- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and communicating operational information
- interpreting and following operational instructions and prioritising work
- manoeuvring RPAS on the ground without incident
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing various on-ground functions simultaneously as required
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- using instruments to monitor aircraft taxi performance

- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- aeronautical decision-making processes
- airfield markings, indicators and lights
- automatic terminal information service (ATIS) reports
- effective communication
- error management, including error types, causes and consequences
- fatigue risk management
- human performance and its limitations, including the senses, memory and situational awareness
- in a Defence context, relevant Defence Orders and Instructions
- on-ground control procedures
- relevant aircraft/equipment type characteristics
- relevant sections of AFM/POH
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- stress, workload and time pressure management
- taxi clearance information
- weather information.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and

operation manuals

- relevant materials, tools, equipment and PPE currently used in industry.

AVIZ0005 Apply situational awareness in remote pilot aircraft systems operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills, knowledge and attitudes required to apply situational awareness in remote pilot aircraft systems (RPAS) operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA).

It includes maintaining situational awareness, assessing situations and making decisions, setting priorities and managing tasks, and working with others in managing situational awareness.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) of aviation personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew RPAS environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit at time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Z – Situational Awareness

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain situational awareness

1.1 Continuous monitoring of all critical factors relevant to the safe progress of an RPAS flight is undertaken

1.2 Effective visual scan is applied, during RPAS operations

1.3 Trends towards unsafe situations are recognised and appropriate corrective action employed in accordance with operational workplace procedures and regulatory requirements

1.4 Breakdown in situational awareness is identified and rectified promptly

2 Assess situations and make decisions

2.1 Operational problems are identified

2.2 Operational risks are assessed and reported in accordance with regulatory requirements

2.3 Potential solutions are identified and control measures decided and implemented

2.4 Determined plan of action is communicated and tasks allocated to others as appropriate

2.5 Plan of action is implemented and monitored to achieve safe outcomes

3 Set priorities and manage tasks

3.1 Priorities and workload are organised to ensure completion of all tasks relevant to flight safety

3.2 Safe and effective operation of the RPAS is prioritised ahead of competing tasks

3.3 Critical events and tasks are anticipated and managed to ensure completion within available time constraints

3.4 Technology is used to reduce workload and to improve ability to perform mental and manipulative activities safely

3.5 Signs and symptoms of fatigue are identified and

appropriate actions taken to manage fatigue of self or in others

4 Work with others in managing situational awareness

- 4.1** Collaboration with others is undertaken to ensure safe completion of flight
- 4.2** Effective communications and interpersonal relationships are established and maintained with all stakeholders to ensure safe flight outcome
- 4.3** Crew members are encouraged to participate in and contribute to safe flight outcome
- 4.4** Appropriate action is taken in conjunction with others to cooperatively correct any identified unsafe situations that may develop during an RPAS flight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIZ3052A Apply situational awareness in remote pilot aircraft systems (RPAS) operations.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIZ0005 Apply situational awareness in remote pilot aircraft systems operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying aviation safety management system policies and procedures for remote pilot aircraft systems (RPAS) flight
- applying precautions and required action to minimise, control or eliminate identified hazards
- managing tasks, including:
 - visual line of sight
 - visual meteorological conditions
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using required equipment
- implementing aviation risk management processes in RPAS contexts
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining all necessary communications
- maintaining compliance with WHS and regulatory requirements
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems that may occur promptly in accordance with regulatory requirements and workplace procedures
- responding appropriately to cultural differences in the workplace
- selecting and using appropriate instruments, displays, communications equipment and aids

- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- sourcing and interpreting aviation weather forecast products appropriate to flight planning and navigation procedures
- transferring RPAS control between crew members as required
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- factors relevant to the safe progress of a flight, including:
 - air traffic in the vicinity of a RPAS
 - becoming lost
 - changes in wind and weather conditions at destination
 - changes in wind and weather conditions en route
 - engine or equipment malfunction or failure
 - errors in navigation
 - exceeding nominated operating parameters and tolerances for RPAS
 - instrument or display malfunction or failure
 - running out of fuel/energy
 - security threat at RPAS control station
- aeronautical communication procedures and protocols
- aeronautical decision-making processes
- air navigation techniques applicable to RPAS operations
- air traffic rules and procedures
- effective communication
- error management, including error types, causes and consequences
- fatigue risk management
- human performance and its limitations, including the senses, memory and situational awareness
- in a Defence context, relevant Defence Orders and Instructions
- operational hazards that may be identified when managing situational awareness and ways of controlling those hazards and associated risks
- principles of flight relevant to RPAS operations
- problems that may occur when managing situational awareness and action that can be taken to overcome these problems
- procedures for maintaining situational awareness
- procedures for transferring RPAS control between crew members
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders

related to RPAS operations

- relevant WHS/OHS and environmental procedures and regulations
- risk identification, analysis and control
- RPAS energy source usage rates
- stress, workload and time pressure management
- use of navigational computers and equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

BSBAUD515 Evaluate and review compliance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to evaluate an organisation's management system and assess its ability to fulfil its obligations and responsibilities under applicable compliance requirements.

The unit applies to individuals who are responsible for evaluating and reviewing the operation and effectiveness of an organisation's management system to ensure compliance with the relevant standards.

Application of this unit must be consistent with the relevant sections of standards and legislative requirements.

Unit Sector

Technical Skills – Audit and Compliance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop evaluation plan	1.1 Obtain and interpret information on organisation's policies, procedures and compliance requirements 1.2 Develop evaluation methodology 1.3 Prepare evaluation plan, detailing established evaluation criteria and data to be collected 1.4 Confirm approval of plan from relevant stakeholders
2. Prepare evaluation data	2.1 Source required evaluation data according to evaluation plan 2.2 Organise, interpret and review collected data against established evaluation criteria 2.3 Discuss issues interpreting data and address in consultation with

ELEMENT	PERFORMANCE CRITERIA
	relevant stakeholders 2.4 Arrange evaluation data for analysis
3. Analyse data	3.1 Analyse evaluation data in accordance with evaluation plan 3.2 Discuss outcomes and findings of the analysis with relevant stakeholders
4. Determine evaluation findings and outcomes	4.1 Develop and discuss preliminary findings and any identified issues with relevant stakeholders 4.2 Source additional data required to clarify aspects of findings, and issues, where required 4.3 Prepare recommendations for actions to improve identified issues
5. Distribute outcomes and recommendations of evaluation	5.1 Prepare draft report of outcomes, findings and recommendations of the compliance evaluation 5.2 Distribute draft report to relevant stakeholders 5.3 Edit report based on the feedback obtained 5.4 Proofread report in preparation for publishing 5.5 Confirm final report is signed off by authorised personnel 5.6 Distribute report to relevant stakeholders according to evaluation plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies, interprets, analyses and reviews complex texts from various sources to determine legislative requirements, organisational operations, specific requirements and responsibilities Checks documents for accuracy of content, grammar, spelling and punctuation
Writing	<ul style="list-style-type: none"> Collates and compiles results of research and analysis using technical language and organisational formats Develops materials to convey information, requirements and recommendations using language and structure appropriate to the audience Composes and edits texts, selecting appropriate vocabulary and structure for audience and purpose

Skill	Description
Self-management	<ul style="list-style-type: none">Follows policies, procedures and legislative requirements
Planning and organising	<ul style="list-style-type: none">Plans, develops, implements and monitors processes for evaluating and reviewing compliance performance
Technology	<ul style="list-style-type: none">Uses digital tools and systems to locate, organise and share information effectively

Unit Mapping Information

Supersedes and is equivalent to BSBCOM502 Evaluate and review compliance.

Supersedes but is not equivalent to BSBCOM602 Develop and create compliance requirements.

Assessment Requirements for BSBAUD515 Evaluate and review compliance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop outcomes, findings and recommendations regarding an organisation's compliance requirements, on at least two different occasions.

In the course of the above, the candidate must:

- access and interpret information about required compliance standards
- develop an evaluation plan including:
 - preparation of an evaluation methodology
 - preparation and submission of a final report for approval and implementation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- compliance evaluation methods
- sources of data relevant to compliance requirements
- format and content of an evaluation plan and a report
- features of relevant compliance management systems
- organisational policies and procedures
- standards and legislative requirements relevant to compliance.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- standards, laws, regulations, industry and organisational codes and standards relevant to compliance requirements
- data required for the demonstration of the performance evidence
- resources for conducting digital searches.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCMM411 Make presentations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit covers the skills and knowledge required to prepare, deliver and review presentations for target audiences.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Verbal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare presentation	1.1 Plan presentation approach and intended outcomes 1.2 Identify target audience, location and resources requirements 1.3 Select presentation strategies, format and delivery methods according to presentation requirements 1.4 Select techniques to evaluate presentation effectiveness
2. Deliver presentation	2.1 Summarise key concepts and ideas and present to target audience 2.2 Provide opportunity for audience to seek clarification on presentation information 2.3 Confirm target audience understand key concepts and ideas, and

ELEMENT	PERFORMANCE CRITERIA
	that identified presentation objectives have been achieved
3. Review presentation	3.1 Evaluate effectiveness of the presentation 3.2 Seek and discuss feedback and any reactions to the presentation from participants and relevant stakeholders 3.3 Make changes to presentation based on feedback received

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Reviews and analyses documents to identify information relevant to a specific presentation
Writing	<ul style="list-style-type: none"> Develops material to convey ideas and information to target audience in an engaging way
Oral Communication	<ul style="list-style-type: none"> Presents information using words and non-verbal features appropriate to the audience and context Uses listening and questioning techniques to gather information required to develop and modify presentations
Problem solving	<ul style="list-style-type: none"> Interprets audience reactions and changes words and non-verbal features accordingly
Planning and organising	<ul style="list-style-type: none"> Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals
Initiative and enterprise	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols to encourage interaction and to present information Recognises the need to alter personal communication style in response to the needs and expectations of others
Self-management	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes
Technology	<ul style="list-style-type: none"> Uses the main features and functions of digital tools to complete work tasks

Unit Mapping Information

Supersedes and is equivalent to BSBCMM401 Make a presentation.

Assessment Requirements for BSBCMM411 Make presentations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and deliver at least two different presentations.

In the course of the above, the candidate must:

- use aids and materials to support the presentation
- select and implement methods to review the effectiveness of presentation and document suggested improvements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- information collection methods that support review and feedback of presentations
- organisational and legislative obligations and requirements relevant to presentations
- structure of presentations according to intended outcomes
- principles of effective communication including:
 - persuasive communication techniques
 - verbal and non-verbal communication
- presentation methods
- different aids, materials and techniques that can be used for presentations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, materials and business software packages for making a presentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCMM511 Communicate with influence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to present and negotiate persuasively, lead and participate in meetings and make presentations to customers, clients and other key stakeholders.

The unit applies to individuals who are managers and leaders required to identify, analyse, synthesise and act on information from a range of sources, and who deal with unpredictable problems as part of their job role. They use initiative and judgement to organise the work of self and others and plan, evaluate and co-ordinate the work of teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Verbal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify communication requirements	1.1 Confirm authority to present material on behalf of an organisation or work area, according to organisational policies and procedures 1.2 Identify information that may be subject to confidentiality and manage appropriately 1.3 Identify information needs of audience and prepare a position in line with purpose of communication
2. Negotiate to achieve agreed outcome	2.1 Identify objectives of negotiation, and needs and requirements of stakeholders

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify and document potential issues and problems 2.3 Prepare positions and supporting arguments according to objectives 2.4 Communicate with stakeholders, and establish areas of common ground and potential compromise 2.5 Confirm and document outcomes of negotiation
3. Participate in and lead meetings	3.1 Identify the need for meeting and schedule according to stakeholder availability 3.2 Prepare meeting materials and distribute to stakeholders 3.3 Conduct meeting and contribute to discussions 3.4 Seek consensus on meeting objectives 3.5 Summarise outcomes of meetings and distribute to stakeholders
4. Make presentations	4.1 Identify forums to present according to organisational objectives 4.2 Determine tone, structure, style of communication and presentation according to target audience 4.3 Prepare presentation according to desired outcomes 4.4 Provide an opportunity for audience to ask questions 4.5 Follow up with stakeholders following presentation 4.6 Evaluate presentation and identify areas for improvement

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none"> Prepares documentation that summarises key findings and outcomes Prepares presentations appropriate to audience needs, context and purpose
Oral Communication	<ul style="list-style-type: none"> Uses active listening and questioning to seek information and confirm understanding
Teamwork	<ul style="list-style-type: none"> Selects and uses relevant conventions and protocols when communicating with team members
Self-management	<ul style="list-style-type: none"> Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a range of communication practices to achieve goals
Problem solving	<ul style="list-style-type: none"> Uses analytical processes to evaluate options, and aid in problem-solving and decision-making

	<ul style="list-style-type: none"> Plays a lead role in situations requiring negotiation and collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others
Initiative and enterprise	<ul style="list-style-type: none"> Adapts personal communication style to build trust and positive working relationships and to show respect for the opinions and values of others Understands the implications of legal and ethical responsibilities to maintain confidentiality Selects relevant vocabulary adjusting language and presentation features to maintain effectiveness of interaction
Planning and organising	<ul style="list-style-type: none"> Plans, organises and implements tasks required to achieve required outcomes

Unit Mapping Information

Supersedes and is equivalent to BSBLDR513 Communicate with influence.

