Assessment Requirements for AHCNAR401 Supervise natural area restoration works

Release: 1

Assessment Requirements for AHCNAR401 Supervise natural area restoration works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise natural area restoration works
- identify hazards and ensure safe systems of work are in place
- scope the natural area restoration works required and compare to specifications of work on the contract
- develop a work program and source labour and equipment to undertake the work
- maintain the supply of materials and access to equipment to allow restoration work to proceed
- coordinate team to achieve optimum performance
- monitor the work program and make adjustments to task schedule where required
- monitor work to achieve specified outcomes and to minimise environmental disturbance
- inspect work to ensure specifications are met and environmental impact is minimised
- report project completion to management or client according to enterprise requirements
- monitor the application of appropriate sustainability practices in natural area restoration works
- monitor team to ensure work health and safety policies and procedures are followed
- monitor team to ensure biosecurity measures are applied

Knowledge Evidence

The candidate must demonstrate knowledge of:

- strategies and techniques to avoid negative environmental impacts
- work programming
- natural area restoration techniques to be used in the works
- environmental factors to be considered in restoration works, including:
- the role of native plants and animals in the ecosystem of the area

- vertebrate pests and options for control
- impact of weeds and pests and appropriate control methods
- ability to assess restoration potential of sites
- basic plant and animal ecology
- knowledge of different ecosystems
- team supervision
- strategies for monitoring work quality and progress
- application of work health and safety and environmental legislation, codes of practice and enterprise procedures in natural area restoration works

Assessment Conditions

Assessors must satisfy current standards for RTOs.
