Supervise acid sulphate soil remediation
and management projects**

Release: 1

Assessment Requirements for AHCSOL404 Supervise acid sulphate soil remediation and management projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review Acid Sulphate Soil (ASS) management plan and plan the work
- document and communicate objectives of the project, as well as environmental and work health and safety issues, to stakeholders and individual contractors
- carry out the works identified in the (ASS) management plan in compliance with regulatory requirements and work specifications
- monitor completed works and carry out modifications in consultation with the approved plan provider where necessary

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of acid sulphate soil remediation
 - Acid Sulphate Soil (ASS) and soil chemistry
 - equipment most suited to ASS site remediation and management
 - Quality Assurance systems, processes and practices
 - relevant environmental, planning and groundwater legislation
 - subsurface and surface drainage principles and systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.