Supersedes but is not equivalent to:

- BSBCMM402 Implement effective communication strategies
- BSBGOV404 Communicate with community stakeholders.

Assessment Requirements for BSBCMM511 Communicate with influence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- participate in and lead at least two meetings
- prepare and make a presentation to two different groups.

In the course of the above, the candidate must:

- communicate with key stakeholders to position the business to best effect including:
 - listening actively
 - understanding information needs of others
 - adapting communication to suit the audience
 - identifying suitable platform for presentations
 - presenting reliable information
 - designing the presentation to meet the needs of the audience
 - answering questions clearly and concisely.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- industry, media and government organisations, events and communication channels that are relevant to the organisation
- cross-cultural communication
- techniques for negotiation, mediation, conflict resolution and incident de-escalation
- structured and inclusive meeting procedures
- organisational policies and procedures relevant to:
 - presenting and negotiating
 - leading and participating in meetings
 - making presentations

- communication tone, structure, style and impact on others
- relevant organisational policies and procedures on confidentiality of information.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources relevant to performance evidence
- organisation information, including organisational structure, goals, objectives and plans.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCRT201 Develop and apply thinking and problem solving skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to solve problems, develop questions and respond to feedback on questions on workplace issues.

The unit applies to individuals, often working under supervision or guidance, who may be required to think critically, ask essential questions and consider answers to those questions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Investigate problem solving	1.1 Identify key features and role of problem solving in the workplace 1.2 Identify different types of questions and styles of questioning 1.3 Identify basic problem solving techniques 1.4 Collaborate with relevant stakeholders and share ideas on different types of questions, styles of questioning and applicable problem solving techniques 1.5 Identify challenges in the types of questions, styles of questioning and basic problem solving techniques
2. Prepare and ask	2.1 Select a basic workplace issue within job role to be resolved

ELEMENT	PERFORMANCE CRITERIA
questions	2.2 Identify ways to structure questions on identified issue in consultation with relevant stakeholders 2.3 Develop questions to consolidate knowledge of selected issue 2.4 Ask prepared questions to relevant personnel
3. Solve basic workplace issues	3.1 Document responses to questions asked according to organisational requirements 3.2 Clarify responses given with further questions and comments 3.3 Apply basic problem solving techniques and document responses to workplace issue
4. Seek feedback on questions and problem solving	4.1 Consult with relevant stakeholders and identify improvements for problem solving process 4.2 Seek feedback on questions, questioning style and problem solving technique from relevant personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Uses listening and questioning techniques to obtain specific information and confirm understanding
Teamwork	<ul style="list-style-type: none"> Uses accepted practices to discuss ideas with others
Planning and organising	<ul style="list-style-type: none"> Develops a plan for the use of information gathered

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to BSBCRT101 Apply critical thinking techniques.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=11ef6853-ceed-4ba7-9d87-4da407e23c10>

Assessment Requirements for BSBCRT201 Develop and apply thinking and problem solving skills

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare, deliver, document and review a set of questions to consolidate understanding of a workplace issue within own job role on at least two occasions
- apply basic problem solving techniques to a workplace issue on at least four occasions.

In course of doing the above, the candidate must:

- use a range of different types of questions and styles of questioning
- identify potential issues that may arise in problem solving processes
- develop questions designed to consolidate information of selected issue
- ask questions to relevant stakeholders, using further questions and comments to clarify responses provided
- seek feedback on questions developed.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features and processes of critical thinking and problem solving
- basic problem solving techniques
- different types of questions and their relevance to different situations
- effective questioning techniques
- typical blockers to problem solving processes
- role of critical thinking for businesses, the community and at an individual level.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to simulated challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBCRT413 Collaborate in creative processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to engage in a creative process and reflect on own role in the process.

The unit applies to individuals who are working in creative industries, as well as those involved in broader business and community activities where creative team effort is highly valued.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Enter into a collaborative creative process	1.1 Identify individual and group responsibilities according to task requirements 1.2 Identify legislative and organisational frameworks applicable to task 1.3 Identify expectations of collaborative process and task outcome with team 1.4 Confirm channels to communicate with team
2. Engage in a collaborative creative process	2.1 Develop action plan for collaboration 2.2 Establish solutions according to task requirements in collaboration with team

ELEMENT	PERFORMANCE CRITERIA
	2.3 Provide constructive feedback on the ideas of others 2.4 Support team members to meet task requirements
3. Reflect on own role in the collaborative creative process	3.1 Reflect on personal level of participation, relationships with others and personal behaviour in the collaborative process 3.2 Seek feedback from others on personal contribution and participation 3.3 Identify methods and opportunities to improve collaborative skills

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Reflects on processes and outcomes and identifies some key principles that may be relevant in future situations
Oral communication	<ul style="list-style-type: none"> Presents ideas clearly using language and features suitable to diverse audiences Uses listening and questioning techniques to elicit the views and opinions of others and to confirm understanding Actively identifies the requirements of important communication exchanges, selecting appropriate channel, format, tone and content to suit purpose and audience
Writing	<ul style="list-style-type: none"> Notes comments, suggestions and ideas for own use
Teamwork	<ul style="list-style-type: none"> Looks for ways of establishing connections and building genuine understanding with a diverse range of people Responds to and uses diverse perspectives to enrich the creative process Contributes to creating a climate where people feel comfortable to suggest, explore, adapt and adopt new ideas as a regular part of work life
Problem-solving	<ul style="list-style-type: none"> Uses problem-solving skills to evaluate and challenge ideas and move towards solutions
Self-management	<ul style="list-style-type: none"> Reflects on personal values, behaviours and assumptions and considers how these might be perceived by others

Assessment Requirements for BSBCRT413 Collaborate in creative processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- collaborate in a creative process on at least two occasions.

In the course of the above, the candidate must:

- contribute to a collaborative creative process in a way that generates, expands and develops ideas into a well-conceived solution
- develop an action plan with team according to task requirements
- evaluate and seek feedback on own role in the collaborative process
- identify and act on ways to enhance own ability to contribute effectively to a collaborative creative process.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legal framework that applies to the collaboration of creative process
- methodologies for creative idea generation and refinement
- features of trustworthy and ethical behaviour in the context of creative endeavours
- various roles individuals may play in a collaborative creative process and how these roles contribute to the overall effort
- strategies to develop teamwork in a collaborative creative process
- components of team action plan including:
 - task requirements
 - timelines
 - delegation of responsibilities
- techniques for maximising the potential for creativity in a team.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a team of people in a collaborative creative process.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBESB402 Establish legal and risk management requirements of new business ventures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish legal and risk management requirements for at least one business or new business venture, and implement procedures for meeting them
- create at least one contract with a supplier of goods or services to business or new business venture
- identify, assess and treat at least three different risks specific to business or new business venture and prioritise risks with highest probability of occurrence and greatest negative impact.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory requirements relating to operation of new business ventures, including:
 - consumer legislation
 - environmental requirements and responsibilities
 - registration and licensing
 - industry codes of practice and standards
 - work health and safety (WHS) requirements and responsibilities
 - insurance products and requirements, including adequate coverage
- workplace procedures for:
 - negotiating, creating and terminating contractual arrangements, including seeking legal advice
 - investigating and securing procurement rights relating to products and/or services
 - identifying options for leasing or owning business premises
- legal rights and obligations of alternative ownership structures

- key features of workplace record-keeping processes and procedures that:
 - meet minimum legal and taxation requirements
 - maintain records in a secure and accessible manner
- key components of compliance procedures:
 - following taxation and industrial relations principles and requirements
 - updating and maintaining legal documents
 - investigating areas of non-compliance
 - monitoring provision of products and/or services
 - taking corrective action where necessary
- key steps in risk management process, including procedures for developing and implementing business risk treatment plan.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business technology, including internet access
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBESB407 Manage finances for new business ventures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement a financial strategy for at least one business or new business venture according to business plan and goals.

In the course of the above, the candidate must:

- adhere to legal requirements
- produce financial projections, including cash flow estimates
- develop a plan to negotiate and manage business assets and financial capital
- define strategies for debt collection and contingencies for debtors
- manage cash flow
- define key indicators for financial performance
- communicate with required people
- seek specialist services, where required
- monitor the financial performance of the business and make changes to strategy as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory financial requirements that apply to new business venture described in performance evidence
- key purposes of financial reports
- components of financial budgets or projections, including cash flow estimates
- workplace procedures for:
 - recording and communicating financial procedures to required personnel

- distributing financial budgets and projections
- using digital technologies to monitor and report on financial performance targets and analyse data
- assessing and changing financial plan
- forms, channels and modes of communication used in relation to managing business finances
- key features of business and industry benchmarking used to evaluate financial ratios
- key features of financial decision-making relevant to the business, including:
 - strategies that enable adequate financial provision for taxation
- components of client credit policies, including contingencies for debtors in default
- key features of significant financial indicators
- key features of balance sheet preparation and interpretation
- key features of debt collection procedures and strategies
- key features of profit and loss statement preparation and interpretation
- key features of stock records and stock control relevant to the business.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business equipment and resources, including business technology
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBFIA302 Process payroll

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan and perform payroll calculations in accordance with all legislative and organisational requirements, and predetermined timelines
- refer enquiries outside area of responsibility to an appropriate authority.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation, standards and codes of practice that may affect payroll operations
- outline relevant organisational policies and procedures
- list the different types of payroll systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer with relevant software
- payroll data (samples or actual)
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIN302 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling systems for debtors and creditors, preparing and maintaining a general ledger and trial balance. It also includes activities associated with monitoring cash control for accounting purposes.

The unit applies to individuals employed in a range of work environments with responsibility for simple accounting functions within an organisation. They may work as individuals providing administrative support within an enterprise or may be other members of staff with delegated responsibilities relating to maintenance of general financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Financial Literacy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare journals required for posting to general ledger	1.1 Identify transactions required to be included in journal entries 1.2 Identify general ledger accounts affected according to organisational policies, procedures and accounting standards 1.3 Prepare and document the journal entries according to organisational policies, procedures and accounting standards 1.4 Assess follow-up steps for journal entries
2. Post journal entries and reconcile	2.1 Post journal entries into general ledger system according to organisational policies, procedures and accounting standards

ELEMENT	PERFORMANCE CRITERIA
discrepancies	2.2 Reconcile accounts payable and accounts receivable subsidiary ledger systems with general ledger 2.3 Rectify any discrepancies and escalate, where required if outside scope of individual authority 2.4 Prepare adjusted journal entries and closing entries for general ledger
3. Maintain general ledger	3.1 Prepare closing and post-closing trial balance from general ledger system of the organisation 3.2 Prepare trial balance 3.3 Check general ledger for accuracy of information and despatch to relevant stakeholders, where required 3.4 Check trial balance meets accounting equation requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> • Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals • Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material • Arranges and compares numerical information
Reading	<ul style="list-style-type: none"> • Recognises and interprets numerical and textual information to determine job requirements and complete required activities
Writing	<ul style="list-style-type: none"> • Uses factual and suitable financial language to refer issues and inconsistencies in data
Teamwork	<ul style="list-style-type: none"> • Recognises strengths and expertise of others and seeks their assistance as required
Planning and organising	<ul style="list-style-type: none"> • Identifies and monitors adherence to applicable industry standards, legislative and organisational requirements in undertaking own work
Self-management	<ul style="list-style-type: none"> • Selects appropriate practices and protocols when handling confidential information • Recognises and addresses problems in the context of own work and seeks advice from others, as necessary
Technology	<ul style="list-style-type: none"> • Uses digital technologies to access, record, store, organise and

Skill	Description
	compile data as required

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBFIA301 Maintain financial records
- BSBFIA304 Maintain a general ledger
- BSBINT306 Apply knowledge of international finance and insurance to complete work requirements.

