFIT311A Deliver approved community fitness programs....978
SISFFIT312A Plan and deliver an endurance training program....985
SISFFIT313A Plan and deliver exercise to apparently healthy children and adolescents 993
SISFFIT314A Plan and deliver exercise to older clients with managed conditions....1002
SISFFIT415A Work collaboratively with medical and allied health professionals....1011
SISFFIT416A Apply motivational psychology to provide guidance on exercise behaviour and change to meet health and fitness goals....1019
SISFFIT417A Undertake long term exercise programming....1028
SISFFIT418A Undertake appraisals of functional movement....1038
SISFFIT419A Apply exercise science principles to planning exercise....1048
SISFFIT420A Plan and deliver exercise programs to support desired body composition outcomes....1060
SISFFIT421A Plan and deliver personal training....1068
SISFFIT422A Implement inclusive aquatic activities for specific population groups....1077
SISFFIT523A Deliver prescribed exercise to clients with cardiorespiratory conditions 1087
SISFFIT524A Deliver prescribed exercise to clients with metabolic conditions....1098
SISFFIT525A Advise on injury prevention and management....1114
SISFFIT526A Deliver prescribed exercise to clients with musculoskeletal conditions ...1128
SISFFIT527A Undertake health promotion activities to decrease risk factors and prevent chronic disease....1145
SISFFIT528A Apply research findings to exercise management strategies....1155
SISFFIT529A Deliver prescribed exercise to clients with a disability or neurological impairment....1161
SISFFIT530A Deliver prescribed exercise to children and young adolescents with specific chronic conditions....1173
SISFFIT531A Deliver prescribed exercise to older clients with chronic conditions....1182
SISOABA201A Demonstrate abseiling skills on artificial surfaces....1192
SISOABA302A Apply single pitch abseiling skills on artificial surfaces....1198
SISOABA303A Establish ropes for abseiling on artificial surfaces....1206
SISOABA304A Guide abseiling on single pitch artificial surfaces....1213
SISOABA405A Establish ropes for multi pitch abseiling on artificial surfaces....1222
SISOABA406A Instruct abseiling on single pitch artificial surfaces....1229
SISOABA407A Instruct abseiling on multi pitch artificial surfaces....1239
SISOABL301A Assist in the facilitation of adventure-based learning activities....1249

© Commonwealth of Australia, 2025 HumanAbility

SISOABL402A Facilitate adventure-based learning activities 1255
SISOABL503A Design and facilitate adventure-based learning programs 1262
SISOABN303A Apply single pitch abseiling skills on natural surfaces 1268
SISOABN201A Demonstrate abseiling skills on natural surfaces 1274
SISOABN202A Safeguard an abseiler using a single rope belay system 1279
SISOABN304A Establish ropes for single pitch abseiling on natural surfaces 1285
SISOABN305A Guide abseiling on single pitch natural surfaces 1292
SISOABN406A Apply multi pitch abseiling skills on natural surfaces 1301
SISOABN407A Establish ropes for multi pitch abseiling on natural surfaces 1309
SISOABN408A Instruct abseiling on single pitch natural surfaces 1316
SISOABN409A Guide abseiling on multi pitch natural surfaces 1326
SISOABN510A Instruct abseiling on multi pitch natural surfaces 1335
SISOARC301A Conduct an archery session 1345
SISOBWG201A Demonstrate bushwalking skills in a controlled environment 1352
SISOBWG302A Apply intermediate bushwalking skills 1359
SISOBWG303A Guide bushwalks in a controlled environment 1367
SISOBWG404A Apply river crossing skills 1375
SISOBWG405A Guide intermediate bushwalks 1381
SISOBWG406A Apply bushwalking skills in uncontrolled landscapes 1390
SISOBWG507A Apply advanced bushwalking skills in alpine areas 1398
SISOBWG508A Apply advanced bushwalking skills in arid areas 1407
SISOBWG509A Apply advanced bushwalking skills in tropical areas 1416
SISOBWG510A Guide bushwalks in an uncontrolled environment 1425
SISOCAY201A Demonstrate horizontal canyoning skills 1434
SISOCAY302A Apply vertical canyoning skills 1441
SISOCAY303A Establish belays in canyons 1450
SISOCAY304A Guide single pitch canyoning trips 1457
SISOCAY405A Apply advanced vertical canyoning skills 1466
SISOCAY406A Establish complex belays in canyons 1476
SISOCAY407A Guide multi pitch canyoning trips 1483
SISOCAY508A Instruct canyoning skills 1492
SISOCLA201A Demonstrate top rope climbing skills on artificial surfaces 1501
SISOCLA302A Apply top rope climbing skills on artificial surfaces 1508
SISOCLA303A Establish belays for climbing on artificial surfaces 1516
SISOCLA304A Guide top rope climbing activities on artificial surfaces 1522
SISOCLA305A Apply route setting skills 1531
SISOCLA406A Apply lead climbing skills on artificial surfaces 1536
SISOCLA407A Apply multi pitch lead climbing skills on artificial surfaces 1545
SISOCLA408A Establish belays for multi pitch climbing on artificial surfaces 1555
SISOCLA409A Instruct lead climbing on single pitch artificial surfaces 1562
SISOCLA510A Instruct lead climbing on multi pitch artificial surfaces 1572
SISOCLN201A Demonstrate top rope climbing skills on natural surfaces 1582
SISOCLN302A Apply climbing skills on natural surfaces 1590
SISOCLN303A Establish belays for climbing on natural surfaces 1599
SISOCLN304A Guide top rope climbing activities on natural surfaces 1606
SISOCLN405A Apply single pitch lead climbing skills on natural surfaces 1615
SISOCLN406A Apply multi pitch lead climbing skills on natural surfaces 1626
SISOCLN407A Establish belays for multi pitch climbing on natural surfaces 1637
SISOCLN408A Guide lead climbing activities on single pitch natural surfaces 1644
SISOCLN409A Instruct top rope climbs on natural surfaces 1654
SISOCLN410A Guide lead climbing activities on multi pitch natural surfaces 1665
SISOCLN411A Instruct lead climbing on single pitch natural surfaces 1675
SISOCLN512A Instruct lead climbing on multi pitch natural surfaces 1686

© Commonwealth of Australia, 2025 HumanAbility

SISOCNE201A Demonstrate simple canoeing skills....1697
SISOCNE202A Perform deep water rescues....1705
SISOCNE303A Apply canoeing skills....1710
SISOCNE304A Apply inland canoeing skills on Grade 2 water....1718
SISOCNE305A Guide canoeing trips on flat and undemanding water....1726
SISOCNE306A Instruct canoeing skills on flat and undemanding water....1735
SISOCNE307A Guide canoeing trips on Grade 2 water....1745
SISOCNE408A Apply inland canoeing skills on Grade 3 water....1754
SISOCNE409A Instruct canoeing skills on Grade 2 water....1762
SISOCNE410A Guide canoeing trips on Grade 3 water....1772
SISOCNE511A Instruct canoeing skills on Grade 3 water....1781
SISOCRP301A Conduct a low ropes session....1791
SISOCRP302A Conduct a high ropes session....1800
SISOCRP403A Supervise a low ropes session....1810
SISOCRP404A Supervise a high ropes session....1819
SISOCRP505A Manage a low ropes course....1830
SISOCRP506A Manage a high ropes course....1836
SISOCVE201A Demonstrate caving skills....1843
SISOCVE302A Apply single pitch abseiling skills in caves....1851
SISOCVE303A Rig a ladder pitch....1859
SISOCVE304A Apply laddering skills....1864
SISOCVE305A Apply caving specific single rope techniques....1869
SISOCVE306A Rig ropes and establish belays in caves....1875
SISOCVE307A Guide vertical single pitch caving trips....1882
SISOCVE308A Guide horizontal caving trips....1890
SISOCVE409A Rig ladders in complex situations....1898
SISOCVE410A Rig a complex pitch using caving specific techniques....1903
SISOCVE411A Apply vertical caving skills....1908
SISOCVE412A Rig multi pitches in complex vertical cave systems....1914
SISOCVE413A Navigate in untrogged caves....1921
SISOCVE414A Guide vertical multi pitch caving trips....1928
SISOCVE415A Perform cave rescues....1936
SISOCVE416A Apply cavern diving skills....1943
SISOCVE417A Instruct vertical single pitch caving skills....1951
SISOCVE518A Apply cave diving skills....1960
SISOCVE519A Apply sinkhole diving skills....1968
SISOCVE520A Apply sump diving skills....1976
SISOCVE521A Apply advanced cave diving skills....1985
SISOCVE522A Instruct vertical multi pitch caving skills....1994
SISOCYT201A Select, set up and maintain a bike....2003
SISOCYT202A Demonstrate basic cycling skills....2008
SISOCYT303A Apply on-road cycling skills....2015
SISOCYT304A Guide on-road cycle tours....2024
SISOCYT405A Apply overnight cycle touring skills....2032
SISOCYT406A Guide overnight and extended cycle tours....2041
SISOCYT407A Instruct cycle touring skills....2050
SISODRV201A Drive AWD/4WD vehicles on unsealed roads....2060
SISODRV302A Drive and recover a 4WD vehicle....2066
SISODRV303A Guide 4WD tours....2074
SISODRV404A Drive a 4WD vehicle in difficult terrain....2082
SISODRV405A Coordinate recovery of 4WD vehicles....2089
SISODRV506A Instruct four wheel driving skills....2095
SISOEQO201A Handle horses....2104

© Commonwealth of Australia, 2025 HumanAbility

SISOEQO202A Demonstrate basic horse riding skills....2110
SISOEQO303A Conduct horse riding sessions in an arena....2118
SISOEQO304A Apply first aid for horses....2125
SISOEQO305A Ride horses in tracked areas....2132
SISOEQO306A Guide day horse trail rides in tracked areas....2140
SISOEQO407A Select horses for a program....2150
SISOEQO408A Determine nutritional requirements for horses....2156
SISOEQO409A Train and condition horses....2162
SISOEQO410A Guide overnight horse trail rides in tracked areas....2169
SISOEQO411A Ride horses in remote areas....2179
SISOEQO412A Manage horse illness and injuries in remote areas....2187
SISOEQO413A Guide trail rides in remote areas....2193
SISOEQO414A Instruct horse riding and handling skills....2204
SISOEQO515A Manage stable maintenance....2212
SISOEQO516A Manage the education of horses....2219
SISOFSH201A Catch and handle fish....2224
SISOFSH202A Select, catch and use bait....2232
SISOFSH203A Select, rig and use terminal tackle....2238
SISOFSH204A Select, use and maintain fishing tackle outfits....2244
SISOFSH205A Construct and work simple fishing lures....2250
SISOFSH206A Locate and attract fish....2258
SISOFSH307A Guide fishing trips....2264
SISOFSH308A Instruct fishing skills....2273
SISOFSH309A Apply fly fishing skills....2282
SISOFSH310A Tie simple fishing flies....2290
SISOFSH311A Demonstrate freshwater fishing skills....2297
SISOFSH312A Demonstrate estuary fishing skills....2305
SISOFSH313A Catch crabs, prawns and squid....2313
SISOFSH314A Construct and repair fishing rods....2318
SISOFSH315A Demonstrate beach fishing skills....2324
SISOFSH416A Demonstrate marine inshore fishing skills....2332
SISOFSH417A Demonstrate marine offshore fishing skills....2340
SISOINT201A Conduct interpretation within an outdoor activity....2348
SISOINT302A Develop specialist resources for interpretive activities....2355
SISOKYK201A Demonstrate simple kayaking skills....2360
SISOKYK302A Apply kayaking skills....2367
SISOKYK303A Apply inland kayaking skills on Grade 2 water....2374
SISOKYK304A Guide kayaking trips on flat and undemanding water....2382
SISOKYK305A Guide kayaking trips on Grade 2 water....2391
SISOKYK406A Demonstrate inland kayaking skills on Grade 3 water....2400
SISOKYK407A Instruct kayaking skills on flat and undemanding water....2409
SISOKYK408A Instruct kayaking skills on Grade 2 water....2418
SISOKYK409A Guide kayaking trips on Grade 3 water....2427
SISOKYK510A Instruct kayaking skills on Grade 3 water....2436
SISOKYS201A Demonstrate simple sea kayaking skills....2445
SISOKYS302A Demonstrate sea kayaking skills....2453
SISOKYS303A Guide sea kayaking trips in easy to moderate conditions....2462
SISOKYS304A Demonstrate sea kayaking skills in moderate to difficult conditions....2472
SISOKYS406A Plan and navigate a sea kayaking inshore passage....2482
SISOKYS407A Instruct sea kayaking in easy to moderate conditions....2489
SISOKYS408A Guide sea kayaking trips in moderate to difficult conditions....2499
SISOKYS409A Instruct sea kayaking in moderate to difficult conditions....2508
SISOMBK201A Demonstrate basic off-road cycling skills....2518

© Commonwealth of Australia, 2025 HumanAbility

SISOMBK302A Apply advanced off-road cycling skills 2526
SISOMBK303A Guide off-road cycle tours 2536
SISOMBK404A Instruct off-road cycling skills 2544
SISONAV201A Demonstrate navigation skills in a controlled environment 2553
SISONAV302A Apply navigation skills in an intermediate environment 2560
SISONAV403A Navigate in uncontrolled environments 2568
SISOODR201A Assist in conducting outdoor recreation sessions 2576
SISOODR302A Plan outdoor recreation activities 2582
SISOODR303A Guide outdoor recreation sessions 2589
SISOODR404A Manage risk in an outdoor activity 2597
SISOODR405A Develop and coordinate programs incorporating outdoor activities 2604
SISOODR506A Evaluate policy for an outdoor organisation 2612
SISOOPS201A Minimise environmental impact 2619
SISOOPS202A Use and maintain a temporary or overnight site 2625
SISOOPS303A Interpret weather for marine environments 2633
SISOOPS304A Plan for minimal environmental impact 2640
SISOOPS305A Provide first aid in a remote location 2648
SISOOPS306A Interpret weather conditions in the field 2658
SISOOPS407A Apply search and rescue skills 2665
SISOOPS508A Manage natural resources 2672
SISOOPS509A Interpret weather for mountain environments 2679
SISOPWC201A Select and maintain a personal water craft 2685
SISOPWC202A Demonstrate simple personal water craft skills in controlled conditions 2691
SISOPWC303A Ride personal water craft in moderate to difficult conditions 2699
SISOPWC304A Guide tours using personal water craft 2707
SISOPWC405A Instruct basic personal water craft riding skills 2716
SISOPWC506A Instruct advanced personal water craft riding skills 2726
SISORAF301A Guide a raft on moving water 2736
SISORAF402A Guide a raft on Grade 3 rapids 2746
SISORAF403A Guide a raft on Grade 4 rapids 2756
SISORAF404A Coordinate and manage white water rafting trips 2766
SISORAF505A Instruct rafting skills 2774
SISOSCB301A SCUBA dive in open water to a maximum depth of 18 metres 2784
SISOSCB302A Complete night dives 2792
SISOSCB303A Complete deep dives to between 18 and 40 metres 2800
SISOSCB304A Navigate prescribed routes underwater 2808
SISOSCB305A Complete underwater search and recovery dives 2814
SISOSCB306A Perform diver rescues 2820
SISOSCB307A Inspect and fill SCUBA cylinders 2827
SISOSCB308A Guide a SCUBA dive 2833
SISOSCB309A Complete dives off boats 2843
SISOSCB310A Complete an underwater video 2849
SISOSCB311A Take still photographs underwater 2856
SISOSCB312A Complete dry suit dives 2863
SISOSCB313A Complete computer aided dives 2869
SISOSCB314A Complete wreck dives 2875
SISOSCB315A Complete drift dives on SCUBA 2881
SISOSCB316A Dive at altitude greater than 300 metres 2887
SISOSCB317A Complete a dive using Enriched Air Nitrox 2892
SISOSCB318A Dive in open water using surface supplied air 2898
SISOSCB419A Instruct SCUBA diving skills 2906
SISOSCB420A Instruct specialised SCUBA diving skills 2915

Modification History

The version details of this endorsed Training Package are in the table below. The latest information is at the top of the table.

Version	Release Date	Comments

1.3	25 November 2011	**Preliminary information**
		The "Location of units within volumes" list is now in pure alphabetical order
		Units of competency and pre requisite requirements
		Fitness:
		The following changes have been made to the pre requisites:
		• SISFIT530A pre requisite now reads SISFIT313A not SISFIT314A
		• SISFIT531A pre requisite now reads SISFIT314A not nil
		Outdoor Recreation:
		The following corrections have been made:
		• SISOVTR002A corrected to SISOVTR402A Perform complex vertical rescues
		• SISOPWC003A corrected to SISOPWC303A Ride personal water craft in moderate to difficult conditions
		Mapping table for units of competency
		Fitness:
		The following inclusions and changes have been made:
		• SISFFIT417A
		  • nature of relationship also includes SRFFIT010B
		• SISFFIT421A
		  • nature of relationship also includes SRFFIT010B
		  • reference to SRFFIT006B deleted
		Outdoor Recreation:
		• SISOABL302A corrected to SISOABL402A Facilitate adventure-based learning activities and corrected elsewhere in package
		Skill Sets
		Community Recreation:
		The following changes have been made:

© Commonwealth of Australia, 2025 HumanAbility

Version	Release Date	Comments

		• Aquatic Facility Operator renamed to Aquatic Technical Operator
		• The following units have been inserted into Aquatic Technical Operator:
		  • SISXRSK301A Undertake risk analysis of activities
		  • SISXEMER201A Respond to emergency situations
		  • SISAQU305A Implement aquatic facility plant and equipment maintenance program
		• Pool Lifeguard includes insertion of unit PUAEME001B Provide Emergency Care
		Outdoor Recreation:
		The following changes have been made:
		• Caving Guide – Multi pitch
		  • insertion of SISOCVE201A Demonstrate caving skills
		  • unit name corrected for SISOCVE305A Apply caving specific single rope techniques
		• Caving Instructor – Multi pitch
		  • SISOVT402A code corrected to SISOVTR402A Perform complex vertical rescues
		• There is no unit for the code SISOEQO003A Supervise horse handling. This unit has now been deleted from the skill sets Horse Program Manager, Horse Riding Instructor, Horse Riding Instructor – Senior, Trail Boss, Trail Guide – Day Rides, Trail Guide – Overnight Rides
		Qualifications
		Community Recreation:
		The following changes have been made:
		• SIS30110 Certificate III in Aquatics

		  • PUAOPE010B Operate a semi automatic defibrillator in an emergency added to General Electives
		• SIS40110 Certificate IV in Community Recreation
		  • SISCAQU202A Perform basic water rescues, added to aquatics electives
		Fitness:
		The following changes have been made:

© Commonwealth of Australia, 2025 HumanAbility

Version	Release Date	Comments

		• SIS30310 Certificate III in Fitness
		  • SISCAQU202A Perform basic water rescues, added to the Aqua General Electives
		• SIS40210 Certificate IV in Fitness
		  • pre requisite unit SISCAQU202A Perform basic water rescues has been inserted into Group A – Aqua
		Other changes made are as follows:
		  • The heading "Suggested electives for those wishing to operate a personal training small business" and associated list of units has been deleted
		  • SISSST301A corrected to SISSSTC301A
		  • SISSST402A corrected to SISSSTC402A
		• SIS50210 Diploma of Fitness
		The following additions have been made to General Electives:
		  • SISFFIT313A Plan and deliver exercise for apparently healthy children and adolescents
		  • SISFFIT314A Plan and deliver exercise to older clients with managed conditions
		The following code correction/s have been made:
		  • code and unit title correction to cross sector Group – SISXRSK501A Manage risk deleted and changed to SISXRSK502A Manage organisational risks
		  • SISSST301A corrected to SISSSTC301A
		  • SISSST402A corrected to SISSSTC402A
		Outdoor Recreation:
		• SIS20210 Certificate II in Outdoor Recreation
		• The following pre requisite units have been inserted into Groups:
		  • Group J – Fishing – Tackle SISOFSH201A Catch and handle fish
		  • Group O – Mountain biking SISOCYT202A Demonstrate basic cycling skills
		• SIS30410 Certificate III in Outdoor Recreation
		The following pre requisite units have been inserted into Groups:
		  • Group G – Caving – Guide
		  • SISOCVE201A Demonstrate caving skills

© Commonwealth of Australia, 2025 HumanAbility

Version	Release Date	Comments

		• Group L – Cycle touring – Guide – On Road
		  • SISOCYT202A Demonstrate basic cycling skills
		  • Imported unit corrected to TLIH207D Plan and navigate routes
		• Group N – Fishing Equipment
		  • SISOFSH201A Catch and handle fish
		  • SISOFSH204A Select, use and maintain fishing tackle outfits
		• Group U – Horse Riding – Guide Day Rides
		  • SISOEQO202A Demonstrate basic horse riding skills
		• Group X – Mountain biking – Guide
		  • SISOCYT202A Demonstrate basic cycling skills
		  • SISOMBK201A Demonstrate basic off-road cycling skills
		• Group AH – Surfing – Guide – Basic
		  • SISOSRF202A Demonstrate basic surfing manoeuvres in controlled conditions
		• Group AI – Trail bike riding – Advanced
		  • SISOTBR201A Select, set up and maintain an off-highway motorcycle
		The following additions have been made to the General Electives:
		• SISOKYS302A Demonstrate sea kayaking skills
		• SISOKYS304A Demonstrate sea kayaking skills in moderate to difficult conditions
		• SITTGDE002A Provide arrival and departure assistance
		• SITXOHS002A Follow workplace hygiene procedures
		
		• SIS40310 Certificate IV Outdoor Recreation
		  • Reference to the unit SISOKYK405A Apply sea kayaking skills in difficult conditions has been deleted. This unit was in error. The following units are now recoded:
		  • From SISOKYS406A to SISOKYS405A Plan and navigate a sea kayaking inshore passage
		  • From SISOKYS407A to SISOKYS406A Instruct sea kayaking in easy to moderate conditions
		  • From SISOKYS408A to SISOKYS407A Guide sea kayaking trips in moderate to difficult conditions
		  • From SISOKYS409A to SISOKYS408A Instruct sea kayaking in moderate to difficult conditions
		  • Incorrect code in General Electives – the code

FREE FOR EDUCATION
www.aesharenet.com.au/FfE2/

The views expressed in the copyright work do not necessarily represent the views of the Commonwealth of Australia.

This work is copyright and licensed under the AEShareNet Free for Education instant licence (AEShareNet-FfE Licence). The onus rests with you to ensure compliance with the AEShareNet-FfE licence and the following is merely a summary of the scope of the Licence.

When you obtain a copy of material that bears the AEShareNet-FfE licence mark by legitimate means you obtain an automatic licence to use and copy the work in whole or in part, solely for educational purposes.

Individual learners may:

1. use the material personally for their education such as including it, with proper attribution, in work that is performed in the course of that education; and
2. make unlimited copies, in whole or in part, of the material.

Organisations may:

1. use the material within the organisation or for the services provided by the organisation;
2. make or give copies to learners;
3. charge for the education provided; and
4. charge learners for the material on a cost-recovery basis.

Conditions for the licence can be found at http://www.aesharenet.com.au/FfE2/. Queries regarding the standard AEShareNet-FfE Licence conditions should be directed to the AEShareNet website at http://www.aesharenet.com.au/help/support/.

In addition to the standard AEShareNet-FfE Licence conditions, the following special conditions apply:

1. The copyright work must only be used in Australia and New Zealand.
2. You are not permitted to develop either an Edited Version or Enhancements of the Licensed Material

Use of this work for purposes other than those indicated above, requires the prior written permission from the Commonwealth. Requests should be addressed to Training Copyright, Department of Education, Employment and Workplace Relations, GPO Box 9880 Canberra City, ACT, 2601 or email copyright@training.com.au.

This work is the result of wide consultations with Australian industry participants. It is a collaborative view and does not necessarily represent the view of the Department or any specific body. For the sake of brevity it may omit factors which could be pertinent in particular cases.

While care has been taken in the preparation of this Training Package, the Department and the original developer do not warrant that any licensing or registration requirements specified here are either complete or up-to-date for your State or Territory. The Department and the original developer do not accept any liability for any damage or loss (including indirect and consequential loss) incurred by any person as a result of relying on the information contained in this Training Package.

The Commonwealth, through the Department of Education, Employment and Workplace Relations, does not accept any liability to any person for the information or advice (or the use of such information or advice) which is provided in this material or incorporated into it by reference. The information is provided on the basis that all persons accessing this material undertake responsibility for assessing the relevance and accuracy of its content. No liability is accepted for any information or services which may appear in any other format. No responsibility is taken for any information or services which may appear on any linked websites.

History

The SIS10 Sport, Fitness and Recreation Training Package consolidates the following Training Packages:

- SRC04 Community Recreation Training Package
- SRF04 Fitness Training Package
- SRO03 Outdoor Recreation Training Package
- SRS03 Sport Training Package

Why the merge?

The Sport and Recreation Training Package Review was undertaken to:

- comply with Training Package development policy, provided by the Department of Education, Employment and Workplace Relations (DEEWR), known as the Department of Education, Science and Training (DEST) when the Training Package Review began.
- embed employability skills into units of competency
- reduce the large amount of duplication occurring across the Sport, Fitness, Community Recreation and Outdoor Recreation Training Packages and within units
- meet equity considerations
- remove prerequisite packaging, where possible, and embed essential knowledge and skills into units of competency
- re-examine the packaging of units to ensure unit selection meets industry employment requirements—industry specific units in the core and the 'business of sport' and 'employment pathway' units in the electives—to focus graduate skills on the technical competencies required for employment and enable the elective units to reflect the individual circumstances of the graduate
- revise and tighten the performance criteria in every unit to reflect and provide examples of activities, skills, knowledge and understanding.

Preliminary Information

Important note to users

Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

Check the version number before commencing training or assessment

© Commonwealth of Australia, 2025 HumanAbility

This Training Package is Version 1.3 – check whether this is the latest version by going to the Training.gov.au website (www.training.gov.au) and locating information about the Training Package. Alternatively, contact Service Skills Australia (www.serviceskills.com.au) to confirm the latest version number.

© Commonwealth of Australia, 2025 HumanAbility

Explanation of version number conventions

The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Package's national code (which remains the same during its period of endorsement).

Cross Sector units of competency and their prerequisite requirements		
Unit code	**Unit title**	**Prerequisite units**
SISXCAI101A	Provide equipment for activities	Nil
SISXCAI102A	Assist in preparing and conducting sport and recreation sessions	Nil
SISXCAI303A	Plan and conduct sport and recreation sessions	Nil
SISXCAI304A	Plan and conduct sport and recreation programs	Nil
SISXCAI305A	Conduct individualised long-term training programs	Nil
SISXCAI306A	Facilitate groups	Nil
SISXCAI507A	Plan and implement high-performance training programs	Nil
SISXCCS201A	Provide customer service	Nil
SISXCCS402A	Coordinate client service activities	Nil
SISXCCS403A	Determine needs of client populations	Nil
SISXCCS404A	Address client needs	Nil
SISXEMR201A	Respond to emergency situations	Nil
SISXEMR402A	Coordinate emergency responses	Nil
SISXFAC201A	Maintain sport and recreation equipment for activities	Nil
SISXFAC202A	Maintain sport and recreation facilities	Nil
SISXFAC303A	Implement facility maintenance programs	Nil
SISXFAC404A	Coordinate facility and equipment acquisition and maintenance	Nil
SISXFAC405A	Plan and provide sport and recreation services	Nil
SISXFAC506A	Manage stock supply and purchase	Nil
SISXIND101A	Work effectively in sport and recreation environments	Nil
SISXIND202A	Process entry transactions	Nil

© Commonwealth of Australia, 2025 HumanAbility

SISXIND403A	Analyse participation patterns	Nil
SISXIND404A	Promote compliance with laws and legal principles	Nil
SISXIND405A	Conduct projects	Nil
SISXIND406A	Manage projects	Nil
SISXIND507A	Manage education initiatives	Nil
SISXOHS101A	Follow occupational health and safety policies	Nil
SISXOHS402A	Implement and monitor occupational health and safety policies	Nil
SISXOHS503A	Establish and maintain occupational health and safety systems	Nil
SISXRES301A	Provide public education on the use of resources	
SISXRES402A	Support implementation of environmental management practices	Nil
SISXRES403A	Use resources efficiently	Nil
SISXRES504A	Conserve and re-establish natural systems	Nil
SISXRES505A	Achieve sustainable land management	Nil
SISXRES506A	Undertake open-space planning	Nil
SISXRES507A	Design and maintain the built environment	Nil
SISXRSK301A	Undertake risk analysis of activities	Nil
SISXRSK502A	Manage organisational risks	Nil

	fundamental perceptual motor skills	ethical coaching practices
SISSCGP304A	Coach junior sports players	SISSCGP201A Apply legal and ethical coaching practices
SISSCGP305A	Plan coaching programs for junior sports players	Nil
SISSCGP306A	Customise coaching for special needs groups	SISSCGP201A Apply legal and ethical coaching practices
SISSCGP307A	Implement selection policies	Nil
SISSCGP308A	Provide drugs in sport information	Nil
SISSCGP309A	Develop nutritional strategies	Nil
SISSCGP310A	Support athletes to adopt principles of sports psychology	Nil
SISSCGP411A	Work with officials	Nil
SISSCGP412A	Implement recovery programs	Nil
SISSCGP413A	Implement a talent identification program	Nil
SISSCGP414A	Implement water based training programs	Nil
SISSCGP515A	Establish selection policies	Nil
SISSCKT201A	Perform the intermediate skills of cricket	Nil
SISSCKT202A	Perform the intermediate tactics and strategies of cricket	Nil
SISSCKT303A	Participate in conditioning for cricket	Nil
SISSCKT304A	Perform the advanced skills of cricket	Nil
SISSCKT305A	Perform the advanced tactics and strategies of cricket	Nil
SISSCKT306A	Teach the intermediate skills of cricket	Nil

© Commonwealth of Australia, 2025 HumanAbility

SISSCKT307A	Teach the intermediate tactics and strategies of cricket	Nil
SISSCKT408A	Teach the advanced skills of cricket	Nil
SISSCKT409A	Teach the advanced tactics and strategies of cricket	Nil
SISSCNO201A	Perform the intermediate skills and tactics of canoeing	Nil
SISSCNO302A	Teach the intermediate skills and tactics of flatwater canoeing	Nil
SISSCNO303A	Teach the intermediate skills and tactics of whitewater canoeing	Nil
SISSCNO304A	Teach the intermediate skills and tactics of canoe polo	Nil
SISSCNO305A	Perform the advanced skills and tactics of canoeing	Nil
SISSCNO406A	Teach the advanced skills and tactics of flatwater canoeing	Nil
SISSCNO407A	Teach the advanced skills and tactics of slalom canoeing	Nil
SISSCOP202A	Develop a personal management plan	Nil
SISSCOP203A	Develop a travel and accommodation plan	Nil
SISSCOP204A	Develop personal media skills	Nil
SISSCOP205A	Develop a personal financial plan	Nil
SISSCOP306A	Prepare a sponsorship proposal	Nil
SISSCOP307A	Manage personal finances	Nil
SISSCOP308A	Model the responsibilities of an elite athlete	Nil
SISSCOP309A	Design an athlete’s diet	Nil
SISSEQS301A	Demonstrate basic dressage, show	Nil

© Commonwealth of Australia, 2025 HumanAbility

	jumping and cross-country riding	
SISSEQS302A	Demonstrate basic dressage and show horse skills	Nil
SISSEQS404A	Teach the intermediate skills of riding on the flat	Nil
SISSEQS405A	Teach the intermediate skills of riding over fences	Nil
SISSGLF201A	Perform the A Grade skills of golf	Nil
SISSGLF202A	Apply the A Grade tactics and strategies of golf	Nil
SISSGLF203A	Interpret and apply the rules of golf at the A Grade level	Nil
SISSGLF304A	Perform the advanced skills of golf	Nil
SISSGLF305A	Apply the advanced tactics and strategies of golf	Nil
SISSGLF306A	Interpret and apply the rules of golf at the advanced level	Nil
SISSGLF307A	Participate in conditioning for golf	Nil
SISSGLF508A	Teach the advanced skills of professional golf	Nil
SISSGLF509A	Teach the advanced tactics and strategies of professional golf	Nil
SISSGLF510A	Fit and alter golf equipment	Nil
SISSNTB202A	Use intermediate level tactics and game strategy in netball play	Nil
SISSNTB203A	Participate in conditioning for netball	Nil
SISSNTB204A	Teach foundation netball skills	Nil
SISSNTB305A	Use advanced level tactics and game strategy in netball play	Nil
SISSNTB306A	Use advanced level netball skills	Nil

© Commonwealth of Australia, 2025 HumanAbility

SISSNTB407A	Teach intermediate level netball skills	Nil
SISSNTB408A	Teach intermediate level netball tactics and game strategy	Nil
SISSOGP301A	Conduct games or competitions	Nil
SISSOGP402A	Conduct a fitness and recovery program for officials	Nil
SISSRGL201A	Use intermediate level Rugby League game skills	Nil
SISSRGL202A	Use intermediate level tactics and game strategy in Rugby League play	Nil
SISSRGL203A	Participate in conditioning for Rugby League	Nil
SISSRGL204A	Teach the skills of Rugby League for modified games	Nil
SISSRGL305A	Use advanced level Rugby League game skills	Nil
SISSRGL306A	Teach intermediate level Rugby League game skills	Nil
SISSRGL307A	Teach intermediate level Rugby League tactics and game strategy	Nil
SISSRGL308A	Use advanced level tactics and game strategy in Rugby League play	Nil
SISSRGL409A	Teach advanced level Rugby League game skills	Nil
SISSRGL410A	Teach advanced level Rugby tactics and game strategy	Nil
SISSRGL511A	Teach high performance Rugby League game skills	Nil
SISSRGL512A	Teach high performance Rugby League tactics and game strategy	Nil

© Commonwealth of Australia, 2025 HumanAbility

SISSRGU201A	Perform foundation level Rugby Union skills	Nil
SISSRGU202A	Perform foundation level Rugby Union tactics and strategies	Nil
SISSRGU203A	Participate in conditioning for Rugby Union	Nil
SISSRGU204A	Officiate junior level Rugby Union	Nil
SISSRGU205A	Officiate local or district level Rugby Union	Nil
SISSRGU306A	Perform advanced level Rugby Union skills	SISSRGU201A Perform foundation level Rugby Union skills
SISSRGU307A	Perform advanced level Rugby Union tactics and strategies	SISSRGU202A Perform foundation level Rugby Union tactics and strategies
SISSRGU308A	Teach Rugby Union tactics and strategies at a foundation level	Nil
SISSRGU309A	Teach Rugby Union skills at a foundation level	Nil
SISSRGU410A	Officiate advanced level Rugby Union	Nil
SISSSAI301A	Teach the basic tactics and strategies of sailing	Nil
SISSSAI402A	Teach the advanced tactics and strategies of sailing	Nil
SISSSOC301A	Perform advanced level soccer skills	Nil
SISSSOC302A	Perform advanced level soccer tactics and strategies	Nil
SISSSPA301A	Coordinate regional touring athletes	Nil
SISSSPA402A	Coordinate international touring athletes	Nil
SISSSPA403A	Administer a team or group	Nil

© Commonwealth of Australia, 2025 HumanAbility

SISSSPA404A	Implement accreditation and registration systems	Nil
SISSSPA505A	Coordinate team or group management	Nil
SISSSPA506A	Coordinate team or group administration	Nil
SISSSPA507A	Develop volunteer management policies	Nil
SISSSPT201A	Implement sports injury prevention	Nil
SISSSPT302A	Provide initial management of sports injuries	Nil
SISSSPT303A	Conduct basic warm-up and cool-down programs	Nil
SISSSPT304A	Tape ankle, thumb and fingers	Nil
SISSSPT305A	Support sports injury management	Nil
SISSSPT306A	Deal with medical conditions in a sport setting	Nil
SISSSPT307A	Conduct advanced taping	Nil
SISSSQU201A	Teach the fundamental skills of squash	Nil
SISSSQU202A	Teach the basic tactics and strategies of squash	Nil
SISSSQU303A	Teach the intermediate skills of squash	Nil
SISSSQU304A	Teach the intermediate tactics and strategies of squash	Nil
SISSSTC301A	Instruct strength and conditioning techniques	Nil
SISSSTC402A	Develop strength and conditioning programs	Nil

© Commonwealth of Australia, 2025 HumanAbility

SISSSUR201A	Teach the basic skills of surf life saving	Nil
SISSSUR202A	Officiate beginner level surf life saving competitions	Nil
SISSSUR303A	Teach the intermediate skills of surf life saving	Nil
SISSSUR304A	Officiate intermediate level surf life saving competitions	Nil
SISSSUR405A	Teach the advanced skills of surf life saving	Nil
SISSSUR406A	Officiate advanced level surf life saving competitions	Nil
SISSSWM301A	Teach the competitive strokes of swimming	Nil
SISSSWM302A	Plan a program for a competitive swimmer	Nil
SISSSWM303A	Teach the advanced skills of competitive swimming	Nil
SISSTNS201A	Assist in conducting tennis activities for beginner players	Nil
SISSTNS202A	Interpret and apply the rules of tennis	SISSCGP201A Apply legal and ethical coaching practices
SISSTNS303A	Coach stroke production and tactics for junior tennis players	Nil
SISSTOU201A	Perform the intermediate skills of Touch	Nil
SISSTOU202A	Perform the intermediate tactics and strategies of Touch	Nil
SISSTOU303A	Teach the intermediate skills of Touch	Nil
SISSTOU304A	Teach the intermediate tactics and strategies of Touch	Nil

© Commonwealth of Australia, 2025 HumanAbility

SISSTPB201A	Teach fundamental tenpin bowling skills	Nil
SISSVOL301A	Teach the intermediate skills of volleyball	Nil
SISSVOL302A	Teach the intermediate tactics and strategies of volleyball	Nil
SISSVOL403A	Teach the advanced skills of volleyball	Nil
SISSVOL404A	Teach the advanced tactics and strategies of volleyball	Nil

Imported Units in SIS10 Training Package

Code	Title	Origin
BSBADM101A	Use business equipment and resources	BSB07 Business Services
BSBADM307B	Organise schedules	BSB07 Business Services
BSBADM311A	Maintain business resources	BSB07 Business Services
BSBADM405B	Organise meetings	BSB07 Business Services

RGRPSH401A	Relate anatomical and physiological features to the care and treatment of horses	RGR08 Racing Industry
RTC1301A	Operate basic machinery and equipment	RTE03 Rural Production
RTC1701A	Follow basic chemical safety rules	RTE03 Rural Production
RTC2012A	Plant trees and shrubs	RTE03 Rural Production
RTC2306A	Operate vehicles	RTE03 Rural Production
RTC2307A	Operate machinery and equipment	RTE03 Rural Production
RTC2309A	Operate tractors	RTE03 Rural Production
RTC2401A	Treat weeds	RTE03 Rural Production
RTC2404A	Treat plant pests, diseases and disorders	RTE03 Rural Production
RTC2706A	Apply chemicals under supervision	RTE03 Rural Production
RTC3218A	Undertake site assessment	RTE03 Rural Production
RTC3310A	Operate specialised machinery and equipment	RTE03 Rural Production
RTC3311A	Perform specialised machinery maintenance	RTE03 Rural Production
RTC3401A	Control weeds	RTE03 Rural Production
RTC3404A	Control plant pests, diseases and disorders	RTE03 Rural Production
RTC3704A	Prepare and apply chemicals	RTE03 Rural Production
RTC3705A	Transport, handle and store chemicals	RTE03 Rural Production
RTC4024A	Recommend plants and cultural practices	RTE03 Rural Production
RTC4306A	Supervise maintenance of machinery and equipment	RTE03 Rural Production
RTC4702A	Minimise risks in the use of chemicals	RTE03 Rural Production
RTC4703A	Plan and implement a chemical use program	RTE03 Rural Production
RTD3505A	Maintain natural areas	RTD02 Conservation and Land Management

© Commonwealth of Australia, 2025 HumanAbility

RTD4802A	Develop approaches to include cultural and human diversity	RTD02 Conservation and Land Management
RTD4811A	Provide information on environmental issues and policies	RTD02 Conservation and Land Management
RTE2104A	Carry out regular horse observation	RTE03 Rural Production
RTE2121A	Provide daily care for horses	RTE03 Rural Production
RTE2130A	Ride and care for horses and equipment	RTE03 Rural Production
RTE2136A	Load and unload livestock	RTE03 Rural Production
RTE2308A	Operate ride-on vehicles	RTE03 Rural Production
RTE3102A	Educate, ride and care for horses and equipment	RTE03 Rural Production
RTE3131A	Transport livestock	RTE03 Rural Production
RTE3137A	Carry out basic hoof care procedures	RTE03 Rural Production
RTE3144A	Prevent and treat equine injury and disease	RTE03 Rural Production
RTE3402A	Implement animal health control programs	RTE03 Rural Production
RTE3712A	Administer medication to animals	RTE03 Rural Production
RTF1003A	Support turf work	RTF03 Amenity Horticulture
RTF2015A	Prepare turf surfaces for play	RTF03 Amenity Horticulture
RTF2019A	Renovate grassed areas	RTF03 Amenity Horticulture
RTF2020A	Assist with turf construction	RTF03 Amenity Horticulture
RTF2023A	Support turf establishment	RTF03 Amenity Horticulture
RTF3001A	Construct turf playing surfaces	RTF03 Amenity Horticulture
RTF3023A	Monitor turf health	RTF03 Amenity Horticulture

© Commonwealth of Australia, 2025 HumanAbility

RTF3027A	Renovate sports turf	RTF03 Amenity Horticulture
RTF4005A	Develop a sports turf maintenance program	RTF03 Amenity Horticulture
RTF5008A	Plan the establishment of sports turf playing surfaces	RTF03 Amenity Horticulture
SFISHIP209B	Operate marine communications equipment	SFI04 Seafood Industry
SIRRRPK012A	Recommend business and leisure products and services	SIR07 Retail Services
SIRXCCS001A	Apply point-of-sale handling procedures	SIR07 Retail Services
SIRXCLM001A	Organise and maintain work areas	SIR07 Retail Services
SIRXFIN001A	Balance point-of-sale terminal	SIR07 Retail Services
SIRXCT001A	Operate retail technology	SIR07 Retail Services
SIRXINV001A	Perform stock control procedures	SIR07 Retail Services
SIRXINV002A	Maintain and order stock	SIR07 Retail Services
SIRXINV004A	Buy merchandise	SIR07 Retail Services
SIRXINV005A	Control inventory	SIR07 Retail Services
SIRXMER001A	Merchandise products	SIR07 Retail Services
SIRXMER002A	Coordinate merchandise presentation	SIR07 Retail Services
SIRXMER004A	Manage merchandise and store presentation	SIR07 Retail Services
SIRXMGT001A	Coordinate work teams	SIR07 Retail Services
SIRXRSK001A	Minimise theft	SIR07 Retail Services

Overview

What is a Training Package?

A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, and recognising and assessing people‘s skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

How do Training Packages fit within the National Training Framework?

The National Training Framework is made up of the nationally agreed quality arrangements for the vocational education and training sector, the Australian Quality Training Framework (AQTF), and Training Packages endorsed by the National Quality Council (NQC).

How are Training Packages developed?

Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

How do Training Packages encourage flexibility?

Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained. Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

© Commonwealth of Australia, 2025 HumanAbility

With Training Packages, assessment and training may be conducted at the workplace, off the job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

Who can deliver and assess using Training Packages?

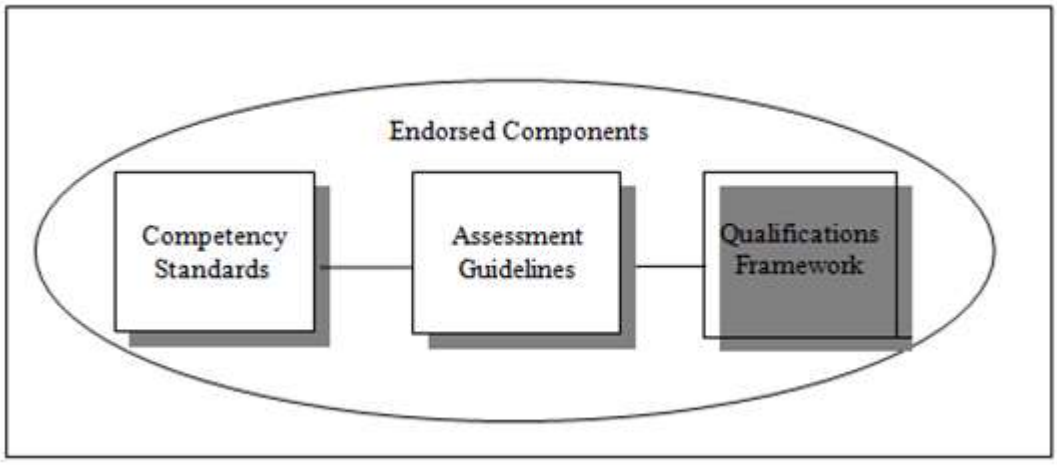
Training and assessment using Training Packages must be conducted by a registered training organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO as specified in the AQTF Essential Conditions and Standards for Registered Training Organisations.

Training Package components

Training Packages are made up of mandatory components endorsed by the NQC and optional support materials.

Training Package endorsed components

The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used



Competency Standards

© Commonwealth of Australia, 2025 HumanAbility

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

Assessment Guidelines

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the *Standards for Registered Training Organisations*. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

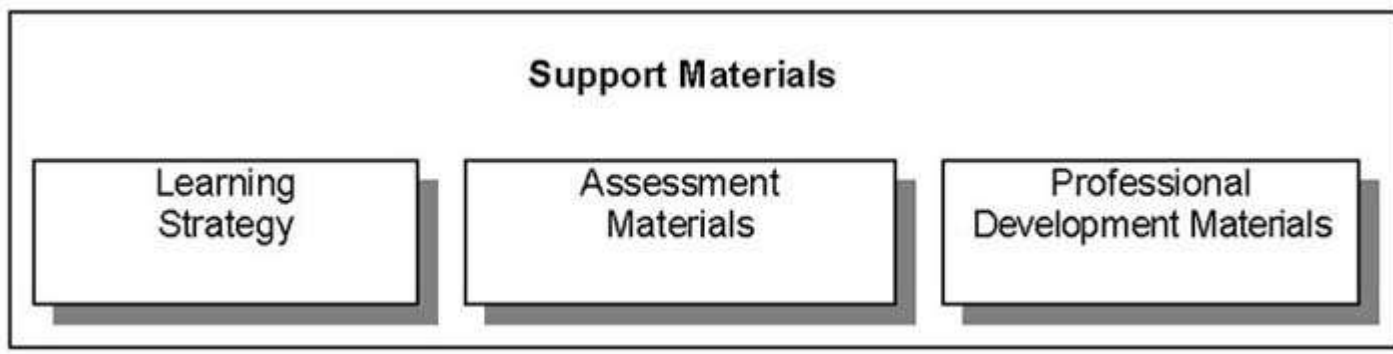
Qualifications Framework

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the _packaging rules‘. The packaging rules must be followed to ensure the integrity of the nationally recognised qualifications issued.

Training Package support materials

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.



© Commonwealth of Australia, 2025 HumanAbility

Training Package support materials are produced by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

Where such materials have been quality assured through a process of "noting" by the NQC, they display the following official logo.

It is not compulsory to submit support materials for noting; any resources that meet the requirements of the Training Package can be used.

It is not compulsory to submit support materials for noting; any resources that meet the requirements of the Training Package can be used.

Training Package, Qualification and Unit of Competency Codes

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, and with the code always before the title.

Training Package Codes

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example SIS10. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

Qualification codes

© Commonwealth of Australia, 2025 HumanAbility

Within each Training Package, each qualification has a unique eight-character code, for example SIS40109. The first three letters identify the Training Package; the first number identifies the qualification level (noting that Arabic numbers are not used in qualification titles themselves); the next two numbers identify the position in the sequence of the qualification at that level; and the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

Unit of competency codes

Within each Training Package, each unit of competency has a unique code. The unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package.

A typical code is made up of 12 characters, normally a mixture of upper case letters and numbers, as in SISCAQU201A. The first three characters signify the Training Package (SIS10 Sport and Recreation Training Package in the above example) and up to eight characters, relating to an industry sector, function or skill area, follow. The last character is always a letter and identifies the unit of competency version. The _A‘ in the example above indicates that this is the original unit of competency. An incremented version identifier usually means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent. Where changes are made that alter the outcome, a new code is assigned and the title is changed.

Training Package qualification and unit of competency titles

There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

Training Package titles

The title of each endorsed Training Package is unique and relates the Training Package‘s broad industry coverage.

Qualification titles

The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

© Commonwealth of Australia, 2025 HumanAbility

- firstly, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma or Advanced Diploma
- this is followed by the words 'in‘ for Certificates I to IV and 'of'‘ for Diploma and Advanced Diploma. For example: SIS40510 Certificate IV in Sport Coaching, SIS50110 Diploma of Facility Management
- then the industry descriptor follows, for example Sport and Recreation
- if applicable, the occupational or functional stream follows in brackets, for example (Computer Systems).

Unit of competency titles

Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example:

- SISCAQU201A Monitor pool water quality
- SISCCR0301A Assist with recreation games not requiring equipment

The development of SIS10 Sport, Fitness and Recreation Training Package

The SIS10 Sport, Fitness and Recreation Training Package consolidates the following Training Packages:

SRC04 Community Recreation Training Package

SRF04 Fitness Training Package

SRO03 Outdoor Recreation Training Package

SRS03 Sport Training Package

Why the merge?

The Sport and Recreation Training Package Review was undertaken to:

- comply with Training Package development policy, provided by the Department of Education, Employment and Workplace Relations (DEEWR), known as the Department of Education, Science and Training (DEST) when the Training Package Review began
- embed employability skills into units of competency
- reduce the large amount of duplication occurring across the Sport, Fitness, Community Recreation and Outdoor Recreation Training Packages and within units to meet equity considerations

© Commonwealth of Australia, 2025 HumanAbility

- remove prerequisite packaging, where possible, and embed essential knowledge and skills into units of competency
- re-examine the packaging of units to ensure unit selection meets industry employment requirements—industry specific units in the core and the _business of sport‘ and employment pathway‘ units in the electives—to focus graduate skills on the technical competencies required for employment and enable the elective units to reflect the individual circumstances of the graduate
- revise and tighten the performance criteria in every unit to reflect and provide examples of activities, skills, knowledge and understanding.

Introduction to the Industry

It’s no secret – Australians love their sport. And why shouldn’t we – we’re very good at it, both as participants and spectators. It complements our lifestyle and is a major recreational pastime for many of us.

When you add to this the contribution and impact of other industries such as hospitality, retail and tourism, plus all the related sales and merchandising – one starts to realise that the scope of the Sport, Fitness and Recreation industry is larger than previously thought.

Australia, with its large areas of Tropical Rainforests, National Parks and wilderness areas is all set to contribute to increased interest and participation levels in outdoor recreational activities – especially if it intends to meet the demands of a forecasted substantial increase in population over the next 50 years.

Fitness also is, and will be, an ever-increasing industry. In addition to gym activities it also encompasses personal service and retail functions that enhance and broaden the participants’s time spent at Fitness centres.

Participation sports which are the most popular are:

- Aerobics
- Golf
- Swimming
- Walking (for exercise)
- Tennis

Spectator sports (including TV coverage) which are the most popular are:

- Australian Rules Football
- Rugby League
- Rugby Union
- Basketball
- Cricket

© Commonwealth of Australia, 2025 HumanAbility

- Golf
- Soccer
- Motor vehicle racing

In relation to the SIS10 Sport, Fitness and Recreation Training Package, the following activities are covered.

Sport

Australian Football

Athletics

Basketball

Canoeing

Competitive Canoeing

Cricket

Coaching

Equestrian Activities

Golf

Gymnastics

Martial Arts

Netball

Officiating General Principles

Rugby League

Rugby Union

Soccer

Sports Administration

Sports Trainer

Squash

Strength and conditioning

Surf Life saving

Swimming

Ten pin bowling

Tennis

Touch Football

Volleyball

© Commonwealth of Australia, 2025 HumanAbility

Fitness

Health screening

Fitness programs

Healthy eating information

Client health assessment

Gym programs

Group exercise sessions

Water based fitness programs

Exercise programs for children, adolescents and the elderly

Personal training

Aquatic activities

Health promotion activities

Delivery of prescribed exercise to clients with the following conditions :

Cardiorespiratory, metabolic, musculoskeletal, disability, neurological impairment and chronic conditions

Community Recreation

Aquatics (swimming and pool-related activities)

Community recreation development

Community recreation operations

Self defence

Dance

Outdoor Recreation

Abseiling

Archery

Bushwalking

Canoeing

Canyoning

Caving

Challenge ropes

Climbing

Cycle Touring

Driving

Equestrian activities
Field Operations
Fishing
Interpretation
Kayaking
Mountain Biking
Navigation
Personal Water Craft
Rafting
SCUBA
Sea kayaking
Skiing
Ski Touring
Snorkelling
Snowboarding
Surfing
Trail bike Riding
Vertical Rescues
White Water Rescue
Yachting – Small Boat
Yachting – Windsurfing

Cross-Sector

Client/Customer service
Coaching and instruction
Emergency response
Facility management
Occupational Health and Safety
Risk management

Some facts and figures to consider

In overall economic and statistical terms (for the period 2004-2005):

- The Sport, Fitness and Recreation sector 0.3% of Australia's Domestic Product

© Commonwealth of Australia, 2025 HumanAbility

- At the end of June 2005 there were over 9,256 businesses in the sport and physical recreation sector (*****)
- 'For Profit' organisations accounted for 54.1% of the total employing organisations(*****)
- 'Not for profit' organisations and government organisations accounted for 39.4% and 6.5% respectively (*****)

Sport, Fitness and Recreation play an important role in the fabric of Australian society, and complement other industry sectors such as tourism, retail and hospitality.

In 2007 these sectors employed 93,100 people (52% women), of which more than half (53%) worked part time and included more than 17,700 businesses and similar to other parts of the service industries, the majority (92%) of businesses can be classified as small, employing less than 20 persons.

Forecast of trends and future skills demands

Trends within this industry are broadly shaped by labour market structure, public health and customer preferences. A re-alignment of the Sport, Fitness and Recreation Training Packages (such as that offered by the SIS10 Sport, Fitness and Recreation Training Package) has been necessary due to restructuring of job roles and the convergence of industry boundaries. The identification of Australia's ageing population and the resulting associated problems signify a need for an increase in health services in addition to recreational and remedial fitness facilities. The sport, fitness and recreation industry is not seen by many as being an industry where one can establish a career – to that end (as in retail), it attracts usually young casual or part-time staff who work (or plan to work) in the industry on a transitory basis thus contributing to high rates of attrition.

Consequently, the industry depends heavily on volunteers with an increased focus on skills development and projects-based outcomes.

In relation to customers fitness and recreational preferences there is a trend away from activity based sports and more towards entertainment-related activities which in turn opens up new avenues in emerging industries within the sectors of recreation and tourism.

Careers in the sport, fitness and recreation industry include:

- Athlete support services
- Exercise trainer or instructor
- Community recreation centre manager
- Team manager
- Sports coach
- Sports development officer

© Commonwealth of Australia, 2025 HumanAbility

Labour market information provided by the Department of Employment and Workplace Relations (**) paints the following picture regarding forecasted job demands within 3 occupational areas:

Fitness Instructors:

- Job prospects – very good
- Employment growth (for 2010-11) expected to be strong
- Low proportion of full-time jobs (32%)
- Working hours are slightly higher yet earnings are lower
- Unemployment levels are below average.

Sportspersons, Sporting Officials and Coaches:

- Job prospects –good
- Employment growth (for 2010-11) expected to be strong
- Low proportion of full-time jobs (38%)
- Working hours are slightly higher yet earnings are lower
- Unemployment levels are average

Sport, Fitness and Recreation Managers:

- Job prospects –average
- Employment growth (for 2010-11) expected to grow slightly
- Are employed across several industries – including Government Administration; Sports; Accommodation and Recreation Services
- Vacancy levels are Average
- 37% of vacancies from new openings
- 60% of vacancies from Managers changing employers

The Sport, Fitness and Recreation sector then - is a dynamic and evolving entity, given that it not only includes, and involves, a wide range of activities but converges with other related industries such as hospitality, retail and tourism, that work in tandem with it – thus breaking down the barriers that (to varying extents) existed previously.

Qualifications Framework

What is the Australian Qualifications Framework?

A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the *AQF Implementation Handbook*.
http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf

© Commonwealth of Australia, 2025 HumanAbility

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

Qualifications

Training Packages can incorporate the following eight AQF qualifications.

- Certificate I in ...
- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...
- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Statement of Attainment

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). Issuance of Statements of Attainment must comply with the advice provided in the current *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Under the AQTF 2010, RTOs must recognise the achievement of competencies as recorded on a qualification or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

AQF Guidelines and Learning Outcomes

The *AQF Implementation Handbook* provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

© Commonwealth of Australia, 2025 HumanAbility

Certificate I

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas;
- demonstrate basic practical skills, such as the use of relevant tools;
- perform a sequence of routine tasks given clear direction
- receive and pass on messages/information.

Certificate II

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas;
- apply a defined range of skills;
- apply known solutions to a limited range of predictable problems;
- perform a range of tasks where choice between a limited range of options is required;
- assess and record information from varied sources;

© Commonwealth of Australia, 2025 HumanAbility

- take limited responsibility for own outputs in work and learning.

Certificate III

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the section of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge
- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.

Certificate IV

Characteristics of Learning Outcomes

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature.

© Commonwealth of Australia, 2025 HumanAbility

Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

Distinguishing Features of Learning Outcomes

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.

Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team co-ordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas

© Commonwealth of Australia, 2025 HumanAbility

- analyse and plan approaches to technical problems or management requirements
- transfer and apply theoretical concepts and/or technical or creative skills to a range of situations
- evaluate information, using it to forecast for planning or research purposes
- take responsibility for own outputs in relation to broad quantity and quality parameters
- take some responsibility for the achievement of group outcomes.

Advanced Diploma

Characteristics of Learning Outcomes

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

Distinguishing Features of Learning Outcomes

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.

Vocational Graduate Certificate

Characteristics of competencies or learning outcomes

© Commonwealth of Australia, 2025 HumanAbility

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.
- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
- Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
- Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.

Vocational Graduate Diploma

Characteristics of competencies or learning outcomes

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth, depth and complexity involving the initiation, analysis, design, planning, execution and evaluation of major functions, both broad and highly specialised, in highly varied and highly specialised contexts.
- Further specialisation within a systematic and coherent body of knowledge.
- Applications involve making high-level, fully independent, complex judgements in broad planning, design, operational, technical and management functions in highly varied and highly specialised contexts. They may include full responsibility and accountability for all aspects of work and functions of others, including planning, budgeting and strategy development.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

Distinguishing features of learning outcomes

© Commonwealth of Australia, 2025 HumanAbility

- Demonstrate the self-directed development and achievement of broad and highly specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major functions, both broad and within highly varied and highly specialised contexts.
- Generate and evaluate complex ideas through the analysis of information and concepts at an abstract level.
- Demonstrate an expert command of wide-ranging, highly specialised, technical, creative or conceptual skills in complex and highly specialised or varied contexts.
- Demonstrate full responsibility and accountability for personal outputs.
- Demonstrate full responsibility and accountability for all aspects of the work or functions of others, including planning, budgeting and strategy.

Skill Sets in this Training Package

Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

Wording on Statements of Attainment

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording 'these competencies meet *[insert skill set title or identified industry area]* need‘ on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See the 2007 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment—the updated version is expected to be available on the AQFAB website <www.aqf.edu.au> during September 2007 and in print in October 2007.

Skill sets in this Training Package

This section provides information on skill sets within this Training Package, with the following important disclaimer: Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

© Commonwealth of Australia, 2025 HumanAbility

Community Recreation Skill Sets

Skill sets are applicable across several community recreation occupations where licensing and registration schemes exist.

The following skill sets have been identified to align to aquatic registration schemes.

Skill Set	Pool lifeguard
Skill Set	Swimming and Water Safety Teacher
Skill Set	Aquatic Technical Operator

Outdoor Recreation Skill Sets

The following are Skills Sets that have been identified through consultation with the Outdoor Council of Australia (OCA), the peak body for the Outdoor Recreation industry and will be utilised as the basis for the registration requirements of programs like the National Outdoor Leader Registration Scheme (NOLRS).

Skill Set	Abseiling Guide Multi Pitch (Natural Surfaces)
Skill Set	Abseiling Guide Single Pitch (Artificial Surfaces)
Skill Set	Abseiling Guide Single Pitch (Natural Surfaces)
Skill Set	Abseiling Instructor Multi Pitch (Artificial Surfaces)
Skill Set	Abseiling Instructor Multi Pitch (Natural Surfaces)
Skill Set	Abseiling Instructor Single Pitch (Artificial Surfaces)
Skill Set	Abseiling Instructor Single Pitch (Natural Surfaces)
Skill Set	Bushwalking Guide Controlled Environments
Skill Set	Bushwalking Guide Intermediate Environment
Skill Set	Bushwalking Guide Uncontrolled Environment
Skill Set	Bushwalk Specialist – Alpine
Skill Set	Bushwalk Specialist – Arid
Skill Set	Bushwalk Specialist – Tropical

© Commonwealth of Australia, 2025 HumanAbility

Skill Set	Canyoning Guide (Multi Pitch)
Skill Set	Canyoning Guide (Single Pitch)
Skill Set	Canyoning Instructor
Skill Set	Canoeing Guide Flat Water
Skill Set	Canoeing Guide White Water Grade 2
Skill Set	Canoeing Guide White Water Grade 3
Skill Set	Canoeing Instructor Flat Water
Skill Set	Canoeing Instructor White Water Grade 2
Skill Set	Canoeing Instructor White Water Grade 3
Skill Set	Caving Guide – Single pitch
Skill Set	Caving Guide – Multi Pitch
Skill Set	Caving Instructor – Multi pitch
Skill Set	Caving Instructor –Vertical Single Pitch
Skill Set	Challenge Ropes Course Conductor (High Ropes)
Skill Set	Challenge Ropes Course Conductor (Low Ropes)
Skill Set	Challenge Ropes Course Manager (High Ropes)
Skill Set	Challenge Ropes Course Manager (Low Ropes)
Skill Set	Challenge Ropes Course Supervisor (High Ropes)
Skill Set	Challenge Ropes Course Supervisor (Low Ropes)
Skill Set	Climbing Guide (Natural Surfaces) Top rope
Skill Set	Climbing Guide (Natural Surfaces) Multi pitch Lead
Skill Set	Climbing Guide (Artificial Surfaces) Top Rope
Skill Set	Climbing Instruct (Natural Surfaces) Single Top rope

Sport Skill Sets

The primary benefit identified by industry in relation to national skill sets for the Sport sector skill sets revolves around alignment with the skill requirements of the National Coaching Accreditation Scheme (NCAS) and National Officiating Accreditation Scheme (NOAS) outcomes.

The following Skills Sets have been identified with individual sports, according to their NCAS and NOAS schemes.

Skill Set	Tennis Australia Junior Development Coach
Skill Set	Sports Medicine Australia Level 1 Sports Trainer

Industry Requirements for Employability Skills

Employability skills replacing key competency information from 2006

© Commonwealth of Australia, 2025 HumanAbility

In May 2005, the approach to incorporate employability skills within Training Package qualifications and units of competency was endorsed.

Background to employability skills

Employability skills are also sometimes referred to as generic skills, capabilities or key competencies. The employability skills discussed here build on the Mayer Committee‘s key competencies, which were developed in 1992 and attempted to describe generic competencies for effective participation in work.

The Business Council of Australia (BCA) and the Australian Chamber of Commerce and Industry (ACCI), produced the Employability Skills for the Future report in 2002 in consultation with other peak employer bodies and with funding provided by the Department of Education, Science and Training (DEST) and the Australian National Training Authority (ANTA). Officially released by Dr Nelson (Minister for Education, Science and Training) on 23 May 2002, copies of the report are available from the DEEWR website at:

http://www.dest.gov.au/archive/ty/publications/employability_skills/index.htm.

The report indicated that business and industry now require a broader range of skills than the Mayer Key Competencies Framework and featured an Employability Skills Framework identifying eight employability skills1:

- communication
- teamwork
- problem solving
- initiative and enterprise
- planning and organising
- self-management
- learning
- technology

The report demonstrated how employability skills can be further described for particular occupational and industry contexts by sets of facets. The facets listed in the report are the aspects of the employability skills that the sample of employers surveyed identified as being important work skills. These facets were seen by employers as being dependent both in their nature and priority on an enterprise‘s business activity.

© Commonwealth of Australia, 2025 HumanAbility

Employability Skills Framework

The following table contains the employability skills facets identified in the report *Employability Skills for the Future*.

Skill	**Facets** Aspects of the skill that employers identify as important. The nature and application of these facets will vary depending on industry and job type.
Communication that contributes to productive and harmonious relations across employees and customers	• listening and understanding • speaking clearly and directly • writing to the needs of the audience • negotiating responsively • reading independently • empathising • using numeracy effectively • understanding the needs of internal and external customers • persuading effectively • establishing and using networks • being assertive • sharing information • speaking and writing in languages other than English
Teamwork that contributes to productive working relationships and outcomes	• working across different ages irrespective of gender, race, religion or political persuasion • working as an individual and as a member of a team • knowing how to define a role as part of the team • applying teamwork to a range of situations e.g. futures planning and crisis problem solving • identifying the strengths of team members • coaching and mentoring skills, including giving feedback
Problem solving that contributes to productive outcomes	• developing creative, innovative and practical solutions • showing independence and initiative in identifying and solving problems • solving problems in teams

© Commonwealth of Australia, 2025 HumanAbility

	• applying a range of strategies to problem solving • using mathematics, including budgeting and financial management to solve problems • applying problem-solving strategies across a range of areas • testing assumptions, taking into account the context of data and circumstances • resolving customer concerns in relation to complex project issues
Initiative and enterprise that contribute to innovative outcomes	• adapting to new situations • developing a strategic, creative and long-term vision • being creative • identifying opportunities not obvious to others • translating ideas into action • generating a range of options • initiating innovative solutions
Planning and organising that contribute to long and short-term strategic planning	• managing time and priorities – setting time lines, coordinating tasks for self and with others • being resourceful • taking initiative and making decisions • adapting resource allocations to cope with contingencies • establishing clear project goals and deliverables • allocating people and other resources to tasks • planning the use of resources, including time management • participating in continuous improvement and planning processes • developing a vision and a proactive plan to accompany it • predicting – weighing up risk, evaluating alternatives and applying evaluation criteria • collecting, analysing and organising information • understanding basic business systems and their relationships
Self-management that contributes to employee satisfaction and growth	• having a personal vision and goals • evaluating and monitoring own performance • having knowledge and confidence in own

© Commonwealth of Australia, 2025 HumanAbility

	ideas and visions • articulating own ideas and visions • taking responsibility
Learning that contributes to ongoing improvement and expansion in employee and company operations and outcomes	• managing own learning • contributing to the learning community at the workplace • using a range of mediums to learn – mentoring, peer support and networking, IT and courses • applying learning to technical issues (e.g. learning about products) and people issues (e.g. interpersonal and cultural aspects of work) • having enthusiasm for ongoing learning • being willing to learn in any setting – on and off the job being open to new ideas and techniques • being prepared to invest time and effort in learning new skills • acknowledging the need to learn in order to accommodate change
Technology that contributes to the effective carrying out of tasks	• having a range of basic IT skills applying IT as a management tool • using IT to organise data • being willing to learn new IT skills • having the OHS knowledge to apply technology • having the appropriate physical capacity

© Commonwealth of Australia, 2025 HumanAbility

Employability Skills Summary

An employability skills summary exists for each qualification. Summaries provide a lens through which to view employability skills at the qualification level and capture the key aspects or facets of the employability skills that are important to the job roles covered by the qualification. Summaries are designed to assist trainers and assessors to identify and include important industry application of employability skills in learning and assessment strategies.

The following is important information for trainers and assessors about employability skills summaries.

- Employability skills summaries provide examples of how each skill is applicable to the job roles covered by the qualification.
- Employability skills summaries contain general information about industry context which is further explained as measurable outcomes of performance in the units of competency in each qualification.
- The detail in each employability skills summary will vary depending on the range of job roles covered by the qualification in question.
- Employability skills summaries are not exhaustive lists of qualification requirements or checklists of performance (which are separate assessment tools that should be designed by trainers and assessors after analysis at the unit level)
- Employability skills summaries contain information that may also assist in building learners‘ understanding of industry and workplace expectations.

Whole of Industry Qualification Information

Qualification requirements

An RTO will award a qualification when the required number of competencies, as determined by the packaging rules for the specific qualification, has been demonstrated. If a learner does not complete all of the competencies required for a qualification he or she will receive a Statement of Attainment for the unit or units of competency completed.

Units of competency within each qualification have been categorised as either core or elective. The core units are essential to the qualification. Candidates must also choose the specified number of elective units required for each qualification.

Qualification code and title	Number of core units required	Number of elective units required	Total number of units required

Australian Apprenticeship pathways and VET in Schools

All qualifications in SIS10 are suitable for an Australian Apprenticeship pathway. Only the following qualifications are suitable for VET in Schools delivery.

Code	Title
SIS10110	Certificate I in Sport and Recreation
SIS20110	Certificate II in Community Activities
SIS20210	Certificate II in Outdoor Recreation
SIS20310	Certificate II in Sport and Recreation
SIS20410	Certificate II in Sport Career Oriented Participation
SIS20510	Certificate II in Sport Coaching

Assessment Guidelines

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the AQTF *Essential Conditions and Standards for Continuing Registration* (that supersedes AQTF 2007 *Essential Standards for Registration)* or the newly NQC endorsed set of AQTF Standards entitled AQTF *Essential Conditions and Standards for Initial Registration* (devised for training organisations that are new to the training industry).These strengthened Essential Standards for existing RTOs (and the introduction of new Standards for RTOs registering for the first time) subsequently strengthening the AQTF and ensuring that regulators have the necessary tools to protect the interests of all students undertaking Vocational Education and Training in Australia.

The changes to AQTF 2007 *Essential Standards for Registration,* and which are incorporated in AQTF *Essential Conditions and Standards for Continuing Registration, are as follows:*

- The Conditions of Registration have been moved to the front of the Standards to reinforce their importance.
- Conditions of Registration will be audited at initial registration. They will also be audited at each renewal of registration in accordance with risk management guidelines.
- Consumer protection has been increased by strengthening the financial management requirements in the Condition of registration. These changes will ensure all providers adopt sustainable business practices, reducing the risk of leaving students out of pocket.

© Commonwealth of Australia, 2025 HumanAbility

- Governance requirements have been strengthened to require senior officers and directors or substantial shareholders to satisfy fit and proper person requirements. Senior management will also have to demonstrate that decision making is informed by the experiences of its trainers and assessors.
- All RTOs will have a student management database that has the capacity to provide the registering body with AVETMISS compliant data. Registering bodies will also become the repository for student records.
- The Standards have been renamed to the AQTF *Essential Conditions and Standards for Continuing Registration* to distinguish them from the new AQTF *Essential Conditions and Standards for Initial Registration*.

Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

Assessment system overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing/registration requirements; and assessment pathways.

Benchmarks for assessment

Assessment within the National Training Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

In the areas of work covered by this Training Package, the endorsed units of competency are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

Australian Quality Training Framework assessment requirements

Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in either the AQTF *Essential Conditions and Standards for Continuing Registration* (that supersedes AQTF 2007 *Essential Standards for Registration)* or the newly NQC endorsed set of AQTF Standards entitled AQTF *Essential Conditions and Standards for Initial Registration.*

© Commonwealth of Australia, 2025 HumanAbility

Based on the strengthened Standards for Continuing Registration, the new AQTF *Essential Conditions and Standards for Initial Registration:*

- reflect all the changes to the Essential Standards for Continuing Registration
- require new RTOs to advise regulators of their intended scope of operations (possibly in the form of a business plan) and
- require potential RTOs to provide a financial audit report with their application for initial registration.

Both the AQTF *Essential Conditions and Standards for Continuing Registration* and the AQTF *Essential Conditions and Standards for Initial Registration* can be downloaded from <www.training.com.au >. The following points summarise assessment requirements.

Registration of training organisations

Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering or Course Accrediting Body in accordance with the AQTF. The RTO must have the specific units of competency and or AQF qualifications on its scope of registration.

Quality training and assessment

Each RTO must provide quality training and assessment across all its operations. See the AQTF *Essential Conditions and Standards for Continuing Registration*, Standard 1; or AQTF *Essential Conditions and Standards for Initial Registration*, Standard 1 (for RTOs that are new to the training industry)**.**

Assessor competency requirements

Each person involved in training, assessment or client service must be competent for the functions they perform. See the AQTF *Essential Conditions and Standards for Continuing Registration*, Standard 1, for assessor (and trainer) competency requirements ; or AQTF *Essential Conditions and Standards for Initial Registration,* Standard 1 , for assessor (and trainer) competency requirements (for RTOs that are new to the training industry)**.**

Assessment requirements

© Commonwealth of Australia, 2025 HumanAbility

The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the AQTF *Essential Conditions and Standards for Continuing Registration*, Standard 1 or AQTF *Essential Conditions and Standards for Initial Registration*, Standard 1 (for RTOs that are new to the training industry)**.**

Assessment strategies

Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the AQTF *Essential Conditions and Standards for Continuing Registration*, Standard 1 or AQTF *Essential Conditions and Standards for Initial Registration*, Standard 1 (for RTOs that are new to the training industry)**.**

Mutual recognition

Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the AQTF *Essential Conditions and Standards for Continuing Registration*, Condition of Registration 7 - Recognition of qualifications issued by other RTOs ; or AQTF *Essential Conditions and Standards for Initial Registration*, Condition of Registration 7 - Recognition of qualifications issued by other RTOs (for RTOs that are new to the training industry)**.**

Access and equity and client services

Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the AQTF *Essential Conditions and Standards for Continuing Registration*, Standard 2 ; or AQTF *Essential Conditions and Standards for Initial Registration,* Standard 2 (for RTOs that are new to the training industry)**.**

Monitoring Assessments

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the Essential Conditions and Standards for Registration. See the AQTF *Essential Conditions and Standards for Continuing Registration*, Standard 3;

Recording assessment outcomes

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF Essential Conditions and Standards for Continuing Registration, Standard 3; or AQTF Essential Conditions and Standards for Initial Registration, Standard 3 (for RTOs that are new to the training industry).

© Commonwealth of Australia, 2025 HumanAbility

Issuing AQF qualifications and Statement of Attainment

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current AQF Implementation Handbook and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s) and courses(s). See the 2007 edition of the AQF Implementation Handbook—available on the AQFAB website <www.aqf.edu.au>.

Licensing/registration requirements

The developers of this Training Package, and DEEWR, consider that no government licensing or registration requirements apply to RTOs, assessors or candidates with respect to this Training Package.

Reference should be made to User Guide for this Training Package for specific information on licensing and registration requirements in the sports, fitness and recreation industry.

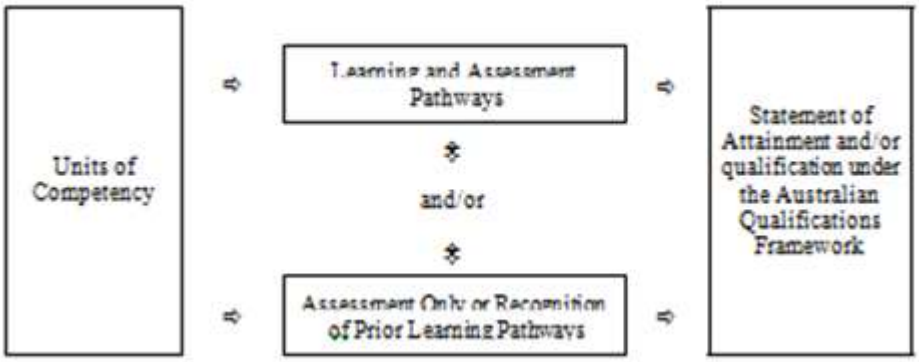
© Commonwealth of Australia, 2025 HumanAbility

Pathways

The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, an assessment-only or recognition pathway, or a combination of the two as illustrated in the following diagram



Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired.

Assessment, by any pathway, must comply with the assessment requirements set out in the *Standards for Registered Training Organisations*.

Learning and assessment pathways

Usually, learning and assessment are integrated, with assessment evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process.

© Commonwealth of Australia, 2025 HumanAbility

Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit New Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

Assessment-only or recognition of prior learning pathway

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were achieved.

In an assessment-only or Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor, such as in the compilation of portfolios; or directed by the assessor, such as through observation of workplace performance and skills application, and oral and/or written assessment. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met (Standard 1).

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, and work samples. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate‘s own work);
- valid (directly related to the current version of the relevant endorsed unit of competency);
- reliable (shows that the candidate consistently meets the endorsed unit of competency);
- current (reflects the candidate‘s current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

© Commonwealth of Australia, 2025 HumanAbility

The assessment only or recognition of prior learning pathway is likely to be most appropriate in the following scenarios:

- candidates enrolling in qualifications who want recognition for prior learning or current competencies;
- existing workers;
- individuals with overseas qualifications;
- recent migrants with established work histories;
- people returning to the workplace; and
- people with disabilities or injuries requiring a change in career

Combination of pathways

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

Assessor requirements

This section identifies the mandatory competencies for assessors, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

Assessor competencies

The AQTF specifies mandatory competency requirements for assessors. Information - (as found in Standard 1, Element 1.4 from the AQTF *Essential Conditions and Standards for Continuing Registration)* - is as follows:

"1.4 Training and assessment is delivered by trainers and assessors who:

a) have the necessary training and assessment competencies as determined by the National

Quality Council or its successors, and

© Commonwealth of Australia, 2025 HumanAbility

b) have the relevant vocational competencies at least to the level being delivered or assessed, and

c) can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and

d) continue to develop their VET knowledge and skills as well as their industry currency and trainer/assessor competence."

Sport, Fitness and Recreation industry advice for assessors

To satisfy the requirements of the AQTF, assessors must have the mandatory units of competency in assessment and the relevant vocational competencies they are assessing.

For the sport, fitness and recreation industry assessors, or at least one person in the assessment team, should satisfy the following vocational competency requirements:

Have relevant industry experience in the field in which they are assessing and must have experience in workplace application of the specific units of competency they are assessing. Relevant industry-based supervisory or management experience and a qualification in the field would be of benefit.

Have comprehensive current knowledge of the industry, current industry practices and the job role against which performance is being assessed. This current knowledge may be developed and demonstrated through:

- participation in relevant industry professional development activities
- conduct of relevant industry projects and research activities
- recent and relevant work experience in a commercial environment
- involvement in professional industry networks and memberships
- participation in assessment and/or training activities conducted in the workplace.

Currency of vocational competence is crucial to the success of assessment outcomes for the sport, fitness and recreation industry. It ensures that those involved in assessment processes have current industry knowledge, expertise in current operational practice and knowledge of what workplace equipment is currently used so that assessments reflect up to date workplace practice.

Alternative ways of meeting the requirement to use qualified assessors

OPTIONS	**Assessors, technical experts and workplace supervisors**
Single assessor	An **assessor** is required to:

© Commonwealth of Australia, 2025 HumanAbility

An individual **assessor** conducts the assessment	• hold formal recognition of competency in the relevant units in the TAE10 Training and Education Training Package • have relevant industry experience in the field in which they are assessing • have experience in workplace application of the specific units of competency they are assessing and, where possible, hold formal recognition • have comprehensive current knowledge of the industry, current industry practices and the job role against which performance is being assessed.
Partnership arrangement An **assessor** works with a **technical expert** to conduct the assessment	An **assessor** is required to: • hold formal recognition of competency in the relevant units in the TAE10 Training and Education Training Package • communicate and liaise with the technical expert throughout the assessment process. A **technical expert** shall be a person who has the relevant vocational competencies and is required to: • have relevant industry experience in the field in which they are assessing • have experience in workplace application of the specific units of competency they are assessing and, where possible, hold formal recognition • have comprehensive current knowledge of the industry, current industry practices and the job role against which performance is being assessed. • communicate and liaise with the assessor throughout the assessment process.
Assessment team/panel A team working together to conduct the assessment	Members of an **assessment team or panel** that combines expertise in assessment and vocational competence, work together to collect evidence and make judgements about competency. The members of the team must collectively meet the following requirements: • hold formal recognition of competency in the relevant units in the TAE10 Training and Education Training Package • have relevant industry experience in the field in which they are assessing • have experience in workplace application of the specific units of competency they are assessing and, where possible, hold formal recognition • have comprehensive current knowledge of the industry, current industry practices and the job role against which performance is being assessed • communicate and liaise with all members of the assessment team throughout the assessment process.

© Commonwealth of Australia, 2025 HumanAbility

Designing assessment tools

This section provides an overview on the use and development of assessment tools.

Use of assessment tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

Using prepared assessment tools

If using prepared assessment tools, assessors should ensure these are benchmarked, or mapped, against the current version of the relevant unit of competency. This can be done by checking that the materials are listed on the National Training Information Service (http://www.ntis.gov.a*u*). Materials on the list have been noted by the National Training Quality Council as meeting their quality criteria for Training Package support materials.

Developing assessment tools

When developing assessment tools, assessors must ensure that they:

- are benchmarked against the relevant unit or units of competency
- are reviewed as part of the continuous improvement of assessment strategies as required under Standard 1 of the AQTF
- meet the assessment requirements expressed in Standard 1 of the AQTF.

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package and the unit of competency TAEASS403A Participate in assessment validation. There is no set format or process for the design, production or development of assessment materials.

Conducting assessment

© Commonwealth of Australia, 2025 HumanAbility

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

Assessment Requirements

Assessments must meet the criteria set out in the AQTF Essential Conditions and Standards for Continuing Registration.

Information - (as found in the mandatory assessment requirements from Standard 1 from the AQTF Essential Conditions and Standards for Continuing Registration) - is as follows:

"1.5 *Assessment, including Recognition of Prior Learning (RPL):*

a) meets the requirements of the relevant Training Package or accredited course,

b) is conducted in accordance with the principles of assessment and the rules of evidence,

c) meets workplace and, where relevant, regulatory requirements, and

d) systematically validated."

Information - (as found in the mandatory assessment requirements from Standard 1 from the AQTF Essential Conditions and Standards for Initial Registration (for RTOs that are new to the training industry) - is as follows:

"1.5 *The organisation has a defined strategy and procedures in place to ensure that assessment, including RPL:*

a) will meet the requirements of the relevant Training Package or accredited course,

b) will be conducted in accordance with the principles of assessment and the rules of evidence,

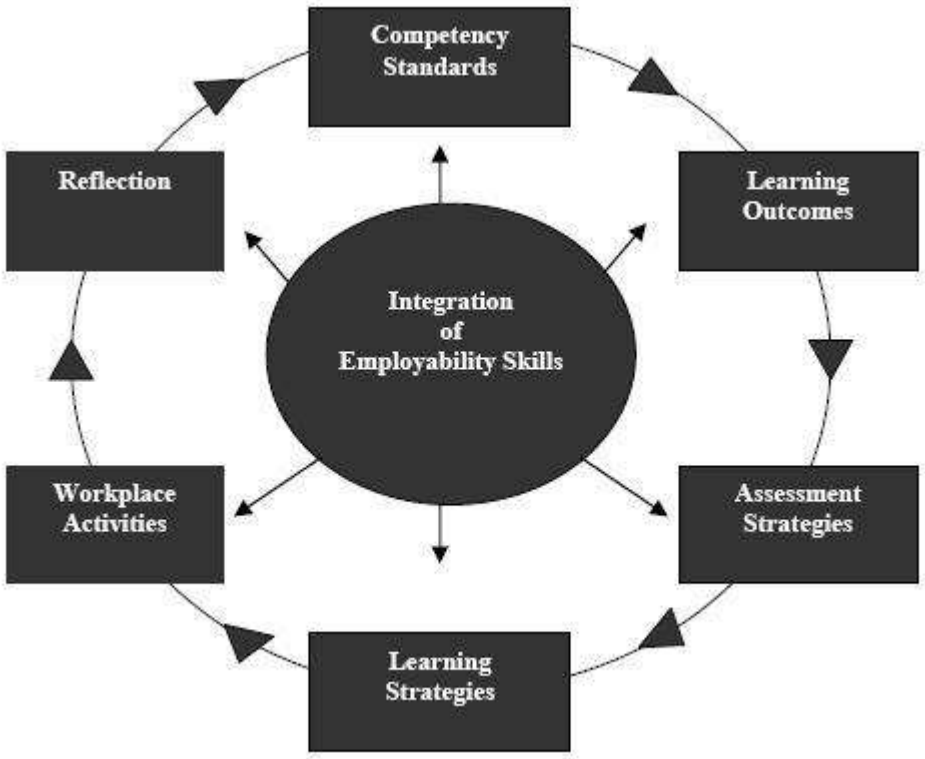
c) will meet workplace and, where relevant, regulatory requirements, and

d) is systematically validated."

© Commonwealth of Australia, 2025 HumanAbility

Assessment of Employability Skills

Employability Skills are integral to workplace competency. As such they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.



Employability Skills are embedded and explicit within each unit of competency. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.

© Commonwealth of Australia, 2025 HumanAbility

For more information on employability skills in SIS10 Sport, Fitness and Recreation Training Package, go to the Service Skills Australia website at www.serviceskills.com.au.

Access and equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package.

Reasonable adjustments can be made to ensure equity in assessment for people with disabilities. Adjustments include any changes to the assessment process or context that meet the individual needs of the person with a disability, but do not change competency outcomes. Such adjustments are considered _reasonable‘ if they do not impose an unjustifiable hardship on a training provider or employer. When assessing people with disabilities, assessors are encouraged to apply good practice assessment methods with sensitivity and flexibility.

Assessment in the Sport, Fitness and Recreation Industry

To ensure valid and reliable assessment for the SIS10 Sport, Fitness and Recreation Training Package units of competency a range of requirements must be met. The following table is a summary of these requirements. Further detail for individual units of competency is available within the evidence guide of each unit.

Summary of assessment requirements	
Context of and specific resources for assessment	Industry places premium value on graduates who are ready to work in their businesses because they have been exposed to industry evironments using workplace equipment and documents which are currently used within industry. The sport, fitness and recreation industry has determined specific assessment environments and the equipment, resources, workplace documentation (e.g.game rules, and recovery plans used to manage over training and injury) and client traffic required for these environments. These are detailed in the 'Context of and specific resources‘ section in each unit of competency. While assessment of the units of competency in SIS10 Sport, Fitness and Recreation Training Package can be undertaken in a simulated workplace environment, the industry strongly recommends that assessment is conducted in the workplace, wherever possible. In all cases, competency must be demonstrated in the appropriate assessment environment as specified in each unit of competency.

© Commonwealth of Australia, 2025 HumanAbility

Simulated assessment environments and activities	Industry highly values graduates who are ready to work in their businesses because they have been exposed to industry conditions. The sport, fitness and recreation industry places a premium on knowledge and skills that can be demonstrated on-the-job in the workplace. The industry strongly encourages practical assessment of skills and knowledge in the workplace and encourages on-the-job assessment, mentoring and coaching. However, assessment in the workplace is not always possible. It may also be the case that the assessment can, in fact, be conducted in the workplace environment but cannot happen on-the-job (as part of the normal operation of the business) so that a simulated activity is undertaken, e.g. coaching a simulated game of sport. Wherever a simulated assessment is conducted it is vital that the assessment environment is as industry realistic as possible. It is essential that assessment is conducted using suitable resources and equipment and under industry-relevant conditions as close to a real work situation as possible. This involves: • appropriate environments as specified in the ‗Context of and specific resources for assessment' section within each unit of competency • adequate numbers of up-to-date equipment and technology that is currently used within industry and would be generally available in a modern sport, fitness and recreation business • appropriate workplace documents which are currently used in industry and would generally be available in a modern sport, fitness and recreation business. This might include policies, procedures, game rules, session plans for coaching, organisational or industry wide codes of conduct. • sufficient numbers of clients, customer and players that accurately reflects the complexity of the role and allows candidates to deal with multiple sales, service, operational, coaching etc. tasks simultaneously • working with with multiple and varied team members, supervisors, managers, clients and customers, including difficult ones • speed, timing and productivity for tasks typical of a commercial operation dealing with multiple and varied problems and prioritisng competing tasks in given timeframes • interruptions to work typical of the workplace • integration of multiple competencies which a candidate would naturally complete simultaneously as part of their job function. In order to ensure that assessment conditions are consistent with those currently experienced in the work environment it is expected that RTOs will develop and maintain strong links with their local industry and relevant industry bodies or associations.

© Commonwealth of Australia, 2025 HumanAbility

Integrated assessment	Within each qualification there are units of competency which are interrelated and which a candidate would naturally complete simultaneously as part of their job function. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended. This integrated approach to assessment brings together a number of units of competency that reflect actual workplace practices, and the assessor should design integrated assessment activities to collect evidence for a number of units together. All units, in the Methods of Assessment section, recommend a range of related units which can be grouped together for integrated assessment. However, any units that relate to a job function can be combined into an integrated assessment. It is important that the assessor clearly identifies units of competency that can be combined to ensure an efficient and effective assessment process. Units of competency can be grouped in a number of combinations and how this is achieved will depend on the candidate‘s job function. Additionally, elements, performance criteria, employability skills and required knowledge should be drawn together in an integrated manner and appropriate assessment methodologies chosen. As a general principle the sport, fitness and recreation industry supports the integration of units of competency for both delivery and assessment as this reflects real work practices. It is important that this integration of units is based on and supports the needs of individual businesses and job functions, not necessarily on the preferences of RTOs.
Prerequisite requirements at unit of competency level	A unit of competence describes an individual skill but rarely do people perform one skill at a time. Rather, many skills are combined on a day to day basis in the workplace as part of work processes. This does not mean that each skill, described by a unit of comptence, is a prerequisite to another. They are conjunctive skills and this should be taken into account when sequencing training and assessment. Holistic assessment of conjunctive skills is recommended in the Methods of Assessment statements within each Evidence guide. A prerequisite requirement, at unit of competency level, means that it is necessary to develop a primary skill and the required knowledge before progressing to another. Prerequisites have been kept to a minimum in this package because: • the sport, fitness and recreation industry does not wish to create unnecessary barriers to the sequencing of training and assessment • there are only a few sport, fitness and recreation skills that must be achieved before higher order skills can be developed Individual prerequisite requirements, where they apply, are specified within the unit of competency and a summary of all prerequisite

© Commonwealth of Australia, 2025 HumanAbility

	requirements is included in the preliminary information section of this Training Package. The existence of a prerequisite does not necessarily mean that training or assessment has to be fully completed before starting on the secondary unit. An integrated approach can be helpful both when using formative assessment strategies and to the sequencing of training and assessment. However, to satisfy formal requirements the prerequisite unit must be signed off prior to the secondary unit.
Evidence required for demonstration of consistent performance	For valid and reliable assessment, evidence should be gathered through a range of methods, on multiple occasions, cover a diversity of products and circumstances and over a period of time to indicate consistent performance and ability to respond to different situations and product requirements. This is particularly relevant when using direct observation as a method. Workplace managers, supervisors, mentors or coaches can work in partnership with any off-site assessor to ensure that evidence of consistent demonstration of competency is collected.
Involvement of the candidate	The individual being assessed needs to be part of the planning, conduct and review of the assessment process and needs to be aware that the collection of evidence is ongoing.
Assessment methods	All units identify assessment methods appropriate to the individual unit of competency. This may include observation of workplace tasks, written or oral questioning to assess knowledge, review of completed workplace documents, projects and role-plays.
Assessing employability skills	Employability skills are integral to effective performance in the workplace. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in each unit should be assessed holistically with other relevant skills and knowledge that make up the unit. They should be assessed in the context of the particular skill set or qualification and in the context of the job role.
Assessing safety and risk management	When designing assessments, assessors need to carefully consider potential risks associated with the specified evidence guide requirements to use defined client groups, equipment and assessment environments. The industry does, however, expect that candidates who are certified as competent will be able to evaluate and manage the risks, dangers and potential hazards associated with their relevant qualification outcomes. In the outdoor recreation sector assessment of competency should confirm the candidate‘s ability to undertake and apply risk assessment procedures for the activity specific outcomes and take appropriate

© Commonwealth of Australia, 2025 HumanAbility

	measures to protect the safety of participants. This confirmation requires that candidates know and are able to apply techniques and procedures to deal appropriately with changes in conditions or equipment failure, which have the potential to impact on the safety of participants. As changes in conditions cannot be reliably predicted, assessment strategies should include the opportunity to demonstrate competency in the specified environment using scenarios that incorporate the relevant contingency, such as changes in weather conditions or equipment malfunction. In the community recreation sector assessment of competency should confirm the candidate's ability to maintain the safety of clients or participants across a range of environments which often involve the application of approaches that focus on community inclusion. Within community recreation there are specific requirements that assessment should confirm, such as ensuring that those who are competent in water rescues have been assessed performing rescues in the water. In the sport sector assessment of competency should confirm the candidate's ability to make assessments on the physical and psychological condition and responses of participants and make group and individual adjustments to programs and instructional techniques. In coaching qualifications, for example this confirmation requires that candidates know and are able to apply motivational techniques to respond appropriately to a range of player behaviours and while it cannot always be guaranteed that this range of behaviours will be present during all assessments, opportunities for the candidate to demonstrate competency should be provided through the use of scenarios.

Assessment of imported units of competence

SIS10 Sport, Fitness and Recreation Training Package includes a number of units of competency imported from other endorsed Training Packages. These units must be assessed according to the relevant requirements of the parent training package.

For guidance on assessment of imported units of competency, check the Assessment Guidelines of the originating Training Package by referring to a hard copy, or accessing the National Training Information Service (NTIS) at www.ntis.gov.a*u*.

Competency Standards

What is competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency, Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

Contextualisation of units of competency by RTOs

© Commonwealth of Australia, 2025 HumanAbility

Registered training organisations (RTOs) may contextualise units of competency to reflect local outcomes required. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this endorsed Training Package must be within the bounds of the following advice. In contextualising units of competency, RTOs:

- must not remove or add to the number and content of elements and performance criteria
- may add specific industry terminology to performance criteria where this does not distort or narrow the competency outcomes
- may make amendments and additions to the range statement as long as such changes do not diminish the breadth of application of the competency and reduce its portability
- may add detail to the evidence guide in areas such as the critical aspects of evidence or resources and infrastructure required where these expand the breadth of the competency but do not limit its use.

© Commonwealth of Australia, 2025 HumanAbility

Components of units of competency

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

Unit title

The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

Unit descriptor

The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided.

There may also be a brief second paragraph that describes its relationship with other units of competency and any licensing requirements.

Employability skills statement

A standard employability skills statement appears in each unit of competency. This statement directs trainers and assessors to consider the information contained in the Employability Skills Summary in which the unit of competency is packaged.

Prerequisite units (optional)

If there are any units of competency that must be completed before the unit, these will be listed.

Application of the unit

This subsection fleshes out the unit of competency‘s scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

Competency field (optional)

© Commonwealth of Australia, 2025 HumanAbility

The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

Sector (optional)

The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

Elements of competency

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

Performance criteria

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

Required skills and knowledge

The essential skills and knowledge are either identified separately or combined. *Knowledge* identifies what a person needs to know to perform the work in an informed and effective manner. *Skills* describe the application of knowledge to situations where understanding is converted into a workplace outcome.

