Assessment Requirements for AHCWRK210 Observe and report on weather

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has observed and reported on weather on at least two occasions and has:

- identified job requirements and selected weather equipment
- identified workplace health and safety hazards and risks and reported to supervisor
- related weather forecasts to impact on current operations and activities
- monitored physical signs of weather in the context of available information
- communicated information on weather and situations that may be impacted.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work requirements applicable to health and safety in the workplace for weather and climate observation
- effects of weather, including:
 - wind and rain
 - wind chill
 - prolonged dry periods
 - extreme heat
 - exposure to the elements
- workplace procedures for monitoring, recording and reporting weather and climate conditions
- weather and climate condition impact upon work activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - weather observation and reporting equipment
 - weather and climate information
- specifications:
 - workplace procedures relevant to observing and reporting on weather
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK211 Participate in environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to participate in environmentally sustainable work practices.

The unit applies to individuals who participate in environmentally sustainable work practices under general supervision with limited autonomy or accountability.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify current resource use	1.1 Identify and report workplace environmental hazards to supervisor 1.2 Identify resources used in own work role 1.3 Measure and record current usage of resources using appropriate techniques 1.4 Identify workplace environmental and resource efficiency issues

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 File documentation measuring current usage
2. Comply with environmental work practices	2.1 Follow workplace environmental procedures 2.2 Report breaches or potential breaches to supervisor 2.3 Follow changes to work practices and procedures
3. Seek opportunities to improve resource efficiency	3.1 Work with supervisor to identify possible areas for improvements to work practices in own work area 3.2 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace instructions to formulate an understanding of expected requirements and activity
Writing	<ul style="list-style-type: none"> Prepare workplace records accurately using clear language and industry relevant terminology
Oral communication	<ul style="list-style-type: none"> Use clear language and standard industry terminology to clarify instructions and communicate with supervisor Participate in verbal exchanges to share knowledge and information with supervisor
Numeracy	<ul style="list-style-type: none"> Measure and record resource usage Use basic mathematical processes of addition, subtraction, division, multiplication, percentages, decimal points and ratios

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has participated in environmentally sustainable work practices on at least one occasion, and has:

- identified and measured resources used in own work role
- identified workplace environmental and resource efficiency issues
- recorded measurements of current usage
- followed workplace procedures to ensure compliance.

And has on at least two occasions:

- identified and reported workplace environmental hazards to supervisor
- reported breaches or potential breaches to supervisor
- worked with supervisor to identify possible areas for improvements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental and resource hazards and risks relevant to industry sector, including:
 - plastics
 - chemicals
 - hazardous materials
 - waste materials
- principles of sustainability, including the economy, society, and the environment
- procedures for reporting environmental and resource hazards and risks, and environment and resource efficiencies and inefficiencies
- resources used in own industry sector, including:
 - labour

- electricity
- financial
- time
- environmental resources used in own industry sector, including:
 - land
 - soil
 - water
 - vegetation
- relevant environmental and resource efficiency systems, procedures and improvement processes
- workplace environmental practices, instructions and procedures relevant to participating in environmentally sustainable work practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions

AHCWRK212 Work effectively in industry

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to work effectively within an industry on an individual basis and within a work team, including observing employment requirements and accepting responsibility for quality of own work.

The unit applies to individuals who work effectively in industry under general supervision with limited autonomy or accountability.

All work must be carried out to comply with workplace procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Obtain information about the industry	1.1 Access sources of information about the industry 1.2 Collect information on industry sector of work 1.3 Identify and follow employment terms and conditions 1.4 Identify industry career pathways

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Observe employment requirements	2.1 Confirm workplace practices and procedures with supervisor 2.2 Check that dress and personal presentation comply with workplace requirements 2.3 Maintain punctuality according to workplace requirements 2.4 Follow workplace routines according to specific instructions and workplace procedures
3. Conduct and accept responsibility for quality of own work	3.1 Maintain personal workspace according to workplace policies and procedures 3.2 Follow workplace code of conduct 3.3 Identify factors affecting work requirements and specifications, and report to supervisor 3.4 Assess and prioritise workload and seek assistance if required from supervisor
4. Participate and contribute to a productive team environment	4.1 Co-operate in a respectful manner according to workplace expectations 4.2 Recognise and report conflict with others according to workplace requirements 4.3 Work cooperatively to ensure designated work goals are met 4.4 Participate in and contribute to team meetings 4.5 Participate in and contribute to inclusive work practices
5. Confirm and undertake workplace activities	5.1 Confirm work plan, daily work schedule and timelines for workplace activities with supervisor 5.2 Confirm material and equipment requirements 5.3 Follow schedule and task requirements 5.4 Recognise and report defects and abnormalities in the workplace 5.5 Report completed tasks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace instructions to formulate an understanding of expected requirements and activity
Oral communication	<ul style="list-style-type: none"> Use clear language and standard industry terminology to clarify instructions and communicate with supervisor Participate in verbal exchanges to share knowledge and information with team members

Assessment Requirements for AHCWRK212 Work effectively in industry

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked effectively in industry on at least one occasion, and has:

- collected information on the industry
- identified employment requirements
- applied workplace procedures relevant to working effectively in industry, including dress standards and work practices
- accepted responsibility for quality of own work
- contributed to a productive team environment
- co-operated and communicated in a respectful manner
- confirmed and followed work plan, daily work schedule and timelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry and workplace awards and conditions
- employer expectations
- workplace procedures, organisational structure and communication channels relevant to the industry sector
- inclusive work practices
- cooperative and respectful workplace communication.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry information, including relevant workplace awards and conditions
 - example work schedules
 - job specifications
- specifications:
 - workplace procedures relevant to working effectively in industry
- relationships:
 - team members and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK214 Observe workplace quality assurance procedures

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has observed workplace quality assurance procedures for a product or service on at least one occasion and has:

- identified and applied basic quality assurance (QA) practices and procedures
- kept QA records
- followed work instructions
- checked quality of work
- identified and reported quality issues.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace production processes relevant to work being undertaken
- basic understanding of the purpose, scope and requirements for the workplace QA system
- risk assessment and identification
- workplace QA policies, guidelines and standard operating procedures relevant to work being undertaken and level of responsibility.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace QA system

- work instructions and procedures relevant to observing workplace QA procedures
- specifications:
 - workplace QA policies, guidelines and standard operating procedures
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK216 Provide information on products and services

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided information on products and services on at least two occasions and has:

- accessed and researched product information
- engaged customer, including:
 - responding to customer requests for information
 - assessing customer needs
 - using questioning and active listening to identify customer requirements
 - giving and receiving information
- referred to or sought advice from supervisor and appropriate personnel when required
- applied workplace policies and procedures relevant to providing information on products and services.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- product and service knowledge relevant to the workplace
- the workplace values, structure, products and services
- customer service and referral techniques
- how to effectively engage and communicate with a range of customers
- workplace policies and procedures relevant to providing information on products and services.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - product and service information
 - computer hardware and software
- specifications:
 - workplace policies and procedures relevant to providing information on products and services
- relationships:
 - customers, appropriate personnel and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work site activities	1.1 Clarify the requirements of the work with supervisor 1.2 Identify personnel, equipment and material resource requirements according to the scope of the project and supervisors instructions 1.3 Identify and document the order of activities and time allocation and present to the supervisor for verification

Element	Performance criteria
	1.4 Identify the environmental implications of the proposed work site activities and assess the likely outcomes and report to supervisor 1.5 Carry out a work health and safety risk assessment 1.6 Select, use and maintain personal protective equipment according to the type of work site activities to be undertaken
2. Organise resources	2.1 Purchase materials and hire equipment and machinery as authorised by the supervisor 2.2 Obtain external agency permits in the correct order as necessary 2.3 Notify neighbours and affected parties of works to be undertaken as necessary 2.4 Organise delivery of materials, equipment and machinery to site as outlined in the order of activities 2.5 Organise personnel to be on site when they are required
3. Coordinate and report on activities	3.1 Coordinate all resources to suit the scope of the project and order of activities 3.2 Direct personnel in activities for each period of work 3.3 Monitor and document personnel, activities, timelines and resource usage 3.4 Identify contingency situations and report to the supervisor and take corrective actions as required 3.5 Write a simple project report to inform management of work site activities undertaken and completed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK305A Coordinate work site activities.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWRK305 Coordinate work site activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpreting documentation associated with work site activities
- prepare and planning worksite activities
- calculate material and resource requirements
- schedule activities and allocating tasks and responsibilities
- coordinate a team to achieve optimum performance
- communicate with personnel at all levels
- monitor activities and recording costs and production levels
- document results clearly and concisely
- perform a work health and safety risk assessment
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental awareness associated with undertaking project works to ensure the impact on the environment is minimal
- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for obtaining external agency permits as necessary
- the range, use and availability of materials, equipment and machinery that may be required for the project
- work health and safety issues, legislative requirements and Codes of Practice.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHCWRK306 Comply with industry quality assurance requirements

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to comply with industry quality assurance requirements in the production of food, fibre, fuels and raw materials produced from agriculture and horticulture activities.

The unit applies to individuals who work under broad direction and take responsibility for their own work to complete tasks according to quality assurance for food safety, biosecurity, environmental management and/or animal welfare requirements. They use discretion and judgement in the selection and use of available resources and to solve problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Follow quality assurance	1.1 Identify elements of quality assurance applicable to

Assessment Requirements for AHCWRK306 Comply with industry quality assurance requirements

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated the ability to apply quality assurance procedures, including:

- identified elements of quality, food safety hazards and quality standards for an industry sector
- assessed work area for critical control points, safety hazards and risks
- identified and reported issues that impact on product quality
- implemented standard operating procedures for operations and corrective action
- recognised, responded and reported non-conformances and variations of product against quality standards
- completed records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry quality assurance requirements for a specified sector of industry
- work processes for specified field of work
- State and territory food safety requirements
- Hazard Analysis and Critical Control Point (HACCP) approach to quality assurance
- procedures, policies, guidelines and standard operating procedures for field of work
- reporting and record keeping requirements for quality assurance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a primary production or a manufacturing setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - products or services relevant to the specific primary production sector
- specifications:
 - workplace policies and procedures related to quality assurance
 - workplace specifications and/or quality standards relevant to the industry sector
 - access to legislation/codes of practice relevant to quality including HACCP

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK308 Handle bulk materials in storage area

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can handle bulk materials in storage, including:

- confirmed work instructions for tasks required and bulk materials to be handled according to workplace procedures
- identified work safety hazards and risks, selected and used appropriate personal protective equipment (PPE) and implemented control measures
- prepared and safely used equipment for bulk storage activities
- assessed work implications for the storage environment and determined actions and activity to address possible outcomes
- maintained records for bulk storage, handling and equipment maintenance according to procedures
- identified bulk materials legislative, regulatory and biosecurity implications and implemented appropriate protocols and procedures for compliance
- collected, prepared, labelled and despatched samples of bulk materials for testing according to workplace procedures
- selected appropriate storage type and equipment and moved bulk material in storage area according to required bulk material characteristics
- maintained quality and minimised infestations and contamination of the product
- cleaned, maintained, secured and stored machinery and equipment and related work facilities according to workplace procedures and maintenance requirements
- recognised, reported and rectified operational faults of storage facilities and equipment according to workplace procedures
- applied measures to ensure product flow was maintained.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of materials and their characteristics suitable for bulk storage
- sampling techniques, quality and classification
- common bulk material biological and product contamination and the problems they can cause for storage
- effect of product properties, including contaminants and desiccant dusts, on the flow of the product
- bulk storage legislative requirements, manufacturer's instructions and workplace procedures
- storage operations and configuration
- work place safety requirements for equipment and facilities in a bulk storage environment
- organisation and industry guidelines for segregation of bulk materials and related quality assurance principles
- bulk storage tools and equipment and their operation including:
 - pre-start checks
 - safety checks
 - maintenance requirements
- cleaning and storage of machinery and equipment
- environmental impact associated with bulk storage operations
- safety hazards, and risks associated with bulk storage
- safety risk controls associated with bulk storage, including PPE
- work place recording and reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a bulk storage facility or an environment that accurately represents workplace conditions for the relevant industry sector
- resources, equipment and materials:
 - access to bulk materials
 - tools, equipment and machinery used to handle bulk materials
 - PPE
- specifications:
 - workplace procedures for bulk storage environment operations
 - operating instructions for required tools, equipment and machinery
 - safety data sheets for cleaning products
 - workplace job specifications or client briefs

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK309 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply environmentally sustainable work practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

Work routines meet organisational and compliance requirements for ethical handling and welfare of animals, environmental sustainability, work health and safety, and biosecurity appropriate to the work role.

No licencing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify current practices in relation to resource usage and sustainability	1.1 Identify current environmental regulations and associated procedures applying to the workplace 1.2 Identify environmental sustainability policy and procedures applicable to the workplace 1.3 Identify resource usage in the workplace using purchasing and other relevant data 1.4 Access information on impact of resource usage on environmental sustainability 1.5 Conduct a safety hazard analysis and risk assessment
2. Contribute to the review of workplace environmental sustainability practices	2.1 Collect information on environmental sustainability and resource efficiency systems relevant to the workplace 2.2 Review current practices and identify potential areas for improvement 2.3 Seek suggestions and ideas from stakeholders to improve the management of the environment and resource efficiency 2.4 Contribute to development of tools or resources to help make improvements in the workplace, using collected information 2.5 Communicate proposed improvements to management
3. Apply improvement strategies	3.1 Use appropriate techniques and tools to assist in achieving efficiencies and environmental targets 3.2 Apply life cycle management principles 3.3 Apply strategies to minimise waste and employ recycling, re-use or re-purposing where appropriate 3.4 Apply strategies to minimise environmental risks and impacts
4. Record and report on work practices	4.1 Use monitoring and evaluation tools and technology where available 4.2 Record incidents where sustainability policy and procedures have been breached 4.3 Record and report on progress against resource efficiency and environmental targets 4.4 Provide feedback to management on environmental sustainability review and improvement process 4.5 Promote organisational improvement strategies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCWRK313A Implement and monitor environmentally sustainable work practices. No equivalent unit.

Assessment Requirements for AHCWRK309 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify current procedures and practices related to environmental regulations
- identify current procedures and practices related to minimising impact of resource usage on environment
- make contributions to the review of environmental sustainability procedures and practices through research and development of tools or techniques
- use appropriate techniques and tools to assist in achieving resource efficiencies and environment targets
- use communication skills to:
 - convey proposed improvements
 - provide feedback on improvement processes
 - promote organisational improvement strategies
- apply life cycle management principles in strategies to improve resource usage, reduce waste, employ recycling, re-use, or re-purposing, and to minimise environmental risks and impacts
- use tools and technology to monitor effectiveness of improvement strategies, and incidents that breach sustainability policy and procedures
- record and report on progress against resource efficiency and environmental targets.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic environmental sustainability principles
- environmental legislation, regulations, standards, codes of practices as may be relevant to industry sector and workplace

- relevant internal and external sources of information that can be used to identify sustainability improvements
- common environmental and energy efficiency issues within the industry
- environmental hazards and risks associated with the relevant industry sector
- organisation's sustainability work policies and procedures
- principles of resources efficiency and life cycle management
- practices for disposal or recycling of waste associated with relevant industry sector
- organisation's recording and reporting systems.

Assessment Conditions

Assessors must satisfy current standards for RTOs

Links

Companion Volume implementation guides are found in VETNet -

AHCWRK313 Collect samples for a rural production or horticulture monitoring program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to collect samples as part of a rural production or horticulture monitoring program or while conducting post-mortem examination of livestock or other animals.

The unit applies to individuals who collect samples under broad direction, and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for collection of samples	1.1 Confirm purpose and scope of sample collection activity with supervisor or from work instructions 1.2 Confirm sample collection schedule with supervisor 1.3 Confirm sampling site location and gain approval for site access where required

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Identify samples to be collected and preserved with supervisor 1.5 Assess range of likely operating conditions, hazards and difficult or sensitive environments for impact on sampling and testing
2. Prepare equipment and resources	2.1 Source equipment required for sampling and preserving according to sampling procedures 2.2 Check tools and equipment for serviceability 2.3 Identify faulty or unsafe tools and equipment, and separate for repair or replacement 2.4 Identify potential hazards and risks, and implement safe working practices to manage risks 2.5 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task 2.6 Collect data or record sheets or books for use 2.7 Move tools, equipment, data sheets and personnel to sampling sites and prepare for use
3. Carry out sampling and preserving procedures	3.1 Collect samples according to sampling plan 3.2 Preserve and record samples 3.3 Prepare and package samples for external analysis according to laboratory standards, and send to laboratory 3.4 Package and transport hazardous materials appropriately 3.5 Make observations, including information on the surrounding area and environmental conditions 3.6 Report and deliver collection outcomes, including presentation of samples
4. Complete sample collection activities	4.1 Clean, sanitise, maintain and store tools, equipment and PPE 4.2 Record sampling results and observations on data sheets, and forward to appropriate person 4.3 Report sampling results and changes in field conditions, and tools and equipment unserviceability, to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret textual information from a range of sources about sample collection activities
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare records
Oral communication	<ul style="list-style-type: none"> Use clear language with supervisor to confirm purpose and scope of sample collection activity Use clear language to report sampling results and changes in field conditions, and tools and equipment unserviceability

Assessment Requirements for AHCWRK313 Collect samples for a rural production or horticulture monitoring program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has collected samples for a rural production or horticulture monitoring program on at least one occasion and has:

- planned for collection of samples and moved equipment to the site
- used and operated sampling tools and equipment relevant to the sampling activity
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- followed sampling plan
- preserved samples for a given site
- prepared samples for external analysis
- packaged samples for transport to laboratory
- made observations and distinguished atypical circumstances
- recorded sampling results and observations on data sheets.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- field procedures for sampling and preservation
- collecting equipment and methods
- preservation equipment and processes
- workplace requirements applicable to health and safety in the workplace for collecting samples for rural production or horticulture monitoring programs
- sample recording and reporting procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - sample collection, tools and equipment
 - PPE applicable to collecting samples for rural production or horticulture monitoring programs
- specifications:
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to collecting samples for rural production or horticulture monitoring programs
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK314 Monitor weather conditions

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to monitor and interpret weather and climate conditions and assess the likely impact on work functions and activity.

The unit applies to individuals who monitor weather conditions under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret weather and climate information	1.1 Review weather and climate information and warnings to determine likely conditions 1.2 Anticipate and assess potential variations in weather and climate conditions according to weather information and reports 1.3 Identify the possible impacts of weather and climate on workplace activity 1.4 Identify and review options for appropriate preventative actions

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Carry out preventative actions within the workplace	2.1 Disseminate information and advice according to workplace procedures 2.2 Plan preventative action according to the known effects on workplace activities 2.3 Implement actions to minimise adverse effects on workplace activities 2.4 Adjust and revise workplace activities and schedules according to weather conditions
3. Monitor weather and climate	3.1 Access regular weather updates to determine the ongoing suitability of current programs 3.2 Review the viability and scheduling of work tasks to align with predicted weather conditions 3.3 Record weather information according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret weather reports, warnings and data from a range of sources
Writing	<ul style="list-style-type: none"> Record weather and climate data according to workplace procedures using appropriate language, grammar and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to interpret and compare weather data

Assessment Requirements for AHCWRK314 Monitor weather conditions

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored weather conditions on at least two occasions and has:

- interpreted weather and climate information and considered the impact on work activities and current operations
- interpreted weather and climate conditions to determine preventative actions
- communicated warnings and concerns to others according to workplace procedures
- implemented preventative actions to minimise impact of adverse weather conditions on workplace activities
- monitored ongoing changes to weather conditions, and reviewed prevention actions
- recorded weather information according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- weather and climate conditions and their impact upon agriculture, horticulture and conservation activities, including:
 - humidity
 - temperature
 - sunlight light
 - delta T (ΔT)
 - frosts
 - inversions
 - dew point
 - wind force and direction
 - rainfall precipitation rate and frequency

- methods of monitoring and interpreting weather and climatic conditions, including:
 - bureau of meteorology
 - local weather stations
 - weather meters
- workplace and industry procedures for monitoring weather and climate conditions and recording and reporting
- effect of adverse weather conditions on agriculture, horticulture and conservation activities
- strategies to mitigate effects of adverse weather and climatic conditions on agriculture, horticulture and conservation activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - weather reports, warnings and climate data relevant to workplace
 - computer hardware and software or similar technologies to access weather data
- specifications:
 - workplace procedures, instructions or job specifications relevant to assessing the effects of weather conditions
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK315 Respond to emergencies

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to recognise and respond to workplace emergencies.

The unit applies to individuals who respond to emergencies under broad direction and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements and manufacturer specifications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for emergency situations	1.1 Identify potential workplace emergency situations and appropriate responses 1.2 Identify emergency resources and their location in the work area 1.3 Identify potential hazards and risks, and implement safe working

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>practices to manage risks</p> <p>1.4 Select, fit, use, maintain and store personal protective equipment (PPE) and safety and communications equipment</p> <p>1.5 Identify and report unserviceable safety and communications equipment and PPE according to workplace procedures</p>
2. Identify and evaluate the emergency	<p>2.1 Recognise and assess the identified or potential emergency situation risks, and effectiveness of initial response actions</p> <p>2.2 Seek advice in evaluating the emergency from appropriate personnel</p> <p>2.3 Determine emergency needs and priority, including any assistance that may be required</p>
3. Implement fire protection and control procedures	<p>3.1 Minimise the risk of fire hazards and any hazardous fuelling procedures</p> <p>3.2 Carry out workplace safety procedures for the handling and use of industrial gases</p> <p>3.3 Use fire extinguishers and equipment appropriate to the fire situation, and notify authorities where applicable</p> <p>3.4 Follow procedures for evacuation to nominated assembly points</p>
4. Confine the emergency where possible	<p>4.1 Confine emergency to the immediate area using available resources</p> <p>4.2 Carry out emergency procedures, and operate equipment using safe work practices</p> <p>4.3 Use equipment safely in conjunction with other emergency actions</p> <p>4.4 Assist with the evacuation of personnel and animals</p> <p>4.5 Provide information required to assist emergency services</p>
5. Control the emergency situation	<p>5.1 Evacuate casualties following workplace emergency procedures</p> <p>5.2 Minimise the risk to self and casualties by minimising and isolating hazards where possible</p> <p>5.3 Seek first aid assistance and advice where necessary</p> <p>5.4 Record and report emergency situation response actions to supervisor</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use clear language with appropriate personnel to seek advice in relation to emergency situation Use clear language to report unserviceable safety equipment and PPE

Assessment Requirements for AHCWRK315 Respond to emergencies

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has responded to emergencies on at least two occasions and has:

- operated emergency safety and communications equipment according to manufacturer specifications and training
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- evaluated the emergency to determine emergency response
- implemented fire protection and control procedures
- used appropriate fire protection and control techniques relevant to the organisation and industry
- safely confined the emergency to immediate area where possible and controlled the emergency situation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace hazard identification and risk assessment techniques and tools
- use of safety and communications equipment and protocols in the event of an emergency
- workplace requirements and duty of care responsibilities applicable to health and safety in the workplace for responding to emergencies
- workplace accident and incident policies and procedures
- emergency network contacts and call out procedures
- the proper use and technique for handling industrial gases
- workplace emergency evacuation procedures and assembly points.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - emergency safety and communications equipment and resources, including firefighting tools and equipment
 - PPE applicable to responding to emergencies
- specifications:
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to responding to emergencies
 - workplace accident and incident policies and procedures, and emergency evacuation procedures
- relationships:
 - appropriate personnel and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for response	1.1 Obtain task and operational instructions 1.2 Confirm location and details of incident 1.3 Collect tools and equipment according to task requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Check tools and equipment for serviceability 1.5 Identify faulty or unsafe tools and equipment, and separate for repair or replacement 1.6 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task 1.7 Identify local environment conditions
2. Respond to incident	2.1 Travel to incident location in a safe and efficient manner 2.2 Maintain communication with base station and other rescue personnel at all times 2.3 Carry out on-site search activities as necessary
3. Effect rescue	3.1 Assess and monitor incident scene for hazards and appropriateness of planned procedures 3.2 Modify planned procedures where necessary in response to local circumstances 3.3 Provide support to other rescue services as appropriate 3.4 Obtain access to casualties safely 3.5 Operate equipment safely and appropriately 3.6 Communicate the progress of the rescue to appropriate rescue personnel 3.7 Move casualties to safety as directed
4. Implement post-incident responses	4.1 Recover, clean, maintain and store tools, equipment and PPE 4.2 Document and report incidents and tools and equipment unserviceability to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical

Skill	Description

Assessment Requirements for AHCWRK316 Respond to rescue incidents

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has responded to at least one rescue incident and has:

- investigated the circumstances and logistics for the emergency
- carried out preparation and moved to the rescue site
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- assessed the situation and established communication with additional or specialist help
- carried out the required rescue or response to emergency
- implemented post-incident responses.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operation and characteristics of rescue equipment, tools and vehicles
- workplace requirements applicable to health and safety in the workplace for responding to rescue incidents
- local environmental conditions
- search and rescue methods
- types of hazards and how they should be handled.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - rescue tools and equipment
 - PPE applicable to responding to rescue incidents
- specifications:
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to responding to rescue incidents
- relationships:
 - supervisor, base station and other rescue personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK317 Coordinate work site activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to coordinate work site activities for small-scale projects.

The unit applies to individuals who coordinate work site activities under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements and sustainability practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work site activities	1.1 Confirm work requirements with supervisor 1.2 Identify personnel, equipment and material resource requirements according to the scope of the project and supervisor instructions 1.3 Identify and document the order of activities and time allocation, and present to the supervisor for verification

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify the environmental implications of the proposed work site activities, assess the likely outcomes and report to supervisor</p> <p>1.5 Identify potential hazards and risks, and implement safe working practices to manage risks</p> <p>1.6 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task</p>
2. Organise resources	<p>2.1 Confirm with supervisor that purchase of materials and hire of equipment and machinery where required has been authorised</p> <p>2.2 Confirm with supervisor that external agency permits have been arranged</p> <p>2.3 Confirm with supervisor that neighbours and affected parties of works to be undertaken have been notified as necessary</p> <p>2.4 Assist with delivery of materials, equipment and machinery to designated site</p> <p>2.5 Organise personnel to be on site where required</p>
3. Coordinate and report on activities	<p>3.1 Coordinate all resources to suit the scope of the project and order of activities</p> <p>3.2 Direct personnel in activities for each period of work</p> <p>3.3 Monitor and document personnel, activities, timelines and resource usage</p> <p>3.4 Identify contingency situations, and report to the supervisor and take corrective actions as required</p> <p>3.5 Write a simple project report to inform management of work site activities undertaken and completed</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare simple project reports

Assessment Requirements for AHCWRK317 Coordinate work site activities

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has coordinated work site activities on at least one occasion and has:

- communicated with personnel at all levels
- read and interpreted documentation associated with work site activities
- prepared and planned worksite activities
- scheduled activities and allocated tasks and responsibilities
- recognised and reported workplace health and safety hazards and used safe work practices
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- coordinated a team to achieve optimum performance
- monitored activities and recorded costs and production levels
- documented results clearly and concisely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the range, use and availability of materials, equipment and machinery that may be required for the project
- work schedule programming
- environmental awareness associated with undertaking project works to ensure the impact on the environment is minimal
- workplace requirements applicable to health and safety in the workplace for coordinating work site activities
- responsibilities and requirements for obtaining external agency permits where required

- possible causes of disruption to work activities and their effect on quality and time schedules.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and material applicable to work site activity
 - PPE applicable to coordinating worksite activities
- specifications:
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to coordinating work site activities
- relationships:
 - work site personnel and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK318 Comply with industry quality assurance requirements

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has complied with industry quality assurance requirements on at least one occasion and has:

- identified elements of quality assurance (QA) and quality standards relevant to the industry sector
- assessed work area for critical control points, safety hazards and risks
- completed records according to workplace procedures
- implemented standard operating procedures for operations and corrective action
- recognised, responded to and reported non-conformances and variations of product against quality standards
- identified and reported issues that impact on product quality.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry quality assurance requirements for a specified sector of industry
- purpose and requirements of a QA program
- procedures, policies, guidelines and standard operating procedures for field of work
- internal QA checking requirements
- reporting and recordkeeping requirements for QA
- work processes for specified field of work.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - products or services relevant to the specific primary production sector
- specifications:
 - workplace policies and procedures relevant to QA
 - workplace specifications and quality standards relevant to the industry sector
 - codes of practice relevant to quality.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK319 Handle bulk materials in a storage area

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to safely receive, move and sample bulk materials (in liquid and solid form, not classified as dangerous goods) in a storage area to minimise loss or damage, and repair, clean and maintain storage facility according to industry standards and storage program.

The unit applies to individuals who handle bulk materials in a bulk storage environment under broad direction and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and environment and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to work in bulk materials storage area	1.1 Confirm job requirements according to workplace procedures 1.2 Identify hazards and risks, and implement safe working practices

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>to manage risks</p> <p>1.3 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task</p> <p>1.4 Select, check and maintain tools and equipment for bulk storage work</p> <p>1.5 Identify environmental risks associated with undertaking work in the bulk materials storage area, assess likely outcomes and take appropriate action to minimise risks</p> <p>1.6 Follow biosecurity protocols for storage facilities</p> <p>1.7 Identify and comply with legislative, regulatory and industry requirements</p>
2. Sample bulk materials for testing	<p>2.1 Take representative samples of bulk material for testing according to workplace procedures</p> <p>2.2 Follow workplace health and safety procedures when taking samples</p> <p>2.3 Prepare and label representative bulk material samples for dispatch according to workplace procedures</p> <p>2.4 Dispatch samples according to workplace procedures</p>
3. Move bulk materials into and out of storage	<p>3.1 Identify bulk materials for handling and storage according to job requirements</p> <p>3.2 Segregate bulk materials by volume, type, variety and quality characteristics according to workplace specifications</p> <p>3.3 Check and take measures to minimise infestation and contamination of bulk materials during movement according to workplace procedures</p> <p>3.4 Select storage type and handling equipment for each bulk material according to the material characteristics and properties</p> <p>3.5 Implement measures to minimise the effect of product properties on the flow of bulk materials</p> <p>3.6 Operate, clean and store equipment used for bulk storage according to workplace and environmental procedures</p> <p>3.7 Complete records according to workplace procedures</p>
4. Repair, clean and maintain storage facility	<p>4.1 Identify equipment and facilities requiring repair or maintenance</p> <p>4.2 Conduct maintenance and repairs according to workplace</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	procedures 4.3 Complete maintenance records according to workplace procedures 4.4 Clean and tidy work area and dispose of or recycle unwanted materials and waste 4.5 Clean, maintain and store tools, equipment and PPE according to workplace procedures 4.6 Identify and report maintenance and repairs, and unserviceable machinery, tools and equipment according to workplace procedures

Assessment Requirements for AHCWRK319 Handle bulk materials in a storage area

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has handled bulk materials in a storage area on at least one occasion and has:

- confirmed work instructions for tasks required and bulk materials to be handled
- recognised and reported workplace health and safety hazards and used safe work practices
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- prepared and safely used equipment for bulk storage activities
- assessed work implications for the storage environment and determined actions and activity to address possible outcomes
- identified bulk materials legislative, regulatory and biosecurity implications, and implemented appropriate protocols and procedures for compliance
- collected, prepared, labelled and dispatched samples of bulk materials for testing
- maintained quality and minimised infestations and contamination of the product
- selected appropriate storage type and equipment, and moved bulk material in storage area according to required bulk material characteristics
- applied measures to ensure product flow was maintained
- cleaned and tidied up work area, maintained and stored machinery, tools and equipment, and disposed of waste according to workplace environmental procedures and maintenance requirements
- maintained records for bulk storage, handling and equipment maintenance
- recognised, reported and rectified operational faults of storage facilities and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- bulk storage legislative requirements, manufacturer instructions and workplace procedures

- safety hazards, risks and controls associated with bulk storage
- workplace requirements applicable to health and safety in the workplace for handling bulk materials in a storage area, including appropriate use of PPE
- bulk storage tools and equipment and their operation
- environmental impact associated with bulk storage operations
- sampling techniques, quality and classification
- workplace and industry guidelines for segregation of bulk materials, and related quality assurance principles
- common bulk material biological and product contamination and the problems they can cause for storage
- effect of product properties, including contaminants and desiccant dusts, on the flow of the product
- storage operations and configuration
- types of materials and their characteristics suitable for bulk storage
- cleaning and storage of machinery and equipment
- workplace recording and reporting procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - bulk materials
 - tools, equipment and machinery used to handle bulk materials
 - PPE applicable to handling bulk materials in a storage area
- specifications:
 - workplace procedures for bulk storage operations
 - operating instructions for required tools, equipment and machinery
 - safety data sheets for cleaning products
 - workplace job specifications or client briefs
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to handling bulk materials in a storage area
 - workplace environmental procedures relevant to bulk storage operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK320 Apply environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to apply environmentally sustainable work practices.

The unit applies to individuals who apply environmentally sustainable work practices under broad direction and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements and sustainability and biosecurity practices.

No licencing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify current resource usage and practices	1.1 Identify current environmental regulations and associated procedures applicable to the workplace 1.2 Identify environmental sustainability policy and procedures and environmental targets applicable to the workplace

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify examples of resource usage in the workplace using records, relevant information and data</p> <p>1.4 Access information on impact of resource usage on environmental sustainability</p>
2. Contribute to the review of workplace practices	<p>2.1 Review current practices and identify potential areas for improvement</p> <p>2.2 Seek feedback from stakeholders to improve the management of the environment and resource efficiency</p> <p>2.3 Contribute to development of tools or resources to help make improvements in the workplace</p> <p>2.4 Communicate proposed improvements to key personnel and stakeholders</p>
3. Apply improvement strategies	<p>3.1 Use appropriate techniques and tools to assist in achieving efficiencies and environmental targets</p> <p>3.2 Apply strategies to minimise wastage</p> <p>3.3 Apply strategies to minimise environmental risks and impacts</p>
4. Record and report on work practices	<p>4.1 Use monitoring and evaluation tools</p> <p>4.2 Record incidents where sustainability policy and procedures have been breached</p> <p>4.3 Record progress against resource efficiency and environmental targets</p> <p>4.4 Provide feedback to key personnel and stakeholders on work practice review and improvements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCWRK320 Apply environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has applied environmentally sustainable work practices on at least one occasion and has:

- identified current procedures and practices related to environmental regulations and minimising impact of resource usage on environment
- made contributions to the review of environmental sustainability practices and tools
- used communication skills to:
 - convey proposed improvements
 - provide feedback on improvement processes
 - seek stakeholder input on improvement processes
- used appropriate techniques and tools to assist in achieving resource efficiencies and environmental targets
- used tools to monitor effectiveness of improvement strategies, and incidents that impact on sustainability practices
- recorded progress against resource efficiency and environmental targets.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of sustainability, including the economy, society and the environment
- environmental legislation, regulations, standards and codes of practices relevant to industry sector and workplace
- workplace environmental and sustainability principles, policies and procedures
- principles of waste management, including:
 - reduce
 - re-use

- re-purpose
- recycle
- relevant internal and external sources of information that can be used to identify sustainability improvements
- resources used in own industry sector, including:
 - labour
 - electricity
 - financial
 - time
- environmental resources used in own industry sector, including:
 - land
 - soil or growing media
 - water
 - vegetation
- common environmental and energy efficiency issues within the industry
- principles of resource efficiency, including workplace and industry improvement processes and practices
- environmental hazards and risks associated with the relevant industry sector
- workplace recording and reporting systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace environmental and sustainability policies and procedures
- specifications:
 - workplace documents, including workplace environmental procedures, processes, instructions and job specifications relevant to applying environmentally sustainable work practices
 - environmental legislation, regulations, standards and codes of practices relevant to industry sector and workplace
- relationships:
 - key personnel and stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK321 Provide on-job training support

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to provide on-job training (OJT) support.

The unit applies to individuals who provide OJT support under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify needs for OJT support	1.1 Determine training needs in consultation with supervisor and employee or trainee 1.2 Obtain agreement on the extent and scope of training support to be provided with the supervisor 1.3 Define outcomes from training prior to commencement 1.4 Clarify methods of providing OJT support, and obtain agreement from supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Support OJT	2.1 Confirm training outcomes with the employee or trainee 2.2 Deliver training as directed according to workplace procedures 2.3 Provide practice opportunities to reinforce the training
3. Provide follow-up and support to learner	3.1 Provide opportunities to apply skills in the workplace 3.2 Provide feedback and coaching to assist learning 3.3 Report employee progress to their supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use clear language and accurate industry terminology to provide feedback and coaching support to employee or trainee and report progress to supervisor

Assessment Requirements for AHCWRK321 Provide on-job training support

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided on-job training (OJT) support for an employee or trainee on at least one occasion and has:

- determined training needs and required outcomes
- provided a physically and psychologically safe learning environment
- identified and provided OJT support and follow-up support to employee or trainee
- delivered training in work tasks
- reported employee or trainee progress to supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- set-up, approaches and resources required for OJT
- training needs of employee or trainee
- OJT and coaching techniques, including providing a safe learning environment
- task knowledge and skills being delivered by OJT
- reviewing and reporting on OJT support.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- relationships:
 - employee or trainee and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK322 Conduct site inspections

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to conduct a site inspection, including verification of the location, ownership, orientation and boundaries of a site.

The unit applies to individuals who conduct site inspections under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information	1.1 Obtain site location and relevant details 1.2 Source site maps and plans where available, and review 1.3 Identify the scope of inspection according to client or stakeholder needs and relevant regulations and legislation 1.4 Seek formal approval to visit site where required

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Identify and record covenants 1.6 Check for remote systems and their status
2. Prepare for a site visit	2.1 Identify and prepare tools and equipment required for inspection 2.2 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task 2.3 Plan methods for recording inspection, and confirm forms are available for use 2.4 Evaluate the scope of proposed work, and prepare field notes to check specific concerns 2.5 Evaluate environmental conditions in preparation for likely site conditions 2.6 Consider traffic management requirements
3. Conduct site inspection	3.1 Carry out site orientation and verify ownership and site boundaries 3.2 Identify potential hazards and risks, and implement safe working practices to manage risks 3.3 Identify and record site features and conditions 3.4 Identify and record site-specific concerns 3.5 Identify and record existing on-site services and adjacent site features
4. Document information	4.1 Prepare and document site inspection information 4.2 Document site inspection information in an inspection or site inventory report, or on the base plan if required 4.3 Complete documents and forward to client or supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical

Assessment Requirements for AHCWRK322 Conduct site inspections

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted a site inspection on at least one occasion and has:

- collected information relevant to conducting site inspection, including relevant regulations and legislation
- identified scope of inspection and sought approval to visit site where required
- prepared for and conducted site inspection
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- recorded site inspection information using inspection forms, and documented in an inspection or site inventory report
- recognised and reported workplace health and safety hazards and used safe work practices to minimise risks.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to source site maps and plans, including digital maps
- site map and plan interpretation
- site inspection procedures
- legislative and regulatory requirements, including environmental protection legislation relevant to conducting site inspections
- local government regulations relating to the proximity of trees to buildings, services and roads
- local tree protection and preservation regulations and codes of practice relevant to conducting site inspections
- protocols of accessing and visiting a site

- workplace requirements applicable to health and safety in the workplace for conducting site inspections, including appropriate use of PPE
- measuring and estimating methods
- current land use and environmental threats to site.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment applicable to conducting site inspections
 - PPE applicable to conducting site inspections
- specifications:
 - local government regulations and local tree protection and preservation regulations and codes of practice relevant to conducting a site inspection
 - workplace health and safety legislation, regulations, codes of practice and workplace procedures relevant to conducting a site inspection
 - workplace documents, including workplace environmental procedures, processes, instructions and job specifications relevant to conducting a site inspection
- relationships:
 - client, stakeholder and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK323 Operate in isolated and remote situations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to plan, prepare for and work safely in isolated and remote situations.

The unit applies to individuals who operate in isolated and remote situations under broad direction, and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for operating in remote environments	1.1 Collate and record information relating to the operating environment and location 1.2 Establish detailed operating plans for work, travel, emergencies, timeframes and contingencies with supervisor 1.3 Notify appropriate authorities of the action plans and time schedules according to workplace procedures 1.4 Identify and source relevant maps

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Conduct a risk assessment for potential hazards and risks for remote location, and implement safe working practices to manage risks
2. Prepare for operating in remote environments	2.1 Prepare personal needs for remote situation according to operating plan 2.2 Select, fit and store personal protective equipment (PPE) applicable to the task 2.3 Prepare transportation and equipment required for prescribed work according to workplace procedures 2.4 Obtain and review relevant maps prior to departure to orient and plan route 2.5 Record planned activities and itinerary prior to departure according to workplace procedures 2.6 Identify weather conditions and assess effect on travel and operating outcomes
3. Prepare for emergency situations	3.1 Arrange provisioning according to operational and emergency requirements 3.2 Participate in remote area survival skills training prior to departure 3.3 Apply emergency management operational plans according to workplace policies and procedures
4. Operate in remote environment	4.1 Carry out activities in remote situations according to prescribed plans and procedures 4.2 Use and maintain PPE applicable to the task 4.3 Monitor available provisions and resources to ensure appropriate usage according to operating plan 4.4 Use appropriate skills to modify the living environment according to prevailing conditions 4.5 Use appropriate technologies to maintain communication according to workplace procedures 4.6 Handle emergency situations according to prescribed plans and workplace procedures 4.7 Comply with workplace reporting procedures on return to base

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret symbols and features on maps to determine special awareness
Oral communication	<ul style="list-style-type: none"> Use clear language and concepts, and tone and pace appropriate for discussions with supervisor when planning and reporting

Assessment Requirements for AHCWRK323 Operate in isolated and remote situations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated in an isolated and remote environment on at least one occasion and has:

- planned and prepared for operating in remote environments in conjunction with supervisor
- sourced and interpreted maps of the remote area
- conducted a risk assessment for workplace health and safety, and environmental hazards for remote location
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- maintained records according to workplace procedures
- prepared and implemented procedures for emergency situations
- prepared and monitored provisions and resources for essential and emergency needs
- conducted work activities safely in a remote environment
- used bushcraft skills to modify the living environment and reduced risks
- implemented workplace communication procedures to notify location, activities and travel to appropriate personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- planning and preparations required for working in isolated environments
- map reading and navigation skills, including:
 - direction finding, including GPS and compass
 - local topography
 - habitation

- geographic indicator
- workplace risk assessment techniques
- clothing requirements for adverse weather conditions
- workplace requirements applicable to health and safety in the workplace for operating in isolated and remote situations, including appropriate use of PPE
- emergency vehicle and mechanical equipment repair
- environmental impacts of work in isolated and remote situations, including weather patterns and indicators
- basic survival and bushcraft skills to maintain human needs in survival situations, including:
 - making a fire
 - cooking
 - distress signalling
 - basic rope skills and useful knots
- communication procedures and operation and maintenance of communications equipment, including:
 - field communications by two-way radio
 - satellite telephony
 - HF or UHF radio
- basic first aid procedures for common injuries.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an isolated and remote environment or an environment that accurately represents working in an isolated and remote environment
- resources, equipment and materials:
 - provisions and resources required for an isolated worksite
 - communications and navigational equipment
 - basic survival tools and equipment
 - tools and equipment for work activities
 - PPE applicable to operating in isolated and remote working environments
- specifications:
 - workplace documents, including policies, procedures, processes, instructions and job specifications
 - manufacturer operating instructions for specific communications and navigational equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK401 Implement and monitor quality assurance procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement and monitor quality assurance procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish quality specifications for product	1.1 Source market specifications 1.2 Identify legislated requirements

Element	Performance criteria
2. Identify hazards and critical control points in the production of quality product	2.1 Identify critical control points impacting on quality 2.2 Determine the degree of risk for each hazard
3. Assist in planning of quality assurance procedures	3.1 Develop procedures for each identified control point to ensure optimum quality 3.2 Minimise hazards and risks by application of appropriate controls 3.3 Develop processes to monitor the effectiveness of quality assurance procedures
4. Implement quality assurance procedure	4.1 Allocate responsibilities for carrying out procedures to staff and contractors 4.2 Prepare instructions 4.3 Provide staff and contractors with induction training on the quality assurance policy 4.4 Provide staff and contractors with in-service training relevant to their allocated procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK401A Implement and monitor quality assurance procedures.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWRK401 Implement and monitor quality assurance procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and critical control points in the production of quality product
- assist in planning of quality assurance procedures
- provide induction and in-service staff training
- implement quality assurance procedures
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- market requirements for product
- definition of quality
- quality specifications for product
- enterprise and industry quality assurance systems
- Hazard Analysis and Critical Control Points (HACCP) techniques
- strategies for control of hazards to quality
- work place training strategies
- delegation and empowerment
- contingency management.

Assessment Conditions

Assessors must satisfy current standards for RTOs

Assessment Requirements for AHCWRK406 Develop community networks

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed community networks, and has on at least one occasion:

- communicated with people using appropriate language and style
- investigated equity requirements and cultural protocols for dealing with community groups
- promoted program goals and issues to community groups through networking
- established networks of common interests through individual contacts and contacts with other groups.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- community structures, organisations and cultures
- relevant government community action programs
- process of delivery of programs
- need for the establishment of a community group
- current social and environmental affairs for local community and wider region.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- community group program or activity, including program goals and issues
- relationships:
 - business, social, personal and programs to the community contacts.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK407 Promote community programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to promote community programs to target markets with a view to encouraging participation.

The unit applies to individuals who apply specialist skills and knowledge to promote community programs. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify target markets	<p>1.1 Identify potential of program to appeal to sections of community or industry in terms of benefits and costs</p> <p>1.2 Identify sectors of community and industry that are potential users, customers and audiences of program</p> <p>1.3 Develop a plan to promote program or local projects or group activities with other communication activities</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Develop promotional materials	2.1 Determine range of promotional channels to reach target sectors 2.2 Source or develop promotional materials to suit promotional channels and target sectors 2.3 Test impact of promotional materials with group or community members 2.4 Obtain specialist marketing support to address specific marketing issues within promotion budget and program and agency guidelines
3. Promote program to potential users	3.1 Approach potential users of program and services through promotional channels and directly 3.2 Assess impact of promotional activities to determine changes required 3.3 Adjust promotional plan and activities to achieve an improved impact
4. Obtain commitment to use program services	4.1 Present proposals for delivery of program services to interested potential users in terms of benefits, costs and other factors 4.2 Address issues raised by potential users to overcome objections 4.3 Obtain commitments to use program services or support program
5. Respond to enquiries	5.1 Address enquiries by members of community, industry and program in terms of good customer service 5.2 Keep records of contacts, enquiries and presentations for reporting and follow-up 5.3 Follow up enquiries and presentations to obtain commitment to program services and objectives

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information regarding community program and promotional marketing, budget and agency guidelines

Skill	Description
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to complete community program promotion plan
Oral communication	<ul style="list-style-type: none"> Use clear language and standard industry terminology to promote community programs and address enquiries

Assessment Requirements for AHCWRK407 Promote community programs

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has promoted at least one community program and has:

- identified the potential of a program to appeal to sections of community or industry based on benefits and costs
- determined communication channels appropriate for promotion
- developed audio, written and graphics promotional materials appropriate to the program and according to program and agency guidelines
- responded to queries and enquiries generated by the promotion program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic marketing principles
- program promotion marketing and budget requirements and agency guidelines for promoting programs and groups
- local advertising channels
- community program services, objectives, goals and guidelines
- local or regional community and industries that could be potential users, customers and audiences of the program.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - community program objectives, goals and guidelines
 - program promotion marketing and budget requirements and agency guidelines
 - computer hardware and software
- relationships:
 - potential users, customers, audiences and specialist marketing support.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided information on issues and policies on at least one occasion and has:

- processed a request for information
- accessed information to respond to a request
- collated information to deal specifically with the request
- prepared and finalised document or correspondence
- maintained a record of the information provided and filed for future reference.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace policies and documentation related to issues and policies
- types of information sources, including:
 - methods of assessing the reliability, credibility and authenticity of information
 - methods and means of accessing and extracting the required information
 - methods of validating information
- types of documents and correspondence and their use.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- workplace policies and documentation
- computer hardware and software
- relationships:
 - clients and colleagues.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK410 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented and monitored environmentally sustainable work practices on at least one occasion and has:

- identified the environmental regulations applicable to the workplace
- analysed and explained information on environmental and resource efficiency systems to the work group
- analysed current resource use and work processes to identify areas for improvement
- conducted an environmental hazard analysis and risk assessment
- sought improvement feedback from stakeholders, key personnel and specialists
- set targets for improvement
- implemented environmental improvement plans for the work group
- developed and used evaluation and monitoring tools.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of sustainability and the circular economy, including the economy, society and the environment
- relevant workplace compliance requirements
- environmental and energy efficiency issues, systems and procedures specific to industry practice
- relevant internal and external sources of information used to identify environmentally sustainable improvements
- environmental hazard analysis and risk assessment techniques and tools
- workplace communication systems and processes
- organisational structure and reporting channels and procedures

- external benchmarks and support for particular benchmarks to be used within the workplace, including approaches to improving resource use for work area and expected outcomes
- strategies to maximise opportunities and to minimise impact relevant to own work area.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace environmental and sustainability policies and procedures
- specifications:
 - workplace documents, including workplace environmental procedures, processes, instructions and job specifications relevant to implementing and monitoring environmentally sustainable work practices
 - environmental legislation, regulations, standards and codes of practices relevant to implementing and monitoring environmentally sustainable work practices
- relationships:
 - work group, key personnel and stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK506 Collect and manage data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to collect, analyse and manage data.

The unit applies to individuals who apply specialised skills and knowledge to the collection and management of data, take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the type and extent of data to be collected	1.1 Define the type and extent of data required 1.2 Consider privacy or sensitive data concerns and appropriate methods to address these concerns 1.3 Identify data sources 1.4 Define data collection methods and techniques relative to data

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>requirements</p> <p>1.5 Communicate data requirements to staff involved in data collection</p> <p>1.6 Identify workplace health and safety hazards and risks associated with data collecting</p>
2. Access and collate data	<p>2.1 Format data to assist collection</p> <p>2.2 Collect data from field source</p> <p>2.3 Collate data by appropriate electronic means</p> <p>2.4 Monitor appropriateness of data and record during collection</p> <p>2.5 Review information using appropriate methods and technologies</p> <p>2.6 Establish and maintain contacts to aid in data collection</p> <p>2.7 Follow workplace health and safety requirements and work practices</p>
3. Evaluate data	<p>3.1 Organise and review data</p> <p>3.2 Seek clarification and assistance where data is unclear or difficult to interpret</p> <p>3.3 Obtain and review additional data as required</p>
4. Manage and retrieve data	<p>4.1 Store data by appropriate electronic means</p> <p>4.2 Present data using appropriate graphical aids and techniques</p> <p>4.3 Assemble data and provide to the manager or client</p> <p>4.4 Retrieve data as required</p> <p>4.5 Suggest new methods of recording and storing data as required</p>
5. Analyse and interpret data	<p>5.1 Analyse data using appropriate statistical and analytical techniques</p> <p>5.2 Interpret data to determine significance, validity and reliability</p> <p>5.3 Document and report findings based on the analysis and interpretation of the data</p> <p>5.4 Organise data into a suitable report format to aid decision making</p> <p>5.5 Provide conclusions based on evidence and reasoned argument</p>

Foundation Skills

Assessment Requirements for AHCWRK506 Collect and manage data

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has collected and managed data on at least one occasion and has:

- identified data requirements and established sampling and data collection techniques
- collected and collated data using standardised recording sheets and systems
- reviewed sampling and data collection techniques based on validity and reliability of the data
- managed data to facilitate retrieval and analysis
- analysed data using appropriate statistical and analytical techniques
- drawn conclusions based on evidence and reasoned argument
- produced a report in required format with information and data presented to support decision making.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sensitive data collection, access and storage techniques
- data collection techniques and procedures
- data recording and evaluation techniques
- data storage and retrieval methods
- data analysis and interpretive techniques
- data reporting and presentation formats.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - research data
 - computer hardware and software
- relationships:
 - staff, contacts, and managers or clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK513 Write and present reports

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has written and presented a separate report on at least two occasions, and has:

- identified and verified the purpose of the report with the client
- conducted research and compiled information
- drawn conclusions from research supported by reasoned argument and supporting information
- produced a correctly formatted report that uses appropriate language and industry standard terminology, is arranged in a logical order, and provides details on information sources and consultation
- made recommendations if required, and referenced to information and conclusions
- delivered a verbal presentation within a specified time using language applicable to the task and audience.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information and research sources that may be used to develop reports
- report and presentation structure
- public presentation techniques and approaches.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - industry publications and internet sources of information relevant to the development of a report
- relationships:
 - appropriately experienced and qualified person, client and work colleagues
- timeframes:
 - according to the job requirements.

AHCWRK514 Manage trial and research material

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to identify the scope and extent of trial and research work, oversee management of trial and research material, and prepare reports.

The unit applies to individuals who apply specialised skills and knowledge to the management of trial and research material, and take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and analyse, design and communicate solutions to sometimes complex problems.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for AHCWRK514 Manage trial and research material

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has managed trial and research material on at least one occasion, and has:

- complied with research and workplace health and safety requirements
- identified the purpose, scope and extent of work
- calculated and documented research costs
- overseen the management of trial and research materials
- collated data and produced report using industry standard terminology.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- research methodologies, planning and design
- workplace health and safety legislation, regulations and workplace procedures relevant to managing trial and research material
- research procedures and best practice techniques
- workplace team management guidelines relevant to managing trial and research material
- data collection and reporting techniques.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- research hypothesis, parameters and objectives
- specifications:
 - workplace health and safety legislation, regulations and workplace procedures applicable to managing trial and research material
- relationships:
 - suppliers, contractors and appropriate personnel
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK517 Interpret legislation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has interpreted legislation on at least two occasions and has:

- determined legislation and legal framework applicable to task
- researched and maintained knowledge of legal frameworks and relevant legislation
- provided staff and clients with advice and documentation regarding applicable legislation, regulations, organisational procedures and codes of practice
- developed and implemented strategies to manage compliance with appropriate legislation
- taken appropriate actions to resolve or report illegal conduct.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant Australian Standards
- how to access and research legislation
- how to interpret and apply legal information to the workplace
- relevant conventions, treaties, agreements, guidelines, declarations, recommendations, laws and rules
- the provisions contained in key relevant legislation and other legally binding legal policies and protocols from all levels of government relevant to the industry
- where to find appropriate sources of information and specialist personnel when limits of own expertise are reached in determining applicable legislation
- organisational policies and procedures relevant to legislation applicable to the organisation
- accepted standards and codes of practice relevant to the workplace, including those relating to:
 - privacy and confidentiality
 - use of company property

- duty of care
- ethical behaviour
- non-discriminatory practice
- conflict of interest
- compliance with reasonable direction
- relevant general legal terminology
- the scope of legal practitioner and support role and own responsibilities and obligations to provide legal advice, complete or sign off on legal work and appear in court as described by relevant jurisdictions
- penalties for non-compliance with legislative requirements
- how to encourage and support own compliance and that of others in the workplace
- techniques to monitor compliance and identify illegal conduct.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computer hardware and software
 - organisational policies and procedures relevant to legislation applicable to the organisation

Assessment Requirements for AHCWRK519 Audit site operations

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has audited site operations on at least one occasion and has:

- determined the scope of items for audit
- identified client or organisation expectations
- interpreted and applied legislative, regulatory and industry requirements relevant to the audit of site operations
- specified parameters of audit requirements
- interpreted and applied codes of practice and Australian standards relevant to the audit of site operations
- defined the audit process
- organised scheduling and meetings
- planned for and acted on contingencies
- organised and completed audit
- identified compliance and non-compliance items
- evaluated audit findings.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legal issues and terminology relating to quality auditing
- legislative, regulatory and industry requirements relevant to the audit of site operations
- quality principles and techniques
- codes of practice and Australian standards relevant to the audit of site operations
- logistics operations of organisation
- audit methodology and techniques relevant to the audit of site operations
- product or service relevant to site operations

- interview techniques
- workplace documentation and policies relevant to site operations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace documentation and policies applicable to the audit of site operations
 - computer hardware and software
- specifications:
 - legislative, regulatory and industry requirements relevant to the audit of site operations
 - codes of practice and Australian standards relevant to the audit of site operations
- relationships:
 - clients, audited group and individual staff.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCWRK520 Develop workplace policy and procedures for environment and sustainability

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to develop workplace policy and procedures for environment and sustainability.

The unit applies to individuals who apply specialised skills and knowledge to develop workplace policy and procedures for environment and sustainability, take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Work (WRK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop workplace environment and sustainability policy	1.1 Identify legislative, regulatory and industry requirements relating to environmental sustainability 1.2 Define scope of environment and sustainability policy

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Gather information from a range of sources to plan and develop policy</p> <p>1.4 Identify and consult with stakeholders as a key component of the policy development process</p> <p>1.5 Include appropriate strategies in policy at all stages of work for minimising resource use and employing life cycle management approaches</p> <p>1.6 Identify and incorporate strategies to reduce hazardous material use where applicable</p> <p>1.7 Make recommendations for policy options based on likely effectiveness, timeframes and cost</p> <p>1.8 Develop policy that reflects the organisation's commitment to environment and sustainability work practices</p> <p>1.9 Select appropriate methods of implementation</p>
2. Communicate workplace environment and sustainability policy	<p>2.1 Promote workplace environment and sustainability policy to key personnel and stakeholders</p> <p>2.2 Inform work team of policy changes and impact on their responsibilities</p>
3. Implement workplace environment and sustainability procedures	<p>3.1 Develop and communicate workplace environment and sustainability procedures</p> <p>3.2 Establish recordkeeping systems for tracking environment and sustainability work practices</p> <p>3.3 Assign responsibility for maintaining recordkeeping system</p>
4. Review workplace environment and sustainability policy implementation	<p>4.1 Investigate outcomes of policy</p> <p>4.2 Monitor records to identify trends that may require remedial action, and use to promote continuous improvement of performance</p> <p>4.3 Modify policy and procedures to incorporate improvements</p> <p>4.4 Document outcomes and provide feedback to key personnel and stakeholders</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyse and evaluate complex textual information to determine legislative, regulatory and industry requirements
Writing	<ul style="list-style-type: none"> Prepare workplace environment and sustainability policies and procedures using clear language, accurate industry terminology and logical structure
Oral communication	<ul style="list-style-type: none"> Initiate discussions with stakeholders, using clear language and questioning techniques to discuss, develop and implement workplace environment and sustainability policy and procedures
Numeracy	<ul style="list-style-type: none"> Estimate and calculate time durations and costs of policy options Use basic mathematical processes of addition, subtraction, division, multiplication, percentages, decimal points, time and ratios

Assessment Requirements for AHCWRK520 Develop workplace policy and procedures for environment and sustainability

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed workplace policy and procedures for environment and sustainability on at least one occasion and has:

- researched, interpreted and applied legislative, regulatory and industry requirements relevant to the development of workplace policy and procedures for environment and sustainability
- planned, developed and implemented organisational policy that complies with legislative requirements
- communicated with stakeholders to discuss approaches to policy development and implementation
- developed and monitored procedures for analysing data on workplace resource consumption
- reviewed policies and procedures, and identified improvements while benchmarking against industry best practice
- incorporated continuous improvement and modified policy and procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace environment and sustainability legislation, regulations and workplace procedures relevant to the development of workplace policy and procedures for environment and sustainability
- legislative, regulatory and industry requirements relevant to the development of workplace policy and procedures for environment and sustainability
- policy development processes and practices
- relevant organisational policies, procedures to improve workplace environment and sustainability work practices

- principles of environmental hazard analysis and risk assessment
- principles, practices and available tools and techniques of environment and sustainability management relevant to the particular industry context
- quality assurance systems relevant to own organisation
- best practice approaches relevant to own work area.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - organisational quality assurance systems
 - organisational policies, procedures and protocols applicable to the development of workplace policy and procedures for environment and sustainability
 - computer hardware and software
- specifications:
 - workplace environment and sustainability legislation, regulations and workplace procedures relevant to the development of workplace policy and procedures for environment and sustainability
 - legislative, regulatory and industry requirements relevant to the development of workplace policy and procedures for environment and sustainability
- relationships:
 - work team, key personnel and stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine QA objectives for the workplace	1.1 Assess future market requirements for quality assured products 1.2 Identify relevant QA programs and costs 1.3 Assess strategic benefits of a QA program

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Plan the QA program and develop implementation strategies	2.1 Define product quality standards 2.2 Audit current status of products and operations 2.3 Evaluate and cost industry QA programs 2.4 Select QA program based on a cost benefit analysis 2.5 Document required processes and practices in the QA program manual and prepare an implementation plan
3. Implement the QA program	3.1 Document instructions defining task and process requirements 3.2 Introduce or consult on changes to processes and practices 3.3 Implement contractor and staff training 3.4 Establish processes to monitor and verify product quality 3.5 Introduce recording systems 3.6 Validate operating instructions under conditions to verify their suitability 3.7 Analyse problems and issues 3.8 Undertake corrective and preventative actions to resolve problems and issues 3.9 Conduct system analysis
4. Review the QA program	4.1 Establish reporting formats 4.2 Implement mechanisms for gaining feedback information 4.3 Prepare for QA audit

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding operating instructions
Oral communication	<ul style="list-style-type: none"> Initiate discussions with contractors and work colleagues, using clear language to communicate QA program requirements

Skill	Description
Numeracy	<ul style="list-style-type: none"> Calculate and document costs of implemented strategy

Assessment Requirements for AHCWRK521 Plan, implement and review a quality assurance program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has planned, implemented and reviewed at least one quality assurance (QA) program and has:

- determined QA objectives for the workplace
- assessed and selected a QA program using a cost benefit analysis
- documented QA processes, practices and instructions
- implemented, monitored, validated and reviewed QA processes and the QA program
- maintained required records to support the QA program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- market projections and customer requirements
- organisational objectives
- workplace culture and values
- cost and benefit of QA implementation
- quality standards
- audit processes
- leadership and administrative skills, including change management
- human resources induction practices
- human resources performance monitoring practices
- QA recording procedures
- system analysis.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - operating instructions relevant to QA program
- specifications:
 - codes of practice relevant to quality
- relationships:
 - managers, staff and contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCWRK605 Design and conduct a field-based research trial

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed and conducted at least one field-based research trial and has:

- established and conducted sound research parameters that enable achievable results
- sought and obtained appropriate approvals to conduct field-based trial
- entered, analysed and organised data in a mathematically sound and accurately graphed, charted or tabled representation, consistent with the trial design
- followed workplace health and safety and environmentally responsible practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- scientific and statistical methodology, research methods, techniques and procedures
- workplace health and safety, environmental protection and employment legislation, regulations and codes of practice relevant to designing and conducting a field-based research trial
- research trial data collection, processing, storage and reporting procedures
- properties of materials involved in the trial.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- trial materials
- research trial reporting procedures
- computer hardware and software

ACMARM301 Support veterinary activities in remote communities

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to promote animal health and prepare for and support veterinary activities in remote Aboriginal and Torres Strait Islander (herein referred to as Indigenous) communities.

This unit applies to individuals who work in animal control or animal management roles in remote Indigenous communities using local knowledge and relationships to maximise the outcomes of veterinary visits. They perform work under broad direction and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes, solving problems and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Animal Regulation and Management (ARM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Perform community animal census	<p>1.1 Count and record numbers of cats and dogs, and where applicable other companion animal species, in the community</p> <p>1.2 Identify, count and record location of animals requiring veterinary services and de-sexing</p> <p>1.3 Observe and record signs of animal ill health, behaviour or welfare issues requiring action</p> <p>1.4 Prioritise cases and create an action task list to assist veterinarian to maximise visit outcomes</p> <p>1.5 File or send information to relevant service provider personnel or veterinarian</p>
2. Prepare for and assist with veterinary visits	<p>2.1 Advertise upcoming veterinary visit within the community</p> <p>2.2 Promote benefits of veterinary visit and health benefits to people and animals</p> <p>2.3 Source and prepare appropriate clinic and surgery site</p> <p>2.4 Assist veterinary staff to set up equipment and supplies</p> <p>2.5 Liaise with community prior to and during veterinary visit</p> <p>2.6 Handle, capture and transport animals safely for surgery or clinic visit using low stress techniques</p>
3. Administer basic treatments to community animals	<p>3.1 Assist with basic first aid activities for sick or injured animals</p> <p>3.2 Apply preventative treatments to animals under veterinarian supervision or using over-the-counter products</p> <p>3.3 Provide advice to community members on basic animal health and preventative treatments</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for ACMARM301 Support veterinary activities in remote communities

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- prepared and supported at least one veterinary visit to a remote community, including:
 - completed a census of community animals and created an action task list to assist veterinarian
 - liaised with community members prior to and during veterinary visit
 - safely handled, captured and transported animals for surgery or clinic visit using low stress techniques
- carried out two of the following activities:
 - applied two different treatments to animals under veterinarian supervision
 - applied two different over-the-counter treatments to animals
 - prepared facility for a temporary veterinary surgery site
 - applied basic first aid to two different animals.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of census and benefits of record-keeping
- methods used to control and manage animal populations in communities, including sterilisation (surgical and chemical)
- benefits of veterinary visits and animal health care for community members and animals
- concept of 'one health' to improve health within remote communities:
 - collaborative, multisectoral, and transdisciplinary approach
 - interconnection between people, animals, plants, and their shared environment

- basic site and equipment requirements for a veterinary clinic or surgery in a remote location
- basic overview of relevant local and state regulations relating to companion animals
- range of service providers involved in animal health and management relevant to the community, including:
 - veterinarians and veterinary workers
 - Aboriginal Land Councils
 - non-government organisations
 - local councils
 - state, territory and Australian government departments
- ways to communicate and promote information in remote communities, including:
 - using culturally appropriate language and communication methods
 - inclusive activities and role of elders
- common community animal infections and diseases, including:
 - skin sores and infections caused by external parasites, including mange/scabies, ringworm, fleas and ticks
 - internal parasites, including heartworm, hook worm, round worm
 - wounds and injuries
- how animals spread pathogens and disease, and prevention techniques
- awareness of possible notifiable diseases relevant to area and regulatory reporting requirements
- treatments for common animal infections and diseases, including:
 - application and use of registered, over-the-counter treatments and those administered by veterinarians
 - state/territory restrictions on the administration of specific medications
 - responsible use of antibiotics/antimicrobials
 - dressing and cleaning basic wounds and injuries
- working safely with companion animals in remote communities, including:
 - recognising animal body language and signs of emotional states
- safe, humane and low stress handling techniques for capture, moving, holding and transporting animals.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a remote or regional/rural Aboriginal and Torres Strait Islander community or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - community animals specified in the performance evidence

- equipment and resources necessary to support veterinary activity specified in the performance evidence
- information about preventative treatments for community animals
- equipment required to capture, restrain and transport animals
- relationships:
 - veterinarian and community members specified in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMARM409 Plan and monitor remote community animal management activities

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to oversee and organise animal health services provided in remote Aboriginal and Torres Strait Islander (herein referred to as Indigenous) communities.

This unit applies to individuals who have responsibilities for planning, implementing and monitoring animal health services in remote Indigenous communities. They work autonomously and apply specialist knowledge and skills to provide solutions for predictable and unpredictable problems.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for ACMARM409 Plan and monitor remote community animal management activities

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- organised animal health related services for one remote or regional/rural Aboriginal and Torres Strait Islander (Indigenous) community
- discussed the implementation and outcomes of the animal health plan with at least two animal, human and/or environmental health workers or veterinary personnel
- monitored and reviewed the services provided and recommended at least two activities to improve future services.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- concept of 'one health' to improve health within remote communities:
 - collaborative, multisectoral and transdisciplinary approach
 - interconnection between people, animals, plants and their shared environment
 - medical/veterinary terminology and literacy relevant to animal management and population and environmental health
 - overview of infection control and zoonotic diseases
- range of veterinary treatments to be provided in remote communities depending on need, including:
 - de-sexing and/or chemical contraception
 - parasite control (internal and external)
 - injury/disease management
 - euthanasia of abandoned, sick or injured animals
- equipment and supplies needed to implement animal health care programs in remote communities

- basic workplace contract and procurement management procedures
- use of statistics and data in measuring and evaluating animal health program outcomes
- use of anecdotal information in evaluating animal health program outcomes
- ways to communicate information in remote communities, including:
 - using culturally appropriate language and communication methods
 - inclusive activities and role of elders
 - community liaison for promotion of existing education programs on animal welfare/health
- cultural significance and attitude to companion animals (particularly dogs) in Indigenous communities
- relevant domestic animal regulations and associated legislation.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - relevant animal management information for an Indigenous community
 - existing domestic animal management plan/s
 - format/template for documenting an action plan
- relationships:
 - animal, human and/or environmental health workers and veterinary personnel specified in the performance evidence
 - access to the remote or regional/rural Aboriginal and Torres Strait Islander community specified in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMARM410 Develop and implement animal management initiatives

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to plan, develop and implement project initiatives aimed at promoting community engagement and improving outcomes relating to animal management and compliance.

This unit applies to individuals who have responsibilities for delivering animal management operational programs and initiatives. They work autonomously and apply specialist knowledge and skills to provide solutions for predictable and unpredictable problems.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for ACMARM410 Develop and implement animal management initiatives

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- reviewed available information to identify areas requiring improvement or compliance issues related to animal management
- prepared and implemented a project action plan aligned to the organisation or community's goals for an identified issue
- provided a verbal and written presentation summarising the project action plan to at least two stakeholders
- reviewed collated information over a defined period, evaluated outcomes of the plan and made at least two recommendations for future action.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant local bylaws and state/territory domestic animal regulations and associated legislation or community agreements in remote communities
- range of strategic and operational plans available in the workplace
- approaches to monitoring and collating information on compliance, including:
 - reviewing information on complaints – reports (formal/informal) and/or data
 - checks for registration compliance, microchip registries, breed registries
 - checking media/social media for advertisements
- use of statistical data in monitoring compliance and measuring performance outcomes
- overview of common areas of coverage of domestic animal management, including:
 - responsible pet ownership
 - compliance with regulations and related legislation

- specific issues or incidents – roaming/nuisance animals, dog attacks, and dangerous, menacing and restricted breed dogs
- reasons for euthanasia rates for dogs and cats
- registration and identification of dogs and cats
- potential benefits of community engagement, including:
 - increase in public perceptions of safety
 - tendency towards a reduction in non-compliance
 - increased reclaim rates by owners
 - increase in community perceptions and confidence in local council activities and/or officers
 - improvement in animal management officers’ attitudes and job satisfaction
 - improved animal welfare outcomes
 - increased human-animal bond
- types of strategies used for community engagement to effect behaviour change, including:
 - increased presence and random patrols (proactive)
 - acting on complaints (reactive)
 - advertising, marketing, social media and/or signage
 - community education, targeted training and/or resources
 - amnesty periods, price incentives and/or free products
 - collaboration with other organisations and/or use of intermediaries, including veterinarians, schools, shops and/or welfare agencies
- target audiences, including:
 - animal owners
 - owners of different demographic/socio-economic groups
 - users of specific locations (parks and/or beaches)
- formats for documenting an action plan.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - animal management compliance information
 - format/template for documenting an action plan
- relationships:
 - stakeholders specified in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMBEH301 Identify behaviours and interact safely with animals

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to identify and interpret behaviour and safely handle, interact and respond to animals in a range of animal care facilities and environments. It can be applied to a range of animal species.

This unit applies to individuals who are required to handle and interact with animals in close proximity in an animal care workplace. They work independently and take responsibility for the quality of their own work, including carrying out assigned tasks, solving routine problems and working to required timeframes.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Behaviour and Training (BEH)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for interaction	1.1 Assess environment and establish a safe and secure environment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
with animal	<p>for interacting with animals according to workplace policies and procedures</p> <p>1.2 Obtain information about the animal from relevant sources to inform approach to animal</p> <p>1.3 Identify hazards and infection control procedures, and minimise risks to self, other people and animals</p> <p>1.4 Select and correctly fit personal protective equipment appropriate for animal interaction</p> <p>1.5 Prepare equipment for securing the animal if required</p>
2. Identify and interpret animal behaviour	<p>2.1 Identify animal by species or breed group, physical characteristics and visible identification</p> <p>2.2 Recognise common behavioural traits for the species or breed group</p> <p>2.3 Observe animal body language and other signs to interpret the animal's likely emotional state, arousal level, and likely motivations for the behaviour observed</p> <p>2.4 Identify individual animal triggers, stressors or species-specific behaviours that may impact on behaviour and pose potential safety risks</p> <p>2.5 Choose appropriate low stress handling techniques based on observation of the animal's behaviour</p>
3. Move animal safely and securely	<p>3.1 Check other animals are safe and secure prior to moving the animal</p> <p>3.2 Approach and move around animal in a calm and non-threatening manner</p> <p>3.3 Move animal or remove from enclosure using low stress handling techniques</p> <p>3.4 Secure animal safely in suitable environment using humane restraints, if required, according to workplace requirements</p> <p>3.5 Prepare and load animal for transport, where required, ensuring safe restraints or housing according to species and workplace requirements</p>
4. Handle animals for intended activity	<p>4.1 Use species-appropriate low stress techniques and equipment to safely secure, position and manage animal</p> <p>4.2 Adjust handling based on situation, individual animal and its</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	responses to being handled 4.3 Undertake intended activity ensuring personal and animal safety, and minimising animal stress 4.4 Follow workplace procedures for hygiene and sanitation after handling the animal 4.5 Provide feedback, using objective descriptions of animal behaviour, to relevant team members according to workplace procedures 4.6 Update animal records in workplace record-keeping system

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for ACMBEH301 Identify behaviours and interact safely with animals

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- identified and interpreted common animal behaviour, including body language for two different species or breed groups
- described the behaviour, using objective behavioural terminology, and the approach to handling or interacting with three animals experiencing different emotional states, including:
 - an animal showing defensive and fearful behaviour
 - an animal that is calm
- used safe and low stress handling techniques and equipment, including personal protective equipment (PPE) to interact with, restrain, move and/or handle at least two different animals to carry out an activity, selected from two of the following:
 - one animal requiring two people to manually lift or move
 - one animal to be handled, lifted and/or moved independently
 - one small and/or fragile animal to be handled or moved
 - one animal to be handled or moved in an activity undertaken in close proximity with the handler
 - one animal to be moved into or out of an enclosure.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to identify animals by:
 - species and breed
 - physical characteristics, including colour and sex
 - common forms of visual identification

- common species-specific behaviour traits and factors that influence behaviour, including genetics, health, environment, current situation/context and previous learning
- core emotional states in animals, including positive, neutral and negative states
- concept of anthropomorphism
- species-specific body language and signs, including:
 - gross and fine movements and vocalisation (where relevant to species)
 - coping behaviours
- how to recognise and respond to behaviours that are potentially unsafe
- carer-animal relationship and its effect on the animal's behaviour
- basic concepts for influencing or directing animal movement, including:
 - body positioning
 - clear instruction or cues
 - species-specific holding or restraint techniques
 - use of positive reinforcers
 - flight zone, pressure zone and point of balance
- safe, low stress and humane species-specific handling techniques and equipment
- hazards and risks associated with handling and interacting with animals, including:
 - injuries, including bites, scratches and manual handling
 - infectious diseases and zoonoses
 - compatibility of different animals
- purpose of PPE items, including footwear, gloves and protective clothing
- common activities undertaken in animal care sectors, including for:
 - health, hygiene and sanitation/infection control
 - grooming
 - medical procedures
 - manual lifting/moving of animals
- key principles of animal welfare and ethics relevant to handling and interacting with animals
- key requirements of health and safety legislation for work undertaken in animal care environments.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live animals as specified in the performance evidence

- videos of animal behaviour where relevant aspects of behaviour cannot be observed with live animals
- equipment and resources appropriate to work being undertaken in an animal care environment, including PPE
- specifications:
 - workplace policies and procedures related to safety and low stress handling/interaction with animals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b75f4b23-54c9-4cc9-a5db-d3502d154103>

ACMEQU202 Handle horses safely

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to identify, safely catch, control and handle calm, consistent and obedient horses educated for the relevant activity. It covers knowledge of potential risks working with and around horses and following industry guidelines and procedures to ensure the welfare and safety of the individual, other workers and the horse.

The unit applies to individuals who have no experience, limited experience or no recent experience working in the relevant horse industry sector. They undertake defined routine activities under supervision and have limited responsibility for their own work. Working environments may include stables, paddocks, yards, tracks, exercise arenas and public areas.

No licensing or certification requirements apply to this unit at the time of publication, except for the racing industry, where requirements vary between states and territories. Users working in the racing industry are advised to contact the relevant Principal Racing Authority for advice on current requirements.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- ACMEQU205 Apply knowledge of horse behaviour.

