AHCWAT201 Set up, operate and maintain
water delivery systems for compost**

Release: 1

Assessment Requirements for AHCWAT201 Set up, operate and maintain water delivery systems for compost

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and adopt safe work practices
- interpret site water management plan and site operating plan or map
- observe faults and variations from required settings
- operate pumps
- record water application data
- set out and operate watering systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices compost water delivery systems
- characteristics and operation of joints, hoses, valves and sprinkler components
- components of water delivery system
- methods and techniques of water delivery
- procedures for safe use of equipment, such as powered and hand tools, as used in water delivery system maintenance
- reporting and recording requirements
- standard industry risk-control measures to minimise risk associated with setting up and operating a water delivery system
- workplace health and safety and environmental legislation and enterprise requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.