Assessment Requirements for BSBFIN302 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- record and process daily transactions for five different days, and identify and respond to discrepancies and errors, according to accounting principles.

In the course of the above, the candidate must:

- enter, transfer and record financial data.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key provisions of relevant legislation, codes of practice and national standards that may affect both:
 - financial record keeping
 - aspects of financial operations
- key components of organisational accounting systems and procedures
- procedures for checking for errors or discrepancies
- organisational policies and procedures relating to maintaining financial records
- types of financial entries including credits and debits
- tax records required to be kept by businesses
- principles of double entry bookkeeping and accrual accounting
- methods of presenting financial data
- processes for rectifying or referring discrepancies or errors in documentation or transactions to designated persons according to organisational and legislative requirements
- accounting software used in the maintenance of financial records.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- accounting software
- examples of source documents relating to financial record keeping including source journals and daily transactions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBFIN401 Report on financial activity

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes skills and knowledge required to prepare financial reports in line with statutory reporting requirements. This includes compiling and analysing financial data.

The unit applies to individuals employed in a range of work environments who are responsible for preparing financial reports. They may be individuals providing administrative support within an organisation, or they might have responsibility for these tasks in relation to their own workgroup or role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Financial Literacy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Compile and analyse financial data	1.1 Prepare a register of assets from fixed asset transactions according to accounting, legislative and organisational requirements 1.2 Calculate depreciation according to legislative and organisational requirements 1.3 Make, record and disclose asset and liability valuations in compliance with accounting standards 1.4 Refer discrepancies, unusual features or queries to appropriate authority where they cannot be resolved 1.5 Identify and record effects of taxation

ELEMENT	PERFORMANCE CRITERIA
2. Report general journal entries for balance day adjustments	2.1 Record all general ledger accounts and prepare a trial balance 2.2 Adjust expense accounts and revenue accounts for prepayments and accruals 2.3 Make adjustments in general ledger system to close any discrepancies for balance day adjustments according to organisational policies, procedures and accounting requirements 2.4 Review data for errors and compliance with statutory requirements and organisational procedures, and amend as required
3. Prepare end of period financial reports	3.1 Prepare revenue statement for reporting periods according to organisational requirements 3.2 Prepare a balance sheet to reflect financial position of business at end of reporting period 3.3 Prepare and post revenue and expense account to final general ledger accounts to reflect gross and net profits for reporting period 3.4 Correct or refer errors for resolution according to statutory and ethical requirements and organisational procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Establishes criteria and categories for financial management purposes and monitors activities on a regular basis Uses a wide range of mathematical calculations to interpret and arrange numerical information in order to comply with requirements
Reading	<ul style="list-style-type: none"> Compares and analyses information from a range of sources varying in complexity to determine and complete financial requirements Checks documents for errors or discrepancies
Writing	<ul style="list-style-type: none"> Records data using relevant format, structure and vocabulary
Planning and organising	<ul style="list-style-type: none"> Applies legislation, industry standards and organisational policies and procedures in the conduct of own work Uses formal and logical processes to plan and complete tasks, achieving timelines and organisational requirements

Skill	Description
Problem solving	<ul style="list-style-type: none">• Addresses problems in the context of own work and seeks advice from others, as necessary• Uses analytical skills to identify discrepancies
Technology	<ul style="list-style-type: none">• Uses digital technology to access, filter, compile, integrate and logically present complex information from multiple sources

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBFIA401 Prepare financial reports
- BSBFIA412 Report on financial activity
- BSBFIA501 Report on finances related to international business
- BSBINT408 Prepare business advice on the taxes and duties for international trade transactions.

Assessment Requirements for BSBFIN401 Report on financial activity

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare a financial report on at least two occasions.

In the course of the above, the candidate must:

- produce a detailed asset register and depreciation schedule
- record entries for balance day adjustments
- use conversion and consolidation procedures including moving averages, standardised variables, trend analysis and unit costs
- apply double-entry principles and accrual accounting.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- double-entry and accrual principles
- provisions of relevant legislation, regulations, standards and codes of practice relevant to financial operations, taxable transactions and reporting requirements
- components of organisational accounting systems
- organisational policies, procedures and accounting standards relating to preparation of financial reports
- organisational financial data, including:
 - budget variances
 - budgets and forecasts
 - cash flow and profit reports
 - balance sheets
 - financial year reports
 - operating statements

- expenditure and receipts
- profit and loss statements
- types of assets including property, plant and equipment
- comparative financial performance
- financial discrepancies including:
 - absence of auditable trail
 - expenditure report mismatches
 - incorrect payments and unreconciled cash flows
- techniques used for financial forecasting and analysis
- options, methods and practices for deductions, benefits and depreciations
- ethical requirements associated with preparing financial reports for corporate entities, including conflict of interest, confidentiality, and disclosure requirements
- industry-standard methods and formats used to present financial data.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- accounting software
- financial reporting legislation, regulations, standards and codes of practice
- samples of financial data, reports and documents
- workplace reference materials including procedural manuals and company policies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBFIN501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the budget and financial plan of an organisation for one reporting period.

In the course of the above, the candidate must:

- communicate with relevant people to clarify budget and financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record-keeping requirements for Australian Taxation Office (ATO) and for auditing purposes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- basic accounting principles
- types of budgets and financial plans
- legislation and current ATO requirements, including the Goods and Services Tax (GST)
- key requirements for financial record keeping and auditing
- principles for managing work teams
- principles and techniques involved in managing:
 - budgeting
 - cash flows
 - electronic spreadsheets

- Goods and Services Tax
- ledgers and financial statements
- profit and loss statements
- evaluation of budget and financial plans.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace policies and procedures
- workplace budgets and financial plans.

Assessment Requirements for BSBGOV502 Recruit and coordinate committee members

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- communicate effectively with a diverse range of people on issues relevant to committee membership and roles
- recruit, select and induct people for committee roles according to policies, procedures and legislative requirements
- coordinate people, processes and information for committee recruitment and induction purposes
- contribute to analysis and decision making on issues relevant to committee member recruitment.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list relevant legislation and organisational policies relating to the employment of committee members, who may be unpaid workers
- outline a range of decision making techniques
- explain committee and management roles and responsibilities
- describe the organisational history, structure, core functions, code of conduct, constitution, policies and procedures, and reporting processes.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical committee recruitment and coordination activities and include access to:

- actual or simulated committee recruitment and coordination
- examples of committee role descriptions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBGOV507 Manage board or committee and organisational conflict

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage conflict, both within the board or committee and with operational personnel in the organisation.

It applies to individuals who are on committees or boards of governance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Governance

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify existing and potential conflict	1.1 Determine if conflict exists and its possible causes 1.2 Identify potential situations of future conflict 1.3 Develop strategies to prevent conflict
2. Consider the conflict situation	2.1 Consider if the conflict relates to operational or strategic activity 2.2 Acknowledge the issue(s) and the roles of the parties involved, noting that board and committee members' roles are strategic and employees' roles are operational

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ascertain how the roles of the parties involved have impacted upon the conflict 2.4 Develop resolution strategies in accordance with legislation, the organisation's constitution and in consultation with conflicting parties 2.5 Seek professional advice where needed, maintaining discretion and confidentiality 2.6 Ensure the wellbeing of individuals and the organisation is considered when developing resolution strategies
3. Use strategies to resolve conflict	3.1 Promptly, appropriately and impartially implement resolution strategies that are in line with legislation and the roles of the parties involved 3.2 Diffuse emotional situations by focussing on the issue(s) rather than the individual(s) concerned 3.3 Follow organisational grievance policy if conflict has escalated to grievance level 3.4 Allow sufficient time for the conflict to be resolved 3.5 Monitor and evaluate the process used to resolve the conflict

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.1	<ul style="list-style-type: none"> Interprets various texts to guide activities and decisions
Writing	1.3, 2.4	<ul style="list-style-type: none"> Collates and compiles material using clear and detailed language to convey specific information, requirements and recommendations
Oral Communication	2.2-2.4, 3.2	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges using suitable tone, language and strategies to confirm, clarify or repair understanding Make constructive suggestions when required Elicits views and opinions of others by active listening and questioning

Navigate the world of work	1.1-1.3, 2.1, 2.2, 2.4, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> • Takes personal responsibility for adherence to legal/regulatory responsibilities relevant to own work context, and draws attention to any issues that may affect the organisation as a whole • Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	2.2-2.4, 2.6, 3.2, 3.3,	<ul style="list-style-type: none"> • Follows accepted communication practices and protocols, adjusting personal communication style in response to values, beliefs and cultural expectations of others
Get the work done	1.3, 2.1, 2.4, 2.5, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> • Develops plans to manage relatively complex tasks with an awareness of how they may contribute to longer term operational strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Recognises and addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek expertise of others

Assessment Requirements for BSBGOV507 Manage board or committee and organisational conflict

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- communicate, negotiate and work cooperatively regarding conflict with:
 - other board or committee members
 - management and staff of the organisation
 - key stakeholders
- develop strategies to prevent conflict both within the board or committee and between the board or committee and operational personnel
- develop resolution strategies with conflicting parties
- diffuse emotional conflict situations by focusing on the issues at hand
- monitor and evaluate conflict resolution processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss potential situations of future conflict
- explain the roles of the parties involved (in terms of board or committee member roles as opposed to operational personnel roles)
- discuss options for conflict resolution and situations that would warrant the use of the following methods:
 - formal discussions with third party presence
 - informal discussions
 - following organisational policies
 - professional advice
 - grievance procedures

- describe conflict monitoring and evaluation processes
- describe legislative and organisational constitutional requirements in relation to conflict.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical committee or board of governance activities and include access to:

- examples of conflict resolution.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBHRM412 Support employee and industrial relations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to communicate and implement employee relations (ER) and industrial relations (IR) policies and procedures to effectively represent organisations and employers.

The unit applies to individuals who work in support positions, assisting others in dealing with ER and IR conflicts and issues.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Human Resources

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Support preparation of Employee and Industrial Relations processes	1.1 Source and share applicable legislation, agreements, policies and procedures with relevant stakeholders 1.2 Identify sources of specialist information 1.3 Support implementation of organisational agreements, policies and procedures according to relevant organisation, enterprise and statutory requirements 1.4 Communicate the organisation's ER and IR procedures to relevant stakeholders according to relevant organisation, enterprise and statutory requirements
2. Support industrial relations	2.1 Identify relevant terms and conditions of employment, employee entitlements, awards, agreements, and individual

ELEMENT	PERFORMANCE CRITERIA
	<p>work contracts</p> <p>2.2 Provide support to relevant stakeholders in simple IR disputes</p> <p>2.3 Provide support to relevant stakeholders in negotiation of employee awards, agreements, and workplace conditions</p> <p>2.4 Record and maintain relevant documents</p>
3. Support employee relations	<p>3.1 Identify relevant grievance and conflict resolution processes</p> <p>3.2 Provide support to relevant stakeholders in resolution of simple ER conflicts</p> <p>3.3 Record and maintain relevant documents</p>
4. Contribute to continuous improvement	<p>4.1 Assist required stakeholders to identify issues in ER and IR processes</p> <p>4.2 Contribute to development of continuous improvement activities</p> <p>4.3 Record and maintain documentation relating to continuous improvement</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Comprehends and analyses complex texts from a variety of sources and records to determine relevance to requirements or review implementation of strategies
Writing	<ul style="list-style-type: none"> Prepares required documents using language and structure appropriate to purpose and audience
Oral Communication	<ul style="list-style-type: none"> Presents information and seeks advice using language and non-verbal features appropriate to audience and context Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Self-management	<ul style="list-style-type: none"> Follows policies, procedures and legislative requirements and identifies implications of new legislation or regulation for self and others Understands responsibilities and limits of own role Plans and organises tasks required to achieve required outcomes, seeking advice from others, as required
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts Collaborates and cooperates with others to achieve required outcomes

	<ul style="list-style-type: none">• Uses effective strategies to moderate conflict and negotiate solutions
Problem solving	<ul style="list-style-type: none">• Makes a range of critical and non-critical decisions in relatively complex situations

Unit Mapping Information

Supersedes and is equivalent to BSBWRK411 Support employee and industrial relations procedures.

