**Release: 1**

## AHCMKH305 Mechanically test milking machines

### Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

### Application

This unit of competency describes the skills and knowledge required to mechanically test milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil.

### Unit Sector

Milk Harvesting (MKH)

### Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Record milking machine specifications	1.1 Establish herd details and health status 1.2 Determine expected performance from machine specifications 1.3 Assess and record condition of components 1.4 Identify work health and safety hazards, assess risks implement controls, record and report to supervisor
2. Calculate required milking machine	2.1 Calculate effective reserve based on facility specifications 2.2 Calculate vacuum pump capacity from effective reserve

<b>Element</b>	<b>Performance criteria</b>
performance	2.3 Record manufacturer's recommended component specification and matching
3. Measure milking machine performance	3.1 Measure working vacuum levels in line with required performance 3.2 Adjust vacuum to optimise milking facility performance 3.3 Determine and report air consumption and component leakage. 3.4 Test pulsators in line with manufacturer's recommendations 3.5 Establish and match working air consumption to manufacturer's recommendations
4. Make recommendations to optimise machine performance	4.1 Interpret test results in line with desired performance and herd details 4.2 Provide recommendations and a written report on safety considerations for the specific installation tested 4.3 Provide recommendations on milking facility performance 4.4 Complete report on component condition in line with manufacturer's requirements

## Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

## Unit Mapping Information

This unit is equivalent to AHCMKH305A Mechanically test milking machines.