Range statement

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

© Commonwealth of Australia, 2025 HumanAbility

Evidence guide

The evidence guide is critical in assessment as it provides information to the RTO and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context.

The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment
- relationships with the assessment of any other units of competency
- suitable methodologies for conducting assessment including the potential for workplace simulation
- resource implications, for example access to particular equipment, infrastructure or situations
- how consistency in performance can be assessed over time, various contexts and with a range of evidence
- the required underpinning knowledge and skills.

© Commonwealth of Australia, 2025 HumanAbility

Employability skills in units of competency

The detail and application of employability skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of employability skills which are incorporated into the relevant units of competency and qualifications.

Employability skills are not a discrete requirement contained in units of competency (as was the case with key competencies). Employability skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine employability skills requirements.

How employability skills relate to the key competencies

The eight nationally agreed employability skills now replace the seven key competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of employability skills may find the following comparison useful.

Employability skills	**Mayer key competencies**
Communication	Communicating ideas and information
Teamwork	Working with others and in teams
Problem solving	Solving problems Using mathematical ideas and techniques
Initiative and enterprise	
Planning and organising	Collecting, analysing and organising

© Commonwealth of Australia, 2025 HumanAbility

	information Planning and organising activities
Self-management	
Learning	
Technology	Using technology

When analysing the above table it is important to consider the relationship and natural overlap of employability skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

Explicitly embedding employability skills in units of competency

This Training Package seeks to ensure that industry-endorsed employability skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability skills must be both explicit and embedded within units of competency. This means that employability skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to employability skills.

This Training Package also seeks to ensure that employability skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

© Commonwealth of Australia, 2025 HumanAbility

The following table contains examples of embedded employability skills for each component of a unit of competency. Please note that in the examples below the bracketed skills are provided only for clarification and will not be present in units of competency within this Training Package.

Unit component	**Example of embedded employability skill**
Unit title	Give formal presentations and take part in meetings. (communication)
Unit descriptor	This unit covers the skills and knowledge required to promote the use and implementation of innovative work practices to effect change. (initiative and enterprise)
Element	Proactively resolve issues (problem solving)
Performance criteria	Information is organised in a format suitable for analysis and dissemination in accordance with organisational requirements. (planning and organising)
Range statement	Software applications may include email, internet, word processing, spreadsheet, database or accounting packages. (technology)
Required skills and knowledge	Modify activities depending on differing workplace contexts, risk situations and environments. (learning) Work collaboratively with others during a fire emergency. (teamwork) Instructions, procedures and other information relevant the maintenance of vessel and port security. (communication)
Evidence guide	Evidence of having worked constructively with a wide range of community groups and stakeholders to solve problems and adapt or design new solutions to meet identified needs in crime prevention. In particular, evidence must be obtained on the ability to: • assess response options to identified crime-prevention needs and determine the optimal action to be implemented • in consultation with relevant others, design an initiative to address

© Commonwealth of Australia, 2025 HumanAbility

	identified issues. (initiative and enterprise).

SIS10110 Certificate I in Sport and Recreation

Modification History

Not Applicable

Description

This qualification provides the skills and knowledge for an individual wishing to enter the sport and recreation industry in a generalist capacity. Likely functions for someone with this will qualification can include working in grounds and maintenance, a retail outlet, café or office located in fitness centres, outdoor sporting grounds or complexes or aquatic centres. All job roles are performed under instruction and supervision.

Job roles

The following are indicative job roles for this qualification:

- general assistant
- administration assistant
- grounds assistant
- retail assistant

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway and for VET in Schools delivery.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY
The following table contains a summary of the employability skills required by the sport and recreation industry for this qualification. The employability skills facets described here are broad

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
The following table contains a summary of the employability skills required by the sport and recreation industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with clients and colleagues to determine and interpret their specific requirements; understanding verbal and written information on sport and recreation products and services; completing maintenance documentation; preparing accurate records of client details; recording telephone messages, interpreting and carrying out verbal instructions from other employees.
Teamwork	Working as a skilled team member, receiving instructions and understanding own role in assisting in the provision of sport and recreation programs; supporting other team members to provide quality sport and recreation experiences for clients; recognising and adapting appropriately to cultural and language differences.
Problem-solving	Identifying hazards and risks in the work environment; responding to emergency situations within scope of responsibility; clarifying the extent of, and resolving problems through negotiating with clients in a sensitive and culturally appropriate manner; dealing with equipment breakdowns; recognising and reporting basic routine problems within work activities; adhering to organisation policies and procedures to guide solutions to problems.
Initiative and enterprise	Adjusting work procedures to differences in equipment and facilities; taking correct action and following established procedures on discovery of an actual or potential emergency, security or safety hazard; reflecting on own performance for improvement.
Planning and organising	Collecting and recording information to assist colleagues to provide sport and recreation programs; setting work priorities and scheduling own daily work activities to meet deadlines; following organisation policies and procedures to complete facility, equipment or ground maintenance tasks in an efficient manner.
Self-management	Understanding and complying with the legal and ethical responsibilities that apply to own role in the sport and recreation industry; applying basic safety practices and procedures; acknowledging the boundaries of own role; seeking and acting on feedback from colleagues and clients to improve own work performance.

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Learning	Knowing the networks and sources of information within the sport and recreation industry; keeping well informed of updates and changes to organisational policies, procedures and regulations; updating skills and knowledge to accommodate changes in equipment and operating procedures; accessing professional development opportunities to strengthen own skill base and sharing information with colleagues.
Technology	Understanding the operating capability of computer systems and software that assist in selling, planning and delivering sport and recreation programs; safely using and maintaining sport and recreation equipment according to manufacturer's specifications and organisation policies and procedures.

Packaging Rules

11 units must be completed:

- 5 core units
- 6 elective units, which may be selected from the elective units listed or from SIS10, and must be first packaged at AQF level 2 or 3; up to 2 of these elective units may be selected from any current accredited course or other Training Package, and must be first packaged at AQF level 2.

In all cases selection of electives must relate to the core function or role of the candidate's current or intended work environment, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**5**)	
BSBWOR202A	Organise and complete daily work activities
HLTFA301B	Apply first aid
SISXEMR201A	Respond to emergency situations
SISXIND101A	Work effectively in sport and recreation environments
SISXOHS101A	Follow occupational health and safety policies
Electives (**6**)	
BSBIND201A	Work effectively in a business environment

© Commonwealth of Australia, 2025 HumanAbility

BSBINM201A	Process and maintain workplace information
BSBINM202A	Handle mail
BSBWOR204A	Use business technology
CUEFOH04C	Usher patrons
CUEFOH10B	Monitor entry to a venue
FNSICGEN305B	Maintain daily financial/business records
ICAU2006B	Operate computing packages
ICAU1129B	Operate a word processing application
ICAU1130B	Operate a spreadsheet application
ICAU1131B	Operate a database application
ICAU1132B	Operate a presentation package
ICPMM263C	Access and use the Internet
RTC2012A	Plant trees and shrubs
RTC2401A	Treat weeds
RTC2404A	Treat plant pests, diseases and disorders
RTC2706A	Apply chemicals under supervision
RTE2308A	Operate ride-on vehicles
RTF2015A	Prepare turf surfaces for play
RTF2019A	Renovate grassed areas
RTF2020A	Assist with turf construction
RTF2023A	Support turf establishment
SIRXCCS001A	Apply point-of-sale handling procedures
SIRXCLM001A	Organise and maintain work areas
SIRXFIN001A	Balance point-of-sale terminal
SIRXINV001A	Perform stock control procedures

© Commonwealth of Australia, 2025 HumanAbility

SIRXMER001A	Merchandise products
SIRXRSK001A	Minimise theft
SIRXSLS001A	Sell products and services
SIRXSLS002A	Advise on products and services
SISOODR201A	Assist in conducting outdoor recreation sessions
SISOOPS201A	Minimise environmental impact
SISXCAI101A	Provide equipment for activities
SISXCAI102A	Assist in preparing and conducting sport and recreation sessions
SISXFAC201A	Maintain sport and recreation equipment for activities
SISXFAC202A	Maintain sport and recreation facilities
SISXIND202A	Process entry transactions
SITHFAB001A	Clean and tidy bar areas
SITHFAB003A	Serve food and beverage to customers
SITHFAB005A	Provide table service of alcoholic beverages
SITHFAB009A	Provide responsible service of alcohol
SITHGAM001A	Attend gaming machines
SITXMPR001A	Coordinate production of brochures and marketing materials
SITXOHS002A	Follow workplace hygiene procedures

SIS20410 Certificate II in Sport Career Oriented Participation

Modification History

The following additions have been made to General Electives:

- SISSRGU202A Perform foundation level Rugby Union tactics and strategies

Description

This qualification provides the skills and knowledge for an individual to pursue a career as an athlete at a regional and state or territory level.

Those undertaking this qualification should hold a scholarship with an Institute of Sport, be a member of a state, territory or national team, squad or development program, a national or state or territory talent development program or a member of a second tier national competition.

Job roles

The following are indicative job roles for this qualification:

- professional athlete

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway and for VET in Schools delivery.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

SIS30210 Certificate III in Community Activity Programs

Modification History

Not Applicable

Description

This qualification provides the skills and knowledge for an individual to be competent in a range of activities and functions requiring autonomous work within a defined range of situations and activities. Qualification outcomes will depend on the specialisation chosen and include conducting both general and specific community based recreation programs such as recreational dance, self defence and programs for children and clients with a disability. Work would be undertaken in locations such as community recreation centres and indoor or outdoor recreation facilities with a focus on community development.

Job roles

The following are indicative job roles for this qualification:

- community dance instructor
- program instructor
- recreation officer
- self-defence instructor

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY
The following table contains a summary of the employability skills required by the sport and recreation industry for this qualification. The employability skills facets described here are broad

SIS30310 Certificate III in Fitness

Modification History

SISCAQU202A Perform basic water rescues, added to the Aqua General Electives

Description

This qualification provides the skills and knowledge for an individual to be competent in a range of activities and functions requiring autonomous work within a defined range of exercise instruction situations and activities. Qualification outcomes will depend on the elective grouping chosen and may include providing exercise instruction for group, aqua or gym programs.

Work may be undertaken in locations such as gyms, fitness facilities, pools, community facilities and in outdoor environments.

Job roles

- exercise instructor - gym
- exercise instructor - group exercise
- exercise instructor - aqua

Pathways Information

Not Applicable

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY
The following table contains a summary of the employability skills required by the fitness industry for this qualification. The employability skills facets described here are broad industry

	service knowledge and skills; sharing information with colleagues.
Technology	Understanding the operating capability of computer systems and software that assist in selling, planning and delivering exercise products and services; safely using and maintaining fitness equipment according to manufacturer's specifications and organisation policies and procedures.

Packaging Rules

15 units must be completed:

- 10 core units
- 5 elective units, consisting of :
  - all the units in any one of Groups A to C
  - the remaining units to make up the required 5 elective units from General Electives; up to 2 of these remaining units may be selected elsewhere in SIS10 or any current accredited course or other Training Package, and must be first packaged at AQF level 3 or 4.

In all cases, selection of electives must be guided by the job outcome sought, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**10**)	
SISFFIT301A	Provide fitness orientation and health screening
SISFFIT302A	Provide quality service in the fitness industry
SISFFIT303A	Develop and apply an awareness of specific populations to exercise delivery
SISFFIT305A	Apply anatomy and physiology principles in a fitness context
SISFFIT306A	Provide healthy eating information to clients in accordance with recommended guidelines
SISXFAC201A	Maintain sport and recreation equipment for activities
SISXIND101A	Work effectively in sport and recreation environments
SISXOHS101A	Follow occupational health and safety policies
SISXRSK301A	Undertake risk analysis of activities

SIS30410 Certificate III in Outdoor Recreation

Modification History

The following pre requisite units have been inserted into Groups:

- Group G – Caving – Guide
  - SISOCVE201A Demonstrate caving skills
- Group L – Cycle touring – Guide – On Road
  - SISOCYT202A Demonstrate basic cycling skills
  - Imported unit corrected to TLIH207D Plan and navigate routes
- Group N – Fishing Equipment
  - SISOFSH201A Catch and handle fish
  - SISOFSH204A Select, use and maintain fishing tackle outfits
- Group U – Horse Riding – Guide Day Rides
  - SISOEQO202A Demonstrate basic horse riding skills
- Group X – Mountain biking – Guide
  - SISOCYT202A Demonstrate basic cycling skills
  - SISOMBK201A Demonstrate basic off-road cycling skills
- Group AH – Surfing – Guide – Basic
  - SISOSRF202A Demonstrate basic surfing manoeuvres in controlled conditions
- Group AI – Trail bike riding – Advanced
  - SISOTBR201A Select, set up and maintain an off-highway motorcycle

The following additions have been made to the General Electives:

- SISOKYS302A Demonstrate sea kayaking skills
- SISOKYS304A Demonstrate sea kayaking skills in moderate to difficult conditions
- SITTGDE002A Provide arrival and departure assistance
- SITXOHS002A Follow workplace hygiene procedures

Description

This qualification provides the skills and knowledge for an individual to be competent in guiding outdoor recreation activities in a controlled environment. It requires technical knowledge of the outdoor recreation activity to be transferred to allow individuals to safely participate in the outdoor activity. It does not provide the skills and knowledge to impart the required level of technical knowledge and expertise to allow participants to independently undertake outdoor recreation activities.

© Commonwealth of Australia, 2025 HumanAbility

A guide operating in a controlled environment has the skills, knowledge and experience to work autonomously within a closely defined range of skilled operations involving known routines, methods and procedures, where a small amount of discretion and judgement is required in the selection of equipment, services or contingency measures. This person may work independently only within clearly defined contexts where there are clearly defined Standard Operating Procedures (SOPs) and relevant documented guidelines, key safety features and risk management procedures for the specific activity location, they are familiar with those SOPs, and where assistance is available should a non-routine situation arise.

Work can be undertaken either autonomously or as part of a team under supervision. This supervision can be on or off site and would provide support to deal appropriately with unplanned or unexpected events. Work would be undertaken in field locations with clearly defined site specific situations such as camps, recreation centres or facilities or fields on various public lands. Work may be undertaken in differing environments such as water-based, dry land and mountainous terrains, using a diverse range of equipment.

Job roles

The following is indicative job role for this qualification:

- outdoor guide (controlled environment)

Pathways Information

This qualification is suitable for an Australian Apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

Entry to this qualification by persons without prior outdoor recreation industry experience or formal qualifications is not recommended.

Examples of sufficient relevant skills and knowledge for entry into the qualification may include:

- Previous qualification at the AQF level below
- Previous experience in the outdoor recreation industry and interest in outdoor pursuits
- Entry into this qualification and progression between qualification levels will be based on the professional judgement of the RTO, in consultation with the individual.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
The following table contains a summary of the employability skills required by the outdoor recreation industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with clients and colleagues to determine and interpret their specific requirements; understanding verbal and written information on guiding outdoor recreation activities; providing clear verbal instructions to clients when guiding; effectively using body language and demonstration to reinforce technique instruction; empathising and negotiating acceptable solutions to client requests and complaints to ensure a positive recreation experience.
Teamwork	Working as a skilled team member, facilitating a group to meet client expectations and dealing appropriately with conflict; receiving instructions and understanding own role in guiding outdoor recreation activities; supporting other staff to provide quality outdoor recreation experiences for clients.
Problem-solving	Identifying hazards and risks that may arise during outdoor recreation activities; mitigating problems by making variations to the activity that are within scope of responsibility; interpreting weather in the field; clarifying the extent of, and resolving problems through negotiating with clients in a sensitive and culturally appropriate manner; taking responsibility for seeking assistance from colleagues to resolve issues and to manage contingencies;.
Initiative and enterprise	Adjusting work procedures to differences in equipment and facilities and changes in work environment (e.g. tides, weather and water conditions); taking correct action and following established procedures on discovery of an actual or potential emergency or safety hazard; accommodating client differences when guiding outdoor recreation activities.
Planning and organising	Collecting, analysing and recording information to allow for the efficient planning of outdoor recreation activities; setting work priorities and scheduling programs to avoid conflicts and avoid duplication of resources; following organisation policies and procedures to plan and deliver outdoor recreation activity programs in an efficient manner and minimise environmental impact.
Self-management	Understanding the boundaries of own role and correctly determining when assistance from colleagues is required; time

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	management to complete tasks in accordance with agreed deadlines; seeking and acting on feedback from supervisors, colleagues and clients to improve own work performance.
Learning	Knowing the structure of networks and sources of information within the outdoor recreation industry; keeping well informed of updates and changes to organisational policies, procedures and regulations; seeking information on new and innovative outdoor recreation activity programs; accessing professional development opportunities to strengthen own skill base and contributing to a learning environment through openly sharing knowledge and experiences.
Technology	Understanding the operating capability of computer systems, software and equipment that assists in the planning and delivery of outdoor recreation activities; safely using and maintaining outdoor recreation equipment according to manufacturer's specifications and organisation policies and procedures.

Packaging Rules

24 units must be completed:

- 12 core units
- 12 elective units, consisting of:
  - all the units in any two of Groups A to AJ, or
  - all the units in any one of Groups A to AJ, and all the units in any one of Groups AK to AT
  - the remaining to make up the required 12 elective units from General electives, or any of the above groups; up to 4 of these remaining units may be selected elsewhere in SIS10, or any current accredited course or other Training Package, and must be first packaged at AQF level 2, 3 or 4.

In all cases, selection of electives must be guided by the job outcome sought, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**12**)	
BSBWOR301A	Organise personal work priorities and development
HLTFA301B	Apply first aid
SISOODR302A	Plan outdoor recreation activities

© Commonwealth of Australia, 2025 HumanAbility

SISOODR303A	Guide outdoor recreation sessions
SISOOPS201A	Minimise environmental impact
SISOOPS306A	Interpret weather conditions in the field
SISXCAI306A	Facilitate groups
SISXCCS201A	Provide customer service
SISXEMR201A	Respond to emergency situations
SISXOHS101A	Follow occupational health and safety policies
SISXRSK301A	Undertake risk analysis of activities
TAEDEL301A	Provide work skill instruction
Electives (12)	
Group A - Abseiling - Guide - Single Pitch - Artificial Surfaces	
SISOABA302A	Apply single pitch abseiling skills on artificial surfaces
SISOABA303A	Establish ropes for abseiling on artificial surfaces
SISOABA304A	Guide abseiling on single pitch artificial surfaces
SISOABN202A	Safeguard an abseiler using a single rope belay system
SISOVTR301A	Perform vertical rescues
Group B - Abseiling - Guide - Single Pitch - Natural Surfaces	
SISOABN202A	Safeguard an abseiler using a single rope belay system
SISOABN303A	Apply single pitch abseiling skills on natural surfaces
SISOABN304A	Establish ropes for single pitch abseiling on natural surfaces
SISOABN305A	Guide abseiling on single pitch natural surfaces
SISOVTR301A	Perform vertical rescues
Group C - Bushwalking - Guide - Controlled Environment	
SISOBWG201A	Demonstrate bushwalking skills in a controlled environment
SISOBWG303A	Guide bushwalks in a controlled environment

© Commonwealth of Australia, 2025 HumanAbility

SISONAV201A	Demonstrate navigation skills in a controlled environment
Group D - Canoeing - Guide - Flat Water	
SISOCNE303A	Apply canoeing skills
SISOCNE202A	Perform deep water rescues
SISOCNE305A	Guide canoeing trips on flat and undemanding water
SISONAV201A	Demonstrate navigation skills in a controlled environment
Group E - Canoeing - Guide - White Water Grade 2	
SISOCNE304A	Apply inland canoeing skills on Grade 2 water
SISOCNE307A	Guide canoeing trips on Grade 2 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group F - Canyoning - Guide - Single Pitch	
SISCAQU202A	Perform basic water rescues
SISOCAY302A	Apply vertical canyoning skills
SISOCAY303A	Establish belays in canyons
SISOCAY304A	Guide single pitch canyoning trips
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR301A	Perform vertical rescues
Group G - Caving - Guide	
SISOCVE201A	Demonstrate caving skills
SISOCVE302A	Apply single pitch abseiling skills in caves
SISOCVE303A	Rig a ladder pitch
SISOCVE304A	Apply laddering skills
SISOCVE305A	Apply caving specific single rope techniques

© Commonwealth of Australia, 2025 HumanAbility

SISOCVE306A	Rig ropes and establish belays in caves
SISOCVE307A	Guide vertical single pitch caving trips
SISOCVE308A	Guide horizontal caving trips
SISOVTR301A	Perform vertical rescues
Group H - Challenge Ropes Course - Conduct High Ropes	
SISOABL301A	Assist in the facilitation of adventure-based learning activities
SISOCRP302A	Conduct a high ropes session
Group I - Challenge Ropes Course - Conduct Low Ropes	
SISOABL301A	Assist in the facilitation of adventure-based learning activities
SISOCRP301A	Conduct a low ropes session
Group J - Climbing - Guide - Artificial Surfaces - Top Rope	
SISOCLA302A	Apply top rope climbing skills on artificial surfaces
SISOCLA303A	Establish belays for climbing on artificial surfaces
SISOCLA304A	Guide top rope climbing activities on artificial surfaces
SISOVTR301A	Perform vertical rescues
Group K - Climbing - Guide - Natural Surfaces - Top Rope	
SISOCLN302A	Apply climbing skills on natural surfaces
SISOCLN303A	Establish belays for climbing on natural surfaces
SISOCLN304A	Guide top rope climbing activities on natural surfaces
SISOVTR301A	Perform vertical rescues
Group L - Cycle Touring - Guide - On-road	
SISOCYT201A	Select, set up and maintain a bike
SISOCYT202A	Demonstrate basic cycling skills
SISOCYT303A	Apply on-road cycling skills

© Commonwealth of Australia, 2025 HumanAbility

SISOCYT304A	Guide on-road cycle tours
TLIH207D	Plan and navigate routes
Group M - Fishing - Guide	
SISOFSH201A	Catch and handle fish
SISOFSH202A	Select, catch and use bait
SISOFSH203A	Select, rig and use terminal tackle
SISOFSH204A	Select, use and maintain fishing tackle outfits
SISOFSH205A	Construct and work simple fishing lures
SISOFSH206A	Locate and attract fish
SISOFSH307A	Guide fishing trips
SISOFSH308A	Instruct fishing skills
Group N - Fishing Equipment	
SISOFSH201A	Catch and handle fish
SISOFSH204A	Select, use and maintain fishing tackle outfits
SISOFSH205A	Construct and work simple fishing lures
SISOFSH310A	Tie simple fishing flies
SISOFSH314A	Construct and repair fishing rods
Group O - Fishing Guide - Beach	
SISOFSH201A	Catch and handle fish
SISOFSH313A	Catch crabs, prawns and squid
SISOFSH315A	Demonstrate beach fishing skills
SISOOPS203A	Interpret weather for marine environments
Group P - Fishing Guide - Estuary	
SISOFSH201A	Catch and handle fish
SISOFSH312A	Demonstrate estuary fishing skills

© Commonwealth of Australia, 2025 HumanAbility

SISOOPS303A	Interpret weather for marine environments
Group Q - Fishing Guide - Fly	
SISOFSH201A	Catch and handle fish
SISOFSH309A	Apply fly fishing skills
SISOFSH310A	Tie simple fishing flies
Group R - Fishing Guide - Freshwater	
SISOFSH201A	Catch and handle fish
SISOFSH311A	Demonstrate freshwater fishing skills
Group S - Four Wheel Driving - Guide	
SISODRV302A	Drive and recover a 4WD vehicle
SISODRV303A	Guide 4WD tours
TLIB307C	Carry out vehicle servicing and maintenance
TLIB407C	Carry out vehicle inspection
TLIH207D	Plan and navigate routes
Group T - Horse Riding - Arena	
RTE3131A	Transport livestock
RTE3402A	Implement animal health control programs
RTE3712A	Administer medication to animals
SISOEQO303A	Conduct horse riding sessions in an arena
SISOEQO304A	Apply first aid for horses
SISSEQS303A	Teach the fundamental skills of riding
Group U - Horse Riding - Guide Day Rides	
RTE3131A	Transport livestock
RTE3402A	Implement animal health control programs
RTE3712A	Administer medication to animals

© Commonwealth of Australia, 2025 HumanAbility

SISOEQO202A	Demonstrate basic horse riding skills
SISOEQO304A	Apply first aid for horses
SISOEQO305A	Ride horses in tracked areas
SISOEQO306A	Guide day horse trail rides in tracked areas
Group V - Kayaking - Guide - Flat Water	
SISOCNE202A	Perform deep water rescues
SISOKYK302A	Apply kayaking skills
SISOKYK304A	Guide kayaking trips on flat and undemanding water
SISONAV201A	Demonstrate navigation skills in a controlled environment
Group W - Kayaking - Guide - White Water Grade 2	
SISOKYK303A	Apply inland kayaking skills on Grade 2 water
SISOKYK305A	Guide kayaking trips on Grade 2 water
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group X - Mountain Biking - Guide	
SISOCYT202A	Demonstrate basic cycling skills
SISOMBK201A	Demonstrate basic off-road cycling skills
SISOMBK302A	Apply advanced off-road cycling skills
SISOMBK303A	Guide off-road cycle tours
SISONAV302A	Apply navigation skills in an intermediate environment
Group Y -Personal Water Craft - Guide	
SISOPWC303A	Ride personal water craft in moderate to difficult conditions
SISOPWC304A	Guide tours using personal water craft
Group Z - Rafting Guide - Moving Water	
SISONAV201A	Demonstrate navigation skills in a controlled environment

© Commonwealth of Australia, 2025 HumanAbility

SISORAF301A	Guide a raft on moving water
SISOWWR201A	Demonstrate self rescue skills in white water
Group AA - SCUBA - Advanced	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB302A	Complete night dives
SISOSCB303A	Complete deep dives to between 18 and 40 metres
SISOSCB304A	Navigate prescribed routes underwater
Group AB - SCUBA - Dive Guide	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB306A	Perform diver rescues
SISOSCB308A	Guide a SCUBA dive
SISOSNK201A	Demonstrate snorkelling activities
SISOSNK302A	Guide snorkelling
SISCAQU202A	Perform basic water rescues
Group AC - SCUBA - Master Diver	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB302A	Complete night dives
SISOSCB303A	Complete deep dives to between 18 and 40 metres
SISOSCB304A	Navigate prescribed routes underwater
SISOSCB305A	Complete underwater search and recovery dives
SISOSCB306A	Perform diver rescues
Group AD - SCUBA - Open Water	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres

© Commonwealth of Australia, 2025 HumanAbility

SISOSCB306A	Perform diver rescues
SISOSCB313A	Complete computer aided dives
Group AE - Skiing - Ski Touring - Guide - Day	
SISONAV302A	Apply navigation skills in an intermediate environment
SISOSKT303A	Day ski tour away from a patrolled area
SISOSKT304A	Guide day ski tours
SISOSKT305A	Apply snow craft skills for day touring
Group AF - Snorkelling - Guide	
SISCAQU202A	Perform basic water rescues
SISOSNK201A	Demonstrate snorkelling activities
SISOSNK302A	Guide snorkelling
Group AG - Snowboarding - Guide - Day	
SISONAV302A	Apply navigation skills in an intermediate environment

SISOSKB303A	Guide day snowboarding activities
SISOSKT305A	Apply snow craft skills for day touring
Group AH - Surfing - Guide - Basic	
SISOSRF202A	Demonstrate basic surfing manoeuvres in controlled conditions
SISOSRF303A	Perform intermediate level surfing manoeuvres
SISOSRF304A	Perform simple rescues in moderate surf conditions
SISOSRF305A	Guide surfing sessions
Group AI - Trail Bike Riding - Advanced	
SISONAV302A	Apply navigation skills in an intermediate environment
SISOTBR201A	Select, set up and maintain an off-highway motorcycle

© Commonwealth of Australia, 2025 HumanAbility

SISOTBR303A	Apply advanced off-highway motorcycling skills
SISOTBR304A	Guide off-highway motorcycle tours
Group AJ - Yachting - Windsurfing	
SISOYSA302A	Apply enhanced windsurfing skills in moderate conditions
SISOYSA303A	Use a sailboard in stronger winds
Group AK - Boating	
MEM50008B	Carry out trip preparation and planning
MEM50009B	Safely operate a mechanically powered recreational boat
MEM50010B	Respond to boating emergencies and incidents
SFISHIP209B	Operate marine communications equipment
SISOOPS303A	Interpret weather for marine environments
Group AL - Community Development	
SISCCRD301A	Facilitate community development through recreational activities
SISCCRD302A	Recruit and manage volunteers
Group AM - Disability	
CHCDIS301A	Work effectively with people with a disability
CHCDIS400C	Provide care and support
SISCCRO303A	Plan and conduct recreation programs for older persons
Group AN - Interpretation - Cultural	
SITTGDE003A	Coordinate and operate a tour
SITTGDE006A	Prepare and present tour commentaries or activities
SITTGDE008A	Research and share general information on Australian Indigenous cultures
SITTGDE009A	Interpret aspects of local Australian Indigenous culture
Group AO - Interpretation - Cultural and Heritage Environments	

© Commonwealth of Australia, 2025 HumanAbility

SISOINT302A	Develop specialist resources for interpretive activities
SITTGDE003A	Coordinate and operate a tour
SITTGDE006A	Prepare and present tour commentaries or activities
SITTGDE012A	Prepare specialised interpretive content on cultural and heritage environments
Group AP - Interpretation - Flora, Fauna and Landscape	
SISOINT302A	Develop specialist resources for interpretive activities
SITTGDE003A	Coordinate and operate a tour
SITTGDE006A	Prepare and present tour commentaries or activities
SITTGDE010A	Prepare specialised interpretive content on flora, fauna and landscape
Group AQ - Interpretation - Marine Environments	
SISOINT302A	Develop specialist resources for interpretive activities
SITTGDE003A	Coordinate and operate a tour
SITTGDE006A	Prepare and present tour commentaries or activities
SITTGDE011A	Prepare specialised interpretive content on marine environments
Group AR - Natural Resource Planning	
RTC3218A	Undertake a site assessment
RTD3505A	Maintain natural areas
Group AS - Tour Guiding	
SITTGDE001A	Work as a guide
SITTGDE004A	Lead tour groups
SITTGDE006A	Prepare and present tour commentaries or activities
SITTGDE007A	Develop and maintain the general and regional knowledge required by guides
Group AT - Youth - Orientation	

© Commonwealth of Australia, 2025 HumanAbility

CHCYTH301D	Work effectively with young people
CHCYTH402A	Work effectively with young people in the youth work context
General electives	
SISOARC301A	Conduct an archery session
SISOBWG302A	Apply intermediate bushwalking skills
SISOCAY201A	Demonstrate horizontal canyoning skills
SISOCLA305A	Apply route setting skills
SISOCNE306A	Instruct canoeing skills on flat and undemanding water
SISOCYT202A	Demonstrate basic cycling skills
SISOINT201A	Conduct interpretation within an outdoor activity
SISOINT302A	Develop specialist resources for interpretive activities
SISOKYS302A	Demonstrate sea kayaking skills
SISOKYS303A	Guide sea kayaking trips in easy to moderate conditions
SISOKYS304A	Demonstrate sea kayaking skills in moderate to difficult conditions
SISOOPS202A	Use and maintain a temporary or overnight site
SISOOPS304A	Plan for minimal environmental impact
SISOOPS305A	Provide first aid in a remote location
SISOPWC202A	Demonstrate simple personal water craft skills in controlled conditions
SISOSCB307A	Inspect and fill SCUBA cylinders
SISOSCB309A	Complete dives off boats
SISOSCB310A	Complete an underwater video
SISOSCB311A	Take still photographs underwater
SISOSCB312A	Complete dry suit dives

© Commonwealth of Australia, 2025 HumanAbility

SISOSCB314A	Complete wreck dives
SISOSCB315A	Complete drift dives on SCUBA
SISOSCB316A	Dive at altitude greater than 300 metres
SISOSCB317A	Complete a dive using Enriched Air Nitrox
SISOSCB318A	Dive in open water using surface supplied air
SISOSRF202A	Demonstrate basic surfing manoeuvres in controlled conditions
SISOTBR201A	Select, set up and maintain an off-highway motorcycle
SISOYSB302A	Sail a small boat in light to moderate conditions
Imported	
SITTGDE002A	Provide arrival and departure assistance
SITXOHS002A	Follow workplace hygiene procedures

SIS30510 Certificate III in Sport and Recreation

Modification History

Not Applicable

Description

This qualification provides the skills and knowledge for an individual wishing to work in the sport and recreation industry in areas such as maintaining grounds and playing surfaces, providing customer service, housekeeping and or administrative assistance. This qualification also provides for multi skilled roles which combine a range of activities required to support the operation of facilities such as fitness centres, outdoor sporting grounds or complexes, aquatic centres and community recreation centres. All job roles are performed under supervision with some degree of autonomy.

Job roles

The following are indicative job roles for this qualification:

- recreation assistant
- administration assistant
- grounds assistant
- retail assistant

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	opportunities to regularly update own knowledge and skills; sharing information with colleagues; updating knowledge and skills to accommodate changes in equipment and operating procedures.
Technology	Understanding the operating capability of computer systems and software that assist in selling, planning and delivering sport and recreation products and services; safely using and maintaining sport and recreation equipment according to manufacturer's specifications and organisation policies and procedures.

Packaging Rules

14 units must be completed:

- 7 core units
- 7 elective units, which may be selected from the electives in this qualification or from units first packaged at AQF levels 2, 3 and 4 within SIS10; up to 2 of these elective units may be selected from any current accredited course or other Training Package, and must be units which are first packaged at AQF level 3.

In all cases selection of electives must relate to the core function or role of the candidate's current or intended work environment, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**7**)	
BSBWOR301A	Organise personal work priorities and development
HLTFA301B	Apply first aid
ICAU2006B	Operate computing packages
SISXCCS201A	Provide customer service
SISXEMR201A	Respond to emergency situations
SISXOHS101A	Follow occupational health and safety policies
SISXRSK301A	Undertake risk analysis of activities
Electives (**7**)	
BSBADM307B	Organise schedules
BSBADM311A	Maintain business resources

© Commonwealth of Australia, 2025 HumanAbility

BSBFIA301A	Maintain financial records
BSBFIA302A	Process payroll
BSBFIA303A	Process accounts payable and receivable
BSBFIA304A	Maintain a general ledger
BSBINM301A	Organise workplace information
CHCDIS301A	Work effectively with people with a disability
CHCDIS302A	Maintain an environment to empower people with disabilities
HLTFA402B	Apply advanced first aid
RTC2306A	Operate vehicles
RTC2307A	Operate machinery and equipment
RTC2309A	Operate tractors
RTC3310A	Operate specialised machinery and equipment
RTC3311A	Perform specialised machinery maintenance
RTC3401A	Control weeds
RTC3404A	Control plant pests, diseases and disorders
RTC3704A	Prepare and apply chemicals
RTC3705A	Transport, handle and store chemicals
RTF3001A	Construct turf playing surfaces
RTF3023A	Monitor turf health
RTF3027A	Renovate sports turf
SIRRRPK012A	Recommend business and leisure products and services
SIRXINV002A	Maintain and order stock
SIRXMER002A	Coordinate merchandise presentation
SIRXSLS003A	Coordinate sales performance
SISCCRD304A	Work with key stakeholders

© Commonwealth of Australia, 2025 HumanAbility

SISCCRO306A	Organise participant travel
SISSSPT303A	Conduct basic warm-up and cool-down programs
SISXCAI303A	Plan and conduct sport and recreation sessions
SISXCAI304A	Plan and conduct sport and recreation programs
SISXCAI306A	Facilitate groups
SISXFAC201A	Maintain sport and recreation equipment for activities
SISXFAC303A	Implement facility maintenance programs
SISXRES301A	Provide public education on the use of resources
SISXRES402A	Support implementation of environmental management practices
SITHFAB005A	Provide table service of alcoholic beverages
SITHFAB006A	Operate cellar systems
SITHGAM004A	Analyse and report on gaming machine data
SITHGAM006A	Provide responsible gambling services
SITXHRM003A	Roster staff
SITXOHS002A	Follow workplace hygiene procedures

SIS30610 Certificate III in Sport Career Oriented Participation

Modification History

The following pre requisite units have been inserted into Groups:

- Group A – Australian football
  - SISSAFL201A Perform the intermediate skills of Australian football
  - SISSAFL202A Perform the intermediate tactics of Australian football

Description

This qualification provides the skills and knowledge for an individual likely to undertake a career as an athlete at a regional, state or territory level which may enable match-payments, prize money, grants or endorsements to form the primary source of their income.

Those undertaking this qualification should hold a scholarship holder with an Institute of Sport, a member of a state or territory or national team, squad or development program, a national or state or territory talent development program or a member of a second tier national competition. Likely functions for someone with this qualification include training for events, assessing competitors and conditions at venues and consulting with coaches to determine appropriate strategies, competing and undertaking promotional duties.

Job Roles

The following is an indicative job role for this qualification:

- professional athlete

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	appropriate development and promotional opportunities.
Learning	Knowing the structure of sport institutes and sources of information within the sport industry; actively using feedback from coaches and support personnel to improve performance; keeping well informed of updates and changes to athlete's diets; sourcing information on new techniques to improve performance.
Technology	Understanding the operating capability of equipment and software that assists in performance enhancement; using information technology to assist in planning an athlete's diet; safely using and maintaining sport equipment according to manufacturer's specifications and organisation policies and procedures.

Packaging Rules

15 units must be completed:

- 10 core units
- 5 elective units, consisting of:
  - all the units in any one of Groups A to G
  - the remaining to make up the required 5 elective units from General electives; up to 2 of these remaining units may be selected elsewhere in SIS10 or any current accredited course or other Training Package, and must be first packaged at AQF level 3 or 4.

In all cases, selection of electives must be guided by the job outcome sought, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**10**)	
BSBWOR301A	Organise personal work priorities and development
HLTFA301B	Apply first aid
SISSCOP202A	Develop a personal management plan
SISSCOP204A	Develop personal media skills
SISSCOP205A	Develop a personal financial plan
SISSCOP306A	Prepare a sponsorship proposal
SISSCOP308A	Model the responsibilities of an elite athlete
SISSCOP309A	Design an athlete's diet

© Commonwealth of Australia, 2025 HumanAbility

Core (**10**)	
SISXOHS101A	Follow occupational health and safety policies
SISXRSK301A	Undertake risk analysis of activities
Electives (**5**)	
Group A - Australian Football	
SISSAFL201A	Perform the intermediate skills of Australian Football
SISSAFL202A	Perform the intermediate tactics of Australian Football
SISSAFL304A	Perform the advanced skills of Australian Football
SISSAFL305A	Perform the advanced tactics of Australian Football
Group B - Cricket	
SISSCKT303A	Participate in conditioning for cricket
SISSCKT304A	Perform the advanced skills of cricket
SISSCKT305A	Perform the advanced tactics and strategies of cricket
Group C - Equestrian	
SISOEQO202A	Demonstrate basic horse riding skills
RGRPSH401A	Relate anatomical and physiological features to the care and treatment of horses
Group D - Golf	
SISSGLF304A	Perform the advanced skills of golf
SISSGLF305A	Apply the advanced tactics and strategies of golf
SISSGLF306A	Interpret and apply the rules of golf at the advanced level
SISSGLF307A	Participate in conditioning for golf
Group E - Netball	
SISSNTB201A	Use intermediate level netball skills
SISSNTB202A	Use intermediate level tactics and game strategy in netball play

© Commonwealth of Australia, 2025 HumanAbility

Core (10)	
SISSNTB305A	Use advanced level tactics and game strategy in netball play
SISSNTB306A	Use advanced level netball skills
Group F - Rugby League	
SISSRGL201A	Use intermediate level Rugby League game skills
SISSRGL202A	Use intermediate level tactics and game strategy in Rugby League play
SISSRGL305A	Use advanced level Rugby League game skills
SISSRGL308A	Use advanced level tactics and game strategy in Rugby League play
Group G - Soccer	
SISSSOC301A	Perform advanced level soccer skills
SISSSOC302A	Perform advanced level soccer tactics and strategies
General electives	
SISSAFL305A	Perform the advanced tactics of Australian Football
SISSCKT303A	Participate in conditioning for cricket
SISSCKT304A	Perform the advanced skills of cricket
SISSCKT305A	Perform the advanced tactics and strategies of cricket
SISSCNO201A	Perform the intermediate skills and tactics of canoeing
SISSCNO305A	Perform the advanced skills and tactics of canoeing
SISSCOP307A	Manage personal finances
SISSGLF304A	Perform the advanced skills of golf
SISSGLF305A	Apply the advanced tactics and strategies of golf
SISSGLF306A	Interpret and apply the rules of golf at the advanced level
SISSGLF307A	Participate in conditioning for golf
SISSNTB306A	Use advanced level netball skills
SISSRGL305A	Use advanced level Rugby League game skills

© Commonwealth of Australia, 2025 HumanAbility

Core (**10**)	
SISSRGL308A	Use advanced level tactics and game strategy in Rugby League play
SISSRGU306A	Perform advanced level Rugby Union skills
SISSRGU307A	Perform advanced level Rugby Union tactics and strategies
SISSSOC301A	Perform advanced level soccer skills
SISSSOC302A	Perform advanced level soccer tactics and strategies
SISXEMR201A	Respond to emergency situations
SISXIND403A	Analyse participation patterns
Imported	
BSBSMB301A	Investigate micro business opportunities

industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with stakeholders to determine their specific requirements; analysing written information on community recreation participation patterns; preparing accurate records or reports on activities undertaken; completing staff rosters; clarifying instructions to staff; negotiating acceptable solutions to client or staff requests and complaints.
Teamwork	Providing leadership to a team of workers; monitoring worker progress and providing assistance where necessary; recognising and adapting appropriately to cultural and language differences in the workplace and community; promoting compliance with legal obligations; acknowledging accountability to senior management and working collaboratively with other community recreation personnel and stakeholders.
Problem-solving	Identifying and mitigating hazards and risks related to sport and recreation activities and facilities; clarifying the extent of, and resolving problems through negotiating with clients in a sensitive and culturally appropriate manner; dealing with unpredictable and non-routine situations; planning, strategy and resource allocation to design activities to meet client needs; research into community needs.
Initiative and enterprise	Identifying and discussing a range of activity or program enhancements to improve client satisfaction and organisation or facility profitability; engaging colleagues in sharing work-place knowledge; actively engaging with community leaders to build relationships; reflecting on own work practices for improvement; monitoring activities and programs for emerging risks.
Planning and organising	Collecting, analysing and recording information to provide efficient planning for community recreation programs and activities; setting work priorities and scheduling staff daily work activities to meet deadlines; preparing program plans and coordinating recreation activities; implementing and monitoring occupational health and safety policies.
Self-management	Understanding the organisation, own role and operating within limits of authority; critically reviewing own strengths and weaknesses; actively seeking and reflecting on feedback on own performance; building industry and community networks to regularly update knowledge and skills.

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Learning	Identifying and accessing sources of research on community recreation; contributing to a learning environment through openly sharing knowledge and experiences; accessing internal and external professional development opportunities; updating knowledge and skills to accommodate changes in community recreation programming.
Technology	Understanding and utilising the operating capability of computer systems and software for community recreation programming; using information technology to assist in communication and support management and planning functions.

Packaging Rules

19 units must be completed:

- 11 core units
- 8 elective units, which may be selected from the electives listed in this qualification or from SIS10 which are packaged at AQF level 3, 4 or 5; up to 3 of these units may be selected elsewhere in SIS10 or from any current accredited course or other Training Package, and must be first packaged at AQF level 4.

In all cases selection of electives must relate to the core function or role of the candidate's current or intended work environment, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**11**)	
BSBWOR404A	Develop work priorities
HLTFA301B	Apply first aid
ICAU2006B	Operate computing packages
SIRXMGT001A	Coordinate work teams
SISCCRD304A	Work with key stakeholders
SISXCCS404A	Address client needs
SISXEMR402A	Coordinate emergency responses
SISXIND404A	Promote compliance with laws and legal principles
SISXOHS402A	Implement and monitor occupational health and safety

© Commonwealth of Australia, 2025 HumanAbility

	policies
SISXRES402A	Support implementation of environmental management practices
SISXRSK301A	Undertake risk analysis of activities
Electives (8)	
Aquatics	
SISCAQU201A	Monitor pool water quality
SISCAQU202A	Perform basic water rescues
SISCAQU303A	Operate aquatic facility plant and equipment
SISCAQU304A	Maintain pool water quality
SISCAQU305A	Implement aquatic facility plant and equipment maintenance program
SISCAQU307A	Perform advanced water rescues
SISCAQU308A	Instruct water familiarisation, buoyancy and mobility skills
SISCAQU309A	Instruct clients in water safety and survival skills
SISCAQU310A	Instruct swimming strokes
SISCAQU311A	Foster the development of infants and toddlers in an aquatic environment
SISCAQU312A	Assist participants with a disability during aquatic activities
SISCAQU414A	Develop pool water maintenance procedures
SISCAQU415A	Develop aquatic facility maintenance procedures
SISCAQU416A	Coordinate lifeguard service at an aquatic facility
SISCAQU417A	Operate self-contained breathing apparatus in an aquatic facility
Community Recreation Development	
SISCCRD301A	Facilitate community development through recreational activities

© Commonwealth of Australia, 2025 HumanAbility

SISCCRD302A	Recruit and manage volunteers
SISCCRD303A	Facilitate inclusion for people with a disability
Community Recreation Operations	
SISCCRO302A	Apply legal and ethical instructional skills
SISCCRO304A	Plan and conduct disability recreation programs
Cross Sector	
SISXCAI304A	Plan and conduct sport and recreation programs
SISXCCS402A	Coordinate client service activities
SISXCCS403A	Determine needs of client populations
SISXFAC404A	Coordinate facility and equipment acquisition and maintenance
SISXIND403A	Analyse participation patterns
SISXIND405A	Conduct projects
SISXIND406A	Manage projects
Fitness	
SISFFIT311A	Deliver approved community fitness programs
Sports Administration	
SISSSPA507A	Develop volunteer management policies
Imported	
BSBHRM401A	Review human resources functions
BSBHRM402A	Recruit, select and induct staff

SIS40210 Certificate IV in Fitness

Modification History

- Pre requisite unit SISCAQU202A Perform basic water rescues has been inserted into Group A – Aqua Trainer

Other changes made are as follows:

- The heading "Suggested electives for those wishing to operate a personal training small business" and associated list of units has been deleted
- SISSST301A corrected to SISSSTC301A
- SISSST402A corrected to SISSSTC402A

Description

This qualification provides the skills and knowledge for an individual to be competent in a range of activities and functions within the Fitness industry, including working independently in a broad range of settings, such as within fitness centres, gyms, pools, community facilities and in open spaces.

Those with this level of competency will be expected to train individual clients, on a one-on-one basis, and may include older clients and children.

Persons with this level of competency will have the ability to plan, conduct and evaluate exercise training, provide leadership and guidance to clients and other staff and possibly deal with unpredictable situations.

Exercise Trainers will have the ability to monitor and manage business activities to operate efficiently and profitably.

Job roles

- exercise trainer - personal trainer
- exercise trainer - aqua trainer
- exercise trainer - program coordinator
- exercise trainer - children's trainer
- exercise trainer - older client trainer

Pathways Information

Not Applicable

© Commonwealth of Australia, 2025 HumanAbility

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

Entry to this qualification is open to those who hold a current first aid qualification and current CPR certificate and who have achieved the following units of competency:

SISFFIT301A	Provide fitness orientation and health screening
SISFFIT302A	Provide quality service in the fitness industry
SISFFIT303A	Develop and apply an awareness of specific populations to exercise delivery
SISFFIT304A	Instruct and monitor fitness programs
SISFFIT305A	Apply anatomy and physiology principles in a fitness context
SISFFIT306A	Provide healthy eating information to clients in accordance with recommended guidelines
SISFFIT307A	Undertake client health assessment
SISFFIT308A	Plan and deliver gym programs
SISXOHS101A	Follow occupational health and safety policies
SISXRSK301A	Undertake risk analysis of activities

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
The following table contains a summary of the employability skills required by the fitness industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Negotiating with clients to determine and interpret their specific requirements and preferences; explaining the benefits of, and selling personal training services proactively to ensure profitability; adjusting communication styles to meet client needs and motivate

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	clients to meet fitness goals; developing and maintaining documentation such as operational procedures, equipment instructions and marketing information.
Teamwork	Motivating and leading diverse groups of employees or clients; planning work to take into account other facility or environment users; providing support and coaching.
Problem-solving	Anticipating facility, equipment or staffing problems and developing a range of strategies to address typical problems; preparing business or operational plans which outline risk management strategies and actions; identifying issues related to client adherence to exercise programs and developing practical solutions; monitoring client progress and identifying modifications to fitness activities and services based on client feedback; identifying issues outside of scope and determining when to refer clients to medical and allied health professionals.
Initiative and enterprise	Using creativity and innovation in delivering exercise sessions that meet or exceed client expectations or improve business capacity; adapting products and services to respond to emerging fitness industry trends; implementing a continuous improvement approach across the personal training business.
Planning and organising	Collecting, analysing and recording client information to allow for the efficient planning and delivery of personal training sessions; developing business or operational plans to ensure effective delivery of services; preparation of exercise programs that include progression and are appropriate to the client's fitness goals; allocating equipment and determining staffing levels to deliver programmed sessions.
Self-management	Understanding and complying with the legal and ethical responsibilities that apply to personal trainers; understanding and respecting scope of practice; taking responsibility for scheduling own time to ensure the personal training business runs efficiently and profitably; seeking and acting on feedback and guidance from clients and colleagues.
Learning	Proactively maintaining and updating exercise product and service knowledge and skills; sharing information with colleagues; accessing current evidence based research; actively listening to clients to learn more about their needs and preferences and incorporating these in program design.
Technology	Identifying updated technologies that assist in the planning, delivery and selling of exercise products and services; safely using

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	and maintaining exercise equipment according to manufacturer's specifications and own policies and procedures.

Packaging Rules

15 units must be completed:

- 10 core units
- 5 elective units, consisting of:
  - all the units in any one of Groups A to C
  - the remaining to make up the required 5 elective units from General electives; up to 2 of these remaining units may be selected elsewhere in SIS10 or any current accredited course or other Training Package, and must be first packaged at AQF level 3 or 4.

In all cases, selection of electives must be guided by the job outcome sought, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**10**)	
BSBSMB401A	Establish legal and risk management requirements of small business
BSBSMB403A	Market the small business
BSBSMB404A	Undertake small business planning
SISFFIT415A	Work collaboratively with medical and allied health professionals
SISFFIT416A	Apply motivational psychology to provide guidance on exercise behaviour and change to meet health and fitness goals
SISFFIT417A	Undertake long term exercise programming
SISFFIT418A	Undertake appraisals of functional movement
SISFFIT419A	Apply exercise science principles to planning exercise
SISFFIT420A	Plan and deliver exercise programs to support desired body composition outcomes
SISFFIT421A	Plan and deliver personal training

© Commonwealth of Australia, 2025 HumanAbility

Electives (**5**)	
Group A - Aqua Trainer	
SISCAQU202A	Perform basic water rescues
SISCAQU307A	Perform advanced water rescues
SISFFIT422A	Implement inclusive aquatic activities for specific population groups
Group B - Children's Trainer	
CHCIC301D	Interact effectively with children
SISFFIT313A	Plan and deliver exercise to apparently healthy children and adolescents
Group C - Older Clients Trainer	
SISFFIT314A	Plan and deliver exercise to older clients with managed conditions
General electives	
Aquatics	
SISCAQU312A	Assist participants with a disability during aquatic activities
Fitness	
SISFFIT311A	Deliver approved community fitness programs
SISFFIT312A	Plan and deliver an endurance training program
Sport	
SISSSTC301A	Instruct strength and conditioning techniques
SISSSTC402A	Develop strength and conditioning programs
Cross Sector	
SISXIND406A	Manage projects
Imported	
BSBFRA402B	Establish a franchise

© Commonwealth of Australia, 2025 HumanAbility

BSBFRA403B	Manage relationship with franchisor
BSBSMB306A	Plan a home-based business
BSBHRM402A	Recruit, select and induct staff
BSBSMB405A	Monitor and manage small business operations
BSBSMB406A	Manage small business finances
BSBSMB407A	Manage a small team
CUFIND401A	Provide services on a freelance basis
ICAU2006B	Operate computing packages
SITXENV002A	Implement and monitor environmentally sustainable work practices
SITXHRM003A	Roster staff

SIS40310 Certificate IV in Outdoor Recreation

Modification History

Incorrect code in General Electives – the code SISOSCB418A Dive in open water using surface supplied air has been corrected to SISOSCB318A

The following pre requisite units have been inserted into Groups:

- Group B – Abseiling – Instruct – Artificial surface – Multi pitch
  - SISOABA406A Instruct abseiling on single pitch artificial surface
- Group K – Caving – Guide – Multi pitch
  - SISOCVE302A Apply single pitch abseiling skills in caves
  - SISOCVE305A Apply caving specific single rope techniques
- Group L – Caving – Instruct – Vertical single pitch
  - SISOCVE201A Demonstrate caving skills
- Group M – Caving – Specialist – Cavern Diving
  - SISOSCB301A SCUBA dive in open water to a maximum depth of 18 metres
- Group N – Challenge ropes course – Supervise High Ropes
  - SISOCRP302A Conduct a high ropes session
- Group O – Challenge ropes course – Supervise low ropes
  - SISOCRP301A Conduct a low ropes session
- Group U – Cycle touring
  - imported unit corrected to TLIH207D Plan and navigate routes
- Group AB – Horse Riding – Remote Areas
  - SISOEQO410A Guide overnight horse trail rides in tracked areas
- Group AH – Mountain biking – Guide
  - SISONAV201A Demonstrate navigation skills in a controlled environment deleted and replaced with SONAV302A Apply navigation skills in an intermediate environment
  - SISOCYT202A Demonstrate basic cycling skills and
  - SISOMBK201A Demonstrate basic off-road cycling skills
- Group AI – Mountain biking – Instruct
  - SISONAV201A Demonstrate navigation skills in a controlled environment deleted
  - SISOCYT202A Demonstrate basic cycling skills, SISOMBK201A Demonstrate basic off-road cycling skills, and SISONAV302A Apply navigation skills in an intermediate environment inserted
- Group AY – Surfing – Guide
  - SISOSCB301A SCUBA dive in open water to a maximum depth of 18 metres
- Group AZ – Surfing – Instruct – Basic to intermediate
  - SISOSRF202A Demonstrate basic surfing manoeuvres in controlled conditions

© Commonwealth of Australia, 2025 HumanAbility

- Group AAB – Trail Bike Riding
  - SISOTBR202A Demonstrate basic off-highway motorcycling skills
- Group AAC – Vertical rescue – Instruct
  - SISOVTR301A Perform vertical rescues

The following additions have been made to the General Electives:

- SISOCAY201A Demonstrate horizontal canyoning skills
- SISOVTR402A Perform complex vertical rescues

Description

Depending on the specialisations chosen, this qualification provides the skills and knowledge for an individual to be competent in:

Guiding outdoor recreation activities in an uncontrolled environment

It requires technical knowledge of the outdoor recreation activity to be transferred to allow individuals to safely participate in the outdoor activity. It does not provide the skills and knowledge to impart the required level of technical knowledge and expertise to allow participants to independently undertake outdoor recreation activities.

A guide operating in an uncontrolled environment has the skills, knowledge and experience that enable them to work independently within a variety of settings and contexts that may be complex and non-routine.

Instructing outdoor recreation skills

An instructor has the skills, knowledge and experience to facilitate skill transfer or development to clients in order that they may participate independently (or with minimal supervision) in outdoor activities. This requires the instructor to be able to:

- transfer required technical skills and knowledge to participants
- apply a variety of appropriate instructional strategies
- critique participants technique
- assess participants skill and knowledge acquisition during and at the end of a program or session
- In all cases those with this qualification would be managing expected and unexpected situations with considerable autonomy. Leadership, guidance and supervision are involved when organising activities of self and others, as well as contributing to technical solutions of a non-routine or contingency nature. Work would be performed in field locations with varied contexts requiring contingency planning and in differing environments such as water-based, dry land and mountainous terrains, using a diverse range of equipment.

© Commonwealth of Australia, 2025 HumanAbility

Job roles

The following are indicative job roles for this qualification:

- outdoor guide (uncontrolled environment)
- outdoor instructor

Pathways Information

This qualification is suitable for an Australian Apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

Entry to this qualification by persons without prior outdoor recreation industry experience or formal qualifications is not recommended.

Examples of sufficient relevant skills and knowledge for entry into the qualification may include:

- Previous qualification at the AQF level below
- Previous experience in the outdoor recreation industry and interest in outdoor pursuits

Entry into this qualification and progression between qualification levels will be based on the professional judgement of the RTO, in consultation with the individual.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
The following table contains a summary of the employability skills required by the outdoor recreation industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with clients and colleagues to determine and interpret their specific requirements; providing precise location and situation information in case of emergency situations, documenting outdoor recreation activity programs; effectively using body language and demonstration to reinforce technique instruction; delivering feedback on client technique; addressing client needs to ensure a positive recreation experience.

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Teamwork	Providing leadership to outdoor activity assistants; monitoring group progress and providing encouragement where necessary; recognising and adapting appropriately to cultural and language differences; promoting compliance with legal obligations; acknowledging accountability to supervisors and working collaboratively with other outdoor recreation personnel and stakeholders.
Problem-solving	Managing hazards, risks and emergencies related to outdoor recreation activities and facilities; clarifying the extent of, and resolving problems through negotiating with clients in a sensitive and culturally appropriate manner; dealing with unpredictable and non-routine situations; planning, strategy and resource allocation to design activities to meet client needs; applying search and rescue skills; interpreting changing weather conditions in the field; determining appropriate instructional strategies for skill transfer to clients.
Initiative and enterprise	Identifying and discussing a range of activity or program enhancements to improve client satisfaction and organisation or facility sustainability; engaging colleagues in sharing work-place knowledge; reflecting on own instructional practices for improvement; supporting the implementation of environmental management practices; monitoring activities and programs for emerging risks.
Planning and organising	Collecting, analysing and recording information to efficiently plan outdoor recreation activities and programs; setting work priorities and scheduling programs and work activities to meet deadlines and use resources efficiently while minimising environmental impact, implementing and monitoring occupational health and safety policies and promoting compliance with legislation and regulations.
Self-management	Understanding and complying with the legal and ethical responsibilities that apply to own role and operating within limits of authority; critically reviewing own strengths and weaknesses; actively seeking and reflecting on feedback on own performance; building industry networks to regularly update knowledge and skills.
Learning	Identifying and accessing sources of research on outdoor recreation instruction and program design; contributing to a learning environment through openly sharing knowledge and experiences; accessing internal and external professional development opportunities; updating knowledge and skills to accommodate changes in the outdoor recreation industry.

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Technology	Understanding and utilising the operating capability of computer systems and software for outdoor recreation program planning and delivery; identifying new equipment that improves safety and enhances delivery of outdoor recreation activities; using information technology to assist in communication and support management and planning functions.

Packaging Rules

31 units must be completed:

- 15 core units
- 16 elective units, consisting of:
  - all the units in any two of Groups A to AAF, or
  - all the units in any one of Groups A to AAF, and all the units in any one of Groups AAG to AAS
  - the remaining to make up the required 16 elective units from the General electives, or any of the above groups; up to 5 of these remaining units may be selected elsewhere in SIS10 or any current accredited course or other Training Package, and must be first packaged at AQF level 2, 3 or 4.

In all cases selection of electives must relate to the core function or role of the candidate's current or intended work environment, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**15**)	
BSBWOR404A	Develop work priorities
HLTFA301B	Apply first aid
SISOOPS306A	Interpret weather conditions in the field
SISOODR404A	Manage risk in an outdoor activity
SISOODR405A	Develop and coordinate programs incorporating outdoor activities
SISOODR302A	Plan outdoor recreation activities
SISXRES402A	Support implementation of environmental management practices
SISOOPS407A	Apply search and rescue skills
SISXEMR201A	Respond to emergency situations

© Commonwealth of Australia, 2025 HumanAbility

SISXCCS404A	Address client needs
SISXIND404A	Promote compliance with laws and legal principles
SISXIND405A	Conduct projects
SISXOHS402A	Implement and monitor occupational health and safety policies
SISXRES403A	Use resources efficiently
TAEDEL301A	Provide work skill instruction
Electives (**16**)	
Group A - Abseiling - Guide - Natural Surface - Multi Pitch	
SISOABN202A	Safeguard an abseiler using a single rope belay system
SISOABN406A	Apply multi pitch abseiling skills on natural surfaces
SISOABN407A	Establish ropes for multi pitch abseiling on natural surfaces
SISOABN409A	Guide abseiling on multi pitch natural surfaces
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR402A	Perform complex vertical rescues
Group B - Abseiling - Instruct - Artificial Surface - Multi Pitch	
SISOABN202A	Safeguard an abseiler using a single rope belay system
SISOABA405A	Establish ropes for multi pitch abseiling on artificial surfaces
SISOABA406A	Instruct abseiling on single pitch artificial surface
SISOABA407A	Instruct abseiling on multi pitch artificial surfaces
SISOVTR402A	Perform complex vertical rescues
Group C - Abseiling - Instruct - Artificial Surface - Single Pitch	
SISOABN202A	Safeguard an abseiler using a single rope belay system
SISOABA302A	Apply single pitch abseiling skills on artificial surfaces
SISOABA303A	Establish ropes for abseiling on artificial surfaces
SISOABA406A	Instruct abseiling on single pitch artificial surfaces

© Commonwealth of Australia, 2025 HumanAbility

SISOVTR301A	Perform vertical rescues
Group D - Abseiling - Instruct - Natural Surface - Single Pitch	
SISOABN202A	Safeguard an abseiler using a single rope belay system
SISOABN303A	Apply single pitch abseiling skills on natural surfaces
SISOABN304A	Establish ropes for single pitch abseiling on natural surfaces
SISOABN408A	Instruct abseiling on single pitch natural surfaces
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR301A	Perform vertical rescues
Group E - Bushwalking - Guide - Intermediate	
PUAOPE002B	Operate communications systems and equipment
SISOBWG302A	Apply intermediate bushwalking skills
SISOBWG404A	Apply river crossing skills
SISOBWG405A	Guide intermediate bushwalks
SISONAV302A	Apply navigation skills in an intermediate environment
SISOOPS202A	Use and maintain a temporary or overnight site
Group F - Canoeing - Guide - White Water Grade 2	
SISOCNE304A	Apply inland canoeing skills on Grade 2 water
SISOCNE307A	Guide canoeing trips on Grade 2 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group G - Canoeing - Guide - White Water Grade 3	
SISOCNE408A	Apply inland canoeing skills on Grade 3 water
SISOCNE410A	Guide canoeing trips on Grade 3 water
SISONAV302A	Apply navigation skills in an intermediate environment

© Commonwealth of Australia, 2025 HumanAbility

SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR403A	Perform complex white water rescues and recoveries
Group H - Canoeing - Instruct - Flat Water	
SISOCNE303A	Apply canoeing skills
SISOCNE202A	Perform deep water rescues
SISOCNE306A	Instruct canoeing skills on flat and undemanding water
SISONAV201A	Demonstrate navigation skills in a controlled environment
Group I - Canoeing - Instruct - White Water Grade 2	
SISOCNE304A	Apply inland canoeing skills on Grade 2 water
SISOCNE409A	Instruct canoeing skills on Grade 2 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group J - Canyoning - Guide - Multi Pitch	
SISCAQU202A	Perform basic water rescues
SISOCAY302A	Apply vertical canyoning skills
SISOCAY405A	Apply advanced vertical canyoning skills
SISOCAY406A	Establish complex belays in canyons
SISOCAY407A	Guide multi pitch canyoning trips
SISOVTR402A	Perform complex vertical rescues
Group K - Caving - Guide - Multi Pitch	
SISOCVE302A	Apply single pitch abseiling skills in caves
SISOCVE305A	Apply caving specific single rope techniques
SISOCVE409A	Rig ladders in complex situations
SISOCVE410A	Rig a complex pitch using caving specific techniques

© Commonwealth of Australia, 2025 HumanAbility

SISOCVE411A	Apply vertical caving skills
SISOCVE412A	Rig multi pitches in complex vertical cave systems
SISOCVE413A	Navigate in untrogged caves
SISOCVE414A	Guide vertical multi pitch caving trips
SISONAV302A	Apply navigation skills in an intermediate environment
SISOVTR402A	Perform complex vertical rescues
Group L - Caving - Instruct - Vertical Single Pitch	
SISOCVE201A	Demonstrate caving skills
SISOCVE302A	Apply single pitch abseiling skills in caves
SISOCVE303A	Rig a ladder pitch
SISOCVE304A	Apply laddering skills
SISOCVE305A	Apply caving specific single rope techniques
SISOCVE306A	Rig ropes and establish belays in caves
SISOCVE417A	Instruct vertical single pitch caving skills
SISONAV302A	Apply navigation skills in an intermediate environment
SISOVTR301A	Perform vertical rescues
Group M - Caving - Specialist - Cavern Diving	
SISOCVE416A	Apply cavern diving skills
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB302A	Complete night dives
Group N - Challenge Ropes Course - Supervise High Ropes	
SISOCRP302A	Conduct a high ropes session
SISOABL402A	Facilitate adventure-based learning activities
SISOCRP404A	Supervise a high ropes session
Group O - Challenge Ropes Course - Supervise Low Ropes	

© Commonwealth of Australia, 2025 HumanAbility

SISOABL402A	Facilitate adventure-based learning activities
SISOCRP301A	Conduct a low ropes session
SISOCRP403A	Supervise a low ropes session
Group P - Climbing - Guide - Natural Surface - Single Pitch - Lead	
SISOCLN303A	Establish belays for climbing on natural surfaces
SISOCLN405A	Apply single pitch lead climbing skills on natural surfaces
SISOCLN408A	Guide lead climbing activities on single pitch natural surfaces
SISOVTR301A	Perform vertical rescues
Group Q - Climbing - Guide - Natural surface - Top Rope	
SISOCLN302A	Apply climbing skills on natural surfaces
SISOCLN303A	Establish belays for climbing on natural surfaces
SISOCLN304A	Guide top rope climbing activities on natural surfaces
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR301A	Perform vertical rescues
Group R - Climbing - Instruct - Artificial Surface - Single Pitch - Lead	
SISOCLA303A	Establish belays for climbing on artificial surfaces
SISOCLA406A	Apply lead climbing skills on artificial surfaces
SISOCLA409A	Instruct lead climbing on single pitch artificial surfaces
SISOVTR301A	Perform vertical rescues
Group S - Climbing - Instruct - Natural Surface - Single Pitch - Lead	
SISOCLN303A	Establish belays for climbing on natural surfaces
SISOCLN405A	Apply single pitch lead climbing skills on natural surfaces
SISOCLN411A	Instruct lead climbing on single pitch natural surfaces
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR301A	Perform vertical rescues

TLIH207D	Plan and navigate routes
Group V - Fishing Guide - Charter In-shore	
SISOFSH201A	Catch and handle fish
SISOFSH416A	Demonstrate marine inshore fishing skills
SISOFSH417A	Demonstrate marine offshore fishing skills
Group W - Fishing Guide - Charter Off-shore	
SISOFSH201A	Catch and handle fish
SISOFSH417A	Demonstrate marine offshore fishing skills
SISOOPS303A	Interpret weather for marine environments

© Commonwealth of Australia, 2025 HumanAbility

Group X - Fishing Instructor	
SISOFSH201A	Catch and handle fish
SISOFSH202A	Select, catch and use bait
SISOFSH203A	Select, rig and use terminal tackle
SISOFSH204A	Select, use and maintain fishing tackle outfits
SISOFSH206A	Locate and attract fish
SISOFSH308A	Instruct fishing skills
Group Y - Four Wheel Driving - Guide - Advanced	
SISODRV302A	Drive and recover a 4WD vehicle
SISODRV303A	Guide 4WD tours
SISODRV404A	Drive a 4WD vehicle in difficult terrain
SISODRV405A	Coordinate recovery of 4WD vehicles
SISONAV201A	Demonstrate navigation skills in a controlled environment
Group Z - Horse Handling	
RGRPSH401A	Relate anatomical and physiological features to the care and treatment of horses
RTE3102A	Educate, ride and care for horses and equipment
RTE3144A	Prevent and treat equine injury and disease
SISOEQO407A	Select horses for a program
SISOEQO408A	Determine nutritional requirements for horses
SISOEQO409A	Train and condition horses
Group AA - Horse Riding - Overnight Rides	
RTE3137A	Carry out basic hoof care procedures
SISOEQO410A	Guide overnight horse trail rides in tracked areas

Group AB - Horse Riding - Remote Areas	
RTE3102A	Educate, ride and care for horses and equipment
RTE3137A	Carry out basic hoof care procedures
RTE3144A	Prevent and treat equine injury and disease
SISOEQO202A	Demonstrate basic horse riding skills
SISOEQO304A	Apply first aid for horses
SISOEQO305A	Ride horses in tracked areas
SISOEQO408A	Determine nutritional requirements for horses
SISOEQO409A	Train and condition horses
SISOEQO410A	Guide overnight horse trail rides in tracked areas
SISOEQO411A	Ride horses in remote areas
SISOEQO412A	Manage horse illness and injuries in remote areas
SISOEQO413A	Guide trail rides in remote areas
SISONAV201A	Demonstrate navigation skills in a controlled environment
Group AC - Horse Riding - Instruct	
RTE3102A	Educate, ride and care for horses and equipment
SISOEQO407A	Select horses for a program
SISOEQO414A	Instruct horse riding and handling skills
Group AD - Kayaking - Guide - White Water Grade 2	
SISOKYK303A	Apply inland kayaking skills on Grade 2 water
SISOKYK305A	Guide kayaking trips on Grade 2 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group AE - Kayaking - Guide - White Water Grade 3	

© Commonwealth of Australia, 2025 HumanAbility

SISOKYK406A	Demonstrate inland kayaking skills on Grade 3 water
SISOKYK409A	Guide kayaking trips on Grade 3 water
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR403A	Perform complex white water rescues and recoveries
Group AF - Kayaking - Instruct - Flat Water	
SISOCNE202A	Perform deep water rescues
SISOKYK302A	Apply kayaking skills
SISOKYK407A	Instruct kayaking skills on flat and undemanding water
SISONAV201A	Demonstrate navigation skills in a controlled environment
Group AG - Kayaking - Instruct - WhiteWater Grade 2	
SISOKYK303A	Apply inland kayaking skills on Grade 2 water
SISOKYK408A	Instruct kayaking skills on Grade 2 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group AH - Mountain Biking - Guide	
SISOCYT202A	Demonstrate basic cycling skills
SISOMBK201A	Demonstrate basic off-road cycling skills
SISOMBK302A	Apply advanced off-road cycling skills
SISOMBK303A	Guide off-road cycle tours
SONAV302A	Apply navigation skills in an intermediate environment
Group AI - Mountain Biking - Instruct	
SISOCYT202A	Demonstrate basic cycling skills
SISOMBK201A	Demonstrate basic off-road cycling skills
SISOMBK302A	Apply advanced off-road cycling skills

© Commonwealth of Australia, 2025 HumanAbility

SISOMBK404A	Instruct off-road cycling skills
SISONAV302A	Apply navigation skills in an intermediate environment
Group AJ - Personal Water Craft - Instruct - Basic Skills	
SISOPWC202A	Demonstrate simple personal water craft skills in controlled conditions
SISOPWC405A	Instruct basic personal water craft riding skills
Group AK - Rafting - Guide - Grade 3 Rapids	
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISORAF402A	Guide a raft on Grade 3 rapids
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group AL -Rafting - Trip leader - Grade 3 Rapids	
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISORAF403A	Guide a raft on Grade 4 rapids
SISORAF404A	Coordinate and manage white water rafting trips
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR403A	Perform complex white water rescues and recoveries
Group AM - SCUBA - Dive Supervisor	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB306A	Perform diver rescues
SISOSCB308A	Guide a SCUBA dive
Group AN - SCUBA - Instruct - Specialities	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB419A	Instruct SCUBA diving skills
SISOSCB420A	Instruct specialised SCUBA diving skills
Group AO - Sea Kayaking - Guide - Easy to Moderate Conditions	

© Commonwealth of Australia, 2025 HumanAbility

PUAOPE002B	Operate communications systems and equipment
SISOCNE202A	Perform deep water rescues
SISOKYS302A	Demonstrate sea kayaking skills
SISOKYS303A	Guide sea kayaking trips in easy to moderate conditions
SISOKYS304A	Demonstrate sea kayaking skills in moderate to difficult conditions
SISOKYS406A	Plan and navigate a sea kayaking inshore passage
SISOOPS303A	Interpret weather for marine environments
Group AP - Sea Kayaking - Instruct - Easy to Moderate Conditions	
PUAOPE002B	Operate communications systems and equipment
SISOCNE202A	Perform deep water rescues
SISOKYS302A	Demonstrate sea kayaking skills
SISOKYS304A	Demonstrate sea kayaking skills in moderate to difficult conditions
SISOKYS406A	Plan and navigate a sea kayaking inshore passage
SISOKYS407A	Instruct sea kayaking in easy to moderate conditions
SISOOPS303A	Interpret weather for marine environments
Group AQ - Skiing - Cross Country - Instruct - Intermediate	
SISOSKT409A	Apply intermediate cross country skiing skills
SISOSKT411A	Instruct cross country skiing
Group AR - Skiing - Downhill - Instruct	
SISOSKI402A	Alpine ski downhill on intermediate terrain
SISOSKI403A	Alpine ski downhill on advanced terrain
SISOSKI405A	Alpine free ski on all terrain
SISOSKI408A	Instruct alpine skiing skills
Group AS - Skiing - Downhill - Instruct - Telemarking	
SISOSKI406A	Telemark ski downhill on intermediate terrain

Group AY - Surfing - Guide	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSRF303A	Perform intermediate level surfing manoeuvres
SISOSRF304A	Perform simple rescues in moderate surf conditions
SISOSRF305A	Guide surfing sessions
Group AZ - Surfing - Instruct - Basic to Intermediate	
SISOSRF202A	Demonstrate basic surfing manoeuvres in controlled conditions
SISOSRF303A	Perform intermediate level surfing manoeuvres
SISOSRF304A	Perform simple rescues in moderate surf conditions
SISOSRF409A	Instruct basic to intermediate surfing skills
Group AAA - Surfing - Instruct - Intermediate and Advanced	
SISOSRF202A	Demonstrate basic surfing manoeuvres in controlled conditions
SISOSRF303A	Perform intermediate level surfing manoeuvres
SISOSRF406A	Perform advanced level surfing manoeuvres
SISOSRF407A	Perform rescues in moderate to difficult surf conditions
SISOSRF410A	Instruct advanced surfing skills
Group AAB - Trail Bike Riding	
SISOTBR201A	Select, set up and maintain an off-highway motorcycle
SISOTBR202A	Demonstrate basic off-highway motorcycling skills
SISOTBR304A	Guide off-highway motorcycle tours
SISOTBR405A	Guide extended off-highway motorcycle tours
SISOTBR406A	Instruct basic off-highway motorcycling skills
Group AAC - Vertical Rescue - Instruct	
SISOVTR301A	Perform vertical rescues
SISOVTR402A	Perform complex vertical rescues

© Commonwealth of Australia, 2025 HumanAbility

SISOVTR403A	Instruct vertical rescue
Group AAD - White Water Rescue - Instruct	
SISOWWR403A	Perform complex white water rescues and recoveries
SISOWWR404A	Instruct white water rescue
Group AAE - Yachting - Instruct - Windsurfing	
SISOYSA404A	Use long boards in difficult conditions
SISOYSA405A	Use short boards in difficult conditions
SISOYSA406A	Instruct windsurfing
Group AAF - Yachting - Small Boats	
SISOYSB403A	Sail a small boat in moderate and variable conditions
SISOYSB404A	Instruct small boat yachting
Group AAG - Community Development	
RTD4802A	Develop approaches to include cultural and human diversity
SISCCRD304A	Work with key stakeholders
SISXCAI304A	Plan and conduct sport and recreation programs
Group AAH - Disability	
CHCDIS301A	Work effectively with people with a disability
CHCDIS507C	Design and adapt surroundings to group requirements
SISCCRD303A	Facilitate inclusion for people with a disability
SISCCRO304A	Plan and conduct disability recreation programs
Group AAI -Interpretation	
SISOINT201A	Conduct interpretation within an outdoor activity
SISOINT302A	Develop specialist resources for interpretive activities
Group AAJ - Interpretation - Cultural	
SITTGDE003A	Coordinate and operate a tour

© Commonwealth of Australia, 2025 HumanAbility

SITTGDE006A	Prepare and present tour commentaries or activities
SITTGDE008A	Research and share general information on Australian Indigenous cultures
SITTGDE009A	Interpret aspects of local Australian Indigenous culture
Group AAK - Interpretation - Cultural and Heritage Environments	
SISOINT302A	Develop specialist resources for interpretive activities
SITTGDE003A	Coordinate and operate a tour
SITTGDE006A	Prepare and present tour commentaries or activities
SITTGDE012A	Prepare specialised interpretive content on cultural and heritage environments
Group AAL - Interpretation - Flora, Fauna and Landscape

SIS40410 Certificate IV in Sport and Recreation

Modification History

Not Applicable

Description

This qualification provides the skills and knowledge for an individual wishing to work in the sport and recreation industry in an administrative or organisational capacity in locations such as fitness centres, outdoor sporting grounds or complexes, aquatic centres or sporting organisations and associations. Persons with this level of competency would support the management of ancillary functions required to ensure the effective provisions of specific services and programs.

Job roles

The following are indicative job roles for this qualification:

- facility coordinator
- administration coordinator
- grounds coordinator

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY
The following table contains a summary of the employability skills required by the sport and recreation industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with colleagues to determine their specific requirements; analysing written information on sport and recreation participation patterns; preparing accurate records of project activities or reports on activities undertaken; completing staff rosters; clarifying instructions to staff; negotiating acceptable solutions to client or staff requests and complaints.
Teamwork	Providing leadership to a team of workers; monitoring worker progress and providing assistance where necessary; recognising and adapting appropriately to cultural and language differences in the workplace; promoting compliance with legal obligations; acknowledging accountability to senior management and working collaboratively with other sport and recreation personnel and stakeholders.
Problem-solving	Identifying and mitigating hazards and risks related to sport and recreation activities and facilities; clarifying the extent of, and resolving problems through negotiating with clients in a sensitive and culturally appropriate manner; planning, strategy and resource allocation contributing to the avoidance or resolution of contingency or emergency situations; research into client needs.
Initiative and enterprise	Identifying and discussing a range of facility or administration enhancements to improve client satisfaction and organisation or facility profitability; engaging colleagues in sharing work-place knowledge; reflecting on own work practices for improvement; actively monitoring activities for emerging risks.
Planning and organising	Collecting, analysing and recording information to provide efficient planning for sport and recreation organisations and facilities; setting work priorities and scheduling staff daily work activities to meet deadlines; preparing project plans; implementing and monitoring occupational health and safety policies.
Self-management	Understanding the organisation, own role and operating within limits of authority; critically reviewing own strengths and weaknesses; actively seeking and reflecting on feedback on own performance; building industry networks to regularly update knowledge and skills.
Learning	Identifying and accessing sources of research on the sport and recreation industry; contributing to a learning environment through openly sharing knowledge and experiences; accessing internal and external professional development opportunities; updating

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
	knowledge and skills to accommodate changes in sport and recreation administration or facility management.
Technology	Understanding and utilising the operating capability of computer systems and software for sport and recreation administration or facility management; using information technology to assist in communication and support management and planning functions.

Packaging Rules

16 units must be completed:

- 9 core units
- 7 elective units, which may be selected from the electives in this qualification or units first packaged at AQF level 3, 4 or 5 within SIS10; up to 3 of these elective units may be selected from any current accredited course or other Training Package, and must be units which are first packaged at AQF level 4

In all cases selection of electives must relate to the core function or role of the candidate's current or intended work environment, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**9**)	
BSBWOR404A	Develop work priorities
ICAU2006B	Operate computing packages
SISXCCS404A	Address client needs
SISXCCS402A	Coordinate client service activities
SISXIND403A	Analyse participation patterns
SISXIND404A	Promote compliance with laws and legal principles
SISXIND405A	Conduct projects
SISXOHS402A	Implement and monitor occupational health and safety policies
SISXRSK301A	Undertake risk analysis of activities
Electives (**7**)	

© Commonwealth of Australia, 2025 HumanAbility

BSBADM405B	Organise meetings
BSBADM406B	Organise business travel
BSBADM409A	Coordinate business resources
BSBCMM401A	Make a presentation
BSBFIA402A	Report on financial activity
BSBFIM501A	Manage budgets and financial plans
BSBHRM402A	Recruit, select and induct staff
BSBITA401A	Design databases
BSBITS401A	Maintain business technology
BSBITU402A	Develop and use complex spreadsheets
BSBITU404A	Produce complex desktop published documents
BSBMKG401B	Profile the market
BSBMKG402B	Analyse consumer behaviour for specific markets
BSBREL401A	Establish networks
BSBREL402A	Build client relationships and business networks
BSBRES401A	Analyse and present research information
HLTFA402B	Apply advanced first aid
ICAU3126B	Use advanced features of computer applications
RTC4024A	Recommend plants and cultural practices
RTC4306A	Supervise maintenance of machinery and equipment
RTC4702A	Minimise risks in the use of chemicals
RTC4703A	Plan and implement a chemical use program
RTD4802A	Develop approaches to include cultural and human diversity
RTD4811A	Provide information on environmental issues and policies
RTF4005A	Develop a sports turf maintenance program

© Commonwealth of Australia, 2025 HumanAbility

RTF5008A	Plan the establishment of sports turf playing surfaces
SIRXINV004A	Buy merchandise
SIRXINV005A	Control inventory
SIRXMER004A	Manage merchandise and store presentation
SIRXMGT001A	Coordinate work teams
SIRXSLS005A	Manage sales and service delivery
SISCCRD302A	Recruit and manage volunteers
SISSSPA507A	Develop volunteer management policies
SISXCAI305A	Conduct individualised long term training programs
SISXFAC405A	Plan and provide sport and recreational services
SISXRES402A	Support implementation of environmental management practices
SISXRES403A	Use resources efficiently
SITXEVT005A	Organise in-house events or functions
SITXHRM003A	Roster staff
TAEDEL301A	Provide work skill instruction

© Commonwealth of Australia, 2025 HumanAbility

SIS40510 Certificate IV in Sport Coaching

Modification History

The following additions have been made to General Electives:

- SISSEQS301A Demonstrate basic dressage, show jumping and cross country riding
- SISSSAI402A Teach the advanced tactics and strategies of sailing
- Group D – Equestrian SISSEQS405A Teach the intermediate skills of riding over fences deleted from this group and placed into General Electives

Description

This qualification provides the skills and knowledge for an individual intending to pursue a career as a coach at a regional or State/Territory level. Likely functions for someone with this qualification include observing the performance of athletes to determine the required level of instruction, and planning, conducting and evaluating individualised and team training programs. Those with this qualification would also supervise practice sessions and provide in competition assistance to athletes which, includes supporting their psychological preparation and conducting post competition analysis of both performance and strategy.

Job roles

The following is an indicative job role for this qualification.

- coach

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

SIS40610 Certificate IV in Sport Development

Modification History

Not Applicable

Description

This qualification provides the skills and knowledge for an individual intending to pursue a career in sport development. Occupational outcomes for this qualification are varied with roles ranging from positions with specific expectations to those where a range of tasks are required. These may include liaising with a number of stakeholder groups to increase the profile of sport, implementing and administering junior sports programs or clinics within clubs and schools in specific sports, training coaches and teachers, recruiting young people, parents and volunteers to sport, and fixturing and scheduling competitions.

Job roles

The following are indicative job roles for this qualification:

- competition coordinator
- program coordinator
- sports development officer
- talent development coordinator

Pathways Information

Not Applicable

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY
The following table contains a summary of the employability skills required by the sport industry for this qualification. The employability skills facets described here are broad industry

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with stakeholder groups to improve the profile of the sport; liaising with volunteers, parents and school staff; preparing accurate records or reports on activities undertaken; clarifying instructions to participants and other staff in clinics or junior sport programs; effectively using body language and demonstration to reinforce technique instruction.
Teamwork	Providing leadership to a group of volunteers; monitoring progress and providing assistance where necessary; collaborating with other coaches and sport personnel to achieve agreed goals; promoting compliance with legal obligations; training teachers to deliver sport sessions; acknowledging accountability to sport management and other sport stakeholders.
Problem-solving	Identifying and mitigating hazards and risks related to sport development activities; clarifying the extent of, and resolving problems through negotiating with stakeholders in a sensitive and culturally appropriate manner; dealing with equipment breakdowns or facility unavailability; planning, strategy and resource allocation to design and deliver sport development activities and programs.
Initiative and enterprise	Identifying and discussing a range of activity or program enhancements to improve participation or sport profile; engaging colleagues in sharing work-place knowledge; actively engaging with sport and community stakeholders to build relationships; reflecting on own work practices for improvement; monitoring activities and programs for emerging risks.
Planning and organising	Collecting, analysing and recording information to provide efficient planning for sport development programs and activities; setting work priorities and scheduling staff and volunteer work activities to meet deadlines; preparing fixtures and scheduling competitions; implementing and monitoring occupational health and safety policies.
Self-management	Understanding and complying with the legal and ethical responsibilities that apply to own role within sports development and operating within limits of authority; critically reviewing own strengths and weaknesses; actively seeking and reflecting on feedback on own performance; building sport networks to regularly update knowledge and skills.

© Commonwealth of Australia, 2025 HumanAbility

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
Learning	Identifying and accessing sources of research on sport development; contributing to a learning environment through openly sharing knowledge and experiences; accessing internal and external professional development opportunities; updating knowledge and skills to accommodate changes in sport development.
Technology	Understanding and utilising the operating capability of computer systems and software for sport programming and promotion; using information technology to assist in communication and support management and planning functions.

Packaging Rules

18 units must be completed:

- 12 core units
- 6 electives which may be chosen from the electives in this qualification or from units first packaged at AQF level 3, 4 or 5 within SIS10; up to 3 of these may be selected from any current accredited course or other Training Package, and must be first packaged at AQF level 4

In all cases selection of electives must relate to the core function or role of the candidates current or intended work environment, local industry requirements and the characteristics of this qualification (as per the AQF descriptors).

Core (**12**)	
BSBSUS301A	Implement and monitor environmentally sustainable work practices
SISCCRD302A	Recruit and manage volunteers
SISSCGP201A	Apply legal and ethical coaching principles
SISSOGP301A	Conduct games or competitions
SISXCAI303A	Plan and conduct sport and recreation sessions
SISXCAI304A	Plan and conduct sport and recreation programs
SISXCCS404A	Address client needs
SISXEMR402A	Coordinate emergency responses

© Commonwealth of Australia, 2025 HumanAbility

SISXIND404A	Promote compliance with laws and legal principles
SISXIND405A	Conduct projects
SISXOHS402A	Implement and monitor occupational health and safety policies
SISXRSK301A	Undertake risk analysis of activities
General electives (**6**)	
RGRPSH401A	Relate anatomical and physiological features to the care and treatment of horses
RTE2104A	Carry out regular horse observation
RTE2121A	Provide daily care for horses
SISOEQO303A	Conduct horse riding sessions in an arena
SISOEQO304A	Apply first aid for horses
SISSCGP201A	Apply legal and ethical coaching practices
SISSCGP307A	Implement selection policies
SISSCGP308A	Provide drugs in sport information
SISSCGP413A	Implement a talent identification program
SISSCKT306A	Teach the intermediate skills of cricket
SISSCKT307A	Teach the intermediate tactics and strategies of cricket
SISSCNO302A	Teach the intermediate skills and tactics of flatwater canoeing
SISSCNO303A	Teach the intermediate skills and tactics of whitewater canoeing
SISSCNO304A	Teach the intermediate skills and tactics of canoe polo
SISSCOP202A	Develop a personal management plan
SISSCOP204A	Develop personal media skills
SISSCOP306A	Prepare a sponsorship proposal
SISSEQS301A	Demonstrate basic dressage, show jumping and cross-country riding
SISSEQS303A	Teach the fundamental skills of riding

© Commonwealth of Australia, 2025 HumanAbility

SISSOGP402A	Conduct a fitness and recovery program for officials
SISXCAI306A	Facilitate groups
SISXCCS402A	Coordinate client service activities

SIS50210 Diploma of Fitness

Modification History

The following additions have been made to General Electives:

- SISFFIT313A Plan and deliver exercise for apparently healthy children and adolescents
- SISFFIT314A Plan and deliver exercise to older clients with managed conditions

The following code correction/s have been made:

- code and unit title correction to cross sector Group – SISXRSK501A Manage risk deleted and changed to SISXRSK502A Manage organisational risks
- SISSST301A corrected to SISSSTC301A
- SISSST402A corrected to SISSSTC402A

Description

This qualification provides the skills and knowledge for an individual to be competent in a range of activities and functions within the fitness industry, including working collaboratively with medical and allied health professionals in a broad range of settings, such as fitness facilities, aquatic facilities, community facilities and in open spaces.

Those with this level of competency will be expected to provide exercise training to individual clients with specific needs, on a one-on-one or group basis, and may include older clients and children with chronic conditions.

Persons with this level of competency will have the ability to implement, evaluate and modify the exercise prescription provided by medical or allied health professionals for clients with specific conditions, within an agreed scope for progression as recommended by referring medical or allied health professionals.

Specialised exercise trainers will have the ability to monitor client progress and, in collaboration with medical or allied health professionals, utilise an evidence-based approach to deliver solutions by applying knowledge of physiology and anatomy and the pathology of specific medical conditions.

Job roles

- specialised exercise trainer

© Commonwealth of Australia, 2025 HumanAbility

Pathways Information

Not Applicable

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

Entry requirements

This qualification is designed for those existing fitness professionals have considerable experience in exercise delivery. Entry to this qualification is open to those who have achieved the following units of competency and have significant vocational experience in the fitness industry:

SISFFIT415A	Work collaboratively with medical and allied health professionals
SISFFIT416A	Apply motivational psychology to provide guidance on exercise behaviour and change to meet health and fitness goals
SISFFIT417A	Undertake long term exercise programming
SISFFIT418A	Undertake appraisals of functional movement
SISFFIT419A	Apply exercise science principles to planning exercise
SISFFIT420A	Plan and deliver exercise programs to support desired body composition outcomes
SISFFIT421A	Plan and deliver personal training
BSBSMB401A	Establish legal and risk management requirements of small business

While the nature and duration of the individual's vocational experience may vary according to the fitness business activity undertaken, evidence of the programming and delivery of a diverse range of fitness services to clients is required.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Consulting with medical or allied health professionals to obtain clear information about providing exercise for clients with specific needs; explaining to clients the benefits of recommended exercise prescription; providing clear information about the exercises and activities proposed or delivered; answering client's questions and providing support during delivery of fitness services.
Teamwork	Collaborating with medical and allied health professionals to take collective responsibility for innovation in delivering quality fitness services to clients; planning fitness service delivery to take into account team member strengths and weaknesses; providing support and coaching.
Problem-solving	Modifying exercise prescriptions within scope of this qualification; identifying issues related to client adherence to fitness programs and developing solutions by applying knowledge of physiology and anatomy and the pathology of specific medical conditions; identifying the need for referral back to, or consultation with medical or allied health professionals.
Initiative and enterprise	Monitoring of client progress and satisfaction and subsequently indentifying the most appropriate modifications to the exercise prescription or program, within the boundaries of scope and any contraindications present; using knowledge of current and emerging fitness and health industry trends to inform work practices.
Planning and organising	Information, time and resources are organised to ensure safe and effective delivery of services; monitoring plans, procedures and systems and participating in continuous improvement processes; specialised exercise trainers will need to manage interactions with medical and allied health professionals to deliver timely and effective services to clients.
Self-management	Understanding and complying with the legal and ethical responsibilities that apply to specialised exercise trainers; maintaining professional standards and demonstrating safe practices in all aspects of the services provided, identifying boundaries and determining when to refer clients to medical or allied health professionals
Learning	Utilising an evidence based approach to obtain and evaluate knowledge relevant to exercise prescription and programs;

SIS50310 Diploma of Outdoor Recreation

Modification History

The following pre requisite units have been inserted into Groups:

- Group J – Caving – Instruct – Multi pitch
  - SISOCVE302A Apply single pitch abseiling skills in caves
  - SISOCVE305A Apply caving specific single rope techniques
- Group K – Caving – Specialist – Sink hole diving, Group L – Caving – Specialist – Sump diving, Group M – Caving – Specialist cave diving
  - SISOSCB301A Scuba dive in open water to a maximum depth of 18 metres added to these groups
- Group W – Mountain biking – Instruct
  - SISOCYT202A Demonstrate basic cycling skills
  - SISOMBK201A Demonstrate basic off-road cycling skills added to the group

The following coding and unit errors have been rectified:

- Group F, Group G, Group H and Group I
  - the unit SISONAV201A is incorrect in these groups and has been corrected to SISONAV302A Apply navigation skills in an intermediate environment

Description

This qualification provides the skills and knowledge for an individual to be competent in planning, implementing and evaluating outdoor recreation programs and activities across a range of activity areas which include complex and non-routine situations. Work would be undertaken autonomously with responsibility for management, leadership of others and maintenance of resources. Work would be performed in and for field locations with varied contexts requiring contingency planning.

Job roles

The following are indicative job roles for this qualification:

- facilitator
- operations manager
- outdoor guide (uncontrolled environment)
- outdoor instructor
- program manager

© Commonwealth of Australia, 2025 HumanAbility

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

To gain entry into this qualification, it is advised that a current first aid certificate is held.

Entry to this qualification by persons without prior outdoor recreation industry experience or formal qualifications is not recommended.