Unit Sector

Equine (EQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify features of horses	1.1 Distinguish horses by their features, and describe using industry terminology 1.2 Identify common horse behaviour and social traits
2. Safely approach, catch, control and lead horses	2.1 Check and clarify supervisor instructions for tasks requiring involving approaching, catching and leading horse 2.2 Select and correctly fit personal protective equipment (PPE) 2.3 Identify, select and prepare appropriate gear for handling horses safely 2.4 Identify and report to supervisor potential safety risks prior to approaching horse 2.5 Identify horse according to instructions and observe horse body language and behaviour before approaching 2.6 Prepare halter and lead in hand prior to approaching the horse 2.7 Approach calmly and catch horse using safe handling techniques under supervision 2.8 Apply safe control when leading and tying up horse and use safe handling practices around tied-up horses 2.9 Use safe handling procedures around other handlers and horses
3. Load and unload horses under supervision	3.1 Check and clarify supervisor instructions for tasks requiring the loading and unloading of horses 3.2 Identify potential safety risks to handler and horse when loading and unloading horses, and discuss with supervisor 3.3 Select and correctly fit PPE for safe loading and/or unloading of horses 3.4 Select gear and equipment for loading horse and check gear for safety 3.5 Fit gear to horse correctly prior to loading under supervision 3.6 Load horses safely according to instructions under supervision

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Position horse according to transport configuration 3.8 Unload horse safely according to instructions under supervision
4. Control horses in exercise environments	4.1 Check and clarify supervisor instructions for tasks requiring the handling of horses in public areas 4.2 Identify potential safety risks to handler and horse when handling horses in public areas, and discuss with supervisor 4.3 Select and correctly fit PPE for safe handling of horses 4.4 Select gear and equipment, including safety check of gear 4.5 Observe and identify horse body language and behaviour prior to handling in exercise environments 4.6 Use safe control when leading and standing with a horse in a public area under supervision 4.7 Use safe control when leading and standing with a horse confined in a stable or yard

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Use active listening and questioning techniques to clarify and confirm supervisor instructions Use industry terminology to describe horses, gear and equipment used for handling horses
Navigate the world of work	<ul style="list-style-type: none"> Follow workplace procedures, including work health and safety and animal welfare requirements, relating to own role and work area Demonstrate a duty of care to self and others when working with horses
Get the work done	<ul style="list-style-type: none"> Assemble resources and follow clear, sequenced instructions for handling horses under supervision

Assessment Requirements for ACMEQU202 Handle horses safely

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual safely handled at least three different calm, consistent and obedient horses educated for the activity being performed including:

- carrying out a basic risk assessment prior to each activity, including observing and identifying horse body language
- communicating clearly with supervisor, including raising safety risks or concerns
- approaching, catching, controlling, leading, standing and tying up horses safely in at least one public space and one confined space, under supervision, including:
 - following work health and safety (WHS) procedures in the context of own work
 - applying safe horse handling techniques according to animal welfare requirements
 - fitting and correctly using horse handling gear and personal protective equipment (PPE)
- loading and unloading horses to a horse transport vehicle under supervision in a calm and humane manner.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common features of a horse, including points, colour, markings, gender, and common breeds
- basic characteristics of common horse behaviour and social traits
- features of horse body language
- communication protocols with supervisor, and procedures within the work environment
- potential hazards and risks when dealing with horses in open and confined spaces
- common types of injuries sustained by horses, handlers and others during handling activities
- safe horse handling zones

- purpose and use of PPE and gear for handling horses
- features of defective equipment and the implications to safety
- quick release knots and methods of securing horses
- types of horse transport and common loading configurations
- difficult situations that may occur when loading and unloading horses and procedures for dealing with difficulties.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions, including open and confined spaces in suitable environments
- resources, equipment and materials:
 - various calm, consistent and obedient horses educated for the activity and assessed as suitable for the experience and skill of the individual
 - appropriate tack for individual, horse and activity
 - horse transport vehicle
 - PPE that is appropriate for activity and correctly fitted for individual
 - other people and horses in the vicinity of the assessment activity
- specifications:
 - work instructions
- relationships with others:
 - supervisor.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU205 Apply knowledge of horse behaviour

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop basic knowledge of horse behaviour, read horse body language and minimise risk to self and others when interacting with horses.

The unit applies to individuals who are new or inexperienced in handling, working with and/or riding horses. Individuals at this level work under supervision.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. As requirements vary between industry sectors and state/territory jurisdictions, users must check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify basic horse behaviour	<p>1.1 Outline the natural instincts, sensory perceptions and social behaviour of horses</p> <p>1.2 Recognise how horse senses can influence their behaviour and reactions</p> <p>1.3 Identify environmental conditions that can unsettle horses</p> <p>1.4 Distinguish ways horses can respond to different people and different situations</p>
2. Observe and interpret basic body language of horses in different situations	<p>2.1 Distinguish a range of horse body language</p> <p>2.2 Recognise body language, including posture, facial features and vocalisation, indicating a horse is relaxed in its surroundings</p> <p>2.3 Recognise body language, including vocalisation, posture and facial features, indicating a horse is unsettled or in a state of agitation in its surroundings</p>
3. Examine how horses learn and respond to different handling cues	<p>3.1 Recognise how pressure-release training works, including how horses learn to 'go', 'slow', 'turn' and 'stop'</p> <p>3.2 Distinguish different ways to reward a horse</p> <p>3.3 Identify a range of common cues used when handling horses</p> <p>3.4 Observe how new cues are learned by the horse</p>
4. Identify areas of personal risk around horses	<p>4.1 Identify situations and behaviour that lead to common accidents and injuries when interacting with horses</p> <p>4.2 Recognise human body language and behaviour to avoid around horses</p> <p>4.3 Identify positive actions and behaviour that handlers or riders can take to minimise risks interacting with horses</p>
5. Minimise risk to self and others around horses	<p>5.1 Listen carefully to supervisor instructions and ask questions or raise concerns with the supervisor about the suitability of the horse selected for handling or riding</p> <p>5.2 Select personal protective equipment (PPE) appropriate for tasks, fit correctly and wear during activities with horses</p> <p>5.3 Assess hazards and potential risks to self, others and the horse, and take steps to minimise risks</p> <p>5.4 Interpret and respond appropriately to horse body language prior to approaching, and maintain awareness of</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	horses at all times 5.5 Use body language and behaviour to achieve safe and positive responses from horses

Foundation Skills

Assessment Requirements for ACMEQU205 Apply knowledge of horse behaviour

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has:

- observed and interpreted horse behaviour and body language of at least three different horses on separate occasions
- identified hazards and determined how to minimise risk to self and others when interacting with horses in at least three different workplace areas, environments or scenarios.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features of horse instinct and behaviour, including:
 - social organisation, need for space and companions
 - attachment, separation anxiety
 - flight and fear responses, arousal
- features of horse senses, including vision, touch, smell, hearing and vocalisation
- how to read horse body language, including posture and body position, facial features, ears, legs and tail
- how to read horse body language to identify:
 - flight response
 - threatened or defensive behaviour
 - stress, agitation or unsettled behaviour
- situations where horse behaviour may cause harm to handlers or other horses, including:
 - approaching from a horse's blind spot
 - around other horses

- leading through gateways or restricted spaces
- safe handling zones when interacting with horses
- basic features of how horses learn:
 - cues
 - repetition and reward
 - exposure to new situations and activities
- basic handling and/or riding cues that assist in the control of horses
- types of rewards used for horses, including pressure release, food, scratch and rub, and rest
- potential hazards and risks associated with interacting with horses
- strategies to minimise and control common risks associated with interacting with horses.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a safe workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - opportunities to observe and interpret live horses displaying different behavioural states and body language in different environments.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU206 Perform horse riding skills at walk, trot and canter

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to control a horse under saddle that is suitably educated for a beginner rider. It focuses on walking, trotting and cantering calm, obedient and consistent horses that are suitable for the level of rider experience, during controlled, supervised horse riding activities.

It covers knowledge of potential risks when working with and around horses, and the application of industry guidelines and procedures to ensure the welfare and safety of the individual, other participants and horses.

The unit applies to individuals who have limited or no horse riding experience, and who are developing skills needed to ride horses for work tasks. They undertake defined routine activities under supervision with limited responsibility for their own work. Working environments may include exercise yards and fenced horse riding areas or arenas.

No licensing, legislative or certification requirements apply to this unit at the time of publication, except for the racing industry, where licensing or registration varies between states and territories. Users working in the racing industry are advised to contact the relevant Principal Racing Authority for advice on current requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite units of competency for this unit is:

- ACMEQU202 Handle horses safely.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
--------------------	--------------------------

ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour
--------------------------------	--

Unit Sector

Equine (EQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for horse riding activity	<p>1.1 Discuss current skill level, riding skill development goals and horse suitability with riding instructor</p> <p>1.2 Identify potential hazards and risks associated with the specific location, environment and horse riding activity, and apply control measures as directed</p> <p>1.3 Select and correctly fit personal protective equipment (PPE) required for preparing and riding the horse according to WHS requirements</p> <p>1.4 Catch, groom and tack-up assigned horse as directed using tack appropriate for rider, horse and discipline</p> <p>1.5 Present horse to instructor appropriately tacked up for riding for gear check prior to mounting</p>
2. Demonstrate controlled riding skills	<p>2.1 Mount horse in a safe and balanced manner as instructed</p> <p>2.2 Ride horse through gaits in a balanced and controlled manner</p> <p>2.3 Use recognised aids including legs, weight, hands and voice to control movement, speed and direction of horse at halt, walk, trot and canter</p> <p>2.4 Cue horse through a range of movements and direction, maintaining control of horse</p> <p>2.5 Control horse under saddle among other horse and rider combinations, maintaining safe group riding practices while performing a variety of required movements</p> <p>2.6 Negotiate potential hazards appropriately to minimise risks</p> <p>2.7 Dismount safely and lead horse in a controlled manner</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
3. Complete and report post-riding activities	3.1 Perform post-riding cool down of horse as directed 3.2 Remove tack safely and check condition 3.3 Report to riding instructor on condition of gear and horse post-exercise 3.4 Discuss with riding instructor, using objective and positive language, personal performance and goals for future riding skill development

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Active listening and questioning to clarify and confirm supervisor instructions Use industry standard terminology to describe horse riding-related activities
Learning	<ul style="list-style-type: none"> Seek, reflect and respond to feedback from supervisor to improve own performance
Navigate the world of work	<ul style="list-style-type: none"> Follow workplace procedures, including WHS and animal welfare requirements, relating to own role and work area Demonstrate a duty of care to self and others when working with horses
Get the work done	<ul style="list-style-type: none"> Assemble resources and follow clear, sequenced instructions to ride horses at walk, trot and canter

Assessment Requirements for ACMEQU206 Perform horse riding skills at walk, trot and canter

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual performed horse riding skills at walk, trot and canter, on at least two different horses assessed as suitable for rider skills and experience. The individual must have ridden each horse on at least three different occasions, with and without other horses and riders in the immediate vicinity, during which the individual has:

- discussed with instructor current skill level and suitability of chosen horse prior to riding
- used and correctly fitted personal protective equipment (PPE)
- fitted gear and equipment for nominated horses, including:
 - saddle
 - saddle cloth
 - bridle
 - accessory gear
- mounted horse using a stirrup mount, mounting block, leg-up assisted mount
- controlled horse under saddle at all times in the following tasks:
 - demonstrating an effective riding position at walk, trot (or jog) and canter (or lope) according to chosen discipline
 - using hand, seat and leg aids according to discipline
 - using transitions or increasing and decreasing speed within a gait according to chosen discipline
 - following arena figures of circles, straight and diagonal lines and changes of direction
 - cantering for a continuous distance of a minimum of 200 metres
- dismounted using a stirrup dismount and a vault dismount
- dealt with risks associated with riding horses around others
- accepted and applied feedback from riding instructor
- reported progress and discussed future personal riding skills needs with riding instructor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic process for assessing horse suitability and matching to own skills
- purpose and use of different items of gear, including accessory tack and equipment and personal protective equipment (PPE)
- purpose of appropriate aids to communicate with a horse
- safe group riding techniques
- safe horse handling techniques
- key animal welfare principles and practices for handling horses
- basic work health and safety (WHS) risk assessment and control principles relating to interacting with horses, riding in an arena and with others
- how to address common undesirable horse behaviours including:
 - travelling too fast
 - reefing and pulling
 - jogging sideways
 - running backwards
- risk factors that influence riding horse behaviour, including:
 - other horses
 - vehicles, fences and equipment
 - other people or animals
 - wind, noise and environmental hazards
 - riding with others
- factors that influence horse ability to respond to rider position and application of the natural and artificial aids.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - confined arena in a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - various calm, consistent and obedient horses assessed as suitable for the experience and skill of the individual
 - other riders
 - appropriate tack for walk, trot and canter riding activities suitable for horse, rider and discipline
 - correctly fitted PPE for the individual, including riding boots, safety vest and Australian standard or equivalent compliant helmet.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

The following specific assessor requirements apply to this unit. The assessor must:

- hold a current, recognised qualification for instructing or coaching horse riding and handling skills (refer to *User Guide* for details), and
- have three years of experience organising groups and responding to different types of riders and horses in order to prevent incidents that could lead to injury of rider or horse.

ACMEQU212 Handle horses safely

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to identify, safely catch, control, handle and release calm, consistent and obedient horses educated for the relevant activity. It covers knowledge of potential risks when handling horses to support the welfare and safety of the individual, other workers and the horse.

This unit applies to workers who undertake routine work under supervision and apply knowledge and judgement to solve predictable issues when handling horses. Work environments may include stables, paddocks, yards, tracks, work arenas and other exercise areas.

Commonwealth and state/territory health and safety and animal welfare legislation, regulations and codes of practice relevant to interacting with horses apply to workers in this industry. Requirements vary between industry sectors and jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication, except for the racing industry, where requirements vary between states and territories. Users working in the racing industry are advised to contact the relevant Principal Racing Authority for advice on current requirements.

Assessment Requirements for ACMEQU212 Handle horses safely

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely handled at least three different calm, consistent and obedient horses. The individual must have safely approached, caught, controlled, led and restrained each horse, including:

- identified at least three horse handling hazards and assessed associated risks
- controlled safety risks when handling horses, including:
 - communicated clearly with supervisor and/or others near the horse being handled
 - selected and correctly fitted personal protective equipment (PPE)
 - applied safe and low stress horse handling techniques and practices
 - fitted and correctly used horse handling gear, including prepared halter and lead in hand prior to approaching the horse
 - identified safety zones, confirmed horse is aware of handler, avoided danger zones, untied and led horse
 - positioned self to reduce risk of harm to self and others
- led horse safely:
 - using handling cues to achieve the desired horse response, including 'go', 'slow', 'turn' and 'stop'
 - on its own through gates, narrow openings and confined spaces
 - in single file with other horses and handlers
 - through a group of at least 2 horses
 - under control past others leading a horse
- secured horse to tie-up point using safe knot.

In addition to the above, the individual must have, for at least one horse:

- safely and effectively applied a restraint to horse, using at least one of the following:
 - hobble
 - nose twitch
 - skin twitch

- horse crush
- fitted an anti-rearing bit
- fitted a bit and bridle
- fitted and used appropriately a nose chain to headcollar
- correctly lifted and checked fore and hind hooves
- removed halter and lead while assuming safe body position in relation to horse
- reported one incident to supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features of a horse, including height, points, colour, markings, gender
- basic characteristics of common horse behaviour, natural instincts and social traits
- features of horse body language, including:
 - posture and facial features that indicate horses are relaxed
 - posture and facial features that indicate horses are threatened or defensive
 - posture and facial features that indicate horses are distressed
- typical horse responses to people, clothing and common human body language, including:
 - aggressive
 - relaxed and approachable
 - self-confident
- typical horse responses to environmental factors, including:
 - weather
 - natural environment
 - physical environment, including infrastructure
- basic horse behaviours, including fight and flight responses, body language, herd, small group and adverse behaviours
- common hazards and/or risks that occur when handling horses, including:
 - horse bites, kicks, strikes, stomping, crushing and being knocked
 - zoonoses, including Hendra and ringworm
 - weather, including wind and rain
- common controls to eliminate or minimise risks when handling horses, including:
 - current assessment of horse suitability
 - use of safe and low stress horse handling practices
 - movement within horse safety zones
 - horse restraints, including horse gear, twitch and crush
 - fences and other barriers
 - infection control, including personal hygiene
 - pre-activity checks, including gear and equipment, horse behaviour and suitability in readiness for work tasks

- purpose, use, maintenance and storage of PPE for handling horses, including:
 - clothing and footwear
 - face and eye protection
 - hand protection
 - head protection
- common equine workplace written and verbal communication procedures and protocols
- common types of injuries sustained by horses, handlers and others during handling activities
- how horses learn through cues, pressure-release and repetition and reward
- safe body position in relation to horses, and use of cues to start, slow down, stop and turn horse
- quick release knots and safe methods of securing horses
- features, purpose, effects, reactions and animal welfare considerations of common horse restraints, including:
 - nose twitch and skin twitch and ear twitch
 - hobbles
 - crush
 - chains, bits and bridles
 - chemical restraints.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an equine workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live horses specified in the performance evidence, assessed as suitable for the assessment of this unit and the individual being assessed
 - structures, tools and equipment required for the tasks specified in the performance evidence, including correctly fitted gear for the horses and correctly fitted PPE for the handler
 - other horse handler and horses required for the tasks specified in the performance evidence
 - the incident scenario in the performance evidence may be simulated
- specifications:
 - workplace procedures for handling horses
- relationships:
 - supervisor and other workers.

The *Companion Volume: User Guide: Safety in Equine Training* provides advice and sample templates to assist assessors with the risk assessments that should be undertaken to help ensure the safety of all involved in the assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU214 Prepare to work safely around horses

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge to understand and interpret horse behaviour and body language in order to minimise risks to self, others and horses when working around horses.

This unit applies to workers who work around horses, but do not directly handle horses. These roles may include administration, finance, marketing, customer service, catering, facility management and equipment repair.

Commonwealth and state/territory health and safety and animal welfare legislation, regulations and codes of practice relevant to interacting with horses apply to workers in this industry. Requirements vary between industry sectors and jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Equine (EQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify basic horse behaviour	1.1 Identify basic horse characteristics and identification features 1.2 Identify the natural instincts, sensory perceptions and social

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	behaviour of horses 1.3 Recognise how horse senses can influence their behaviour and reactions 1.4 Identify environmental conditions and other stimuli that can unsettle horses 1.5 Identify ways horses can respond to different people and in different situations 1.6 Identify body language, vocalisation, posture and facial features, indicating a horse is unsettled, agitated, in pain or relaxed in its surroundings
2. Identify areas of personal risk around horses	2.1 Identify situations, work activities and behaviours that lead to common incidents, accidents and injuries when working around horses 2.2 Recognise human body language and behaviour that should be avoided around horses 2.3 Identify positive actions and behaviours that minimise risks when around horses
3. Undertake site induction	3.1 Report to site supervisor, and complete required site registration and safety requirements to access site for own work 3.2 Confirm and explain workplace roles, responsibilities and procedures for responding to worker and horse health and safety incidents, accidents and emergencies 3.3 Confirm work tasks, location, timeframes, support workers and resources required with site supervisor 3.4 Identify hazards associated with own tasks, assess risks and confirm risk controls for proposed tasks with site supervisor
4. Minimise risks when working around horses	4.1 Select and fit personal protective equipment, identification and other equipment as required 4.2 Interpret and respond appropriately to horse body language during work tasks 4.3 Maintain situational awareness of horses while undertaking tasks, and respond to and report new hazards that arise to site supervisor 4.4 Complete tasks, report outcomes to site supervisor and undertake exit procedures according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret equine workplace safety induction documentation
Oral communication	<ul style="list-style-type: none"> Use equine industry terminology to describe horse behaviour and body language Use open and closed questions to seek and confirm information

Assessment Requirements for ACMEQU214 Prepare to work safely around horses

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- identified horse identification features, including gender, colour and brand
- explained the typical behaviour of the following types of horse toward other horses and handlers:
 - educated, calm and obedient horses
 - uneducated horses
 - excited and less responsive to commands
 - stallions and colts
- observed and interpreted horse behaviour and body language of at least three different horses displaying different behavioural states and body language in different environments on separate occasions
- identified at least three different hazards arising from their own work activities undertaken around horses that may create health and safety risks to themselves, others and horses
- assessed and explained how to minimise the risk created by at least three different hazards arising from their own work when undertaken around horses
- completed a visitor or worker safety induction for at least one equine workplace
- reported any concerns regarding horse behaviour and outcomes for own work to site supervisor in a timely manner.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common features of a horse, including colour, gender, basic points of horse and brands
- features of horse natural instincts and behaviour, including:
 - normal flight and fight responses, including protective behaviour

- normal and abnormal behaviours
- herd, social organisation, need for space and companions
- attachment and separation anxiety
- alertness, fear and arousal
- features of horse senses, including vision, touch, smell, hearing and taste
- observation and interpretation of horse vocalisation and body language, including posture and body position, facial features, ears, legs and tail to identify:
 - flight response
 - fight response
 - threatened or defensive behaviour
 - stress, agitation or unsettled behaviour
 - pain
 - relaxed behaviour
- human body language, voice and behaviour that should be avoided around horses
- positive actions and behaviours that minimise risks when around horses
- situations, work activities and behaviours that lead to common incidents, accidents and injuries when working around horses, including:
 - loose uncontrolled horses
 - start-up and operation of loud equipment, machinery and vehicles
 - sudden or unexpected movements and sounds, including those create by people
 - uncontrolled dogs
 - approaching from a horse's blind spot
 - introduction of other horses
 - gates and restraints not used correctly that result in loose horses
 - weather conditions and sudden changes in weather
- key features and benefits of situational awareness when working around horses
- common hazards and risks associated with visitors when working around horses, including zoonotic diseases and basic biosecurity
- basic principles of hazard identification and risk assessment in an equine workplace
- typical strategies to minimise and control common risks associated with working around horses
- key features of safety inductions for an equine worksite, including roles and responsibilities for reporting hazards and risks.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an equine workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:

- live horses and/or videos/images of horse behaviour where relevant aspects of behaviour specified in the performance evidence cannot be observed with live horses
- equine workplace safety induction materials as specified in the performance evidence
- relationships:
 - site supervisor.

If live horses are used during the assessment of skills, the *Companion Volume: User Guide: Safety in Equine Training* provides advice and sample templates to assist assessors with the risk assessments that should be undertaken to help ensure the safety of all involved in the assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU217 Load and unload horses

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to safely load and unload horses onto and from horse transport vehicles.

The unit applies to workers who undertake routine work under supervision and apply knowledge and judgement to solve predictable issues when loading and unloading horses. Work environments may include stables, paddocks, yards, tracks, event venues and public areas.

Commonwealth and state/territory health and safety and animal welfare legislation, regulations and codes of practice relevant to interacting with horses apply to workers in this industry. Requirements vary between industry sectors and jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication, except for the racing industry, where requirements vary between states and territories. Users working in the racing industry are advised to contact the relevant Principal Racing Authority for advice on current requirements.

Assessment Requirements for ACMEQU217 Load and unload horses

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely loaded and unloaded at least three different calm, consistent and obedient horses onto and from a horse transport vehicle. Each horse must be loaded and unloaded separately on a vehicle or trailer specifically designed for horse transport.

For each horse loading and unloading process, the individual must have:

- confirmed the loading and unloading requirements with a supervisor
- identified at least two hazards, and assessed and controlled and/or reported the risks
- applied safe and low stress horse handling techniques and practices
- selected and correctly fitted personal protective equipment (PPE)
- checked, prepared and fitted horse gear and equipment, including halter and lead
- checked the horse transport vehicle, including horse restraints and ventilation
- positioned and secured horse in vehicle according to transport configuration
- unloaded, led and restrained horse in a secure location
- inspected the horse after unloading, and provided a report to a supervisor on horse condition
- cleaned and tidied horse section of transport vehicle.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common hazards, risk assessment and risk controls related to loading and unloading horses
- purpose, use, maintenance and storage of PPE for handling, loading and unloading horses
- safe and low stress horse loading and unloading techniques
- key animal welfare requirements when transporting horses

- different types of horse transport vehicles, including:
 - basic safety checks, including flooring and air vents
 - safe operation of doors, gates and other restraints
 - use of ramps and/or mechanical lifts
 - transport configuration
 - horse position and securing
- purpose, benefits and risks of common horse gear and equipment used to load and unload horses, including:
 - tail ropes
 - bits or bridles
 - ramp panels
 - appropriate use of whips
- protective horse gear and equipment that may be required during transport, including rugs, poll guards, leg and tail protection
- workplace procedures for loading and unloading horses, including:
 - checking horse condition and preparing horses
 - checking, fitting and maintaining horse gear and equipment
 - vehicle cleaning and sanitisation before and after loading
 - seeking assistance with difficult or unexpected situations
- key considerations when loading and/or unloading horses onto transport vehicles, including:
 - phenomena that can spook a horse
 - safe positioning and handling practices
 - common injuries to horses and handlers, and their causes
 - common adverse reactions by horse to loading, unloading and travelling.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an equine workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live horses specified in the performance evidence, assessed as suitable for the assessment of this unit and the individual being assessed
 - gear and equipment required for the tasks specified in the performance evidence, including correctly fitted gear for the horses and correctly fitted PPE for the handler
 - horse transport vehicle specified in the performance evidence
- specifications:
 - workplace procedures for loading and unloading horses

- relationship:
 - supervisor.

The *Companion Volume: User Guide: Safety in Equine Training* provides advice and sample templates to assist assessors with the risk assessments that should be undertaken to help ensure the safety of all involved in the assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU218 Perform horse riding skills at walk, trot and canter

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to control a horse under saddle that is suitably educated for a beginner rider. It focuses on walking, trotting and cantering calm, obedient and consistent horses that are suitable for the level of rider experience, during controlled, supervised horse riding activities.

The unit includes the foundational skills and knowledge required for entry level riding tasks in an equine workplace, including knowledge of potential risks when working with and around horses, to ensure the welfare and safety of the individual, other participants and horses.

The unit applies to individuals who have limited or no horse riding experience, and who are developing skills needed to ride horses. Riding environments may include exercise yards and fenced horse riding areas or arenas.

Commonwealth and state/territory health and safety and animal welfare legislation, regulations and codes of practice relevant to interacting with horses apply to workers in this industry. Requirements vary between industry sectors and jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for horse riding activity	<p>1.1 Explain own current skill level, riding skill development goals and horse preferences to assist with assignment of a suitable horse</p> <p>1.2 Identify and confirm with supervisor potential hazards and risks associated with specific location, environment and horse riding activity, and apply control measures as directed</p> <p>1.3 Identify, confirm and fit personal protective equipment (PPE) required for preparing and riding horse</p> <p>1.4 Catch, secure, groom and check assigned horse for general health, injuries, hoof damage and loose shoes using safe and low stress horse handling techniques</p> <p>1.5 Select, check and fit gear allocated to horse</p> <p>1.6 Present horse and self to supervisor for gear check, stirrup length adjustment and girth tightening prior to mounting</p>
2. Demonstrate controlled riding skills in an enclosed environment	<p>2.1 Mount horse in a safe and balanced manner</p> <p>2.2 Ride horse through gaits in a balanced and controlled manner</p> <p>2.3 Use recognised aids, including legs, weight, hands and voice, to control movement, speed and direction of horse at halt, walk, trot and canter</p> <p>2.4 Cue horse through a range of movements and direction, maintaining control of horse</p> <p>2.5 Control horse under saddle among other horse and rider combinations, maintaining safe riding practices while performing a variety of basic school movements</p> <p>2.6 Negotiate potential hazards appropriately to minimise risks</p> <p>2.7 Undertake emergency stop using a safe technique</p> <p>2.8 Dismount safely and lead horse in a safe and controlled manner</p>
3. Complete post-riding activities	<p>3.1 Perform post-riding cool down of horse as required</p> <p>3.2 Remove gear safely, clean it and check its condition, and report to supervisor on condition of gear and horse post-exercise</p>

Assessment Requirements for ACMEQU218 Perform horse riding skills at walk, trot and canter

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely performed horse riding skills at walk, trot and canter, in an enclosed environment on at least two different horses assessed as suitable for rider skills and experience. The individual must have ridden each horse on at least three different occasions, with and without other horse/s and rider/s in the immediate vicinity, during which the individual has:

- identified, assessed and controlled within level of responsibility at least three different risks associated with riding horses around others
- used correctly fitted personal protective equipment (PPE), including compliant riding helmet, long pants, and flat soled shoes or boots with a heel
- checked and fitted gear and equipment for nominated horses, including:
 - saddle
 - saddle cloth
 - bridle
- mounted horse safely
- controlled horse under saddle at all times in the following tasks:
 - demonstrating an effective and balanced riding position at walk, trot and canter
 - using hand, seat and leg aids to safely ride the three gaits and negotiate around obstacles
 - using transitions between gaits
 - following arena figures of circles, straight and diagonal lines and changes of direction
 - rising on the correct diagonal at trot on both reins
 - cantering for a distance of a minimum of 100 metres
 - cantering on correct lead on both reins
 - maintaining appropriate spacing and following 'right of way' rules when riding in a group
 - demonstrating safe emergency stop

- dismounted horse safely
- cleaned, checked and stored gear and equipment according to stable procedures
- reflected on horse performance and reported to supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key consideration for assessing horse suitability and matching to own skills
- common horse body language, behaviour and social traits that may affect riding activities
- purpose and use of horse gear that may be used for beginner riders on suitable horses
- purpose, use, correct fit, maintenance and storage of PPE for riding, including:
 - clothing and footwear, including flat soled shoes with a heel
 - riding helmets that comply with current Australian Standards
- purpose of appropriate aids to communicate with a horse
- safe group riding techniques, including:
 - spacing
 - right of way in relation horse pace
 - right of way in relation to direction
- safe horse handling techniques and zones
- key animal welfare principles and practices for interaction with horses and riding, including:
 - low stress techniques related to riding
 - benefits of rider's core balance and fitness
- basic workplace health and safety risk assessment and control principles relating to interacting with horses, riding in an arena and with others
- risk factors that influence riding horse behaviour, including:
 - other horses
 - vehicles, fences and equipment
 - other people or animals
 - wind, noise and environmental hazards
 - riding with others
 - unexpected horse behaviour
- workplace safety and emergency response procedures for horse riding activities, including zones relevant to preparing to ride, riding and returning horse to paddock or yard
- basic indicators of horse health and injury
- reasons for grooming horses prior to fitting gear
- purpose and features of personal protective equipment for riders, to include:
 - clothing
 - footwear
 - helmets, including when to replace.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - enclosed riding environment
- resources, equipment and materials:
 - live calm, consistent and obedient horses specified in the performance evidence, assessed as suitable for the assessment of this unit and the individual being assessed
 - other horses with riders
 - appropriate gear for walk, trot and canter riding activities suitable for horse, rider and discipline
 - correctly fitted PPE for the individual, as specified in the performance evidence, including a riding helmet that complies with Australian Standard or equivalent
 - workplace procedures and instructions for riding horses at walk, trot and canter
- relationships:
 - supervisor.

Risk assessments and appropriate risk controls must be undertaken to ensure the safety of all involved in the assessment of this unit.

Horse matching prior to all assessments involving horse interaction is essential. Registered Training Organisations (RTOs) and/or assessors must:

- complete, participate in or validate a risk assessment of both the individual being assessed and other participant riders' characteristics and level of horse handling and riding skills
- match, or validate the matching of, horses of suitable history, size and temperament to both the individual being assessed and other participants to ensure that rider and horse combination is safe.

Note – If an employee is being assessed in their workplace, the horse matching above can be replaced with advice from a workplace supervisor that the employee has previously ridden the horse to be used for the assessment, and the horse and rider are suitably matched for the assessment tasks.

The *Companion Volume: User Guide: Safety in Equine Training* provides advice and sample templates to assist RTOs, trainers and assessors with risk assessments and related risk controls, including horse and rider matching, that should be undertaken to ensure the safety of all involved in the assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

The following specific assessor requirements apply to this unit. The assessor must have at least one of the following:

- achieved a recognised horse riding coaching/instruction accreditation (refer to the User Guide)
- experience training and/or assessing beginner level horse riders (refer to the User Guide).

ACMEQU305 Implement a horse health program

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Application

This unit of competency covers the skills and knowledge required to implement existing health programs for horses. It involves prevention and treatment of illness and injury by implementing program health management strategies, including vaccination, parasite control and hoof and teeth care. The unit also covers treatment of horse illnesses and injuries with advice from professionals if required.

This unit applies to workers who apply technical knowledge and skills with discretion and judgement to care for horses in a range of environments. They work under broad direction, coordinate activities, solve predictable and unpredictable problems and may have responsibility for highly valuable animals.

Commonwealth and state/territory health and safety and animal welfare legislation, regulations and codes of practice relevant to interacting with horses apply to workers in this industry. Requirements vary between industry sectors and jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for ACMEQU305 Implement a horse health program

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a horse health program, including vaccination, parasite control, hoof care, dental check, and illness or injury treatment, across at least three compliant and manageable horses. All health care contact and activities with horses must be carried out using safe and low stress horse handling practices. For each horse, the individual must have:

- conducted a pre-activity hazard identification, and assessed and controlled risks
- selected, checked and correctly fitted appropriate personal protective equipment (PPE)
- applied personal hygiene, biosecurity and infection control practices
- identified restraint method appropriate for horse health treatment
- selected, fitted and applied suitable horse gear to restrain horses during treatments
- checked horse vital signs, including temperature, respiratory rate, capillary refill, hydration status and heart rate
- recognised normal physical and behavioural signs in horses:
 - temperature, pulse and respiration
 - condition score
 - lameness
- accurately updated workplace horse health records.

In addition to the above, the individual must have, for at least one horse:

- safely and effectively applied a restraint to horse
- checked for signs of internal and external parasites
- administered oral drench using appropriate equipment and technique
- used appropriate technique and location to administer an injection according to veterinary instructions (NOTE: This may be performed on a horse replica)
- applied prescribed oral and topical treatments

- externally checked horse teeth and reported health status
- applied treatment bandages to the leg, fetlock and hoof
- checked for common illnesses, injuries and communicable diseases.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- industry terminology for points of horses and basic horse anatomy and physiology
- horse vital sign checks, including temperature, respiratory rate, capillary refill, hydration status and heart rate
- workplace requirements for controlling common horse medications and vaccinations, including:
 - identification, traceability and record-keeping
 - transport, storage and disposal of medicines and vaccines
 - application procedures and practices
- identification of prohibited substances in medications that may affect participation in competitions or breeding
- effects of medications on horses, including:
 - antibiotic resistance
 - contraindications
 - different classes of horse, including stallions and pregnant mares
- features, purpose, effects, reactions and animal welfare considerations of common horse restraints used for when checking and treating horses
- general vaccination requirements for horses, and individual requirements based on exposures
- horse injections, including locations on horses, subcutaneous, in muscle mass and intravenous
- state/territory restrictions on the administration of intravenous injections to horses by a proper responsible agent
- common horse parasites, including:
 - detection, including faecal sampling
 - options for prevention
 - symptoms and life cycles of parasites
 - resistance to treatments
- safe and low stress horse handling and medical treatment practices
- normal dentition and patterns of eruption
- dental disease, mouth conformation and abnormalities
- hoof structure and function
- considerations for routine hoof care checks and treatment, including:
 - seasonal or environmental factors
 - horse workload

- typical gait abnormalities
- indicators of horse lameness
- horse shoes, fit and common problems
- identification and use of basic farriery equipment
- application techniques for medical bandages
- causes, signs and treatment of common horse illnesses, injuries and communicable diseases
- key features of horse quarantine requirements and biosecurity procedures for infection control
- contents and use of items in horse first aid kit
- zoonoses transferred by horses to humans, including Hendra, ringworm and leptospirosis
- when owner or management consent is required prior to treating horses, including consideration of treatment cost, insurance cover and animal welfare
- workplace procedures for recording, storing and reporting information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an equine workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live horses specified in the performance evidence, assessed as suitable for the assessment of this unit and the individual being assessed
 - administration of injection as specified in the performance evidence may be carried out on a live horse or simulated with a horse replica
 - medications, gear, products, tools and equipment, including PPE required for the tasks specified in the performance evidence
 - reporting and recording forms
- specifications:
 - workplace horse health programs and procedures for the tasks specified in the performance evidence.

The *Companion Volume: User Guide: Safety in Equine Training* provides advice and sample templates to assist assessors with the risk assessments that should be undertaken to help ensure the safety of all involved in the assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU306 Provide routine care for horses

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to provide routine care for horses. It involves grooming, basic trimming, rugging, feeding, basic turnout and monitoring horse welfare.

This unit applies to individuals who apply technical knowledge and skills with discretion and judgement to care for horses. They work under broad direction, coordinate activities and solve problems related to horse welfare. Work environments may include stables, small horse enclosures, paddocks and yards.

Commonwealth and state/territory health and safety and animal welfare legislation, regulations and codes of practice relevant to interacting with horses apply to workers in this industry. Requirements vary between industry sectors and jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for ACMEQU306 Provide routine care for horses

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and efficiently cared for at least three different compliant and manageable horses that have individual needs, over a period of seven days. For each horse, the individual must have:

- identified at least three hazards, and assessed and controlled associated risks
- selected, checked and correctly fitted personal protective equipment (PPE)
- used safe and low stress horse handling techniques
- maintained feed and water quantity and quality, including:
 - inventoried and replenished feed supplies and supplements
 - identified and isolated contaminated feed
 - identified, reported and/or removed sources of contamination
- fed according to individual horse requirements, including:
 - prepared hard feed, mixed feeds and provided supplements
 - ensured feeding bins are suitable and clean
 - monitored feeding and drinking patterns and horse condition, and adjusted feeding plan based on dietary advice
- maintained horse environments, including:
 - cleaned stable or small horse enclosure
 - cleaned feed and water vessels and food handling tools and equipment
- groomed and rugged horse according to horse requirements
- trimmed and tidied horse mane, tail and bridle path according to instructions
- prepared horse for work according to workplace routine, including:
 - selected, fitted and adjusted working gear
 - fitted exercise boots or bandages
 - removed, checked, cleaned and stored working gear
- provided post-exercise care to horse, including:

- cooled down, hosed, washed and groomed
- checked horse condition and responded to any signs of injury, illness and distress
- completed horse feeding and condition records according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key features of workplace health and safety and animal welfare legislation
- risk identification, assessment and minimisation processes
- purpose and types of PPE for horse handling and care tasks
- horse identification processes
- horse housing requirements, including environmental, security, physical, social, emotional and mental
- key features of stable or small horse enclosure and yard design and layout, including regulatory requirements for waste management and disposal
- current horse industry practices for hygiene and basic biosecurity requirements
- workplace routines and scheduling of duties
- type, purpose and maintenance requirements of horse bedding and floor coverings
- procedures for dealing with cast horses
- procedures for cleaning and disinfecting stables or small horse enclosures, and for adding stable bedding or flooring materials
- procedures for cleaning and disinfecting areas and equipment shared by horses, including crushes, floats and vehicles
- typical food and water requirements for horses based on their age, condition, activity levels and weather conditions
- common horse feeds, including:
 - hay
 - chaff
 - grain/pellets or other forms of concentrated feed
 - supplements
 - bran
 - feed appetisers
- horse feed and water storage requirements, including:
 - temperature and humidity
 - contamination control
 - vermin control
 - shelf life and expiration dates
- common horse feeds, additives and medications (natural and manufactured) that may contain substances that prohibit participation in events
- processes for identification, isolation and removal of:
 - contaminated feed

- feed that does not meet quality requirements
- effects of contaminated and poor quality feed on horse health, performance and welfare
- equipment and techniques for:
 - washing horses
 - trimming horse mane, tail and bridle path
 - grooming
- types, fitting and application of horse rugs, rug accessories, flyveils and other protective equipment
- using, fitting, checking, maintaining and storing working gear for horses
- post-exercise horse care
- application and monitoring of horse feeding plans, including:
 - feed types and supplements
 - normal and abnormal eating and drinking behaviours and patterns
 - behaviour during group and individual feeding
 - safe practices for feeding horses in groups
- workplace record-keeping procedures and practices
- zoonoses transferred by horses to humans, including Hendra, ringworm and leptospirosis.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an equine workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live horses specified in the performance evidence, assessed as suitable for the assessment of this unit and the individual being assessed
 - equipment, tools, materials and supplies required for the tasks specified in the performance evidence, including cleaning stables or small horse enclosures, and feeding, grooming, washing and trimming horses
 - PPE and load carrying equipment
 - feed and supplements for selected performance horses
 - appropriate horse gear for the tasks specified in the performance evidence
 - workplace recording and reporting formats
- specifications:
 - workplace procedures, schedules and specifications for the tasks specified in the performance evidence.

The *Companion Volume: User Guide: Safety in Equine Training* provides advice and sample templates to assist assessors with the risk assessments that should be undertaken to help ensure the safety of all involved in the assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU309 Carry out basic hoof care procedures

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Application

This unit of competency describes the skills and knowledge required to check horse hooves and shoes and identify issues that affect hoof health and function. It includes the application of simple hoof treatments and removal of loose or damaged horse shoes. This unit does not replace hoof care advice, services and/or treatments that require a farrier and/or veterinarian.

This unit applies to workers who apply technical knowledge and skills with discretion and judgment to care for horses in a range of environments. They work under broad direction, coordinate activities, solve problems and provide information about the health status of horse hooves to farriers and/or veterinarians.

Commonwealth and state/territory health and safety and animal welfare legislation, regulations and codes of practice relevant to interacting with horses apply to workers in this industry. Requirements vary between industry sectors and jurisdictions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

ACMEQU212 Handle horses safely

Unit Sector

Equine (EQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Examine horse hooves	1.1 Confirm horse identification and location, and identify hazards and

	<p>assess and control their risks</p> <p>1.2 Select and fit personal protective equipment (PPE) for hoof examination</p> <p>1.3 Restrain horse using techniques to prevent injury to horse and worker</p> <p>1.4 Lift horse's feet and check condition of hooves and shoes, using safe and low stress horse handling techniques</p> <p>1.5 Assess hoof health, injury status and shoe condition, and determine action required, including the need for farrier and veterinary advice and/or treatment</p>
2. Provide hoof care to horse	<p>2.1 Select and prepare basic farriery and hoof care tools, equipment, hoof treatments, bandages and other medications required</p> <p>2.2 Restrain horse and clean hoof using safe and low stress practices</p> <p>2.3 Apply hoof care treatment, dressing and medication using appropriate application methods and tools</p> <p>2.4 Store unused treatment and disposed of waste products according to manufacturer instructions and workplace procedures</p> <p>2.5 Clean and store equipment used in treating horse hoof</p> <p>2.6 Monitor horse, maintain treatment records and consult with veterinary if required</p>
3. Perform shoe removal	<p>3.1 Confirm shoe is loose or sprung and needs to be removed to prevent hoof capsule damage, injury or further injury to horse, and it is within scope of responsibility to remove shoe without damaging the hoof</p> <p>3.2 Prepare basic farriery tools and equipment required</p> <p>3.3 Check horse restraints and remove loose or sprung shoe, taking care not to damage the hoof, and if required perform trim</p> <p>3.4 Communicate with owner, farrier and/or veterinarian to arrange shoe replacement and/or treatment required</p> <p>3.5 Monitor horse and update records according to workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for ACMEQU309 Carry out basic hoof care procedures

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 5.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has carried out basic hoof care procedures on at least three different live, compliant and manageable horses. For each horse, the individual must have picked up a front and hind leg and demonstrated use of nippers and rasp to perform a light trim of the hooves.

For at least one live horse, the individual must have:

- applied a poultice to a hoof
- detected a digital pulse.

In addition to the above, the individual must have:

- used a live horse to indicate the location and signs of, and verbally explained first aid treatment for, the following hoof conditions/ailments:
 - laminitis (founder)
 - bruised heel
 - bruised sole and corn
 - hoof abscess
 - hoof crack (toe crack, quarter crack, heel crack)
 - thrush
 - seedy toe bacteria (white line disease)
- observed movement and behaviour of a live horse (or video of a live horse), and identified lameness and its likely location.

All hoof care contact and activities with horses must be carried out using safe and low stress horse handling practices. For each horse, the individual must have:

- identified at least three hazards related to undertaking hoof care, and assessed and controlled associated risks
- selected, checked and correctly fitted appropriate personal protective equipment (PPE) required for hoof care
- used safe position and posture when working with horses' hooves
- used appropriate tools and practices to examine and clean horse hooves
- applied a dressing or treatment to all hooves
- accurately updated workplace horse hoof care records.

In addition to the above, the individual must have:

- removed a loose shoe and performed any necessary hoof trim according to workplace procedures or specialist advice (NOTE: This may be performed on a cadaver horse leg)
- provided a brief written or verbal report to a veterinarian or farrier describing a hoof care condition using industry terminology and requesting specialist advice.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- structure and function of the hoof, and associated problems
- common horse behaviour and reactions to hoof care
- signs and first aid treatment of common hoof injuries, ailments and injuries, including:
 - laminitis (founder)
 - bruised heel
 - bruised sole and corn
 - hoof abscess
 - hoof crack (toe crack, quarter crack, heel crack)
 - thrush
 - seedy toe bacteria (white line disease)
- hoof ailments and injuries that require immediate professional advice and/or attendance
- horse shoes, including:
 - fit and common problems
 - signs of hoof growth that indicate need for reshoeing
 - signs of loose, worn and damaged shoes, including sprung shoes
 - hoof injuries and ailments caused by loose, worn and damaged horse shoes
 - techniques for safe removal of loose shoes
- hoof care examination and treatment procedures
- types, purpose, use and maintenance of hoof care tools and equipment, including horse restraints and farriery equipment used for basic hoof care
- common workplace health and safety requirements and practices relating to hoof care, including:

- hazard identification, risk assessment, risk control and reporting
- horse behaviour based on horse education and/or soundness of limbs
- types and purpose of PPE
- safe and low stress horse handling and hoof treatment practices
- workplace procedures for recording, storing and reporting horse health information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an equine workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live horses specified in the performance evidence, assessed as suitable for the assessment of this unit and the individual being assessed
 - a video of a live horse may be used for the observation and identification of lameness as specified in the performance evidence
 - cadaver horse legs may be used for the loose shoe removal and any hoof trims specified in the performance evidence
 - medications, gear, materials, tools and equipment, including PPE, required for the tasks specified in the performance evidence
 - workplace recording and reporting forms or systems
- specifications:
 - workplace horse hoof health procedures.

The *Companion Volume: User Guide: Safety in Equine Training* provides advice and sample templates to assist assessors with the risk assessments that should be undertaken to help ensure the safety of all involved in the assessment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required in horse behaviour and learning to manage the suitable selection of horses for new and/or inexperienced handlers, riders or drivers.

The unit applies to individuals who are horse instructors, coaches or supervisors with work health and safety responsibilities and obligations to workers, learners and participants in their care.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU205 Apply knowledge of horse behaviour.

Unit Sector

Equine (EQU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop knowledge of horse behaviour and learning theory	<p>1.1 Evaluate current, evidence-based learning theory and techniques used in horse training and behaviour management</p> <p>1.2 Apply knowledge of horse training and behaviour to evaluate own horses as suitable for use by new and/or inexperienced handlers, riders or drivers</p> <p>1.3 Review own practices against current learning theory to determine if any improvements could be made to managing horse behaviour for workplace activities</p>
2. Assess horse suitability for purpose	<p>2.1 Identify factors to consider for conducting a fit-for-purpose assessment of a horse to address work health and safety (WHS) requirements</p> <p>2.2 Develop or modify a tool to identify and record horse characteristics and behaviour and assess horse suitability for specified activities</p> <p>2.3 Observe and assess horses to determine their characteristics and behaviour in a range of activities, conditions and stimuli relevant to activities to be undertaken by new and/or inexperienced handlers, riders or drivers</p> <p>2.4 Evaluate outcomes of the assessment and record an activity suitability rating for individual horses in relation to the handler, rider or driver skills according to workplace procedures</p> <p>2.5 Conduct additional horse assessments over time and in response to different scenarios, recording incidents and observing responses of the horse to ensure currency of horse suitability records</p>
3. Assess skills of new worker or participant	<p>3.1 Conduct an induction briefing covering workplace rules and new and/or inexperienced handler, rider or driver responsibilities and obligations, prior to their commencing activities</p> <p>3.2 Identify factors to consider, and develop or modify a tool to assess new and/or inexperienced handler, rider or driver skills and capabilities for specific activities involving a horse</p> <p>3.3 Assess new and/or inexperienced handler, rider or driver readiness and current knowledge of horse handling, riding or driving</p> <p>3.4 Conduct a practical assessment of new and/or inexperienced handler, rider or driver with a quiet, consistent and obedient horse</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>in a safe and controlled environment</p> <p>3.5 Determine new and/or inexperienced handler, rider or driver capability rating objectively against criteria in an appropriate tool, and record according to workplace procedures</p>
4. Match horse to new worker or participant for specific activity	<p>4.1 Establish a range of safe activities that can be used to assess the suitable matching of horse to new and/or inexperienced handler, rider or driver</p> <p>4.2 Conduct activities to determine suitable matching of horse to new and/or inexperienced handler, rider or driver</p> <p>4.3 Discuss with new and/or inexperienced handler, rider or driver their capabilities</p> <p>4.4 Address any concerns from new and/or inexperienced handler, rider or driver, including any unrealistic expectations or beliefs they may have about their own abilities or that of the horse</p>
5. Monitor new worker or participant and horse behaviour	<p>5.1 Observe new and/or inexperienced handler, rider or driver for any signs of mismatch with horse, inappropriate behaviour or control issues with selected horse, and take action to address these</p> <p>5.2 Monitor horse, including patterns of inappropriate behaviour, and determine action required</p> <p>5.3 Implement ongoing monitoring activities to identify problems and appropriate courses of action</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret critical information in horse records and records of work experience or training provided by new and/or inexperienced handler, rider or driver
Writing	<ul style="list-style-type: none"> Use clear language and accurate industry terminology for recording information about horses and skills of new and/or inexperienced handler, rider or driver

Skill	Description
Oral communication	<ul style="list-style-type: none"> Convey information clearly using tone and pace appropriate to audience
Navigate the world of work	<ul style="list-style-type: none"> Follow workplace procedures, including work health and safety (WHS) and animal welfare requirements, and meet expectations relating to own role and area of responsibility
Interact with others	<ul style="list-style-type: none"> Conduct induction briefings, conveying information to others according to industry practices and WHS requirements and duty of care obligations
Get the work done	<ul style="list-style-type: none"> Prepare resources and materials to match horse and handlers, riders or drivers, and schedule and sequence activities in logical order

Assessment Requirements for ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has managed the selection and matching of horses for at least three riders, handlers or drivers, consisting of new or inexperienced, and experienced, capable riders, handlers or drivers, including:

- testing horses through riding, handling and/or driving activities and observations to determine levels of behaviour, reactions and education to categorise them according to workplace assessment ratings and procedures
- assessing new or inexperienced handlers, riders or drivers with quiet, consistent and obedient horses to determine their skill levels and abilities
- allocating handlers, riders or drivers to suitable horses and appropriate activities once assessed
- monitoring suitability of horse and handler, rider and/or driver to workplace activity involving horses, with reference to safety of individual and horse wellbeing
- responding to problems by changing the horse, educating the handlers, riders and/or drivers, and/or changing activities to ensure the safety of participants and horses.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- factors to consider in determining handler, rider or driver skills and experience
- factors to consider in assessment of horse suitability (fit-for-purpose):
 - experience and training
 - temperament and behaviour
 - horse reactivity to normal, abnormal and new situations
- types of mismatch between horse and participant
- potential consequences of inappropriately matched horses and handlers, riders or drivers:

- horses displaying avoidance or dangerous behaviours
- rider, handler or driver loses control of the horse and/or loses confidence
- injuries to rider, handler, driver or horse
- ongoing horse problems and appropriate courses of action, including removal and/or retraining.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
 - safe, controlled environment for practical skills assessment of new and/or inexperienced handler, rider or driver
- resources, equipment and materials:
 - various horses to be assessed for suitability
 - appropriate gear and tack for horses for handling, riding or driving assessment
 - personal protective equipment (PPE), correctly fitted and applicable to activity
- relationships:
 - opportunities to assess skills and capabilities of handlers, riders or drivers with varying levels of experience.

Training and assessment strategies must show evidence of the use of guidance provided in the Companion Volume: User Guide: Safety in Equine Training.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMEXH304 Assist with capturing, restraining and moving animals

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to secure and handle animals, including assisting with the capture, restraint and herding or moving of animals in a manner that ensures human and animal safety and minimises negative impacts on animals.

This unit applies to individuals who work in animal carer, keeper or aquarist roles, undertaking individual and team activities in small to large scale animal facilities. They perform work under broad direction and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for ACMEXH304 Assist with capturing, restraining and moving animals

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assisted in capturing, restraining and moving a minimum of three different animals using safe, humane species-specific methods and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of facility procedures for capturing, restraining and moving animals, including:
 - emergency, security and escape procedures
 - workplace health and safety – hygiene, infection control, biosecurity, manual handling
- key animal welfare considerations for capturing, restraining and transporting animals
- species-specific information for animals that are captured, restrained and transported by the facility, including:
 - anatomical structures and physiological features
 - behavioural features – nature, defence mechanisms, stress response
 - animal husbandry requirements
 - handling techniques
- planning considerations for capturing, restraining and moving animals, including:
 - assessment of impact on animal and/or group
 - species-specific capture technique
 - restraint techniques – conditioned behaviour, physical and/or chemical (sedation/anaesthesia)
 - staff numbers and roles, including veterinary

- environment and climatic conditions
- contingency plans in the event of escape
- equipment required
- safety issues for the public, team members and animals
- time factors
- types, appropriate use and maintenance of equipment, including:
 - bags, nets, ropes, catch poles
 - transportation containers
 - visual barriers
- risks involved when handling animals, including:
 - animal bites, envenomation, kicks, scratches, intraocular contamination and crush injuries
 - biological hazardous waste and sharps injuries
 - handling of chemicals and biological waste, including disposal of deceased animals
 - manual handling, including carrying, lifting and shifting
 - release of infective agents, zoonotic diseases
 - slippery or uneven work surfaces
- key requirements of state/territory legislation, regulations, standards and protocols for transporting live animals, including:
 - Australian Animal Welfare Standards and Guidelines
 - International Air Transport Association (IATA) shipment requirements and protocols
 - relevant quarantine requirements for the external shipment of animals, including government department requirements for biosecurity and quarantine, import and export licences and Australasian Species Management Program (ASMP)
 - Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care workplace or an environment that accurately reflects a real workplace setting – this includes the use of mannequins and scenarios where assessment would be unsafe, impractical or unethical using live animals
- resources, equipment and materials:
 - a range of live animals or realistic mannequins
 - species-specific equipment and resources typically available in a captive animal facility
- specifications:
 - facility policies and procedures, key legislation, standards and regulations for transporting animals

- relationships:
 - interactions with supervisor and team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Links

Companion Volumes, including Implementation Guides, are available at VETNet: -

ACMGEN309 Provide basic animal first aid

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to provide essential first aid for animals. The first aider is not expected to deal with complex cases or incidents, but to provide an initial response where first aid is required.

The unit applies to individuals working in the animal care and management industry in a range of small to large facilities who may be required to apply animal first aid. They work under broad direction, typically in a team environment, and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes, solving routine problems and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for ACMGEN309 Provide basic animal first aid

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- identified the animal and hazards, and assessed and minimised risks to self, other people, injured animal and other animals for two separate incidents
- provided basic first aid for at least two animals with different first aid needs, including:
 - approached, secured and handled each animal safely using low stress techniques and following workplace health and safety procedures
 - updated supervisor or relevant personnel of animal condition
 - accurately recorded and maintained records for each animal.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- risks of providing first aid to animals, including:
 - risks to self and other people, including bites, scratches, envenomation, zoonoses and manual handling
 - risks to other animals
 - risks to injured animal
- first aid management principles
- methods used to catch, restrain and secure animals, including commonly used equipment
- personal protective equipment (PPE), including when and how it should be used, and correct fitting
- safe and humane animal handling techniques and procedures
- basic examination techniques to determine health status
- basic animal first aid techniques, including how to:
 - check airway and clear if required

- control bleeding
- minimise impact of shock by keeping animal quiet, warm and away from activity or noise
- immobilise limb injuries, if safe to do so, where soft tissue damage or fractures are suspected
- apply water appropriately, if available, in cases of burns or overheating
- transport animal to veterinary assistance as soon as possible using methods appropriate to illness or injury
- organisation policies and procedures, including health safety, and emergency procedures
- animal emergency networks, where applicable, including:
 - veterinary services
 - animal welfare bodies and support facilities
 - state and local government emergency services relevant to animal incidents.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live animals or animal models/replicas specified in the performance evidence – live animals can only be used where first aid is undertaken as part of routine workplace activity and the animal's welfare is not compromised
 - PPE for handling animals
 - animal first aid equipment specified in the performance evidence
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMGEN311 Maintain and monitor animal health and wellbeing

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to follow animal health management practices to monitor animal health via daily observations of behaviour and condition. The animals may include a range of species housed long-term or cared for short-term in a workplace.

This unit applies to individuals undertaking animal care activities in small to large scale animal facilities where it may be necessary to care for a range of animal species and to monitor the wellbeing of healthy, ill or injured animals. They work under broad direction, typically in a team environment, and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes, solving routine problems and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for ACMGEN311 Maintain and monitor animal health and wellbeing

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has maintained and monitored the health and wellbeing of a minimum of three different animals and, on each occasion, the individual must have:

- applied work practices for personal safety and personal hygiene standards
- monitored and tested indicators of animal health
- assessed the physical environment of animals for evidence of conditions that may have affected the physical wellbeing and welfare of animals
- maintained records of observations, monitoring activities and samples, including isolation and/or quarantine records where required
- selected, fitted and correctly used personal protective equipment
- administered treatments under supervision.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- anatomical and physiological structures and functions related to animal health and wellbeing
- overview of anatomical and physiological terminology
- broad categories of parasitic infestations and preventative treatments
- common infectious diseases and their causes and transmission, including:
 - bacteria
 - fungi
 - virus
 - zoonoses
- common non-infectious diseases, including:

- allergies
- chemical toxicities
- genetic
- metabolic
- neoplastic
- nutritional
- observing and reporting normal species-specific behaviour and indicators of ill health, injury or distress
- indicators of poor response to treatment or management of young, ill, injured or compromised animals
- indicators of recovery from illness or injury
- isolation and/or quarantine protocols
- safe work practices related to animal handling, including infection control
- methods used to measure, interpret and record animals' weight and other objective measures of animal health
- key principles of animal welfare and ethics.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live animals specified in the performance evidence
 - videos/photos may be used for identification of diseases where live samples are not available
 - equipment and resources typically available in an animal care environment for animal health assessment and isolation and/or quarantine, including personal protective equipment
- specifications:
 - workplace policies and procedures, and current, relevant legislation and codes of practice related to animal health assessment and isolation and/or quarantine
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMGEN312 Provide nutritional requirements for animals

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to prepare rations based on animal species needs and availability of food products.

The unit applies to individuals working in the animal care industry who feed and provide nutritional requirements for animals, in a range of small to large facilities. They work under broad direction, typically in a team environment and are required to take responsibility for their own work, including carrying out assigned tasks, organising processes, solving routine problems and working to schedules.

All work must be carried out to comply with workplace procedures according to Commonwealth and state/territory health and safety and animal welfare regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

General Animal Care (GEN)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify nutritional requirements of animals	1.1 Identify natural nutrient sources and types of digestive systems for animal species or groups within the workplace

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Align normal feeding behaviours and nutritional requirements of a range of animals</p> <p>1.3 Evaluate feeding strategies and methods to maximise activity and behavioural enrichment</p> <p>1.4 Identify characteristics of under-supply or over-supply of nutrients, and evaluate methods used to monitor nutritional uptake</p>
2. Review food sources and calculate dietary requirements	<p>2.1 Classify food products according to nutrient content for animals cared for in the workplace</p> <p>2.2 Assess foodstuffs for shelf life, preparation requirements, availability and cost</p> <p>2.3 Identify hazards to animal and human health from food sources, and implement procedures to manage risks</p> <p>2.4 Estimate with reasonable accuracy or calculate feed and water requirements, based on provided diet plan</p> <p>2.5 Identify key food groups of animal food or diet</p> <p>2.6 Identify other dietary issues included in animal diets</p> <p>2.7 Document diet provided to animals according to workplace procedures or instructions</p>
3. Prepare diets and provide food and water	<p>3.1 Prepare food as required by diet plan</p> <p>3.2 Store food safely to avoid contamination and minimise degradation or nutrient loss</p> <p>3.3 Provide food and water according to animal's requirements</p>
4. Monitor feeding and watering practices	<p>4.1 Monitor and record food and water consumption according to the workplace procedures</p> <p>4.2 Identify and report abnormal feed intake or feeding behaviour according to the workplace procedures</p> <p>4.3 Monitor animals for condition, metabolic and behavioural changes</p> <p>4.4 Identify reasons for poor response to diet and seek specialist advice</p> <p>4.5 Determine required dietary changes in consultation with supervisor</p> <p>4.6 Document required dietary variations and update workplace records</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.7 Hand over individual dietary information to team member or client

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret species-specific dietary and nutritional terminology in workplace policies and procedures
Writing	<ul style="list-style-type: none"> Use biological and industry terminology when completing records
Oral communication	<ul style="list-style-type: none"> Use open-ended questioning, active listening, paraphrasing and summarising to identify animal dietary issues and possible resolutions with relevant personnel
Numeracy	<ul style="list-style-type: none"> Calculate volume, weight, area, ratio, time and application rates Measure, interpret and record animal weight, length and other relevant objective indicators of change in physiological status

Assessment Requirements for ACMGEN312 Provide nutritional requirements for animals

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has provided a nutritionally appropriate diet for a minimum of three different animals. The three animals selected must include two species and include at least two different individual dietary needs.

In doing the above, the individual must have undertaken the following for each animal:

- prepared animal diet in consultation with relevant personnel
- prepared, stored and distributed food according to animal needs and workplace quality control procedures and hygiene practices
- monitored animal response to feeding program and reviewed diet in consultation with supervisor.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- animal classifications that influence dietary needs and styles of eating
- key food groups in animal food or diet, including protein, carbohydrate, vitamin and mineral supplement and fibre content
- behavioural features related to feeding styles and unsuitable responses to diets
- methods used to monitor nutritional uptake, including:
 - comparing food distributed and food not eaten
 - estimating condition scores
 - weighing animals
- principles of contamination and cross-contamination
- species-specific feed products available and approved in Australia, including availability, cost, shelf life, method of storage, preparation and presentation to animals

- feeding methods of different animals, including the use of safe, low stress animal handling/interaction techniques
- appropriate food storage and feeding containers for different animals
- common nutrition-related health problems and health problems that impact an animal's diet
- importance of compliance with veterinary or supervisor instructions for specific animals
- sources of nutrients for particular animal classes and groups
- potential causes of poor response to diets.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an animal care facility or an environment that represents workplace conditions
- resources, equipment and materials:
 - live animals specified in the performance evidence
 - animal care environment equipment and resources required for the nutrition tasks specified in the performance evidence
- specifications:
 - workplace procedures relevant to animal diets and nutritional requirements
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCAIS302 Process and store semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to process and store semen collected from livestock for the purpose of artificial insemination.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare diluent	1.1 Clean containers to be used for preparation of diluent according to enterprise hygiene standards

Element	Performance criteria
	1.2 Calibrate equipment and tools used in processing semen 1.3 Heat distilled water for use in diluent to required temperature 1.4 Add distilled water to powdered diluent in correct proportions 1.5 Store diluent correctly before use
2 Determine number of semen doses	2.1 Determine concentration of the ejaculate using appropriate equipment 2.2 Calculate number of doses according to the concentration determined
3 Assess quality of semen batch	3.1 Examine semen batch and check for contamination 3.2 Assess motility of semen 3.3 Compare quality of semen batch against enterprise benchmarks 3.4 Discard poor quality semen appropriately
4 Check incubator	4.1 Check temperature and other operational parameters of incubator before use 4.2 Report and resolve problems with incubator before operation
5 Prepare semen doses	5.1 Add diluent to semen batch 5.2 Divide diluted semen into doses 5.3 Label each semen dose 5.4 Place doses in incubator 5.5 Assess quality of prepared doses 5.6 Record data in line with enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAIS302A Process and store semen.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCAIS302 Process and store semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare diluent
- determine number of semen doses
- assess quality of semen batch
- check incubator temperature and other operational parameters before use
- prepare and label semen doses
- record semen details.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods and procedures for cleaning and sterilisation of containers, equipment and tools
- calibration of equipment and tools
- preparation and storage of diluent
- types, uses, maintenance and servicing of equipment used for determining semen concentration and quality
- calculation of semen doses
- criteria, characteristics and methods for assessing semen quality
- requirements and methods for the disposal of semen
- types, functions and maintenance of incubator
- requirements, methods and procedures for preparing semen doses
- effects and impacts of environmental conditions, equipment factors and human factors on viability of semen doses
- enterprise recording requirements.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBEK203 Open and reassemble a beehive

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least two occasions the individual has demonstrated that they have safely opened and reassembled a hive, including:

- identified health and safety hazards and risks and applied appropriate controls
- selected, checked serviceability, fitted and used appropriate personal protective equipment (PPE)
- selected appropriate tools and equipment, and checked serviceability
- complied with hive quarantine and biosecurity requirements
- assessed the weather and other factors to minimise the risk of robbing and stress to bees
- worked from a safe position and used smoker, tools and equipment to move, open and dismantle a hive according to workplace procedures
- ensured hive components were kept clean and free from dirt
- replaced hive components and brood, reassembled the hive according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of opening and reassembling beehives
- bee behaviour when manipulating and dismantling a beehive
- the use of smoke to control bee behaviour
- hive components, location and purpose
- beekeeping tools and their application for dismantling a hive
- basic principles of hive hygiene, biosecurity and quarantine
- safety hazards, risks and controls when working bees including:

- PPE
- manual and mechanical handling techniques
- effect of weather and nectar flow on bee behaviour.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary with live bees
- resources, equipment and materials:
 - live bees
 - hive tools
 - hive components
 - PPE
 - mechanical handling equipment
- specifications:
 - workplace procedures related to opening and reassembling beehives
 - access to specific bee related quarantine regulations and biosecurity codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have operated a bee smoker including:

- confirmed work activity with supervisor
- identified and confirmed that the conditions are appropriate for using a bee smoker
- checked bee smoker equipment is available and serviceable
- identified hazards and risks and used personal protective equipment (PPE) and safe work practices to minimise risk
- ensured fire prevention procedures were carried out
- anticipated defensive behaviour of bees and monitored and applied smoke to control bee behaviour
- selected and ignited suitable fuel for smoker keeping it alight and functioning while carrying out bee husbandry tasks
- used and shut down bee smoker safely after completing operations according to regulations and workplace fire prevention procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of using smoke on bees to pacify behaviour
- types of bee smokers and their use and advantages/disadvantages, including:
 - bellows (traditional)
 - electric fan operated
 - electric ignition
- types of smoke and the effect on bees and hive products
- suitable bee safe fuel and ignition procedures

- operation of bee smokers and the effect of weather and environmental conditions on the safe use of smoker including fire prevention activities
- fire restrictions and regulations that impact on use of bee smokers, including:
 - permits and exemptions
 - applications for exemptions
- health and safety hazards and risks and their controls when using smokers.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a functioning apiary with live bees or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - bee smoker and apiary tools for manipulating hives
 - access to live bees
 - PPE
- specifications:
 - access to specific regulations and permits relevant to the lighting and operating bee smokers within work area.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK206 Assemble and maintain beekeeping components

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely assemble and disassemble beehives, identify and repair damaged components, and treat hive components according to biosecurity and legislative requirements.

The unit applies to beekeepers who work under routine supervision. This includes identifying and providing solutions to a limited range of predictable problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to assemble or repair hive components	1.1 Confirm construction plans, hive components, other materials and equipment required for hive assembly, repair and treatment with supervisor 1.2 Check and inspect stored hive components for availability and suitability for use 1.3 Remove faulty components from store and replace, repair or

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	discard according to workplace procedures 1.4 Identify health and safety hazards and take action according to workplace procedures 1.5 Select, ensure serviceability, fit and use personal protective equipment
2. Assemble or repair hive components	2.1 Inspect hives to identify necessary repairs, scope of job, materials and tools required 2.2 Treat hive components where inspection or testing indicated presence of pests or diseases according to supervisor instructions, biosecurity procedures and product label 2.3 Assemble or repair hive components according to workplace procedures 2.4 Apply treatments to preserve hive components appropriate for materials used and according to workplace procedures, product label and safety data sheets 2.5 Mark hive components with beekeeper identifier according to state or territory legislation 2.6 Report problems or difficulties in completing work to required standards or timelines to supervisor 2.7 Maintain a clean and safe work site while working
3. Clean up on completion of work	3.1 Return, store or dispose of materials according to workplace waste management and biosecurity procedures 3.2 Clean, maintain and store equipment 3.3 Report work outcomes according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret basic hive plans and specifications Interpret safety data sheets for treatments and preservatives used

Skill	Description

Assessment Requirements for AHCBEK206 Assemble and maintain beekeeping components

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have assembled and maintained beekeeping components including:

- identified hive components for assembly or repair
- identified materials, equipment and tools required for assembly work
- identified health and safety hazards and risks and applied relevant actions
- checked components for suitability and biosecurity risk to the environment or apiculture products
- removed, repaired or replaced unsuitable materials from the store
- constructed and repaired hive components according to workplace procedures, including correct selection and safe use of tools
- applied biosecurity and preservation treatments according to product labels, safety data sheets and workplace procedures
- marked hive components according to legislative requirements
- disposed of waste materials according to workplace biosecurity and waste management procedures
- cleaned and maintained and stored equipment and unused materials after completion of work
- maintained workplace records and reporting procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, materials and properties of hive components
- principles and techniques for construction, repair and preservation of hive components
- tools and equipment used for assembly work, including:
 - safe use
 - appropriate personal protection equipment

- maintenance and storage
- biosecurity issues with used hive components and treatments including:
 - pests and diseases and treatment options
 - sanitising new and used components
- hive components preservation materials and techniques, including:
 - plastic components
 - timber components
 - paints
 - chemical dips
 - wax dips
- interpretation of chemical labels and safety data sheets for treatments and preservatives
- legislative requirements for identifying hive ownership
- mandatory and workplace record keeping systems.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - hand tools and equipment
 - new and used hive components
 - preservatives and treatments relevant to the type of materials used in the hive
 - use of appropriate personal protective equipment
- specifications:
 - workplace procedures relating to assembly and maintenance of beehives
 - manufacturer's operating instructions for tools and equipment used in beehive construction, assembly and preservation
 - product labels and safety data sheets for preservatives and treatments
 - access to specific legislation/codes of practice for hive identification and bee biosecurity
 - construction plans showing hive components.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have managed a honey bee swarm including:

- assessed swarm for condition and viable and safe options for collection, and determined resources and equipment required
- identified the hazards and risks and selected, fitted and used appropriate personal protective equipment
- identified and prepared equipment required for swarm collection
- interpreted behaviour and handling of bees and applied appropriate management strategies
- collected a swarm of honey bees using appropriate equipment and techniques while following quarantine and biosecurity requirements
- assessed captured swarm for health and need for re-queening
- selected and implemented control options to manage swarming behaviour in honey bees
- updated and maintained workplace and statutory records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of managing swarms, including:
 - causes and timing of honey bees swarm activity
 - why swarms are collected including environmental and social impacts
 - signs of colony swarming activity
 - management techniques that can be used to manage a colony showing signs of potential swarm activity
 - setting up swarm catch boxes to capture swarming bees

- biosecurity considerations, including:
 - pests and diseases that occur in honey bees
 - signs of pests and diseases in swarms
 - quarantine procedures to prevent cross contamination of apiaries
 - sampling procedures for pests and disease for confirmation
- signs and purpose for re-queening collected swarms
- swarm collecting and boxing techniques, including:
 - tools and equipment used for capturing swarms
 - hive components
- hazards and risks when collecting swarms and control strategies, including:
 - safety aspects of swarm collection and location
 - personal protective clothing
 - public safety
- workplace and statutory apiary records and notifications.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
 - access to bee swarm
- resources, equipment and materials:
 - live bees or hive preparing to swarm
 - safety equipment for handling bees
 - tools and equipment appropriate for managing swarms.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK302 Manipulate honey bee brood

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have manipulated a honey bee brood including:

- established the purpose for manipulating brood and determined appropriate actions and sequencing of a honey bee brood to achieve a desired outcome
- identified hazards, assessed the risks and implemented safe work procedures for handling bees
- selected, checked serviceability, fitted and used appropriate personal protective equipment
- selected and used tools, materials and equipment for manipulating bee brood
- complied with apiary biosecurity and quarantine procedures during the activity
- opened hives, removed frames and set aside with minimal disturbance to brood and queen
- repositioned frames safely according to plan with minimal damage or unintended disturbance to brood
- monitored the hive after manipulation
- cleaned up work area and disposed of waste appropriately
- updated and maintained workplace and statutory records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of honeybee brood manipulation
- biosecurity and quarantine requirements when manipulating bees
- bee behaviour and handling techniques
- different types of manipulation that may be used to achieve desired results, including:
 - hive expansion

- splitting and nucleus development (nucs)
- pests and disease inspection and control
- increasing honey production
- swarm control
- re-queening and queen rearing
- seasonal preparations
- frame rotation
- tools and equipment and their safe use for opening hives and manipulating brood
- types of hive waste and processes for disposal
- workplace and statutory records and reporting.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
- resources, equipment and materials:
 - hives with live bees with brood comb
 - specific hive tools
 - personal protective equipment
- specifications:
 - workplace procedures and instructions for manipulating brood
 - access to beekeeping legislation and biosecurity code of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK303 Re-queen a honey bee colony

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated that they have re-queened a honey bee colony for at least one hive including:

- monitored colony performance, assessed the queen against specifications and determined the need and method for re-queening
- identified hazards and risks and implement control measures for re-queening operations
- selected, fitted and used suitable personal protective equipment
- selected and ensured serviceability of tools and equipment required for re-queening operations
- obtained, assessed the condition and stored the new queen according to workplace and biosecurity requirements
- monitored conditions to ensure optimum time for re-queening operations
- assessed the health and condition of the parent colony
- conducted hive operations to locate old queen and replace with new queen according to selected method
- monitored hives for colony acceptance of new queen and queen brood development performance
- updated and maintained apiary records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of re-queening honey bee hives
- common manipulations, methods and techniques used to re-queen colonies

- tools and equipment required for hive operations and re-queening, including:
 - maintenance
 - safe operation
 - hygiene and biosecurity
- natural processes for queen replacement and their signs, including:
 - supersedure
 - swarming
 - emergency queen replacement
- hive monitoring techniques and assessing the performance of queen bee in the colony, including:
 - behaviour
 - colony traits
 - brood and egg laying
 - honey bee brood production
- selection criteria for queen bees
- assessing the health of queen bees
- handling queen bees, including:
 - transport and storage requirements
 - handling cages
 - handling live queen bee
 - identifying, removing and destroying old queen
 - introducing new queen
- sources of queen bees their advantages and disadvantages, including:
 - commercial suppliers
 - apiary breeding stock
 - supersedure
- health and safety hazards and risks when handling bees and personal protection equipment
- biosecurity considerations when selecting queen bees and suppliers
- workplace and statutory records and reporting procedures for re-queening operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
- resources, equipment and materials:
 - live bees
 - live queen bee as supplied by commercial supplier or own apiary breeding program
 - tools for hive and queen bee manipulation
 - personal protective equipment

- specifications:
 - workplace procedures related to re-queening a bee colony
 - workplace queen bee specifications
 - access to biosecurity code of practice
- timeframes:
 - within a specific time period according to queen bee replacement method.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK304 Remove a honey crop from a hive

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to separate bees from ripe honey comb and remove the full comb from the hive for transport to the extracting facility.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Harvesting honey is subject to state and territory food safety legislation and regulations.