Assessment Requirements for BSBHRM412 Support employee and industrial relations

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and support ER (employee relations) and IR (industrial relations) processes for an organisation or work area, on at least two occasions.

In the course of the above, the candidate must:

- locate information required to identify relevant legislation, agreements, policies and procedures
- use effective communication techniques to support the resolution of simple workplace grievances and conflicts
- provide accurate written and oral advice about industrial matters
- use strategies to monitor and gather feedback on the implementation of industrial relations policies and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key aspects of ER and IR and application in the workplace
- relevant industrial relations policies and procedures
- key features of grievance resolution policy and procedures
- relevant legislation, codes of practice and national standards
- relevant state/territory and federal industrial relations systems
- key sources of expert advice relevant to performance evidence.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes
- relevant workplace policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBHRM415 Coordinate recruitment and onboarding

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to develop and implement strategies to source candidates and to assess their suitability for available positions.

The unit applies to individuals working in a human resources job role, as well as those for whom recruitment and onboarding are part of their broader duties.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Human Resources

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for recruitment	1.1 Establish recruitment requirements and authority to fill position 1.2 Consult with relevant stakeholders about job descriptions, selection criteria and workforce strategy 1.3 Contribute to development of job descriptions that accurately reflect the role requirements according to relevant policies, procedures and legislative requirements 1.4 Implement strategies to assist in sourcing candidates according to organisational policies and procedures
2. Screen and interview potential candidates	2.1 Conduct preliminary screening with candidates according to legislative requirements 2.2 Organise and conduct interviews and selection activities according to organisational policies and procedures

ELEMENT	PERFORMANCE CRITERIA
	2.3 Carry out skills assessment relevant to the position 2.4 Obtain relevant additional information from candidates
3. Assess and select candidates	3.1 Consult with relevant stakeholders to conduct assessment and selection process according to organisational policy and legislative requirements 3.2 Assess candidates against specified selection criteria and referee reports 3.3 Prepare recommendations for relevant stakeholders and document according to organisational procedures
4. Manage candidate outcomes	4.1 Inform all candidates of selection decisions 4.2 Provide feedback to candidates according to organisational policies and procedures 4.3 Secure preferred candidate's agreement 4.4 Coordinate necessary documentation according to organisational procedures, observing confidentiality and privacy requirements
5. Onboard successful candidate	5.1 Advise relevant stakeholders of new appointment, including start date 5.2 Make necessary administrative arrangements for pay and employee record keeping 5.3 Coordinate successful candidate's onboarding according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets a range of textual information from a variety of sources and analyses and reviews for compliance and suitability
Writing	<ul style="list-style-type: none"> Prepares concise notes to help synthesise information sourced during research Produces reports and other business communication for a range of contexts and audiences using relevant language and structure
Oral Communication	<ul style="list-style-type: none"> Asks questions and listens carefully to gather, interpret or evaluate information Participates in verbal exchanges using clear language and appropriate tone to provide relevant information and feedback

Self-management	<ul style="list-style-type: none"> • Applies workplace protocols, legislation or regulations relevant to own responsibilities • Selects and uses appropriate conventions and protocols when communicating with candidates or clients • Takes responsibility for planning and implementing tasks for efficient and effective outcomes
Teamwork	<ul style="list-style-type: none"> • Participates in conversations relevant to role responding, explaining, negotiating and persuading, as required
Problem solving	<ul style="list-style-type: none"> • Uses systematic, analytical processes to evaluate information and make decisions

Unit Mapping Information

Supersedes and is equivalent to BSBHRM405 Support the recruitment, selection and induction of staff.

Supersedes but is not equivalent to:

- BSBEMS401 Develop and implement business development strategies to expand client base
- BSBEMS402 Develop and implement strategies to source and assess candidates
- BSBEMS403 Develop and provide employment management services to candidates
- BSBEMS404 Manage the recruitment process for client organisations
- BSBSMB417 Recruit staff.

Assessment Requirements for BSBHRM415 Coordinate recruitment and onboarding

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- coordinate the recruitment and onboarding of two candidates.

In the course of the above, the candidate must:

- demonstrate the process for screening and interviewing a candidate
- communicate effectively with clients and successful and unsuccessful candidates
- review job descriptions and use them to support sourcing, selecting and appointing suitable staff
- consult with relevant stakeholders to gain approvals
- develop selection criteria and interview questions in consultation with relevant stakeholders
- obtain referees' reports
- provide a written report or demonstration of an assessment of a candidate's skills and selection recommendation
- secure preferred candidate's agreement and provide an employment contract.
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key provisions of relevant legislation, regulations, standards and codes of practice that affect employment agencies and organisation's recruiting processes
- common interview techniques and recruitment sourcing methods
- common methods of attracting candidates
- methods to assess and report on candidates according to organisational procedures
- strategies to provide feedback to candidates according to organisational procedures.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace policies and procedures relevant to performance evidence
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and onboarding.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBHRM416 Process payroll

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes skills and knowledge required to process payroll from provided data using manual and computerised payroll systems.

The unit applies to individuals employed in a range of work environments who are responsible for payroll functions within an organisation. They may work as individuals providing administrative support within an enterprise or may be other members of staff who have been delegated payroll responsibilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Human Resources

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Record payroll data	1.1 Check payroll data and clarify discrepancies with relevant stakeholder 1.2 Enter employee pay period details in payroll system according to organisational requirements 1.3 Calculate individual employee's payment according to employee source data
2. Prepare payroll	2.1 Prepare payroll according to organisational policy and procedures and designated timelines 2.2 Reconcile total wages for pay period, check and correct irregularities or refer to relevant stakeholder for resolution

ELEMENT	PERFORMANCE CRITERIA
	2.3 Make arrangements for payment according to organisational and individual requirements 2.4 Obtain authorisation of payroll and individual pay advice according to organisational requirements 2.5 Produce, check and store payroll records according to organisational policy and security procedures 2.6 Follow security procedures for processing payroll and for maintaining payroll records
3. Handle payroll enquiries	3.1 Respond to payroll enquiries according to organisational and legislative requirements 3.2 Provide payroll information according to organisational and legislative requirements 3.3 Ensure all enquiries outside area of responsibility and knowledge are referred to designated persons for resolution 3.4 Complete additional information or follow-up action within designated timelines according to organisational policy and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets a range of textual information to determine activities required
Writing	<ul style="list-style-type: none"> Accurately records textual information and maintains personal and banking details using format, language and structure in context
Oral Communication	<ul style="list-style-type: none"> Explains payment clearly using terminology and tone appropriate to audience Uses questioning and listening skills in verbal exchanges to clarify information
Numeracy	<ul style="list-style-type: none"> Uses a limited range of mathematical calculations to calculate and reconcile amounts and arrange and compare numerical information
Self-management	<ul style="list-style-type: none"> Takes responsibility for own workload and monitors adherence to specified goals and timelines
Teamwork	<ul style="list-style-type: none"> Selects the appropriate mode of communication for a specific purpose Collaborates with others to achieve predetermined goals

Problem solving	<ul style="list-style-type: none">• Recognises and takes responsibility for resolving problems relevant to own role• Takes responsibility for routine low-impact decisions within familiar situations
Technology	<ul style="list-style-type: none">• Uses digital technologies to access, record, store, organise and compile data, as required

Unit Mapping Information

Supersedes and is equivalent to BSBFIA302 Process payroll.

Assessment Requirements for BSBHRM416 Process payroll

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- process payroll for an organisation or work area on at least three occasions.

In the course of the above, the candidate must:

- respond to routine payroll enquiries
- refer enquiries outside area of responsibility to an appropriate authority.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key provisions of relevant legislation, standards and codes of practice that may affect payroll operations
- relevant organisational policies and procedures
- key features of different types of payroll systems
- processes associated with Single Touch Payroll (STP).

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources relevant to performance evidence
- payroll data (samples or actual).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBHRM525 Manage recruitment and onboarding

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to manage all aspects of recruitment and onboarding processes according to organisational policies and procedures.

The unit applies to individuals who take responsibility for managing aspects of recruiting, selecting new staff and orientating those staff in their new positions. The individual may be directly involved in the recruitment processes themselves or coordinating the process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Human Resources

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop recruitment and onboarding policies and procedures	1.1 Identify existing recruitment and onboarding policies and procedures 1.2 Assess options for technology to improve efficiency and effectiveness of recruitment process 1.3 Update existing policies and procedures according to organisational requirements 1.4 Obtain support for policies and procedures from relevant stakeholders 1.5 Create forms and documents supporting policies and procedures and make adjustments, where required 1.6 Communicate policies and procedures to relevant staff and

ELEMENT	PERFORMANCE CRITERIA
	provide training, where required
2. Manage recruitment process	<p>2.1 Determine future human resource requirements in collaboration with relevant stakeholders</p> <p>2.2 Ensure current position descriptors for vacancies are used by relevant stakeholders involved in recruitment and onboarding processes</p> <p>2.3 Ensure advertising of vacant positions complies with legislation and organisational policies and procedures</p> <p>2.4 Consult and use specialists, where required</p> <p>2.5 Ensure selection procedures are according to legislation and organisational policies and procedures</p> <p>2.6 Ensure processes for advising applicants of selection outcome are followed</p> <p>2.7 Ensure job offers and contracts of employment are prepared and provided promptly, and new appointments are provided with relevant advice</p>
3. Manage staff onboarding	<p>3.1 Provide access to training and support to relevant stakeholders</p> <p>3.2 Ensure onboarding processes are followed across the organisation</p> <p>3.3 Oversee management of probationary employees and provide feedback until employment is confirmed or terminated</p> <p>3.4 Collect feedback from participants and relevant stakeholders on onboarding process according to its objectives</p> <p>3.5 Update onboarding policies and procedures according to feedback</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Critically evaluates and applies content from a range of complex texts to determine legislative and business requirements
Writing	<ul style="list-style-type: none"> Demonstrates clear writing skills by selecting appropriate conventions and by expressing precise meaning relevant to context and audience
Oral Communication	<ul style="list-style-type: none"> Draws on a repertoire of open questioning and active listening when seeking feedback from others Uses appropriate terminology and non-verbal features to present

	information and clarify understanding
Numeracy	<ul style="list-style-type: none"> Analyses numerical information to determine employees' remuneration packages Makes basic calculations to ensure work output is delivered in a timely manner
Initiative and enterprise	<ul style="list-style-type: none"> Develops or updates organisational policies to meet organisational objectives Considers own role in terms of its contribution to broader goals of work environment Analyses outcomes of decisions to identify improvement opportunities Seeks expert advice and skills training, where required
Teamwork	<ul style="list-style-type: none"> Considers whether and how often others should be involved, using consultative or collaborative processes as an integral part of the decision-making process
Planning and organising	<ul style="list-style-type: none"> Plans and implements tasks required to deliver timely outcomes, negotiating some key aspects with others Monitors implementation of plans and adjusts as necessary

Unit Mapping Information

Supersedes and is equivalent to BSBHRM506 Manage recruitment selection and induction processes.

Assessment Requirements for BSBHRM525 Manage recruitment and onboarding

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the recruitment and onboarding process for two different individuals.

In the course of the above, the candidate must:

- update organisational policies and procedures for recruitment and onboarding
- identify the need for recruitment
- prepare and oversee appropriate documentation required for recruitment
- select and advise job applicants appropriately
- manage the onboarding process
- comply with relevant legislation and organisational requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features of recruitment, selection and onboarding policies and procedures
- common recruitment and selection methods
- relevant legislation, regulations, standards and codes of practice that may affect recruitment and onboarding
- key features of psychometric and skills testing programs for recruitment
- key components of contracts of employment.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources relevant to performance evidence
- relevant organisational policies and procedures
- relevant legislation, regulations and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINN501 Establish systems that support innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conceptualise and establish new systems that support and encourage innovation in the workplace.