Examples of sufficient relevant skills and knowledge for entry into the qualification may include:

- Previous qualification at the AQF level below
- Previous experience in the outdoor recreation industry and interest in outdoor pursuits

Entry into this qualification and progression between qualification levels will be based on the professional judgement of the RTO, in consultation with the individual.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
The following table contains a summary of the employability skills required by the outdoor recreation industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with stakeholder groups, facility owners and staff to identify specific needs; analysing documentation on outdoor recreation facility and equipment acquisition and maintenance; liaising with program and other staff; preparing accurate records or reports on program outcomes; educating staff on efficient use of resources; completing staff rosters; negotiating acceptable solutions to facility owner or staff requests and complaints.
Teamwork	Providing leadership to a team of workers; monitoring staff

SISOCVE416A	Apply cavern diving skills
SISOCVE518A	Apply cave diving skills
SISOCVE519A	Apply sinkhole diving skills
SISOSCB302A	Complete night dives
Group L - Caving - Specialist - Sump Diving	
SISOSCB301A	Scuba dive in open water to a maximum depth of 18 metres
SISOCVE416A	Apply cavern diving skills
SISOCVE518A	Apply cave diving skills
SISOCVE520A	Apply sump diving skills
SISOSCB302A	Complete night dives
Group M - Caving - Specialist Cave Diving	
SISOSCB301A	Scuba dive in open water to a maximum depth of 18 metres
SISOCVE416A	Apply cavern diving skills
SISOCVE518A	Apply cave diving skills
SISOCVE521A	Apply advanced cave diving skills
SISOSCB302A	Complete night dives
Group N - Climbing - Guide - Natural Surface - Multi Pitch - Lead	
SISOCLN406A	Apply multi pitch lead climbing skills on natural surfaces
SISOCLN407A	Establish belays for multi pitch climbing on natural surfaces
SISOCLN410A	Guide lead climbing activities on multi pitch natural surfaces
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR402A	Perform complex vertical rescues
Group O - Climbing - Guide - Natural Surface - Single Pitch - Lead	
SISOCLN303A	Establish belays for climbing on natural surfaces
SISOCLN405A	Apply single pitch lead climbing skills on natural surfaces

© Commonwealth of Australia, 2025 HumanAbility

SISOCLN408A	Guide lead climbing activities on single pitch natural surfaces
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR301A	Perform vertical rescues
Group P - Climbing - Instruct - Artificial Surface - Multi Pitch - Lead	
SISOCLA407A	Apply multi pitch lead climbing skills on artificial surfaces
SISOCLA408A	Establish belays for multi pitch climbing on artificial surfaces
SISOCLA510A	Instruct lead climbing on multi pitch artificial surfaces
SISOVTR301A	Perform vertical rescues
Group Q - Climbing - Instruct - Natural Surface - Multi Pitch - Lead	
SISOCLN406A	Apply multi pitch lead climbing skills on natural surfaces
SISOCLN407A	Establish belays for multi pitch climbing on natural surfaces
SISOCLN512A	Instruct lead climbing on multi pitch natural surfaces
SISOVTR402A	Perform complex vertical rescues
Group R - Climbing - Instruct - Natural Surface - Single Pitch - Lead	
SISOCLN303A	Establish belays for climbing on natural surfaces
SISOCLN405A	Apply single pitch lead climbing skills on natural surfaces
SISOCLN411A	Instruct lead climbing on single pitch natural surfaces
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOVTR301A	Perform vertical rescues
Group S - Equine Management	
SISOEQO409A	Train and condition horses
SISOEQO515A	Manage stable maintenance
SISOEQO516A	Manage the education of horses
Group T - Kayaking - Guide - White Water Grade 3	
SISOKYK406A	Demonstrate inland kayaking skills on Grade 3 water

© Commonwealth of Australia, 2025 HumanAbility

SISOKYK409A	Guide kayaking trips on Grade 3 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR403A	Perform complex white water rescues and recoveries
Group U - Kayaking - Instruct - White Water Grade 2	
SISOKYK303A	Apply inland kayaking skills on Grade 2 water
SISOKYK408A	Instruct kayaking skills on Grade 2 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR302A	Demonstrate white water rescues and recoveries
Group V - Kayaking - Instruct - White Water Grade 3	
SISOKYK406A	Demonstrate inland kayaking skills on Grade 3 water
SISOKYK510A	Instruct kayaking skills on Grade 3 water
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR403A	Perform complex white water rescues and recoveries
Group W - Mountain Biking - Instruct	
SISOCYT202A	Demonstrate basic cycling skills
SISOMBK201A	Demonstrate basic off-road cycling skills
SISOMBK302A	Apply advanced off-road cycling skills
SISOMBK404A	Instruct off-road cycling skills
SISONAV201A	Demonstrate navigation skills in a controlled environment
Group X - Personal Water Craft - Instruct - Advanced Skills	
SISOPWC303A	Ride personal water craft in moderate to difficult conditions
SISOPWC506A	Instruct advanced personal water craft riding skills

© Commonwealth of Australia, 2025 HumanAbility

Group Y - Rafting - Instruct	
SISORAF404A	Coordinate and manage white water rafting trips
SISORAF505A	Instruct rafting skills
SISOWWR403A	Perform complex white water rescues and recoveries
Group Z - Rafting - Trip Leader - Grade 3 Rapids	
SISONAV201A	Demonstrate navigation skills in a controlled environment
SISORAF403A	Guide a raft on Grade 4 rapids
SISORAF404A	Coordinate and manage white water rafting trips
SISOWWR201A	Demonstrate self rescue skills in white water
SISOWWR403A	Perform complex white water rescues and recoveries
Group AA - SCUBA - Instruct - Specialties	
SISOSCB301A	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB420A	Instruct specialised SCUBA diving skills
Group AB - Sea Kayaking - Guide - Moderate to Difficult Conditions	
PUAOPE002B	Operate communications systems and equipment
SISOCNE202A	Perform deep water rescues
SISOKYS304A	Demonstrate sea kayaking skills in moderate to difficult conditions
SISOKYS408A	Guide sea kayaking trips in moderate to difficult conditions
SISONAV302A	Apply navigation skills in an intermediate environment
SISOOPS203A	Interpret weather for marine environments
SISOWWR201A	Demonstrate self rescue skills in white water
Group AC - Sea Kayaking - Instruct - Moderate to Difficult Conditions	
PUAOPE002B	Operate communications systems and equipment
SISOCNE202A	Perform deep water rescues

SIS50410 Diploma of Sport and Recreation Administration

Modification History

Not Applicable

Description

This qualification provides the skills and knowledge for an individual wishing to work in the sport and recreation industry in an administrative or organisational capacity in locations such as fitness centres, outdoor sporting grounds or complexes or aquatic centres. Persons with this level of competency would manage the ancillary functions required to ensure the effective provision of specific services and programs and have a high degree of autonomy.

Job roles

- facility manager
- administration manager

Pathways Information

Not Applicable

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

Employability Skills Summary

EMPLOYABILITY SKILLS QUALIFICATION SUMMARY	
The following table contains a summary of the employability skills required by the sport and recreation industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on packaging options.	
Employability Skill	**Industry/enterprise requirements for this qualification include**:
Communication	Communicating with client populations and staff to determine their specific requirements; analysing documentation on sport and

SIS50510 Diploma of Sport Coaching

Modification History

The following additions have been made to General Electives:

- SISSRGL511A Teach high performance Rugby League game skills

The following pre requisite units have been inserted into Groups:

- Group A – Equestrian
  - SISOEQO409A Train and condition horses

Description

This qualification provides the skills and knowledge for an individual intending to pursue a career as a coach at an international level. Likely functions for someone with this qualification include observing high performance athletes to determine the level of instruction required, and planning, conducting and evaluating high performance individualised and team training programs. Those with this qualification would also supervise practice sessions and provide in competition assistance to athletes which includes supporting their psychological preparation and conducting post competition analysis of both performance and strategy. Outcomes would vary depending on the specialisation chosen

Job roles

The following is an indicative job role for this qualification

- coach

Pathways Information

This qualification is suitable for an Australian apprenticeship pathway.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of endorsement.

Entry Requirements

There are no entry requirements for this qualification.

SISSS00078 Pool Lifeguard

Modification History

Pool Lifeguard includes insertion of unit PUAEME001B Provide Emergency Care.

Description

Skill sets are applicable across several community recreation occupations where licensing and registration schemes exist. The following skill set has been identified to align to aquatic registration schemes.

Pathways Information

These units provide credit towards SIS30110 Certificate III in Aquatics.

Licensing/Regulatory Information

This Skill Set complies with NSW Practice Note 15 – Water Safety.

Skill Set Requirements

Units	Unit code	Unit title
	HLTFA301B	Apply first aid
	PUAEME001B	Provide Emergency Care
	PUAEME003C	Administer oxygen in an emergency situation
	SISCAQU202A	Perform basic water rescues
	SISCAQU306A	Supervise clients at an aquatic facility or environment
	SISCAQU307A	Perform advanced water rescues

Target Group

This skill set is for those wishing to gain pool lifeguard accreditation and aligns to the Royal Life Saving Society of Australia Pool Lifeguard accreditation.

© Commonwealth of Australia, 2025 HumanAbility

Suggested words for Statement of Attainment

These competencies from the Sport, Fitness and Recreation Training Package (SIS10) meet the skill and knowledge requirements under Royal Life Saving Society of Australia's Pool Lifeguard Award and complies with NSW Practice Note 15 - Water Safety.

SISSS00095 Swimming and Water Safety Teacher

Modification History

Not Applicable

Description

Skill sets are applicable across several community recreation occupations where licensing and registration schemes exist. The following skill set has been identified to align to aquatic registration schemes.

Pathways Information

These units provide credit towards SIS30110 Certificate III in Aquatics.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Skill Set Requirements

Units	Unit code	Unit title
	SISCAQU202A	Perform basic water rescues
	SISCAQU308A	Instruct water familiarisation, buoyancy and mobility skills
	SISCAQU309A	Instruct clients in water safety and survival skills
	SISCAQU310A	Instruct swimming strokes
	SISCCRO302A	Apply legal and ethical instructional skills

Target Group

This skill set is for those wishing to teach swimming.

© Commonwealth of Australia, 2025 HumanAbility

Suggested words for Statement of Attainment

These competencies from the Sport, Fitness and Recreation Training Package (SIS10) meet competency requirements for Swimming and Water Safety Teacher.

Disclaimer

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

SISSS00001 Abseiling Guide Multi Pitch (Natural Surfaces)

Modification History

Not applicable.

Description

The following Skills Set has been identified through consultation with the Outdoor Council of Australia (OCA), the peak body for the Outdoor Recreation industry and will be utilised as the basis for the registration requirements of programs like the National Outdoor Leader Registration Scheme (NOLRS).

Pathways Information

These units provide a credit towards SIS40310 Certificate IV in Outdoor Recreation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Skill Set Requirements

Units	Unit code	Unit title
	HLTFA301B	Apply first aid
	SISOABN202A	Safeguard an abseiler using a single rope belay system
	SISOABN303A	Apply single pitch abseiling skills on natural surfaces
	SISOABN304A	Establish ropes for single pitch abseiling on natural surfaces
	SISOABN305A	Guide abseiling on single pitch natural surfaces
	SISOABN406A	Apply multi pitch abseiling skills on natural surfaces
	SISOABN407A	Establish ropes for multi pitch abseiling on natural surfaces
	SISOABN409A	Guide abseiling on multi pitch natural surfaces
	SISOODR302A	Plan outdoor recreation activities
	SISOODR303A	Guide outdoor recreation sessions

© Commonwealth of Australia, 2025 HumanAbility

	SISOODR404A	Manage risk in an outdoor activity
	SISOOPS201A	Minimise environmental impact
	SISOOPS304A	Plan for minimal environmental impact
	SISOOPS305A	Provide first aid in a remote location
	SISOOPS306A	Interpret weather conditions in the field
	SISOOPS407A	Apply search and rescue skills
	SISOVTR402A	Perform complex vertical rescues
	SISXCAI306A	Facilitate groups
	SISXEMR201A	Respond to emergency situations
	SISXEMR402A	Coordinate emergency responses
	SISXOHS101A	Follow occupational health and safety policies
	SISXOHS402A	Implement and monitor occupational health and safety policies

Target Group

Those wishing to guide abseiling activities on natural surfaces which are multi pitch and which may be outdoors.

Suggested words for Statement of Attainment

These competencies from the Sport, Fitness and Recreation Training Package (SIS10) meet competency requirements for Multi Pitch Abseiling Guide (Natural Surfaces) and will be utilised as the basis for the registration requirements of programs like the National Outdoor Leader Registration Scheme (NOLRS).

The following Skills Set has been identified through consultation with the Outdoor Council of Australia (OCA), the peak body for the Outdoor Recreation industry and will be utilised as the basis for the registration requirements of programs like the National Outdoor Leader Registration Scheme (NOLRS).

Pathways Information

These units provide a credit towards SIS40410 Certificate IV in Outdoor Recreation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Skill Set Requirements

Units	Unit code	Unit title
	SISOCVE201A	Demonstrate caving skills
	SISOCVE302A	Apply single pitch abseiling skills in caves
	SISOCVE303A	Rig a ladder pitch
	SISOCVE304A	Apply laddering skills
	SISOCVE305A	Apply caving specific single rope techniques
	SISOCVE306A	Rig ropes and establish belays in caves
	SISOCVE417A	Instruct vertical single pitch caving skills
	SISONAV302A	Apply navigation skills in an intermediate environment
	SISOODR302A	Plan outdoor recreation activities
	SISOODR303A	Guide outdoor recreation sessions

© Commonwealth of Australia, 2025 HumanAbility

	SISOODR404A	Manage risk in an outdoor activity
	SISOOPS201A	Minimise environmental impact
	SISOOPS304A	Plan for minimal environmental impact
	SISOOPS305A	Provide first aid in a remote location
	SISOOPS306A	Interpret weather conditions in the field
	SISOVTR301A	Perform vertical rescues
	SISXCAI306A	Facilitate groups
	SISXEMR201A	Respond to emergency situations
	SISXEMR402A	Coordinate emergency responses
	SISXOHS101A	Follow occupational health and safety policies
	SISXOHS402A	Implement and monitor occupational health and safety policies
	TAEDEL301A	Provide work skill instruction

Target Group

Those wishing to instruct caving vertical single pitch.

Suggested words for Statement of Attainment

These competencies from the Sport, Fitness and Recreation Training Package (SIS10) meet competency requirements for a Caving Instructor Vertical Single Pitch and will be utilised as the basis for the registration requirements of programs like the National Outdoor Leader Registration Scheme (NOLRS).

The following Skills Set has been identified through consultation with the Outdoor Council of Australia (OCA), the peak body for the Outdoor Recreation industry and will be utilised as the basis for the registration requirements of programs like the National Outdoor Leader Registration Scheme (NOLRS).

Pathways Information

These units provide a credit towards SIS40410 Certificate IV in Outdoor Recreation.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Skill Set Requirements

Units	Unit code	Unit title
	SISOKYK406A	Demonstrate inland kayaking skills on Grade 3 water
	SISOKYK409A	Guide kayaking trips on Grade 3 water
	SISOODR302A	Plan outdoor recreation activities
	SISOODR303A	Guide outdoor recreation sessions
	SISOODR404A	Manage risk in an outdoor activity
	SISONAV201A	Demonstrate navigation skills in a controlled environment
	SISOOPS201A	Minimise environmental impact
	SISOOPS304A	Plan for minimal environmental impact
	SISOOPS305A	Provide first aid in a remote location
	SISOOPS306A	Interpret weather conditions in the field

© Commonwealth of Australia, 2025 HumanAbility

	SISOWWR201A	Demonstrate self rescue skills in white water
	SISOWWR302A	Demonstrate white water rescues and recoveries
	SISXCAI306A	Facilitate groups
	SISXEMR201A	Respond to emergency situations
	SISXEMR402A	Coordinate emergency responses
	SISXOHS101A	Follow occupational health and safety policies
	SISXOHS402A	Implement and monitor occupational health and safety policies

Target Group

Those wishing to guide kayaking activities on Grade 3 water.

Suggested words for Statement of Attainment

These competencies from the Sport, Fitness and Recreation Training Package (SIS10) meet competency requirements for a Kayaking Guide Grade 3 Water and will be utilised as the basis for the registration requirements of programs like the National Outdoor Leader Registration Scheme (NOLRS).

	SISSRGU205A	Officiate local or district level Rugby Union
	SISSRGU410A	Officiate advanced level Rugby Union
	SISXCAI101A	Provide equipment for activities
	SISXCAI306A	Facilitate groups
	SISXFAC201A	Maintain sport and recreation equipment for activities
	SISXIND404A	Promote compliance with laws and legal principles

© Commonwealth of Australia, 2025 HumanAbility

	SISXOHS101A	Follow occupational health and safety policies
	SISXRSK301A	Undertake risk analysis of activities

Target Group

This skill set is for those wishing to gain employment as an official in a competitive Rugby Union setting.

Suggested words for Statement of Attainment

These competencies from the Sport, Fitness and Recreation Training Package (SIS10) meet competency requirements for Rugby Union officials.

Disclaimer

Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

SISCAQU201A Monitor pool water quality

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to continually monitor the water quality of swimming pools and aquatic facilities, take corrective action and record test results.

Application of the Unit

This unit applies to those working as pool attendants or aquatic operators in various aquatic environments, such as council or commercially operated aquatic and leisure centres. Work may be carried out under supervision or with some degree of autonomy, depending on the individual situation and job role.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be

© Commonwealth of Australia, 2025 HumanAbility

consistent with the Evidence Guide.

1. Conduct pool water tests.	1.1. Complete ***routine pool water tests*** according to ***public health regulatory requirements***, ***organisational policies and procedures*** and ***relevant legislation***.
	1.2. Compare and interpret pool water test results with public health regulatory requirements.
	1.3. Report pool water test irregularities to aquatic facility or to service personnel for corrective action.
	1.4. Respond to contamination incidents according to public health regulatory requirements, organisational policies and procedures and relevant legislation.
	1.5. Perform continual visual checks of ***pool water quality*** and initiate corrective actions.
2. Record results.	2.1. Record routine pool water test results according to aquatic facility specifications and public health regulatory requirements.
	2.2. Update swimming pool log according to aquatic facility specifications and organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - report irregularities to aquatic facility or service personnel
  - initiate corrective actions
- problem-solving skills to:
  - conduct a variety of routine pool water tests
  - identify irregularities in results
  - respond to contamination incidents
- planning and organisational skills to conduct regular pool water tests according to facility schedule
- literacy skills to:
  - record pool water test results
  - update swimming pool log
- numeracy skills to identify and interpret routine test results.

© Commonwealth of Australia, 2025 HumanAbility

Required knowledge

- legislation and organisational policies and procedures that enable:
  - safe conduct of pool water tests
  - appropriate response to contamination incidents
  - correct maintenance of swimming pool logs
- public health regulatory requirements and aquatic facility specifications for:
  - comparing and interpreting pool water test results
  - recording pool water test results
- pool water chemistry to understand scientific terms related to tests such as pH levels, alkalinity, chlorine, bromine, temperature and calcium hardness
- equipment and resources used for testing pool water quality.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • conducts pool water tests and reports irregularities to aquatic facility or service personnel promptly, according to public health regulatory requirements and organisational policies and procedures • records pool water test results and updates pool log according to organisational policies and procedures and relevant legislation • performs routine visual checks for pool water quality and proposes corrective actions in response to contamination incidents.
Context of and specific resources for assessment	Assessment must ensure conduct of regular pool water tests to monitor water quality over a realistic aquatic facility timeframe. Assessment must also ensure access to: • an aquatic facility with a suitable pool • equipment, resources and pool water testing apparatuses to test water quality • public health regulatory requirements, relevant

© Commonwealth of Australia, 2025 HumanAbility

legislation and organisational policies and procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate using pool water testing apparatuses and equipment
- oral or written questioning to assess knowledge of the application of routine pool water quality tests
- observation of reading and recording test results
- portfolio of written recordings detailing test irregularities, pool water test results and log updates
- third-party reports from a supervisor detailing the candidate's performance on the job.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXOHS101A Follow occupational health and safety policies

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Routine pool water tests may include:

- free chlorine
- total bromine
- total chlorine
- combined chlorine
- pH
- alkalinity
- cyanuric acid
- calcium hardness
- total hardness
- temperature.

Public health regulatory requirements may include:

- health and poisons acts
- infectious diseases regulations
- dangerous goods act and regulations
- metropolitan water supply, sewerage and

© Commonwealth of Australia, 2025 HumanAbility

	drainage by-laws • occupational health and safety act • environment legislation • local government regulations.
Organisational policies and procedures may include:	• occupational health and safety • communication protocols • use and maintenance of equipment and resources • reporting and record keeping • emergency and risk management procedures.
Relevant legislation may include:	• occupational health and safety • dangerous goods • environment.
Pool water quality may include:	• microbiological • disinfectant • pH • clarity.

SISCAQU202A Perform basic water rescues

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify and evaluate aquatic emergencies and respond appropriately with basic water rescues that incorporate cardiopulmonary resuscitation (CPR). These situations will usually require an individual response.

Application of the Unit

This unit applies to those working in indoor or outdoor aquatic facilities, such as pool lifeguards or aquatic educators teaching water familiarisation, learn-to-swim and water safety classes in swimming pools or confined natural shallow water venues. It also applies to those instructing canyoning and snorkelling activities.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a Unit of Competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. with the Evidence Guide.

1. Identify and evaluate aquatic emergencies.	1.1. Recognise the ***signs and signals*** of a person in difficulty. 1.2. Assess situation to determine appropriate ***response*** to ***aquatic emergency***, according to ***accepted best practice principles of aquatic rescues***, ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Identify and assess immediate ***hazards*** and ***risks*** to self and ***others***.
2. Apply the principles of a basic water rescue.	2.1. Determine the type of rescue required and promptly formulate a ***rescue plan*** according to relevant legislation and organisational policies and procedures. 2.2. Access ***equipment*** as required. 2.3. Perform ***basic water rescue*** according to accepted best practice principles of aquatic rescues. 2.4. Monitor the condition of the casualty and plan course of action. 2.5. Provide appropriate ***treatment*** according to ***industry standards*** and organisational policies and procedures.
3. Record and report the incident.	3.1. Record details of the incident and the action taken using appropriate forms, according to organisational policies and procedures. 3.2. Notify appropriate personnel and statutory authorities of the incident.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:
  - identify factors leading to aquatic emergencies
  - assess and evaluate emergencies and determine the appropriate rescue technique for the situation and location
- communication skills to:
  - alert others to the situation
  - delegate tasks during aquatic emergencies
  - provide reassurance to casualties and bystanders

© Commonwealth of Australia, 2025 HumanAbility

- planning and organisational skills to:
  - allocate relevant equipment under pressure to aid in rescue
  - devise a rescue plan after assessing the situation
- monitoring and observational skills to identify aquatic emergencies requiring basic water rescues
- swimming, defensive swimming and towing skills to perform basic swimming rescues
- fitness and strength level to perform basic non-swimming water rescues
- cardiopulmonary resuscitation techniques to provide an initial response to emergencies.

Required knowledge

- legislation, organisational policies and procedures and industry standards to enable:
  - the safe conduct of water rescues
  - accurate completion of incident documentation
- use and location of equipment types to effect prompt rescues
- swimming and non-swimming rescue methods to enable appropriate responses to aquatic emergencies
- characteristics and features of water environments, such as pools or canyons, and safe rescue techniques appropriate to the conditions and location
- communication systems used during rescues to inform managers, other employees and emergency services of progress
- potential dangers in a range of aquatic environments and how to respond to them
- cardiopulmonary resuscitation techniques to provide an initial response to emergencies.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies the common signs and signals of a person experiencing difficulties in the water and promptly determines possible contributing factors and formulates a suitable rescue plan • performs all basic water rescue techniques in the water while maintaining own safety • monitors condition of affected person, applies appropriate treatment

© Commonwealth of Australia, 2025 HumanAbility

	• recognises issues that arise during rescues and makes appropriate adjustments to ensure safety of self and others, according to organisational policies and procedures and relevant legislation • accurately reports incidents and notifies other relevant personnel according to organisational policies and procedures.
Context of and specific resources for assessment	Assessment must ensure performance of all swimming and non-swimming basic rescues and performance of cardiopulmonary resuscitation. Assessment must also ensure access to: • an aquatic environment appropriate to the candidate's current or intended work role, such as a swimming pool or confined natural shallow water venue • suitable participants to enable demonstration of water rescue techniques • CPR mannequins • equipment such as flotation devices, first aid facilities and equipment, ropes and reaching poles.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of aquatic emergency situations and basic water rescues • direct observation of the candidate safely participating in and demonstrating swimming and non-swimming water rescues incorporating cardiopulmonary resuscitation • third-party reports from a supervisor detailing candidate's performance on the job. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 HumanAbility

Signs and signals may include:

- call for help
- vertical body position
- minimal or non-supportive leg action
- vigorous arm movements
- submerged or unconscious person.

Response may include:

- type of rescue
- number of people in difficulty
- assistance
- leaving existing role to assist
- promptly organising a suitable replacement
- contacting emergency services.

Aquatic emergency may include:

- envenomation by aquatic animals
- sudden unconsciousness
- spinal injury
- drowning
- heart attack
- severe bleeding
- epileptic seizure
- severe asthma attack.

Accepted best practice principles of aquatic rescues may include:

- accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks to the casualty, bystanders and rescuer
- guidelines and codes of conduct
  - Royal Life Saving Society Australia
  - Surf Life Saving Australia
- national, state and territory or local government regulations and guidelines
- the culture of lifesaving
- current and past good practice demonstrated by self or peers in the same or similar situation.

Relevant legislation may include:

- occupational health and safety legislation
- duty of care regulations
- working with children requirements.

Organisational policies and procedures may include:

- occupational health and safety
- use and care of lifesaving equipment
- communication protocols
- safety, rescue and emergency procedures
- incident reporting.

Hazards may include:

- slippery surfaces around pools
- deep or shallow water
- currents

© Commonwealth of Australia, 2025 HumanAbility

- strong wind
- risk taking behaviour.

Risks may include:

- imminent drowning
- injury
- hypothermia
- cramps
- choking
- submersion or injury of rescuer.

Others may include:

- bystanders
- staff
- other facility users
- parents
- emergency services.

Rescue plan may include:

- self-preservation
- available assistance
- selection of rescue aids
- number of people in difficulty
- priorities of rescue
- type of rescue.

Equipment may include:

- flotation devices
- ropes
- reaching poles
- pool safety equipment.

Basic water rescue must include:

- non-swimming rescues:
  - reach rescue
  - rope throw rescue
  - throw a flotation aid
- swimming rescues:
  - accompanied rescue
  - wade rescue
  - non-contact tow
  - contact tow
  - water search procedures
  - vice grip and extended arm roll-over techniques
  - defensive techniques including blocking, blocking with an aid, reverses
  - escape techniques including escape from front and rear grasps.

Treatment may include:

- danger, response, airway, breathing, circulation routine

© Commonwealth of Australia, 2025 HumanAbility

	• expired air resuscitation • cardiopulmonary resuscitation • injury, illness or shock related treatment.
Industry standards may include:	• Australian Resuscitation Council standards • first aid techniques and standards.

LEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Conduct routine checks.	1.1. Perform routine inspections of ***aquatic facility plant and equipment*** according to ***public health regulatory requirements***. 1.2. Conduct ***routine checks of electrical and plumbing appliances*** according to ***organisational policies and procedures*** and ***relevant legislation***.
2. Maintain and manage aquatic facility plant and equipment.	2.1. Carry out routine maintenance of aquatic facility plant and equipment using appropriate ***resources*** according to manufacturer's guidelines and organisational policies and procedures. 2.2. Monitor use and condition of equipment and facility according to established routines and procedures. 2.3. Record equipment and facility use and document any conditions that require further action according to organisational policies and procedures. 2.4. Isolate and report faults and irregularities according to organisational policies and procedures.
3. Initiate corrective action.	3.1. Remove, replace and repair faulty and defective equipment or facilities, within designated responsibility and according to manufacturer's guidelines and organisational policies and procedures. 3.2. Notify aquatic facility or service personnel of faults and any corrective actions initiated. 3.3. Record action taken according to organisational policies and procedures and public health regulatory requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - report irregularities and faults to aquatic facility or service personnel
  - initiate corrective action
- problem-solving skills to:
  - conduct routine checks of aquatic facility plant, equipment and electrical and

plumbing appliances
  - identify irregularities, defects and faults in equipment and or facility
  - respond to common maintenance problems
- planning and organisational skills to:
  - select resources to assist in the maintenance of aquatic facility plant and equipment
  - carry out checks of equipment and facility
- literacy skills to:
  - record equipment and facility use
  - document conditions and irregularities
  - record action taken
- first aid skills and treatment procedures related to plant and equipment accidents.

Required knowledge

- legislation and organisational policies and procedures that enable:
  - safe monitoring and maintenance of plant and equipment
  - accurate reporting of faults and irregularities
  - timely repair of faulty and defective equipment within designated responsibility
- public health regulatory requirements to:
  - conduct routine inspections of plant and equipment
  - record corrective action taken
- organisational reporting lines and appropriate service personnel to notify regarding faults and irregularities
- resources required for the maintenance and management of aquatic facility plant and equipment.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • conducts thorough routine inspections of aquatic facility plant, equipment, and electrical and plumbing appliances to ensure safety and health of public • identifies faults and irregularities of plant and equipment and initiates corrective action according to organisational policies and procedures and

© Commonwealth of Australia, 2025 HumanAbility

manufacturer's specifications
- monitors and records use and condition of facility and equipment
- documents and reports faults and irregularities to aquatic facility or service personnel and documents corrective action initiated.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- a suitable first aid qualification.

Context of and specific resources for assessment

Assessment must ensure the safe and timely operation of aquatic facility plant and equipment on sufficient occasions to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- an aquatic facility plant and equipment
- resources to maintain facility and equipment and keep records
- public health regulatory requirements, relevant legislation and organisational policies and procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate inspecting and maintaining aquatic facility plant and equipment
- oral or written questioning to assess knowledge of procedures for plant and equipment operation
- portfolio of candidate's written records and documentation detailing facility and equipment irregularities and action taken
- third-party reports from a supervisor detailing candidate's performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU305A Implement aquatic facility plant and equipment maintenance program

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Aquatic facility plant and equipment may include:

- circulation plant
- heating, lighting and ventilation systems
- electrical control units
- electrical appliances
- self-contained breathing apparatus.

Public health regulatory requirements may include:

- health and poisons acts
- infectious diseases regulations
- dangerous goods act and regulations
- metropolitan water supply, sewerage and drainage by-laws
- environment legislation
- local government regulations.

Routine checks of electrical and plumbing appliances may include:

- power supply and circuits
- water supply and drainage systems
- electronic and mechanical operation
- circuit breakers
- batteries and fuses
- electrical hazards
- water supply faults
- water related hazards.

Organisational policies and procedures may include:

- occupational health and safety
- chemical handling procedures
- backwash procedures
- filtration processes
- isolation procedures
- communication protocols
- use and maintenance of resources
- reporting and record keeping.

Relevant legislation may include:

- occupational health and safety
- infectious diseases regulations
- relevant dangerous goods act and regulations
- metropolitan water supply, sewerage and drainage by-laws
- relevant environment legislation

© Commonwealth of Australia, 2025 HumanAbility

Resources may include:

- local government regulations.
- cleaning materials and equipment
- hand tools
- record keeping materials
- spare parts.

    - maintain disinfectant levels and chemical balance of pool water
- planning and organisational skills to:
    - collect and organise pool information
    - develop safe processes for the use of chemicals
- literacy skills to:
    - record pool water test results and corrective actions implemented
    - interpret aquatic facility's treatment operating plan
- numeracy skills to calculate the amount of chemicals required to correct chemical imbalances
- first aid skills to implement procedures related to pool water chemical accidents.

Required knowledge

- legislation and organisational policies and procedures that enable:
    - completion and monitoring of pool water tests
    - use and maintenance of chemical dosing equipment
    - development and implementation of schedules for microbiological testing and chemical use
    - accurate and timely record keeping
- public health regulatory requirements to:
    - implement processes for chemical use
    - calculate chemical requirements
- pool water chemistry to understand scientific terms related to tests such as pH levels, alkalinity, chlorine, bromine, temperature and calcium hardness
- plant and equipment operation, chemical dosing equipment and relevant resources used for testing, treating and maintaining pool water quality.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

© Commonwealth of Australia, 2025 HumanAbility

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- develops and implements schedules for pool water microbiological testing and safely uses and calculates chemicals to maintain chemical balance of pool water
- anticipates bather loadings and takes corrective action to ensure public health and safety
- operates chemical dosing equipment for the treatment of pool water
- updates pool records with information detailing water quality test results and corrective action taken.

Context of and specific resources for assessment

Assessment must ensure:

- conduct of regular pool water quality tests and monitoring of results on sufficient occasions to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a suitable aquatic facility
- equipment and resources required for the maintenance of pool water quality
- public health regulatory requirements, relevant legislation and organisational policies and procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate safely handling chemicals, equipment and resources
- oral or written questioning to assess knowledge of procedures for pool water testing and treatment
- observation of the candidate calculating chemical requirements to correct imbalances
- portfolio of written recordings detailing pool water test results and corrective action taken
- third-party reports from a supervisor detailing the candidate's performance on the job.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU303A Operate aquatic facility plant and equipment

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Routine pool water tests may include:

- free chlorine
- total bromine
- total chlorine
- combined chlorine
- pH
- alkalinity
- cyanuric acid
- calcium hardness
- total hardness
- temperature.

Public health regulatory requirements may include:

- health and poisons acts
- infectious diseases regulations
- dangerous goods act and regulations
- metropolitan water supply, sewerage and drainage by-laws
- environment legislation
- local government regulations.

Organisational policies and procedures may include:

- occupational health and safety
- use and maintenance of equipment and resources
- emergency and risk management procedures
- chemical handling procedures
- backwash procedures
- filtration processes
- isolation procedures
- communication protocols
- reporting and record keeping.

Relevant legislation may include:

- occupational health and safety
- relevant dangerous goods act
- relevant environment legislation.

Pool water microbiological testing may include:

- standard plate count
- coliform count
- pseudomonas aeruginosa

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT

	• legionella • staphylococcus • cryptosporidium.
Pool water quality may include:	• microbiological count • pH • clarity levels.
Water treatment procedures may include:	• chemical disinfection • electrolytic generation of chlorine • superchlorination • shock dosing • dechlorination • chlorine stabilisation with cyanuric acid • control of algae • ozonisation • ultraviolet radiation • alkalinity adjustments • calcium and total hardness adjustments • lowering total dissolved solids • pool water filtration and recirculation • backwashing • manual removal of visible contaminants.

SISCAQU305A Implement aquatic facility plant and equipment maintenance program

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to safely implement an aquatic facility plant and equipment maintenance program. This involves maintaining plant and equipment, diagnosing faults, responding to unsafe or failed plant and equipment and reviewing the effectiveness of the maintenance program.

Application of the Unit

This unit applies to those working independently as aquatic operators or managers in various aquatic environments, such as council or commercially operated aquatic and leisure centres. This may also include those coordinating and supervising others in the aquatic environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Maintain aquatic facility plant and equipment.	1.1. Carry out regular monitoring of ***aquatic facility plant and equipment*** condition. 1.2. Identify potential problems with plant and equipment and record details according to ***organisational policies and procedures***. 1.3. Implement preventative maintenance systems for aquatic facility plant and equipment for the long-term protection of assets according to ***relevant legislation***, organisational policies and procedures and manufacturer's specifications.
2. Diagnose faults.	2.1. Erect clear and noticeable warning signs around aquatic facility plant and equipment that is being repaired. 2.2. Assess failed or unsafe aquatic facility plant and equipment according to organisational policies and procedures. 2.3. Identify faults and, where possible, determine the underlying cause.
3. Respond to failed or unsafe aquatic facility plant and equipment.	3.1. Erect clear and noticeable warning signs around aquatic facility plant and equipment that is being repaired. 3.2. Carry out repairs within designated responsibility according to manufacturer's recommendations and standards, ***public health regulatory requirements*** and organisational policies and procedures. 3.3. Take defective equipment and or facilities out of operation according to organisational policies and procedures. 3.4. Make arrangements for required repairs to be carried out by qualified and or licensed contractors according to relevant legislation. 3.5. Record actions taken according to organisational policies and procedures and relevant legislation.
4. Review maintenance program.	4.1. Evaluate maintenance program to ensure short- and long-term maintenance requirements of the facility are met.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	4.2. Schedule maintenance activities to minimise disruption to facility users and ensure that ***supplies*** are available. 4.3. Integrate maintenance program with asset acquisition and disposal plans. 4.4. Identify and use acceptable alternative maintenance methods to maintain cost-effective program as required.

Required Skills and Knowledge

is section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - make suitable arrangements with qualified contractors to repair failed or unsafe aquatic plant and equipment
  - consult with others when reviewing the maintenance program
  - problem-solving skills to:
  - review maintenance programs
  - monitor and respond to failed or unsafe facility plant and equipment
- planning and organisational skills to:
  - carry out maintenance that minimises disruption to the facility users
  - ensure all required supplies are available
- literacy skills to:
  - record details of failed or unsafe plant or equipment and corrective actions taken
  - ensure clarity of warning signs for public safety during repair processes
- numeracy skills to maintain cost-effective maintenance plans
- first aid skills and treatment procedures related to plant and equipment accidents.

Required knowledge

- legislation and organisational policies and procedures that enable:
  - implementation of effective preventative maintenance systems
  - assessment of failed or unsafe aquatic plant and equipment
- public health regulatory requirements to carry out repairs within designated responsibility
- maintenance planning procedures and qualified and or licensed contractors to repair plant and equipment when required

© Commonwealth of Australia, 2025 HumanAbility

- resources and supplies required to maintain and manage aquatic facility plant and equipment.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • conducts regular monitoring of use and condition of aquatic facility plant and equipment and identifies potential problems and faults • responds to plant and equipment failures and faults and repairs within designated responsibility or makes arrangements for qualified contractors to carry out repairs as required • records details of failed or unsafe plant or equipment and corrective actions taken.
Context of and specific resources for assessment	Assessment must ensure: • implementation and review of aquatic facility and equipment maintenance program on multiple occasions to demonstrate competency and consistency of performance • access to an aquatic facility plant and equipment • access to resources to maintain facility and equipment and to keep records • access to qualified contractors • access to public health regulatory requirements, relevant legislation, and organisational policies and procedures.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the candidate assessing failed or unsafe facility plant and equipment • oral or written questioning to assess candidate's knowledge of procedures and processes for plant and equipment operation and maintenance • portfolio of written records detailing unsafe or failed

plant and equipment and corrective action taken
- third-party reports from a supervisor detailing candidate's performance on the job.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU303A Operate aquatic facility plant and equipment

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Aquatic facility plant and equipment may include:

- circulation plant
- heating systems
- lighting and ventilation systems
- electrical control units
- electrical appliances
- self-contained breathing apparatus.

Organisational policies and procedures may include:

- occupational health and safety
- communication protocols
- use and maintenance of resources
- emergency and risk management procedures
- chemical handling procedures
- backwash procedures
- filtration processes
- isolation procedures
- procedures for disposal of dangerous materials
- reporting and record keeping.

Relevant legislation may include:

- occupational health and safety
- public health regulations
- infectious diseases regulations
- relevant dangerous goods act and regulations
- metropolitan water supply, sewerage and drainage by-laws
- relevant environment legislation
- local government regulations.

SISCAQU306A Supervise clients at an aquatic facility or environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to supervise clients at an aquatic recreation facility or environment to minimise risk.

Application of the Unit

This unit applies to those working in aquatic settings or environments such as swimming pools and aquatic recreation facilities and may include pool lifeguards, aquatic operators and swimming teachers.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 HumanAbility

1. Identify potential hazardous behaviours and situations.	1.1. Access the organisation's risk management plan. 1.2. Identify ***hazardous behaviour and activities*** for ***clients*** utilising the ***aquatic facility or environment***. 1.3. Identify ***clients at risk*** or those who have specific needs. 1.4. Identify ***environmental hazards*** for clients utilising the aquatic facility or environment 1.5. Promote compliance with safety rules of aquatic facility to clients 1.6. Identify supervision requirements according to ***relevant legislation***, ***industry codes*** and ***organisational policies and procedures*** and select supervision techniques appropriate to the nature of the facility or environment.
2. Maintain a safe aquatic facility or environment.	2.1. Monitor client behaviour and activities according to relevant legislation and organisational policies and procedures. 2.2. Identify behaviour and activities posing a risk to the individual or other facility users. 2.3. Inform clients of unacceptable behaviour or actions according to organisational policies and procedures. 2.4. Take action to remove clients who persist in unsafe behaviour, according to organisational policies and procedures.
3. Assess possible emergency or rescue situations.	3.1. Identify ***signs of possible casualty or difficulty***. 3.2. Assess situation to determine appropriate ***response*** to ***emergency*** according to ***accepted best practice principles of aquatic rescues***, relevant legislation and organisational policies and procedures. 3.3. Communicate emergency situation to appropriate personnel according to organisational policies and procedures. 3.4. Report and record incidents according to organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:

© Commonwealth of Australia, 2025 HumanAbility

  - identify factors leading to unsafe situations
  - determine appropriate course of action to minimise risks to clients
- communication skills to:
  - promote compliance with safety rules and regulations
  - inform clients of unacceptable behaviour or actions and deal with potential conflict
  - respond to and report aquatic emergencies
- planning and organisational skills to devise an appropriate response after assessing an emergency situation
- language and literacy skills to:
  - access and interpret the organisation's risk management plan
  - document emergency incidents
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures that enable:
  - identification and fulfilment of supervision requirements
  - monitoring of client behaviour and activities
  - reporting and recording of incidents and emergency situations
- industry standards that enable the provision of a safe environment for client activities and appropriate response to emergencies
- potential dangers or hazards commonly encountered in aquatic environments and how to ensure safe conduct and supervision of client activities
- first aid, emergency and rescue procedures appropriate to the conditions to ensure risk minimisation
- characteristics and needs of individuals who may be at risk to enable effective supervision and response
- signs and symptoms of physical injury to enable prompt response in an emergency
- hazardous behaviour and activities that pose risks to clients and how to identify and deal with them quickly and safely
- conflict resolution techniques to deal with difficult or aggressive clients.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and Evidence of the following is essential:

© Commonwealth of Australia, 2025 HumanAbility

evidence required to demonstrate competency in this unit

- identifies behaviours and actions that pose a risk to the range of clients commonly encountered in aquatic facilities or environments
- determines and actions appropriate responses according to the organisation's risk management plan and own level of responsibility
- monitors and supervises client activity discreetly and takes prompt action within own level of responsibility to maintain a safe aquatic facility or environment at all times
- uses effective communication techniques to monitor and manage the behaviour of clients and to document incidents
- identifies the common signs and signals of a person experiencing difficulties in the water and determines and actions the most appropriate response.

Context of and specific resources for assessment

Assessment must ensure:

- participation in supervisory duties on multiple occasions to demonstrate consistency of performance
- access to an aquatic facility or environment
- access to a range of participants
- access to organisational policies and procedures appropriate to risk management
- access to appropriate personnel
- access to incident reporting documentation
- access to first aid facilities and equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of signs indicating client difficulty especially as regards high risk clients
- observation of candidate responding to unacceptable behaviour and actions by clients in an aquatic environment
- third-party reports from a supervisor detailing performance
- portfolio containing completed incident reports.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU202A Perform basic water rescues
- SISXRSK301A Undertake risk analysis of activities

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazardous behaviour and activities may include:	• misusing equipment • swimming in unsafe areas • behaving with disregard for the safety of others or self • chewing gum while swimming • diving into shallow water • consuming alcohol or illegal drugs.
Clients may include:	• participants • care-givers • members • volunteers • facility owners • spectators • staff.
Aquatic facility and environments may include:	• pools and spas • pool surrounds • play equipment • shower and changing areas • lakes, rivers and dams • beaches.
Clients at risk may include:	• drug or alcohol affected • overweight • elderly • people with a disability • weak or non-swimmers • injured swimmers • new facility users • young children.
Environmental hazards may include:	• weather conditions • reflective glare • water clarity or turbidity • rips

© Commonwealth of Australia, 2025 HumanAbility

- shallow water.

Relevant legislation may include:

- occupational health and safety
- duty of care regulations
- working with children regulations
- dangerous goods act and regulations
- environment legislation
- anti-discrimination legislation.

Industry codes may include:

- guidelines or code of conduct policies developed by peak bodies responsible for lifesaving:
  - Royal Life Saving Society Australia
  - Surf Life Saving Australia and relevant state or territory surf life saving organisation.

Organisational policies and procedures may include:

- occupational health and safety
- use and care of equipment
- communication protocols
- safety, rescue and emergency procedures
- incident reporting
- risk management
- behaviour management.

Signs of possible casualty or difficulty may include:

- lack of movement
- arm waving
- calling for help.

Response may include:

- type of rescue
- required assistance
- available assistance
- required emergency services.

Emergency may include:

- envenomation by aquatic animals
- spinal injury
- drowning
- heart attack
- severe bleeding
- multiple victims.

Accepted best practice principles of aquatic rescues may include:

- accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks
- Royal Life Saving Society Australia guidelines and code of conduct policies
- the culture of lifesaving.

SISCAQU307A Perform advanced water rescues

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify and evaluate a major aquatic emergency and perform an advanced water rescue. These situations will usually involve a team response.

Application of the Unit

This unit applies to pool lifeguards in swimming pools and confined natural shallow water venues. It may also apply to those conducting water familiarisation, learn-to-swim and water safety classes in venues where a pool lifeguard is not available.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

HLTFA301B Apply first aid

SISCAQU202A Perform basic water rescues

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify and evaluate major aquatic emergencies.	1.1. Recognise ***factors which contribute to major aquatic emergencies***. 1.2. Recognise the ***signs and signals*** of the ***aquatic emergency***. 1.3. Communicate initial assessment to ***appropriate personnel*** according to ***accepted best practice principles of aquatic rescues***, ***relevant legislation*** and ***organisational policies and procedures***. 1.4. Identify an appropriate ***emergency response*** for the situation and the people involved Promote compliance with safety rules of aquatic facility to clients.
2. Respond to the emergency.	2.1. Activate emergency systems according to organisational policies and procedures. 2.2. Implement ***strategies for group control*** according to relevant legislation and organisational policies and procedures. 2.3. Assess the ***factors*** impacting on the ***advanced water rescue*** and formulate a ***rescue plan***. 2.4. Determine ***involvement of others*** according to the nature of the emergency, relevant legislation and organisational policies and procedures. 2.5. Determine the type of rescue required and ***rescue equipment*** needed. 2.6. Identify hazards and appropriate action taken to prevent further injury to the casualty. 2.7. Perform an advanced water rescue in accordance with accepted best practice principles of aquatic rescues.
3. Assess the casualty.	3.1. Observe and assess the condition of the casualty. 3.2. Assess vital signs and symptoms of shock according to accepted first aid procedures. 3.3. Provide appropriate treatment according to accepted ***first aid techniques and standards***.
4. Organise further emergency care as required.	4.1. Make contact with emergency services as soon as possible. 4.2. Provide accurate information to emergency services

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	to obtain the required assistance. 4.3. Monitor casualty or arrange further treatment until emergency response team assumes responsibility.
5. Record and report the incident.	5.1. Complete required documentation according to relevant legislation and organisational policies and procedures. 5.2. Notify other personnel and statutory authorities of the incident as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - assert group control
  - reassure casualties and bystanders
  - provide clear and accurate information to emergency authorities
- literacy skills to accurately complete incident documentation
- problem-solving skills to promptly assess aquatic emergencies and formulate appropriate rescue plans
- teamwork skills to:
  - organise staff and bystanders
  - delegate tasks to enable effective rescues
- ability to retrieve an object from the deepest water within the aquatic environment, no greater than 3 metres; if depth is greater than 3 metres assistance may be used, e.g. fins
- ability to complete a 25 metre swim and 25 metre tow with assisted landing in less than 1 minute and 45 seconds
- fitness and strength level to swim 200 metres in less than 6 minutes.

Required knowledge

- legislation and organisational policies and procedures that enable the safe and appropriate conduct of all activities
- factors contributing to aquatic emergencies to enable prompt and accurate assessment of emergency situations
- accepted best practice principles of aquatic rescues to enable prompt and appropriate responses to major aquatic emergencies
- signs and signals of people in difficulty to enable prompt recognition of emergency situations

© Commonwealth of Australia, 2025 HumanAbility

- first aid techniques and standards to enable provision of safe and effective response and treatment of casualties
- types and characteristics of water rescue equipment used in advanced water rescue to enable its safe and effective use
- roles of lifeguards and other personnel during major aquatic emergencies to enable effective emergency responses.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies the signs and signals of a person experiencing difficulties in the water and determines possible contributing factors to enable prompt assessment and formulation of a suitable rescue plan • determines appropriate rescue types and participates as part of a team in rescues in the water that involve more than one casualty • demonstrates the use of spine-boards, spinal immobilisation collars, oxygen supplemented resuscitation and oxygen therapy on sufficient occasions to demonstrate competency and consistency of performance • monitors, accurately assesses and treats casualties and communicates effectively with emergency services • accurately reports incidents and notifies other relevant personnel according to relevant legislation and organisational policies and procedures.
Context of and specific resources for assessment	Assessment must ensure: • access to an aquatic environment appropriate to the candidate's current or intended work role, such as a swimming pool or confined natural shallow water venue, to enable rescues to be demonstrated in the water • access to suitable participants to enable demonstration of advanced water rescue techniques • access to rescue and resuscitation equipment.

© Commonwealth of Australia, 2025 HumanAbility

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- demonstration of the performance of safe and effective advanced water rescues of multiple casualties as part of a team
- oral or written questioning to assess knowledge of accepted best practice principles of aquatic rescues and how they apply to safe and effective conduct of rescues
- third-party reports from a supervisor detailing candidate's performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Factors which contribute to major aquatic emergencies may include:

- swimming ability
- deep water
- shallow water
- river currents
- surf
- strong wind
- risk-taking behaviour.

Signs and signals may include:

- calling for help
- vertical body position
- diagonal body position
- minimal or non-supportive leg action
- vigorous arm movements
- head tilted up and back, face turned to safety or help
- submerged.

Aquatic emergency may include:

- envenomation by aquatic animals
- sudden unconsciousness
- spinal injury

© Commonwealth of Australia, 2025 HumanAbility

	• drowning • heart attack • severe bleeding • epileptic seizures • severe asthma attacks.
Appropriate personnel may include:	• other rescuers • staff.
Accepted best practice principles of aquatic rescues may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks to casualty, bystanders and rescuer • The Royal Life Saving Society Australia guidelines and code of conduct policies • the culture of lifesaving • current and past good practice demonstrated by self or peers in the same or similar situation.
Relevant legislation may include:	• occupational health and safety • duty of care • working with children.
Organisational policies and procedures may include:	• occupational health and safety • use and care of lifesaving equipment • communication protocols • safety, rescue and emergency procedures • incident reporting.
Emergency response may include:	• rescue equipment required • personnel involved • group control • risk management for self and others.
Strategies for group control may include:	• removing facility users from danger • giving clear direction to other staff • dealing effectively with caregivers or friends of person in difficulty.
Factors may include:	• number of casualties • rescue equipment • number and location of other staff.
Advanced water rescue may include:	• spine-board • spinal immobilisation collar • oxygen supplemented resuscitation • oxygen therapy.
Rescue plan may include:	• self-preservation

© Commonwealth of Australia, 2025 HumanAbility

	• awareness of personal capabilities • available assistance • selection of rescue aids • nature of the area • priorities of rescue.
Involvement of others may include:	• bystanders • trained or untrained staff.
Rescue equipment may include:	• reaching aids • ropes • floatation aids • flippers • rescue tube • spine-board • spinal immobilisation collar • rescue board • oxygen resuscitation equipment.
First aid techniques and standards may include:	• danger, response, airway, breathing, circulation routine • Australian Resuscitation Council Standards.

SISCAQU308A Instruct water familiarisation, buoyancy and mobility skills

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to instruct a broad range of clients in water familiarisation, buoyancy and mobility skills using drills, activities and games according to best practice principles of aquatic activities.

Application of the Unit

This unit applies to those conducting learn-to-swim and water safety classes in swimming pools and confined natural shallow water venues.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

SISCAQU202A Perform basic water rescues

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Determine participant readiness.	1.1. Identify the ***characteristics of the participant group***. 1.2. Identify the ***water familiarisation***, ***buoyancy and mobility skills*** to be developed according to ***best practice principles of aquatic activities***. 1.3. Assess participant readiness to acquire the relevant skills. 1.4. Determine the ***instructional methods*** and styles appropriate to the participant group. 1.5. Determine appropriate drills, activities and or games for the participant group. 1.6. Allocate sufficient space and assemble ***resources*** for the drills, activities or games according to ***relevant legislation***, ***organisational policies and procedures***, ***conditions and external influences***.
2. Conduct drills, activities and games.	2.1. Provide clear and accurate instruction on drills, activities or games to be used. 2.2. Introduce participants to the water in an appropriate manner according to best practice principles of aquatic activities. 2.3. Demonstrate skills and techniques to participant group as required, according to best practice principles of aquatic activities. 2.4. Monitor the participation and performance of each participant according to relevant legislation and provide feedback as required. 2.5. Observe participants' movement through water according to the ***principles of movement in water*** and adjust or refine individual or group performance as required. 2.6. Modify the activity as required according to participant needs and ***factors which affect skills acquisition***. 2.7. Respond to participant concerns and questions as required according to best practice principles of aquatic activities. 2.8. Respond to participants experiencing difficulties according to organisational policies and procedures and relevant legislation.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	2.9. Monitor time and complete drills, activities or games according to organisational policies and procedures.
3. Review and adapt the instruction.	3.1. Request and respond to feedback from participants. 3.2. Identify aspects needing further emphasis, attention or intervention in future sessions. 3.3. Review own performance and identify ***areas needing improvement*** and appropriate strategies as required. 3.4. Implement modifications to future instruction in response to feedback and review of participant progress.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - provide clear instruction
  - confirm understanding
  - request and respond to participant questions and feedback
- problem-solving skills to:
  - identify and address participant difficulties in applying water familiarisation, buoyancy and mobility
  - adjust activities as required
- planning and organisational skills to:
  - select and instruct appropriate drills, activities and games
  - manage time
- self-management skills to:
  - review own performance
  - address any areas requiring improvement.

Required knowledge

- legislation and organisational policies and procedures that ensure the safety of clients other facility users and staff
- principles of movement in water and best practice principles of aquatic activities to enable safe, effective and consistent instruction in buoyancy and mobility skills
- water familiarisation, buoyancy and mobility skills to enable accurate and comprehensive instruction to participants

© Commonwealth of Australia, 2025 HumanAbility

- use, care and maintenance of equipment
- cardiopulmonary resuscitation techniques to enable initial response to emergencies.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • delivers concise information, explanations and demonstrations to ensure drills, activities and games are conducted safely • observes clients and provides feedback and intervention to improve individual skill performance as appropriate • modifies instructional methods, styles and activities for individuals and groups to enhance skill development as appropriate • applies organisational policies and procedures and relevant legislation to ensure safety of participants and other facility users.
Context of and specific resources for assessment	Assessment must ensure: • conduct of drills, activities and games for multiple sessions which incorporate instruction in all water familiarisation, buoyancy and mobility skills • access to a swimming pool or confined natural shallow water venue • access to safety equipment relevant to local regulatory and organisational requirements • access to appropriate clients.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of candidate instructing, monitoring and adjusting water familiarisation, buoyancy and mobility skills according to the needs and characteristics of participant groups and organisational safety requirements • oral or written questioning to assess knowledge of the

© Commonwealth of Australia, 2025 HumanAbility

application of the principles of movement in water
- review of portfolio of lesson plans developed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCCRO302A Apply legal and ethical instructional skills.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics of the participant group may include:	• age • stage of development • physical or intellectual characteristics • cultural and situational factors.
Water familiarisation may include:	• entering, leaving and moving through the water • getting the face wet • submerging and opening eyes under water • regaining a standing position • breathing.
Buoyancy and mobility skills may include:	• front, back and side floating • gliding • torpedo • sculling • treading water • stroke exploration.
Best practice principles of aquatic activities may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks • AUSTSWIM Limited Swimming Teachers Code of Conduct policies • the culture of swimming and water safety.
Instructional methods may	• whole skill strategies • whole, progressive part, whole strategies

© Commonwealth of Australia, 2025 HumanAbility

include:

- progressive part strategies
- demonstration strategies
- command and response strategies
- experiential or problem-solving strategies
- techniques to encourage the reluctant participant.

Resources may include:

- flotation devices
- first aid facilities and equipment
- ropes
- reaching poles
- pool safety equipment
- clipboards
- instructors and equipment.

Relevant legislation may include:

- occupational health and safety
- duty of care
- working with children.

Organisational policies and procedures may include:

- occupational health and safety
- communication protocols
- swimming teachers Code of Conduct policy
- appropriate swimwear and personal protective equipment
- consideration of other facility users.

Conditions and external influences may include:

- environmental conditions
- other facility users
- spectators
- parents
- other instructors.

Principles of movement in water may include:

- buoyancy
- flotation
- hydrostatic pressure
- propulsion
- lift
- drag
- turbulence
- acceleration
- resistance
- balance and stability.

Factors which affect skills acquisition may include:

- individual considerations
- venue
- weather conditions
- background noise and distractions

© Commonwealth of Australia, 2025 HumanAbility

- class size
- water depth
- available water space.

Areas needing improvement may include:

- knowledge
- instructional skills and techniques
- group control techniques.

ELEMENT	PERFORMANCE CRITERIA
readiness.	1.2. Identify the ***water safety and survival skills*** to be developed. 1.3. Assess participant readiness to acquire the relevant skills. 1.4. Determine the ***instructional methods*** and instructional styles appropriate to the participant group. 1.5. Determine the appropriate ***drills***, ***activities or games*** for the participant group. 1.6. Allocate sufficient space and assemble ***resources*** for the drills, activities or games according to ***relevant legislation***, ***organisational policies and procedures***, ***conditions and external influences***.
2. Conduct drills, activities and games.	2.1. Provide clear and accurate instruction in drills, activities or games using technological aids where appropriate. 2.2. Introduce participants to the water in an appropriate manner according to ***best practice principles of aquatic activities***. 2.3. Demonstrate skills and techniques to participant group as required. 2.4. Monitor the participation and performance of each participant, according to relevant legislation, and provide feedback as required. 2.5. Observe participants' movement through water according to the ***principles of movement in water*** and the ***factors affecting movement in water*** and adjust or refine individual or group performance as required. 2.6. Modify drills, activities or games as required, according to participant needs and ***factors which affect skill development***. 2.7. Respond to participant concerns and questions as required, according to best practice principles. 2.8. Respond to participants experiencing difficulties according to organisational policies and procedures and relevant legislation. 2.9. Monitor time and complete drills, activities and games according to organisational policies and procedures.
3. Review and adapt the instruction.	3.1. Request and respond to feedback from participants. 3.2. Identify aspects needing further emphasis or

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	attention in future sessions. 3.3. Review own performance and identify ***areas needing improvement*** and appropriate strategies as required. 3.4. Implement modifications to future instruction in response to feedback and review of participant progress.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - provide clear instruction
  - confirm understanding
  - request and respond to participant questions and feedback
- problem-solving skills to:
  - identify and address participant difficulties in developing water safety and survival skills
  - maintain group control
- planning and organisational skills to:
  - select and instruct appropriate drills, activities or games
  - manage time
- cardiopulmonary resuscitation techniques to enable initial response to emergencies.

Required knowledge

- legislation and organisational policies and procedures that ensure the safety of clients, other facility users and staff
- principles of movement in water and best practice principles of aquatic activities to enable safe, effective and consistent instruction of water safety and survival skills
- use, maintenance and care of equipment
- cardiopulmonary resuscitation techniques to enable initial response to emergencies.

ELEMENT	PERFORMANCE CRITERIA
	practice principles of aquatic activities.
	5.2. Monitor time and complete activities and games according to organisational policies and procedures.
	5.3. Identify aspects needing further emphasis, attention or intervention in future sessions.
	5.4. Review own performance and identify ***areas needing improvement*** and appropriate strategies as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - provide clear instruction to infants, toddlers and their caregivers
  - request and respond to questions and feedback
- problem-solving skills to select activities, games and resources appropriate to the participants and the facility
- planning and organisational skills to manage participant group and available time
- cardiopulmonary resuscitation techniques to enable initial response to emergencies.

Required knowledge

- legislation and organisational policies and procedures to ensure the safety of clients, other facility users and staff
- best practice principles of aquatic activities to respond to concerns, feedback and questions
- motor, cognitive and personal development stages of infants and toddlers
- aquatic activities and games to facilitate motor, cognitive and personal development in infants and toddlers
- use and care of equipment
- cardiopulmonary resuscitation techniques to enable initial response to emergencies.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 HumanAbility

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- manages the involvement and participation of infants, toddlers and caregivers in activities that promote motor and cognitive development
- encourages and responds to feedback to review own performance and develops strategies to address performance and modify practice as appropriate
- applies organisational policies and procedures and relevant legislation to ensure safety of participants, caregivers and other facility users as appropriate.

Context of and specific resources for assessment

Assessment must ensure:

- facilitation of multiple aquatic sessions according to the needs of infants and toddlers and the accepted best practice principles of aquatic activities
- access to a swimming pool or confined natural shallow water venue
- access to suitable resources for infant and toddler aquatic activities
- access to appropriate clients and their care givers
- access to safety equipment relevant to local regulatory and organisational requirements.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate interacting with infants and toddlers and their caregivers to provide safe and appropriate aquatic activities
- oral or written questioning to assess knowledge of the application of organisational and legislative requirements
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCCRO302A Apply legal and ethical instructional skills.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics of the participant group may include:	• 0 - 6 months • infants 7 - 24 months • toddlers 25 - 42 months • pre-schoolers 43 - 60 months.
Resources may include:	• aquatic equipment and toys • first aid facilities and equipment • pool safety equipment • ratio of instructors or equipment to participants.
Relevant legislation may include:	• occupational health and safety • duty of care • working with children.
Organisational policies and procedures may include:	• occupational health and safety • communication protocols • AUSTSWIM Limited Swimming Teachers Code of Conduct policy • swimwear and personal protective equipment • consideration of other facility users.
Conditions and external influences may include:	• environmental conditions • other facility users • spectators • parents • other instructors.
Motor development may include:	• reflexive movements • disorganised and unstable movements • control of breathing, coughing and swallowing • organised and voluntary movement • coordinated movements with buoyancy, head and breath control.
Cognitive development may include:	• attention to details • classification of information • memory • imagination and conceptual development • problem-solving skills

© Commonwealth of Australia, 2025 HumanAbility

	• language acquisition.
Temperament and personality characteristics include:	• the easy child • the slow-to-warm-up child • the difficult child.
Best practice principles of aquatic activities may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks • AUSTSWIM Limited Swimming Teachers Code of Conduct policies • the culture of swimming and water safety.
Areas needing improvement may include:	• knowledge • selection of appropriate aquatic experiences • group control techniques.

ELEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Identify participant needs.	1.1. Identify the ***characteristics of the participant group***. 1.2. Identify and assess suitability of ***environmental features*** according to the needs of the participant group. 1.3. Identify entry and exit requirements and appropriate entry and exit points. 1.4. Assess the degree and type of ***support*** required by the participant group according to ***organisational policies and procedures*** and ***relevant legislation***. 1.5. Report any unsuitable environmental features or entry and exit points according to organisational policies and procedures.
2. Provide support.	2.1. Advise participants and ***caregivers*** of the location and appropriate use of ***resources***. 2.2. Provide information and demonstrations to participants and caregivers on safe exit, entry and support in the aquatic environment. 2.3. Seek and respond to questions or feedback from participants and caregivers. 2.4. Provide the appropriate type and level of support. 2.5. Observe participants' response and adjust or refine the support provided as required. 2.6. Respond to participants or caregivers experiencing difficulties, according to organisational policies and procedures and relevant legislation.
3. Review the support.	3.1. Respond to participant and caregiver concerns, feedback and questions as required, according to ***best practice principles of aquatic activities***. 3.2. Report on resources and aspects needing further emphasis, attention or intervention in future sessions according to organisational policies and procedures. 3.3. Review own performance and identify areas needing improvement and ***appropriate strategies*** as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 HumanAbility

- communication skills to:
  - provide clear instruction
  - confirm understanding
  - request and respond to participant and caregiver questions and feedback
- problem-solving skills to identify and address participant support needs and the appropriateness of environmental features for the participant group
- ability to perform basic water rescue techniques.

Required knowledge

- legislation and organisational policies and procedures that ensure the safety of clients, other facility users and staff
- best practice principles of aquatic activities to respond to concerns, feedback and questions
- support techniques and their application to different participant requirements to enable safe and appropriate support
- location, use and care of equipment
- first aid and water rescue techniques to enable appropriate responses to participants or caregivers experiencing difficulties.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • delivers concise information, explanations and demonstrations to ensure safe exit and entry and provides support appropriate to the needs of the participant group • provides appropriate support and responds to participant feedback and any difficulties experienced by participants • applies organisational policies and procedures and relevant legislation to ensure safety of participants and other facility users • reviews own performance and addresses any areas requiring modification or improvement.
Context of and specific resources for assessment	Assessment must ensure: • provision of support appropriate to the disability of

© Commonwealth of Australia, 2025 HumanAbility

	the participant group during multiple aquatic activities to demonstrate competency and consistency of performance • access to a swimming pool or confined natural shallow water venue • access to safety equipment relevant to local regulatory and organisational requirements • access to appropriate clients.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of candidate instructing, monitoring and adjusting water familiarisation, buoyancy and mobility skills according to the needs and characteristics of participant groups and organisational safety requirements • oral or written questioning to assess knowledge of the suitability of environmental features as they relate to participants needs • third-party reports from a supervisor detailing candidate's performance on the job. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISSCGP201A Apply legal and ethical coaching practices

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the Performance Criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics of the participant group may include:	• physical disability • intellectual or sensory impairment • mobility • fitness • body type and composition • age.

© Commonwealth of Australia, 2025 HumanAbility

Environmental features may include:	• ramps • hoists • steps • surface • railings • depth • available water space.
Support may include:	• hands on torso • hands to hands • back hold in vertical or horizontal positions • short arm hold • cradling • carry hold • hip hold • prone hold • prone side hold • assisted exits.
Organisational policies and procedures may include:	• occupational health and safety • reporting procedures • communication protocols • AUSTSWIM Limited Teachers Code of Conduct policy • swimwear and personal protective equipment.
Relevant legislation may include:	• occupational health and safety • duty of care • working with children • Disability Discrimination Act 1992 • privacy.
Caregivers may include:	• parents • guardians • integration aids • therapists.
Resources may include:	• flotation devices • ropes • reaching poles • pool safety equipment • instructors and equipment.
Best practice principles of aquatic activities may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards or risks • Instructors code of conduct policies developed by the peak bodies responsible for the teaching

© Commonwealth of Australia, 2025 HumanAbility

	of swimming and water safety • the culture of swimming and water safety.
Appropriate strategies may include:	• formal training • mentoring • peer support.

SISCAQU313A Develop an aquatics career plan

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to effectively plan a career in aquatics by developing an understanding of the Australian aquatic industry, the role of aquatic activities and peak aquatic organisations.

Application of the Unit

This unit applies to those working in a paid or voluntary capacity in the aquatics industry, such as those conducting learn-to-swim and water safety classes in swimming pools and confined natural shallow water venues.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Analyse the	1.1. Identify the ***significance of swimming and water***

© Commonwealth of Australia, 2025 HumanAbility

philosophy of participation in aquatic activities.	***safety*** as a life skill in Australian culture. 1.2. Identify the range of ***aquatic activities*** supported by ***peak aquatic organisations***. 1.3. Identify the range of ***participants*** accessing organised aquatic activities. 1.4. Identify the ***major roles*** and structures of peak aquatic organisations in Australia. 1.5. Analyse the ***impact*** of peak aquatic organisations on swimming and water safety as a life skill in Australian culture.
2. Identify employment opportunities.	2.1. Identify ***employment opportunities*** and ***employment roles*** within the aquatic industry. 2.2. Research employment roles to identify their ***functions*** and ***features***. 2.3. Identify career pathways within the Australian aquatic industry. 2.4. Analyse available options in relation to own career aspirations.
3. Develop a career plan.	3.1. Identify any additional ***training needs*** required to achieve preferred career aspiration. 3.2. Source and assess ***training options*** according to own needs and circumstances. 3.3. Develop a career plan according to employment options, own career aspirations and available training options.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- self-management skills to identify own career aspirations and any further training and skills development required
- technological skills to source, collect and record electronically based information
- problem-solving skills to:
  - identify personal training needs and assess training options
  - make informed career decisions.

Required knowledge

- peak aquatic organisations in Australia to enable the identification of available career paths

© Commonwealth of Australia, 2025 HumanAbility

- personal computer usage to access and record information
- own strengths, weaknesses and preferences to enable the identification of personal training needs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies major aquatic activities and the nature of participants engaging in aquatic activities to develop an understanding of the role of aquatic activities in Australian culture • accesses and interprets information on the roles, responsibilities and aims of peak aquatic organisations to determine employment and career options • analyses employment options, own career aspirations and training needs and options to develop a personal career plan.
Context of and specific resources for assessment	Assessment must ensure: • development and documentation of a personal aquatics career plan that includes additional training options • access to sources of information on the industry.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • electronic or hard copy portfolio of relevant information on peak aquatic organisations • oral or written questioning to assess knowledge of the roles and impact of peak aquatic organisations. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Significance of swimming and water safety may include:	• physical fitness • cultural importance.
Aquatic activities may include:	• water familiarisation • swimming, water safety and survival classes • lifesaving classes • aquatics classes for people with a disability • infant, toddler and parent aquatic classes • aquatic games • water exercise classes • group and individual programs • surf lifesaving.
Peak aquatic organisations in Australia may include:	• AUSTSWIM • The Royal Life Saving Society Australia • Surf Life Saving Australia • Swimming Australia.
Participants may include:	• infants 6 - 24 months • toddlers 25 - 42 months • pre-schoolers 43 - 60 months • children • adults • older adults • people with a disability.
Major roles may include:	• promotion and development of swimming • fostering the growth of swimming as a sport • leading water safety education • community development.
Impact may include:	• influence on national water safety policy • funding of community initiatives • promotion of water safety.
Employment opportunities may include:	• full time • part time • casual • volunteer

© Commonwealth of Australia, 2025 HumanAbility

	• seasonal.
Employment roles may include:	• swimming instructor • pool lifeguard • swim school coordinator • duty manager.
Functions may include:	• instructing swimming, water familiarisation, water safety and survival skills • supervising clients • responding to emergencies • operating pools • managing aquatic facilities.
Features may include:	• multi-skilled • outdoor working environment • flexible.
Training needs may include:	• technical skill development • interpersonal skill development • opportunities to practise existing skills.
Training options may include:	• accredited training and assessment • AUSTSWIM accreditation • mentoring • supervised practice • in-house professional development • conference attendance • observation of peers.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge section and the Range Statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Develop procedures for water treatment processes.	1.1. Access and analyse ***pool water quality maintenance requirements***. 1.2. Assess ***pool water treatment needs*** of the aquatic facility according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Develop and document systems for ***water treatment processes*** in consultation with appropriate personnel and according to organisational policies and procedures and relevant legislation. 1.4. Identify staff training needs and any gaps to be addressed. 1.5. Develop ***staff training programs*** according to identified needs and organisational policies and procedures.
2. Implement procedures for water treatment processes.	2.1. Explain provisions of relevant legislation to affected staff using appropriate communication strategies. 2.2. Provide training opportunities to address training needs in consultation with relevant parties. 2.3. Monitor effectiveness of training programs and modify as required. 2.4. Implement and monitor water treatment processes to maintain pool water quality according to relevant legislation and organisational policies and procedures.
3. Evaluate procedures for water treatment processes.	3.1. Assess the effectiveness of pool water treatment processes according to relevant legislation and organisational policies and procedures. 3.2. Document and communicate improvements and changes to pool water treatment processes according to relevant legislation and organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - elicit information from staff to assess training needs

© Commonwealth of Australia, 2025 HumanAbility

  - convey relevant information about pool water treatment procedures
  - liaise with designated personnel to develop systems for water treatment processes
- problem-solving skills to:
  - develop systems to maintain water quality and meet regulatory requirements
  - assess factors affecting the maintenance of pool water quality
  - determine and implement corrective action
  - assess the effectiveness of pool water treatment procedures
- language and literacy skills to:
  - read and analyse legislation in relation to maintenance of pool water quality
  - document the development of maintenance system
  - use maintenance documentation to identify problems.

Required knowledge

- legislation and organisational policies and procedures that enable the:
  - development and monitoring of safe and legally compliant systems for water treatment processes
  - documentation of pool water treatment processes
- characteristics of water quality such as pH, alkalinity, hardness and temperature
- waterborne bacteria such as pseudomonas aeruginosa, legionella, staphylococcus and cryptosporidium to enable these to be monitored and controlled safely
- consultative and communication mechanisms to develop and implement procedural systems
- safe chemical-handling procedures to enable safe work practices and public safety
- chemical emergency response plans to respond promptly and appropriately to emergency situations
- plant and equipment manufacturer's specifications to enable appropriate operation and servicing procedures
- training providers who provide appropriate training in pool water management
- products related to pool water quality maintenance to enable appropriate selection of required products.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, Range Statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate	Evidence of the following is essential: • works effectively within organisational management

© Commonwealth of Australia, 2025 HumanAbility

competency in this unit	systems to develop, implement and evaluate pool water maintenance systems, and makes ongoing improvements in line with regulatory requirements and organisational policies and procedures • proposes recommendations to address inadequacies in pool water quality systems and applies effective contingency management techniques to respond to and correct problems with pool water quality and maintenance procedures • identifies the interrelationship between all aspects of organisational safety systems and effectively implements emergency procedures and evacuation plans in the event of a chemical emergency to maintain the safety of facility, staff and patrons • assesses staff training needs to effectively implement water treatment procedures and develops, implements and evaluates staff training programs to meet organisational and regulatory requirements.
Context of and specific resources for assessment	Assessment must ensure: • development, implementation and evaluation of pool water maintenance procedures consistent with legislative and organisational requirements • access to a fully operational aquatic facility or pool environment • access to plant and equipment of an aquatic facility • access to comprehensive information about pool water quality maintenance to allow the candidate to develop a tailored system • access to legislation and organisational policies and procedures that are relevant to the development of pool water maintenance procedures.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • portfolio that documents the development of a pool water maintenance system for an organisation, including policies, procedures and staff needs analysis and training plans • reports prepared by the candidate detailing how the maintenance of pool water quality policies, systems and procedures were established for a given project or work activity • project or work activities conducted in conjunction with an industry operator to allow the candidate to develop systems for a specific workplace

© Commonwealth of Australia, 2025 HumanAbility

- third-party reports from key stakeholders or review of reports of the implementation and review processes
- case studies and problem-solving exercises to establish systems, policies and procedures for different workplace sizes and types
- written or oral questioning or interview to assess knowledge of the legislative requirements of water quality.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU415A Develop aquatic facility maintenance procedures

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Pool water quality maintenance requirements must include:

- microbiological levels
- disinfectant levels
- pH levels
- clarity levels.

Pool water treatment needs may include:

- condition of aquatic facility
- location
- size
- nature of services provided
- availability of resources.

Relevant legislation may include:

- occupational health and safety
- duty of care
- infectious diseases regulations
- dangerous goods act and regulations
- poisons act
- metropolitan water supply, sewerage and drainage by-laws
- environment legislation
- local government regulations.

© Commonwealth of Australia, 2025 HumanAbility

Organisational policies and procedures may include:	• occupational health and safety • incident and accident management and notification • risk assessment and control • handling of hazardous substances • security • emergency evacuation.
Water treatment processes may include:	• routine pool water tests • pool water microbiological tests • superchlorination • shock dosing • dechlorination • chlorine stabilisation with cyanuric acid • control of algae • ozonisation • alkalinity adjustments • calcium and total hardness adjustments • lowering total dissolved solids • pool water filtration and recirculation • backwashing • manual removal of visible contaminants.
Staff training programs may include:	• on-the-job training • refresher courses • specialist training with external agencies • pre-season training.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
1. Plan preventative maintenance schedules.	1.1. Assess and document uses and condition of the ***aquatic facility plant and equipment*** according to ***relevant legislation*** and ***organisational policies and procedures***. 1.2. Inspect the aquatic facility plant and equipment to assess ***operational maintenance needs*** according to relevant legislation and organisational policies and procedures. 1.3. Identify and document priorities for action according to organisational policies and procedures. 1.4. Identify potential sources of increased efficiency of the aquatic facility plant and equipment according to organisational policies and procedures. 1.5. Identify ***aquatic facility cost factors*** for services provided. 1.6. Develop and document ***preventative maintenance systems*** for the operation of the aquatic facility according to relevant legislation and occupational policies and procedures. 1.7. Assess ***staff training needs*** against current requirements and develop programs for implementing facility maintenance systems according to relevant legislation and occupational policies and procedures. 1.8. Develop security procedures to maintain the safety of facility, staff and patrons according to organisational policies and procedures.
2. Implement procedures for preventative maintenance.	2.1. Provide training opportunities to address training needs in consultation with relevant parties. 2.2. Monitor effectiveness of training programs and modify as required. 2.3. Implement and monitor preventative inspection and maintenance schedule according to relevant legislation and organisational policies and procedures. 2.4. Monitor maintenance records and take corrective action as required according to organisational policies and procedures. 2.5. Implement and monitor security system according to organisational policies and procedures.
3. Evaluate maintenance systems.	3.1. Assess the effectiveness of maintenance systems according to relevant legislation and organisational policies and procedures.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.2. Document and communicate improvements and changes to maintenance systems according to relevant legislation and organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to:
  - assess operational maintenance needs of the aquatic facility
  - determine priorities for action
  - develop preventative maintenance systems
  - identify staff training needs and develop appropriate training opportunities
  - assess the effectiveness of facility maintenance systems
- communication skills to:
  - elicit information from staff to assess training needs
  - facilitate implementation of aquatic facility maintenance procedures
- language and literacy skills to:
  - complete required documentation for the operation of preventative maintenance systems
  - monitor maintenance records
  - use information to identify problems and take corrective action
- planning and organisational skills to monitor maintenance schedules and security systems
- numeracy skills to identify and assess cost factors for the efficient operation of the aquatic facility

Required knowledge

- legislation and organisational policies and procedures that enable the:
  - assessment of the operational maintenance needs of the aquatic facility plant and equipment to ensure safety of facility users
  - development, implementation and monitoring of preventative maintenance systems for the operation of the aquatic facility
- procedures and processes for plant and equipment operation to enable effective maintenance and management of aquatic facility
- consultation and communication mechanisms to develop and implement procedural systems
- plant and equipment manufacturer's specifications to enable appropriate operation and servicing procedures
- factors affecting the operating cost of an aquatic facility to enable operations to be conducted

© Commonwealth of Australia, 2025 HumanAbility

within budgetary requirements
- project management techniques to plan and implement preventative maintenance processes for an aquatic facility
- training providers and products to ensure that staff are appropriately trained to implement aquatic facility maintenance procedures
- security procedures to maintain the safety of the facility, staff and facility users

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • assesses facility cost factors and sources of increased efficiency to plan maintenance system within budget • monitors implementation of maintenance system to minimise inconvenience to facility users • assesses staff training needs to effectively implement facility maintenance procedures and develops, implements and evaluates staff training programs to meet organisational and regulatory requirements • develops, implements and monitors a security system that maintains the safety requirements of facility, staff and patrons • proposes recommendations to address inadequacies in facility maintenance systems and applies effective contingency management techniques to respond to and correct problems with maintenance procedures.
Context of and specific resources for assessment	Assessment must ensure: • development, implementation and evaluation of multiple maintenance programs for aquatic facilities, plant and equipment which are of sufficient breadth and complexity to demonstrate competency and consistency of performance • access to a fully operational aquatic facility or pool environment • access to an aquatic operation for which a maintenance system would be developed • access to plant and equipment of an aquatic facility • access to comprehensive information about

© Commonwealth of Australia, 2025 HumanAbility

maintenance systems to allow the candidate to develop a tailored system
- access to legislation and organisational policies and procedures relevant to the development of facility maintenance procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- portfolio documenting the development of an aquatic facility maintenance system, including policies, procedures, staff training needs analysis, training programs and evidence of analysis of maintenance records
- project or work activities conducted in conjunction with an industry operator to develop systems for a particular workplace
- third-party reports on candidate's work from key stakeholders
- case studies and problem-solving exercises to establish systems, policies and procedures for different workplace sizes and types
- written or oral questioning or interview to assess knowledge of the legislative requirements of maintenance systems.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU414A Develop pool water maintenance procedures.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Aquatic facility plant and equipment may include:

- circulation plant
- heating systems
- lighting and ventilation systems
- electrical control units and appliances

© Commonwealth of Australia, 2025 HumanAbility

- self-contained breathing apparatus
- supplies.

Relevant legislation may include:

- occupational health and safety
- health and poisons acts
- duty of care
- dangerous goods act and regulations
- metropolitan water supply, sewerage and drainage by-laws
- environmental legislation
- local government regulations
- infectious diseases regulations
- building codes and regulations
- fire regulations.

Organisational policies and procedures may include:

- standard operating conditions and levels
- occupational health and safety
- consultation procedures
- risk assessment and control
- handling of hazardous substances
- security
- emergency evacuation.

Operational maintenance needs may include:

- building and grounds maintenance
- obtaining supplies
- servicing and minor repairs of plant and equipment
- replacement and redundancy of plant and equipment.

Aquatic facility cost factors may include:

- faulty operation
- cleaning requirements
- consumables
- replacement parts
- utility costs
- contractor costs.

Preventative maintenance systems may include:

- maintenance schedules
- preventative inspection
- staffing capability and availability
- security
- signage
- movement of equipment.

Staff training needs may include:

- on-the-job training
- public health regulatory requirements and maintenance programs
- refresher courses

© Commonwealth of Australia, 2025 HumanAbility

- specialist training with external agencies
- pre-season training.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a Unit of Competency.	Performance Criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge section and the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
1. Identify supervision requirements.	1.1. Identify and document the use of the ***aquatic facility or environment***.
	1.2. Conduct research and consultation to establish the ***supervision requirements*** of the aquatic facility or environment according to ***organisational policies and procedures***.
	1.3. Allocate appropriate resources to meet supervision requirements of the aquatic facility or environment according to organisational policies and procedures.
2. Implement supervision requirements.	2.1. Train appropriate staff to implement supervision requirements according to ***relevant legislation*** and organisational policies and procedures.
	2.2. Identify and communicate staff roles and responsibilities according to organisational policies and procedures.
	2.3. Advise staff of factors that contribute to problems in the aquatic facility or environment.
	2.4. Monitor staff performance in carrying out supervision requirements according to relevant legislation and organisational policies and procedures.
	2.5. Evaluate staff performance and provide constructive feedback according to organisational policies and procedures.
	2.6. Carry out regular inspection of the aquatic facility or environment to minimise ***risk*** to ***clients***, according to relevant legislation and organisational policies and procedures.
	2.7. Take action to address possible risks according to organisational policies and procedures.
3. Manage emergency situations.	3.1. Communicate ***emergency*** procedures to staff according to organisational policies and procedures.
	3.2. Conduct emergency drills according to organisational policies and procedures.
	3.3. Assess and manage the emergency according to organisational policies and procedures.
	3.4. Utilise ***emergency services*** according to organisational policies and procedures.
	3.5. Report and record incidents according to the emergency action plan for the aquatic facility or environment and organisational policies and procedures.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
4. Review and adapt lifeguard operations.	4.1. Seek feedback on effectiveness of lifeguard service from staff and clients according to organisational policies and procedures. 4.2. Review and amend lifeguard ***operations*** in response to feedback according to organisational policies and procedures. 4.3. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - inform staff of roles and responsibilities
  - consult stakeholders to determine supervision requirements
  - train staff to implement supervision requirements
  - provide feedback to assist staff in meeting or improving performance standards
- problem-solving skills to:
  - determine appropriate emergency responses
  - allocate resources and staff to implement supervision requirements
  - seek feedback on lifeguard service and make appropriate changes
- planning and organisational skills to:
  - allocate and coordinate staff roles and responsibilities to meet the supervision requirements of the aquatic facility or environment
  - carry out regular inspections to identify and respond to risk
  - coordinate responses to minor and major aquatic emergencies
- language and literacy skills to document levels of patronage at the aquatic facility and to document emergency incidents
- first aid and emergency response skills appropriate to the location to enable initial assessment of and response to emergencies

Required knowledge

- legislation and organisational policies and procedures that enable the provision of a safe environment for client activities and appropriate response to emergencies
- potential dangers or hazards commonly encountered in aquatic environments to enable safe conduct of client activities
- facility or environment hazards to enable these to be monitored through supervision

© Commonwealth of Australia, 2025 HumanAbility

- factors affecting the classification of emergencies including nature and size, likely development and availability of support to enable an appropriate response
- supervision techniques in an aquatic environment to enable effective supervision
- communications equipment to enable prompt response to emergencies
- first aid, emergency and rescue procedures appropriate to the conditions to ensure risk minimisation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • determines the supervisory needs of the aquatic facility or environment and allocates resources to ensure safety of patrons • monitors and modifies use of resources to maintain safety of aquatic facility or environment and patrons • coordinates staff training, in line with identified staff roles and responsibilities, and follows operational procedures to minimise and respond to risk in the aquatic facility or environment • assesses, manages and reports on emergency situations.
Context of and specific resources for assessment	Assessment must ensure: • coordination of a lifeguard service at an aquatic facility or environment on multiple occasions to demonstrate competency and consistency of performance • access to an aquatic facility or environment, such as a swimming pool or confined natural shallow water venue • access to appropriate personnel and staff • access to incident reporting documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of factors affecting the supervision requirements of the

© Commonwealth of Australia, 2025 HumanAbility

aquatic facility or environment
- observation of candidate's management of emergency situations
- third-party reports from a supervisor detailing candidate's performance
- portfolio containing completed incident reports and research into measures of use of aquatic facility or environment.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXRSK301A Undertake risk analysis of activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Aquatic facility or environment may include:
- pools and spas
- lakes
- rivers
- water slides
- dams.

Supervision requirements may include:
- opening and closing procedures
- rostering lifeguards
- allocating duties and responsibilities
- cleaning and maintenance.

Organisational policies and procedures may include:
- occupational health and safety
- communication protocols
- safety, rescue and emergency procedures
- incident reporting
- risk management procedures
- staff training
- local call-out procedures.

Relevant legislation may include:
- occupational health and safety
- health act
- duty of care
- working with children

© Commonwealth of Australia, 2025 HumanAbility

	• local government regulations • environment legislation • anti-discrimination legislation.
Risks may include:	• misuse of equipment • swimming in unsafe areas • behaving with disregard for the safety of others.
Clients may include:	• participants • spectators • members • volunteers • facility owners • staff.
Emergency may include:	• water incident • hazardous release • medical condition.
Emergency services may include:	• police search and rescue • state emergency service • ambulance service • fire services.
Operations may include:	• staffing levels • availability of resources • supervision ratios.

ELEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Identify and evaluate emergency situations.	1.1. Identify ***emergencies*** requiring the use of self-contained breathing apparatus. 1.2. Communicate initial assessment of emergency to ***appropriate personnel*** according to ***organisational policies and procedures***. 1.3. Determine an appropriate response to the emergency according to ***relevant legislation*** and organisational policies and procedures. 1.4. Notify appropriate personnel of emergency response according to relevant legislation and organisational policies and procedures.
2. Use self-contained breathing apparatus.	2.1. Ensure self-contained breathing apparatus unit is operational according to manufacturer's specifications and organisational policies and procedures. 2.2. Fit and operate the self-contained breathing apparatus unit according to relevant legislation, organisational policies and procedures and manufacturer's specifications. 2.3. Control emergency situation and notify appropriate personnel according to organisational policies and procedures.
3. Complete post-emergency responsibilities.	3.1. Check the self-contained breathing apparatus unit and report any faults and corrective actions required according to organisational policies and procedures. 3.2. Remove, replace or repair faulty equipment and defective parts according to organisational policies and procedures and manufacturer's specifications. 3.3. Clear and store the self-contained breathing apparatus unit after use, according to organisational procedures and manufacturer's specifications. 3.4. Evaluate emergency procedures and recommend any changes required to improve ***response***.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 HumanAbility

- problem-solving skills to:
  - identify situations requiring the use of self-contained breathing apparatus
  - determine an appropriate response
  - identify and rectify or report faulty equipment
- communication skills to:
  - notify appropriate personnel of emergency situations and responses
  - report faults and corrective actions
- language and literacy skills to interpret manufacturer's instructions for the use, care and maintenance of self-contained breathing apparatus units
- numeracy skills to determine air supply limits.

Required knowledge

- legislation, organisational policies and procedures and manufacturer's instructions to:
  - determine and implement safe emergency responses requiring the use of self-contained breathing apparatus
  - safely use, care and maintain equipment
- properties of chlorine gas to enable identification and appropriate response to emergency situations involving the release of chlorine gas.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies emergency situations requiring the use of a self-contained breathing apparatus and determines and implements an appropriate emergency response • uses, checks, maintains and stores a self-contained breathing apparatus according to legislative, organisational and manufacturer's requirements • evaluates emergency response and makes recommendations on any actions required to improve personal and facility responses.
Context of and specific resources for assessment	Assessment must ensure: • demonstration of the use, care, maintenance and storage of a self-contained breathing apparatus on multiple occasions to demonstrate competency and

© Commonwealth of Australia, 2025 HumanAbility

	consistency of performance • access to an aquatic facility where chlorine gas or chlorine is used • access to a self-contained breathing apparatus.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the candidate using a self-contained breathing apparatus to respond to a real or simulated emergency involving the hazardous release of chlorine gas • oral or written questioning to assess knowledge of the properties of chlorine gas and its safe handling • oral or written questioning to assess knowledge of appropriate responses and procedures for dealing with emergency situations involving the hazardous release of chlorine gas • third-party reports from a supervisor detailing work performed by the candidate. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Emergencies may include:	• hazardous release of chlorine gas.
Appropriate personnel may include:	• facility staff • occupational health and safety representative • emergency services.
Organisational policies and procedures may include:	• occupational health and safety • emergency response • reporting • use, care, maintenance and storage of equipment.
Relevant legislation may include:	• occupational health and safety

© Commonwealth of Australia, 2025 HumanAbility

- duty of care
- hazardous chemicals.

Response may include:

- personal response
- facility response.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply community development principles in a recreation context. This unit focuses on liaising with specific community groups to plan and implement community recreation initiatives to meet their needs. It covers the application of the principles of access and equity to identify and address issues affecting participation of specific communities.

Application of the Unit

This unit applies to those working autonomously in a sport and recreation environment. This includes middle managers and coordinators of volunteers working in a range of locations or with a range of participants in aquatic programs, sport programs or recreation leisure centres including gyms.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

1. Develop the recreation initiative in consultation with a specific community.	1.1. Identify ***characteristics*** of the ***specific community***. 1.2. Consult with ***key stakeholders*** to identify and confirm needs and expected outcomes. 1.3. Identify any ***barriers to participation*** in recreational activities. 1.4. Develop the ***recreation initiative*** according to ***relevant legislation***, ***organisational policies and procedures*** and principles of community development. 1.5. Identify and organise appropriate ***resources*** to implement the recreation initiative. 1.6. Prepare and disseminate marketing materials to target audience according to relevant legislation and organisational policies and procedures.
2. Deliver the recreation initiative.	2.1. Implement strategies for delivering the recreation initiative according to relevant legislation and organisational policies and procedures. 2.2. Monitor access and participation and adjust recreation initiative according to responses of specific community. 2.3. Monitor safety of the group during the recreation initiative. 2.4. Seek feedback from the specific community on the ***outcomes*** of the recreation initiative.
3. Review the recreation initiative.	3.1. Assess and evaluate the recreation initiative against planned goals and objectives according to organisational policies and procedures. 3.2. Assess evaluation outcomes and consult with key stakeholders to determine future directions.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 HumanAbility

- communication skills to:
  - consult with the specific community and key stakeholders to identify community characteristics and needs and develop an appropriate recreation initiative
  - liaise with the specific community to obtain feedback on the effectiveness of the initiative
- problem-solving skills to:
  - design a recreation initiative to meet the specific community's needs
  - identify and apply strategies to deliver the initiative
  - make adjustments according to feedback and evaluation outcomes
- planning and organisational skills to:
  - coordinate resources necessary for the recreation initiative
  - monitor progress of the initiative
- teamwork skills to liaise with members of the specific community and other stakeholders in the development of the recreation initiative
- language and literacy skills to research, collect, analyse and interpret information about specific communities to effectively plan a recreation initiative.

Required knowledge

- legislation and organisational policies and procedures that inform planning and delivery of safe recreation initiatives for specific communities
- social, political, cultural and historical issues that affect or are relevant to specific communities and groups to a level required to develop appropriate initiatives
- recreation activities and resources required for the initiative within an organisation or specific community
- factors that may affect participation in community recreation activities for specific communities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies the principles and practices of social justice, anti-discrimination, and equal access to community initiatives using communication and delivery strategies appropriate to the specific community • matches recreation initiative with specific community

© Commonwealth of Australia, 2025 HumanAbility

characteristics and needs and with organisational objectives and applies contingency management techniques to address any issues that arise
- monitors community participation and adjusts initiative according to community feedback
- evaluates effectiveness of initiative and liaises with specific community to identify future directions.

Context of and specific resources for assessment

Assessment must ensure:

- planning and implementation of community recreation initiatives of sufficient breadth to enable the candidate to demonstrate the use of strategies that support access and participation for specific communities.
- access to information on a specific community relevant to the candidate's current or intended work role to enable accurate identification of characteristics and needs
- access to resources for the conduct of the specific community recreation initiative
- access to key stakeholders
- access to relevant documentation such as sources of information about specific communities.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consultation with a range of specific communities and collection of information to develop strategies to plan, implement and resource a community development initiative
- oral or written questioning to assess candidate's knowledge of factors that affect access and participation of people from specific communities
- third-party reports from a supervisor detailing candidate's performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXOHS101A Follow occupational health and safety policies.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics may include:

- age
- physical or intellectual characteristics
- cultural and situational factors
- family structures
- level of literacy and numeracy
- psychological status.

Specific community may include:

- cultural and linguistic diversity
- urban rural or remote location
- family systems
- schools.

Key stakeholders may include:

- local government authorities
- funding agencies
- community organisations, clubs and groups
- health and welfare agencies.

Barriers to participation may include:

- cultural
- religious
- social
- physical
- intellectual
- psychological
- time and resource constraints.

Recreation initiative may include:

- recreation, sport and cultural participation activities
- events
- promotional activities
- educational activities
- goals and objectives to meet community needs.

Relevant legislation may include:

- occupational health and safety
- anti-discrimination
- equal opportunity
- privacy
- working with children
- duty of care.

© Commonwealth of Australia, 2025 HumanAbility

Organisational policies and procedures may include:	• occupational health and safety • communication protocols • principles of social justice • advocacy.
Resources may include:	• facilities • equipment • finance • personnel • marketing materials • transport and related logistical requirements.
Outcomes may include:	• increased participation • retention levels • feelings of inclusiveness.

	with the Evidence Guide.
1. Identify organisation's volunteer requirements.	1.1. Analyse the organisation's ***volunteer management policy*** to identify relevant procedures. 1.2. Identify organisation's ***volunteer requirements*** and ***target areas*** for recruitment.
2. Recruit volunteers.	2.1. Prepare and communicate call for volunteers according to ***organisational policies and procedures***. 2.2. Receive and process applications according to organisational policies and procedures. 2.3. Organise suitable venue and conduct ***selection processes*** according to organisational policies and procedures. 2.4. Analyse and record outcomes of selection process according to organisational policies and procedures and ***relevant legislation***. 2.5. Advise applicants of selection outcomes and ***follow-up processes***.
3. Induct volunteers.	3.1. Prepare and distribute ***relevant documentation*** to successful volunteers according to organisational policies and procedures. 3.2. Organise suitable time and venue for volunteer induction. 3.3. Provide induction to volunteers according to organisational policies, procedures and ***requirements***.
4. Manage volunteers.	4.1. Identify and arrange any training required by volunteers to meet allocated ***roles*** according to organisational policies and procedures. 4.2. Review volunteer performance and provide feedback and opportunities for additional training where required. 4.3. Maintain volunteer records according to organisational policies and procedures and relevant legislation.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 HumanAbility

Required skills

- written and verbal communication skills to:
  - prepare and distribute documentation
  - provide induction and feedback
- planning and organisational skills to arrange selection, induction and monitoring of volunteers
- teamwork skills to build rapport with and between volunteers
- problem-solving skills to assess suitability of volunteers for different roles
- literacy skills to analyse organisational policies and procedures that enable all processes to be conducted appropriately.