Assessment Requirements for AHCBEK304 Remove a honey crop from a hive

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated that they have removed a ripe honey crop from a hive including:

- selected and ensured serviceability of tools and equipment for harvesting a honey crop
- identified work safety hazards and risks and implemented control measures when working around bees
- selected and used appropriate personal protective equipment (PPE)
- performed honey harvest activities according to food safety, quarantine and biosecurity procedures
- determined the ripeness and volume of honey comb and its readiness for harvest
- checked treatment records and ensured honey is harvested according to treatment withholding periods
- determined the factors affecting quality and quantity of honey and planned the time and location to harvest
- handled comb filled with honey to prevent contamination and maintain quality
- selected and used appropriate method to remove ripe honey comb from hives and loaded and secured for transport
- used safe handling and loading techniques
- transported and stored ripe honey comb in a pest and bee secure environment protected from damage and contamination
- updated and maintained apiary records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of removing honey filled frames from hives
- impact on colony, type of honey and apiary site on the quality of honey, planning and timing of removal
- methods of removing bees from ripe honey comb and supers, including:
 - fume boards
 - brushing
 - blowers
 - escape boards
- food safety and handling requirements of honey comb
- indicators of ripe honey and adequately filled comb
- honey quality and factors that impact on quality
- calculations for estimating volume of harvest
- hive medications and treatments and their effect on honey harvesting and withholding periods
- tools and equipment required for honey harvest operations, including:
 - maintenance
 - safe operation
 - hygiene and biosecurity
- potential contaminants of ripe honey and the effect on honey quality
- loading, securing, protecting, transporting and storing ripe honey comb to minimise contamination, and comply with biosecurity requirements
- biosecurity standards and practices, barrier system and traceability of hive components when harvesting ripe honey
- hazards and risks when harvesting honey and control measures to apply including PPE
- planning a harvest and factors and conditions that impact on timing and location
- records and record keeping systems when harvesting honey crop.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - bee hives with ripe honey
 - live bees
 - PPE
 - equipment, resources and tools used for removing bees from ripe honey comb
- specifications:

- workplace procedures for honey removal
- safety data sheets for fume boards used
- access to specific food safety regulations, biosecurity code of practice and transport regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK307 Collect and store propolis

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to collect propolis from bee hives and store propolis according to food safety standards.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work in the specialist production of propolis according to food safety and quality assurance requirements. They use discretion and judgement in the selection, allocation and use of available resources to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to collect propolis	1.1 Identify and prepare hives suitable for propolis collection 1.2 Clean and sanitise equipment to be used 1.3 Identify health and safety in the workplace hazards and take action to minimise risks 1.4 Select, check, fit and use personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Determine and implement propolis production strategy 1.6 Stimulate propolis production by manipulating hive conditions
2. Collect and store propolis	2.1 Remove propolis from hive with minimum colony disturbance and care according to production strategy 2.2 Comply with quality assurance and food safety requirements throughout propolis production process 2.3 Observe personal hygiene requirements according to food health and safety standards and workplace procedures 2.4 Extract propolis according to production strategy and workplace procedures 2.5 Store extracted propolis according to food safety standards, quality and workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret product labels, safety data sheets, instructions, procedures and specifications

Assessment Requirements for AHCBEK307 Collect and store propolis

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have collected and stored propolis including:

- assessed safety hazards, risks and applied appropriate controls
- selected, fitted and used personal protective equipment (PPE) while handling and working safely around bees
- identified and prepared hives suitable for producing propolis
- determined a propolis production strategy and manipulated hive to stimulate propolis production
- applied quality assurance and food safety and quality procedures
- cleaned and sanitised tools and removed propolis from the hive
- remove propolis ensuring minimal colony disturbance
- used appropriate propolis extraction and storage methods.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- honey bees and their behaviours for propolis and its production including types of flora
- recognition of propolis and distinguishing features from other substances collected by honey bees
- propolis production and collection strategies and hive manipulations to increase propolis production
- suitable extraction methods, conditions and constraints when collecting propolis
- methods, procedures and conditions for storing propolis
- food safety requirements when collecting propolis and working with hives
- honey industry quality assurance and biosecurity requirements specific to propolis production.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live honey bees
 - tools for manipulating a hive and collecting propolis
 - cleaning products that comply with food safety standards
 - PPE
- specifications:
 - workplace procedures for propolis production
 - safety data sheets for cleaning products.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK308 Produce and harvest royal jelly

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to manipulate a honey bee hive to encourage the production, collection and storage of royal jelly.

The unit applies to beekeepers who work under broad direction to analyse information and complete a range of specialised beekeeping activities and who demonstrate a thorough understanding of the development of queens in hives and the production of royal jelly. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

State and Territory food safety legislation, regulations and standards apply to royal jelly that is used in food for human consumption.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to produce and harvest royal jelly	1.1 Assess health and safety in the workplace hazards and risks associated with working with bees and apply appropriate control measures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Select, ensure serviceability, fit and use personal protective equipment 1.3 Assess hive for suitability for production of royal jelly 1.4 Prepare hive and introduce artificial queen bee cells 1.5 Graft bee larvae according to workplace procedures 1.6 Stimulate the colony into producing royal jelly 1.7 Ensure production equipment is clean and sanitised according to hygiene procedures
2. Collect and store royal jelly	2.1 Adhere to hygiene requirements according to food safety and workplace procedures 2.2 Ensure royal jelly collection and storage equipment is clean and sanitised according to hygiene procedures 2.3 Remove and discard larvae from queen cells ensuring no contamination of jelly 2.4 Harvest royal jelly from each cell according to workplace procedures 2.5 Prepare the royal jelly for storage according to workplace procedures 2.6 Place royal jelly into hygienic containers ensuring minimum exposure to contamination and refrigerate according to food safety procedures
3. Finalise tasks	3.1 Check, clean and store equipment according to workplace procedures and hygiene procedures 3.2 Update and maintain records according to workplace procedures and quality assurance procedures

Foundation Skills

Assessment Requirements for AHCBEK308 Produce and harvest royal jelly

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated that they have manipulated a hive to produce and harvest royal jelly including:

- assessed safety hazards, risks and applied appropriate controls
- selected, fitted and used appropriate personal protective equipment (PPE)
- assessed the suitability of hives for the production of royal jelly
- introduced queen cells, grafted larvae and stimulated the colony for royal jelly production
- handled bees and hive components while preparing the hive
- prepared and sanitised equipment ready for royal jelly harvest
- maintained a hygienic environment according to food safety requirements
- removed and discarded larvae according to workplace procedures
- collected and stored royal jelly according to workplace and food safety procedures
- checked, cleaned and stored production equipment used in royal jelly harvesting
- maintained records of royal jelly production for food safety and quality assurance requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of royal jelly production in honey bee hives including biological processes and role of nurse bees
- queen bee cells and their development, larvae grafting techniques and methods of stimulating royal jelly production
- safety and safe practices when handling bees
- cleaning and sanitation methods and procedures for royal jelly production tools and equipment

- food safety requirements for collecting and storage of royal jelly
- quality assurance and record keeping requirements
- procedures and practices for removing and discarding larvae
- identification, use, maintenance and storage of tools and equipment required for production, harvesting, preparation and storage of royal jelly.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in hives suitable for royal jelly production or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live bees
 - tools and equipment required to prepare hives and harvest royal jelly
 - PPE
 - consumables and equipment required to store and preserve royal jelly
- specifications:
 - workplace procedures and specifications for royal jelly production
 - access to food safety and beekeeping legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK309 Trap and store pollen

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to obtain and install a suitable pollen trapping mechanism to collect and store pollen according to its intended use.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work in the collection of pollen according to food safety and quality assurance requirements. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

State and territory food safety legislation, regulations and standards apply to pollen that is used in food for human consumption.

Assessment Requirements for AHCBEK309 Trap and store pollen

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have trapped and stored pollen including:

- identified flora and assessed suitability of colonies for pollen collection
- selected a pollen trap and used according to manufacturer instructions
- assessed health and safety and food handling hazards and risks, and applied controls
- fitted and used appropriate personal protective equipment (PPE)
- collected, stored and processed pollen according to food safety and handling and workplace procedures
- assessed colony health, pests and contamination and rectified according to hive management procedures
- maintained records according to workplace procedures
- handled bees safely
- cleaned and sanitised equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of trapping and storing pollen
- pollen traps, their construction and operation
- colony pollen requirements and impact of harvesting on colony development including signs and symptoms of colony decline
- bee and hive handling techniques for collecting pollen
- flora resources and impact on pollen productivity
- quality assurance requirements for pollen collection including food safety and handling
- health and safety in the workplace and equipment requirements when working with hives
- commercial processing practices for pollen including, cleaning and treatments to prevent deterioration
- storage techniques for pollen for pre and post processing

- pests and contamination of pollen and corrective actions
- record keeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary
- resources, equipment and materials:
 - live bees
 - tools and equipment to trap and store pollen, including pollen traps
 - PPE
 - cleaning and sanitising products
- specifications:
 - workplace procedures and specifications for pollen capture and storage
 - manufacturer's instructions for construction/operation of pollen traps
 - safety data sheets for cleaning and sanitising products
 - access to food safety and beekeeping legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK310 Process raw wax into moulds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has processed raw wax into moulds, on at least one occasion including:

- received and stored wax, ensuring no cross contamination with operational hive components
- prepared the raw wax for loading into processing equipment
- identified hazards and risks and implemented controls, including fitting and use of personal protective equipment (PPE) and safe work practices
- selected tools, equipment and moulds required for the wax processing
- ensured wax processing equipment is clean and ready for service, conducted pre start checks and identified, rectified or reported faults
- loaded raw wax into processing equipment, started equipment and monitored temperature, time and equipment operation during processing
- separated residual honey and slum gum from wax and transferred molten wax to moulds
- stored or disposed of residual honey and slum gum according to workplace, biosecurity and food safety and handling procedures
- removed wax from moulds, labelled and placed into storage according to workplace procedures
- shut down and cleaned processing equipment according to operating instructions
- cleaned work area and disposed of all waste material according to workplace waste management procedures and environmental procedures
- updated records and reports according to workplace, biosecurity and legislative requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of processing honey bee wax
- sources of raw wax used for processing and its preparation, including:
 - cappings from honey extraction
 - bur comb
 - damaged or rotated brood and honey comb
 - slum gum
- bees wax properties and impact on processing
- types and uses of residual materials in unprocessed and processed bees wax, including:
 - burned or cooked honey
 - slum gum
- wax processing equipment, their maintenance and operation, including:
 - types of wax processing equipment and their operation, solar, hot water, steam, direct heat
 - signs of faults in equipment operation and reporting procedures
 - repairs and maintenance requirements
 - cleaning procedures
- wax processing temperatures and timing
- types of moulds
- hygiene and biosecurity requirements and procedures for processing wax
- cleaning procedures and disposal of waste
- storage requirements for unprocessed and processed bees wax
- health and safety, hazards and risks and their controls when using wax processing equipment, including:
 - working with hot materials and equipment
 - PPE
 - manual handling
 - processing equipment safety
 - safe use of tools and equipment
- stock control records, labelling and mandatory records and reporting requirements for processing wax.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a wax processing plant or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - raw bees wax
 - tools for processing wax
 - PPE

- specifications:
 - workplace procedures and specifications for processing raw wax
 - manufacturer's operating instructions for wax processing equipment
 - access to specific biosecurity codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK311 Transport bee hives by road to new apiary site

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare, load and transport live bee colonies (hives) by road transport between apiary sites.

The unit applies to beekeepers who operate apiaries under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership.

The transport, siting and cross border movement of livestock including bee hives and must comply with state and territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

No vehicle licensing is required for individuals undertaking the work described in this unit. Where an individual is the nominated transport vehicle owner or driver, state and territory legislation, regulations, licencing and registration apply.

Assessment Requirements for AHCBEK311 Transport bee hives by road to new apiary site

Modification History

Release	Comments
Release 1	This version released with Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated that they have transported hives by road to an apiary site, including:

- prepared a hive transport plan, determined hazards to bees and people and prepared a hive management strategy for transporting bees to a new apiary site
- assessed suitability and condition of hives for road transport and secured hives and components ready for transport
- selected equipment and resources required for transit of bee hives and prepared vehicle according to workplace procedures and biosecurity requirements
- loaded and secured hives according to workplace procedures and transport regulations
- transported hives according to public safety and traffic regulations
- monitored load security and bee health during transport
- removed bee hives safely according to workplace procedures and positioned and reinstated hives according to apiary site plan
- completed documentation and permits and complied with biosecurity and regulatory requirements
- updated records, assessed, reviewed and reported on the transport plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic map reading and navigation skills to determine route parameters and transport plan, including:
 - road conditions
 - route efficiencies
 - journey duration and estimated time of arrival

- access to transport vehicle services e.g. fuel, water, air
- critical factors that affect hive health during transit, including:
 - weather and other environmental factors
 - travel time
 - road conditions
 - vibration
 - distance from previous apiary
- vehicle preparation for bee safety and vehicle operation, including:
 - tyre pressure for bee health, terrain and road conditions
 - exhaust fumes
 - pre-start checks
- transport methods for hives, including:
 - open hives
 - closed hives
 - covers and netting
 - barrier system
- transporting bee colonies and effect on health and biosecurity, including:
 - ventilation
 - water
 - loose frames
 - recognising bee disorders and distress during transport and remedial actions required
- techniques and equipment for securing hives for transport, including:
 - moving and handling hives for transport vehicle and safety
 - hive orientation on transport vehicle and impact on hive management
 - securing load techniques, load restraint procedures and transport regulations
 - vehicle load limits
 - unloading procedures
- managing live bee loads during stops, including:
 - fuel stops
 - mandatory rest periods
 - checking load movement and stability
- other road users safety when transporting live bees, including:
 - night road workers and work lights
 - police and road transport authority checks
 - weigh bridges
 - accidents and emergencies
 - emergency services
 - quarantine checkpoints
 - ferry crossings
 - urban areas

- general public approaching the transporting vehicle
- strategies to mitigate safety concerns for other road users, including:
 - signage and placarding
 - accident emergency procedures
 - communication and notification procedures
- hive manipulations to prepare for transport and restore hives to operational conditions after arrival
- assessing and reviewing transport plan and hive management strategies
- permits and regulations for transporting live bees, including:
 - biosecurity requirements
 - health certification
- record keeping and reporting procedures for bee transport
- health and safety procedures and requirements for transporting and handling hives.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary with hives to be transported or an environment that accurately represents workplace conditions
 - an apiary site prepared and ready to receive hives
- resources, equipment and materials:
 - health and safety equipment for transporting and handling bees
 - hives with live bees
 - hive tools and equipment used for transporting hives
 - vehicle for loading and transporting bee hives
 - loading and unloading tools and equipment
 - resources to secure bee hive loads to vehicles
- specifications:
 - work procedures for transporting bee hives, including safe work practices, bee handling and management, environmental requirements
 - information on equipment and vehicle carrying capacity and operating parameters
 - specifications, control points and parameters for handling and assessing bee health
 - documentation and recording requirements and procedures
 - access to biosecurity codes of practice, quarantine and transport regulations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK312 Extract honey

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare comb and safely operate equipment used to extract honey fit for human consumption. The work may be carried out on hive, in a mobile processing facility or a purpose built fixed facility.

The unit applies to beekeepers who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and to solve problems.

Honey extraction for human consumption is subject to state and territory food safety legislation and regulations.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to extract honey	1.1 Identify and select appropriate extraction method and equipment for type of honey production used 1.2 Identify health and safety in the workplace hazards and take action to minimise risks to self and others 1.3 Select, ensure serviceability, fit and use personal protective

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>equipment</p> <p>1.4 Ensure extraction equipment and storage containers are clean, dry, sanitised and serviceable according to workplace procedures, sanitiser product labels and safety data sheets</p> <p>1.5 Undertake personal hygiene requirements according to workplace and food safety procedures</p>
2. Prepare unprocessed honey comb	<p>2.1 Identify, select and reserve frames or sections for unprocessed honey comb according to workplace product and customer requirements</p> <p>2.2 Separate and clean sections or divide comb according to workplace product requirements</p> <p>2.3 Package, label and store raw honeycomb according to workplace quality assurance, food safety, handling and packaging requirements</p>
3.Extract honey	<p>3.1 Identify and comply with quality assurance and food safety and handling requirements throughout the process of extracting honey</p> <p>3.2 Inspect comb visually for areas of brood and prepare comb to avoid damage to brood</p> <p>3.3 Prepare comb to assist the extraction process according to workplace procedures</p> <p>3.4 Expose the honey by decapping or breaking comb avoiding unnecessary damage to cells, frames and hive components according to extraction method selected</p> <p>3.5 Operate the extraction equipment to remove honey from comb according to equipment operation instructions and safety procedures</p>
4. Handle extracted frames and supers	<p>4.1 Remove frames from extractor and return to supers according to extraction method, workplace and biosecurity procedures</p> <p>4.2 Store extracted supers in suitable bee and pest proof facility awaiting return to apiary according to workplace pest management and biosecurity procedures</p> <p>4.3 Return frames to apiary according to workplace barrier system and biosecurity procedures</p> <p>4.4 Reserve frames due for rotation or damaged and store for</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	wax extraction or repair according to workplace, quarantine and biosecurity procedures
5.Handle extracted honey	5.1 Ensure extracted honey meets temperature specifications to assist removal of wax, air, pollen and detritus 5.2 Test moisture content of honey and take action to maintain appropriate moisture according to workplace procedures 5.3 Monitor conditions of honey fermentation and implement procedures to reduce risk
6.Store honey	6.1 Store cleaned honey in containers to meet quality assurance standards, food health regulations and customer requirements 6.2 Obtain a reference sample of honey, label and store according to workplace procedures 6.3 Clean, dry and sanitise all equipment and work area according to workplace procedures.
7. Collect and store cappings and raw comb for future wax processing	7.1 Identify comb suitable for future wax processing 7.2 Extract residual honey from cappings and raw comb according to workplace procedures 7.3 Consolidate wax cappings and raw comb and store according to workplace, quarantine and biosecurity procedures
8. Maintain records of honey production	8.1 Update records for honey production according to workplace procedures and legislative requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret product labels, safety data sheets, instructions, procedures and specifications to determine activities in honey extraction processes
Writing	<ul style="list-style-type: none"> Complete workplace documentation using appropriate terminology and in required format

Skill	Description
Numeracy	<ul style="list-style-type: none"> Interprets numerical information related to testing of moisture levels in honey samples
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for following policies, procedures and regulatory requirements for extracting honey, maintaining food safety standards and quality assurance
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks for operation of extraction equipment and collection and storage of extracted honey

Assessment Requirements for AHCBEK312 Extract honey

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have extracted honey from mature honey comb, including:

- identified and selected appropriate extraction method for honey production process
- identified hazards and risks and implemented control measures and used equipment safely
- selected, fitted and used appropriate personal protective equipment (PPE) and complied with workplace personal hygiene practices
- identified, selected and prepared tools and equipment required for extraction process and ensured appropriate food hygiene procedures were performed on them
- identified, selected, prepared and stored unprocessed comb according to workplace product requirements
- identified and complied with quality assurance and food safety and handling requirements while extracting honey
- safely extracted honey using extraction equipment in compliance with quality assurance and food safety requirements
- prepared the comb for extraction avoiding brood comb according to the extraction method and equipment being used
- organised frames from the extraction process stored, returned to apiary or retained for repair or future wax processing in compliance with pest management, biosecurity and barrier system requirements
- ensured extracted honey was maintained at specified temperature to assist removal of wax, air, pollen and detritus
- tested moisture content of honey and took action to maintain appropriate condition
- monitored conditions conducive to honey fermentation and implemented procedures to reduce risk
- stored honey in containers and obtained a reference sample following to meet quality assurance standards, food health regulations and customer requirements
- identified comb suitable for wax processing, collected, removed residual honey and stored wax cappings following workplace, quarantine and biosecurity procedures
- cleaned and sanitised honey extraction equipment
- maintained appropriate records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of honey extraction
- recognition of different types of bee comb and maturity, including:
 - brood worker and drones
 - queen cells
 - mature and immature honey comb
 - pollen cells
- biosecurity protocols for honey extraction and transport of supers and hive components to extraction site
- processing of raw honey comb, including:
 - sections
 - cutting/slicing comb from frames
- honey extraction processes, including:
 - pressing
 - centrifugal/spinning
 - gravity draining or drip method
- equipment commonly used to extract honey and the safe operation and maintenance requirements
- hygiene and sanitation procedures and materials used for tools, equipment and storage of extracted honey
- storage requirements of honey, honey comb, extracted frames and supers including bulk storage and pest management
- food safety systems and requirements relevant to honey extraction
- quality assurance tests and standards for extracted honey
- temperature and the effect of heat on the extraction processes and quality of honey
- health and safety in the workplace issues associated with extraction and extraction technologies
- record keeping systems and labelling for extracted honey
- preparation and storage procedures for comb at time of extraction for later wax processing.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - either a portable honey extraction unit or a permanent extraction facility
- resources, equipment and materials:
 - mature honey comb ready for extraction

- specific tools and equipment for the type of extraction method employed
- PPE
- sanitising chemicals and equipment
- specifications:
 - workplace procedures related to honey extraction
 - manufacturer's operating instructions for honey extraction equipment
 - safety data sheets for chemical sanitisers
 - access to specific legislation/codes of practice related to honey extraction and food safety.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCBEK313 Manage pests and disease within a honey bee colony

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that on at least one occasion the individual has demonstrated an ability to manage pests and diseases that affect brood and adult bees including:

- selected and ensured serviceability of tools and equipment for opening and checking hives
- identified health and safety in the workplace hazards and risks and implemented control measures when working around bees
- selected, fitted and used appropriate personal protective equipment (PPE)
- conducted inspections to hive to assess general health and condition of brood and adult honey bees and identified signs and symptoms of disease and pests that affect brood or adult honey bees
- collected samples and conducted field diagnosis following workplace procedures and industry standards
- labelled and secured samples for dispatch to specialist and confirmed diagnosis and reported notifiable diseases
- identified and implemented appropriate treatments and biosecurity measures to control pests and diseases
- monitored, reviewed and recorded outcomes of treatments for future beekeeping operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of disease management within a honey bee colony
- pests and diseases of bees including common and notifiable species, including:
 - mechanism for infection/infestation
 - level of risk to bees and beekeeping industry

- biological processes relevant to infection and control
- hive inspection procedures and recording pests and disease observations
- identification of pests diseases, including:
 - signs and symptoms
 - field diagnosis techniques
 - collecting, labelling and sending samples for specialist diagnosis
 - immune detection kits
- types of samples and procedures, including:
 - adults
 - brood
 - honey
 - comb
- legislative and biosecurity standards for pests and diseases control and notification for Australian apiaries including procedures for reporting
- tools, equipment, materials and safe handling procedures when manipulating hive components and taking samples
- hazards and risks when working with bees and collecting pests and disease samples
- hygiene and sanitation practices for tools and equipment
- biosecurity procedures for pests and diseases of honey bees, including:
 - barrier systems
 - isolation
 - quarantine
 - frame rotation
- treatment of contaminated hive components, including:
 - burning and burial
 - sterilisation and irradiation
 - dipping treatments (e.g. hot wax or caustic dips)
 - scorching
- hive health, pests and disease control
- treatments for specific pest and diseases, including:
 - chemicals, types and application methods
 - antibiotics and prescription treatments
 - environmental treatments
- procedures for monitoring and reviewing treatments
- record keeping for pests and diseases including mandatory and workplace documents.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active aviary or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - live bees
 - hive management tools
 - treatments appropriate to pests or diseases
 - equipment and materials required for field diagnosis activities
 - PPE
 - inert samples or representations of bee pests and diseases
- specifications:
 - workplace procedures for managing pests and diseases within a honey bee colony
 - safety data sheets for pest and disease treatments
 - access to specific legislation and codes of practice relevant to biosecurity and mandatory reporting
- relationships:
 - specialists in honey bee pest and disease diagnosis.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK402 Perform queen bee artificial insemination

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to determine suitable method for artificial breeding objectives and develop a program to collect semen from drone honey bees and artificially inseminate a queen bee.

The unit applies to advanced beekeepers who analyse information and exercise judgement to complete specialised bee breeding activities. They work autonomously and have accountability for the work of others. They research, analyse, design and communicate solutions to a range of complex problems.

State and territory legislation, regulations and local government by-laws apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice.

Pre-requisite Unit

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated artificial insemination on at least one occasion including:

- reviewed options and developed artificial breeding objectives
- selected and scheduled an artificial breeding option for breeding program
- obtained resources and determined artificial insemination activities
- identified hazards and risks and implemented control measures
- selected, fitted and used appropriate personal protective equipment (PPE)
- obtained and ensured genetic material complied with breeding characteristics and objectives
- received, checked and stored genetic materials to ensure maximum viability
- ensured queen and drone maturity and breeding cycles aligned
- prepared queen and drone honey bees for artificial insemination
- used appropriate techniques to extract semen from drones and inseminate queens
- complied with required hygiene practices
- introduced inseminated queen bees to new hive and monitored progress and success
- reviewed and documented genetic material transfer and management practices
- determined the success of artificial insemination program by calculating success rates
- maintained records in relation to an artificial insemination program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of artificial insemination of queen honey bees

- anatomy and physiology of reproductive organs and reproductive process in queen and drone honey bees
- genetics and inheritance for bee characteristics required in genetic material, including:
 - honey bee health
 - abnormalities
 - productivity
 - habit
- artificial breeding methods and the benefits and limitations
- identification systems for queen and drone honey bees and semen
- physical resource requirements for artificial insemination practices
- safe handling and transportation of bees and genetic material
- artificial insemination policies and recording and reporting requirements
- preparation requirements for artificial insemination
- semen collection and preparation processes
- reviewing and maintaining effective insemination procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a laboratory or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live queen bees and donor drones
 - tools and equipment for collecting sperm and inseminating queens
 - PPE for hygiene and safety
- specifications:
 - workplace procedures for laboratory operations
 - workplace specifications for bee breeding.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK405 Select and establish an apiary site

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to evaluate and analyse potential honey production sites and select, establish and evaluate an apiary site.

The unit applies to experienced beekeepers with thorough understanding in honey production who analyse nectar flow and likely honey production to complete a range of specialist apiary site selection and establishment activities. They work autonomously and have accountability for the work of others. They research, analyse, design and communicate solutions to a range of complex problems.

All work must be carried out to comply with workplace procedures, state/territory legislation, regulations and local government by-laws which may apply in some jurisdictions to beehive ownership and compliance with biosecurity codes of practice. The transport, siting and cross border movement of livestock including bee hives must comply with state/territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to select and establish an apiary site	1.1 Establish and prioritise criteria for selecting a site 1.2 Identify suitable locality in which to search for site 1.3 Identify appropriate certificates and permits required for moving and establishing an apiary site 1.4 Gather and analyse information for potential sites in selected locality
2. Select the apiary site	2.1 Analyse data collected and select suitable site according to criteria 2.2 Determine capacity of available flora to support desired number of hives 2.3 Prepare a plan to establish an apiary at the selected site 2.4 Select precise areas to establish an apiary within the site 2.5 Ensure appropriate permissions and certificates are obtained prior to locating apiary
3. Establish the apiary at the selected site	3.1 Identify health and safety, biosecurity and food safety hazards and risks and implement controls for establishing suitable apiary sites 3.2 Select, fit and use personal protective equipment 3.3 Select tools and equipment required and ensure serviceability 3.4 Transport hives to apiary site according to workplace procedures, legislative requirements and biosecurity procedures 3.5 Locate hives on site according to site establishment plan and safe handling procedures 3.6 Observe and record access of bees to floral sources and water and effect on colony strength and production 3.7 Monitor the suitability of the site and reposition hives according to honey production and bee activity 3.8 Record results of inspections and any remedial action according to biosecurity and production procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret symbols and other technical information on maps and other documentation that impact on apiary site selection
Writing	<ul style="list-style-type: none"> Document outcomes of site performance and activities using industry terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to analyse potential honey production and costs for selected site
Navigate the world of work	<ul style="list-style-type: none"> Accept responsibility and ownership for selecting a site and make decisions on suitability and coordination of resources Follow explicit and implicit policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Select and use appropriate conventions and protocols when communicating with persons when seeking permission for site
Get the work done	<ul style="list-style-type: none"> Make routine decisions and implement standard procedures for site selection tasks and resources

Assessment Requirements for AHCBEK405 Select and establish an apiary site

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated site selection and establishment of an apiary site including:

- established and prioritised selection criteria for apiary site
- identified suitable localities and appropriate permits and certificates required
- analysed site options and selected site according to selection criteria
- determined apiary capacity, orientation and layout, and prepared an establishment plan
- selected actual site and ensured appropriate permissions and certificates were obtained
- identified health and safety, food safety and biosecurity hazards and risks and implemented control measures
- selected serviceable tools and equipment required for site establishment
- transported hives to site safely, and located hives according to establishment plan and legislative and biosecurity requirements
- observed, monitored and recorded apiary performance and implemented corrective action according to apiary plan
- maintained apiary records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of apiary site selection
- sources of information for selecting potential sites
- site selection criteria for strategic and regulatory purposes, including:
 - legislation, regulations and biosecurity codes of practice relevant to the establishment of apiary sites

- relevant planning and land use regulations and permissions
- proximity to flora, water, general public, animals, gates, stockyards and movement of the sun
- accessibility of the site for beekeeper and security
- nearby land use
- protection from extreme environmental conditions
- fire risk
- site selection criteria for different bee management purposes, including:
 - honey
 - pollen
 - propolis
 - royal jelly
 - queen rearing
 - pollination services
 - over wintering
- nutritional and other requirements of a bee colony
- hazards, risks and controls associated with establishing apiaries, including:
 - personal protective equipment
 - safe handling procedures
 - barriers and distances from sensitive areas and public space
 - hive densities
 - elevated hives
- tools and equipment and their safe use for handling bees and hives when establishing an apiary site
- types of flora for the production of pollen and nectar flow
- apiary records and recording systems
- bee keeping legislation and biosecurity codes of practice for apiary sites, including:
 - weeds
 - diseases
 - pests
 - genetically modified organisms
 - certified organic produce.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an active apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live bees in hives

- tools and equipment for working with and re-locating hives
- personal protective equipment
- maps showing site access and available resources
- specifications:
 - workplace procedures related to selecting and establishing an apiary site
 - workplace specifications for apiary site layout and orientation
 - access to legislation, permit requirements and biosecurity codes of practice related to establishing an apiary site.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK408 Provide bee pollination services

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to negotiate with clients and to determine pollination requirements and costs for bee pollination services.

This unit applies to experienced beekeepers who analyse information and exercise judgement to complete specialised pollination services activities. They work autonomously, have accountability for the work of others. They analyse, design and communicate solutions to a range of complex problems.

The transport, siting and cross border movement of livestock including bee hives must comply with state/territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

Pre-requisite Unit

Nil

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess pollination service requirement	1.1 Discuss and confirm the pollination services required with client 1.2 Determine number, location and types of colonies required for crop 1.3 Confirm state, territory and local government legislative and regulatory and requirements, including biosecurity affecting

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>pollination services</p> <p>1.4 Assess strength, condition and health of bee colonies for their suitability for use as crop pollinators</p> <p>1.5 Assess risk of pollination problems with client and establish process to monitor risk</p> <p>1.6 Provide technical information to client to support bee performance and maintain health</p> <p>1.7 Obtain appropriate certificates and permits where bees are to be moved across state borders</p>
2. Price and formalise agreement for pollination services	<p>2.1 Identify resources and calculate costs in providing pollination services</p> <p>2.2 Confirm with client the price for pollination services</p> <p>2.3 Document, confirm and exercise an agreement with client to provide pollination service</p>
3. Prepare apiary sites and deliver hives to client	<p>3.1 Prepare sites for hives according to workplace procedures and client requirements</p> <p>3.2 Deliver hives to site and set up apiary according to client and workplace procedures, legislative requirements and biosecurity code of practice</p> <p>3.3 Demonstrate strength and condition of hives to client to confirm agreed service has been provided</p>
4. Monitor pollination performance of bee colonies	<p>4.1 Liaise with client on spraying programmes to minimise damage to bees</p> <p>4.2 Monitor crop within appropriate timeframe for evidence of bee foraging and pollination efficiency</p> <p>4.3 Carry out bee husbandry practices to ensure apiary performance</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> • Draft and finalise written pollination service agreements for clients • Accurately complete applications for permits and certificates according to legislatives and regulatory requirements
Numeracy	<ul style="list-style-type: none"> • Perform calculations to analyse bee and pollination data, including quantity of hives required, costs and the performance of pollination services
Oral Communication	<ul style="list-style-type: none"> • Determine and confirm client requirements using active listening and questioning and observation of verbal and non-verbal signals to convey and clarify information and to confirm pollination services required
Get the work done	<ul style="list-style-type: none"> • Plan and monitor progress of services and reviews and implements change to meet client and service requirements

Assessment Requirements for AHCBEK408 Provide bee pollination services

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have provided bee pollination services, including:

- discussed and confirmed pollination service requirements with a client
- assessed number, types and hive condition required for pollination outcomes
- assessed the risks of pollination services and provided technical advice to client
- identified resources and calculated costs associated with providing the pollination service and confirmed with client
- prepared and implemented an agreement after confirmation with client
- identified suitable locations within crop or site for hive placement and established, delivered and managed an apiary for pollination services
- liaised with the client to protect apiary from chemical use
- monitored and managed hive activity according to industry practice and agreed service outcomes
- obtained requisite certificates and permits and complied with relevant legislation, regulations and biosecurity codes of practice.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of pollination services
- crop chemicals and alternatives when managing hives
- environmental and climatic factors affecting bee foraging behaviour and pollination
- health and performance of bee colonies, including:
 - pests and diseases
 - swarm management
- hive management strategies, including effects of:

- weather
- nutrition
- water requirements
- basic negotiation skills and essential elements of valid agreements and service contracts
- pollination requirements of major crops targeted, including:
 - hive numbers, strength and densities
 - locality conditions of operation
 - competing crops and plants
 - timing to maximise crop pollination
- measuring and assessing pollination performance and success and readiness to remove
- site selection and impact of location on colonies to maximise pollination
- calculations and pricing techniques for service industry
- legislation, regulations and biosecurity requirements affecting pollination services.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - an apiary or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live bees in hives
 - tools and equipment required to locate and manage hives
 - access to crop requiring pollination
- specifications:
 - client specifications for pollination service
 - access to legislation/codes of practice related to pollination services
- relationships:
 - client with pollination requirement.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBEK409 Rear queen bees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to rear queen bees and queen cells through the manipulation of hives.

The unit applies to experienced beekeepers who exercise judgement to complete a range of specialist activities requiring a thorough understanding in honey production. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

All work must be carried out to comply with workplace procedures, state and territory legislation, regulations and local government by laws that apply to the ownership and registration of bee hives and compliance with industry biosecurity codes of practice. The transport and cross border movement of livestock including queen bees must comply with state and territory transport, quarantine and biosecurity legislation, regulations and codes of practice.

Pre-requisite Unit

Assessment Requirements for AHCBEK409 Rear queen bees

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have reared queen bees including:

- obtained queen bee breeding stock according to breeding program
- assessed safety hazards, risks and implemented controls
- obtained tools, equipment and personal protective equipment (PPE) required for breeding manipulations and ensured serviceable for use
- conducted all bee manipulations and activity according to biosecurity and quarantine protocols
- ensured hives used for queen rearing are clean and healthy
- prepared queen using desired method and assessed, selected and grafted larvae into queen cells according to workplace procedures
- assessed and maintained nurse bee population to support developing queens
- monitored and maintained hive nutrition and health
- transferred ripe queen cells into nucleus
- monitored the queen mating process and provided drones according to workplace procedures
- maintained records according to workplace and industry procedures
- selected queen bee cage type and packaging requirements and ensured adequate food and escort bees for transport
- prepared package for transport according to workplace procedures and transport company requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of rearing queen bees
- basic genetics, breeding and evaluation for selecting queen bee stock

- techniques and timing for queen cell production including queenright and queen less starter and finishers
- grafting techniques including the use of kits
- making, placement and use of nucleus hives (nucs) for queen rearing
- capturing and handling techniques for queen bees
- holding and securing queen bees, including:
 - queen cages
 - queen banks
- transport, postage and handling queen bees
- labelling and identifying queens including international colour codes
- monitoring and recognising brood and adult bee health, diseases, pests and other disorders and required action
- optimum conditions and timing for queen rearing activities
- required number of mature, healthy and genetically suitable drones
- standards and protocols for selecting and manipulating bees and larvae for queen bee production.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an active apiary
- resources, equipment and materials:
 - live bees and queen bee stock
 - hive manipulation and larvae grafting tools
 - PPE
- specifications:
 - workplace procedures and specifications for rearing queen bees
 - access to legislation and codes of practice for biosecurity and queen bee breeding.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCBUS301 Use hand held e-business tools

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use hand held e-business tools including computers, personal data assistants, (PDAs), radio frequency (RF) scanners, microchip scanners, mobile phone enabled email and SMS, data recording devices, barcoding equipment.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes and in consultation with the management team.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They must use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare hand held e-business tools for use	1.1 Select e-business tools 1.2 Complete relevant start-up procedures 1.3 Configure tools with business data 1.4 Test connectivity
2. Use hand held e-business tools	2.1 Use e-business tools 2.2 Address equipment faults 2.3 Check data for accuracy and address errors
3. Process business data	3.1 Generate and compile business data 3.2 Process business data 3.3 Maintain the integrity of data and data security 3.4 Review performance of hand held e-business tools and make recommendations for improvements to hardware, software or their use in accordance with e-business strategy and budget

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBUS301A Use hand held e-business tools.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBUS301 Use hand held e-business tools

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare hand held e-business technology
- use relevant technology such as computers, handheld scanners, and barcoding equipment
- enter and process data according to technical and business requirements
- generate data in the format required by the e-business supply chain.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features and operating procedures of relevant business tools
- relevant protocols for electronic data interchange
- personal identification and password for online access between businesses for access to inventory data and purchasing, payment or supply processes.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCHM101 Follow basic chemical safety rules

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have followed basic rules relevant to chemical safety, including:

- confirmed work requirements and equipment for chemical use with supervisor
- located and followed information on chemical labels and relevant safety data sheets according to supervisors' instructions
- recognised the use of chemicals and complied with chemical safety signs and symbols in the workplace
- recognised chemical hazards and risks and reported to supervisor and applied risk controls
- used, maintained and stored personal protective equipment (PPE)
- maintained and stored chemical application equipment according to supervisors' instructions
- located chemical store, handled, transported, stored and worked with chemicals according to supervisors' instructions
- followed emergency procedures for accidents or chemical spillage and reported to supervisor
- maintained records according to supervisor instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- rules and instructions for working with and around chemicals
- common types of chemicals used in the workplace
- common types of chemical application equipment to be maintained and stored
- the structure and purpose of chemical labels and safety data sheets

- basics of hazards and risks of chemical use
- safety signage and symbols for chemical use in the workplace
- level of hazard and risks associated with common chemicals used in the workplace and methods of control
- PPE, when and how it should be worn, stored and maintained
- methods of reporting to supervisors' chemical hazards and risks
- safe methods of transporting, handling and storage of chemicals
- types of emergencies and the procedures for accidents and spills of chemicals
- records commonly kept for chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to chemicals and chemical store
- resources, equipment and materials:
 - PPE
- specifications:
 - workplace instructions and procedures
 - chemical safety data sheets
 - common chemical labels
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to handle, transport, and apply chemicals under supervision using workplace specified chemicals and application equipment.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well-known parameters, providing solutions to a limited range of predictable problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to handle chemicals	1.1 Confirm the activity related to chemical handling to be undertaken with supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Identify and select tools and equipment required according to supervisor instructions</p> <p>1.3 Identify health and safety hazards and risks and apply controls according to supervisor instructions and workplace procedures</p> <p>1.4 Select, ensure serviceability, fit and use personal protective equipment (PPE)</p>
2. Check application equipment	<p>2.1 Carry out pre-operational checks of application equipment and identify and replace any damaged or worn components or report to supervisor</p> <p>2.2 Prepare application equipment for use according to workplace practice and safe chemical handling processes</p>
3. Handle and transport chemicals	<p>3.1 Confirm safety precautions for the handling and transport of chemicals with supervisor</p> <p>3.2 Handle and transport chemicals according to chemical label, safety data sheets and supervisor instructions</p>
4. Prepare chemical for application	<p>4.1 Interpret and apply chemical label instructions according to safety data sheets for the chemical or substance being used</p> <p>4.2 Select and use appropriate mixing equipment</p> <p>4.3 Measure, mix and load application equipment with chemical according to application rates</p> <p>4.4 Clear chemical spills according to chemical label and supervisor instructions</p> <p>4.5 Check that output of application equipment is correct and in accordance with chemical application plan</p>
5. Apply chemicals	<p>5.1 Assess and record weather conditions and forecasts prior to and during application according to workplace requirements</p> <p>5.2 Apply chemical safely according to chemical application plan, chemical label and supervisor instructions</p> <p>5.3 Monitor conditions for application and take appropriate action when conditions are unsuitable according to workplace procedures</p> <p>5.4 Minimise risks to others, product integrity and the environment prior to and during application</p>
6. Finalise work	6.1 Clean and store PPE and application equipment in accordance with manufacturers and health and safety in the workplace

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements 6.2 Dispose of excess chemicals and clean containers in accordance with label instructions and regulatory requirements 6.3 Complete incident reports according to workplace procedures 6.4 Complete chemical application records according to workplace procedures 6.5 Store unused chemical and products according to workplace procedures 6.6 Adhere to all re-entry requirements for treated areas

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret instructions, chemical labels and safety documentation to identify relevant and key information to apply to mixing and application of chemicals
Writing	<ul style="list-style-type: none"> Use clear language and correct concepts and terminology when reporting incidents and completing chemical application records
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations when measuring and mixing chemicals and checking chemical application equipment
Oral Communication	<ul style="list-style-type: none"> Use clear language, concepts, tone and pace appropriate when confirming chemical application parameters with supervisor
Get the work done	<ul style="list-style-type: none"> Follow clearly defined instructions and sequencing, and monitors own progress for the task, seeks assistance when necessary

Assessment Requirements for AHCCHM201 Apply chemicals under supervision

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated that chemicals have been applied under supervision, ensuring they have:

- identified hazards and risks and adopted safe work practices and used appropriate personal protective equipment (PPE) according to supervisors' instructions
- confirmed activity with supervisor and identified and selected tools and equipment necessary for the application of chemical treatment
- carried out pre-operational checks of application equipment and made it ready for operation
- handled and transported chemicals to be used according to chemical labels and supervisors' instructions
- followed directions on chemical labels and relevant safety data sheets to safely mix and prepare chemicals
- selected appropriate measuring equipment and measured, mixed and loaded application equipment with chemicals safely and correctly
- ensured chemical spills were cleared according to chemical label instruction and supervisor instructions
- checked the application equipment for output against plan and applied chemical safely complying with weather conditions
- monitored and recorded weather and applied chemical appropriate to prevailing conditions
- maintained a healthy and safe condition for the environment and others while applying and following chemical application
- cleaned application equipment and PPE and disposed of waste according to equipment manufacturer instructions, chemical label and supervisor instructions
- complied with equipment manufacturer instructions, chemical label and supervisor instructions

- maintained chemical application records and incident reports according to workplace procedures
- stored protection equipment, application equipment and unused chemicals according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- various handling and transport techniques and requirements for chemicals
- structure and content of chemical labels and safety data sheets and their use and purpose for safe chemical application
- principles and methods of measuring, mixing and applying chemicals
- features and functions of a range of application equipment relevant to the workplace their operations, and maintenance requirements
- risk factors to be taken into account for human and animal health, spillage and environmental impact relevant to chemical use before, during and following chemical application
- basic chemical groupings and types used in the workplace, including:
 - the mode of action
 - the impact on chemical safety
 - application methods
- paths of entry of poisons into the body and the methods of limiting exposure through practices and personal protective clothing
- maintenance practices for chemical application related equipment and PPE and disposal procedures for chemical contaminants and containers
- assessing weather conditions and the impact on safe application of chemicals
- components of a workplace chemical application plan
- chemical related records and reports and their purpose.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to chemical store
- resources, equipment and materials:
 - common chemicals
 - PPE
 - chemical application equipment
 - chemical measuring and mixing equipment
- specifications:

- workplace documents, including work instructions and procedures
- chemical labels and safety data sheets
- chemical application plan and relevant chemical application rates
- manufacturers' operation and maintenance instructions for chemical measuring and application equipment
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have safely transported and stored chemicals, including:

- identified health and safety hazards, assessed risks and implemented controls
- ensured emergency services contact details are available
- ensured transport vehicle meets regulations and that chemicals were loaded, secured and protected according to regulations and procedures
- ensured emergency equipment and procedures were available
- handled, transported and stored chemicals safely
- carried out emergency procedures safely and according to procedures
- maintained a chemical storage manifest and safety data sheets (SDS) according to legislative and regulatory requirements
- complied with chemical label instructions and SDS for transporting and storage of chemicals and legislative and regulatory requirements
- maintained inventory and records according to workplace procedures and legislative and regulatory requirements
- monitored chemical expiration and disposed of chemicals and waste according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- chemical labels and SDS their purpose, use and terminology, including:

- chemical signs, symbols and coding
- basic chemical properties and reactivity related to SDS and labels
- legislation and regulations that apply to transporting and storing chemicals, including:
 - transport vehicle requirements
 - information and documentation
 - dangerous and hazardous chemicals
 - placarding requirements
- risk factors including human and animal health and environmental
- processes and procedures for the disposal of excess, unwanted, expired chemicals and chemical waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- emergency procedures for spills and accidents
- recording and monitoring of chemical stores including, expiration and disposal procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to storage facility for chemicals
 - access to vehicle for transporting chemicals
- resources, equipment and materials:
 - chemicals
 - PPE
 - materials and equipment to handle, secure and protect chemical loads
- specifications:
 - specific workplace documents, including work instructions and procedures for chemical handling, storage and transport
 - chemical labels and safety data
 - legislation and regulations about handling, storage and transport of chemicals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely prepare and apply chemicals for the control of pests, weeds and diseases, using general application equipment.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the need for chemical use and prepare an application plan	1.1 Identify the pest, weed or disease, and assess the need for control 1.2 Assess the requirement for chemical use 1.3 Assess health and safety hazard, risks and controls for different chemicals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Confirm requirement for chemical application according to workplace procedures 1.5 Assess off target risk of each application method 1.6 Assess the environmental risk for application method 1.7 Notify stakeholders of intended chemical application according to workplace procedures and legislative and regulatory requirements 1.8 Prepare application plan according to workplace procedures
2. Prepare chemical mixes	2.1 Identify and select chemical required for target according to application plan 2.2 Calculate the volume, rate or dose according to chemical label instructions 2.3 Identify and select application equipment and set-up requirements according to application plan and operator instructions 2.4 Identify hazards, assess risks and implement control measures for application method according to chemical label and health and safety in the workplace procedures 2.5 Identify, select, fit and use personal protective equipment (PPE) according to workplace procedures 2.6 Select appropriate mixing equipment and suitable location to prepare and load chemicals according to workplace procedures 2.7 Prepare chemicals according to chemical label instructions 2.8 Return unused chemical to store and clean preparation equipment and work site of residues and spillage according to chemical label instructions and workplace procedures
3. Calibrate application equipment	3.1 Select application equipment for chemical according to application plan, off target risks and workplace procedures 3.2 Conduct pre-operational checks of application equipment according to operator and maintenance manual 3.3 Calibrate equipment according to operating instructions and application plan 3.4 Load equipment with chemical according to operating instructions and workplace safety procedures
4. Apply chemicals	4.1 Monitor and assess weather conditions and forecasts to ensure effective chemical application according to application plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Select, ensure serviceability, fit and use PPE according to chemical label instructions and workplace procedures</p> <p>4.3 Apply chemical according to label directions and application plan relating to the control of the pest, weed or disease</p> <p>4.4 Monitor application equipment for correct performance and ensure effective chemicals application according to operating instructions</p> <p>4.5 Identify health and safety in the workplace hazards and risks and implement controls</p> <p>4.6 Clean up spills during application according to chemical label instructions and workplace procedures</p>
5. Clean up equipment and complete records	<p>5.1 Clean and decontaminate application equipment according to operator instructions, safety data sheets (SDS) and legislative requirements</p> <p>5.2 Dispose of chemicals and used containers according to chemical label instructions, SDS and legislative requirements</p> <p>5.3 Clean and store PPE according to workplace procedures</p> <p>5.4 Record and report safety and environmental incidents according to workplace procedures and regulatory requirements</p> <p>5.5 Record details of chemical application according to workplace procedures and legislative requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret SDS, chemical labels, operating instruction and other documentation and consolidates information to determine chemical application actions and activity
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational records using clear language and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine rates of application chemical mixtures and calibration of equipment

Skill	Description
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following policies, procedures and regulations Identify and implement chemical label requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for chemical application activities

Assessment Requirements for AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely prepare and apply chemicals ensuring they have:

- determined and confirmed the need for chemical application by assessing the infestation, off target risk, and environmental risks
- developed an application plan for chemical application
- identified health and safety hazards, risk and implemented control procedures according to chemical label
- notified stakeholders of planned chemical application
- used personal protective equipment (PPE) according to workplace procedures
- interpreted chemical labels and applied chemical according to safety data sheets (SDS) and application plan
- identified and selected the chemical required for the target and calculated the amount and rates required according to chemical label
- identified and selected application equipment and suitable location, and determined the set up parameters according to application plan and operator instructions
- monitored and assessed weather conditions and equipment performance to ensure effective chemical application
- selected, conducted pre-operational checks according to operator and maintenance manual
- completed at least one calibration activity for application equipment
- prepared and loaded chemicals and returned unused chemicals to store in accordance with label, application plan and workplace procedures
- applied chemicals safely according to chemical labels, regulations and workplace procedures
- complied with chemical labels, SDS, regulations, maintenance manual, environmental procedures, operator instructions and application plan
- cleaned equipment and spills, and disposed of waste according to workplace and environmental procedures

- maintained records and reported incidents according to workplace procedures and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- control options when selecting chemicals for pests, diseases and weeds infestations, including:
 - chemical
 - mechanical
 - cultural
 - biological
 - integrated pest management including resistance management principles
- types of pest, diseases and weed their treatment and resistance
- legal implications and requirements of chemical labels and SDS
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- impact of weather factors on the safe and effective application of chemicals
- characteristics of chemicals, their mode of action and relevance to chemical selection and use, including:
 - translocated/systemic
 - contact
 - ingested poison
 - protectant
 - eradicant
 - knock-down
 - residual
 - selective/non selective
- factors that contribute to off target damage, including:
 - physical movement of chemicals (e.g. animals moving baits or soil movement)
 - chemical formulation
 - wind speed and direction
 - temperature and relative humidity
 - temperature inversions
 - controlling off target damage
 - rainfall
 - buffer zones and barriers
- hazards of chemical application, including:
 - human and animal health
 - environmental contamination

- residues in environment, plants and animals
- withholding/re-entry periods
- safety requirements when applying chemicals, including:
 - procedures
 - PPE
 - signage
- safe handling, transporting and storage of chemicals
- preparing chemicals including preparation, compatibility, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- selecting and operating suitable application equipment
- features, functions and calibration techniques for powered and hand held application equipment, including:
 - pressure and volume of chemical
 - travel speed
 - nozzle identification, selection, operation
- legislation, regulations and licensing requirements in relation to chemical use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chemicals
 - PPE
 - application equipment
 - chemical measuring and mixing equipment
- specifications:
 - specific workplace documents, including work instructions and procedures for chemical application
 - chemical labels and SDS
 - regulations about use of chemicals
 - manufacturers' operation and maintenance instructions for equipment
 - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCCHM308 Use application equipment to apply fumigant in confined spaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to use application equipment to fumigate grain, seed, crops and plants housed in enclosures or confined spaces.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions for the purchase and use of fumigants.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan fumigation	1.1 Determine the need for fumigation as an option for pest management strategy of the workplace 1.2 Assess the facility and conditions for suitability of fumigation as a method to use 1.3 Select method of fumigant and application equipment to suit type

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>of pest, facility and material to be treated</p> <p>1.4 Identify and select fumigant to be used and its application rate according to chemical label</p> <p>1.5 Identify hazards, assess risks and implement control measures for fumigation in confined spaces</p> <p>1.6 Establish security measures to control access during fumigation and prescribed re-entry periods according to chemical label and workplace procedures</p> <p>1.7 Determine appropriate personal protective equipment (PPE) according to fumigant safety requirements</p>
2. Prepare storage facility, equipment and fumigants for fumigation activity	<p>2.1 Erect signage and barriers to control risk of inadvertent entry to facility</p> <p>2.2 Seal the facility and check the seal integrity</p> <p>2.3 Take appropriate measurements and calculations to ensure the concentration of fumigant will meet specification</p> <p>2.4 Check operational effectiveness of fumigation equipment according to operating procedures</p> <p>2.5 Calibrate fumigation equipment to deliver the correct rate of application according to chemical label and operating instructions</p> <p>2.6 Transport and store fumigants according to chemical label and safety data sheets (SDS) and regulatory requirements</p> <p>2.7 Select, ensure serviceability, fit and use PPE for selected fumigant according to chemical label and SDS</p> <p>2.8 Prepare fumigant according to chemical label and equipment operator instructions</p>
3. Conduct and monitor fumigation	<p>3.1 Apply fumigant according to planned application method, pest management strategy and chemical label</p> <p>3.2 Monitor fumigation site during exposure time and prevent unauthorised access</p> <p>3.3 Maintain integrity of seals throughout the active fumigation period</p> <p>3.4 Respond to emergency situations according to workplace emergency procedures</p>
4. Ventilate storage facility	4.1 Establish ventilation and re-entry times and risk controls according to chemical label and withholding periods

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Ventilate facility using appropriate equipment to remove fumigant in a safe and controlled manner</p> <p>4.3 Test for evidence of residual gas according to workplace procedures, and maximum residue limits for the material being treated</p> <p>4.4 Notify appropriate personnel of any further risk control measures required</p>
5.Restore storage facility	<p>5.1 Collect and remove all equipment, sealants, fumigants and waste materials according to workplace procedures</p> <p>5.2 Remove signage and barriers according to site security measures</p>
6.Clean, safety-check and store equipment and fumigants	<p>6.1 Clean, decontaminate, check and store equipment and PPE according to workplace procedures, chemical labels, SDS and regulatory requirements</p> <p>6.2 Dispose of all waste according to chemical label instructions and workplace environmental procedures</p>
7.Record fumigation details	<p>7.1 Record details of fumigation applications according to workplace procedures</p> <p>7.2 Record and report safety incidents according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret safety data, labels, manufacturers specifications, operating procedures, specifications, and other documentation and consolidates information to determine fumigation actions and activity
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational documents using clear language and correct spelling, grammar and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine storage facility volumes and rates of application and to check, interpret and confirm results of tests

Skill	Description
Oral Communication	<ul style="list-style-type: none"> Effectively participate in verbal exchanges using active listening to convey and clarify post treatment risks and control measures
Navigate the world of work	<ul style="list-style-type: none"> Identify and implement manufacturer requirements for fumigants
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for fumigation activities Address problems and initiate standard procedures in response to emergencies applying problem solving processes

Assessment Requirements for AHCCHM308 Use application equipment to apply fumigant in confined spaces

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely apply a fumigant on materials housed in an enclosure, ensuring they have:

- determined need, appropriateness and method for fumigating a storage facility
- determined hazards and risks and established safety and security resources and control measures required
- prepared facility for safe fumigation
- determined fumigant requirements and prepared the fumigant and equipment for treatment according to chemical label instructions and safety data sheets (SDS)
- ensured personal safety by using appropriate personal protective equipment (PPE)
- applied fumigant and monitored the safety and integrity of the fumigation process, responding appropriately to emergencies
- rendered the storage facility safe through ventilation, conducted tests to establish safe air quality notifying personnel of residual risks
- removed fumigation materials, waste and temporary resources from storage facility and disposed of waste according to workplace and environmental procedures
- complied with workplace and environmental procedures and chemical label instructions and SDS
- checked, decontaminated, cleaned and stored equipment used in the fumigation process according to workplace procedures
- maintained records of fumigation activities and incidents and reported according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pests relevant to materials to be treated and factors and considerations in relation to the use of fumigation
- pest management strategies and relation to the use and selection of fumigation methods, including:
 - chemical
 - mechanical
 - biological
 - cultural
 - integrated pest management including resistance management principles
- types of fumigant used for treating storage facilities, their mode of action, methods of application, transport, storage and handling
- fumigant labels and SDS and how to interpret and apply label requirements for specific crops and facilities
- equipment used in fumigation, their setup, calibration, operation, shutdown, care and maintenance
- storage facilities and their suitability for fumigation, techniques used to seal a facility, and methods and calculations required to determine fumigant rates of application
- monitoring procedures during a fumigation process and methods of assessing leakage
- safety requirements including signage, equipment, PPE for use when handling fumigants and conducting fumigation activities
- legislation, regulations, licensing and codes of practice relevant to fumigant use
- risks associated with working near confined spaces including signage, gas detection and relevant entry and exit procedures
- chemical hazards and risk factors including human and animal health, leakage, spillage, environment damage and control measures required to mitigate risk
- methods for ventilating storage facilities and the equipment required
- how to assess for residual gas and safe re-entry periods including the consequence of fumigant residues and maximum residue limits
- requirements for disposal of excess fumigants, clearing spillages and equipment clean up
- procedures and processes for rendering a storage facility safe and operational after fumigation
- records required when conducting fumigation activities and related safety reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to storage facility and materials for fumigation
- resources, equipment and materials:
 - fumigants

- PPE
- fumigation and ventilation equipment
- fumigation measuring and mixing equipment
- gas testing equipment
- materials required to seal facilities for fumigation
- specifications:
 - workplace documents, including work instructions and procedures for fumigation
 - fumigant labels and SDS
 - legislation, regulations, codes of practice relevant to handling, storage, transport and use of fumigants
 - manufacturers' operation and maintenance instructions for fumigation equipment
 - relevant standards for air quality for test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM309 Fumigate soil

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to select and use application equipment to fumigate soil or growing media for the control of pathogens and pests.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan fumigation	1.1 Determine the need for fumigation as an option for pest management strategy of the workplace 1.2 Assess site and soil conditions for suitability of fumigation as a method to use 1.3 Select method of fumigant and application equipment to suit type

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>of pest and soil or media to be treated</p> <p>1.4 Identify and select fumigant and its application rate according to chemical label</p> <p>1.5 Identify hazards, assess risks and implement control measures for soil and media fumigation</p> <p>1.6 Establish site security measures to control access during fumigation and prescribed re-entry periods according to chemical label and workplace procedures</p> <p>1.7 Determine appropriate personal protective equipment according to fumigant safety requirements</p>
2. Prepare site for fumigation	<p>2.1 Implement controls and site security measures according to workplace procedures</p> <p>2.2 Erect signage and barriers to control risk of inadvertent entry to facility</p> <p>2.3 Ensure site emergency procedures are in place and ready to implement</p> <p>2.4 Assess the soil for readiness for fumigation treatment</p>
3. Prepare application equipment and fumigants	<p>3.1 Select application equipment appropriate for the fumigant and according to workplace procedures and industry practice</p> <p>3.2 Check operational effectiveness of fumigation equipment according to operating procedures</p> <p>3.3 Calibrate fumigation equipment to deliver the correct application rate according to chemical label and operating instructions</p> <p>3.4 Transport and store fumigants according to chemical label and safety data sheets (SDS) and regulatory requirements</p> <p>3.5 Select, ensure serviceability, fit and use personal protective equipment for selected fumigant according to chemical label and SDS</p> <p>3.6 Prepare fumigant according to chemical label and equipment operating instructions</p>
4. Conduct and monitor fumigation	<p>4.1 Apply fumigant according to planned application method, pest management strategy and chemical label</p> <p>4.2 Apply appropriate soil sealing methods to contain fumigant</p> <p>4.3 Monitor fumigation site during exposure time to prevent unauthorised access</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.4 Aerate soils according to chemical label instructions and workplace procedures</p> <p>4.5 Test for evidence of residual fumigant according to workplace procedures and maximum residue limits for the soil or media</p> <p>4.6 Implement re-entry procedures to control risks to human and animal health</p> <p>4.7 Notify appropriate personnel of any further risk control measures required</p> <p>4.8 Ventilate fumigation enclosure in safe and controlled manner according to chemical labels instructions, SDS and workplace procedures</p> <p>4.9 Respond to emergency situations according to workplace emergency procedures</p>
5. Restore site	<p>5.1 Collect and remove equipment, fumigants and waste according to workplace procedures</p> <p>5.2 Remove signage according to site security measures</p>
6. Clean, safety-check and store equipment and fumigants	<p>6.1 Clean, decontaminate, check and store equipment and personal protective equipment according to workplace procedures, chemical labels, SDS and regulatory requirements</p> <p>6.2 Dispose of all waste according to chemical label instructions and workplace environmental procedures</p>
7. Record fumigation details	<p>7.1 Record details of fumigation applications according to workplace procedures and regulatory requirements</p> <p>7.2 Record and report safety incidents according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret safety data, labels, manufacturers specifications, operating procedures, specifications, and other documentation and consolidates information to determine fumigation actions and activity
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational documents using clear language and correct spelling, grammar and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine soil volumes and rates of application and to check, interpret and confirm results of tests
Oral Communication	<ul style="list-style-type: none"> Effectively participate in verbal exchanges using active listening to convey and clarify post treatment risks and control measures
Navigate the world of work	<ul style="list-style-type: none"> Identify and implement manufacturer requirements for fumigants
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for fumigation activities Address problems and initiate standard procedures in response to emergencies applying problem solving processes

Assessment Requirements for AHCCHM309 Fumigate soil

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to safely apply a fumigant to soil ensuring they have:

- determined need, appropriateness and method for fumigating a soil
- determined hazards and risks and established safety and security resources and control measures required
- prepared soil for safe fumigation
- determined fumigant requirements and prepared the fumigant and equipment for treatment according to fumigant label instructions and safety data sheets (SDS)
- transported, handled and stored fumigants according to safety procedures, label and legislative requirements
- ensured personal safety by selecting, fitting and using appropriate personal protective equipment (PPE)
- applied fumigant and monitored the safety and integrity of the fumigation process, responding appropriately to emergencies
- rendered the soil and surrounding area safe through aeration and conducted tests to establish safe soil and air quality notifying personnel of residual risks
- removed fumigation materials, waste and temporary resources from treatment area and disposed of waste according to workplace and environmental procedures
- complied with fumigant label instructions and SDS
- checked, decontaminated, cleaned and stored equipment used in the fumigation process according to workplace procedures
- maintained records of fumigation activities and incidents and reported according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- primary and secondary soil pests, diseases and weeds to be treated and factors and considerations in relation to the use of fumigation including threshold pest levels and cost benefit
- pest management strategies and relation to the use and selection of fumigation methods, including:
 - chemical
 - mechanical
 - biological
 - cultural
 - integrated pest management including resistance management principles
- soil, media type, moisture and temperature factors relative to fumigation and methods employed to "seal" soils during fumigation
- types of fumigant used for treating soils, their mode of action, methods of application, transport, storage and handling
- fumigant labels and SDS and how to interpret and apply label requirements for specific soil and media situations
- equipment used in fumigation, their setup, calibration, operation, shutdown, care and maintenance
- calculations required to determine fumigant rates of application
- monitoring procedures during a fumigation process and methods of assessing escape
- safety requirements including signage, equipment, PPE for use when handling fumigants and conducting fumigation activities
- legislation, regulations, codes of practice and licensing requirements relevant to fumigant use, transport, storage and handling
- chemical hazards and risks factors including human and animal health, leakage, spillage, environment damage and control measures required to mitigate risk
- methods for aerating treated soils and assessment of residual fumigants including testing fumigant residues and maximum residue limits
- requirements for disposal of excess fumigants, clearing spillages and equipment clean up
- records required when conducting fumigation activities and related safety reporting procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - soil requiring fumigation
 - fumigants
 - PPE
 - fumigation and soil aeration equipment

- fumigant measuring and mixing equipment
- fumigant testing equipment
- materials required to seal soil for fumigation
- specifications:
 - specific workplace documents, including work instructions and procedures for fumigation
 - fumigant labels and SDS
 - legislation, regulations, codes of practice relevant to handling, storage, transport and use of fumigants
 - manufacturers' operation and maintenance instructions for fumigation equipment
 - relevant standards for fumigation test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM310 Conduct manual fumigation of vertebrate and invertebrate pests

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to determine, apply, monitor and clean up fumigants for the control of vertebrate and invertebrate pests.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine type and method of fumigation	1.1 Identify the pest characteristics and degree of infestation 1.2 Assess the infestation and determine threshold for fumigant treatment 1.3 Identify fumigant treatment options for vertebrate and invertebrate pests

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify and select fumigant and its application rate according to chemical label and pest to be controlled</p> <p>1.5 Identify hazards, assess risks and implement control measures for pest fumigation activities</p>
2. Prepare to use fumigant according to label and safety data sheets (SDS)	<p>2.1 Identify, select, fit and use personal protective equipment (PPE) according to chemical label instructions and workplace procedures</p> <p>2.2 Identify and calculate application rates for fumigation conditions according to chemical label instructions</p> <p>2.3 Prepare hazard exclusion barriers, signage and emergency response procedure according to health and safety in the workplace procedures and legislative and regulatory requirements</p> <p>2.4 Identify hazards, assess risks and implement control measures according to health and safety in the workplace procedures</p>
3. Conduct fumigation	<p>3.1 Ensure emergency response resources are ready and available according to workplace emergency response procedure</p> <p>3.2 Check current weather and forecast conditions are favourable for fumigation activity to proceed</p> <p>3.3 Create seal in treatment area to ensure maximum effectiveness of fumigant according to workplace and chemical label instructions</p> <p>3.4 Apply fumigant according to chemical label instructions and workplace procedures</p> <p>3.5 Transport and store fumigants according to workplace procedures and chemical transport and storage regulations</p>
4. Monitor fumigation	<p>4.1 Monitor fumigation site and control access to maintain safe conditions according to chemical label instructions and workplace procedures</p> <p>4.2 Monitor fumigation site for effective fumigation according to workplace procedures</p> <p>4.3 Assess fumigation seal and integrity and take action to rectify according to workplace procedures</p>
5. Ventilate fumigated area	<p>5.1 Determine ventilation parameters according to chemical label instructions and workplace procedures</p> <p>5.2 Calculate ventilation time according to chemical label instructions and workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Ventilate site according to chemical label instructions, SDS, workplace procedures and legislative and regulatory requirements 5.4 Check for residual fumigant according to chemical label instructions and workplace procedures
6. Clean up following fumigation	6.1 Remove site exclusion barriers, signs when safe to do so according to workplace procedures 6.2 Clean, decontaminate, check and store fumigation equipment, safety signs and equipment and PPE according to chemical label instructions, workplace procedures and legislative and regulatory requirements 6.3 Dispose of all waste according to chemical label instructions
7. Record application details	7.1 Record details of fumigation activities and application according to workplace practices and legislative and regulatory requirements 7.2 Update chemical and resource register for used and remaining stock according to workplace procedures and legislative and regulatory requirements 7.3 Record and report safety incidents according to workplace procedures and legislative and regulatory requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret SDS, chemical labels, manufacturer instructions, signs and symbols, equipment operating instruction and other documentation and consolidates information to determine fumigant application actions and activity

Assessment Requirements for AHCCHM310 Conduct manual fumigation of vertebrate and invertebrate pests

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have fumigated vertebrate and invertebrate pests manually, including:

- selected the appropriate fumigant option for the pest characteristics and infestation
- determined fumigation parameters according to manufacturer instructions and safety data sheets (SDS)
- prepared fumigant according to chemical manufacturers instructions
- identified health and safety hazards, risks and implemented controls for fumigation activities
- transported, handled and stored fumigants according to safety procedures, fumigant label and legislative requirements
- maintained the fumigant inventory and disposed of waste fumigant and materials according to workplace and environmental procedures
- implemented emergency response procedures to maintain a safe site
- prepared site for fumigation and erected exclusion barriers and signage
- checked weather conditions and forecasts to decide on fumigation progression
- sealed treatment area, applied the fumigant, monitored fumigation activity and ventilated sites
- checked for residual fumigant according to workplace procedures
- restored the treatment area, cleaned and decontaminated the equipment
- complied with chemical manufacturers' instructions, workplace and legislative and regulatory requirements, safety procedures, fumigant label and legislative requirements, and environmental procedures
- maintained records, stock inventories and reported on work activities and incidents. according to workplace and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pests and their characteristics for fumigation control
- primary vertebrate and invertebrate pests that can be controlled by manual fumigation methods
- pest control strategies and the role of fumigation, including:
 - chemical
 - cultural
 - biological
 - mechanical
 - Integrated Pest Management
- fumigants their use and action
- fumigant selection criteria to consider, including:
 - size of area
 - weather conditions
 - type of material concentration
 - safety implications
- interpretation and use of labels and SDS
- techniques to seal fumigation treatment sites
- site characteristics and conditions for suitable for fumigation
- relevant legislation and regulatory requirements for fumigant use
- risk factors including human and animal health, weather, leakage, spillage and environment
- safety and environmental requirements for disposal of fumigant, spills and waste materials
- clean-up procedures and decontamination
- pre and post fumigation safety procedures
- transporting and storage requirements of fumigants, including:
 - legislation and regulations that apply to transporting and storing chemicals including:
 - transport vehicle requirements
 - dangerous and hazardous chemicals
 - placarding requirements
- processes and procedures for the disposal of excess, unwanted, expired fumigants and waste including industry disposal programs
- health and safety in the workplace requirements including personal protective equipment (PPE) and manual handling
- record keeping procedures and practices for workplaces and regulations
- tests and testing for residual fumigants
- inventory and stock records and procedures for fumigants.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
 - access to storage facilities for fumigants
- resources, equipment and materials:
 - site requiring fumigation
 - fumigants
 - PPE
 - fumigation aeration equipment
 - fumigant measuring and mixing equipment
 - fumigant testing equipment
 - materials required to seal treatment area
- specifications:
 - specific workplace documents, including work instructions and procedures for fumigation
 - chemical labels and SDS
 - legislation and regulations relevant to handling, storage, transport and use of fumigants
 - manufacturers' and maintenance instructions for hand fumigation equipment
 - relevant standards for residual fumigation test results.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM403 Prepare safe operating procedures for calibration of equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare workplace procedures for the calibration of equipment used in the application of pest, weed and disease control chemicals and bio-agents.

The unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCCHM403 Prepare safe operating procedures for calibration of equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have prepared safe operating procedures for calibration of equipment, including:

- identified and analysed the need for equipment calibration
- analysed and confirmed equipment calibration requirements and operator capability
- performed a risk assessment of the calibration activity and incorporated risk controls into the calibration procedure
- documented procedures for calibration according to intended use and workplace protocols.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, codes of practice and enterprise procedures relevant to pesticides, the environment and health and safety in the workplace
- sources of chemical safety information, including:
 - codes of practice
 - legislation and regulations
 - chemical manufacturer labels
 - safety data sheets
- chemical handling and application
- mechanical and electronic controls on application equipment
- calibration techniques
- hazards, risks and controls including use of personal protective equipment (PPE).

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chemical application equipment
 - specific tools for calibration and adjustments
 - PPE
- specifications:
 - workplace documents including policies, procedures and processes
 - manufacturers' operating instructions for equipment to be calibrated
 - workplace instructions and specifications for calibration
- relationships:
 - access to supervisors and operators.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCCHM404 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed procedures to minimise risks in the use of chemicals, including:

- sourced information and analysed its content for safe chemical use
- identified steps in the chemical use process and identified hazards and risks
- assessed the risks and developed risk control procedures to mitigate the risk for chemical use
- implemented procedures, monitored and evaluated personnel using procedures
- developed a continuous improvement strategy for risk control procedures
- implemented, monitored and evaluated a chemical risk control procedure
- developed and maintained records for risk assessment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of chemical safety information, including:
 - codes of practice
 - legislation and regulations
 - chemical manufacturer labels
 - safety data sheets (SDS)
- industry best practice requirements relating to chemical use
- strategies for identifying hazards, risks and controls
- risk factors, including:
 - human
 - animal health
 - product integrity

- weather
- residues and maximum residue levels
- spray drift, spillage and environment
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations
- principles and practices of chemical handling, transporting and storage of chemicals and fumigants
- principles and practices of chemical application strategies and equipment including integrated pest management
- operational factors to consider in procedures, including:
 - transport, handling and storage
 - application methods, equipment and personal protective equipment (PPE)
 - cleaning and decontamination
 - disposal of waste
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment required to implement the chemical use procedure
 - PPE
- specifications:
 - specific workplace documents including policies and processes
 - manufacturers' operating instructions for equipment and machinery
 - SDS
 - workplace instructions and job specifications
 - chemical information including legislation, codes of practice, manufacturer instructions
- relationships:
 - team member(s).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCCHM405 Plan and implement a chemical use program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to assess and control the risks associated with chemical use and to plan and implement a program for chemical use.

The unit applies to individuals who take responsibility for their own work and provide direction to others. All work must be carried out to comply with workplace procedures, in accordance with applicable state/territory health and safety in the workplace, pesticide and environmental legislation and codes of practice.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify requirements for chemical use	1.1 Identify, source and interpret information required for planning and implementing a chemical use program 1.2 Assess the need for chemical use as an option 1.3 Ensure that personnel are adequately trained in chemical use according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess risks and develop control procedures	<p>2.1 Identify hazards, assess risks and develop control measures and emergency action plans for chemical use operational activities</p> <p>2.2 Assess weather conditions and forecasts to determine implications for off target contamination</p> <p>2.3 Assess the sensitivity of target area and impact of chemical on the environment according to chemical label instructions and safety data sheets (SDS)</p> <p>2.4 Assess the risk to human and animal health according to chemical label instructions and SDS</p> <p>2.5 Analyse assessments and document risk control procedures for the chemical application plan according to workplace procedures</p>
3. Develop an operational and maintenance program for chemical use	<p>3.1 Determine chemicals to be used according to workplace pest management strategy</p> <p>3.2 Calculate mixing requirements for chemicals according to chemical label instructions and workplace procedures</p> <p>3.3 Document operational checks and calibration requirements of equipment according to operators instructions and manufacturer specifications</p> <p>3.4 Develop and implement an operational and maintenance strategy for application equipment and personal protective equipment according to health and safety practices</p> <p>3.5 Document operational and maintenance procedures for chemical application plan according to workplace protocols</p>
4. Implement and monitor chemical application plan	<p>4.1 Provide personnel with chemical use procedures, and instruction on safety equipment for chemical application plan</p> <p>4.2 Monitor adherence with safe practice for preparation and application of chemicals according to chemical application plan</p> <p>4.3 Monitor adherence to procedures for handling, transport, storage, decontamination and disposal of chemicals according to chemical application plan</p> <p>4.4 Monitor adherence to maintenance procedures according to chemical application plan</p> <p>4.5 Monitor adherence to residue procedures for product and environment according to chemical application plan</p>
5. Finalise work	5.1 Ensure excess chemicals are disposed of according to waste

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
activities in accordance with chemical application plan	management and environment procedures 5.2 Ensure required records are completed according to operational and workplace, health and safety procedures
6. Evaluate chemical application plan and records for continuous improvement	6.1 Develop procedures for evaluating the effectiveness of chemical application plan 6.2 Identify and document shortfalls in chemical application plan 6.3 Develop a continuous improvement strategy to rectify the chemical application plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyse and consolidate information to determine chemical control procedures and develop chemical application plan
Writing	<ul style="list-style-type: none"> Develop procedural material using clear and detailed language in order to convey explicit risk control information
Oral Communication	<ul style="list-style-type: none"> Present complex information using clear and convincing language, tone and pace appropriate when briefing personnel on chemical application plan
Navigate the world of work	<ul style="list-style-type: none"> Work independently or with others in making decisions to achieve organisation outcomes Contribute to roles and responsibilities of others through implementation of plans Take full responsibility for following policies, procedures and legislative requirements
Interact with others	<ul style="list-style-type: none"> Implement strategies for a diverse range of colleagues in order to build rapport and foster strong relationships when instructing and monitoring performance Elicit feedback and provides feedback to others in order to improve workgroup behaviours and update plans

Skill	Description
Get the work done	<ul style="list-style-type: none"> • Accept responsibility for planning and sequencing complex tasks and workload • Monitor progress of procedures and reviews and amends them to meet demands and priorities • Apply systematic and analytical decision making processes for complex and non-routine situations

Assessment Requirements for AHCCHM405 Plan and implement a chemical use program

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have planned and implemented a chemical use program, including:

- sourced information and analysed its content for chemical application
- assessed the need for chemical use and ensured personnel are adequately trained in chemical use according to workplace procedures
- identified hazards, risks and provided controls, including personal protective equipment (PPE) for chemical application and off target impact
- assessed weather conditions and environmental sensitivity of the site
- documented chemical application and maintenance procedures according to workplace protocols
- determined chemicals required and mixing requirements according to workplace procedures and chemical label instructions
- develop a continuous improvement strategy to minimise risk
- communicated chemical application plan to personnel
- implemented procedures and monitored and evaluated personnel according to chemical application plan
- developed a continuous improvement strategy for chemical application plan
- implemented, monitored and evaluated a chemical application plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- source of information for developing plans, including:
 - legislation and regulations
 - codes of practice
 - chemical labels

- safety data sheets (SDS)
- industry requirements relating to chemical use
- strategies for identifying hazard, risks and controls
- risk factors, including:
 - human
 - animal health
 - product integrity
 - weather
 - residues and maximum residue levels
 - off target damage, spillage and environment
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities, limitations and calibration
- mixing chemicals, including:
 - rates
 - mixing order if more than one chemical
 - adjuvants
 - water quality
- life cycle of a variety of pests and the target stages
- implications of pest resistance to chemicals
- principles and practices of chemical application strategies and equipment including, integrated pest management and animal health strategies
- preparation and documentation of strategic plans and procedures
- signs of pest damage and signs of beneficial organisms
- operational factors to consider in a procedures, including:
 - transport, handling and storage
 - application methods, equipment and PPE
 - cleaning and decontamination
 - disposal of waste
- emergency procedures including first aid
- strategies for instructing personnel, and monitoring and assessing personnel performance
- mandatory and workplace record keeping requirements for chemical storage, disposal, application and safety.

