# Assessment Requirements for AHCLPW501 Develop a management plan for a designated area

## Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- discuss management plan objectives, deliverables and timeline with client
- prepare a site plan detailing landscape values, physical features and characteristics, past and present land uses, physical condition and biological characteristics
- assess land capability and identify conservation issues on and surrounding the site
- analyse site information and description to assess feasibility of management objectives
- develop and cost recommended actions in line with client requirements
- present a draft management plan to client for discussion
- consult with stakeholders and incorporate feedback into the final management plan
- prepare documentation to enterprise standards and to meet client needs

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- civil design concepts
- management planning principles and issues
- environmental assessment, survey and analysis techniques and practical application to a range of habitats and landscapes
- native fauna or flora physiology, habitat requirements, and seasonal and nutritional influences on life cycle
- wildlife habitats associated with the designated area and local geographic region
- pest plant and animal and disease identification, physiology, control techniques, and equipment, pesticides and habitat requirements
- land management strategies including:
- pest management or control techniques

- techniques and strategies for use in the management, rehabilitation and enterprise use of native Australian habitats, species and landscapes
- Indigenous flora regeneration and revegetation techniques, equipment and methods of application in relation to a range of landscape characteristics
- management and rehabilitation techniques for the wildlife and habitat relevant to the designated area
- soil, plant and water testing processes and procedures, interpretation and application of results

## **Assessment Conditions**

Assessors must satisfy current standards for RTOs.