Required knowledge

- legislation and organisational policies and procedures that enable the safe, legal and ethical participation of volunteers
- issues that affect the availability of volunteers to enable effective recruitment and management.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies and implements organisational requirements, policies and procedures for recruiting, inducting and managing volunteers • conducts volunteer induction and identifies and arranges any additional training required by volunteers • maintains records of recruitment, induction and management processes for volunteers.
Context of and specific resources for assessment	Assessment must ensure: • resourcing and implementation of volunteer induction sessions that are of a sufficient breadth to demonstrate competency and consistency of performance • access to real or simulated volunteers appropriate to local organisational volunteer requirements • access to a venue appropriate to the number of

© Commonwealth of Australia, 2025 HumanAbility

volunteers being recruited and inducted
- access to presentation equipment appropriate to the induction sessions being conducted
- access to documentation such as job descriptions and organisational policies and procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate conducting induction sessions
- oral or written questioning to assess knowledge of organisational policies and procedures and their application to volunteer selection, recruitment and management
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Volunteer management policy may include:

- volunteer management philosophy
- volunteer eligibility
- rights and responsibilities
- expenses
- record keeping
- training and accreditation
- conflict of interest.

Volunteer requirements may include:

- operational area
- duties
- competencies required
- time involvement.

Target areas may include:

- past and present membership
- volunteer agencies

- unemployed
- retired
- service organisations.

Organisational policies and procedures may include:

- occupational health and safety
- selection processes
- training procedures
- recording and reporting
- communication protocols
- administration procedures
- security
- emergency procedures.

Selection processes may include:

- appraisal tests
- interviews
- timelines
- notification procedures.

Relevant legislation may include:

- occupational health and safety
- working with children
- anti-discrimination
- privacy.

Follow-up processes may include:

- notification of selection outcome
- feedback to unsuccessful applicants
- induction time and location.

Relevant documentation may include:

- position description
- outline of duties
- licence
- proof of age
- police check.

Requirements may include:

- expectations
- authorities and responsibilities
- event or activity details
- cash handling
- security
- regulatory requirements
- grievance procedures
- reporting.

Roles may include:

- coach or instructor
- fundraiser
- official
- administrator
- organiser
- finance

ELEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Identify needs of clients with a disability.	1.1. Identify individual preferences in consultation with client according to ***organisational policies and procedures*** and ***relevant legislation***. 1.2. Identify ***support requirements*** of people with a disability in consultation with appropriate personnel. 1.3. Identify potential and real ***barriers to participation*** and identify strategies to address them. 1.4. Access and provide information on options and services available to people with a disability. 1.5. Assist in developing community awareness of the needs of people with a disability.
2. Assist people with a disability to participate in networks.	2.1. Identify ***key people and organisations*** that can help people with a disability maximise their independence and inclusion. 2.2. Communicate roles and responsibilities of key people and their organisations to people with a disability using appropriate ***communication strategies***. 2.3. Assist people with a disability to participate in their own personal networks. 2.4. Identify opportunities to develop and maintain supportive connections with key people on an individual basis according to organisational policies and procedures.
3. Identify recreation opportunities for people with a disability.	3.1. Identify individual's current skills and interests and identify recreation opportunities which provide maximum chance of participation. 3.2. Identify strategies to link people with a disability to recreation opportunities. 3.3. Provide information and resources, including assistive technology, to facilitate participation in recreation activities. 3.4. Identify and establish effective environments for participation of people with a disability. 3.5. Monitor, review and adjust the strategies that link people with a disability to recreation opportunities. 3.6. Identify opportunities beyond the program or activity and communicate them to people with a disability.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - interact and build rapport with people with a disability to identify their needs
  - consult key stakeholders to identify networks and opportunities for participation
  - convey information about available services and options
- problem-solving skills to:
  - identify recreation opportunities to enhance participation of people with a disability
  - apply and review strategies to link them to appropriate activities and networks
- research skills to identify sources of information and resources available to people with a disability
- teamwork skills to liaise with members of the community and other stakeholders to identify and source opportunities for participation

Required knowledge

- legislation and organisational policies and procedures that:
  - enable non-discriminatory treatment of people with a disability
  - identify and meet individual preferences according to the principles and practices of social justice
- social, political, cultural and historical issues that affect, or are relevant to, access and participation issues for people with a disability
- resources required for the effective participation of people with a disability
- specific recreation opportunities and activities appropriate to people with a disability
- relevant modified equipment and activities appropriate to people with a disability
- community organisations, services and activities that provide recreation opportunities for people with a disability
- barriers that affect the access and participation of people with a disability to enable the development of strategies to overcome these
- community inclusion principles to enable effective participation of clients with a disability

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 HumanAbility

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies principles and practices of social justice, anti-discrimination and equal access to identify the needs and opportunities for participation in recreation activities and networks for people with a disability
- identifies strategies to align recreational opportunities with the specific requirements and needs of people with a disability and organisational objectives
- monitors strategies to facilitate recreational opportunities for people with a disability and adjusts accordingly.

Context of and specific resources for assessment

Assessment must ensure:

- identifying and addressing support requirements, within the bounds of legislative and organisational constraints, for those with the sort of disability or needs that are commonly encountered in the candidate's current or intended work environment
- access to people with disabilities to enable the identification of individual needs
- access to key people and organisations that support people with a disability
- access to relevant sources of information about recreational services and options for people with a disability
- access to relevant legislation and organisational policies and procedures concerning inclusion processes.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate interacting with people with disabilities and community organisations and networks to identify recreational opportunities
- oral or written questioning to assess candidate's knowledge of factors that affect access and participation of people with disabilities
- third-party reports from a supervisor detailing candidate's work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

ELEMENT	PERFORMANCE CRITERIA
	with the Evidence Guide.
1. Identify the role and function of key stakeholders.	1.1. Identify ***key stakeholders*** in the sport and recreation sector. 1.2. Access information on and analyse the ***roles and functions*** of key stakeholders in the sport and recreation sector. 1.3. Identify key stakeholders and personnel who impact on the organisation. 1.4. Identify decision-making processes within key stakeholder organisations and their impact on the sport and recreation organisation. 1.5. Research what ***information and resources*** are available from key stakeholder personnel.
2. Develop and implement strategies to promote effective working relationships with stakeholders.	2.1. Develop ***organisational strategies*** to facilitate an effective rapport with stakeholders. 2.2. Communicate with stakeholders to establish their needs according to ***organisational policies and procedures***. 2.3. Adopt communication approaches which are appropriate to the needs of stakeholders. 2.4. Implement organisational strategies in interactions with stakeholders according to organisational policies and procedures. 2.5. Maintain working relationships with stakeholders according to organisational policies and procedures.
3. Evaluate relationships with stakeholders.	3.1. Assess organisational strategies in developing effective working relationships with stakeholders according to organisational policies and procedures. 3.2. Make modifications to strategies in consultation with key organisational and stakeholder personnel.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - liaise with key stakeholder personnel to develop and maintain positive working relationships

© Commonwealth of Australia, 2025 HumanAbility

    - apply communication techniques appropriate to the needs of stakeholders
- language and literacy skills to source and analyse information about the roles and functions of key stakeholders
- problem-solving skills to:
    - identify issues impacting on stakeholder relationships
    - implement measures to improve working relationships.

Required knowledge

- organisational policies and procedures that enable the development and management of effective relationships which comply with organisational protocols and standards
- sources of information on stakeholders such as key agencies and government bodies to enable understanding of their role in the sport and recreation industry
- role and function of stakeholders such as government and other key agencies to enable the development of an effective rapport and understanding of stakeholder needs
- stakeholder organisational structures and dynamics to enable the development of an understanding of systems and structures that impact on the sport and recreation industry
- resources and information available from key stakeholders to assist in the planning and delivery of sport and recreation services
- changing role of stakeholders in the recreation industry.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • interacts with key stakeholders according to knowledge of roles, functions and requirements of stakeholders, as well as own organisational strategies, to develop and maintain an effective working relationship with key stakeholders • uses effective communication techniques to develop trust and confidence in dealings with stakeholders • applies a continuous improvement approach to evaluate relationships with stakeholders and recommend potential improvements.
Context of and specific resources for	Assessment must ensure participation in multiple

© Commonwealth of Australia, 2025 HumanAbility

assessment	interactions with a range of key stakeholders to demonstrate competency and consistency of performance. Assessment must also ensure access to: • relevant personnel in agencies that reflect local industry requirements • resources and information such as roles and functions of key stakeholders.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the candidate interacting with key stakeholder personnel in government and key agencies in forming and maintaining effective working relationships • oral or written questioning to assess candidate's knowledge of the functions and roles of key stakeholders • third-party reports from a supervisor detailing candidate's work performance over multiple applications • review a portfolio of evidence of information and resources accessed. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Key stakeholders may include:

- government agencies
- funding agencies
- community organisations
- peak bodies
- boards of management
- enterprises
- industry associations.

© Commonwealth of Australia, 2025 HumanAbility

Roles and functions may include:	• funding • management • decision making • sponsorship.
Information and resources may include:	• facilities • equipment • grants or funding • personnel • promotion • services.
Organisational strategies may include:	• communication processes • relationship management • roles and responsibilities • negotiation.
Organisational policies and procedures may include:	• communication protocols • evaluation measures and criteria • conflict resolution procedures • information management and security.

	Statement. Assessment of performance is to be consistent with the Evidence Guide.
1. Assist in planning recreation games.	1.1. Confirm ***participant group*** and ***characteristics*** with ***appropriate personnel***. 1.2. Offer ***suggestions*** which are appropriate for the participants and support the ***aims of the recreation games*** according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Identify and select ***recreation games*** in consultation with appropriate personnel to encourage maximum participation and enjoyment of participants. 1.4. Clarify ***game requirements*** in consultation with appropriate personnel. 1.5. Plan recreation games appropriate to the abilities and needs of participants according to organisational policies and procedures. 1.6. Check and confirm suggested recreation games with a responsible person according to organisational policies and procedures.
2. Assist with the conduct of recreation games.	2.1. Communicate ***information*** required to safely participate in the session according to organisational policies and procedures. 2.2. Carry out ***allocated tasks*** promptly, efficiently and as directed. 2.3. Respond to participant queries according to own level of responsibility. 2.4. Monitor participants' performance in consultation with a responsible person. 2.5. Report ***problems*** in participant behaviour to responsible person as required. 2.6. Seek participant feedback and identify further needs.
3. Assist in the evaluation of the recreation games.	3.1. Provide personal feedback on the outcomes of the recreation games to appropriate staff. 3.2. Convey participant feedback on the recreation games to appropriate staff. 3.3. Review own work performance and identify potential improvements.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - offer suggestions during planning for the recreation games
  - confirm arrangements with responsible staff
  - interact with participants and colleagues to clarify client requirements
  - convey information about the session
  - seek and convey feedback from participants
- problem-solving skills to:
  - select and plan recreational games to suit participants' interests and abilities
  - identify and report problems related to activities
  - implement contingencies for situations arising beyond area or responsibility
- planning and organisational skills to confirm arrangements with the responsible person
- self-management skills to:
  - recognise and act within boundaries of role and responsibilities
  - review and evaluate session outcomes in relation to personal performance
- teamwork skills to liaise with appropriate staff to carry out allocated tasks
- literacy and numeracy skills to interpret and seek clarification on recreational games requirements such as rules and regulations.

Required knowledge

- legislation and organisational policies and procedures that:
  - enable the safe and non-discriminatory conduct of recreation games
  - ensure compliance with roles and responsibilities of staff working in an assisting role
- potential hazards associated with the games to ensure safe conduct of the session
- techniques and skills appropriate to different recreation games to ensure participant needs are met according to their abilities
- techniques to motivate participants to interact and participate in recreation games
- information sources to access information about the requirements of recreation games.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 HumanAbility

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies, confirms and carries out assigned duties according to own level of responsibility and refers tasks outside own level to appropriate personnel • carries out allocated tasks responsibly and in a non-discriminatory manner according to instructions of responsible person and reports any difficulties to the appropriate personnel • clarifies and conveys information about essential aspects of the games to assist and encourage participants to fully participate in the recreation games • contributes to the evaluation of the recreation games and suggests how they could be improved and reflects on own work performance.
Context of and specific resources for assessment	Assessment must ensure participation in the planning and conduct of multiple recreation games or sessions to enable the candidate to demonstrate competency and consistency of performance. Assessment must also ensure access to: • sport and recreation environments, venues or facilities that reflect local requirements • participants with varying needs • responsible staff or appropriate personnel • information about recreation games • legislation and organisational policies and procedures in relation to the conduct of recreation games.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of the candidate interacting with a range of participants, including conveying information for safe participation in recreation games and assisting in delivery, supervision and evaluation of games according to own level of responsibility • observation of candidate dealing with contingencies such as situations arising beyond area or responsibility • oral or written questioning to assess knowledge of techniques and skills appropriate to different recreation games • third-party reports from a supervisor detailing

© Commonwealth of Australia, 2025 HumanAbility

appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISXCAI303A Plan and conduct sport and recreation sessions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participant group may include:	• experienced • inexperienced • adults • children.
Characteristics may include:	• needs and interests • numbers • age and gender • previous experience • special requirements.
Appropriate personnel may include:	• coordinator • supervisor • manager.
Suggestions may include:	• type of games • content of games • methods of working with participants • timing and sequencing of games.
Aims of the recreation games may include:	• participation • confidence • motivation • self-improvement • fitness • lifestyle adjustment.
Relevant legislation may include:	• occupational health and safety • equal opportunity • privacy

© Commonwealth of Australia, 2025 HumanAbility

	• working with children.
Organisational policies and procedures may include:	• occupational health and safety • communication protocols • roles and responsibilities • duty of care • reporting channels.
Recreation games may include:	• competitive • non-competitive • traditional • cultural activities • individual or group.
Game requirements may include:	• safety • rules and regulations • resources • scheduling.
Information may include:	• game requirements • expected behaviour • clothing and footwear • hydration • instructions • potential hazards.
Allocated tasks may include:	• providing access to facilities or recreation areas • providing advance information to participants • organising refreshments.
Problems may include:	• aggressive or unacceptable behaviour • inappropriateness of game type or duration • participant injury.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Apply legal responsibilities.	1.1. Identify ***legal responsibilities*** according to ***activity-specific requirements***, ***clients*** and ***organisational policies and procedures***. 1.2. Analyse how activity-specific legal responsibilities apply to own role. 1.3. Develop strategies to address possible or likely ***difficulties or issues*** that can arise during instruction.
2. Apply ethical responsibilities.	2.1. Identify ***ethical responsibilities*** according to activity-specific requirements, clients and organisational policies and procedures. 2.2. Analyse how activity-specific ethical responsibilities apply to own role. 2.3. Develop strategies to address possible or likely ethical difficulties or issues that can arise during instruction.
3. Develop instructional practices.	3.1. Identify the role of the instructor according to the required ***activity-specific skills*** and ***best practice principles*** of the activity or organisation. 3.2. Identify appropriate ***activity-specific instructional styles*** according to activity-specific skills and best practice principles of the activity or organisation. 3.3. Access ***relevant information*** according to organisational policies and procedures. 3.4. Prepare activity-specific session plans according to the requirements of specific skill development, client needs and ***learning styles***.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to enable effective non-judgemental instruction and cooperation with clients and colleagues
- research skills to identify activity-specific legal and ethical responsibilities
- literacy skills to interpret relevant information and to prepare session plans
- problem-solving skills to analyse responsibilities and develop instructional styles appropriate to the activity and the work role

© Commonwealth of Australia, 2025 HumanAbility

Required knowledge

- legal responsibilities and organisational policies and procedures that enable:
  - the safe conduct of all activities
  - ethical and legally compliant access, use and storage of information
- principles of session planning to develop activity-specific session plans
- activity-specific knowledge to identify and interpret legal, ethical and skills development requirements
- learning styles to enable the use of a variety of activities to cater for different client learning preferences
- principles of growth and development to select and sequence appropriate tasks and activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • accesses and interprets legal and ethical information relevant to the activity to anticipate possible legal and ethical issues and develop appropriate management strategies • determines instructional styles appropriate to the needs of clients and the skills • develops session plans for activity-specific skills according to the needs of clients, best practice principles of the activity and the organisation.
Context of and specific resources for assessment	Assessment must ensure the candidate applies legal and ethical responsibilities to own instructional role according to activity-specific requirements and the needs of clients on multiple occasions to demonstrate competency and consistency of performance. Assessment must also ensure access to: • sources of legal and ethical information • relevant information for real or simulated client groups relevant to the candidate's intended work role.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples

© Commonwealth of Australia, 2025 HumanAbility

are appropriate for this unit:

- oral or written questioning to assess knowledge of activity-specific legal and ethical information
- portfolio of session plans
- third-party reports from a supervisor detailing candidate's work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU309A Instruct clients in water safety and survival skills

or

- SISCCRO304A Plan and conduct disability recreation programs

or

- SISCSDF301A Instruct the basic skills of unarmed self-defence.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Legal responsibilities may include:

- occupational health and safety
- working with children
- duty of care
- mandatory reporting
- negligence
- waivers and exclusion clauses
- insurance
- anti-discrimination
- equal opportunity
- privacy.

Activity-specific requirements may include:

- equipment
- ratio of staff to clients
- provision of first aid
- security.

© Commonwealth of Australia, 2025 HumanAbility

Clients may include:	• experienced • inexperienced • adults • children • groups.
Organisational policies and procedures may include:	• occupational health and safety • communication protocols • access and storage of information.
Difficulties or issues may include:	• unsafe equipment • injuries and illnesses • unlawful behaviour of clients or staff • suspected abuse • improper use of information • inappropriate behaviour of clients or staff • cheating • bullying • dealing with non-payment of fees.
Ethical responsibilities may include:	• reporting ethical breaches • maintaining professional standards of behaviour • responding to clients, colleagues and parents or guardians.
Activity-specific skills may include:	• motor skills • physical skills • sequencing of skills.
Best practice principles may include:	• activity-specific codes of conduct • Australian Coaching Council's Coaches Code of Conduct • national activity organisation regulations and guidelines • relevant national, state, territory or local government regulations and guidelines • the culture of the activity • preventative practices adopted by self or peers to minimise safety hazards and risks.
Activity-specific instructional styles may include:	• friendly and approachable • directive regarding not-negotiable issues • casual • critical friend • motivational • disciplinarian.
Relevant information may	• expectations and aspirations of clients

© Commonwealth of Australia, 2025 HumanAbility

include:	• numbers of clients • client background, experience and developmental stage • staff and financial resources • cultural and political influences • involvement and interest of parents • length and number of sessions • equipment, materials and provisions • precautions and other health and safety information.
Learning styles may include:	• auditory • kinaesthetic • visual • sensory.

SISCCRO303A Plan and conduct recreation programs for older persons

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and conduct recreation programs for older persons including frail and moderately active participants. It focuses on the application of planning skills to develop a program that takes into account the needs of older participants and the resources required to safely conduct and supervise a recreation program for older participants.

Application of the Unit

This unit applies to those working as recreation officers in a community recreation environment with responsibility for conducting programs for older clients. Work would be undertaken in locations such as community recreation centres and indoor or outdoor recreation facilities with a focus on community development.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify participant needs and expectations.	1.1. Identify ***participants' needs and aims*** according to ***organisational policies and procedures***. 1.2. Conduct relevant ***assessments*** to determine ***variations in status of participants*** in consultation with relevant support personnel according to organisational policies and procedures. 1.3. Identify any special requirements according to participants' needs. 1.4. Advise participants of any reasons for not participating in a given program. 1.5. Identify barriers to participation for older persons.
2. Plan a recreation program for older persons.	2.1. Identify ***equipment and resources*** appropriate to the program. 2.2. Design and document a ***program plan*** to meet the identified needs and abilities of participants according to ***relevant legislation*** and organisational policies and procedures. 2.3. Seek agreement on the program plan from staff, participants and organisations where relevant. 2.4. Assess the likely demands of the program on the participants in consultation with appropriate personnel. 2.5. Determine the range of ***activities*** to be included in the program according to participant needs and capabilities. 2.6. Identify support requirements for older persons according to relevant legislation and organisational policies and procedures.
3. Prepare for the program.	3.1. Communicate instructions and relevant information about the program and encourage participants to seek clarification as required. 3.2. Access required equipment from store and check for ***damage or deterioration*** and report where appropriate to the responsible person according to organisational policies and procedures. 3.3. Issue suitable equipment and aids and provide assistance with fitting where necessary.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.4. Set up equipment according to organisational policies and procedures.
	3.5. Modify or condition equipment for use by different participant groups according to workplace policies and procedures.
4. Conduct the program.	4.1. Encourage participants to warm up and cool down through safe and appropriate exercises.
	4.2. Monitor technique and correct use of equipment, where relevant, and provide appropriate feedback to participants.
	4.3. Provide assistance with use of aids, including modification, as appropriate.
	4.4. Seek feedback from participants regarding their progress during the program and modify as required.
	4.5. Use techniques that motivate clients to maintain an appropriate participation rate.
	4.6. Identify ***risks*** to participant safety and take action to minimise these, according to relevant legislation and organisational policies and procedures.
	4.7. Modify the program, where necessary, based on an assessment of the conditions, status of older persons, facilities and equipment.
5. Conclude the program.	5.1. Conclude the program at a pace appropriate to the participants, their level of involvement and the duration of the program.
	5.2. Inform participants of follow-up programs and recreational opportunities.
	5.3. Collect and check issued equipment for damage and wear according to organisational policies and procedures.
6. Evaluate the program.	6.1. Seek and acknowledge feedback from participants and identify further needs.
	6.2. Evaluate all components of the program and record outcomes.
	6.3. Identify potential areas for improvement in future programs.
	6.4. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants and personnel about recreation activities to meet participant needs
  - convey information and instructions to participants about the program and safe use of the equipment
  - seek feedback on the program
  - report missing or damaged equipment according to organisational requirements
- problem-solving skills to:
  - plan programs according to participants' needs, abilities and risk factors
  - select a range of activities and exercises and modify programs and equipment as required
- planning and organisational skills to source, allocate and coordinate the resources and equipment needed for the recreation program
- teamwork skills to liaise with support personnel and other appropriate staff and organisations to plan and conduct the program
- language and literacy skills to produce and document a program plan and complete documentation in relation to damaged or missing equipment or materials
- self-management skills to review and reflect on own work performance in facilitating personal development of older participants
- activity-specific skills to safely conduct recreation programs for older participants.

Required knowledge

- legislation and organisational policies and procedures relevant to:
  - designing a program for older participants that enables safe and non-discriminatory conduct
  - identifying support requirements and specific needs of older persons, such as use of modified equipment, aids and venues
  - producing and maintaining records for equipment use and maintenance
- principles of community development to enable inclusive client-centred practices
- stages and impact of ageing on participation in recreation activities and the variations in older people's abilities, to enable appropriate selection of activities for the program
- risk analysis processes for assessing the potential impact of a planned recreation program on participant safety
- activity-specific knowledge to match activities with client needs and capabilities, including suitable exercises for older persons such as stretching and mobility exercises
- factors affecting group dynamics and conflict resolution strategies
- modified equipment and aids for older participants and equipment testing and

© Commonwealth of Australia, 2025 HumanAbility

checking techniques
- social, political, cultural and historical issues that affect or are relevant to older persons
- screening processes of older persons for entry into programs or activities and general contraindications for participation evaluation processes to enable improvements to be made to the program.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • encourages participation and interaction of older persons using appropriate communication strategies that enhance emotional wellbeing • plans recreation programs that determine the range of activities or exercises for older persons and coordinates and allocates program resources to optimise their use by participants • applies contingency management techniques to deal with problems and issues that may arise during program implementation • delivers recreation programs safely and in a manner that reflects the needs and capabilities of older participants • monitors the progress of participants and provides feedback to enhance participant motivation and self-esteem.
Context of and specific resources for assessment	Assessment must ensure the delivery of multiple recreation programs of a sufficient duration to demonstrate techniques that balance individual and group needs and consistency of performance. Assessment must also ensure access to: • older persons to participate in program • an environment or facility appropriate to the specific program content • equipment, resources and support staff required for the delivery of the program • access to key people and organisations that support

© Commonwealth of Australia, 2025 HumanAbility

older people
- relevant legislation and organisational policies and procedures in relation to inclusion processes.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate preparing for and resourcing recreation programs for older persons including developing program plans
- observation of candidate interacting with a range of older participants, conveying information for safe participation in programs and delivering and evaluating programs
- oral or written questioning to assess candidate's knowledge of the ageing process in relation to program design and delivery
- portfolio containing evidence of candidate's program plans and modifications
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCCRD301A Facilitate community development through recreational activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participants' needs and aims may include:

- physical
- emotional
- motivational
- psychological.

Organisational policies and procedures may include:

- occupational health and safety
- privacy
- roles and responsibilities

© Commonwealth of Australia, 2025 HumanAbility

	• staff behaviour • risk minimisation • time constraints and scheduling requirements • budget allocation • use and maintenance of equipment.
Assessments may include:	• interviews with participants and carers • medical history • physical ability tests.
Variations in status of participants may include:	• impact of medication • chronological age • physiological age • medical conditions.
Equipment and resources may include:	• staff • equipment and aids • venues and facilities • music.
Program plan may include:	• objectives • date and time • resources • sessions • movement of people and equipment into and out of venue • timelines • pre-program information.
Relevant legislation may include:	• occupational health and safety • equal opportunity • privacy.
Activities may include:	• stretching and mobility • strengthening or conditioning • confidence building • posture • balance • chair based • floor work.
Damage or deterioration may include:	• damage to fabric • missing parts.
Risks may include:	• level of challenge and difficulty • behaviour of other participants • equipment failure.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants and personnel about recreation activities that will meet participant needs
  - convey information and instructions to participants about the programs and safe use of equipment
  - seek feedback on the program
  - report missing or damaged equipment
- problem-solving skills to:

© Commonwealth of Australia, 2025 HumanAbility

    - plan programs according to participants' needs, abilities and risk factors
    - select a range of activities and exercises and modify programs and equipment as required
- planning and organisational skills to source, allocate and coordinate resources and equipment for planned recreation program
- teamwork skills to liaise with support personnel and other appropriate staff and organisations to plan and conduct programs
- language and literacy skills to produce and document program plans and complete documentation in relation to damaged or missing equipment or materials
- self-management skills to review and reflect on own performance in facilitating personal development for participants with a disability
- activity-specific skills to conduct disability recreation programs safely and effectively

Required knowledge

The following knowledge must be assessed as part of this unit:

- legislation and organisational policies and procedures relevant to:
    - designing a safe and non-discriminatory recreation program for people with a disability
    - identifying support requirements and specific needs of people with a disability
    - recording and maintaining records for equipment use and maintenance
- principles of community development regarding inclusive client-centred practices
- impact of disability on participation in recreation activities and the variation in abilities of people with a disability
- appropriate selection of activities for the program
- risk analysis processes for assessing the potential impact of planned recreation program on participant safety
- activity-specific knowledge to match activities with client needs and capabilities, including exercises suitable for people with a disability, such as stretching and mobility exercises
- factors affecting group dynamics and conflict resolution strategies to enable constructive engagement of participants
- modified equipment and aids for participants with a disability and equipment testing and checking techniques to enable safe use of all equipment
- social, political, cultural and historical issues that affect or are relevant to people with a disability
- individual structural and functional variations to the human body and barriers to participation for people with a disability
- screening processes for entry into programs or activities and general contraindications to participation
- evaluation processes to enable improvements to be made to the program

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- encourages participation and interaction of people with a disability using appropriate communication strategies that enhance emotional wellbeing
- plans recreation programs that determine the range of activities or exercises for people with a disability and coordinates and allocates program resources to optimise their use by participants
- applies contingency management techniques to deal with problems and issues that may arise during program implementation
- delivers recreation programs safely and in a manner that reflects the needs and capabilities of participants with a disability
- monitors the progress of participants and provides feedback to enhance client motivation and self-esteem.

Context of and specific resources for assessment

Assessment must ensure the candidate delivers multiple recreation programs of a sufficient duration to demonstrate techniques that balance individual and group needs and consistency of performance.

Assessment must also ensure access to:

- people with a range of disabilities to participate in the program
- an environment or facility appropriate to the specific program content
- equipment, resources and support staff required for the delivery of the program
- key people and organisations that support people with a disability
- relevant legislation and organisational policies and procedures in relation to inclusion processes.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate preparing for and resourcing

© Commonwealth of Australia, 2025 HumanAbility

a disability recreation program, including developing program plans
- observation of candidate interacting with a range of participants with disabilities, conveying information for safe participation in programs, and delivering and evaluating programs
- observation of candidate dealing with contingencies such as the changing availability of equipment or venues
- oral or written questioning to assess candidate's knowledge of techniques and activity skills in relation to program aims and community development principles
- portfolio containing evidence of candidate's program plans and modifications
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCCRD303A Facilitate inclusion for people with a disability.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participants' needs and aims may include:
- physical
- emotional
- motivational
- psychological.

Organisational policies and procedures may include:
- occupational health and safety
- risk minimisation
- privacy
- roles and responsibilities
- staff behaviour
- time constraints and scheduling requirements
- budget allocation

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Determine range of resources required for initiative.	1.1. Obtain data identifying resources required to conduct similar initiatives over similar timeframes from the ***responsible person***. 1.2. Obtain and confirm budget allocation from responsible person. 1.3. Identify potential ***sources of income*** according to ***organisational policies and procedures***. 1.4. Determine realistic projections of income based on information obtained.
2. Undertake costing for initiative.	2.1. Obtain relevant data identifying ***costs*** for similar initiatives from responsible person. 2.2. Calculate costs according to organisational policies and procedures. 2.3. Determine break-even analysis as required. 2.4. Determine unit cost or product price as required. 2.5. Maintain and document costing system to ensure all relevant information is up to date, accurate and confidential. 2.6. Identify and plan for likely contingencies according to organisational policies and procedures.
3. Draft budgets.	3.1. Prepare a draft budget from data obtained according to organisational policies and procedures. 3.2. Submit budget to responsible person for approval within designated timelines. 3.3. Adjust budget in response to feedback.
4. Review budget against actual results.	4.1. Compare original budget to actual results and identify variances according to organisational policies and procedures. 4.2. Record and maintain information to allow retrieval for the development of future budgets. 4.3. Review own work performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 HumanAbility

- numeracy skills to:
  - analyse and compare financial data
  - determine income projections
  - calculate costs for initiatives
  - prepare a budget for a recreation initiative
  - identify variances against original budget
- literacy skills to:
  - gather and analyse financial data
  - record and maintain financial information
- problem-solving skills to:
  - assess resources required for the initiative
  - estimate projected income
  - allocate financial resources within organisational limits
  - adjust costings in response to feedback
- planning and organisational skills to:
  - develop and submit the budget within designated timeframes
  - plan responses for contingencies
- technology skills to set up appropriate formats to record financial information
- communication skills to liaise with responsible personnel to obtain data and information

Required knowledge

- organisational policies and procedures that:
  - enable sound and responsible financial management
  - maintain confidentiality and security of financial information
- principles of budgetary control to enable the development of a responsible budget
- forecasting techniques to enable the projection of potential income
- principles of statistical analysis and measures of variance to enable accurate analysis of data
- resources required for a recreation initiative to enable accurate costings to be determined

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

© Commonwealth of Australia, 2025 HumanAbility

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consults with appropriate personnel to gather and analyse data to determine required resources for a recreation initiative
- utilises data obtained to calculate income and to prepare, document and submit a budget, including costings for the initiative, using an appropriate format and within required organisational timeframes
- applies effective contingency management techniques to respond to problems and makes adjustments in response to feedback
- applies a continuous improvement approach to review own performance and recommend potential improvements.

Context of and specific resources for assessment

Assessment must ensure development of a budget for a recreation initiative that reflects local requirements and is of sufficient breadth to enable the candidate to demonstrate competency.

Assessment must also ensure access to:

- recreation environments and facilities that reflect local requirements and activities
- data required to develop the budget
- organisational policies and procedures related to budgeting
- appropriate personnel
- organisational documentation and appropriate technology requirements.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of forecasting techniques for projected income
- portfolio containing evidence of candidate's documentation relating to the costing and preparation of a budget for a recreation initiative
- third-party reports from a supervisor detailing candidate's work performance over multiple applications.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCCRD301A Facilitate community development through recreational activities.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Responsible person may include:

- supervisor
- manager
- finance manager
- chief executive officer
- board of management.

Sources of income may include:

- grants
- sponsorship
- client contributions
- donations.

Organisational policies and procedures may include:

- designated timelines for presentation to nominated person for authorisation
- approval processes
- record keeping
- contingency planning
- confidentiality
- security of information
- sources of income
- format.

Costs may include:

- material
- labour
- overheads.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - identify travel requirements of participants
  - convey travel information and confirm travel arrangements with appropriate personnel
- planning and organisational skills to:
  - make and confirm logistical arrangements for travel
  - develop travel schedules
  - manage groups according to the travel schedule
- literacy skills to record and maintain required documentation relating to travel
- numeracy skills to identify and monitor travel costs in order to ensure cost effectiveness
- problem-solving skills to:
  - identify potential risks during travel
  - develop courses of action to respond to these risks
  - conduct a review of travel arrangements and make recommendations for improvements

Required knowledge

- relevant legislation and organisational policies and procedures that enable safe and compliant implementation of travel arrangements
- risks associated with travel activities and locations to enable implementation of safe travel arrangements and effective contingency planning
- principles and techniques for effective group management to enable positive interaction and cohesiveness amongst participants
- roles and responsibilities of participants to enable appropriate behaviour during travel
- travel arrangements appropriate to the needs of different participant and suited to the journeys for recreation activities
- safe handling and storage techniques of equipment and or luggage to avoid injury and damage
- transport options for various journeys to enable cost effectiveness and efficiency of travel

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 HumanAbility

Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • makes and implements travel arrangements and schedules, including contingency plans, appropriate to the travel requirements of participants balancing efficiency, cost effectiveness, comfort and safety • uses communication techniques to convey information about travel schedules and arrangements to all participants and maintains the safety and wellbeing of participants during the journey • applies a continuous improvement approach to evaluate travel outcomes and recommend potential improvements.
Context of and specific resources for assessment	Assessment must ensure implementation and maintenance of documentation for multiple travel arrangements which are of sufficient duration and breadth to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a group of participants involved in recreation activities • logistical resources and equipment required for travel • support staff and personnel to assist in travel • organisational policies and procedures related to making travel arrangements • required travel documentation.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of candidate's interaction with appropriate personnel to plan, supervise and review travel arrangements for participants in recreation activities • oral or written questioning to assess candidate's knowledge of the principles and techniques for effective group management • portfolio containing evidence of documentation created by candidate relating to the planning and supervision of travel arrangements • third-party reports from a supervisor detailing candidate's work performance over multiple

applications.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participants may include:

- experienced
- inexperienced
- adults
- children
- groups.

Appropriate personnel may include:

- managers
- carers.

Relevant legislation may include:

- occupational health and safety
- duty of care
- anti-discrimination
- road safety and transport
- working with children
- privacy
- consumer protection.

Organisational policies and procedures may include:

- occupational health and safety
- roles and responsibilities of staff
- communication protocols
- liability
- insurance
- codes of behaviour
- protocols for making travel arrangements
- reporting obligations.

Resource and logistical requirements may include:

- bookings
- licensing
- insurance
- equipment
- clothing

© Commonwealth of Australia, 2025 HumanAbility

	• meals • medical.
Risks may include:	• disruption to travel arrangements • injury or illness • alterations to schedule • misplaced or lost equipment • accidents • staff unavailability.
Travel arrangements may include:	• method of transport • route • departure and arrival times • comfort and hygiene • overnight accommodation • supervision and support • transport of equipment and belongings.
Strategies for effective group management may include:	• head counts • rolls • buddy systems • travel partners • codes of behaviour • communication strategies.

SISCDAN301A Teach recreational dance

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and teach recreational dance classes. It focuses on using methods for teaching dance in a community, social or recreational context and implementing injury prevention strategies.

Application of the Unit

This unit applies to those working as community dance instructors in a community recreation environment with responsibility for teaching recreational dance programs. Work would be undertaken in locations such as community recreation centres, indoor or outdoor recreation facilities or dance studios with a focus on community development.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Identify participant needs and expectations.	1.1. Identify the ***characteristics***, needs and expectations of participants according to ***organisational policies and procedures*** and the ***roles and functions of dance***.
	1.2. Identify any special requirements according to participants' needs.
	1.3. Advise participants of any reasons why they should not participate in the recreational ***dance program***.
2. Plan a recreational dance program.	2.1. Identify and access ***equipment and resources*** appropriate for the program according to organisational policies and procedures.
	2.2. Design and document a recreational dance program to meet the identified needs and abilities of participants according to ***relevant legislation*** and organisational policies and procedures.
	2.3. Identify effective and safe ***teaching strategies*** appropriate to the teaching context.
	2.4. Select music and choreography appropriate to the teaching context.
	2.5. Identify ***risks*** to participant safety and take action to minimise these according to relevant legislation and organisational policies and procedures.
	2.6. Identify ***injury prevention strategies*** according to organisational policies and procedures.
	2.7. Identify and provide a ***safe dance environment*** according to organisational policies and procedures.
3. Conduct the recreational dance program.	3.1. Communicate instructions and relevant information to participants in a suitable manner.
	3.2. Monitor participants' progress against program aims.
	3.3. Implement identified teaching methods and strategies and modify as required.
	3.4. Assist participants to perform dance moves and make appropriate corrections according to organisational policies and procedures.
	3.5. Encourage participants to seek and provide feedback regarding their progress during the program, according to organisational policies and procedures.
	3.6. Implement injury prevention strategies according to organisational policies and procedures.
4. Identify community performance	4.1. Identify appropriate ***community performance opportunities*** for participants according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
opportunities.	organisational policies and procedures. 4.2. Apply selection procedures for performance roles according to organisational policies and procedures. 4.3. Assist participants to prepare for community recreational dance performances.
5. Evaluate the program.	5.1. Seek and acknowledge feedback from ***relevant stakeholders*** involved in the program. 5.2. Evaluate all relevant components of the program according to organisational policies and procedures. 5.3. Identify potential areas of improvement for future programs. 5.4. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants and elicit the information required to design a recreational dance program to meet participant needs
  - convey information and instructions about safe participation in the program
  - seek and provide feedback about the recreational dance program
- problem-solving skills to:
  - plan program according to participants' needs, abilities and risk factors
  - identify and implement effective teaching strategies to promote self-expression and self-confidence
  - evaluate and modify the program as required
- planning and organisational skills to source, access and coordinate resources and equipment necessary for the implementation of the recreational dance program
- literacy skills to produce and document a recreational dance program
- self-management skills to review and reflect on own work performance in facilitating personal development and self-confidence in participants
- skills in the chosen genre and style of dance

Required knowledge

- legislation and organisational policies and procedures that enable safe and non-discriminatory conduct of the recreational dance program

© Commonwealth of Australia, 2025 HumanAbility

- philosophies and principles of community development, to enable inclusive client-centred practices
- health and other factors affecting ability to participate in dance classes, to enable design of appropriate dance movements and techniques
- anatomy and physiology of basic body structures to enhance safe dance practice
- common dance injuries, to enable the implementation of effective injury prevention strategies
- sources of information and resources on dance safety
- basic first aid procedures to enable effective management of injuries that may occur during the program
- risk analysis processes to enable assessment of the potential impact of planned dance program on participant safety
- genre and style of dance to instruct the participants the skills or movements during sessions
- teaching methods to promote self-expression and self-confidence
- factors affecting group dynamics and conflict resolution strategies to enable constructive engagement of participants
- equipment testing and checking techniques to enable safe use of all equipment
- evaluation processes to enable improvements to be made to the program
- principles of group management to build group cohesion and encourage participation
- fundamental principles of dance analysis to enable accurate corrections to be made to technique
- fundamental principles of dance such as choreography, performance and appreciation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans and conducts recreational dance programs in response to the needs and capabilities of participants • uses teaching methods and strategies that are safe and supportive, monitors the progress of participants and makes adjustments in response to changing situations • applies contingency management techniques to deal with a range of problems and issues that may arise during program implementation

© Commonwealth of Australia, 2025 HumanAbility

- provides positive feedback to encourage motivation, self-esteem and self-expression
- evaluates and reflects on own performance to identify ways in which program outcomes can be improved.

Context of and specific resources for assessment

Assessment must ensure candidate plans and conducts multiple recreational dance programs of a sufficient duration to enable demonstration of techniques that balance individual and group needs and ensure consistency of performance.

Assessment must also ensure access to:

- range of participants to participate in the program
- an environment or facility appropriate for recreational dance sessions
- equipment, resources and support staff required for the delivery of the dance program
- relevant legislation and organisational policies and procedures in relation to personal development.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate preparing for and conducting a recreational dance program
- observation of candidate interacting with a range of participants, including conveying information for safe participation in programs, and monitoring and evaluating programs
- observation of candidate dealing with contingencies such as the changing availability of equipment or venues
- oral or written questioning to assess candidate's knowledge of dance forms and techniques
- portfolio containing evidence of dance program planning and modification
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCCRD301A Facilitate community development through recreational activities.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics may include:

- age
- skill level
- fitness
- emotional, physical and intellectual development
- existing injuries.

Organisational policies and procedures may include:

- occupational health and safety
- reporting of hazards and risks
- risk minimisation
- selection of participants for performances
- scheduling requirements
- communication protocols
- budget allocation.

Roles and functions of dance may include:

- artistic
- social
- ritual or ceremonial
- spiritual
- self-expression and creativity.

Dance program may include:

- ballet
- contemporary
- jazz
- folk
- latin
- ballroom
- classical dance forms
- ethnic dance forms
- Indigenous dance
- social dance
- frequency
- intensity
- duration.

Equipment and resources may include:

- dance studio or community hall
- music
- technological aids

© Commonwealth of Australia, 2025 HumanAbility

	• electronic equipment • teaching aids.
Relevant legislation may include:	• occupational health and safety • privacy • duty of care • working with children • equal opportunity.
Teaching strategies may include:	• whole skill • progressive • demonstration • command and response • directive approaches through specific set tasks • experiential or problem-solving.
Risks may include:	• level of challenge and difficulty • behaviour of other participants.
Injury prevention strategies may include:	• warm-up and cool-down • stretching for flexibility • suitable footwear and clothing.
Safe dance environment may include:	• size of floor area • ventilation • unobstructed space • appropriate heating, cooling and lighting • appropriate floor coverings • security.
Community performance opportunities may include:	• community concerts • class performances.
Relevant stakeholders may include:	• participants • staff • colleagues • community organisations.

ELEMENT	PERFORMANCE CRITERIA
	improve individual or group skills. 3.6. Monitor participants' progress against program aims and modify session as required. 3.7. Encourage participants to seek and provide feedback regarding their progress during the program according to organisational policies and procedures. 3.8. Implement injury prevention strategies according to organisational policies and procedures.
4. Utilise assistants during a self-defence session.	4.1. Instruct assistant or assistants to set up equipment for the self-defence activity safely and correctly according to organisational policies and procedures. 4.2. Direct assistants to instruct basic skills of unarmed self-defence within the specific self-defence system using appropriate communication strategies. 4.3. Monitor assistants during instruction of basic skills of unarmed self-defence according to organisational policies and procedures.
5. Evaluate the program.	5.1. Seek and acknowledge feedback from ***relevant stakeholders*** involved in the program. 5.2. Evaluate all relevant components of the program according to organisational policies and procedures. 5.3. Identify potential areas for improvement in future programs. 5.4. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants and elicit information required to design an appropriate self-defence program to meet participant needs
  - convey information and instructions to participants and assistants about safe participation in the program
  - seek and provide feedback about the self-defence program
- problem-solving skills to:
  - plan self-defence programs according to participants' needs, abilities and risk

© Commonwealth of Australia, 2025 HumanAbility

factors
    - identify and implement effective teaching strategies to promote skills development
    - analyse self-defence technique to provide instructions for improvement
    - evaluate and modify programs as required
- planning and organisational skills to source, access and coordinate resources and equipment necessary for the implementation of the self-defence program
- literacy skills to produce and document programs for unarmed self-defence
- self-management skills to review and reflect on own work performance to facilitate personal development and self-confidence
- application of manoeuvres, techniques and methods of a self-defence system
- application and demonstration of injury prevention strategies

Required knowledge

- relevant legislation to enable safe and non-discriminatory conduct of the self-defence program
- principles of community development to enable inclusive client-centred practices
- health and other factors affecting ability to participate in self-defence classes, to enable design of safe and effective self-defence movements and techniques
- organisational policies and procedures regarding the planning and conduct of an unarmed self-defence program such as those related to appropriate use of equipment and venues
- biomechanics associated with the unarmed self-defence skills of the particular self-defence system being taught to enable safe and effective instruction
- common injuries sustained through self-defence drills and activities to enable the implementation of effective injury prevention strategies
- basic first aid procedures to enable effective management of injuries that may occur during the program
- manoeuvres, techniques and methods of the self-defence system being taught to enable accurate demonstration and correction of skills
- risk analysis processes to enable assessment of the potential impact of planned techniques and manoeuvres on participant safety
- self-defence principles, strategies, teaching methods and factors that affect skills acquisition, to promote effective skills development and confidence
- factors affecting group dynamics and conflict resolution strategies to enable constructive engagement of participants
- equipment testing and checking techniques to enable safe use of all equipment
- evaluation processes to enable improvements to be made to the program
- fundamental principles of technique analysis to enable accurate and prompt corrections to technique
- physiology and psychology of pain and danger to enable an appropriate response

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- carries out community self-defence instruction professionally and safely, in a non-discriminatory manner using a client-centred approach and appropriate communication strategies to encourage participation and interaction
- uses knowledge of self-defence systems, techniques and manoeuvres to plan and conduct unarmed self-defence programs in response to the needs and capabilities of participants
- uses teaching methods and strategies that are safe, supportive, encouraging and non-threatening; monitors the progress of participants and makes adjustments in response to changing situations
- coordinates and allocates program resources to optimise their use by participants
- applies effective contingency management techniques to deal with problems and issues that may arise during the program, including motivation and participation levels and injuries to participants
- provides positive feedback to encourage motivation and self development
- evaluates and reflects on own performance to identify ways in which program outcomes and benefits to participants can be improved.

Context of and specific resources for assessment

Assessment must ensure candidate plans and conducts multiple unarmed self-defence sessions of sufficient duration to demonstrate techniques that build group cohesion and balance individual and group needs and consistency of performance.

Assessment must also ensure access to:

- a range of participants to undertake an unarmed self-defence program
- an environment or facility appropriate and safe for the conduct of unarmed self-defence sessions
- equipment and resources required for the delivery of the program including assistants and equipment

© Commonwealth of Australia, 2025 HumanAbility

- documentation such as program plans, forms relating to equipment checks and documentation relating to equipment damage
- relevant legislation and organisational policies and procedures in relation to the conduct of self-defence sessions.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate interacting with a range of participants, including conveying information about safe participation in programs, monitoring and evaluating programs
- observation of candidate dealing with contingencies such as the changing availability of equipment or venues
- oral or written questioning to assess candidate's knowledge of biomechanical principles as they apply to the self-defence techniques and manoeuvres being instructed
- portfolio containing evidence of self-defence program planning and modification
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCCRD301A Facilitate community development through recreational activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics may include:

- age
- skill level
- fitness
- emotional, physical and intellectual

SISCSDF302A Instruct the intermediate skills of unarmed self-defence

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to instruct unarmed intermediate self-defence skills including partner applications against an opponent. It focuses on planning, conducting and evaluating an intermediate unarmed self-defence program.

Application of the Unit

This unit applies to those working as self-defence instructors in a community recreation environment and whose responsibilities include teaching self-defence programs. Work would be undertaken in locations such as community recreation centres or halls and indoor or outdoor recreation facilities with a focus on community development.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify participant needs and expectations.	1.1. Identify the ***characteristics***, ***needs and expectations*** of ***participants*** according to ***organisational policies and procedures***. 1.2. Identify any participants with specific requirements according to organisational policies and procedures. 1.3. Advise participants of any reasons why they should not participate in self-defence activities.
2. Plan an intermediate unarmed self-defence program.	2.1. Gather ***relevant information*** to plan an ***intermediate unarmed self-defence program*** according to organisational policies and procedures. 2.2. Identify and access ***equipment*** and ***resources*** appropriate for the program according to organisational policies and procedures. 2.3. Design and document an intermediate self-defence program to meet the identified needs and abilities of participants according to ***relevant legislation*** and organisational policies and procedures. 2.4. Identify effective and safe ***teaching strategies*** appropriate to the teaching context. 2.5. Identify ***risks*** to participant safety and take action to minimise these according to relevant legislation and organisational policies and procedures. 2.6. Identify ***injury prevention strategies*** according to organisational policies and procedures. 2.7. Inspect and confirm set-up of equipment for self-defence session according to organisational policies and procedures.
3. Instruct the self-defence program.	3.1. Communicate instructions and relevant information to participants in a suitable manner. 3.2. Use appropriate methods of self-defence instruction to develop the intermediate skills of a self-defence system according to ***best practice principles*** and organisational policies and procedures. 3.3. Instruct participants in technically correct exercises and skills of intermediate unarmed self-defence according to organisational policies and procedures. 3.4. Demonstrate safe methods of handling training equipment to trainees and assistants according to

ELEMENT	PERFORMANCE CRITERIA
	organisational policies and procedures. 3.5. Observe participants' execution of intermediate skills of unarmed self-defence and apply correction techniques to improve individual or group skills. 3.6. Encourage participants to seek and provide feedback regarding their progress during the program according to organisational policies and procedures. 3.7. Implement injury prevention strategies according to organisational policies and procedures. 3.8. Respond to accident and or emergency situations according to organisational policies and procedures.
4. Utilise assistants during a self-defence session.	4.1. Instruct assistant or assistants to set up equipment for the self-defence activity safely and correctly according to organisational policies and procedures. 4.2. Direct assistants to instruct participants in the intermediate skills of unarmed self-defence within the specific self-defence system using appropriate communication strategies. 4.3. Monitor assistants during instruction of intermediate skills of unarmed self-defence and intervene as required according to organisational policies and procedures.
5. Evaluate the program.	5.1. Seek and acknowledge feedback from ***relevant stakeholders*** involved in the program. 5.2. Evaluate all relevant components of the program according to organisational policies and procedures. 5.3. Identify potential areas for improvement in future programs. 5.4. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants and elicit information required to design an appropriate intermediate self-defence program to meet participant needs
  - convey information and instructions to participants and assistants about safe

© Commonwealth of Australia, 2025 HumanAbility

participation in the program
    - seek and provide feedback about the program
- problem-solving skills to:
    - plan an intermediate self-defence program according to participants' needs, abilities and risk factors
    - identify and implement effective teaching strategies to promote skills development
    - analyse self-defence technique to provide instructions for improvement
    - evaluate and modify the program as required
- planning and organisational skills to source, access and coordinate resources and equipment necessary for the implementation of the self-defence program
- literacy skills to produce and document a program for intermediate unarmed self-defence
- self-management skills to review and reflect on own work performance to facilitate personal development and self-confidence
- application of manoeuvres, techniques and methods of a self-defence system
- application of first aid treatment to deal with accidents or emergencies that arise during self-defence sessions

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of the self-defence program
- risk analysis processes to enable assessment of the potential impact of planned techniques and manoeuvres on participant safety
- equipment testing and checking techniques to enable safe use of all equipment
- fundamental principles of technique analysis to enable accurate and prompt corrections to technique to prevent injury
- common injuries sustained through self-defence drills and activities to enable the implementation of effective injury prevention strategies
- basic first aid procedures to enable effective management of injuries that may occur during the program
- physiology and psychology of pain and danger to enable an appropriate response
- principles of community development to enable inclusive client-centred practicesfactors commonly affecting ability to participate in self-defence classes, to enable design of appropriate self-defence movements and techniques
- biomechanics associated with the intermediate unarmed self-defence skills pertaining to the particular self-defence system being taught
- factors affecting group dynamics and conflict resolution strategies to enable constructive engagement of participants
- self-defence principles, strategies and teaching methods to promote skills development and confidence
- factors that affect acquisition of self-defence skills to enable use of appropriate teaching strategies
- manoeuvres, techniques and methods of the particular self-defence system being

© Commonwealth of Australia, 2025 HumanAbility

taught
- drills, activities and exercises to develop appropriate intermediate self-defence skills
- evaluation processes to enable improvements to be made to the program

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans and conducts intermediate unarmed self-defence programs in response to the needs and capabilities of participants, using safe and supportive teaching methods and strategies • monitors the progress of participants and makes adjustments in response to changing situations to improve skills development • applies effective contingency management techniques to deal with problems and issues that may arise during the program including motivation and participation levels and injuries to participants • evaluates and reflects on own performance to identify ways in which program outcomes and benefits to participants can be improved.
Context of and specific resources for assessment	Assessment must ensure candidate plans and conducts multiple intermediate unarmed self-defence sessions of sufficient duration to demonstrate techniques that build group cohesion and balance individual and group needs, and consistency of performance. Assessment must also ensure access to: • a range of participants wishing to undertake an intermediate unarmed self-defence program • an environment or facility appropriate for the conduct of unarmed self-defence sessions • resources required for the delivery of the program including assistants and equipment • legislation and organisational policies and procedures relevant to the conduct of self-defence sessions.

© Commonwealth of Australia, 2025 HumanAbility

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of candidate interacting with a range of participants, including conveying information about safe participation in programs, monitoring and evaluating programs
- observation of candidate dealing with contingencies such as the changing availability of equipment or venues
- oral or written questioning to assess candidate's knowledge of self-defence techniques and manoeuvres
- portfolio containing evidence of intermediate self-defence program planning and modification
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics may include:

- age
- skill level
- fitness
- emotional, physical and intellectual development
- existing injuries
- stage of development
- personality
- body type and composition.

Needs and expectations may include:

- physical
- emotional
- motivational
- psychological.

© Commonwealth of Australia, 2025 HumanAbility

Participants may include:

- experienced or inexperienced
- adults
- children
- school or youth groups
- club or group members.

Organisational policies and procedures may include:

- occupational health and safety
- collection and use of information
- privacy
- duty of care
- extent and limitations of responsibilities
- staff behaviour
- risk minimisation
- emergency procedures
- time constraints and scheduling requirements
- budget allocation
- hire of equipment.

Relevant information may include:

- needs and expectations of organisation
- needs and expectations of participants
- numbers, ages and gender of participants
- previous experience and developmental stage of participants
- available time
- special requirements
- staff, physical and financial resources
- suitable attire
- safe use of equipment
- occupational health and safety requirements
- safe and responsible behaviour
- emergency procedures.

Intermediate unarmed self-defence program may include:

- manoeuvres, techniques and methods
- grouping and progression of intermediate skills
- teaching methods
- exercises
- skills and strategies:
  - six basic locks
  - six movement lock flow
  - direct attack
  - indirect attack
  - timing
  - counter attack

- mobile defence.

Equipment and resources may include:

- jigsaw mats
- hand-held punching bags, kicking bags, focus mitts
- free-standing or structural types of striking or kicking equipment
- plastic training knives or other simulation equipment
- body guards, face guards and other forms of face and body protection equipment
- hand, shin, instep, forearm, groin, chest, elbow and knee guards.

Relevant legislation may include:

- occupational health and safety
- privacy
- duty of care
- working with children
- equal opportunity.

Teaching strategies may include:

- whole skill
- voice command and response
- reciprocal or peer tutoring
- feedback and refinement
- explanation
- demonstration
- partner application.

Risks may include:

- level of challenge and difficulty
- behaviour of other participants
- physical risks such as incorrect use of equipment
- inappropriate floor coverings
- movements or manoeuvres
- emotional risks such as conflict with others.

Injury prevention strategies may include:

- warm-up and or cool-down
- stretching for flexibility
- suitable footwear and clothing.

Best practice principles of self-defence activities may include:

- accepted preventative practice adopted throughout the self-defence or martial arts industry to minimise safety hazards or risks
- instructors' code of conduct developed by the peak bodies responsible for the teaching of self-defence
- national activity organisation regulations and guidelines
- national code of conduct for martial arts

	statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify general client fitness requirements.	1.1. Identify general ***client*** fitness requirements 1.2. Identify and assess client ***requirements and expectations*** according to ***organisational policies and procedures***. 1.3. Explain available ***services and facilities*** relevant to the client's requirements and expectations. 1.4. Greet client in a friendly and courteous manner
2. Advise client on the benefits of fitness appraisal and exercise prescription.	2.1. Explain the ***benefits*** of fitness activities relevant to the needs of the client. 2.2. Advise the client of the benefits of fitness appraisals and exercise programs. 2.3. Advise the client on specific fitness activities to meet identified needs.
3. Administer and process a health screening questionnaire.	3.1. Briefly explain the ***purpose*** of a pre-exercise health-screening questionnaire to the client. 3.2. Provide and administer an industry standard health screening questionnaire to the client according to organisational policies and procedures. 3.3. Review the questionnaire in consultation with the client and clarify **screening information** provided as required. 3.4. Refer the client to ***appropriate personnel*** for further appraisal as required. 3.5. Provide information to the client on the selected exercise program. 3.6. Process or file the screening questionnaire according to organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - obtain information from clients about their needs and expectations
  - convey information about fitness activities and services
  - clarify screening information provided by clients

© Commonwealth of Australia, 2025 HumanAbility

    - refer clients to appropriate personnel as appropriate
- problem-solving skills to match client needs to appropriate fitness activities and services
- literacy skills to administer a health screening questionnaire and clarify screening information.

Required knowledge

- organisational policies and procedures to enable the collection, use and storage of personal client information
- purpose and content of basic health screening questionnaires to enable accurate information to be communicated to clients and accurate responses to be made to client queries
- fitness industry standards and practices for client health screenings
- features and benefits of exercise programs and services provided to enable clients to receive accurate advice about the most appropriate programs and services for their needs and fitness goals
- process of identification of risk stratification and appropriate referral.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • accurately identifies client's fitness requirements and provides clear information about appropriate exercise programs and services • interacts with the client in a friendly and courteous manner using appropriate communication strategies and organisational channels to collect, handle and clarify sensitive information and to respond to client queries • works within role and responsibilities to administer, review and process a health screening questionnaire and makes arrangements for clients to follow up appraisal with appropriate personnel as required.
Context of and specific resources for assessment	Assessment must ensure the provision of orientation to multiple clients with a range of fitness goals and expectations to demonstrate consistency of performance. Assessment must also ensure access to:

© Commonwealth of Australia, 2025 HumanAbility

- a facility where a variety of exercise programs and services are available
- a range of clients with a range of real or simulated fitness needs and expectations and relevant personnel for follow-up appraisals
- documentation such as health screening questionnaires, written facility information about available exercise programs and services and organisational policies and procedures relating to client orientation.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consulting with clients to convey information about exercise programs and respond to queries
- oral or written questioning to assess knowledge of fitness industry standards and practices for health screening of clients
- third-party reports from colleagues or supervisors detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT307A Undertake client health assessment

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Client may include:

- experienced or inexperienced
- older clients
- children
- adolescents
- active or inactive.

Requirements and expectations may include:

- fitness goals
- specific exercise preferences

© Commonwealth of Australia, 2025 HumanAbility

	• expected outcomes • perceived benefits • cost • time availability • scheduling • range of facilities and equipment.
Organisational policies and procedures may include:	• records management • privacy • screening of clients • referral requirements.
Services and facilities may include:	• group exercises • one-on-one training • healthy eating information • lifestyle advice • fitness equipment • memberships.
Benefits may include:	• general fitness and wellbeing • strength and balance • flexibility • stamina • mental health.
Purpose may include:	• information general health and fitness goals • possible barriers to participation.
Screening information must include:	• medical conditions • prescribed medications • existing injuries • current fitness level • functional limitations • lifestyle factors • exercise history.
Appropriate personnel may include:	• supervisors • co-ordinators • duty managers • fitness instructors.

ELEMENT	PERFORMANCE CRITERIA
relationship.	organisation protocols. 4.2. Develop a rapport with and provide empathy and special assistance to the client who is faced with special needs or circumstances. 4.3. Promote repeat business by the offer of ***promotional services***. 4.4. Encourage clients to voice queries and or fears and address these appropriately. 4.5. Take into consideration cultural and personal factors when consulting or interacting with clients. 4.6. Exercise discretion and confidentiality appropriately, outlining and explaining to clients boundaries of confidentiality as required. 4.7. Define and apply boundaries of the exercise instructor and client relationship.
5. Respond to conflicts and client complaints.	5.1. Identify potential and existing conflicts and seek solutions in conjunction with parties involved. 5.2. Recognise client dissatisfaction promptly and take action to resolve the situation according to individual level of responsibility and organisation procedures. 5.3. Respond to ***client complaints*** positively, sensitively and politely and in consultation with the client. 5.4. Resolve or refer escalated complaints to the appropriate person according to individual level of responsibility and organisation policy and procedures. 5.5. Maintain a positive and cooperative manner at all times. 5.6. Present relevant information clearly. 5.7. Discuss unresolved concerns. 5.8. Make appointments for clients according to workplace guidelines when required
6. Use ***basic counselling skills***.	6.1. Determine needs for basic counselling. 6.2. Provide basic counselling.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

© Commonwealth of Australia, 2025 HumanAbility

Required skills

- communication techniques
  - non-verbal communication,
  - active listening and
  - open and closed questioning
- basic writing skills to write clear and concise messages, notes, emails and faxes
- basic literacy skills to read messages, notes, emails and faxes and to locate and understand specific information required by the client and or employer
- telephone skills to correctly operate the equipment and to use correct vocal tone, pace and volume
- problem-solving skills to:
  - identify and respond to different cultural and special needs and expectations
  - select and use appropriate language according to client differences
  - identify and resolve:
    - conflict situations,
    - client complaints and
    - misunderstandings within scope of responsibility
  - assess the need for professional counselling
- use basic counselling skills to facilitate various goals and to recognise the limitations of own counselling skills
- customer service techniques to meet client requirements and requests, develop rapport and promote suitable products and services.

Required knowledge

- protocol and service rituals of the industry, sector and organisation
- ethics of professional fitness industry behaviour
- characteristics, uses and conventions of different types of communication mediums
- stresses faced by clients
- promotional products and services provided by the fitness industry and the specific organisation
- local professional counselling resources
- legal and ethical issues relating to exercise instructors and client relations
- procedures for the provision of services
- standards of personal presentation that apply to the fitness industry and the organisation in particular
- knowledge of different cultural groups and appropriate communication protocols
- complaint handling policies and procedures that generally operate within the fitness industry and the organisation in particular.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- understanding of communication and customer service and its importance in a fitness industry context
- ability to communicate effectively with a variety of clients including those with special needs and difficult or complaining ones
- ability to provide quality customer service on multiple occasions. This should occur over a period of time and cover a range of diverse customer service situations, including the resolution of complaints, to ensure consistency of performance and ability to respond to different circumstances.
- completion of service within commercial time constraints so that all clients are served effectively.

Context of and specific resources for assessment

Assessment must ensure:

- that the candidate has accessed a fully equipped fitness environment using appropriate telephones, computers, printers, information programs, product publications and software programs currently used in the fitness industry to assist with communication and service provision
- interaction with clients to demonstrate the interpersonal communication requirements of the unit
- the presence of sufficient client traffic that allows for prioritisation of tasks.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of the candidate providing service to clients
- project or work activities that show the candidate's ability to provide quality customer service that meets the requirements of differing industry contexts
- role-plays about communication situations and the resolution of complaints and misunderstandings
- review of simple messages written by the candidate

© Commonwealth of Australia, 2025 HumanAbility

for various situations
- review of client feedback
- written and oral questioning or interview to test knowledge of effective communication techniques and personal presentation requirements

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Communication may be:

- verbal
- by written format, such as handwritten, electronic (e.g. email) or hard copy (e.g. letter)
- by telephone
- face-to-face
- varied according to the needs of the client including:
  - use of appropriate voice tonality and volume
  - use of languages other than English
  - use of a family interpreter
  - use of basic gestures
  - use of visual aids such as photographs, sketches or product information sheets
  - formal
  - informal using abbreviations.

Clients may be:

- team members and colleagues in a large internal structure
- external customers and clients
- business to business client
- new
- regular

© Commonwealth of Australia, 2025 HumanAbility

	• retail • corporate.
Non-verbal communication may involve:	• body language • dress and accessories • gestures and mannerisms • use of space • culturally specific communication, customs and practices. • eye contact
Cultural and social differences may include:	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing.
Medium of communication may be via:	• letter • promotional materials such as newsletters • fax • email or other electronic communication • simple written messages, such as writing down the price of display items or telephone messages • face-to-face • telephone • two-way communication systems • standard forms and proformas • assistive technology, e.g. telephone typewriter (TTY).
Factors affecting the selection of appropriate medium *may include*:	• technical and operational features • access of the sender and receiver to necessary equipment • technical skills required to use the medium • required format • degree of formality required • urgency and timeframes.
Protocols and organisation procedures may include:	• modes of greeting and farewelling • addressing the person by name • required timeframe for addressing and serving clients • required timeframe for response to an enquiry • style manual requirements • use of standard letters • use of proformas e.g. tickets, labels, signs and

© Commonwealth of Australia, 2025 HumanAbility

	quotations • relationship with referral organisation.
Personal presentation may include:	• attire, shoes and accessories • wearing of uniform items within the organisation's policy requirements • complying with organisation's policy for personal presentation • hair and grooming • hands and nails • jewellery • personal hygiene.
Clients with special needs may include:	• those with a disability • those with special cultural or language needs • overweight or obese • those with challenging behaviour • unaccompanied children or adolescents • parents with young children • pregnant women • older clients.
Promotional services may include:	• client loyalty programs • newsletters • email notification of sales or promotional packages • sale of gift vouchers • marketing events and activities • discount vouchers.
Client complaints may relate to:	• problems with the service • communication barriers or misunderstandings • communication via email or other electronic means, telephone, mail or face-to face contact.
Boundaries may refer to:	• confidentiality • privacy • respect • acknowledgement of individual needs • appropriate sexual boundaries • appropriate physical boundaries • use of enquiry only as appropriate and necessary • exercise instructor awareness of possibilities of client transference • exercise instructor staying within area of expertise.

© Commonwealth of Australia, 2025 HumanAbility

Relevant information may include:	• confirmation of appointment date and time • number, length and costs of membership services • location directions • costs and payment options • referrals • health Practitioner referral • procedure and practices • information about general health and self care • background information about the scope of service • information about the limitation of the service provider.
The needs for basic counselling may include:	• to support client • to facilitate negotiation with client • to facilitate education of client • to facilitate information giving • to assess the need for referral to an appropriate medical or allied health professional.
Basic counselling skills may include:	• attending skills, use of body language • paraphrasing • reflecting feelings • open and closed questioning or probing • summarising • reframing • exploring options • normalising statements.
Organisation specific guidelines may include:	• clients requiring professional counselling are referred • basic counselling is used as a communication tool and for emotional support when necessary • client boundaries are respected at all times • counselling is provided in accordance with level of training.

SISFFIT303A Develop and apply an awareness of specific populations to exercise delivery

Modification History

Not Applicable

Unit Descriptor

This unit covers the skills and knowledge to provide appropriate advice to specific population clients on participation in fitness appraisals and fitness activities. It covers the pathology of the more common disease states and conditions encountered within the fitness industry and the limiting effects of the condition on exercise performance and functional capacity.

Application of the Unit

This unit applies to exercise instructors who work in facilities that provide a range of exercise programs and services, such as aqua, group or gym-based to specific populations. This unit is applicable to those working in fitness venues, gyms or other exercise environments under the supervision of a medical or allied health professional.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify specific population clients.	1.1. Recognise possible medical conditions, possible injuries and possible use of prescribed medications that should exclude an individual from undertaking a fitness appraisal or participating in exercise without a medical clearance and discuss with client. 1.2. Apply a recognised risk stratification process to the client's information to determine the risk status of the client and the ***level of risk*** associated with participation in exercise. 1.3. Recommend clients who need to make an appointment with a ***medical or allied health professional*** as required and implement actions resulting from evaluation of risk status. 1.4. Identify specific populations common to the fitness industry requiring modification to exercise or exercise programs.
2. Provide advice to specific population clients regarding exercise testing and participation.	2.1. Explain to the client, the legal and ethical limitations of a fitness instructor in prescribing and delivering exercise to identified specific populations, and the need for a suitably qualified exercise, medical or allied health professional to design an exercise program is acknowledged. 2.2. Apply an understanding of the specific requirements of individuals with specific disease states or conditions when providing information about exercise testing or exercise participation. 2.3. Apply an understanding of the ***pathology*** of the identified disease state, condition or injury to exercise. 2.4. Investigate the effects of ***medications*** commonly used to manage the disease or condition through consultation or research. 2.5. Promote the ***benefits of exercise for specific populations*** and discuss the anticipated structural and physiological improvements with clients. 2.6. Recommend suitable fitness activities and exercises and identify unsuitable or contraindicated activities and exercises. 2.7. Provide advice regarding exercise programs currently available in the fitness industry for specific

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	population ***clients*** or groups.
3. Deliver exercise programs for specific populations under the guidance of medical or allied health professionals.	3.1. Apply exercise considerations and exercise prescription guidelines relevant to the identified specific populations to the delivery of fitness activities undertaken by specific population ***clients*** who are under the supervision of an appropriate medical or allied health professional. 3.2. Advise ***clients*** that exhibit ***signs of poor exercise tolerance*** to any fitness activity to stop the exercise immediately and make an appointment to see a medical or allied health professional. 3.3. Identify modifications to ***exercise or exercise programs***, fitness programs and facilities in consultation with a medical or allied health professional.
4. Identify a network of medical and allied health professionals.	4.1. Refer fitness clients to medical or allied health professionals when ***contraindications to exercise*** are identified in accordance with organisational policies and procedures. 4.2. Use appropriate documentation and terminology to communicate information to medical or allied health professionals when referring fitness ***clients***. 4.3. Maintain client confidentiality at all times. 4.4. Identify and access suitable reference points to develop awareness of specific populations. 4.5. Identify medical or allied health professional suitable for referral of the client. 4.6. Determine the most appropriate medical or allied health professional for referral according to the specific condition or needs of the client.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - obtain and provide information (within scope) related to common medical conditions, disorders, disabilities or impairments.
  - enable consultation, advice and monitoring of client performance

© Commonwealth of Australia, 2025 HumanAbility

  - provide clear instruction and constructive feedback to a range of clients with specific needs
  - liaise with medical and allied health professionals
- problem-solving skills to:
  - identify exercises targeted to specific fitness components
  - assess and adjust client performance
  - identify professional limitations and refer clients to relevant medical or allied health professional
- numeracy skills to manage the time of clients and facility schedules
- observation skills to identify potential issues that require action
- literacy skills to record and update client information.

Required knowledge

- principles of exercise program design to enable safe and effective program design
- client induction and screening processes
- structure and function of major body systems to enable the selection, instruction and adjustment of exercises appropriate to client needs including:
  - musculoskeletal
  - cardiovascular
  - nervous
  - digestive
  - pathology of common medical conditions or disorders
  - exercise modification requirements of specific population groups
- effects of different exercise components on the major body systems to enable safe and appropriate exercise planning
- motivational techniques to support client adherence to the exercise program
- fitness industry or organisation guidelines, policies and procedures to support safe and effective operations
- industry standard risk stratification process
- common medical conditions prevalent in children and young adolescents and older clients

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate	Evidence of the following is essential:

© Commonwealth of Australia, 2025 HumanAbility

competency in this unit	• confirm sufficient knowledge of exercise modifications for specific populations. • identify specific population clients • apply knowledge of the pathology of the disease, condition or injury to exercise delivery • provide suitable advice to specific population clients about exercise participation • deliver exercise delivery for specific population clients after referral and under the supervision of health professionals.
Context of and specific resources for assessment	Assessment must ensure: • demonstration of skills within a facility where a variety of exercise modes and equipment are available, such as a weights gym, pool, exercise to music room and an outdoor environment • access to a range of clients with a range of real or simulated fitness needs and expectations.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of consulting with clients to determine their preferences and needs and designing and instructing an appropriate fitness program • oral or written questioning to assess knowledge of exercise program principles and their use in developing client specific exercise programs • third-party reports from colleagues or supervisors detailing work performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISFFIT304A Instruct and monitor fitness programs • SISFFIT307A Undertake client health assessment • SISFFIT308A Plan and deliver gym programs • SISFFIT309A Plan and deliver group exercise sessions • SISFFIT310A Plan and deliver water based fitness activities

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Actions resulting from evaluation of risk status may include:	• referral to a medical or allied health professional for further medical evaluation and clearance • referral for clinical test • medical or allied health professional present for sub-maximal testing • suitably qualified fitness professional conducts sub-maximal testing
Medical or allied health professionals may include:	• sports physician • sports doctor • general practitioner • physiotherapist • accredited exercise physiologist • occupational therapist • remedial massage therapist • chiropractor • osteopath • accredited practising dietician • psychologist • continence nurse advisor
Benefits of exercise for specific populations may include:	• improved functional capacity • improved quality of life • independence • decreased mortality • decreased morbidity • decrease in medication dosage • relief of symptoms.
Clients may include:	• experienced or inexperienced • adult or children • pre-natal • post-natal • menopausal • specific populations with medical or allied health clearance • medical conditions or injury under the

© Commonwealth of Australia, 2025 HumanAbility

	supervision of an appropriate medical or allied health professional • healthy active older clients.
Contraindications to exercise may include:	• absolute • relative • risk of participation outweighs any perceived benefits.
Exercise programs may include:	• resistance training • circuit training • gym training • endurance training • aerobic fitness • group exercise fitness session • aqua fitness session • spinning • gentle exercise • aqua therapy • stretching session.
Level of risk may include:	• low risk • moderate risk • high risk.
Common medical conditions may include:	• hypertension • high cholesterol • continence issues • asthma • metabolic disease or conditions • diabetes • obesity • pregnancy (pre and post natal) • musculoskeletal conditions • rheumatoid arthritis • osteoarthritis • osteoporosis • lower back pain • neck issues • knee injuries • depression • menopause.
Medications may include:	• lipid lowering agents • bronchodilators • anti hypertensive agents • insulin

© Commonwealth of Australia, 2025 HumanAbility

	• oral hypoglycaemic • anti inflammatory • analgesic • anti-depressants • non-prescribed • multiple medicine interactions.
Pathology may include	• the pathophysiology of the condition • variations of the pathophysiology of the disease and or condition • the physical or physiological effects of the disease and or condition • the psychological effects of the disease and or condition • method of how a sufferer should be managed if complications arise during a fitness activity • effect of the condition on exercise behaviour.
Signs of poor exercise tolerance may include:	• shortness of breath • pallor • dizziness or light-headedness • swelling of ankles • nausea or vomiting • fatigue • leg cramps • claudication • redness • unusual heart rate response • loss of coordination.

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify client needs and expectations.	1.1. Clarify the ***preferences***, ***needs and expectations*** of the ***client***. 1.2. Identify any special requirements according to the client's fitness level and any medical or injury problems. 1.3. Identify any ***additional factors*** that will affect the client's ability to perform in a fitness program. 1.4. Recommend client seek ***external assistance*** where required before proceeding with fitness programming according to organisational policies and procedures. 1.5. Identify a range of ***exercises*** to target specific fitness components. 1.6. Develop a balanced client exercise profile to meet identified client needs and limitations.
2. Develop an ***exercise plan*** and design a fitness program for a client.	2.1. Identify appropriate ***fitness environments*** according to client needs, preferences and organisational policies and procedures. 2.2. Utilise ***principles of fitness program design*** to develop a ***fitness program*** or general activity program, maximising the positive aspects of their environment and personal attributes for long-term adherence to the program and minimise risk of injury. 2.3. Incorporate ***motivation techniques*** to maximise fitness program adherence. 2.4. Apply programming guidelines to developing aerobic, strength, endurance and stretching programs relevant to the ***client's goals*** and fitness and the relative benefits desired from the program. 2.5. Provide appropriate safety and adherence recommendations to the client. 2.6. Discuss and confirm the ***fitness program*** with the client and record this information according to ***organisational policies and procedures***. 2.7. Explain the relative contribution to aerobic and anaerobic fitness of recommended activities to the client. 2.8. Use energy, water and other resources effectively when cleaning, preparing and maintaining equipment

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	and activity areas to reduce negative environmental impacts.
3. Motivate clients.	3.1. Apply ***motivation techniques*** to help a client identify barriers to adherence and to set effective exercise goals. 3.2. Use motivational techniques to positively influence the performance of clients during fitness activities. 3.3. Use ***arousal control techniques*** to improve the performance of clients during fitness activities. 3.4. Provide positive ***feedback*** to clients on their progress and any recommended changes.
4. Supervise fitness activities.	4.1. Provide ***clear and accurate instruction*** of exercises to the client. 4.2. Monitor and address any ***negative attitudinal behaviour*** or ***personal difficulties*** exhibited by the client. 4.3. Monitor and address any incorrect performance of the activities within the fitness program. 4.4. Monitor and adjust motivation techniques to meet client needs.
5. Review and adapt the client's fitness program.	5.1. Evaluate parameters of the fitness level being developed in the program. 5.2. Obtain feedback from clients on their own personal progress and their degree of satisfaction with the program. 5.3. Undertake relevant ***fitness appraisals*** to monitor a client's fitness development. 5.4. Provide feedback to the client on their progress and any changes recommended. 5.5. Record the clients amended or adapted fitness program according to organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:

© Commonwealth of Australia, 2025 HumanAbility

  - enable consultation, advice and monitoring of client performance
  - provide clear instruction and constructive feedback to clients
- problem-solving skills to:
  - identify exercises targeted to specific fitness components
  - assess and adjust client performance and exercise technique
- numeracy skills to manage the time of clients and facility schedules
- literacy skills to record and update client information.

Required knowledge

- principles of fitness program design to enable safe and effective program design
- effects of different exercise components on the major body systems to enable safe and appropriate exercise planning
- motivational techniques to support client adherence to the fitness program
- fitness venue policy and procedures to support safe and effective operations
- methods of monitoring exercise intensity
- anatomical terminology and application to exercise technique.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consults with a range of clients including older clients and older adolescents to develop fitness programs specific to individual client needs, expectations and limitations • clearly and safely demonstrates, explains and supervises fitness programs appropriate to local fitness industry and organisation requirements • evaluates and adjusts fitness programs in consultation with clients • monitors and maintains the behaviour of clients according to the requirements and expectations of the facility.
Context of and specific resources for assessment	Assessment must ensure: • demonstration of skills within a facility where a variety of exercise modes and equipment are available, such as a weights gym, pool, exercise to

© Commonwealth of Australia, 2025 HumanAbility

music room and an outdoor environment
- access to a range of clients with a range of real or simulated fitness needs and expectations.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consulting with clients to determine their preferences and needs and designing and instructing an appropriate fitness program
- oral or written questioning to assess knowledge of fitness program principles and their use in developing client specific fitness programs
- third-party reports from colleagues or supervisors detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT301A Provide fitness orientation and health screening.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Preferences, ***needs and expectations*** may include:

- cultural considerations
- fitness goals
- perceived benefits
- cost
- time availability.

Client may include:

- pre-natal
- post-natal
- menopausal
- experienced or inexperienced
- those aged 50 years and over
- de-conditioned adults
- older adolescents
  - 16 years and over

© Commonwealth of Australia, 2025 HumanAbility

- active or inactive
- pregnant.

Additional factors may include:

- medical conditions
- prescribed medications
- existing injuries
- current fitness level
- functional limitations
- lifestyle evaluation
- exercise history.

Exercise plans may include:

- cardiovascular exercise
- water-based exercise
- resistance training
- flexibility
- circuit training
- gym training
- endurance training
- aerobic fitness
- group exercise fitness session
- aqua fitness session
- spinning
- gentle exercise
- stretching session.

Feedback may include:

- exercise purpose and technique
- appropriate exercise intensity
- improvements in training and technique
- fitness activity aims and objectives
- client satisfaction
- suitability and safety of facilities and equipment.

Arousal control techniques may include:

- anxiety and stress management
- progressive relaxation.

External assistance may include:

- sports physician
- sports doctor
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist
- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician

© Commonwealth of Australia, 2025 HumanAbility

- podiatrist
- psychologist
- aboriginal health worker.

Exercises may include:

- circuit training
- gym training
- repetitions.

Fitness environments may include:

- indoor
- outdoor.

Motivational techniques may include:

- arousal control techniques
  - anxiety management
  - progressive relaxation
  - stress management
- arousal theories
  - drive theory
  - inverted 'u'
  - zone of optimal function.

Organisational policies and procedures may include

- Occupational Health and Safety
- records management
- medical clearance
- client age requirements
- parental or guardian consent
- use, care and maintenance of equipment and facilities
- use of outdoor locations.

Principles of fitness program design may include:

- FITT formula
- program phases:
  - preparation
  - conditioning
  - recovery
  - adaptation
- program types:
  - flexibility
  - muscular endurance
  - cardiorespiratory endurance
  - strength.

Client's goals may include:

- improved health
- enhanced appearance
- reduced body fat
- cardiovascular endurance
- improved flexibility

© Commonwealth of Australia, 2025 HumanAbility

	• increased strength.
Clear and accurate instruction may include	• simple explanations • demonstration of effective exercise technique • setting of intensity and loading • clear communication techniques: • reinforcement of correct technique and attitude.
Negative attitudinal behaviour may include:	• aggression • competitiveness • discourtesy to other clients
Personal difficulties may include:	• discomfort • embarrassment.
Fitness program may include:	• motivational strategies • phases • specific exercises • expected outcomes • aerobic fitness • body fat reduction • cardiovascular endurance • stretching • range of movements • flexibility • strength • power, activity or sports specific • muscle endurance • muscle hypertrophy.
Fitness appraisals may include:	• cardiovascular response • heart rate, such as tri-level aerobic response • blood pressure • range of movement • strength • girth measurements • skin folds.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Apply knowledge of anatomical and physiological terminology to fitness instruction.	1.1. Identify ***relevant anatomical and physiological terminology*** and apply to the development of a fitness program. 1.2. Apply relevant anatomical and physiological terminology to fitness instruction. 1.3. Apply relevant anatomical and physiological terminology in the provision of ***fitness advice***.
2. Apply knowledge of anatomy and physiology to fitness instruction	2.1. Identify and apply the ***structural levels of organisation*** in the study of anatomy and physiology to the development of a ***fitness program or fitness instruction***. 2.2. Apply the relevant principles of the structural levels of organisation in the study of anatomy and physiology to ***fitness instruction***. 2.3. Identify ***contra-indications*** fitness activities, and where to refer to appropriate ***medical and allied health professionals*** is indicated. 2.4. Apply the principles of anatomy and physiology as they relate to fitness instructions in the provision of fitness advice. 2.5. Use ***anatomical terminology*** and describe and demonstrate movements of the body to clients.
3. Apply the relevant principles of the body's systems to fitness instruction	3.1. Apply the relevant principles of the body's systems to the performance delivered from fitness instructions. 3.2. Apply the relevant principles of the body's systems as they relate to fitness instructions in the provision of aftercare service and advice.
4. Apply an understanding of the structure and function of the musculoskeletal system when providing information about exercise programs.	4.1. Describe the structure, growth and development of bone tissue and factors affecting growth to clients. 4.2. Relate the type and the structure of joints to joint mobility, joint integrity and risk of injury when planning exercise programs and providing information to clients. 4.3. Identify and describe the movements allowed at the major joints of the body when providing information about exercise programs. 4.4. Identify the major bones, bony landmarks, major joints and major muscles when providing

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	information about fitness testing and exercise programs.
	4.5. Use knowledge of the structure of skeletal muscle and the process of muscle contraction to plan and develop exercise programs.
	4.6. Apply knowledge of major muscles and their actions, and the role of the muscle during contraction, to select suitable exercises when planning exercise programs.
	4.7. Analyse common exercises to identify to clients, the joint action occurring, the muscle responsible and the type of contraction
	4.8. Discuss the interplay between muscle innervation and muscle contraction.
	4.9. Relate the oxidative capacity of different muscle fibres to different fitness activities.
	4.10. Describe ideal postural alignment and common pathological postures to fitness clients.
5. Relate the structure and function of the cardiovascular system and respiratory system to fitness activities.	5.1. Explain the structure and function of the cardiovascular system and the respiratory system when providing information to clients.
	5.2. Describe the process of gaseous transport and gaseous exchange occurring during fitness activities to clients.
	5.3. Explain the role of the cardio-respiratory system in the carrying, delivery and extraction of oxygen for muscle contraction and relate to exercise intensity.
	5.4. Investigate the oxygen demands of various fitness activities to identify the relationship between exercise intensity and the circulatory and ventilation responses.
	5.5. Relate the differences in individual respiratory volumes and basic circulatory responses, and the regulation of these physiological responses to the client's fitness levels.
6. Apply knowledge of the structure and function of the nervous system to fitness activities.	6.1. Describe the basic structure of the nervous system and its role in the control of movement and exercise to clients.
	6.2. Apply the process of excitation and conduction of nerve impulses during muscle contraction, when providing information about fitness activities.
	6.3. Explain the role of the sensory receptors during movement, in stretching and flexibility to clients.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	6.4. Explain to clients the relationship between the composition of motor units and motor unit innervation to the strength of muscle contraction, during fitness activities.
7. Apply knowledge of the body's energy systems to exercise instruction.	7.1. Explain the effect of exercise intensity on the energy substrate to clients during exercise instruction. 7.2. Apply the limiting factors of the body's energy systems to the setting of exercise intensities when instructing fitness activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- applying the structure and function of anatomy and physiology to the performance of fitness instructions.
- literacy skills to source, read ,comprehend and apply relevant information on the anatomy and physiology of the human body in a fitness context.
- communication skills required to translate information on the anatomy and physiology of the human body when providing advice, responding to questions and providing information and reassurance to the client.

Required knowledge

- Occupational Health and Safety regulations and requirements.
- workplace policies and procedures in regard to the performance of fitness instructions
- terminology of anatomy and physiology as it relates to fitness.
- anatomy and physiology in relation to fitness, including:
  - the structural levels of organisation in the study of anatomy and physiology
  - the functions of the internal transportation systems of the body
  - the gas exchange that occurs within the respiratory system
  - role of the nervous system
  - role of the skeletal system
  - role of the muscular system
- body systems in regard to their interdependence and purpose in relation to a healthy body and their relationship to the muscles and nerves:
  - skeletal and muscular, including muscle contractibility and motor points
  - lymphatic, digestive, respiratory, and circulatory systems
- the appearance and management of contra-indications and adverse effects.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- knowledge and consistent application of relevant workplace policies and procedures.
- knowledge and consistent application of safe work practices and the safe use of equipment according to Occupational Health and Safety regulations or requirements.
- structure and functions of anatomy and physiology as they apply to fitness instructions.
- basic anatomical terminology for the development of the fitness program, the performance of the exercise instructor and the provision of aftercare service and advice.
- knowledge and consistent application of the principles of the body's systems as they apply to fitness.
- applying knowledge of anatomy and physiology to analyse and identify client requirements and or needs and develop and record a fitness program including:
  - areas requiring special treatment
  - range of appropriate fitness instructions
  - review of previous exercise programs
- applying knowledge of anatomy and physiology to evaluate the clients needs and requirements and to advise the client on future fitness instructions.
- accurately and legibly recording relevant data.

Context of and specific resources for assessment

Assessment must ensure that the candidate:

- demonstrates competency in the workplace or a simulated workplace environment in a range of situations which may include client interruptions and involvement in other related activities normally expected in the workplace. For further guidance on the use of an appropriate simulated environment, refer to the Assessment Guidelines in this Training

© Commonwealth of Australia, 2025 HumanAbility

Package

- has access to relevant documentation, such as workplace policy and procedures manuals.
- has access to a range of clients with different requirements.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the learner performing a range of tasks in a simulated work environment, over sufficient time to demonstrate his or her handling of a range of contingencies. Tasks may include:
  - identifying client characteristics and developing a fitness program according to client needs
  - performance of fitness instructions according to client requirements
  - providing advice on fitness activities according to client needs.
- written and oral questioning or interview to assess knowledge and understanding of anatomy and physiology as it relates to planning and provision of exercise programs, including aftercare advice. Questions will be asked in a manner appropriate to the language and literacy level of the learner.
- completing workplace documentation relevant to the provision of fitness instructions
- third-party reports from experienced fitness professionals in the workplace.
- completion of self-paced learning materials, including personal reflection and feedback from trainer or coach or supervisor.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT304A Instruct and monitor fitness programs

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

RANGE STATEMENT

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant anatomical and physiological terminology must include:

- definitions of anatomy and physiology
- anatomical terminology
- tissue types
- global and local muscular systems:
  - functions
  - types and classifications
  - disorders of muscular systems
- nervous system:
  - functions
  - anatomy of nervous system
  - nerves
  - reflex arc
  - disorders of the nervous system
- skeletal system:
  - function
  - types of bones
  - gross and microscopic anatomy
  - disorders of skeletal system
- circulatory system:
  - heart anatomy
  - functions
  - circulation pathways
  - blood vessels
  - blood
  - disorders of the circulatory system
- respiratory system:
  - functions
  - anatomy
  - mechanics of breathing
  - disorders of respiratory system
- lymphatic system:
  - function
  - anatomy
  - disorders of lymphatic system

© Commonwealth of Australia, 2025 HumanAbility

RANGE STATEMENT

- endocrine system:
  - function
  - anatomy.

The structural levels of organisation may include
- the human cell
- human tissues
- body organs
- body systems.

The development of ***a fitness program*** must include but is not limited to:
- frequency and duration
- techniques
- equipment
- contra-indications
- relevant medical history and or medications
- outcomes of previous exercise programs.

Contra-indications may include but are not limited to:
- disorders of the:
  - skeletal system
  - muscular system
  - nervous system
  - circulatory system
  - respiratory system
  - lymphatic system.

Medical and allied health professional may include:
- sports physician
- sports doctor
- general practitioner
- physiotherapist

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake a risk-management process in relation to an activity and in accordance with an organisation's risk-management policies and procedures. In this context, the risk-analysis process is conducted using structured analysis methodology according to the current Australian and New Zealand standard.

Application of the Unit

This unit applies to exercise instructors who work in facilities that provide a range of exercise programs to general populations who present with no major health conditions.

This unit is applicable to those working in fitness venues, gyms or other exercise environments.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Explain the relationship between healthy eating, health and fitness to clients.	1.1. Discuss with ***clients***, the adverse effect of poor nutrition on health and identify common ***chronic diseases***. 1.2. Briefly explain the ***general features of healthy eating*** to clients. 1.3. Convey the concept of a well balanced diet and regular exercise to promote good health when providing information to clients. 1.4. Explain the interaction between healthy eating options and physical activity and obtain information about current nutritional intake and physical activity levels of clients.
2. Provide basic information to clients about the fundamental principles of healthy eating.	2.1. Provide information to clients about the ***fundamental principles of healthy eating*** to improve overall health. 2.2. Apply knowledge of the general principles of healthy eating to provide basic information to clients about healthy eating options and requirements for exercising individuals. 2.3. Identify the advantages and disadvantages of current ***dietary trends*** appearing in the media with clients. 2.4. Observe the ***industry standards*** for giving healthy eating information to clients and refer clients with ***healthy eating or dietary concerns*** to suitably qualified accredited practising dieticians.
3. Provide healthy eating information to clients regarding body composition management.	3.1. Evaluate information collected in the fitness appraisal of clients about current body composition using relevant ***body composition measures***. 3.2. Provide basic information about the relationship between diet and the ***management of body composition*** to ***clients***. 3.3. Describe briefly the role of the body's ***energy systems*** in the storage and utilisation of ***energy substrates*** for energy production. 3.4. Refer clients requiring more extensive dietary information to a suitably qualified accredited practising dietician
4. Support fitness clients with body	4.1. Implement strategies to promote body satisfaction when providing information about exercise, fitness

© Commonwealth of Australia, 2025 HumanAbility

image issues.	testing and healthy eating options. 4.2. Provide information about healthy eating options that fosters a positive attitude towards food and eating. 4.3. Recognise indicators of poor body image and discuss body satisfaction with clients, providing referral to an appropriate ***medical or allied health professional***, if required. 4.4. Show sensitivity to ***cultural and social differences***.
5. Refer clients to medical or allied health professionals for further information or consultation.	5.1. Recognise and acknowledge the current legal and ethical limitations of a fitness instructor in providing healthy eating information. 5.2. Identify ***gastrointestinal disorders*** or other ***medical conditions***, disclosed by the clients during a screening process, which may affect nutritional intake, and refer clients to a suitably qualified medical or allied health professional. 5.3. Identify healthy eating or dietary concerns and refer clients to contact suitably a qualified accredited practising dietician or medical or allied health professional in accordance with organisational policies and procedures maintaining confidentiality of ***clients***.
6. Provide information about the structure and function of the digestive system.	6.1. Use knowledge of the structure and function of the ***digestive system*** when providing information to ***clients***. 6.2. Describe to clients the process of digestion and absorption, including the production and action of ***enzymes*** during the breakdown of foodstuffs for energy. 6.3. Explain the process of ***energy metabolism*** in relation to muscle contraction.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - discuss and negotiate the fitness and healthy eating requirements of clients
  - provide clear and accurate information to support body composition goals
  - provide information related to body image issues in an appropriate manner

© Commonwealth of Australia, 2025 HumanAbility

- problem-solving skills to analyse clients dietary and lifestyle patterns against recognised guidelines
- literacy and numeracy skills to enable the completion of plans, records and other related documentation
- characteristics of the main social and cultural groups in Australian society and the key aspects that relate to their cultural and religious protocols and preferences for exercise in relationship to healthy eating options and body image

Required knowledge

- the relationship between healthy eating options and health and current Australian dietary guidelines for a balanced diet to enable the provision of accurate information to clients
- structure and function of the digestive system and the effect of healthy eating on other major body systems
- factors that influence fat loss response to exercise to enable effective goal setting
- appropriate protocols for advising clients on healthy eating
- own role and limitations in providing healthy eating information and situations requiring advice from or referral to suitably credentialed medical or allied health professionals
- body composition measurement methods and the relationship between body composition, fat distribution and health to enable the development of realistic and achievable exercise and healthy eating plans aligned to client needs and targets
- guidelines for developing exercise plans to improve body composition.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • communicates effectively with clients to ascertain needs and goals • provides current and accurate healthy eating information appropriate to the needs and goals of clients and recognises and refers situations outside own scope of practice • correctly measures body composition for clients using appropriate measures • designs, implements and reviews exercise plans appropriate to the body composition needs and goals of multiple clients

© Commonwealth of Australia, 2025 HumanAbility

	• applies all organisational policies and procedures and legislative requirements.