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessment of skills must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools and equipment required to implement the chemical application program
 - PPE
 - chemicals and relevant weighing and mixing equipment
- specifications:
 - specific workplace documents including policies and processes
 - manufacturers' operating instructions for chemicals, equipment and machinery
 - SDS
 - workplace instructions and job specifications
 - chemical information including legislation, codes of practice, chemical label instructions
- relationships:
 - team member(s) or work crew
- timeframes:
 - schedules and planned completion dates for a chemical application plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed and managed a chemical use strategy, including:

- evaluated pest control strategies for workplace requirements
- identified, assessed and incorporated external factors, legislation, codes of practice and industry requirements into chemical use strategy
- reviewed available chemicals and their method of application and assessed their relevance to the workplace
- identified and assessed hazards and risks and developed control measures for a risk management strategy according to legislation and workplace guidelines
- researched and documented insurance cover for chemical use in the workplace
- developed procedures for management and use of chemicals according to workplace guidelines, including:
 - risk control measures
 - communication strategy to inform stakeholders of the chemical use strategy
- developed procedures that comply with legislation and workplace guidelines
- distributed information on procedures for chemical management to stakeholders
- developed and implemented a strategy for upskilling and supervising personnel for chemical use
- monitored the implementation of the chemical use strategy and evaluated and rectified underperformances, according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles of a chemical control strategies, including:
 - relevant legislation, codes of practice and industry requirements covering health and safety in the workplace, hazardous substances, environment and food safety
 - workplace and regulatory requirements and options for the keeping of records
 - documentation
- hazards to human health, agricultural produce, and all aspects of the environment and non-target species of flora and fauna associated with the transport, storage, handling, application and disposal of chemicals, including:
 - routes of entry of chemicals into the body and the implications of this on chemical use management strategies
 - safety procedures including the maintenance, use, fit and decontamination of personal protective equipment (PPE)
 - monitoring of staff health exposed to chemicals according to regulatory requirements
 - emergency procedures for safety incidents involving chemicals
 - purpose and role of chemical labels and safety data sheets (SDS) in determining chemical transport, storage, handling, application and disposal procedures and practices to all staff
- external factors that affect chemical use, including:
 - influence of meteorological factors (wind, temperature, humidity, rain) on quality of chemical application, drift potential, effectiveness and efficacy of use
 - elements of a spray drift management strategy including measures to assess the potential for spray drift and prevent or control its occurrence
- pest control strategies and their benefits in terms of risk management and evaluation, including:
 - chemical
 - biological
 - cultural
 - Integrated Pest Management
 - Integrated Resistance Management
 - Integrated Animal Health Management
 - off-label chemical application and procedures
- equipment required, calibration and operation
- principles of residue effects and their management, including:
 - persistence in soil and water
 - accumulation in agricultural produce
 - rate of breakdown of residues in produce and in the environment
 - withholding periods
 - ways in which residues can occur
 - maximum residue levels
 - movement of and persistence and degradation of different types of chemicals
 - industry waste agreements

- source and purpose of insurance for use, transportation and storage of chemicals
- communication and negotiation strategies with stakeholders including community, workers and management, including informing on:
 - staff responsibilities
 - how to act in an emergency
 - neighbours when chemical spraying is planned
 - make agencies aware when accidents occur
- types of training needs including internal and external
- monitoring methods and procedures including periodical reviews of procedures, workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace with pest control requirements personnel and physical resources to implement and monitor chemical use strategy or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chemicals and spray equipment appropriate to control strategy
 - PPE
- specifications:
 - workplace documents including policies, procedures and processes to help formulate the chemical use strategy
 - manufacturers' operating and calibration instructions for equipment used in implementation to inform the procedures within the strategy
 - SDS
 - workplace instructions and procedures for implementing chemical use strategy
 - specific legislation, regulations and codes of practice
- relationships:
 - work team tasked with chemical control activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCFAU501 Manage fauna populations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare a fauna management plan, including controlling or maintaining fauna populations.

The unit applies to individuals who manage natural areas, and technical specialists who manage and provide advice on fauna populations.

Firearms licensing conditions may apply to this unit. Scientific licenses and permits may be required in some jurisdictions where the management plan involves endangered or threatened species, or critical habitats.

Pre-requisite Unit

Nil

Unit Sector

Fauna (FAU)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess fauna populations	1.1 Conduct surveys for distribution, ecology, viability, genetic diversity and threats 1.2 Determine increase or decrease in species population size and range

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Assess desirability of the population change and impact on immediate environment</p> <p>1.4 Assess condition of the environment and habitats for ongoing support of species</p> <p>1.5 Research species numbers in other locations to determine significance of local population</p> <p>1.6 Assess attitudes of stakeholders to the species to determine acceptable range of population management options</p> <p>1.7 Complete a cost/benefit analysis of population management options</p>
2. Prepare management plan	<p>2.1 Develop plan of management from assessment</p> <p>2.2 Prepare submissions for funding to implement management plan</p> <p>2.3 Reconcile costs of plan for management against available funds</p>
3. Control or maintain fauna population	<p>3.1 Develop plan to manage species using a series of intervention measures according to resource constraints and legislative requirements</p> <p>3.2 Implement measures to manage population</p> <p>3.3 Obtain permits for population management according to legislative requirements</p> <p>3.4 Inform stakeholders and staff about population management measures</p> <p>3.5 Ensure management measures comply with workplace health and safety, animal welfare, biosecurity and environmental sustainability policies and procedures</p> <p>3.6 Ensure staff are trained and comply with licensing requirements for managing population</p> <p>3.7 Manage incidents with species according to legislative, workplace health and safety and public safety requirements</p> <p>3.8 Monitor and adjust management plan and record results in accordance with legislative and workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Conduct literature reviews on the impact of animal populations, and critically review results for the development of a fauna management plan
Writing	<ul style="list-style-type: none"> Prepare fauna management plans and supporting texts, expressing ideas and exploring complex issues that are constructed logically, succinctly and accurately
Oral communication	<ul style="list-style-type: none"> Establish and maintain effective oral communication with stakeholders and staff
Numeracy	<ul style="list-style-type: none"> Calculate animal population densities and compare results with researched results for comparable locations Prepare costing for management plan and reconciliation with available funding

Assessment Requirements for AHCFAU501 Manage fauna populations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared and implemented a management plan for at least one fauna species in its ecological environment.

There must also be evidence that the individual has:

- assessed fauna populations and their habitat
- assessed the impact of fauna population on the environment
- determined the stability and importance of fauna populations for their species
- planned intervention measures to improve species distribution, habitat and survivability
- prepared a fauna management plan in accordance with legislative requirements and workplace procedures, including:
 - developed workplace health and safety procedures
 - incorporated biosecurity procedures
 - informed staff and stakeholders
- implemented plan to control or maintain fauna populations
- applied ethical welfare practices when managing fauna populations
- applied appropriate sustainability practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislative and workplace requirements, including:
 - ethical standards and practices when working with fauna

- laws relevant to the protection of flora, fauna and marine environments
- ecological principles and practices as they apply to:
 - fauna species and their interrelationships with the environment
 - fauna and their habitat
 - predators and fauna population
 - competition between fauna species
- survey and assessment techniques, including:
 - survey materials and equipment
 - documenting and recording survey results
- key anatomical and behavioural characteristics and reproduction patterns of fauna species
- signs and symptoms of health issues in the species
- management planning methods and procedures
- requirements of licences for scientific, educational and conservation activities
- requirements for ensuring the welfare of animals described in the relevant codes of practice.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated for at least one fauna species in its ecological environment
- resources, equipment and materials:
 - fauna in the ecological environment
 - survey materials and equipment
- specifications:
 - specific workplace policies, procedures, processes for working with fauna
 - manufacturer operating instructions for survey equipment
 - legislation/codes of practice and standards for the ethical management of fauna.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCHYD301 Implement a maintenance program for hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a maintenance program for hydroponic growing systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor plant health	1.1 Interpret and clarify workplace information about the existing hydroponic system 1.2 Assess growth rate of plants against targets set in the production plan

Element	Performance criteria
	1.3 Assess plants for overall health 1.4 Assess plant for onset of fruit according to production plan
2. Monitor the hydroponic environment	2.1 Monitor environmental parameters according to the production plan and make adjustments as required 2.2 Collect samples and send off for analysis to identify potential sources of contamination 2.3 Monitor and adjust hygiene procedures 2.4 Monitor disposal of materials to ensure it follows enterprise guidelines
3. Monitor nutrient solution	3.1 Identify ingredients of the hydroponic nutrient solution 3.2 Take samples for testing and analysis 3.3 Interpret and discuss results 3.4 Modify nutrient solution to ensure correct balance of ingredients
4. Perform routine maintenance checks	4.1 Inspect all buildings and structures for wear and tear 4.2 Check equipment for delivering the nutrient solution 4.3 Check equipment controlling the atmospheric and root zone environments
5. Complete monitoring activities	5.1 Report problems to the manager 5.2 Record all checks

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD301A Implement a maintenance program for hydroponic systems.

Assessment Requirements for AHCHYD301 Implement a maintenance program for hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and assess plant health
- administer nutrients to a hydroponic system as instructed
- assist in performing nutrient measurement tests
- read nutrient analysis information
- undertake hydroponic system maintenance and repairs
- monitor hydroponic maintenance programs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for implementing a hydroponic maintenance program
- characteristics of healthy and unhealthy plants
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- equipment used in hydroponic systems
- plant growing media choices and their properties
- potential problems associated with a range of crops grown in a hydroponic environment
- properties of a nutrient solution
- recirculated and non-recirculated systems
- testing methods for a hydroponic nutrient solution
- testing methods for the gauging of environmental parameters

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHCHYD302 Install hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install recirculating or non-recirculating hydroponic systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for installation	1.1 Interpret and clarify site plans and design specifications 1.2 Locate underground services according to site plans 1.3 Identify any potential site problems 1.4 Identify environmental implications of installing the system

Element	Performance criteria
	1.5 Clear the site for installation 1.6 Determine and arrange equipment and materials according to design and layout plans
2. Install a hydroponic system	2.1 Prepare site for and install drainage channels and water collection, and storage facilities according to design specifications 2.2 Assemble system infrastructure according to design specifications 2.3 Install system components according to design and layout plans and manufacturers specifications 2.4 Communicate problems associated with installation to the client or manager
3. Test and calibrate the system	3.1 Check infrastructure and systems are in working order and meet specifications 3.2 Calibrate hydroponic equipment 3.3 Install growing media 3.4 Test the system 3.5 Complete check list of all testing results
4. Complete installation operations	4.1 Clean and store all tools and equipment 4.2 Tidy site and remove and dispose of waste

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD302A Install hydroponic systems.

Assessment Requirements for AHCHYD302 Install hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- commission a hydroponic system according to instructions and directions
- prepare a site for installation of a hydroponics system
- prepare materials and equipment for installation
- install components and structures associated with a hydroponic system
- test and calibrate a hydroponic system
- store and maintain associated installation equipment and materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of hydroponic system installation
- environmental implications of the drainage of high nutrient effluents
- head pressure and flow rates
- legislation regarding the installation of hydroponic systems
- plant growing media choices and their properties
- recirculated and non-recirculated systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCHYD501 Develop a plan for a hydroponic system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design a hydroponic system. It applies to those who design systems for hydroponic production of horticultural crops.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary research	1.1 Research type of crop to be grown based on sound marketing principles

Element	Performance criteria
	1.2 Research the growing requirements of the crop based on sound horticultural practices 1.3 Establish the associated risks of growing a particular crop based on sound horticultural practices 1.4 Calculate estimated yield and crop turnover time from historical data and research statistics 1.5 Determine quantity of the plants to be grown based on a cost benefit analysis
2. Assess the suitability of a site	2.1 Assess the physical characteristics of the site 2.2 Ascertain and assess the proximity of the site to markets 2.3 Identify legal requirements in relation to the site and the development of a hydroponic farm 2.4 Identify and consider the environmental implications of developing a hydroponic farm on the site
3. Select the required system	3.1 Research main types of hydroponic systems 3.2 Carry out analysis on each type of system for the chosen crops 3.3 Carry out a cost/benefit analysis on each system for each type of crop 3.4 Determine the type of hydroponic system to be installed
4. Design the hydroponic system	4.1 Select and document the water collection and storage system on the plan 4.2 Select the irrigation system and its components according to the required volume of water and flow rate 4.3 Select and document the fertigation system 4.4 Determine the dimensions of the controlled environment structure following full consideration of the relevant factors 4.5 Determine the environmental control system and document specifications on the plan
5. Prepare and document the design	5.1 Develop a design plan 5.2 Determine specifications and detailed costings with the help of experts, if required 5.3 Develop and document detailed production procedures and schedules 5.4 Present documentation to the client for final approval

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD501A Develop a plan for a hydroponic system.

Assessment Requirements for AHCHYD501 Develop a plan for a hydroponic system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research the growing requirements, risks and returns of the proposed crop
- select, design or customise a system for the site and purpose
- survey the site for suitability and environmental impacts, and gain approvals
- develop a design plan
- present a design plan to clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing a hydroponic system plan
- advantages and disadvantages of the different equipment used in hydroponic systems
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- legislation and regulations relating to the establishment of a hydroponic system
- plant growing media choices, their properties and enterprise specifications
- technical requirements and operating parameters of recirculated and non-recirculated systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSK101 Support extensive livestock work

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to analyse and interpret animal, crop and horticultural production data.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who take responsibility for their own work. They undertake a range of routine and non-routine activities and work in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials, tools and equipment for extensive livestock work	<p>1.1 Identify the required materials, tools and equipment using provided lists and supervisor's instructions</p> <p>1.2 Carry out checks on all materials, tools and equipment and report insufficient or faulty items to the supervisor</p> <p>1.3 Use safe manual handling techniques when loading and unloading materials and equipment</p> <p>1.4 Select and use suitable personal protective equipment (PPE) and check prior to use</p> <p>1.5 Identify hazards and report to supervisor</p>
2. Undertake extensive livestock work as directed	<p>2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary</p> <p>2.2 Carry out work in a safe and environmentally appropriate manner</p> <p>2.3 Interact with other staff and customers in a positive and professional manner</p> <p>2.4 Report problems or difficulties in completing work to required standards or timelines to supervisor</p> <p>2.5 Carry out livestock handling and husbandry activities in line with enterprise animal welfare policies</p>
3. Handle materials and equipment	<p>3.1 Store waste material produced during work in a designated area according to supervisor's instructions</p> <p>3.2 Handle and transport materials, equipment and machinery appropriately</p> <p>3.3 Maintain a clean and safe work site</p>
4. Clean up on completion of work	<p>4.1 Return materials to store or dispose of appropriately</p> <p>4.2 Clean, maintain and store tools and equipment</p> <p>4.3 Report work outcomes to supervisor</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels and work health and safety symbols
- use safe animal handling techniques
- use livestock handling tools and equipment
- assist in monitoring livestock health and welfare
- provide assistance to repair and maintain facilities
- follow work health and safety policies
- follow enterprise animal welfare and sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- safe work practices
- animal handling techniques including animal welfare requirements
- tools and equipment
- repair and maintenance of facilities
- work health and safety and environmental protection legislation and enterprise procedures.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK102 Support intensive livestock work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support to others undertaking intensive livestock production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy. They undertake defined routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for intensive livestock	1.1 Identify required materials, tools and equipment from lists and instructions provided by enterprise and supervisor

Element	Performance criteria
work	1.2 Carry out checks on all materials, tools and equipment and report insufficient or faulty items to the supervisor 1.3 Use safe manual handling techniques when loading and unloading materials and equipment 1.4 Select, check and use suitable personal protective equipment (PPE) 1.5 Identify work health and safety hazards and report to or seek support from supervisor
2. Undertake intensive livestock work as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Carry out work in a safe and environmentally appropriate manner 2.3 Carry out livestock work in line with enterprise animal welfare policies 2.4 Interact with other staff and customers in a positive and professional manner 2.5 Report problems or difficulties in completing work to required standards or timelines to supervisor
3. Handle materials and equipment	3.1 Store waste material produced during work in a designated area according to supervisor's instructions 3.2 Handle and transport materials, equipment and machinery appropriately 3.3 Maintain a clean and safe work site
4. Clean up on completion of work	4.1 Return materials to store or dispose of appropriately 4.2 Clean, maintain and store tools and equipment appropriately 4.3 Report work outcomes to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK102 Support intensive livestock work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow work health and safety procedures and instructions provided by enterprise and supervisor
- prepare materials, tools and equipment for intensive livestock work
- undertake intensive livestock work as directed
- handle materials and equipment appropriately
- clean up on completion of work appropriately
- follow enterprise environmental, animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare and biosecurity requirements and sustainability practices
- materials, tools and equipment used for intensive livestock work
- safe manual handling techniques for loading and unloading materials and equipment
- use, maintenance and storage of appropriate Personal Protective Equipment
- animal handling techniques including animal welfare
- positive and professional communication
- methods of waste storage
- handling and transportation of materials, equipment and machinery
- methods for maintenance of a clean and safe work site
- storage of materials
- cleaning, maintenance and storage of tools and equipment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK201 Assist with feeding in a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with the process of preparing and providing feed and water for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and distribute	1.1 Check requirements for the daily feeding program with supervisor

Element	Performance criteria
feed	1.2 Identify hazards and report to supervisor 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select and check tools, machinery and equipment for readiness 1.5 Provide assistance for weighing and measuring feed 1.6 Load feed into trolleys from silos or other storage bins and distribute feed 1.7 Check automatic or computerised feeders, where used, for blockages and correct functioning 1.8 Report abnormalities or irregularities with feed stocks to supervisor
2. Check watering systems	2.1 Adjust watering systems for height or position where appropriate 2.2 Check water level and flow and make adjustments accordingly 2.3 Empty and clean watering containers or lines where necessary
3. Keep workplace records	3.1 Keep basic feeding records and report to supervisor 3.2 Clean, maintain and store tools, machinery and equipment 3.3 Apply enterprise biosecurity and environmental policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK201 Assist with feeding in a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- identify a range of feed types and qualities
- identify feed contaminants
- prepare and distribute feed
- check watering systems
- recognise and rectify minor operational faults
- interpret and apply task instructions, communicate with work team and supervisor and record and report faults, workplace hazards and accidents
- complete records and documentation of feed use and volumes for the enterprise section
- use machinery and equipment associated with providing feed
- report on feeding to supervisors
- follow enterprise work health and safety policies
- follow enterprise biosecurity and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- silo operations, tractors and associated feeding machinery and equipment
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures
- common grains, meals, pelleted and liquid feeds
- evidence of spoilage and handling of spoilt feeds
- enterprise work health and safety, biosecurity and environmental policies

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK202 Care for health and welfare of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Discuss work requirements with supervisor and seek clarification where necessary 1.2 Identify work health and safety risks and inform supervisor 1.3 Prepare and use suitable personal protective equipment 1.4 Select and prepare appropriate tools and equipment
2. Monitor and assess livestock health and welfare	2.1 Check livestock regularly to assess health and welfare 2.2 Recognise and report symptoms of injuries, ill health or abnormal behaviour 2.3 Handle livestock in line with enterprise animal welfare policies
3. Implement livestock health and welfare procedures	3.1 Follow quarantine and biosecurity procedures as instructed to minimise the risk of disease 3.2 Maintain thorough personal hygiene practices in all activities associated with handling livestock to reduce risks from diseases that are transmissible to humans 3.3 Treat sick and injured livestock or make arrangements to humanely destroy livestock if necessary 3.4 Recognise environmental implications associated with livestock husbandry practices and follow relevant procedures 3.5 Follow the regulations and codes of practice appropriate for the industry 3.6 Follow enterprise animal welfare emergency procedures where required
4. Administer drenches, vaccines and prescribed treatments to livestock	4.1 Prepare livestock treatment site and facilities 4.2 Prepare livestock treatments 4.3 Move, yard and control livestock and inspect for treatment requirements 4.4 Use safe work practices with regard to livestock handling 4.5 Administer treatment if required as instructed or under supervision
5. Monitor treated livestock and maintain records	5.1 Monitor livestock post-treatment for signs of treatment effectiveness 5.2 Recognise and report livestock health and condition abnormalities 5.3 Record disease incidence, livestock losses, and treatments 5.4 Report post-treatment information to the supervisor so that prevention strategies can be planned and implemented

Element	Performance criteria
6. Complete work	6.1 Dispose of treatment materials appropriately 6.2 Clean, maintain and store equipment, materials and facilities 6.3 Dispose of livestock residues and waste in an environmentally responsible manner

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK202 Care for health and welfare of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle livestock safely and humanely
- monitor and assess livestock health and welfare
- select, use and maintain specialised animal health equipment
- prepare treatment site, facilities and equipment
- administer treatments to livestock
- monitor the effectiveness of treatments and report issues
- keep and maintain records
- dispose of unused treatments safely and in an environmentally correct manner
- recognise ill health and abnormal behaviour in livestock
- recognise fear and aggressive behaviour in livestock
- recognise heat stress
- follow enterprise animal welfare emergency procedures
- follow enterprise work health and safety policies
- follow enterprise biosecurity, animal welfare and sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water quality and animal requirements
- feed requirements and quality
- workplace biosecurity and euthanasia procedures
- safe handling of sick and dead livestock
- livestock handling principles and livestock behaviour

- signs of heat stress
- symptoms of ill-health in livestock
- the range of common diseases affecting livestock
- vaccination programs
- relevant legislation and regulations relating to waste and environment management, livestock health, stock medicines and animal welfare
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK204 Carry out regular livestock observation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out regular livestock observation.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with livestock	1.1 Discuss work to be undertaken with supervisor and seek clarification where necessary 1.2 Discuss tasks with other workers who may be affected to ensure continued smooth operation of the process 1.3 Select and check tools and equipment suitable for the work to be undertaken and maintain if necessary 1.4 Select, use and maintain suitable personal protective equipment in line with work health and safety policies 1.5 Identify hazards and report to supervisor
2. Carry out livestock checks	2.1 Check livestock for signs of illness, injuries and abnormalities and report to supervisor 2.2 Use safe handling techniques while handling livestock 2.3 Carry out all husbandry and handling activities in line with enterprise animal welfare policies
3. Deal with livestock emergencies	3.1 Follow enterprise biosecurity policies where required 3.2 Recognise common signs of livestock injury or life threatening conditions and report to supervisor 3.3 Use basic emergency and livestock first aid procedures until professional help arrives 3.4 Report serious cuts and abrasions to livestock to the supervisor or veterinarian
4. Provide veterinary procedure support	4.1 Treat cuts, abrasions and bruises under instruction from the veterinarian or supervisor 4.2 Examine animals for signs of distress, injury, illness and abnormal behaviours after completing procedures and report to supervisor 4.3 Apply appropriate treatment as instructed by a supervisor or veterinarian

Foundation Skills

Assessment Requirements for AHCLSK204 Carry out regular livestock observation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe operating procedures
- check livestock regularly
- handle livestock safely and humanely
- identify signs of ill health, injury and abnormality
- identify symptoms of ill health or injury
- deal efficiently and calmly with livestock emergencies
- complete basic livestock first aid procedures
- record and report serious issues or injuries.
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- range of ailments that may occur or affect livestock
- application of a range of basic treatments under veterinary supervision
- behaviour of the relevant species
- environmental controls and codes of practice applicable to the enterprise
- organisations livestock production and management plans
- relevant work health and safety legislative requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK205 Handle livestock using basic techniques

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare handling areas, gates and access routes for livestock movement
- monitor and anticipate livestock behaviour
- recognise enterprise livestock identification systems
- identify and draft livestock during handling operations
- move and control livestock using low stress livestock handling techniques
- minimise undue stress and risk to livestock and handlers
- recognise livestock abnormalities
- assess, calculate and record livestock numbers
- control the environmental impacts associated with livestock production within the limitations of own responsibility
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production
- regulatory controls with regard to handling livestock on public roads where required
- common livestock breeds

- basic nutritional and welfare requirements
- range of common livestock abnormalities, illnesses and injuries and associated signs
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK206 Identify and mark livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out the identification and marking of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to identify and mark animals	1.1 Select and check appropriate equipment for correct operation, and maintain or replace as required 1.2 Select appropriate materials and ensure adequate quantities for required task 1.3 Identify, clean and prepare suitable marking sites and facilities 1.4 Prepare and ensure adequate quantities of animal preventative health treatments as instructed 1.5 Identify hazards, control risks as appropriate and report to supervisor 1.6 Select, use and maintain suitable personal protective equipment
2. Identify and mark animals	2.1 Muster animals and identify, draft and move young animals to marking site in readiness for identifying and marking 2.2 Carry out animal identifying and marking operations in line with enterprise animal welfare policies 2.3 Carry out contingency plans as instructed in the event of adverse weather conditions 2.4 Identify environmental implications associated with enterprise operations for identifying and marking animals and report to the supervisor
3. Complete identifying and marking operation	3.1 Keep tally or record animal numbers as required during operations and assist to conduct and record animal counts at completion of tasks 3.2 Prepare animals and move along a planned route without damage to person, livestock, property or environment 3.3 Clean, maintain and store equipment, materials and facilities 3.4 Report equipment faults or malfunctions 3.5 Dispose of animal residues and waste appropriately 3.6 Monitor livestock behaviour and wellbeing post-operations, and mother-up young animals if required 3.7 Apply enterprise biosecurity and environmental policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK206A Identify and mark livestock

Assessment Requirements for AHCLSK206 Identify and mark livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, control risks and implement safe operating procedures
- prepare and maintain appropriate identifying and marking sites and facilities to industry standards
- handle animals in a safe and humane manner in line with enterprise and industry animal welfare policies
- operate and maintain equipment
- determine identifying and marking methods
- carry out identifying and marking operations
- monitor animal's behaviour post-marking for health and well-being, mother-up animals and their young if required
- apply contingency measures in the event of adverse weather conditions
- tally, count, calculate and record animal numbers during marking operations if required
- demonstrate safe and environmentally responsible workplace practices
- follow enterprise work health and safety policies
- follow enterprise biosecurity and environmental policies as required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- components and functions of animal handling equipment
- animal marking methods and identification systems
- animal preventative health requirements and procedures
- relevant livestock behaviour
- basic livestock health and nutritional requirements

- environmental codes of practice with regard to animal production
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK207 Load and unload livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to load and unload animals for transport.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check facilities and equipment for sound working conditions	1.1 Identify facilities and equipment required for the task and confirm with supervisor 1.2 Prepare loading facilities and equipment according to enterprise procedures 1.3 Check the work site, facilities and equipment for hazards and operation, control risks where appropriate and report safety concerns to supervisor 1.4 Carry out or organise repairs and maintenance of facilities and equipment required for loading or unloading livestock where necessary 1.5 Select appropriate personal protective equipment and ensure correct fit
2. Load animals	2.1 Identify, muster, yard or secure animals using safe working methods in line with enterprise animal welfare policies 2.2 Inspect animals for signs of ill health, injury or abnormal behaviours and separate animals unsuitable for transport 2.3 Prepare animals for transport 2.4 Record identification details of animals and fit individual animal tags as required 2.5 Count, record and load livestock safely and with minimal stress to ensure no injury to co-workers or animals in line with enterprise animal welfare policies 2.6 Complete vendor declarations and any other required documentation
3. Unload animals	3.1 Unload livestock in a safe manner to ensure no injury to other workers or animals 3.2 Record numbers and individual identification details of livestock 3.3 Inspect livestock for signs of ill health, injury or abnormal behaviours and report to appropriate persons 3.4 Check documentation and reach agreement on condition of animals with the receiving or dispatching party where required
4. Perform appropriate animal health procedure	4.1 Sort stock, and separate distressed, injured or ill livestock if required 4.2 Undertake animal health treatments off truck if required 4.3 Feed and water animals as instructed 4.4 Apply enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK207 Load and unload livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check loading facilities for correct operation and hazards to animals and workers
- sort livestock as required and separate unsuitable animals for transport
- load and unload livestock
- anticipate animal behaviour
- provide and maintain appropriate animal feed and water
- complete relevant documentation and affix individual tags if required
- monitor animal health and welfare
- read and interpret mustering, work and loading plans and maps
- calculate animal numbers to assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity policies as required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal handling and movement methods and techniques
- basic animal health and nutritional requirements
- animal herding and flocking behaviour
- techniques and uses of working dogs where appropriate
- types of animal health treatments that may be required
- common diseases and injuries in livestock
- common abnormal livestock behaviours

- causes of livestock being unfit for transport
- legislative documentation requirements for livestock transport
- relevant work health and safety, biosecurity and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK209 Monitor water supplies

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to monitor the supply of potable water for livestock from water storages and sources.

All work must be carried out to comply with workplace procedures, work health and safety, legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor water supplies	1.1 Inspect water supplies routinely 1.2 Recognise high and low water levels and report to supervisor 1.3 Carry out treatment of water quality problems or pathogens according to enterprise procedures 1.4 Record and report information on water supplies
2. Inspect and clear intake and outlet points	2.1 Inspect intakes and outlets 2.2 Report potential blockages and clear actual blockages 2.3 Check and replace water filters as required 2.4 Reposition intake lines as necessary to ensure unobstructed suction 2.5 Clear strainers of debris and sludge
3. Operate water delivery equipment	3.1 Identify hazards and risks and report to supervisor 3.2 Prepare and check water delivery equipment 3.3 Operate water delivery equipment 3.4 Check outflow to ensure water delivery equipment is operating correctly 3.5 Shut down water delivery equipment as required 3.6 Report on activities and water delivery equipment

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety procedures
- record and report water supply information, activities and system performance
- read and follow manufacturers procedures
- problem solve to identify potential as well as actual blockages
- undertake basic poly pipe repairs
- check outflow rates
- clear blockages using safe working procedures
- check flow rates
- inspect and report on water supplies with only routine supervision
- follow work health and safety requirements.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water delivery systems and components and their operation
- common water quality problems
- enterprise procedures for carrying out inspections, recording and reporting water information and system performance
- environmental impacts and procedures for water supplies
- relevant work health and safety requirements.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK210 Muster and move livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to muster and move livestock as part of a team.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for muster	1.1 Identify mustering requirements and confirm with supervisor 1.2 Arrange transport requirements and check and confirm for operation 1.3 Identify and access additional information relevant to livestock movements 1.4 Identify hazards and safety concerns and report to the supervisor 1.5 Select and use personal protective equipment
2. Carry out muster	2.1 Locate livestock identified in the muster plan and aggregate in preparation for movement 2.2 Carry out muster processes in line with enterprise animal welfare policies
3. Move livestock	3.1 Carry out livestock movement with minimal stress to livestock and without damage to person, property or environment 3.2 Monitor and maintain livestock welfare during movement with adequate provision of rest, water and feeding points 3.3 Confine and pasture livestock at destination 3.4 Count and record numbers of livestock 3.5 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK210A Muster and move livestock

Assessment Requirements for AHCLSK210 Muster and move livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- read and interpret muster plans and maps
- prepare equipment and working dogs (when used) for handling livestock
- implement directions for mustering
- monitor livestock behaviour and recognise abnormalities
- muster and move livestock along prepared routes in a calm and controlled manner
- handle livestock safely and humanely, monitor welfare of mustered stock
- monitor and minimise impacts to the environment
- communicate effectively with the muster team
- calculate livestock numbers and assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements where required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mustering and movement methods and techniques
- livestock basic health and nutritional requirements
- livestock herding/flocking behaviour
- environmental codes of practice with regard to livestock production
- working dogs uses and techniques (where appropriate)
- legislative requirements for stock movement along public roads

- environmental impacts and procedures for livestock movements and musters
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK211 Provide feed for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- monitor and record livestock condition
- provide feed and feed supplements in accordance with feeding plan
- monitor livestock health and condition, and recognise abnormalities
- employ safe and environmentally responsible systems and procedures with regard to the handling of livestock and feed
- read and interpret feeding plan, work plan and supervisors instructions
- communicate and report livestock feeding abnormalities and workplace hazards, and maintain livestock records
- assess and calculate herd/flock numbers, measure feed and rate and frequency of feeding
- safely handle livestock in line with enterprise animal welfare policies
- report feeding abnormalities and maintain records
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional requirements for livestock (including water)
- types of feed and feed supplements (including pastures and grazing)
- types of noxious and toxic plants relevant to feeding areas
- livestock health and behaviour
- livestock scoring and weighing methods

- environmental impact of livestock
- safe livestock handling techniques and procedures
- hazards associated with handling livestock and control measures
- personal protective clothing and equipment
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK213 Clean out production sheds

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to clean out sheds used for the production of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean shed	1.1 Confirm work to be undertaken with supervisor

Element	Performance criteria
	1.2 Identify work health and safety hazards and seek advice from supervisor for implementation of suitable risk controls 1.3 Select, maintain and use suitable personal protective equipment 1.4 Identify the potential environmental and biosecurity impacts of cleaning the shed and seek advice from supervisor for managing these impacts 1.5 Raise, dismantle or remove equipment from the shed for cleaning and clean equipment to appropriate industry standards 1.6 Cover or seal electrical switchboards and other equipment to prevent entry of water if appropriate
2. Clean shed and surrounds	2.1 Service and prepare machinery for cleaning operation 2.2 Remove and dispose of litter where these are used 2.3 Remove and dispose of manure appropriately 2.4 Remove dust and cobwebs from all surfaces 2.5 Service filters and flush drinker lines and tanks 2.6 Empty and clean silos where appropriate 2.7 Prepare and use cleaning agents in line with safe working procedures 2.8 Air shed to completely remove traces or vapours of the cleaning agent prior to re-entry of staff and re-installation of equipment 2.9 Handle chemical agents safely and use in accordance with relevant work health and safety and industry practices 2.10 Dry clean electrical equipment 2.11 Ensure run-off from cleaning activity complies with enterprise, industry and regulatory effluent and waste management procedures 2.12 Ensure all cleaning and hygiene processes are completed to industry standards
3. Complete cleaning operation	3.1 Clean and store equipment appropriately at end of operation 3.2 Dispose of containers, leftover fluids, waste and debris from the cleaning operations appropriately 3.3 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK213 Clean out production sheds

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, follow safe work practices and use personal protective equipment appropriately
- make appropriate preparations for cleaning out shed
- clean shed and surrounds
- complete cleaning operation
- complete records
- follow relevant environmental and biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of sheds and equipment found in sheds
- methods to handle and transport equipment found in sheds
- methods of sealing or covering shed equipment to prevent entry of water
- methods for dry cleaning electrical equipment
- environmental and biosecurity impacts of shed cleaning operation, and measures to mitigate these impacts
- equipment and machinery used for shed cleaning operation, and the maintenance, servicing and storage of such equipment and machinery
- environmental and biosecurity impacts and methods of disposal of effluent, bio-waste and waste generated by the cleaning operation
- cleaning, maintenance and servicing of filters, drinker lines, tanks and silos
- types, handling, use and disposal of cleaning agents, work health and safety and environmental practices for these agents

- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK214 Maintain production growing environments

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain growing environments for livestock under production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain environment systems	1.1 Carry out biosecurity procedures, including access to sheds and boot washing 1.2 Carry out maintenance work according to enterprise work health and safety standards for hazards identification, risk assessment and risk control measures 1.3 Carry out shed heating, cooling and ventilation systems maintenance 1.4 Check litter and manure conditions and report changes 1.5 Maintain lighting programs specified for the production unit and report variations 1.6 Clean light globes regularly and report malfunctions 1.7 Check feed program is working according to enterprise procedures and report malfunctions 1.8 Check feeding times and feed rate when restricted feeding is practised and report malfunctions 1.9 Carry out maintenance work as necessary 1.10 Check waterers in sheds and report malfunctions
2. Observe and assess livestock health	2.1 Check livestock regularly 2.2 Recognise and report ill health of livestock 2.3 Carry out disease prevention strategies appropriate to the unit as instructed and in line with biosecurity codes
3. Handle livestock	3.1 Handle livestock in accordance with animal welfare requirements and codes of practice 3.2 Count and identify livestock 3.3 Recognise and identify injured, malformed or non-productive livestock, and report to enterprise or supervisor 3.4 Treat livestock under direction of the unit supervisor, and report the effects of treatment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK214 Maintain production growing environments

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and follow safe work practices
- follow relevant biosecurity practices
- maintain environment systems
- observe and assess livestock health
- follow relevant animal welfare practices when handling or treating livestock

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant biosecurity requirements
- relevant animal welfare requirements
- relevant work health and safety requirements and sustainability practices
- shed heating, cooling and ventilations systems, their functions, maintenance and servicing, and impact of changes on livestock
- types of litter, functions and impact of litter changes on livestock
- impact of manure conditions on livestock
- lighting programs and impact of variations in lighting programs on livestock
- types of lighting, functions, maintenance and servicing
- feeding programs and impact of changes and malfunctions on livestock
- restricted feeding and impact of changes and malfunctions on livestock
- watering systems, functions, maintenance and servicing, and the impact of changes and malfunctions on livestock
- types of maintenance work that need to be carried out in a livestock production unit

- signs of health, anatomy, physiology and behaviour of the livestock species
- signs of ill health in the livestock species
- signs of injury, malformation and non-productiveness in livestock
- types of disease prevention strategies and their functions
- methods for handling livestock
- methods for counting and identifying livestock
- types of treatment in livestock and assessment of treatment effectiveness

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK215 Carry out alpaca handling and husbandry operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to move and control alpacas using basic handling methods and procedures.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to handle alpacas	1.1 Identify, prepare and maintain alpaca handling areas, gates and access routes 1.2 Locate and identify alpacas for handling according to supervisor instructions 1.3 Observe and anticipate behavioural characteristics of alpacas and select appropriate handling methods 1.4 Select, check for soundness and prepare handling equipment 1.5 Identify hazards and report to supervisor 1.6 Recognise hazards to animals and report to supervisor 1.7 Observe site quarantine and other biosecurity protocols 1.8 Select and use suitable personal protective equipment
2. Handle alpacas	2.1 Follow procedures to control and sort alpacas safely and in line with enterprise animal welfare policies 2.2 Classify alpacas according to age, sex and husbandry tasks to be performed 2.3 Carry out restraint procedures with minimum stress and discomfort to alpacas 2.4 Transport alpacas when required according to animal welfare requirements 2.5 Monitor and anticipate alpaca behaviour during moving and handling processes to ensure wellbeing of alpacas and safety of handlers 2.6 Conduct alpaca count record 2.7 Recognise environmental impacts of alpaca handling and husbandry tasks and report to supervisor
3. Carry out alpaca husbandry tasks	3.1 Carry out alpaca husbandry safely and in line with enterprise animal welfare policies 3.2 Identify unhealthy stock and abnormal conditions and behaviour and report 3.3 Provide adequate feed and clean water to stock 3.4 Recognise plants poisonous to alpacas and report to supervisor
4. Complete alpaca handling activities	4.1 Complete alpaca husbandry tasks as instructed, and prepare gates and access routes for alpacas' departure 4.2 Clean and maintain handling areas and equipment and store surplus materials 4.3 Report equipment faults or malfunctions

Element	Performance criteria
	4.4 Dispose of alpaca residues and waste appropriately 4.5 Record and report relevant information about particular animals and the husbandry tasks performed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK215A Carry out alpaca handling and husbandry operations

Assessment Requirements for AHCLSK215 Carry out alpaca handling and husbandry operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- assess and calculate alpaca numbers
- prepare handling areas, gates and access routes for alpaca movement
- monitor and anticipate alpaca behaviour in handling operations
- identify, sort, move and control alpacas for handling and husbandry operations
- use correct equipment, and calming and humane methods to minimise undue stress and risk to alpacas or handlers
- carry out typical basic alpaca husbandry tasks
- recognise and report signs of unusual behaviour, unhealthy animals or abnormal conditions
- control environmental impacts associated with alpaca handling and husbandry
- feed and provide adequate clean water to alpacas
- identify a range of plants poisonous to alpacas
- provide due care in the handling of alpacas
- read and comprehend oral and written information and instructions and maintaining alpaca handling records
- use enterprise alpaca identification systems
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alpaca behavioural characteristics and movement in handling areas
- classes of alpacas and their basic nutritional and welfare requirements
- components and functions of handling equipment
- enterprise identification systems for alpacas
- environmental codes of practice with regard to alpaca production
- correct handling techniques and restraint methods
- alpaca husbandry procedures and why they are carried out
- regulatory controls relating to the transport of animals on public roads
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK216 Clean and maintain livestock pens

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to clean and maintain livestock pens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean pens	1.1 Confirm work to be undertaken with supervisor 1.2 Identify work health and safety hazards and seek advice from supervisor for implementation of suitable risk controls 1.3 Select, maintain and use suitable personal protective equipment 1.4 Identify the potential environmental and biosecurity impacts of cleaning the pens and seek advice from supervisor for managing these impacts 1.5 Raise, dismantle or remove equipment from the pens for cleaning if required and clean equipment to appropriate industry standards
2. Clean pens	2.1 Service and prepare machinery and tools for cleaning operation 2.2 Remove and dispose of manure appropriately 2.3 Clean feeding and watering troughs or equipment appropriately 2.4 Ensure run-off from cleaning activity complies with enterprise, industry and regulatory effluent and waste management procedures 2.5 Ensure all cleaning and hygiene processes are completed to industry standards
3. Maintain pens	3.1 Repack worn and uneven pen surface appropriately 3.2 Repair damaged feed bunks and leaking water troughs as required 3.3 Repair pen fences, gates and shade structures as required
4. Complete cleaning and maintenance operation	4.1 Clean and store equipment appropriately at end of operation 4.2 Dispose of containers, leftover fluids, waste and debris from the cleaning operations appropriately 4.3 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

No equivalent unit.

Assessment Requirements for AHCLSK216 Clean and maintain livestock pens

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, follow safe work practices and use personal protective equipment appropriately
- make appropriate preparations for cleaning livestock pens
- clean and maintain pens
- complete cleaning and maintenance operation
- follow relevant environmental and biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements and methods of cleaning livestock pens
- environmental and biosecurity impacts of pen cleaning operation and measures to mitigate these impacts
- types and use of tools, equipment and machinery for pen cleaning operation and the maintenance, servicing and storage of such tools, equipment and machinery
- environmental and biosecurity impacts and methods of disposal of effluent, bio-waste and waste generated by the cleaning operation
- cleaning and maintenance of feeding and watering troughs or similar equipment
- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety, biosecurity and environmental management policies

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply animal welfare principles to the handling and husbandry of animals to ensure their welfare.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify animal welfare requirements	1.1 Identify legislative, regulatory and industry animal welfare requirements 1.2 Identify the principles of animal welfare
2. Comply with animal welfare requirements	2.1 Follow enterprise work health and safety policies 2.2 Carry out animal handling and husbandry activities in compliance with relevant animal welfare codes of practice and workplace requirements 2.3 Recognise animal welfare issues in the workplace and report to supervisor or management 2.4 Take appropriate corrective action as instructed by supervisor 2.5 Complete appropriate record keeping of workplace animal welfare concerns and actions taken as required
3. Participate in animal welfare process	3.1 Participate in workplace or industry animal welfare induction programs and training 3.2 Participate in workplace or industry animal welfare emergency training

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

No equivalent unit.

Assessment Requirements for AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow enterprise work health and safety policies
- identify animal welfare requirements in relevant legislation, regulations, codes of practice and workplace procedures
- apply animal welfare principles to animal handling and husbandry activities in compliance with relevant animal welfare codes of practice and workplace requirements
- recognise and report animal welfare issues to supervisor
- participate in workplace or industry animal welfare emergency training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations and codes of practice
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- workplace or industry animal welfare procedures and animal emergency procedures
- workplace or industry procedures for reporting and recording animal welfare concerns, non-conformance and malpractice in the workplace
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK218 Ride educated horses to carry out basic stock work

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	Initial release with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to handle and ride calm horses educated to muster and move livestock. It addresses the potential risks associated with working with and around horses and livestock.

The unit applies to individuals who have experience in riding horses assessed as calm, consistent and obedient. They work under general supervision, with some accountability for their own work, identifying and providing solutions to a limited range of predictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite units of competency for this unit are:

- ACMEQU202 Handle horses safely
- ACMEQU206 Perform horse riding skills at walk, trot and canter.

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour
ACMEQU206 Perform horse riding skills at walk, trot and canter	ACMEQU202 Handle horses safely

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain horse health and condition	<p>1.1 Monitor horses for signs of ill health, injury, or poor condition as part of daily routines</p> <p>1.2 Report horse condition to supervisor</p> <p>1.3 Administer treatments for common ailments safely and humanely under supervision of veterinarian or supervisor</p> <p>1.4 Carry out hoof care and cleaning according to safe workplace practices</p> <p>1.5 Apply workplace biosecurity and sustainability policies and follow workplace procedures</p>
2. Prepare horses for work	<p>2.1 Assess work to be undertaken and confirm with supervisor</p> <p>2.2 Identify hazards, assess risks, and implement control measures for working safely with horses</p> <p>2.3 Select and check equipment suitable for the work to be undertaken</p> <p>2.4 Select and use appropriate personal protective equipment (PPE) during preparation activities</p> <p>2.5 Identify horses by sex, colour, markings, and brands</p> <p>2.6 Safely and humanely catch assigned horse, assess for health and soundness, and promptly report any issues to supervisor</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.7 Confirm with supervisor that the assigned horse is suitable for required work and own skill level</p> <p>2.8 Prepare horse for ridden work including a pre-exercise groom</p> <p>2.9 Fit and adjust, for individual horses, the appropriate working gear to manage and control horse for required work</p>
3. Ride horses for stock work	<p>3.1 Select and use equipment (PPE) for riding</p> <p>3.2 Lunge horse safely and humanely to check gear fit and horse behaviour</p> <p>3.3 Mount horse safely</p> <p>3.4 Safely control the horse at walk, trot, and canter prior to beginning stock work</p> <p>3.5 Practise appropriate safety drills and safely perform emergency manoeuvres including one-rein stops</p> <p>3.6 Using safe riding techniques, ride quiet, consistent and obedient horses to carry out basic stock work duties</p> <p>3.7 Work and safely control horse at a walk, trot, and canter as part of stock husbandry routines</p> <p>3.8 Safely dismount horse</p> <p>3.9 Report and record stock work activities</p>
4. Provide post ride care	<p>4.1 Remove gear and groom, wash, or clean horse, according to workplace policy</p> <p>4.2 Water and feed horse in line with workplace policy</p> <p>4.3 Release horse safely to appropriate enclosure, paddock, or yard</p> <p>4.4 Check, clean, maintain, and store working gear and PPE</p> <p>4.5 Report damaged or repair working gear as instructed</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Writing	<ul style="list-style-type: none"> Record data and observations about livestock in workplace forms accurately
Oral communication	<ul style="list-style-type: none"> Use active listening and questioning techniques to clarify and confirm instructions and report information
Navigate the world of work	<ul style="list-style-type: none"> Follow workplace procedures, including safe work and safe horse handling practices and animal welfare principles, in own role and work area
Get the work done	<ul style="list-style-type: none"> Plan and organise tasks and assemble equipment to complete basic livestock activities, taking safety and risk factors into consideration

Assessment Requirements for AHCLSK218 Ride educated horses to carry out basic stock work

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	Initial release with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has safely ridden at least two different calm, consistent and obedient horses educated for stock work to carry out at least three assigned jobs involving riding horses for basic stock work duties. For each job there must be evidence that the individual has:

- prepared for the job by:
 - recognising hazards and implementing required risk control measures
 - identifying relevant work health and safety requirements
 - selecting and using suitable personal protective equipment (PPE)
 - selecting suitable saddlery and equipment
 - identifying the assigned horse by gender, colour markings, and brands
 - catching assigned horse and assessing for health and soundness
 - communicating with supervisor to discuss concerns and suitability of horse for the assigned job
- handled horse safely and humanely during job including:
 - safely and correctly fitting, then checking and adjusting working gear to suit individual horse
 - mounting horse safely
 - riding and controlling horse, at a walk, trot, and canter, to perform basic stock work duties
 - adhering to animal welfare policies when working around horses and livestock
 - minimising stress of livestock when checking, mustering, and moving livestock
 - dismounting horse safely
- completed post-ride activities including:

- cleaning, feeding and watering horse
- checking, cleaning and maintaining tack
- completing records as required by workplace.

In addition, there must be evidence that the individual has monitored the condition of at least one horse (which may be one of the above-mentioned three horses), including:

- identifying signs of ill health, injury, or poor condition, and reporting to supervisor
- safely and humanely administering basic treatments under supervision
- carrying out basic hoof care and cleaning safely and humanely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key features of work health and safety, animal welfare codes of practice, biosecurity requirements, and sustainability practices in the context of own job role
- basic pre-activity risk assessment for basic stock work
- common horse gender, colours, markings, and other identifying features
- common basic features of horse behaviour and psychology
- the features of livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant workplace procedures, industry standards, and guidelines for horse riding and riding safety, including lungeing or riding in a yard before outside and one-rein stops
- basic care and husbandry, and procedures for horses
- the common signs of disease or injury in horses, basic anatomy and physiology of the horse
- the use of horses for workplace operations
- care and maintenance of working gear.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions, including livestock handling yards and paddocks
- resources, equipment and materials:
 - various live, calm, consistent and obedient horses educated for stock work and assessed as suitable for the experience and skill of the individual
 - livestock to muster, move, and check
 - appropriate tack for individual, horse and activity
 - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual

- specifications:
 - work instructions and procedures for carrying out basic stock work.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCLSK301 Administer medication to livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply preventative health treatments and other medications to livestock under professional supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Assessment Requirements for AHCLSK301 Administer medication to livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- prepare, clean and maintain treatment site, facilities and equipment to industry standards
- select and utilise equipment and materials appropriate for treating requirements and match to work tasks
- muster, move and handle livestock for health treatments
- administer preventative health treatments in accordance with work plan
- monitor effectiveness of treatments and provide follow up if required
- maintain records of treatments
- assess and calculate herd/flock numbers, measure dosage and quantities
- monitor livestock behaviour and recognise abnormalities
- apply contingency measures for administering treatments in the event of adverse weather conditions
- carry out animal husbandry procedures
- provide due care and handle livestock humanely
- communicate abnormalities, equipment faults and workplace hazards
- read and interpret manufacturers specifications, work and maintenance plans, veterinary chemical labels and Safety Data Sheets (SDS's)
- apply relevant work health and safety requirements
- apply relevant biosecurity requirements
- apply relevant animal welfare practices
- apply relevant environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment and materials for treating livestock, their components and functions
- livestock health treatments, procedures and methods
- livestock identification methods
- mustering and moving techniques
- withholding periods for residues in meat, milk or wool
- technique of disposing of livestock residues and waste appropriately
- hazards associated with handling livestock and veterinarian medicines and chemicals
- implications and management of veterinary medicine and/or chemical resistance
- personal protective clothing and equipment and when and how it should be used and maintained
- procedures for cleaning and maintaining treatment equipment and materials
- enterprise policies with regard to treating livestock, recording and reporting routines
- relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, biosecurity and the use and control of hazardous substances

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK303 Carry out feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out feedlot operations

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to corporate, small scale or opportunity lot feeding of cattle, sheep and goats.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures
- prepare equipment and machinery mixing feed
- identify a range of grain and feed types and qualities
- mix livestock feed
- feed livestock
- follow relevant procedures for the safe and environmentally responsible disposal of waste
- apply and maintain relevant feedlot hygiene and biosecurity procedures
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant biosecurity requirements
- relevant animal welfare practices
- tools and equipment used for working with livestock feed, their functions and maintenance
- environmental impacts of working with livestock feed and mitigation methods
- measurement systems for livestock feed, and calibration and maintenance of measuring equipment
- types of grains and feed ingredients (grains, meals, vitamins, minerals and premix formulations) used for feeding livestock, their functions, characteristics and quality assessment methods

- methods and equipment for blending and grinding of feed
- methods of storage and handling of livestock feed and impact of feed quality changes on livestock
- livestock feeding programs and impact of program changes or variations on livestock
- impact of biosecurity practices on livestock in a feedlot
- cleaning methods, cleaning agents, their proper use and disposal, and relevant Work Health and Safety practices
- common zoonoses and their impacts on human and livestock health
- management and disposal of waste, debris and run-offs according to relevant biosecurity and environmental regulations, codes of practice, industry and enterprise standards
- management of and biosecurity requirements for visitors to the feedlot

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK304 Carry out post-mortem examination of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out post-mortem examination of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources

Individuals must comply with national and local regulations for disposal of the carcass.

Individuals must comply with regulations for sending of biological samples by post.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to conduct post-mortem / necropsy	1.1 Select site for post-mortem, ensuring compliance with biosecurity and environmental requirements 1.2 Prepare the site to be used for the post-mortem 1.3 Obtain and collate all relevant preliminary information about the carcass to be examined 1.4 Identify work health and safety and biosecurity hazards, assess risks and take appropriate action 1.5 Select and use personal protective equipment 1.6 Obtain and prepare required equipment and resources 1.7 Move the animal to be examined to the post mortem area using appropriate manual lifting techniques and equipment 1.8 Seek expert assistance if required
2. Carry out post-mortem examination	2.1 Carry out external assessment and note outward signs of disease or injury 2.2 Seek expert advice and assistance before proceeding where unusual symptoms are present 2.3 Perform post mortem of the carcass in a systematic and safe manner using appropriate techniques and equipment, without causing artificial damage to organs and tissues 2.4 Examine organs, tissues and joints 2.5 Take samples of organs and tissues where appropriate, and place in properly labelled containers to meet laboratory requirements 2.6 Record relevant data and details of the post mortem examination and suggest the cause of death where possible
3. Carry out post necropsy procedures	3.1 Dispose of carcass and biological materials using appropriate equipment and comply with biosecurity and environmental requirements, and national and local regulations for carcass disposal 3.2 Send labelled and packaged samples to the laboratory for analysis and comply with regulations for sending biological samples by post 3.3 Collate all information about the livestock examined and the records made during the post-mortem, and forward to supervisor or veterinarian for analysis and establishing a diagnosis 3.4 Clean and disinfect all equipment used and store appropriately 3.5 Clean and disinfect site used for the post-mortem 3.6 Disinfect disposable personal protective equipment before disposing them 3.7 Wash hands and exposed body areas thoroughly 3.8 Change clothing and place in appropriate bin for laundering and disinfect boots

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK304A Carry out post-mortem examination of livestock

Assessment Requirements for AHCLSK304 Carry out post-mortem examination of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for post mortem, ensuring appropriate handling and use of equipment, personal protective equipment and disinfectants
- identify work health and safety and biosecurity hazards and implement risk controls
- handle carcasses safely and appropriately
- perform external examination and post mortem examination of carcass
- dispose of carcass appropriately
- carry out post necropsy procedures of cleaning and disinfection of equipment, post mortem site and personal protective equipment
- prepare biological samples for sending to the laboratory where appropriate
- carry out procedures for personal hygiene
- apply relevant work health safety environmental and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sequence of actions in conducting a post mortem examination
- appropriate handling and use of post mortem equipment, personal protective equipment and disinfectants
- requirements for correct preparation, labelling and packaging of biological samples
- anatomy and physical features of the species being examined
- common causes of death for the species being examined
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species

- relevant work health and safety environmental and biosecurity requirements, and carcass disposal regulations

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a livestock carcass:

- carry out post mortem examination

Assessors must satisfy current standards for RTOs.

AHCLSK305 Maintain livestock water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain livestock water supplies.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify maintenance requirements	1.1 Check livestock water supplies for quality and inspect for signs of contamination or deterioration, and low or interrupted supply

Element	Performance criteria
	1.2 Check components of water supply systems for wear, deterioration or malfunctions 1.3 Check and confirm Identified maintenance requirements according to the maintenance plan
2. Prepare for maintenance	2.1 Select tools, equipment and materials appropriate to the job requirements and check for serviceability 2.2 Identify faulty or unsafe tools and segregate for repair or replacement 2.3 Identify hazards, assess risks and implement control measures 2.4 Select and use personal protective equipment
3. Carry out maintenance procedures	3.1 Maintain water systems and equipment to manufacturers specifications, livestock requirements and maintenance plan 3.2 Carry out maintenance and repair of motors where necessary, including fault finding 3.3 Report more complex faults and repair requirements to the supervisor
4. Complete maintenance activities	4.1 Clean worksite, tools and materials, return to operating order and store 4.2 Report malfunctions, faults, and wear or damage to tools for repair or replacement 4.3 Collect, treat and dispose of or recycle unwanted materials and waste from maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK305A Maintain livestock water supplies

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK305 Maintain livestock water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- estimate water requirements based on average and peak demand for water
- test and monitor machinery and equipment for correct operation and recognise minor faults and report major faults
- identify the components of a range of water supply systems
- arrange water supply system components and materials
- use hand and power tools safely
- carry out routine servicing and minor repairs on a range of water supply systems and equipment
- work as part of a contract team as required
- demonstrate safe and positive environmental working practices
- test water quality as directed
- read and interpret a water supply plan
- measure and calculate lubrication requirements
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock requirements and average and peak demand for water
- operational principles of various pumps and pumping systems
- functions and components of a range of water supply systems
- operation and maintenance of diesel and petrol engines

- factors which affect water quality, various water contaminants and remedial action
- advantages and disadvantages of different types of water supply systems
- State and Territory work health and safety legislative requirements relevant to the job role
- relevant legislative requirements with regard to property water supply systems
- environmental code of practices associated with maintenance activities.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK306 Coordinate and monitor production performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate resources and monitor the work of others within an intensive production process.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work in the	1.1 Confirm work to be undertaken from work program where

Element	Performance criteria
production area	<p>necessary, and clarify with supervisor if required</p> <p>1.2 Identify hazards, assess risks and implement suitable controls</p> <p>1.3 Select and use suitable personal protective equipment</p> <p>1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken</p> <p>1.5 Communicate the personal protective equipment and other safety requirements to staff and contractors, and obtain confirmation of understanding</p>
2. Coordinate work activities	<p>2.1 Communicate the work required to staff and contractors clearly and unambiguously following the production plan and program</p> <p>2.2 Meet work schedules, plans and priorities according to the needs of the organisation or situation</p> <p>2.3 Ensure the allocation of work optimises resources and the existing competencies of staff</p> <p>2.4 Provide feedback to staff and management on request, or as necessary</p>
3. Monitor daily operations	<p>3.1 Assess manure and litter consistency and treat to prevent deterioration, where appropriate</p> <p>3.2 Implement the designated lighting and internal environment programs for the unit</p> <p>3.3 Check that effluent storage and disposal systems are operated according to the production program and manufacturer's instructions</p> <p>3.4 Ensure that all rubbish and used consumables are removed from production site according to the requirements of the production program</p> <p>3.5 Ensure work, health and safety requirements are being observed and followed</p> <p>3.6 Communicate with operational staff and any contractors regularly to ensure smooth operation and progress</p>
4. Monitor herd/flock health	<p>4.1 Observe herd/flock and shed conditions for signs of ill health, and record and report changes</p> <p>4.2 Examine livestock for evidence of disease through post-mortem techniques in line with individual unit standard and veterinary advice</p> <p>4.3 Identify disease status of unit stock and request serviceman or veterinary assistance when required</p> <p>4.4 Check components of quarantine/ biosecurity procedures for compliance</p> <p>4.5 Comply with enterprise animal welfare policies</p>

Element	Performance criteria
5. Complete records and documentation	5.1 Collate information gathered throughout production operations 5.2 Graph collated information where required, and prepare for presentation to supervisor or manager ensuring easy recognition and extraction of data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK306 Coordinate and monitor production performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain biosecurity procedures and report concerns immediately
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- read and interpret production and other information in a manner that is readily accessible for both management and operators
- monitor shed temperature and adjust as required
- read and interpret spreadsheet information using a software package
- discuss production performance, risk and hazard potential, quality of output, and methods of production with both management and operators
- read and interpret the activities contained in livestock production plans
- observe, identify and react appropriately to work health and safety hazards and environment risks
- recognise when performance standards are not met and investigate and report findings in written form
- provide supervision of staff including allocating duties and feedback on performance
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- prepare and present production and other information in a manner that is readily accessible for both management and operators
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- biosecurity procedures and codes of practice
- common livestock diseases and clinical signs
- relevant industry, environmental and quality standards (including ISO9002:1094)
- animal welfare codes of practice and procedures
- types of sheds and equipment
- raw data to determine issues and problems
- recording and reporting requirements
- fundamentals of quarantine and control methods
- common feed ingredients and additives
- water reticulation systems and quality
- State and Territory work health and safety legislation and codes of practice relevant to the sector

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK307 Euthanase livestock

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to euthanase livestock without distress or suffering prior to cessation of their vital life functions.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Individuals must hold firearms licenses if they are using firearms to euthanase livestock.

Individuals must comply with national and local regulations for disposal of the carcass.

Pre-requisite Unit

Nil

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for euthanasia	1.1 Confirm criteria for decision to destroy livestock conforms to workplace procedures and approval of supervisor where required 1.2 Confirm the method selected to destroy livestock is suitable for the species and meets animal welfare requirements, as outlined in the relevant codes of practice 1.3 Prepare equipment and materials required to complete the euthanasia 1.4 Identify hazards, assess risks and implement control measures 1.5 Identify environmental and public safety risks associated with the euthanasia 1.6 Obtain licences and permits required to complete euthanasia where necessary 1.7 Check and prepare equipment and materials for euthanasia 1.8 Select and use personal protective equipment
2. Carry out euthanasia of animal	2.1 Handle and transport equipment appropriately and safely 2.2 Restrain animal in a way that minimises pain and distress 2.3 Euthanase animal in a quick and painless way 2.4 Check animal to ensure it is dead 2.5 Destroy animals that have not been euthanased immediately, in a humane manner
3. Carry out post euthanasia procedures	3.1 Handle and prepare carcass to be used for research or commercial according to enterprise requirements 3.2 Dispose of carcass not to be used for research or commercial purposes in line with legislative and enterprise requirements 3.3 Clean and store equipment and materials 3.4 Report and record animal and euthanasia details as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant animal welfare requirements
- implement relevant work health and safety practices
- implement relevant biosecurity requirements
- prepare for euthanasia
- carry out euthanasia
- confirm signs of death in a euthanased animal
- handle, prepare or dispose of carcass in line with workplace procedures, national and local regulations
- clean and store equipment and materials
- record details of the euthanasia.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- their responsibilities with regard to animal welfare as outlined in the relevant animal welfare codes of practice
- relevant work health and safety and biosecurity requirements, explain the requirements of statutory legislation and codes of practice related to euthanasing livestock
- workplace procedures for euthanasia of livestock as required, describe animal handling, restraint and behaviour for carrying out euthanasia
- signs of death in an animal
- anatomy and physical features of the relevant livestock species

- methods of euthanasia suitable for the livestock species as outlined in the relevant codes of practice.
-

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK308 Identify and draft livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- handle and draft livestock in line enterprise animal welfare practices
- identify criteria for animal selection
- control and sort livestock
- select animals according to selection criteria
- safely and humanely apply identification devices
- appraise and grade animals
- recognise livestock abnormalities
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- handling techniques and restraint methods
- animal movement and drafting
- animal welfare principles
- livestock behaviour relevant to drafting
- selection criteria for breeding stock
- livestock identification systems and devices
- enterprise animal identification procedures
- State and Territory work health and safety and animal welfare legislative and enterprise requirements.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK309 Implement animal health control programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices for animal health treatment
- identify the symptoms of parasite infestation and other diseases
- monitor animal health status and refer to the production plan for intervention strategies
- select livestock prone to infection for culling
- accurately diagnose the type and severity of infection or parasite infestation
- arrange and co-ordinate equipment and resources
- read and interpret chemical and veterinary health labels, manufacturer's specifications and Safety Data Sheets (SDSs)
- calculate animal numbers and measure treatment dosage and rates
- select and administer treatments appropriate to treat infections and infestations and observe withholding periods
- drench and vaccinate livestock
- provide due care and humanely handle animals
- return animals to prepared and clean environments
- monitor animals for treatment effectiveness
- apply relevant work health and safety requirements
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of parasite infestation and their symptoms
- parasite resistance of different classes of livestock

- application procedures and effects of veterinary chemicals
- types of health preparation treatments
- enterprise vaccination program and procedures
- identification of and prescribed treatments for infections and infestations
- grazing management strategies used in internal parasite control
- drenching equipment, drenches and their efficiency
- relevant codes of practice with regard to the safe use and handling of hazardous substances
- withholding periods for treated animals
- animal handling and restraint techniques
- animal welfare principles
- relevant work health and safety and animal welfare legislative and enterprise requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK310 Implement feeding plans for intensive production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures and suitable risk controls
- assess livestock according to enterprise requirements
- prepare for feeding livestock
- carry out feeding and watering
- clean feeding equipment
- complete records and documentation
- follow relevant biosecurity requirements and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant animal welfare practices and biosecurity requirements
- environmental impacts of intensive livestock feeding
- methods of assessing livestock condition
- systems and stages of intensive livestock production
- feed distribution systems and feeders, their functions, maintenance and servicing
- methods of storage and handling of intensive livestock feed and impact of feed quality changes on livestock
- intensive livestock feeding programs and impact of program changes or variations on livestock
- watering systems and equipment, their functions, maintenance, servicing and impact of changes or variations on livestock

- methods of cleaning feed equipment, cleaning agents, their proper use and disposal, and relevant work health and safety practices
- type of information to be gathered, documentation and records which must be maintained

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK311 Implement feeding plans for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor available pasture for grazing and implementing a feeding plan.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Determine livestock condition and nutritional requirements	1.1 Monitor and report livestock condition 1.2 Identify livestock production status 1.3 Source livestock nutritional requirements and the nutritional value of feedstuffs from the feeding plan 1.4 Use feeding plans to determine adjustment in response to the monitoring of livestock condition and pasture growth 1.5 Report and separate animals that are in atypical condition, injured or diseased in line with enterprise biosecurity policies 1.6 Apply enterprise animal welfare policies to livestock handling and husbandry activities
2. Assess pasture feed	2.1 Assess quantity and quality of available pasture 2.2 Implement grazing management plans and monitor to ensure the sustainable stocking capacity of pasture 2.3 Monitor grazing behaviour of livestock and identify shy or problem feeders 2.4 Determine livestock feeding methods and level of supplementary feeding if required
3. Manage the feeding of livestock	3.1 Graze livestock on pasture according to the guidelines described in the feeding plan 3.2 Obtain required supplementary feed 3.3 Provide supplementary feed to livestock in the appropriate manner and times 3.4 Identify and assess indications of any negative environmental impacts and make amendments to the feeding method as required 3.5 Monitor and report condition and live weight response to feeding

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK311 Implement feeding plans for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor pasture health and condition
- assess herd/flock health and condition and live weight
- identify livestock nutritional requirements
- order feed if requested in line with feeding plan
- identify feeding problems and animals that require individual treatment
- handle livestock humanely and monitor animal welfare
- respond to or report negative environmental impacts of feeding
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutrient and feeding requirements of a range of livestock
- different types of agricultural feeds
- factors that affect feed supply and demand for a grazing operation
- grazing practices which maximise pasture growth and quality to best match herd/flock feed requirements
- purpose of feed conservation in relation to enterprise feed supply and livestock requirements
- different types of pasture grazing systems, including rotation, strip and set stocked grazing
- ways of determining a feed surplus
- role of spelling subdivision in effective pasture and animal management
- different supplementary feeding options for livestock

- environmental controls and codes of practice applicable to the enterprise
- nutrient values of pasture and supplementary feedstuffs
- codes of practice with regard to animal welfare and environmental protection
-

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK316 Prepare livestock for competition

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- plan for and provide livestock feed and water requirements
- maintain livestock facilities and handling equipment
- restrain, handle and groom livestock using safe and humane methods and procedures
- train livestock for showing
- comply with animal welfare requirements
- prepare livestock to competition standards
- parade and present livestock for show
- read and interpret written information, receive, comprehend and communicate oral information, write basic statements and maintain livestock records
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- competition requirements for grooming, handling and presentation
- components and functions of handling equipment
- handling techniques, restraint methods and when to use them
- livestock grooming and training techniques (to lead and stand correctly)
- livestock health and nutritional requirements
- preparation and maintenance requirements for livestock facilities and equipment
- livestock movement and behavioural characteristics in handling and confined areas

- work health and safety , animal welfare and livestock movement legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK317 Plan to exhibit livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select livestock for exhibition
- prepare animals for exhibition
- present livestock to best advantage
- promote the product to clients and pursue sales opportunities
- communicate with staff during preparations, exhibit officials and potential customers
- identify potential exhibits against selection criteria to accurately select livestock/fleeces
- train animals to be led and presented in competition
- organise entries, resources and facilities for showing
- arrange and prepare for transport
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria for competition judging
- preparation procedures
- requirements for entry of competitors
- transportation requirements
- feeding and nutrition requirements
- communication and supervision techniques
- observation methods

- relevant legislative work health and safety requirements, especially as they relate to livestock and fleece exhibitions, and animal transportation, animal welfare and safe livestock handling techniques
- enterprise and industry policies and codes of practice with regard to livestock exhibitions, sales, livestock transportation, and recording and reporting requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK318 Rear newborn and young livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- weigh and assess condition of newborn and young animals
- work within animal welfare legislative requirements and enterprise and industry guidelines
- identify abnormal conditions and report or react promptly
- safely and humanely handle and care for newborn and young animals
- recognise signs of stress or ill health in newborn and young animals
- communicate with other personnel
- provide support as needed to veterinarians attending to sick newborn and young animals
- collect samples
- identify the young and their parent
- use feed, shelter and ventilation equipment
- calculate feed and dose rates
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- newborn and young animals development and growth
- newborn and young animals feed, shelter and environmental requirements
- common deformities
- infection controls and treatment programs

- significance of colostrum to livestock
- feeding systems and weaning strategies
- husbandry procedures
- hygiene and cleanliness requirements
- enterprise requirements for rearing of newborn and young animals and recording and reporting requirements
- relevant legislative animal welfare health and work health and safety requirements especially as they relate to safe animal handling techniques, feeding, animal treatments, and rearing and caring for newborn and young animals

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK319 Slaughter livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare site, equipment and livestock for slaughter safely and appropriately
- conduct the slaughter of livestock in compliance with relevant requirements and regulations
- complete slaughter operations
- dispose of, or destroy offal and waste products in an environmentally responsible manner and according to State/Territory and local authority health standards
- comply with all relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements
- preparation, selection and use of the site, equipment and livestock for the slaughter
- methods and procedures for the humane slaughter of livestock
- preparation, processing and disposal of the carcass and its parts after slaughter
- post-slaughter procedures for the site and equipment
- anatomy and physical features of the species being slaughtered
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species
- codes of practice for the welfare and husbandry of relevant livestock species

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a live animal:

- prepare for slaughter
- slaughter animal
- complete slaughter operations

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK320 Coordinate and monitor livestock transport

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- interpret transport plan requirements
- coordinate the transport of livestock
- safely, load livestock while maintaining load within specifications
- distribute animals on transport to prevent overcrowding and minimise risk of injury
- obtain relevant permits and comply with movement restrictions
- ensure documentation and livestock identification is in place
- ensure appropriate recording including use of technology where applicable
- safely unload livestock
- review health and condition of livestock after transit
- demonstrate safe and humane handling of livestock according to animal welfare codes of practice
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and legislative requirements for the transport of livestock
- model codes of practice for the welfare of animals Land transport (various species)

- animal welfare, biosecurity and work health and safety legislative requirements
- environmental codes of practice with regard to vehicle operation and livestock transport
- market requirements in relation to the quality and condition of livestock
- process of sourcing and costing transportation alternatives
- livestock transport recording and documentation requirements
- enterprise policies with regard to the use of vehicles and equipment
- relevant documentation requirements and procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK321 Service and repair bores and windmills

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to service and repair bores and windmills. This includes activities such as replacing parts, checking equipment for wear and tear, determining lime deposits, stripping, dismantling or reassembling bores and windmills.

These activities carry risk of falls due to working at heights, injury due to working with moving parts and machinery.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes of practice and manufacturer's specifications

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish bore history and enterprise policy	1.1 Review enterprise records and confirm bore history 1.2 Confirm enterprise bore and windmill service and repair policy with supervisor 1.3 Obtain any required specialist instructions and assistance as appropriate
2. Prepare to carry out service and repairs	2.1 Select and inspect tools, equipment and materials appropriate to job requirements 2.2 Carry out dismantling and stripping of windmill and bore installations appropriately 2.3 Identify hazards in the workplace, assess and control risks appropriately
3. Carry out service and repairs	3.1 Select, use and maintain personal protective equipment appropriately 3.2 Carry out service and repairs to bores, windmills, motors and pumps appropriately 3.3 Report complex faults and repairs and refer for specialist advice and remedial action appropriately 3.4 Retrieve lost equipment appropriately
4. Complete service and repair activities	4.1 Reassemble and test bore and windmill components appropriately for full function and flow 4.2 Clean work site, tools and equipment, return to operating order and store appropriately 4.3 Collect, treat, dispose of or recycle waste from service and repair activities appropriately 4.4 Document information appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK321A Service and repair bores and windmills

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK321 Service and repair bores and windmills

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- apply basic diagnostic techniques
- recognise faults and deterioration of components and carry out repairs to bore, mill heads and pumps to ensure the full function and flow of water supplies
- select and match tools and equipment with work requirements
- apply safe workplace and positive environmental procedures
- read and interpret enterprise policy, maintenance plans, manufacturer specifications and Safety Data Sheets (SDSs)
- effectively communicate with contractors and supervisor, record and report maintenance details and outcomes
- calculate volumes, and measure speed, flow rates and distance
- maintain all components of bores and windmills
- carry out testing procedures to determine correct operation
- refer to bore histories for troubleshooting
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- construction of bores and windmills and maintenance requirements
- diesel engine components, maintenance requirements and repair procedures
- working principles of diesel engines
- drive systems and components
- types and uses of lubricants and other servicing materials

- servicing characteristics of bores and windmills
- types, characteristics, uses and limitations of hand and power tools
- basic diagnostic processes and techniques
- environmental codes of practice with regard to maintenance activities
- work health and safety legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK322 Transport farm produce or bulk materials

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to transport farm produce or bulk materials.

All work must be carried out to comply with workplace procedures, work health and safety, biosecurity legislation and codes of practice.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

Note: relevant vehicles licences are required when farm produce or bulk materials are transported on public roads.

This unit does not apply to livestock transport

Relevant vehicles licences are required when farm produce or bulk materials are transported on public roads.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for the transport of farm produce	1.1 Receive, interpret and clarify briefing, hand-over details, authorisation and clearances appropriately 1.2 Confirm the transportation schedule and organise appropriate equipment and authorised personnel 1.3 Adhere to schedule specifications 1.4 Identify and manage hazards and risks 1.5 Conduct equipment pre-operational checks 1.6 Observe site environmental practices
2. Load, transport and unload farm produce	2.1 Conduct start-up, park and shutdown procedures for plant and equipment 2.2 Determine load appropriately and prevent damage to equipment or loss of load 2.3 Load and secure farm produce 2.4 Transport farm produce 2.5 Ensure vehicles follow approved transport routes and speed limits 2.6 Conduct transport of farm produce 2.7 Unload farm produce or bulk materials 2.8 Coordinate transport of farm produce with harvesting machinery, if required 2.9 Complete transport of farm produce to plan and within the operating capacity of the equipment 2.10 Dispatch produce retain documentation, including weigh bills
3. Protect farm produce quality and integrity	3.1 Maintain hygiene of all surfaces in contact with farm produce 3.2 Protect farm produce from loss, contamination, moisture and pests during transport 3.3 Store farm produce according to enterprise procedures 3.4 Clean and maintain storage and holding areas, keeping potentially hazardous substances at a safe distance 3.5 Monitor the transport environment using temperature data loggers, if applicable 3.6 Check quality of farm produce at unloading 3.7 Monitor batches of farm produce for isolation and product integrity, where applicable

Element	Performance criteria
4. Carry out equipment maintenance	4.1 Conduct visual inspection and fault finding 4.2 Conduct routine operational servicing

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK322A Transport farm produce or bulk materials

Assessment Requirements for AHCLSK322 Transport farm produce or bulk materials

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- manoeuvre transport machinery or truck in difficult sites and conditions
- drive truck safely using all available controls
- clean and store vehicles and equipment
- identify operational faults
- complete time sheets and other maintenance records as required
- use communication methods to advise and anticipate conditions
- interpret plans, reports, maps, specifications
- maintain and store records, reports, and log books
- select, fit, and use personal and protective equipment
- operate and load a truck in accordance with Road Traffic Regulations
- plan, load, unload and move a range of loads over a full range of road conditions in accordance with Road Traffic Regulations
- conduct pre-start and post-operational checks
- maintain the quality and integrity of transported produce
- apply relevant work health and safety requirements
- apply relevant biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturers and work site requirements including property conditions, and hazards on the property and on the open road

- road traffic laws and licensing requirements
- organisational procedures for use of vehicles and equipment
- relevant work health and safety requirements for storage of materials and equipment
- work health and safety legislation, codes of practice, procedures, and principles, including manual handling
- emergency procedures
- site safety requirements
- equipment safety requirements
- operational, start up, and shutdown procedures and checks
- hauling and towing procedures
- receipt and document requirements at both ends of the transport operation
- differences in handling and operation with bagged and bulk loads
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs to the Assessment Conditions.