It applies to individuals including managers, senior operational personnel and/or internal/external specialists who are responsible for the development of new systems in small and large organisations in any community or industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Creativity and Innovation – Innovation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Research context for new system development	1.1 Explore and analyse the impact of systems in the overall context of innovation 1.2 Explore and gain clarity around system objectives, particularly in relation to innovation 1.3 Analyse current organisational systems to identify gaps or barriers to innovation 1.4 Research and analyse current and emerging information about

ELEMENT	PERFORMANCE CRITERIA
	<p>systems in other organisations and contexts</p> <p>1.5 Evaluate the resources and other commitment required to foster innovation</p> <p>1.6 Identify key stakeholders who can play a role in conceptualising or supporting new system ideas</p>
2 Generate system concepts and options	<p>2.1 Create system concepts that will foster innovation using individual and group techniques</p> <p>2.2 Evaluate and discuss a range of ideas with relevant stakeholders</p> <p>2.3 Clearly articulate the ways in which innovation is better supported by system ideas and options</p> <p>2.4 Clearly articulate how the system itself is innovative</p> <p>2.5 Expose ideas and options to ongoing testing, exploration and challenge</p> <p>2.6 Select and refine system ideas that meet the workplace requirements and which are both feasible and innovative</p>
3 Develop a plan for the system	<p>3.1 Determine the need for specialised assistance and integrate into system planning</p> <p>3.2 Analyse the potential impact of the new system on people, resources and other organisational practices</p> <p>3.3 Consult with all stakeholders who will be involved with, or affected by, the new system</p> <p>3.4 Develop an operational plan for the system, with budget, timelines and responsibilities</p> <p>3.5 Develop a communication strategy to support the introduction of the new system</p> <p>3.6 Evaluate the coaching and training needs of those who will use the system and plan a learning and development strategy</p>
4 Trial the system	<p>4.1 Present and consult on system proposals with relevant stakeholders</p> <p>4.2 Analyse and integrate feedback into the system development process</p> <p>4.3 Determine appropriate context and parameters for the trial process</p> <p>4.4 Initiate the trial, taking account of all required consultative, coaching and technical issues</p> <p>4.5 Monitor and review the trial in relation to its goals for fostering</p>

ELEMENT	PERFORMANCE CRITERIA
	innovation 4.6 Open the improvement process to ongoing collaborative input and challenge 4.7 Adjust system to reflect evaluation feedback

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4	<ul style="list-style-type: none"> Researches, analyses and evaluates textual information, from a wide range of sources, to identify information relevant to systems that support innovation
Writing	2.3, 2.4, 2.5, 3.3, 3.4, 3.5, 3.6, 4.1, 4.2	<ul style="list-style-type: none"> Develops complex plans and strategies using language and format appropriate to the audience and purpose
Oral Communication	2.1, 2.2, 2.3, 2.4, 3.3, 4.1, 4.6	<ul style="list-style-type: none"> Presents ideas and concepts to a range of audiences varying vocabulary and non-verbal features to suit the audience Uses active listening and questioning to discuss and clarify information and to confirm understanding
Numeracy	3.4	<ul style="list-style-type: none"> Interprets, analyses and presents numeric or financial information in complex documents
Navigate the world of work	1.1-1.4	<ul style="list-style-type: none"> Takes responsibility for researching and evaluating systems to achieve organisational outcomes in innovation according to role requirements
Interact with others	2.1, 2.2, 2.5, 4.1, 4.4, 4.6	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with stakeholders from diverse backgrounds Uses inclusive and collaborative techniques to negotiate, influence and elicit the views and opinions of a wide range of stakeholders
Get the work done	1.1-1.6, 2.1, 2.6, 3.1, 3.2, 3.4-3.6, 4.2-4.7	<ul style="list-style-type: none"> Accepts responsibility for planning and implementing systems and strategies to achieve organisational goals, negotiating key aspects with others Develops new and innovative ideas through exploration, analysis and critical thinking

		<ul style="list-style-type: none"> • Uses digital tools or systems to access, organise, integrate and share information
--	--	--

Assessment Requirements for BSBINN501 Establish systems that support innovation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of ability to:

- design a new system for the organisation that clearly supports innovation, is innovative and is based on:
 - analysis of the organisation's objectives, current systems, resources and barriers in relation to innovation
 - individual and group techniques with stakeholders to generate, test and evaluate several concepts and options for the new system
- consult with and analyse and integrate feedback from relevant stakeholders to develop a plan for the new system that addresses:
 - the need for external assistance
 - the impact of the new system on people, resources and other organisational practices
 - budget, timelines, responsibilities
 - a communication strategy
 - a learning and development strategy
- trial the new system including taking account of all consultative, coaching and technical issues and review it in relation to its goals for fostering innovation
- open the improvement process to ongoing collaborative input and challenge
- adjust system to reflect evaluation feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how the new system supports innovation in the organisation

- explain the concepts and theories of change management including ways of introducing change in different organisational contexts and change management communication strategies
- explain the concepts and theories of innovation and how these link to innovation in practice
- explain techniques for generating, testing and evaluating concepts and options for new systems
- analyse the technical context in which the system is being developed
- outline the typical ways in which systems may present barriers to innovation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents and
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others
- current industry technology used in the development of systems.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINS201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to receive, process, and store workplace information and maintain information systems. It also includes the maintenance of records management systems.

The unit applies to individuals who perform a variety of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information	1.1 Confirm task requirements 1.2 Collect physical and digital information items 1.3 Allocate time and date of receipt to relevant information items 1.4 Apply organisational policies and procedures relating to security and confidentiality in handling information
2. Process workplace information	2.1 Enter metadata applying to information items into relevant system according to organisational policies and procedures 2.2 Collate and distribute information according to task requirements

ELEMENT	PERFORMANCE CRITERIA
3. Manage information systems	<p>3.1 Maintain information and relevant classification system according to organisational policies and procedures</p> <p>3.2 Identify and dispose of inactive unpublished information items or deaccession published information items according to organisational policies and procedures</p> <p>3.3 Create new files of unpublished information materials according to organisational policies and procedures</p> <p>3.4 Update registration, accessioning, classification and index systems according to organisational policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Recognises and interprets textual information to complete tasks according to organisational policies and procedures
Writing	<ul style="list-style-type: none"> Records simple and routine content using an established format to organise information
Oral Communication	<ul style="list-style-type: none"> Uses listening and questioning skills to clarify and adhere to requirements
Numeracy	<ul style="list-style-type: none"> Comprehends basic mathematical measurements relating to times and number sequences
Self-management	<ul style="list-style-type: none"> Follows clearly defined instructions and monitors own progress to achieve timelines
Technology	<ul style="list-style-type: none"> Uses digital technologies regarding data entry and retrieval

Unit Mapping Information

Supersedes and is equivalent to BSBINM201 Process and maintain workplace information.

Assessment Requirements for BSBINS201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- receive and process three pieces of workplace information according to organisational policies and procedures.

In the course of the above, the candidate must:

- record and document information accurately
- store, classify and maintain information materials.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relating to collecting and processing workplace information
- key aspects of organisational information items management systems and security and confidentiality procedures.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- examples of workplace information systems.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS309 Maintain business records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to maintain the records of a business on an operational basis.

The unit applies to individuals who follow established guidelines and processes to carry out their work. They work under supervision or in consultation with senior staff or system users to support effective information management and governance practices across the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collate business records	1.1 Identify relevant information and records according to organisational policies and procedures 1.2 Organise records in accordance with organisational policies and procedures 1.3 Follow relevant security and access requirements in accordance with organisational policies and procedures
2. Update business or records system	2.1 Record and update information and record description of new records in business or records system according to organisational policies and procedures 2.2 Identify and dispose of relevant records of redundant business

ELEMENT	PERFORMANCE CRITERIA
	activities from current system according to organisational policies and procedures
3. Prepare and distribute reports from the business or records system	3.1 Interpret requests for reports 3.2 Prepare reports from business or records system according to request and organisational security and access procedures 3.3 Distribute reports to relevant stakeholders according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Gathers and interprets textual information from different sources to determine how information and records may be applied
Writing	<ul style="list-style-type: none"> Uses clear and industry related terminology to document, complete and update workplace information and records
Numeracy	<ul style="list-style-type: none"> Recognises and uses numerical systems associated with business or record systems
Self-management	<ul style="list-style-type: none"> Takes responsibility for planning and organising own workload to ensure work deadlines are met Takes responsibility for the outcomes of routine decisions related directly to own role
Technology	<ul style="list-style-type: none"> Uses main features and functions of digital tools to maintain business records

Unit Mapping Information

Supersedes and is equivalent to BSBRKG304 Maintain business records.

Supersedes but is not equivalent to BSBRKG305 Review recordkeeping functions.

Assessment Requirements for BSBINS309 Maintain business records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify, organise, update, and distribute four business records in compliance with organisational policies and procedures on at least three separate occasions.

In the course of the above, the candidate must:

- record and update information in an information management system
- describe records.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures regarding the maintenance and security of business records
- organisational requirements of business or records system reports
- key aspects and processes of records management and records management systems.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources relevant to business records.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to collect, organise, analyse and present information using available systems and sources. This includes identifying research requirements and sources of information, evaluating the quality and reliability of the information, and preparing and producing reports.

The unit applies to those who are required to analyse and apply their knowledge of the organisation to research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and confirm research strategy	1.1 Identify research objectives according to organisational requirements 1.2 Identify potential sources for research information relevant to organisation requirements 1.3 Assess reliability of potential sources 1.4 Identify and confirm information research strategy is relevant to the research objectives
2. Collect and store research information	2.1 Access and extract relevant information in a format suitable for analysis and distribution according to research strategy

ELEMENT	PERFORMANCE CRITERIA
	2.2 Store research information according to security requirements and organisational policies and procedures
3. Analyse and synthesise research information	3.1 Analyse stored information according to research strategy 3.2 Identify themes and draw conclusions according to research strategy 3.3 Demonstrate that assumptions and conclusions used in analysis are clear, justified, supported by evidence and consistent with research strategy
4. Present research information	4.1 Identify methods of reporting that align with the intended audience and relevant organisational requirements 4.2 Draft research report on findings 4.3 Facilitate review of draft report according to organisational policies and procedures 4.4 Distribute research report according to organisational policies and procedures 4.5 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses and evaluates textual information to develop information research strategies, integrate facts and ideas and meet organisational requirements
Writing	<ul style="list-style-type: none"> Gathers, evaluates and integrates information from a range of sources Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience
Oral Communication	<ul style="list-style-type: none"> Presents recommendations and issues using language appropriate to audience and according to organisational requirements
Self-management	<ul style="list-style-type: none"> Plans, organises and implements tasks to meet organisational requirements Takes responsibility for the outcomes of routine decisions related directly to own role
Problem solving	<ul style="list-style-type: none"> Identifies and solves foreseeable problems in familiar work contexts
Technology	<ul style="list-style-type: none"> Uses the main features and functions of digital technologies and tools to

Assessment Requirements for BSBINS401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- research, analyse and present research findings according to organisational requirements on at least two occasions.

In the course of the above, the candidate must:

- identify research requirements and objectives
- collect, organise and present research information
- maintain information securely
- prepare report on research findings, including:
 - justified assumptions and conclusions
 - efficient and reliable research methods.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relating to:
 - accessing information
 - storing information
 - security requirements
 - form and content of research report
- key aspects of the reliability and validity of research and analysis
- common research strategies
- key aspects of relevant information sources, including:
 - reliability
 - accuracy
 - authority

- audience
- relevance
- likelihood of bias.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace information systems, equipment and resources relevant to performance evidence
- workplace policies and procedures relevant to performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS402 Coordinate workplace information systems

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement and review workplace information systems. It involves identification, collection, initial analysis and use of information.