Context of and specific resources for assessment	• Assessment must ensure provision of healthy eating advice for multiple clients.
	• Assessment must also ensure access to:
	  • clients able to provide information regarding diet and lifestyle and pre-appraisal screening information
	  • appropriate documentation and resources normally used in the workplace, such as organisational policies and procedures

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of consulting with clients to determine body composition goals and to provide information on the relationship between healthy eating and health • oral or written questioning to assess knowledge of healthy eating standards and national dietary guidelines • portfolio demonstrating evidence of accurate body composition appraisals • third-party reports from supervisors detailing work performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended: • SISFFIT301A Provide fitness orientation and health screening

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Medical or allied health professional may include:	• sports physician • sports doctor • general practitioner • accredited practising dietician

© Commonwealth of Australia, 2025 HumanAbility

	• psychologist • aboriginal health worker • diabetes educator.
Body composition measures may include:	• weight • height • waist circumference • hip circumference • skin folds
Chronic diseases may include:	• cardiovascular disease • hypertension • diabetes • gallstones • celiac • lactose intolerant • obesity • stroke • arthritis.
Clients may include:	• pre-natal • post-natal • menopause • experienced or inexperienced • adult • active or inactive • no major dietary or health concerns.
Healthy eating information may include:	• government endorsed national dietary guidelines • government endorsed campaigns promoting healthy eating options • healthy eating information from nutrition peak bodies.
Dietary trends may include:	• fad' or popular diets • nutritional supplementation • healthy eating ergogenic aids.
Energy substrates may include:	• lipids • carbohydrate • protein • alcohol.
Energy systems may include:	• alactic • lactic • aerobic.
Fundamental principles of	• enjoy a wide variety of nutritious food

© Commonwealth of Australia, 2025 HumanAbility

healthy eating may include:	• eat plenty of vegetables, legumes and fruits • eat plenty of cereals preferably wholegrain • include lean meat, fish, poultry and alternatives • include milks, yogurts, cheese or alternatives. reduced fat varieties should be chosen where possible • drink plenty of water • take care to limit saturated fat and moderate total fat intake • choose foods low in salt • limit your alcohol intake alcohol if you choose to drink • consume only moderate amounts of sugars and food containing added sugars.
Gastrointestinal disorders may include:	• gastrointestinal reflux • ulcers • inflammatory bowel disease • irritable bowel syndrome • coeliac disease • lactose intolerance • chrons disease.
General features of balanced healthy eating may include:	• energy balance • recommended daily intake of nutrients • fuel for exercise • fuel for minimising post-exercise fatigue and maximising recovery • hydration levels.

General principles of healthy eating may include:	• food groups
	  • dairy
	  • meat, poultry, fish, eggs, nuts, legumes
	  • fruit
	  • vegetables
	  • breads and cereals
	• national dietary guidelines
	• carbohydrates
	  • role of carbohydrates
	  • recommended daily intake
	  • simple sugars
	  • fibre
	  • resistant starch
	  • glycemic index
	• lipids

- nutritional supplementation.

Cultural and social differences may include:

- modes of greeting, farewelling and conversation
- body language, including use of body gestures
- formality of language
- clothing.

Industry standards may include:

- professional associations
- government recommendations, guidelines or legislation
- fitness industry regulations.

Management of body composition may include:

- metabolism
- balance between energy intake and energy expenditure
- energy expenditure
  - resting metabolic rate
  - thermogenesis
  - thermic effect of food
  - thermic effect of exercise
  - adaptive thermogenesis
- energy intake
  - kilojoule value of nutrients
- body fat changes and body composition
- changes to body composition
  - fat loss
  - muscle gain.

Medical conditions may include:

- diabetes
- gallstones
- cancer
- gout
- pregnancy.

Healthy eating or dietary concerns may include:

- anorexia
- bulimia
- overweight or obesity
- nutritional deficiencies including iron, calcium
- dehydration
- diabetes
- gastrointestinal disorders for example celiac disease, irritable bowel syndrome
- food allergy and or intolerances
- weight gain.

SISFFIT307A Undertake client health assessment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to review client screening information, discuss fitness goals with the client, and conduct a basic fitness appraisal in preparation for a exercise program.

Application of the Unit

This unit applies to exercise instructors who work in facilities that provide a range of exercise programs and services such as aqua, group or gym-based to general populations including older clients and older adolescents who present with no major health conditions. It requires the ability to recognise and work within professional limitations.

This unit is applicable to those working in fitness venues, gyms or other exercise environments.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Review pre-test screening information.	1.1. Access and review initial client ***pre-test screening information*** according to ***legislation and regulatory requirements*** and ***organisational policies and procedures***. 1.2. Advise the client of the relevance of the screening and appraisal process to developing an individualised exercise program. 1.3. Ascertain additional ***health information*** about the ***client*** prior to ***fitness appraisal*** and identify any factors requiring medical clearance according to organisational policies and procedures. 1.4. Recommend client seek ***medical or allied health professional*** assistance, where required before proceeding with fitness appraisal according to organisational policies and procedures.
2. Determine the fitness goals of clients.	2.1. Determine the ***perceived benefits*** clients expect from the exercise program. 2.2. Discuss the client's habits, cultural expectation lifestyle, family situation, likes and dislikes which might impact on the prescription of an appropriate exercise program. 2.3. Provide relevant information on the impact of poor lifestyle behaviours on health and fitness to the client. 2.4. Consult with the client to develop and document short and long-term ***fitness goals***. 2.5. Match fitness goals to products and services available in the fitness industry.
3. Conduct a basic fitness appraisal.	3.1. Select appropriate tools and ***appraisal methods*** according to the clients' current fitness capacity. 3.2. Organise ***fitness assessment equipment*** required for the appraisal as appropriate. 3.3. Conduct basic fitness appraisals ensuring the safety of the client according to organisational policies and procedures. 3.4. Explain the results of the fitness appraisals to the client and recommend an appropriate ***exercise***

ELEMENT	PERFORMANCE CRITERIA
	program.
	3.5. Record recommendations for the client's exercise program according to organisational policies and procedures.
	3.6. Develop a client profile that can be used to develop an individualised exercise program.
	3.7. Identify signs of poor exercise tolerance and reason for discontinuation of a fitness appraisal.
	3.8. Use energy, water and other resources effectively when cleaning, preparing and maintaining equipment and activity areas to reduce negative environmental impacts.
4. Motivate and encourage clients.	4.1. Determine the client's level of commitment to the exercise program.
	4.2. Apply ***motivation techniques*** to help the client identify barriers to adherence and to set effective and manageable exercise goals according to ***fitness levels***.
	4.3. Assist the client to identify behavioural changes to improve long-term adherence to an exercise program.
	4.4. Advise the client on techniques that may increase their adherence to exercise.
	4.5. Recognise and use the factors that encourage people to adhere to exercise programs when instructing clients.
	4.6. Recognise and apply common reasons for discontinuation of exercise programs when settling program guidelines.
	4.7. Discuss habits, lifestyle, family situation likes, dislikes which might impact on writing an appropriate exercise program with the client.
	4.8. Use the physical and the psychological characteristics that apply to each stage of fitness, stages of change and the most appropriate form of motivation at each level when instructing clients.
	4.9. Direct clients to understand and overcome their own barriers to the continuation of an exercise program.
	4.10. Identify the steps involved in establishing a behavioural change that results in their long term adherence to an exercise program to the client and use when instructing clients.
	4.11. Take into account people's idiosyncrasies, ***cultural***

ELEMENT	PERFORMANCE CRITERIA
	and social differences, behavioural patterns and industry standards when instructing clients.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - elicit information from clients about their needs and expectations
  - consult with clients about fitness goals
  - clarify screening information provided by clients
  - convey information about the fitness appraisal process and appraisal results
- problem-solving skills to:
  - select fitness tools and methods appropriate to the client's fitness capacity
  - assist the client to identify techniques to adhere to an exercise program
- literacy skills to review and clarify information in a health screening questionnaire, determine further information required and develop a client profile
- ability to recognise and refer to medical or allied health professionals.

Required knowledge

- organisational policies and procedures to enable ethical and compliant collection, use and storage of client information
- factors that motivate people to commence and stay with a long term exercise program
- purpose and process of fitness appraisals to enable accurate information to be communicated to clients and accurate responses to be made to client queries
- fitness industry standards and practices for the conduct of safe fitness appraisals
- tools and methods to conduct fitness appraisals that enable client fitness capabilities to be assessed accurately
- medical and health conditions indicating the need for a medical clearance
- own professional limitations relating to safe operation and scope of practice
- physical and psychological characteristics that apply to each stage of fitness (such as preparation, conditioning, recovery and adaptation phases) to enable fitness appraisals to provide accurate information for the development of an appropriate exercise program
- motivational techniques to support client adherence to the exercise program
- stages of change and appropriate motivational strategies for each stage
- exercise adherence and behaviour change
- general characteristics of the main social and cultural groups in Australian society

© Commonwealth of Australia, 2025 HumanAbility

and the key aspects that relate to their cultural and religious protocols and preferences for exercise.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • develops a rapport with a range of clients based on gender, age, physical capacity, fitness goals and level of motivation • treats client information with sensitivity and discretion, displays client empathy and puts clients at ease during the fitness appraisal process • undertakes fitness assessments based on the fitness goals and physical capacity of the client and makes informed recommendations on appropriate exercise programs or the need to seek medical or allied health assistance • identifies motivational techniques and strategies appropriate to a range of clients with different needs to support and encourage adherence to an exercise program • applies effective contingency management techniques to deal with a range of problems and issues that may arise during the appraisal process such as difficult or demanding clients with unrealistic fitness expectations
Context of and specific resources for assessment	Assessment must ensure completion of client induction and screening processes for a range of clients with different needs to demonstrate competency and consistency of performance Assessment must also ensure access to: • a facility where appropriate fitness appraisal equipment is available • a range of clients with a range of real or simulated fitness needs and expectations and fitness assessment equipment to conduct the appraisal • documentation such as initial client health screening

© Commonwealth of Australia, 2025 HumanAbility

information, written facility information about available exercise programs and services and organisational policies and procedures relating to client fitness appraisals.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of client consultations to determine their fitness goals
- oral and or written questioning to assess knowledge of fitness industry standards and practices for fitness appraisal of clients
- portfolio of completed fitness appraisals
- third-party reports from colleagues or supervisors detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT304A Instruct and monitor fitness programs.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Pre-test screening information may include:

- lifestyle evaluation
- fitness goals
- time availability
- exercise history
- likes and dislikes
- medical history
- medications
- informed consent
- clearance letter from an allied health professional or medical practitioner.

Legislation and regulatory requirements may include:

- occupational health and safety
- duty of care
- privacy

© Commonwealth of Australia, 2025 HumanAbility

- anti-discrimination
- copyright
- licensing
- child protection
- trade practices
- consumer protection
- environmental
- business registration and licences.

Organisational policies and procedures may include:

- privacy
- confidentiality
- medical clearance
- risk management
- client record systems
- collection and use of client information
- client referral procedures
- recording appraisal information.

Health information may include:

- medical conditions
- injuries
- prescribed medication
- medical and exercise history
- functional limitations.

Client may include:

- experienced or inexperienced
- various ages
- screened
- active or inactive
- pre-natal
- post-natal
- menopausal.

Fitness appraisal may include:

- cardiorespiratory endurance
- blood pressure
- range of movement
- strength
- body composition
- waist- hip ratio
- girth measurements
- skin folds.

Medical or allied health professional may include:

- sports medicine physician or staff specialist
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist

© Commonwealth of Australia, 2025 HumanAbility

- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician
- psychologist
- aboriginal health worker
- diabetes educator.

Perceived benefits may include:

- cosmetic
- health
- social or recreational
- athletic.

Fitness goals may include:

- improved health
- enhanced appearance
- increase muscle mass
- body fat reduction
- cardiovascular endurance
- improved flexibility
- increased strength.

Appraisal methods may include:

- heart rate response
- pulse response
- blood pressure response
- respiration rate response
- skin colour response
- rate of perceived exertion
- exercise form
- work output.

Fitness assessment equipment may include:

- tape measure
- stadiometer
- scales
- sit and reach box
- bicycle ergo meter
- heart rate monitor
- bio-impedance machine
- camera
- goniometer
- stethascope
- spirometer
- dynanometer
- sphygmomanometer (manual and digital)
- skin fold callipers
- step up

© Commonwealth of Australia, 2025 HumanAbility

	• stop watch.
Exercise program may include:	• motivational strategies for a client • realistic goals • phases • specific exercises • expected outcomes.
Motivation techniques may include:	• arousal control techniques • zone of optimal function.
Cultural and social differences may include:	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing
Fitness levels may include:	• beginner • relatively fit • advanced.

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop customised gym programs.	1.1. Identify the current fitness profile, training history, exercise preferences, exercise contraindications and ***specific fitness goals*** of the ***client***. 1.2. Establish the physical, psychological and social reasons for the client's participation in an exercise program. 1.3. Use ***motivational techniques*** to help the client identify barriers to adherence and to set effective exercise goals. 1.4. Relate the training requirements of the client to their long-term ***fitness plan***. 1.5. Integrate the client's resistance ***training program*** with their flexibility and cardiorespiratory programs as required. 1.6. Customise ***exercise variables*** and ***program variables*** according to ***principles of training*** to create a training program to meet the client's specific fitness goals. 1.7. Identify the joint movements and muscles that the client needs to target or strengthen. 1.8. Perform an ***exercise analysis*** to determine suitable resistance exercises to meet specific needs of the client. 1.9. Record the training program according to ***organisational policies and procedures***.
2. Instruct resistance exercises.	2.1. Demonstrate the correct technique for performing specific ***resistance exercises*** to the client and explain their purpose and expected results. 2.2. Explain ***misconceptions*** that are commonly held about resistance training programs. 2.3. Use ***instructional techniques*** to teach the correct technique for specific resistance exercises. 2.4. Advise the client of safety considerations for specific resistance exercises and equipment according to organisational policies and procedures. 2.5. Encourage feedback from the client to confirm their understanding of the program and to identify any foreseeable difficulties.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
3. Supervise training sessions.	3.1. Observe client training sessions to ensure all activities are performed according to organisational policies and procedures and with due consideration of other facility users. 3.2. Adjust incorrect or unsafe exercise technique as required according to ***safety considerations***. 3.3. Apply spotting techniques to ensure safety and enhance performance. 3.4. Supervise ***resistance exercise equipment*** usage to minimise conflict and maximise access for all clients. 3.5. Identify aspects of client exercise behaviour to develop effective motivational strategies for the client.
4. Develop a circuit training session plan.	4.1. Identify the ***aims*** of the circuit training session. 4.2. Define expected outcomes of the circuit training session. 4.3. Identify a broad and varied ***exercise repertoire***. 4.4. Plan and document a ***circuit training session plan*** for clients using the ***principles of exercise planning*** according to ***legislation and regulatory requirements*** and ***industry guidelines***. 4.5. Design clear and structured forms or cards for use in a circuit training session.
5. Instruct a circuit training session.	5.1. Confirm appropriate ***exercise area*** according to legislation and regulatory requirements and organisational policies and procedures. 5.2. Check ***circuit equipment*** is in good working order prior to commencement of session. 5.3. Use energy, water and other resources effectively when preparing and maintaining equipment and activity areas to reduce the environmental impact. 5.4. Communicate session objectives and the principles and ***benefits*** of circuit training to clients. 5.5. Explain ***common types of injuries*** that would prevent participation in the session and confirm that clients are not affected. 5.6. Instruct session according to circuit training plan and legislation and regulatory requirements and organisational policies and procedures. 5.7. Demonstrate and instruct correct use of equipment during circuit training session, according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	organisational policies and procedures and manufacturer instructions.
	5.8. Demonstrate exercises within the circuit training session using appropriate ***instructional techniques***.
	5.9. Monitor client intensity, technique and safety during the session and suggest modifications where required.
	5.10. Recognise signs and symptoms of overtraining and ***potentially harmful practices*** and implement appropriate ***intervention strategies*** according to organisational policies and procedures.
6. Review circuit training session.	6.1. Seek and acknowledge feedback from clients.
	6.2. Identify relevant changes to address required improvements.
	6.3. Modify the circuit training session plan where relevant to meet client needs.
	6.4. Review own performance and identify potential improvements.
7. Monitor client progress.	7.1. Identify when a review of a client's exercise program and or overall fitness plan is necessary according to ***re-evaluation criteria***.
	7.2. Recognise the signs and symptoms of ***overtraining***.
	7.3. Reassess fitness levels of the client to determine the effectiveness of their current exercise program.
	7.4. Re-establish the specific fitness goals of the client.
	7.5. Modify the client's exercise program according to results of fitness reassessments and any changing requirements.
	7.6. Provide positive and constructive feedback to the client on their progress and any recommended changes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- ability to move in a controlled and efficient manner while demonstrating to clients
- communication skills to:
  - consult, advise and monitor client performance

© Commonwealth of Australia, 2025 HumanAbility

  - provide clear instruction and constructive feedback to clients
  - convey information to clients about circuit class or gym program objectives, safe exercise techniques and use of equipment
  - interact with clients during the circuit class or gym program
- problem-solving skills to:
  - clarify client requirements and develop, monitor and adjust exercise programs to meet the changing needs and requirements of clients
  - identify client problems during the session and address these through appropriate intervention
  - identify improvements to energy, water and other resources for environmental sustainablity
- organisational skills to enable the collection and analysis of information on fitness levels and exercises and to manage the effective use of facilities and equipment
- planning and organisational skills to:
  - plan a circuit class
  - plan a gym program
  - prepare the exercise area and equipment
  - manage the time of clients and facility schedules time effectively.
  - make modifications to the session
- language and literacy skills to produce and document a circuit training session plan for the session and gym programs for an individual client
- technology skills to enable selection and correct use of applicable equipment
- self-management to review and reflect on own work performance in effectively planning and instructing circuit classes and gym program according to client expectations
- literacy and numeracy skills to complete workplace documentation such as client fitness records and plans.

Required knowledge

- structure and function of joints and muscles to enable accurate identification of joints and muscles that require strengthening and stability and accurate assessment of the degree of difficulty in performing the proposed exercises
- legislative and organisational requirements to enable safe and effective conduct of activities including safe use of equipment and managing facility schedules in the context of the requirements of other facility users
- motivational techniques and strategies to support client adherence to programs
- a range of resistance exercises and exercise programs to enable selection and implementation of appropriate programs to improve or maintain the fitness of clients
- a range of suitable warm up and cool down activities
- principles of exercise planning to enable sound planning for the circuit classes and gym programs
- structure and function of the musculoskeletal, cardiorespiratory and metabolic body systems to determine the benefits and appropriateness of different exercise to meet

© Commonwealth of Australia, 2025 HumanAbility

client needs
- health and other reasons affecting ability to participate in a circuit class to enable clients to be advised appropriately
- organisational policies and procedures to enable safe planning and instruction of circuit classes and gym programs
- conflict resolution strategies to support group cohesion and interaction
- manufacturer-equipment specifications for use and techniques to check the safe use of session equipment
- potentially harmful practices and the reasons why they are avoided in circuit training sessions to enable safe client participation in the circuit classes and gym programs
- instructional and motivational techniques suitable for circuit classes and gym programs to enable use of strategies to produce positive outcomes for clients
- physiological, psychological and biomechanical changes that occur with circuit and resistance training to enable informed planning and instruction of session and prompt response to client difficulties.
- use, care and maintenance of gym equipment to maximise benefits for clients and enable safe conduct
- environmental and resource efficiency practices related to the use of activity areas and gym equipment.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, demonstrates, supervises and adjusts gym programs incorporating safe and effective equipment use and exercise prescription for a range of clients, including older clients to address their fitness goals
- communicates effectively with a range of clients to explain the exercise program, its expected benefits and safety considerations and provides constructive feedback
- identifies individual client behaviours and applies appropriate motivational techniques and strategies to support exercise adherence
- plans circuit class with interrelated components, monitors the progress of the session and applies effective contingency management techniques to deal

© Commonwealth of Australia, 2025 HumanAbility

	with a range of problems and issues that may arise during the session, such as equipment failure or client overtraining, and makes adjustments in response to changing situations • instructs circuit class that meet client expectations, comply with legislative and organisational requirements, and are of sufficient duration to allow the candidate to demonstrate techniques to instruct and review a circuit class • evaluates and reflects on own work performance to identify ways in which session outcomes and benefits to clients can be improved. • manages the timing and conduct of gym programs to enable effective and efficient use of facilities, respecting the needs of other facility users.
Context of and specific resources for assessment	Assessment must ensure planning and delivery of gym programs including circuit sessions for multiple clients to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a fitness facility where equipment such as cardiovascular, free weight, pin-loaded and circuit is available • a range of clients, including older clients, with a range of real or simulated fitness goals and needs • relevant documentation such as programming cards relevant to the specific program format. • documentation such as circuit training session plans and manufacturer specifications for equipment use.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • direct observation of client consultation • observation of effective training sessions, incorporating feedback and appropriate motivational techniques • oral or written questioning to assess knowledge of the structure and function of joints and muscles and their relationship to effective exercise planning • portfolio of customised training plans developed, monitored and adjusted in the workplace • third-party reports from supervisors detailing work performance. Holistic assessment with other units relevant to the

© Commonwealth of Australia, 2025 HumanAbility

industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Specific fitness goals may include:	• sports, cardio and muscle conditioning • increased strength or endurance • flexibility and mobility • decrease stress • increase functional capacity.
Client may include:	• experienced or inexperienced • older adult • de-conditioned • older adolescents: • 16 years and over • active or inactive • pre-natal • post-natal • menopausal.
Motivational techniques may include	• arousal control techniques and theories • zone of optimal function.
Fitness plan may include:	• long and short term goals • periodisation and training phases • time and commitment to training sessions • exercise adherence.
Aims may include:	• competition or performance targets • self improvement • fitness targets • lifestyle adjustments.
Exercise repertoire may include:	• cardio • strength and conditioning • flexibility.
Training programs may include:	• warm up • cool down

© Commonwealth of Australia, 2025 HumanAbility

- resistance specification:
  - exercises
  - equipment
  - repetitions
  - sets
  - resistance
  - intensity
  - frequency
  - variations
- cardiorespiratory specifications:
  - exercises
  - equipment
  - intensity
  - duration
  - frequency
  - heart-rate training zones
- flexibility specifications:
  - target muscles
  - range of motion
  - duration
  - type of stretch
  - static
  - dynamic
  - Proprioceptive neuromuscular facilitation (PNF).

Exercise variables may include:

- range of motion
- speed of movement
- source of resistance
- level of impact on the body
- equipment selection
- exercise order
- exercise selection - machines vs free weights.

Benefits may include:

- physiological
- psychological
- social.

Program variables may include:

- training frequency and session duration
- exercise order
- repetitions
- sets
- resistance

© Commonwealth of Australia, 2025 HumanAbility

- intensity
- overload techniques:
- cardiorespiratory and flexibility training.

Principles of training may include:

- training thresholds
- progressive overload
- specificity
- individuality
- reversibility
- recovery
- variation
- diminishing returns.

Exercise analysis may include:

- identification of joints where movement is occurring
- classification of the exercise as being isolation or compound
- identification of working muscles and the joints on which they act
- identification of joints and body parts that require stability - antagonists, agonists, stabilisers
- identification of the muscles responsible for stabilising the joints and body parts
- assessment of the degree of difficulty in performing the exercise
- assessment of how well the exercise meets the functional requirements of the client.

Organisational policies and procedures may include:

- Occupational Health and Safety
- client supervision
- communication protocols
- privacy
- records management and security
- use, care and maintenance of equipment.

Resistance exercises may include:

- bench and chest press
- flye
- cable crossover
- shoulder press
- lateral and front-arm raise
- shrug
- upright row
- shoulder internal and external rotation
- biceps, preacher and hammer curl
- overhead triceps press
- lying triceps extensions and press

© Commonwealth of Australia, 2025 HumanAbility

- triceps kickback
- bent over and one-arm row
- supported and t-bar row
- pullover
- wrist curl
- bent over lateral raises and reverse flye
- squat
- lunge
- deadlift - bent and stiff leg
- calf raise
- hip abduction and adduction
- leg curl, extension and press
- hack squat
- back and hip extension (glute-ham raise)
- abdominal, including oblique and reverse, crunch
- abdominal isometric hold
- basic core stability and proprioceptive exercises
- lat pull-downs
- seated row.

Misconceptions may include:

- hypertrophy outcomes
- slowness
- reduced flexibility
- spot reduction of body fat.

Instructional techniques may include:

- clear and accurate explanation
- demonstration of correct technique
- observation of client performance
- positive feedback
- spotting techniques.

Resistance exercise equipment may include:

- machines
- free weights
- body weight
- benches
- racks
- exercise balls
- elastic resistance
- proprioception and stability training devices.

Circuit training session plan may include:

- phases of:
  - preparation
  - conditioning

© Commonwealth of Australia, 2025 HumanAbility

	• recovery • adaptation • rest intervals • required equipment • floor plan for equipment arrangement.
Principles of exercise planning may include:	• frequency • intensity • duration • movement • environment • program type.
Common types of injuries may include:	• *muscle or soft tissue* • *back* • *heart condition* • *joint*.
Re-evaluation criteria may include:	• signs and symptoms of overtraining • loss of motivation • lifestyle factors • illness or injury • plateau in performance • time elapsed since last evaluation • client satisfaction • change in fitness goals.
Legislation and regulatory requirements may include:	• Organisational Health and Safety • duty of care • privacy • anti-discrimination • copyright • licensing • child protection • trade practices • consumer protection • environmental • business registration and licences.
Industry guidelines may include:	• Peak-body guidelines • national standards for the use of electrical equipment • number of machines on a single circuit.
Potentially harmful practices may include:	• hyperextension • exercising while sick or in extremes of temperature

© Commonwealth of Australia, 2025 HumanAbility

- multiple repetitions
- ballistic movements
- spinal hyperextension
- loaded knee hyperflexion
- on-the-spot pounding
- straight leg sit-ups
- lever length
- additional equipment.

Intervention strategies may include:

- stopping or modifying the exercise
- modifying equipment.

Equipment may include:

- cardiovascular:
  - bikes
  - treadmills
  - elliptical trainers
  - steppers
  - rowing machines
- free weight:
  - bars
  - dumbbells
  - collars
  - straps
  - barbells
  - benches
- hydraulic
- innovative
- exercise, medicine and swiss balls
- bars and body bars
- steps
- bands:
  - dyna
  - tethers
  - tubing
- specific muscle targets:
  - abdominal assisters
  - rotator cuff
- plyometric training systems
- resistance
- pin-loaded equipment
- electronically braked
- air-braked

© Commonwealth of Australia, 2025 HumanAbility

	• pool-based • sound and microphone systems.
Overtraining may include:	• fatigue • elevated resting heart rate • loss of motivation to exercise and exercise form • plateau or decrease in performance • development of over-use injuries.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge to plan and instruct group exercise session to music. It focuses on the planning, selection, sequencing and progression of exercises and appropriate music, and instructing and monitoring client to ensure safe conduct of activities.

Application of the Unit

This unit applies to exercise instructors who provide a range of exercise programs to diverse populations.

This unit is applicable to those working in fitness venues, gyms or other exercise environments.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan and develop the group exercise session.	1.1. Determine the expected fitness outcomes and ***session type*** for the client group. 1.2. Plan appropriate ***phases*** of the session and a varied ***exercise repertoire*** or choreography to meet the needs of the client group. 1.3. Provide for a beginner, intermediate or advanced level of workout appropriate to the needs and levels of the client group. 1.4. Select and sequence ***music*** according to duration, concepts and phases and type of session. 1.5. Develop sequence of choreography to suit session type 1.6. Access music according to ***organisational policies and procedures*** and ***legislation and regulatory requirements***. 1.7. Incorporate ***motivational techniques*** to maximise exercise program adherence.
2. Deliver the session.	2.1. Prepare exercise environment according to organisational policies and procedures. 2.2. Explain ***common types of injuries*** that would prevent participation in the session and confirm that clients are not affected. 2.3. Deliver ***pre-session instructions*** according to effective ***instructional principles***. 2.4. Deliver the selection of exercises using appropriate instructional methodologies, sequencing and progression. 2.5. Monitor the performance of clients and adjust any ***technical errors*** to ensure safety. 2.6. Monitor ***exercise intensity*** and adjust as required. 2.7. Use ***motivational techniques*** and arousal control techniques to positively influence the performance of clients during exercise sessions. 2.8. Recognise and respond to inappropriate client behaviour to effectively manage group cohesion. 2.9. Provide constructive and positive encouragement to clients, showing sensitivity to ***cultural and social differences***.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	2.10. Modify exercises to meet individual needs.
3. Develop a circuit training session plan.	3.1. Identify the ***aims*** of the circuit training session. 3.2. Define expected outcomes of the circuit training session. 3.3. Identify a broad and varied ***exercise repertoire***. 3.4. Plan and document a ***circuit training session plan*** using the ***principles of exercise planning*** according to ***industry guidelines***. 3.5. Design clear and structured forms or cards for use in a circuit training session.
4. Deliver a circuit training session.	4.1. Confirm appropriate ***exercise area*** according to legislation and regulatory requirements and organisational policies and procedures. 4.2. Check ***circuit equipment*** is in good working order prior to commencement of session. 4.3. Use energy, water and other resources effectively when preparing and maintaining equipment and activity areas to reduce negative environmental impact. 4.4. Communicate session objectives and the principles and ***benefits*** of circuit training to clients. 4.5. Explain common types of injuries that would prevent participation in the session and confirm that clients are not affected. 4.6. Instruct session according to circuit training plan and legislation and regulatory requirements and organisational policies and procedures. 4.7. Demonstrate and instruct correct use of equipment during circuit training session, according to organisational policies and procedures and manufacturer instructions. 4.8. Demonstrate exercises within the circuit training session using appropriate ***instructional principles***. 4.9. Monitor client intensity, technique and safety during the session and suggest modifications where required. 4.10. Recognise signs and symptoms of overtraining and ***potentially harmful practices*** and implement appropriate ***intervention strategies*** according to organisational policies and procedures.
5. Evaluate the session.	5.1. Seek and acknowledge ***feedback*** from clients. 5.2. Evaluate ***client response*** and feedback.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	5.3. Evaluate ***own performance*** according to planned outcomes and organisational policies and procedures. 5.4. Identify potential improvements to enhance future sessions. 5.5. Modify the session plan where relevant to meet client needs.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- ability to move in a controlled and efficient manner while instructing or participating in a variety of exercise-to-music sessions
- communication skills, including safe and effective cueing to:
  - provide clear and accurate instructions
  - encourage clients
  - effectively manage group cohesion
- problem-solving skills to:
  - identify improvements to energy, water and other resources for environmental sustainability
  - select and sequence exercises and music to meet client needs
  - identify client problems during the session
  - address client issues through appropriate intervention
- self-management to review and reflect on own work performance in effectively planning and instructing a session according to client expectations
- conflict resolution skills to identify and respond to inappropriate behaviour to enable effective management of group cohesion
- planning and organisational skills to:
  - plan a circuit session
  - plan a group exercise session
  - prepare the exercise area and equipment
  - select appropriate instructional techniques
  - make modifications to the session
- language and literacy skills to produce and document a circuit training session plan for the session
- technology skills to operate music equipment
- ability to maintain timing to beat of music when appropriate
- numeracy skills to manage the time of clients and facility schedules

© Commonwealth of Australia, 2025 HumanAbility

- ability to apply injury prevention strategies and resources for group exercise sessions.

Required knowledge

- signs and symptoms of harmful practices and overtraining
- organisational policies and procedures and relevant legislation to enable the safe and effective conduct of group exercise sessions
- music beat, tempo and phrasing to select appropriate music for exercise sessions
- the physical, psychological and social reasons for participating in group exercise to enable the application of effective motivational techniques
- injury prevention strategies related to group exercise
- principles of exercise planning and repertoires to enable the selection and sequencing of exercises appropriate for beginner, intermediate and advanced clients
- principles of instruction to enable instruction of an effective session
- potentially harmful practices and the reasons why they are avoided to enable safe client participation in the circuit or group exercise session
- instructional and motivational techniques suitable for group exercise and circuit training sessions to support client adherence to exercise
- physiological, psychological and biomechanical changes that occur with circuit training to enable informed planning
- Group exercise session types and their suitability for meeting client needs
- Group management techniques to assist individuals within the group to achieve desired outcomes
- Common injuries which may preclude participation
- Environmental and resource efficiency practices related to the use of activity areas and group exercise equipment.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plan, instructs and monitors client performance, and responds appropriately to client behaviour to maintain an effective exercise environment • applies appropriate techniques to motivate group • selects and uses music effectively within group exercise sessions

© Commonwealth of Australia, 2025 HumanAbility

- safe and effective cueing
- plans circuit sessions with interrelated components, monitors the progress of the session.
- applies effective contingency management techniques to deal with a range of problems and issues that may arise during the session, such as equipment failure or client overtraining, and makes adjustments in response to changing situations
- instructs sessions that meet client expectations, comply with legislative and organisational requirements, and are of sufficient duration to allow the candidate to demonstrate techniques to instruct and review circuit sessions
- evaluates client and own performance and identifies improvements for future sessions
- uses appropriate delivery technique to enhance client learning and performance.

Context of and specific resources for assessment

Assessment must ensure planning and instruction of a variety of exercise session, including circuit and group exercise for different client groups which are of sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a facility where an exercise area with access to audio equipment is available
- appropriate documentation and resources used in the workplace
- documentation such as circuit training session plans and manufacturer specifications for equipment use
- a range of client groups with a range of exercise needs and expectations.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct observation of instruction of exercise sessions to music
- oral or written questioning on knowledge of the principles of instruction
- third-party reports from supervisors detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

© Commonwealth of Australia, 2025 HumanAbility

- SISFFIT311A Deliver approved community fitness programs

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Session type may include:

- beginners
- step
- low and high impact
- new body or sculpt
- circuit
- pre-choreographed
- routine format
- muscle conditioning
- flexibility
- relaxation
- free weights.

Phases may include:

- planning
- warm up
- conditioning
- recovery
- adaptation.

Exercise repertoire may include:

- contraindications and modifications
- variations to provide differing intensities
- potential for combinations.

Music may include:

- beats per minute
- rhythm
- tempo
- motivational value
- phrasing
- quality
- volume.

Organisational policies and procedures may include:

- pre-session screening
- overcrowding
- ventilation

© Commonwealth of Australia, 2025 HumanAbility

- hygiene
- client to instructor ration
- climate control
- emergency
- risk management
- standards of personal presentation
- clients' clothing and footwear
- use care and maintenance of equipment.

Legislation and regulatory requirements may include:

- Occupational Health and Safety
- duty of care
- privacy
- anti-discrimination
- copyright
- licensing
- child protection
- trade practices
- consumer protection
- environmental
- business registration and licences.

Aims may include:

- competition or performance targets
- self improvement
- fitness targets
- lifestyle adjustments.

Exercise repertoire may include:

- cardio
- strength and conditioning
- flexibility.

Circuit training session plan may include:

- phases of:
  - preparation
  - conditioning
  - recovery
- adaptation
- rest intervals
- required equipment
- floor plan for equipment arrangement.

Principles of exercise planning may include:

- frequency
- intensity
- duration
- movement
- environment
- program type.

© Commonwealth of Australia, 2025 HumanAbility

Industry guidelines may include:	• peak-body guidelines • national standards for the use of electrical equipment • number of machines on a single circuit.
Exercise area may include:	• indoor • outdoor.
Cultural and social differences may include:	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing.
Motivational techniques may include:	• arousal control techniques and theories • zone of optimal function.
Pre-session instructions must include:	• verbal pre-screen • personal introduction • outline of session level • pain or discomfort • rests • correct exercise techniques and breathing.
Instructional principles may include:	• establishing rapport • teaching positioning • session organisation and formation • visual and verbal cueing with variety • visual previewing • verbal communication • body language • mirror imaging • demonstration • pre-cueing • rehearsal • combinations • movement breakdown techniques • use of learning curves • monitoring and encouraging session response.
Technical errors may include:	• hyperextension • limb position • ballistic movements.
Exercise intensity may include:	• heart-rate response • perceived rate of exertion • form and fatigue • motivation and enthusiasm suitable to the

© Commonwealth of Australia, 2025 HumanAbility

	session format.
Feedback may include:	• structured • unstructured • verbal • non-verbal.
Client response may include:	• education • motivation • exercise technique • satisfaction.
Own performance may include:	• instructional and choreographic techniques • session format • appropriate intensity • managing client behaviour • responding to feedback • managing time allocation.
Benefits may include:	• physiological • psychological • social.
Common types of injuries may include:	• *muscle or soft tissue injury* • *back injury* • *heart condition.*
Potentially harmful practices may include:	• hyperextension • exercising while sick or in extremes of temperature • multiple repetitions • ballistic movements • spinal hyperextension • loaded knee hyperflexion • on-the-spot pounding • straight leg sit-ups • lever length.
Intervention strategies may include:	• stopping or modifying the exercise • modifying equipment or its use.

SISFFIT310A Plan and deliver water based fitness activities

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, knowledge and skills required to plan, deliver and evaluate water based fitness activities for mainstream clients. It requires the application of effective aquatic instructional techniques and the application of the hydrodynamic principles on muscles, joints and cardiorespiratory system to ensure safe and effective fitness outcomes for clients.

Application of the Unit

This unit applies to exercise instructors who provide a range of exercise programs to diverse population groups who are able to independently enter and exit the water environment. This unit is applicable to those employed in fitness environments such as fitness facilities, public swimming pools, private swim schools or other aquatic fitness venues.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

ELEMENT	PERFORMANCE CRITERIA
	to feedback and review of participant progress.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - determine participant needs
  - provide explanations of the benefits of specific water based fitness activities
  - instruct safe and effective water based fitness sessions on pool-deck and in the water
  - demonstrate effective use of music for purposes of motivation and exercise intensity
  - determine any necessary basic water safety skills
  - seek feedback from clients
- transferability of hydrodynamic principles whilst on pool-deck which emulate demonstration of exercises at water speed
- problem-solving skills to:
  - evaluate participant characteristics and needs to develop and monitor appropriate water based fitness sessions
  - identify any medical conditions requiring further clarification
- identify improvements to energy, water and other resources for environmental sustainability
- conflict resolution skills to identify and respond to inappropriate behaviour to enable effective management of group cohesion
- planning and organisational skills to:
  - plan a circuit session
  - prepare the exercise area and equipment
  - make modifications to the session
- language and literacy skills to produce and document a circuit training session plan for the session
- self-management and learning to maintain currency of knowledge and to provide effective water based exercise formats to clients
- technology skills to enable the use of water based and instructor equipment
- ability to perform non contact basic water assistance
- general characteristics of the main social and cultural groups in Australian society and the key aspects that relate to their cultural and religious protocols and preferences for exercise

© Commonwealth of Australia, 2025 HumanAbility

- environmental and resource efficiency practices related to aquatic environments and fitness equipment.

Required knowledge

- organisational policies and procedures and legislation relevant to enable the safe and effective conduct of water based exercise
- concerns or conditions commonly considered as an impediment to safe participation in planned aquatic activities
- physiological and biomechanical adaptation to exercising in water
- hydrodynamic principles to enable safe and effective water based exercise
- instructional techniques appropriate to participant characteristics and hydrodynamic effects of movement.
- motivational techniques to provide appropriate encouragement and feedback to participant groups
- instructional techniques suitable for circuit training sessions to enable use of strategies to produce positive outcomes for clients
- a range of water-based fitness formats applicable to a wide range of clients to provide a variety of appropriate activities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, explains, demonstrates and conducts activities for multiple water based fitness sessions that are of sufficient duration to demonstrate competency and consistency of performance whilst in the water and on pool deck
- monitors clients and provides feedback and intervention to improve individual skill performance as appropriate
- modifies instructional methods, styles and activities on an individual and group basis to enhance skill development as required
- addresses cultural needs in planning and instruction of water based fitness sessions
- plans circuit sessions with interrelated components, monitors the progress of the session and applies effective contingency management techniques to deal

© Commonwealth of Australia, 2025 HumanAbility

	with a range of problems and issues that may arise during the session, such as equipment failure or client overtraining, and makes adjustments • identifies common signs and signals of a participant experiencing difficulties in the water based fitness session and promptly determines possible contributing factors and formulates a suitable assistance plan including referring to suitably qualified personnel • applies all organisational policies and procedures and legislation and regulatory requirements to ensure safety of clients and other facility users.
Context of and specific resources for assessment	Assessment must ensure planning and conducting activities for multiple participant groups of a size and nature that reflect current local and industry conditions. Assessment must also ensure: • demonstration of skills within a facility with access to a suitable aquatic environment with appropriate depth, surfaces, entry, exit, water quality and temperature • access to appropriate documentation and resources normally used in the workplace such as equipment checklists and session plan proformas • access to equipment for water based fitness activities • access to a safe pool deck including instructor and safety resources • access to documentation such as manufacturer specifications for equipment use • access to a range of clients with a range of fitness needs.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of instructing, monitoring and adjusting a range of water based fitness sessions appropriate to the needs and characteristics of a range of participant groups • oral or written questioning to assess knowledge of the application of the physiological and biomechanic adaptation for the safe planning, conduct and modification of safe and effective water based fitness activities • portfolio showing participation in, planning and delivery of multiple water based fitness activities for

© Commonwealth of Australia, 2025 HumanAbility

clients with differing characteristics and needs.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISCAQU202A Perform basic water rescues
- SISAQU308A Instruct water familiarisation, buoyancy and mobility skills

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Characteristics of the participant group may include:

- age
- gender
- culture
- physical fitness
- body type and composition
- water familiarisation

Legislation and regulatory requirements may include:

- Occupational Health and Safety
- duty of care
- working with children
- copyright and licensing
- industry registration.

Organisational policies and procedures may include:

- Occupational Health and Safety
- duty of care
- privacy
- anti-discrimination
- copyright
- licensing
- child protection
- trade practices
- consumer protection
- environmental
- business registration and licences
- facility users.

Medical or allied health

- sports physician

© Commonwealth of Australia, 2025 HumanAbility

professionals may include:	• sports doctor • general practitioner • physiotherapist • accredited exercise physiologist • occupational therapist • remedial massage therapist • chiropractor • osteopath • accredited practising dietician • psychologist • aboriginal health worker • diabetes educator • podiatrist.
Concerns or conditions may include:	• chronic disease state • medical condition or injury • prescribed medication • dependent upon assistance to enter and exit the pool.

Instructional techniques may include:	• formations
	• instructor preservation
	• visual and verbal cueing
	• mirror imaging
	• emulating water movements
	• anchored or weighted movement
	• active or energetic movement
	• propulsion or turbulent actions
	• suspended movements in deep or shallow water
	• efficient learning curves
	• establishing rapport
	• communication
	• teaching positioning:
	  • in the water
	  • on pool deck
	  • in relation to clients, sound system, sun glare
	  • encouragement
	  • motivation
	  • voice clarity
	  • pitch
	  • non-verbal.

© Commonwealth of Australia, 2025 HumanAbility

Water-based fitness activities may include:	• interval • circuit • drills • exercises • games • choreographed sessions to music • deep water session • equipment based.
Session plan may include	• participant characteristic • goals • formations • exercises • music • phases.
Identified needs may include:	• sports, respiratory and muscle conditioning • resistance training • flexibility, mobility and coordination • social and enjoyment.
Water Properties may include:	• mass • density • viscosity • hydrostatic pressure.
Forces that act upon the body in water may include:	• buoyancy • resistance • turbulence • propulsion • inertia.
Site and pool design may include:	• change rooms, toilets and showers • participant and instructor storage cupboard • pool deck seating, towel hooks and surface • pool surface • gradient • pool temperature • location of steps or ladders • pool depths • rails • wall surface and ledge • lane ropes.
Specific purpose aqua activities may include:	• fitness • balance and coordination • drills

© Commonwealth of Australia, 2025 HumanAbility

- fun and aquatic games
- social
- movement functionality.

Client Equipment may include:

- kickboards
- flotation belts and vests
- flippers
- balls
- dumbbells
- paddles
- webbed gloves
- noodles, woggles, cookies, wafers and kick rollers
- resistance bands
- clothing and sun protection
- ankle cuffs
- shoes
- water-resistant heart rate monitors and stop watches.

Conditions and external influences may include:

- weather conditions
- angle of sun-glare or sun protection
- other facility users
- spectators
- noise levels
- turbulence or eddy from users.

Signs and signals may include:

- call for help
- muscle cramp
- dizziness
- localised pain.

Instructor and Safety Resources may include:

- ropes
- reach poles
- flotation devices
- whistle
- ratio of instructors and or equipment to clients.
- access to hydration
- non slip pool deck instructor mat
- instructor aqua frame
- microphone
- circuit breaker power cord
- sound system
- circuit card holders
- equipment storage.

© Commonwealth of Australia, 2025 HumanAbility

Music may include:	• motivational • themed • phrased, unphrased • cultural • beats per minute • selection should consider copyright and legal procedures.
Water familiarisation skills may include:	• entering and exiting the pool • ability to remain balanced and stable in moving water • aquatic exercise familiarity • movements in a variety of depths of water • water safety awareness.

Basic water assistance may include:	• non-swimming assistance techniques
	  • reach
	  • throw
	  • wade
	• call for assistance from lifeguard or industry recognised employer.

Cultural and social differences may include:	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing.
Best practice principles of aquatic activities may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards and risks • Instructors Code of Conduct policies developed by the peak bodies responsible for the teaching of swimming and water safety such as AUSTSWIM Incorporated, Australian Swimming Incorporated, Australian Swimming Coaches and Teachers Association, The Royal Life Saving Society Australia and Surf Life Saving Australia, and Sports Medicine Australia • national activity organisation regulations and guidelines.
Motivational techniques may include:	• arousal theories and control techniques • zone of optimal function.
Feedback may include:	• verbal • written

© Commonwealth of Australia, 2025 HumanAbility

	• visual • tactile.
Aims may include:	• competition or performance targets • self improvement • fitness targets • lifestyle adjustments.
Exercise repertoire may include:	• cardio • strength and conditioning • flexibility.

Circuit training session plan may include:	• phases of:
	  • preparation
	  • conditioning
	  • recovery
	• adaptation
	• rest intervals
	• required equipment
	• floor plan for equipment arrangement.

Principles of exercise planning may include:	• frequency • intensity • duration • movement • environment • program type.
Common types of injuries may include:	• *muscle or soft tissue injury* • *back injury* • *heart condition*.
Potentially harmful practices may include:	• hyperextension • exercising while sick or in extremes of temperature • multiple repetitions • ballistic movements • spinal hyperextension • straight leg sit-ups • lever length • additional equipment.
Intervention strategies may include:	• stopping or modifying the exercise • modifying equipment.

SISFFIT311A Deliver approved community fitness programs

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to deliver an approved community fitness program designed to promote wellbeing and increase physical activity levels. This unit focuses on the skills needed to deliver programs that are low intensity, in order to minimise risk and enable delivery to general populations, and to monitor and report on the program outcomes to the approving authority. Program evaluation remains the responsibility of the approving authority.

Application of the Unit

This unit applies to exercise trainers and recreation program instructors working in a range of locations and with a range of clients in diverse environments including aquatic, recreation, leisure, fitness and community centres.

This unit is applicable to those working in fitness venues, gyms or other exercise environments.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Prepare for program delivery.	1.1. Obtain confirmation that the program is approved by an ***approving authority***. 1.2. Confirm ***venue or facility requirements*** and ***resources*** required for program delivery. 1.3. Confirm ***access*** to the venue or facility meets the needs and requirements of the ***clients*** according to ***organisational policies and procedures*** and ***legislation and regulatory requirements***.
2. Deliver approved community fitness program.	2.1. Screen clients according to program guidelines and organisational policies and procedures. 2.2. Deliver ***pre-session instructions*** according to program and venue or facility requirements. 2.3. Explain and demonstrate the program using a appropriate ***instructional techniques***. 2.4. Explain and demonstrate the correct use of any ***equipment*** required for the program according to manufacturer's instructions and organisational policies and procedures. 2.5. Show sensitivity to ***cultural and social differences***.
3. Monitor and modify the activities.	3.1. ***Monitor*** exercise intensity, technique and safety of clients continuously throughout the program according to program guidelines. 3.2. Deliver effective and positive ***feedback*** to clients regarding correct program intensity or technique. 3.3. Modify activities as required to ensure program continues to meet the needs and requirements of clients and minimise injuries.
4. Monitor and report on the effectiveness of the program.	4.1. Seek and respond to feedback from clients. 4.2. Identify modifications to instructional technique in response to feedback. 4.3. Identify aspects needing further emphasis or development and document for reporting to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	approving authority as required. 4.4. Maintain ***records*** according to program guidelines and organisational policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - provide clear and accurate instructions and pre-session information
  - encourage clients
  - elicit feedback
  - effectively manage group cohesion
- language and literacy skills to:
  - read and interpret the program plan
  - create reports on aspects of the program that need emphasis or development as a result of program monitoring
  - read manufacturer's instructions for equipment
  - maintain records
- planning and organising skills to ensure venue or facility and required equipment are available and suitable for specific program requirements
- problem-solving skills to identify allowable modifications to meet the needs of the participant group while maintaining the integrity of the program.

Required knowledge

- the purpose, aims and target group of the approved program to enable effective program delivery and identification of acceptable program modifications to meet group needs
- legislation, organisational policies and procedures to enable safe and effective delivery of the program
- equipment usage to enable the safe and effective incorporation of equipment as required by the specific program
- instructional techniques to enable the effective delivery and monitoring of the program
- general characteristics of the main cultural and social groups in Australian society and the key aspects that relate to their cultural and religious protocols and preferences for exercise
- injury prevention strategies to maximise client participation in the program.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- delivers, monitors and adjusts an approved community fitness program which effectively meets the needs and requirements of the participant group while maintaining the integrity of the program
- identifies and implements organisational, program and facility requirements, including the safe use of any required equipment, to maintain the safety of clients.
- maintains accurate records of program delivery and modification
- shows sensitivity to social and cultural differences.

Context of and specific resources for assessment

Assessment must ensure access to:

- clients in an approved community fitness program
- resources for the conduct of the community fitness program such as a venue or facility and any required equipment
- documentation related to an approved community fitness program.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of delivery of approved community fitness programs
- oral or written questioning to assess knowledge of the purpose, aims and allowable modifications to the program to meet the needs of the target group
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT309A Plan and deliver group exercise

© Commonwealth of Australia, 2025 HumanAbility

sessions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Approving authority may include:	• state or federal government department • peak fitness body • community organisation • statutory authority.
Venue or facility may include:	• community hall • council facility • fitness centre • aquatic centre.
Venue or facility requirements may include:	• entry charge • needs of other facility users • emergency evacuation • access.
Resources may include:	• facilities • equipment • finance • personnel • transport and related logistical requirements.
Access may include:	• stairs • ramps • lift • vicinity to public transport • parking.
Clients may include:	• inactive • active • age specific groups • gender specific groups • experienced or inexperienced • specific cultural or social groups.
Organisational policies and procedures may include	• Occupational Health and Safety • training

© Commonwealth of Australia, 2025 HumanAbility

	• privacy • venue hire • recording and reporting • communication protocols • security • emergency • first aid • use care and maintenance of equipment and facilities.
Legislation and regulatory requirements may include:	• Occupational Health and Safety • duty of care • privacy • anti-discrimination • copyright • licensing • child protection • trade practices • consumer protection • environmental • business registration and licences.
Cultural and social differences may include	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing
Pre-session instructions must include:	• personal introduction • verbal pre-screen • session level outline • emergency procedures • appropriate and safe footwear and clothing • rests • correct exercise techniques and breathing.
Instructional techniques may include:	• teaching position • session organisation and formation • mirror imaging • verbal and non-verbal communication • demonstration • motivational strategies,
Equipment may include:	• balls, rings and sticks • dumbbells and barbells • noodles • resistance bands

© Commonwealth of Australia, 2025 HumanAbility

- stability balls and discs
- mats
- chairs
- benches
- heart rate monitors
- sound and microphone.

Monitor may include:

- talk test
- heart rate
- breathing frequency
- rate of perceived exertion.

Feedback may include:

- verbal
- written.

Records may include:

- written
- electronic
- oral recording.

SISFFIT312A Plan and deliver an endurance training program

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and deliver indoor and outdoor endurance training programs for a range of clients utilising a broad range of equipment and motivational and instructional techniques.

Application of the Unit

This unit applies to coaches working with individuals or teams. It also applies to exercise instructors who provide a range of exercise programs and services to individuals and or groups.

The unit is applicable to those working with sporting groups, and to those working in fitness venues, gyms or other exercise environments.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Develop an endurance training program.	1.1. Identify and document ***goals*** of ***client*** for an ***endurance training program***. 1.2. Incorporate a varied repertoire of training methods appropriate to the characteristics and goals of the client. 1.3. Allocate ***phases*** of the session within the exercise program. 1.4. Identify required ***equipment*** and confirm its availability and serviceability ***according to organisational policies and procedures***.
2. Prepare for program delivery.	2.1. Access client ***pre-exercise screening*** information prior to participation according to organisational policies and procedures and ***legislation and regulatory requirements***. 2.2. Redirect non screened participants according to organisational policies and procedures. 2.3. Evaluate the ***exercise environment*** to ensure client safety according to organisational policies and procedures. 2.4. Arrange equipment according to exercise program and legislation and regulatory requirements and organisational policies and procedures.
3. Deliver the program.	3.1. Explain and demonstrate endurance training exercises using appropriate ***instructional techniques*** and ***anatomical terminology***. 3.2. Demonstrate and instruct correct use of equipment during endurance training sessions according to organisational policies and procedures and manufacturer instructions. 3.3. Continuously monitor the client's ***performance*** and correct any ***potentially harmful practices***. 3.4. Provide ongoing feedback to clients and apply ***motivational techniques*** to maximise adherence to the endurance program. 3.5. Recognise ***signs and symptoms of overtraining*** and implement appropriate intervention and prevention strategies.
4. Evaluate endurance	4.1. ***Evaluate*** the program according to client ***feedback***

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
training program.	and self evaluation. 4.2. Implement modifications to the program where relevant to meet identified client needs and preferences. 4.3. Periodically review the endurance training program and adjust to allow for clients to adapt to the program.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - establish client goals
  - instruct effective endurance programs
  - give and receive feedback
- problem-solving skills to:
  - select and sequence appropriate endurance training activities to meet client goals
  - identify and correct potentially harmful practices
  - identify adjustments required as a result of client adaptation to program
- planning and organising skills to:
  - sequence sessions within the program
  - ensure required equipment is available and functional
- literacy and numeracy skills to enable accurate documentation of program schedules and the timely completion of sessions.

Required knowledge

- the major body systems, bones, joints muscles and their function to enable the selection, instruction and adjustment of appropriate exercises to meet the needs of clients
- organisational policies and procedures and legislation and regulatory requirements to enable the safe delivery of endurance training programs including the safe use of equipment and a safe learning environment
- motivational techniques to provide appropriate encouragement to clients to maximise program adherence
- principles of exercise planning to enable a range of activities appropriate to different client goals to be incorporated into the endurance training program to maximise client success

© Commonwealth of Australia, 2025 HumanAbility

- physiological, psychological and biomechanical changes that occur with endurance training to enable informed planning and instruction of sessions and prompt response to client difficulties during the session
- injury prevention strategies and resources for endurance training programs.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • planning and conducting endurance training programs that meet the specific needs of individuals, groups or sports • applying effective communication techniques to instruct, monitor, motivate and evaluate multiple endurance training programs • selecting, sequencing and monitoring the safe and appropriate use of a range of current equipment in endurance training.

Context of and specific resources for assessment	Assessment must ensure:
	• demonstration of skills to plan and instruct endurance training sessions within an environment with appropriate facilities, equipment and materials such as free weight or hydraulic equipment .
	• Assessment must also ensure access to:
	  • access to a range of clients with real or simulated fitness goals
	  • access to documentation such as manufacturer specifications for equipment use.

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of interaction with a range of clients, including conveying information for safe participation in endurance training sessions and motivating clients to achieve desired outcomes • oral or written questioning to assess knowledge of physiological, psychological and biomechanical

© Commonwealth of Australia, 2025 HumanAbility

changes that occur during endurance training
- oral or written questioning to assess knowledge of body systems, bones, joints and muscles and their relationship to effective exercise
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Goals may include:
- physiological
- psychological
- social
- increased capability in sport or activity.

Client may include:
- experienced or inexperienced
- absence of diagnosed disease
- older clients
- de-conditioned adults
- older adolescents:
  - 16 years and over
- those with specific conditioning goals
- athletes
- pre-natal
- post-natal
- menopausal.

Endurance training program may include:
- aerobic
- interval
- circuit
- gym
- fartlek
- anaerobic threshold
- strength
- speed

© Commonwealth of Australia, 2025 HumanAbility

	• lactate tolerance • power.
Phases must include	• *preparation* • *conditioning* • *recovery* • *adaptation* • *transition*.
Equipment may include:	• resistance equipment • heart rate monitor • program card • resistance bands.
Organisational policies and procedures may include:	• Organisational Health and Safety • emergency • risk management • use of client record systems • collection and use of client information • equipment use and maintenance • client supervision • incident reporting • client screening • client referral.
Legislation and regulatory requirements may include:	• Occupational Health and Safety • duty of care • privacy • anti-discrimination • copyright • licensing • child protection • trade practices • consumer protection • environmental • business registration and licences.
Pre-exercise screening may include:	• questionnaire • interview • medical clearance • informed consent • medical and exercise history • functional limitations • medication • lifestyle evaluation • fitness goals

© Commonwealth of Australia, 2025 HumanAbility

- injuries
- time availability.

Exercise environment may include:

- indoors
- outdoors
- aquatic.

Instructional techniques may include:

- establishing rapport
- instructional position
- verbal and non-verbal communication
- demonstration and motivational strategies.

Anatomical terminology may include:

- flexion
- extension
- rotation
- abduction
- adduction
- circumduction
- protraction
- retraction
- inversion
- eversion
- pronation
- supination
- horizontal flexion and extension.

Performance may include:

- intensity
- technique
- safety
- interaction with other clients.

Potentially harmful practices may include:

- hyperextension
- hyperflexion
- exercising while sick
- exercising in extremes of environmental conditions
- multiple repetitions
- addition of equipment
- overextension.

Motivation techniques may include:

- communication
- body language
- listening skills
- building rapport
- questioning and observational techniques
- feedback
- reinforcement.

© Commonwealth of Australia, 2025 HumanAbility

Signs and symptoms of overtraining may include:	• increased incidence of injuries • chronic muscle or joint soreness • reduced appetite • disturbed sleep patterns • increased RPE during workouts • increased incidence of colds or infections • impaired recovery from exercise • reduced enthusiasm for training and work.
Evaluate may include:	• program aims and objectives • client satisfaction • suitability and safety of facilities and equipment.
Feedback may include:	• exercise purpose and technique • appropriate exercise intensity and methods of monitoring • safety • muscle involvement • improvements in training and technique.

Adaptations may include:	• physiological
	  • cardiovascular changes
	  • thermoregulation
	  • energy system and substrate utilisation
	  • pulmonary and nervous system changes
	  • musculoskeletal
	  • respiratory
	• psychological
	• biomechanical.

SISFFIT313A Plan and deliver exercise to apparently healthy children and adolescents

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and deliver exercise for children and young adolescents. It involves planning, demonstration, instruction, review and modification of activities and instructional techniques to meet participant needs.

Application of the Unit

This unit applies to exercise instructors who work in facilities that provide a range of exercise programs to general populations, including children and young adolescents who present with no major health conditions.

This unit is applicable to those working in fitness venues, gyms or other exercise environments.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan the exercise.	1.1. Apply appropriate ***pre-exercise screening*** procedures for children and or young adolescents prior to participation in an ***exercise program*** according to ***organisational policies and procedures*** and ***legislation and regulatory requirements***. 1.2. Identify the characteristics of the ***participants*** and their ***needs and expectations***. 1.3. Consult with parent, guardian or caregiver where appropriate to clarify any risk factors identified in pre-exercise assessment. 1.4. Recognise the sign and symptoms of ***major types of injuries*** that are commonly associated with different stages of development. 1.5. Recommend advice be sought from a ***medical or allied health professional*** based on any health, nutritional or dietary disorder, or medical or injury concerns according to organisational policies and procedures. 1.6. Provide advice on alternative options for participants who are unsuitable for the planned exercise according to organisational policies and procedures, selecting options according to the ***special needs of children***. 1.7. Select exercises from an appropriate ***exercise repertoire*** according to the ***stages of growth and development***, ***age variation*** and ***injury risks*** of the participants. 1.8. Select and modify appropriate ***equipment*** according to needs of participants and organisational policies and procedures. 1.9. Determine the ***instructional techniques*** appropriate to the participants and select and apply appropriate ***baseline assessments*** that inform the benefits of exercise.
2. Instruct the exercise session.	2.1. Communicate the benefits of exercise for children and adolescents to participants. 2.2. Communicate the general features of ***healthy eating***

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	for children and young adolescents and provide basic dietary recommendations to improve overall health and support exercise goals. 2.3. Explain and demonstrate the exercises to participants and provide opportunities for questioning and clarification. 2.4. Demonstrate and instruct correct use of equipment according to organisational policies and procedures and manufacturer's instructions. 2.5. Monitor exercise intensity, technique and safety of participants during session and modify as required according to participant responses. 2.6. Apply appropriate ***motivational techniques*** to encourage participants and make any required modifications to activities. 2.7. Facilitate activities to maximise individual participation. 2.8. Show sensitivity to ***cultural and social differences***.
3. Evaluate the exercise session.	3.1. Evaluate the exercise session according to participant and or caregiver feedback and personal reflection. 3.2. Provide feedback to the client group on their progress and any changes recommended. 3.3. Determine ***modifications*** to the ***exercise plan*** where relevant to meet needs identified through evaluation.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to provide clear instruction and constructive feedback to children, young adults, parents, guardians or caregivers and medical and allied health professionals regarding the pre-exercise screening and alternative options
- plan and instruct activities and exercises that reflect appropriate developmental stages of adolescents
- problem-solving skills to:
  - identify exercises targeted at specific fitness components and make modifications where required
  - recognise conditions outside own scope of practice and make appropriate

© Commonwealth of Australia, 2025 HumanAbility

recommendations
- planning and organising skills to plan and instruct the exercise session including accessing required equipment and appropriate modifications
- interpersonal skills to interact effectively with children and adolescents, parents, guardians or caregivers
- numeracy skills to manage the time of sessions and facility schedules.

Required knowledge

- recommended healthy eating options and dietary guidelines for children and young adults to enable the provision of accurate information to participants
- limitations of a fitness instructor in providing healthy eating information
- the medical and allied health sector to enable appropriate recommendations be made to parents, guardians or caregivers
- principles of paediatric and exercise science to enable the selection of exercises appropriate exercises to participant characteristics and needs
- stages of physical, social and emotional growth and development in children and young adults to enable effective planning of programs and selection of appropriate exercises.
- principles of exercise program design to enable development of a program for a specific age group
- legislation and regulatory requirements and organisational policies and procedures to enable safe and appropriate conduct of exercise for children and young adolescents.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • screens children and young adolescents prior to commencement of exercise sessions and communicates results to relevant caregivers and recommends referral to appropriate medical or allied health professionals where necessary • develops a variety of sessions for exercise that are fun, interactive and safe for a range of client groups of children and young adolescents • provides accurate and current information about healthy eating and healthy eating options in accordance with recommended guidelines

© Commonwealth of Australia, 2025 HumanAbility

	• evaluates exercise sessions and modifies exercise plans according to feedback received from participants and own evaluation.
Context of and specific resources for assessment	Assessment must ensure instruction of multiple exercise sessions that are of sufficient duration and breadth to allow the demonstration of competency and consistency of performance. Assessment must also ensure access to: • a facility where a variety of exercise modes and equipment are available, such as a weights gym, exercise room and open air • relevant resources, for example, weight to height ratios, healthy eating information for a range of ages • appropriate documentation normally used in the workplace such as fitness charts and assessment questionnaires • a range of individuals and participant groups composed of children and young adolescents.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of instructing and monitoring exercise sessions for children and young adolescents • oral or written questioning to assess knowledge of stages of development and growth in children and young adolescents and how these relate to effective exercise planning • a portfolio of plans for exercise programs for different age groups • third-party reports from a supervisor detailing work performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISFFIT309A Plan and deliver group exercise sessions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

© Commonwealth of Australia, 2025 HumanAbility

conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Pre-exercise screening must include:	• medical history • functional limitations • medication • lifestyle evaluation • fitness goals • exercise history • questionnaire • caregiver • parent • legal guardian consent • interview.
Exercise programs may include:	• fundamental motor skills • cardiovascular exercise for age variations • resistance training • flexibility.
Organisational policies and procedures may include:	• Occupational Health and Safety • confidentiality of client information • client screening procedures • client referral procedures • ethical considerations in assessing children • use and maintenance of equipment.
Legislation and regulatory requirements may include:	• Occupational Health and Safety • duty of care • privacy • anti-discrimination • copyright • licensing • child protection • trade practices • consumer protection • environmental • business registration and licences.

Participants may include:	• children:
	  • aged between 3 - 5 years
	  • aged between 5 - 9 years
	• young adolescents:
	  • aged between 9 - 16 years.

Needs and expectations may	• recreational

© Commonwealth of Australia, 2025 HumanAbility

include:	• social • improved fitness levels and motor skills.

Major types of injuries may include	• sprains
	• osteochondroses
	  • severs
	  • patellofemoral pain syndrome
	  • legg-calve-perthes
	• shoulder instability
	• joint hypermobility.

Medical or allied health professional may include:	• general practitioners • medical specialists • paediatricians • accredited exercise physiologist • physiotherapist • occupational therapist • accredited practising dietician • osteopath • chiropractor • diabetes educator • podiatrist.
Special needs of children may include:	• diabetes • overweight and obese • hypermobility • asthma and other respiratory problems • ADD • ADHD • children and adolescents on medications.
Exercise repertoire may include:	• contraindications and modifications • variations to provide differing intensities • level of participant skill required • potential for combinations • exercise selection.
Stages of growth and development must include:	• changes in child growth and development • effect of exercise on growth and development • social development • physiological characteristics of the exercising child though developmental stages.
Age variation may include:	• session structures for different ages • coordination and motor development • communication and instructional skill difficulties

© Commonwealth of Australia, 2025 HumanAbility

	• behavioural change and social needs • exercise requirements for different stages of development.
Injury risks may include:	• inadequate skill and physical preparation • overtraining • biomechanics and exercise technique • physical and mental preparation • fatigue and recovery.
Equipment may include:	• small, interactive and circuit-based equipment • sporting • age specific strength training equipment • cycle and ergomoters • rowing machine • treadmill.
Instructional skills may include:	• transitions between exercises or games • session structure variations • communication skills • verbal and visual instructions relevant to age group • technique correction.
Baseline assessment may include:	• functional motor skills • cardiovascular • strength • agility • flexibility.
Healthy eating may include:	• energy balance • dietary guidelines for children and young adolescents • fuel for exercise • fuel for minimising post-exercise fatigue and maximising recovery • hydration levels • specialised dietary interventions requiring referrals.
Cultural and social differences may include:	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing.
Motivational techniques may include:	• goal setting • positive feedback • foundation of play in exercise prescription.

© Commonwealth of Australia, 2025 HumanAbility

Modifications may include:	• accommodating the physical changes and health conditions associated with developmental age • accommodating the social and psychological changes that occur with children.
Exercise plan may include:	• identification of client needs and goals • an outline of the session components • order and sequence of exercises • duration, intensity, volume • equipment • progression within an exercise program • appropriate music selection.

SISFFIT314A Plan and deliver exercise to older clients with managed conditions

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and deliver exercise for clients aged 50 and over. It involves planning, demonstration, instruction, review and modification of activities and instructional techniques to meet client needs.

Application of the Unit

This unit applies to exercise instructors and community fitness leaders who work in facilities that provide a range of exercise programs to older clients who present with managed medical conditions. The unit is applicable to those employed in fitness environments such as fitness venues, community facilities and those working autonomously in the fitness and health industries.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan the exercise.	1.1. Apply appropriate ***pre-exercise screening*** procedures for ***older clients*** prior to participation in an ***exercise program*** according to ***organisational policies and procedures*** and ***legislation and regulatory requirements***. 1.2. Identify the characteristics of the older clients and their ***needs and expectations***. 1.3. Consult with family members where appropriate to clarify any risk factors identified in pre-exercise assessment in order to recognise the sign and symptoms of ***major types of injuries or conditions*** that are commonly associated with older clients. 1.4. Obtain client's permission to seek advice from a ***medical or allied health professional*** to clarify health, medical or injury concerns according to organisational policies and procedures. 1.5. Provide advice on alternative options for clients who are unsuitable for the planned exercise according to organisational policies and procedures, selecting options according to the clients needs. 1.6. Select exercises from an appropriate ***exercise repertoire*** that match the client's needs, abilities and goals. 1.7. Select and modify appropriate ***equipment*** according to needs of clients and organisational policies and procedures. 1.8. Determine the ***instructional techniques*** appropriate to the clients and select and apply appropriate ***baseline assessments*** that inform the benefits of exercise.
2. Instruct the exercise session.	2.1. Inform older clients about the ***physical changes*** that occur with the ***ageing process*** and communicate benefits of exercise for older clients to clients. 2.2. Show sensitivity to ***cultural and social differences*** 2.3. Communicate the general features of ***balanced nutrition*** and provide healthy eating information to improve overall health and support exercise goals. 2.4. Explain and demonstrate the exercises to clients and provide opportunities for questioning and

ELEMENT	PERFORMANCE CRITERIA
	clarification. 2.5. Modify exercises to ensure they are safe and effective for older clients. 2.6. Demonstrate and instruct correct use of equipment according to organisational policies and procedures and manufacturer's instructions. 2.7. Monitor exercise intensity, technique and safety of clients during session and modify as required according to client responses. 2.8. Apply appropriate ***motivational techniques*** to encourage clients and make any required modifications to activities.
3. Evaluate the exercise session.	3.1. Evaluate the exercise session according to client and or caregiver feedback and personal reflection. 3.2. Provide feedback to the client group on their progress and any changes recommended. 3.3. Identify ***modifications*** to the ***exercise plan*** where relevant to meet needs identified through evaluation.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to provide clear instruction and constructive feedback to older clients, family members, medical and allied health professionals regarding the pre-exercise screening and alternative options
- problem-solving skills to:
  - identify exercises targeted at specific fitness components or medical conditions and make modifications where required
  - select functional exercises that are appropriate for the clients, taking into account their abilities and interests
  - recognise conditions outside own scope of practice and make appropriate recommendations or referrals
- planning and organising skills to plan and instruct the exercise session including accessing required equipment and making appropriate modifications to equipment and exercise selection
- interpersonal skills to interact effectively with older clients
- numeracy skills to manage the time of sessions and facility schedules
- application of injury prevention strategies for older clients.

© Commonwealth of Australia, 2025 HumanAbility

Required knowledge

- recommended healthy eating guidelines for older clients to enable the provision of accurate information to clients
- the limitations of a fitness instructor in providing healthy eating information
- the medical and allied health sector to enable appropriate recommendations and referrals be made to clients or family members
- principles of biomechanics and exercise science to enable the selection of exercises appropriate to client conditions and needs
- physiological, social and emotional processes of ageing to enable effective planning of programs
- principles of exercise program design to cater for a variety of managed medical conditions
- legislation and regulatory requirements and organisational policies and procedures to enable safe and appropriate conduct of exercise for older clients
- general characteristics of the main older client, social and cultural groups in Australian society and the key aspects that relate to their cultural and religious protocols and preferences for exercise.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- screens older clients prior to commencement of exercise sessions and communicates results to family members where appropriate and recommends referral to appropriate medical or allied health professionals where necessary
- develops a variety of sessions for a range of older clients that are fun, interactive and safe
- provides accurate and current healthy eating information in accordance with recommended guidelines
- modifies individual exercises to accommodate the specific needs of the client
- evaluates exercise sessions and modifies exercise plans according to feedback received from clients and own evaluation.

© Commonwealth of Australia, 2025 HumanAbility

Context of and specific resources for assessment	Assessment must ensure instruction of multiple exercise sessions that are of sufficient duration and breadth to allow the demonstration of competency and consistency of performance. Assessment must also ensure access to: • a facility or venue where a variety of exercise modes and equipment are available, such as a weights gym, exercise room and open air • relevant resources, for example, healthy eating information • appropriate documentation normally used in the workplace such as pre-exercise and assessment questionnaires • a range of client groups composed of older clients with a variety of managed conditions.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of instructing and monitoring exercise sessions for older clients • oral or written questioning to assess knowledge of the ageing process and how this relates to effective exercise planning • a portfolio of plans for exercise programs for older clients with different managed conditions • third-party reports from a supervisor detailing work performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISFFIT309A Plan and deliver group exercise sessions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 HumanAbility

Pre-exercise screening must include:	• medical history • functional limitations • medication • lifestyle evaluation • fitness and health goals • exercise history • injury history • questionnaire • interview.
Exercise programs may include:	• cardiovascular • strength training • flexibility • agility • balance • fundamental movement skills.
Organisational policies and procedures may include:	• occupational health and safety • confidentiality of client information • client screening procedures • client referral procedures • ethical considerations in assessing older clients • use and maintenance of equipment.
Legislation and regulatory requirements may include:	• Occupational Health and Safety • duty of care • privacy • anti-discrimination • copyright • licensing • trade practices • consumer protection • environmental • business registration and licences.

Older clients may include:	• adults aged 50 years and over who are:
	  • healthy and active
	  • have managed conditions
	• menopausal.

Needs and expectations may include:	• recreational • social • improved fitness levels, strength and functional movement skills.
Major types of injuries or conditions may include	• sprains • musculoskeletal

© Commonwealth of Australia, 2025 HumanAbility

- arthritis
- joint instability
- restricted range of movement
- osteoporosis

- cardiovascular
  - hypotension
  - hypertension
- neurological
  - Parkinson's disease
- other medical
  - diabetes
  - metabolic conditions
  - thyroid disorders
  - cancers
  - obesity
  - under-nutrition
  - continence issues
- psychological
  - depression
  - dementia or early stage
- respiratory
  - asthma
  - emphysema.

Medical or allied health professional may include:

- sports physician
- sports doctor
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist
- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician
- psychologist
- aboriginal health worker.

Exercise repertoire may include:

- contraindications and modifications
- variations to provide differing intensities
- level of client skill required
- potential for combinations
- exercise selection.

© Commonwealth of Australia, 2025 HumanAbility

Ageing process may include:	• physiological • biomechanical • psychological • behavioural change and social needs • lifestyle and cultural • general population characteristics.
Injury risks may include:	• inadequate skill and physical preparation • overtraining • biomechanics and exercise technique • physical and mental preparation • poor core&postural awareness • fatigue and recovery.
Equipment may include:	• treadmill • cycle and ergometers • rowing machine • steppers • dumbbells and strength training equipment • chairs • resistance bands • small, interactive and circuit-based equipment • gym based equipment.
Cultural and social differences may include:	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing.
Instructional techniques may include:	• transitions between exercises or games • session structure variations • communication skills • verbal and visual instructions relevant to client conditions • technique correction.
Baseline assessment may include:	• cardiovascular • strength • agility • flexibility • balance • functional motor skills
Balanced nutrition may include:	• energy balance • dietary guidelines • fuel for exercise

© Commonwealth of Australia, 2025 HumanAbility

	• fuel for minimising post-exercise fatigue and maximising recovery • hydration levels • specialised dietary interventions requiring referrals.
Motivational techniques may include:	• goal setting • positive feedback.
Modifications may include:	• accommodating the physical changes and health conditions associated with ageing • accommodating the social and psychological changes that occur with ageing.
Exercise plan may include:	• identification of client needs and goals • an outline of the session components • order and sequence of exercises and flow of session • duration, intensity, volume, frequency • equipment • progression within an exercise program • appropriate music selection.

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify and refer clients requiring medical or allied health professional expertise.	1.1. Access and review client initial ***pre-test screening information*** according to ***Legislation and regulatory requirements*** and ***organisational policies and procedures***. 1.2. Ascertain additional ***health information*** from the ***client*** as required. 1.3. Analyse health information to determine the need for referral and guidance from ***medical or allied health professionals*** within established professional parameters. 1.4. Recommend client seek advice from medical or allied health professionals as appropriate according to organisational policies and procedures. 1.5. Arrange a referral to an appropriate medical or allied health professional. 1.6. Ensure referral occurs with permission or consent of client and within confidentiality and privacy standards 1.7. Complete relevant documentation according to organisational policies and procedures.
2. Receive and respond to referrals.	2.1. Identify instructions within the ***referral*** received from medical or allied health professional. 2.2. Seek clarification from medical or allied health professional as required. 2.3. Discuss outcomes of referral with client and answer client queries regarding exercise plan. 2.4. Develop exercise plan as directed by referral. 2.5. Document referral process according to organisational policies and procedures and legislation and regulatory requirements.
3. Apply exercise considerations and guidelines to provide an exercise plan to manage clients with identified special requirements.	3.1. Describe the ***exercise and types of exercise*** which are recommended for clients with identified special requirements exercising in the fitness industry to maintain and develop health and functional capacity to clients. 3.2. Deliver the exercise plan designed by a suitably qualified medical or allied health professional to clients with identified special requirements.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.3. Instruct clients with identified special requirements under the supervision of suitably qualified medical or allied health professionals.
	3.4. Apply aerobic and resistance training guidelines to clients with identified special requirements in line with recommendations and guidelines from medical or allied health professionals.
	3.5. Provide advice on exercise guidelines appropriate to clients with identified special requirements in consultation with medical or allied health professional.
4. Monitor client responses and progress.	4.1. Monitor ***client response*** to the exercise program.
	4.2. Report client progress including difficulties and concerns to medical or allied health professional in a timely manner.
	4.3. Recognise ***signs and symptoms of instability*** and take appropriate action.
	4.4. Notify medical or allied health professional of any changes in client condition or health status as required according to organisational policies and procedures and legislation and regulatory requirements.
	4.5. Review client's fitness level and health status regularly and make appropriate modifications to exercise plan as required.
	4.6. Provide ***feedback*** to client on progress and any recommended adjustments.
5. Maintain case management file.	5.1. Identify information that needs to be recorded in the case management file.
	5.2. Identify information that needs to be shared with medical or allied health professionals and provide as required.
	5.3. Maintain current, complete, accurate and relevant ***client records*** for each client contact.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

© Commonwealth of Australia, 2025 HumanAbility

- literacy skills to:
  - enable the accurate recording of client information
  - interpret and follow written sequenced instructions from medical or allied health professionals
  - communication skills to enable interaction with clients and medical or allied health professionals in an appropriate manner
  - problem-solving skills to determine situations and conditions requiring guidance from medical or allied health professionals
- self management skills to determine and work within own areas of professional expertise.

Required knowledge

- legislation and organisational policies and procedures to enable accurate recording of information and to maintain the security of client information
- local medical and allied health professionals and their areas of expertise to enable appropriate and timely referrals for clients
- risk stratification process
- exercise testing and testing supervision recommendations
- risk factors beyond own expertise and authority indicating the need for referral recommendations
- medical and anatomical terminology to accurately interpret instructions from medical or allied health professionals and to record client condition and information.
- normal and abnormal values of common clinical tests used to determine health status of clients
- effects of common medications prescribed to manage common health conditions

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • identifies and advises clients requiring referral to medical or allied health professionals • communicates effectively with medical or allied health professionals using appropriate communication techniques to respond to instructions contained in referrals and provides accurate information to clients advised to seek referral

© Commonwealth of Australia, 2025 HumanAbility

- demonstrates ability to receive referrals in a professional manner in accordance with guidelines of referring medical or allied health professional and own organisation.
- maintains confidentiality, security and privacy of information.

Context of and specific resources for assessment

Assessment must ensure participation in multiple client interactions that reflect a range of commonly encountered conditions requiring the guidance of a medical or allied health professional.

Assessment must also ensure access to:

- a range of clients with a real or simulated range of fitness requirements
- a range of real or simulated medical or allied health professional referrals appropriate to the range of clients
- relevant documentation such as client record forms.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consultations with a range of medical or allied health professionals
- accurate and legible completion of workplace documentation in response to rehabilitation referrals according to legal and organisational requirements
- oral or written questioning to assess knowledge of personal responsibilities and the range of services offered by medical or allied health professionals
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFIT421A Plan and deliver personal training

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

© Commonwealth of Australia, 2025 HumanAbility

regional contexts) may also be included.

Pre-test screening information must include:	• medical history, including medications • current medical conditions • informed consent • letter from a medical or allied health professional.
Legislation and regulatory requirements may include:	• Occupational Health and Safety • duty of care • privacy • anti-discrimination • copyright • licensing • child protection • trade practices • consumer protection • environmental • business registration and licences.
Organisational policies and procedures may include:	• privacy • confidentiality • referral for appraisal • appraisal forms • recording appraisal information • waiver or release form.
Health information may include:	• medical conditions • injuries • prescribed medication • medical and exercise history • functional limitations.

Client may include:	• male or female
	• pre-natal
	• post-natal
	• menopausal
	• older clients:
	  • de-conditioned males over 45
	  • de-conditioned females over 50
	• older adolescents:
	  • 16 years and over
	• those with:
	  • illness or sickness
	  • disease or disorder
	  • unaccustomed lack of functional strength.

© Commonwealth of Australia, 2025 HumanAbility

Medical or Allied health professional may include:	• sports physician • sports doctor • general practitioner • physiotherapist • accredited exercise physiologist • occupational therapist • remedial massage therapist • chiropractor • osteopath • accredited practising dietician • psychologist • continence nurse advisor.
Referral may include:	• instructions to provide part or all of the exercise program to a client • specific instructions to implement an exercise program within the current expertise and knowledge of the fitness trainer.
Feedback may include:	• verbal, in a timely manner • written.
Client response may include:	• heart rate • respiratory rate • subjective ratings of perceived exertion • subjective ratings of specific symptomatic complaints • signs and symptoms of exercise intolerance.
Signs and symptoms of instability may include:	• unusual fatigue and weakness • pain, discomfort or other anginal equivalent in the chest, neck, jaw, arms or other areas that may be due to ischemia • breathlessness • oedema • palpitations or tachycardia or bradycardia • claudication pain • dizziness or lightheadedness • musculo-skeletal pain.
Client records may include:	• electronic • hand written • pre-exercise screening form • medical clearance • fitness test results • clinical test results • informed consent

© Commonwealth of Australia, 2025 HumanAbility

- caregiver or legal guardian sign off.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
1. Support clients to undertake ***exercise behaviour change***.	1.1. Obtain ***information*** about the client's current exercise behaviour and their attitude towards exercise to determine the ***stage of readiness*** to make a behaviour change. 1.2. Show sensitivity to ***cultural and social differences***. 1.3. Assess the level of motivation, commitment and confidence of the client to change attitudes, beliefs and behaviour. 1.4. Identify client's perceived ***barriers to exercise*** and other factors that may impact negatively on the success of an exercise behaviour change. 1.5. Identify suitable strategies to motivate exercise behaviour change based on ***behaviour change models***, ***processes of change***, evidence based research and client characteristics. 1.6. Develop a plan for behaviour change including suggested behavioural modifications relevant to the client. 1.7. Reinforce positive beliefs and behaviours. 1.8. Emphasise short and long term benefits of regular exercise to encourage exercise behaviour change.
2. Implement ***strategies to improve client exercise adherence***	2.1. Demonstrate an understanding of the ***determinants of exercise adherence*** that influence an individual's behaviour. 2.2. Identify and implement a variety of strategies suited to the client to improve exercise adherence based on ***personal and situational factors***. 2.3. Provide guidelines for improving exercise adherence. 2.4. Implement effective ***goal setting*** to support clients to adhere to long term exercise behaviour. 2.5. Monitor and review progress regularly to reinforce efforts. 2.6. Recognise ongoing barriers to continuation of long term exercise and provide motivational strategies as appropriate. 2.7. Assess changes in behaviour in collaboration with the client to determine the effectiveness of the strategies implemented and make appropriate adjustments. 2.8. Recognise common reasons for discontinuation of an exercise program and apply strategies to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	overcome setbacks. 2.9. Apply basic counselling approaches to motivate clients to increase their exercise adherence.
3. Apply a variety of motivational techniques when training clients.	3.1. Tailor motivational strategies to suit individual client psychological needs based on ***personal and situational factors***. 3.2. Use effective ***verbal and nonverbal communication skills*** when instructing clients to optimise motivation and performance. 3.3. Identify ***arousal*** levels and use ***arousal control techniques*** and apply ***arousal and anxiety theory*** to enable the modification of ***client*** exercise behaviour. 3.4. Provide positive reinforcement and feedback to clients to positively influence exercise behaviour. 3.5. Use personal attitudes and values to positively influence clients exercise adherence and behaviour. 3.6. Increase confidence in clients to help them cope with increased stress and anxiety.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills appropriate to:
  - discuss client needs,
  - negotiate strategies for behaviour change and exercise adherence
  - provide clear and accurate information about exercise behaviour.
- problem-solving skills to:
  - analyse clients information and
  - select motivational strategies appropriate to individual client social and cultural differences, needs, barriers and other influences.
- literacy and numeracy skills to enable the completion of questionnaires, records and other related documentation.

Required knowledge

- behavioural strategies to enhance exercise, health behaviour change and lifestyle modifications.
- stages of motivational readiness and processes of change.
- types of motivation, theory of achievement motivation and specific techniques to

© Commonwealth of Australia, 2025 HumanAbility

enhance motivation.
- role of intrinsic and extrinsic motivation in exercise behaviour.
- methods of evaluating self-motivation, self-efficacy and readiness for behaviour change.
- arousal and anxiety theory, and its relationship to exercise performance, adherence and behaviour change.
- goal setting techniques.
- general characteristics of the main social and cultural groups in Australian society and the key aspects that relate to their cultural and religious protocols and preferences for exercise.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • provides individualised strategies to promote a positive exercise behaviour change in clients • implements effectively a range of short and long term motivational strategies suited to the individual client and the exercise situation • utilises appropriate motivational theory in exercise situations when instructing clients • demonstrates effective use of verbal and non verbal aspects of communication to motivate clients • analyse the physical environment of a fitness venue and how that impacts on client behaviour, then adopt appropriate motivational techniques that meet the needs of the client • demonstrates appropriate manner, empathy and patience when working with clients embarking on a behaviour change.
Context of and specific resources for assessment	Assessment must ensure demonstration of skills over a period of time within a facility where a variety of exercise modes and equipment are available to support exercise behaviour change. Assessment must also ensure access to: • a range of clients of different ages and with different client needs

© Commonwealth of Australia, 2025 HumanAbility

- appropriate documentation and resources normally used in the workplace, such as organisational policies and procedures
- demonstration of skills on sufficient occasions to determine competence in implementing a variety of motivational strategies to effect behaviour change and exercise adherence.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consulting with clients to determine personal and situational factors affecting client's exercise behaviour and attitude towards exercise, providing guidance about exercise behaviour and adherence, and implementing suitable motivational strategies when training clients
- observation of dealing effectively with a range of contingencies such as poor performance, discontinuation of exercise and client setbacks
- oral or written questioning to assess knowledge of the motivational psychology theory
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT420A Plan and deliver exercise programs to support desired body composition outcomes
- SISFFIT421A Plan and deliver personal training

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Behaviour change models may include but are not restricted to:

- health belief model
- transtheoretical model
- motivational change model
- social cognitive model

© Commonwealth of Australia, 2025 HumanAbility

- theory of planned behaviour
- relapse prevention model.

Processes of change may include:

- cognitive processes
- behavioural processes.

Cultural and social difficulties may include:

- modes of greeting, farewelling and conversation
- body language, including use of body gestures
- formality of language
- clothing.

Strategies to improve exercise adherence may include:

- prompts
- contracting
- perceived choice
- reinforcement
- feedback
- rewards
- self monitoring
- goal setting
- social support
- decision balance sheet
- physical setting
- exercise variety
- minimised discomfort and injury
- group training
- enjoyment
- periodic fitness and health assessment
- progress charts.

Determinants of exercise adherence may include:

- personal factors:
  - demographic variables
  - cognitive variables
  - personality variables
  - behaviours
  - cultural
- environmental factors:
  - social environment
  - physical environment
  - physical activity characteristics:
    - exercise intensity and duration
    - group vs. individual activity
    - type
    - instructor or trainer qualities.

© Commonwealth of Australia, 2025 HumanAbility

Barriers to exercise may include:	• lack of time • lack of energy • lack of motivation • excessive cost • illness or injury • feeling uncomfortable • lack of skill • fear of injury • fear of safety • lack of child care • insufficient access • lack of support • lack of transportation.
Basic counselling approaches may include:	• active listening • body language • tone • asking questions • paraphrasing • summarising • note taking.
Information about client's attitude towards exercise may include:	• client expectations • coping techniques • defence mechanisms • belief systems and values • social support systems • stage of readiness for change.
Stage of readiness for change may include:	• precontemplation • contemplation • preparation • action • maintenance • relapse.

Goal setting may include:	• short, medium and long terms goals
	• SMART goals
	  • specific
	  • measurable
	  • achievable
	  • realistic
	  • time appropriate
	• outcome, process and performance goals
	• goal achievement strategies

© Commonwealth of Australia, 2025 HumanAbility

- goal support
- evaluation and feedback
- recording goals
- linked to personality and motivation.

Arousal and anxiety theory may include:

- drive theory
- inverted 'u' hypothesis
- individual zones of optimal functioning
- catastrophic model
- multidimensional anxiety theory
- reversal theory.

Arousal control techniques may include:

- anxiety management
- progressive relaxation
- stress management
- visualisation
- self talk.

Components of motivation may include:

- direction of effort
- intensity of effort
- persistence of behaviour.

Verbal communication may include:

- voice
  - inflection
  - emphasis
  - fluency
  - tone
  - tempo
  - resonance.

Non verbal communication may include:

- body language
  - movement
  - facial expression
  - eye contact
  - gestures
  - posture
  - sign language
  - touching.

Behaviour change may include:

- changes to exercise behaviour
- changes to dietary intake
- lifestyles changes.

Personal and situational factors may include:

- personality
- self concept
- habits
- lifestyle

SISFFIT417A Undertake long term exercise programming

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, knowledge and skills required to design, plan and program long term exercise for fitness industry clients.

Application of the Unit

This unit applies to exercise trainers who work in facilities that provide a range of exercise programs to general populations including older clients who present with no major health conditions. The unit is applicable to those employed in fitness environments such as fitness venues and those working autonomously in the fitness industry.

Licensing/Regulatory Information

Not Applicable

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
1. Use the principles and variables of programming that underlie exercise planning	1.1. Use the ***principles of exercise*** planning to develop long term ***exercise plans*** for ***clients***. 1.2. Use clear and structured forms when writing exercise plans and exercise programs. 1.3. Consider total training volume when developing an exercise plan and relate training volume to other ***program variables***. 1.4. Identify participants specific needs to be addressed by the long-term exercise program. 1.5. Develop objectives for the long-term program and each phase of the program, in consultation with the participant. 1.6. Identify the need for support personnel within the program.
2. Use a structured approach to exercise planning	2.1. Conduct a client induction and screening before commencing to develop an exercise plan. 2.2. Use the four ***program phases*** when developing session programs and relate to the clients specific needs. 2.3. Describe the physiological and ***psychological benefits*** of the preparation and recovery phase to clients. 2.4. Outline the various types of ***conditioning*** appropriate for their goals and fitness levels to clients. 2.5. Incorporate a competition or performance strategy into the program where applicable.
3. Write the exercise plan for specific fitness adaptations	3.1. Use the programming principles of planning for specific fitness ***adaptations*** when writing fitness ***exercise plans***. 3.2. Explain the relationship between the type of conditioning desired and the type of preparation phase selected to clients. 3.3. Demonstrate an awareness of the clients needs, objectives and exercise likes and dislikes when writing exercise plans. 3.4. Select appropriate exercises and incorporate injury prevention strategies to meet the clients needs when writing the exercise plans. 3.5. Design an exercise plan format and structure that is appropriate to the client and the specific target adaptation.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.6. Describe the ***physiological changes*** and anatomical changes that occur with regular participation in the specific program to clients.
4. Evaluate and modify existing exercise plans for fitness industry clients	4.1. Recognise the general conditions that suggest a client's exercise plan should be ***evaluated***. 4.2. Describe the process by which clients are evaluated to the client. 4.3. Recognise the signs and symptoms of overtraining and utilise strategies for its prevention. 4.4. Analyse and incorporate client's exercise likes and dislikes into a modified exercise plan 4.5. Review client goals and incorporate changes to goals into the exercise plan. 4.6. Assess clients for relevant fitness level changes. 4.7. Discuss changes to the long term exercise plan with clients. 4.8. Write revised programs and provide instruction to clients.
5. Demonstrate and instruct the use of cardio-vascular equipment	5.1. Develop innovative cardiovascular fitness plans and exercise programs to meet a client's specific needs. 5.2. Demonstrate the functions on the display board of ***cardiovascular equipment*** are demonstrated to clients. 5.3. Utilise a variety of different electronic exercise equipment program functions for specific client needs. 5.4. Adjust the cardiovascular equipment to suit the needs of clients. 5.5. Instruct the client on the use of cardiovascular equipment.
6. Demonstrate and instruct the use of free weight equipment	6.1. Develop innovative free weight fitness plans and exercise programs to meet a client's specific needs. 6.2. Demonstrate a ***variety of exercises*** using free weight equipment. 6.3. Instruct the client on the use of free weight equipment. 6.4. Use a knowledge of the basic mechanics of action of ***free weight equipment*** to modify exercises for specific fitness outcomes or for safety. 6.5. Analyse the time that a client has been training with free-weights with respect to the exercises taught and adjust the technical difficulty of the exercises

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	accordingly.
7. Demonstrate and instruct the use of innovative exercise equipment	7.1. Develop plans and exercise programs using non-traditional equipment to meet a client's specific needs. 7.2. Use ***exercise equipment*** with reference to manufacturer's guidelines. 7.3. Use a knowledge of the basic mechanics of action of exercise equipment to modify exercises for specific fitness outcomes or for safety. 7.4. Instruct exercises using exercise equipment to clients.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- interpersonal skills to enhance interaction with clients
- the ability to apply injury prevention strategies
- verbal, written and listening communication skills for understanding a client's specific exercise requirements
- technical expertise and experience in the specific fitness activity being planned for the client
- problem-solving skills to identify client problems and address these through appropriate intervention.

Required knowledge

- activity aims and client goal setting
- principles and variables of exercise planning
- exercise science, including anatomy, physiology, biomechanics and healthy eating principles, as applied to fitness activities
- manufacturer and exercise equipment specifications for use and techniques to check safe use
- signs and symptoms of harmful practices and over-training.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 HumanAbility

Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • implement the principles and variables of training that underlie exercise planning • interrelate the components of an exercise plan for specific adaptations • write exercise plans for a variety of training conditions • modify existing exercise plans for clients.
Context of and specific resources for assessment	Assessment must ensure access to: • a real or simulated work environment • a fitness venue with the appropriate facilities and equipment for the context of delivery such as • a weights gym • exercise to music room • pool • community fitness environment • an outdoor environment such as a running track • clients able to give information regarding progress in their fitness program • human resources consistent with those outlined in the Assessment Guidelines.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation • oral or written questioning to assess knowledge of healthy eating standards and guidelines • portfolio demonstrating evidence of accurate body composition appraisals • third-party reports from supervisors detailing work performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different

© Commonwealth of Australia, 2025 HumanAbility

work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Adaptations may include:

- aerobic endurance
  - energy system involvement
  - large muscle groups
  - involvement of aerobic responses such as:
    - substrate utilisation
    - heart rate responses
    - ventilation responses
- cardiovascular endurance
  - muscle group involvement
  - energy system
  - involvement of cardiovascular responses such as:
    - blood pressure
    - heart rate
    - vascular shunting
    - vasodilation
- hypertrophy
  - low volume and heavy load stimuli for fast twitch fibres
  - high volume and low load stimuli for slow twitch fibres
  - muscle tension
- local muscle endurance
  - number of sets
  - repetition maximum
  - recovery
  - exercises
- neuromuscular coordination
  - sets and repetitions
  - exercise type
  - exercise technique
  - safety considerations
  - skill foundation
- power
  - sets and repetitions

© Commonwealth of Australia, 2025 HumanAbility

- repetition maximum
- recovery times
- exercise techniques
- strength
  - sets and repetitions
  - repetition maximum
  - recovery times
  - exercise techniques
- stretching and flexibility
  - sets and repetitions
  - recovery times
  - exercise technique.