AHCLSK323 Maintain and monitor feed stocks

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and monitor livestock feed stocks.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine quantities of stockfeed required	1.1 Undertake stocktake of stockfeed and update inventory 1.2 Check livestock feed plans and compare required quantities with

Element	Performance criteria
	quantities in stock
2. Place orders with suppliers	2.1 Place orders for stockfeed with suppliers 2.2 Ensure orders specify quantity, quality, delivery date, delivery site and any special instructions
3. Receive feed into store	3.1 Check delivery manifest and report discrepancies to supplier and supervisor 3.2 Check quality of stockfeed and report problems to supplier and supervisor 3.3 Transfer stockfeed into appropriate storage containers 3.4 Update and file records and labels
4. Prepare and maintain feed storage area and containers	4.1 Identify work health and safety hazards and take action to minimise risk 4.2 Clean feed storage area and containers according to enterprise cleaning schedule 4.3 Organise stocks of stockfeed according to enterprise inventory management policy 4.4 Label stockfeed correctly 4.5 Clean feed storage containers before refilling 4.6 Check feed storage area and containers regularly for signs of pest infestation 4.7 Identify problems with feed storage facilities and resolve or report to supervisor for resolution 4.8 Dispose of stockfeed that does not meet quality standards

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK323A Maintain and monitor feed stocks

Assessment Requirements for AHCLSK323 Maintain and monitor feed stocks

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake feed stocktake and update inventory
- determine quantities of stockfeed required
- place stockfeed orders with suppliers
- receive feed into feed store
- prepare and maintain feed storage areas and containers
- dispose of spoiled feeds
- implement relevant work health and safety and biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- stocktaking and inventory for stockfeeds
- enterprise livestock feeding plans and determination of stockfeed quantities and qualities
- procedures for ordering stockfeeds
- procedures for taking, checking and handling stockfeeds during delivery
- post-delivery handling and storage of stockfeeds
- quality parameters of stockfeeds and feed ingredients
- documentation and record keeping requirements for stockfeeds
- procedures for cleaning feed storage areas and containers
- pest management of feed storage areas and containers
- monitoring, maintenance and servicing of feed storage facilities
- feed disposal methods and management
- relevant work health and safety and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK324 Care for and train working dogs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, train and care for working dogs in the rural industry.

This unit applies to farm workers who use dogs to handle livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. Individuals must be aware of state/territory regulations and licensing requirements for keeping working dogs.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify workplace requirement and select working dog	1.1 Identify and confirm working dog requirements for the workplace 1.2 Research suitable working dog breeds and determine availability 1.3 Inspect dogs for suitability and make selection according to workplace criteria
2. Develop and implement training program for working dog	2.1 Teach commands for working tasks 2.2 Introduce the dog to a small flock in a confined area 2.3 Train the dog to handle larger numbers in more open areas 2.4 Train the dog on specialist skills such as backing and forcing 2.5 Assess existing and potential hazards associated with handling livestock in the workplace and implement measures to control risks 2.6 Comply with animal welfare codes of practice
3. Maintain health and welfare of working dog	3.1 Monitor and maintain health and condition of the working dogs 3.2 Provide an adequate and balanced diet to meet nutritional requirements of the working dogs taking into account work load/training program 3.3 Seek veterinary advice and arrange for or administer preventative health treatments 3.4 Provide and maintain appropriate housing facilities and equipment in line with animal welfare requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK324 Care for and train working dogs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the workplace need for working dogs
- select working dog to meet workplace requirements
- develop working dog training programs and apply effective training methods
- maintain health and welfare of the working dog
- follow relevant work health and safety and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- working dog breeds and behaviour
- use of working dogs in the workplace
- effective working dog training systems and procedures
- livestock handling methods and techniques
- care, husbandry and management procedures for working dogs
- signs of health, anatomy and physiology of working dogs
- common illnesses of working dogs and preventative health strategies
- relevant State/Territory legislative and regulatory requirements with regard to work health and safety, animal welfare, biosecurity and the registration and care of domestic dogs

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- develop and implement training program for working dog

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK325 Castrate livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe operating procedures
- handle animals humanely and with minimal stress in line with animal welfare legislation codes of practice
- perform a recommended method of castration with attention to hygiene
- administer pre or post operative treatments
- monitor castrated animals
- carry out animal husbandry tasks in hygienic manner
- record the number and health of animals post castration
- work effectively as a part of a team and communicate with supervisors
- apply relevant work health and safety requirements
- apply relevant animal welfare and environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- male anatomy as it relates to castration
- castration methods for various species of livestock
- organisation castration, hygiene and animal welfare procedures and policies
- industry standards for the care and husbandry of animals
- industry and enterprise requirements for debris, waste material and animal residues disposal
- relevant work health and safety legislation, codes of practice and industry and enterprise requirements
- relevant animal welfare legislation, codes of practice and industry and enterprise requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK326 Mix and mill standard stockfeed

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable control measures
- follow enterprise mill and mix stockfeed work program
- order and store feeds and ingredients
- identify feed ingredients and obtain from storage locations
- measure ingredients in the specified ratios and quantities
- mix feeds and ingredients in line with industry quality standards and requirements
- recognise and rectify minor operational faults and perform routine maintenance
- complete records and documentation of feed use and volumes for the shed
- conduct post-procedural hygiene and administration activities
- implement relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise requirements for mixing and milling feeds
- relevant work health and safety requirements
- tools and equipment machinery used for mixing and milling feeds, and the cleaning, maintenance, servicing and storage of such tools and equipment
- environmental impacts of mixing and milling feeds and strategies to mitigate such impacts
- type of feed ingredients and procedures for ordering, handling and storage of feed ingredients

- the impact of seed, chemical, insect and fungal contamination of grain. This includes an awareness of the industry process in place to monitor these contaminants - the National Residue Survey (NRS), the National Antibiotic Residue Minimisation (NARM) and programmed basket surveys
- measurement equipment for feed ingredients, and their calibration and maintenance
- procedures for mixing, blending and milling feed ingredients and feeds
- documentation and record keeping requirements for mixing and milling feed
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK327 Collect, store and administer colostrum

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain colostrum from suitable donor animals and select suitable frozen colostrum
- handle and feed new born animals appropriately
- handle frozen colostrum according to enterprise and health and safety procedures
- store colostrum for future use
- follow relevant work health and safety and animal welfare requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional needs of newborn animals and the need for feeding colostrum to newborn animals
- selection of suitable donor animals
- methods and equipment used to collect colostrum
- care, husbandry and management of newborn animals
- handling of frozen colostrum
- administration of colostrum to newborn animals and their post-administration care
- storage procedures of colostrum
- relevant work health and safety and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- obtain colostrum
- administer colostrum to newborn animals

Assessors must satisfy current standards for RTOs.

AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to remove and facilitate reuse of effluent and manure from an intensive livestock production system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

The production enterprise may be required to comply with local council, State or Commonwealth licensing requirements for operations involving effluent and manure.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with effluent disposal equipment	1.1 Interpret work to be undertaken from work program where necessary, and confirm with management 1.2 Hold discussions with other workers who may be affected by the maintenance activities to ensure continued smooth operation of the production process 1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment (PPE) 1.5 Select, check and maintain tools and equipment suitable for the work to be undertaken
2. Maintain and operate effluent storage and disposal system	2.1 Observe and follow regulatory and industry requirements and standards for effluent operations 2.2 Service and maintain effluent removal and disposal equipment 2.3 Use effluent disposal systems according to system design in compliance with approval granted by local government and state environment protection authority 2.4 Carry out techniques for irrigation compliance with relevant regulatory and industry standards when using liquid effluent storages 2.5 Flush and drain in-shed effluent pits as required 2.6 Turn composted effluent in compliance with relevant regulatory and industry standards
3. Monitor effluent disposal system	3.1 Check flow rates, pit levels, compost temperatures and equipment regularly to maintain effective operation of the system 3.2 Carry out cleaning procedures and hygiene practices 3.3 Identify environmental impacts of effluent disposal and reuse, assess likely outcomes and if necessary, take responsive action
4. Conduct hygiene and administration activities	4.1 Clean equipment according to manufacturer specifications 4.2 Clean and store attachments and other ancillary equipment according to manufacturer specifications 4.3 Dispose of all containers, leftover fluids, waste and debris from the operations safely and appropriately 4.4 Complete all required records and documentation accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK328A Remove and facilitate reuse of effluent and manure from an intensive production system

Assessment Requirements for AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable controls
- make preparations to work with effluent disposal equipment
- maintain and operate effluent storage and disposal system in compliance with approval granted by local government and state environment protection authority
- monitor effluent disposal system
- conduct cleaning and hygiene practices associated with effluent operations
- implement relevant environmental practices
- complete organisational records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- an enterprise work program and program requirements for effluent operations
- relevant work health and safety requirements
- tools, equipment and systems used for effluent operations (effluent handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for effluent operations
- environmental impacts of effluent operations and liquid effluent irrigation, and strategies to mitigate such impacts
- irrigation techniques for liquid effluent
- functions, maintenance and service of effluent pits
- methods and maintenance of effluent composting

- methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
- documentation and type of records that need to be completed for effluent operations
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK331 Comply with industry animal welfare requirements

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to comply with industry animal welfare requirements in the production of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts, and use discretion and judgement in the selection and use of available resources. They provide and communicate solutions to a range of predictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine and identify animal welfare requirements	1.1 Determine legislative, regulatory and industry and enterprise animal welfare requirements 1.2 Identify workplace animal welfare concerns 1.3 Propose actions that can be taken to address identified workplace animal welfare concerns
2. Comply with animal welfare requirements	2.1 Carry out workplace animal welfare procedures and requirements consistently 2.2 Report non-conformance to supervisor 2.3 Take appropriate corrective action as advised by supervisor and in compliance with workplace procedures 2.4 Complete appropriate record keeping of workplace animal welfare concerns and actions taken
3. Participate in animal welfare process	3.1 Recognise animal welfare issues in the workplace, report to supervisor or management and take appropriate corrective action as required 3.2 Participate in workplace and/or industry animal welfare induction, training and programs 3.3 Participate in workplace and/or industry animal welfare emergency training

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK331 Comply with industry animal welfare requirements

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine and identify animal welfare requirements of relevant legislations, regulations, codes of practice and industry and workplace procedures
- comply with animal welfare requirements by carrying out workplace procedures, reporting non-conformance, taking appropriate corrective actions and completing record keeping
- participate in workplace animal welfare processes by reporting animal welfare issues and taking part in animal welfare induction, training and programs
- participate in workplace and/or industry animal emergency training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations and codes of practice
- basic requirements for ensuring the welfare of livestock described in the relevant Codes of Practice
- workplace and/or industry animal welfare procedures and animal emergency procedures
- workplace and/or industry procedures for reporting and recording animal welfare concerns, non-conformance and malpractice in the workplace

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor animal health status	1.1 Source information on animal health programs from the livestock production plans 1.2 Assess animal health status by routinely inspecting each animal from induction to despatch by having unimpeded access and opportunity to observe behavioural characteristics, signs of ill-health and freedom of movement 1.3 Source information on past treatment(s) from the individual animal's identification tag or identification marking and enterprise records 1.4 Identify husbandry practices appropriate for the health status of the individual animal: follow-up observation, isolation from other livestock and/ or treatment
2. Identify animals requiring treatment	2.1 Identify individual animals with potential health issues or in ill health 2.2 Determine the type and severity of infection or injury and identify and/or isolate affected animals requiring treatment
3. Determine the type and scope of treatment	3.1 Determine the need for, type and scope of treatment by seeking expert or veterinary advice 3.2 Prepare equipment, materials and treatment site 3.4 Identify work health and safety hazards, assess risks and implement control measures in relation to the treatment 3.5 Record withholding periods and other details of treatment
4. Administer treatment	4.1 Check, select and use suitable personal protective equipment (PPE) 4.1 Handle and restrain animals safely and humanely 4.2 Administer treatment appropriately according to chemical label or veterinary advice 4.3 Identify treated animals from non-treated animals to ensure compliance with the required Withholding Period (WHP) 4.4 Prepare and move treated animals as planned
5. Carry out post-treatment procedures	5.1 Monitor animal health and condition post-treatment and report on animal's progress 5.2 Identify, environmental impacts associated with the administration of treatment, assess likely outcomes and take responsive action 5.3 Clean equipment and worksite, and dispose of organic and

Element	Performance criteria

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor animal health status
- identify animals requiring treatment
- determine the type and scope of treatment
- identify work health and safety hazards, assess risks and implement control measures associated with administering treatments to animals
- handle, restrain and treat animals without compromising animal welfare
- monitor animals post treatment and complete workplace recording requirements
- implement relevant animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information to be gathered from livestock production plans, animal health plans and individual animal records
- signs of health, signs of ill health and methods of assessing livestock health
- biosecurity requirements, husbandry and management strategies and procedures for ill or injured animals
- methods for humane and safe handling and restrain of animals
- common diseases of the livestock species, and strategies for treatment and management of such diseases
- typical and common medications, vaccines, the routes of administration in animals and keeping/storage of such medications
- work health and safety requirements associated with administering treatments to animals

- principles and regulations for veterinary medicines treatment and Withholding Periods in animals
- environmental impacts of administering treatments to animals and strategies to mitigate these impacts
- enterprise heat load management plans
- types of and disposal methods for organic and non-organic waste
- documentation and type of records that need to be completed for animal treatments

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor ration and water levels and respond to issues as required
- inspect pen status and condition and respond to issues as required
- assess manure condition and respond as required
- check pen hygiene and respond to issues as required
- report and record incidents
- communicate with work team and supervisors
- implement relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information on rations, water, housing infrastructure and feeding infrastructure that can be gathered from livestock production and feeding plans
- principles and elements of nutrition and the impact of nutrition on livestock production
- nutritional requirements of different livestock species, classes and life stages
- impacts of poor nutrition and unsuitable rations on livestock production, and strategies to mitigate these impacts
- how rations can be adjusted or modified to benefit sick animals
- housing requirements and housing management of different livestock species, classes and life stages
- feeding and water requirements, and feeding and water management of different livestock species, classes and life stages

- impacts of unsuitable housing, feeding and watering infrastructure on livestock and strategies to mitigate these impacts
- effects of weather on housing and feeding infrastructure and strategies to mitigate such effects
- methods for using manure as assessment of livestock health
- methods for maintaining, cleaning and removing waste from housing and feeding infrastructure
- documentation, record keeping and methods for monitoring effectiveness of adopted strategies
- relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK334 Plan, prepare and conduct mulesing procedures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct the most efficient and humane mulesing procedure in circumstances where all alternative methods of breech flystrike prevention have been evaluated and mulesing is considered the most appropriate of these for the long-term welfare of the sheep.

This unit applies to sheep farmers and contractors in the livestock industry who normally operate under limited supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct pre-mulesing evaluations	1.1 Identify and comply with relevant State/Territory legislation, regulations and animal welfare standards and guidelines 1.2 Identify industry standards and guidelines 1.3 Seek expert advice and discuss alternative strategies to manage flystrike susceptibility prior to undertaking mulesing procedures 1.4 Confirm workplace requirements for use of mulesing 1.5 Conduct pre-operative evaluation of sheep 1.6 Assess risks associated with mulesing procedure and implement measures to control the risks such as using appropriate Personal Protective Equipment
2. Prepare for mulesing operations	2.1 Identify and order all required supplies and equipment in advance 2.2 Monitor weather conditions to determine optimal conditions for operation and recovery of sheep from the procedure 2.3 Select suitable time of day for operation to minimise the separation time of lambs and ewes 2.4 Engage adequate number of skilled workers 2.5 Select appropriate yards, paddocks and pastures for each mob and each day to allow adequate time for mothering up of lambs after separation from the ewes 2.6 Use appropriate procedures for mustering, movement and handling so that stress to sheep is kept to a minimum 2.7 Allow lambs to settle and cool after yarding
3. Select, maintain and use appropriate equipment	3.1 Maintain all equipment in clean, hygienic and working conditions to reduce the risk of infection and cross-infection in sheep 3.2 Maintain cradles to be used for mulesing in good working condition and can be operated to ensure minimal risk to the operator or lamb, especially when loading and unloading 3.3 Set, grind and sharpen mulesing shears to working standards 3.4 Disinfect mulesing shears after sharpening, before use and between each animal 3.5 Prepare wash-down, soaking and disinfecting containers for use 3.6 Prepare and test chemical application equipment to check for operational efficiency 3.7 Clean and disinfect all equipment at the end of operation and store appropriately to minimise contamination

Element	Performance criteria
4. Conduct mulesing procedures	4.1 Conduct all procedures in accordance with work health and safety, animal welfare and biosecurity requirements 4.2 Maintain a high standard of hygiene throughout the operation in relation to facilities, operators' hands, handling and equipment 4.3 Handle lambs calmly and use appropriate restraints such as cradles 4.4 Perform mulesing procedure in accordance with model code of practice and industry standards 4.5 Apply pain relief to the wound immediately after the procedure in accordance with industry standards and legislative requirements, and following label and Safety Data Sheet (SDS) instructions 4.6 Apply insecticide dressing to the surrounding intact wool bearing skin (not the wound) immediately after the procedure in accordance with industry standards and following label and SDS instructions 4.7 Continually evaluate wound symmetry, size and position, and breaks in selvage (muscle fascia) 4.8 Remove lambs from cradles so they land gently on all four feet
5. Conduct post-mulesing management procedures	5.1 Allow lambs, following release, to 'mother-up' to ewes as soon as possible 5.2 Provide immediate treatment for lambs that are abandoned or unable to stand or walk 5.3 Monitor lambs for abnormal signs such as infection and septicaemia 5.4 Maintain and update required documentation and records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK334A Plan, prepare and conduct mulesing procedures

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK334 Plan, prepare and conduct mulesing procedures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of mulesing
- identify optimal conditions for carrying out mulesing procedures
- conduct pre-operative evaluation of lambs submitted for mulesing procedures and risk assessment in consultation with sheep manager
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with industry best standards and legislative requirements
- follow low stress stock mustering, movement and handling procedures
- carry out mulesing operations in accordance with industry recognised best practice mulesing techniques and hygiene standards
- follow appropriate procedures and label directions to provide pain relief plus insecticide dressing as required
- monitor animals' behaviour post-mulesing for health and well-being including the ability to recognise signs of post-mulesing complications
- communicate post-mulesing management requirements to sheep manager
- accurately document and maintain appropriate records
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare and biosecurity requirements
- relevant codes of practice and industry standards for mulesing

- reasons and requirements for mulesing in sheep
- body condition scoring (BCS), breech wrinkle scoring (BRWR) and breech cover scoring (BCOV) in lambs and adult sheep
- methods and strategies of flystrike control
- effects of weather, environmental, facility, flock, individual animal and human factors on mulesing operations
- use and maintenance of materials and equipment for mulesing
- principles and maintenance of hygiene in mulesing operations
- methods and techniques for handling and restraint of adult sheep and lambs
- use of pain relief and insecticide treatment in mulesing procedures
- anatomy and external features of sheep
- health and animal welfare implications of post mulesing complications in sheep
- signs of ill health and related management strategies in sheep
- use of and regulatory considerations for the use of disinfectants
- relevant care, husbandry and management strategies for sheep flocks
- relevant legislation, regulations and codes of practice, including those relating to work health and safety, animal welfare, veterinary practitioner/surgeons' Acts, stock diseases and waste disposal, agricultural and veterinary chemical use

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- conduct mulesing procedures

Assessors must satisfy current standards for RTOs.

AHCLSK337 Train, care for and ride horses for stock work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Application

This unit of competency describes the skills and knowledge required to handle, ride and train horses to muster, move and separate livestock. It covers caring for horses and equipment, and addresses the potential risks associated with working with and around horses and livestock.

This unit applies to individuals who have experience working in the livestock industry and in riding educated, compliant and manageable horses to muster and check stock on grazing properties. Work is normally carried out independently, under broad direction according to workplace procedures.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) generally have the same meaning in the workplace. In jurisdictions where the national model WHS legislation has not been implemented, RTOs must contextualise the unit of competency by referring to current OHS legislative requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- AHCLSK218 Ride educated horses to carry out basic stock work

Note the following chain of prerequisites that also applies to this unit.

Unit of competency	Prerequisite requirement
AHCLSK218 Ride educated horses to carry out basic	ACMEQU202 Handle horses safely

stock work	ACMEQU206 Perform horse riding skills at walk, trot and canter
ACMEQU202 Handle horses safely	ACMEQU205 Apply knowledge of horse behaviour
ACMEQU206 Perform horse riding skills at walk, trot and canter	ACMEQU202 Handle horses safely

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare horses for work	1.1 Select, use and maintain appropriate personal protective equipment (PPE) 1.2 Select, muster, or bring from paddock, and assess the suitability of the horse for the task 1.3 Catch and handle horses safely and humanely 1.4 Check horse health, soundness, and fitness level to ensure it is capable to complete the work required 1.5 Select, check, and maintain working equipment, according to instructions 1.6 Groom horse prior to exercise or work 1.7 Fit working gear to individual horse
2. Train horses for stock work	2.1 Identify and assess risks, and implement risk controls associated with horse riding and horse training 2.2 Assess current level of education of the horse 2.3 Train horse to calmly carry out required movements for working stock, including stops, turns and rollbacks 2.4 Train horse to work and control a mob of livestock as a whole 2.5 Train horse to safely handle a single beast and to return it to the

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>mob safely according to industry practices</p> <p>2.6 Train horse to separate a beast from a mob as instructed and according to industry practices</p> <p>2.7 Train horse to calmly accept a stock whip being used by the rider, if required by the workplace, according to industry practices</p> <p>2.8 Train horse to work with working dogs where required by workplace</p> <p>2.9 Utilise agreed emergency procedures when training horses in required safety movements, including one-rein stops</p>
3. Ride horses to carry out stock work	<p>3.1 Interpret work program to determine work to be undertaken, and confirm with management</p> <p>3.2 Select horses for the task, taking into consideration task requirements and own skill level</p> <p>3.3 Catch and handle horses safely and humanely</p> <p>3.4 Practise and reinforce training of horse while carrying out routine stock work</p> <p>3.5 Take corrective action to re-train horse where necessary</p>
4. Provide post ride care and maintain saddlery and equipment	<p>4.1 Remove gear, and groom, wash and/or clean horse according to industry practices</p> <p>4.2 Water and feed horse in line with workplace procedures and safe work practices</p> <p>4.3 Release horse safely to appropriate enclosure, paddock or yard</p> <p>4.4 Check, clean, maintain and store working gear</p> <p>4.5 Repair working gear according to industry practices</p> <p>4.6 Apply the workplace's biosecurity and sustainability policies</p>
5. Maintain horse health and condition	<p>5.1 Monitor horses as a part of daily routines to identify signs of ill health, injury and poor condition</p> <p>5.2 Muster or catch horses in need of attention, and report and record condition in line with workplace procedures</p> <p>5.3 Administer prescribed treatments for common ailments, under supervision of the veterinarian or manager</p> <p>5.4 Safely check horse legs and feet, safely clean out feet, and correctly identify lameness and potential causes for lameness</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.5 Organise shoeing according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Comprehend information in workplace documentation
Writing	<ul style="list-style-type: none"> Record data and observations about horses in workplace forms accurately
Navigate the world of work	<ul style="list-style-type: none"> Follow industry guidelines and workplace procedures, including safe work and safe horse handling practices and animal welfare principles, relevant to own role
Interact with others	<ul style="list-style-type: none"> Follow accepted communication practices and protocols for reporting issues to management using accurate industry terminology
Get the work done	<ul style="list-style-type: none"> Plan, sequence and prioritise multiple tasks, and assemble equipment to complete activities, taking safety and risk factors into consideration

Assessment Requirements for AHCLSK337 Train, care for and ride horses for stock work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has cared for, ridden and trained at least two different horses for stock work. The following points must be demonstrated for each horse:

- identifying work health and safety hazards and implementing safe work procedures
- selecting and maintaining saddlery and equipment
- handling and preparing horses for riding and livestock work
- using calm and humane handling methods to minimise undue stress and risk to horses, handlers, and livestock according to animal welfare requirements
- developing a working relationship with the horse or horses in own care
- monitoring health and condition of horses, including carrying out basic hoof care and cleaning
- identifying signs of ill health, injury, or poor condition and administering basic treatments
- training horses to:
 - calmly carry out required movements for working stock, including safety movements, stops, turns and rollbacks
 - work and control a mob of livestock as a whole
- riding, controlling and stopping the horse to carry out checking, mustering and moving livestock as part of property operations
- assessing and monitoring horse behaviour during riding activities and taking corrective action if required
- completing post-ride activities including:
 - cleaning, feeding and watering horse
 - checking and maintaining tack
 - completing records as required by workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common horse colours and markings, gender and other identifying features
- horse movement and behavioural characteristics, and learning theories relevant to stock work
- livestock behaviour and how this is utilised to minimise stress for horse and livestock
- relevant industry standards and practices, and workplace procedures and guidelines for horse riding and riding safety, including lungeing, riding in a yard before riding outside, and one-rein stops
- approaches to horse education for stock work and associated learning theories
- basic care husbandry and management procedures for horses
- common signs of unsoundness, including injury, disease, work stress or other disorders in horses
- basic anatomy and physiology of the horse
- use of horses for workplace operations
- care and maintenance of working gear
- horse conformation and work readiness or level of education
- horse handling and riding techniques
- key requirements of work health and safety and animal welfare regulations, and codes of practice relevant to working and interacting with horses.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions containing livestock handling facilities
- resources, equipment and materials:
 - various live, suitably educated, compliant and manageable horses to be trained for stock work and assessed as suitable for the experience and skill of the individual
 - livestock to use in training horses
 - appropriate tack for individual, horse and stock work activity
 - personal protective equipment (PPE) correctly fitted and applicable to activity for the individual
- specifications:
 - work instructions and workplace procedures for training, caring for and riding horses for stock work.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCLSK401 Develop feeding plans for a production system

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop feeding plans for a production system.

This unit applies to supervisors and unit managers who are responsible for nutrition and feeding in an intensive livestock production facility.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
---------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select ingredients for feed	<p>1.1 Identify nutritional needs of livestock from information available and class of livestock</p> <p>1.2 Source nutritional advice from the appropriate industry or organisational sources</p> <p>1.3 Select ingredients that provide for the identified nutritional need of livestock</p> <p>1.4 Select suppliers of ingredients on the basis of quality and cost of feed</p> <p>1.5 Determine quantities of individual ingredients required, in conjunction with advice from other available information and expert/supplier advice</p>
2. Determine feed rations and schedules	<p>2.1 Determine quantities of total feeds required for livestock from the production program, in conjunction with advice from other available information and expert advice</p> <p>2.2 Take into consideration the results of any available laboratory testing when determining the quantities of each ingredient used</p> <p>2.3 Schedule feeding and allocate responsibility for feeding in line with the production program and other operations occurring within the site</p> <p>2.4 Identify the method(s) of providing feed to livestock identified in the production plan and confirm with supplier of ingredients and other expert advice</p>
3. Supervise mixing and storage of feed	<p>3.1 Organise secure and hygienic storage of feed and ingredients to eliminate contamination and infestation</p> <p>3.2 Select storage location to ensure safe access</p> <p>3.3 Organise rotation of feedstocks and replacements to arrive at the appropriate time to ensure optimum freshness</p> <p>3.4 Organise mixing of feed to suit the needs of the livestock, the identified nutritional requirements and the equipment available within the organisation</p> <p>3.5 Add medications to feeds according to enterprise procedures if required</p> <p>3.6 Take, package and label samples of feed and forward them to the laboratory for testing according to the schedules described in the production program</p> <p>3.7 Check calibration of measuring equipment and calculation of quantities at regular intervals</p>

Element	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.8 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls for feed preparation and feeding operations</p> <p>3.9 Comply with enterprise biosecurity policies</p>
4. Supervise feeding	<p>4.1 Supply rations to the livestock according to the production program and schedules devised</p> <p>4.2 Make potable water available continuously to the livestock</p> <p>4.3 Monitor the health and wellbeing of the livestock in line with enterprise requirements and animal welfare policies</p> <p>4.4 Monitor and report any change in production levels as a direct result of changes to feed types, ingredients or schedules</p> <p>4.5 Give advice to operational staff during the feeding operation when requested, or when the need is observed</p> <p>4.6 Remove all waste materials and substances from the site and store, or disposed of, according to legislation, environmental policies and enterprise procedures</p> <p>4.7 Collate and store documentation according to the requirements of the organisation</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- discuss feed and nutritional content with nutritionist and managers
- identify a range of raw ingredients
- operate a range of feeding equipment
- perform basic trouble shooting of the feeding operation
- monitor animal intake and performance
- read and interpret manufacturers' specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- interpret and apply task instructions, communicate with work team and supervisor, and record and report faults, workplace hazards and accidents
- accurately measure and calculate volumes, consumption and storage requirements
- complete the required records of feed use and livestock performance
- comply with enterprise biosecurity, environmental and animal welfare procedures and policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- control of common livestock diseases and preventative measures including the placement of medications in feed
- growth and development in livestock
- milling systems

- dietary needs and analysis of feed samples
- organisations sampling requirements and techniques
- where to access appropriate legislative requirements, manufacturer's instructions and enterprise procedures/instructions
- silo operations and configuration, machinery and operating practices
- codes of practice and enterprise policies with regard to work health and safety, biosecurity, environment and animal welfare
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures.

Assessment Conditions

Competency is to be assessed in the workplace, OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine nutritional requirements for livestock	1.1 Determine nutritional value of pasture and feedstuffs 1.2 Identify and assess livestock production status according to enterprise requirements 1.3 Determine essential requirements for livestock nutrition according to assessed livestock condition
2. Assess pasture feed	2.1 Determine grazing management strategy to ensure the sustainable stocking capacity of pasture 2.2 Monitor pasture for quantity and quality to ensure continual and consistent supply of nutrients to livestock 2.3 Monitor and assess pasture intake according to identified nutritional requirements of livestock
3. Determine supplementary feeding program	3.1 Determine economic basis to supplementary feeding according to enterprise requirements 3.2 Identify and determine types of supplementary feed for all classes of livestock 3.3 Determine supplementary feeding program to fill the pasture shortfall for predicted pasture growth
4. Develop livestock feeding plan	4.1 Develop and review feeding plan to ensure it remains responsive to changing conditions 4.2 Identify and carry out suitable feed conservation methods or fodder sources in preparation for abnormal conditions 4.3 Select a system of feeding that supplies the appropriate amount of feed to the herd/flock to meet condition and growth needs, and that meets production requirements of the business 4.4 Prepare a feed budget according to the selected system of feeding 4.5 Document data for continual assessment and effective management planning

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK402 Develop livestock feeding plans

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research predicted seasonal pasture production for the area
- estimate the feed value of a standing pasture at different times of the year
- calculate the feed demand for different types of livestock and production phases
- match feed supply and demand
- assess feeding plan alternatives
- develop and document a feeding plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional and daily energy requirements of livestock
- water quality and livestock tolerances
- nutritional value of different feedstuffs
- assessment procedures to ascertain livestock condition
- methods of assessing pastures quality and quantity
- pasture livestock carrying capacity
- supplementary feeding strategies
- change in nutritional requirements during late pregnancy and lactation

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Provide information about animal welfare to the team	1.1 Explain the relevant provisions of animal welfare regulations and codes of practice to the work group 1.2 Provide information on workplace animal welfare policies, procedures and programs in a readily accessible manner 1.3 Provide information about identified animal welfare requirements to the group and individuals in a broad workplace context and in the context of the individuals' job roles
2. Facilitate the participation of workers in animal welfare compliance	2.1 Implement and monitor workplace procedures for compliance with animal welfare procedures 2.2 Explain procedures for reporting animal welfare concerns, grievances and complaints to workers, and action that will be taken to address these concerns, grievances and complaints 2.3 Manage and resolve animal welfare concerns, grievances and complaints according to workplace procedures, or refer to the appropriate personnel where necessary
3. Implement and monitor workplace animal welfare procedures	3.1 Report existing and potential animal welfare concerns, and take action to address these concerns according to workplace procedures 3.2 Maintain detailed records of animal welfare concerns, grievances and complaints, and actions taken 3.3 Monitor implementation of workplace animal welfare procedures to ensure ongoing adherence to and effectiveness of these procedures
4. Implement workplace procedures for dealing with animal welfare emergencies	4.1 Implement workplace procedures for dealing with animal welfare emergencies 4.2 Record and report animal welfare emergencies to workplace management or relevant authorities 4.3 Implement measures to prevent recurrence and minimise risk of animal welfare emergencies
5. Implement and monitor workplace procedures for providing animal welfare training	5.1 Identify animal welfare induction and training needs 5.2 Implement both on and off-the-job animal welfare induction and training for work group

Element	Performance criteria
6. Implement and monitor workplace procedures for maintaining animal welfare records	6.1 Implement and monitor procedures to maintain animal welfare records 6.2 Use aggregate information from animal welfare records to implement animal welfare programs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK404 Implement and monitor animal welfare programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- provide information about animal welfare to the work group and individuals in the workplace
- facilitate the participation of workers in animal welfare compliance
- implement and monitor workplace procedures for animal welfare
- implement workplace procedures for animal welfare emergencies
- implement and monitor staff training in animal welfare
- maintain animal welfare records
- implement relevant work health safety animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations, codes of practice and guidelines including:
 - Australian Animal Welfare Strategy
 - Animal Welfare Act or Prevention of Cruelty to Animals Act or equivalent specific to the State or Territory
 - Australian Standards and Model Codes of Practice specific to the livestock or industry sector
 - industry requirements and standards for animal welfare for the animal species
- animal welfare emergencies procedures for:
 - animal disease or injury
 - damage to facilities where animals are housed

- animals which have escaped from the normal control of the workplace
- road accidents when moving and transporting animals
- inclement weather - flooding, strong wind, lightning, storm, extreme temperatures
- fire
- power failure
- water or feed failure or contamination
- need for animal welfare in the workplace
- requirements for ensuring the welfare of livestock described in the relevant codes of practice
- workplace policies, procedures, guidelines and standard operating procedures relating to animal welfare
- relevant work health safety animal welfare and biosecurity requirements and practices in the context of animal welfare

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK405 Implement intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine measurable indicators, specifications and targets for the intensive enterprise assess the resources required for unit operations
- establish processes/strategies, procedure and controls to meet quality assurance requirements and production targets
- communicate production program to relevant personnel and complete administration activities
- manage livestock and the production environment
- implement quarantine procedures and monitor disease status of stock
- manage effluent and waste generated by production operations
- monitor and adjust production system for output, QA compliance, costs and profitability.
- prepare recommendations for future production programs based on the conduct of the operations, the data collected and the discussions with enterprise staff and contractors
- implement relevant work health and safety, biosecurity, animal welfare and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type and use of information that can be gathered from enterprise programs, documents and records
- types of resources required, types of products, methods for assessing and calculating resources and products by using information from enterprise programs, documents and records

- type of measurable indicators, specifications and targets for the production system using information from enterprise programs, documents and records
- functions, parameters and scope of enterprise production programs and production plans
- relevant regulatory, industry and enterprise approvals, licences, authorities, documentation, records and reporting requirements for enterprise production operations
- manpower, materials and equipment requirements for carrying out effective and efficient enterprise production operations
- relevant work health and safety requirements
- signs of health, signs of ill health and methods of assessing livestock health
- types and functions of housing and feeding infrastructure relevant to the enterprise production operations and methods for assessing damage, wear and tear to infrastructure
- techniques, procedures and requirements for post-mortem examination of livestock carcasses
- common diseases of livestock, and methods for assessing and evaluating disease status
- relevant biosecurity requirements, quarantine requirements, functions, components and facilities required of an enterprise quarantine system
- regulatory and industry requirements for effluent storage and disposal, types and functions of effluent storage and disposal systems, and methods for assessing and calculating effluent production
- regulatory and industry requirements, methods and systems for waste and debris storage and disposal
- relevant environment requirements and sustainability practices
- functions and aspects of production environment maintenance programs
- relevant animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK406 Oversee animal marking operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor of safe operating procedures
- plan, cost and schedule resource requirements
- prepare and implement a work plan for marking
- prioritise and schedule marking operations
- determine and allocate staff roles and responsibilities
- monitor the health and well-being of animals during and after marking
- manage staff and operations and establish and monitor performance targets
- document and prepare plans and reports for the understanding of staff and management
- implement and monitor relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- management processes and procedures
- cost analysis techniques
- procedures for planning and developing marking plans
- marking and production plans
- codes of practice with regard to animal marking and animal health and welfare
- use of veterinary medicines and their administration
- animal marking methods and procedures
- work health and safety and animal welfare legislation, codes of practice and enterprise requirements
- animal behaviour and nutritional requirements

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK407 Plan and monitor intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and monitor intensive production systems.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information for	1.1 Consult livestock production plan for details of current period

Element	Performance criteria
input to production system planning	planning, enterprise requirements and market expectations 1.2 Analyse key production data to establish unit performance 1.3 Access and analyse information regarding the characteristics of the herd/flock under production 1.4 Access and analyse regulatory, industry and enterprise requirements that impact on the production system 1.5 Access and analyse market information regarding quality, standards and trends for input to the planning process
2. Plan for production	2.1 Determine target unit performance through a comparison with industry and enterprise standards 2.2 Establish and confirm production targets using data and information from unit's livestock production 2.3 Determine resources required to achieve production targets in terms of personnel, equipment and materials 2.4 Organise and engage staff and contractors to suit the production plan and its targets 2.5 Select and order other resources according to enterprise guidelines
3. Plan for animals' needs, environmental and effluent management to ensure welfare of animals and achieve production targets	3.1 Assess and calculate housing, effluent management, environmental management and biosecurity requirements from livestock numbers, market requirements and regulatory requirements 3.2 Evaluate construction and equipment system options and select the best option 3.3 Select materials chosen for construction according to animal welfare needs, cost and efficiency 3.4 Determine aspects of the production environment according to animals' welfare needs, efficiency of systems and market expectations 3.5 Select animal feed based on animal production, the size of the herd/flock, and the suitability of available feed products
4. Determine scheduling and key responsibilities	4.1 Determine scheduling for the production plan taking the range of seasonal, geographic and resourcing factors into consideration 4.2 Determine key responsibilities for specific implementation processes 4.3 Determine documentation and record keeping requirements and put procedures in place to ensure compliance with the range of applicable regulations 4.4 Ensure the production plan, including scheduling and key responsibilities, is clearly documented 4.5 Ensure the production plan includes the type, format, frequency

Element	Performance criteria
	and detail of all reporting requirements by managers and operators
5. Monitor and adjust production plan strategies	5.1 Evaluate the effectiveness of the production plan at key points and make adjustments as necessary 5.2 Identify, monitor and assess environmental impacts and work health and safety hazards relating to the production plan throughout the implementation process 5.3 Make modifications to the production plan as and when necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK407A Plan and monitor intensive production systems

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK407 Plan and monitor intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse key production data, herd/flock information and market requirements
- set production targets and identify resources needed to achieve them
- plan accommodation that meets animal welfare and production requirements
- develop feeding plans and evaluate alternatives for feed purchasing, milling and distribution
- determine work responsibilities and staffing requirements
- handle waste and effluent in line with environmental requirements and legislation
- monitor, review and adjust intensive production plans
- implement relevant work health and safety requirements
- implement relevant biosecurity, animal welfare and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- functions, parameters and scope of production plans
- type and use of information from enterprise production plans and enterprise production data that can be used to formulate production system planning and production unit performance targets
- type and use of information on herd/flock characteristics; regulatory, industry and enterprise requirements; industry and enterprise standards and benchmarks; market specifications for product qualities, product standards and market trends; production unit's history and data, for the formulation of the production system plan and performance targets

- types, quantities, assessment and calculation, procurement and selection of manpower, material, equipment and other resources required for the production plan
- types and functions of, and methods for assessing and calculating requirements of, housing, effluent management and environmental management infrastructure
- efficiency and cost benefit ratios of different types of housing, effluent management and environmental effluent infrastructure and systems, taking into account animal welfare requirements and enterprise production targets
- types, functions and cost benefit ratios of livestock feeds
- relevant aspects and impacts of production cycles and staff job roles on production planning
- relevant regulatory, industry and enterprise documentation, records and reporting requirements for implementation of production plans
- methods for assessing and evaluating production plans
- relevant work health and safety requirements
- relevant environmental requirements and sustainability practices
- relevant biosecurity requirements
- relevant animal welfare practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK409 Supervise animal health programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise animal health programs.

This unit applies to managers of animal production enterprises and covers the process of implementing and monitoring animal health programs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor and assess animal health	1.1 Conduct regular observations to assess animals' health 1.2 Recognise and report symptoms of ill health and common diseases or parasite infestations 1.3 Carry out sampling and arrange testing for internal parasites or diseases where required 1.4 Refer unusual or suspected exotic disease outbreaks for veterinary advice in line with biosecurity legislation and enterprise policies 1.5 Report notifiable diseases and comply with all restrictions and treatment requirements 1.6 Record animal health status 1.7 Identify work health and safety hazards, assess risks and implement and monitor suitable controls 1.8 Select, use and maintain appropriate hygiene measures and suitable personal protective equipment (PPE) 1.9 Monitor and record animal welfare status in line with enterprise and legislative requirements 1.10 Dispose of deceased animals according to environmental policies
2. Implement preventative health strategies	2.1 Identify risks to animal health, and source strategies, from the production plan, relevant expert or specialist consultant where applicable 2.2 Develop and implement a vaccination program to control clostridial and other diseases 2.3 Identify livestock prone to internal parasite build up and plan out the timing of treatments 2.4 Implement or research pest and disease control strategies based around pasture spelling and rotations of different classes of livestock 2.5 Plan the health treatments for animals using an integrated approach 2.6 Use drenches, vaccines and other stock medications according to manufacturer instructions and comply with withholding periods 2.7 Rotate drench groups to minimise the risk of parasite resistance
3. Record and review the animal health program	3.1 Record all treatments and maintain an inventory of stock medicines 3.2 Record health issues and record the results of tissue, organ and blood samples if applicable

Element	Performance criteria
	3.3 Use records of health tests and animal health treatments, including animal production records, to review the animal health plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK409A Supervise animal health programs

Assessment Requirements for AHCLSK409 Supervise animal health programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor safe work practices and appropriate hygiene procedures
- monitor the health and wellbeing of animals
- detect possibility of disease through parameters such as loss of bodyweight behaviour or length of time required to eat food
- recognise clinical symptoms (normal vs. abnormal)
- recognise abnormal physiological and behavioural signs in livestock
- collect samples for testing for internal parasites and diseases
- implement preventative health strategies
- administer vaccines and medications to animals
- maintain records associated with animal health programs
- implement relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- symptoms of common livestock diseases and parasite infestations
- storage conditions for a range of chemicals, including veterinary chemicals
- types of vaccines and how they work
- zoonotic diseases and their mode of transmission
- animal anatomy and physiology relevant to the collection of tissue, organ, blood and other biological samples in live and dead animals and the conduct of post-mortems
- relevant biosecurity requirements

- management practices and processes to minimise noise, odours, and debris from the livestock operations
- relevant legislation, regulations and codes of practice relating to the use of veterinary medicines, animal diseases, animal welfare and waste and environmental management,
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK410 Supervise feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise feedlot operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Select feedlot livestock	1.1 Consult enterprise plans and management regarding the breeds, classes and numbers of livestock to be obtained for feedlotting 1.2 Select and purchase livestock for feedlotting 1.3 Inspect purchased livestock on delivery for satisfactory health and condition 1.4 Complete required documentation and records accurately and promptly, and store these appropriately
2. Oversee the preparation of rations for feedlot livestock	2.1 Identify nutritional needs of livestock from information available and enterprise production targets 2.2 Gather expert advice on livestock nutrition from the appropriate government, industry or enterprise sources 2.3 Select feed ingredients that meet the identified nutritional needs of livestock 2.4 Select suppliers of feed ingredients based on quality and cost benefit ratios 2.5 Determine quantities of feed ingredients required based on available information and advice 2.6 Formulate feeding schedule and allocate responsibility for feeding livestock to appropriate personnel 2.7 Assess and identify method(s) of feeding livestock based on available information and advice
3. Supervise feeding of feedlot livestock	3.1 Organise mixing of feed to suit the needs of the livestock, the identified nutritional requirements, and the equipment available within the enterprise 3.2 Supervise calibration of measuring equipment and calculation of feed ingredient quantities 3.3 Supervise the selection, maintenance and use of suitable personal protective equipment 3.4 Identify work health and safety hazards, assess risks and implement control measures 3.5 Supervise the feeding of livestock according to production program
4. Monitor performance of feedlot livestock	4.1 Monitor the health and condition of livestock and their production levels; record and report any reaction or change to a change in feed types, ingredients or schedules 4.2 Provide advice to enterprise staff on the feeding of livestock when requested, or when the need arises 4.3 Supervise the storage, removal and disposal of all feed wastes and debris from the production environment 4.4 Supervise the dispatch of livestock for slaughter with required identification and documentation

Element	Performance criteria
	4.5 Collate and analyse feedback from slaughter point and downstream customers 4.6 Maintain and store documentation and records appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK410 Supervise feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select, purchase and induct livestock for feedlotting according to enterprise requirements
- source advice on feed and feeding regime with nutritionist and managers
- oversee the preparation of rations for feedlot livestock
- supervise feeding of feedlot livestock and provide advice to staff where required
- monitor livestock performance on weight gains and meeting carcass criteria and diagnose feeding problems and remove animals for treatment
- review procedures in response to feedback from slaughter point and customers
- complete the required records of feed use and livestock performance
- implement relevant work health and safety, animal welfare, biosecurity and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types and use of information to be gathered from enterprise plans and management for the determination of suitable feedlot livestock to be procured
- breeds, classes and characteristics of feedlot livestock
- criteria for assessment and selection of feedlot livestock
- regulatory, industry and enterprise requirements and procedures for purchase, delivery and movement of feedlot livestock.
- principles of nutrition, feeding strategies and feeding management of feedlot livestock
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of feedlot livestock
- types, forms and characteristics of livestock feeds

- process and requirements of a cost benefit analysis
- procedures and resource requirements for mixing, blending and milling feed ingredients and feeds
- relevant work health and safety requirements
- signs of health, ill health, good condition and poor condition in livestock, and methods for assessing livestock health and condition in relation to nutrition and feeding
- possible production changes in relation to changes in nutrition, feeds and feeding strategies
- types of and disposal methods for organic and non-organic waste
- relevant environmental requirements and sustainability practices
- regulatory, industry and enterprise requirements for selection, movement and dispatch of livestock for slaughter
- types and use of information that can be gathered from slaughter facilities and downstream customers to formulate, improve or adjust nutritional and feeding strategies for feedlot livestock
- relevant animal welfare and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK412 Arrange livestock purchases

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research livestock price trends and budgeted returns
- organise transport
- negotiate on price and terms
- assess livestock and condition
- arrange transport and insurance
- check on health status and condition of livestock
- complete records associated with livestock transport
- implement relevant quarantine/biosecurity practices where required
- implement relevant work health and safety requirements
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock assessment for relevant features / traits
- livestock selling procedures
- matching livestock to feed available
- livestock transportation
- animal health procedures
- livestock insurance
- relevant legislative work health and safety requirements especially as they relate to livestock sales, livestock products, animal welfare, animal transportation for local and export markets, and safe livestock handling techniques

- enterprise and industry policies and codes of practice with regard to livestock sales, livestock transportation, and recording and reporting requirements (NLIS)

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK413 Design livestock handling facilities

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the need for livestock handling facilities
- evaluate and recommend alternative options
- determine the site and design the handling facility for the site
- incorporate work health and safety and animal welfare requirements, potential environmental impacts and enterprise operational principles for livestock handling and movement into design
- estimate cost of building the designed facilities
- develop a detailed plan for livestock handling facility

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behaviour and design interactions
- enterprise livestock handling facility requirements
- requirements of transportation vehicles and loading areas
- costing methodologies
- livestock handling options and accommodation facilities and their uses
- site constraints in relation to livestock handling facilities
- industry and legislative requirements for the planning and establishment of livestock handling facilities
- relevant work health and safety legislative requirements
- codes of practice with regard to environmental protection and animal welfare

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK414 Arrange transport for farm produce or livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise quotes and negotiate effective transport contracts/agreements
- document a transport plan
- ensure transport plan meets relevant work health and safety, animal welfare and biosecurity requirements
- obtain permits and clearances
- co-ordinate transport operations
- ensure the accurate and timely completion of relevant documentation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and legislative requirements for the transport of grain and livestock
- safety requirements for livestock and personnel
- transportation methods availability and costing alternatives
- relevant animal welfare, biosecurity and work health and safety legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK418 Escort livestock during export

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to escort livestock during export.

This unit applies to animal attendants who escort livestock on sea voyages.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They may provide direction to others, and use discretion and judgement in the selection, allocation and use of available resources. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCLSK331 Comply with industry animal welfare requirements

AHCLSK307 Euthanase livestock

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out administration requirements	1.1 Obtain and clarify details of the livestock to be exported from the exporter or producer 1.2 Establish effective communication links between all parties to the consignment and any relevant organisations or agencies 1.3 Investigate and verify specific details of the vessel/plane to facilitate loading and transit operations 1.4 Complete required certification, permit and invoicing arrangements according to exporter requirements and relevant legislation 1.5 Estimate nutritional and veterinary requirements and order required quantities according to exporter directions, established industry standards and load specifications
2. Prepare for livestock to be loaded	2.1 Comply with work health and safety policies and procedures, including selection of appropriate Personal Protective Equipment (PPE) 2.2 Ensure that animal welfare and biosecurity requirements are met 2.3 Establish communication lines with all shipboard personnel for the voyage 2.4 Review exporter instructions according to loading criteria 2.5 Identify appropriate infrastructure for loading 2.6 Perform basic risk analysis for loading and recommend preventative measures 2.7 Identify appropriate on-board loading resources including personnel requirements 2.8 Check and ensure all on-board equipment is in working condition, including the veterinary kit and euthanasia equipment
3. Load and accompany livestock on transport	3.1 Observe and follow work health and safety policies and procedures, animal welfare, biosecurity and environmental requirements 3.2 Load and secure prepared livestock safely and humanely according to animal welfare, biosecurity, work health and safety and exporter requirements 3.3 Check and verify loading densities and conditions in accordance with the loading plan and regulatory requirements 3.4 Monitor and record water and feed provision to livestock and report any abnormalities or variance from feed budgets to the appropriate party

Element	Performance criteria
	<p>3.5 Carry out regular observation of all livestock to ensure timely and appropriate responses to changes in condition, feed and water intake, or incidence of disease</p> <p>3.6 Deal humanely with injured or diseased livestock in accordance with relevant animal welfare, biosecurity, health and environmental considerations and in consideration of customer requirements</p> <p>3.7 Complete reports according to shipping company policy and in accurate observation of shipping conditions</p>
4. Complete post-shipment procedures	<p>4.1 Establish unloading strategies including timing, health checks and documentation in consultation with the carrier's Chief Officer or Master</p> <p>4.2 Complete pen cleaning and other established pre-unloading procedures prior to entering port</p> <p>4.3 Unload animals safely and humanely using appropriate equipment and facilities in line with work health and safety, animal welfare, biosecurity and exporter requirements</p> <p>4.4 Identify specific animal requirements at unloading and obtain supplies to meet consignment needs</p> <p>4.5 Complete end of voyage reports and required documentation in accordance with exporter requirements, shipping company policy, government legislation, and customer requirements</p> <p>4.6 Undertake post-transport checks according to exporter and customer requirements, and shipping company policy</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK418A Escort livestock during export

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK418 Escort livestock during export

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out pre-shipping and consignment administration procedures
- make preparations for loading of livestock
- load livestock onto the carrier
- handle, treat and feed livestock in accordance with relevant animal welfare, biosecurity, health and environmental legislation and codes of practice and in consideration of customer requirements
- identify signs of ill health and injury, or signs of abnormal or depressed appetite
- handle and restrain livestock for observation and treatment as required
- oversee the care of livestock in transit
- communicate effectively with exporting agents and related agencies, as well as the Master/Captain, officers and seamen on board
- complete export documentation including daily records of animal observations and conditions
- communicate effectively with exporting agents and related agencies, as well as transportation officers and staff
- implement relevant work health and safety, animal welfare, biosecurity and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare, biosecurity and quarantine, and environmental legislation and codes of practice

- regulatory requirements and industry standards for the transport of livestock using sea carriers
- typical exporter and shipping company requirements, policies and procedures
- how conflicts should be handled between regulatory requirements and requirements of exporters or shipping companies
- working culture and specifications for imported livestock of common importing countries
- care, husbandry and management procedures for health and welfare of all classes of livestock - including pregnant livestock - in transit
- methods and techniques for handling and restraint of all classes of livestock
- methods and techniques for loading and unloading of livestock
- signs of health, anatomy and physiology of the livestock species
- zoonoses of livestock and preventative health strategies for humans and livestock
- common diseases of the livestock species and preventative health strategies
- signs of ill health and related management strategies in the livestock species
- methods and techniques of euthanasia
- disposal of animal carcasses on-board sea carriers
- on-board procedures and responsibilities
- use and maintenance of personal protective equipment, veterinary, euthanasia and disinfectant materials and equipment
- invoice, receipt and document requirements at both ends of the transport operation
- strategies for effective communication between all parties to the consignment, relevant organisations and agencies, and on-board carrier personnel

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- load and transport livestock

Competency for the unit can be determined in a single species.

Assessors must satisfy current standards for RTOs

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCLSK419 Manage horses for stock work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Application

This unit of competency describes the skills and knowledge required to manage horses for stock work, including coordinating specialist services from veterinarians and farriers.

The unit applies to individuals, experienced in riding horses for stock work, who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources, and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing or certification requirements apply to this unit at the time of publication.

Work health and safety and animal welfare legislation relevant to interacting with horses applies to workers in this industry. Requirements vary between industry sectors and state/territory jurisdictions. Users are advised to check with the relevant authority for specific requirements.

Pre-requisite Unit

The prerequisite unit of competency for this unit is:

- ACMEQU406 Manage selection of horse for new or inexperienced handler, rider or driver

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage horse condition and health	<p>1.1 Develop and implement workplace procedures for maintaining health and welfare of horses in consultation with workplace staff</p> <p>1.2 Assess, report and document soundness and working condition of horses in the workplace</p> <p>1.3 Ensure proper selection, use and maintenance of appropriate personal protective equipment (PPE)</p> <p>1.4 Identify unsound or unhealthy horses and diagnose or establish reasons for their condition, such as seeking veterinary advice where required</p> <p>1.5 Administer treatment and implement management plan for unsound or unhealthy horses under supervisor or veterinary supervision, according to plan</p> <p>1.6 Keep accurate records of horse identification, treatments administered and management plans</p>
2. Manage nutritional requirements of horses	<p>2.1 Develop and implement feeding plans for horses in the workplace, taking into account daily and seasonal factors affecting nutritional requirements</p> <p>2.2 Provide supplementary feeding programs to workplace horses to ensure they are in optimum physical condition and health for stock work</p> <p>2.3 Identify potential nutritional problems and take preventative or corrective action through the use or withdrawal of supplementary feeding</p> <p>2.4 Develop and implement work programs for horses according to their condition and nutritional status</p>
3. Supervise activities and tasks requiring the use of horses for workplace personnel	<p>3.1 Conduct risk assessments for activities and tasks requiring the use of horses, and implement and monitor the measures to control these risks</p> <p>3.2 Match horses in workplace to personnel by rider ability and suitability for tasks</p> <p>3.3 Schedule tasks requiring the use of horses, and communicate details to appropriate staff</p> <p>3.4 Coordinate tasks requiring the use of horses, and provide supervision to ensure that horses and personnel work within industry and workplace requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.5 Coordinate breaking-in of horses by contractors or staff, and provide supervision to ensure that horses and personnel work within industry and workplace requirements</p> <p>3.6 Provide inexperienced horses with stock training by experienced riders</p> <p>3.7 Maintain regular communication with workplace staff and contractors to ensure smooth operation</p> <p>3.8 Monitor outcomes of activities and tasks requiring the use of horses, and record in line with workplace requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret and check accuracy of textual and numerical information from a range of sources to determine and confirm work requirements
Writing	<ul style="list-style-type: none"> Record and report specific information using workplace formats, and revise and update documentation based on outcomes of action
Numeracy	<ul style="list-style-type: none"> Calculate quantities of resources and costs associated with horse health and feed programs
Oral communication	<ul style="list-style-type: none"> Provide clear, sequenced instructions and respond to queries using terminology and concepts appropriate for the audience
Navigate the world of work	<ul style="list-style-type: none"> Work independently and collectively within broad parameters, taking responsibility for plans, decisions and outcomes relating to work area Know own obligations and responsibilities relating to regulatory and industry requirements for due diligence and safety of staff and horses
Interact with others	<ul style="list-style-type: none"> Follow accepted industry practices and protocols for working collaboratively with management and organising specialist services from veterinarians and farriers

Skill	Description
Get the work done	<ul style="list-style-type: none"> Plan, implement and coordinate multiple work tasks to achieve effective and efficient management of horses for stock work

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK419 Manage horses for stock work

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has demonstrated management of at least two horses and two workers undertaking stock work on a property, including:

- developing and implementing management plans for the condition and health of horses in the workplace
- monitoring and managing the health and welfare of horses and developing feeding plans for horses in the workplace
- developing work programs for horses in the workplace
- matching horse type and experience to rider and task
- supervising and coordinating activities and tasks requiring the use of horses in the workplace, and monitoring the outcomes
- managing the provision of training for inexperienced horses
- identifying and treating ill or injured horses and consulting with veterinarians
- coordinating the horse work of other property personnel such as horse breakers, veterinarians, farriers and other farm staff
- communicating task requirements to staff and arrangements for breaking-in of horses to staff and contractors
- observing, identifying and reacting appropriately to environmental implications and work health and safety hazards
- applying relevant animal welfare and biosecurity requirements to managing horses.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key requirements of work health and safety and animal welfare regulations and codes of practice relevant to working and interacting with horses

- key requirements of biosecurity and environment sustainability requirements relevant to working and managing horses
- industry and workplace policies, procedures and guidelines relevant to the job role
- feeding plan and work program for individual horses in the workplace
- care, husbandry and management procedures for horses
- signs of health, anatomy, physiology and behaviour of the horse
- signs of ill health in horses and management strategies for common illnesses
- strategies for and management of breaking in of horses and training inexperienced horses
- use of horses for workplace operations
- strategies for effective communication in the workplace
- strategies for effective supervision and management of staff in the workplace.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - various horses used in livestock work assessed as suitable for the experience and skill of the individual
 - appropriate tack for individual, horse and stock work activity
 - personal protective equipment (PPE) correctly fitted and applicable to activity for individual
- specifications:
 - work instructions and workplace procedures relating to managing horses
 - access to legislation and industry information related to managing horses
- relationships with others:
 - management and specialists to interact with regarding the management of horses
 - staff to coordinate and match to horse suitability.

Training and assessment strategies must show evidence of the use of guidance provided in the *Companion Volume: User Guide: Safety in Equine Training*.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCLSK501 Manage livestock production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan for livestock production and manage the implementation of such a plan.

This unit applies to farm managers with extensive or intensive livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Plan for production	<p>1.1 Assess the capability of land resources for grazing and determine stock, pasture and land management strategies for each land capability class</p> <p>1.2 Assess the suitability and sustainability of water resources</p> <p>1.3 Establish livestock production targets for each enterprise for the short and long term according to the farms marketing and business plans</p> <p>1.4 Establish production targets, taking into consideration enterprise short and long term livestock production goals, herd/flock breeding improvements and relevant risk control strategies</p> <p>1.5 Select genetics and breeding programs based on the production targets and the marketing requirements for the enterprise</p> <p>1.6 Select and design production facilities in a way that deals sensitively with identified waste products</p> <p>1.7 Establish and specifically include environmental controls in the production plan</p> <p>1.8 Identify work health and safety hazards, assess risks and incorporate suitable controls into the production plan</p> <p>1.9 Prepare a plan that documents the decisions taken, the assessments made, the targets established, and any specific issues that relate to work health and safety, animal welfare, biosecurity and environmental risks</p> <p>1.10 Ensure plan includes the type, format, frequency and detail of any reporting required by both manager(s) and operators</p>
2. Plan for livestock needs	<p>2.1 Determine feed requirements for each age/sex category of herds and/or flocks</p> <p>2.2 Determine most appropriate feeding plan for each livestock category based on a cost benefit analysis</p> <p>2.3 Research and implement most appropriate health strategies to prevent and control disease in each herd and/or flock on the basis of a cost benefit analysis</p> <p>2.4 Prepare schedules for purchasing and using the products and services used in livestock production</p> <p>2.5 Research and implement most appropriate livestock production, harvesting, handling and transportation methods and animal welfare requirements from a cost benefit analysis</p> <p>2.6 Prepare a livestock production plan that incorporates the calendar of operations for each enterprise production cycle, and the management of any specific animal welfare issues</p> <p>2.7 Ensure plan includes the type, format, frequency and detail of any</p>

Element	Performance criteria
	reporting required by both manager(s) and operators
3. Seek information on innovations for existing or potential enterprises and farm activities	3.1 Identify and access sources of information on innovations relevant to the enterprise and livestock species 3.2 Assess information on innovations to determine whether or not such innovations could be used in the present enterprise, or in a potential future enterprise 3.3 Amend prepared production plans to include innovations deemed suitable for use in the enterprise
4. Test and adopt relevant innovations	4.1 Consult any people who may be involved in implementing the innovation or in planning for it and discuss the change with them 4.2 Test innovations on the farm to determine whether or not they are suitable, and whether they may be readily adapted to suit the circumstances of the business 4.3 Identify any work health and safety hazards, animal welfare, biosecurity or environmental risks that present during the trial phase, assess them and take responsible action 4.4 Make a decision about whether or not to adopt the innovation, based on its costs and benefits and any implementation issues, including work health and safety, animal welfare, biosecurity and environmental considerations
5. Implement, monitor and evaluate livestock production plans	5.1 Implement and monitor production plans according to the calendar of operations 5.2 Site, erect or install production facilities in a way that deals sensitively with identified waste products 5.3 Evaluate livestock growth/maturity or production according to the planned targets and the marketing requirements 5.4 Monitor flock/herd health, and control and prevent parasite and disease outbreaks quickly and effectively 5.5 Assess feed supplies, monitor pasture or landscape condition and species composition, and vary stocking rates to maintain optimum pasture and livestock health 5.6 Identify, monitor and manage work health and safety hazards, animal welfare, biosecurity or environmental impacts relating to livestock production in the business to promote optimum pasture, livestock, and employee health 5.7 Analyse physical and financial records and extractions taken from them to assess production performance, and to provide information for business and taxation purposes 5.8 Evaluate the production performance of each enterprise to determine whether or not they are sustainable and profitable, and to use in reviewing and revising production plans
6. Comply with legal	6.1 Obtain information about the legal requirements and regulations

Element	Performance criteria
requirements and regulations	<p>that affect farm land ownership/possession and livestock production</p> <p>6.2 Determine record keeping requirements, and put in place procedures to ensure compliance with the range of applicable regulations including taxation legislation</p> <p>6.3 Obtain permits from the relevant authorities for the transport and movement of livestock and equipment</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK501 Manage livestock production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop livestock production plans
- manage all resources for a grazing enterprise
- implement grazing strategies that match livestock needs and optimise pasture growth
- maintain the farm natural resource base through sustainable practice
- plan and monitor the finances of the production unit
- observe, identify and react appropriately to animal welfare, biosecurity and environmental implications and work health and safety hazards
- monitor and manage animal health, welfare and nutrition
- supervise livestock husbandry operations
- analyse and assess the economic impact of specific situations
- establish processes/strategies, procedures and controls for livestock production
- assess land capability
- comply with legal and taxation requirements
- maintain records of production.
- assess, and then adopt profitable innovations
- implement and monitor relevant work health and safety, animal welfare, biosecurity and environmental requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock nutrition
- health and welfare of animals within the production system.

- key considerations in a livestock breeding operation
- livestock husbandry and management practices
- land capability and its relevance to planning livestock production in the context of the whole farm
- sustainable land use principles and practices applicable in the region
- environmental controls and codes of practice applicable to the enterprise
- budgeting and financing for an enterprise
- cost benefit analysis,
- management practices and processes to minimise noise, odours and debris from the livestock operations
- relevant legislation and regulations relating to soil and water degradation issues, animal health and welfare, biosecurity and chemical use
- relevant work health and safety legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate markets and sales opportunities
- calculate cost of production and target sale price
- select sales outlets
- select selling method and negotiate with brokers, sellers and agents
- prepare and implement marketing plan
- ensure that the product meets legislative and industry requirements for fitness for sale
- coordinate sales and transport logistics for livestock products
- analyse sales data and trends to maximise future profit margins

Knowledge Evidence

The candidate must demonstrate knowledge of:

- market specifications for the products produced
- quality assurance procedures and their implementation
- sales outlets
- current and alternate sale methods
- preparation of livestock and transportation systems
- price risk and sales strategies
- sales analysis
- enterprise and industry policies and codes of practice with regard to livestock sales transportation, recording and reporting requirements
- market access requirements -Minimum Residue Levels (MRLs) and the variance between countries, withholding periods after treatment

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

essential outcomes.	achievement of the element.
1. Determine the feasibility of an effluent management system	1.1 Assess and determine planning parameters that affect the design of effluent management systems 1.2 Assess and determine statutory, local government and environment authority requirements for effluent disposal 1.3 Assess and determine the environmental impacts of livestock effluent disposal 1.4 Evaluate effluent recycling options in conjunction with the enterprise plan 1.5 Analyse effluent processing options on the basis of their merits and suitability for the environment 1.6 Obtain information from effluent management specialists on all relevant aspects of effluent management 1.7 Assess and determine an effluent management system on the basis of a cost benefit analysis
2. Design an effluent management system	2.1 Calculate the volume of livestock effluent using information collected from enterprise plans, industry and enterprise production data and other sources 2.2 Calculate the volume of water flowing into the effluent management system 2.3 Calculate storage requirements 2.4 Obtain professional advice appropriate to the complexity of the task and the financial risk involved 2.5 Ensure plan and layout include provision of access, availability and the incorporation of technological innovations 2.6 Assess and evaluate work health and safety hazards and risks, establish safe systems, and maintain records 2.7 Ensure effluent management system design reflects the requirements of the enterprise business plan, production plan and management plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK506A Design livestock effluent systems

Assessment Requirements for AHCLSK506 Design livestock effluent systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the effectiveness of a range of effluent management systems to meet the requirements of statutory, local government and environment authorities for effluent disposal
- conduct cost benefit analysis of livestock effluent management systems to select a suitable effluent management system
- design and plan the layout of an effluent system that meets environmental standards and enterprise requirements
- design an effluent management system
- incorporate the enterprise work health and safety and environmental management policies into the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, characteristics, disadvantages and advantages of effluent management systems (including storage, recycling, processing and disposal)
- regulatory requirements, including environmental, sustainability work health and safety and biosecurity requirements, industry standards, industry and enterprise production parameters, data and information for the design and planning of effluent management systems
- uses and processes for cost benefit analyses, and their applications in relation to livestock production and effluent management
- types and use of information required, and methods for the assessment and determination of effluent production, output and volume for livestock enterprises

- effects and impacts of different livestock production systems on the design and planning of effluent management systems
- types and use of information and advice from other professions or industry sectors that are relevant to livestock enterprises in the design of effluent management systems, including engineering and financial professions

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCMKH401 Carry out cleaning-time tests of milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out cleaning time tests of milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for cleaning-time testing	1.1 Implement enterprise work health and safety policies 1.2 Establish protocols for the conduct of cleaning-time tests based

Element	Performance criteria
	<p>on previous testing outcomes</p> <p>1.3 Assess and record quality of water used for the cleaning process from on-site, facility or laboratory tests</p> <p>1.4 Determine the suitability and recommended concentrations of cleaning chemicals in line with prevailing water quality, facility requirements and equipment manufacturer recommendations</p> <p>1.5 Establish bacteriology of the specific facility from relevant records</p>
2. Carry out cleaning-time tests of milking equipment	<p>2.1 Identify and record details of normal cleaning routines and procedures while testing is carried out</p> <p>2.2 Install testing equipment to measure water or airflow velocities</p> <p>2.3 Carry out cleaning-time tests before or during the cleaning of the milking machines or bulk milk tank</p>
3. Report on cleaning-time test result	<p>3.1 Record and collate test results</p> <p>3.2 Interpret test report results in line with industry standards and manufacturer recommendations</p> <p>3.3 Report test results to the enterprise</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH401A Carry out cleaning-time tests of milking machines.

Assessment Requirements for AHCMKH401 Carry out cleaning-time tests of milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations for cleaning-time testing
- carry out cleaning-time tests of milking equipment
- report on cleaning-time test result
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking machines and all components
- criteria and methods for assessing optimal performance of milking machines and their components
- requirements, procedures and assessment criteria for mechanical testing of milking machines and all components
- requirements, criteria and assessment methods for determining water quality and the impacts of water quality on maintenance and performance of milking machines
- requirements, criteria and assessment methods for determining bacteriology and the impacts of bacteriology on maintenance and performance of milking machines
- possible faults, problems and poor performance with milking machines and their components, impacts on milking operations and corrective actions for these faults and problems
- requirements, criteria, procedures, routines and assessment methods for optimal cleaning and hygiene of milking machines and their components

- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
- requirements, procedures and assessment criteria of cleaning-time tests and the impacts of cleaning-times on maintenance and performance of milking machines
- key aspects and components of collating, interpreting and reporting on test results to an enterprise
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMKH402 Design and fabricate milking equipment installations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and fabricate milking equipment installations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare design and	1.1 Determine facility design and installation estimates to suit the

Element	Performance criteria
installation estimates	application 1.2 Document financial and physical resources that impact on the proposed works 1.3 Identify work health and safety issues that impact on the design and construction of the facility and installation, and incorporate risk controls in the design and construction planning 1.4 Determine manpower and other resources required and submit the tender
2. Plan installation	2.1 Complete contract for work including verification of material estimates and costings 2.2 Obtain relevant building and planning permits 2.3 Ensure site planning includes consideration of environmental issues, service connections and alternative power supplies 2.4 Plan required components to match the proposed installation and source from the original equipment manufacturer 2.5 Plan the installation to eliminate hazards to people and animals during milking, cleaning or service operations
3. Facilitate the completion of the installation	3.1 Carry out job scheduling with all relevant parties 3.2 Order and take delivery of physical and material resources 3.3 Coordinate the implementation of the milking machine installation 3.4 Establish areas of responsibility for all the project participants and provide full notification

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH402A Design and fabricate milking equipment installations.

AHCMKH403 Design and install enterprise milk cooling and storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and install on-farm milk cooling and storage systems.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine cooling and	1.1 Determine available cooling water supply quantity and test the

Element	Performance criteria
storage system requirements	<p>quality of the water supply</p> <p>1.2 Ensure the planned milk cooling and storage systems meet industry standards and match enterprise and herd needs</p> <p>1.3 Determine and record design considerations including appropriate siting of components</p> <p>1.4 Determine work health and safety hazards, assess risks, implement controls and report as required</p>
2. Determine milk pre-cooling requirements	<p>2.1 Measure and record maximum peak flow of milk delivery</p> <p>2.2 Check cooling water temperatures and quality against design specifications</p> <p>2.3 Compare available milk cooling equipment with design requirements and select suitable equipment</p> <p>2.4 Determine work health and safety and human health regulatory requirements and establish compliance targets</p> <p>2.5 Determine water cooling system requirements in line with planned equipment and available resources</p>
3. Determine milk storage requirements	<p>3.1 Determine enterprise milk production levels and projected production increases</p> <p>3.2 Establish milk entry temperature and other critical design considerations in consultation with the enterprise and from available data</p> <p>3.3 Select a suitable milk vat to meet shed production requirements and bulk milk collection routines</p>
4. Install milk cooling and storage equipment	<p>4.1 Install plate cooler and other components of the pre-cooling system in line with established system design and industry standards</p> <p>4.2 Install vat and refrigeration equipment to meet design specifications</p> <p>4.3 Complete commissioning tests to ensure the operation of all elements of the cooling and storage systems comply with performance targets and milk supply quality standards</p>
5. Operate and maintain milk cooling and storage equipment	<p>5.1 Complete routine maintenance program requirements in line with manufacturers' recommendations</p> <p>5.2 Determine repair and service requirements, including rectification of operational faults, as part of maintenance routines</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCMKH403 Design and install enterprise milk cooling and storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine cooling and storage system requirements
- determine milk pre-cooling requirements
- determine milk storage requirements
- install milk cooling and storage equipment
- operate and maintain milk cooling and storage equipment
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant requirements and industry standards for design, planning, installing and operating milk cooling and milk storage systems
- types, functions, cleaning, operating, monitoring and maintenance of milk cooling and milk storage systems and all components
- requirements, components and considerations for designing, planning, siting and installing milk cooling and milk storage systems and their components, and to meet the needs of the enterprise
- requirements, criteria and assessment methods for determining water quality and the impacts of water quality on maintenance and performance of milk cooling and milk storage systems
- possible faults, problems and poor performance with milk cooling and milk storage systems and their components, impacts on enterprise operations and corrective actions for these faults and problems

- criteria and methods for assessing performance of milk cooling and milk storage systems and their components
- requirements and assessment methods for determining enterprise milk production levels
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM101 Assist with routine maintenance of machinery and equipment

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to assist with routine maintenance tasks for small engine machinery and associated equipment.

The unit applies to individuals who assist with routine maintenance tasks while working alongside a supervisor exercising limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for basic routine maintenance	1.1 Read or listen to work instructions from supervisor and clarify where necessary 1.2 Select tools and supplies required to carry out basic routine maintenance tasks according to job requirements 1.3 Select, fit and use personal protective equipment applicable to job requirements 1.4 Carry out routine pre-operational checks of machinery and equipment according to operation and maintenance manual and make adjustments where required 1.5 Identify and segregate faulty or unsafe machinery and equipment for repair or replacement 1.6 Identify health and safety hazards in the workplace and report safety concerns to supervisor
2. Carry out basic routine maintenance	2.1 Carry out greasing, lubrication and other basic servicing of machinery and equipment 2.2 Make routine adjustments and repairs to machinery and equipment 2.3 Use safe workplace practices and methods when undertaking basic routine maintenance tasks
3. Complete basic routine maintenance activities	3.1 Clean and store tools according to workplace procedures 3.2 Clean and maintain work areas and return to operating condition 3.3 Collect, treat and dispose or recycle waste from maintenance activities according to workplace procedures 3.4 Report malfunctions, faults, wear or damage of tools to supervisor

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> • Use clear language to report malfunctions, faults, wear or damage to tools • Participate in verbal exchanges to respond to questions and clarify

Skill	Description
	information
Numeracy	<ul style="list-style-type: none"> Interpret machinery and equipment fluid levels including grease, oil and fuel
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> machinery and equipment damage and serviceability checking for missing parts fluid leaks and levels fuel level.
Machinery and equipment must include at least two of the following:	<ul style="list-style-type: none"> hydraulic equipment hydroplats stationary engines pumps irrigation equipment seeders harvesters balers spraying equipment hedging machines solar and wind powered equipment.