The applies to individuals whose work will normally be carried out within methods and procedures which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and review information needs	1.1 Identify information required by relevant stakeholders 1.2 Review information requirements to determine suitability, accessibility, currency and reliability of information according to organisational policies and procedures
2. Collect, analyse and report information	2.1 Collect information which is adequate and relevant to the requirements of relevant stakeholders 2.2 Confirm information is in a format suitable for analysis, interpretation and distribution 2.3 Analyse information, identify and report relevant trends according to the requirements for which it was collected

ELEMENT	PERFORMANCE CRITERIA
3. Implement information systems	<p>3.1 Implement information systems effectively to store, retrieve and regularly review information for decision making purposes</p> <p>3.2 Use technology available in the work area to manage information effectively</p> <p>3.3 Recommend improvements to information system to relevant stakeholders</p>
4. Support information system continuous improvement	<p>4.1 Collect data about information system future needs in consultation with relevant stakeholders</p> <p>4.2 Confirm identified information system future needs reflect the organisation's business plans</p> <p>4.3 Assist development of proposals for continuous improvement of information system</p> <p>4.4 Distribute information to relevant stakeholders on information system changes, where required</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Critically analyses documentation from a variety of sources and consolidates information
Writing	<ul style="list-style-type: none"> Develops information for a specific audience using clear and detailed language
Oral Communication	<ul style="list-style-type: none"> Uses active listening and questioning to convey and clarify information and to confirm understanding
Numeracy	<ul style="list-style-type: none"> Selects from and uses mathematical strategies to perform initial analysis on information
Planning and organising	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes
Teamwork	<ul style="list-style-type: none"> Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Problem solving	<ul style="list-style-type: none"> Contributes to continuous improvement of current work practices by applying basic principles of analytical thinking
Technology	<ul style="list-style-type: none"> Uses digital technologies and systems to access, enter, present and distribute information

Assessment Requirements for BSBINS402 Coordinate workplace information systems

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- distribute information to relevant stakeholders in response to three different workplace information needs
- implement and review a workplace information system on at least one occasion.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key aspects of workplace information systems including:
 - budgets and financial management systems
 - customer information software or records
 - databases
 - product and service information
 - project management software
 - record management systems
 - spreadsheets.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- a workplace information system
- organisational policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBINS410 Implement records systems for small business

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to research, develop and implement business or records systems for a small business.

The unit applies to individuals who use a range of organisational, analytical and communication techniques to carry out the responsibilities of their role and report directly to a supervisor or manager within the business or section of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Technical Skills – Information Services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine information management requirements	1.1 Consult with relevant stakeholders and identify and document core business functions, supporting activities, resources, and business and social contexts 1.2 Research and identify organisational functions and activities for which records must be kept 1.3 Analyse the organisation's functions and activities and identify required detail and format of records 1.4 Identify security and access requirements for records system content from analysis of organisation's activities 1.5 Analyse business documentation to determine organisational reporting and accountability requirements

ELEMENT	PERFORMANCE CRITERIA
2. Select required records system	<p>2.1 Identify metadata needed to describe, store, locate and retrieve records in a records system</p> <p>2.2 Specify technological, internal controls, maintenance, disposal and updating requirements of prospective records systems according to scale and nature of business operations</p> <p>2.3 Select records systems that meets required requirements according to scale, nature, and organisational cash flow requirements</p>
3. Develop procedures and implement records system	<p>3.1 Develop rules for incorporating individual records and metadata into records system</p> <p>3.2 Develop and document procedures for the use of the system</p> <p>3.3 Distribute information and instructions to relevant stakeholders in the use of the records system</p> <p>3.4 Monitor and assist with implementation of the records system</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Evaluates and interprets information from a range of relevant sources and identifies relevant and key information
Writing	<ul style="list-style-type: none"> Creates documents to convey information and instructions using language and format appropriate to text and audience
Oral Communication	<ul style="list-style-type: none"> Uses active listening and questioning techniques to confirm and clarify information Communicates using words and non-verbal features appropriate to the audience and context
Numeracy	<ul style="list-style-type: none"> Interprets, compares and contrasts numerical data to determine needs Uses numerical systems associated with record storage systems
Planning and organising	<ul style="list-style-type: none"> Uses understanding of organisational requirements in planning an appropriate information management system Sequences and schedules tasks required to achieve outcomes and manages relevant communication
Technology	<ul style="list-style-type: none"> Uses digital systems and tools to complete tasks

Assessment Requirements for BSBINS410 Implement records systems for small business

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify, select, develop and implement a records system for a small business.

In the process of the above, the candidate must:

- document the steps used to determine the criteria for a records system appropriate to the organisation's business functions and reporting requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key principles and processes of records management and records management systems
- internal controls required of the business or records system
- key characteristics of the organisational functions, structure and culture relevant to implementation of records system
- organisational policies and procedures relevant to implementing a records system in a small business.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBITU304 Produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop spreadsheets through the use of spreadsheet software.

It applies to individuals employed in a range of environments who tend to be personally responsible for designing and working with spreadsheets under minimal supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Adhere to ergonomic, work organisation and occupational health and safety requirements 1.2 Use energy and resource conservation techniques to minimise wastage 1.3 Identify spreadsheet task requirements in relation to data entry, storage, output and presentation
2. Plan spreadsheet design	2.1 Ensure spreadsheet design suits purpose, audience and information requirements of task

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2 Ensure spreadsheet design enhances readability and appearance, and meets organisational and task requirements for style and layout</p> <p>2.3 Use style sheets and automatic functions to ensure consistency of design and layout</p>
3. Create spreadsheet	<p>3.1 Ensure data is entered, checked and amended to maintain consistency of design and layout, in accordance with organisational and task requirements</p> <p>3.2 Format spreadsheet using software functions to adjust page and cell layout to meet information requirements, in accordance with organisational style and presentation requirements</p> <p>3.3 Ensure formulae are tested and used to confirm output meets task requirements, in consultation with appropriate personnel as required</p> <p>3.4 Use manuals, user documentation and online help to overcome problems with spreadsheet design and production</p>
4. Produce simple charts	<p>4.1 Select chart type and design that enables valid representation of numerical data, and meets organisational and task requirements</p> <p>4.2 Create charts using appropriate data range in spreadsheet</p> <p>4.3 Modify chart type and layout using formatting features</p>
5. Finalise spreadsheets	<p>5.1 Preview, adjust and print spreadsheet and any accompanying charts, in accordance with task requirements</p> <p>5.2 Ensure data input meets designated timelines and organisational requirements for speed and accuracy</p> <p>5.3 Name and store spreadsheet in accordance with organisational requirements and exit application without data loss/damage</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 3.1-3.4, 5.1	<ul style="list-style-type: none"> Recognises and interprets numerical and textual information to determine organisational and task

		requirements
Writing	2.1, 3.1-3.3, 4.2, 4.3, 5.1-5.3	<ul style="list-style-type: none"> Inputs numerical and key reporting information when creating and finalising spreadsheets and uses format, layout, style guides and standard naming conventions to organise data according to purpose and audience
Oral Communication	3.3	<ul style="list-style-type: none"> Participates in exchange of information to determine whether formulae utilised produce result required
Numeracy	4.1, 4.2	<ul style="list-style-type: none"> Uses mathematical equations to create simple formulae and validate numerical data
Navigate the world of work	1.1-1.3, 2.1-2.3, 3.1-3.3, 4.1, 5.1-5.3	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	3.3	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes
Get the work done	2.1-2.3, 3.1-3.4, 4.1-4.3, 5.1-5.3	<ul style="list-style-type: none"> Uses advanced features within applications to address routine and complex work tasks

Assessment Requirements for BSBITU304 Produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design spreadsheets that address a range of data and organisational requirements
- use software functions, graphics and support materials to create spreadsheets
- apply knowledge of formatting requirements for workplace documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formatting requirements of workplace documents
- identify organisational guidelines on spreadsheet design and use
- explain organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR411 Demonstrate leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

The unit applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These leaders have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to demonstrate leadership	1.1 Identify organisation's requirements for management performance 1.2 Identify qualities required for positive management performance according to organisational policies and procedures 1.3 Develop and implement performance plans for individual and team according to organisation's business objectives 1.4 Establish key performance indicators according to organisation's business objectives
2. Align behaviour with	2.1 Locate and assess organisation's standards and values for

ELEMENT	PERFORMANCE CRITERIA
organisational values	<p>conducting business</p> <p>2.2 Identify how own performance will contribute to upholding organisational values</p> <p>2.3 Identify issues to be resolved according to organisational values</p> <p>2.4 Gather and organise information relevant to the issues under consideration</p>
3. Model leadership behaviour	<p>3.1 Facilitate individual's and team's active participation in team decision-making processes</p> <p>3.2 Examine options and assess associated risks to determine preferred course of action</p> <p>3.3 Develop plan to implement decisions agreed by relevant individuals and teams</p> <p>3.4 Use feedback processes to monitor the implementation and impact of decisions</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	<ul style="list-style-type: none"> Records and reports key information related to the organisational goals, standards and objectives Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	<ul style="list-style-type: none"> Uses structure and language when developing performance plans, or when seeking and providing information about organisational goals and objectives
Numeracy	<ul style="list-style-type: none"> Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Enterprise and initiative	<ul style="list-style-type: none"> Identifies how own role meshes with others and contributes to broader work goals Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Teamwork	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes Identifies the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate

	with whom, why and how
Planning and organising	<ul style="list-style-type: none"> • Develops plan to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals • Uses systematic, analytical processes in complex, non-routine situations, setting goals • Evaluates effectiveness of decisions in terms of how well they meet stated goals

Assessment Requirements for BSBLDR411 Demonstrate leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least two performance plans, including one relating to individuals and one relating to teams.

In the course of the above, the candidate must:

- comply with organisation's standards and values
- evaluate own behaviour and performance against organisational standards and values and adjust to achieve required standards
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
 - relevant information
 - examination of options and associated risks
 - input from relevant people
- communicate about making and implementing decisions including:
 - facilitating agreement on the preferred course of action and implementation plans
 - monitoring and seeking feedback on the implementation and impact of decisions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods to identify an organisation's standards and values when they are stated, and where they are implied
- organisational values and expectations of behaviour
- basic leadership theories
- common leadership styles

- organisation's process for raising questions about standards and values
- examples of behaviours and performance that would typically be considered damaging to an organisation
- concepts of:
 - organisational values and ethics
 - role modelling
 - integrity and credibility
 - leadership.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBLDR412 Communicate effectively as a workplace leader

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare, engage and review communication on at least four occasions with different individuals or groups.

In the course of the above, the candidate must:

- identify the context for communication and select approach and responses accordingly
- create and present messages by choosing method and mode appropriate to the audience and context
- undertake effective two-way communication from the perspective of a supervisor or team leader
- identify and record actions required as a result of communication and follow-up in a timely manner.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislation requirement and organisational policies on workplace communication
- characteristics of effective leadership communication
- electronic and non-electronic communication methods, including situations where they would or would not be used
- effective listening techniques
- common feedback process and methods
- leadership communication responsibilities applicable to own role
- common barriers to effective communication in a workplace context
- characteristics of verbal and non-verbal communication.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources for communication and leadership.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBLDR414 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan team outcomes	1.1 Lead team to identify and establish team objectives and work processes 1.2 Support team to document identified objectives and work processes according to organisational processes 1.3 Encourage team members to incorporate innovation and productivity measures in work plans 1.4 Lead and support team members to meet expected outcomes
2. Promote team cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2 Support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3 Provide feedback to team members on their efforts and contributions</p> <p>2.4 Address or refer issues, concerns and problems identified by team members</p> <p>2.5 Model expected behaviours and approaches</p>
3. Supervise team performance	<p>3.1 Encourage team members to participate in and take responsibility for team activities and communication processes</p> <p>3.2 Support team to identify and resolve problems which impede performance</p> <p>3.3 Ensure own contribution to work team serves as a role model for others</p>
4. Liaise with management	<p>4.1 Establish open communication with line management</p> <p>4.2 Communicate information from line management to the team</p> <p>4.3 Communicate unresolved issues, concerns and problems raised by the team to line management to action</p> <p>4.4 Communicate issues raised by management to the team to action</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none"> Prepares workplace plans that communicate intent and elicits feedback clearly and effectively
Oral communication	<ul style="list-style-type: none"> Engages in discussions or provides information using structure and language appropriate to the audience and situation
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with team members Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others

Planning and organising	<ul style="list-style-type: none">• Develops, implements and monitors plans and processes to ensure team engagement and effectiveness• Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others, as required

Assessment Requirements for BSBMGT621 Design and manage the enterprise quality management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use structured processes to evaluate current performance against best practice benchmarks to identify areas for improvement
- engage relevant stakeholders in establishing and maintaining evaluating systems and processes to achieve agreed quality targets
- use leadership and communication techniques to promote a quality culture
- undertake continuous monitoring of systems and processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- articulate quality management objectives with reference to relevant legislation, standards and codes of practice
- outline typical barriers to establishing quality systems in an organisation and possible strategies to address them
- explain change management techniques that can support the implementation of quality systems
- explain leadership and engagement strategies that can support a quality culture in an organisation
- describe benchmarking strategies for analysing production and financial performance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBMGT623 Monitor corporate governance activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop, implement, monitor and review corporate governance
- access and interpret legislation and regulations to identify corporate governance compliance requirements
- research and analyse information to identify trends in corporate governance practices and reporting
- establish and implement processes for corporate governance adherence including determining corporate governance indicators and establishing a reporting plan
- meet statutory reporting requirements
- monitor compliance and analyse the causes of non-compliances including analysing governance reports, returns, review processes and the information technology system
- identify and implement corrective actions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislation, regulations and statutory requirements and standards that relate to corporate governance obligations for the organisation including at least those covering:
 - finances and taxation
 - industrial relations, equal opportunity, employment records and superannuation
 - intellectual property
 - corporate entities
 - competition, ethical practice and consumer rights
 - work health and safety

- outline principles of internal control including statutory requirements
- understand statutory reporting requirements
- state the principles of valuation and apply common methods of depreciation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources including governance reports and returns
- business information technology systems
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBMKG431 Assess marketing opportunities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify and evaluate at least three different marketing opportunities according to task requirements.