Exercise plans may include:

- changes to
  - movement
    - direction
    - range
    - lever length
    - complexity.
    - speed
  - environment
    - stability of client
    - perceived risk
    - activity type
  - intensity
    - resistance
    - repetitions
    - muscle involvement
  - program type, such as
    - strength
    - muscular endurance
    - power
    - cardiovascular endurance
    - speed
    - flexiblity
  - sets and reps
  - circuit
  - matrix
  - super sets
  - plyometrics
  - pre-fatigue

© Commonwealth of Australia, 2025 HumanAbility

	• interval.
Clients may include:	• experienced or inexperienced • various ages • screened • active or inactive • pre-natal • post-natal • menopausal.
Conditioning may include:	• speed • power • strength • flexibility • cardiovascular endurance • hypertrophy • muscle endurance • weight loss.
Long term exercise plans may include:	• client details • current fitness level • client goals • targeted adaptations • anticipated rate of client adaptation • periodisation of multiple target adaptations • number and nature of specific session programs • equipment requirements • facility requirements • review dates.
Evaluated may include:	• original aims and objectives • client satisfaction • suitability and safety of facilities and equipment.
Physiological changes may include:	• cardiovascular changes • thermoregulation • energy system and substrate utilisation • pulmonary changes • nervous system changes.
Principles of exercise may include:	• client goals • client physical capacity • planning elements • training threshold • overload • specificity

© Commonwealth of Australia, 2025 HumanAbility

- reversibility
- progression
- genetic potential
- recovery rate
- individualisation
- motivational techniques
- performance goals
- predicted rate of adaptation.

Program phases may include:

- preparation phase
- mobility
- first preparation
- pre-stretch
- specific preparation
- conditioning phase
- apply the training stimulus
- recovery phase
- stretching
- healthy eating options
- massage
- soft or gentle exercise
- adaptation phase
- rest
- recovery
- positive physiological and anatomical adaptations.

Program variables may include:

- frequency
- intensity
- duration
- type
- progressive overload
- specificity
- individualisation
- reversibility
- recovery
- periodisation.

Psychological may include:

- mental imaging
- focusing
- level of self motivation
- development of motivational tools.

Cardiovascular equipment may include:

- bikes
- treadmills
- elliptical trainers

© Commonwealth of Australia, 2025 HumanAbility

	• steppers • rowing machines.
Free weight equipment may include:	• bars • dumbbells • collars • barbells • benches.
Variety of exercises may include:	• compound • isolation • body part or muscle specific • equipment specific.

Exercise equipment may include:	• exercise balls
	  • medicine balls
	  • swiss balls
	• bars
	  • body bars
	• steps
	• bands
	  • dyna bands
	  • speed assisted bands
	  • speed resisted bands
	• specific muscle targets
	  • abdominal assisters
	  • rotator cuff
	• plyometric training systems.

SISFFIT418A Undertake appraisals of functional movement

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to undertake general postural appraisals to evaluate a client's posture, functional range of movement and muscle strength and weakness in preparation for the development of an appropriate exercise program.

Application of the Unit

This unit applies to exercise trainers who work in facilities that provide a range of exercise programs to general populations including older clients and older adolescents who present with no major health conditions. The unit is applicable to those who are employed in fitness venues or who work autonomously in the fitness industry.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	statement. Assessment of performance is to be consistent with the evidence guide.
1. Prepare clients for postural appraisal.	1.1. Undertake ***exercise screening*** of clients using recognised screening tool according to ***organisational policies and procedures***. 1.2. Explain the ***aims of postural appraisal*** and the procedure for the appraisal to clients. 1.3. Discuss the importance of identifying ***postural variances*** and explain the relationship between posture and injury prevention to clients. 1.4. Inform clients of the legal and ethical limitations of the role of a exercise trainer according to ***legislation and regulatory requirements***. 1.5. Select relevant postural screening tool and screening tests appropriate to the client. 1.6. Organise and prepare ***appraisal equipment*** as required.
2. Assess client's range of movement.	2.1. Conduct movement tests to evaluate the client's ***joint mobility*** according to industry standards. 2.2. Administer tests using appropriate equipment according to organisational policies and procedures. 2.3. Identify restrictions in ***range of movement*** and recommend client seeks external assistance if abnormal range of movement is observed. 2.4. Record assessment results using a standardised method and explain results to the client.
3. Analyse client's static posture.	3.1. Conduct a ***static postural appraisal*** of the client using an appropriate posture analysis tool according to organisational policies and procedures. 3.2. Compare the client's posture to the ***ideal postural alignment*** in order to identify common postural variances. 3.3. *Analyse the symmetrical development* of ***muscles*** to identify any ***muscular deficits***. 3.4. Identify and record joints, muscles and connective tissues that may require strengthening and or stretching. 3.5. Record assessment results and explain the results to clients according to organisational policies and procedures. 3.6. Recommend clients with postural variances or concerns seek external assistance according to

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	organisational policies and procedures.
4. Observe client's dynamic posture.	4.1. Observe the client's dynamic posture while performing simple ***fitness exercises*** according to legislation and regulatory requirements and organisational policies and procedures. 4.2. *Analyse client movements to* determine joint movement, muscle action and the role of muscle contraction. 4.3. Correct poor technique likely to cause postural variances and explain the potential for injury to clients. 4.4. *Record information and provide feedback to clients according to organisational policies and procedures*. 4.5. Recommend clients with dynamic postural variances or concerns seek external assistance according to organisational policies and procedures.
5. Provide information to clients relating to posture.	5.1. Provide information about the common ***causes of poor posture*** to clients. 5.2. Provide strategies to address poor posture and reduce the likelihood of injury. 5.3. Discuss the role of appropriate exercise technique, when correcting inappropriate posture. 5.4. Advise clients of exercises or activities that are contraindicated or may further exacerbate any postural variance.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - interact with clients to convey information about aims and procedures of postural appraisals and outcomes of assessments
  - to respond to client queries
  - provide follow-up advice to address poor posture
- problem-solving skills to:
  - select appropriate postural appraisal tools appropriate to the client's needs
  - evaluate the client's posture and make appropriate recommendations

© Commonwealth of Australia, 2025 HumanAbility

- literacy skills to record assessment results and analyse assessment information
- self-management skills to recognise and respond appropriately to areas outside own scope of practice.

Required knowledge

- musculoskeletal system to conduct postural appraisals to inform the development of safe and effective exercise programs and provide information to clients including:
  - structure of joints
  - range of motion
  - function of muscles and muscle groups
  - joint integrity and risk of injury
  - types and functions of muscles
  - muscle actions
  - muscle fibre types
- legislation and organisational policies and procedures to enable:
  - appropriate collection, use and storage of client information
  - application of legal and ethical limitations of own role
- purpose and process of postural appraisals to enable accurate information to be communicated to clients and accurate responses to be made to client queries
- fitness industry standards and practices for the conduct of appraisals of clients in a safe and ethical manner
- tools and methods to conduct postural appraisals that enable accurate information to be collected and analysed
- ideal postural alignment to enable identification of postural variances for follow-up action.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • treats client information with sensitivity and discretion, displays client empathy, puts clients at ease during the appraisal process and communicates information and results appropriately • carries out postural appraisals according to legal and ethical limitations and refers to appropriate personnel

© Commonwealth of Australia, 2025 HumanAbility

regarding areas outside level of responsibility
- utilises a range of postural assessment tools and activities and makes informed recommendations to the client for appropriate exercise programs or recommends external assistance
- applies effective contingency management techniques to deal with a range of problems and issues that may arise during the appraisal process such as providing strategies to address poor posture and referring clients with abnormal appraisal outcomes to medical or allied health professionals.

Context of and specific resources for assessment

Assessment must ensure conduct of multiple postural appraisals for a range of clients including older clients.

Assessment must ensure access to:

- a fitness facility with appropriate postural analysis equipment to conduct the appraisals
- multiple clients with a range of real or simulated fitness needs and postural conditions
- documentation such as health screening questionnaires and appraisal tools, relevant appraisal forms to record information and organisational policies and procedures relating to client appraisal.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of interaction with clients to conduct a postural fitness appraisal
- oral or written questioning to assess knowledge of the role of the musculoskeletal system in assessing postural exercise requirements
- portfolio demonstrating evidence of postural appraisals completed
- third-party reports from supervisors detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT421A Plan and deliver personal training

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Exercise screening may include:

- questionnaire
- interview
- visual observation.

Organisational policies and procedures may include:

- privacy
- confidentiality
- legal and ethical limitations of role
- fitness industry standards
- test protocols
- use, care and maintenance of equipment
- forms for appraisal
- recording appraisal information

External assistance may include:

- exercise physiologist
- physiotherapist
- occupational therapist
- accredited practising dietician
- osteopath
- chiropractor
- diabetes educator
- podiatrist
- massage therapist
- sports physician
- medical practitioner
- continence nurse advisor.

Postural appraisal may include:

- static or dynamic
- views
- positions
- supine posture.

Aims of postural appraisal include:

- identify abnormality
- determine degree and origin of deviation
- determine effect on proposed or current exercise plan and goals
- identify contraindications and postural risk factors associated with exercise
- prevent injury.

© Commonwealth of Australia, 2025 HumanAbility

Postural variances may include:	• structural • functional • kyphosis • rounded shoulders • winging of scapula • scoliosis • increased or decreased lordosis • excessive posterior or anterior pelvic tilt • genu varum or genu valgum • increased pronation of foot or ankle complex • increased supination of foot or ankle complex • hyperextension of knees • lateral tilt of pelvis or head • forward head posture • rotated patella
Legislation and regulatory requirements may include:	• Occupational Health and Safety • duty of care • privacy • anti-discrimination • copyright • licensing • child protection • trade practices • consumer protection • environmental • business registration and licences
Appraisal equipment may include:	• flexometer • goniometer • plumb line • grid • plurimeter.
Joints may include:	• intervertebral segments • glenohumeral • elbow • lumbo-sacral • hip • patello-femoral • knee • ankle.
Joint mobility may include:	• flexion • extension

© Commonwealth of Australia, 2025 HumanAbility

- dorsiflexion
- plantar flexion
- horizontal flexion and extension
- abduction
- adduction
- circumduction
- rotation
- supination
- pronation
- inversion
- eversion
- protraction
- retraction
- elevation
- depression.

Range of movement may include:

- functional range
- active and passive range
- joint and muscle specific
- joint and muscle specific tests.

Static postural appraisal may include:

- anterior
- posterior
- lateral.

Ideal postural alignment may include:

- normal spinal curves
- straight line running through:
  - ear lobe
  - anterior shoulder joint
  - vertebral bodies of L 1 - 5
  - posterior hip joint
  - anterior knee joint
  - anterior ankle joint
  - transverses abdominus
  - pelvic floor muscles.

Muscles may include:

- erector spinae
- rectus abdominis
- internal and external obliques
- multifidus
- latissimus dorsi
- quadratus lumborum
- iliopsoas
- rhomboid major and minor
- pectoralis major

© Commonwealth of Australia, 2025 HumanAbility

	• serratus anterior • levator scapulae • teres major and minor • supraspinatus • infraspinatus • gluteus maximus, medius and minimus • iliotibial tract • tensor fascia latae • piriformis • rectus femoris • vastus lateralis, medialis and intermedius • sartorius • biceps femoris • semitendinosus • semimembranosus • gastrocnemius • soleus • tibialis anterior • adductor magnus and longus • gracilis • sartorius.
Muscular deficits may include:	• diminished muscle strength and or endurance • limited flexibility • diminished muscle endurance.
Fitness exercises may include:	• muscle strength • muscle endurance • symmetrical development and range • co-ordination of movement.
Role of muscle contraction may include:	• agonist • antagonist • fixator • assistor.
Causes of poor posture may include:	• congenital abnormalities of the musculoskeletal system • poor muscle strength • poor muscle endurance • muscle imbalance • lack of mobility • damage to bony structures • damage to connective tissue including ligaments, cartilage • changes to line of gravity caused by

© Commonwealth of Australia, 2025 HumanAbility

pregnancy, inappropriate footwear, behaviours, work practices, sport or leisure activities.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Apply a knowledge of musculoskeletal anatomy to exercise planning, programming, and instruction	1.1. Apply knowledge of ***skeletal anatomy*** to exercise planning, programming and instruction. 1.2. Apply knowledge of the integrated monitoring and control of ***skeletal muscle contraction*** by the nervous system to exercise planning, programming and instruction. 1.3. Apply knowledge of the ***structure***, ***range of motion*** and ***function of muscles***, ***muscle groups*** and ***directional terms*** to exercise planning, programming and instruction.
2. Apply related concepts and principles of mechanics to exercise	2.1. Analyse and apply the ***forces*** acting on the body during exercise and ***basic mechanical concepts*** to exercise. 2.2. Apply concepts and principles of mechanics to exercise. 2.3. Use the common terms used to qualify the basic ***principles of biomechanics*** when instructing fitness activities. 2.4. Identify and explain the basic ***lever systems*** in both anatomical and mechanical lever systems to clients. 2.5. Use the ***lever systems*** in the human body and their role in movement and stability to provide safe and effective exercises for clients. 2.6. Take into account the use of levers and cams in ***resistance*** equipment to alter the force required by muscles and affect joint stability when developing programs and instructing fitness activities. 2.7. Take into account the effect of changes in lever length on muscle force output in both anatomical and mechanical lever when instructing fitness activities.
3. Apply related concepts of physiology to exercise	3.1. Apply knowledge of the structure and function of the ***cardio vascular system*** to exercise. 3.2. Apply knowledge of the structure, ***processes*** and function of body ***energy systems*** involved in the storage, transport, and utilisation of energy. 3.3. Apply knowledge of the ***physiological responses*** of the human body to a single bout of physical activity to exercise.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.4. Apply knowledge of the ***physiological adaptations*** and ***weight bearing*** of the human body to regular exercise to exercise planning, programming and instruction.
	3.5. Apply knowledge of the ***physiological responses*** to physical activity in various ***environmental conditions*** to exercise planning, programming and instruction.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills including use of common terms when providing instructions clients during fitness activities
- literacy skills to
  - source, read, comprehend and apply relevant exercise science principles to exercise plans
- problem-solving skills to determine modifications due to adaptations of the body to exercise

Required knowledge

- basic exercise physiology
- anatomy
- biomechanics and its application to exercise planning
- physiological responses to physical activity
- adaptations of the body to exercise
- environmental conditions and their relationship to exercise planning.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

© Commonwealth of Australia, 2025 HumanAbility

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • monitor the physiological responses of the body to exercise. • explain the adaptations the body makes to exercise. • conduct aerobic function assessments. • monitor the temperature regulation of the body during exercise.
Context of and specific resources for assessment	• This unit of competency must be assessed in the context of fitness in Australia. For valid and reliable assessment the fitness activity should closely replicate the work environment. The environment should be safe, with the hazards, circumstances and equipment likely to be encountered in a real workplace. • This unit of competence should be assessed through the observation of processes and procedures, oral and or written questioning on required knowledge and skills and consideration of required attitudes. Where performance is not directly observed and or is required to be demonstrated over a "period of time" and or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of healthy eating guidelines • portfolio demonstrating evidence of accurate body composition appraisals • third-party reports from supervisors detailing work performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating

© Commonwealth of Australia, 2025 HumanAbility

conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Basic mechanical concepts may include:	• types of levers • mechanical advantage.
Cardiovascular system may include:	• the major physical characteristics of blood and the functions of its major components • the structure and function of the heart and its major components • the structural and functional characteristics of the conduction systems of the heart • the major events of the cardiac cycle • the structure and function of the various types of blood vessels • the major arteries and veins of the circulatory system • the control of blood flow to skeletal muscle.
Concepts and principles of mechanics may include:	• mechanical concepts modelling human movement • gravity • centre of mass • inertia • force and momentum • force production by the body • mechanical concepts related to common exercise equipment • resistance and or resistance arm • force and or force arm • axis of rotation • variable resistance.
Directional terms may include:	• flexion • extension • dorsiflexion • plantar flexion • abduction • adduction • circumduction • rotation • supination • pronation • inversion • eversion

- protraction
- retraction
- elevation
- depression.

Energy systems may include:

- duration and intensity of exercise effect energy contribution from the main energy systems utilised during different forms of exercise
- adenosine triphosphate
- phosphocreatine
- anaerobic glycolysis
- exercise programs that utilise of fatty acid metabolism
- energy system adaptations
- effect of energy intake affects the breakdown of energy substrates
- body systems involved in production of energy.

Environmental conditions may include:

- adaptations of the body to hot and cold environmental conditions
- physiological and biomechanical differences of exercising in the heat compared to normal adaptive conditions
- physiological and biomechanical differences of exercising in the cold compared to normal adaptive conditions
- acute and chronic effects of exercising in water
- the mechanism whereby the body regulates internal temperature in responses to environmental changes and exercise
- dehydration and the importance of water intake and or re-hydration during exercise
- physiological demands placed on the body from smoking
- need for a comprehensive preparation phase to avoid heat or cold stress
- mobility
- general preparation
- pre stretch
- specific preparation.

Fitness equipment may include:

- rowers
- steppers
- steps
- treadmills
- stationary cycles

© Commonwealth of Australia, 2025 HumanAbility

- VO2 max shuttle run test recordings
- heart rate monitors
- ratings of perceived exertion
- 'norm' charts.

Forces may include:

- resistive
- motive
- friction
- centre of gravity
- centre of force, equipment and muscles.

Functional appraisals may include:

- anthropometry
- aerobic responses
- cardiovascular responses
- strength
- endurance
- flexibility.

Measurement methods may include:

- heart rate response
- pulse response
- blood pressure response
- respiration rate response
- skin colour response
- perceived exertion
- exercise form
- work output.

Metabolic products may include:

- lactate
- carbon dioxide
- water.

Muscle groups may include:

- prime mover
- fixators
- assistors.

Physiological responses may include:

- the acute responses to the onset of exercise
- cardiovascular system
- heart rate response
- blood volume
- blood pressure
- stroke volume
- cardiac output
- respiratory system
- respiratory rate
- immune system
- nervous system
- musculoskeletal system

SISFFIT420A Plan and deliver exercise programs to support desired body composition outcomes

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, knowledge and skills required to design exercise plans and programs to change body composition in clients. It requires the application of healthy eating standards and guidelines to provide accurate healthy eating information to clients and the ability to recognise and work within professional limitations.

Application of the Unit

This unit applies to exercise trainers who work in facilities that provide a range of exercise programs to general populations including older clients who present with no major health conditions. The unit is applicable to those employed in fitness environments such as fitness venues and those working autonomously in the fitness industry.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Review pre-appraisal screening information	1.1. Access and review initial client ***pre-appraisal screening information*** according to ***Legislation and regulatory requirements*** and ***organisational policies and procedures***. 1.2. Ascertain additional ***health information*** about the ***client*** as required prior to ***body composition appraisal***. 1.3. Identify client's goals and targets for body composition. 1.4. Provide information to client on the relationship between healthy eating, exercise and health.
2. Conduct a body composition appraisal of client.	2.1. Measure the body composition of client using ***anthropometric standards***. 2.2. Determine the client's ***daily energy requirements***. 2.3. Refer client to the appropriate ***medical or allied health professional*** based on any health, nutritional or dietary disorder, or medical or injury concerns. 2.4. Show sensitivity to ***cultural or social differences***
3. Design an exercise plan to improve body composition	3.1. Set realistic short and long term goals to meet client needs 3.2. Apply ***body-composition management*** guidelines to develop an exercise plan relevant to the ***client's goals*** and fitness levels. 3.3. Utilise the principles of ***balanced nutrition*** to provide healthy eating advice for the client. 3.4. Set realistic guidelines and appropriate exercises to meet client goals 3.5. Outline healthy eating options and hydration requirements for the exercise plan to clients. 3.6. Apply current industry standard Occupational Health and Safety guidelines to the planning, according to organisational policies and procedures. 3.7. Discuss and confirm the exercise plan and healthy eating advice with the client and record according to organisational policies and procedures.
4. Implement and monitor exercise plans to address body	4.1. Instruct client in specific programs and exercises. 4.2. Apply principles of behaviour modification to encourage exercise, guidelines and healthy eating

ELEMENT	PERFORMANCE CRITERIA
composition outcomes	adherence. 4.3. Monitor and record progress. 4.4. Determine the appropriate exercise modifications or changes to ***healthy eating*** advice in conjunction with relevant medical or allied health professionals 4.5. Communicate proposed change to the exercise plan or healthy eating advice and reason for any change to the client. 4.6. Reappraise client's body composition at agreed stages of the program 4.7. Review client short and long term goals and exercise plan.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - discuss and negotiate the fitness requirements of clients and provide healthy eating information
  - provide clear and accurate instruction and feedback to support body composition goals
- problem-solving skills to analyse clients dietary and lifestyle patterns and design appropriate and achievable exercise programs
- interpersonal skills to develop a rapport with clients to ensure information provided about healthy eating options and body composition is received effectively
- numeracy skills to calculate daily energy requirements
- literacy and numeracy skills to enable the completion of plans, records and other related documentation.

Required knowledge

- the relationship between healthy eating options and current Australian dietary guidelines for a balanced diet to enable the provision of accurate information to clients
- structure and function of the digestive system and the effect of healthy eating on other major body systems
- factors that influence fat-loss response to exercise to enable effective goal setting
- appropriate methods and protocols for collecting general information about eating habits from clients

© Commonwealth of Australia, 2025 HumanAbility

- own role and limitations in providing healthy eating information and situations requiring advice from suitably qualified medical or allied health professionals
- body composition measurement methods and the relationship between body composition, fat distribution and health to enable the development of realistic and achievable exercise plans and healthy eating advice aligned to client needs and targets
- guidelines for developing exercise plans to change body composition.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • communicates effectively with clients to ascertain needs and goals and applies appropriate motivational techniques to support client success • provides current and accurate general healthy eating advice appropriate to the needs and goals of clients and recognises and refers situations outside own scope of practice • correctly measures body composition for clients using appropriate measures • designs, implements and reviews exercise plans appropriate to the body composition needs and goals of multiple clients • applies all organisational policies and procedures and legislative requirements.
Context of and specific resources for assessment	Assessment must ensure: • development of body composition and exercise programs to support healthy eating for multiple clients who present with differing needs. Assessment must also ensure access to: • a facility where a variety of exercise modes and equipment are available, such as a weights gym, pool or exercise room • clients able to provide information regarding diet and lifestyle and pre-appraisal screening information • appropriate documentation and resources normally used in the workplace, such as organisational policies

© Commonwealth of Australia, 2025 HumanAbility

and procedures.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consulting with clients to determine body composition goals and to provide information on the relationship between healthy eating and health
- oral or written questioning to assess knowledge of healthy eating standards and guidelines
- portfolio demonstrating evidence of accurate body composition appraisals
- food diary and healthy eating checklist and analysis
- third-party reports from supervisors detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT302A Provide quality service in the fitness industry
- SISFFIT421A Plan and deliver personal training.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Pre-appraisal screening information may include:

- training schedule
- food likes and dislikes
- financial constraints
- responses to questionnaire
- lifestyle evaluation
- interview
- informed consent
- clearance or referral letter from a medical or allied health professional.

Legislation and regulatory requirements may include:

- Occupational Health and Safety
- duty of care
- privacy

© Commonwealth of Australia, 2025 HumanAbility

	• anti-discrimination • copyright • licensing • child protection • trade practices • consumer protection • environmental • business registration and licences
Organisational policies and procedures may include:	• privacy • confidentiality • referrals and forms for appraisal • recording and storing client information.
Health information may include:	• nutritional supplements • religious restrictions • dietary choices • medical conditions • injuries • prescribed medication • medical and exercise history • functional limitations.
Client may include:	• experienced or inexperienced • adult • active or inactive • older client • no major dietary or nutritional concerns • pre-natal • post-natal • menopausal.
Body composition appraisal may include:	• weight • height • hip circumference • waist circumference • skin folds • bioelectrical impedance analysis • body mass indices.
Healthy eating may include:	• general healthy eating principles • national dietary guidelines and recommendations.
Anthropometric standards may include:	• somatotypes (body shapes) • skin fold indices • body mass indices

© Commonwealth of Australia, 2025 HumanAbility

	• waist-hip ratios • healthy weight range charts.
Daily energy requirements may include:	• basal metabolic rate • activity effect on metabolic rate • muscle and lean body mass • thermogenesis
Cultural or social differences may include:	• modes of greeting, farewelling and conversation • body language, including use of body gestures • formality of language • clothing
Medical or Allied health professional may include:	• sports physician • sports doctor • general practitioner • physiotherapist • accredited exercise physiologist • occupational therapist • remedial massage therapist • chiropractor • osteopath • accredited practising dietician • psychologist • aboriginal health worker • diabetes educator • counsellor • podiatrist

Management of body composition may include:	• metabolism
	• balance between energy intake and energy expenditure
	• energy expenditure:
	  • resting metabolic rate
	  • thermogenesis
	  • thermic effect of food
	  • thermic effect of exercise
	  • adaptive thermogenesis
	• energy intake
	• changes to body composition
	  • fat loss
	  • muscle gain.

Client's goals may include:	• fat loss • fitness

© Commonwealth of Australia, 2025 HumanAbility

	• performance enhancement • muscle gain • improved health • improved self image.
Balanced nutrition may include:	• energy balance • recommended daily intake of nutrients • fuel for exercise • fuel for minimising post-exercise fatigue and maximising recovery • hydration levels • food groups • dietary guidelines • essential nutrients • food labelling and preparation.
Motivational techniques may include:	• building rapport • questioning techniques • feedback • goal setting • reinforcement.
Exercise modifications may include:	• frequency, duration, intensity and type of sessions • balance of cardio, stretching and resistance exercises.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Plan personal training program for clients.	1.1. Identify the fitness ***preferences***, ***needs and expectations*** of the ***client***. 1.2. Apply ***pre-screening and assessment procedures*** to identify client fitness levels according to ***organisational policies and procedures*** and ***Legislation and regulatory requirements***. 1.3. Clarify the fitness goals of the client. 1.4. Determine the client's preferred ***learning style***.
2. Prepare personal training exercise plans.	2.1. Develop a personal training exercise plan to meet client's specific needs. 2.2. Select appropriate ***instructional techniques*** and strategies to match client's learning style preferences. 2.3. Identify appropriate ***fitness equipment*** within the exercise plan. 2.4. Identify appropriate session assessment techniques. 2.5. Evaluate the ***exercise environment*** to ensure client safety according to organisational policies and procedures and Legislation and regulatory requirements. 2.6. Obtain permission for use of public spaces if required. 2.7. Minimise the negative environmental impacts by effectively using energy, water and other resources when planning, preparing and using the exercise environment
3. Demonstrate exercise activities and use of equipment.	3.1. Determine client's prior knowledge and skill in the activity. 3.2. Demonstrate the correct and safe performance of exercises to the client using appropriate ***anatomical terminology*** as required. 3.3. Relate the location and function of the ***major bones*** and ***major joints*** to movement when instructing the client. 3.4. Relate ***major muscles*** and their prime moving movements at major joints in the body to movement when instructing clients. 3.5. Demonstrate safe and appropriate use of fitness equipment according to organisational policies and procedures and Legislation and regulatory requirements.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
4. Implement the personal training exercise plan.	4.1. Record the short and long-term responses of the client in relation to motivation to exercise. 4.2. Use ***motivational techniques*** for individual training to increase performance and adherence to exercise. 4.3. Supervise regular client exercise sessions according to the exercise plan and workplace policies and procedures. 4.4. Recognise and use symptoms and effects of specific muscular fatigue and blood lactate accumulation during muscle endurance activities to adjust exercise intensity. 4.5. Apply the limiting factors of the body's energy systems to the setting of exercise intensities as required. 4.6. Maintain records on the personal training plan according to organisational policies and procedures and Legislation and regulatory requirements. 4.7. Recommend and implement steps that improve exercise adherence for a client.
5. Review and modify fitness goals.	5.1. Prepare and implement a ***goal setting review*** session for the client. 5.2. Perform a follow up fitness assessment on the client. 5.3. Recommend clients who develop health, medical or injury conditions seek assistance from a ***medical or allied health professional*** according to organisational policies and procedures. 5.4. Modify exercise plans for the client and prepare and deliver new exercise ***programs***.
6. Plan and arrangement of equipment within a fitness facility	6.1. Develop floor plan for the arrangement of equipment within a fitness facility, taking into account the type of programs delivered in the facility, occupational health and safety requirements and manufactures specifications 6.2. Comply with manufacture's, legislated and Australian Standards for the use of electrical equipment
7. Evaluate and select equipment for a fitness facility	7.1. Outline the procedures to select and purchase new fitness equipment for a recreational facility 7.2. Select fitness equipment to meet facility and program needs

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult, advise and monitor client performance
  - provide clear instruction and constructive feedback and motivation
- problem-solving skills to:
  - plan personal training programs according to the specific needs of clients
  - identify changes in the client's condition and make appropriate adjustments
- adapt communication style to suit client
- identify resource use to minimise the environmental impact
- technical expertise in the fitness activities being provided to ensure the safety and effectiveness of the activity for the client
- numeracy skills to manage the time of clients and facility schedules
- decision making to determine appropriate interactions with clients according to industry standards
- literacy skills to record and update client information and session plans.

Required knowledge

- the structure of the major body systems, bones, joints muscles and their function to enable the selection, instruction and adjustment of appropriate exercises to meet the needs of clients
- anatomical terminology to enable accurate information to be provided to clients
- motivational techniques to provide feedback and encouragement to clients to maximise exercise adherence
- the safe and effective use of fitness activity equipment to enable incorporation of equipment use within the program
- postural appraisal and functional movement and the implications for program design
- legislation and organisational policies and procedures to enable the safe delivery of exercise programs
- environmental and resource efficiency practices related to the exercise environment.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 HumanAbility

Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans, demonstrates, instructs and adjusts exercises incorporating teaching and learning styles appropriate to needs of different clients • uses appropriate techniques to build rapport with and motivate clients with different needs • performs effective assessment reviews of a range of exercise plans and makes any required adjustments.
Context of and specific resources for assessment	Assessment must ensure planning and delivery of multiple personal training sessions for a range of clients with different needs to allow the candidate to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a facility where a variety of exercise modes and equipment are available, such as a weights gym, pool, exercise room and an outdoor environment such as a running track • appropriate documentation and resources normally used in the workplace • a range of clients able to give information regarding progress in their individual exercise programs.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of personal training sessions • portfolio of written exercise programs developed, monitored and adjusted for specific clients • oral or written questioning to assess knowledge of body systems, bones, joints and muscles and their relationship to effective exercise • third-party reports from a supervisor detailing work performance Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISFFIT302A Provide quality service in the fitness industry.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Preferences**, **needs and expectations may include:

- cultural considerations
- fitness goals
- perceived benefits
- cost
- time availability.

Client may include:

- experienced or inexperienced
- older clients:
  - deconditioned males over 45
  - deconditioned females over 50
- older adolescents:
  - 16 years and over
- screened
- active or inactive
- pre-natal
- post-natal
- menopausal.

Pre-screening and assessment procedures may include:

- pre-screen and pre-exercise questionnaires
- question and answer sessions
- postural appraisal
- written surveys.

Organisational policies and procedures may include:

- Occupational Health and Safety
- client supervision
- communication protocols
- privacy
- records management and security
- use, care and maintenance of equipment.

Legislation and regulatory requirements may include:

- Occupational Health and Safety
- duty of care
- privacy
- anti-discrimination
- copyright
- licensing
- child protection
- trade practices

© Commonwealth of Australia, 2025 HumanAbility

- consumer protection
- environmental
- business registration and licences.

Learning styles may include:

- activist
- pragmatists
- theorists
- reflectors
- visual learners
- auditory learners
- kinaesthetic learners.

Instructional techniques may include:

- establishing rapport
- instructional position
- communication
- demonstration and motivational strategies
- positive feedback.

Fitness equipment may include:

- exercise balls
- bars
- steps
- bands
- abdominal assisters
- plyometric training systems
- pin loaded, cardiovascular, free weight, hydraulic, electronic and air-braked equipment
- pool-based.

Anatomical terminology may include:

- flexion
- extension
- rotation
- abduction
- adduction
- circumduction
- inversion
- eversion
- pronation
- supination
- horizontal flexion and extension

Major bones may include:

- skull
- cervical, thoracic and lumbar vertebrae
- sacrum
- clavicle
- scapula
- humerus

© Commonwealth of Australia, 2025 HumanAbility

- radius
- ulna
- carpals
- digits
- pelvis
- femur
- patella
- tibia
- fibula
- tarsals.

Major joints may include:

- elbow
- shoulder
- pectoral girdle
- inter-vertebral
- sacro-iliac
- hip
- knee
- ankle.

Major muscles may include:

- trapezius
- sternocleidomastoid
- latissimus dorsi
- erector spinae
- rectus abdominis
- internal and external obliques
- quadratus lumborum
- pectoralis major
- rhomboids
- deltoids
- biceps and triceps brachii
- forearm flexors
- forearm extensors
- gluteals
- quadriceps
- hamstrings
- gastrocnemius
- soleus
- tibialis anterior.

Exercise environment may include:

- indoors
- outdoors
- aquatic.

Motivational techniques may

- arousal theories and control techniques

© Commonwealth of Australia, 2025 HumanAbility

include:	• zone of optimal function.
Medical or allied health professional may include	• exercise physiologist • physiotherapist • occupational therapist • accredited practising dietician • osteopath • chiropractor • sports physician • medical practitioner • podiatrist.
Programs may include:	• gym • floor • pool • outdoor • water based • aerobic • interval • circuit • gym • fartlek • anaerobic threshold • strength • speed • power.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Plan the aquatic session.	1.1. Identify specific population (participant) groups common to using the aquatic environment requiring modification to aquatic activities. 1.2. Identify participant ***goals*** and ***medical conditions*** in consultation with participant, ***caregivers*** and ***health professionals*** as appropriate. 1.3. Identify ***potential risk status*** that may be experienced by participant and or group. 1.4. Apply a recognised risk stratification process to the clients' information and identify and assess suitability of ***environmental features*** according to the needs of the participant group. 1.5. Address any unsuitable environmental features according to ***organisational policies and procedures*** and ***legislation and regulatory requirements***. 1.6. Determine appropriate ***teaching strategies*** according to the needs and characteristics of participants.
2. Design and prepare for an appropriate aquatic session.	2.1. Develop the ***session plan*** according to the needs and characteristics of participants, ***principles of movement in water***, organisational policies and procedures and legislation and regulatory requirements. 2.2. Create a checklist for the aquatic session and identify any potential barriers to participation including basic water ***basic water assistance***. 2.3. Consider the properties of water and the movement skill of participant. 2.4. Communicate potential risk status to participants, caregivers and provide advice on appropriate responses. 2.5. Advise participants and caregivers of the location and appropriate use of ***resources*** and amenities.
3. Conduct activities.	3.1. Greet participants in a positive manner and inform them of the purpose of the session. Provide guidance on potential movement response initiated from water principles. 3.2. Display expertise in selecting and leading appropriate exercise for participant group. 3.3. Demonstrate the safe and appropriate use of selected exercise equipment. 3.4. Provide clear and accurate information and

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	demonstrations to participants and caregivers during the aquatic session.
	3.5. Apply appropriate hydrodynamic principles to result in appropriately modified exercise technique.
	3.6. Provide the appropriate type and level of support according to the principles of movement in water to the specific population participating in the aquatic activity.
	3.7. Monitor participant's response and adjust or refine the activity or support provided as required.
	3.8. Assess aquatic session to determine implementation of basic non contact water assistance
4. Review the session.	4.1. Respond to participant and caregiver concerns, feedback and questions as required according to ***best practice principles of aquatic activities***.
	4.2. Identify resources and aspects needing further emphasis, attention or intervention in future sessions and report according to organisational policies and procedures.
	4.3. Review own performance and identify areas needing improvement and ***appropriate strategies*** as required.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to establish participant goals and needs, provide clear instruction, confirm understanding and to request and respond to participant and caregiver questions and feedback
- problem-solving skills to identify and address participant needs, assess the appropriateness of environmental features for the participant group and recognise and respond to difficulties appropriately
- technical expertise in the aquatic exercise selection and prescription to ensure appropriate exercise selection, modification and progressions according to client needs
- team work skills to interact effectively with participants, caregivers, medical and allied health professionals to create a positive and supportive environment
- numeracy skills to plan components and rest breaks of sessions and to manage session times effectively
- literacy skills to record and update participant information and session plans.

© Commonwealth of Australia, 2025 HumanAbility

Required knowledge

- principles of movement in water to enable safe, effective and consistent provision of activities to participants according to their specific condition
- address risk issues that may be experienced by participants and enable prompt and appropriate responses
- teaching techniques and strategies appropriate to risk status for participant group to enable effective and safe conduct of aquatic activities
- best practice principles of aquatic activities and implications for safe participation in aquatic activities to enable the provision of effective goal orientated activities
- organisational and legislative requirements to ensure the safety of participants, caregivers, other facility users and staff
- appropriate location, use and care of safety equipment.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- assesses participants' goals to develop and deliver safe and effective aquatic activities according to the principles of movement in water
- uses, monitors and modifies effective teaching strategies appropriate to specific population group to deliver multiple sessions that are of sufficient duration to demonstrate competency and consistency of goal orientated performance
- perform basic non contact water rescue according to best practice principles of aquatic activities
- demonstrates appropriate manner, empathy and promotes inclusive participation when working with a group
- applies all organisational policies and procedures and legislation and regulatory requirements to ensure safety of participants, self and other facility users as appropriate.
- responds to participant feedback and reviews own performance, session outcome and addresses any areas requiring modification or improvement.

© Commonwealth of Australia, 2025 HumanAbility

Context of and specific resources for assessment	Assessment must ensure access to: • a swimming pool or confined natural shallow water venue • safety equipment relevant to local regulatory and organisational requirements • appropriate participant equipment • clients from varying or specific population group and their caregivers.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of instructing, monitoring and modifying safe and effective aquatic activities for participants from specific population groups, including the use of appropriate communication with participants and care givers • oral or written questioning to assess knowledge of the implications for aquatics activities for participants from a specific population group • oral or written questioning to assess knowledge of the principles of movement in water and their relationship to safe and effective exercise for a range of specific population groups • portfolio of participation, self and peer evaluations, session plans Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • CHCDIS1C Orientation to disability work. • SISCAQU202A Perform basic water rescues • SISCAQU307A Perform advanced water rescues • SISFFIT421A Plan and deliver personal training

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 HumanAbility

Goals may include:

- improved functional capacity
- social interaction
- improved fitness elements
- increased cardiovascular fitness
- improved self esteem.
- relaxation techniques
- endorphin release.

Participant characteristic may include:

- aged
  - frail
  - active
- autistic spectrum disorders
- cultural and linguistically diverse
- intellectual impairment
- physical disability
- neurological condition
- mobility limitations
- mental health issues
- medical conditions
- musculoskeletal condition
- pregnancy
- hearing or sight impairment
- sensory disability.

Caregivers may include:

- parents
- guardians
- integration aids
- therapists
- volunteers
- friends
- partners
- family member.

Health professionals may include:

- physiotherapist
- exercise physiologist
- general practitioner
- diversional therapist
- rehabilitation therapist
- personal trainer
- occupational therapist.

Environmental features may include:

- indoor and outdoor swimming pool
- swimming pool entry and exit points
- wet decks
- ramps

© Commonwealth of Australia, 2025 HumanAbility

- steps
- scum gutters
- bulk heads
- surface of pool and concourse
- pool floor gradient
- water temperature
- railings
- depth
- available water space
- chemical additives
- ambient temperature.

Principles of movement in water may include:

- buoyancy
- flotation
- hydrostatic pressure
- propulsion
- lift
- drag
- turbulence
- acceleration
- resistance
- balance and stability metacentric.

Organisational policies and procedures may include:

- Occupational Health and Safety:
  - emergency responses
  - risk analysis of activities
  - inspection of designated pool area prior to use
  - safe and appropriate dress
  - personal hygiene requirements
  - sun safety guidelines
  - hydration guidelines
- reporting responsibilities
- managing hoist
- communication protocols
- Swimming Teachers Code of Conduct policy
- appropriate swimwear, pool-deck attire and personal protective equipment
- consideration of other facility users.

Legislation and regulatory requirements may include:

- Occupational Health and Safety
- duty of care
- privacy
- anti-discrimination

© Commonwealth of Australia, 2025 HumanAbility

- copyright
- licensing
- child protection
- trade practices
- consumer protection
- environmental
- business registration and licences

Risk Status may include:

- shortness of breath
- impaired breathing or swallowing
- tightness in the chest
- dizziness
- tiredness or weakness
- seizures
- loss of symmetry resulting in rolling to one side in a horizontal position
- loss of symmetry resulting in leaning to one side in a vertical position
- limited head and breath control
- difficulty with vertical rotation
- poor concentration
- slowed responses
- poor memory
- limited communication verbal and aural
- low frustration tolerance
- sight and or hearing impaired
- inappropriate social behaviour.

Teaching strategies may include:

- visual and or verbal and or aural and or tactile communication
- multi-sensory
- guided discovery
- repeating instructions
- breaking tasks into smaller activities
- positive reinforcement
- directive.

Session plan may include:

- water familiarisation
- deep water activities
- one on one exercise session
- aqua exercises
- balance and stability techniques
- strength and resistance
- relaxation and wellness session
- emergency plan

© Commonwealth of Australia, 2025 HumanAbility

	• non-contact rescue techniques • duration • rest components • required warm up and cool down

Basic water assistance may include:	• non-swimming assistance techniques
	  • reach
	  • throw
	  • wade
	• call for assistance from lifeguard or industry recognised employer.

Resources may include:	• flotation devices • access to first aid facilities and equipment • resistance devices • accessible change room • change table • hoists, slings and wet chairs • pool safety equipment as listed in state or territory Occupational Health and Safety requirements for pools • ratio of participant to trainer
Safe support techniques in water may include:	• independent • hands on torso • hands to hands • back hold in vertical or horizontal positions • short arm hold • cradling • carry hold • hip hold • prone hold • prone side hold.
Feedback may include:	• verbal • written • visual • tactile.
Best practice principles of aquatic activities may include:	• accepted preventative practice adopted throughout the aquatic industry to minimise safety hazards, risks or environmental impacts • Swimming Teachers Code of Conduct policy • national activity organisation regulations and guidelines • relevant national, state or territory or local government regulations and guidelines

© Commonwealth of Australia, 2025 HumanAbility

- employer organisation's policies and procedures
- the culture of swimming and water safety
- current and past good practice demonstrated by self or peers in the same or similar situation.

Appropriate strategies may include:

- formal training
- mentoring
- peer support.

SISFFIT523A Deliver prescribed exercise to clients with cardiorespiratory conditions

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to deliver prescribed exercise programs to stable clients with cardiorespiratory conditions in collaboration with medical or allied health professionals.

Application of the Unit

This unit applies to specialised exercise trainers whose clients have been provided an exercise prescription from an accredited exercise physiologist or relevant medical or allied health professional.

The specialised exercise trainer is able to apply the understanding and skills to deliver the program and modify the program in terms of frequency, mode, intensity and volume to accommodate the progression of the client within the parameters prescribed by the accredited exercise physiologist or relevant medical or allied health professional.

They apply self directed application of knowledge and skills related to cardiorespiratory conditions, and exercise judgment in delivering the prescribed exercise. The specialised exercise trainer demonstrates the ability to analyse the client's responses to exercise and where appropriate consult with the accredited exercise physiologist or relevant medical or allied health professional.

This unit excludes clients with serious cardiac and respiratory conditions.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Consult with referred clients presenting with stable cardiorespiratory conditions.	1.1. Receive exercise referral from an accredited exercise physiologist, or relevant ***medical or allied health professional***. 1.2. Confirm exercise referral has sufficient detail to allow flexibility for modifications to accommodate progression of the client. 1.3. Become familiar with typical adverse signs and symptoms that may arise during exercise for this pathology. 1.4. Consult with a relevant ***medical or allied health professional*** as necessary. 1.5. Discuss with the client their complete exercise history and their ***cardiorespiratory condition*** and co-morbidities and record information according to ***relevant legislation*** and ***organisational policies and procedures***. 1.6. Explain the physiology of cardiorespiratory conditions and associated ***risk factors*** to the client in simple terms and confirm client understanding. 1.7. Explain to the client the causes and consequences of specific ***cardiorespiratory considerations*** in the context of their effect on exercise capacity and conditions. 1.8. Explain to the client the role of physical activity and exercise in managing cardiorespiratory conditions and enhancing health. 1.9. Confirm the outcomes of a goals ***and needs analysis*** in collaboration with the client and the ***medical or allied health professionals*** if

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	appropriate. 1.10. Explain to the client their need to be referred back to a medical or allied health professional if their condition becomes unstable. 1.11. Identify any potential barriers to exercise and discuss ***methods to enhance exercise adherence*** with the client. 1.12. Clarify any areas of concern with the relevant medical or allied health professional in conjunction with the client. 1.13. Obtain the informed consent of the client and maintain the client's ***records*** according to relevant legislation and organisational policies and procedures.
2. Deliver prescribed exercise programs.	2.1. Undertake appropriate fitness assessments as required. 2.2. Work with ***the accredited exercise physiologist*** or medical or allied health professional to deliver an exercise plan in accordance with recognised exercise recommendations, fitness test results, client limitations, and potential interactions of medications. 2.3. Explain to the client the different roles of ***cardiorespiratory conditioning*** and ***muscular conditioning***, and the reasons for their inclusion as part of the client's exercise prescription. 2.4. Explain to the client the exercise variables to be delivered in the context of managing their specific cardio respiratory conditions. 2.5. Apply ***instructional techniques*** to ensure safe and appropriate application of the ***exercise program*** by the client. 2.6. Demonstrate the safe and appropriate use of selected ***exercise equipment*** and report or address any unsafe equipment according to organisational policies and procedures.
3. Monitor and review clients responses to the prescribed exercise program	3.1. Monitor perceived exercise intensity and make adjustment as required. 3.2. Assess the client's performance and explain and correct any unsafe exercise procedures. 3.3. ***Monitor client responses*** for any typical signs and ***symptoms requiring intervention*** that may occur during exercise.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.4. Apply ***procedures to respond to signs and symptoms requiring intervention*** as required according to relevant legislation and organisational policies and procedures. 3.5. Recognise ***signs of an unstable condition*** and refer the client back to an appropriate ***medical or allied health professional***. 3.6. Report outcomes to referral source as well as client. 3.7. Revise the client's record and advise the referral source of suggested changes to the exercise program if required.
4. Provide advice regarding additional ***lifestyle modifications*** to enhance the management of the condition.	4.1. Obtain information about the client's current lifestyle. 4.2. Discuss possible barriers to behaviour change and delivery of healthy eating practices. 4.3. Provide information in accordance with healthy eating guidelines for to improve general health and reduce the risk of cardiovascular disease. 4.4. Recommend other lifestyles changes to improve current disease status.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills appropriate to the age and values of referred clients with cardiorespiratory conditions
- problem-solving skills to identify adverse signs and symptoms requiring intervention and unsafe exercise performance and to recommend appropriate changes in consultation with an appropriate medical or allied health professional
- team work skills to work collaboratively with medical or allied health professionals according to legal and ethical conditions
- literacy and numeracy skills to enable the accurate interpretation of referrals and to record client exercise programs and calculate and adjust exercise duration and frequency
- analytical skills to interpret information on the health and functional status of clients with cardiorespiratory conditions in terms of their medical conditions, risk factors, medical treatments and exercise history
- decision making skills to determine appropriate instructional techniques
- literacy skills to accurately document and report on client progress

© Commonwealth of Australia, 2025 HumanAbility

- instructional skills to ensure safe and appropriate application of the exercise program
- report writing skills to relay written information to both client and referral source

Required knowledge

- structure and function of the cardiovascular and respiratory systems to enable understanding of cardiovascular responses to exercise and their relationship to cardiorespiratory conditions and the needs of clients including:
  - structure of the heart, coronary circulation and cardiac conduction including abnormalities
  - the interrelationship between the phases, timing and heart sounds of the cardiac cycle
  - cardiovascular physiology and regulation of the cardiovascular system
  - respiratory physiology
- circulatory and respiratory volume changes occurring in response to exercise, the structural and physiological changes consistent with the pathology of cardiorespiratory conditions in relation to the needs of the client
- body systems and their relationship to cardiorespiratory exercise to support safe and effective exercise outcomes including:
  - musculoskeletal system and its relationship to safe and effectively rehabilitate exercise outcomes
  - nervous system and its relationship to the control of cardiovascular regulation and respiration
  - digestive system and its relationship to good health
- causes and consequences of cardiorespiratory conditions in the context of their effect on exercise capacity and the role of physical activity in managing cardiorespiratory conditions and enhancing health
- coronary risk factors in relation to screening, fitness testing and exercise participation
- contraindications associated with cardiorespiratory conditions to enable the provision, monitoring and adjustment of safe and effective exercise
- classes of medications used to manage cardiorespiratory conditions, their effects on the condition, potential interactions of exercise and medication, and effect on exercise performance
- common clinical tests used to evaluate functional capacity and the normal and abnormal values of physiological responses of the cardiovascular and respiratory systems in relation to these tests
- recognised recommendations for exercise testing and prescription for cardiorespiratory conditions
- medical and anatomical terminology to interpret referrals from medical or allied health professionals
- motivational psychology to enable identification and mitigation of barriers to exercise adherence
- nutritional aspects of cardiovascular disease

© Commonwealth of Australia, 2025 HumanAbility

- legislation and organisational policies and procedures to enable safe and effective exercise planning delivery and evaluation and to maintain the confidentiality of client information.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • communicates effectively with accredited exercise physiologist ***or relevant medical or allied health professionals*** regarding relevant health and functional status of the referred client and discusses aspects of exercise prescription with clients. • when appropriate, reacts to adverse events to deal with exercise program problems and issues • ability to correctly interpret the exercise prescription and makes modifications consistent with prescribed parameters and scope of practice • safely and effectively delivers exercise for referred clients with cardiorespiratory conditions and recommends appropriate alterations according to client's physical and motivational responses • monitors and maintains the safety of clients, exercise equipment and the exercise setting and applies effective contingency management techniques to deal with problems and issues that may arise during the exercise program • applies all relevant legal and ethical requirements when discussing and recording client information • demonstrates appropriate manner, empathy and patience when working with clients.
Context of and specific resources for assessment	Assessment must ensure demonstration of skills over a period of time within a facility where a variety of exercise modes and equipment are available to support effective exercise for clients with cardiorespiratory conditions. Assessment must also ensure access to: • a range of clients with real or simulated

© Commonwealth of Australia, 2025 HumanAbility

	cardiorespiratory conditions from a range of ages • a range of real or simulated medical or allied health professional referrals for a range of referred clients with cardiorespiratory conditions and risk factors • relevant documentation such as client record forms • demonstration of skills on sufficient occasions to determine competence in interpreting relevant information and delivering the prescribed exercise program for a range of clients with a range of cardiorespiratory conditions.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of consulting with clients and carers and adjusting standard exercise prescriptions in consultation with an appropriate medical or allied health professional to account for a range of cardio-respiratory conditions and risk factors to focus on functional capacity and health rather than physical fitness • observation of dealing effectively with a range of contingencies such as real or simulated client injuries or inability to complete the exercise prescription • oral or written questioning to assess knowledge of the physiology of cardiorespiratory conditions, medications and associated risk factors • third-party reports from a supervisor detailing work performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISFFIT524A Deliver prescribed exercise to clients with metabolic conditions.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

© Commonwealth of Australia, 2025 HumanAbility

Medical or allied health professional may include:	• sports physician • sports doctor • general practitioner • physiotherapist • accredited exercise physiologist • occupational therapist • remedial massage therapist • chiropractor • osteopath • accredited practising dietician • psychologist • aboriginal health worker.
Cardiorespiratory condition may include:	• Asthma (controlled) • Hypertension: controlled • Anaemia • Coronary artery disease • stable angina
Relevant legislation may include:	• Occupational Health and Safety • duty of care • privacy • codes of practice • fair trading.
Organisational policies and procedures must include:	• Occupational Health and Safety • emergency procedures • risk management • use of client record systems • collection and use of client information • equipment use and maintenance • incident reporting • client history gathering procedures • client referral procedures.
Risk factors may include:	• family history such as myocardial infarction, coronary artery disease, sudden cardiovascular death before 55 years of age in father or other male first-degree relative or before 65 years of age in mother or other female first degree relative • cigarette smoker • hypertension; systolic blood pressure of =140 mm Hg or diastolic =90 mm Hg confirmed by measurement on at least two separate occasions, or taking any antihypertensive medication

© Commonwealth of Australia, 2025 HumanAbility

	• hypercholesterolaemia; total serum cholesterol of >5.0 mmol/l or high density lipoprotein cholesterol of <1.0 mmol/l, or on lipid-lowering medication • impaired fasting glucose; fasting blood glucose of =6 mmol/L by measurements on at least 2 separate occasions • obesity; body mass index of =30kg/m2 or waist girth of > 100cm for males, = 88cm for women or waist/height ratio of = 0.5 cm • sedentary lifestyle; persons not participating in a regular exercise program or accumulating 30 minutes or more of moderate physical activity most days of the week.
Goals and needs analysis may include:	• timeframes • appropriate exercise program adjustments • barriers • motivation • stage of readiness for behaviour change • opportunities and enablers.
Methods to enhance exercise adherence may include:	• rewards for attendance and participation • statement of intent • perceived choice • goal setting.
Records may include:	• electronic • hand written.

Cardiorespiratory conditioning may include:	• Choice of exercises and location:
	  • appropriate to condition and health needs
	  • emphasis on functional capacity and activities of daily living such as mobility
	  • gait, coordination, balance limitations
	  • low initial fitness level, easily fatigued
	  • inefficient movement
	  • possible cognitive impairment
	• integration with muscular training:
	  • prior improvement in strength, balance and range of motion
	  • use of exercise machines and circuit training
	• low fitness level and need for gradual progression.

Muscular conditioning may	• muscular endurance • muscular strength

© Commonwealth of Australia, 2025 HumanAbility

include:	• muscular power.
Instructional techniques may include:	• establishing rapport • instructional position • communication • demonstration and motivational strategies • positive feedback.
Exercise program may include:	• Program variables include mode, intensity, frequency, duration and volume • exercise variety • logical progression.

Exercise equipment may include:	• cardiorespiratory equipment:
	  • stepper
	  • rowing machine
	  • stationary bicycle
	  • treadmill
	• free weight equipment
	• resistance training machines
	• aquatic equipment
	• resistance bands.

Monitor client responses may include:	• rating of perceived exertion (RPE) • heart rate measures • 'talk test' • direct observation.
Symptoms requiring intervention may include:	• pain, discomfort or other typical symptoms of angina equivalent in the chest, neck, jaw, arms or other areas that may be due to ischemia • shortness of breath at rest or with mild exertion • dizziness or syncope • orthopnea or paroxysmal nocturnal dyspnea • palpitations or tachycardia or bradycardia • intermittent claudication • unusual fatigue or shortness of breath with usual activities • acute febrile illness or sickness • complaint • unaccustomed lack of functional strength • signs and symptoms of acute inflammations and infections such as fever, temperature, redness • fractures • recent muscle injury

© Commonwealth of Australia, 2025 HumanAbility

	• haematoma • joint instability • acute and or sudden joint swelling • neck soreness or strain • pain on movement of any body part • inability to bear weight through a limb • cyanosis.
Procedures to respond to symptoms requiring intervention must include:	• cessation of activity • first aid • emergency medical assistance • referral.
Signs of unstable condition may include:	• fatigue and weakness • cardiac pain • breathlessness • oedema • palpitations • claudication pain • dizziness.
Lifestyle modifications may include:	• moderation of alcohol consumption • cessation of smoking • increased incidental activity • stress reduction • provision of health eating guidelines • provision of healthier choices.

SISFFIT524A Deliver prescribed exercise to clients with metabolic conditions

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to deliver prescribed exercise programs to stable clients with metabolic conditions in collaboration with medical or allied health professionals.

Application of the Unit

This unit applies to specialised exercise trainers whose clients have been provided an exercise prescription from an accredited exercise physiologist or relevant medical or allied health professional.

The specialised exercise trainer applies the understanding and skills to deliver the program and modify the program in terms of frequency, mode, intensity and volume to accommodate the progression of the client within the parameters prescribed by the accredited exercise physiologist or relevant medical or allied health professional.

They apply self directed application of knowledge and skills related to metabolic conditions, and exercise judgment in delivering the prescribed exercise. The specialised exercise trainer demonstrates the ability to analyse the clients responses to exercise and where appropriate consult with the accredited exercise physiologist or relevant medical or allied health professional.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

ELEMENT	PERFORMANCE CRITERIA
	condition becomes unstable.
	1.11. Identify any ***potential barriers*** to exercise and discuss ***methods to enhance exercise adherence*** with the client.
	1.12. Clarify any areas of concern with the referring ***accredited exercise physiologist***, or relevant medical or allied health professional in conjunction with the client.
	1.13. Obtain the informed consent of the client and maintain the client's ***records*** according to relevant legislation and organisational policies and procedures.
2. Deliver prescribed exercise programs.	2.1. Undertake appropriate ***fitness assessments*** as required.
	2.2. Work with ***medical or allied health professionals*** to deliver an exercise plan in accordance with recognised exercise recommendations, fitness test results, client limitations, and potential interactions of medications.
	2.3. Explain to the client the role of ***muscular conditioning***, and the reasons for their inclusion as part of the client's exercise prescription.
	2.4. Apply ***instructional techniques*** to ensure safe and appropriate application of the ***exercise program*** by the client.
	2.5. Explain to the client the exercise variables to be delivered in the context of managing their specific metabolic conditions.
	2.6. Demonstrate the safe and appropriate use of selected ***exercise equipment*** and report or address any unsafe equipment according to organisational policies and procedures.
3. Monitor and review clients responses to the prescribed exercise program	3.1. Monitor perceived exercise intensity and make adjustment as required.
	3.2. Assess the client's performance and explain and correct any unsafe exercise procedures.
	3.3. ***Monitor client responses*** for any typical signs and ***symptoms requiring intervention*** that may occur during exercise.
	3.4. Apply ***procedures to respond to signs and symptoms requiring intervention*** as required according to relevant legislation and organisational policies and procedures.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.5. Recognise ***signs of an unstable condition*** and refer the client back to a relevant ***medical or allied health professional***.
	3.6. Report outcomes to the referred source as well as the client.
	3.7. Revise the client's record and advise the referral source of suggested changes to the exercise program if required.
4. Provide advice regarding additional ***lifestyle modifications*** to enhance the management of the condition.	4.1. Obtain information about the client's current lifestyle.
	4.2. Identify to ***client*** appropriate and non-appropriate methods of managing body composition.
	4.3. Explain to the client the ***negative health effects*** of poor management of body composition.
	4.4. Provide information in accordance with healthy eating guidelines to improve general health and enhance the management of the metabolic condition.
	4.5. Discuss the physiological mechanisms of decreasing adipose tissue in a method that is understandable to the client.
	4.6. Explain the importance of healthy eating for body composition management to the client.
	4.7. Explain the effect of exercise on management of body composition.
	4.8. Recommend other lifestyles changes to improve current disease status.
	4.9. Discuss possible barriers to behaviour change and implementation of healthy eating practices.
5. Apply extensive knowledge of the anatomy and physiology of the endocrine system to the delivery of exercise programs for moderate risk clients	5.1. Apply knowledge of the structure and function of the ***endocrine system*** to the delivery of exercise for relevant medical conditions or injuries.
	5.2. *Apply knowledge of the effects of* ***hormones*** *on metabolism and energy production when providing information to clients regarding exercise, healthy eating and body composition management*.
	5.3. Explain the interrelationship between the ***nervous system*** and the endocrine system to control body systems to ***moderate risk clients***.
	5.4. Explain the effects of some of the ***medical conditions and disorders*** on homeostasis of the endocrine system.
6. Apply knowledge of	6.1. Explain clearly the structure and function of the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
the structure and function of the digestive system when providing advice about healthy eating and body composition to moderate risk clients	***digestive system*** when providing advice relating to healthy eating, metabolism and body composition management to clients. 6.2. Use an understanding of the process of digestion and absorption of food in relation to energy production when providing information to clients.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills appropriate to the age and values of referred clients with metabolic conditions
- skills to identify adverse signs and symptoms requiring intervention and unsafe exercise performance and to recommend appropriate changes in consultation with an appropriate medical or allied health professional.
- problem-solving skills to identify symptoms requiring interjection and unsafe exercise performance and to recommend appropriate changes
- teamwork skills to work collaboratively with medical or allied health professionals according to all legal and ethical considerations
- analytical skills to interpret information on the health and functional status of clients with metabolic conditions in terms of their medical conditions, risk factors, medical treatments and exercise history.
- decision making skills to determine appropriate instructional techniques.
- literacy and numeracy skills to enable the accurate interpretation of referrals and to record client exercise programs and calculate and adjust exercise duration and frequency.

Required knowledge

- components of metabolic conditions and the associated risk factors
- the pathology of metabolic conditions and considerations in relation to the needs of the client
- structure and function of the endocrine system to enable understanding of physiological responses to exercise and their relationship to the condition and needs of clients
- risk factors and contraindications associated with metabolic conditions and metabolic syndrome to enable the provision, monitoring and adjustment of safe and effective exercise
- effects of hormones on metabolism and energy production and the regulation of

© Commonwealth of Australia, 2025 HumanAbility

basic physiological responses to exercise to enable the provision of accurate information to clients regarding exercise
- medical and anatomical terminology to interpret referrals from medical or allied health professionals
- relationship between metabolic conditions and other conditions such as cardiovascular disease
- recognised recommendations for exercise testing and prescription for metabolic conditions
- categories of medications used to manage metabolic conditions such as oral hypoglycaemic agents, including insulin, antihypertensives, lipid-lowering agents and their effects on the condition
- effect of metabolic conditions on the acute response to exercise to enable assessment of the individual's functional capacity when developing exercises
- relevant legislation and organisational polices and procedures to maintain the safety of clients and the confidentiality of client information
- motivational psychology to enable identification and mitigation of barriers to exercise adherence
- industry recognised guidelines associated with exercise prescription and delivery
- the role of physical activity in managing metabolic conditions and enhancing health.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • communicates effectively with accredited exercise physiologist ***or relevant medical or allied health professionals*** regarding relevant health and functional status of the referred clients and discusses aspects of exercise prescription with clients. • when appropriate, reacts to adverse events to deal with exercise program problems and issues. • correctly interprets the exercise prescription and make modifications consistent with prescribed parameters and scope of practice • safely and effectively delivers exercise for referred clients with cardiorespiratory conditions and recommends appropriate alterations according to client's physical and motivational response

© Commonwealth of Australia, 2025 HumanAbility

- monitors and maintains the safety of clients, exercise equipment and the exercise setting and applies effective contingency management techniques to deal with problems and issues that may arise during the exercise program
- applies all relevant legal and ethical requirements when discussing and recording client information
- demonstrates appropriate manner, empathy and patience when working with clients.

Context of and specific resources for assessment

Assessment must ensure demonstration of skills over a period of time within a facility where a variety of exercise modes and equipment are available to support effective exercise for clients with metabolic conditions.

Assessment must also ensure access to:

- a range of clients with real or simulated metabolic conditions from a range of ages
- a range of real or simulated medical or allied health professionals referrals for a range of referred clients with metabolic conditions and risk factors
- demonstration of skills on sufficient occasions to determine competence in interpreting relevant information and delivering the prescribed exercise program for a range of clients with a range of metabolic conditions
- relevant documentation such as client record forms.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consulting with clients and adjusting standard exercise prescriptions in consultation with an appropriate medical or allied health professional to account for a range of needs and risk factors to focus on functional capacity and health rather than physical fitness
- observation of dealing effectively with a range of contingencies such as real or simulated client injuries or inability to complete the exercise prescription
- oral or written questioning to assess knowledge of the physiology of metabolic conditions and associated risk factors and the use and effect of medications
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

© Commonwealth of Australia, 2025 HumanAbility

for example:

- SISFFIT523A Deliver prescribed exercise to clients with cardiorespiratory conditions
- SISFFIT530A Deliver prescribed exercise to children and young adolescents with specific chronic conditions

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Medical or allied health professional may include:

- sports physician
- sports doctor
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist
- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician
- psychologist
- aboriginal health worker.

Client may include:

- older
- sedentary
- overweight and obese
- presenting with additional medical or psychological conditions.

Metabolic condition must include:

- dyslipidaemias
- obesity
- hyperglycaemia
- hyperinsulinaemia
- pre-diabetes
- hyperparathyroidism
- diabetes Type I or Type II: controlled
- polycystic ovary
- Hyperthyroidism and or Graves Disease

© Commonwealth of Australia, 2025 HumanAbility

- Hypothyroidism

Relevant legislation may include:

- Occupational Health and Safety
- duty of care
- privacy
- codes of practice
- fair trading.

Organisational policies and procedures may include:

- Occupational Health and Safety emergency procedures
- risk management
- use of client record systems
- collection and use of client information
- equipment use and maintenance
- client supervision
- incident reporting
- client screening procedures
- client referral procedures.

Risk factors may include:

- family history such as diabetes
- smoking
- hypertension; systolic blood pressure of =140 mm hg or diastolic =90 mm hg confirmed by measurement on at least two separate occasions, or taking any antihypertensive medication
- hypercholesterolaemia; total serum cholesterol of >200 mg/dl [5.2 mmol/l] or high density lipoprotein cholesterol of <35 mg/dl [0.9 mmol/l], or on lipid-lowering medication
- impaired fasting glucose; fasting blood glucose of =110mg/dl confirmed by measurements on at least 2 separate occasions
- obesity; body mass index of =30kg/m2 or waist girth of > 100cm for males, = 88cm for women or waist/height ration of = 0.5 cm
- sedentary lifestyle; persons not participating in a regular exercise program or accumulating 30 minutes or more of moderate physical activity most days of the week
- heart conditions.

Goals and needs analysis may include:

- timeframes
- appropriate exercise program adjustments
- barriers
- motivation.

Methods to enhance exercise adherence may include:

- rewards for attendance and participation
- statement of intent

© Commonwealth of Australia, 2025 HumanAbility

- perceived choice
- goal setting.

Potential barriers may include:

- perceived versus actual barriers
- initial low fitness level and probable overweight or obesity
- time and access to facilities
- self-consciousness in client
- concerns for health.

Fitness assessment may include:

- range of movement
- strength
- girth measurements
- body mass.
- waist to height ratio.

Muscular conditioning may include:

- muscular strength
- muscular power
- muscular endurance.

Records may include:

- electronic
- hand written.

Exercise program may include:

- exercise selection
- exercise sequence
- exercise variety
- logical progression.

Exercise equipment may include:

- cardiovascular equipment:
  - stepper
  - rowing machine
  - stationary bicycle
  - treadmill
- free weight equipment
- resistance training machines
- hydraulic machines
- aquatic equipment
- resistance bands.

Monitor client responses may include:

- rating of perceived exertion (RPE)
- heart rate measures
- 'talk test'
- possible fluctuations in blood glucose levels and dehydration.

Symptoms requiring intervention may include:

- shortness of breath at rest or with mild exertion
- dizziness or syncope
- orthopnea or paroxysmal nocturnal dyspnea
- palpitations or tachycardia

© Commonwealth of Australia, 2025 HumanAbility

	• symptoms of hypoglycaemia and hyperglycaemia • intermittent claudication • unusual fatigue or shortness of breath with usual activities • illness or sickness • unaccustomed lack of functional strength • soreness or strain • pain on movement of any body part.
Procedures to respond to symptoms requiring intervention must include:	• cessation of activity • first aid • emergency medical assistance • referral.
Signs of unstable condition may include:	• fatigue and weakness • cardiac pain • breathlessness • oedema • palpitations • claudication pain • dizziness.

Negative health effects may include:	• eating disorders:
	  • bulimia
	  • anorexia
	• obesity
	• diabetes
	• hypertension
	• cardiovascular disease
	• cancer
	• joint degeneration.

Lifestyle modifications may include:	• moderation of alcohol consumption • cessation of smoking • increased incidental activity • stress reduction • provision of health eating guidelines • provision of healthier choices.
Endocrine system may include:	• role and function of the endocrine system • endocrine glands • pituitary • adrenal • parathyroid • pancreas

© Commonwealth of Australia, 2025 HumanAbility

- gonads
- thymus
- hormones
- types
- hormone transport in the blood
- hormone action
- control of hormone action
- control of hormone secretion
- abnormal secretion
- role of endocrine system in stress and disease
- effects of ageing on the endocrine system
- disorders or homeostatic imbalances
- diabetes.

Hormones may include:

- human growth hormone
- anti-diuretic hormone (vasopressin)
- calcitonin
- aldosterone
- insulin.

Nervous system may include:

- divisions:
  - central nervous system
  - peripheral nervous system:
    - somatic nervous system
    - autonomic nervous system
- central nervous system:
  - brain
  - spinal cord
- peripheral nervous system:
  - cranial nerves
  - spinal nerves
  - peripheral nerves
  - plexus
- neurons:
  - afferent
  - efferent
  - motor
  - sensory
- histology of nerve tissue:
  - neuron:
    - axon
    - dendrites

© Commonwealth of Australia, 2025 HumanAbility

        - nucleus
        - cell body
        - node of ranvier
        - neurilemma
        - myelin sheath
        - scwann cell
      - neuroglia
  - brain:
      - structure
      - brain stem
      - cerebral hemispheres
      - ventricles
      - cranial nerves
      - meninges
      - cerebrospinal fluid
      - blood supply:
        - sensory areas and pathways
        - motor areas and pathways
  - nerve impulses:
      - resting membrane potentials
      - graded potentials
      - action potentials
      - refractory period
      - subthreshold stimulation
      - all or none law
      - summation:
        - spatial
        - temporal
  - neuromuscular transmission:
      - neuromuscular junction
      - transmission
  - synaptic transmission:
      - synapse
      - excitation at synapse
      - inhibition at synapse
  - spinal reflexes:
      - reflex arc
      - receptors
      - reflex action

© Commonwealth of Australia, 2025 HumanAbility

- types of reflexes
- spinal cord:
  - structure
  - spinal nerves
- peripheral nerves:
  - cervical plexus
  - brachial plexus
  - lumbosacral plexus
- regeneration and repair of nervous tissue
- effects of ageing on the nervous system
- disorders of the nervous system:
  - multiple sclerosis
  - epilepsy
  - nerve injuries
  - cerebrovascular accident
- sensory receptors:
  - interoreceptors
  - exteroreceptors
- sensory organs:
  - eye:
    - structure
  - accessory organs
  - vision:
    - formation of image
  - proprioreceptors:
    - visual acuity
    - visual fields
    - visual pathways
    - visual defects
  - ear:
    - structure
    - hearing
    - conduction of sound
    - auditory pathway
    - hearing defects
    - equilibrium

Moderate risk clients may include:

- chronic disease state
- medical condition or injury
- under prescribed medication
- symptoms of cardiorespiratory disease

© Commonwealth of Australia, 2025 HumanAbility

- those identified by medical or allied health professionals
- older and sedentary.

Digestive system may include:

- structure:
  - mouth
  - oesophagus
  - stomach
  - small intestine
  - large intestine
  - rectum
  - anus
  - sphincters
- glands:
  - salivary glands
  - pancreas
  - liver
  - gall bladder
- blood supply
- innervation
- role in energy production
- digestion:
  - breakdown
  - motor functions:
    - mastication
    - peristalsis
    - segmentation
    - deglutition
    - gastric motility
    - intestinal motility
  - secretion of enzymes
  - secretion of juices
- enzymes:
  - secretion
  - function
- absorption:
  - carbohydrate
  - lipids
  - protein
  - water and electrolytes
  - vitamins

© Commonwealth of Australia, 2025 HumanAbility

- chemical composition of foods
- metabolism of foodstuffs:
  - oxidation of food
  - by-products
  - storage
  - regulation of metabolism:
    - choice of metabolic pathway
    - carbohydrate metabolism
    - fat metabolism
- protein metabolism

Medical conditions and disorders may include:

- conditions affecting the endocrine system:
  - diabetes
- conditions affecting the nervous system:
  - retinopathy
  - peripheral neuropathy
  - quadriplegia
  - paraplegia
  - cerebral palsy
  - muscular dystrophy
  - Parkinson's disease

SISFFIT525A Advise on injury prevention and management

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to provide information to fitness clients about exercise related injuries, their prevention and management.

Application of the Unit

This unit applies to those working in a sport, fitness and recreation environment. It applies to specialised exercise trainers who are responsible for providing fitness training programs for general populations, including older adults, with the ability to customise fitness training programs to meet the specific individualised needs of different client groups.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Undertake injury surveillance.	1.1. Source and analyse ***data*** on common ***injuries*** for specific fitness activities. 1.2. Monitor occurrence of injury and analyse injury patterns for specific fitness activities. 1.3. Identify ***risk factors*** that may lead to injury for specific fitness activities according to ***relevant legislation*** and ***organisational policies and procedures***. 1.4. Identify ***preventative measures*** in consultation with ***medical or allied health professionals***.
2. Develop injury prevention strategies.	2.1. *Analyse various exercises, exercise technique and fitness activities to formulate effective* ***injury prevention strategies*** according to relevant legislation and organisational policies and procedures. 2.2. *Develop* injury prevention strategies in consultation with medical or allied health professionals. 2.3. *Communicate* recommendations about injury prevention strategies to relevant ***stakeholders*** according to organisational policies and procedures.
3. Implement injury prevention strategies.	3.1. Assess ***facilities and equipment*** for safe participation and advise relevant personnel of problems according to organisational policies and procedures. 3.2. Promote preventative strategies to clients to minimise the likelihood of injury according to ***best practice guidelines***. 3.3. Implement strategies for the management of common exercise-related musculoskeletal injuries according to relevant legislation and organisational policies and procedures.
4. Monitor injury management.	4.1. Monitor ***client*** progress and encourage reassessment of injury by a medical or allied health professional as required. 4.2. Adjust preventative measures and interventions in response to ongoing injury surveillance. 4.3. Conduct ongoing monitoring of injury trends in consultation with medical or allied health professionals as required. 4.4. Evaluate own performance and identify potential improvements for future implementation of injury

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	prevention strategies.
5. Conduct postural appraisals tests to evaluate the clients mobility, stability, muscle strength and endurance.	5.1. Observe the client's static posture using a valid and reliable postural screening method to identify common postural variances and observe the degree of deviation. 5.2. Conduct standardised tests to evaluate joint mobility and observe joint specific functional ***range of movement*** of the ***major joints*** to identify restrictions and right and or left differences in range. 5.3. Conduct standardised ***postural appraisal*** tests to evaluate muscle strength and muscular endurance in order to identify functional ability. 5.4. Apply knowledge of the ***functional anatomy of the joints*** and the location of relevant ***bony landmarks*** when conducting postural appraisals. 5.5. Use a standardised method of recording the results of tests accurately and systematically using a process that allows for subsequent re-evaluation. 5.6. Refer clients with significant injury and postural variances or concerns to appropriate medical or allied health professional before recommending any corrective exercises. 5.7. Consult with an appropriate medical or allied health professional to discuss results of the postural evaluation to determine an appropriate exercise management plan. 5.8. Implement valid postural appraisal methods according to recognised test protocols and industry standards.
6. Observe and evaluate a client's dynamic posture through observation of gait.	6.1. Observe the client's dynamic ***posture*** whilst performing suitable ***locomotive movements*** and record information about movement coordination and balance. 6.2. Apply an understanding of the ***biomechanics of movement*** to the ***gait observation*** to obtain relevant information about the client's dynamic posture. 6.3. Relate the effect of common ***postural variances*** to the client's gait. 6.4. Conduct functional tests to evaluate range of movement, movement control, muscular deficits and proprioception. 6.5. Use a standardised method of recording information obtained to allow for further re-evaluation.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	6.6. Understand the aim of gait observation by the specialised exercise trainer is not to be diagnostic or prescriptive, but to identify potential causes of injury.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - convey information to clients about injury prevention strategies
  - liaise with appropriate personnel to report problems that can contribute to injury
- problem-solving skills to:
  - assess the risk of equipment and facilities to clients
  - identify appropriate preventative methods and interventions
  - adapt measures in response to ongoing surveillance
  - identify and report issues related to implementation of injury prevention strategies
  - conduct a postural appraisal to identify potential causes of injury
  - assess the need for referral and reassessment of client injuries
- language and literacy skills to access, record and interpret information about injuries related to specific fitness activities and their causes
- observation skills to identify the bony landmarks used as identification points when conducting postural screening tests
- numeracy skills to calculate client range of movement at major joints
- self-management skills to:
  - recognise and work within own professional roles and responsibilities
  - review and reflect on own performance.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities according to job role and responsibilities
- principles of biomechanics to enable the application of appropriate techniques and strategies to minimise injuries for specific fitness activities
- pathology of injury and injury response and the phases of healing and repair to enable appropriate exercise prescription to aid healing
- anatomy of the musculoskeletal system and its supporting systems to enable the design of appropriate programs
- function of the musculoskeletal system to enable design of appropriate programs

© Commonwealth of Australia, 2025 HumanAbility

- range of motion and stretching techniques to enable the inclusion of exercise variables to suit client's functional capacity
- common causes of musculoskeletal injuries in relation to fitness activities
- the role of exercise and fitness in the prevention, management and rehabilitation of common exercise related injuries and falls prevention.
- defined roles and responsibilities of the specialised exercise trainer and their ethical and legal limitations to enable understanding of work parameters in implementing injury prevention and management strategies.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • researches cause and prevalence of commonly occurring injuries to develop injury prevention strategies for fitness clients • implements injury prevention strategies and monitors and adjusts the effect of interventions within the parameters of own accepted roles and responsibilities • applies effective contingency management techniques according to own level of responsibility to respond to problems impacting on effective injury prevention and management • evaluates and reflects on own performance in implementing and evaluating injury prevention strategies.
Context of and specific resources for assessment	Assessment must ensure development and implementation of effective injury prevention strategies that are of sufficient breadth to allow the candidate to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a fitness centre with appropriate equipment and facilities in which the candidate operates or intends to operate • fitness clients participating in the specific fitness environment in which the candidate operates or intends to operate.

© Commonwealth of Australia, 2025 HumanAbility

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of interaction with fitness clients and other personnel in conveying information about injury prevention strategies
- oral or written questioning to assess knowledge of common injuries and preventative methods related to fitness activities
- portfolio containing evidence of analysis of injury patterns in relation to fitness activities and self evaluation of own performance
- third-party reports from a supervisor detailing performance
- portfolio containing evidence of injury prevention and management strategies developed for specific clients.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT526A Deliver prescribed exercise to clients with musculoskeletal conditions

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Data may include:

- incidence
- severity
- prevalence
- cause
- types of injuries.

Injuries may include:

- primary or secondary
- direct or indirect
- acute or overuse
- musculoskeletal.

Risk factors may include:

- personal and internal factors

© Commonwealth of Australia, 2025 HumanAbility

- extrinsic factors
- equipment used
- gender
- age
- weight
- fitness level.

Relevant legislation may include:

- Occupational Health and Safety
- duty of care
- privacy
- codes of practice
- fair trading.

Organisational policies and procedures may include:

- Occupational Health and Safety
- emergency procedures
- risk management
- use of client record systems
- collection and use of client information
- equipment use and maintenance
- client supervision
- incident reporting
- client screening procedures
- client referral procedures.

Preventative measures may include:

- screening
- physical conditioning
- protective equipment
- hydration and nutrition.

Medical or allied health professionals may include:

- sports physician
- sports doctor
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist
- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician
- psychologist
- aboriginal health worker.

Prevention strategies may include:

- pre-exercise, warm-up and stretching
- neural stretching
- protective equipment
- recovery strategies and physical conditioning

© Commonwealth of Australia, 2025 HumanAbility

- frequency and duration of participation
- correction of technique
- adequate rehabilitation following injury
- appropriate management of previous injury.

Stakeholders may include:

- clients
- fitness professionals and centre owners
- coaches
- parents or caregivers
- medical or allied health professionals.

Facilities and equipment may include:

- exercise specific equipment
- first aid kit
- environment
- protective equipment.

Best practice guidelines may include:

- guidelines for fitness trainers
- Code of Ethics
- Code of Conduct.

Clients may include:

- young or aged
- experienced or inexperienced.

Range of movement may include:

- joint specific
- muscle specific
- passive range
- active range
- functional range
- joint and muscle specific tests
- equipment:
  - flexometer
  - goniometer
  - electronic

Major joints may include:

- intervertebral
- glenohumeral
- elbow
- radiocarpal
- sacroiliac
- hip (coxal)
- tibiofemoral
- patello-femoral
- ankle

Postural appraisal may include:

- visual observation
- appraisals using appropriate equipment
- joint mobility:
  - joint specific range of movement

© Commonwealth of Australia, 2025 HumanAbility

- tests for specific joints
- segmental mobility of vertebral sections
- active range
- passive range
- functional range
- hypo and or hyper mobile joints
- contra lateral
- symptoms

- muscular strength:
  - tests for specific muscles and or muscle groups
  - functional strength
  - relative strength
- muscular endurance:
  - tests for specific muscles and or muscle groups
  - functional endurance
- functional tests:
  - squat
  - single leg squat
  - single arm push up
- special tests
- postural screening equipment:
  - plumb line
  - grid
  - photographic technology
  - video analysis
  - tape measure
  - goniometer
  - flexometer
  - plurimeter
- pressure biofeedback unit.

Functional anatomy of the joints may include:

- glenohumeral:
  - bones:
    - humerus
    - scapula
    - clavicle
  - ligaments:
    - corocohumeral
    - corococlavicular

© Commonwealth of Australia, 2025 HumanAbility

        - glenohumeral
        - transverse humeral
      - related structures:
        - subscapular bursa
        - subacromial bursa
        - subdeltoid bursa
        - subcorocoid bursa
      - muscles acting on the joint
    - elbow:
      - bones:
        - humerus
        - ulna
        - radius
      - ligaments:
        - ulnar collateral
        - radial collateral
      - related structures:
        - olecranon bursa
      - muscles acting on the joint
    - lumbo-sacral:
      - bones:
        - 5th lumbar vertebrae
        - 1st vertebrae of sacrum
      - ligaments
      - muscles acting on the joint
    - intervertebral:
      - bones:
        - vertebral bodies
      - ligaments
      - muscles acting on the joint
    - hip (coxal):
      - bones:
        - femur
        - hip
      - ligaments:
        - pubofemoral
        - iliofemoral
        - ischiofemoral
        - transverse ligament of acetabulum

© Commonwealth of Australia, 2025 HumanAbility

        - ligament of head of femur
      - muscles acting on the joint
  - knee (tibiofemoral and or patellofemoral):
    - bones:
      - tibia
      - femur
      - patella
    - ligaments:
      - patella
      - oblique popliteal
      - arcuate popliteal
      - tibial collateral
      - fibular collateral
      - posterior cruciate
      - anterior cruciate
    - related structures:
      - tendons of the quadriceps femoris and facia latae
      - medial meniscus
      - lateral meniscus
      - prepatellar bursa
      - intrapatellar bursa
      - suprapatellar bursa
    - muscles acting on the joint
  - ankle (talocrucal):
    - bones:
      - talus
      - tibia
      - fibula
    - ligaments:
      - deltoid
      - anterior talofibial
      - posterior talofibial
      - calcaneofibular
    - related structures:
      - achilles tendon
  - muscles acting on the joint

Bony landmarks may include:

- mastoid process
- spinous process of the vertebrae
- spine of the scapula

© Commonwealth of Australia, 2025 HumanAbility

- inferior angle of the scapula
- acromion process
- coracoid process
- xiphoid process
- lateral epicondyle of humerus
- head of the radius
- styloid process
- olecranon process
- umbilicus
- anterior superior iliac spine
- posterior superior iliac spine

Locomotive movements may include:

- walking
- jogging
- running.

Biomechanics of movement may include:

- levers
- loads
- fulcrum
- movement arms
- muscle actions
- centre of gravity
- base of support
- balance
- stability
- equilibrium.

Gait observation may include:

- view:
  - anterior
  - posterior
  - lateral
- gait cycle:
  - stance phase
  - swing phase
  - flight phase
  - double stance phase
- evaluation:
  - ankle
  - foot
  - tibia
  - knee
  - pelvis
  - trunk
  - head
  - arm
- foot cycle:
  - foot strike
  - mid-stance
  - toe off
- evaluation of:
  - sequence of movement at each joint
  - sequence of muscle actions
  - efficiency of movement
- method:

© Commonwealth of Australia, 2025 HumanAbility

- visual analysis
- video analysis.

Postural variances may include:

- structural
- functional.

SISFFIT526A Deliver prescribed exercise to clients with musculoskeletal conditions

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge to deliver prescribed exercise programs to stable clients with musculoskeletal conditions, in collaboration with medical or allied health professionals.

Application of the Unit

This unit applies to specialised exercise trainers, whose clients have been provided an exercise prescription from an accredited exercise physiologist or relevant medical or allied health professional.

The specialised exercise trainer applies the understanding and skills to deliver the program and modify the program in terms of frequency, mode, intensity and volume to accommodate the progression of the client within the parameters prescribed by the accredited exercise physiologist or relevant medical or allied health professional.

They apply self directed application of knowledge and skills related to musculoskeletal conditions, and exercise judgment in delivering the prescribed exercise. The specialised exercise trainer demonstrates the ability to analyse the clients responses to exercise and where appropriate consult with the accredited exercise physiologist or relevant medical or allied health professional.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Consult with referred clients presenting with stable musculoskeletal considerations.	1.1. Receive exercise referral from an accredited exercise physiologist or relevant ***medical or allied health professional***. 1.2. Confirm exercise referral has sufficient detail to allow flexibility for modifications to accommodate progression of the ***client***. 1.3. Become familiar with typical adverse signs and symptoms that may arise during exercise for this pathology. 1.4. Discuss with the client their complete exercise history and their ***musculoskeletal condition*** and record relevant information according to ***relevant legislation*** and ***organisational policies and procedures***. 1.5. Explain the physiology of musculoskeletal considerations and associated ***risk factors*** to the client in simple terms and confirm client understanding. 1.6. Explain to the client the causes and consequences of specific musculoskeletal conditions in the context of their effect on exercise capacity and conditions. 1.7. Explain to the client the role of physical activity in managing musculoskeletal conditions and enhancing health.
2. Deliver prescribed exercise programs.	2.1. Undertake appropriate ***fitness assessments*** as required. 2.2. Work with ***medical or allied health professional*** to deliver an exercise plan in accordance with recognised exercise recommendations, fitness test results, client limitations, and potential interactions of medications.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	2.3. Explain to the client the role of ***muscular conditioning***, and the reasons for their inclusion as part of the client's exercise prescription. 2.4. Explain to the client the exercise variables to be delivered in the context of managing their specific musculoskeletal conditions. 2.5. Apply ***instructional techniques*** to ensure safe and appropriate application of the ***exercise program*** by the client. 2.6. Demonstrate the safe and appropriate use of selected ***exercise equipment*** and report or address any unsafe equipment according to organisational policies and procedures.
3. Monitor and review clients responses to the prescribed exercise program	3.1. Monitor perceived exercise intensity and make adjustment as required. 3.2. Assess the client's performance and explain and correct any unsafe exercise procedures. 3.3. ***Monitor client responses*** for any typical signs and ***symptoms requiring intervention*** that may occur during exercise. 3.4. Recognise ***signs of an unstable condition*** and refer the client back to an appropriate ***medical or allied health professional***. 3.5. Report outcomes to referral source as well as client. 3.6. Discuss the information obtained through observation of the client's static and dynamic ***posture*** with the referring accredited exercise physiologist, or relevant medical or allied health professional to deliver an exercise program to reduce the progression of ***postural variances*** and to minimise the risk of injury during fitness activities.
4. Apply extensive knowledge of musculoskeletal anatomy and physiology to the delivery of exercise for moderate risk clients.	4.1. Identify major bones, joints and their related connective tissue structures, and the major muscles acting on these joints when delivering exercise programs for clients. 4.2. Identify and describe to clients the ***functional anatomy of the major joints*** when delivering rehabilitation exercise programs for clients with musculoskeletal conditions. 4.3. Apply knowledge of the structure and function of the ***musculoskeletal system*** and basic biomechanics to posture, functional stability and locomotion when delivering exercise programs for ***moderate risk***

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	clients.
	4.4. Apply an understanding of the fundamental structural and functional differences affecting the mobility and stability of the pectoral girdle, pelvic girdle and vertebral column when undertaking screening and programming for clients with postural concerns.
	4.5. Apply the structural adaptations of musculoskeletal tissue in response to exercise, mechanical stress and disease to exercise programming for moderate risk clients.
	4.6. Explain to clients the process of bone remodelling and muscle tissue repair in response to injury when dealing with musculoskeletal conditions.
	4.7. Describe the effects of ageing and inactivity on musculoskeletal tissue and apply to exercise delivery to clients.
	4.8. Apply the effect of individual structural differences on exercise performance to the delivery of exercise programs for moderate risk clients.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to elicit and convey information to clients with musculoskeletal conditions to enable the delivery and modification of appropriate and effective exercise prescription
- problem-solving skills to;
  - identify adverse signs and symptoms requiring intervention and
  - unsafe exercise performance
  - recommend appropriate changes in consultation with an appropriate medical or allied health professional
- team work skills to work collaboratively with medical or allied health professionals according to legal and ethical considerations
- analytical skills to interpret information on the health and functional status of clients with musculoskeletal conditions in terms of their medical conditions, risk factors, medical treatments and exercise history
- decision making skills to determine appropriate instructional techniques
- literacy skills to accurately document and report on client progress.

© Commonwealth of Australia, 2025 HumanAbility

Required knowledge

- anatomy of the musculoskeletal system and its supporting systems
- function of the musculoskeletal systems to enable design of appropriate programs
- the pathology of musculoskeletal conditions and considerations in relation to the conditions of the client
- directional and movement terminology to enable effective communication with medical or allied health professionals
- range of motion and stretching techniques to enable the inclusion of exercise variables to suit client's functional capacity
- structural and physiological changes consistent with the pathology of disease states or conditions affecting the musculoskeletal system
- risk factors and contraindications associated with musculoskeletal conditions to enable the provision, monitoring and adjustment of safe and effective exercise
- effect of musculoskeletal conditions on the acute response to exercise to enable assessment of the individual's functional capacity when developing exercises
- categories of medications used to manage musculoskeletal conditions such as nonsteroidal anti-inflammatory drugs (NSAIDs) and their effects on the condition
- medical and anatomical terminology to interpret referrals from medical or allied health professionals
- relevant legislation and organisational policies and procedures to maintain the safety of clients and the confidentiality of client information
- causes and consequences of specific musculoskeletal considerations in the context of their effect on exercise capacity
- principles of biomechanics to enable the application of appropriate exercise techniques for specific fitness activities
- the role of physical activity in managing musculoskeletal conditions and enhancing health
- use, care and maintenance of facility equipment to maintain safety of clients and other facility users.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • communicates effectively with accredited exercise physiologist or relevant medical or allied health professional regarding health and functional status of

© Commonwealth of Australia, 2025 HumanAbility

	the referred client • effective communication skills to discuss aspects of exercise prescription with clients • when appropriate, react to adverse events to deal with exercise program problems and issues • ability to correctly interpret the exercise prescription and make modifications consistent with prescribed parameters and scope of practice • safely and effectively delivers exercise for referred clients with musculoskeletal conditions and recommends appropriate alterations according to client's physical and motivational responses • monitors and maintains the safety of clients, exercise equipment and the exercise setting and applies effective contingency management techniques to deal with problems and issues that may arise during the exercise program • applies all relevant legal and ethical requirements when discussing and recording client information • demonstrates appropriate manner, empathy and patience when working with clients
Context of and specific resources for assessment	Assessment must ensure demonstration of skills over a period of time within a facility where a variety of exercise modes and equipment are available to support effective musculoskeletal exercise. Assessment must also ensure access to: • facility where a variety of exercise modes and equipment are available, such as exercise machines, weight machines, exercise mats and adequate floor space • a range of clients with real or simulated musculoskeletal conditions from a range of ages • a range of real or simulated medical or allied health professionals referrals for a range of clients with musculoskeletal conditions and risk factors • demonstration of skills on sufficient occasions to determine competence in interpreting relevant information and delivering the prescribed exercise program for a range of clients with a range of musculoskeletal conditions • relevant documentation such as client record forms.

© Commonwealth of Australia, 2025 HumanAbility

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consulting with clients and adjusting standard exercise prescriptions in consultation with an appropriate medical or allied health professional, to account for a range of musculoskeletal conditions and risk factors to focus on functional capacity and health rather than physical fitness
- observation of dealing effectively with a range of contingencies such as real or simulated client injuries or inability to complete the exercise prescription
- oral and or written questioning to assess knowledge of the physiology of musculoskeletal conditions, medications and associated risk factors
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISFFIT523A Deliver prescribed exercise to clients with cardiorespiratory conditions

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Medical or allied health professional may include:

- sports physician
- sports doctor
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist
- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician

© Commonwealth of Australia, 2025 HumanAbility

	• psychologist • aboriginal health worker • diabetes educator.
Client may include:	• aged • sedentary • overweight • presenting with additional medical or psychological conditions (including trauma) • athletes.
Relevant legislation may include:	• Occupational Health and Safety • duty of care • privacy • codes of practice • fair trading.
Organisational policies and procedures may include:	• Occupational Health and Safety • emergency procedures • risk management • use of client record systems • collection and use of client information • equipment use and maintenance • client supervision • incident reporting • client screening procedures • client referral procedures.
Risk factors may include:	• family history • obesity • joint trauma and injury • menopause in females • repetitive occupational use • physical inactivity • eating disorders • low body weight and calcium intake • smoking.
Fitness assessment may include:	• cardiovascular response to exercise • range of movement • strength • girth measurements. • posture.
Muscular conditioning may include:	• muscular strength • muscular power • muscular endurance.

© Commonwealth of Australia, 2025 HumanAbility

Instructional techniques may include:	• establishing rapport • instructional position • demonstration and motivational strategies • positive feedback.
Exercise program may include:	• exercise selection, sequence and variety • logical progression • warm-up and cool-down • stretching.
Exercise equipment may include:	• cardiovascular equipment • resistance training machines: • hydraulic machines • aquatic equipment • resistance bands • free weights.
Monitor client responses may include:	• rating of perceived exertion (RPE) • heart rate measures • 'talk test' • possible fluctuations in blood glucose levels and dehydration.
Symptoms requiring interjection may include:	• shortness of breath at rest or with mild exertion • dizziness or syncope • orthopnea or paroxysmal nocturnal dyspnea • palpitations or tachycardia • intermittent claudication • unusual fatigue or shortness of breath with usual activities • illness or sickness • lack of functional strength • neck soreness or strain • pain on movement of any body part.
Procedures to respond to symptoms requiring interjection include:	• cessation and modification of activity • first aid • emergency medical assistance • referral.
Signs of unstable condition may include:	• fatigue and weakness • cardiac pain • breathlessness • oedema • palpitations • claudication pain • dizziness.