Assessment Requirements for AHCMOM101 Assist with routine maintenance of machinery and equipment

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has assisted with routine maintenance tasks for at least two different types of small engine machinery and associated equipment and has:

- identified hazards and reported to supervisor
- tested machinery and equipment to identify maintenance requirements
- carried out routine repairs and adjustments required for maintenance of machinery and equipment
- cleaned and maintained work area and returned to operating condition
- applied safe and environmentally responsible workplace practices
- used oral communication skills and language competence to communicate effectively with others
- followed workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, characteristics and functions of machinery and equipment
- types, characteristics and functions of tools used in maintenance of machinery and equipment
- machinery and equipment operation and maintenance manual

- environmental impacts of machinery servicing and disposal methods for fuels, oils and other wastes
- workplace procedures applicable to health and safety in the workplace and machinery maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - maintenance tools and equipment
 - personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- relationships:
 - supervisors
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare a two wheel motorbike for operation	1.1 Confirm with supervisor activity to be undertaken and that the vehicle is fit for purpose 1.2 Identify potential hazards and risks to self and implement safe

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>working practices to manage risks</p> <p>1.3 Conduct routine pre-operational checks on two wheel motorbike according to operators manual and report faults or malfunctions to supervisor for repair</p> <p>1.4 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.5 Use and fit personal protective equipment, including helmet that is fit for purpose</p> <p>1.6 Select two wheel motorbike according to rider's size, skill level and task to be completed</p> <p>1.7 Ensure any items that are to be transported on the two wheel motorbike are safely secured</p> <p>1.8 Identify and confirm areas and applications excluded to two wheel motorbike operation on the workplace safety plan</p>
2. Operate a two wheel motorbike	<p>2.1 Start up, steer, manoeuvre, position and stop two wheel motorbike in a controlled manner</p> <p>2.2 Comply with legislation and workplace safety plan in regard to carrying passengers</p> <p>2.3 Identify environmental and biosecurity implications associated with two wheel motorbike operation and minimise impact</p> <p>2.4 Identify situations where two wheel motorbike good riding techniques are required</p> <p>2.5 Apply two wheel motorbike good riding techniques to pre-position the body to assist bike stability</p> <p>2.6 Identify and avoid riding surfaces, terrain and slopes that are dangerous to safe operation</p> <p>2.7 Operate and manoeuvre over a variety of surfaces, slopes and terrain to minimise risk to safety</p> <p>2.8 Modify two wheel motorbike operation according to local weather conditions</p>
3. Conduct shut down procedures	<p>3.1 Shut down two wheel motorbike</p> <p>3.2 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.3 Store and secure two wheel motorbike</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.4 Remove and store keys in the required location 3.5 Unload, load and secure motorbike safely

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults and irregular performance or damage Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including oil and fuel Identify correct tyre pressures
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> vehicle damage and serviceability engine oil fuel brakes tyres, including pressure and condition vehicle controls.
Biosecurity implications	<ul style="list-style-type: none"> control of cross site contamination.

must include:	
Two wheel motorbike good riding techniques must include:	<ul style="list-style-type: none"> • pre-positioning and adjustment of body weight when going uphill, including standing up and body forward • pre-positioning and adjustment of body weight when going downhill, including standing up and body rearward • leaning the two wheel motorbike towards the slope and pressing hard on the outside (downhill) footrest, keeping the body weight on top of the tyre tread when riding across slopes • standing up to improve situational awareness, when operating in restricted visibility situations, rough terrains and crossing obstacles.
Unload, load and secure motorbike must include at least one of the following:	<ul style="list-style-type: none"> • trailer • transportation device • on site vehicle storage.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a two wheel motorbike on at least two different riding surface conditions and on an even, uneven and sloping terrain and has:

- operated a two wheel motorbike without a passenger
- identified hazards and risks associated with two wheel motorbike areas of operation
- identified and avoided riding surfaces, terrains and slopes that are dangerous to safe operation of two wheel motorbikes
- complied with legislation and workplace safety plan in regard to carrying passengers
- selected and worn two wheel motorbike helmet that was fit for purpose
- selected, correctly fitted, used and maintained personal protective equipment
- started, steered, manoeuvred, positioned and stopped a two wheel motorbike in a controlled manner
- applied two wheel motorbike good riding techniques to pre-position the body to assist bike stability
- unloaded, loaded and secured two wheel motorbike safely.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with two wheel motorbike areas of operation
- components, controls and features of two wheel motorbikes and their functions
- two wheel motorbike functional applications
- operating principles and operating methods of two wheel motorbikes

- two wheel motorbike good riding techniques, including requirements to pre-position and adjust body weight for riding uphill, downhill and on uneven terrain
- workplace safety plan and operators manual
- impacts and consequences of substandard environmental and biosecurity practices
- load limits and two wheel motorbike capabilities and the effects to dynamic stability on the two wheel motorbike including:
 - passengers
 - weight distribution
 - load security
 - liquid or shifting loads
 - effect of load when operating on uneven or sloping terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
 - tie down devices
 - vehicle ramps
 - loading surfaces and angle
- effects of different riding surfaces and terrain conditions on the operation of two wheel motorbikes
- variations in state/territory regulations, legislation and licensing requirements in regard to two wheel motorbike use.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - no riders under 16 years of age on adult sized two wheel motorbikes
 - no towing
 - helmets must be worn whilst operating two wheel motorbikes
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
 - two wheel motorbike
 - vehicle fuel
 - two wheel motorbike helmet
 - enclosed shoes
- specifications:
 - two wheel motorbike manufacturer specifications and operator manuals
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM202 Operate tractors

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and complete tractor operations under general supervision in the agriculture, horticulture and land management sectors.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare tractor for operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Source and interpret machinery operation and maintenance manual and manufacturer instructions for tractor operation 1.3 Select and maintain personal protective equipment and safety equipment according to workplace safety requirements 1.4 Fit and use personal protective equipment according to job requirements and task to be undertaken 1.5 Select and attach equipment as directed by supervisor 1.6 Conduct tractor routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor
2. Operate tractor	2.1 Carry out pre-start and start up procedures required for tractor operation 2.2 Drive and operate tractor in a smooth and controlled manner 2.3 Apply workplace environmental and biosecurity procedures associated with tractor operation and minimise impact 2.4 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.5 Complete work according to agreed plan as directed by supervisor 2.6 Report abnormal monitoring system indicators and alarms to supervisor
3. Complete tractor operation	3.1 Park tractor and conduct shut down procedures 3.2 Perform routine operational servicing according to the operation and maintenance manual 3.3 Report malfunctions, faults, irregular performance or damage to supervisor 3.4 Clean, decontaminate, secure and store tractor and attached equipment 3.5 Remove and store keys in the required location 3.6 Maintain tractor and equipment use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations

Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, safely operated and completed tractor operations under general supervision at least once and has:

- identified and reported hazards and implemented safe operating procedures
- carried out tractor pre-operational checks and reported faults to supervisor
- driven and operated a tractor safely, in a smooth and controlled manner
- operated tractors in even and uneven terrain conditions
- carried out tractor shut down procedures
- maintained tractor use records and reported faults or malfunctions
- minimised environmental impacts associated with tractor operation
- followed workplace health and safety procedures for safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor operation and maintenance manuals
- tractor steering systems and features
- features, operational functions and procedures for attached equipment
- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities

- effects of various surface and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of vehicles
- health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - tractors
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - tractor operation and maintenance manual
 - industry and workplace biosecurity procedures applicable to tractor operation
 - legislation relevant to tractor operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken pre start checks, operated, maintained and shut down at least two types of basic machinery and equipment used in the agriculture, horticulture or land management sectors.

For each type, the individual must have demonstrated the following:

- identified and reported hazards and implemented safe working practices
- carried out basic machinery and equipment pre-operational checks including basic servicing and maintenance according to operation and maintenance manual
- operated basic machinery and equipment in a safe and controlled manner consistent with operation and maintenance manual and manufacturer specifications
- carried out safe shut down and storage procedures for basic machinery and equipment
- followed workplace health and safety procedures during the operation and use of basic machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with basic machinery and equipment operation
- pre-operational and safety checks for basic machinery and equipment
- operating principles and operating methods for basic machinery and equipment
- procedures for cleaning, securing and storing basic machinery and equipment
- risks associated with the operation of machinery and equipment in different types of weather and terrain conditions
- duty of care to self, others and the environment when using and operating basic machinery and equipment

- workplace procedures applicable to work health and safety requirements to operate basic machinery and equipment safely.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - a range of basic machinery and equipment
 - enclosed toe shoes
 - safety equipment and personal protective equipment applicable to the machinery and equipment being used and the task being undertaken
- specifications:
 - basic machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to basic machinery and equipment operation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM204 Undertake operational maintenance of machinery

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and completed operational maintenance of at least two types of machinery used in the agriculture, horticulture or land management sectors. For each machinery type, the individual must have demonstrated the following:

- identified and reported hazards and implemented safe working practices
- selected and prepared tools and equipment required for machinery maintenance
- carried out lubrication and operational servicing of machinery
- conducted basic diagnostic tests required for maintenance of machinery
- checked machinery components for wear and tear, replaced parts, tagged and reported defects
- collected, removed and recycled or disposed of wastes according workplace environmental procedures
- followed workplace health and safety procedures when undertaking operational maintenance of machinery.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and uses of lubricants and other commonly used servicing materials
- operating principles of machinery including mechanical and auto-electrical systems
- servicing characteristics of plant and equipment
- types, characteristics, uses and limitations of hand power tools
- functions of components of common mechanical and hydraulic systems
- different working principles of two stroke, four stroke, petrol and diesel engines

- set-up requirements of plant and equipment, and principles of calibration
- basic diagnostic processes and techniques used to identify faults
- sourcing machinery and equipment operation and maintenance manuals
- environmental impacts of machinery maintenance and disposal of fuels, oils and other wastes
- procedures applicable to health and safety in the workplace requirements to maintain machinery safely.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery
 - maintenance tools and equipment
 - personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to machinery maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has undertaken pre-start checks, operated and shut down vehicles used in the agriculture, horticulture and land management sectors on at least one occasion and has:

- identified and reported hazards and implemented safe operating procedures for vehicle operation
- prepared the vehicle for use by undertaking routine pre-operational checks and maintenance tasks
- safely secured loads prior to vehicle operation
- driven the vehicle in a safe and controlled manner
- carried out vehicle shut down procedures including securing of vehicle and safe storage
- minimised environmental impacts associated with vehicle usage and operation
- followed workplace health and safety procedures during preparing vehicle for use, operation and shut down
- followed industry and workplace biosecurity procedures
- completed required documentation for vehicle use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with vehicle operations
- safety requirements for vehicle use and operation
- vehicle operation and maintenance manual
- vehicle components, controls, features, technical capabilities and limitations
- vehicle operating principles and operating methods

- load limits and the principles of weight distribution with regard to load shifting and vehicle movement
- effects of adverse surface and terrain conditions on the operation of vehicles
- duty of care to self, others and the environment when operating vehicles
- relevant legislation with regard to vehicle operation and licensing requirements
- environmental impacts relevant to operation of vehicles
- workplace procedures applicable to workplace health and safety requirements to operate a vehicle safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating vehicles
- resources, equipment and materials:
 - a range of vehicles
 - vehicle loads
 - tie down devices
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - vehicle operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to vehicle operation
 - legislation relevant to vehicle operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM206 Conduct grader operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and shut down grader operations in an agricultural environment.

The unit applies to individuals who conduct grader operations to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for grader operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>practices to manage risks</p> <p>1.2 Source and interpret grader operation and maintenance manual and observe manufacturer instructions</p> <p>1.3 Select and maintain personnel protective equipment according to workplace safety requirements</p> <p>1.4 Fit and use personal protective equipment and confirm safety equipment applicable to the task being undertaken</p> <p>1.5 Conduct grader routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor for repair</p> <p>1.6 Observe safety rules and regulations, including site rules and legislation and site specific instructions</p>
2. Operate grader	<p>2.1 Carry out pre-start, and start up procedures according to health and safety in the workplace guidelines</p> <p>2.2 Drive and operate grader, and modify operating technique to meet changing work conditions</p> <p>2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.4 Identify environmental and biosecurity implications associated with grader operation and minimise impact</p> <p>2.5 Complete work task according to agreed plan and within the operating capacity of the equipment and operator</p>
3. Complete grader operation	<p>3.1 Park grader and conduct shut down procedures</p> <p>3.2 Perform routine operational servicing and minor maintenance according to the grader operation and maintenance manual</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.4 Clean, decontaminate, secure and store grader</p> <p>3.5 Remove and store keys in the required location</p> <p>3.6 Maintain grader use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document grader use

Assessment Requirements for AHCMOM209 Conduct dozer operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has prepared for, carried out and shut down dozer operations at least once and has demonstrated the following:

- identified hazards and implemented safe operating procedures for dozer operations
- carried out dozer pre-operational checks for safe dozer operation
- driven and operated a dozer safely including modifying operating technique to meet changing work conditions
- carried out dozer shut down procedures including securing and storage of dozer
- minimised environmental impacts associated with dozer operation
- followed workplace health and safety procedures while undertaking pre-operational checks, operational and shut down procedures for the dozer
- followed industry and workplace biosecurity procedures
- completed required documentation for loader use.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with dozer operations
- dozer and site safety requirements
- dozer components, controls, features, technical capabilities and limitations
- dozer operation and maintenance manual
- duty of care to self, others and the environment
- relevant legislation with regard to dozer operation and licensing requirements
- environmental impacts relevant to the operation of dozers

- workplace procedures applicable to health and safety in the workplace requirements to operate dozer safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - dozers
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - dozer operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to dozer operation
 - legislation relevant to dozer operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM210 Conduct scraper operations

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and shut down scraper operations used for earthworks in an agricultural environment.

The unit applies to individuals who conduct scraper operations to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for scraper operation	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Source and interpret scraper operation and maintenance manual and observe manufacturer instructions</p> <p>1.3 Assess the work site and confirm the suitability of the machinery for the task</p> <p>1.4 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.5 Fit and use personal protective equipment and confirm safety equipment applicable to the task being undertaken</p> <p>1.6 Conduct scraper routine pre-operational checks according to operation and maintenance manual and report faults or malfunctions to supervisor for repair</p> <p>1.7 Observe safety rules and regulations, including site rules and legislation and site specific instructions</p>
2. Operate scraper	<p>2.1 Carry out pre-start, and start up procedures according to health and safety in the workplace guidelines</p> <p>2.2 Drive and operate scraper, and modify the operating technique to meet changing work conditions</p> <p>2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.4 Identify environmental and biosecurity implications associated with scraper operation and minimise impact</p> <p>2.5 Complete work according to the agreed plan and within the operating capacity of the equipment and operator</p>
3. Complete scraper operation	<p>3.1 Park scraper and conduct shut down procedures</p> <p>3.2 Perform routine operational servicing and minor maintenance according to scraper operation and maintenance manual</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.4 Clean, secure and store scraper in line with workplace practices</p> <p>3.5 Remove and store keys in the required location</p> <p>3.6 Maintain scraper use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document scraper use
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including fuel Identify correct tyre pressure or track tension
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> maintenance interval schedule daily check machine damage and serviceability checking for missing parts fluid leaks and levels fuel level brakes and clutch operation condition of tyres or tracks machine controls.
Biosecurity implications must include:	<ul style="list-style-type: none"> control of cross-site contamination.

AHCMOM213 Operate and maintain chainsaws

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to safely operate a hand-held chainsaw and maintain it in working condition.

This unit applies to cross-cutting fallen timber using safe cutting techniques.

The unit applies to individuals who apply low risk work procedures and comply with worksite health and safety requirements when operating hand-held chainsaws to carry out routine work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assist in preparation of work-site	1.1 Identify location of worksite and fallen timber from scope of works and confirm with supervisor 1.2 Identify site hazards, assess risks and report to supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Confirm first aid and emergency personnel, equipment and procedures 1.4 Document and implement site health and safety in the workplace, environmental and traffic control measures according to workplace procedures
2. Recognise and apply workplace safety procedures	2.1 Identify hazards and risks relevant to the maintenance and operation of chainsaws and implement safe working practices to manage risks 2.2 Select, fit and use personal protective equipment according to workplace safety procedures 2.3 Confirm with supervisor relevant licensing and legislative requirements with regard to the operation of chainsaws 2.4 Transport chainsaw safely according to operation and maintenance manual
3. Check and prepare chainsaw for use	3.1 Select tools and materials required for maintenance 3.2 Conduct routine checks and maintenance prior to operation, according to chainsaw operation and maintenance manual 3.3 Calculate required fuel oil ratios prior to mixing 3.4 Mix fuel and fuel chainsaw according to operation and maintenance manual 3.5 Identify, tag, record and report chainsaw faults or malfunctions to supervisor
4. Operate chainsaw	4.1 Communicate with work team during operations using voice, hand or whistle signals 4.2 Place supports to ensure a stable base for cutting 4.3 Identify materials to be cut and position them for operation 4.4 Visually assess material to be cut for defects and embedded hazards 4.5 Determine cutting methods appropriate to material type and implement risk controls 4.6 Select and use tools associated with chainsaw use 4.7 Operate chainsaw to cross-cut timber using documented low risk work methods 4.8 Identify and report work-site communication issues to supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.9 Identify and report environmental impacts of chainsaw operation to supervisor
5. Complete and check chainsaw operation	5.1 Record and report chainsaw damage, malfunction and irregular performance according to workplace procedures 5.2 Clean and store chainsaw according to workplace procedures and operation and maintenance manual 5.3 Dispose of debris from operation in accordance with environmental requirements 5.4 Maintain workplace documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document site health and safety in the workplace, environmental and traffic control measures
Oral communication	<ul style="list-style-type: none"> Use clear language to report hazards and risks and to confirm work site, first aid and emergency personnel, equipment and procedures Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate fuel oil ratios and fuel quantities
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Interact with others	<ul style="list-style-type: none"> Use verbal and non-verbal communications with work team during operations using voice, hand and whistle signals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	<ul style="list-style-type: none"> • safety helmet • mesh visor • gloves • hearing protection • safety glasses or goggles • safety boots.
Routine checks and maintenance must include at least two of the following:	<ul style="list-style-type: none"> • checking and adjusting bar • cleaning air filter • cleaning and/or replacing spark plug • sharpening chain.
Supports must include at least one of the following:	<ul style="list-style-type: none"> • fallen timber • saw horse trestle • v-shaped supports.
Cutting methods must include:	<ul style="list-style-type: none"> • pulling chains cuts (bottom of bar) • pushing chainsaw cuts (top of bar) • bore / plunge cuts (tip of bar).
Tools must include:	<ul style="list-style-type: none"> • bars • chains • files • plug spanner.

Assessment Requirements for AHCMOM213 Operate and maintain chainsaws

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a hand-held chainsaw at least once, maintained it in working condition and demonstrated the following:

- determined site location for work and work details and clarified with supervisor
- identified site hazards, assessed risks and reported to supervisor
- confirmed work zone with work crew and monitored site
- confirmed first aid and emergency personnel, equipment and procedures
- applied hazard and risk assessment and implemented controls for chainsaw use
- performed routine checks and maintenance for chainsaw usage according to operation and maintenance manual
- identified, tagged and reported chainsaw faults and malfunctions
- recorded and implemented site health and safety in the workplace, environmental and traffic control measures
- used personal protective equipment that complies with Australian Standards
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- used appropriate tools and materials to maintain chainsaw
- applied environmentally responsible workplace practices
- applied low risk work practices including stopping, disengaging quickly and dealing with foreign matter
- cleaned and stored chainsaw
- followed workplace procedures relevant to safely operating a chainsaw.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles and practice for operating chainsaws
- chainsaw routine checks and maintenance according to operation and maintenance manual, including:
 - checking and adjusting bar
 - cleaning air filter
 - cleaning and replacing spark plug
 - sharpening chain
- workplace safe operating procedures
- hazards and risks when operating a chainsaw
- relevant Australian Standards concerning chainsaw operation including use of personal protective equipment
- components of chainsaws and their respective functions
- common defects in woody materials
- cutting methods and techniques, patterns and sequence of cuts
- health and safety in the workplace requirements for the operation of a chainsaw including caution and hazard signs and symbols
- environmental impacts associated with operating chainsaws.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - personal protective equipment must be worn whilst operating chainsaw
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
 - chainsaws
 - chainsaw tools
 - wood
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - chainsaw manufacturer specifications and operator manuals
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM214 Operate cane haulage vehicle

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and complete cane haulage vehicle operations in the sugar cane production industry.

The unit applies to individuals who operate cane haulage vehicles to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare cane haulage vehicle	1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Source and interpret relevant cane haulage vehicle operation and maintenance manual and manufacturer instructions 1.3 Select and maintain personal protective equipment according to health and safety in the workplace requirements 1.4 Fit and use personal protective equipment according to job requirements and task to be undertaken 1.5 Conduct cane haulage vehicle routine pre-operational checks 1.6 Conduct cabin drill according to workplace procedures
2. Carry out cane haulage operations	2.1 Carry out pre-start, and start up procedures required for vehicle operation 2.2 Drive and operate cane haulage vehicle, and modify the operating technique to meet changing work conditions 2.3 Select, haul and deliver cane using correct pushing or towing practices according to operation and maintenance manual and within equipment capabilities 2.4 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.5 Identify environmental and biosecurity implications associated with cane haulage vehicle operation and undertake actions to minimise impact 2.6 Complete work according to the agreed plan and within the operating capacity of the equipment and operator
3. Complete cane haulage vehicle operation	3.1 Park cane haulage vehicle and conduct shut down procedures 3.2 Identify and report malfunctions, faults, irregular performance or damage to supervisor 3.3 Clean, secure and store cane haulage vehicle 3.4 Remove and store keys 3.5 Maintain cane haulage vehicle use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCMOM214 Operate cane haulage vehicle

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated a cane haulage vehicle to haul a load of cane safely and efficiently at least once and has demonstrated the following:

- identified hazards and risks associated with cane haulage vehicle operation implemented safe work practices
- carried out cane haulage vehicle pre-operational checks
- checked haulage equipment prior to use
- driven and operated a cane haulage vehicle safely including modifying operating technique to meet changing work conditions
- operated cane haulage vehicle features and attachments consistent with operation and maintenance manual and manufacturer specifications
- used safe pushing and towing practices to haul cane safely and efficiently
- carried out cane haulage vehicle shut down procedures
- minimised environmental impacts associated with cane haulage vehicle operation
- followed workplace health and safety procedures
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with cane haulage vehicle operations
- site safety requirements for cane haulage operations
- cane haulage vehicle components, controls, features, technical capabilities and limitations
- operating methods of cane haulage vehicles including pushing and towing

- principles of weight distribution with regard to load shifting and vehicle movement
- risks associated with the operation of cane haulage vehicles in different weather and terrain conditions
- cane haulage processes and spillage minimisation techniques
- cane harvesting processes as they relate to collection and haulage of harvests
- duty of care to self, others and the environment including environmental impacts relevant to the operation of cane haulage vehicles
- relevant legislation with regard to cane haulage vehicle operation and licensing requirements
- environmental impacts associated with operating a cane haulage vehicle
- workplace procedures applicable to health and safety in the workplace requirements to operate a cane haulage vehicle safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - cane haulage vehicles
 - cane
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - cane haulage vehicle operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to cane haulage vehicle operation
 - legislation relevant to cane haulage vehicle operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM215 Operate commercial lawnmowers

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to operate commercial lawnmowers to mow a lawn surface including preparation of site and equipment requirements, shutdown procedures and routine maintenance.

The unit applies to individuals who operate commercial lawnmowers to undertake routine work under general supervision with limited autonomy and accountability.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare site to be mown	1.1 Confirm site to be mown and identify potential hazards and risks including obstacles and fixtures 1.2 Implement safe working practices to manage risks including removal and replacement obstacles before and after mowing 1.3 Report abnormal conditions or changes in the appearance of the site and existing grass surface

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare equipment for mowing	2.1 Select appropriate tools, equipment and machinery for site to be mown 2.2 Calibrate lawnmower and adjust to height according to manufacturer guidelines 2.3 Complete pre-operational checks of tools, equipment and machinery 2.4 Select and maintain personal protective equipment according to workplace safety requirements 2.5 Fit and use personal protective equipment according to job requirements 2.6 Erect safety warning notices during work periods
3. Mow site surface	3.1 Assess grass appearance and changes during mowing operations in line with requirements for the site 3.2 Match implements to the lawnmower according to manufacturers' specifications 3.3 Maintain continuous oversight of mowing activities including monitoring of hazards and risks 3.4 Identify environmental impacts associated with operation of equipment and minimise where possible
4. Complete mowing and check lawnmower operation	4.1 Conduct shut down procedures in line with workplace practices 4.2 Perform routine operational servicing and minor maintenance 4.3 Identify and report malfunctions, faults, irregular performance or damage in required format 4.4 Clean and store lawnmower and associated equipment in the required location 4.5 Maintain lawnmower use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations and products
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare lawnmower use records
Numeracy	<ul style="list-style-type: none"> Calculate quantities of lawn mower fluids including oil and fuel
Oral Communication	<ul style="list-style-type: none"> Use clear language to report abnormal conditions, changes to site appearance, malfunctions, faults, irregular performance or damage
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility
Get the work done	<ul style="list-style-type: none"> Take responsibility for routine decisions about operating commercial lawnmowers and reflect on outcomes to identify effectiveness of decisions

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	<ul style="list-style-type: none"> hearing protection eye protection gloves safety footwear long trousers.
Routine operational servicing and minor maintenance must include:	<ul style="list-style-type: none"> engine oil fuel cutting blades.

Assessment Requirements for AHCMOM215 Operate commercial lawnmowers

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has mown a commercial site using a commercial lawnmower at least once and has:

- determined the condition of the existing grass surface and sought advice for subsequent routine preparations and treatments
- prepared site and equipment used for mowing
- used lawnmower, equipment, machinery and implements according to manufacturer specifications
- operated a commercial mower safely including making adjustments for attached implements and modifying techniques to meeting changed conditions
- minimised environmental impacts associated with lawnmower operation
- implemented lawnmower shut down procedures
- carried out routine servicing and maintenance and recorded malfunctions, faults or irregular performance
- cleaned and stored mower according to workplace guidelines
- followed workplace health and safety procedures for safe use and operation of commercial lawnmowers.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of grass preparation
- preparation methods and treatments required for optimal maintenance of grass surfaces
- effect of adverse outdoor climatic conditions on commercial lawnmower operations
- use of lawnmower, equipment, machinery and implements according to manufacturer specifications
- commercial lawnmower operation and maintenance requirements
- hazards and risks associated with commercial lawnmower operation

- environmental impacts relevant to the operation of commercial lawnmowers
- workplace procedures applicable to health and safety in the workplace requirements to operate a commercial lawnmower safely.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - commercial lawn mower
 - lawnmower implements
 - personal protective equipment specific to lawnmower operation
- specifications:
 - lawn mower manufacturer specifications and manufacturer guidelines
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM216 Operate side by side utility vehicles

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to safely operate a side by side utility vehicle including undertaking pre-start checks and shut down procedures.

The unit applies to individuals who operate side by side utility vehicles to undertake routine work under general supervision with limited autonomy and accountability.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1.Prepare side by side utility vehicle for use	<p>1.1 Confirm with supervisor activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks</p> <p>1.2 Conduct routine pre-operational checks on the vehicle according to operators manual and report faults or malfunctions for repair</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Use, wear and correctly fit personal protective equipment including helmets that are fit for purpose according to operators manual</p> <p>1.5 Attach equipment and loads that do not exceed the weight limitations of the vehicle</p> <p>1.6 Secure loads to ensure safe transport</p>
2. Operate side by side utility vehicle	<p>2.1 Start up, steer, manoeuvre, position and stop side by side utility vehicle in a controlled manner</p> <p>2.2 Identify environmental and biosecurity implications associated with side by side utility vehicle operation and minimise impact of vehicle use</p> <p>2.3 Apply side by side utility vehicle driver skills</p> <p>2.4 Operate side by side utility vehicles in accordance with task requirements, conditions and operators manual</p> <p>2.5 Identify and avoid riding surfaces, terrains and slopes that are dangerous to safe operation</p> <p>2.6 Operate and manoeuvre over a variety of surfaces, slopes and terrain to minimise risk to safety</p> <p>2.7 Modify side by side utility vehicle operation according to local weather conditions</p> <p>2.8 Ensure that vehicle seat belts and other safety features are functional and correctly fitted</p>
3. Complete side by side utility vehicle operation	<p>3.1 Shut down side by side utility vehicle</p> <p>3.2 Identify and report malfunctions, faults, irregular performance or damage to supervisor</p> <p>3.3 Park and secure side by side utility vehicle</p> <p>3.4 Remove and store keys in the required location</p> <p>3.5 Unload, load and secure side by side utility vehicle safely</p> <p>3.6 Maintain vehicle use records for servicing purposes in line with workplace practices</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults and irregular performance or damage Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Calculate quantities of vehicle fluids including oil and fuel Calculate load volumes and weights Identify correct tyre pressure
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> vehicle damage and serviceability fuel brakes tyres including pressure and condition vehicle controls.
Personal protective equipment must include:	<ul style="list-style-type: none"> a suitable helmet according to operators manual enclosed toe shoes
Side by side utility vehicle driver skills must include:	<ul style="list-style-type: none"> parking across the slope when parking on a hill or gradient on-board weight distribution load security crossing obstacles avoiding hazards.
Safety features must include at least three of	<ul style="list-style-type: none"> roll-over protective structure seat belts

the following:	<ul style="list-style-type: none"> • side nets • doors • occupant hand holds • tyre selection and inflation pressure.
Unload, load and secure side by side utility vehicle must include at least one of the following:	<ul style="list-style-type: none"> • trailer • transportation device • on site vehicle storage.

Assessment Requirements for AHCMOM216 Operate side by side utility vehicles

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a side by side utility vehicle on at least two riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with side by side utility vehicle use
- identified and avoided driving surfaces, terrains and slopes that are dangerous to safe operation of side by side utility vehicles
- selected and worn side by side utility vehicle helmet that is fit for purpose according to operators manual
- selected, fitted and used other personal protective equipment that is required for the task
- maintained personal protective equipment in suitable condition for use
- unloaded the side by side utility vehicle safely and checked it is safe to use
- operated and manoeuvred side by side utility vehicles in different surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a side by side utility vehicle in a controlled manner
- selected appropriate modes of operation and applied side by side utility vehicle driver skills to assist vehicle stability
- parked the side by side utility vehicle safely and checked for any damage, malfunctions or faults
- loaded and secured side by side utility vehicle safely
- minimised environmental impacts associated with side by side utility vehicle operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with side by side utility vehicle areas of operation

- components, controls, modes and features of side by side utility vehicles and their functions
- side by side utility vehicle functional applications, including:
 - occupant hand holds, correct use, importance of reach and keeping body parts inside vehicle
 - roll-over protective structure
 - tyre selection and inflation pressure
 - side nets and doors
- operating principles and operating methods of side by side utility vehicles
- workplace safety plan for operating and maintaining side by side utility vehicles
- side by side utility vehicle operator's manual
- side by side utility vehicle driver skills, including higher level two foot pedal operation skills, for technical applications
- effects of different surfaces and terrain conditions on the operation of side by side utility vehicle
- load limits and attachments specific to side by side utility vehicle capabilities and the effects to dynamic stability of the side by side utility vehicle including:
 - weight distribution
 - load security
 - liquid or shifting loads
 - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
 - tie down devices
 - vehicle ramps
 - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to side by side utility vehicle use
- environmental impacts associated with operating side by side utility vehicles and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - helmets must be worn whilst operating side by side utility vehicles according to operators manual
- resources, equipment and materials:
 - side by side utility vehicle
 - vehicle fuel

- side by side utility vehicle helmet as identified by operator manual
- enclosed toe shoes
- specifications:
 - side by side utility vehicle manufacturer specifications and operator manuals
 - industry and workplace biosecurity procedures applicable to side by side utility vehicle operation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM217 Operate quad bikes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a quad bike on at least two different riding surface conditions and on an even, uneven and sloping terrain and has:

- identified hazards and risks associated with quad bike areas of operation
- identified and avoided riding surfaces, terrains and slopes that are dangerous to safe operation of quad bikes
- identified and confirmed quad bike no go areas
- selected, fitted and used quad bike helmet and other personal protective equipment that was fit for purpose
- maintained personal protective equipment in suitable condition for use
- unloaded the quad bike safely and checked it is safe to use
- operated and manoeuvred quad bikes in different riding surface and terrain conditions including uneven and sloping terrain
- started, steered, manoeuvred, positioned and stopped a quad bike in a controlled manner
- applied quad bike active riding techniques to reposition operator body weight to assist bike stability
- parked the quad bike safely and checked for any damage, malfunctions and faults
- loaded and secured the quad bike safely
- minimised environmental impacts associated with quad bike operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with quad bike areas of operation including quad bike no go areas
- components, controls and features of quad bikes and their functions
- quad bike functional applications, including appropriate selection of machine for task

- workplace safety plan for operating and maintaining quad bikes
- quad bike operator's manual
- operating principles and operating methods of quad bikes
- circumstances when quad bike active riding techniques should be applied
- quad bike active riding techniques, including both when and when not to apply quad bike active riding techniques
- effects of different riding surfaces and terrain conditions on the operation of quad bikes
- load limits and attachments specific to quad bike capabilities and the effects to dynamic stability of the quad bike, including:
 - weight distribution
 - load security
 - liquid or shifting loads
 - effect of load when operating on uneven or steep terrain
- loading and unloading safely from a trailer, transportation device and site storage, including use of:
 - tie down devices
 - vehicle ramps
 - loading surfaces and angle
- variations in state/territory regulations and legislation that may apply in regard to quad bike use
- environmental impacts associated with operating quad bikes and consequences of substandard environmental and biosecurity practices
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - no passengers on single seat quad bikes
 - no riders under 16 years of age on adult sized quad bikes
 - no towing
 - helmets must be worn whilst operating quad bikes
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
- resources, equipment and materials:
 - quad bike
 - vehicle fuel
 - a suitable quad bike helmet
 - enclosed toe shoes

- specifications:
 - quad bike operation and maintenance manual
 - industry and workplace biosecurity procedures applicable to quad bike operation
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has coordinated maintenance and repair of machinery and equipment for a small enterprise and has:

- identified workplace hazards, assessed risks and implemented safe workplace procedures
- interpreted documentation associated with work site activities
- sought specialist advice on repairs requiring specialist attention
- established priorities for repair and maintenance work to be carried out
- co-ordinated staff and resources to achieve work priorities
- minimised environmental impacts of machinery and equipment maintenance and repair activities
- responded to contingencies and taken corrective actions where necessary
- documented activities, timelines and material usage
- applied workplace health and safety procedures when organising and conducting maintenance and repair activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery required for the project
- environmental impacts of machinery and equipment maintenance and repair work and disposal of fuels, oils and other wastes

- workplace procedures applicable to health and safety in the workplace, and machinery and equipment maintenance and repair.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - maintenance tools and equipment
 - material resources
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

- minimised environmental impacts associated with undertaking machinery maintenance
- maintained machinery and equipment components
- recorded details of maintenance and monitoring
- applied workplace health and safety procedures when undertaking machinery maintenance activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- engine function principles
- turbo charging and after cooling
- assessing engine specifications in line with power requirements

- engine electric and hydraulic indicators and gauges
- transmission and drive systems
- machinery and equipment operation and maintenance manual
- environmental impacts of machinery servicing and disposal of fuels, oils and other wastes
- workplace procedures applicable to health and safety in the workplace and machinery maintenance.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - maintenance tools and equipment
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery operation and maintenance manual
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM304 Operate machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare and operate machinery and equipment in a safe and controlled manner that is used principally in agriculture, horticulture, and conservation and land management work.

This unit does not apply to chainsaws, tractors, vehicles or earth moving equipment.

The unit applies to individuals who operate machinery and equipment under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare machinery and equipment for use	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated agricultural or horticultural machinery and equipment at least once and has:

- identified and reported workplace hazards and implemented safe operating procedures
- carried out machinery and equipment pre-operational checks including basic servicing and maintenance according to operation and maintenance manual
- operated machinery and equipment in a safe and controlled manner consistent with task requirements, conditions, operation and maintenance manual and manufacturer specifications
- attached ancillary equipment and checked for correct operation
- carried out machinery shut down procedures
- recognised, reported and documented defects in equipment and machinery and operational capacity
- cleaned, secured and stored machinery and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with machinery and equipment operation
- pre-operational and safety checks for machinery and equipment according to operation and maintenance manual
- operating principles and operating methods for machinery and equipment
- procedures for cleaning, securing and storing machinery, equipment and materials
- risks associated with the operation of machinery and equipment in different weather conditions and difficult terrain conditions

- duty of care to self, others and the environment
- workplace procedures applicable to health and safety in the workplace requirements for operating machinery and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating machinery and equipment
- resources, equipment and materials:
 - a range of machinery and equipment
 - enclosed toe shoes
 - safety equipment and personal protective equipment applicable to the machinery and equipment being used and the task being undertaken
- specifications:
 - machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to machinery and equipment operation
 - records must include details of the machinery and equipment that the individual was assessed on
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM306 Ground spread fertiliser and soil ameliorant

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated fertiliser and soil ameliorant spreading equipment and machinery at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- assessed environmental and physical hazards that may be encountered when undertaking ground spreading operations and taken appropriate action to minimise risks
- communicated with clients to ensure a common understanding and agreement of task to be undertaken
- used maps and interpreted written instructions regarding areas to be spread including types of products and application rates
- maintained, calibrated and operated ground spreading equipment according to operation and maintenance manual, manufacturer specifications and in line with industry standards for uniformity of application
- monitored weather conditions during ground spreading operations and adjusted operations to minimise risk to local environment and personnel in the vicinity
- minimised environmental impacts associated with fertiliser and soil ameliorant application including attention to buffer zones and run-off
- applied fertiliser or soil ameliorants at rate agreed by customer to specified land area
- implemented shut down procedures including cleaning, securing, and safe storage of machinery
- completed operational and equipment maintenance records according to workplace procedures
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with fertiliser and soil ameliorant application, and machinery and equipment operation
- fertiliser and soil ameliorant machinery and equipment operating components, controls, features, technical capabilities and limitations
- operational limits of equipment with regard to uniformity of application and potential health and safety implications
- spreading characteristics of different fertiliser and soil ameliorant products
- environmental impacts associated with fertiliser spreading including hazards to waterways
- purpose of buffer zones
- methods of monitoring local weather conditions and the effects of changes on ground spreading activities
- operating principles and operating methods of fertiliser and soil ameliorant machinery and equipment
- procedures for cleaning, securing and storing fertiliser and soil ameliorant machinery, equipment and tools
- workplace procedures applicable to fertiliser and soil ameliorant application
- workplace procedures applicable to health and safety in the workplace and fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating fertiliser and soil ameliorant machinery
- resources, equipment and materials:
 - fertiliser and soil ameliorant machinery, equipment and tools
 - fertiliser or soil ameliorant products
 - protective clothing
 - respirators
 - protective eyewear
 - unlined rubber or plastic gloves
 - neoprene or nitrile boots

- safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - fertiliser and soil ameliorant machinery and equipment operation and maintenance manuals and manufacturer specifications
 - industry code of practice applicable to fertiliser and soil ameliorant application
 - industry and workplace biosecurity procedures applicable to fertiliser and soil ameliorant application, and fertiliser and soil ameliorant machinery and equipment
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOMB07 Operate a cane harvester

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and complete cane harvester operations in the sugar cane production industry.

The unit applies to individuals who operate cane harvesters under broad direction, and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare cane harvesting equipment for use	1.1 Confirm work activity to be undertaken, including identifying potential hazards and risks implementing safe working practices to manage risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Source and interpret relevant cane harvester operation and maintenance manual and manufacturer instructions</p> <p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Fit and use personal protective equipment according to job requirements and applicable to task to be undertaken</p> <p>1.5 Conduct cane harvester routine pre-operational checks</p> <p>1.6 Document damaged or worn components and organise for replacement according to workplace procedures</p> <p>1.7 Conduct cabin drill according to workplace procedures</p> <p>1.8 Locate and select crop class, variety and field for harvest</p>
2. Carry out cane harvesting	<p>2.1 Carry out pre-start, and start up procedures</p> <p>2.2 Set and operate cane harvester in a safe, controlled and correct manner and monitor for performance and efficiency</p> <p>2.3 Operate cane harvester in co-ordination with cane haulage vehicles and other associated harvesting equipment</p> <p>2.4 Harvest cane in a productive, safe and controlled manner and consign according to workplace procedures</p> <p>2.5 Identify environmental and biosecurity implications associated with cane harvesting and undertake activities to minimise impact</p> <p>2.6 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p>
3. Complete cane harvesting operations	<p>3.1 Park cane harvester and conduct shut down procedures according to workplace practices</p> <p>3.2 Perform routine operational servicing and minor maintenance</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures</p> <p>3.4 Clean and sterilise cane harvester to prevent cross-site contamination</p> <p>3.5 Store and secure cane harvester</p> <p>3.6 Remove and store keys in the required location</p> <p>3.7 Maintain cane harvester use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations

Assessment Requirements for AHCMOM307 Operate a cane harvester

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated a cane harvester to harvest a commercial crop of cane at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out cane harvester pre-operational checks according to operation and maintenance manual
- checked cane harvester equipment prior to use
- familiarised self with field and local conditions for harvest
- set and operated a cane harvester in a safe, controlled and correct manner and monitored for performance and efficiency
- operated cane harvester consistent with operation and maintenance manual and manufacturer specifications
- recognised and reported defects in cane harvester equipment and operational capacity
- communicated and co-operated with relevant personnel including haul-out drivers
- controlled and minimised cane spillage
- carried out cane harvester shut-down procedures
- cleaned and sterilised the harvester to prevent cross-site contamination
- minimised environmental impacts associated with cane harvester operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with cane harvester operations

- cane harvester and site safety requirements
- cane harvester components, controls, features, technical capabilities and limitations
- operating principles and operating methods for cane harvesters
- cane harvester processes and spillage minimisation techniques
- harvest and haulage processes as they relate to collection and haulage of harvests
- principles of the safe removal of obstacles from harvesters and adjustment of harvester settings
- duty of care to self, others and the environment
- relevant legislation with regard to cane harvester operation and licensing requirements
- environmental impacts associated with operating cane harvesters
- workplace procedures applicable to health and safety in the workplace and operating a cane harvester safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - in a range of weather and surface conditions and on a range of different terrains
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating cane harvester
- resources, equipment and materials:
 - cane harvester
 - cane
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - cane harvester operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to cane harvesting
 - legislation relevant to cane harvester operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM308 Operate broadacre and row crop harvest machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to operate harvest machinery and equipment used for broadacre and row crop harvesting in the agriculture and horticulture sectors.

This unit applies to individuals who operate broadacre or row crop harvesting machinery and equipment under broad direction, and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare broadacre and	1.1 Confirm activity to be undertaken, including identifying potential

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated broadacre and row crop harvesting machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out harvest machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in broadacre and row crop harvest machinery equipment and operational capacity
- attached and detached ancillary equipment safely
- operated harvest machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and local conditions
- shut down machinery and equipment and recorded usage
- minimised environmental impacts associated with harvest machinery and equipment operation
- followed industry and workplace biosecurity procedures
- followed workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with broadacre and row crop harvest machinery and equipment operations
- broadacre and row crop harvest machinery and equipment components, controls, features, technical capabilities and limitations

- manufacturer and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - planned and emergency shut down procedures
- relevant legislation with regard to harvest machinery operation and licensing requirements
- environmental impacts associated with operating machinery and equipment used for harvesting
- workplace procedures applicable to health and safety in the workplace requirements and harvest machinery and equipment operation
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating harvest machinery
- resources, equipment and materials:
 - harvest machinery and equipment
 - broadacre or row crop
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - harvest machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to broadacre and row crop harvesting
 - legislation relevant to harvest machinery operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOMB311 Operate precision control technology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to operate precision technology used for the control of specialised machinery and equipment and to optimise specialised machinery performance.

The unit applies to individuals who operate precision control technology under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare precision technology for use	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks 1.2 Source and interpret relevant precision control technology

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	operation and maintenance manual and manufacturer instructions 1.3 Conduct precision control technology routine pre-operational checks according to workplace practices 1.4 Record minor routine servicing and housekeeping tasks in line with workplace processes 1.5 Check ancillary equipment for correct operation 1.6 Check that data complies with job specifications
2. Operate precision technology	2.1 Operate precision control technology according to operation and maintenance manual, manufacturer specifications, task requirements and conditions 2.2 Monitor activities to ensure that machinery is operating in an efficient and controlled manner and make adjustments as required 2.3 Monitor and assess hazards and risks, and ensure safety of self, other personnel and associated equipment 2.4 Identify and assess impacts on the environment of precision control equipment operation and undertake activities to minimise
3. Complete work	3.1 Conduct shut down procedures for precision control equipment according to workplace practices 3.2 Download data and complete operational records 3.3 Perform basic diagnostic procedures as required according to job specifications 3.4 Identify and report malfunctions, faults and irregular performance or damage according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations

Skill	Description
Writing	<ul style="list-style-type: none"> Complete operational records
Numeracy	<ul style="list-style-type: none"> Check and compare precision control technology data against job specifications Download and interpret precision control technology data and record in operational records
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Precision control technology must include at least one of the following:	<ul style="list-style-type: none"> on-board Global Positioning System (GPS), Global Navigation Satellite System (GNSS) or Differential Global Positioning System (DGPS) precision control equipment fixed GPS, GNSS or DGPS precision control equipment.
Pre-operational checks must include at least one of the following:	<ul style="list-style-type: none"> precision control technology equipment damage and serviceability Automatic Section Control measurement check equipment dimension check GPS offset setting.

Assessment Requirements for AHCMOMB11 Operate precision control technology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has used precision control technology in the operation of agricultural or horticultural machinery at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out precision control technology pre-operational checks according to operation and maintenance manual
- used technology to operate machinery in an efficient and controlled manner
- minimised environmental impacts associated with use of precision control technology to operate machinery
- performed routine maintenance tasks
- performed basic diagnostic procedures
- downloaded and uploaded data for the task
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- manufacturer specifications and requirements for:
 - precision control technology pre-operational checks
 - precision instrument controls, feature and functions
 - minor servicing requirements
- uploading and downloading of data produced during the operation of precision control machinery and associated equipment
- components and controls features and functions of equipment
- diagnostic techniques for operational performance

- characteristics, technical capabilities and limitations of associated machinery and equipment
- environmental impacts of using precision control technology to operate machinery.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating precision control technology equipment
- resources, equipment and materials:
 - precision control technology equipment
- specifications:
 - precision control technology equipment operation and maintenance manuals
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Source and interpret relevant planting and seeding machinery and equipment operation and maintenance manual and manufacturer instructions</p> <p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Fit and use personal protective equipment according to job requirements and applicable to task to be undertaken</p> <p>1.5 Conduct planting and seeding machinery and equipment routine pre-operational checks</p> <p>1.6 Document damaged or worn components and organise for replacement according to workplace procedures</p> <p>1.7 Attach ancillary equipment and check for correct operation</p>
2. Operate row crop planting and seeding machinery and equipment	<p>2.1 Carry out machinery pre-start, and start up procedures according to workplace practices</p> <p>2.2 Operate planting and seeding machinery in a safe, controlled and efficient manner and monitor for performance and efficiency</p> <p>2.3 Operate planting and seeding machinery according to operation and maintenance manual, manufacturer specifications, task requirements and conditions</p> <p>2.4 Identify environmental and biosecurity implications associated with row crop planting and seeding machinery usage and undertake activities to minimise impact</p> <p>2.5 Continually monitor hazards and risks, and ensure safety of self, other personnel and equipment</p>
3. Complete work	<p>3.1 Conduct shut down procedures for row crop planting and seeding machinery and equipment according to workplace requirements and manufacturers' specifications</p> <p>3.2 Perform routine operational servicing and minor maintenance</p> <p>3.3 Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures</p> <p>3.4 Clean, store and secure planting and seeding machinery and equipment</p> <p>3.5 Maintain planting and seeding machinery use records in required format</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> Document planting and seeding machinery use
Oral communication	<ul style="list-style-type: none"> Use clear language to report malfunctions, faults, irregular performance or damage
Numeracy	<ul style="list-style-type: none"> Identify correct tyre pressure
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> machine damage and serviceability checking for missing parts condition of tyres.
Biosecurity implications must include:	<ul style="list-style-type: none"> control of cross-site contamination.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has operated row crop planting and seeding machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out planting and seeding machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in row crop planting machinery and equipment and operational capacity
- attached and detached ancillary equipment
- operated planting and seeding machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and conditions
- followed planting requirements
- minimised environmental impacts associated with row crop planting and seeding machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with row crop planting and seeding machinery and equipment operations
- planting and seeding machinery and equipment components, controls, features, technical capabilities and limitations

- manufacturer requirements and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - planned and emergency shut down procedures
- environmental impacts associated with operating machinery and equipment used for row crop planting and seeding
- workplace procedures applicable to health and safety in the workplace for row crop planting and seeding machinery and equipment operation
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - in a range of weather and surface conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating row crop planting and seeding machinery
- resources, equipment and materials:
 - row crop planting and seeding machinery and equipment
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - row crop planting and seeding machinery and equipment operation and maintenance manuals
 - industry and workplace biosecurity procedures applicable to row crop planting and seeding
- relationships:
 - supervisors
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM313 Operate mobile irrigation machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to operate mobile machinery and equipment used for irrigation in agriculture and horticulture sectors.

The unit applies to individuals who operate mobile irrigation machinery and equipment under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare mobile irrigation machinery for use	<p>1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage risks</p> <p>1.2 Source and interpret relevant mobile irrigation machinery and</p>

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has safely operated either lateral or centre pivot mobile irrigation machinery and equipment at least once and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out mobile irrigation machinery and equipment pre-operational checks according to operation and maintenance manual
- performed minor maintenance
- recognised and documented defects in mobile irrigation machinery and equipment and operational capacity
- attached and detached ancillary equipment
- operated mobile irrigation machinery and equipment according to operation and maintenance manual, manufacturer specifications, task requirements and conditions
- shut down machinery and equipment and recorded usage
- minimised environmental impacts associated with mobile irrigation machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with mobile irrigation machinery and equipment operations
- mobile irrigation machinery and equipment components, controls, features, technical capabilities and limitations
- manufacturer requirements and workplace requirements for:

- pre-operational checks
- machinery operation techniques
- operator level servicing
- planned and emergency shut down procedures
- health and safety in the workplace procedures applicable to mobile irrigation machinery and equipment operation
- environmental impacts associated with operating machinery and equipment used for mobile irrigation
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating mobile irrigation machinery

AHCMOMB14 Transport machinery

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to load, transport and unload machinery used for earth-moving and agricultural operations.

The unit applies to individuals who transport machinery under broad direction, and take responsibility for their own work.

Vehicles must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Load machines	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe workplace procedures for transporting machinery and managing risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Prepare trailer, low loader or float for loading according to contractor policy 1.3 Load machine according to safe operating procedures and workplace procedures 1.4 Complete tie down procedures according to industry practice 1.5 Secure machine to prevent movement in transport according to industry practice 1.6 Display signs indicating oversized loads according to legislative requirements 1.7 Arrange permits, clearances and escorts for transporting oversized loads
2. Transport machines	2.1 Plan transport route ensuring compliance with oversized loads, permits, clearances and relevant legislation 2.2 Drive machines on or off road in compliance with relevant licensing requirements and regulations 2.3 Transport machinery safely to destination according to licensing requirements and regulations
3. Unload machines	3.1 Complete untie procedures according to industry practice 3.2 Unload machines according to safe operating procedures and workplace procedures 3.3 Complete workplace documentation in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Load must include at least one of the following:	<ul style="list-style-type: none"> • side loaded • rear loaded.
Tie down must include at least one of the following:	<ul style="list-style-type: none"> • webbing straps • chains • wire rope • polypropylene or nylon filament rope • clevis claw hook • grab hook • ratchet hook.

Assessment Requirements for AHCMOM314 Transport machinery

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has loaded, transported and unloaded large machinery used for earthmoving or agricultural operations at least once and has:

- identified hazards and risks and implemented safe work practices and procedures
- safely loaded and unloaded large earthmoving or agricultural machinery
- secured machinery as a transport load
- provided an escort for wide loads
- arranged permits and escorts as required by legislation
- driven machinery to destination, complying with requirements for moving wide loads
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation pertaining to transport of heavy vehicles and machinery
- machinery operating principles and operating methods used for earth moving and agricultural operations
- tying down procedures for large machinery
- relevant legislation with regard to vehicle operation and licensing requirements
- workplace procedures relevant to health and safety in the workplace requirements to transport machinery safely
- industry practice and workplace procedures relevant to transport of machinery.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating machinery
- resources, equipment and materials:
 - a range of machinery
 - tie down devices
- specifications:
 - machinery operation and maintenance manuals
 - legislation relevant to vehicle operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCMOM315 Operate chemical application machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that, on at least one occasion, the individual has calibrated, operated and cleaned specialised liquid or granular chemical application machinery and equipment and has:

- identified hazards and implemented safe workplace practices and procedures
- carried out chemical application machinery and equipment pre-operational checks according to operation and maintenance manual
- sourced and interpreted relevant Safety Data Sheets (SDS)
- performed minor maintenance
- recognised and documented defects in chemical application machinery and equipment and operational capacity
- attached and detached ancillary equipment
- calibrated and set up application components
- operated chemical application machinery according to operation and maintenance manual, manufacturer specifications, task requirements and regulatory requirements
- assessed and minimised spray drift risk
- completed operational records according to legislative and regulatory requirements
- minimised environmental impacts associated with chemical application machinery and equipment operation
- followed industry and workplace biosecurity procedures
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hazards and risks associated with chemical application machinery and equipment operations
- categories of information contained in SDS
- chemical application machinery and equipment components, controls, features, technical capabilities and limitations
- manufacturer requirements and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - planned and emergency shut down procedures
- features and functions of chemical application equipment components, including:
 - liquid spray; nozzles, tanks, agitation systems, pumps, filters, pressure regulation valves
 - granular applicators/dusters; hoppers, flow control valves
- effects of meteorological conditions on chemical application
- legislative and regulatory requirements applicable to chemical application
- workplace procedures applicable to health and safety in the workplace for chemical application machinery and equipment operation
- environmental impacts associated with operating chemical application machinery and equipment including spray drift
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating chemical application machinery
- resources, equipment and materials:
 - chemical application machinery and equipment
 - protective clothing
 - respirators
 - protective eyewear
 - unlined rubber or plastic gloves
 - neoprene or nitrile boots
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:

- chemical application machinery and equipment operation and maintenance manuals and manufacturer specifications
- legislative and regulatory requirements applicable to chemical application
- industry and workplace biosecurity procedures applicable to chemical application
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM316 Refuel machinery or vehicle

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to receive and store bulk fuel, prepare for refuelling, refuel machinery or vehicle and complete refuelling.

The unit applies to individuals who refuel machinery or vehicles under broad direction, and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Receive and store bulk fuel	1.1 Identify regulatory and industry requirements for the receipt and storage of bulk fuel, and refuelling operations 1.2 Identify health and safety hazards in the workplace, assess risks and implement suitable controls

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify dangers of volatile fuel liquids and vapours</p> <p>1.4 Locate and check firefighting and spill response equipment, and replace faulty equipment according to manufacturer specification</p> <p>1.5 Ensure facilities for storage of bulk fuel meet national standards</p> <p>1.6 Check bulk fuel storage facilities to ensure fuel quality is maintained during storage</p> <p>1.7 Check storage facilities and refuelling equipment for leaks</p> <p>1.8 Receive bulk fuel into storage according to regulatory requirements and workplace procedures</p> <p>1.9 Complete documentation for receipt of bulk fuel according to workplace procedures</p> <p>1.10 Monitor bulk fuel during storage to maintain fuel quality and usage</p>
2. Prepare for refuelling	<p>2.1 Select and maintain personal protective equipment</p> <p>2.2 Fit and use personal protective equipment and confirm safety equipment applicable to the task being undertaken</p> <p>2.3 Select fuel based on machinery or vehicle use and manufacturer specifications</p> <p>2.4 Ensure appropriate firefighting and spill response equipment are accessible</p> <p>2.5 Ensure appropriate refuelling equipment is available and meets national standards</p> <p>2.6 Check and secure refuelling equipment according to workplace practices and manufacturer specifications</p> <p>2.7 Position and secure machinery or vehicle for refuelling</p>
3. Refuel machinery or vehicle from fixed storage	<p>3.1 Open tank valves on machinery or vehicle if necessary</p> <p>3.2 Refuel machinery or vehicle according to regulatory requirements and manufacturer specifications</p> <p>3.3 Ensure there is no residual fuel left in any equipment used for fuel transfer</p> <p>3.4 Contain spills and mitigate environmental or safety dangers according to legislation and workplace procedures</p> <p>3.5 Check fuel levels are at required level for refuelling purposes</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.6 Close and secure tank valves if necessary
4. Refuel machinery or vehicle from portable containers	4.1 Ensure only approved containers are used to transport decanted fuel 4.2 Ensure portable containers being towed are secure 4.3 Check containers to ensure fuel quality is maintained 4.4 Decant fuel from fixed storage into containers ensuring risks are minimised 4.5 Ensure there is no residual fuel in fuel transfer equipment for all decanting procedures 4.6 Transport containers to worksite according to regulatory requirements and workplace procedures 4.7 Decant fuel from portable containers using appropriate equipment 4.8 Contain spills and mitigate environmental or safety dangers according to legislation and workplace procedures
5. Complete refuelling	5.1 Clean, maintain and store refuelling equipment and containers according to workplace procedures 5.2 Complete workplace documentation and records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

work	requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Personal protective equipment must include:	<ul style="list-style-type: none"> • protective clothing • protective eyewear • unlined rubber or plastic gloves • neoprene or nitrile boots • high visibility clothing.

Assessment Requirements for AHCMOM316 Refuel machinery or vehicle

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has received and stored bulk fuel and has refuelled machinery or a vehicle on at least one occasion and has demonstrated the following:

- identified health and safety hazards in the workplace, assessed risks and implemented suitable controls
- received and stored bulk fuel according to workplace and regulatory requirements
- prepared for refuelling of machinery or a vehicle from fixed storage and from a portable container
- refuelled machinery or vehicle from fixed storage
- refuelled machinery or vehicle from portable containers
- completed refuelling according to workplace procedures
- completed required documentation
- minimised environmental impacts associated with machinery and vehicle refuelling
- applied workplace health and safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulatory and industry requirements for the receipt and storage of bulk fuel, and refuelling operations
- health and safety in the workplace procedures relevant to machinery and vehicle refuelling
- types, use and maintenance of personal protective equipment
- types, features and use of fuels for machinery and vehicles
- requirements, types, features and facilities used to store and receive fuel

- workplace procedures for checking fuel storage facilities, refuelling equipment and fuel transfer equipment for leaks
- types, features, use, maintenance and storage of fuel transfer and refuelling equipment
- risks and dangers associated with volatile fuel liquids and vapours, and mitigation and protection measures
- procedures for emptying fuel transfer equipment and checking that they are empty of residual fuel
- methods and procedures for securing portable fuel containers during transport
- environmental impacts of fuel leaks and spills
- types, features, use and maintenance of firefighting and spill response equipment
- legislation and workplace procedures relevant to containment methods and equipment for fuel spills
- workplace procedures applicable to environmental protection and sustainability procedures for mitigation and protection measures for fuel spills.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when refuelling machinery or vehicles
- resources, equipment and materials:
 - a range of machinery or vehicles
 - refuelling equipment
 - fuel
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery or vehicle operation and maintenance manuals
 - regulations, legislation, industry requirements, manufacturer specifications and workplace procedures relevant to machinery and vehicle refuelling and fuel storage requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOMB317 Operate tractors with attachments

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, operate and maintain tractor operations with attached equipment.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all health and safety in the workplace aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

The unit applies to individuals who operate tractors with attachments under broad direction and take responsibility for their own work.

Vehicle must be operated according to relevant state/territory licensing authority vehicle licence requirements and regulations.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare tractor for operation	1.1 Confirm activity to be undertaken, including identifying potential hazards and risks and implementing safe working practices to manage

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>risks</p> <p>1.2 Source and interpret relevant machinery operation and maintenance manual and manufacturer instructions</p> <p>1.3 Select and maintain personal protective equipment according to workplace safety requirements</p> <p>1.4 Fit and use personal protective equipment required for safe tractor operation and task to be undertaken</p> <p>1.5 Conduct tractor routine pre-operational checks according to operation and maintenance manual</p> <p>1.6 Inspect for missing parts, damage, faults, or malfunctions and report and tag defects</p>
2. Select, remove and fit attachments	<p>2.1 Select attachment for the task</p> <p>2.2 Safely fit attachment according to manufacturer instructions and local conditions for use</p> <p>2.3 Test attachment to ensure correct fitting and safe operation</p> <p>2.4 Use attachment in accordance with recommendations and design limits</p>
3. Operate tractor	<p>3.1 Carry out pre-start and start up equipment procedures</p> <p>3.2 Drive and operate tractor, and modify the operating technique to meet changing work conditions</p> <p>3.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>3.4 Identify environmental and biosecurity implications associated with tractor operation and minimise impact</p> <p>3.5 Complete work according to agreed plan and within the operating capacity of the equipment and operator</p> <p>3.6 Act on or report abnormal monitoring system indicators and alarms</p>
4. Complete and check tractor operation	<p>4.1 Park tractor and conduct shut down procedures according to workplace practices</p> <p>4.2 Perform routine operational servicing and minor maintenance according to the operation and maintenance manual</p> <p>4.3 Identify and report malfunctions, faults, irregular performance or damage according to workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.4 Safely remove attachments according to manufacturer instructions 4.5 Clean and store removed attachments in designated location 4.6 Clean, decontaminate, secure and store tractor in designated location 4.7 Remove and store keys in the required location 4.8 Maintain tractor and equipment use records in required format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> • Interpret textual information from a range of sources to identify relevant and key information about workplace operations
Writing	<ul style="list-style-type: none"> • Document tractor and equipment use
Numeracy	<ul style="list-style-type: none"> • Calculate quantities of vehicle fluids including fuel • Identify correct tyre pressure or track tension
Navigate the world of work	<ul style="list-style-type: none"> • Recognise and follow workplace requirements, including safety requirements, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Pre-operational checks must include:	<ul style="list-style-type: none"> • maintenance interval schedule daily check • machine damage and serviceability • guards are in place and undamaged • checking for missing parts • fluid leaks and levels
--------------------------------------	---

	<ul style="list-style-type: none"> • fuel level • brakes and clutch operation • condition of tyres or tracks • machine controls.
Attachment must include one three point linkage, one Power Take Off (PTO) driven and one trailed implement from the following tractor attachments and implements:	<ul style="list-style-type: none"> • three point linkage implement linkage adjustment • three point linkage PTO driven • three point linkage hydraulic operated • tractor mounted implement direct drive • tractor mounted implement hydraulic operated • tractor mounted implement PTO operated • trailed implement manual adjustment • trailed implement mechanical adjustment • trailed implement PTO operated • trailed implement hydraulic operated.
Biosecurity implications must include:	<ul style="list-style-type: none"> • control of cross-site contamination.

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has used safe working practices when operating tractors and fitting and using attachments on at least one occasion and has:

- identified hazards and risks associated with operating tractors and using attachments
- implemented safe working practices to minimise risks when fitting and using attachments
- carried out tractor pre-operational checks and maintenance including tagging defects
- driven and operated a tractor safely, including modifying operating technique to meet changing work conditions
- selected and safely attached, removed, tested and used one three point linkage, one power take off driven and one trailed implement according to manufacturer specifications and weather conditions
- used safe towing practices
- operated tractors on an incline and an off-road surface with and without attachments and implements
- carried out tractor shut down procedures
- minimised environmental impacts associated with tractor operation
- applied workplace health and safety procedures or safe tractor operation
- followed industry and workplace biosecurity procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tractor components, controls and features and operational functions
- tractor steering systems and features
- tractor operation and maintenance manuals
- features, operational functions and procedures for safe fitting and use of attachments and implements

- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities
- effects of various surface and difficult terrain conditions on tractor operation and use of attachments
- duty of care to self, others and the environment
- relevant legislation with regard to tractor operation and licensing requirements
- environmental impacts relevant to operation of tractors with attachments
- common injuries, causes and implications of using unsafe practices when operating tractors and fitting attachments
- workplace procedures relevant to health and safety in the workplace requirements to operate a tractor safely
- industry and workplace biosecurity procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
 - individual must not be under the influence of alcohol or drugs
 - individual must not be taking any medication (prescribed or otherwise) that may impair judgement
 - individual must not be in a fatigued state when operating the machinery
- resources, equipment and materials:
 - tractors
 - attachments
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - tractor operation and maintenance manual
 - industry and workplace biosecurity procedures applicable to tractor operation
 - legislation relevant to tractor operation and licensing requirements
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM401 Conduct major repair and overhaul of machinery and equipment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to prepare for, carry out and complete major repair and overhaul of machinery and equipment.

The unit applies to individuals who apply specialised skills and knowledge to ensure that workplace machinery and equipment is repaired or overhauled in a way that enables minimal disruption to workplace operations. They have responsibility for their own work and for the quality of the work of others within known parameters. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that, on at least one occasion, the individual has undertaken major repair and overhaul of machinery and equipment in a manner that allows the core business of the enterprise to continue with minimal disruption and has:

- identified potential workplace hazards and implemented control measures
- diagnosed faults and identified the most effective and economic option in the replacement, repair and overhaul of components
- selected and used tools and materials appropriate to the task
- recognised and replaced deteriorated or worn parts
- disassembled and reassembled parts and components of machinery and equipment according to operation and maintenance manual and manufacturer specifications
- used and operated welding and thermal cutting equipment safely and effectively
- determined appropriate cutting and welding techniques
- disposed of wastes to minimise environmental impact
- recorded details of breakdowns, major repairs, overhauls and incidents in workshop record.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- assemblies and components of drive, electrical and hydraulic systems
- operational requirements of machinery and equipment
- detailed knowledge of mechanics and equipment operating systems
- use and storage of welding equipment

- maintenance manuals and manufacturer specifications for machinery and equipment operation relevant to repair tasks
- environmental impacts of machinery and equipment major repair and disposal of fuels, oils and other wastes
- workplace procedures applicable to health and safety in the workplace for major repair of machinery and equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment
 - repair and overhaul tools and equipment
 - welding equipment
 - safety equipment and personal protective equipment applicable to the task being undertaken
- specifications:
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures applicable to health and safety in the workplace and machinery maintenance
- relationships:
 - team members and supervisors
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has implemented and supervised the range of maintenance programs covering property, machinery and equipment that are required to be performed in an agriculture/horticulture industry enterprise, and has demonstrated the following on at least one occasion:

- identified potential workplace hazards and implemented control measures
- planned, costed and scheduled maintenance requirements
- allocated resources
- monitored and controlled costs within workplace budget requirements
- dealt with contingencies and rescheduled maintenance where necessary
- established and monitored performance targets for maintenance team
- monitored and reported on performance of maintenance activities
- ensured property, machinery and equipment are maintained in clean and safe operational condition
- communicated effectively with work team, contractors and management
- monitored health and safety in the workplace and adherence to environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of maintenance requirements with regard to property, machinery and equipment
- maintenance and servicing cycles for property, machinery and equipment
- maintenance planning, scheduling and budgeting
- warranty, insurance agreements and indemnity provisions applicable to property, machinery and equipment maintenance

- workplace procedures applicable to health and safety in the workplace and property, machinery and equipment maintenance.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - warranties, insurance agreements, and indemnity provisions
 - property, machinery and equipment maintenance plans and schedules
 - property, machinery and equipment budgets
- specifications:
 - property maintenance schedule
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures applicable to health and safety in the workplace and property, machinery and equipment maintenance
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that individual has coordinated, monitored and reviewed the operation and maintenance of machinery and equipment for an enterprise and has demonstrated the following on at least one occasion:

- identified potential workplace hazards and implemented safe working systems for machinery and equipment operation
- monitored machinery and equipment operations for a workplace
- evaluated machinery and equipment requirements for a workplace
- developed machinery and equipment operation and maintenance procedures according to health and safety guidelines, manufacturer specifications, workplace procedures and hazardous substances legislation
- scheduled, supervised and recorded the service and maintenance of machinery and equipment
- monitored machinery and equipment operations and maintenance requirements, and reviewed risk assessments periodically to ensure a safe operating environment
- communicated effectively with staff
- assessed staff capability in machinery maintenance and operation, and provided supervision and mentoring.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- servicing and maintaining machinery and equipment within area of responsibility
- methods of calculating the cost of machines and their contribution
- training and instruction techniques for directing the learning of staff

- hazard identification, risk assessment and procedures for developing risk controls
- workplace procedures, legislation and regulation requirements applicable to machinery and equipment maintenance and management
- environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
- workplace procedures applicable to health and safety in the workplace and machinery and equipment management.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment maintenance plans and schedules
 - machinery and equipment budgets
- specifications:
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures and health and safety in the workplace procedures, legislation and regulation applicable to machinery and equipment maintenance and management
 - legislation and regulation requirements applicable to machinery and equipment management
 - environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
- relationships:
 - team members
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCMOM502 Implement a machinery management system

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to coordinate and manage services, maintenance and operational requirements of machinery and equipment to implement a machinery management system for an enterprise.

This unit applies to individuals who apply specialised skills and knowledge to implementing a machinery management system, who take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish machinery and equipment	1.1 Identify machinery and equipment requirements of the workplace 1.2 Evaluate applicability of alternative options to machinery

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	<p>ownership</p> <p>1.3 Identify and address storage and housing requirements for machinery and equipment</p> <p>1.4 Monitor and assess machinery innovations for applicability to workplace requirements, safety and functions</p> <p>1.5 Maintain inventory of machinery and equipment according to workplace procedures</p>
2. Select and manage machinery services provided by off-property suppliers	<p>2.1 Identify services to be provided by off-property suppliers</p> <p>2.2 Develop criteria to select and monitor the provision of services according to workplace safety, operational and financial requirements</p> <p>2.3 Record and monitor agreements and transactions related to service provision for machinery operating requirements</p>
3. Manage machinery maintenance	<p>3.1 Determine machinery and equipment maintenance requirements from operation and maintenance manuals and manufacturer specifications</p> <p>3.2 Establish maintenance schedules and systems for recording machinery use and maintenance</p> <p>3.3 Monitor machinery maintenance to ensure adherence to schedules, operation and maintenance manuals, and manufacturer instructions</p>
4. Manage machinery and equipment operation	<p>4.1 Monitor and record machinery and equipment use according to workplace procedures</p> <p>4.2 Monitor machinery operation to ensure compliance with manufacturer instructions</p> <p>4.3 Determine procedures for operation of machinery and monitor to ensure adherence to safe procedures</p> <p>4.4 Develop and implement staff training program in the safe operation of machinery and procedures for machinery maintenance</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret information regarding maintenance requirements for machinery and equipment Interpret information related to management of machinery and equipment
Writing	<ul style="list-style-type: none"> Develop documentation to record machinery purchase, maintenance and replacement plans
Oral communication	<ul style="list-style-type: none"> Initiate discussions with staff, contractors and suppliers, using clear language to communicate machinery management system, machinery and equipment maintenance schedules and workplace procedures Use clear communications with management to discuss machinery purchase, running costs, servicing costs and budget
Numeracy	<ul style="list-style-type: none"> Compare costs of services provided by off-property suppliers Apply comparative analysis of machinery purchase and running costs
Navigate the world of work	<ul style="list-style-type: none"> Identify and describe own workplace requirements associated with own role and area of responsibility Monitor self and others adherence to workplace requirements including safety requirements
Interact with others	<ul style="list-style-type: none"> Use appropriate language and communication skills to disseminate information within work team

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Machinery and equipment must include:	<ul style="list-style-type: none"> vehicles and attachments stationary and mobile plant used in the workplace.
Services must include:	<ul style="list-style-type: none"> machinery repair machinery overhaul parts supply.

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has established and managed a machinery management system for an enterprise and has demonstrated the following on at least one occasion:

- identified machinery and equipment requirements for a workplace
- identified potential workplace hazards and implemented safe working systems for machinery and equipment operation
- sourced, selected and managed machinery services provided by off-property suppliers
- managed machinery and equipment operation for a workplace
- managed machinery maintenance schedules for a workplace
- documented procedures for machinery and equipment operation and maintenance used in the workplace
- communicated effectively with staff
- identified staff training requirements for the safe operation of machinery and maintenance procedures
- developed and implemented training plans related to operation and maintenance of machinery in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- total costs associated with the use of machinery
- maintenance requirements of machinery and equipment
- storage and housing requirements for machinery
- safe operating procedures for machinery

- systems for monitoring machinery maintenance and operation
- licensing requirements for the operation of machinery
- workplace procedures applicable to health and safety in the workplace and environmental legislation and machinery management systems
- principles of staff learning, development and training.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery and equipment maintenance schedules
 - machinery and equipment budgets
- specifications:
 - machinery and equipment operation and maintenance manual and manufacturer specifications
 - workplace procedures and health and safety in the workplace procedures, legislation and regulation applicable to machinery and equipment management
 - licensing and legislation applicable to machinery operation
 - environmental legislation applicable to maintenance of machinery and equipment, disposal of waste and hazardous substances
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has analysed machinery options for a workplace, including the associated costs and potential returns on capital investments, and has demonstrated the following on at least one occasion:

- compared the productivity and suitability of different types and brands of machinery
- identified and calculated total costs associated with machinery operations
- reviewed machinery requirements for a workplace and evaluated costed alternative options
- analysed the financial costs, tax impacts and investment risks for different types of machinery
- budgeted and incorporated benchmarks of energy efficiency for total running costs of machinery
- calculated potential returns from major capital investments in machinery over designated timeframes
- documented machinery usage analysis and preferred options
- reviewed the machinery options plan and analysis of options.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- benchmarking practices and procedures for determining machinery requirements, including energy efficiency, carbon footprint and water use efficiency
- capital budgeting techniques
- relevant taxation provisions relating to investment in machinery types including related technology and equipment

- risks associated with machinery investments
- analysis and planning processes required for machinery operation and location.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - machinery requirements and machinery options plan
 - machinery costs benchmark data
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM301 Establish an Australian native stingless bee colony

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to identify, procure, establish and maintain a colony of Australian native stingless bees (ANSBs) suitable for establishing in a specific location for a defined purpose.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCNRM301 Establish an Australian native stingless bee colony

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, established an Australian native bee colony, including:

- recognised and selected appropriate Australian native stingless bees (ANSBs) for domestication, and prepared a strategy for managing the colony for a defined purpose
- identified a suitable structure to house an ANSB colony, and acquired components
- used tools and equipment, including personal protective equipment (PPE), to safely prepare a structure to house an ANSB colony
- procured a population of ANSBs and established and located the colony in a suitable environment
- monitored the colony conditions, pests, diseases and disorders during establishment according to colony workplace and biosecurity procedures
- monitored, manipulated and assessed the colony to achieve strategic outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of Australian native bees and their basic biology and nesting habits for a given locality, including:
 - stinging
 - stingless
 - social
 - solitary
- ANSBs and their attributes suitable for 'domestication', including:

- colony forming
- health and safety risks
- suitable environmental conditions
- role in pollination
- commercial and non-commercial outcomes for keeping ANSBs, including:
 - pollination and pollination services
 - honey production
 - education
 - conservation
 - pets
- developing, monitoring and assessing basic strategies for keeping ANSBs
- equipment and resources required for keeping ANSBs, including beekeeping tools, use and maintenance
- structures to house Australian native stingless bees, including:
 - natural habitats
 - hives and hive designs
- health, hygiene and biosecurity considerations
- health and safety hazards and risks associated with handling and working with ANSBs, including:
 - PPE
 - public safety
 - lifting and handling
 - safe use of tools
- methods used for procuring and establishing ANSBs, including:
 - legislative requirements when collecting wild populations
 - transfer techniques for wild colony
 - budding
 - splitting
 - trapping
 - purchasing established colony
- locating colonies and establishing native bee meliponary, including:
 - locality/location/region
 - weather and temperature
 - orientation
 - access to food and water
 - proximity of colonies to each other and competition
- pests, diseases and disorders of Australian native stingless bees, and their control, including biosecurity
- monitoring procedures and signs of health or declining population
- ANSB manipulation techniques, including:

- inspections
- accessing honey
- splitting.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - Australian native stingless bee colony
 - tools and equipment for assembling and working with Australian native stingless bee colonies
 - PPE
- specifications:
 - workplace procedures and specifications related to establishing Australian native stingless bee colonies
 - manufacturer instructions for equipment and machinery to maintain structures to house bee colonies
 - access to legislation and codes of practice related to Australian native stingless bee colonies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCNRM503 Support the implementation of waterways strategies

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has communicated with stakeholders, identified a diverse range of strategies and supported the implementation of waterways strategies.