In the course of the above, the candidate must:

- identify and research marketing opportunities
- perform a market segmentation and identify marketing focus using segmentation results
- evaluate and select preferred marketing opportunities in consultation with relevant personnel
- document and present selected opportunities to management.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- requirements of legislation affecting marketing roles
- data collection and analysis techniques
- marketing industry knowledge, including:
 - components of marketing mix
 - elements of marketing planning
- marketing communications concepts and processes
- organisational structures, roles, responsibilities, business and marketing plans
- relevant product and service standards
- best practice techniques related to marketing
- relevant statistical terms used by the Australian Bureau of Statistics.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBOPS402 Coordinate business operational plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare, implement and review two operational plans.

In the course of the above, the candidate must:

- interact with a range of people and groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives including facilitating new employee onboarding
- present information and recommendations to support implementation and variation of the operational plan
- monitor operational performance against the performance objectives and budgets and implement improvements to rectify unsatisfactory performance
- vary the operational plan and gain approval to deal with contingencies
- document and provide reports on performance as required by the organisation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- processes to identify resource requirements
- sources of information to identify resource requirements
- methods to manage contingencies including through consultation with relevant stakeholders
- key features of performance monitoring systems and processes
- common methods for problem solving
- methods to support staff including mentoring, coaching and supervision

- implementation methods for operational plan
- budget and other financial information related to the organisation
- organisational objectives including costs, identified shortfalls and surpluses.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- organisational operational plans, policies and procedures relevant to performance evidence
- workplace documentation and resources including budgets
- physical and human resource procurement documentation
- employee onboarding and performance monitoring procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBOPS403 Apply business risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify business risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the work role.

The unit applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or delegate aspects of these tasks to others. Risks applicable to own work responsibilities and area of operation may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Business Operations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify risks	1.1 Identify context for risk management 1.2 Undertake required steps to identify risks 1.3 Document identified risks according to relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes

ELEMENT	PERFORMANCE CRITERIA
3. Treat risks	3.1 Identify control measures for risks 3.2 Assess strengths and weaknesses of control measures 3.3 Refer risks to relevant personnel, where required, according to policies and procedures 3.4 Select and implement control measures for personal area of operation and responsibilities
4. Monitor and review effectiveness of risk treatments	4.1 Review implemented treatments against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Monitor and review management of risk in personal area of operation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Learning	<ul style="list-style-type: none"> • Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures • Evaluates effectiveness of plans and results to inform improvement decisions
Reading	<ul style="list-style-type: none"> • Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	<ul style="list-style-type: none"> • Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes
Oral communication	<ul style="list-style-type: none"> • Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	<ul style="list-style-type: none"> • Uses numerical tools to assess risk and uses numerical data to review plans
Enterprise and initiative	<ul style="list-style-type: none"> • Complies with organisational and legislative requirements • Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Teamwork	<ul style="list-style-type: none"> • Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Planning and organising	<ul style="list-style-type: none"> • Determines job sequence and works logically and systematically to undertake defined tasks

Skill	Description
Technology	<ul style="list-style-type: none">• Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Unit Mapping Information

Supersedes and is equivalent to BSBRK401 Identify risk and apply risk management processes.

Assessment Requirements for BSBOPS403 Apply business risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to apply organisational policies, procedures and processes to:

- treat at least three risks by:
 - identifying different types of organisational risks
 - consulting with stakeholders to analyse and evaluate risks
 - implementing control measures
 - referring risks that are beyond own area of responsibility to others
 - maintaining risk management documentation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory context of the organisation in relation to risk management
- techniques for identifying and evaluating risks
- organisational policies and procedures for risk management
- areas where risks are commonly identified in an organisation
- risks beyond scope of individual responsibility to be referred to relevant organisational personnel
- purpose and key elements of current risk management standards.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relating to business risk

- workplace documentation on selected organisational risks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBOPS601 Develop and implement business plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least one business plan.

In the course of the above, the candidate must:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements and marketing approaches
- write a business plan, including:
 - description of the business
 - products and services
 - financial, physical and human resource requirements
 - regulatory requirements
 - marketing strategy
 - financial indicators
 - productivity and performance targets for key result areas
- monitor and respond to business performance including evaluation of performance against key results indicators
- consult, communicate with and report to relevant stakeholders
- provide analysis of the strengths and weaknesses of a business plan.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational and legislative frameworks required for the development of business plans, including:
 - pre-existing strategic, business and operational plans
 - business vision, mission, values and objectives

- permits or licences that may be required for new activity
- processes for developing and monitoring business plans
- customer needs and budgeting information
- performance objectives and measures, including key results indicators
- stakeholders involved in the development of business plans.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business information and data relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 2	This version first released with BSB Business Services Training Package Version 7.2. Release created to amend typographical error in the foundation skills.

Application

This unit describes the skills and knowledge required to organise personal work schedules, to monitor and obtain feedback on work performance and to maintain required levels of competence.

The unit applies to individuals who exercise discretion and judgement and apply a broad range of competencies in various work contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise and complete own work schedule	1.1 Develop work goals and key performance indicators (KPIs) according to task and organisational requirements 1.2 Prioritise workload according to task timeframes 1.3 Identify factors affecting achievement of work objectives 1.4 Develop personal work plans
2. Evaluate own work	2.1 Identify variations between expected and actual work

ELEMENT	PERFORMANCE CRITERIA
performance	<p>performance according to task requirements and KPIs</p> <p>2.2 Report variations to relevant personnel</p> <p>2.3 Seek feedback from relevant personnel for solutions to minimise variations in expected and actual work outputs</p> <p>2.4 Research sources of stress and access appropriate supports according to organisational policies and procedures</p>
3. Coordinate personal skill development and learning	<p>3.1 Identify personal and professional development needs for job role</p> <p>3.2 Identify opportunities to undertake personal skill development activities in consultation with supervisor</p> <p>3.3 Access professional development opportunities</p> <p>3.4 Record professional development undertaken for continuous learning and career development process</p> <p>3.5 Incorporate feedback into review of further learning needs</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Employs a range of approaches and investigative techniques to source the knowledge necessary to arrange personal learning experiences
Reading	<ul style="list-style-type: none"> Interprets textual information to determine organisation's procedures, own work performance and objectives
Writing	<ul style="list-style-type: none"> Prepares written reports and workplace documents that communicate information clearly and effectively
Oral communication	<ul style="list-style-type: none"> Provides and receives feedback using specific and relevant language Uses listening and questioning techniques to confirm understanding
Self-management	<ul style="list-style-type: none"> Complies with organisational policies, procedures and protocols
Teamwork	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Proactively collaborates with others to achieve specific goals
Planning and organising	<ul style="list-style-type: none"> Plans and organises work commitments to ensure deadlines and objectives are met Uses formal analytical thinking techniques to recognise and respond to routine problems

Skill	Description
Technology	<ul style="list-style-type: none"><li data-bbox="464 306 1410 338">• Uses digital systems and tools to enter, store and monitor information

Unit Mapping Information

Supersedes and is equivalent to BSBWOR301 Organise personal work priorities and development.

Assessment Requirements for BSBPEF301 Organise personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.2. Release created to amend typographical error in the foundation skills.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and implement a personal work plan.

In the course of the above, the candidate must:

- prepare a work plan according to organisational requirements and work objectives
- use technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work tasks and address contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from relevant personnel
- identify personal development needs and access, complete and record skill development and learning.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relevant to work tasks
- goals, objectives and key performance indicators for task within scope of job role
- methods to elicit, analyse and interpret feedback when communicating with other people in the workplace
- content of work plans including:
 - timeframes
 - tasks requirements

- risks
- contingencies for identified risks
- types of personal learning and professional development requirements
- principles and techniques of goal setting, measuring performance and time management
- signs and sources of stress and strategies to deal with stress in the workplace
- methods to identify and prioritise personal learning needs.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- challenges and situations to demonstrate application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPEF402 Develop personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to plan and prioritise own work tasks. It also addresses the skills and knowledge to monitor and obtain feedback on personal work performance.

The unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking & Problem Solving – Personal Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan personal work schedule	1.1 Identify task requirements 1.2 Identify own accountabilities in line with task requirements 1.3 Assess barriers for performance of personal accountabilities 1.4 Develop a personal work schedule
2. Implement personal work schedule	2.1 Communicate personal work schedule to relevant personnel 2.2 Monitor own performance according to personal work schedule 2.3 Document variations between expected and actual work performance according to task requirements and communicate to relevant personnel

ELEMENT	PERFORMANCE CRITERIA
3. Review personal work priorities	3.1 Seek and evaluate feedback from relevant stakeholders on own work performance 3.2 Analyse variations between expected and actual work performance 3.3 Update personal work schedule according to internal and external feedback and changes in circumstances

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Develops strategies to reflect on own performance and obtain feedback
Reading	<ul style="list-style-type: none"> Identifies and applies textual information from relevant sources to understand organisation's policies and practices
Writing	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Numeracy	<ul style="list-style-type: none"> Analyses numerical information related work accountabilities
Enterprise and initiative	<ul style="list-style-type: none"> Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Planning and organising	<ul style="list-style-type: none"> Plans, organises and implements tasks to meet organisational requirements Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

Unit Mapping Information

Supersedes and is equivalent to BSBWOR404 Develop work priorities.

Supersedes but is not equivalent to:

- BSBSMB408 Manage personal, family, cultural and business obligations
- BSBWOR424 Develop a time management plan.

Assessment Requirements for BSBPEF402 Develop personal work priorities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop, implement and review one personal work schedule.

In the course of the above, the candidate must:

- identify personal responsibilities and barriers to their fulfilment according to task requirements
- prepare a personal work schedule
- communicate work schedule to relevant personnel
- monitor personal work performance to identify variations between expected and actual work performance
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from internal and external stakeholders.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- content of work plans including:
 - resource requirements
 - stakeholder needs
 - workgroup targets
- business technology applications to schedule tasks and plan work
- methods of personal work performance review including:
 - self-assessment
 - feedback from others
- techniques to prepare personal plans and establish priorities
- methods to elicit, analyse and interpret feedback.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBPMG418 Apply project stakeholder engagement techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work with others to establish various stakeholders needs and interests
- engage with project stakeholders using effective interpersonal skills and appropriate methods of communication
- select and use communications methods relevant to the project needs and stakeholder expectations
- complete all relevant documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe different types of stakeholders
- explain the different levels of stakeholder engagement on projects
- describe techniques and strategies for stakeholder engagement
- explain why the interests and expectations of stakeholders must be considered
- describe common problems leading to variances in stakeholder engagement.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation detailing stakeholder engagement
- examples of stakeholder engagement activities.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBPMG427 Apply project procurement procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- assist application of project procurement processes during at least two different projects.