© Commonwealth of Australia, 2025 HumanAbility

Posture may include:

- static
- dynamic
- standing
- sitting
- supine
- specific observations of standing posture:
  - head and neck
  - thoracic spine
  - rib cage
  - shoulder position
  - scapula position
  - elbow position
  - lumbar spine
  - pelvis
  - abdominals
  - femur
  - knee
  - patella
  - foot position.

Postural variances may include:

- structural
- functional
- kyphosis
- rounded shoulders
- winging of scapula
- scoliosis
- increased lordosis
- decreased lordosis
- excessive posterior pelvic tilt
- excessive anterior pelvic tilt
- genu varum
- genu valgum
- increased pronation of foot and or ankle complex
- increased supination of foot and or ankle complex
- hyperextension of knees
- lateral tilt of pelvis
- lateral tilt of head.

Functional anatomy of the joints may include:

- glenohumeral
- bones:
  - humerus

© Commonwealth of Australia, 2025 HumanAbility

- scapula
- clavicle
- ligaments:
  - corocohumeral
  - corococlavicular
  - glenohumeral
  - transverse humeral
- related structures:
  - subscapular bursa
  - subacromial bursa
  - subdeltoid bursa
  - subcorocoid bursa
  - muscles acting on the joint
- elbow
- bones:
  - humerus
  - ulna
  - radius
- ligaments:
  - ulnar collateral
  - radial collateral
- related structures:
  - olecranon bursa
- muscles acting on the joint
- lumbo-sacral:
  - bones
  - 5th lumbar vertebrae
  - 1st vertebrae of sacrum
  - ligaments
  - muscles acting on the joint
- intervertebral:
  - bones
  - vertebral bodies:
    - ligaments
- muscles acting on the joint
- hip (coxal)
- bones:
  - femur
  - hip:
- ligaments:

© Commonwealth of Australia, 2025 HumanAbility

        - pubofemoral
        - iliofemoral
        - ischiofemoral
        - *transverse ligament of acetabulum*
        - *ligament of head of femur*
      - muscles acting on the joint
    - knee (tibiofemoral and or patellofemoral)
    - bones:
      - tibia
      - femur
      - patella
      - ligaments:
        - patella
        - oblique popliteal
        - arcuate popliteal
        - tibial collateral
        - fibular collateral
        - posterior cruciate
      - related structures:
        - tendons of the quadriceps femoris and facia latae
        - medial meniscus
        - lateral meniscus
        - prepatellar bursa
        - intrapatellar bursa
        - suprapatellar bursa
      - muscles acting on the joint
    - ankle (talocrucal):
      - bones:
        - talus
        - tibia
        - fibula
      - ligaments:
        - deltoid
        - anterior talofibial
        - posterior talofibial
        - calcaneofibular
      - related structures:
        - achilles tendon
    - muscles acting on the joint

© Commonwealth of Australia, 2025 HumanAbility

Major joints may include:

- intervertebral
- glenohumeral
- elbow
- radiocarpal
- sacroiliac
- hip (coxal)
- tibiofemoral
- patello-femoral
- ankle.

Joint movement may include:

- flexion
- extension
- dorsiflexion
- plantar flexion
- horizontal flexion
- horizontal extension
- abduction
- adduction
- circumduction
- rotation
- supination
- pronation
- inversion
- eversion
- protraction
- retraction
- elevation
- depression.

Muscles may include:

- erector spinae
- trapezius
- rectus abdominis
- internal obliques
- external obliques
- multifidus
- quadratus lumborum
- iliopsoas
- latissimus dorsi
- rhomboid major
- rhomboid minor
- pectoralis major
- pectoralis minor
- serratus anterior
- levator scapulae

© Commonwealth of Australia, 2025 HumanAbility

- teres major
- teres minor
- subscapularis
- supraspinatus
- infraspinatus
- gluteus maximus
- gluteus medius
- gluteus minimus
- pelvic floor
- iliotibial tract
- tensor fascia latae
- piriformis
- rectus femoris
- vastus lateralis
- vastus medialis
- vastus intermedius
- sartorius
- biceps femoris
- semitendinosus
- semimembranosus
- gastrocnemius
- soleus
- tibialis anterior
- adductor magnus
- adductor longus
- gracilis
- sartorius.

Musculoskeletal conditions may include:

- ostoepaenia
- sub acute soft tissue injury and or sprain and or strain
- osteoporosis
- epicondylitis
- tendonitis
- osteoarthritis
- repetitive strain injuries

Musculo-skeletal system may include:

- functions
- types of bones:
  - long
  - short
  - flat
  - irregular
- growth and development of long bones

© Commonwealth of Australia, 2025 HumanAbility

- structure of long bones
- classification of joints:
  - fibrous
  - cartilagenous
- synovial structure of a synovial joint:
  - bones
  - articular or hyaline cartilage
  - joint capsule
  - joint cavity
  - ligaments
  - synovial membrane
  - synovial fluid
  - bursae
  - meniscus
- connective tissue:
  - fascia
  - tendons
  - ligaments
- muscular system
- function of muscle tissue
- properties of muscle tissue:
  - excitability
  - contractility
  - extensibility
  - elasticity
- types of muscles:
  - smooth
  - cardiac
  - skeletal
- structure of skeletal muscle tissue:
  - muscle belly
  - tendon
  - fascicle
  - muscle fibre
  - myofibril
  - microscopic anatomy:
    - sarcomere
    - filaments
    - actin
    - myosin

© Commonwealth of Australia, 2025 HumanAbility

- tropomyosin
- troponin
- sarcolemma
- sarcoplasm
- sarcoplasmic reticulum
- T-tubules
- Z lines
- A band
- I band

- muscle contraction:
  - sliding filament theory
  - length-tension relationship
- attachments:
  - origin
  - insertion
- role of muscle contraction:
  - agonist
  - antagonist
  - fixator
  - synergist
- skeletal muscle fibre types:
  - slow twitch oxidative
  - fast twitch oxidative-glycolytic
  - fast twitch glycolytic
  - distribution and recruitment of different fibre types
- physiological adaptations due to training:
  - hypertrophy
  - increased strength
  - increased extensibility
- muscle actions of major muscles.

Moderate risk client may include:

- chronic disease state
- medical condition or injury
- under prescribed medication
- symptoms of cardiorespiratory disease
- moderate or high risk as identified by medical or allied health professional
- aged and sedentary
- musculoskeletal moderate risk includes:
  - history of injury to back or neck or joints or

© Commonwealth of Australia, 2025 HumanAbility

muscles of arms and legs requiring assessment and or treatment by a medical or allied health professional but is now fully resolved

- previous surgery to back or neck or joints or muscles of arms and legs
- recurrent injury
- injury to musculoskeletal system in the past 8 weeks even if it has resolved
- recent low level of physical activity
- hyper mobile

Unit Sector(s)

Fitness

SISFFIT527A Undertake health promotion activities to decrease risk factors and prevent chronic disease

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and deliver exercise to promote general health and well-being, and decrease risk factors and chronic disease. The unit outlines appropriate exercise levels within the context of public health recommendations on physical activity.

Application of the Unit

This unit applies to specialised exercise trainers operating within fitness or health environments such as fitness centres, community and workplace settings, health clubs, gyms or autonomously in the fitness or health industry.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Explain and apply current recommendations regarding the type and amount of physical activity to promote health, reduce risk factors and prevent ***chronic disease and disability*** among adults.	1.1. Identify major causes of disease and disability among adults, and explain to the client ***the role of physical activity in health and disease prevention***. 1.2. Identify and explain to the client the mechanisms by which exercise may lower risk of ***chronic lifestyle disease or disability***. 1.3. Identify major cardiovascular disease ***risk factors*** and the recommended clinical values for each, and explain to the client to what extent each is affected by exercise. 1.4. Identify and apply ***current recommendations regarding physical activity*** for disease prevention in adults. 1.5. Identify and explain to the client the appropriate ***exercise variables*** recommended to achieve a beneficial change in risk factors and disease prevention. 1.6. Explain to the client the different roles of cardiovascular conditioning and muscular conditioning in enhancing general health and for preventing specific diseases or conditions. 1.7. Reinforce the need to undertake additional ***lifestyle modifications*** to improve health.
2. Plan and develop a physical activity intervention to improve and promote the health status of a population group, ***sub-group*** or individual.	2.1. Access relevant sources of information to determine health problems of target group and the established causes of the health problem. 2.2. Locate and critically evaluate effectiveness of other health promotion interventions to develop an evidence based approach that would cause beneficial change in health status of the target group. 2.3. Obtain information about the level of physical activity currently undertaken by participants using an appropriate ***method of measuring physical activity*** and determine whether current physical activity level is sufficient to gain health benefits. 2.4. Collect information about current health problems or concerns, lifestyle and other ***factors affecting participation in physical activity***. 2.5. Design a multifaceted approach to ***health***

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	promotion activities including education and skill building.
	2.6. Demonstrate recognition of and support for the importance of access and equity in the provision of physical activity interventions.
	2.7. Ensure intervention addresses identified client barriers to participation.
3. Implement physical activity intervention in an appropriate ***setting***.	3.1. Conduct appropriate health and fitness assessments to establish baseline measures and monitor client progress.
	3.2. Fully explain intervention strategies to participants.
	3.3. Provide additional support materials and assist client to access additional ***sources of relevant information*** to improve health status.
	3.4. Implement motivational strategies to encourage behaviour change and exercise adherence based on ***behaviour change models*** and determinants of exercise adherence.
	3.5. Monitor ***client's physiological responses*** during activity sessions and make appropriate adjustments to exercise variables as required to ensure client safety.
	3.6. Maintain ***records*** of relevant documentation in accordance with relevant legislation, and organisational policy and procedure.
4. Deliver education and training activities to promote good health and support physical activity strategies.	4.1. Conduct health promotion and education activities relating to aspects of physical activity, diet and lifestyle that directly effect the reduction of ***risk factors*** and prevention of chronic disease.
	4.2. Ensure health promotion and education activities support clients to take a self-care approach to health in line with individual needs.
	4.3. Recognise clients that may need further assistance from medical or allied health professionals and organise referral.
	4.4. Re-administer questionnaires relating to exercise behaviour and health status to determine changes in behaviour.
5. Evaluate effectiveness of intervention.	5.1. Obtain feedback from participants about the effectiveness of the physical activity sessions and other ***health promotion activities*** conducted.
	5.2. Ascertain level of compliance and comfort with

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	recommended strategies. 5.3. Identify any obstacles or problems for future reference.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills appropriate to educating clients about health benefits of physical activity in relation to management of risk factors and prevention of disease, and delivering health promotion activities
- problem-solving skills to identify specific client group needs and match health promotion activities to meet these needs
- team work skills to work collaboratively with team members and relevant partners to implement effective health promotion activities
- literacy and numeracy skills to:
  - develop supporting resources,
  - locate and access evidence based research
  - ensure accurate documentation is maintained

Required knowledge

- major causes of disease and disability in Australian adults
- major risk factors for disease, the recommended clinical values for each, the role of physical activity as a risk factor and its effect on other risk factors
- factors affecting health and well-being
- social determinants of health
- national health priority areas
- burden of disease and burden attributable to risk factors
- role of physical activity in the prevention and management of disease and disability
- methods used to measure physical activity
- determinants of physical activity, barriers to participation
- risk stratification according to the American College of Sports Medicine definitions
- effects of physical activity on risk factors and risk of disease
- roles of cardio-respiratory and muscular conditioning in altering risk factors for disease
- current Australian and overseas recommendations for physical activity for health and disease prevention
- factors motivating adults to be physically active and influencing adherence to physical activity

© Commonwealth of Australia, 2025 HumanAbility

- signs and symptoms of untoward event that may occur during exercise
- behavioural change models, interventions and strategies to effect a behaviour change
- health promotion practice and principles.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • demonstrates understanding and application of current exercise recommendations to promote health, reduce risk factors and prevent chronic lifestyle disease • designs, implements and evaluates health promotion activities to improve the health status of groups or individuals • uses effective communication strategies to lead and instruct physical activity sessions, and to deliver education and training activities to promote good health • monitors and maintains the safety of participants, exercise equipment and the exercise setting when delivering health promotion interventions • provides appropriate motivational strategies to effect a positive behaviour change in participants
Context of and specific resources for assessment	Assessment must ensure demonstration of skills over a period of time within a setting where a variety of exercise modes and equipment are available to deliver physical activity sessions Assessment must also ensure access to: • a range of clients from a range of ages who do not meet the minimum level of physical activity to gain health benefit • a suitable setting for the implementation of a physical activity intervention • relevant documentation such as client health screening forms, physical activity logs or questionnaires, other record forms

© Commonwealth of Australia, 2025 HumanAbility

- demonstration of skills on sufficient occasions to determine competence in interpreting relevant client information, and designing, delivering and evaluating health promotion activities to promote health, reduce risk factors and prevent chronic disease.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the delivery of health promotion activities including physical activity sessions
- written plans of physical activity intervention strategies
- samples of health promotion materials, client records and support materials
- observation of dealing effectively with a range of contingencies such a range of clients with varied risk factors or health conditions
- oral or written questioning to assess knowledge of the relationship between physical activity and chronic disease, behaviour change principles, exercise recommendations and health promotion principles
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISIND405A Conduct projects
- SISFFIT523A Deliver prescribed exercise to clients with cardiorespiratory conditions
- SISFFIT524A Deliver prescribed exercise to clients with metabolic conditions

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Role of physical activity in health and disease prevention may

- major causes of disease and disability in Australian adults:

© Commonwealth of Australia, 2025 HumanAbility

include:

- effects of physical activity in prevention
- effects of physical activity in management of disease and disability
- mechanisms by which physical activity alters disease risk
- answer questions by clients about health benefits of physical activity.

Chronic lifestyle disease or disability may include:

- hypertension
- type 2 diabetes
- obesity
- cardiovascular disease
- dislipidemia
- musculoskeletal conditions
- mental health problems
- asthma
- chronic obstructive pulmonary disease
- osteoporosis
- sarcopenia.

Risk factors may include:

- family history
- smoking
- hypertension
- hypercholesterolaemia
- impaired fasting glucose
- obesity
- sedentary lifestyle
- alcohol
- dietary imbalances
- age
- co-morbidities.

Current recommendations regarding physical activity may include:

- position statements and recommendations by recognised bodies
- national physical activity guidelines
- evidence based research.

Exercise variables may include:

- mode
- intensity
- frequency
- duration.

Lifestyle modifications may include:

- moderation of alcohol consumption
- cessation of smoking
- increased incidental activity
- stress reduction
- provision of health eating guidelines

© Commonwealth of Australia, 2025 HumanAbility

- provision of healthier choices.

Methods of measuring physical activity may include:

- diary
- log
- recall
- self report
- direct observation
- pedometer
- accelerometer
- calorimetry.

Factors affecting participation in physical activity may include:

- personal factors
- social factors
- environmental factors
- cultural factors
- education factors.

Health promotion activities may include:

- population approaches
- individual approaches.

Sources of relevant information may include:

- state , national and international support organisations
- books
- journals
- internet sites
- research studies
- medical and allied health professionals.

Behavioural change models may include:

- health belief model
- protection motivation theory
- theory of reasoned action
- theory of planned behaviour
- social cognitive model
- self efficacy
- trans-theoretical model

Client physiological responses may include:

- heart rate
- rating of perceived exertion (RPE)
- 'talk test'
- direct observation.

Records may include:

- electronic
- hand written
- questionnaires
- pre-exercise screening forms
- medical clearance and referral
- physical activity recall
- exercise programming cards

© Commonwealth of Australia, 2025 HumanAbility

- diaries
- attendance records.

Risk factors may include:

- family history
- smoking
- hypertension
- hypercholesterolaemia
- impaired fasting glucose
- obesity
- sedentary lifestyle
- alcohol
- dietary imbalances
- age
- co-morbidities.

Health promotion strategies may include:

- screening, individual risk factor assessment
- education and skill development
- social marketing
- health information
- environmental approaches
- public policy
- workforce initiatives
- community action
- settings and supportive environments.

Factors motivating adults to be physically active and influencing exercise adherence may include:

- client need and preference for:
  - moderate activity
  - social interaction
  - non-competitive setting
  - non-judgmental interactions and instruction
  - activity specifically addressing health concerns and risks
- barriers to participation:
  - perceived versus actual
  - initial low fitness level
  - time
  - access
  - health risks and concerns
  - peer and family support
- possibly overweight.

Population sub-groups considered 'at risk' may include:

- a group identified through statistics to be less likely to be physically active or able to access or afford programs or facilities that encourage active participation

© Commonwealth of Australia, 2025 HumanAbility

	• young adolescents • people with chronic disease or disability • indigenous Australians • people from non-English speaking backgrounds • older adults • women especially mothers with young children • middle age • adults with low education and or low socio-economic status.
Settings for health promotion interventions may include:	• worksites • schools • community based • health.
Determinants of physical activity may include:	• demographic or biological variables • psychological factors • socio-cultural factors • physical environmental factors • behavioural attributes or skills • physical activity characteristics.

SISFFIT528A Apply research findings to exercise management strategies

Modification History

Not Applicable

Unit Descriptor

This unit of competency describes the skills and knowledge required to source and evaluate evidence based research information and apply findings to the prescription of exercise management strategies to support the long and short term goals of clients with various identified medical conditions or musculoskeletal needs.

Application of the Unit

This unit applies to specialised exercise trainers operating within fitness or health environments such as fitness centres, health clubs, gyms or autonomously in the fitness or health industry.

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	statement. Assessment of performance is to be consistent with the evidence guide.
1. Identify information needs	1.1. Work with an awareness of the need for evidence based practice in exercise management. 1.2. Become familiar with the medical condition or health concern of the target client group being managed. 1.3. Become familiar with health and medical information needs.
2. Access research literature.	2.1. Undertake literature searches. 2.2. Identify ***relevant primary and secondary sources*** of information. 2.3. Recognise ***established and reputable sources of information***. 2.4. Assess currency of ***information***. 2.5. Collect and collate information.
3. Evaluate information.	3.1. Establish relevance of information to exercise management. 3.2. Critically appraise information accessed in terms of ***reliability*** and ***applicability***. 3.3. Extract relevant information. 3.4. Correlate information findings with individual client information.
4. Apply information to the development of exercise management strategies.	4.1. Apply information to modification of exercise programs to meet the long and short term goals of clients. 4.2. Integrate information findings with existing exercise programming.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - transfer information through written or verbal media
  - question clients and medical and allied health professionals
- problem-solving skills to:

© Commonwealth of Australia, 2025 HumanAbility

  - identify information needs and plan information-gathering strategies
  - critically evaluate information with regard to validity and credibility
  - prioritise usefulness of information to exercise situation
- literacy and research skills to:
  - identify a range of primary, secondary, new and established information sources
  - access and interpret current information and relevant reference works
  - critically evaluate reference material
- numeracy skills to:
  - recognise statistical terminology and understand the significance of common statistical analysis.

Required knowledge

- up-to-date information on relevant research
- research priorities
- research strategies and techniques
- recent issues and events affecting the industry
- issues and their application
- relevant reference works and information sources
- statistical analysis and methods
- research methodologies commonly used in research
- common terminology used in medical, allied health and complementary medicine research.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • understanding of the research process as it relates to accessing current relevant information to deliver exercise management strategies for clients with identified medical conditions or musculoskeletal needs. • ability to critical review and interpret research literature • ability to apply research information to the modification of exercise programs to meet the long

© Commonwealth of Australia, 2025 HumanAbility

and short term goals of clients.

Context of and specific resources for assessment	Assessment must ensure the identification of client needs relevant to the candidate's current or intended work environment and the development of customised solutions to demonstrate consistency of performance. Assessment must also ensure access to: • relevant databases to locate research literature • relevant texts, manuals or research papers • relevant journals • access to internet or on-line research information • exercise programs for a range of clients • a range of clients with a real or simulated range of long and short term health goals.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of • oral and or written questioning to assess knowledge of • third-party reports from a supervisor detailing appropriate work performed by the candidate. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant primary and secondary sources may include:	• clinical research studies • peer reviewed medical and allied health journals • peer reviewed complementary medicine journals • reference texts • peer reviewed conference presentations • other journals

© Commonwealth of Australia, 2025 HumanAbility

- abstracts
- popular media (magazines, newsletters, books)
- other conferences and presentations
- internet.

Information may include:

- exercise recommendations
- recommendations for screening
- staff qualifications
- emergency policies related to safety
- contraindications
- information on pathology of specific conditions and or diseases
- information on latest treatment pathology options for specific conditions and or diseases
- research data on exercise recommendations relevant to specific conditions and or diseases
- clinical information to assist in meeting specific client health outcomes.

Established and reputable information sources may include:

- Sports Medicine Australia
- Australian Physiotherapy Association
- National Heart Foundation
- Dieticians Association of Australia
- Exercise and Sports Science Australia
- American College of Sports Medicine
- American Heart Association
- clinical texts
- reference works
- recognised teachings.

Reliability may include:

- The logical soundness of method, results and conclusions drawn by authors.

Applicability may include:

- The extent to which the finding could extend to, or be replicated, in other groups - particularly the group being targeted.

Research literature may include:

- reports
- research studies
- position statements
- position stands
- scientific review
- epidemiological observation studies
- cohort studies
- controlled trials.

Relevant sources of information may include:

- books
- journals

© Commonwealth of Australia, 2025 HumanAbility

	• surveys • annual public health reports • existing epidemiological and or socio-demographic data.
Evaluate may include:	• establish the validity and credibility • establish relevance to meeting information needs • assess the level of industry recognition • assess usefulness • check references.
Implement may include:	• Include new findings in exercise management strategies • Use information to reassess exercise management strategies.

SISFFIT529A Deliver prescribed exercise to clients with a disability or neurological impairment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required assist in the delivery of exercise programs to referred clients with a disability or neurological impairment who present with only moderate risk of untoward event or exacerbation of impairment during exercise, in collaboration with the relevant medical or allied health professionals.

Application of the Unit

This unit applies to specialised exercise trainers, whose clients have been provided an exercise prescription from an accredited exercise physiologist or relevant medical or allied health professional.

The specialised exercise trainer applies the understanding and skills to deliver the program and modify the program in terms of frequency, mode, intensity and volume to accommodate the progression of the client within the parameters prescribed by the accredited exercise physiologist or a relevant medical or allied health professional.

They apply self directed application of knowledge and skills related to neurological impairment or disability, and exercise judgment in delivering the prescribed exercise. The specialised exercise trainer demonstrates the ability to analyse the clients responses to exercise and where appropriate consult with the accredited exercise physiologist or relevant medical or allied health professional.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Consult with clients presenting with neurological impairment.	1.1. Receive exercise referral from a relevant ***medical or allied health professional***. 1.2. Confirm exercise referral has sufficient detail to allow flexibility for modifications to accommodate progression of the client. 1.3. Become familiar with typical adverse signs and symptoms that may arise during exercise for clients with ***neurological impairment or disability***. 1.4. Consult with an appropriate ***medical or allied health professional*** as necessary. 1.5. Discuss with the client their complete exercise history and their neurological impairment and record relevant information according to ***relevant legislation*** and ***organisational policies and procedures***. 1.6. Explain to the client the different roles of cardiovascular and ***muscular conditioning***, and the reasons for their inclusion in the exercise prescription. 1.7. Confirm the outcomes of a ***goals and needs analysis*** in collaboration with the client and the ***medical or allied health professional*** if appropriate. 1.8. Explain to the client their need to be referred back to a medical or allied health professional if their condition becomes unstable. 1.9. Identify any potential barriers to exercise and discuss ***methods to enhance exercise adherence*** with the client.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.10. Clarify any areas of concern with the referring ***accredited exercise physiologist or relevant medical or allied health professional***, in conjunction with the client.
	1.11. Obtain the informed consent of the client and maintain the client's ***records*** according to ***relevant legislation*** and ***organisational policies and procedures***.
2. Consult with clients presenting with disabilities.	2.1. Receive exercise referral from medical and allied health professional if applicable or undertake pre-exercise screening with client.
	2.2. Interpret referral and ***pre-exercise screening*** and seek clarification from medical or allied health professional.
	2.3. Discuss with the client their complete exercise history and condition and record relevant information according to relevant legislation and organisational policies and procedures.
	2.4. Explain to the client the role and benefits of physical activity in managing ***disabilities*** and enhancing health.
3. Deliver prescribed exercise programs.	3.1. Undertake appropriate ***fitness assessment*** as required.
	3.2. Work with ***medical or allied health professional*** to deliver an exercise plan in accordance with recognised exercise recommendations, fitness test results, client limitations, and potential interactions of medications.
	3.3. Explain to the client the different roles of cardiorespiratory and ***muscular conditioning***, and the reasons for their inclusion as part of the client's exercise prescription.
	3.4. Explain to the client the exercise variables to be implemented in the context of managing their specific cardiorespiratory conditions.
	3.5. Apply ***instructional techniques*** to ensure safe and appropriate application of the ***exercise program*** by the client.
	3.6. Demonstrate the safe and appropriate use of selected ***exercise equipment*** and report or address any unsafe equipment according to organisational policies and procedures.
4. Monitor and review	4.1. Monitor perceived exercise intensity and make

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
clients responses to the prescribed exercise program.	adjustment as required. 4.2. Assess the client's performance and explain and correct any unsafe exercise procedures. 4.3. ***Monitor client responses*** for any typical signs and ***symptoms requiring intervention*** that may occur during exercise. 4.4. Apply ***procedures to respond to signs and symptoms requiring intervention*** as required according to relevant legislation and organisational policies and procedures. 4.5. Recognise ***signs of an unstable condition*** and refer the client back to an appropriate ***medical or allied health professional***. 4.6. Monitor progress and report outcomes to the client. 4.7. Revise the client's record and advise the referral source of suggested changes to the exercise program if required.
5. Provide advice regarding additional ***lifestyle modifications*** to enhance the management of the disability or neurological impairment.	5.1. Obtain information about the client's current lifestyle. 5.2. Discuss possible barriers to behaviour change and implementation of healthy eating practices. 5.3. Provide information about the fundamental features of balanced nutrition and recommend modifications to dietary intake to improve general health and reduce the risk of cardiovascular disease. 5.4. Recommend other lifestyles changes to improve current disease status.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - elicit and convey information to clients with neurological conditions or disabilities
  - develop rapport with clients
  - clarify potential risks and concerns with treating medical or allied health professionals
- Problem-solving skills to identify adverse signs and symptoms requiring

© Commonwealth of Australia, 2025 HumanAbility

intervention and unsafe exercise performance and to recommend appropriate changes in consultation with an appropriate medical or allied health professional
- teamwork skills to work collaboratively with medical and allied health professionals according to all legal and ethical considerations
- decision making skills to determine suitable exercise selection and progression
- analytical skills to interpret information on the health and functional status of clients with disabilities or neurological impairments in terms of their medical conditions, risk factors, medical treatments and exercise history
- literacy and numeracy skills to enable the accurate interpretation of referrals and to record client exercise programs and calculate and adjust exercise duration and frequency.
- decision making skills to determine appropriate instructional techniques.
- literacy skills to accurately document and report on client progress.

Required knowledge

- physical and cognitive consequences of common neurological impairments likely to be encountered in the exercise setting including:
  - cerebral palsy
  - multiple sclerosis
  - Parkinson's disease
  - spinal cord injury
  - acquired brain injury
  - stroke
  - dementia
  - muscular dystrophy
  - autism spectrum disorder
- effect of neurological conditions on the acute response to exercise to enable assessment of the individual's functional capacity when developing exercises
- anatomy and physiology of the musculoskeletal system and its supporting systems to enable appropriate design of exercise programs
- nervous system and its relationship to movement
- digestive system and its relationship to exercise performance
- physiology of specific disabilities and associated risk factors in relation to exercise to enable safe and effective exercise outcomes
- causes and consequences of specific disabilities in the context of their effect on exercise capacity and the role of physical activity in managing disability and enhancing health
- directional and movement terminology to enable effective communication with medical and allied health professionals
- range of motion and stretching techniques to enable the inclusion of exercise variables to suit client's functional capacity
- the role of physical activity in improving functionality in clients with neurological conditions
- relevant legislation and organisational policies and procedures to maintain the

© Commonwealth of Australia, 2025 HumanAbility

safety of clients and the confidentiality of client information
- use, care and maintenance of facility equipment to maintain safety of clients and other facility users.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • communicates effectively with medical or allied health professionals regarding relevant health and functional status of the referred client • effective communication skills to discuss aspects of exercise prescription with clients • when appropriate, react to adverse events to deal with exercise program problems and issues • ability to correctly interpret the exercise prescription and make modifications consistent with prescribed parameters and scope of practice • safely and effectively delivers exercise for referred clients with disabilities and neurological impairment and recommends appropriate alterations according to client's physical and motivational responses • monitors and maintains the safety of clients, exercise equipment and the exercise setting and applies effective contingency management techniques to deal with problems and issues that may arise during the exercise program • applies all relevant legal and ethical requirements when discussing and recording client information • demonstrates appropriate manner, empathy and patience when working with clients with disabilities and neurological impairment
Context of and specific resources for assessment	Assessment must ensure demonstration of skills over a period of time within a facility where a variety of exercise modes and equipment are available to support effective exercise for clients with disabilities and neurological impairment. Assessment must also ensure access to:

© Commonwealth of Australia, 2025 HumanAbility

- a facility where a variety of exercise modes and equipment are available, such as exercise machines, weight machines, exercise mats and adequate floor space
- a range of clients with real or simulated neurological impairment from a range of ages
- a range of clients with real or simulated disability from a range of ages
- a range of real or simulated medical and allied health professional referrals for a range of clients with neurological impairment
- demonstration of skills on sufficient occasions to determine competence in interpreting relevant information and delivering the prescribed exercise program for a range of clients with disabilities and neurological impairment.
- relevant documentation such as client record forms.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of consulting with clients and adjusting standard exercise prescriptions to account for a range of neurological impairments, disabilities and risk factors to focus on functional capacity and health rather than physical fitness
- observation of dealing effectively with a range of contingencies such as real or simulated client injuries or inability to complete the exercise prescription
- oral and or written questioning to assess knowledge of physical and cognitive consequences of common neurological impairments and disabilities likely to be encountered in the exercise setting
- third-party reports from a supervisor detailing work performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

© Commonwealth of Australia, 2025 HumanAbility

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Medical or allied health professional may include:	• sports physician • sports doctor • general practitioner • physiotherapist • accredited exercise physiologist • occupational therapist • remedial massage therapist • chiropractor • osteopath • accredited practising dietician • podiatrist • psychologist • aboriginal health worker.
Client may include:	• older • sedentary • overweight or obese.
Neurological impairment may include:	• cerebral palsy • acquired brain injury • stroke • Parkinson's disease • multiple sclerosis • spinal cord injury • dementia • autism spectrum disorder • muscular dystrophy • spasticity.
Disability may include:	• intellectual • physical • neurological • sensory.
Relevant legislation may include:	• Occupational Health and Safety • duty of care • privacy • codes of practice • fair trading.
Organisational policies and procedures may include:	• Occupational Health and Safety • emergency procedures • risk management • use of client record systems

© Commonwealth of Australia, 2025 HumanAbility

	• collection and use of client information • equipment use and maintenance • client supervision • incident reporting • client screening procedures • client referral procedures.
Muscular conditioning may include:	• muscular strength • muscular power • muscular endurance
Goals and needs analysis may include:	• timeframes • appropriate exercise program adjustments • barriers • motivation.
Barriers may include:	• physical access • client attitude • perceived limitations.
Methods to enhance exercise adherence may include:	• rewards for attendance and participation • statement of intent • perceived choice • goal setting.
Records may include:	• electronic • hand written.
Pre-exercise screening may include:	• medical clearance • current client condition • medical and exercise history • functional limitations • medication • fitness goals • time availability.

Disabilities may include:	• *paraplegic*
	• *quadriplegic*
	• *visually impaired*
	• *hearing impaired*
	• *cerebral palsy*
	• *chromosomal abnormalities*:
	  • *down syndrome*
	  • *turner syndrome*
	• *chronic pain*
	• *brain injury*
	• *amputee*
	• *intellectual disabilities*

© Commonwealth of Australia, 2025 HumanAbility

	• *stroke* • *muscular dystrophy* • *joint replacement*.
Fitness assessment may include:	• neurological or relevant disability response to exercise • range of movement • strength • girth measurements • posture.
Instructional techniques may include:	• demonstration • explanation • positive feedback • motivational strategies.
Exercise program may include:	• exercise selection • exercise sequence • exercise variety.
Exercise equipment may include:	• free weight equipment • resistance training machines • hydraulic machines • aquatic equipment • resistance bands.
Monitor client responses may include:	• rating of perceived exertion (RPE) • heart rate measures • 'talk test' • direct observation.
Symptoms requiring intervention may include:	• shortness of breath at rest or with mild exertion • dizziness or syncope • unusual fatigue • illness or sickness • weakness • neck pain or strain • pain on movement of any body part.
Procedures to respond to signs and symptoms requiring intervention may include:	• cessation of activity • first aid • emergency medical assistance • referral.
Signs of an unstable condition may include:	• fatigue and weakness • cardiac pain • breathlessness • oedema • palpitations

© Commonwealth of Australia, 2025 HumanAbility

- claudication pain
- dizziness.

Lifestyle modifications may include:

- moderation of alcohol consumption
- cessation of smoking
- increased incidental activity
- stress reduction
- provision of health eating guidelines
- provision of healthier choices.

Alterations to the exercise variables may include:

- duration
- frequency
- intensity.

Pre-exercise screening may include:

- initial screening may consist of:
  - *questionnaire*
  - *interview*
  - *medical clearance*
- initial screening should determine whether the client:
  - *has a medical condition*
  - *has an injury*
  - *is on prescribed medication*
- forms used:
  - *pre-activity screening questionnaire*
  - *informed consent*
  - *medical clearance*
- information obtained:
  - *medical history*
  - *functional limitations*
  - *medication*
  - *lifestyle evaluation*
  - *fitness goals*
  - *exercise history*
  - *time* availability.

SISFFIT530A Deliver prescribed exercise to children and young adolescents with specific chronic conditions

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge to deliver exercise programs to children and young adolescents who present with risk of an adverse event or exacerbation of impairment during exercise, in collaboration with relevant medical or allied health professionals.

Application of the Unit

This unit applies to specialised exercise trainers whose clients have one or more specific but stable chronic conditions. A chronic medical condition is usually a condition in which the signs and symptoms related to that condition last more than three months. Common paediatric chronic medical conditions include, but are not restricted to, metabolic and endocrine, musculo-skeletal, respiratory, sensory impairment and neurological. This unit excludes clients with congenital cardiac disorders and some cardiorespiratory conditions.

The specialised exercise trainer demonstrates the ability to analyse the clients responses to exercise and where appropriate consult with the medical or allied health professional.

The specialised exercise trainer applies the understanding and skills to deliver and modify the program in terms of mode, frequency, intensity and volume to accommodate the progression of the client within the parameters prescribed by the medical or allied health professional.

They apply self directed application of knowledge and skills related to chronic conditions of children and young adolescents, and exercise judgment in delivering the prescribed exercise. The specialised exercise trainer demonstrates the ability to analyse the clients responses to exercise and where appropriate consult with the medical or allied health professional.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

SISFFIT313A Plan and deliver exercise to apparently health children and adolescents

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Apply pre-screening and baseline assessment protocols and procedures to children and young adolescents.	1.1. Demonstrate the appropriate ***pre-screening*** required to determine the needs of ***children and young adolescents*** to participate in an ***exercise program*** in accordance with ***organisation policies and procedures***. 1.2. Recommend advice be sought from a ***medical or allied health professional*** based on any health, nutritional or dietary disorder, or medical or injury concerns according to organisational policies and procedures. 1.3. Provide advice for participants and their parents or guardian when referrals are required following appropriate pre-screening procedures. 1.4. Plan and develop physical activity sessions based on results of pre-screening procedures. 1.5. Demonstrate appropriate ***baseline assessment*** protocols for children and young adolescents with special needs prior to participation in an exercise program in accordance with organisation policies and procedures.
2. Develop a plan for an exercise session for children and young adolescents with special needs.	2.1. Identify prevailing conditions of children and young adolescents and establish ***client needs***. 2.2. Become familiar with typical adverse signs and symptoms that may arise during exercise for children and young adolescents with ***specific chronic medical conditions***. 2.3. Consult with an appropriate ***medical or allied health professional*** as necessary. 2.4. Work with ***medical or allied health professionals*** to document

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	exercise ***session plans*** for a variety of exercise programs for children and young adolescents with specific chronic medical conditions in accordance with recognised exercise recommendations, fitness test results, client limitations, and potential interactions of medications.
	2.5. Explain to the children and young adolescents and their caregivers their need to be referred back to a medical or allied health professional if their condition becomes unstable.
3. Instruct an exercise session for children and young adolescents with special needs.	3.1. Outline the purpose of the exercise session to participants including the benefits of exercise for children and young adolescents with specific chronic medical conditions.
	3.2. Deliver appropriate ***instructional skills*** for the client group.
	3.3. Select and modify appropriate equipment for safe use according to the prevailing needs of children and young adolescents with specific chronic medical conditions.
	3.4. Demonstrate the safe and appropriate use of selected ***exercise equipment*** and report or address any unsafe equipment according to organisational policies and procedures.
	3.5. Deliver exercise sessions suitable to the needs and goals of the client group.
	3.6. Demonstrate how ***modifications*** to the exercise can incorporate the different needs of ***children and young adolescents***.
	3.7. Demonstrate ***motivational techniques*** providing positive and effective feedback to the client group.
	3.8. Implement strategies to promote positive behaviour.
	3.9. Monitor client responses for any typical signs and ***symptoms requiring intervention*** that may occur during exercise.
	3.10. Apply ***procedures to respond to adverse signs and symptoms requiring intervention*** as required according to relevant legislation and organisational policies and procedures.
	3.11. Recognise ***signs of an unstable medical condition*** and refer the client back to an appropriate ***medical or allied health professional***.
4. Review a range of exercise programs for children and young adolescents with special needs.	4.1. Critically evaluate a series of exercise sessions for children and young adolescents with special needs according to feedback received from participants and parents, carers or guardians.
	4.2. Produce a ***written evaluation*** assessing observations.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to provide clear instruction and constructive feedback to children, young adolescents, parents, guardians or caregivers, medical or allied health professionals
- problem-solving skills to:
  - identify exercises targeted to specific fitness components and to make modifications where required
  - recognise conditions outside own scope of practice and make appropriate referral to medical or allied health professionals
- planning and organising skills to deliver the exercise session including accessing all required equipment
- team work skills to work collaboratively with medical or allied health professionals according to legal and ethical condition.
- literacy and numeracy skills to enable:
  - the accurate interpretation of referrals and to
  - document exercise sessions and calculate and
  - adjust exercise duration and frequency.
- manage the time of sessions and facility schedules
- decision making skills to select venues appropriate for the physical and social needs of children and young adolescents and determine appropriate instructional techniques
- ability to adapt to the inclusion of children with specific chronic medical conditions in normal sessions where appropriate.

Required knowledge

- the medical and allied health sector to enable appropriate recommendations to be made to parents, guardians or care givers
- principles of biomechanics and exercise science to enable the selection of exercises appropriate to participant characteristics and needs
- stages of physical, social and cognitive growth and development in children and young adolescents to enable effective planning of programs
- principles of exercise program design to enable development of exercise sessions for specific age groups or development stages of children and adolescents
- medical and anatomical terminology to interpret referrals from medical or allied health professionals
- motivational psychology to enable identification and mitigation of barriers to exercise adherence
- relevant legislation and organisational policies and procedures to enable safe and appropriate conduct of exercise for children and young adolescents and to maintain the confidentiality of client information.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • screens children and young adolescents with specific chronic medical conditions needs prior to commencement of physical activity sessions and communicates results to relevant caregivers and recommends referral to appropriate medical or allied health professionals where necessary • develops a variety of physical activity sessions for a range of client groups of children and young adolescents with specific chronic medical conditions • monitors and maintains the safety of clients, exercise equipment and the exercise setting and applies effective contingency management techniques to deal with problems and issues that may arise during the exercise program. • communicates effectively to provide clear instruction and constructive feedback to a range of children and young adolescents, caregivers, medical and allied health professionals • demonstrates appropriate manner, empathy and patience when working with children and young adolescents. • modifies individual exercises to accommodate the specific chronic medical conditions of the client group • evaluates exercise sessions and modifies exercise plans according to feedback received from participants, relevant medical and allied health professionals and own evaluation.
Context of and specific resources for assessment	Assessment must ensure training of multiple exercise sessions that are of sufficient duration and breadth to allow the demonstration of competency and consistency of performance. Assessment must also ensure access to: • a facility where a variety of exercise modes and equipment are available, such as a weights gym, exercise room or outdoors • relevant resources; for example, nutritional

© Commonwealth of Australia, 2025 HumanAbility

information prepared by dieticians for a range of ages
- appropriate documentation normally used in the workplace such as fitness charts, client record forms and assessment questionnaires
- a range of participant groups composed of children and young adolescents with specific medical conditions.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of instructing and monitoring exercise sessions for children and young adolescents
- oral or written questioning to assess knowledge of stages of development and growth in children and young adolescents and how these relate to effective exercise planning
- portfolio of plans for physical activity sessions for different age groups, covering a range of specific medical conditions.
- third-party reports from a supervisor detailing work performance.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Pre-exercise screening may include:

- medical history
- functional limitations
- medication
- lifestyle evaluation
- fitness goals
- exercise history
- questionnaire
- interview.

Children and young adolescents may include:

- children:
  - aged between 3 - 5 years
  - aged between 5 - 9 years

© Commonwealth of Australia, 2025 HumanAbility

- young adolescents:
  - aged between 9 - 16 years.

Exercise programs may include:

- cardio-vascular exercise for age variations
- resistance training
- flexibility
- fundamental motor skills.

Organisational policies and procedures may include:

- Occupational Health and Safety
- emergency procedures
- risk management
- use of client record systems
- collection and use of client information
- equipment use and maintenance
- client supervision
- incident reporting
- client screening procedures
- client referral procedures
- ethical considerations in assessing children
- child protection

Medical or allied health professional may include:

- sports medicine physician
- staff specialist
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist
- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician
- psychologist
- aboriginal health worker
- diabetes educator.

Baseline assessment may include:

- cardio-vascular
- strength
- agility
- flexibility
- fundamental motor skills.

Client needs may include:

- consideration of adaptations by children with specific medical conditions to physical activity programs
- methods of instruction
- time delivery to achieve outcomes

© Commonwealth of Australia, 2025 HumanAbility

- changes to environment and or spaces
- adaptation and modification of equipment
- modification to rules.

Specific chronic medical conditions may include:

- musculoskeletal issues
- sensory impairment
- eating disorders
- metabolic and endocrine conditions
- physical disabilities
- neurological disorders
- respiratory conditions
- mental health.

Session plans may include:

- exercise selection
- identification of client needs and goals
- components of the session
- order and or sequence of physical activities
- duration and or intensity of exercise
- safety considerations
- instructional skills
- equipment selection
- suggested progression within the physical activity
- special consideration to accommodate the different needs and limitations and age variations
- selection of appropriate music.

Instructional skills may include:

- transitions between exercises or games
- session structure variations.
- communication skills
- verbal and visual instructions relevant to age group
- technique correction.

Exercise equipment may include:

- treadmill
- cycle
- ergomoters
- rowing machine
- dumbbells and age specific strength training equipment
- small equipment
- interactive equipment
- sporting
- circuit-based equipment.

© Commonwealth of Australia, 2025 HumanAbility

Modifications may include:	• accommodation for the physical changes and health conditions associated with developmental age • accommodation for the social and psychological changes that occur with children.
Motivational techniques may include:	• goal setting • positive feedback.
Symptoms requiring interjection may include:	• shortness of breath at rest or with mild exertion • dizziness or syncope • orthopnea or paroxysmal nocturnal dyspnea • palpitations or tachycardia • intermittent claudication • unusual fatigue or shortness of breath with usual activities • illness or sickness • lack of functional strength • neck soreness or strain • pain on movement of any body part.
Procedures to respond to adverse signs and symptoms requiring intervention may include:	• cessation of activity • first aid • emergency medical assistance • referral.
Written evaluation may include:	• evaluation of session • possible improvements.

SISFFIT531A Deliver prescribed exercise to older clients with chronic conditions

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge to deliver exercise programs to referred older clients who present with risk of an adverse event or exacerbation of impairment during exercise, in collaboration with relevant medical or allied health professionals.

Application of the Unit

This unit applies to specialised exercise trainers, whose clients are adults aged 50 years and over who present with risk of an adverse event or exacerbation of impairment during exercise and have been provided an exercise prescription from an accredited exercise physiologist or relevant medical or allied health professional.

The specialised exercise trainer applies the understanding and skills to deliver the program and modify the program in terms of frequency, mode, intensity and volume to accommodate the progression of the client within the parameters prescribed by the accredited exercise physiologist or relevant medical or allied health professional.

They apply self directed application of knowledge and skills related to chronic conditions, and exercise judgment in delivering the prescribed exercise. The specialised exercise trainer demonstrates the ability to analyse the clients responses to exercise and where appropriate consult with the accredited exercise physiologist or relevant medical or allied health professional.

This unit excludes clients with cardiac disease and serious respiratory conditions.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

SISFFIT314A Plan and deliver exercise for older clients with managed conditions

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Consult with referred clients presenting with chronic conditions.	1.1. Receive exercise referral from a ***medical or allied health professional***. 1.2. Confirm exercise referral has sufficient detail to allow flexibility for modifications to accommodate progression of the client. 1.3. Become familiar with typical adverse signs and symptoms that may arise during exercise for this pathology. 1.4. Consult with an appropriate ***medical or allied health professional*** as necessary. 1.5. Discuss with the client their complete exercise history and their ***chronic condition*** and co-morbidities and record information according to ***relevant legislation*** and ***organisational policies and procedures***. 1.6. Explain the physiology of chronic conditions and associated ***risk factors*** to the client in simple terms and confirm client understanding. 1.7. Explain to the client the causes and consequences of specific chronic conditions in the context of their effect on exercise capacity and conditions. 1.8. Explain to the client the role of physical activity and exercise in managing chronic conditions and enhancing health. 1.9. Confirm the outcomes of a goals and needs analysis in collaboration with the client and the ***medical or allied health professionals*** if appropriate.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	1.10. Explain to the client and their family members where necessary their need to be referred back to a medical or allied health professional if their condition becomes unstable.
	1.11. Establish ***client needs*** and identify any potential barriers to exercise, and discuss methods to enhance exercise adherence with the client.
	1.12. Clarify any areas of concern with the referring ***medical or allied health professional***, in conjunction with the client.
	1.13. Obtain the informed consent of the client and maintain the client's records according to relevant legislation and organisational policies and procedures.
2. Deliver prescribed exercise programs.	2.1. Undertake appropriate fitness assessments as required.
	2.2. Work with ***medical or allied health professionals*** to deliver an exercise plan in accordance with recognised exercise recommendations, fitness test results, client limitations, and potential interactions of medications.
	2.3. Explain to the client the different roles of ***cardiorespiratory*** and ***muscular conditioning***, and the reasons for their inclusion as part of the client's exercise prescription.
	2.4. Explain to the client the exercise variables to be delivered in the context of managing their specific cardiorespiratory conditions.
	2.5. Apply ***instructional techniques*** to ensure safe and appropriate application of the ***exercise program*** by the client.
	2.6. Demonstrate how ***modifications*** to the exercise can incorporate the different needs of ***older clients***
	2.7. Demonstrate the safe and appropriate use of selected ***exercise equipment*** and report or address any unsafe equipment according to organisational policies and procedures.
3. Monitor and review clients responses to the prescribed exercise program.	3.1. Monitor perceived exercise intensity and make adjustment as required.
	3.2. Assess the client's performance and explain and correct any unsafe exercise procedures.
	3.3. Monitor client responses for any typical signs and ***symptoms requiring intervention*** that may occur

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	during exercise.
	3.4. Apply ***procedures to respond to signs and symptoms requiring intervention*** as required according to relevant legislation and organisational policies and procedures.
	3.5. Recognise signs of an ***unstable condition*** and refer the client back to an appropriate ***medical or allied health professional***.
	3.6. Monitor progress and report outcomes to the client.
	3.7. Revise the client's record and advise the referral source of suggested changes to the exercise program if required.
4. Provide advice regarding additional ***lifestyle modifications*** to enhance the management of the condition.	4.1. Obtain information about the client's current lifestyle.
	4.2. Discuss possible barriers to behaviour change and implementation of healthy eating practices.
	4.3. Recommend other lifestyles changes to improve current disease status.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to provide clear instruction and constructive feedback to older clients, family members, medical or allied health professionals
- problem-solving skills to:
  - identify exercises targeted at specific fitness components or medical conditions and make modifications where required
  - recognise conditions outside own scope of practice and make appropriate recommendations and referrals
- team work skills to work collaboratively with medical or allied health professionals according to legal and ethical conditions
- literacy and numeracy skills to enable the accurate interpretation of referrals and to record client exercise programs and calculate and adjust exercise duration and frequency.
- decision making skills to determine appropriate instructional techniques
- planning and organising skills to plan and instruct the exercise session including accessing all required equipment and making appropriate modifications to equipment

© Commonwealth of Australia, 2025 HumanAbility

- interpersonal skills to interact effectively with older adults.
- observation skills to monitor the performance of older clients and recognise where and when modifications are required.
- literacy skills to accurately document and report on client progress
- numeracy skills to manage the time of classes and facility schedules.

Required knowledge

- the medical and allied health sector to enable appropriate recommendations to be made to older clients and family members
- principles of biomechanics and exercise science to enable the selection of exercises appropriate to participant conditions and needs
- physiological, social and emotional processes of ageing to enable effective planning of programs.
- age related health conditions to enable appropriate selection and modification of exercises.
- principles of exercise program design to enable development of a program for a specific condition or multiple conditions.
- relevant legislation and organisational policies and procedures to enable safe and appropriate conduct of exercise for older clients.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • communicates effectively with accredited exercise physiologist or relevant medical or allied health professional regarding relevant health and functional status of the referred client • effective communication skills to discuss aspects of exercise prescription with clients • when appropriate, react to adverse events to deal with exercise program problems and issues • ability to correctly interpret the exercise prescription and make modifications consistent with prescribed parameters and scope of practice • safely and effectively delivers exercise for older clients with chronic conditions and recommends appropriate alterations according to client's physical and motivational responses

© Commonwealth of Australia, 2025 HumanAbility

- monitors and maintains the safety of clients, exercise equipment and the exercise setting and applies effective contingency management techniques to deal with problems and issues that may arise during the exercise program
- applies all relevant legal and ethical requirements when discussing and recording client information
- demonstrates appropriate manner, empathy and patience when working with older clients
- develops a variety of sessions for physical activity classes for a range of client groups of older clients with chronic conditions
- modifies individual exercises to accommodate the specific needs of the client
- evaluates exercise sessions and modifies exercise plans according to feedback received from clients and own evaluation.

Context of and specific resources for assessment

Assessment must ensure training of multiple exercise sessions that are of sufficient duration and breadth to allow the demonstration of competency and consistency of performance

Assessment must also ensure access to:

- a facility or venue where a variety of exercise modes and equipment are available, such as a weights gym, pool, exercise room and open air
- a range of real or simulated medical or allied health professional referrals for a range of older clients with chronic conditions
- relevant documentation such as client record forms
- a range of participant groups composed of older adults with a variety of chronic conditions.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of instructing and monitoring exercise classes for older clients with unstable conditions
- oral or written questioning to assess knowledge of ageing process, specific medical conditions and how these relate to effective exercise planning
- portfolio of plans for physical activity programs for older clients with different unstable conditions
- third-party reports from a supervisor detailing work performance.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Medical or allied health professional may include:

- sports physician
- sports doctor
- general practitioner
- physiotherapist
- accredited exercise physiologist
- occupational therapist
- remedial massage therapist
- chiropractor
- osteopath
- accredited practising dietician
- psychologist
- aboriginal health worker
- diabetes educator.

Chronic conditions may include:

- asthma
- autoimmune diseases
- cancer
- cardiovascular diseases
- chronic fatigue
- chronic obstructive pulmonary disease
- diabetes
- hepatitis
- osteoarthritis
- osteoporisis
- renal failure
- rheumatoid arthritis.

Relevant legislation may include:

- Occupational Health and Safety
- duty of care
- privacy
- codes of practice
- fair trading.

Organisational policies and procedures may include:

- Occupational Health and Safety
- emergency procedures
- risk management

© Commonwealth of Australia, 2025 HumanAbility

- use of client record systems
- collection and use of client information
- equipment use and maintenance
- client supervision
- incident reporting
- client screening procedures
- client referral procedures.

Risk factors may include:

- family history
- obesity
- joint trauma and injury
- menopause in females
- repetitive occupational use
- physical inactivity
- eating disorders
- low body weight and calcium intake
- smoking.

Client needs may include:

- consideration of adaptations of older clients
- methods of instruction
- time delivery to achieve outcomes
- changes to environment and or spaces
- adaptation and modification of equipment.

Cardiorespiratory conditioning may include:

- Choice of exercises and location:
  - appropriate to condition and health needs
  - emphasis on functional capacity and activities of daily living such as mobility
  - gait, coordination, balance limitations
  - low initial fitness level, easily fatigued
  - inefficient movement
  - possible cognitive impairment
- integration with muscular training:
  - prior improvement in strength, balance and range of motion
  - use of exercise machines and circuit training
- low fitness level and need for gradual progression.

Muscular conditioning may include:

- muscular endurance
- muscular strength
- muscular power.

Instructional techniques may include:

- transitions between exercises or games
- class structure variations

© Commonwealth of Australia, 2025 HumanAbility

- communication skills
- verbal and visual instructions relevant to client conditions
- technique correction.

Exercise programs may include:

- cardiovascular
- strength training
- flexibility
- agility
- balance
- posture and core stability
- fundamental movement skills
- aquatic exercise.

Modifications may include:

- accommodations for the physical changes and unstable health conditions
- accommodations for the social and psychological changes that occur with ageing

Older clients may include:

- adults 50 years and over with:
  - one chronic condition
- multiple conditions

Exercise equipment may include:

- treadmill
- cycle
- ergometers
- rowing machine
- dumbbells and strength training equipment
- small equipment
- chairs
- balance equipment
- interactive equipment
- circuit-based equipment
- aquatic.

Symptoms requiring interjection may include:

- shortness of breath at rest or with mild exertion
- dizziness or syncope
- orthopnea or paroxysmal nocturnal dyspnea
- palpitations or tachycardia
- intermittent claudication
- unusual fatigue or shortness of breath with usual activities
- illness or sickness
- lack of functional strength
- neck soreness or strain
- pain on movement of any body part.

© Commonwealth of Australia, 2025 HumanAbility

Procedures to respond to signs and symptoms requiring intervention may include:	• cessation of activity • first aid • emergency medical assistance • referral.
Unstable condition may include:	• musculoskeletal • sensory impairment • dementia • metabolic conditions • physical disabilities • neurological disorders • joint replacement • claudication • angina • stroke • COPD and or COAD.
Lifestyle modifications may include:	• moderation of alcohol consumption • cessation of smoking • increased incidental activity • stress reduction • provision of health eating guidelines • provision of healthier choices.

SISOABA201A Demonstrate abseiling skills on artificial surfaces

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in basic abseiling activities on artificial surfaces under supervision. This unit focuses on the demonstration of simple abseiling skills in a controlled artificial environment.

Application of the Unit

This unit applies to those working as assistant abseiling leaders or support staff under supervision in a range of controlled artificial conditions.

This unit may also apply to leaders working for outdoor education or adventure providers, volunteer groups, not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

unit of competency.	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Prepare for abseiling activity.	1.1. Identify associated ***hazards*** and procedures to minimise ***risks*** for abseiling on ***artificial surfaces***, as advised by the leader. 1.2. Comply with ***relevant legislation*** and ***organisational policies and procedures***.
2. Select and utilise appropriate equipment.	2.1. Identify, select and use ***equipment*** in a safe and efficient manner. 2.2. Adjust and fit equipment to ensure personal comfort and safety. 2.3. Select and attach ***descending device*** to the rope and tie ***knots*** suitable to the ***belay system*** being used. 2.4. Complete all necessary personal and equipment ***safety checks including belay systems used***, prior to commencing descent.
3. Demonstrate abseiling technique.	3.1. Demonstrate correct posture and technique while abseiling, using single and or double rope. 3.2. Demonstrate use of effective ***communication*** between abseiler and belayer using standard calls and procedures. 3.3. Negotiate simple ***obstacles*** and avoid ***hazards*** safely, to descend in a controlled manner.
4. Evaluate the abseiling activity.	4.1. Receive feedback on performance from leader. 4.2. Evaluate ***relevant aspects*** of the abseiling activity. 4.3. Identify personal improvements for future abseiling activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to inform progress and interact with belayer
- problem-solving skills to negotiate obstacles and hazards when abseiling

Required knowledge

- relevant organisational policies and procedures to enable safe participation in

© Commonwealth of Australia, 2025 HumanAbility

abseiling activities
- identification and use of personal abseiling equipment.
- care of abseiling equipment to ensure prolonged life span and safety requirements
- abseiling techniques and common communication methods and calls used to reduce risk during an abseiling activity on an artificial surface
- hazards that may be experienced in an artificial abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • selects and fits abseiling equipment, and carries out personal safety checks • follows written and verbal instructions to apply knowledge and demonstrate controlled abseiling techniques on an artificial surface • negotiates obstacles and hazards during the abseiling activity, and communicates effectively with the belayer or leader to ensure safety of self and others • Receives feedback from leader and evaluates and reflects on own abseiling performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in abseiling activities that are of sufficient duration to allow the participant to demonstrate competency and consistency of performance. Assessment must also ensure access to: • resources and information regarding abseiling techniques and potential hazards of the artificial surface • a suitable artificial abseiling site with simple obstacles and features that allow participant to demonstrate simple abseiling skills • a qualified leader

© Commonwealth of Australia, 2025 HumanAbility

- abseiling equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral and or written questioning to assess knowledge of organisational policies and procedures to enable safe participation in abseiling
- observation of safe participation and demonstration of abseiling skills and techniques, such as communicating with belayer and descending in a controlled manner
- observation of dealing with contingencies
- third-party reports from a leader detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABN202A Safeguard an abseiler using a single rope belay system

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Hazards may include:

- Fitting and fixtures
- Surface irregularities
- dangerous animals and insects
- Slippery surfaces

Risks may include:

- Emotional risk
- injuries
- exhaustion
- equipment and misuse

Artificial surfaces may include:

- portable or fixed wall
- fixed tower or bridge
- indoor or outdoor
- single pitch.

© Commonwealth of Australia, 2025 HumanAbility

Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational policies and procedures may include:	• operating procedures and company or enterprise policies • use of equipment • communication protocols • emergency procedures • code of ethics.
Equipment may include:	• helmets • protective clothing • karabiners • harnesses • gloves • footwear • belay device • rope • descending device.
Safety checks may include:	• A - anchors - secure and suitable to application • B - buckles - locked as per manufacturers recommendations • C- connector - locked, secured and orientated • D - devices - threaded correctly and secured • E - organisation specific procedures including; end or rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured. • F- friend - cross check.
Belay and Descending devices may include:	• auto locking devices • figure 8 devices • plate devices • tubular devices • inline devices.
Belay system may include:	• top belay • bottom brake • self belay.
Communication may include:	• calls • radio • hand signals • whistles.

© Commonwealth of Australia, 2025 HumanAbility

Obstacles may include:

- ledges
- overhangs
- squeezes.

Relevant aspects may include:

- objectives
- equipment selection
- clothing selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques.

ELEMENT	PERFORMANCE CRITERIA
	anchor to minimise movement during a fall. 4.3. Maintain rope tension to ensure fall distance is minimised whilst not restricting abseiler movement. 4.4. Monitor abseiler progress constantly and respond appropriately to abseiler calls. 4.5. Arrest falls promptly using technique suitable to the belaying device and situation. 4.6. Demonstrate attachment to alternate belay or safety system when self-belaying to maintain safety in the event of a fall. 4.7. Apply safety procedures at top and bottom of descent site to minimise risk.
5. Evaluate abseiling activity.	5.1. Receive feedback on performance from leader. 5.2. Evaluate ***relevant aspects*** of abseiling and belaying. 5.3. Identify improvements for future abseiling activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to inform progress and interact with abseiler and or belayer
- problem-solving skills to:
  - identify and negotiate obstacles and hazards when abseiling
  - assess application of rope tension when belaying
- rope handling skills to maintain adequate rope tension when belaying
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of abseiling activities
- equipment types, characteristics and technology used for abseiling on artificial surfaces, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during abseiling on artificial surfaces

© Commonwealth of Australia, 2025 HumanAbility

- belay techniques and devices appropriate for single pitch surfaces
- technical abseiling knowledge, such as common techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the activity
- hazards that may be experienced in an artificial abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies relevant processes to plan for abseiling and belaying activities, and identifies procedures to minimise potential hazards and risks • selects and fits equipment independently and carries out safety checks to ensure effective working order • arranges a suitable communication system with abseiler, when belaying, to monitor progress • negotiates obstacles and hazards during abseiling, and adapts quickly to problems or issues that may arise to ensure safety of self and other participants • evaluates and reflects on own abseiling and belaying performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in abseiling and belaying activities on single pitch artificial surfaces, that are of a sufficient duration to demonstrate competency and consistency of performance. Assessment must also include access to: • resources and information regarding abseiling and belaying, to accurately plan for the activity • a suitable artificial single pitch abseiling site with simple obstacles and features that allow participant to demonstrate abseiling skills • other abseiling participants, to assist with belaying • equipment such as harnesses, helmets, belay devices,

© Commonwealth of Australia, 2025 HumanAbility

descending devices, ropes, gloves, karabiners and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling activities
- observation of safe participation and demonstration of abseiling and belaying skills, such as communicating with abseiler or belayer to inform of progress
- observation of dealing with contingencies, such as equipment misuse or change in weather or abseiler entrapment
- third-party reports from a leader detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABA303A Establish ropes for abseiling on artificial surfaces
- SISOVTR301A Perform vertical rescues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Food and water requirements may include:

- range of foods
- perishability
- packaging.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:

- occupational health and safety
- use and maintenance of equipment

Unit Sector(s)

Outdoor Recreation

Competency Field

Abseiling artificial surface

© Commonwealth of Australia, 2025 HumanAbility

SISOABA303A Establish ropes for abseiling on artificial surfaces

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to independently select fixed anchors for the attachment of ropes and equipment for belays, such as tapes and karabiners. These anchors are to be used to establish belay systems and rope pitches on single-pitched artificial abseiling surfaces, and must be able to accommodate different belayer and abseiler abilities.

Application of the Unit

This unit applies to those required to establish ropes for abseiling activities. This may include those working as abseiling guides or assistant guides in a range of controlled artificial conditions.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Select suitable equipment for belay system.	1.1. Select a ***belay system*** according to ***contextual issues*** of the activity. 1.2. Identify and select ***equipment*** after consideration of ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Select ***anchors*** that meet the requirements of the abseil and abilities of the ***participants***. 1.4. Assess ***condition of the anchors***, including performance under ***likely load***. 1.5. Choose a ***belay device*** that is suitable to the ***artificial surface conditions*** and belayer's ability. 1.6. Complete all necessary ***safety checks***, according to organisational policies and procedures.
2. Set up belay system.	2.1. Rig multiple anchors, ensuring equalisation and minimal shock loading. 2.2. Tie ***knots*** and rig ropes suitable for the type of belay system established. 2.3. Establish a belay from which the belayer is able to escape and safely perform a rescue. 2.4. Avoid or remove belay ***hazards***, to maintain ***safety of belayer***. 2.5. Complete all necessary safety checks, according to organisational policies and procedures.
3. Rig rope pitches.	3.1. Identify safe access to and egress from the site according to relevant legislation. 3.2. Identify descent route appropriate to context. 3.3. Select and tie knots suitable for the type of system established and for potential retrieval or rescue situations. 3.4. Minimise the risk of cross loading and cyclical loading of karabiners.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to select appropriate anchors and belay systems for the context and conditions of the abseiling activity
- rope handling and knot tying skills to rig ropes and anchors adequately and safely
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of abseiling activities
- equipment types, characteristics and technology used to establish belays for abseiling on artificial surfaces
- care and maintenance of equipment to ensure prolonged life span and safety requirements, as advised by the manufacturer's specifications and recommendations for equipment use
- belay and anchor systems appropriate for single pitch artificial abseiling surfaces
- technical abseiling and equipment knowledge to establish top belay and bottom brake
- types of knots, their advantages and disadvantages and their impact on abseiling activities
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- independently selects appropriate equipment and carries out safety checks to ensure effective working order
- differentiates between the different types of belay systems, anchors and knots and their suitability to different rigging situations
- determines the need for, and establishes, belay systems to ensure safety of self and other

© Commonwealth of Australia, 2025 HumanAbility

participants.

Context of and specific resources for assessment	Assessment must ensure participation in rigging of equipment that is of sufficient breadth to demonstrate competency and consistency of performance. Assessment must also ensure access to: • resources and information regarding abseiling and belaying equipment • suitable artificial single pitch abseiling sites with simple obstacles and features that allow participant to demonstrate rigging skills • equipment such as anchors, harnesses, helmets, belay devices, descending devices, slings, ropes, karabiners and first aid equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to ensure safe and appropriate use of all abseiling equipment • observation of safe participation and demonstration of setting up belay systems suitable to different contexts and participants • observation of dealing with contingencies, such as equipment misuse • third-party reports from a leader detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • SISOABA302A Apply single pitch abseiling skills on artificial surfaces. • SISOVTR301A Perform vertical rescues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and

© Commonwealth of Australia, 2025 HumanAbility

regional contexts) may also be included.

Belay system may include:	• top belay • self belay • bottom brake.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Equipment may include:	• ropes • tape slings • rope protectors • karabiners • belay devices. • rope protectors
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational policies and procedures may include:	• occupational health and safety • use and maintenance of equipment • emergency procedures • code of ethics.
Anchors may include:	• bolts • chains • bollards • eyelets • U bolts • beams • poles • wire cables.
Participants may include:	• experienced • inexperienced • adults • children • tourists, club members, clients, school or youth groups.
Condition of the anchors may include:	• age • location • wear

© Commonwealth of Australia, 2025 HumanAbility

	• decay • corrosion • environmental stress • insect damage.
Likely load may include:	• group size • set up • type of abseil conducted • abseiler ability • technique • possible forces generated during a fall.
Belay device may include:	• plate devices • auto-locking devices • tubular devices • figure 8 • inline device.
Artificial surface conditions may include:	• portable or fixed walls or towers • fixed towers or bridges • indoor or outdoor • single pitch.
Safety checks may include:	• certification of anchor points • angles at focal point • no shock loading • no single point at failure • minimum of two failsafe anchor points.
Knots may include:	• knots that have at least 50% of the static strength of the rope • end-of-rope knots • mid-rope knots • rope joining knots • tape knot.
Hazards may include:	• temperature extremes of surfaces • slippery surfaces • dangerous animals and insects • group management hazards.
Safety of belayer may include:	• attachment to anchor or alternate safety system • positioning out of direct line of equipment fall • minimising movement of the belayer in the event of a fall.

SISOABA304A Guide abseiling on single pitch artificial surfaces

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to guide participants in a single pitch abseiling activity on an artificial surface. This unit focuses on the skills to guide a group through an abseiling activity.

Application of the Unit

This unit applies to those working as abseiling guides or assistant guides in a range of controlled artificial conditions that have easy access to the top and bottom of the pitch.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

ELEMENT	PERFORMANCE CRITERIA
unit of competency.	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan abseiling activity.	1.1. Conduct relevant assessments to determine the ***condition of participants***. 1.2. Develop an activity ***plan***, according to ***relevant legislation*** and ***organisational policies and procedures***, to meet participant's needs. 1.3. Select an appropriate activity site or location that is suitable for participants and meets ***activity objectives***, relevant legislation and organisational policies and procedures. 1.4. Identify ***hazards*** associated with abseiling on ***artificial surfaces*** and minimise ***risks*** to ensure personal safety of participants. 1.5. Access ***relevant sources*** to interpret detailed ***weather and environmental information*** to determine activity plan, where applicable. 1.6. Determine ***food and water requirements*** according to ***contextual issues*** of the activity. 1.7. Determine most appropriate ***belay system*** according to participant's abilities and site conditions. 1.8. Inform ***appropriate authorities*** before commencing the abseiling activity.
2. Select equipment for the group.	2.1. Select ***equipment*** according to contextual issues and organisational policies and procedures, and check that it is in good working condition. 2.2. Assess equipment for safety and suitability, and adjust and fit to ensure personal comfort. 2.3. Select safety and rescue equipment to check suitability to the group and the abseil.
3. Brief participants.	3.1. Communicate instructions and ***relevant information*** about the abseiling activity in a manner suitable to the participants. 3.2. Demonstrate correct abseiling and belaying techniques. 3.3. Establish a suitable ***communication system*** for participants to use while abseiling and belaying. 3.4. Outline ***safety procedures*** and safe areas and or boundaries for the activity. 3.5. Confirm participants are properly equipped for the abseil and correct any omissions or deficiencies.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
4. Supervise abseiling activity.	4.1. Conduct introductory activities for participants, to reduce the risk of injury. 4.2. Provide clear and concise direction and advice to group during the activity. 4.3. Monitor ***participant's performance*** of abseiling and belaying techniques and provide feedback as required. 4.4. Identify potential hazards as they occur and implement contingency actions according to organisational policies and procedures. 4.5. Implement appropriate modifications to activity in regard to all ***variable factors*** that are monitored.
5. Complete post activity responsibilities.	5.1. Retrieve, inspect, repair and store equipment according to organisational policies and procedures including manufacturers recommendations. 5.2. Evaluate ***relevant aspects*** of abseiling activity. 5.3. Identify potential areas of improvement for future abseiling activities. 5.4. Review performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an appropriate abseiling activity
  - convey information about the safety aspects of the activity
  - interact with participants to create a safe and positive abseiling environment
- problem-solving skills to:
  - plan a suitable abseiling activity according to participant's needs and abilities
  - make decisions affecting the activity
  - respond appropriately to non routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and an artificial pitch suitable for the participants
  - organise participants into manageable groups for abseiling and belaying
- language and literacy skills to:

© Commonwealth of Australia, 2025 HumanAbility

  - produce an activity plan for the abseiling activity,
  - complete post-activity participant and self evaluations
- personal abseiling skills to a high level , rescue skills and be able to demonstrate and explain abseiling and belaying techniques to participants
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of abseiling activities
- site specific information to assist in the planning process and to enable management of potential abseiling hazards, and any special restrictions applying to the site
- equipment types, characteristics and technology used for abseiling on artificial surfaces, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- clothing and footwear requirements for abseiling activities to ensure comfort and safety
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements are met
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during abseiling on artificial surfaces
- belay systems, devices and anchors appropriate for single pitch artificial surfaces
- technical abseiling knowledge, such as techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the activity
- hazards that may commonly be encountered in an artificial abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • Develop an activity plan and documentation which comply with relevant legislation and organisational policies and procedures

© Commonwealth of Australia, 2025 HumanAbility

- continually monitors the performance and progress of participants and identifies and corrects any performance issues
- applies effective contingency management techniques to deal with problems and issues that arise during the abseiling activity
- receive feedback
- evaluates and reflects on own guiding performance to identify strengths, weaknesses and areas that can be improved.

Context of and specific resources for assessment

Assessment must ensure the planning and guiding of abseiling activities for single pitch artificial surfaces that are of sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding participants and location to accurately plan, guide and document abseiling activities for a variety of participants
- an artificial abseiling site suitable to the abilities of participants
- a group of participants to take part in the abseiling activity
- equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners, rescue equipment and safety and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of interaction with a group of participants including conveying information for safe participation
- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling activities
- observation of dealing with contingencies such as changing weather conditions, equipment misuse, abseiler entrapment
- review of abseiling activity plans
- third-party reports from a leader detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended,

© Commonwealth of Australia, 2025 HumanAbility

for example:

- SISOABA303A Establish ropes for abseiling on artificial surfaces.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Condition of participants may include:

- skill level
- previous experience
- fitness level and physical capabilities
- age
- injuries and illnesses.

Plan may include:

- activity aims and objectives
- date, time and duration
- location or site
- guide and participant ratios
- resources and equipment
- food and water
- weather details
- risk management plan.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:

- occupational health and safety
- participant confidentiality
- assessment procedures
- time constraints
- use and maintenance of equipment
- communication protocols
- guide and participant ratios
- emergency and safety procedures
- code of ethics.

Activity objectives may include:

- self improvement
- meeting people
- fitness targets

	• adventure and recreation.
Hazards may include:	• temperature extremes on surfaces • slippery surfaces • dangerous animals and insects • group management hazards.
Risks may include:	• Emotional risk • injuries • exhaustion • equipment misuse
Artificial surfaces may include:	• portable or fixed wall • fixed tower or bridge • indoor or outdoor • single pitch.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • synoptic charts
Food and water requirements may include:	• perishability • packaging • storage.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Belay system may include:	• top belay • bottom brake.
Appropriate authorities may include:	• government departments or agents • facility and land managers • statutary bodies • supervisors.
Equipment may include:	• ropes • harnesses

© Commonwealth of Australia, 2025 HumanAbility

- descending device
- karabiners
- helmet
- belay devices
- first aid kit
- rope protectors
- knife
- rescue pulley
- whistle

Relevant information may include:

- personal equipment requirements:
- safety procedures
- preventative measures for risks
- possible hazards
- abseiling and belaying techniques
- objectives
- rules and codes
- responsible and safe behaviour.

Communication system may include:

- calls
- radio
- hand signals
- whistles.

Safety procedures may include:

- A - anchors - secure and suitable to application
- B - buckles - locked as per manufacturers recommendations
- C- connector - locked, secured and orientated
- D - devices - threaded correctly and secured
- E - organisation specific procedures including; end or rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured.
- F- friend - cross check.

Participant's performance may include:

- use of appropriate communication system
- abseiling technique
- attitude
- negotiation of hazards
- use of equipment.

Variable factors may include:

- change of weather
- equipment misuse
- participant's needs
- abseiling conditions.

© Commonwealth of Australia, 2025 HumanAbility

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Select suitable equipment for belay system.	1.1. Select a ***belay system*** according to ***contextual issues*** of the activity. 1.2. Identify and select ***equipment*** according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Select ***anchors*** that meet the requirements of the abseil and abilities of the ***participants***. 1.4. Assess ***condition of the anchors***, including performance under ***likely load***. 1.5. Choose a ***belay device*** that is suitable to the ***artificial surface conditions*** and belayer's ability. 1.6. Complete all necessary ***safety checks***, and action unsafe equipment according to organisational policies and procedures.
2. Set up belay system.	2.1. Rig anchors, ensuring equalisation and minimal shock loading in the event of a failure. 2.2. Tie ***knots*** and rig ropes suitable for the type of belay system established. 2.3. Establish a belay from which the belayer is able to escape and safely perform a rescue. 2.4. Avoid or remove belay ***hazards***, to maintain ***safety of belayer***. 2.5. Complete all necessary ***safety checks*** and action unsafe equipment according to organisational policies and procedures.
3. Rig rope pitches.	3.1. Identify safe access to and egress from the site according to relevant legislation. 3.2. Identify descent route appropriate to context. 3.3. Select and tie knots suitable for the type of system established and for potential retrieval or rescue situations. 3.4. Minimise the risk of cross loading and cyclical loading of karabiners.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- problem-solving skills to select appropriate anchors and belay systems for the context and conditions of the abseiling activity
- rope handling and knot tying skills to rig ropes and anchors safely
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of multipitch abseiling activities
- equipment types, characteristics and technology used to establish belays for multi pitch abseiling on artificial surfaces
- care and maintenance of equipment to ensure prolonged life span and safety requirements, as advised by the manufacturer's specifications and recommendations for equipment use
- belay and anchor systems appropriate for multi pitch abseiling on artificial surfaces
- technical abseiling and equipment knowledge to establish appropriate belay systems
- types of knots, their advantages and disadvantages and their impact on roping activities
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- independently selects appropriate equipment and carries out safety checks to ensure effective working order
- uses discretion and judgement to determine belay system required for abseiling in multi pitch contexts and differentiates between the types of belay systems, anchors and knots and their suitability to different rigging situations

© Commonwealth of Australia, 2025 HumanAbility

- determines the need for, and establishes, belay systems to ensure safety of self and other participants.

Context of and specific resources for assessment

Assessment must ensure participation in rigging of anchors and equipment that is of sufficient breadth to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding abseiling and belaying equipment
- suitable artificial multi pitch abseiling sites with fixed anchors and varying qualities and features that allow participant to demonstrate rigging skills
- equipment such as anchors, harnesses, belay systems, descending devices, slings, ropes, karabiners and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to ensure safe and appropriate use of all abseiling equipment
- observation of safe participation and demonstration of setting up belay systems suitable to different contexts and participants
- observation of dealing with contingencies, such as equipment misuse
- third-party reports from a leader detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

- SISOVTR301A Perform vertical rescues
- SISOABA303A Establish ropes for abseiling on artificial surfaces

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

© Commonwealth of Australia, 2025 HumanAbility

situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Belay system may include:
- top belay
- self belay
- bottom brake.

Contextual issues may include:
- weather conditions, including times
- season
- transport
- location
- trip distance and duration
- group objectives
- group size.

Equipment may include:
- ropes
- tape slings
- rope protectors
- karabiners
- belay devices.

Relevant legislation may include:
- occupational health and safety
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:
- occupational health and safety
- use and maintenance of equipment
- emergency procedures
- code of ethics.

Anchors may include:
- bolts
- chains
- bollards
- eyelets
- U bolts
- beams
- poles
- wire cables.

Participants may include:
- experienced
- inexperienced
- adults
- children
- tourists, club members, clients, school or youth groups.

Condition of the anchors may include:
- age
- location
- wear

© Commonwealth of Australia, 2025 HumanAbility

	• decay • corrosion • environmental stress • insect damage.
Likely load may include:	• group size • set up • type of abseil conducted • abseiler ability • technique • possible forces generated during a fall.
Belay device may include:	• plate devices • auto-locking devices • tubular devices • prusik cord and suitable friction hitch. • Figure 8 • Inline device
Artificial surface conditions may include:	• portable or fixed walls or towers • fixed towers or bridges • indoor or outdoor
Safety checks may include:	• Certification of anchor points • Angles at focal point • No slack loading • No single point at failure • Minimum of two failsafe anchor points
Knots may include:	• knots that have at least 50% of the static strength of the original • end-of-rope knots • mid-rope knots • rope joining knots • tape knot.
Hazards may include:	• temperature extremes of surfaces • slippery surfaces • dangerous animals and insects • group management hazards.
Safety of belayer may include:	• attachment to anchor or alternate safety system • positioning out of direct line of equipment fall • minimising movement of the belayer in the event of a fall.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan an abseiling session.	1.1. Establish ***participant's needs and characteristics***. 1.2. Determine participant's current abseiling knowledge in order to determine the ***session's aims and objectives***. 1.3. Determine an appropriate ***instructional plan*** according to participant's needs and characteristics. 1.4. Develop an ***abseiling plan*** according to participant's needs and characteristics, ***relevant legislation*** and ***organisational policies and procedures***. 1.5. Identify potential ***hazards*** associated with abseiling on ***artificial surfaces*** and minimise ***risks***, according to organisational policies and procedures, to ensure safety of participants. 1.6. Access ***relevant sources*** to interpret detailed ***weather and environmental information*** and determine ***contingency plans***.
2. Select and organise equipment and resources.	2.1. Select and access ***equipment*** and ***resources*** according to ***contextual issues*** and organisational policies and procedures, and check that it is in good working condition. 2.2. Check equipment for safety and suitability, according to relevant legislation and manufacturer's recommendations, and adjust and fit to ensure personal comfort. 2.3. Check contents of first aid and rescue kits to ensure suitability to the location and activity.
3. Brief participants.	3.1. Communicate instructions and ***relevant information*** about the abseiling session in a manner appropriate to the participants. 3.2. Encourage participants to seek clarification, information and feedback as required during the session. 3.3. Establish a suitable ***communication system*** for participants to use while abseiling and belaying. 3.4. Inform participants of known and anticipated hazards, ***safety procedures*** and appropriate

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	behaviour.
4. Instruct an abseiling session.	4.1. Conduct introductory activities for participants to reduce the risk of injury. 4.2. Monitor individual ***participant's performance*** during abseiling session. 4.3. Apply clear and accurate ***instructional techniques*** to impart ***activity specific knowledge***, ***abseiling skills*** and ***safety and rescue procedures***. 4.4. Observe participants during abseiling and belaying and adjust or refine individual and or group technique as required. 4.5. Inform participants of ***opportunities*** to further develop their abseiling skills and knowledge.
5. Complete post session responsibilities.	5.1. Retrieve, inspect, repair and store equipment according to organisational policies and procedures and manufacturers specifications and recommendations. 5.2. Provide opportunities for participants to identify their personal progress and satisfaction with the session, and give feedback as required. 5.3. Receive feedback and evaluate ***relevant aspects*** of abseiling session, and determine the level of learning achieved. 5.4. Identify potential areas of improvement for future abseiling instruction sessions.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an abseiling session that meets their needs
  - convey information about the safety aspects of the session
  - interact with participants to create a safe and positive abseiling environment
- problem-solving skills to:
  - plan a suitable abseiling session according to participant's needs and characteristics
  - address participant difficulties in developing abseiling techniques

© Commonwealth of Australia, 2025 HumanAbility

    - anticipate and respond appropriately to non-routine situations
- planning and organising skills to:
    - source, allocate and coordinate resources, equipment and an artificial pitch suitable for the participants
    - monitor and evaluate progress
    - organise participants into manageable groups for abseiling and belaying
- language and literacy skills to:
    - produce abseiling and instructional plans for the abseiling session
    - complete post-session participant and self evaluations
- instructional techniques to suit a range of participant's needs and characteristics
- a high level of personal abseiling skills, rigging skills and rescue skills to demonstrate and explain abseiling and belaying techniques to participants
- first aid and emergency response skills appropriate to the location to enable initial response and or rescue in emergencies whilst instructing abseiling on artificial surfaces.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of an abseiling session
- site specific information to assist in the planning process and to enable management of potential abseiling hazards, and any special restrictions applying to the site
- equipment types, characteristics and technology used for abseiling on artificial surfaces, the advantages and disadvantages of the range of equipment and factors affecting appropriate selection of equipment
- clothing and footwear requirements for abseiling activities to ensure comfort and safety
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements are met
- instruction techniques and theories applicable to a range of ages and learning abilities
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during abseiling on artificial surfaces
- belay systems, devices and anchors appropriate for single pitch artificial surfaces
- technical abseiling knowledge, such as techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the session
- hazards that may be experienced in an artificial abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans and delivers information, explanations and demonstrations for abseiling session to ensure activities are conducted safely according to participant's needs and characteristics
- observes and monitors the progress of participants and provides constructive feedback and intervention to improve abseiling performance
- modifies instructional techniques and or activities to cater for a range of individual learning styles
- receives feedback and evaluates and reflects on own instruction performance to identify strengths, weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure instruction of multiple single pitch abseiling activities on artificial surfaces using a variety of instructional techniques that reflect the needs and characteristics of a range of participants and are of sufficient duration to demonstrate competency and consistency of performance.

Assessment must also include access to:

- resources and information regarding participants and location to accurately plan, instruct and document abseiling sessions for a variety of participants
- an artificial abseiling site suitable for the conduct of instructional sessions
- a group of participants to take part in the abseiling session
- equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners, rescue and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling activities during the session

© Commonwealth of Australia, 2025 HumanAbility

- observation of safe abseiling instruction, monitoring and adjustment according to participant's needs and characteristics
- review of abseiling session plans
- third-party reports from a leader detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABA303A Establish ropes for abseiling on artificial surfaces.
- SISOABA304A Guide abseiling on a single pitch artificial surfaces

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participant's needs and characteristics may include:

- age
- cultural factors
- fitness level and physical capabilities
- abseiling skills and knowledge
- injuries and illnesses.

Session's aims and objectives may include:

- developing single pitch abseiling skills independently
- education
- therapy
- fitness targets
- recreation.

Instructional plan may include:

- abseiling activities and drills
- duration of activities and drills.

Abseiling plan may include:

- session's aims and objectives
- date, time and duration
- location or site
- instructor and participant ratios
- resources
- equipment

© Commonwealth of Australia, 2025 HumanAbility

- weather details
- safety requirements.

Relevant legislation may include:

- occupational health and safety:
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:

- occupational health and safety
- time and budget constraints
- use and maintenance of equipment
- communication protocols
- confidentiality of participant information
- instructor and participant ratios
- emergency and safety procedures
- code of ethics.

Hazards may include:

- temperature extremes of surfaces
- slippery surfaces
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

Artificial surfaces may include:

- portable or fixed walls
- fixed towers or bridges
- indoor or outdoor

Risks may include:

- emotional stress
- injuries
- exhaustion
- equipment misuse and failure

Relevant sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- local knowledge.

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings
- event warnings
- synoptic charts.

Contingency plans may include:

- change in weather
- equipment failure
- unavailability of artificial pitch.
- Group or individual participant issues

© Commonwealth of Australia, 2025 HumanAbility

Equipment may include:	• abseiling equipment • safety equipment • rescue equipment
Resources may include:	• food and water • personal clothing and footwear • teaching aids. • suitable artificial structure of instructing abseiling
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Relevant information may include:	• equipment requirements, selection and use • safety procedures • preventative measures for risks • possible hazards • abseiling and belaying techniques • objectives • rules and codes • responsible and safe behaviour.
Communication system may include:	• calls • radio • hand signals • whistles.
Safety procedures may include:	• A - anchors - secure and suitable to application • B - buckles - locked as per manufacturers recommendations • C- connector - locked, secured and orientated • D - devices - threaded correctly and secured • E - organisation specific procedures including; end or rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured. • F- friend - cross check.
Participant's performance may include:	• use of appropriate communication system • abseiling technique • belaying technique • attitude and behaviour • negotiation of hazards

© Commonwealth of Australia, 2025 HumanAbility

	• use of equipment.

Instructional techniques may include:	• simple to complex
	• part to whole
	• chronological
	• known to unknown
	• D.E.D.I.C.T:
	  • demonstrate
	  • explain
	  • demonstrate
	  • instruct
	  • critique
	  • test
	• E.D.I.C.T:
	  • explain
	  • demonstrate
	  • instruct
	  • critique
	  • test
	• I.D.E.A:
	  • introduce
	  • demonstrate
	  • explain
	  • apply

Activity specific knowledge may include:	• abseiling skills and techniques • establishment of ropes • risk and hazard management • equipment selection, use, maintenance and storage • communication systems used in abseiling.
Abseiling skills may include:	• abseiling and belaying techniques • establishment of ropes for a single pitch • use and knowledge of different techniques • practice of techniques • negotiation of hazards and management of risks to ensure safety of self and group • use and maintenance of equipment.
Safety and rescue procedures may include:	• emergency response procedures • group management in emergency situations • emergency response equipment • understanding of safety practices.

© Commonwealth of Australia, 2025 HumanAbility

Opportunities may include:

- locations suitable to skill level
- range of equipment and clothing available
- outdoor clubs or groups in the local area.

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to instruct abseiling on multi pitch artificial surfaces. This unit focuses on planning, instructing and evaluating an instructional abseiling session to enable participants to achieve the skills and knowledge required to participate independently in multi pitch abseiling on artificial surfaces.

Application of the Unit

This unit applies to those working as abseiling instructors in a range of multi pitch artificial conditions. This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

SISOABA406A Instruct abseiling on single pitch artificial surfaces

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Plan an abseiling session.	1.1. Establish ***participant's needs and characteristics***. 1.2. Determine participant's current abseiling knowledge in order to determine the ***session's aims and objectives***. 1.3. Determine an appropriate ***instructional plan*** according to participant's needs and characteristics. 1.4. Develop an ***abseiling plan*** according to participant's needs and characteristics, ***relevant legislation*** and ***organisational policies and procedures***. 1.5. Identify potential ***hazards*** associated with multi pitch abseiling on ***artificial surfaces*** and minimise ***risks***, according to organisational policies and procedures, to ensure safety of participants. 1.6. Access ***relevant sources*** to interpret detailed ***weather and environmental information*** and determine ***contingency plans***.
2. Select and organise equipment and resources.	2.1. Select and access ***equipment*** and ***resources*** according to ***contextual issues*** and organisational policies and procedures, and check that it is in good working condition. 2.2. Check equipment for safety and suitability, according to relevant legislation and manufacturer's recommendations, and adjust and fit to ensure personal comfort. 2.3. Check contents of first aid and rescue kits to ensure suitability to the location and activity.
3. Brief participants.	3.1. Communicate instructions and ***relevant information*** about the abseiling session in a manner appropriate to the participants. 3.2. Encourage participants to seek clarification, information and feedback as required during the session. 3.3. Establish a suitable ***communication system*** for participants to use while abseiling and belaying. 3.4. Inform participants of known and anticipated hazards, ***safety procedures*** and appropriate behaviour.
4. Instruct an abseiling session.	4.1. Conduct introductory activities for participants, to reduce the risk of injury. 4.2. Monitor individual ***participant's performance*** during abseiling session.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	4.3. Apply clear and accurate ***instructional techniques*** to impart ***activity specific knowledge***, ***abseiling skills*** and ***safety and rescue procedures***.
	4.4. Observe participants during abseiling and belaying and adjust or refine individual and or group technique as required.
	4.5. Inform participants of ***opportunities*** to further develop their abseiling skills and knowledge.
5. Complete post session responsibilities.	5.1. Retrieve, inspect, repair and store equipment according to organisational policies and procedures and manufacturers specifications and recommendations.
	5.2. Provide opportunities for participants to identify their personal progress and satisfaction with the session, and give feedback as required.
	5.3. Receive feedback and evaluate ***relevant aspects*** of abseiling session, and determine the level of learning achieved.
	5.4. Identify potential areas of improvement for future abseiling instruction sessions.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an abseiling session that meets their needs
  - convey information about the safety aspects of the session
  - interact with participants to create a safe and positive abseiling environment
- problem-solving skills to:
  - plan a suitable abseiling session according to participant's needs and characteristics
  - address participant difficulties in developing abseiling techniques
  - anticipate and respond appropriately to non routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and an artificial pitch suitable for the participants
  - monitor and evaluate progress

© Commonwealth of Australia, 2025 HumanAbility

  - organise participants into manageable groups for abseiling and belaying
- language and literacy skills to:
  - produce abseiling and instructional plans for the abseiling session
  - complete post session participant and self evaluations
- instructional techniques to suit a range of participant's needs and characteristics
- a high level of personal abseil skills, rigging skills and rescue skills to demonstrate and explain abseiling and belaying techniques to participants
- first aid and emergency response skills appropriate to the location to enable initial response and or rescue in emergencies whilst instructing abseiling on artificial surfaces.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of an abseiling session
- site specific information to assist in the planning process and to enable management of potential abseiling hazards, and any special restrictions applying to the site
- equipment types, characteristics and technology used for abseiling on multi pitch artificial surfaces, the advantages and disadvantages of the range of equipment and factors affecting appropriate selection of equipment
- clothing and footwear requirements for abseiling activities to ensure comfort and safety
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements are met
- instruction techniques and theories applicable to a range of ages and learning abilities
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during multi pitch abseiling on artificial surfaces
- belay systems, devices and anchors appropriate for multi pitch artificial surfaces
- technical abseiling knowledge, such as techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the session
- hazards that may be experienced in an artificial abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 HumanAbility

Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans and delivers precise relevant information, explanations and demonstrations for abseiling session to ensure activities are conducted safely according to participant's needs and characteristics • observes and monitors the progress of participants and provides constructive feedback and intervention to improve abseiling performance • modifies instructional techniques and or activities to cater for a range of individual learning styles • receives feedback and evaluates and reflects on own instruction performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure instruction of multi pitch abseiling activities on artificial surfaces, using a variety of instructional techniques that reflect the needs and characteristics of a range of participants and are of sufficient duration to demonstrate competency and consistency of performance. Assessment must also include access to: • resources and information regarding participants and location to accurately plan, instruct and document abseiling sessions for a variety of participants • a multi pitch artificial abseiling site suitable for the conduct of instructional sessions • a group of participants to take part in the abseiling session • equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners, rescue and first aid equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral and or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling activities during the session • observation of safe abseiling instruction, monitoring and adjustment according to participant's needs and characteristics

© Commonwealth of Australia, 2025 HumanAbility

- review of abseiling session plans
- third-party reports from a leader detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABA405A Establish ropes for multi pitch abseiling on artificial surfaces.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participant's needs and characteristics may include:

- age
- cultural factors
- fitness level and physical capabilities
- abseiling skills and knowledge
- injuries and illnesses.

Session's aims and objectives may include:

- developing abseiling skills
- education
- development
- therapy
- fitness targets
- recreation

Instructional plan may include:

- abseiling activities and drills
- duration of activities and drills.

Abseiling plan may include:

- session's aims and objectives
- date, time and duration
- location or site
- instructor and participant ratios
- resources and equipment
- food and water
- weather details
- participant information
- safety requirements
- risk management plan.

© Commonwealth of Australia, 2025 HumanAbility

Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational policies and procedures may include:	• occupational health and safety • time and budget constraints • use and maintenance of equipment • communication protocols • confidentiality of participant information • instructor and participant ratios • emergency and safety procedures • code of ethics.
Hazards may include:	• temperature extremes on surfaces • slippery surfaces • dangerous animals and insects • group management hazards.
Artificial surfaces may include:	• portable or fixed walls • fixed towers or bridges • indoor or outdoor.
Risks may include:	• emotional stress • injuries • exhaustion • equipment misuse and failure
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • synoptic charts
Contingency plans may include:	• change in weather • equipment failure • unavailability of artificial pitch. • group or individual participant issue
Equipment may include:	• abseiling equipment: • safety equipment: • rescue equipment: • artificial protection.

© Commonwealth of Australia, 2025 HumanAbility

Resources may include:	• food and water • personal clothing and footwear • teaching aids • suitable artificial structure for instructing abseiling.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Relevant information may include:	• equipment requirements, selection and use • safety procedures • possible hazards • abseiling and belaying techniques • communication • objectives • rules and codes • responsible and safe behaviour.
Communication system may include:	• calls • radio • hand signals • whistles.
Safety procedures may include:	• A - anchors - secure and suitable to application • B - buckles - locked as per manufacturers recommendations • C - connector - locked, secured and orientated • D - devices - threaded correctly and secured • E - organisation specific procedures including; end or rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured. • F - friend - cross check.
Participant's performance may include:	• use of appropriate communication system • abseiling technique • belaying technique • attitude and behaviour • negotiation of hazards • use of equipment.
Instructional techniques may	• simple to complex • part to whole

Activity specific knowledge may include:

- abseiling skills and techniques
- establishment of ropes
- minimal impact practices
- risk and hazard management
- equipment selection, use, maintenance and storage
- communication systems used in abseiling.