There must also be evidence that the individual has:

- applied appropriate communication techniques in order to:
 - collect information on needs
 - inform funding opportunities
 - develop plans and submissions
 - educate and resolve conflict
- identified and applied strategies to achieve priorities and related targets from catchment plans
- evaluated progress towards achievement of priorities and targets
- prioritised projects based on regional targets and funding provisions
- determined funding requirements and identified funding mechanisms
- supported the development of plans, which must include:
 - priorities and targets
 - strategies and program outcomes
 - steps and sequence of implementation
 - monitoring and evaluation requirements and procedures
 - reporting methodology
 - communication strategy and procedures

- developed reports for stakeholders and future planning purposes according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- identifying and working with stakeholders, and their importance in building relationships for consultation and formulating strategies, including:
 - waterways agencies and managing authorities
 - Indigenous land rights and ownership
 - special interest groups engaged in water-based activities
 - property owners impacted by waterways strategies and their obligations
 - education and training
- environmental legislation
- contemporary regional catchment management strategies
- ecology of aquatic environments and waterways management
- principles of community capacity building and engagement
- relevant policies across all levels of government and within the specific region, including those under catchment plans
- waterways management and improvement techniques, including:
 - fencing
 - revegetation
 - habitat restoration
 - pest plant control.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- specifications:
 - workplace policies, procedures and processes for implementing waterways strategies
 - waterways strategies for implementation
 - legislation and regulations for waterways management
- relationships:
 - stakeholders
- timeframes:
 - according to stakeholder needs.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM504 Interpret and report on catchment hydrology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to interpret catchment hydrology to report on water quantity and quality within a catchment.

The unit applies to individuals employed in a technical capacity to collect, collate, analyse and report on hydrological data for use in floodplain management, asset protection and water allocation. This person will analyse information and exercise judgement to complete a range of skilled activities. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for AHCNRM504 Interpret and report on catchment hydrology

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has accessed and collated a wide range of hydrological information and data, and interpreted and reported outcomes to stakeholders.

There must also be evidence that the individual has:

- determined the movement of water within a catchment
- assessed processes within catchment to evaluate non-sustainable practices
- reported on catchment hydrological behaviour to workplace requirements
- applied work health and safety practices and biosecurity awareness to the collection and testing of water.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- hydrological cycles
- chemical and physical properties of water
- rock and soil types, including weathering processes
- fluvial geomorphology, including:
 - drainage basin function
 - factors influencing stream flow rates
 - interactions between ground and surface water
 - stream hierarchy and ordering
 - human impacts on surface water quality and quantity

- hydrogeology, including:
 - aquifer types and properties
 - aquifer discharge and recharge
 - rates of water movement through aquifers
 - human impacts on groundwater quality and quantity
- sustainable use of ground and surface water, including:
 - uses of water in catchments
 - water allocation
 - policies and strategies determining water use.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for report writing and statistical analysis
- specifications:
 - workplace policies, procedures and processes for accessing, collating and manipulating hydrological data
 - site-related hydrological data sets
- relationships:
 - work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM505 Provide technical advice on sustainable catchment management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to provide technical advice on sustainable catchment management to land managers in a catchment area or region.

The unit applies to individuals in a catchment management role who are responsible for identifying and managing land degradation, as well as providing advice and information on programs and funding for the sustainable management of farms, small properties, recreational land and land used for commercial activities. The person will analyse information and exercise judgement to complete a range of skilled activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Respond to requests	1.1 Respond to requests for advice from land managers

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
for advice on sustainable catchment management	<p>1.2 Seek information on location, land management or production objectives and land management concerns</p> <p>1.3 Review state and regional legislation, regulations and strategies relevant to the region in relation to potential constraints</p> <p>1.4 Confirm options and processes for provision of advice with land managers</p>
2. Identify and analyse land management issues	<p>2.1 Conduct a site assessment to collect information on geological characteristics, ecological processes and biodiversity</p> <p>2.2 Apply workplace health and safety policies and procedures, environmentally sustainable practices and biosecurity measures when conducting site assessments</p> <p>2.3 Collect information on land uses and land management techniques</p> <p>2.4 Interpret and communicate site information for land managers and other stakeholders using supportive and non-threatening communication</p> <p>2.5 Evaluate the type and extent of land degradation in a site assessment</p>
3. Provide advice on sustainable land and catchment management	<p>3.1 Provide advice according to state and regional legislation, regulations and strategies</p> <p>3.2 Propose options for changing land management practices according to economic, technical, practical, social and environmental standards</p> <p>3.3 Advise land manager on outcomes of analysis, land management techniques, planning outcomes and remediation measures</p> <p>3.4 Provide resource materials and information for supporting programs and accessing funding</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, assess and review information from stakeholders, land managers and legislation and regulations, and consolidate and rationalise for communicating to stakeholders
Oral communication	<ul style="list-style-type: none"> Establish and maintain effective communications when discussing, consulting and advising stakeholders

Assessment Requirements for AHCNRM505 Provide technical advice on sustainable catchment management

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has provided technical advice on sustainable catchment management to land managers in a catchment area or region, according to state and regional legislation, regulations and strategies and stakeholder requirements.

There must also be evidence that the individual has:

- reviewed state and regional legislation, regulations and strategies for relevance to responsibilities of land managers
- analysed issues, processes and techniques in sustainable land management
- assessed land management practices in complying with long-term objectives of a catchment or region
- sourced and communicated advice on sustainable land management practices to a variety of land managers in a knowledgeable and non-threatening manner.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- geological processes and influences on land management, including:
 - rock types and weathering
 - soil formation and soil types
- ecological processes, including:
 - energy flow through ecological systems
 - matter flow through ecological systems

- nutrient cycling
- land degradation processes and impacts, including:
 - soil compaction
 - erosion
 - tree decline
 - pest plant and animal infestations
 - eutrophication
 - acidification
 - salinity
 - fertility decline
- catchment management principles, including:
 - catchment planning priorities and programs
 - roles and responsibilities of land users in catchments
- biodiversity, including:
 - basic plant identification techniques
 - animal identification
 - ecological vegetation communities
- whole property planning principles:
 - energy flows
 - sustainable water management
 - land capability.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- specifications:
 - workplace policies, procedures and processes for catchment management
 - catchment management plans
 - legislation and regulations for catchment management
- relationships:
 - land managers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCNRM603 Implement a monitoring, evaluation and reporting program

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to implement a monitoring, evaluation and reporting program for an organisation to measure progress against targets and reporting responsibilities. It includes implementation of evaluation strategies developed to inform a natural resource management Monitoring, Evaluation, Reporting and Improvement (MERI) framework used to manage human, social, natural, physical and financial assets.

The unit applies to individuals who are in senior land management roles and who apply knowledge and skills in land management with autonomy and judgement, and analyse information to complete activities, interpret and transmit solutions to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement a monitoring and	1.1 Collect relevant baseline data according to MERI plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
evaluation strategy	1.2 Consult with stakeholders 1.3 Brief stakeholders implementing program on the monitoring and evaluation methods to be used 1.4 Implement selected monitoring and evaluation methods according to defined strategy 1.5 Access and use standard procedures and recording templates 1.6 Communicate and monitor program timelines to stakeholders
2. Collect and analyse data	2.1 Verify data and information is collected according to workplace and industry standards and formats 2.2 Corroborate collected data addresses key evaluation questions, and rectify design where unsuitable 2.3 Verify data security, storage and access complies with workplace policies and procedures 2.4 Coordinate all stakeholders involved in monitoring and evaluation process 2.5 Evaluate effectiveness, efficiencies and financial objectives and priorities have been achieved according to evaluation design
3. Prepare reports and information products	3.1 Assess and report on achievement of milestones and outputs 3.2 Produce information products to inform and engage stakeholders 3.3 Communicate findings and activities to stakeholder groups according to program schedule 3.4 Negotiate changes to projects and programs with stakeholders according to MERI findings 3.5 Apply findings to improve delivery and alignment of projects and policy decisions with organisational targets and mission 3.6 Use a style of reporting that reflects audience and information use
4. Review the monitoring and evaluation process	4.1 Encourage ongoing participation, consultation and communication of stakeholders by fostering a culture of self-evaluation and learning 4.2 Review evaluation strategy and processes, and provide feedback on implementation and evaluation design to stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Access, collate and analyse complex data and information from baseline reports and MERI activities, and use to implement changes and report on progress of MERI activity
Writing	<ul style="list-style-type: none"> Demonstrate sophisticated writing skills by selecting appropriate conventions and stylistic devices to express precise meaning and understanding when reporting on MERI activities

Assessment Requirements for AHCNRM603 Implement a monitoring, evaluation and reporting program

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has implemented a monitoring and evaluation and reporting strategy, and has:

- applied monitoring and evaluation methods ensuring integrity and validity of data
- collected and managed data related to the monitoring program according to workplace procedures
- analysed complex information related to the monitoring program according to enterprise requirements
- prepared reports and information products for stakeholder use according to workplace standards
- reviewed the monitoring and evaluation process for continuous improvement.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quantitative and qualitative methods for monitoring and evaluation
- data management processes and systems
- policy and program management processes
- adaptive management and review cycles
- Monitoring, Evaluation, Reporting and Improvement (MERI) framework
- national standards for the practice of ecological restoration.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- specifications:
 - workplace policies, procedures and processes for formatting and documenting reports and data sets
 - data sets from a MERI project
 - legislation and codes of practice and standards for conducting MERI projects
- relationships:
 - stakeholders and stakeholder groups.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have collected and preserved plant specimens for identification, including:

- collected representative parts of plant specimens and recorded and labelled specimens with characteristic data for identification purposes
- stored labelled plant specimens ready for preservation
- determined a plant preservation technique
- arranged and preserved plant specimens according to procedures
- arranged and mounted preserved specimens with observation records ready for identification
- packaged specimens with observation data and submitted for identification
- recorded and catalogued specimen information according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic botanical requirements for plant identification purposes
- principles and practices of collecting plant materials
- characteristics of plants to be collected and recognising suitable specimens for collection
- storing plant specimens before preservation to maintain specimen integrity
- plant preservation techniques and the agencies and organisations that use them
- records and recording systems for plant collections and plant data.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live plant materials to be collected from the field
 - equipment and materials required for preserving and mounting plant specimens
 - records and recording systems for plants
- specifications:
 - workplace procedures and processes for preserving plants
 - workplace instructions and specifications for preserved plants.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have identified plant specimens, including:

- identified and recorded key characteristics of plant morphology and identified to division level
- determined plant health and assessed effect on characteristics indicative to identification
- used reference materials to compare characteristics to taxonomic classification
- identified plant specimen to lowest level of taxonomic level (category)
- compiled identification data and recorded the identification and process according to workplace procedures
- reported outcomes to client according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices of plant identification, including:
 - plant health problems indicative of plant species
 - basic physiology and life cycle of pests and diseases
 - botanical terms for plant morphology, physiology
- symptoms of plant pests and diseases that mask characteristics for identification
- methods of data capture
- plant identification techniques
- problem-solving techniques
- soil characteristics particularly in relation to the local region

- plant characteristics including tactile and sensory
- levels (categories) of taxonomic classification.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live plant specimens
 - tools and equipment necessary for plant observations
 - botanical reference materials, plant data bases, plant keys
- specifications:
 - workplace documents including procedures and processes for recording data and preparing reports
 - workplace instructions, specifications or client briefs
- relationships:
 - real clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPGD205 Prepare a grave site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a gravesite.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare site for excavation	1.1 Identify work health and safety hazards, assess risks and report to the supervisor 1.2 Select and use personal protective clothing (PPE) and equipment 1.3 Select, prepare and use tools, equipment and machinery 1.4 Inspect surrounding monuments, masonry or headstones that threaten the stability of the new gravesite and remove if

Element	Performance criteria
	<p>necessary, after consultation with supervisor</p> <p>1.5 Use sludge pump to remove excess water if required</p> <p>1.6 Mark gravesite out to suit coffin dimensions</p>
2. Assist with the excavation	<p>2.1 Assist with excavation of grave</p> <p>2.2 Shore sides of grave where depth of grave exceeds 1.5 metres or as instructed</p> <p>2.3 Cover surface area for 400 mm from the edge of the excavation with an approved material to ensure the integrity and stability of the soil</p> <p>2.4 Secure gravesite with protective restraints to limit access to the site while being established and when left unattended</p>
3. Backfill and enhance the gravesite following burial	<p>3.1 Back-fill grave with soil free from large lumps, plant debris or waste material</p> <p>3.2 Use backfilling techniques to consolidate the soil, to minimise cavities and to restore the ground to its original level</p> <p>3.3 Replace surrounding monuments, masonry or headstones as necessary</p> <p>3.4 Dispose of waste material and plant debris removed from the gravesite in an environmentally safe manner</p> <p>3.5 Enhance gravesite as instructed</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD205A Prepare a grave site.

Links

Assessment Requirements for AHCPGD205 Prepare a grave site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare site for excavation
- assist with the site excavation
- shore up sides of grave as required
- backfill and enhance the gravesite following burial

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grave site preparation
 - safe work practices working in and around confined spaces
 - the environmental implications of pumping sludge water from an excavation site and the effects it may have on surrounding gravesites
 - work health and safety responsibilities of employees

Assessment Conditions

Assessors must satisfy current standards for RTO's.

Assessment Requirements for AHCPMG201 Treat weeds

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that they have treated weeds using at least two different techniques, including:

- recognised and recorded target weeds and confirmed with supervisor
- discussed and selected control options with supervisor
- prepared control options and treatments following required procedures
- identified health, safety and environmental hazards and risks and applied controls according to workplace procedures
- identified, selected, fitted and used personal protective equipment
- applied treatments safely ensuring off-target species were unaffected
- shut down, cleaned and stored personal protective equipment and application equipment according to environmental procedures
- disposed of waste according to workplace procedures and environmental procedures
- maintained records according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common weeds identification and naming conventions
- weeds and dispersal methods common to work area
- common weed treatment options, including:
 - cultural
 - chemical
 - mechanical
 - biological

- Integrated Pest Management
- basic environmental considerations when using chemicals for treating weeds, including:
 - spray drift and off target damage
 - inversion
 - re-entry period
 - residues
 - chemical handling
- regulatory requirements and responsibilities when applying weed treatments
- weed control equipment, capabilities and limitations
- health and safety in the workplace including personal protective equipment required for controlling weeds
- principles and methods for securing treatment sites including, caution or hazard signs and signals
- purpose and use of chemical labels and safety data sheets (SDS)
- environmental considerations when controlling and disposing of weeds and waste materials
- record keeping methods and requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site with weed infestation or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - weeds to be identified and controlled
 - tools and equipment suitable for control options and treatments
 - personal protective equipment
 - treatment materials
- specifications:
 - workplace documents including treatment and control procedures and processes and forms for recording treatments
 - use of manufacturers' operating instructions for specific equipment, machinery used for weed control
 - SDS for treatment materials
 - specific regulations
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG202 Treat plant pests, diseases and disorders

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to recognise plant pests, diseases and disorders, determine the treatment options and apply treatments under supervision.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

AHCPMG203 Work effectively in a pest management environment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to interpret and apply industry and workplace procedures and standards to daily work activities when working in the pest management sector. It requires the ability to identify and follow legislative and procedural requirements while under supervision.

The unit applies to individuals working in a broad range of job contexts who undertake defined routine activities under supervision. They exercise limited autonomy within established and well known parameters, providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPMG203 Work effectively in a pest management environment

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can work effectively in a pest management environment, including:

- recognised common pests and identified the characteristics and impact on community
- identified and monitored effectiveness of pest management plans for pests recognised for impact on workplace performance
- identified, selected and safely used equipment required to implement pest management program
- identified and took corrective action for equipment faults
- recognised and implemented workplace strategies for controlling pests
- applied health and safety in the workplace and environmental practices and procedures ethically according to legislative requirements
- identified permissions, licences and necessary permits required prior to entering properties
- followed safe waste disposal procedures
- prepared and used communication and navigational equipment relevant to workplace requirements
- assisted with identifying key stakeholders and contributed to stakeholder engagement
- used communication strategies to engage with supervisor and stakeholders
- complied with designated timelines
- maintained pest management records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common pest management methods, strategies and monitoring techniques for specific pest species
- standard operating procedures and codes of practice applicable to pest control
- invasive pest species common to field of work and their harmful impact, including:
 - signs and symptoms of active pests
 - effect of pests on work environment
- basic environmental considerations when controlling pests, including:
 - spray drift and off target damage
 - inversion
 - re-entry period
 - residues
 - chemical handling
- pest control strategies, including:
 - cultural
 - chemical
 - mechanical
 - biological
 - Integrated Pest Management
- risk factors, including human, health and environmental associated with the pest management activity
- record keeping and reporting processes and procedures, including:
 - databases
 - paper based
 - mandatory reporting
- licenses, permits and permissions when entering properties
- common equipment used for, controlling pests, navigating and communicating on properties, including:
 - calibration requirements
 - basic operation principles
 - maintenance and repairs
- health and safety in the workplace procedures and legislative requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests for identification and control
 - tools and equipment for pest control, navigation and communications

- personal protective equipment
- specifications:
 - workplace documents including policies, procedures, processes, instructions, records and forms
 - manufacturers' operating instructions for specific equipment, machinery
 - relevant legislation, regulations and codes of practice
- relationships:
 - industry stakeholders
 - supervisor
- timeframes:
 - according to the job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPMG301 Control weeds

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated on at least one occasion that they have controlled weeds, including:

- identified, recorded and assessed weeds and their impact on the target area
- investigated the suitability of weed control approaches and effect on site environment and non-target entities
- planned and coordinate weed control activities
- identified tolerable levels of weed infestation for the target site
- conducted a site hazard, risk assessment and identified controls for weed control
- ensured personal safety by using appropriate personal protective equipment
- selected and applied weed management methods appropriate to the target site
- maintained records of weed management activities
- monitored, recorded and reported the effectiveness of methods
- ensured control measures had minimal effect on non-target species and environment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- weeds and their tolerable levels and impact on target area, including:
 - economic, aesthetic, health, fire hazard and environmental thresholds of common weeds
 - non-target entities common to the area
 - effect of weed infestation on required plant health and growth

- basic weed biology, including:
 - lifecycle and ecology of a range of weeds
 - cyclical nature of weeds and control programs
 - weed characteristics, morphology and dispersal
- weed management strategies and their selection criteria, including:
 - cultural
 - chemical
 - mechanical
 - biological
 - Integrated Pest Management
- risk factors including human, animal health and environmental associated with control measures
- factors that affect the efficacy of weed management strategies, including:
 - prevailing weather and atmospheric conditions
 - impact of off target damage on non-target entities
 - residues and maximum residue levels
- weed control activities and disturbance to other plant or animal species
- signs of adverse impact of control measures and ways to minimise their effect on non-target entities, including:
 - humans
 - animals
 - non-target plants
 - environment
- site-monitoring techniques that may be used to implement the weed control plan
- hazard and risks assessment and control methodologies
- equipment including personal protective equipment appropriate to control measure
- health and safety in the workplace requirements
- pest management planning and survey strategies
- legislative requirements relevant to weed control.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live weeds
 - tools and equipment used for weed control program
 - personal protective equipment
- specifications:

- workplace documents including policies, procedures, processes and forms for record keeping
- manufacturers' operating instructions for specific equipment and machinery
- safety data sheets
- workplace instructions and client briefs
- specific regulations and codes of practice
- relationships:
 - clients.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPMG302 Control plant pests, diseases and disorders

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that on at least one occasion they can control pests, disease and disorders, including:

- identified and recorded pests, diseases and disorders, beneficial organisms on host plants in target area
- assessed damage, threat and threshold of pests diseases or disorders on host plants according to client, market or environment requirements
- selected and implemented pest, disease and disorder control measures according to workplace, environmental and safe work practices
- identified and selected tools equipment and resources necessary to implement the control measure
- identified and assessed health and safety hazards and risks and incorporate and implemented in controls strategies according to health and safety procedures
- identified, fitted and used personal protective equipment according to workplace procedures
- monitored the effectiveness of pest and disease control
- adjusted control measure on crop and off-target entities where outcomes were below expectation
- maintained records of pest and disease control activities according to regulatory and workplace requirements
- coordinated the control strategy with others according planned outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest, disease and disorder and symptom recognition of host stress
- economic, aesthetic or environmental thresholds for a range of plant pests, diseases and disorders
- control strategies for pests diseases and disorders, including:
 - chemical
 - biological
 - cultural methods
 - treatments available
 - Integrated Pest Management
 - industry best practice
- tools, equipment and machinery for implementing the control strategies and the importance of calibration
- site monitoring and analysis techniques used to implement a control strategy
- implications of control strategies for:
 - target and off-target
 - site limitations
 - environmental implications
 - end market and production
 - environmental objectives
- health and safety in the workplace responsibilities for employees and employers
- correct use, maintenance and storage of personal protective equipment
- health and safety in the workplace and environmental regulatory requirements including hazardous substances regulations
- basic communications skills
- workplace and mandatory record keeping requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pests, diseases and disorders
 - tools and equipment for control program
 - personal protective equipment
- specifications:

- workplace documents including policies, procedures, processes and forms for record keeping
- manufacturers' operating instructions for specific equipment and machinery
- safety data sheets
- workplace instructions and client briefs
- specific legislation/codes of practice
- relationships:
 - clients
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG304 Use firearms to humanely destroy animals

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to euthanise animals using firearms and techniques appropriate for the type and mobility of the animal.

The unit applies to individuals who hold a valid firearms license and work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions. Destruction of pest animals must comply with state animal cruelty legislation.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for the shooting activity	1.1 Map location and boundaries for the shoot in accordance with the pest management plan and monitoring program 1.2 Confirm location of habitats, habits and range of movement of target animal

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Determine timing of the shoot based on the activity patterns of the target animal and estimate time required to complete the shoot</p> <p>1.4 Identify hazards and risks and apply control measures associated with the shoot according to workplace safety procedures</p> <p>1.5 Identify environmental and personal and public safety risks associated with the shoot</p> <p>1.6 Identify, fit and use suitable personal protective equipment and warning signs required for the activity</p>
2. Prepare for the shooting activity	<p>2.1 Confirm anatomy and physical features identifying location of vulnerable organs of target animal</p> <p>2.2 Take precautions to minimise hazards and environmental risks associated with the shoot</p> <p>2.3 Select vehicles, equipment and materials intended for use and check for serviceability</p> <p>2.4 Ensure firearm licences and permits are current and applicable to purpose</p> <p>2.5 Select firearm and ammunition types to comply with recommendations and workplace procedures for target animal</p> <p>2.6 Ensure firearms, ammunition, and stowage for transportation meets licensing requirements</p> <p>2.7 Check and prepare firearm and ammunition</p> <p>2.8 Zero and test firearm according to workplace procedures</p> <p>2.9 Stow firearm for transport according to legislative and regulatory requirements and workplace procedures</p>
3. Shoot animals	<p>3.1 Carry firearm safely with muzzle pointing in safe direction at all times according to industry best practice and workplace procedures</p> <p>3.2 Load, discharge and unload firearm according to safety procedures</p> <p>3.3 Aim firearm at vulnerable organ on the target animal and discharge firearm to kill using a single shot</p> <p>3.4 Check each target animal to ensure it is dead prior to selecting the next target animal</p> <p>3.5 Euthanise target animals that have not been killed cleanly</p> <p>3.6 Handle carcasses required for research or commercial use to minimise personal health and safety and biosecurity risks</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.7 Dispose of animal carcasses not required for research or other purposes according to enterprise procedures to minimise biosecurity or public safety and health risks
4. Clean and store equipment and material	4.1 Clean and store carcasses for research or commercial use 4.2 Clean and store equipment and materials according to workplace practices 4.3 Clean, maintain and store firearms in line with regulatory standards 4.4 Store ammunition safely 4.5 Report or record activity completion according to workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately completes organisational records and reports using clear language and industry terminology
Navigate the world of work	<ul style="list-style-type: none"> Takes responsibility for following explicit and implicit licencing requirements, policies, procedures, codes of practice and legislative requirements Be up to date with state or territory and federal legislation related to the use of firearms licensing
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and workload Makes routine decisions and implements standard procedures for routine tasks, using formal decision making processes

Assessment Requirements for AHCPMG304 Use firearms to humanely destroy animals

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated the skills to use a firearm to euthanise animals, including:

- planned the shoot within the boundaries and location of the target animal its range and habitat according to the timeframe, pest management plan and monitoring program
- ensured licences and permits were valid and applicable and environmental and public safety risks were mitigated
- identified target animal and its anatomical vulnerabilities for a clean kill
- operated a firearm safely in accordance with statutory requirements
- zeroed and test fired the firearm safely at a range under supervision at a distance that is commensurate with the target animals to be destroyed
- selected and checked serviceability of transport, equipment, firearms and ammunition, and stowed the firearm and ammunition safely for transport
- cleaned, maintained and stored equipment, firearms and ammunition safely and in accordance with statutory requirements
- checked target animal was dead, and euthanised immediately, if signs of life, according to relevant animal welfare codes of practice
- used personal protective equipment (PPE) to handle carcasses to ensure health and safety in the workplace
- identified health and safety in the workplace hazards and risks and applied control measures and used PPE according to health and safety in the workplace procedures
- applied biosecurity measures when handling, transporting or disposing of carcasses
- maintained records and reporting procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest management plan and their purpose
- environmental hazards and risks associated with the use of firearms
- safety hazards and risk management strategies associated with shooting
- checking and preparing a firearm and ammunition
- checking target animal for life after discharging the firearm
- anatomy and physical features and vulnerable organs, or humane points on target animals
- procedures for the safe handling of carcasses required for research or commercial use
- procedures for the safe disposal of animal carcasses not required for other purposes
- reporting and recording procedures required by the pest management plan
- location and boundaries for the shoot
- habitats, habits and range of movement of target animals
- PPE required for the shoot
- firearm's licensing requirements
- firearm and ammunition types recommended for the target animal
- State and territory gun control laws, acts and regulatory requirements including firearms agreements and codes of practice, relating to the use of firearms for euthanising animals
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- prevention of cruelty to animals legislation applicable to destruction of animals
- basic requirements for biosecurity in the context of destruction of animals.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an outdoor field environment with pest animals or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - pest animals, carcasses or targets
 - firearms
 - PPE
- specifications:
 - workplace documents including procedures for firearm use
 - operating instructions for firearms
 - licences and permissions to discharge firearms
 - specific legislation and codes of practice for firearm use and animal welfare
- timeframes:
 - checked animal for signs of life after discharge of firearm.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

AHCPMG305 Survey pests

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to survey pest abundance for plants, vertebrate or invertebrate animals. This will be carried out using a range of observation techniques in conjunction with workplace pest management plan, survey strategy and a monitoring program according to established standards and protocols.

The unit applies to individuals who work under broad direction and take responsibility for their own work use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to conduct survey	1.1 Access and interpret pest management plan, survey strategy and monitoring program documents according to workplace procedures 1.2 Map location and boundaries for the count and obtain required

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>permits</p> <p>1.3 Work with key stakeholders to develop trust and effective working relationships</p> <p>1.4 Identify natural areas and features</p> <p>1.5 Confirm location of habitats and the range of movement of the target pest</p> <p>1.6 Determine items of direct evidence of the pest to be counted and survey method</p> <p>1.7 Determine time and duration of the count and notify relevant personnel</p> <p>1.8 Identify safety hazards and take precautions to minimise risks associated with the selected survey method</p> <p>1.9 Identify environmental risks and take precautions to minimise risks associated with the count</p> <p>1.10 Check serviceability of resources required to complete the count</p>
2. Conduct survey and record observations	<p>2.1 Operate equipment according to workplace procedures and operator instructions</p> <p>2.2 Conduct count within boundaries of specified location</p> <p>2.3 Record observations of direct evidence of the target pest and report to supervisor</p> <p>2.4 Clean and store equipment and materials according to workplace practices</p> <p>2.5 Apply animal welfare policies and procedures when conducting survey</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret plans, strategies and other documentation and consolidates information to determine and implement surveys

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately complete organisational records of observations using clear language and industry terminology
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations to determine counts and preparing reports and records
Navigate the world of work	<ul style="list-style-type: none"> Take personal responsibility for following explicit and implicit policies, procedures and permit requirements
Interact with others	<ul style="list-style-type: none"> Select and use appropriate conventions and protocols when communicating with key stakeholders
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload

Assessment Requirements for AHCPMG305 Survey pests

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have surveyed pests, including:

- organised and completed a pest survey according to the organisation's pest management plan and survey strategy
- recognised signs or evidence of common pests
- counted, calculated and recorded observations
- operated equipment safely and according to workplace and environmental procedures
- cleaned and stored the equipment at the conclusion of the job
- took appropriate safety and environmental precautions for all pest survey activities
- applied appropriate animal welfare practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- survey techniques and equipment appropriate to the geography and type of pest being surveyed
- health and safety considerations with survey techniques including aerial observation
- the basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- relevant parts of the organisation's pest management plan and survey strategy
- permits and permissions required for survey work
- pest survey plans and their application
- pest behaviour and habitats including areas that have a high probability of infestation
- direct evidence requirements of range of pests included in pest management plan
- survey recording methods and procedures

- map reading techniques for survey work.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a site with pests to be surveyed or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests to be surveyed
 - survey tools and equipment
 - personal protective equipment
- specifications:
 - workplace documents including survey plans, procedures, survey records and forms
 - manufacturers' operating instructions for specific equipment
 - workplace instructions or briefs]
 - specific animal welfare codes of practice
- relationships:
 - team member, supervisor or key stakeholder.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPMG306 Determine pest control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have determined pest control techniques, including:

- assessed the impact of pests on assets
- identified the target pest and its characteristics
- determined the desired outcomes, constraints and measures for pest control techniques
- planned and discussed appropriate humane pest control techniques with supervisor and stakeholder
- used a variety of monitoring techniques to determine pest numbers
- identified non-target species and biosecurity risks affected during a control program
- identified pest control permissions and licences required for pest control techniques
- determined the legal, economic and social constraints affecting pest control techniques
- included health and safety in the workplace policies and procedures when planning pest control techniques.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest lifecycles and behaviours, including modes of dispersal, biology and reproduction
- features of target and non-target species
- habitats of target and non-target pest animals
- impacts pest control activities can have on native species
- licenses, permits and clearances that may need to be obtained
- the impact pest control can have on nearby urban areas and off target species
- pest control techniques appropriate for different contexts

- key conditions for the survival of pests and methods for eliminating or controlling those conditions
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice, where target pests are vertebrate animals
- pests and their impact on assets, including the environment and their acceptable population densities
- types of constraints that apply to pest control techniques
- legislation applicable to pest control including declared species.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests
- specifications:
 - workplace documents including survey plans, procedures, records and forms
 - workplace instructions or briefs
 - specific animal welfare codes of practice
 - technical information and resources applicable to pest.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG307 Apply animal trapping techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to trap and hold live animals for release, transportation or destruction. Trapped animals can be native animals, domestic animals, animals determined to be pests or feral animals.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for trapping	1.1 Identify purpose of animal capture and set objectives 1.2 Confirm the location and size of the area designated for trapping activities

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Confirm target animal movement patterns, behaviour and lifecycles to determine trapping location and placement of equipment and appropriate timing of trapping activity</p> <p>1.4 Identify potential non-target animals</p> <p>1.5 Estimate time required to complete trapping activities</p> <p>1.6 Identify and check method of transport, materials and equipment required for trapping</p> <p>1.7 Select appropriate traps for target animal and the environment</p> <p>1.8 Clean, maintain and prepare trapping equipment according to manufacturer specifications</p> <p>1.9 Identify hazards, risks and controls for trapping and select appropriate personal protective equipment</p> <p>1.10 Identify and manage environmental risks associated with trapping animals</p> <p>1.11 Obtain relevant approvals, permits and permission to carry out trapping activities</p> <p>1.12 Determine precautions for minimising trapping of non-target animals</p>
2. Place and set traps	<p>2.1 Undertake site surveillance prior to setting traps</p> <p>2.2 Select and prepare site to maximise opportunity for trapping target animals and minimise the chance of trapping non-target animals</p> <p>2.3 Position, set and calibrate trapping equipment and check it for operation and safety</p> <p>2.4 Apply lures, decoys, baits or toxins according to workplace procedures and permits</p> <p>2.5 Camouflage traps according to workplace procedures</p> <p>2.6 Apply precautions to prevent trapping of non-target animals</p> <p>2.7 Set traps according to legislative requirements and animal welfare codes of practice</p>
3. Check and remove traps	<p>3.1 Inspect traps at the required frequency</p> <p>3.2 Identify trapped animals then release, humanely destroy or prepare for transport according to trapping objectives and permits</p> <p>3.3 Handle captured animals humanely according to animal welfare codes of practice</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.4 Transport animals from site according to trapping objectives and animal welfare codes of practice 3.5 Observe health and safety in the workplace procedures and public safety requirements during trapping activities 3.6 Operate trap release mechanism safely and remove trap 3.7 Restore trap-site to its prior condition
4. Record data	4.1 Use global positioning system (GPS) loggers to record locations of trapped animals 4.2 Use recording instruments to record details of trapping activities according to trapping plan and workplace procedures
5. Clean and store equipment and material	5.1 Clean and store carcasses for research or other purposes 5.2 Clean and store equipment and materials according to safety data sheets, workplace and biosecurity procedures 5.3 Record target and non-target kills
6. Report completion of work	6.1 Report results of trapping activities and incidents according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational documentation using clear language, and terminology when reporting and maintaining animal trapping records
Numeracy	<ul style="list-style-type: none"> Perform basic mathematical calculations to determine and record trapping data and GPS locations
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective trapping outcomes

Assessment Requirements for AHCPMG307 Apply animal trapping techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have applied animal trapping techniques, including:

- determined objectives for trapping and confirmed target animal characteristics and trapping location and size
- estimated trapping period and identified, selected and prepared baits, equipment, traps and transport for trapping activities
- set and trapped animals humanely and released or destroyed animals according to workplace procedures and animal welfare code of practice
- identified presence of target and non-target animals
- identified environmental, health and safety in the workplace hazards, risks and applied controls according to workplace and environmental procedures
- checked method of transport, equipment and materials for serviceability and cleaned equipment before and after trapping activities
- selected, prepared and restored trapping site during trapping activities
- positioned, set, calibrated and checking trapping equipment according to workplace procedures
- applied lures or baits according to trapping plan
- selected, used and stored baits or toxins according to workplace procedures
- inspected traps in a timely manner and handled and euthanised captured animals in accordance with workplace procedures and animal welfare practices
- maintained records using global positioning system data
- summarised and presented trapping data and reports according to workplace procedures
- cleaned and stored equipment and carcasses using approved chemicals according to safety data sheets (SDS) and workplace procedures to minimise biosecurity risks.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- purpose for trapping the animal
- target animals and non-target animals
- target animal's range, movement patterns and behaviour and how to apply knowledge of these to selecting trapping location and equipment
- reproductive cycle of the target animal to determine appropriate timing of trapping activities
- food preferences, both general and local, of target animals
- capture and kill points for target animals
- traps and techniques for target animals
- permissions that may be required to undertake trapping
- principles relating to property, stock and duty of care when trapping
- precautions that need to be taken to minimise trapping of non-target animals
- trap camouflage materials and techniques
- trap types, setting and operating release to render them inactive
- health and safety in the workplace procedures that relate to trapping animals
- recording and reporting requirements
- use of decoys and lures
- baits or toxins types and preparation
- applicable state or territory legislation on the use and storage of baits or toxins
- applicable legislation on the capture and handling of animals
- suitable personal protective equipment
- transportation methods for captured animals.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live animals in the field
 - traps appropriate to trapping technique required
 - baits, lures or poisons relevant to trapping context
 - methods of transport relevant to trapping context
 - cleaning products
- specifications:

- workplace documents including plans, procedures, records and forms
- workplace instructions or briefs
- specific regulations and animal welfare codes of practice
- technical information and resources applicable to pest
- specific SDS
- relationships:
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit if firearms are used to destroy animals:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

AHCPMG308 Implement pest management strategies

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to assist in the implementation of a pest management plan for weeds, vertebrate or invertebrate pests.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for pest management strategy implementation	1.1 Access and interpret the pest management plan and discuss requirements with supervisor 1.2 Determine declared species in legislation 1.3 Identify concepts of the pest management plan and impact on

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>implementation</p> <p>1.4 Identify key stakeholders and take into consideration their opinions about the pest management plan</p> <p>1.5 Identify, select and prepare resources required for implementation</p> <p>1.6 Identify health and safety hazards, risks and controls required according to health and safety in the workplace procedures</p> <p>1.7 Identify select, fit, use and maintain personal protective equipment according to workplace procedures</p> <p>1.8 Identify budgetary constraints for pest management plan and ensure planned activity is within budget</p>
2. Assess targeted pest	<p>2.1 Identify the targeted pest and determine pest characteristics</p> <p>2.2 Identify pest management control method according to workplace procedures</p> <p>2.3 Identify pest status according to location, land use, legislative requirements, benefits and damage caused</p> <p>2.4 Assess target area for hazards, environmental risks and conflicting outcomes with pest management plan,</p>
3. Implement the pest management plan	<p>3.1 Use safeguards to ensure that the target pest is controlled, and other species remain unharmed according to plan outcomes</p> <p>3.2 Assess and control environmental impacts and use biosecurity and sustainability principles as outlined in the plan</p> <p>3.3 Use appropriate application processes and techniques to achieve desired period of control</p> <p>3.4 Ensure animal welfare, property, stock and duty of care comply with federal and state legislation</p> <p>3.5 Assess the effectiveness of the plan using relevant monitoring techniques and survey data</p> <p>3.6 Apply follow-up controls to manage reinfestation according to procedures</p>
4. Complete activities pertaining to the pest management plan	<p>4.1 Dispose of pest waste according to workplace procedures and legislative requirements</p> <p>4.2 Review and assess outcomes of the plan with supervisor to inform future pest management plans</p> <p>4.3 Complete required documentation and make recommendations to</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	supervisor according to workplace procedures 4.4 Clean, store and maintain equipment, tools and machinery

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret pest management plans and other documentation to consolidate information to determine implementation requirements
Writing	<ul style="list-style-type: none"> Accurately record and complete organisational documentation using clear language, and terminology for recording and reporting performance of management strategies
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculation to analyse budgetary information, costs and values to determine performance against budget
Oral Communication	<ul style="list-style-type: none"> Effectively participate in verbal exchanges including active listening and questioning and reading of verbal and non-verbal signals to convey and clarify information with supervisor
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit policies, procedures and legislative requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload for efficiency and effective outcomes Make routine decisions and implements standard procedures for tasks, using formal decision-making processes for complex and non-routine situations

Assessment Requirements for AHCPMG308 Implement pest management strategies

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has demonstrated that they have implemented a pest management strategy, including:

- accessed and interpreted pest management plan and discussed requirements
- identified declared species
- identified stakeholders, resources, health and safety in the workplace requirements and budgetary constraints of pest management plan
- assessed the target pest status, control technique and impact
- implemented the pest management plan using appropriate techniques ensuring safety of non-target species and environment
- applied the techniques to achieve long term outcomes
- applied standard monitoring techniques
- reviewed pest management plan and presented recommendations on improvements
- disposed of waste and cleaned, stored and maintained equipment according to workplace and legislative requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- appropriate legislative requirements with regards to declared species
- basic sustainability principles, including the ecological role provided by some pests
- federal and state legislation relating to property, animal welfare and duty of care
- risk management approaches
- stakeholder engagement and consultation strategies

- pest physiological and biological characteristics that influence on pest management, particularly with regard to pest populations and the ability of pests to rapidly recolonise
- pest management control methods and techniques and how they fit into an integrated pest management strategy
- standard monitoring techniques
- pest status in the context of location, land use, benefits and damage caused
- types of follow up techniques that may be required to minimise the possibility of reinfestation
- information sources used for identifying and managing pests
- animal welfare requirements for vertebrate pest control
- legislative requirements for the destruction, movement and propagation of a declared species
- biosecurity principles, including prevention of pest spread
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- conflicting and cross purpose land use resolution processes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pests
 - vehicle, tools and equipment and resources appropriate to the control methods
 - personal protective equipment
- specifications:
 - workplace documents including procedures, processes, forms
 - manufacturers' operating instructions for specific equipment and machinery
 - safety data sheets where chemicals have been used
 - workplace instructions, job specifications or client briefs
 - specific legislation/codes of practice
 - financial budget for project
- relationships:
 - clients
 - supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG309 Apply pest animal control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to apply control techniques for pest animals, in compliance with a pest management plan. This includes involving the use of vertebrate pesticides, traps (except leg hold traps), cages, lures and firearms with the animal humanely destroyed according to industry guidelines or protocols.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for pest control	1.1 Identify control techniques to be used in the pest management plan 1.2 Identify health and safety in the workplace hazards and risks

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>associated with the control technique and apply controls</p> <p>1.3 Identify health and safety hazards and risks in the workplace that could adversely impact on the environment, off-target animals and public and apply controls</p> <p>1.4 Select and check materials, equipment and vehicles according to pest management plan</p> <p>1.5 Clean, calibrate and prepare equipment according to workplace procedures</p> <p>1.6 Obtain permits, permissions and licences for affected properties and follow appropriate notification plan for stakeholders</p> <p>1.7 Prepare timeline for pest control operation according to industry best practise or protocols</p>
2. Implement pest control	<p>2.1 Identify target and non-target animals according to workplace procedures</p> <p>2.2 Select site to maximise impact of control methods on target animals and minimise impact on non-target animals.</p> <p>2.3 Check planned control technique applies to current target pest, site, current conditions and timing</p> <p>2.4 Install notification and warning signage according to control plan and health and safety in the workplace procedures</p> <p>2.5 Carry out control activities according to control plan and health and safety in the workplace procedures</p> <p>2.6 Follow control timelines for control technique</p> <p>2.7 Maintain records of control plan activities and outcomes according to workplace procedures</p> <p>2.8 Monitor site according to control plan and local conditions</p> <p>2.9 Euthanise animals according to pest control plan and workplace procedures</p>
3. Complete the pest control work	<p>3.1 Ensure equipment and unused resources are reconciled against plan and removed from site according to pest control plan and workplace procedures</p> <p>3.2 Dispose of waste and animal carcasses and restore site according to pest control plan, workplace and environmental procedures</p> <p>3.3 Clean, maintain and store equipment and materials according to workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	3.4 Report results of control activities according to workplace procedures and legislative and regulatory requirements

Foundation Skills

Assessment Requirements for AHCPMG309 Apply pest animal control techniques

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have applied a pest animal control technique, including:

- identified the control techniques and selected equipment and resources required
- Identified hazards and risks and controls measure
- identified target and non-target animals
- obtained permits and licences and notified stakeholders of intended works
- checked vehicles, selected equipment and materials for serviceability and cleaned equipment before and after implementation
- prepared timeline and selected and prepared the site for control activity and restored it on completion
- prepared, installed and checked, safety warning signs, control equipment, materials according to plan
- applied controls according to timelines and control plan
- reconciled controls against plan within specified timeframes
- recorded details of control activities to comply with enterprise and legislative requirements
- reported results of control
- reconciled, cleaned and maintained equipment and disposed of waste according to workplace and environmental procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements for ensuring the welfare of animals described in the relevant Codes of Practice and standard operating procedures
- the purpose and scope of the animal control program
- suitable control techniques and timing of control activities based on:
 - the target animal's range, movement patterns, behaviour and habitats
 - the reproductive cycle of the target animal
 - target animal behaviours and biology relevant to control technique
 - food preferences, both general and local, of target animals
 - scent station and other animal tracks and traces
 - target pests and non-target native animals found in the area
 - the environment and terrain of the target area
- appropriate calibre of firearm required to euthanise animals
- euthanasia procedures, including capture and kill points for animals
- licencing, permissions and notification protocols
- precautions that need to be taken to minimise harm to non-target animals
- health and safety in the workplace procedures that relate to animal control activities including personal protective equipment
- recording and reporting requirements
- procedures for using, recording and reconciling baits and poisons
- relevant legislation for pest animal control activities
- transportation methods for captured animals or carcasses
- land reparation works, waste disposal and the environment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pest animals
 - tools and equipment used for pest animal control program
 - personal protective equipment
- specifications:
 - workplace documents including policies, procedures, processes and forms for record keeping
 - use of manufacturers' operating instructions for specific equipment, machinery
 - safety data sheets
 - workplace instructions and client briefs
 - specific legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit if firearms are used to destroy animals:

- must possess firearms licences
- appropriate experience in using firearms for pest control.

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Undertake pre-flight procedures	1.1 Confirm location and boundaries for the activities with pilot 1.2 Obtain appropriate approvals and permits to conduct pest control activity according to regulations and the Civil Aviation Safety

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	Authority (CASA) 1.3 Check time and duration of flight and notify relevant personnel 1.4 Confirm flight plans and search and rescue operations with the pilot and ground crew 1.5 Check on-board emergency equipment with pilot 1.6 Check emergency landing procedures with pilot 1.7 Check landing-site requirements 1.8 Confirm intent to approach or leave the aircraft with pilot 1.9 Approach aircraft according to aircraft and workplace health and safety procedures
2. Prepare activity related to the use of a firearm	2.1 Carry current firearm's license according to regulations 2.2 Ensure the prescribed firearm is functioning correctly and sighted according to operation procedures 2.3 Check the firearm to ensure it meets appropriate regulatory standards
3. Use firearm from aircraft	3.1 Stow equipment safely on aircraft according to health and safety in the workplace procedures and legislative and regulatory requirements 3.2 Wear harnesses and helmet during pest control activities according to health and safety in the workplace procedures 3.3 Plot route and location of activities on map 3.4 Carry out pest control activity safely according to legislative and regulatory requirements, workplace procedures and instructions 3.5 Ensure animal is humanely destroyed 3.6 Observe and record pest numbers according to workplace procedures
4. Complete work relating to the use of firearms for pest control	4.1 Clean and store equipment and materials according to workplace procedures 4.2 Dispose of waste and debris according to workplace procedures 4.3 Document and report activities according to workplace instructions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret plans, permits and conditions to ensure compliance with regulatory requirements
Writing	<ul style="list-style-type: none"> Accurately complete organisational records and reports using clear language and industry terminology
Oral Communication	<ul style="list-style-type: none"> Use clear language and concepts, and tone and pace appropriate when communicating with pilot
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following explicit and implicit licencing requirements, policies, procedures, codes of practice and legislative requirements Be up to date with state or territory and federal legislation related to the use of firearms licensing
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks and workload

Assessment Requirements for AHCPMG311 Use firearms for pest control activities from aircraft

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have used a firearm to control pest animals from an aircraft, including:

- obtained and complied with approvals, permits and conditions for planned activity
- confirmed flight plan, emergency procedures and search and rescue operations with pilot
- checked, sighted and used a firearm safety to shoot pest animal targets from an aircraft
- applied air safety practices when entering and occupying aircraft
- stored firearms safely in an aircraft
- applied health and safety in the workplace practices
- checked accurate location, carried out pest control and ensured all animals were humanely destroyed according to animal welfare codes of practice and workplace procedures
- cleaned maintained and stored firearms and equipment and disposed of waste according to workplace procedures
- maintained records of pest numbers and reported outcomes according to workplace procedures.

Knowledge Evidence

- An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:
- requirements for ensuring the welfare of animals described in relevant codes of practice and workplace procedures
- map reading and plotting position
- air safety principles and emergency procedures appropriate to firearms
- approvals required for carrying firearms airside
- firearms' licensing requirements

- health and safety in the workplace procedures
- environmental, animal welfare, prevention of cruelty to animals, and pest control legislation
- appropriate personal protective equipment (PPE)
- principles and methods of using firearms from an aircraft.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an aircraft suitable for pest animal control activities or an environment that accurately represents these conditions
- resources, equipment and materials:
 - live pest animals
 - appropriate firearms for pest animal management
 - suitable PPE for the individuals task
- specifications:
 - workplace and Civil Aviation Safety Authority documents such as policies, procedures, processes, forms and instructions
 - operating instructions for firearms
 - licences and permissions to discharge firearms from an aircraft
 - legislation, regulations and codes of practice for animal welfare and firearm use from aircraft
- relationships:
 - pilot and supervisors
- timeframes:
 - according to the specified flight plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, the following specific assessor requirements apply to this unit:

- the assessment team must include assessors with firearms licences and appropriate experience in using firearms from aircraft for pest control.

AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental landscapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare pest animal baiting programs. This includes the safe preparation and distribution of poison baits for the control of vertebrate pest animals affecting the rural and natural environment according to legislative and regulatory requirements.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection, allocation and use of available resources and for solving problems.

State or territory licensing, legislative or certification requirements apply in some jurisdictions.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify vertebrate pests' species and prepare a poison baiting program	1.1 Identify the pest animal species and abundance in target area 1.2 Assess the type, availability and mode of action of poison for control of pest animal species in target area

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify key aspects of pest animal species ecology, habitat use and control program objectives to determine the timing and extent of baiting program</p> <p>1.4 Assess public health, safety hazards, risks and regulatory restrictions for control options</p> <p>1.5 Assess environmental conditions and off target risk for control options</p> <p>1.6 Select appropriate control option, baiting technique, poison and delivery method appropriate for target pest species, location and landscape</p> <p>1.7 Prepare baiting program to maximise pest animal control objectives according to legislative and regulatory requirements</p> <p>1.8 Determine monitoring and reporting protocols to evaluate effectiveness of baiting program according to legislative and regulatory requirements</p>
2. Obtain and confirm approvals for accessing and using poison baits	<p>2.1 Identify necessary approvals and notification requirements for the location of the baiting program and poison use according to legislative and regulatory requirements and toxin/poison label requirements</p> <p>2.2 Access and complete documentation to gain approvals for use of poisons and baits according to workplace procedures and legislative and regulatory requirements</p> <p>2.3 Ensure approvals have been granted, received and filed according to workplace procedures and legislative and regulatory requirements</p> <p>2.4 Notify stakeholders of intended baiting program according to workplace procedures and legislative and regulatory requirements</p>
3. Prepare, transport and store baits	<p>3.1 Determine the type of bait, quantity and dose rate of poison for the pest control program according to poison label and legislative and regulatory requirements</p> <p>3.2 Select, ensure serviceability, fit and use personal protective equipment for baits according to chemical label and safety data sheets (SDS)</p> <p>3.3 Select suitable location to prepare poison bait according to workplace procedures and legislative and regulatory requirements, codes of practice or guidelines</p> <p>3.4 Prepare bait for the target species, bait substrate/material and poison according to label and legislative and regulatory requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>3.5 Transport poisons and prepared baits according to legislative and regulatory requirements</p> <p>3.6 Prepare baits for storage according to baiting program requirements, type of bait and legislative and regulatory requirements</p> <p>3.7 Store the treated baits safely according to workplace procedures, legislative and regulatory requirements and poison label directions</p> <p>3.8 Clean and decontaminate bait preparation and distribution equipment according to operator instructions, SDS and legislative and regulatory requirements</p>
4. Distribute and monitor baits in target area	<p>4.1 Monitor and assess weather conditions and forecasts to ensure effective conditions for baiting to proceed</p> <p>4.2 Ensure notifications have been communicated and signage installed prior to baiting program according to legislative and regulatory requirements</p> <p>4.3 Identify health and safety hazards and risks and implement controls when handling and distributing baits according to workplace procedures, poison label directions and SDS</p> <p>4.4 Distribute baits in target area to maximise target pest access and minimise off target risk according to label directions and baiting program</p> <p>4.5 Monitor bait uptake and control outcomes in a timely manner according to baiting program requirements, poison label directions and legislative and regulatory requirements</p> <p>4.6 Clean up and dispose of baits according to poison label instructions, workplace procedures and legislative and regulatory requirements</p>
5. Recording and reporting on outcomes of baiting program	<p>5.1 Record and report safety and environmental incidents according to workplace procedures and legislative and regulatory requirements</p> <p>5.2 Record details of poison bait application and outcomes according to workplace procedures and legislative and regulatory requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and interpret SDS, poison labels, operating instruction, applicable legislation and regulations and other documentation and consolidates information to determine baiting requirements
Writing	<ul style="list-style-type: none"> Complete regulatory applications and forms for permissions according to legislation and regulations Accurately record and complete organisational and legislative records using clear language and terminology
Numeracy	<ul style="list-style-type: none"> Perform mathematical calculations to determine bait size and quantity relevant to the vertebrate animal population and scale of the program
Navigate the world of work	<ul style="list-style-type: none"> Take responsibility for following policies, procedures and regulations Identify and implement poison label requirements
Get the work done	<ul style="list-style-type: none"> Take responsibility for planning, sequencing and prioritising tasks required for baiting activities

Assessment Requirements for AHCPMG312 Apply poison baits for vertebrate pest control in rural and environmental landscapes

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has on at least one occasion demonstrated the ability to apply poison baits for vertebrate pest animals in a rural or natural environmental landscape ensuring they have:

- identified pest animal species and abundance
- identified and assessed the availability, mode of action of poison and their application for control of vertebrate pest animal species
- identified and selected the poison and baits required for the target pest and calculated the requirements for bait size according to poison label and regulatory requirements
- determined the timing for undertaking a baiting program in consideration of target animal ecology, behaviour, location and landscape
- identified the various approaches to baiting for pest animal species and selects most appropriate form of baiting for target pest animal species and environment
- assessed environmental and off target hazards and risks
- developed a poison baiting program and monitoring protocol suitable for pest control objectives for target vertebrate pest and location
- identified and accessed legislative and regulatory forms and made application for approvals to access and implement a poison baiting program
- confirmed approvals and notified stakeholders of poison baiting program
- assessed health and safety in the workplace hazards, risks and implemented control procedures for applying and handling poison baits according to poison label, safety data sheets (SDS), legislative and regulatory requirements, and workplace procedures
- used personal protective equipment for all poison bait activities
- prepared baits for target species in a suitable location
- prepared bait for storage and stored the bait safely ready for distribution according to poison label and workplace procedures
- monitored and assessed weather to ensure effective baiting conditions according to workplace procedures and poison label
- transported baits according to legislative requirements

- installed signage and distributed baits ensuring effective target access and minimising off target risks according to baiting program
- monitored bait stations in a timely manner according to poison label and baiting program
- cleaned equipment, spills, and disposed of waste and baits according to workplace and environmental procedures, SDS and poison labels
- maintained records and reported incidents according to workplace procedures and legislative and regulatory requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- vertebrate pests and their impact on the rural and environmental landscape
- vertebrate pesticides, toxins or poisons to control and manage pest animal species, including:
 - types
 - origin
 - mode of action
 - application
- application and use of pesticides in vertebrate animal baiting program
- baiting techniques for the delivery of vertebrate pesticide toxins or poisons to target species in a baiting program
- regulatory conditions for the use of vertebrate pesticides in pest animal baiting programs, including:
 - legal implications
 - requirements of poisons labels
 - role of SDS
 - regulated poisons including Schedule 7
- federal, state or territory guidelines and codes of practice for the preparation and use of poison baits for pest animals
- types and characteristics of vertebrate pests and their impact on the human and natural environment, including:
 - life cycle
 - effect on farms and farmland
 - effect on natural ecosystem and landscape
 - effect on the urban environment
- options for controlling vertebrate pests for a control program, including:
 - poison baiting
 - fumigation
 - habitat destruction
 - concussive (explosive) force
 - trapping

- shooting
- fencing
- Integrated Pest Management
- guard animals
- aversions
- bait techniques and technologies, including:
 - grains
 - meat
 - fruits and vegetables
 - bait stations
 - baiting trails
 - replacement baiting programs
 - canid pest ejectors
 - aerial baiting
- legislation, regulations and licensing requirements in relation to access and use of poisons and poison baits, including:
 - application process for permits and licencing
 - roles and responsibilities of land owners, pest controllers and government agencies for using poison baits
- stakeholders and required notifications including, neighbours, staff and statutory notifications
- bait distribution techniques and considerations, including:
 - impact of weather
 - pest species and their habits
 - breeding cycle
 - feeding and caching (storing) behaviours
 - watering behaviours
- predation risk to rural and environmental assets being protected
- building baiting program into farm or park management activities
- factors that contribute to off target risks, including:
 - proximity to urban and peri urban environment
 - domestic animal behaviours
 - pest animal interactions
 - native birds and animal activities
- hazards of poisons and their application, including:
 - human and animal health
 - environmental contamination
 - residues in environment, plants and animals
 - timing for checking bait stations/sites
- safety requirements when handling, treating and distributing poisonous baits, including:

- procedures
- personal protective equipment
- signage
- preparing poisonous baits, including:
 - bait types
 - sizes
 - preparation before and after treatment
 - equipment and methods of treating baits
- safe handling, transport and storage of treated baits and poison concentrates
- requirements for disposal of waste poison and baits, clearing spillages and equipment clean up.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a typical workplace environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - poison baits
 - personal protective equipment
- specifications:
 - workplace documents including work instructions and procedures for bait distribution and planning
 - poison labels and SDS
 - legislation and regulations relevant to the use of poisons and poison baits
 - access to weather forecasts or means to measure local weather.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG313 Prepare, monitor and maintain biological agents for weeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Application

This unit of competency describes the skills and knowledge required to prepare, monitor and maintain biological control agents for weed control prior to release in an experimental or field situation. Biological agents must be maintained and stored in an effective way to optimise their potency on targeted weed species.

The unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare and propagate bioagent media	1.1 Identify, select, fit and use personal protective equipment according to health and safety in the workplace procedures 1.2 Identify, select and access bioagent media to suit the host and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	target 1.3 Prepare required media according to workplace procedures according to laboratory policies and procedures, and health and safety in the workplace, environmental sustainability and biosecurity protocols
2. Obtain bioagent cultures	2.1 Procure cultures from established sources and maintain microclimate in transport to the laboratory 2.2 Transfer cultures to growing environment according to laboratory policies and procedures and health and safety in the workplace, environmental sustainability and biosecurity protocols
3. Maintain and monitor cultures	3.1 Check cultures according to workplace procedures 3.2 Maintain optimum environmental conditions to maximise culture growth and condition according to laboratory policies and procedures and health and safety in the workplace, environmental sustainability and biosecurity protocols 3.3 Record observations and report abnormalities according to workplace procedures
4. Harvest and store cultures	4.1 Monitor culture growth to identify the need for harvest and agent release according to workplace procedures 4.2 Determine harvesting program according to program requirements 4.3 Complete harvest operations and transfer cultures to storage according to laboratory policies and procedures for health and safety in the workplace, environmental sustainability and biosecurity

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for AHCPMG313 Prepare, monitor and maintain biological agents for weeds

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have prepared, monitored and maintained biological agents for weed control, including:

- prepared and propagated biological agents according to laboratory policies and procedures
- procured and transferred cultures to growing environment according to laboratory policies and procedures
- maintained, harvested and stored biological agents according to laboratory policies and procedures
- monitored and kept records of observations and details of any abnormalities according to laboratory policies and procedures.
- applied health and safety in the workplace procedures, environmental sustainability and biosecurity practices.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- context of biological agents used for weed control
- laboratory procedures for biological agents
- media available for culture maintenance
- culture and media preparation techniques
- available biological control agents and their use
- the range of pest species that are to be targeted with biological agents
- biosecurity and quarantine requirements
- health and safety in the workplace for laboratories and biological agents, including:
 - use of personal protection equipment (PPE)
- environmental sustainability and biosecurity practices when using biological agents.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a laboratory suitable for handling biological agents or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live biological agents
 - laboratory tools, equipment and materials to produce and store media
 - PPE
- specifications:
 - workplace and laboratory policies, procedures and processes
 - safety data sheets
 - workplace instructions and specifications.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they can implement a pest management plan, including:

- determined all operational parameters and objectives and identified the budgetary allocations, health and safety in the workplace, biosecurity, human and operational resources required for the pest management plan
- supervised others to meet health and safety in the workplace, legislative and regulatory requirements in their work
- procured and ensured machinery, equipment tools and materials met operational and statutory requirements
- communicated with stakeholders and personnel on pest management activities
- supervised others to carry out pest management work according to the pest management plan and provided feedback, advice and coaching
- informed and advise personnel on duties and expected standards
- reviewed and rescheduled works and notified stakeholders of changed schedules
- reviewed and compiled outcomes of pest management plan and prepared reports to stakeholders on progress.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pest management plans their structure and implementation
- factors affecting the selection of pest control methods and techniques, including:
 - pest biology and lifecycle
 - potential diseases and toxicity

- principles of sustainability
- herbicide resistance and the alternatives that are available
- pest status in the context of location, land use, benefits and damage caused
- pest management control programs and how to use them in an integrated manner, including:
 - key concepts of integrated pest management as a strategy
- contingency management principles
- risk assessment and management processes
- legal responsibilities of stakeholders including landowners
- local, regional, state and national pest management strategies
- federal, state or territory legislation and regulations relating to pest management activities
- the basic concepts and underpinning principles of the strategic approach to invasive pest management and how to manage damage caused by pests
- the basic principles and importance of monitoring and evaluating the effectiveness of invasive pest management and how to plan and implement an appropriate monitoring program for a pest management plan
- common causes of failure in pest management
- requirements for ensuring the welfare of animals described in relevant codes of practice
- relevant environmental and pesticides legislation as they apply to the workplace
- developing operational parameters and objectives, timelines and milestones
- reporting and recording requirements for the various stakeholders
- scheduling workload and developing work plans.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - live pest animals
 - tools and equipment required to implement the plan
 - personal protective equipment
 - baits and poisons
- specifications:
 - workplace documents including policies, procedures, processes
 - pest management plan
 - manufacturers' operating instructions for specific equipment and machinery
 - specific safety data sheets
 - workplace instructions and job specifications
 - specific legislation/codes of practice
- relationships:

- clients
- team member(s)/work crew
- supervisors/management
- timeframes:
 - schedules and planned completion dates for a pest management plan.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG412 Develop a pest management plan

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop a pest management plan for the management of pests, in the broader context of weeds, vertebrate or invertebrate pests and diseases. This includes identifying the activities required to meet objectives of the organisation through the coordination of human and physical resource requirements.

The unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have developed a pest management plan, including:

- developed the scope, goals and time frames for a pest management plan
- consulted with stakeholders in the development of the plan
- defined and documented the objectives, roles and responsibilities for the plan
- identified and documented the activities and developed a schedule of critical control points
- conducted a risk assessment for management of community, environment production and health and safety in the workplace and developed contingency plans
- determined and developed operational procedures and methods for monitoring the plan, control methods to be used, site clean-up strategy, and biosecurity
- identified resources and estimated cost of pest management plan
- prioritised activities according to budgetary constraints
- incorporated health and safety in the workplace, environmental and biosecurity procedures and regulations into pest management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- project planning and management processes
- factors that impact on selection of pest management activities, including:
 - pests in the context of weeds, vertebrate and invertebrate animals and diseases
 - pest behaviour
 - pest population dynamics and economic and environmental thresholds

- target pest biology and lifecycles
- potential diseases or toxicity risks
- relevant local, regional, state or territory and national pest management strategies
- the principles that underpin the strategic approach to managing pests
- land management and production processes of targeted area
- Federal, state or territory legislation and regulations relating to pest management activities including animal welfare
- chemical, biological, physical and habitat control techniques for pest management
- pest control methods and techniques
- critical control points in the target pests' life cycle, land management and production activity cycles
- develop objectives for specific, measurable, achievable, realistic and time-based outcomes.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - technology and resources for documenting plans
- specifications:
 - workplace documents including policies, procedures, processes
 - pest management planning tools
 - workplace instructions and job specifications
 - specific legislation and codes of practice
- relationships:
 - clients
 - team member(s)/work crew
 - supervisors/management.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCPMG413 Define the pest problem

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that on at least one occasion the individual has demonstrated that they have produced a written report that details the pest problem in a target area, including:

- identified and consulted with stakeholders
- collected information on pest impact and defined the pest problem in consultation with stakeholders
- determined the target pest population and distribution and factors impacting population and distribution
- determined non-target species populations and distribution in area
- accessed and analysed information to validate pest impact
- identified appropriate times for pest control activities and identified and documented pests' characteristics that impact on program effectiveness
- conducted a cost-benefit analysis for managing target pest
- prepared a report and assessed the viability for a pest management plan for pest population
- identified environmental impact of pest presence and pest management activity.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- impact of pests on environment, land use, land management and production processes
- behaviour of target pests, particularly those behaviours that impact pest susceptibility to being effectively managed
- animal welfare and related codes of practice and workplace procedures

- pest biology and lifecycles of target pests
- principles that underpin the strategic approach to managing pests
- land management and production processes of targeted area
- ecology of targeted area
- performance criteria for measuring land management and production outcomes
- techniques used to validate the target pest population and distribution data supplied by stakeholders and sources of relevant data
- measuring or estimating economic implication and environmental impacts of pests
- potential ecological role some pests provide
- potential disease or toxicity risks
- relevant parts of local, regional, state or territory and national pest management strategies
- factors that influence pest population and distribution
- periods of vulnerability in the lifecycle of pests
- critical control points for management of pest problem
- range of pests, non-target species, plant pests and diseases.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site with pests to evaluate
 - technology and resources for documenting reports and cost benefit analysis
- specifications:
 - workplace documents including policies, procedures, processes
 - research materials and data for pests
 - workplace instructions and job specifications
 - specific legislation and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG506 Manage the implementation of legislation

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to manage the implementation of legislation and develop procedures to support and advise landholders to ensure compliance within organisational guidelines or legislative requirements relating to the management of pests, including weeds, vertebrate and/or invertebrate pests.

The unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse information and exercise judgement to complete a range of advanced skilled activities. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

Pest control legislation and regulations apply in all states and territories and must be adhered to. User are advised to check details with the relevant regulatory authority.

Pre-requisite Unit

Pest Management (PMG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop procedures to identify infestations and locations	1.1 Analyse and interpret pest legislation 1.2 Develop procedures to identify land ownership, and responsibilities of stakeholders, according to legislation 1.3 Develop procedures to contact landowners, and issue notifications of pest control requirements, according to agency and regulatory requirements 1.4 Verify record-keeping documents comply with regulatory requirements 1.5 Develop and implement procedures for serving notices 1.6 Develop and implement guidelines on collecting evidence and reporting findings 1.7 Establish organisational policy to provide assistance and advice to landholders in implementing pest management plans
2. Administer the implementation of legislation	2.1 Interpret, analyse and evaluate existing policy, and provide recommendations 2.2 Determine need for legal action 2.3 Explain policies for right of entry to work team for them to communicate to landowners 2.4 Verify monitoring program identifies contravention of existing legislation 2.5 Issue and serve penalty notices according to contraventions and workplace procedures 2.6 Provide pest management advice to landholders 2.7 Collate evidence and findings for court or legal representative 2.8 Prepare ministerial briefs according to workplace procedures and legislative requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
-------	-------------

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, analyse and critique information from pest management legislation, regulations and policies to build and maintain a balanced understanding for developing procedures of compliance and preparing reports and briefs for legal arguments and ministerial needs
Writing	<ul style="list-style-type: none"> Develop procedures and reports expressing ideas and presenting complex and technical information in a simple and factual manner ensuring accurate, succinct and logically constructed texts
Oral Communication	<ul style="list-style-type: none"> Establish and maintain complex and effective communications when discussing, consulting and advising stakeholders on pest management and compliance requirements

Assessment Requirements for AHCPMG506 Manage the implementation of legislation

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, developed procedures to identify infestations in accordance with pest management legislation.

There must also be evidence that the individual has:

- interacted with landholders according to workplace requirements and legislative requirements to:
 - explain the ramifications of legislation
 - provide pest management advice
- explained policies for right of entry to work team
- prepared and served penalty notices to landholders who are in contravention of legislation
- collated evidence and findings for presentation in a court or to legal team
- prepared a ministerial brief.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant Commonwealth and state/territory legislation and regulations relevant to pest management, including:
 - identification, destruction, movement and propagation of declared species
 - gathering and presenting evidence
- appropriate record-keeping systems
- environmental protection legislation and compliance in land and water management
- land management and production principles

- techniques used in the development of policies and procedures
- how to present evidence for court proceedings
- principles that underpin a strategic approach to managing pests
- pest control treatments relating to pests dealt with under legislation
- monitoring points in the pest management plan and evidence of infestations
- biosecurity implications of pest management strategies
- chemicals and toxins used in pest control and environmental protection
- relevant local, regional, state/territory and national pest management strategies.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an agency environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for reviewing legislation and preparing written documentation
- specifications:
 - workplace policies and procedures for preparing and processing pest management documents
 - legislation and regulations for pest management
- relationships:
 - landowners
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has developed at least one pest monitoring and evaluation program, according to local, regional, state or territory and national pest management strategies.

There must also be evidence that the individual has:

- consulted with stakeholders
- investigated and determined the objectives of the pest management monitoring plan
- identified required operational and performance standards for monitoring, which must include:
 - sample timing, observation systems, level of accuracy required and sample size
 - economic and environmental impact
 - triggers for emergency response
- developed procedures for monitoring and evaluation of pest management plan.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- monitoring and evaluation principles and how they should be included in the management program
- pest biology, behaviour and lifecycles and how they influence monitoring procedures
- pest population dynamics and economic and environmental thresholds
- relevant local, regional, state, territory and national pest management strategies

- Commonwealth, state or territory legislation and regulations relating to pest management activities
- key concepts in the integrated pest management strategy
- data and information management, including formatting and complexity considerations for target stakeholders
- monitoring points for target pests
- non-target species in the area and their impact on pest management
- potential economic and environmental impacts of pest population
- trigger points to initiate an emergency response
- aims, objectives and milestones in the pest management plan
- requirements for ensuring the welfare of animals described in the relevant codes of practice, where monitoring plan involves pest animals
- potential diseases and toxicity relevant to the area and pests.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for research and creating documents
- specifications:
 - legislation, regulations and industry codes of practice for pest management
- relationships:
 - stakeholders.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCPMG510 Develop a pest survey strategy

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to develop a plant pest survey strategy to determine the presence, distribution and prevalence of pest plants, vertebrates and/or invertebrates. The work may be conducted as part of an emergency response to an incursion or as part of routine surveillance and must be conducted in accordance with established standards and protocols.

The unit applies to individuals who undertake a role within a pest incursion response and take personal responsibility and exercise autonomy in undertaking complex work. They are accountable for the work of others within broad parameters and analyse information and exercise judgement to complete a range of advanced skilled activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Obtain and analyse biological information for survey design	1.1 Identify the biological and dispersal characteristics of the pest 1.2 Determine impact of climate on reproduction rates and the predicted distribution of the pest 1.3 Identify the geographical distribution of the host 1.4 Analyse information to determine priority areas to be surveyed
2. Develop survey methodology	2.1 Determine particular type of survey to be designed according to phase of incursion 2.2 Determine field data collection methodology in consultation with technical experts 2.3 Incorporate quality assurance standards, legislative requirements and codes of practice into survey methodology and documentation 2.4 Select diagnostic tests for use in confirming pest presence in samples 2.5 Include procedure for sustainability and biosecurity in survey plan 2.6 Determine review processes to evaluate survey program 2.7 Develop instructions for survey teams
3. Determine the resources and obtain approvals for survey design	3.1 Determine and document resources required for survey activities in consultation with technical experts 3.2 Document survey design according to protocols, industry standards and workplace health and safety policies 3.3 Submit survey design to authorising agency for approval

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organise, evaluate and analyse biological data, maps and charts to verify pest characteristics and dispersal

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on at least one occasion, the individual has produced at least one pest survey strategy according to local, regional, state/territory and national pest management strategies.

There must also be evidence that the individual has:

- analysed biological information for the characteristics, distribution and dispersal of pest
- developed survey methodology for target pest, environment and terrain
- prepared plans to workplace and authority standards
- developed review processes according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- biometric principles of biological survey design
- biology of pests relevant to the region
- types and distribution of hosts relevant to the region
- requirements for ensuring the welfare of animals described in the relevant codes of practice
- legislation, regulations, codes of practice and industry standards relevant to surveying pests
- pest biology, behaviour and lifecycles

- diagnostic tests for use in confirming pest presence in samples
- resources required for survey activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the field for a possible pest incursion, or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology and software for researching pest biological information and preparing documentation
- specifications:
 - legislation, regulations and industry codes of practice for pest management
- relationships:
 - stakeholders
 - work team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for AHCSAW503 Plan conservation earthworks

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has produced at least one plan of conservation earthworks that conforms with the following:

- meets client needs
- conforms to industry standards
- complies with legislation and policy requirements.

There must also be evidence that the individual has:

- consulted and negotiated with client for needs, agreements and approvals
- investigated site using:
 - surveys
 - aerial photographs
 - maps
- explained to landholder the impact of legislation and policies on project
- developed a strategy to protect natural areas and utilise earthworks according to industry principles and regulatory requirements
- prepared detailed project costing according to client budget
- prepared detailed works plans and communicated design requirements to designer.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental, planning, groundwater, heritage and cultural legislation, and the impact on development sites and conservation earthworks planning
- environmental, planning and earthwork construction standards and codes of practice relevant to planning conservation earthworks projects

- earthwork structures used for managing the movement of water
- principles of erosion control and design for conservation earthworks
- ecology protection and principles of rehabilitation on conservation sites
- soils and soil formation and the properties of soils for earthworks and erosion control
- determining levels and levelling on sites
- accessing plans and checking titles
- principles of earthmoving to manage water flow, and the equipment used to achieve it
- total catchment issues related to erosion and land degradation
- land use practices that contribute to erosion, and land development strategies to help mitigate erosion
- earthworks and erosion control and their potential impact on environment
- estimating and calculating peak water flows and methods to manage peak flows
- sub-surface and surface water interactions and the drainage principles and systems used in design
- simulation systems and techniques for demonstrating design outcomes and their limitations.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a landholder site or in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - digital technology with planning and design tools and resources
- specifications:
 - workplace policies, procedures and processes for planning and design
 - site land use, maps, plans and titles
 - legislation, regulations and industry codes of practice for addressing land degradation
- relationships:
 - landholder.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AHCSHG201 Crutch sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to crutch a sheep.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crutching operations	1.1 Check crutching equipment for correct operation prior to commencing work 1.2 Identify potential and existing hazards in the workplace and

Element	Performance criteria
	report to the supervisor 1.3 Select, use and maintain suitable personal protective equipment and ensure correct fit 1.4 Identify, catch and move sheep to be crutched in line with work health and safety, industry and animal welfare standards 1.5 Position sheep for crutching
2. Perform crutching operations	2.1 Activate handpiece and position in readiness for crutching 2.2 Shear wool from face, crutch or belly as instructed 2.3 Use crutching methods to ensure that injury to the sheep and damage to the fleece is avoided 2.4 Use safe handling techniques at all times
3. Respond to complications	3.1 Identify contamination during crutching and report to wool handlers 3.2 Treat cuts as required 3.3 Identify and report flyblown sheep 3.4 Identify and report problem sheep
4. Complete crutching operations	4.1 Place wool appropriately to avoid contamination and for wool handlers to collect 4.2 Switch off handpiece and re-position to non-operational position 4.3 Release sheep safely from the board into the count out pens 4.4 Report crutching grievances and difficulties 4.5 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSHG201 Crutch sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify potential and existing hazards to the supervisor
- select and use equipment and materials appropriate for crutching sheep
- avoid contamination, second cuts and damage to wool, animals and people
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain crutching equipment, site and facilities
- communicate problems, faults and workplace hazards to the owner or overseer
- tally crutched sheep count
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool.
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- personal protective clothing and equipment, and when and how it should be used

- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG202 Assist in preparing for shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist the owner or classer in the preparation of sheds and facilities prior to shearing and crutching operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare equipment	1.1 Inspect the facilities with the owner or classer to determine the degree of preparation required

Element	Performance criteria
	1.2 Clean facilities and equipment as directed 1.3 Identify contaminating substances, remove and dispose of according to enterprise environmental requirements 1.4 Report equipment faults or malfunctions to owner or classer 1.5 Select, use and maintain suitable personal protective equipment
2. Arrange equipment and materials	2.1 Position equipment according to owner or classer requirements 2.2 Arrange bins and wool packs as instructed 2.3 Position brooms and scrapers where required for safety
3. Identify hazards and dispose of contaminants	3.1 Identify potential and existing hazards and report to owner or classer 3.2 Follow directions of owner or classer in eliminating work health and safety hazards
4. Pen sheep	4.1 Undertake work in conjunction with shed manager and other shed staff, to ensure sheep are moved and penned for shearing or crutching in line with work health and safety, industry and animal welfare standards

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange and position shearing equipment and materials ready for shearing or crutching
- maintain contamination and hazard-free environment for shearing and wool handling
- carry out minor maintenance and repairs to equipment and facilities as directed
- disposal of waste in accordance with enterprise environmental requirements
- communicate verbally with owner/classer and follow instructions
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shearing shed layouts and equipment
- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role
- enterprise environmental policies

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG203 Shear sheep to novice level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, handle and shear sheep under supervision to novice level.