Abseiling skills may include:

- abseiling and belaying techniques
- establishment of ropes for a multi pitch
- communication of progress
- negotiation of hazards and management of risks to ensure safety of self and group
- use and maintenance of equipment.

Safety and rescue procedures may include:

- emergency response procedures
- group management in emergency situations
- emergency response equipment
- understanding of safety practices.

Opportunities may include:

- locations suitable to skill level
- range of equipment and clothing available
- outdoor clubs or groups in the local area.

ELEMENT	PERFORMANCE CRITERIA
	required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Assist in planning for adventure activity.	1.1. Determine individual roles, tasks and responsibilities with the activity leader. 1.2. Identify ***phases of an adventure-based learning cycle*** within the activity. 1.3. Encourage and support participants to set realistic individual and group goals that are consistent with learning outcomes for the activity. 1.4. Negotiate individual and group guidelines that will inform action and behaviour by all participants. 1.5. Identify ***safety issues*** for the adventure activity and the participants. 1.6. Brief the group on safety issues and activity-specific participation requirements and techniques.
2. Assist in facilitation of the activity.	2.1. Implement risk management strategies according to ***relevant legislation***, ***organisational policies and procedures***, and activity-specific requirements. 2.2. Communicate ideas and information clearly and constructively and engender trust and confidence within the group. 2.3. Encourage co-operation between individual group members. 2.4. Implement strategies which develop trust between individuals within the group and with the leaders. 2.5. Monitor and maintain compliance with agreed individual and group guidelines. 2.6. Establish a supportive and constructive environment and respond to emergent issues that may require intervention.
3. Participate in activity debriefing.	3.1. Observe and monitor individual actions and group interactions during activities, and provide feedback to participants during and after the activity. 3.2. Evaluate personal role as assistant facilitator within the activity, based on ***feedback*** from participants and activity leader and personal reflection. 3.3. Review the conduct of the activity according to program, individual and group goals and outcomes.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- planning and organising skills to determine own roles, responsibilities and tasks within the activity
- problem-solving skills to identify and address safety issues within own level of responsibility
- communication skills to:
  - interact with different groups in a variety of situations and circumstances
  - brief groups on safety issues, activity requirements
  - communicate information throughout activity
- teamwork skills to support leader and participants to achieve goals
- self management skills to review and reflect on own performance.

Required knowledge

- legislation and organisational policies and procedures to enable safe facilitation of activities
- definitions of adventure-based learning and associated disciplines to implement suitable activities with relevant goals and outcomes
- philosophical and psychological foundations for adventure-based learning to determine its relevance and significance to participants
- debriefing techniques to enhance learning through adventure activities
- models and stages of group formation to enable effective and constructive group support
- factors impacting on group dynamics to enable response to group behaviour
- facilitation techniques to assist the group to obtain the best outcomes.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • assists in planning processes required for adventure-based learning activities and identifies individual and group roles, responsibilities, learning outcomes, and goals • interacts effectively with group members from

© Commonwealth of Australia, 2025 HumanAbility

	diverse backgrounds and assists in the facilitation of adventure-based learning activities • communicates clearly and concisely with the group and implements strategies which encourage co-operation and develop trust • conducts a debriefing process which includes strategies and tasks to facilitate and enhance learning outcomes for individuals and the group • evaluates own performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure assisting in the facilitation of multiple adventure-based learning activities to demonstrate competency and consistency of performance. Assessment must also ensure access to: • diverse groups of participants to take part in adventure-based learning activities • an environment suitable for the conduct of adventure-based activities, this may include outdoor or indoor activities • equipment and resources required for adventure-based learning activities.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of participation in planning, facilitating and debriefing processes under the guidance of an activity leader • oral and or written questioning to assess knowledge of the application of legislation and organisational policies and procedures required to maintain participant safety • third-party reports from a supervisor and or leader detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • adventure activity specific units of competency.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Phases of an adventure-based learning cycle may include:

- ice breaking and briefing
- goal setting
- development of trust
- adventure activity participation
- processing and debriefing
- transfer of learning.

Safety issues may include:

- physical
- mental
- emotional
- individual or group.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations
- marine regulations.

Organisational policies and procedures may include:

- occupational health and safety
- time and budget constraints
- debriefing procedures
- risk management
- communication protocols
- minimal impact environmental codes
- code of ethics.

Feedback may include:

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to independently facilitate learning through adventure activities. This unit focuses on the ability to plan and conduct activities demonstrating a range of basic facilitation techniques.

Application of the Unit

This unit applies to those who work as facilitators of adventure-based learning activities in a range of settings. This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	with the evidence guide.
1. Plan and prepare for adventure activity	1.1. Identify individual and or group ***learning outcomes*** to inform the planning and design of activities. 1.2. Establish a program and sequence of activities according to participant's needs, learning outcomes, ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Select an adventure environment according to participant's needs, learning outcomes, relevant legislation and organisational policies and procedures. 1.4. Determine factors affecting a participant's perception of risk and plan activities with a balance between real and perceived risk. 1.5. Select and access equipment and resources according to ***contextual issues*** and organisational policies and procedures. 1.6. Confirm all staff conducting the activities are suitably qualified.
2. Plan for progression and transfer of learning.	2.1. Select a ***model of adventure or experiential learning*** and apply ***phases within the model*** to program to meet learning outcomes. 2.2. Inform participants of any potential transfer of learning to different environments and contexts. 2.3. Incorporate measures for monitoring individual and group ***holistic development*** in planned adventure activities. 2.4. Establish ***contingency plans*** for adventure activities according to organisational policies and procedures.
3. Manage learning activities in an outdoor environment.	3.1. Implement minimal impact practices and display a respect and understanding of the outdoor environment. 3.2. Monitor the physical and emotional safety of individuals and the group. 3.3. Implement ***facilitation approaches*** that allow individuals to share in the responsibility of their learning and safety. 3.4. Identify potential situations of physical and emotional danger and take action to manage these dangers. 3.5. Re-evaluate participant's needs throughout activities and make adjustments as required.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.6. Reinforce the value of ***individual differences*** in terms of their contribution within the group to stimulate collaborative work between participants.
4. Evaluate adventure-based learning activities.	4.1. Facilitate individuals and group to identify their future learning needs. 4.2. Use a suitable facilitation activity to achieve the development of personal and group ***action plans***. 4.3. Evaluate and review outcomes for all participants against individual participant goals for the program and activity. 4.4. Obtain feedback from assistant facilitators on program and activity delivery. 4.5. Develop strategies for improvement in personal skills and programming according to participant feedback, peer review and evaluation reports.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- planning and organising skills to:
  - identify individual and group learning needs, goals and outcomes
  - establish a program and sequence of activities
  - locate suitable adventure-based learning environment
  - source equipment and resources
  - select suitable facilitation approaches and activities
- problem-solving skills to:
  - anticipate potential problems and consequences and establish contingency plans
  - sequence components within adventure activities
  - identify and manage possible physical and emotional dangers
  - respond to situational demands and make changes to activities where required
- communication and interpersonal skills to:
  - interact with and facilitate different groups in a variety of situations and circumstances
  - brief groups on safety issues, activity requirements and behaviour
  - provide active listening, questioning and feedback throughout activity
- self management skills to assess feedback and review and reflect on activity and personal performance.

© Commonwealth of Australia, 2025 HumanAbility

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all activities
- basic adventure-based learning cycle to enable appropriate sequencing of activities and debriefing
- facilitation approaches and activities applicable to a range of needs, ages and learning abilities to enhance learning outcomes
- theories on the transfer of learning and ways of transferring learning in different contexts to meet individual and group needs
- physical and psychological needs of participants to plan suitable adventure-based activities
- factors affecting participant's perception of risk to plan activities with a balance between real and perceived risk
- models and stages of group formation to enable effective and constructive group support
- factors impacting on group dynamics to enable response to group behaviour
- motivation techniques and strategies to keep participants engaged and challenged
- forms of reflective learning and facilitation to improve on various aspects of adventure-based learning activities and programming
- adventure environments, equipment and resources required to facilitate adventure-based learning activities.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans and designs a sequence of adventure activities according to individual and group learning outcomes, needs and goals
- interacts effectively with group members from diverse backgrounds and facilitates adventure-based learning activities which evidence positive group dynamics
- monitors individual and group progression throughout activities and implements contingency plans where required
- evaluates and reflects on own performance as a facilitator to identify strengths, weaknesses and areas

© Commonwealth of Australia, 2025 HumanAbility

	that need improvement.
Context of and specific resources for assessment	Assessment must ensure facilitation of adventure-based learning activities on multiple occasions to enable demonstration of competency and consistency of performance. Assessment must also ensure access to: • diverse groups of participants to take part in adventure-based learning activities • an environment suitable for the conduct of adventure-based activities, this may include outdoor or indoor activities • equipment and resources required for adventure-based learning activities.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of planning processes, such as determining learning outcomes and assessing participant's needs • observation of safe facilitation of adventure-based learning programs for a variety of individuals and groups • oral and or written questioning to assess knowledge of facilitation approaches and activities • third-party reports from a supervisor and or leader detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example: • adventure activity specific units of competency.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Learning outcomes may include:	• recreational • educational

© Commonwealth of Australia, 2025 HumanAbility

	• developmental • therapeutic • vocational.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Organisational policies and procedures may include:	• occupational health and safety • time and budget constraints • support personnel • use, maintenance and storage of equipment and resources • risk management • communication protocols • minimal impact environmental codes • code of ethics.
Contextual issues may include:	• weather conditions; including times • season • transport • location • trip distance and duration • group objectives • group size.
Model of adventure or experiential learning may include:	• linear • cyclical • spiral • nested loop.
Phases within the model may include:	• diagnosis • design • delivery • debriefing • detachment.
Holistic development may include:	• physical • emotional • social • intellectual • spiritual.
Contingency plans may include:	• change in weather and conditions • equipment failure • unavailability of equipment or suitable site.
Facilitation approaches may	• funnelling

© Commonwealth of Australia, 2025 HumanAbility

include:	• cognitive hierarchy • challenge by choice • working agreements.
Individual differences may include:	• gender • language • age • life experiences and background • mental or physical ability • culture and values.
Action plans may include:	• short term • long term.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Elements describe the essential outcomes of a unit of competency	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide
1. Design adventure-based learning programs.	1.1. Consult with participant to determine required program outcomes. 1.2. Access ***external services*** where required to assist participants whose needs require specialist skills. 1.3. Design activities to meet the ***complex learning needs*** of individuals and the group according to ***relevant legislation*** and ***organisational policies and procedures***. 1.4. Determine facilitation techniques within the proposed program to reflect the stages of group development.
2. Apply isomorphic framing and indirect frontloading.	2.1. Determine the appropriate application of isomorphic framing adventure-based program facilitation. 2.2. Create and incorporate an isomorphic framework that meets program outcomes. 2.3. Determine the appropriate application of indirect frontloading to adventure-based program facilitation. 2.4. Identify and address relevant ethical issues related to the use of indirect frontloading.
3. Evaluate adventure-based learning programs.	3.1. Develop or access ***adventure-based learning program*** evaluation tools according to organisational policies and procedures. 3.2. Conduct evaluation with the assistance of peer and, where relevant, external professional supervision. 3.3. Use feedback from others, in consultation with professional supervision, to identify areas where own professional practice can be improved and ways of improving.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- planning and organising skills to:
  - identify program outcomes and participant's learning needs
  - design activities that reflect stages of development and meet learning needs and outcomes
  - conduct adventure-based learning programs using advanced facilitation techniques including isomorphic framing and indirect frontloading
  - evaluate adventure-based learning programs
- problem-solving skills to:
  - develop activities that meet complex learning needs and safety requirements
  - identify potential problems and develop contingency plans
  - identify advantages and disadvantages of using isomorphic framing plans and the implications of using indirect frontloading techniques
- communication and interpersonal skills to:
  - interact with and facilitate different groups in a variety of situations and circumstances
  - collaborate with colleagues and share leadership roles
- self management skills to:
  - determine effectiveness of program and activities
  - review performance and identify potential improvement in personal skills and programming.

Required knowledge

- legislation and organisational policies and procedures to enable safe and ethical conduct of all activities
- advantages and disadvantages of isomorphic framing and indirect frontloading to enable their appropriate application to the conduct of adventure-based learning programs
- factors affecting participant's perception of risk to plan activities with a balance between real and perceived risk
- adventure-based learning cycle to enable appropriate sequencing of activities within programs
- theories on the transfer of learning to enable learning to be transferred in different adventure-based learning contexts
- principles of evaluation to enable the design or implementation of evaluation tools and analysis of results
- physical and psychological needs of participants to enable the design of appropriate programs.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • consults with participants and professional practitioners, where required, to identify individual and group learning needs • designs challenging and stimulating adventure-based learning programs to meet complex learning needs and outcomes • conducts adventure-based learning programs using isomorphic framing and indirect frontloading techniques to meet complex learning needs of participants • evaluates and reflects on own performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure design and implementation of multiple adventure-based learning programs that meet complex learning needs and outcomes to demonstrate competency and consistency of performance. Assessment must also ensure access to: • diverse groups of participants with complex learning needs to take part in adventure-based learning activities • an environment suitable for the conduct of indoor or outdoor adventure-based activities • equipment and resources required to facilitate adventure-based learning activities.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • portfolio of adventure-based learning programs incorporating the appropriate use of isomorphic framing and frontloading techniques to enhance program outcomes • observation of safe facilitation of adventure-based learning programs for a variety of individuals and groups • portfolio of program evaluations identifying

strengths, weaknesses and required improvements
- third-party reports from a supervisor and or leader detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- activity specific units of competency.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

External services may include:
- counsellors
- specialist teachers
- human resource officers
- therapists.

Complex learning needs may include:
- youth at risk
- offenders
- learning difficulties
- corporate clients.

Relevant legislation may include:
- occupational health and safety
- permits or permission for access
- environmental regulations
- marine regulations.

Organisational policies and procedures may include:
- occupational health and safety
- time and budget constraints
- support personnel
- use, maintenance and storage of equipment and resources
- risk management
- communication protocols
- minimal impact environmental codes
- code of ethics.

Adventure-based learning programs may include:
- indoor
- outdoor
- experiential focus

© Commonwealth of Australia, 2025 HumanAbility

- personal growth focus.

SISOABN303A Apply single pitch abseiling skills on natural surfaces

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to independently abseil in single pitch situations on natural surfaces. This unit includes the application of belaying skills for the protection of self and others. It does not cover setting up or rigging an abseil.

Application of the Unit

This unit applies to those working as assistant abseiling leaders or support staff under supervision in a range of controlled natural conditions.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Select and utilise appropriate equipment.	1.1. Use ***equipment*** in a safe and efficient manner. 1.2. Adjust and fit equipment to ensure personal comfort and safety. 1.3. Complete all necessary personal and equipment ***safety checks***, prior to commencing abseiling and or belaying. 1.4. Attach ***descending device*** to the abseil rope being used. 1.5. Apply safety procedures at top and bottom of descent site to minimise risk.
2. Demonstrate abseiling technique.	2.1. Display correct posture and technique while abseiling, using single and double rope. 2.2. Maintain effective ***communication systems*** between abseiler and belayer throughout the descent. 2.3. Apply safe and correct ***abseiling techniques***, to minimise injury in the event of a fall. 2.4. Negotiate simple ***obstacles*** and avoid or remove hazards to descend in a controlled manner. 2.5. Demonstrate techniques that minimise damage to the environment while abseiling.
3. Demonstrate belaying technique.	3.1. Establish belaying position by moving body in relation to ***belay device*** that allows effective use of ***belay system***. 3.2. Demonstrate a safe and efficient escape from belay system, and attachment of belayer to an anchor to minimise movement during a fall. 3.3. Maintain rope tension to ensure fall distance is minimised whilst not restricting abseiler movement. 3.4. Monitor abseiler progress constantly and respond appropriately to abseiler calls. 3.5. Arrest falls promptly using technique suitable to the belaying device and situation. 3.6. Identify a situation where a self belay system or bottom brake system would be required. 3.7. Demonstrate use of a self belay or bottom brake

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	system to maintain safety in the event of a fall.
4. Evaluate abseiling activity.	4.1. Evaluate ***relevant aspects*** of abseiling and belaying. 4.2. Identify improvements for future abseiling activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to inform progress and interact with abseiler and or belayer whilst participating in activity
- problem-solving skills to:
  - negotiate obstacles and hazards when abseiling
  - assess application of rope tension when belaying
- rope handling skills to maintain adequate rope tension when belaying
- self belaying or bottom brake skills to maintain personal safety in the absence of top rope belay
- Tie off skills to protect or safeguard abseilier when belayer escapes from system.

Required knowledge

- minimal impact codes to ensure protection of the environment
- equipment types, characteristics and technology used for abseiling on natural surfaces, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during abseiling on single pitch natural surfaces
- belay techniques and devices appropriate for single pitch surfaces
- technical abseiling knowledge, such as techniques and procedures to suit the features of the surface
- basic weather and environmental information to ascertain possible conditions and their affect on the activity
- hazards that may be experienced in a natural abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- correctly fits equipment independently and carries out safety checks to ensure effective working order
- arranges a suitable communication system with abseiler, when belaying, to monitor progress
- negotiates obstacles and hazards during abseiling, and adapts quickly to problems or issues that may arise to ensure safety of self and other participants
- evaluates and reflects on own abseiling and belaying performance to identify strengths, weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure participation in abseiling and belaying activities on single pitch natural surfaces that are of a sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- a cliff with simple obstacles and features that allow participant to demonstrate abseiling skills
- other abseiling participants, to assist with belaying
- equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves and karabiners.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of safe participation and demonstration of abseiling and belaying skills, such as communicating with abseiler or belayer to inform of progress
- observation of dealing with contingencies, such as equipment failure or change in weather
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABN304A Establish ropes for single pitch

© Commonwealth of Australia, 2025 HumanAbility

abseiling on natural surfaces
- SISOVTR301A Perform vertical rescues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Equipment may include:
- helmets
- protective clothing
- karabiners
- harnesses
- gloves
- belay device
- rope
- anchors
- footwear.

Safety checks may include:
- A - anchors - secure and suitable to application
- B - buckles - locked as per manufacturers recommendations
- C - connectors - locked, secured and orientated
- D - devices - threaded correctly and secured
- E - everything else including end of rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured
- F - friend - cross check.

Descending device may include:
- auto locking devices
- circular devices
- plate devices
- tubular devices
- improvised devices
- inline devices.

Communication system may include:
- calls
- radio
- hand signals
- whistles.

© Commonwealth of Australia, 2025 HumanAbility

Abseiling techniques may include:
- walking backwards
- bouncing backwards
- forward rundowns.

Obstacles may include:
- ledges
- trees
- water
- overhangs.

Belay device may include:
- plate devices
- auto locking devices
- tubular devices.

Belay system may include:
- top belay
- bottom brake
- self belay.

Relevant aspects may include:
- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed
- natural surface features
- abseiling techniques.

1. Utilise appropriate equipment.	1.1. Use ***equipment*** in a safe and efficient manner. 1.2. Adjust and fit equipment to ensure personal comfort and safety. 1.3. Complete all necessary personal and equipment ***safety checks***, in accordance with standard ***procedures*** prior to commencing. 1.4. Demonstrate a safe and efficient escape from belay system, and attachment of belayer to an anchor point within the system to minimise movement during a fall.
2. Demonstrate suitable belaying technique.	2.1. Arrange a ***communication system*** with abseiler. 2.2. Establish belaying position by moving body in relation to ***belay device*** that allows effective use of belay system and minimises movement during a fall. 2.3. Maintain rope slack to ensure fall distance is minimised whilst not restricting abseiler movement. 2.4. Monitor abseiler progress constantly and respond appropriately to abseiler calls. 2.5. Arrest falls promptly using technique suitable to the belaying device and or situation.
3. Evaluate the belaying activity.	3.1. Evaluate ***relevant aspects*** of the belaying activity. 3.2. Identify improvements for future belays.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to interact with abseiler whilst belaying to enable safe conduct of the abseiling activity
- problem-solving skills to assess and apply rope tension requirements
- rope handling skills to maintain adequate rope tension when belaying.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of all activities and legal access

© Commonwealth of Australia, 2025 HumanAbility

- minimal impact codes to ensure protection of the environment
- equipment types, characteristics and technology used for single rope belay systems and bottom brake systems, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- care and maintenance of abseiling equipment, such as dynamic and static ropes, to ensure prolonged life span and safety requirements
- common communication methods and calls used between abseilers and belayers
- belay techniques and devices appropriate for single rope belay systems
- technical abseiling knowledge, such as abseiling techniques and procedures to suit the features of the surface
- basic weather and environmental information to ascertain possible conditions and their affect on the activity
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • correctly fits equipment, such as attachment of belayer to an anchor, and carries out safety checks to ensure effective working order • arranges a suitable communication system with abseiler, monitors their progress and responds to abseilers calls appropriately • follows instructions to accurately apply knowledge and demonstrate belaying techniques, such as maintaining appropriate rope tension • adapts quickly to problems or issues that may arise during abseiling or belaying, such as movement restriction of the abseiler due to inappropriate rope tension, and makes appropriate adjustments to ensure safety of abseiler • evaluates and reflects on own belaying performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in belaying, using a single rope belay system and a bottom brake system,

© Commonwealth of Australia, 2025 HumanAbility

that is of a sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding belaying techniques and potential hazards of artificial and natural surfaces, to plan for the activity
- a suitable single pitch natural and or artificial abseiling site with simple obstacles and features that allow participant to demonstrate simple abseiling and belaying skills
- a qualified abseiling guide or instructor
- equipment such as belay devices, prusik loops, sewn slings, ropes, harness, helmet, karabiners and safety equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of equipment usage, and safety checks to ensure correct equipment application
- questioning to assess knowledge of appropriate rope tension to minimise abseiler fall distance
- observation of safe participation and demonstration of belaying skills, such as communication with abseiler and constant monitoring of abseiler
- observation of dealing with contingencies, such as equipment failure or change in weather
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABN201A Demonstrate abseiling skills on natural surfaces

or

- SISOABA201A Demonstrate abseiling skills on artificial surfaces

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised

© Commonwealth of Australia, 2025 HumanAbility

wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Equipment may include:

- rope
- belay device
- prusik loops
- sewn slings
- karabiners
- helmets
- harness.

Safety checks may include:

- A - anchors - secure and suitable to application
- B - buckles - locked as per manufacturers recommendations
- C - connector - locked, secured and orientated
- D - devices - threaded correctly and secured
- E - organisation specific procedures including; end or rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured.
- F - friend - cross check.

Procedures may include:

- wearing of helmets
- attaching to safety ropes for top belay
- positioning out of direct line of rock fall.

Communication system may include:

- calls
- radio
- hand signals
- whistles.

Belay device may include:

- plate devices
- auto locking devices
- tubular devices.

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique assessment technique
- group feedback

© Commonwealth of Australia, 2025 HumanAbility

- directing techniques
- rescue techniques employed.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to independently select fixed or natural anchors for the attachment of ropes and equipment for belays, such as tapes and karabiners. These anchors are to be used to establish belay systems and ropes on single-pitch natural abseiling surfaces and must be able to accommodate different belayer and abseiler abilities.

Application of the Unit

This unit applies to those required to establish ropes for abseiling activities.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Select suitable equipment for abseiling and belay system.	1.1. Select an ***abseiling and belay system*** according to ***contextual issues*** and to minimise ***environmental impact***. 1.2. Identify and select ***equipment*** according to ***relevant***. ***legislation*** and ***organisational policies and procedures*** 1.3. Select ***anchors*** that meet the requirements of the abseil and abilities of the ***participants***. 1.4. Assess ***condition of the anchors***, including performance under ***likely load***. 1.5. Choose a ***belay device*** that is suitable to the natural surface conditions and belayer's ability. 1.6. Complete all necessary equipment ***safety checks***, and action unsafe equipment according to organisational policies and procedures.
2. Set up belay system.	2.1. Rig multiple anchors, ensuring equalisation and minimal shock loading. 2.2. Tie ***knots*** and rig ropes suitable for the type of belay system established. 2.3. Establish a belay from which the belayer is able to escape and safely perform a rescue. 2.4. Avoid or remove belay ***hazards***, to maintain ***safety of belayer***. 2.5. Determine the need for, and establish, back up belay systems.
3. Rig rope pitches.	3.1. Identify safe access to and egress from the site. 3.2. Identify ascent and descent route appropriate to context. 3.3. Select and tie knots suitable for the type of system established and for potential retrieval or rescue situations.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- language and literacy skills to:
  - implement organisational policies and procedures
  - comply with legislative requirements
- problem-solving skills to select appropriate anchors and belay systems for the context and conditions of abseiling activity
- rope handling and knot tying skills to rig ropes and anchors adequately and safely
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable the safe conduct of all abseiling activities
- minimal impact codes to enable protection of the environment
- equipment types, characteristics and technology used to establish belays for abseiling on natural surfaces
- care and maintenance of equipment to ensure prolonged life span and safety requirements, as advised by the manufacturer's specifications and recommendations for equipment use
- belay and anchor systems appropriate for single pitch natural surfaces
- technical abseiling and equipment knowledge to establish top, self belay and bottom brake
- types of knots, their advantages and disadvantages and their impact on roping activities
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • independently selects appropriate equipment and carries out safety checks to ensure effective working order

© Commonwealth of Australia, 2025 HumanAbility

- uses discretion and judgement to determine belay system required for abseiling in single pitch contexts
- differentiates between the different types of belay systems, anchors and knots and their suitability to different rigging situations
- determines the need for, and establishes belay systems to ensure safety of self and other participants.

Context of and specific resources for assessment

Assessment must ensure participation in rigging of equipment for different situations to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding abseiling and belaying equipment
- single pitch cliff sites suitable for the participants with simple obstacles and features that allow participant to demonstrate rigging skills
- other abseiling participants, to assist in belaying and rigging
- equipment such as harnesses, belay systems, descending devices, ropes, karabiners and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to ensure safe and appropriate use of all abseiling equipment
- observation of safe participation and demonstration of setting up belay systems suitable to different contexts and participants
- observation of dealing with contingencies, such as equipment failure
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABN303A Apply single pitch abseiling skills on natural surfaces.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Abseiling and belay system may include:	• twin rope • single rope • top belay • self belay • bottom brake.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Environmental impact may include:	• rock dislodgement • compacting of soil • damage to flora, fauna, and the environment • effect on other users of the site.
Equipment may include:	• ropes • tape slings • karabiners • rope protectors • belay devices.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational policies and procedures may include:	• occupational health and safety • use and maintenance of equipment • emergency procedures • code of ethics.
Anchors may include:	• trees • threads • bolts • chains • bollards • boulders

© Commonwealth of Australia, 2025 HumanAbility

	• pitons.
Participants may include:	• experienced • inexperienced • adults • children.
Condition of the anchors may include:	• age • location • wear • decay • corrosion • environmental stress • insect damage.
Likely load may include:	• group size • set up • abseiler ability • technique • possible forces generated during a fall • type of abseil conducted.
Belay device may include:	• plate devices • auto-locking devices • tubular devices • improvised device.
Safety checks may include:	• corrosion • abrasion • impact • aging • cracks • deformities • fissures.
Knots may include:	• end-of-rope knots • mid-rope knots • rope joining knots • tape knot.
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Safety of belayer must include:	• attachment to anchor or alternate safety system

© Commonwealth of Australia, 2025 HumanAbility

- positioning out of direct line of rock or equipment fall.

SISOABN305A Guide abseiling on single pitch natural surfaces

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to guide participants in a single pitch abseiling activity on a natural surface. This unit focuses on the application of planning skills to make suitable arrangements to guide a group through an abseiling activity.

Application of the Unit

This unit applies to those working as abseiling guides. Activities are conducted in a range of natural single pitch sites that have access to the top and bottom of the pitch.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan abseiling activity.	1.1. Determine the ***condition of participants*** prior to participation in the activity. 1.2. Develop an activity ***plan***, according to ***relevant legislation*** and ***organisational policies and procedures***, to meet participant's needs. 1.3. Select an appropriate activity site or location that is suitable for participants and meets ***activity objectives***, relevant legislation and organisational policies and procedures. 1.4. Identify ***hazards*** associated with abseiling on ***natural surfaces*** and minimise ***risks*** to ensure personal safety of participants. 1.5. Access ***relevant sources*** to interpret detailed ***weather and environmental information*** to determine activity plan. 1.6. Determine ***food and water requirements*** according to ***principles of nutrition*** and ***contextual issues*** of the activity. 1.7. Determine most appropriate ***belay system*** according to participant's abilities and conditions at the site. 1.8. Inform ***appropriate authorities*** before commencing the abseiling activity as required.
2. Select equipment for the group.	2.1. Select ***equipment*** according to contextual issues and organisational policies and procedures and check serviceability. 2.2. Assess equipment for safety and suitability and adjust and fit to ensure personal comfort. 2.3. Establish anchors and ropes, ensuring they are in correct position for the activity. 2.4. Check safety and rescue equipment to ensure suitability to the group and the abseil.
3. Brief participants.	3.1. Communicate instructions and ***relevant information*** about the abseiling activity in a manner suitable to the participants. 3.2. Demonstrate correct abseiling and belaying techniques. 3.3. Establish a suitable ***communication system*** for participants to use while abseiling and belaying.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.4. Outline ***safety checks***, safe areas and boundaries for the activity. 3.5. Check and confirm participants are properly equipped for the abseil.
4. Supervise abseiling activity.	4.1. Provide clear and concise direction and advice to group during the activity. 4.2. Monitor abseiling and belaying techniques to ensure safety of participants. 4.3. Monitor individual ***participant's performance*** and provide appropriate feedback. 4.4. Implement appropriate modifications to activity in regard to all ***variable factors*** that are monitored. 4.5. Use positive encouragement throughout activity, and encourage feedback and questioning from group members.
5. Complete post-activity responsibilities.	5.1. Retrieve, inspect and store equipment according to organisational policies and procedures. 5.2. Evaluate ***relevant aspects*** of abseiling activity. 5.3. Identify potential areas of improvement for future abseiling activities. 5.4. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an abseiling activity that meets their needs
  - convey information about the safety aspects of the activity
  - interact with participants to create a safe and positive abseiling environment
- problem-solving skills to:
  - plan a suitable abseiling activity according to participant's needs and abilities
  - make decisions affecting activity such as potential hazards and impact of weather
  - respond appropriately to non-routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and natural pitch suitable

© Commonwealth of Australia, 2025 HumanAbility

for the participants
    - organise participants into manageable groups for abseiling and belaying
- language, numeracy and literacy skills to:
    - produce an activity plan for the abseiling activity
    - perform basic calculations to determine equipment needs based on height of pitch
    - complete post activity participant and self evaluations
- effective and efficient personal abseiling skills to demonstrate and explain abseiling and belaying techniques to participants
- rope handling, retrieval and knot tying skills to rig ropes and anchors adequately and safely
- contingency and rescue skills to recover participants from abseiling incident
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of abseiling activities
- minimal impact codes to ensure protection of the environment
- site specific information to assist in the planning process and enable management of potential abseiling hazards, and any special restrictions applying to the area
- equipment types, characteristics and technology used for abseiling on natural surfaces, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- clothing and footwear requirements for abseiling activities to ensure comfort and safety
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements
- nutritional requirements when abseiling to maintain wellbeing
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during abseiling on single pitch natural surfaces
- belay systems, devices and anchors appropriate for single pitch natural surfaces
- technical abseiling knowledge, such as techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the activity
- hazards that may be experienced in a natural abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans activity in accordance with participants needs, relevant legislation, organisational policy and procedures
- briefs, guides and monitors groups in a safe and professional manner
- applies effective contingency management techniques to deal with a range of problems and issues that may arise during the abseiling activity
- encourages and responds to group feedback and evaluates and reflects on own guiding performance to identify strengths, weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure leading abseiling activities that reflect the needs of a range of participants and are of sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding participants and location to accurately plan, guide and document abseiling activities for a variety of participants
- a natural single pitch abseiling site suitable for the participants
- a group of participants to take part in the abseiling activity
- equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners, food and water, and safety and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of interaction with a group of participants, including conveying information for safe participation
- oral and written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling

© Commonwealth of Australia, 2025 HumanAbility

activities
- observation of dealing with contingencies such as changing weather conditions and equipment failure
- review of abseiling activity plans
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOVTR301A Perform vertical rescues
- SISOABN303A Apply single pitch abseiling skills on natural surfaces
- SISOABN304A Establish ropes for single pitch abseiling on natural surfaces

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Condition of participants may include:
- skill level
- previous experience
- physical capabilities and fitness level
- age
- injuries and illnesses.

Plan may include:
- activity aims and objectives
- date, time and duration
- location
- guide and participant ratios
- resources
- equipment
- food and water
- weather details
- participant information
- safety requirements
- risk management plan.

Relevant legislation may include:
- occupational health and safety
- permits or permission for access

© Commonwealth of Australia, 2025 HumanAbility

	• environmental regulations
Organisational policies and procedures may include:	• occupational health and safety • time and budget constraints • use and maintenance of equipment • communication protocols • confidentiality of participant information • guide and participant ratios • emergency and safety procedures • code of ethics.
Activity objectives may include:	• self improvement • fitness • social interaction • education
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Natural surfaces may include:	• cliffs • boulders
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment failure.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions.
Food and water requirements may include:	• perishability • packaging

© Commonwealth of Australia, 2025 HumanAbility

	• storage.
Principles of nutrition may include:	• food groups • dietary guidelines.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Belay system may include:	• top belay • bottom brake • self belay.
Appropriate authorities may include:	• authorities • supervisors
Equipment may include:	• abseiling equipment: • safety equipment • rescue equipment.
Relevant information may include:	• personal equipment requirements • safety procedures • possible hazards • environmental impact minimisation • abseiling and belaying techniques • objectives • rules and codes • responsible and safe behaviour.
Communication system may include:	• calls • radio • hand signals • whistles.
Safety checks may include:	• A - anchors - secure and suitable to application • B - buckles - locked as per manufacturers recommendations • C - connectors - locked, secured and orientated • D - devices - threaded correctly and secured • E - everything else including end of rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured • F - friend - cross check.

© Commonwealth of Australia, 2025 HumanAbility

Participant's performance may include:	• use of appropriate communication system • abseiling technique • attitude • negotiation of hazards • use of equipment.
Variable factors may include:	• change of weather • equipment failure • participant's needs • abseiling conditions.
Relevant aspects may include:	• objectives • planning process • activity site • weather • equipment selection • clothing selection • food selection • instructional content • instructional technique • assessment technique • group feedback • directing techniques • rescue techniques employed.

Access ***relevant sources*** to interpret detailed ***weather and environmental information*** to determine activity plan. 1.5. Establish a suitable ***communication system*** to use with belayer while abseiling.
2. Select and utilise appropriate equipment.	2.1. Select and use ***equipment*** in a safe and efficient manner, after consideration of ***contextual issues***. 2.2. Adjust and fit equipment to ensure personal comfort and safety. 2.3. Complete all necessary personal and equipment ***safety checks*** prior to commencement according to organisational policies and procedures. 2.4. Select and attach ***descending device*** to the rope, suitable to the ***belay system*** being used. 2.5. Apply safety procedures at top and bottom of descent site to minimise risk.
3. Demonstrate abseiling technique.	3.1. Display correct posture and technique while abseiling, using single and double rope. 3.2. Maintain effective communication between abseiler and belayer throughout the descent. 3.3. Apply safe and correct ***abseiling techniques*** according to the belay system being used to minimise injury in the event of a fall. 3.4. Negotiate ***obstacles*** and avoid or remove hazards to descend in a controlled manner. 3.5. Demonstrate techniques that minimise damage to the environment while abseiling. 3.6. Retrieve ropes upon completion of an abseil.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
4. Evaluate abseiling activity.	4.1. Evaluate ***relevant aspects*** of abseiling. 4.2. Identify improvements for future abseiling activities.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to inform progress and interact with belayer
- problem-solving skills to identify and safely negotiate obstacles and hazards
- rope handling skills to manage and retrieve ropes
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of all activities
- minimal impact codes to ensure protection of the environment
- equipment types, characteristics and technology used for abseiling on natural surfaces, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements
- knots that are appropriate to the abseiling activity to manage risk
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during multi pitch abseiling on a variety of natural surfaces according to the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the activity
- hazards that may be experienced in a natural abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 HumanAbility

Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • selects and fits equipment independently and carries out safety checks to ensure effective working order • arranges a suitable communication system with belayer, when abseiling, to monitor progress • applies abseiling techniques and negotiates obstacles and hazards during to ensure safety of self and other participants • evaluates and reflects on own abseiling performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in multiple abseiling activities on multi pitch natural surfaces that are of sufficient duration and breadth to demonstrate competency and consistency of performance. Assessment must also include access to: • resources and information regarding abseiling to accurately plan for the activity • a variety of multi pitch natural abseiling sites with obstacles and features that allow participant to demonstrate abseiling skills • other abseiling participants, to assist with belaying • equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners and first aid equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling activities • observation of safe participation and demonstration of abseiling skills, such as communicating with belayer to inform of progress • observation of dealing with contingencies, such as equipment failure or change in weather • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the

© Commonwealth of Australia, 2025 HumanAbility

industry sector, workplace and job role is recommended, for example:

- SISOABN407A Establish ropes for multi pitch abseiling on natural surfaces
- SISOVTR402A Perform complex vertical rescues.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Food and water requirements may include:	• perishability • packaging • storage.
Principles of nutrition may include:	• food groups • dietary guidelines.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Organisational policies and procedures may include:	• occupational health and safety • use and maintenance of equipment • communication protocols • emergency procedures • code of ethics.
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment failure.

© Commonwealth of Australia, 2025 HumanAbility

Natural surfaces may include:	• cliffs • boulders
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • coastal patrol or coastguard • volunteer marine rescue • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions.
Communication system may include:	• calls • radio • hand signals • whistles.
Equipment may include:	• helmets • protective clothing • karabiners • harnesses • gloves • belay device • rope • anchors • spare equipment • first aid kit.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size
Safety checks may include:	• A - anchors - secure and suitable to application • B - buckles - locked as per manufacturers recommendations

- C - connectors - locked, secured and orientated
- D - devices - threaded correctly and secured
- E - everything else including end of rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured
- F - friend - cross check.

Descending device may include:

- auto locking devices
- circular devices
- plate devices
- tubular devices
- improvised devices
- inline devices.

Belay system may include:

- top belay
- bottom brake
- self belay.

Abseiling techniques may include:

- walking backwards
- bouncing backwards
- forward rundowns.

Obstacles may include:

- ledges
- trees
- falling water
- overhangs
- squeezes
- traverses.

Relevant aspects may include:

- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

SISOABN407A Establish ropes for multi pitch abseiling on natural surfaces

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to independently select anchors and rig ropes for multi pitch abseiling on natural surfaces. These anchors are to be used in establishing belay systems and rope pitches, and must be able to accommodate different belayer and abseiler abilities in multi pitch contexts.

Application of the Unit

This unit applies to those required to establish ropes for multi pitch abseiling activities.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

ELEMENT	PERFORMANCE CRITERIA
essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Select suitable equipment for belay system.	1.1. Select an *abseiling and* ***belay system*** according to ***contextual issues*** and to minimise ***environmental impact***. 1.2. Identify and select ***equipment*** according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Select ***anchors*** that meet the requirements of the abseil and abilities of the ***participants***. 1.4. Assess ***condition of the anchors***, including performance under ***likely load***. 1.5. Choose a ***belay device*** that is suitable to the ***natural surface conditions*** and belayer's ability. 1.6. Complete all necessary equipment ***safety checks***, according to organisational policies and procedures.
2. Set up belay system.	2.1. Rig multiple anchors, ensuring equalisation and minimal shock loading. 2.2. Tie ***knots*** and rig ropes suitable for the type of belay system established. 2.3. Establish a belay from which the belayer is able to escape and safely perform a rescue. 2.4. Avoid or remove belay ***hazards*** to maintain ***safety of belayer***. 2.5. Determine the need for, and establish, back up belay systems.
3. Rig rope pitches.	3.1. Identify safe access to and egress from the site according to relevant legislation. 3.2. Identify ascent and descent route appropriate to context. 3.3. Select and tie knots suitable for the type of system established and for potential retrieval or rescue situations.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- language and literacy skills to:
  - implement organisational policies and procedures
  - comply with legislative requirements
- problem-solving skills to select appropriate anchors and belay systems for the context and conditions
- rope handling, retrieval and knot tying skills to rig ropes and anchors adequately and safely
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of all activities
- minimal impact codes to enable protection of the environment
- equipment types, characteristics and technology used to establish belays for multi pitch abseiling on natural surfaces
- care and maintenance of equipment to ensure prolonged life span and safety requirements, as advised by the manufacturer's specifications and recommendations for equipment use
- belay and anchor systems appropriate for multi pitch natural abseiling surfaces
- technical abseiling and equipment knowledge to establish top, self belay and bottom belays
- types of knots, their advantages and disadvantages and their impact on roping activities
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • independently selects appropriate equipment and carries out safety checks to ensure effective working

© Commonwealth of Australia, 2025 HumanAbility

order
- uses discretion and judgement to determine belay system required for abseiling in multi pitch contexts
- differentiates between the types of belay systems, anchors and knots and their suitability to different rigging situations
- determines the need for, and establishes belay systems to ensure safety of self and other participants.

Context of and specific resources for assessment

Assessment must ensure participation in rigging of anchors and equipment for different situations to demonstrate competency and consistency of performance.

Assessment must also include access to:

- resources and information regarding abseiling and belaying equipment
- suitable natural multi pitch abseiling sites with varying qualities and features that allow participant to demonstrate rigging skills
- other abseiling participants, to assist in belaying and rigging
- equipment such as anchors, harnesses, belay systems, descending devices, slings, ropes, karabiners and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to ensure safe and appropriate use of all abseiling equipment
- observation of safe participation and demonstration of setting up belay systems suitable to different contexts and participants
- observation of dealing with contingencies, such as equipment failure
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABN406A Apply multi pitch abseiling skills on natural surfaces.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Abseiling and Belay system may include:	• twin rope • single rope • top belay • self belay • bottom brake.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Environmental impact may include:	• rock dislodgement • compacting of soil • damage to flora, fauna, and the environment • effect on other users of the site.
Equipment may include:	• ropes • tape slings • rope protectors • karabiners • belay devices.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations • marine regulations.
Organisational policies and procedures may include:	• occupational health and safety • use and maintenance of equipment • emergency procedures • code of ethics.
Anchors may include:	• trees • threads

© Commonwealth of Australia, 2025 HumanAbility

- bolts
- chains
- bollards
- boulders
- pitons.

Participants may include:

- experienced
- inexperienced
- adults
- children

Condition of the anchors may include:

- age
- location
- wear
- decay
- corrosion
- environmental stress
- insect damage.

Likely load may include:

- group size
- set up
- type of abseil conducted
- abseiler ability
- possible forces generated during a fall.

Belay device may include:

- A - anchors - secure and suitable to application
- B - buckles - locked as per manufacturers recommendations
- C - connectors - locked, secured and orientated
- D - devices - threaded correctly and secured
- E - everything else including end of rope knots, friction hitches, belayer ready, helmet chin strap, clothing, jewellery and hair secured
- F - friend - cross check.

Natural surface conditions may include:

- cliffs
- boulders

Safety checks may include:

- corrosion
- abrasion
- impact
- aging
- cracks
- deformities
- fissures.

Knots may include:

- end-of-rope knots
- mid-rope knots

© Commonwealth of Australia, 2025 HumanAbility

	• rope joining knots • tape knot.
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Safety of belayer may include:	• attachment to anchor or alternate safety system • positioning out of direct line of rock or equipment fall.

Unit Sector(s)

ELEMENT	PERFORMANCE CRITERIA
	4.2. Monitor individual ***participant's performance*** during abseiling session. 4.3. Apply clear and accurate ***instructional techniques*** to impart ***activity specific knowledge***, ***abseiling skills*** and ***safety and rescue procedures***. 4.4. Observe participants during abseiling and belaying and adjust or refine individual and or group technique as required. 4.5. Inform participants of ***opportunities*** to further develop their abseiling skills and knowledge.
5. Complete post-session responsibilities.	5.1. Retrieve, inspect, repair and store equipment according to organisational policies and procedures. 5.2. Provide opportunities for participants to identify their personal progress and satisfaction with the session, and give feedback as required. 5.3. Evaluate ***relevant aspects*** of abseiling session, and determine the level of learning achieved. 5.4. Identify potential areas of improvement for future abseiling instruction sessions.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an abseiling session that meets their needs
  - convey information about the safety aspects of the session
  - interact with participants to create a safe and positive abseiling environment
- problem-solving skills to:
  - plan a suitable abseiling session according to participant's needs and characteristics
  - address participant difficulties in developing abseiling techniques
  - anticipate and respond appropriately to non-routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and a natural pitch
  - monitor and evaluate progress
  - organise participants into manageable groups for abseiling and belaying
- language and literacy skills to:

© Commonwealth of Australia, 2025 HumanAbility

  - produce abseiling and instructional plans for the abseiling session,
  - complete post-session participant and self evaluations
- instructional techniques to suit a range of participant's needs and characteristics
- rope handling, retrieval and knot tying skills to rig ropes and anchors adequately and safely
- efficient and effective personal abseiling skills to demonstrate and explain abseiling and belaying techniques to participants
- first aid and emergency response skills appropriate to the location to enable initial response and or rescue in emergencies whilst instructing abseiling on natural surfaces.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of abseiling sessions
- minimal impact codes to ensure protection of the environment
- site specific information to assist in the planning process and enable management of potential abseiling hazards, and any special restrictions applying to the site
- equipment types, characteristics and technology used for abseiling on natural surfaces, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- clothing and footwear requirements for abseiling activities to ensure comfort and safety
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements
- instruction techniques and theories applicable to a range of ages and learning abilities
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during abseiling on single pitch natural surfaces
- belay systems, devices and anchors appropriate for single pitch natural surfaces
- technical single pitch abseiling knowledge, such as techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the session
- hazards that may be experienced in a natural abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

© Commonwealth of Australia, 2025 HumanAbility

Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans and delivers information, explanations and demonstrations for abseiling session to ensure activities are conducted safely according to participant's needs and characteristics • observes and monitors the progress of participants, provides constructive feedback and intervention and modifies instructional techniques and activities to improve participants abseiling performance as required • evaluates and reflects on own instruction performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure instruction of abseiling activities, using a variety of instructional techniques that reflect the needs and characteristics of a range of participants competency and consistency of performance. Assessment must also ensure access to: • resources and information regarding participants and location to accurately plan, instruct and document abseiling sessions for a variety of participants • a natural single pitch abseiling site suitable for the conduct of instructional sessions • a group of participants to take part in the abseiling session • equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners, food and water, and safety and first aid equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral and or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling activities during the session • observation of safe abseiling instruction, monitoring and adjustment according to participant's needs and characteristics • review of abseiling session plans • third-party reports from a supervisor detailing

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participant's needs and characteristics may include:

- age
- cultural factors
- fitness level and physical capabilities
- abseiling skills and knowledge
- injuries and illnesses.

Session's aims and objectives may include:

- developing abseiling on natural surface skills
- education
- development
- therapy
- fitness targets
- recreation.

Instructional plan may include:

- abseiling activities and drills
- duration of activities and drills.

Abseiling plan may include:

- session's aims and objectives
- date, time and duration
- location
- instructor and participant ratios
- resources and equipment
- food and water
- weather details
- participant information
- safety requirements
- risk management plan.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access

© Commonwealth of Australia, 2025 HumanAbility

- environmental regulations
- marine regulations.

Organisational policies and procedures may include:

- occupational health and safety
- time and budget constraints
- use and maintenance of equipment
- communication protocols
- confidentiality of participant information
- instructor and participant ratios
- emergency and safety procedures
- code of ethics.

Hazards may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

Natural surfaces may include:

- cliffs
- boulders

Risks may include:

- hypothermia
- heat exhaustion
- injuries
- exhaustion
- lost party or party member
- equipment failure.

Relevant sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- coastal patrol or coastguard
- volunteer marine rescue
- local knowledge

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings
- event warnings
- river levels
- synoptic charts
- high and low tide predictions.

Contingency plan may include:

- change location
- reduce duration
- cancel

ELEMENT	PERFORMANCE CRITERIA
	3.4. Outline ***safety checks***, safe areas and boundaries for the activity. 3.5. Check and confirm participants are properly equipped for the abseil.
4. Supervise abseiling activity.	4.1. Provide clear and concise direction and advice to group during the activity. 4.2. Monitor abseiling, belaying and back-up belaying techniques to ensure safety of participants. 4.3. Monitor individual ***participant's performance*** and provide appropriate feedback. 4.4. Implement appropriate modifications to activity in regard to all ***variable factors*** that are monitored. 4.5. Use positive encouragement throughout activity, and encourage feedback and questioning from group members.
5. Complete post activity responsibilities.	5.1. Retrieve, inspect and store equipment according to organisational policies and procedures. 5.2. Evaluate ***relevant aspects*** of abseiling activity. 5.3. Identify potential areas of improvement for future abseiling activities. 5.4. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an abseiling activity that meets their need
  - convey information about the safety aspects of the activity
  - interact with participants to create a safe and positive abseiling environment
- problem-solving skills to:
  - plan a suitable abseiling activity according to participant's needs and abilities
  - make decisions affecting activity such as potential hazards and impact of weather
  - respond appropriately to non-routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and natural pitch suitable

© Commonwealth of Australia, 2025 HumanAbility

for the participants
    - organise participants into manageable groups for abseiling and belaying
- language, numeracy and literacy skills to:
    - produce an activity plan for the abseiling activity
    - perform basic calculations to determine equipment needs based on height of pitch
    - complete post-activity participant and self evaluations
- effective and efficient personal abseiling skills to demonstrate and explain abseiling and belaying techniques to participants
- rope handling, retrieval and knot tying skills to rig ropes and anchors adequately and safely
- contingency and rescue skills to recover participants from abseiling incident
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe conduct of abseiling activities
- minimal impact codes to ensure protection of the environment
- site specific information to assist in the planning process and enable management of potential abseiling hazards, and any special restrictions applying to the area
- equipment types, characteristics and technology used for multi pitch abseiling on natural surfaces, the advantages and disadvantages of the range of equipment and factors affecting appropriate selection of equipment
- clothing and footwear requirements for abseiling activities to ensure comfort and safety
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements
- nutritional requirements when abseiling to maintain wellbeing
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during abseiling on multi pitch natural surfaces
- belay systems, devices and anchors appropriate for multi pitch natural surfaces
- technical abseiling knowledge, such as techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the activity
- hazards that may be experienced in a natural abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

© Commonwealth of Australia, 2025 HumanAbility

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans activity in accordance with participants needs, relevant legislation, organisational policy and procedures
- briefs, guides and monitors groups in a safe and professional manner
- applies effective contingency management techniques to deal with a range of problems and issues that may arise during the abseiling activity
- encourages and responds to group feedback and evaluates and reflects on own guiding performance to identify strengths, weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure leading abseiling activities that reflect the needs of a range of participants demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding participants and location to accurately plan, guide and document abseiling activities for a variety of participants
- a natural multi pitch abseiling site suitable for the participants
- a group of participants to take part in the abseiling activity
- equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners, food and water, and safety and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of interaction with a group of participants, including conveying information for safe participation
- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling

© Commonwealth of Australia, 2025 HumanAbility

activities
- observation of dealing with contingencies such as changing weather conditions and equipment failure
- review of abseiling activity plans
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABN407A Establish ropes for multi pitch abseiling on natural surfaces.
- SISOABN406A Apply multi pitch abseiling skills on natural surfaces
- SISOVTR301A Perform vertical rescues

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Condition of participants may include:
- skill level
- previous experience
- physical capabilities and fitness level
- age
- injuries and illnesses.

Plan may include:
- activity aims and objectives
- date, time and duration
- location
- guide and participant ratios
- resources
- equipment
- food and water
- weather details
- participant information
- safety requirements
- risk management plan.

Relevant legislation may include:
- occupational health and safety
- permits or permission for access

© Commonwealth of Australia, 2025 HumanAbility

- environmental regulations
- marine regulations.

Organisational policies and procedures may include:

- occupational health and safety
- time and budget constraints
- use and maintenance of equipment
- communication protocols
- confidentiality of participant information
- guide and participant ratios
- emergency and safety procedures
- code of ethics.

Activity objectives may include:

- self improvement
- meeting people
- fitness targets
- adventure and recreation.

Hazards may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

Natural surfaces may include:

- cliffs
- boulders

Risks may include:

- hypothermia
- heat exhaustion
- injuries
- exhaustion
- lost party or party member
- equipment failure.

Relevant sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- coastal patrol or coastguard
- volunteer marine rescue
- local knowledge.

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings
- event warnings
- river levels
- synoptic charts

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to instruct abseiling on multi pitch natural surfaces. This unit focuses on planning, instructing and evaluating an instructional abseiling session to enable participants to achieve the skills and knowledge required to participate independently in multi pitch abseiling on natural surfaces.

Application of the Unit

This unit applies to those working as abseiling instructors in a range of multi pitch natural conditions.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

unit of competency.	italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan an abseiling session.	1.1. Establish ***participant's needs and characteristics***. 1.2. Determine participant's current abseiling knowledge in order to determine the ***session's aims and objectives***. 1.3. Determine an appropriate ***instructional plan*** according to participant's needs and characteristics. 1.4. Develop an ***abseiling plan*** according to participant's needs and characteristics, ***relevant legislation*** and ***organisational policies and procedures***. 1.5. Identify potential ***hazards*** associated with multi pitch abseiling on ***natural surfaces*** and minimise ***risks***, according to organisational policies and procedures to ensure safety of participants. 1.6. Access ***relevant sources*** to interpret detailed ***weather and environmental information*** and determine ***contingency plans***.
2. Select and organise equipment and resources.	2.1. Select and access ***equipment*** and ***resources*** according to ***contextual issues*** and organisational policies and procedures and check serviceability. 2.2. Check equipment for safety and suitability, according to relevant legislation and manufacturer's recommendations. 2.3. Check contents of first aid and repair kits to ensure suitability to the location and activity.
3. Brief participants.	3.1. Communicate instructions and ***relevant information*** about the abseiling session in a manner appropriate to the participants. 3.2. Encourage participants to seek clarification, information and feedback as required during the session. 3.3. Establish a suitable ***communication system*** for participants to use while abseiling and belaying. 3.4. Inform participants of known and anticipated hazards, ***safety checks*** and appropriate behaviour.
4. Instruct an abseiling session.	4.1. Conduct introductory activities for participants, to reduce the risk of injury. 4.2. Monitor individual ***participant's performance*** during abseiling session.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	4.3. Apply clear and accurate ***instructional techniques*** to impart ***activity specific knowledge***, ***abseiling skills*** and ***safety and rescue procedures***.
	4.4. Observe participants during abseiling and belaying and adjust or refine individual and or group technique as required.
	4.5. Inform participants of ***opportunities*** to further develop their abseiling skills and knowledge.
5. Complete post session responsibilities.	5.1. Retrieve, inspect, repair and store equipment according to organisational policies and procedures.
	5.2. Provide opportunities for participants to identify their personal progress and satisfaction with the session, and give feedback as required.
	5.3. Evaluate ***relevant aspects*** of abseiling session, and determine the level of learning achieved.
	5.4. Identify potential areas of improvement for future abseiling instructional sessions.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an abseiling session that meets their needs
  - convey information about the safety aspects of the session
  - interact with participants to create a safe and positive abseiling environment
- problem-solving skills to:
  - plan a suitable abseiling session according to participant's needs and characteristics
  - address participant difficulties in developing abseiling techniques
  - anticipate and respond appropriately to non-routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and a natural pitch suitable for the participants
  - monitor and evaluate progress
  - organise participants into manageable groups for abseiling and belaying
- language and literacy skills to:
  - produce abseiling and instructional plans for the abseiling session,

© Commonwealth of Australia, 2025 HumanAbility

    - complete post session participant and self evaluations
- instructional techniques to suit a range of participant's needs and characteristics
- rope handling, retrieval and knot tying skills to rig ropes and anchors adequately and safely
- efficient and effective personal abseiling skills to demonstrate and explain abseiling and belaying techniques to participants
- first aid and emergency response skills appropriate to the location to enable initial response and or rescue in emergencies whilst instructing abseiling on natural surfaces.

Required knowledge

- relevant legislation and organisational policies and procedures to enable safe and non-discriminatory conduct of abseiling session
- minimal impact codes to ensure protection of the environment
- site specific information to assist in the planning process and enable management of potential abseiling hazards, and any special restrictions applying to the site
- equipment types, characteristics and technology used for abseiling on multi pitch natural surfaces, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- clothing and footwear requirements for abseiling activities to ensure comfort and safety
- care and maintenance of abseiling equipment to ensure prolonged life span and safety requirements
- instruction techniques and theories applicable to a range of ages and learning abilities
- abseiling techniques and common communication methods and calls used between abseilers and belayers to reduce risk during multi pitch abseiling on natural surfaces
- belay systems, devices and anchors appropriate for multi pitch natural surfaces
- technical multi-pitch abseiling knowledge, such as techniques and procedures to suit the features of the surface
- weather and environmental information to ascertain possible conditions and their affect on the session
- hazards that may be experienced in a natural abseiling environment
- emergency procedures, potential hazards and obstacles relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 HumanAbility

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans and delivers information, explanations and demonstrations for abseiling session to ensure activities are conducted safely according to participant's needs and characteristics
- observes and monitors the progress of participants, provides constructive feedback and intervention and modifies instructional techniques and activities to improve participants abseiling performance as required
- evaluates and reflects on own instruction performance to identify strengths, weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure instruction of abseiling activities using a variety of instructional techniques that reflect the needs and characteristics of a range of participants to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information regarding participants and location to accurately plan, instruct and document abseiling sessions for a variety of participants
- a natural multi pitch abseiling site suitable for the conduct of instructional sessions
- a group of participants to take part in the abseiling session
- equipment such as harnesses, helmets, belay devices, descending devices, ropes, gloves, karabiners, food and water, and safety and first aid equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- oral and or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all abseiling activities during the session
- observation of safe abseiling instruction, monitoring and adjustment according to participant's needs and characteristics
- review of abseiling session plans
- third-party reports from a supervisor detailing performance.

© Commonwealth of Australia, 2025 HumanAbility

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOABN409A guide abseiling on multi pitch natural surfaces

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Participant's needs and characteristics may include:	• age • cultural factors • fitness level and physical capabilities • abseiling skills and knowledge • injuries and illnesses.
Session's aims and objectives may include:	• developing abseiling on a multi pitch natural surface skills • education • development • therapy • fitness targets • recreation.
Instructional plan may include:	• abseiling activities and drills • duration of activities and drills.
Abseiling plan may include:	• session's aims and objectives • date, time and duration • location • instructor and participant ratios • resources • equipment • food and water • weather details • participant information • safety requirements • risk management plan.
Relevant legislation may include:	• occupational health and safety

- permits or permission for access
- environmental regulations
- marine regulations.

Organisational policies and procedures may include:

- occupational health and safety
- time and budget constraints
- use and maintenance of equipment
- communication protocols
- confidentiality of participant information
- instructor and participant ratios
- emergency and safety procedures
- code of ethics.

Hazards may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

Natural surfaces may include:

- cliffs
- boulders

Risks may include:

- hypothermia
- heat exhaustion
- injuries
- exhaustion
- lost party or party member
- equipment failure.

Relevant sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- coastal partrol or coastguard
- volunteer marine rescue
- local knowledge.

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings
- event warnings
- river levels
- synoptic charts

Contingency plans may include:

- change location
- reduce duration
- cancel

ELEMENT	PERFORMANCE CRITERIA
	statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan for an archery session.	1.1. Conduct relevant assessments to determine the ***condition of participants***. 1.2. Develop a ***plan*** according to ***relevant legislation***, ***organisational policies and procedures*** and ***participant's needs***. 1.3. Identify a location according to participant's abilities, ***aims and objectives***, relevant legislation and organisational policies and procedures. 1.4. Identify ***hazards*** associated with target archery and minimise ***risks*** to ensure safety of participants. 1.5. Access ***relevant sources*** to interpret ***weather and environmental information*** to determine activity plan. 1.6. Inform ***appropriate authorities*** before commencing the session, where required.
2. Select equipment for the group.	2.1. Select ***equipment*** according to ***contextual issues*** and organisational policies and procedures. 2.2. Assess equipment for safety and serviceability. 2.3. Check and pack safety equipment according to organisational policies and procedures.
3. Brief participants.	3.1. Communicate instructions and ***relevant information*** about the archery session in a manner suitable to the participants. 3.2. Outline safety procedures, contingency plans and boundaries for the session and activities. 3.3. Demonstrate correct posture and techniques for firing arrows and the removal of arrows from the ground and targets. 3.4. Establish a suitable communication system for participants to use during the session. 3.5. Check and confirm participants are properly equipped for archery activities and conditions.
4. Conduct archery session.	4.1. Demonstrate archery techniques to participants. 4.2. Monitor individual participant's performance and provide appropriate feedback. 4.3. Implement appropriate modifications to activities as required according to ***situational changes***. 4.4. Respond to emergencies or non-routine situations according to organisational policies and procedures.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
5. Complete post session responsibilities.	5.1. Notify appropriate authority of session completion as required. 5.2. Retrieve, inspect, repair and store equipment according to organisational policies and procedures. 5.3. Evaluate ***relevant aspects*** of the session. 5.4. Identify potential areas of improvement for future sessions. 5.5. Review own performance and identify potential improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan an archery session that meets their needs
  - convey information about the safety aspects of the session
  - interact with participants to create a safe and positive environment
- problem-solving skills to:
  - plan an archery session according to participant's needs
  - make decisions regarding potential hazards and impact of weather conditions
  - respond to non-routine situations
- planning and organising skills to:
  - source, allocate and coordinate equipment and a suitable location
  - organise participants into manageable groups for archery activities
- language and literacy skills to:
  - produce plans
  - complete post session participant and self evaluations
- personal target archery skills to a high level of technical correctness to demonstrate and explain techniques to participants
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of archery session
- location specific information to enable planning and management of potential archery hazards and any special restrictions applying to the area

© Commonwealth of Australia, 2025 HumanAbility

- equipment types, characteristics and technology used for target archery, the advantages and disadvantages of the range of equipment and factors affecting appropriate selection
- clothing and footwear requirements for safe conduct and participation in archery session
- target archery techniques and communication systems used between participants
- weather and environmental information to ascertain possible conditions and their affect on the session
- emergency and safety procedures to negotiate potential hazards and risks relevant to the location to ensure safety of self and participants.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans within activity constraints and guides or leads and monitors groups in a safe and professional manner • applies contingency management techniques to deal with a range of problems and issues that may arise during archery sessions • encourages and responds to group feedback and evaluates and reflects on own leading performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure the safe leading of groups in archery activities that are appropriate to the needs and characteristics of a range of participants to demonstrate competency and consistency of performance. Assessment must also ensure access to: • a suitable archery venue to lead groups in archery activities • participants to take part in the archery session • resources and information regarding participants and location to plan, lead and document archery activities for a variety of participants • bows, strings, arrows, targets, stands, quivers, finger or arm guards, and safety and first aid equipment.

© Commonwealth of Australia, 2025 HumanAbility

Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • observation of planning and leading processes and interacting with a group of participants, including conveying information for safe participation • oral or written questioning to assess knowledge and application of relevant legislation and organisational policies and procedures to enable safe conduct of all archery activities during session • observation of dealing with contingencies such as changing weather conditions and equipment failure • review of archery session plans • third-party reports from a supervisor detailing performance. Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

SISOBWG201A Demonstrate bushwalking skills in a controlled environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in supervised bushwalks. This unit focuses on the demonstration of bushwalking skills through the participation in planned bushwalks and associated activities under the supervision of a suitably qualified leader.

Application of the Unit

This unit applies to those working as assistant bushwalking guides under supervision, in tracked or easy untracked areas that are reliably marked on maps and are obvious on the ground.

This unit may also apply to outdoor recreation leaders working for outdoor education or adventure providers, volunteer groups, not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan for a bushwalk.	1.1. Identify ***food and water requirements*** according to ***principles of nutrition*** and the ***duration of the walk*** to maintain physiological well being during activity. 1.2. Identify an appropriate activity location according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Obtain and become familiar with appropriate map for the intended walk. 1.4. Access ***relevant sources*** to interpret ***weather and environmental information***. 1.5. Identify potential ***hazards*** associated with the activity.
2. Select equipment.	2.1. Select, fit and adjust ***equipment*** to ensure comfort and safety according to ***contextual issues*** and organisational policies and procedures. 2.2. Ensure pack weight is appropriate to body weight and level of fitness. 2.3. Select personal clothing and footwear and identify the design and or construction features that make it appropriate.
3. Apply bushwalking skills.	3.1. Adopt appropriate posture when lifting and carrying backpack. 3.2. Approach ***obstacles*** and hazards in a safe manner and minimise ***risks*** to self and group where possible. 3.3. Apply ***ascending techniques*** and ***descending techniques*** on slopes. 3.4. Follow a route in ***tracked or easy untracked areas***, demonstrating use of ***navigation aids***.
4. Evaluate the bushwalk.	4.1. Evaluate ***relevant aspects*** of the walk. 4.2. Identify improvements for future walks.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
  - read and interpret maps
  - analyse weather and environmental information
- planning and organising skills to select an appropriate activity location and equipment
- communication skills to:
  - follow instructions and directions from the supervisor
  - interact with other participants
- numeracy skills to navigate and follow a route using a map and compass
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- minimal impact walking codes to ensure protection of environment
- equipment types, characteristics and technology used for bushwalking, the advantages and disadvantages of the range of equipment provided by supervisor, and factors affecting appropriate selection of equipment
- packing techniques in order to protect personal and group equipment
- clothing requirements for outdoor activities and factors affecting appropriate clothing selection, such as layering and protective clothing
- footwear types, the advantages and disadvantages of different footwear, and factors affecting appropriate selection for the anticipated track conditions
- principles of nutrition to maintain health during activity
- navigation techniques in tracked or easy untracked areas to determine location, direction and potential hazards under supervision
- basic weather and environmental information to ascertain possible conditions and their affect on the activity
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

© Commonwealth of Australia, 2025 HumanAbility

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies relevant process to plan equipment and supply requirements according to the conditions and duration of the bushwalk
- demonstrates bushwalking techniques including ascending and descending techniques
- seeks advice and feedback from leader to improve skills and ensure safety of self and group
- evaluates and reflects on own bushwalking performance to identify strengths and weaknesses and areas that need improvement.

Context of and specific resources for assessment

Assessment must ensure participation in bushwalking activities in tracked and untracked areas that reflect local conditions and are of sufficient duration to demonstrate competency and consistency of performance.

Assessment must also ensure access to:

- resources and information, such as maps and meteorological data, to plan for the bushwalk
- a suitable outdoor location with tracks that are reliably marked on maps, are obvious on the ground and are inspected on a regular basis
- a qualified leader or supervisor
- bushwalking, navigation and safety equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of safe participation and demonstration of bushwalking skills
- oral or written questioning to assess knowledge of relevant legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- written or verbal self evaluation
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOOPS202A Use and maintain a temporary or overnight site.

© Commonwealth of Australia, 2025 HumanAbility

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Food and water requirements may include:	• menu planning and preparation • range of foods • emergency food and water.
Principles of nutrition may include:	• food groups • dietary guidelines • essential nutrients • individual food requirements and allergies.
Duration of the walk may include:	• short walks of up to two hours • day walks • two day walks.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational procedures may include:	• occupational health and safety • emergency procedures • communication protocols • use and maintenance of equipment • code of ethics.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions.

© Commonwealth of Australia, 2025 HumanAbility

Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Equipment may include:	• bushwalking equipment • navigation equipment • safety and first aid equipment • overnight equipment.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Obstacles may include:	• rivers • logs • rocks • gullies • exposed areas.
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment failure.
Ascending techniques may include:	• zig-zagging • placing feet down flat with a deliberate step • resting heels on any available projections.
Descending techniques may include:	• placing toes against projections to avoid overstriding • avoiding placing feet down heavily • using flat-footed or stiff-heeled technique.
Tracked or easy untracked areas include:	• those that align with Class 4 Tracks within the Australian Standard for Walking Tracks.
Navigation aids may include:	• maps • compass.
Relevant aspects may include:	• objectives

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to bushwalk in uncontrolled environments under minimal supervision. This unit focuses on the demonstration of various bushwalking skills through the participation in bushland, arid, alpine, or rainforest walks.

Application of the Unit

This unit applies to those who are working as bushwalking guides in uncontrolled environments where there are limited modifications to the natural surface and minimal clearance and signage along the track.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

SISONAV302A Apply navigation skills in an intermediate environment

Employability Skills Information

This unit contains employability skills.

ELEMENT	PERFORMANCE CRITERIA
essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan for a bushwalk.	1.1. Identify and plan ***food and water requirements*** according to ***principles of nutrition*** and the ***duration of the walk*** to maintain physiological well being during activity. 1.2. Identify an appropriate activity location according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Obtain and become familiar with appropriate map for the intended walk. 1.4. Access ***relevant sources*** to interpret detailed ***weather and environmental information*** to determine activities. 1.5. Identify possible ***hazards*** and ***changing conditions*** associated with the activity.
2. Select equipment.	2.1. Select ***equipment*** according to ***contextual issues*** and check to ensure that it is in good working condition. 2.2. Adjust and fit equipment to ensure comfort and safety according to organisational policies and procedures. 2.3. Ensure pack weight is appropriate to body weight and level of fitness. 2.4. Select personal clothing and footwear, and identify the design and or construction features that make it appropriate.
3. Apply walking skills.	3.1. Adopt appropriate posture when lifting and carrying backpack. 3.2. Approach ***obstacles*** and hazards in a safe manner and minimise ***risks*** to self and group where possible. 3.3. Apply ***ascending*** and ***descending techniques*** on slopes. 3.4. Maintain an appropriate ***walking rhythm*** and pace according to conditions. 3.5. Follow a route in ***difficult or trackless areas***, demonstrating use of ***navigation aids***.
4. Evaluate the bushwalk.	4.1. Evaluate ***relevant aspects*** of the walk. 4.2. Identify improvements for future walks.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to:
  - read and interpret maps
  - analyse weather and environmental information
- planning and organising skills to select an appropriate activity location and equipment
- communication skills to:
  - interact with other participants
  - follow instructions and procedures
- numeracy skills to navigate and follow a route using a map and compass
- problem-solving skills to deal with unforeseen circumstances such as changes in weather conditions
- survival skills to keep warm and sheltered in the case of extreme environmental conditions and or loss of equipment
- minimal impact camping skills to use lightweight, portable equipment
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- minimal impact walking codes to ensure protection of environment
- equipment types, characteristics and technology used for bushwalking, the advantages and disadvantages of the range of equipment, and factors affecting appropriate selection of equipment
- packing and maintenance techniques before, during and after the activity to protect personal and group equipment and ensure prolonged life
- pack handling, packing and lifting techniques to prevent and avoid injury
- clothing and footwear requirements for outdoor activities and factors affecting appropriate clothing selection, such as layering and protective clothing
- principles of nutrition to maintain health during activity
- navigation techniques in difficult or trackless areas to determine location, direction and potential hazards
- weather and environmental information to ascertain possible conditions and their effect on the activity
- selection of tie-off points and anchors when using handlines to assist on steep terrain

© Commonwealth of Australia, 2025 HumanAbility

- relevant track signage standards, such as the current Australian Standard, to determine the suitability of the track to skill levels
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies relevant processes to plan equipment and supply requirements according to the conditions and duration of the bushwalk • demonstrates bushwalking techniques including ascending and descending techniques on slopes • adapts to problems or issues that may arise during the walk, such as change in weather conditions, and makes appropriate adjustments in response to these contingencies to ensure safety of self and group • evaluates and reflects on own bushwalking performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure participation in multiple bushwalking activities in difficult or trackless areas that reflect local conditions demonstrate competency and consistency of performance. Assessment must also ensure access to: • resources and information, such as maps and meteorological data, to plan for the bushwalk • a suitable outdoor location with tracks that have limited modifications and indistinct alignment, minimal clearance and signage, and may have terrain and man-made hazards • bushwalking, navigation and safety equipment.
Method of assessment	A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit: • oral or written questioning to assess knowledge of

© Commonwealth of Australia, 2025 HumanAbility

relevant legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities
- observation of safe participation and demonstration of bushwalking skills
- observation of dealing with contingencies, such as changing weather conditions
- written or verbal self evaluation
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOOPS202A Use and maintain a temporary or overnight site.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Food and water requirements may include:
- menu planning and preparation
- range of foods
- emergency food and water.

Principles of nutrition may include:
- food groups
- dietary guidelines
- essential nutrients
- individual food requirements and allergies.

Duration of the walk may include:
- short walks of up to two hours
- day walks
- multiple day walks.

Relevant legislation may include:
- occupational health and safety
- permits or permission for access
- environmental regulations

Organisational procedures may include:
- occupational health and safety
- emergency procedures
- equipment use and maintenance
- communication protocols

	• code of ethics.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions.
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Changing conditions may include:	• weather • equipment failure • injuries • group dynamics.
Equipment may include:	• bushwalking equipment • navigation equipment • safety and first aid equipment • overnight equipment.
Contextual issues may include:	• weather conditions, including times • season • transport • location • trip distance and duration • group objectives • group size.
Obstacles may include:	• rivers • logs • rocks • gullies • exposed areas.
Risks may include:	• hypothermia • heat exhaustion

© Commonwealth of Australia, 2025 HumanAbility

	• injuries • exhaustion • lost party or party member • equipment failure.
Ascending techniques may include:	• zig-zagging • placing feet down flat with a deliberate step • resting heels on any available projections.
Descending techniques may include:	• placing toes against projections to avoid overstriding • avoiding placing feet down heavily • using flat-footed or stiff-heeled technique.
Walking rhythm may include:	• maintaining same speed of pace • keeping hands free • allowing natural body swing • avoiding jerky movements or springing.
Difficult or trackless areas may include:	• bushland • arid areas • alpine areas • rainforest • those that align to Class 5 tracks within the Australian Standard for Walking Tracks.
Navigation aids may include:	• maps • compass.
Relevant aspects may include:	• objectives • planning process • activity site • weather • equipment selection • clothing selection • food selection • instructional content • instructional technique • assessment technique • group feedback • directing techniques • rescue techniques employed.

SISOBWG303A Guide bushwalks in a controlled environment

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge to guide or lead participants on day and or overnight bushwalks. This unit focuses on the application of planning skills to make logistical arrangements for a bushwalking trip and lead the trip safely according to an activity plan.

Application of the Unit

This unit applies to those working as bushwalking guides who are responsible for planning, implementing and evaluating bushwalking trips conducted in a range of controlled environments and locations such as tracked or easy untracked areas that are reliably marked on maps, are obvious on the ground, and easily accessed within two hours.

This unit may also apply to leaders working for outdoor education or adventure providers; volunteer groups; not-for-profit organisations or government agencies.

Licensing/Regulatory Information

No licensing, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

ELEMENT **PERFORMANCE CRITERIA**

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan a bushwalking trip.	1.1. Conduct relevant assessments to determine the condition of participants in consultation with ***support personnel***. 1.2. Select an activity site or location which meets ***activity objectives*** and is suitable for participants according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Select appropriate maps and plan the route for the walk, taking into account environmental impact factors. 1.4. Identify ***hazards*** associated with the activity and apply risk minimisation procedures to ensure personal safety of participants. 1.5. Develop an ***activity plan*** for the walk to meet the identified needs, abilities and risk factors of participants according to relevant legislation and organisational policies and procedures. 1.6. Prepare a Navigation Data Sheet for the proposed walk. 1.7. Access ***relevant sources*** to obtain and interpret ***weather and environmental information*** for the walk. 1.8. Inform ***appropriate authorities*** before the walk.
2. Select equipment for the activity.	2.1. Identify and source ***equipment*** for the activity. 2.2. Assess equipment for safety and suitability for the walk and complete documentation. 2.3. Prepare equipment for transportation to walk location according to organisational policies and procedures.
3. Make logistical arrangements.	3.1. Determine and plan ***food and water requirements*** for participants according to walking requirements. 3.2. Identify the location of water sources accessible during the walk and determine the need for water purification. 3.3. Prepare water for carrying and storage in a manner appropriate to the activity.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.4. Select clothing suitable for the walk.
4. Brief participants.	4.1. Communicate instructions and ***relevant information*** about the walk in a manner suitable to participants. 4.2. Demonstrate packing of a backpack with gear appropriate to proposed walk to participants. 4.3. Explain symptoms, treatment and prevention of hypothermia, hyperthermia and dehydration to group to assist in self-monitoring. 4.4. Establish communication systems for use during walk and confirm systems with participants. 4.5. Check and confirm participants are properly equipped for the walk.
5. Lead bushwalking trip.	5.1. Assist participants to fit and adjust equipment to ensure suitability and safety as required. 5.2. Provide and reinforce direction and advice to the group during the walk. 5.3. Monitor walking pace and spacing between walkers in relation to conditions during the walk. 5.4. Monitor individual participant's performance and behaviour. 5.5. Monitor weather conditions during the walk. 5.6. Implement appropriate modifications to walk in response to ***changing conditions***.
6. Select and maintain a temporary site as required.	6.1. Select a suitable site with reference to minimal impact on the environment according to relevant legislation. 6.2. Arrange shelter appropriate for prevailing weather conditions. 6.3. Establish site to ensure comfort and safety of the group. 6.4. Explain relevant minimum impact practices to group and monitor their compliance. 6.5. Return site to an equal standard on departure.
7. Complete post trip responsibilities.	7.1. Notify relevant authority of trip completion. 7.2. Retrieve, inspect, repair and store equipment according to organisational policies and procedures. 7.3. Evaluate ***relevant aspects*** of the walk according to organisational criteria and record outcomes. 7.4. Identify potential areas of improvement for future walks.

© Commonwealth of Australia, 2025 HumanAbility

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan a bushwalking activity to meet their needs
  - convey information about the safety and logistical aspects of trip
  - interact with participants to create a safe and positive environment during the walk
- problem-solving skills to:
  - plan a trip according to participant's needs, abilities and risk factors
  - make decisions about potential hazards that may affect trips
  - modify aspects of trips according to all variable factors and non-routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and location for the walk
  - make logistical arrangements
  - advise authorities of routes and duration of walk as required
  - organise participants into manageable groups
- language, literacy and numeracy skills to:
  - produce and document a plan for the walk
  - complete post trip documentation
  - produce a navigation data sheet
- self management to review and reflect on own work performance to facilitate personal development
- use of communications equipment
- first aid, search and rescue and emergency response skills appropriate to the location to enable initial response and or rescue in emergencies.

Required knowledge

- legislation and organisational policies and procedures to ensure safe and legal conduct of all activities performed during bushwalking trips
- minimal impact codes and practices and general land management requirements to enable application of low impact environmental practices during the walk
- Australian Standards for Walking Tracks to enable accurately identify track classifications appropriate for the capabilities of participants
- site specific information to assist in the planning process and enable management of potential hazards and any special restrictions applying to the area
- equipment characteristics and technology used for bushwalking, and factors

© Commonwealth of Australia, 2025 HumanAbility

affecting appropriate selection, use and maintenance to enable safe conduct of all activities
- clothing and footwear requirements for bushwalking and general principles affecting clothing selection, such as layering and protective clothing principles
- nutritional requirements when participating in outdoor activities and types of food available to suit activity constraints to enable participant wellbeing
- risk management strategies to enable safe completion of the walk
- water purification methods and equipment to enable access to fresh water
- conflict resolution techniques to ensure the group functions cohesively
- influence of local air masses, seasons and topography on weather
- barometric pressure and its implications for planning
- tie-off points and anchors for handlines
- first aid, emergency, search and rescue procedures relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans within activity constraints and guides and monitors group in a safe and professional manner • applies effective modifications and contingency management techniques to make adjustments in response to changing conditions that may arise during bushwalking trips • encourages and responds to group feedback and evaluates and reflects on own guiding performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure guiding of groups on multiple bushwalking trips in tracked or easy untracked areas that reflect local conditions and are of sufficient breadth and duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • an outdoor environment with tracked or easy untracked areas to guide bushwalking

© Commonwealth of Australia, 2025 HumanAbility

- participants to take part in bushwalking trips
- bushwalking, navigation, communication, overnight, safety, rescue and first aid equipment
- resources and information regarding participants to plan, guide and document bushwalking trips.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of planning and guiding processes and interacting with participants, including conveying information for safe participation
- observation of dealing with contingencies such as changing weather conditions and equipment failure
- oral or written questioning to assess knowledge of the application of relevant legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities throughout trip
- review of activity plans for the bushwalking activity
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOODR302A Plan outdoor recreation activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Support personnel may include:

- emergency contact
- logistics personnel
- drivers
- administrators
- teachers or instructor
- subject matter experts.

Activity objectives may include:

- self improvement
- fitness

© Commonwealth of Australia, 2025 HumanAbility

- social interaction
- education.

Relevant legislation may include:

- occupational health and safety
- permits or permission for access
- environmental regulations.

Organisational policies and procedures may include:

- occupational health and safety
- participant confidentiality and assessment procedures
- use, maintenance and storage of equipment
- tagging faulty or damaged equipment
- emergency procedures
- communication protocols
- risk management procedures
- time and budget constraints
- code of ethics.

Hazards may include:

- temperature extremes
- slippery or unstable terrain
- dangerous animals and insects
- stinging trees and nettles
- dense vegetation
- group management hazards.

Activity plan may include:

- aims and objectives
- date, time and duration
- location, equipment and resources
- guide and participant ratios
- safety and emergency requirements
- risk assessment and contingency management plans.

Relevant Sources may include:

- Bureau of Meteorology
- media
- land managers or agencies
- local knowledge.

Weather and environmental information may include:

- satellite images
- daily and weekly forecasts
- maximum and minimum temperatures
- weather warnings
- event warnings
- river levels
- synoptic charts
- high and low tide predictions

Appropriate authorities may

- authorities

© Commonwealth of Australia, 2025 HumanAbility

include:
- supervisors.

Equipment may include:
- bushwalking equipment
- navigation equipment
- safety, rescue and first aid equipment
- communication equipment
- camping equipment.

Food and water requirements may include:
- menu planning and preparation
- range of foods
- emergency food and water
- water purification

Relevant information may include:
- logistical details
- personal equipment requirements
- safety procedures
- responsible behaviour
- risk and hazard prevention and management.

Changing conditions may include:
- weather
- participant needs
- equipment failure.

Relevant aspects may include:
- objectives
- planning process
- activity site
- weather
- equipment selection
- clothing selection
- food selection
- instructional content
- instructional technique
- assessment technique
- group feedback
- directing techniques
- rescue techniques employed.

ELEMENT	PERFORMANCE CRITERIA
essential outcomes of a unit of competency.	demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan a river crossing.	1.1. Identify ***river features***. 1.2. Identify potential ***hazards*** and ***risks*** associated with crossing rivers. 1.3. Access ***relevant sources*** to interpret ***weather and environmental information***. 1.4. Waterproof backpack contents. 1.5. Select and justify an ***appropriate location*** to cross a river according to ***relevant legislation*** and ***organisational policies and procedure***.
2. Apply swimming techniques in moving water.	2.1. Adopt the correct body position for defensive swimming. 2.2. Demonstrate the negotiation of hazards using ***defensive swimming techniques*** and ferry angles. 2.3. Identify and demonstrate techniques to actively free oneself from river hazards using ***aggressive swimming techniques***. 2.4. Demonstrate the ability to set a ferry angle in order to reach the bank or eddy.
3. Apply river crossing techniques.	3.1. Demonstrate the ability to wade across a swift current of mid-thigh depth, using a wide variety of ***river crossing methods***. 3.2. Complete entry to and exit from river safely. 3.3. Demonstrate safe retreating from a partial river crossing. 3.4. Demonstrate appropriate use of upstream and downstream safety.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to discuss, negotiate and apply appropriate river crossing methods with other participants
- problem-solving skills to determine river crossing methods appropriate to the

© Commonwealth of Australia, 2025 HumanAbility

conditions
- first aid and emergency response skills appropriate to the location to enable initial response to emergencies and personal health care
- swimming skills to free oneself from potential hazards.

Required knowledge

- legislation and organisational policies and procedures to enable safe conduct of all river crossing activities
- river crossing methods and techniques to cross rivers in a safe manner after selection of a suitable crossing location
- weather and environmental information to ascertain possible conditions and their affect on the activity including life threatening conditions
- emergency procedures and potential hazards relevant to the location to ensure risk minimisation to self and group
- hydrology and river grading systems, to understand how rivers work so decisions can be made accordingly
- aggressive and defensive swimming techniques to get free from hazards
- equipment improvisation to help with the river crossing
- first aid appropriate to location and level of responsibility.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • applies relevant knowledge of river features and hazards to select a suitable crossing site and plans for a safe crossing • applies defensive and aggressive swimming techniques to negotiate river crossings • adapts quickly to problems or issues that may arise during the river crossing, such as change in current and or weather conditions, and makes appropriate adjustments in response to these contingencies to ensure safety of self and group.
Context of and specific resources for assessment	Assessment must ensure participation in multiple river crossings that reflect local conditions to demonstrate competency and consistency of performance.

© Commonwealth of Australia, 2025 HumanAbility

Assessment must also ensure access to:

- a suitable moving water location with safe rapids to minimise the danger of being swept downstream into more difficult conditions
- equipment such as a pole and rope, to aid in the crossing technique.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the planning process
- oral and or written questioning to assess knowledge of the relationship between features, hazards and risks associated with crossing moving water rivers
- observation of safe participation and demonstration of swimming and river crossing techniques
- observation of dealing with contingencies, such as changing weather conditions
- third-party reports from a supervisor detailing performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOBWG404A Bushwalk in unmodified landscapes.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

River features may include:

- eddy
- current
- tongue
- waves
- bank
- rocks.

Hazards may include:

- temperature extremes
- slippery or unstable terrain

© Commonwealth of Australia, 2025 HumanAbility

	• dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Risks may include:	• hypothermia • heat exhaustion • injuries • exhaustion • lost party or party member • equipment failure.
Relevant sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions
Appropriate location may include:	• narrow, straight part of the river • low banks • less than waste deep.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational policies and procedures may include:	• occupational health and safety • equipment use and maintenance • communication protocols • emergency procedures.
Defensive swimming techniques may include:	• floating passively on back • riding with the river current • pointing feet downstream • using arms and legs to fend off obstacles • swimming to shore or safety.
Aggressive swimming techniques may include:	• moving on to stomach • pointing feet downstream • stroking hard to move across the current • swimming to shore or safety.

© Commonwealth of Australia, 2025 HumanAbility

River crossing methods may include:	• individual without aid • individual with a pole • mutual support using linked arms, a circle or a pole • swimming using pack as a float.

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Plan a bushwalking trip.	1.1. Conduct relevant assessments to determine the condition of participants in consultation with ***support personnel***. 1.2. Select an activity site or location which meets ***activity objectives*** and is suitable for participants according to ***relevant legislation*** and ***organisational policies and procedures***. 1.3. Select appropriate maps and plan the route for the walk taking into account environmental impact factors. 1.4. Identify ***hazards*** associated with the activity and apply risk minimisation procedures to ensure personal safety of participants. 1.5. Develop an ***activity plan*** for the walk to meet the identified needs, abilities and risk factors of participants according to relevant legislation and organisational policies and procedures. 1.6. Prepare a Navigation Data Sheet for the proposed walk. 1.7. Access ***relevant sources*** to obtain and interpret ***weather and environmental information*** for the walk. 1.8. Inform ***appropriate authorities*** before the walk.
2. Select equipment for the activity.	2.1. Identify and source ***equipment*** for the activity. 2.2. Assess equipment for safety and suitability for the walk and complete documentation. 2.3. Prepare equipment for transportation to walk location according to organisational policies and procedures.
3. Make logistical arrangements.	3.1. Determine ***food and water requirements*** for participants according to walking requirements. 3.2. Identify the location of water sources accessible during the walk and determine the need for water purification. 3.3. Prepare water for carrying and storage in a manner appropriate to the activity.

© Commonwealth of Australia, 2025 HumanAbility

ELEMENT	PERFORMANCE CRITERIA
	3.4. Select clothing suitable for the walk.
4. Brief participants.	4.1. Communicate instructions and ***relevant information*** about the walk in a manner suitable to participants. 4.2. Demonstrate packing of a backpack with gear appropriate to proposed walk to participants. 4.3. Explain symptoms, treatment and prevention of hypothermia, hyperthermia and dehydration to group to assist in self-monitoring. 4.4. Establish communication systems for use during walk and confirm systems with participants. 4.5. Check and confirm participants are properly equipped for the walk.
5. Lead bushwalking trip.	5.1. Assist participants to fit and adjust equipment to ensure suitability and safety as required. 5.2. Provide and reinforce direction and advice to the group during the walk. 5.3. Monitor walking pace and spacing between walkers in relation to conditions during the walk. 5.4. Monitor individual participant's performance and behaviour. 5.5. Monitor weather conditions during the walk. 5.6. Implement appropriate modifications to walk in response to ***changing conditions***.
6. Select and maintain a temporary site as required.	6.1. Select a suitable site with reference to minimal impact on the environment according to relevant legislation. 6.2. Arrange shelter appropriate for prevailing weather conditions. 6.3. Establish site to ensure comfort and safety of the group. 6.4. Explain relevant minimum impact practices to group and monitor their compliance. 6.5. Return site to an equal standard on departure.
7. Complete post-trip responsibilities.	7.1. Notify relevant authority of trip completion. 7.2. Retrieve, inspect, repair and store equipment according to organisational policies and procedures. 7.3. Evaluate ***relevant aspects*** of the walk according to organisational criteria and record outcomes. 7.4. Identify potential areas of improvement for future walks. 7.5. Review own performance and identify potential

ELEMENT	PERFORMANCE CRITERIA
	improvements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
  - consult with participants to plan a walking activity to meet their needs
  - convey information about the safety and logistical aspects of trip
  - interact with participants to create a safe and positive environment during the walk
- problem-solving skills to:
  - plan a trip according to participant's needs, abilities and risk factors
  - make decisions about potential hazards that may affect trips
  - modify aspects of trips according to all variable factors and non-routine situations
- planning and organising skills to:
  - source, allocate and coordinate resources, equipment and location for the walk
  - make logistical arrangements
  - advise authorities of routes and duration of walk
  - organise participants into manageable groups
- language, literacy and numeracy skills to:
  - produce and document a plan for the walk
  - complete post trip documentation
  - produce a navigation data sheet
- self management skills to review and reflect on own work performance to facilitate personal development
- use of communication equipment
- first aid, search and rescue and emergency response skills appropriate to the location to enable initial response and or rescue in emergencies.

Required knowledge

- legislation and organisational policies and procedures to ensure safe and legal conduct of all activities performed during bushwalking trips
- minimal impact codes and practices and general land management requirements to enable application of low impact environmental practices during the walk
- Australian Standards for Walking Tracks to enable identification of track classifications appropriate for the capabilities of participants

© Commonwealth of Australia, 2025 HumanAbility

- site specific information to assist in the planning process and enable management of potential hazards and any special restrictions applying to the area
- equipment characteristics and technology used for bushwalking, and factors affecting appropriate selection, use and maintenance to enable safe conduct of all activities
- clothing and footwear requirements for bushwalking and general principles affecting clothing selection, such as layering and protective clothing principles
- nutritional requirements when participating in outdoor activities and types of food available to suit activity constraints to enable participant wellbeing
- risk management strategies to enable safe completion of the walk
- water purification methods and equipment to enable access to fresh water
- conflict resolution techniques to ensure the group functions cohesively
- influence of local air masses, seasons and topography on weather
- barometric pressure and its implications for planning
- first aid, emergency, search and rescue procedures relevant to the location to ensure safety of self and others.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of the following is essential: • plans within activity constraints and guides and monitors group in a safe and professional manner • applies effective modifications and contingency management techniques to make adjustments in response to changing conditions that may arise during bushwalking trips • encourages and responds to group feedback and evaluates and reflects on own guiding performance to identify strengths, weaknesses and areas that need improvement.
Context of and specific resources for assessment	Assessment must ensure guiding groups on multiple bushwalking trips in difficult and trackless areas that reflect local conditions and are of sufficient breadth and duration to demonstrate competency and consistency of performance. Assessment must also ensure access to: • an outdoor environment with difficult and trackless

© Commonwealth of Australia, 2025 HumanAbility

areas to guide bushwalking
- participants to take part in bushwalking trips
- bushwalking, navigation, river crossing, overnight, communication, safety, rescue and first aid equipment
- resources and information regarding participants to plan, guide and document bushwalking trips.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of planning and guiding processes and interacting with participants, including conveying information for safe participation
- observation of dealing with contingencies such as changing weather conditions and equipment failure
- oral or written questioning to assess knowledge of the application of relevant legislation and organisational policies and procedures to enable safe conduct of all bushwalking activities throughout trip
- review of activity plans for the bushwalking activity
- third-party reports from a supervisor detailing appropriate work performed by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SISOODR303A Guide outdoor recreation activities.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Support personnel may include:

- emergency contact
- logistics personnel
- drivers
- administrators
- teachers or instructor
- subject matter experts.

© Commonwealth of Australia, 2025 HumanAbility

Activity objectives may include:	• self improvement • fitness • social interaction • education.
Relevant legislation may include:	• occupational health and safety • permits or permission for access • environmental regulations.
Organisational policies and procedures may include:	• occupational health and safety • participant confidentiality and assessment procedures • use, maintenance and storage of equipment • tagging faulty or damaged equipment • emergency procedures • communication protocols • time and budget constraints • code of ethics.
Hazards may include:	• temperature extremes • slippery or unstable terrain • dangerous animals and insects • stinging trees and nettles • dense vegetation • group management hazards.
Activity plan may include:	• aims and objectives • date, time and duration • location, equipment and resources • guide and participant ratios • safety and emergency requirements • risk and contingency management plans.
Relevant Sources may include:	• Bureau of Meteorology • media • land managers or agencies • local knowledge.
Weather and environmental information may include:	• satellite images • daily and weekly forecasts • maximum and minimum temperatures • weather warnings • event warnings • river levels • synoptic charts • high and low tide predictions
Appropriate authorities may	• authorities

© Commonwealth of Australia, 2025 HumanAbility

include:	• supervisors.
Equipment may include:	• bushwalking equipment • navigation equipment • river crossing equipment • safety, rescue and first aid equipment • communication equipment • overnight equipment.
Food and water requirements may include:	• menu planning and preparation • range of foods • emergency food and water • water purification.
Relevant information may include:	• logistical details • personal equipment requirements • safety procedures • responsible behaviour • risk assessment and hazard prevention and management.
Changing conditions may include:	• weather • participant needs • equipment failure.
Relevant aspects may include:	• objectives • planning process • activity site • weather • equipment selection • clothing selection • food selection • instructional content • instructional technique • assessment technique • group feedback • directing techniques • rescue techniques employed.

SISOBWG406A Apply bushwalking skills in uncontrolled landscapes

Modification History

Not Applicable

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to bushwalk in unmodified landscapes with no supervision on trips. This unit focuses on the demonstration of various bushwalking skills through the participation in extreme bushland, arid, alpine or rainforest walks.

Application of the Unit