Novice level is defined as shearing a minimum of 40 adult merino sheep or 50 adult crossbred sheep per day to industry standards.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Assessment Requirements for AHCSHG203 Shear sheep to novice level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 40 adult merino sheep or 50 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- follow safe work practices
- select and use equipment and materials appropriate for shearing sheep
- load a handpiece correctly
- avoid contamination, second cuts
- shear sufficient sheep within eight hours to match novice skill level
- use appropriate suturing for cuts to sheep
- catch and release sheep safely
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards to the owner or overseer
- tally shorn sheep count
- apply work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing

- safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG204 Shear sheep to improve r level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, handle and shear sheep under supervision to improve r level.

Improver level is defined as shearing a minimum of 80 adult merino sheep or 100 adult crossbred sheep per day to industry standards.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad supervision and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for shearing	1.1 Check shearing equipment for correct operation prior to shearing session 1.2 Identify potential and existing hazards in the workplace and report to the supervisor 1.3 Select, use and maintain suitable personal protective equipment 1.4 Identify, catch sheep and move to required location in line with organisational, work health and safety, industry and animal welfare standards
2. Perform shearing operations	2.1 Position sheep for shearing using identified positions 2.2 Activate handpiece and position in readiness for shearing operations 2.3 Shear sheep using identified method and positions 2.4 Use shearing methods that ensure that injuries and damage to the sheep and fleece is avoided while meeting volume expectations 2.5 Use safe and humane handling techniques at all times
3. Respond to complications	3.1 Identify contamination during shearing operations and report to wool handlers 3.2 Suture sheep cuts as required 3.3 Identify flyblown sheep and report 3.4 Identify problem sheep and report
4. Complete shearing operation	4.1 Place wool to avoid contamination and for wool handlers to collect 4.2 Set handpiece to non-operational position and store 4.3 Release sheep safely from the board into the count-out pens 4.4 Report shearing grievances and difficulties 4.5 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCSHG204 Shear sheep to improver level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 80 adult merino sheep or 100 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- select and use equipment and materials appropriate for shearing sheep
- avoid contamination, second cuts and damage to wool, sheep and people
- shear sufficient sheep within eight hours to match skill level as per industry award minimum rate of pay for learner shearers
- suture cuts to sheep
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer
- tally shorn sheep count
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens

- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- aspects of safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- common sheep diseases
- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG205 Grind combs and cutters for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to grind combs and cutters for machine shearing so that they are effective for the type of wool and shearing conditions.

All work must be carried out to comply with workplace procedures, work health and safety, biosecurity requirements and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine need for sharpening combs and	1.1 Check combs and cutters for wear and report any issues found

Element	Performance criteria
cutters	1.2 Clean combs and cutters prior to grinding 1.3 Identify work health and safety hazards and report to supervisor
2. Prepare grinder and pendulum for use	2.1 Check the grinder and its location for serviceability and safety report safety hazards to supervisor 2.2 Identify grinder faults or malfunctions and report to supervisor for repair or replacement 2.3 Apply grinding papers to grinder discs 2.4 Store and care for grinding papers 2.5 Check, clean and adjust the bottom bar of the pendulum to ensure it is true 2.6 Confirm that the pressure bar and pins are set at the recommended distance 2.7 Check the height setting of pendulum
3. Carry out grinding	3.1 Wear eye protection while grinding is carried out 3.2 Secure comb or cutter for grinding 3.3 Apply correct pressure while grinding 3.4 Grind combs and cutters as directed 3.5 Check combs and cutters visually for even grinding 3.6 Identify and rectify faults or unevenness in grinding 3.7 Ensure grinding wheel is not left running when unattended

Assessment Requirements for AHCSHG301 Prepare livestock for shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed preparing livestock for shearing.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- select equipment appropriate to crutching and shearing tasks
- organise crutching and shearing operations
- muster, move, draft and handle livestock in compliance with animal welfare requirements
- observe and monitor livestock health and condition and detect disease or nutritional disorders and treat appropriately
- organise feed and water supplies
- avoid and remove contamination of fleece
- demonstrate safe and environmentally responsible workplace practices
- communicate verbally with work team and manager
- calculate livestock numbers, keep mobs separate
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types and purposes of shearing boards, yards and catching pens
- components and functions of shearing, cleaning and drenching equipment
- handling, mustering and movement techniques

- livestock breeds, nutritional and hygiene requirements
- possible fleece contaminants and types of pigmentation faults
- biosecurity legislation and codes of practice applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1. Identify worn and faulty handpiece	1.1 Assess the performance of the handpiece

Element	Performance criteria
components and install minor repair kit components	1.2 Check and clean comb bed, cups and fork yokes and check comb bed visually for flatness 1.3 Identify worn and faulty handpiece components 1.4 Install minor repair kit components 1.5 Check faulty comb beds and assess the required scope of repairs 1.6 Determine if there is a need for a technician to repair the fault 1.7 Carry out repairs according to manufacturer's specifications and work health and safety requirements 1.8 Arrange repairs by a technician as required
2. Service handpiece	2.1 Adjust handpiece components to maintain operational performance 2.2 Lubricate handpiece 2.3 Replace components requiring periodic replacement 2.4 Identify wear and tear on handpiece in terms of effects on performance 2.5 Install safety components and check before operation of the handpiece 2.6 Run and check handpiece prior to use to determine safe operational performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG303A Maintain and service shearing handpieces

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSHG303 Maintain and service shearing handpieces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed maintaining and servicing shearing handpieces.

The candidate must provide evidence that they can:

- identify worn and faulty handpiece components
- install minor repair kit components
- maintain and service handpieces
- apply enterprise work health and safety policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- terminology and assembly procedures for handpieces
- maintenance and servicing requirements for shearing handpieces
- components of a shearing handpiece
- different types of combs and cutters to use under different conditions
- work health and safety legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG304 Shear sheep to professional level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, handle and shear sheep to a professional level at least 120 adult merino sheep or 140 adult crossbred sheep per day to industry standards.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Recognise and correct faults in shearing technique	1.1 Analyse shearing technique 1.2 Recognise and correct faults in sheep position, footwork and free hand use 1.3 Recognise and correct faults in the number of blows and their placement 1.4 Improve co-ordination of footwork, free hand use, sheep control and blow placement
2. Apply techniques to increase shearing speed and accuracy	2.1 Increase speed at which the handpiece is pushed forward and returned between blow placements 2.2 Improve the power, direction and manoeuvrability applied at the increased speed 2.3 Improve rhythm at the increased speed 2.4 Maintain calm and consistent temperament whilst shearing 2.5 Recognise the importance of stamina and fitness in improvement of output consistency
3. Shear required number of sheep in an eight hour day working day to quality standard of the industry for both sheep and wool	3.1 Demonstrate safety procedures during shearing in relation to people and sheep 3.2 Avoid excessive wool contamination and damage to the wool 3.3 Shear 120 adult merino sheep or equivalent using identified method and positions in a normal eight-hour working day 3.4 Use correct movement of feet and hands, and maintain correct positioning to the downtube 3.5 Release sheep at increased speed 3.6 Comply with work health and safety and animal welfare requirements 3.7 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG304A Shear sheep to professional level

Assessment Requirements for AHCSHG304 Shear sheep to professional level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 120 adult merino sheep or 140 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- identify hazards and work safely
- avoid contamination, second cuts and injury to animals
- shear sufficient sheep within eight hours to match skill level of a professional shearer
- analyse and increase on improver shearer level
- shear with the industry accepted pattern
- use appropriate suturing for cuts to sheep
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- apply enterprise workplace health and safety policies in the context of own work
- apply enterprise biosecurity policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep

- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG305 Maintain consistent shearing performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain a consistent shearing performance.

All work must be carried out to comply with workplace procedures and work health and safety requirements

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain shearing control, coordination	1.1 Maintain consistent rhythm for 8-hour working day

Element	Performance criteria
and rhythm	1.2 Maintain coordination of footwork to assist control and blows placement for 8-hour working day 1.3 Analyse eye to hand coordination to optimise consistent blow placement
2. Maintain shearing output	2.1 Maintain shearing output and quality to meet expectation of the grower, contractor and self in terms of shearing conditions 2.2 Maintain shearing output and quality in terms of minimum industry output requirements and minimum industry quality requirements 2.3 Evaluate current stamina and fitness program, including eating, exercise, back care, fluid intake and rest periods, for means of improvement maintaining shearing performance 2.4 Comply with enterprise animal welfare and work health and safety policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG305A Maintain consistent shearing performance

Assessment Requirements for AHCSHG305 Maintain consistent shearing performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed maintaining shearing control, coordination and rhythm over a working day.

The candidate must provide evidence that they can:

- identify hazards and implement risk controls
- maintain optimum shearing output by correct preparation and set up of equipment
- maintain application of improved techniques
- maintain speed and accuracy
- assess and monitor the shearing conditions and environment to maintain shearing performance
- maintain control, coordination, rhythm and output during shearing

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- aspects of safe handling techniques for catching, dragging, shearing and releasing sheep.
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool.
- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep

- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG306 Carry out post-shearing procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed caring for shorn livestock.

The candidate must provide evidence that they can:

- identify existing and potential hazards implement control measures
- relate weather conditions to livestock requirements
- prepare contingency plan and anticipate emergency action
- handle livestock with due care
- weigh livestock and assess condition
- observe and monitor livestock behaviour, health and condition
- read and interpret weather information
- provide feed and water based on livestock numbers
- rug animals where required
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare and biosecurity policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- impacts of adverse weather conditions on shorn livestock
- physiological conditions brought on by stress post shearing, and treatment of same
- types and constructs of livestock shelter
- livestock handling techniques in response to adverse weather
- condition scoring
- appropriate types of feed for stressed livestock

- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG402 Conduct equipment experting for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a comb for shearing, or experting the comb.

All work must be carried out to comply with workplace procedures and work health and safety policies.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Trim and finish combs	1.1 Identify signs of non-optimal equipment performance and remedy 1.2 Identify potential and existing work health and safety hazards and

Element	Performance criteria
	implement control measures 1.3 Confirm that the trim and finish meet the requirements of the current shearing task 1.4 Maintain control of comb and tools throughout the experting process 1.5 Adapt the comb in a form that meets individual shearing style
2. Scallop comb	2.1 Recognise and apply the principles and method of scalloping 2.2 Determine the interrelationship between correctly scalloped combs and shearing performance in terms of density of wool, time of year, and breed 2.3 Scallop combs to meet the shearing style of individual shearers

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWOL201 Pen sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards minimise risks and use safe work procedures
- accept and interpret advice from the shed supervisor
- observe differences between mobs of sheep
- monitor shearers workflow and estimate rates for refilling the catching pens and for mob cutout
- move sheep in a shed and pen them up
- use the accepted communications signals in the shed when shearing and sheep movement is in full force
- apply work health and safety in the context of own work
- follow enterprise biosecurity policies where required
- apply animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- types of gates and catches in shearing sheds
- safe handling techniques for catching, dragging, and releasing sheep
- animal welfare requirements in relation to sheep
- features of sheep behaviour in the shearing sheds and yards
- hazards associated with handling livestock
- safety features of personal protective equipment and clothing, and when and how it should be used
- relevant industry awards and conditions that relate to working conditions in the wool industry

- relevant sections of State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, and biosecurity as applied to working in the wool industry

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

from the fleece	supervisor 1.2 Select and use suitable personal protective equipment 1.3 Remove stained wool, black/coloured wool and contamination on the shearing board as instructed 1.4 Apply safe working practices and using the available safety equipment
2. Remove fleeces and component parts from the shearing board	2.1 Pick wool up after the shearing handpiece has been disengaged and not before 2.2 Identify wet wool and remove for drying 2.3 Pick belly wool up and remove stained wool 2.4 Remove crutch wool and reposition the hind leg if necessary 2.5 Arrange the hind legs of the fleece to allow for the fleece to be picked up efficiently 2.6 Pick fleece up in a controlled bundle and remove from shearing stand as soon as sheep is shorn 2.7 Carry fleece to the wool table and throw to land flat and spread out ready for skirting 2.8 Collect loose wool remaining in the let-out chute 2.9 Place all wool removed from the fleece and from the shearing board in the correct bins or on the correct table
3. Handle non-fleece wool	3.1 Sweep up locks and place in correct bins 3.2 Separate board and table locks where directed 3.3 Remove shanks and jowls if directed and placed in appropriate bin 3.4 Remove pizzle stain from bellies and place in stains line 3.5 Remove brisket wool if directed by the wool classer 3.6 Sweep crutchings clear of the board, remove stain and dags and place in appropriate bins 3.7 Carry lambs wool and prematurely shorn wools to the wool table using boards or paddles, if required 3.8 Place lambs wool on tables for sorting
4. Skirt fleeces under supervision	4.1 Seek information on wool classer requirements for mob 4.2 Remove ribs and sweats and place in appropriate bins 4.3 Remove short crutch wool and wiggings and place with locks 4.4 Remove wool carrying vegetable matter under wool classer supervision 4.5 Seek feedback on accuracy of skirting and fleece to skirtings ratio 4.6 Assist wool classer or wool roller in separating fleece wool, which has been identified as defective or lacking uniformity

Element	Performance criteria
5. Sweep the board and wool room	5.1 Sweep shearing boards, wool room and area beneath the wool table regularly and when necessary during the shearing operation 5.2 Keep the shearing boards and the wool room free of potential contamination 5.3 Remove waste and place appropriately in full consideration of environmental implications
6. Empty bins and other wool containers	6.1 Empty bins and other wool containers as necessary, and replace as directed
7. Perform cut-out duties	7.1 Empty all butts and bins and press wool 7.2 Stack bales 7.3 Sweep wool working area 7.4 Store equipment 7.5 Wash board down and disinfect

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL202A Perform board duties

Assessment Requirements for AHCWOL202 Perform board duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely onto wool table
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stains
- use correct technique for skirting and rolling fleece
- check quantities in bins
- sweep floors and remove contamination
- work rapidly within specified timeframes
- communicate with supervisor, the wool classer and the shearers
- apply work health and safety practices in the context of own work
- apply enterprise environmental sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of a fleece
- types of shearing shed layouts
- duties and responsibilities of a board person
- types and sources of contamination of the fleece and be able to explain the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to the preparation of skirtings and oddments

- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCWOL203 Carry out wool pressing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to press wool into bales and related tasks.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for wool	1.1 Identify work health and safety hazards and report to the

Element	Performance criteria
pressing	supervisor 1.2 Select and use suitable personal protective equipment 1.3 Identify the lines of wool to be pressed and confirm with the supervisor 1.4 Check the wool press for safe operation and report any issues to supervisor 1.5 Carry out any required lubrication and maintenance as directed by supervisor 1.6 Prepare the work area in readiness for pressing as instructed 1.7 Check the scales to be used for accuracy and calibrate if necessary, as instructed 1.8 Check the press and its location for safety 1.9 Identify any defective equipment and report to the supervisor
2. Press wool	2.1 Apply safe working practices using the available safety equipment 2.2 Remove contamination from the woolpack and place in the appropriate location 2.3 Place all wool correctly and evenly in the press, as directed 2.4 Press bales safely for weight and length as directed 2.5 Keep work area in a condition that avoids contamination of the wool
3. Close and stack bales	3.1 Use approved bale dividers as instructed and ensure flaps are correctly fastened 3.2 Identify bales for branding before removing them from the press 3.3 Store bales safely, avoiding injury to presser, risk to other workers, and damage to bales and equipment
4. Complete recording requirement	4.1 Brand bales as directed 4.2 Weigh bales and have weight checked by supervisor 4.3 Record bale weights, numbers and descriptions using the appropriate recording system, as directed and arrange a check by the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCWOL203 Carry out wool pressing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and report on work health and safety hazards and risks
- apply standard operating procedures for the press and equipment
- operate different types of wool presses under supervision
- operate the various types of scales and manual handling devices and supervision
- maintain uniform bale weights for each line
- brand bales clearly and accurately
- handle and stack wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer/supervisor
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of the fleece
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- methods of handling fleece and bales that minimise risk to own health, including safe lifting and bending techniques
- features of industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding
- features of the recording system for bale details in use in the organisation

- enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCWOL301 Appraise wool using industry descriptions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to appraise wool by applying the industry description system (AWEX-ID) to classed lines of wool.

All work is carried out to industry standards using the AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID) and Code of Practice for the Preparation of Australian Wool Clips.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source and prepare information on wool to	1.1 Identify and access sources of information on wool appraisal

Element	Performance criteria
be appraised	1.2 Describe the features of AWEX - ID the system for the appraisal and description of non-measured characteristics of greasy wool 1.3 Identify and classify the visual characteristics to be appraised using the relevant descriptors
2. Apply the industry description to lines in a clip	2.1 Check wool clip classing lines for compliance with the Code of Practice 2.2 Appraise wool clip classing lines and record the AWEX-ID 2.3 Evaluate the consistency of appraisal across a wool clip against appraisals for the clip in the sale catalogue
3. Use the industry description to establish a market value for lines made	3.1 Access market information 3.2 Identify premiums and discounts for wool characteristics 3.3 Determine a value for each line made
4. Review clip preparation strategies using an industry description	4.1 Check clip preparation strategies and revise using the AWEX-ID descriptors, and the market value applied to the lines made 4.2 Provide feedback on market information, the effect of management on the wool clip and possible future selection strategies to the woolgrower using the AWEX-ID descriptors applied to the lines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Wool appraised must include wool from Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL301A Appraise wool using industry descriptions

Links

Assessment Requirements for AHCWOL301 Appraise wool using industry descriptions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source and prepare information on wool to be appraised for industry description (AWEX-ID)
- apply an industry description (AWEX-ID) to lines in a clip and record appraisal result
- use an industry description (AWEX-ID) to establish a market value for lines made
- review clip preparation strategies using industry standard terminology to communicate feedback to the grower

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of Code of Practice for the Preparation of Australian Wool Clips
- features of AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID)
- features of the Australian Wool Exchange Wool Selling Rules
- interpretation of the wool sale catalogue
- interpretation of wool testing data
- relevant sources of wool sale lot information
- features of subjective assessment of style, colour, type of vegetable matter fault, degree of stain and faults, and defects.

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL303 Prepare wool based on its characteristics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare wool based on its characteristics.

All work must be carried out to comply with the requirements of Code of Practice for the Preparation of Australian Wool Clips, workplace procedures, work health and safety and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Separate wools with characteristics outside	1.1 Make assessment of sheep breed and wool type

Element	Performance criteria
the uniformity requirements of the Code of Practice.	1.2 Separate wools into different lines based on fibre diameter, length and strength, colour and character and handle and style 1.3 Check staple formation and tip 1.4 Separate pigmented wool and wool which includes medulated fibres
2. Separate wool showing faults that impact on processing or fabric quality.	2.1 Separate wool for dogginess that will impact on fabric quality 2.2 Separate cotted wool that will require extra processing 2.3 Identify and remove skin pieces 2.4 Check wool for dermatitis and kept separate 2.5 Identify and separate wool based on the level and type of vegetable matter contamination where it requires different processing 2.6 Identify mobs with high pigmented fibre risk and keep their wool completely separate from low risk wool 2.7 Identify wool from sheep with shedding characteristics and keep completely separate from non-shedding white woolled sheep, record risk of exposure to shedding breeds on the classer's report 2.8 Keep fleeces containing pigmented fibre in a white woolled flock separate 2.9 Keep wool containing stain separate
3. Recognise impurities of greasy wool and their effect on processing and yield.	3.1 Examine wool for natural impurities 3.2 Identify applied impurities and assess their effect on processing 3.3 Identify acquired impurities and assess their effect on processing and yield of clean fibre

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Preparation must include wool from Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL303A Prepare wool based on its characteristics

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCWOL303 Prepare wool based on its characteristics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess key wool characteristics
- identify and separate wool faults
- identify and separate wool with impurities
- separate wool that does not meet Code of Practice requirements for uniform, predictable low risk lines of wool
- identify and separate wool from shedding sheep breeds
- identify and separate wools with a high pigmented fibre risk

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics of the breeds of sheep
- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on processing and final wool product
- features of impurities in wool and explain their impact on processing and yield of clean fibre after processing
- types and sources of contamination and explain their impact on processing and final wool product
- features of the main wool faults and explain their impacts on processing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, stages of processing
- wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics

- requirements for handling shedding and pigmented fibres
- relevant aspects of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards that related to preparing wool.

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL304 Prepare fleece wool for classing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare fleece wool for classing to comply with the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction of the wool classer and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify characteristics	1.1 Identify characteristics of wool important in processing and assess

Element	Performance criteria
of greasy wool and relate to processor requirements	uniformity within the fleece 1.2 Determine the portion of fleece to be removed to ensure uniformity of the fleece with the other fleeces from the mob
2. Check fleeces for impurities	2.1 Identify natural impurities of the wool and determine the portion of fleece to be removed 2.2 Identify vegetable matter types and determine the portion of fleece to be removed 2.3 Identify mineral impurities and relate to yield potential and determine the portion of fleece to be removed 2.4 Identify and remove any contamination from the fleece 2.5 Check work regularly with the wool classer and adjust procedures if required
3. Check fleeces for presence of wool faults	3.1 Identify hairy breeches and cotted wool and determine the portion of fleece to be removed 3.2 Identify unscourable colour, water stain and dermatitis and handled as directed 3.3 Remove skin pieces and place where directed 3.4 Carry out work safely and at a rate appropriate to the enterprise
4. Skirt and roll fleeces	4.1 Skirt fleeces to remove those portions determined above that adversely affect the uniformity and value of the remaining fleece 4.2 Double skirt fleeces containing clumpy vegetable matter or prepared as directed 4.3 Assess necks and backs for soundness, dust and VM levels, and handled as directed 4.4 Roll fleeces and present to classer 4.5 Place skirtings in the nominated bins 4.6 Remove waste and dispose of appropriately taking into account environmental implications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Classing must include the preparation of Fine/Superfine Merino, Medium/Strong Merino and Crossbred fleece wools

Unit Mapping Information

This unit is equivalent to AHCWOL304A Prepare fleece wool for classing

Assessment Requirements for AHCWOL304 Prepare fleece wool for classing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess fleece characteristics and prepare fleeces as directed by wool classer
- assess levels of vegetable matter and other impurities
- accurately skirt fleeces at commercial pace
- roll fleeces in preparation for classing
- communicate with wool classer and other team members using industry standard terminology
- follow enterprise work health and safety procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics wool and their impacts on processing
- principles and requirements of wool processing methods-woollen and worsted
- features of wool growth
- features of the parts of a fleece
- features of wool faults and impurities
- enterprise the work health and safety procedures
- requirements of Code of Practice for the Preparation of Australian Wool Clips as they relates to the preparation of fleece wool

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWOL306 Supervise clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- explain clip preparation requirements to shed staff and monitor their performance
- oversee shed staff to ensure quality clip preparation
- communicate preparation requirements with shed staff
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of fleece
- procedures for handling skirtings, bellies, lambs wool, premature shorn wool, locks and crutchings, and stained wool and oddments
- responsibilities of board and table staff
- characteristics of different wool types and parts of the fleece
- premiums and discounts for wool characteristics
- pressing and branding requirements
- skirting technique and appropriate skirting ratios for different clip types
- personal protective clothing and equipment requirements for shed staff
- on job training techniques
- principles of staff supervision
- requirements of work health and safety legislation and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL307 Document a wool clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare the documentation for a wool clip to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise.

It includes instructing others in the use of the system, maintaining the records and advising the owner or manager of issues where appropriate.

The documentation of a wool clip contributes to the wool harvesting operation by optimising efficiency for the grower.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish recording system and documentation	1.1 Select documentation that complies with the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise 1.2 Establish guidelines for the use of the recording system including the type, frequency and format of recording 1.3 Inform those who are to use the recording system of their obligations and any specific instructions that are necessary 1.4 Check documentation regularly to confirm that it is accurately completed and updated at the proper times
2. Complete records for wool classing	2.1 Complete documents and records required by the organisation and the market 2.2 Complete wool clip specification prior to consignment, to ensure that the correct lotting advice is provided to the selling broker or buyer 2.3 Make any additional notes or give advice necessary on the documents so that they are clearly understood 2.4 Obtain all signatures and registrations that are required and include on documentation 2.5 Prepare wages statements for contractors according to the agreements reached in employment conditions
3. Provide information and advice to the woolgrower	3.1 Make suggestions for improved safety and fleece quality that are derived from observations, smoothness of workflow, and discussions with operators within the wool shed 3.2 Communicate the wool clip specification to the appropriate authority at shed cutout

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL307A Document a wool clip

Assessment Requirements for AHCWOL307 Document a wool clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop the recording system for wool clips and bales
- communicate recording requirements clearly to wool handlers and pressers
- prepare and maintain records as required by the Code of Practice for the Preparation of Australian Wool Clips, legislation or enterprise
- observe, identify and react appropriately to work health and safety hazards
- observe the work and identify areas of the work or the facilities that could be improved
- communicate information and advice to the woolgrower on improvements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- features of quality assurance schemes used in the organisation and in the industry, and their documentation requirements
- requirements for the completion of a clip specification
- employment conditions and agreements for a range of workers in a wool harvesting and preparation team
- documentation requirements for wool clip preparation and shearing operations

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL308 Prepare facilities for shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to ensure the safety and hygiene standards of facilities and equipment prior to shearing and crutching operations, and is undertaken by growers with assistance from wool handlers.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCWOL308 Prepare facilities for shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- maintain contamination and hazard-free environment for shearing and wool handling
- recognise and remedy health and safety hazards
- carry out minor maintenance and repairs to equipment and facilities
- disposal of waste in an environmentally responsible manner
- pen sheep humanely in line with enterprise animal welfare policies
- communicate with shed staff and direct operations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- sources and types of contamination
- principles of moving and penning animals
- shearing requirements
- features of efficient shed and board layouts
- requirements of work health and safety legislation and animal welfare codes of practice as they relate to the shearing and wool preparation sector

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL310 Press wool for a clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to press wool into bales and carry out related tasks such as branding the bales, recording bale weights and numbers, and subsequently storing the wool bales.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to wool pressers who work in close cooperation with the wool classer and maintain a rate of pressing that ensures wool flow can be maintained. The work is carried out within established routines, methods and procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for wool pressing	1.1 Identify the lines of wool and confirm with the wool classer 1.2 Check the wool press for safe operation, and lubricate and maintain it as required 1.3 Inspect the work area to confirm it is free of all contaminants in readiness for pressing 1.4 Confirm that supplies of wool packs, bale fasteners and hooks, stencils and bale-branding inks are located in appropriate place 1.5 Identify the appropriate recording system 1.6 Check the scales to be used for accuracy and calibrate if necessary 1.7 Check the press and its location for safety 1.8 Identify any defective equipment and report to the appropriate person
2. Press wool	2.1 Consult the wool classer to determine mob cut-outs and pressing requirements 2.2 Apply safe work practices at all times and use available safety equipment in line with work health and safety policies 2.3 Remove contamination from the woolpack and place in the appropriate location 2.4 Check woolpacks for conformity 2.5 Seek directions for order of pressing and any special requirements from the wool classer 2.6 Place all wool correctly and evenly in the press to produce even density bales
3. Carry out the role and responsibilities of the wool presser	3.1 Press bales to optimal weights to reduce selling costs and within specified weight and length dimensions in compliance with Code of Practice 3.2 Press lines to avoid mixed bales 3.3 Monitor wool flow and build-up in bins 3.4 Maintain work area in a condition that avoids contamination of wool 3.5 Carry out pressing within time restrictions and workflow of the wool room
4. Close and store bales	4.1 Use approved bale dividers as instructed, and fasten flaps correctly 4.2 Identify bales for branding before removing them from the press 4.3 Store bales safely, avoiding injury to presser, risk to other workers, and damage to bales and equipment 4.4 Store bales to maximise shed space and to avoid weather damage
5. Complete recording	5.1 Brand bales appropriately

Element	Performance criteria
requirements	5.2 Weigh bales appropriately 5.3 Record bale weights, numbers and descriptions clearly using the appropriate recording system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWOL310 Press wool for a clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- operate different types of wool presses and carry out basic lubrication and maintenance according to manufacturer instructions
- operate the various types of scales and manual handling devices
- check woolpacks and wool to ensure freedom from contamination
- assess and monitor wool-flow and build-up in bins
- maintain uniform bale weights for each line
- brand bales clearly and accurately to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips
- handle and store wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer
- work safely in compliance with enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of wool
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- operating requirements for different types of wool presses
- methods of handling wool and bales that minimise risk to own health, including safe lifting and bending techniques
- industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding

- features of the recording system for bale details in use in the organisation
- enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL311 Perform shed duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform shed duties covering the board and table and to provide mentoring to less experienced staff.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Perform board duties	1.1 Remove stained wool, black wool, and contamination on the shearing board

Element	Performance criteria
	<p>1.2 Pick up belly wool and remove stained wool</p> <p>1.3 Remove crutch wool and reposition the hind leg if necessary</p> <p>1.4 Pick up fleece and throw or park and retrieve later if wool table is not clear</p> <p>1.5 Monitor removal of wool and maintenance of the board and provide extra support when needed</p> <p>1.6 Provide mentoring and demonstration of work skills to inexperienced board staff as required</p> <p>1.7 Apply safe work practices at all times and use available safety equipment</p> <p>1.8 Comply with enterprise animal welfare and biosecurity policies and procedures</p>
2. Prepare wool	<p>2.1 Sweep up locks and keep board and table locks separate where directed</p> <p>2.2 Remove shanks and jowls if directed and place in correct bin</p> <p>2.3 Remove pizzle stain from bellies and placed in stains line</p> <p>2.4 Remove brisket wool if directed by the wool classer</p> <p>2.5 Sweep crutchings clear of the board, remove stain and dags and place in correct bins</p> <p>2.6 Carry lambs wool and prematurely shorn wools to the wool table using boards or paddles if required</p> <p>2.7 Provide mentoring and support in wool handling to inexperienced staff as part of the work team role</p>
3. Skirt fleeces	<p>3.1 Seek information on wool classer requirements for mob</p> <p>3.2 Remove fribs and sweats and place in appropriate bins</p> <p>3.3 Remove short crutch wool and wiggings and place with locks</p> <p>3.4 Remove wool carrying clumpy vegetable matter if directed by the wool classer</p> <p>3.5 Seek feedback on accuracy of skirting and fleece to skirtings ratio</p> <p>3.6 Remove fleece wool which is defective or lacks uniformity if directed by the wool classer</p>
4. Maintain wool flow and minimise contamination risk	<p>4.1 Sweep the immediate shearing area after each sheep is shorn</p> <p>4.2 Sweep shearing boards, wool room, and area beneath the wool table as regularly as necessary during the shearing operation</p> <p>4.3 Keep the shearing boards and the wool room free of potential contamination</p> <p>4.4 Remove waste and place appropriately in full consideration of environmental implications</p> <p>4.5 Minimise the risk of mixing wool between lines through regular sweeping and maintenance of bins, other containers and the wool</p>

Element	Performance criteria
	area 4.6 Complete all tasks and cover contingencies through a professional, team-based approach
5. Carry out tasks to support the shearing operation	5.1 Observe the rate of shearing and estimate the frequency of refilling the catching pens and for mob cutout 5.2 Keep different mobs of sheep separate 5.3 Implement directions from the wool classer and provide feedback on sheep supply and wool flow 5.4 Empty all butts and bins and press wool 5.5 Store bales as directed 5.6 Sweep wool working area clean 5.7 Store equipment at the end of shearing 5.8 Wash board down and disinfect after shearing cutout

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL311A Perform shed duties

Assessment Requirements for AHCWOL311 Perform shed duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stain
- use correct technique for skirting and rolling fleece
- sweep floors and remove contamination
- work rapidly within specified timeframes
- interpret verbal and visual communication signals within the wool shed given by the supervisor, the wool classer and the shearers
- monitor sheep supply in pens and fill as necessary
- monitor wool flow and the wool working area to ensure risk of mixing between lines is minimised
- provide mentoring to less experienced staff
- deal with contingencies by supporting other staff in tasks as required
- observe and report on adverse environmental impacts
- apply work health and safety requirements in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- types of contamination and their sources
- properties of the parts of a fleece

- principles of moving and penning animals
- shearing requirements
- shearing shed and board layouts
- environmental codes of practice with regard to shearing
- relevant work health and safety and animal welfare legislation, codes of practice and enterprise requirements that apply to wool harvesting and pressing

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL401 Determine wool classing strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop classing strategies to be used for classing a wool clip and communicating the strategy to shed staff and owner and/or manager, then evaluating the strategy for the clip.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information for	1.1 Obtain information on previous year's clip preparation and sale

Element	Performance criteria
input to classing strategies	<p>results, including classer's specification, test results, skirting ratios, AWEX-ID, sale prices, and any grower or processor feedback</p> <p>1.2 Obtain information on growing and management history for the mobs over the last twelve months from the grower</p> <p>1.3 Research current market trends and premiums and discounts</p> <p>1.4 Identify current recommendations appropriate to the specific wool clip in the Code of Practice for Preparation of Australian Wool Clips</p> <p>1.5 Obtain current specific exporter and processor requirements and limitations and record relevant details</p> <p>1.6 Identify marketing and selling methods and end uses for the wool from the marketing plan and determine their implications on clip preparation</p> <p>1.7 Identify estimated prices for specific lines from market information</p> <p>1.8 Identify factors that will influence the classing process in the organisation</p>
2. Develop strategies for classing this clip	<p>2.1 Identify fleece type and set up suitable fleece, skirting and oddment lines</p> <p>2.2 Select clip preparation methods and standards to suit the fleece type and market requirements in consultation with the manager and other shed personnel</p> <p>2.3 Adopt operating procedures that eliminate contamination</p> <p>2.4 Select wool classing procedures, methods and criteria in line with fleece type, market requirements and industry standards</p> <p>2.5 Select shed layout and facilities that will permit efficient workflow</p> <p>2.6 Identify work health and safety hazards, assess risks and implement suitable control measures</p> <p>2.7 Select requirements for labelling and placement of bins and containers</p>
3. Communicate classing strategy	<p>3.1 Prepare the shed layout, equipment and facilities required and convey requirements for clip preparation to shed staff</p> <p>3.2 Clip preparation methods and classing procedures are clearly communicated to, and confirmed with, the wool handlers</p>
4. Review the success of the strategies for the clip	<p>4.1 Analyse classed clips and review strategies based on lines made, AWEX-ID, test results, selling costs and prices obtained</p> <p>4.2 Compare alternative clip preparation and classing strategies for profitability of the clip</p> <p>4.3 Incorporate conclusions and actions of review processes into</p>

Element	Performance criteria
	future classing decisions and instructions to shed staff 4.4 Discuss a review of classing and marketing alternatives is with owner or manager

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWOL401 Determine wool classing strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a classing strategy based on owners enterprise goals, research of past performance of the clip, current management, growing season, market and processor requirements which conforms with the Code of Practice for the Preparation of Australian Wool Clips
- establish and maintain consistent methods of clip preparation
- analyse classed clips and test alternative classing strategies for profitability
- review classing strategies based on broker and buyer feedback
- adapt classing strategies for buyer requirements, marketing systems and owner manager
- value lines of wool using industry descriptions and test results
- incorporate review of classing strategies into instructions for shed staff
- discuss clip test results, prices and alternative classing strategies with owner/shed manager
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- provide feedback to grower/manager on performance of clip preparation strategy adopted.
- communicate classing strategy to shed staff and owner/manager
- implement work health and safety policies and procedures into classing strategy
- implement animal welfare practices into classing strategy

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the industry description system (AWEX-ID)
- requirements of the organisation's wool marketing and production plans
- implications of wool testing, broking and export organisations on clip preparation

- clip preparation and analysis processes for the major wool types
- requirements and standards of the national wool processing industry
- methods used for processing wool and their impact on clip preparation and marketing
- marketing alternatives and their implications for classing
- wool brokering services
- features of efficient wool room layout
- sale catalogue and market reports
- specifications for classers
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Assessment Requirements for AHCWOL402 Use individual fleece measurements to prepare wool for sale

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange shed or wool room layout for sampling efficient operation where required
- understand and interpret the individual fleece measurements
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips, or as required by the enterprise classing strategy and marketing plan
- communicate specific and detailed requirements for wool preparation and classing to wool handling staff
- identify wool of higher and lower market value and make lines which maximise return to woolgrower
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of wool room layouts which promote efficient wool flow and handling
- characteristics different breeds of sheep
- inherent wool characteristics , including fibre diameter, staple length and strength, colour, yield, VM type, curvature, comfort factor
- fleece measurement criteria - techniques used to measure wool characteristics
- interpretation of test results
- principles of classing , including mob/flock concept, variability for fibre diameter and staple length, soundness, defects
- classing scenarios requiring detail of clip break-ups
- clip analysis reports and comparisons

- clips and other relevant quality standards
- requirements of work health and safety legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan and implement wool harvesting and preparation operations	1.1 Consult the flock owner or manager about their requirements and inform them of any planning issues taking into account weather and environmental issues 1.2 Determine the order of mobs for wool harvesting and preparation 1.3 Determine staffing needs by negotiation with owner or manager according to clip type, enterprise requirements, legislative requirements, employment agreements and awards 1.4 Allocate staff duties and give staff directions where necessary 1.5 Arrange the shed equipment and materials in line with shearing plan, work health and safety requirements and the quality management system 1.6 Implement the wool harvesting and preparation plan and adjust as required
2. Implement plan and monitor work flows	2.1 Monitor sheep numbers, mob cut outs and shearing speeds to match wool preparation capacity 2.2 Supervise shed staff to maintain a clear board and ensure fleeces are thrown correctly 2.3 Direct shed staff to use appropriate skirting strategies and monitor fleece to skirting ratios 2.4 Direct staff to close off bins and lines for mob cut outs 2.5 Manage wool harvesting and preparation team to comply with quality management system requirements 2.6 Monitor compliance with enterprise and legislative requirements including work health and safety, animal welfare, biosecurity, industrial, and environmental practices 2.7 Manage staff performance and provide direction where necessary
3. Supervise wool pressing	3.1 Instruct presser on pressing strategies to reduce mixed bales while meeting code of practice requirements for uniformity in bales 3.2 Inform presser of order for pressing and procedures to minimize contamination 3.3 Monitor rate of build up in lines by consulting with wool presser 3.4 Monitor bale weights to ensure efficiencies are achieved for the grower without creating overweight bales 3.5 Brand bales appropriately 3.6 Monitor wool book to ensure it is up to date, accurate and legible
4. Provide feedback to grower on classing strategies, clip performance and wool harvesting and preparation operations	4.1 Review staff performance in clip preparation 4.2 Provide feedback on classing strategies, clip preparation in relation to mob characteristics, skirting ratios, bale weights and any workflow issues 4.3 Provide feedback on possible improvements to wool handling

Element	Performance criteria
	facilities 4.4 Report on equipment effectiveness and maintenance requirements 4.5 Explain lines made and bale details in relation to mob characteristics 4.6 Provide feedback on lotting advice 4.7 Complete wool clip documentation and present to owner or manager for signature

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Unit is equivalent to AHCWOL403A Prepare for, implement and review wool harvesting, clip preparation and classing

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL403 Plan, implement and review wool harvesting and clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and implement wool harvesting and preparation operations
- organise and schedule staff and work tasks
- supervise staff and monitor productivity
- implement risk management strategies
- monitor environmental impacts and implement control measures
- implement relevant legislative requirements associated with the shearing industry including employment agreements and awards
- communicate using industry standard terminology written and oral information to team members and management
- review and evaluate operational performance and clip preparation standards
- provide feedback to grower on the shearing operation and the preparation and classing of the clip
- calculate resources and bale weights for mob cut outs
- implement and monitor work health and safety requirements for work team
- implement relevant enterprise biosecurity policies and procedures
- implement animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- supervisory procedures with regard to operations and personnel
- principles staff management including team building and conflict resolution
- wool industry codes of practice and quality systems

- industry requirements with regard to hygiene and safety for wool harvesting and preparation facilities and equipment
- how weather conditions can impact on wool harvesting programs
- features of workplace documentation required for wool harvesting and preparation
- employment agreements, industrial awards, relevant to the wool harvesting sector
- the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation, biosecurity and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL404 Establish work routines and manage wool harvesting and preparation staff

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish work routines and manage wool harvesting and preparation staff.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Define work roles for shed staff	1.1 Define the roles and responsibilities of shed staff 1.2 Identify the skills of shed staff and match with available tasks and duties 1.3 Identify the requirements of job duties and Code of Practice and communicate to shed staff 1.4 Explain work health and safety policy and procedures to staff and monitor implementation 1.5 Explain animal welfare and biosecurity policies to staff and monitor implementation
2. Induct shed staff	2.1 Identify work health and safety hazards, assess risks and implement suitable controls 2.2 Communicate the details of shearing, including flock and mob details to staff 2.3 Brief new staff on relevant awards, enterprise agreements, pay rates and related administration 2.4 Advise new staff of terms and conditions and sign on 2.5 Familiarise new staff with the workplace and colleagues 2.6 Explain the enterprise's environmental policy and procedures and monitor implementation
3. Support on-the-job training	3.1 Encourage individuals to self-evaluate performance and identify areas for improvement 3.2 Determine training needs through appraisal of staff and monitoring of work performance 3.3 Analyse practical skills and then explained and demonstrated as required 3.4 Provide workplace learning opportunities with coaching and mentoring to support learning 3.5 Adjust staff responsibilities to allow for practice and skills development where required
4. Performance manage shed staff	4.1 Establish performance standards for clip preparation and communicate to individuals and the team 4.2 Explain skirting requirements and monitor skirtings ratio 4.3 Describe the requirements for separating specific parts of the fleece to wool handlers using the Code of Practice and processor requirements 4.4 Use motivation strategies for shed staff to maintain a consistent focus on clip preparation standards and timing of operations
5. Maintain effective working relations with the team	5.1 Recognise problems and address through discussion with work group 5.2 Seek assistance from work group members when difficulties arise

Element	Performance criteria
	in achieving allocated tasks 5.3 Use discussion and information sharing to communicate requirements of work activities through a participative approach 5.4 Manage disagreements and conflicts constructively using appropriate conflict management strategies
6. Provide feedback to shed staff	6.1 Provide confirmatory feedback to emphasise good performance and technique and its importance for clip quality 6.2 Provide corrective feedback in a constructive way, including an explanation of the effects of poor performance or incorrect technique and strategies for improvement 6.3 Address under performance both on an individual and team basis 6.4 Use clip data to share feedback on clips prepared with team members

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL404A Establish work routines and manage wool harvesting and preparation staff

Assessment Requirements for AHCWOL404 Establish work routines and manage wool harvesting and preparation staff

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- identify staff training needs and provide on job training, mentoring and coaching as required
- implement effective time management
- use problem solving techniques to address staffing and resource issues motivate and performance manage work team
- manage conflicts within work team
- communicate with team members
- implement and monitor work health and safety policies and procedures
- implement enterprise biosecurity policies and procedures
- implement and monitor enterprise animal welfare policies and procedures
- implement enterprise environmental policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shearing industry awards, agreements and personnel processes
- principles of team work, negotiation and time management
- principles of workplace instruction/training and coaching techniques
- principles of conflict management
- features of effective communication for feedback and motivation
- principles of staff performance management

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL405 Class fleece wool

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to class fleece wool from merino and crossbred sheep into lines that meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

The unit applies to wool classers who class wool as a professional service after consultation with the grower or shed manager.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for wool classing	1.1 Arrange the layout of the shed, equipment and facilities according to the determined classing strategy for efficient wool flow, quality management and pressing 1.2 Identify potential and existing work health and safety hazards, assess risks and implement control measures 1.3 Place clearly labelled bins and containers in line with the classing strategy, quality management system and enterprise requirements 1.4 Establish and maintain sufficient staffing ratio
2. Carry out classing of fleece wool	2.1 Identify hazards, apply safe working practices and use available safety equipment 2.2 Handle and skirt fleece wool to the required standards 2.3 Check wool to ensure freedom from contamination and stain 2.4 Check wool to ensure adequate and optimum skirting 2.5 Assess pigmented fibre risk and keep wool separate as required 2.6 Identify wet wool, stained, cotted and coloured wool and keep separate 2.7 Appraise wool for its characteristics 2.8 Class wool to standards of the enterprise classing strategy, the Code of Practice and as required by alternative selling methods 2.9 Identify wool of higher and lower market value and processing requirements and make lines to maximise return to the wool owner
3. Place wool in bins for pressing	3.1 Place wool in the correct bins ready for pressing and ensure that cross contamination does not occur 3.2 Check wool flow into bins and communicate with wool presser

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Classing must include the classing of Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL405A Class fleece wool

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCWOL405 Class fleece wool

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work procedures
- arrange layout of bins and wool table for optimum efficient wool flow and pressing in a variety of sheds
- label bins and containers correctly
- monitor clip preparation and skirting
- assess pigmented fibre risk and separate wool as required
- identify and appraise wool characteristics
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips or as required by alternative selling methods
- identify wool of higher and lower market value and lines made which maximise return to grower.
- separate wools of different processing or end user requirements
- identify and keep separate wet wool, stained, cotted and coloured wool and contamination
- communicate with team members in completing tasks associated with classing fleece wool.
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shed layouts which promote safe, efficient wool flow and classing
- characteristics of the breeds of sheep
- types and sources of contamination
- impact of the wool production areas of Australia on clip characteristics

- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on classing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, and stages of processing
- effect of raw wool characteristics on wool processing and final product
- features of wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics
- requirements for handling shedding and pigmented fibres
- interpretation of test results, clip feedback and reports
- principles of classing (mob/flock concept, variability for fibre diameter and staple length, soundness, defects)
- documentation requirements for wool clips
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation in a wool preparation workplace

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWRK601 Monitor projects in a program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and report on requirements at a program level including interim, annual and final project reporting.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Review project milestones	1.1 Log project milestones for approved projects within the program for monitoring 1.2 Use negotiated and approved changes to milestones to adjust the monitoring records
2. Check progress against	2.1 Maintain contact with groups and coordinators to monitor project

Element	Performance criteria
milestones	progress against agreed timelines 2.2 Keep records of progress for reporting purposes 2.3 Identify variations from agreed progress for reporting and response purpose 2.4 Submit requests for change in project milestones and timelines for approval as required
3. Summarise progress	3.1 Prepare regular progress reports as required by program and agency 3.2 Discuss progress reports with groups, coordinators and others 3.3 Consolidate project reports into program reports as required
4. Assist groups maintain project timeline	4.1 Review group activities and resources where required achievement may not or has not been met 4.2 Develop strategies to place the project back onto required plan with coordinator and community group leaders 4.3 Submit documented proposed changes in project for approval by group initially, and then to program and agency requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK601A Monitor projects in a program.

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review project milestones
- check progress against milestones
- summarise progress
- assist groups maintain project timelines
- monitor resource usage against the project plan
- use industry standard terminology to describe.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- group and regional cultures including diverse groups of people
- program and agency reporting requirements
- reporting formats
- project management
- financial reporting
- project management computer applications.

Assessment Conditions

Assessors must satisfy current standards for RTOs

ACMGEN315 Communicate effectively with clients and team members

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Application

This unit of competency describes the skills and knowledge required to communicate effectively with clients, a supervisor, team members and industry representatives.

The unit applies to individuals who work in organisations in operational roles with some supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

General Animal Care (GEN)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Communicate effectively with clients and industry representatives	1.1 Use verbal and non-verbal communication to enhance understanding and demonstrate respect 1.2 Communicate information in a manner that is appropriate, clear and easily understood 1.3 Use electronic and digital communication tools effectively

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Listen to requests, clarify meaning and respond appropriately 1.5 Exchange information clearly in a timely manner 1.6 Empathise with those experiencing distress 1.7 Follow privacy and confidentiality protocols
2. Communicate with team	2.1 Listen to and clarify instructions for carrying out workplace tasks 2.2 Use industry terminology in verbal, written and digital communications 2.3 Follow communication protocols that apply to interactions with team members 2.4 Participate actively in team meetings and discussions
3. Address constraints to communication	3.1 Identify constraints to effective communication and resolve using appropriate communication strategies and techniques 3.2 Use communication skills to avoid, defuse and resolve conflict situations
4. Complete workplace documentation	4.1 Complete paper-based and electronic documents in line with workplace standards 4.2 Carry out routine numerical calculations relevant to work role and requirements 4.3 Document agenda and minutes for meetings 4.4 Store or save correspondence and documentation in line with workplace protocols 4.5 Follow workplace communication policies and procedures for using digital media

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for ACMGEN315 Communicate effectively with clients and team members

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- communicated effectively on a minimum of three different occasions, including each of the following:
 - interacted appropriately with clients in writing using digital media
 - interacted appropriately with a client or industry representative by telephone
 - participated actively in a team meeting.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- models of effective communication across a range of modes, including written, verbal, electronic and digital
- the role of non-verbal communication
- effective communication principles for working in a team
- conflict resolution techniques
- social media platforms used for business
- ways to show empathy and support those in distress
- appropriate industry language and terminology
- communication systems, procedures and technology commonly used in workplaces
- confidentiality and privacy legislation, regulations and protocols.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - communication equipment and resources appropriate to work undertaken
- specifications:
 - access to organisational policies and procedures
- relationships:
 - interactions with team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ACMINF304 Promote environmental health and safety for companion animals in remote communities

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to promote health and safety related to companion animals in remote Indigenous (Aboriginal and Torres Strait Islander) communities. It focuses on basic infection prevention and control for companion animals (mainly dogs and cats) and humans and covers knowledge of cultural issues and the need to work collaboratively within remote communities.

The unit applies to individuals who provide advice related to human health, veterinary, animal management or education services in remote Indigenous communities. They work under broad direction, take responsibility for their own work, solve problems and use discretion and judgement in the use of available resources.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Infection control (INF)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify a remote community's basic animal environmental	1.1 Confirm the community's attitude and relationship to companion animals

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
health and infection control requirements	<p>1.2 Carry out a basic assessment of human and animal disease risk and access to preventatives or treatment options within the community</p> <p>1.3 Confirm applicable regulations relating to the keeping and management of companion animals in the community and their relationship to environmental health and infection control</p> <p>1.4 Identify key issues related to the health and condition of animals and local community priorities</p> <p>1.5 Establish rapport and trust with the local community to be able to carry out animal welfare activities within the community</p>
2. Handle or interact with companion animals safely within a remote community	<p>2.1 Observe animal behaviour before approaching or handling to assess risks to safety of self or other people or animals</p> <p>2.2 Select, fit and use personal protective equipment before contact with animals and animal body fluids and excrement</p> <p>2.3 Use appropriate personal hygiene practices when handling or interacting with companion animals</p> <p>2.4 Apply basic animal training and behaviour principles when approaching or handling animals to ensure safety</p> <p>2.5 Apply behaviours and techniques to behaviours to prevent attacks, bites and perceived threats to animals</p>
3. Provide animal environmental health and infection control advice to community members	<p>3.1 Check general condition and look for signs of health and diseases in individual companion animals within a community</p> <p>3.2 Provide advice on how to access treatments and treat common animal skin and parasitic infections to individual community members, including medications which can only be administered by a veterinarian</p> <p>3.3 Explain how to contact a veterinarian or local council or regional services for more serious animal health conditions</p> <p>3.4 Explain the benefits to the community and promote the use of available population control and treatment services</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Provide hygiene and infection control advice to community members	<p>4.1 Identify opportunities to build awareness of the link between animal and human health and the adoption of good hygiene relating to animal care</p> <p>4.2 Model appropriate personal hygiene and safety when handling or interacting with animals according to health standards</p> <p>4.3 Provide advice to individual community members on basic hygiene and infection control for self and family members</p> <p>4.4 Provide advice on seeking medical assistance for signs of zoonotic diseases according to available services in the region</p>
5. Consult to provide ongoing culturally appropriate community awareness activities	<p>5.1 Seek permission to interact with or handle animals according to community requirements and practices</p> <p>5.2 Involve community members in activities to improve care for animals, prevent and minimise the transmission of diseases and promote responsible animal ownership</p> <p>5.3 Use communication techniques and work practices that show respect for the culture of the community and other team members according to community standards</p> <p>5.4 Provide feedback to supervisor and service providers to increase cross-cultural awareness in animal environmental health and management services</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret instructions on product labels and packaging Interpret veterinary terminology and instructions received in various formats including emails and text messages (SMS)
Oral communication	<ul style="list-style-type: none"> Explain information in culturally appropriate language and terms for community audience

Skill	Description
	<ul style="list-style-type: none"> Use questioning and active listening techniques to obtain and provide information to veterinarians, health workers and others
Numeracy	<ul style="list-style-type: none"> Estimate the number of community animals and changes over time Calculate medication doses from instructions on labels for routine animal treatments and/or veterinarian prescribed medications
Navigate the world of work	<ul style="list-style-type: none"> Recognise the need to incorporate and respect the cultural views of different communities Understand the nature and purpose of own role and associated responsibilities relating to safety and animal welfare within the community context
Getting the work done	<ul style="list-style-type: none"> Plan and prioritise work tasks, adapting to contingencies and changing circumstances to achieve outcomes, targets and timelines Use basic technologies to report and record information related to work role

Assessment Requirements for ACMINF304 Promote environmental health and safety for companion animals in remote communities

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has:

- interacted with and/or handled at least two companion animals safely and humanely, modelling personal hygiene and use of personal protective equipment (PPE)
- identified and provided information to Indigenous community members about improving the health and condition of individual dogs or other companion animals on at least two occasions
- provided basic advice on hygiene and infection control to at least two individual community members including one child and one adult
- consulted with community members and other stakeholders about appropriate strategies to use in delivering a community awareness activity
- delivered at least one basic education or community awareness activity to two individuals or one group on the importance of healthy animals to the health of people.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- cultural significance and attitude to companion animals (particularly dogs), in Indigenous communities, including:
 - dreaming and creation knowledge, sacred/totem animals, 'skin names'
 - physical security and spiritual protection
 - companionship and friendship bonds
 - assist with hunting
 - differences between dingoes and domestic dogs
- importance of understanding Indigenous community context:
 - impact of cultural beliefs on uptake of animal care services

- cultural events that can impact on timing of services
- limited access to veterinary services
- adjustment to loss of traditional lifestyle and legacy animal control programs
- geographic isolation and climatic conditions
- common areas and areas of difference between remote community attitudes, prevalent social attitudes and personal attitudes
- issues associated with unmanaged animals, including:
 - overpopulation including reproductive cycles and capacity/potential of dogs and cats
 - dealing with unwanted animals and strays, including overview of humane euthanasia techniques accessible to the community
 - common disease that transfer between humans and animals
 - injuries which left untreated, lead to subsequent suffering
 - nuisance, including noise from barking, fighting and mating
 - litter and faeces
 - threat of attack
 - dangers during car chasing
 - conservation issues related to introduced animal species
 - stress and human mental health impacts, including grief over sick or dying animals, frustration resulting from animals causing regular nuisance and shame associated with visibly unhealthy dogs residing in the community
- common companion animal infections and diseases, including:
 - skin sores and infections caused by parasites including mange/scabies and ringworm
 - fleas and ticks
 - heartworm, hook worm, round worm
- treatments for common animal infections and diseases, including:
 - state/territory restrictions on the administration of specific medications
 - use of antibiotics and microbial resistance
- how animals spread disease, including:
 - excrement, including faeces and urine
 - mixing with other animals
 - spreading rubbish
 - close contact with humans
- prevention techniques, including:
 - personal hygiene and hand washing
 - avoiding close contact with animals
 - providing fresh water
 - cleaning animal bedding and blankets
 - disposing of excrement
 - feeding regularly to build health and minimise scavenging
- working safely with companion animals in remote communities, including:

- recognising basic emotions and body language for aggressive, 'cheeky', scared and friendly animals
- types of dog behaviour including protective/territorial behaviours and pack behaviour
- humane handling techniques for capture, moving, holding and transporting
- diversion tactics and techniques for defusing and preventing problems and bites
- methods used to control and manage animal populations in communities, including:
 - animal registration and micro chipping
 - surgical desexing and chemical desexing/injectable contraceptives
 - euthanasia
- ways to communicate information in remote communities, including:
 - using culturally appropriate language and communication methods
 - inclusive activities and role of elders
- overview of relevant local and state regulations relating to the keeping and management of companion animals
- range of service providers involved in animal health and management, including:
 - veterinarians and veterinary workers
 - Aboriginal Land Councils
 - Non-Government Organisations
 - local councils
 - state, territory and Australian government departments.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a remote community environment or an environment that accurately represents remote community conditions
- resources, equipment and materials:
 - companion animals
 - PPE
- relationships:
 - community members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

In addition, assessment strategies and tools must be checked for cultural appropriateness for the specific community before assessment is undertaken.

AMPMGT806 Commercialise research and technology product or idea

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to undertake the fundamentals of product/idea commercialisation. It describes the process from conception to launch to full production.

Competency requires developing the skills and knowledge to successfully research, analyse, cost and develop a business opportunity for a product/idea. This unit also describes the skills required to manage commercialisation and evaluate product success.

This unit applies to leaders or managers responsible for developing a commercialisation strategy for an innovative product or technique, which has been developed through research.

Leaders undertaking product commercialisation must investigate and negotiate the legal and partnership implications of commercialisation, undertake market testing and develop commercialisation strategies.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate commercialisation options	1.1 Describe product/innovation to be commercialised 1.2 Analyse innovation alignment against organisation's innovation objectives 1.3 Research, analyse and test market opportunities 1.4 Investigate optimum business structure and funding options
2. Develop commercialisation proposal	2.1 Determine resourcing requirements 2.2 Develop marketing plan 2.3 Determine supply chain strategy 2.4 Determine strategies for managing Intellectual Property (IP) 2.5 Determine environmental sustainability of proposed product/idea 2.6 Develop risk mitigation plan 2.7 Negotiate proposal modifications with key stakeholders
3. Prepare for implementation	3.1 Develop project implementation plan 3.2 Determine monitoring process 3.3 Establish and develop required business processes 3.4 Assemble project team

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AMPMGT806 Commercialise research and technology product or idea

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must undertake the fundamentals of product/idea commercialisation from conception to launch to full production.

Candidates must demonstrate ability to:

- analyse market trends
- budget, including forecasting, capacity and asset analysis, setting targets and compliance mechanisms
- negotiate licensing IP (in and out), contractual supply chain arrangement and partnerships
- use communication skills to:
 - maintain appropriate relationships with colleagues and others
 - value and be open to the opinions of others
 - work as part of a team
 - model collaborative communication and learning
 - use active listening and negotiation skills
 - present and negotiate proposals
 - seek opinions and feedback from a range of stakeholders
 - develop plain English texts dealing with complex ideas and concepts
- generate and evaluate ideas by analysing information and concepts at an abstract level
- provide strategic leadership during change and negotiation processes
- use problem-solving, initiative and enterprise skills to:
 - direct, motivate, consult and delegate appropriately
 - collect, analyse and interpret data using a range of methods
 - shape strategic thinking and inspire others with a shared vision
 - work with teams with diverse emotional intelligence and cognitive ability
- provide leadership in workplace health and safety practice, ethical standards and legislative requirements

- review own personal and professional competence against personal development objectives
- support and use participative arrangements aimed at establishing trust
- to develop, negotiate and structure an agreed commercialisation strategy
- to apply leadership style and approach appropriate to individuals involved, outcomes being sought and contextual factors

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- relevant legislation
- business strategies and legal requirements underpinning trademarks, copyright and patents
- legal requirements underpinning partnership arrangements, contracts and taxation
- commercial environmental analysis techniques, including Strengths, Weaknesses, Opportunities, Threats (SWOT)/TOWS
- market testing strategies and techniques
- strategies for analysing and assessing the upstream and downstream implications of an innovation
- risk assessment strategies and techniques
- team selection, management and support strategies
- environmental sustainability principles

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:

- access to an actual workplace or simulated environment
- assessment over a sufficient timeframe to allow holistic assessment of the candidate's capacity to lead the development of a commercialisation strategy
- resources normally used in the workplace, including organisational policies and procedures, and relevant legislation
- access to stakeholders, potential partners and clients

Assessors must satisfy current standards for RTOs.

AUMGTW001 Perform basic welding, thermal cutting, heating and gouging

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTW3001 Conduct basic welding, thermal cutting, heating and gouging operations
Release 2	Updated for clarity and policy adherence

Application

This unit describes the performance outcomes required to perform basic welding, thermal cutting, heating and gouging operations.

It applies to those in the automotive manufacturing industry and involves the application of skills and knowledge at a production worker level.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.

Unit Sector

Technical - Welding, Grinding, Machining and Soldering

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Identify job requirements and welding information from work instructions 1.2 Identify, select and inspect welding equipment and resources 1.3 Identify work health and safety (WHS) requirements according to workplace procedures 1.4 Obtain materials and components of the required size, type and quantity, and inspect for compliance 1.5 Plan work areas and welding according to workplace

Elements	Performance Criteria
	procedures
2. Perform basic welding	2.1 Set up weld equipment to suit job requirements and workplace procedures 2.2 Select welding methods to suit job requirements 2.3 Carry out welding according to workplace standards and without causing damage to property, vehicle or components
3. Perform basic thermal cutting, heating and gouging work	3.1 Set up basic thermal cutting, heating and gouging equipment to suit job requirements and workplace procedures 3.2 Select basic thermal cutting, heating and gouging equipment to suit job requirements 3.3 Carry out basic thermal cutting, heating and gouging according to workplace standards and without causing damage to property, vehicle or components
4. Complete work processes	4.1 Check completed work against job specifications 4.2 Collect and store materials that can be reused 4.3 Remove waste and scrap materials according to workplace procedures 4.4 Clean work area and maintain equipment 4.5 Identify, tag and report faulty equipment 4.6 Complete workplace documentation in line with requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skills	Description
Reading skills to:	<ul style="list-style-type: none"> interpret sketches and drawings interpret safety data sheets (SDS) identify WHS signs and symbols in the workplace interpret workplace procedures; job instructions; and welding, cutting and heating plan.
Writing skills to:	<ul style="list-style-type: none"> complete basic welding, heating and cutting job cards complete faulty equipment tags.
Numeracy skills to:	<ul style="list-style-type: none"> identify and set gas working pressures set machine settings measure materials to specifications.

Digital literacy skills to:	<ul style="list-style-type: none"> use basic electronic welding and thermal cutting equipment.
Planning and organising skills to:	<ul style="list-style-type: none"> plan and prepare equipment, work area and materials to job specifications.
Problem-solving skills to:	<ul style="list-style-type: none"> identify workplace hazards.

AUMGTW001 Perform basic welding, thermal cutting, heating and gouging

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTW3001 Conduct basic welding, thermal cutting, heating and gouging operations
Release 2	Updated for clarity and policy adherence

Performance Evidence

Before competency can be determined, individuals must have competently demonstrated basic welding, thermal cutting, heating and gouging operations; each on a minimum of three occasions.

Individuals must demonstrate they can:

- apply workplace requirements, procedures and workplace health and safety (WHS) practices in relation to:
 - weld production
 - work quality
- perform gas metal arc welding (GMAW) and manual metal arc welding (MMAW) processes
- perform oxy-acetylene welding processes
- perform thermal cutting, heating and gouging processes
- use relevant tools and equipment for the process
- check completed work against job specifications
- collect and store materials that can be reused
- clean work area and maintain equipment complete workplace documentation relating to basic welding, thermal cutting, heating and gouging operations.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

- work health and safety (WHS) requirements in relation to basic welding, thermal cutting, heating and gouging work tasks, including personal protective equipment (PPE)
- types of welding rods and their application

- MMAW techniques
- GMAW techniques
- thermal cutting, heating and gouging techniques
- welding quality standards
- oxy-acetylene welding techniques

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicles or components on which they have performed basic welding, thermal cutting, heating and gouging, e.g. production work sheets.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- vehicles or components that require basic welding, thermal cutting, heating and gouging operations
- WHS equipment, including PPE relating to basic welding, thermal cutting, heating and gouging
- workplace procedures, equipment and operating instructions relating to basic welding, thermal cutting, heating and gouging
- welding consumables and materials
- welding equipment and accompanying operating instructions, including:
 - gas metal arc welding (GMAW) equipment
 - manual metal arc welding (MMAW) equipment
 - oxy-acetylene plant and equipment
 - thermal cutting, heating and gouging equipment
- work sheets relating to basic welding, thermal cutting, heating and gouging operations.

Assessment Requirements for AUMGTW003 Perform manual metal arc welding

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMGTW3003 Perform manual metal arc welding operations

Performance Evidence

Before competency can be determined, individuals must have competently demonstrated manual metal arc welding operations on a minimum of three occasions.

Individuals must demonstrate they can:

- identify welding requirements from work sheets and work instructions
- prepare welding equipment and work area according to workplace procedures and work health and safety (WHS) requirements
- perform manual metal arc welding while controlling weld distortion, according to workplace procedures, applicable welding standards, and WHS requirements
- inspect welding using non-destructive testing procedures and identify and rectify faults
- clean welds and work area, and maintain and store welding equipment according to workplace procedures and WHS requirements
- complete manual metal arc welding work sheets.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- WHS requirements and workplace procedures relating to performing manual metal arc welding:
 - hazard identification and risk control methods
 - personal protective equipment (PPE)
- types of materials that can be welded using manual metal arc welding
- types of metal arc welding electrodes and their application
- basic welding symbols
- procedures for setting up and operating MMAW equipment
- material preparation techniques for manual metal arc welding
- methods for identifying and repairing weld defects
- manual metal arc welding distortion control techniques

- metal arc weld test procedures, including non-destructive testing
- welding standards applicable to manual metal arc welding.

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the manual metal arc welding operations that they have performed, e.g. production work sheets.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- work orders and job specifications
- applicable manual metal arc welding standards
- safe operating procedures and PPE relating to MMAW
- MMAW equipment
- consumables and materials for MMAW
- production work sheets for the welding job.

AVIY0026 Conduct aerial application operations using remote pilot aircraft systems

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the application of skills and knowledge required to conduct aerial application operations using remote pilot aircraft systems (RPAS) in compliance with the relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes conducting pre-flight operations, performing operational area evaluations, conducting an aerial survey, applying substances through aerial application, and conducting global navigation satellite system (GNSS) swath guidance equipment operations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed in small teams or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct pre-flight actions

- 1.1 Own fitness for flight and planned operations is self-assessed
- 1.2 Operational aircraft type is determined for suitability for type of aerial application operation
- 1.3 Aircraft and role equipment are checked and assessed for serviceability prior to commencing flight operations
- 1.4 Required applicable maintenance documentation is compiled and checked for accuracy and completeness
- 1.5 Role equipment calibration is checked and adjusted as required
- 1.6 Planned aerial application operations are assessed for potential or actual hazards
- 1.7 Fuel/power requirements are determined and established within aerial application management plans
- 1.8 Logistical considerations are addressed within scope of application management plan

2 Conduct planning and risk management

- 2.1 Suitability of current and forecast weather is determined
- 2.2 Application management plan is developed and used as the basis for aerial application operations
- 2.3 Potential and actual hazards and operational requirements are identified, risks to aerial application operations are assessed and appropriate risk controls are implemented in accordance with the application management plan
- 2.4 Treatment area map is correctly interpreted
- 2.5 Pilot decision on the safety of the proposed application, including refusing to undertake an application where the risks are considered to be too high, is made as required
- 2.6 Appropriate selection of application pattern and

direction of treatment is made taking into consideration safety, efficiency, hazards and terrain

2.7 Acceptable aircraft performance for aerial application operational conditions is confirmed through performance planning

2.8 Normal and abnormal operational communications and signals are confirmed

3 Perform operational area evaluation

3.1 Operational landing areas are assessed for condition, approach/landing direction, hazard identification and meteorological conditions

3.2 Issues relating to aircraft weight, performance, dimensions, load and meteorological conditions are identified and managed

3.3 Landing areas suitable for conducting aerial application operations are selected

3.4 Aircraft pre-landing/launch checks are performed in accordance with operational procedures

3.5 Appropriate landing and launch techniques are conducted during aerial application operations

3.6 Aerial application operations are performed in accordance with published regulations requirements

3.7 Appropriate aerial survey plans are developed for conducting safe aerial application operations

3.8 Operating area boundaries are established and environmentally sensitive areas are identified, including areas that are noise sensitive, biologically susceptible, populated and urban, and restricted or dangerous

3.9 Potential emergency or alternate landing areas are identified and/or established for contingency operations

3.10 Environmental hazard factors affecting aerial application operations are considered

3.11 Wind velocity and direction are assessed for effect on operations

3.12 Application management plans are amended or modified based on aerial survey assessment results as required

- 3.13** GNSS familiarity is applied to the appropriate level of operational requirement
 - 3.14** Sound judgement is applied during application treatment area pattern selection
 - 3.15** Aircraft is operated at maximum permissible weights for aerial application operations in accordance with manufacturer and regulatory requirements
 - 3.16** Aircraft launch weight is determined within requirements relevant to operating conditions
- 4 Operate within the vicinity of power lines**
 - 4.1** Power lines within and outside the treatment area during an aerial survey are identified
 - 4.2** Power line infrastructure cues are interpreted to aid wire run identification
 - 4.3** Wire heights are accurately assessed to support safe operations in vicinity of power lines, including safe flying parallel to wires
 - 4.4** Other hazards relevant to operations near power lines, such as pole stays, crop height, fences or machinery that may pose a risk, are identified and managed
 - 4.5** Safe command decision whether to fly over or under a wire is made
 - 4.6** Aerial application operations over wires, including adequate safety buffers for pull-up and let down and accurate cut-off and on-off application equipment, are conducted
 - 4.7** Aerial application operations under wires, including assessment of safe clearance distances, are conducted
 - 4.8** Application approaches towards power lines when passage beneath is unachievable are terminated safely
 - 4.9** Human factors that may affect operations near power lines, particularly distraction, short-term memory limitations and inattention (perceptual) blindness are applied during aerial application operations
- 5 Apply substances through aerial application**
 - 5.1** Substances are applied safely in accordance with the application management plan

- 5.2 Correct application height relevant to terrain, application type and meteorological conditions is established and maintained
- 5.3 Appropriate airspeed and flight profile are controlled on entry or re-entry to operational areas
- 5.4 Aerial application equipment is operated within scope of the application management plan
- 5.5 Hazard areas are manoeuvred around with adequate safety margins during application operations
- 5.6 Application flow rates, pressure and product quantities are monitored during application operations
- 5.7 Decisions to suspend or continue safe aerial application operations are made based on planned or actual operating conditions
- 5.8 Clean-up operations and hazard safety checks are conducted on completion of aerial application

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for AVIY0026 Conduct aerial application operations using remote pilot aircraft systems

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant aeronautical knowledge
- implementing work health and safety (WHS) procedures and relevant regulations
- assessing and checking aircraft and equipment for flight serviceability
- assessing identified environmental hazard factors
- assessing own fitness for flight and planned operations
- assessing relevant wind velocity and direction
- compiling applicable maintenance documentation
- conducting pre-flight operational planning
- determining aircraft launch weights relevant to operational conditions
- determining landing area suitability for normal and contingency operations
- determining relevant aircraft type suitability
- developing, amending and modifying application management plans
- establishing and implementing safe operating condition margins during aerial application operations
- establishing operational energy and power requirements for normal and contingency operations
- identifying aerial application hazards
- identifying logistical considerations for application management plan, including:
 - ground support requirements
 - personal supplies and life support
- identifying potential contingency and alternate landing areas
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerial application human factors, including:

- heat stress and dehydration
- in-flight distractions
- maintaining situational awareness
- mental and physical fatigue
- planning and risk management associate with aerial applications
- application area evaluation, including:
 - meteorological conditions
 - regulations and requirements with aerial applications
 - environmental hazard factors
- aerial application role equipment
- aircraft configuration and flight characteristics for the aircraft being flown during maximum weight flight and operations
- aircraft flight manual, performance, engine and systems
- applicable regulations that relate to conducting a safe aerial application operation
- aviation risk and fatigue risk management processes
- factors to be considered when determining payload weights for aerial application
- global navigation satellite system (GNSS) equipment and operator procedures
- low-level flight safety hazards and risks
- meteorological factors affecting aircraft flight performance during low-level flight
- relevant aerodynamics and aircraft performance
- terrain following techniques.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0027 Operate multi-rotor remote pilot aircraft systems

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to operate multi-rotor remote pilot aircraft systems (RPAS) in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes operating and managing multi-rotor RPAS during normal flight and during abnormal and emergency procedures.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to equipment and system operations of flight or ground operations personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew RPAS environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Operate and manage multi-rotor RPAS during normal flight

- 1.1 RPAS, sub-systems and devices are operated to achieve operational requirements
- 1.2 RPAS, sub-systems and devices are monitored using a systematic scan technique
- 1.3 RPAS and flight environment information is analysed to identify actual and potential threats or errors
- 1.4 Aircraft and systems inspection is completed prior to flight
- 1.5 Launch, landing and emergency hover zones are established
- 1.6 RPAS automation is utilised to manage control station workload
- 1.7 Checklist procedures are implemented during normal RPAS operations

2 Manage multi-rotor RPAS during abnormal and emergency procedures

- 2.1 Abnormal or emergency situations are identified, diagnosed and communicated
- 2.2 RPAS control is maintained at all times
- 2.3 RPAS abnormal or emergency checklist procedures are implemented to maintain safety of flight
- 2.4 Course of action is decided, implemented, evaluated and revised to achieve safest outcomes
- 2.5 Location and operation of emergency systems applicable to RPAS are explained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Unit Mapping Information

No equivalent unit

Assessment Requirements for AVIY0027 Operate multi-rotor remote pilot aircraft systems

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting remote pilot aircraft systems (RPAS) displays
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- operating electronic communications equipment to required protocol
- performing systematic scan technique for monitoring multi-rotor RPAS, sub-systems (equipment) and devices
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- undertaking fault finding in multi-rotor RPAS
- using automated systems to manage workload
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aeronautical decision-making processes relevant to multi-rotor RPAS operations
- effective communication
- risk identification, analysis and control in relation to multi-rotor RPAS operations

- flight environment information, including:
 - head-up display (HUD) suitable for flight
 - multi-rotor RPAS control systems suitable for flight indications, including height, speed, direction and location
- RPAS as applicable to rating/endorsement requirements in relation to multi-rotor RPAS type if relevant
- risk identification, analysis and control in relation to multi-rotor RPAS operations
- autorotation principles
- gyroscopic principles
- RPAS components, including location and function of electrical parts
- aerodynamics – multirotor lift and drag, hovering and forward flight
- aerodynamics – abnormal operations
- principles of operation – flight controls
- RPAS as applicable to rating/endorsement requirements in relation to multi-rotor RPAS type if relevant
- battery/fuel/power system, including:
 - likely faults that may affect battery/fuel/power system
 - emergency operating procedures for battery/fuel/power system
 - operation of battery/fuel/power selector panel or display full battery/fuel capacity and fuel grade
- electrical system, including:
 - likely faults that may affect electrical system
- detection and avoidance systems, including:
 - surveillance and collision avoidance functions of detection and avoidance systems
 - system limitations
 - ‘return to home’ failsafe function
 - control link corruption the loss of command and control link procedures in accordance with the RPAS operator’s documented practices and procedures
 - safe forced landing and collision avoidance
- automated systems, including:
 - limitations of automated systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace

conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0052 Control remote pilot aircraft systems on the ground

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to control remote pilot aircraft systems (RPAS) on the ground in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes starting an engine, taxiing and/or positioning the RPAS, and performing an RPAS shutdown.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to RPAS operational duties of flight crew and ground personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew RPAS environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Start engine

1.1 Pre-start and after-start checks are completed in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH)

1.2 RPAS is positioned to ensure safety when starting engine

1.3 Manufacturer limitations and report deviations are complied with as required

1.4 Engine/s are started in accordance with AFM/POH

1.5 Emergencies are managed in accordance with AFM/POH and regulatory requirements

2 Taxi and/or position RPAS

2.1 Automatic terminal information service (ATIS) reports and taxi clearance are obtained as required

2.2 RPAS is taxied at a safe speed and in accordance with prevailing location, traffic, surface and weather conditions

2.3 Instrument checks are performed clear of conflicting traffic and other hazards to confirm serviceability

2.4 Handling and braking on ground is in accordance with AFM/POH

2.5 Airfield markings/lights/signals/indicators are interpreted and complied with as required

2.6 Lookout and right-of-way rules are complied with as required

2.7 Adverse effects on other aircraft, facilities and personnel are avoided

2.8 Inspection of taxi path is carried out when surface conditions are obscured as required

2.9 RPAS (and launch system) is positioned in accordance with launch point requirements and applicable safety precautions

3 Perform RPAS shutdown

3.1 Pre-and post-shutdown checks are completed in accordance with AFM/POH

3.2 Engine is shut down in accordance with AFM/POH

- 3.3** Required documentation is completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY3073 Control remote pilot aircraft systems on the ground.

Assessment Requirements for AVIY0052 Control remote pilot aircraft systems on the ground

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- complying with regulatory requirements and local air traffic control (ATC) instructions
- controlling and managing remote pilot aircraft systems (RPAS) taxi emergencies
- controlling RPAS on the ground in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH)
- identifying and correctly using relevant equipment
- implementing contingency plans