In the course of the above, the candidate must:

- document procurement requirements for a workplace project, including clear descriptions of product and service, quality specifications, resource identification, supply and delivery requirements and supply and engagement metrics
- apply procurement-management procedures to a workplace project, including selection criteria, testing and accepting, monitoring and receiving supplies
- finalise procurement agreements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- procurement-management policy, processes and procedures
- procurement documentation requirements
- components of contractual documentation and the legal obligations of all parties
- process used to select preferred contractors
- project procurement-management tools and techniques.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- examples of project procurement documentation
- examples of procurement tasks and activities

- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

4. Assist with project finalisation	4.1 Prepare finalised project products and associated documentation for handover to client 4.2 Assist in completing financial, legal and contractual obligations 4.3 Provide feedback and suggestions for improvement to project performance 4.4 Review project performance, assessments and document lessons learned

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises and interprets textual information from a range of sources and determines how content may be applied to organisational requirements
Writing	<ul style="list-style-type: none"> Uses clear, industry specific terminology, and appropriate structure, to complete and update, workplace documentation Maintains records using required vocabulary and formats
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear language and appropriate non-verbal features to provide relevant information
Numeracy	<ul style="list-style-type: none"> Interprets mathematical information to finalise financial obligations and measure work outputs against projections
Self-management	<ul style="list-style-type: none"> Understands own responsibilities and considers implications of these when negotiating, planning and undertaking work

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none"> • Collaborates with others as part of familiar routine activities and contributes to specific activities
Problem solving	<ul style="list-style-type: none"> • Reflects on outcomes to identify opportunities for improvement
Planning and organising	<ul style="list-style-type: none"> • Sequences and schedules required tasks, monitors implementation and manages relevant communication
Initiative and enterprise	<ul style="list-style-type: none"> • Adheres to organisational policies and procedures and legislative requirements • Identifies importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how • Uses active listening and questioning to elicit views and opinions of others

Unit Mapping Information

Supersedes and is equivalent to BSBPMG417 Apply project life cycle management processes.

Assessment Requirements for BSBPMG428 Apply project life cycle management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- assist in implementing project life cycle management process during at least two projects.

In the course of above, the candidate must:

- work with others to plan and document a project based on organisational parameters
- examine impact that project changes could have on final outcomes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- basic project governance models
- project charter
- project life cycle stages, phases and structures relevant to industry and project
- project planning documents and formats relevant to industry and context
- organisational strategies and goals in relation to the project
- organisational financial, legal and contractual obligations
- methods to prepare project budgets
- various types of project initiation documentation
- types of project logs and registers in use in this context.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- examples of project documentation, including information about life cycle processes

- workplace documentation and resources
- relevant legislation, regulations, standards and codes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG429 Apply project stakeholder engagement techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to assist in managing stakeholder relationships during a project. It involves ensuring timely and appropriate involvement of key individuals, organisations and groups throughout the project.

The unit applies to individuals who are project assistants working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assist in identifying and addressing stakeholder interests	1.1 Assist in identifying stakeholders relevant to project objectives 1.2 Divide stakeholder interests and assist in determining forms of engagement 1.3 Assist in identifying and supporting ways to address differing stakeholder interests
2. Assist stakeholder communications	2.1 Assist in negotiating agreement on project communication method, and content and timing of stakeholder engagement 2.2 Provide support for communication of information within authority levels, by identifying and addressing variances
3. Participate in stakeholder	3.1 Establish and confirm stakeholder behaviour expectations and communication needs

ELEMENT	PERFORMANCE CRITERIA
engagement	3.2 Confirm and conduct stakeholder engagement according to project objectives and roles
4. Review stakeholder communication	4.1 Discuss with stakeholders relevant staff and own performance review according to project expectations, objectives and roles 4.2 Identify and document relevant staff and own development needs and opportunities

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets textual information to determine and adhere to objectives
Writing	<ul style="list-style-type: none"> Documents findings on communication needs using required formats and structure
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear and detailed language to provide relevant information Uses active listening and questioning techniques to elicit views and opinions of others
Initiative and enterprise	<ul style="list-style-type: none"> Understands how own role meshes with others and contributes to broader work goals
Teamwork	<ul style="list-style-type: none"> Identifies importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how Collaborates with others as part of familiar routine activities and contributes to specific activities Uses interpersonal skills to build rapport, negotiate agreement and maintain positive working relationships
Planning and organising	<ul style="list-style-type: none"> Uses analytical skills to identify stakeholders and determine their needs Follows pre-determined plans to achieve required outcomes

Unit Mapping Information

Supersedes and is equivalent to BSBPMG418 Apply project stakeholder engagement techniques.

Assessment Requirements for BSBPMG429 Apply project stakeholder engagement techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- assist in conducting stakeholder engagements and communication during at least two projects.

In the course of above, the candidate must:

- work with others to establish various stakeholders needs and interests
- engage with project stakeholders using effective interpersonal skills and appropriate methods of communication
- select and use communications methods relevant to the project needs and stakeholder expectations.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- different types of stakeholders
- different levels of stakeholder engagement on projects
- techniques and strategies for stakeholder engagement
- interests and expectations of stakeholders
- common problems leading to variances in stakeholder engagement.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project documentation detailing stakeholder engagement
- examples of stakeholder engagement activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG430 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to undertake a minor project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

The unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish project parameters	1.1 Identify project scope 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to project and project parameters 1.4 Identify responsibilities of relevant stakeholders and reporting requirements 1.5 Clarify relationship of project to other projects and to the objectives of the organisation 1.6 Identify availability and access of resources for undertaking the project

ELEMENT	PERFORMANCE CRITERIA
2. Develop project plan	<p>2.1 Identify risks and develop a risk management plan for project, including Work Health and Safety (WHS)</p> <p>2.2 Develop project budget and timeframe and seek approval from relevant stakeholders</p> <p>2.3 Consult team members and apply their views in planning the project</p> <p>2.4 Identify and access appropriate project management tools</p> <p>2.5 Develop project plan according to project parameters and deliverables</p> <p>2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan</p>
3. Administer and monitor project	<p>3.1 Communicate to project team members their responsibilities and project requirements</p> <p>3.2 Establish and maintain required recordkeeping systems throughout the project</p> <p>3.3 Implement and monitor plans for managing the project</p> <p>3.4 Undertake risk management as required</p>
4. Finalise and review project	<p>4.1 Complete financial recordkeeping associated with project and confirm according to agreed budget</p> <p>4.2 Complete project documentation and obtain sign-offs for concluding project</p> <p>4.3 Review project outcomes and processes against the project scope and plan</p> <p>4.4 Document feedback and suggested improvements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Organises, evaluates and critiques ideas and information from a range of complex texts
Writing	<ul style="list-style-type: none"> Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text Establishes and maintains records according to organisational requirements
Numeracy	<ul style="list-style-type: none"> Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial

SKILL	DESCRIPTION
	information
Oral communication	<ul style="list-style-type: none"> Participates in verbal discussions using clear language and appropriate features to present or seek information Using listening and questioning skills to seek information and confirm understanding
Self-management	<ul style="list-style-type: none"> Identifies and responds to organisational and legislative/regulatory requirements
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations Uses collaborative techniques to engage stakeholders in consultations and negotiations
Planning and organising	<ul style="list-style-type: none"> Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands Systematically gathers and analyses all relevant information and evaluates options to make informed decisions Evaluates outcomes of decisions to identify opportunities for improvement
Technology	<ul style="list-style-type: none"> Uses digital technologies and applications to access, organise and share information

Unit Mapping Information

Supersedes and is equivalent to BSBPMG522 Undertake project work.

Supersedes but is not equivalent to BSBADM407 Administer projects.

Assessment Requirements for BSBPMG430 Undertake project work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- undertake project work on a minor project or a section of a larger project.

In the course of the above, the candidate must:

- confirm the quality of project outcomes according to expectations of the organisation
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project management tools
- types of documents and other sources of information commonly used in defining the parameters of a project
- mission, goals, objectives and operations of the organisation
- relevant legislation and regulations, including work health and safety (WHS) requirements, for project planning
- project management processes according to policies and procedures of the organisation and including:
 - lines of authority and approvals
 - quality assurance
 - human resources
 - budgets and finance
 - risk management
 - recordkeeping

- reporting.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG530 Manage project scope

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to determine and manage project scope. It involves obtaining project authorisation, developing a scope management plan, and managing the application of project scope controls.

The unit applies to individuals responsible for managing and leading a project in an organisation, business or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Conduct project authorisation activities	1.1 Develop and confirm procedures for project authorisation with an appropriate authority 1.2 Obtain authorisation to expend resources 1.3 Confirm project delegations and authorities in project governance arrangements
2. Define project scope	2.1 Identify and negotiate project boundaries with relevant stakeholders 2.2 Establish measurable project benefits, outcomes and outputs 2.3 Establish a shared understanding of desired project outcomes with relevant stakeholders

ELEMENT	PERFORMANCE CRITERIA
	2.4 Document scope management plan
3. Manage project scope control process	3.1 Implement agreed scope management procedures and processes 3.2 Monitor impact of scope changes within established time, cost and quality constraints according to change control procedures 3.3 Identify and document scope management issues and recommend improvements for future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets and analyses information from a range of complex texts
Writing	<ul style="list-style-type: none"> Develops project documentation and procedures using formats and language appropriate to context
Oral Communication	<ul style="list-style-type: none"> Participates in discussions and negotiations using clear language and appropriate non-verbal features Uses active listening and questioning to elicit views and opinions of others
Numeracy	<ul style="list-style-type: none"> Interprets numerical information to determine project timelines and measure outcomes against project scope
Initiative and enterprise	<ul style="list-style-type: none"> Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of work environment
Teamwork	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with diverse stakeholders Collaborates with others to achieve joint outcomes, playing an active role in negotiating and facilitating agreement
Planning and organising	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation and manages relevant communications Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account Uses experience to reflect on ways variables impact outcomes and identify future improvements

Unit Mapping Information

Supersedes and is equivalent to BSBPMG511 Manage project scope.

Supersedes but is not equivalent to BSBPMG602 Direct the scope of a project program.

Assessment Requirements for BSBPMG530 Manage project scope

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project scope on at least two occasions.

In the course of the above, the candidate must:

- collaborate with stakeholders to produce a scope-management plan
- review and document scope-management implementation and recommend improvements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- components of a project scope-management plan
- factors likely to impact the project scope
- formal change-control processes
- methods for measuring work outcomes and progress against plans
- methods for segmenting and documenting a work breakdown structure
- problem areas likely to be encountered in scope management
- procedures for reporting scope change
- project life cycle and the significance of scope management
- project management tools used for managing scope
- roles and responsibilities of project manager in relation to project planning
- types of project initiation documentation.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation used to document and manage project scope
- examples of feedback from project stakeholders regarding management of project scope.
-

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG531 Manage project time

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to manage time during projects. It involves determining and implementing the project schedule and assessing time management outcomes.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project schedule	1.1 Develop work breakdown structure with sufficient detail to enable effective planning and control 1.2 Estimate duration and effort, sequence and dependencies of tasks, to achieve project deliverables 1.3 Use project scheduling tools and techniques to identify schedule impact on project time management, resource requirements, costs and risks 1.4 Contribute to achieving an agreed schedule baseline and communication of the schedule to stakeholders
2. Implement project schedule	2.1 Implement mechanisms to measure, record and report progress of activities according to agreed schedule

ELEMENT	PERFORMANCE CRITERIA
	2.2 Conduct ongoing analysis to identify baseline variance 2.3 Analyse and forecast impact of changes to the schedule 2.4 Review progress throughout project life cycle and implement agreed schedule changes 2.5 Develop responses to potential or actual schedule changes and implement them to maintain project objectives
3. Assess time management outcomes	3.1 Review schedule performance records to determine effectiveness of time management activities 3.2 Identify and document time management issues and recommend improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies, interprets and analyses textual information obtained from a range of sources
Writing	<ul style="list-style-type: none"> Drafts and develops documentation required for project scheduling and reporting using appropriate formats and language
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear and detailed language and appropriate non-verbal features to convey expectations and advise others on progress
Numeracy	<ul style="list-style-type: none"> Calculates time requirements for project scheduling Uses basic mathematical formula to determine costs and other necessary resources
Teamwork	<ul style="list-style-type: none"> Identifies requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience
Planning and organising	<ul style="list-style-type: none"> Plans and schedules complex activities, monitors implementation and manages relevant communication Monitors actions against goals, adjusting plans and resources where necessary Uses analytical skills to review and evaluate process and decide on future improvements
Technology	<ul style="list-style-type: none"> Uses digital applications to access, organise, integrate and share relevant information in effective ways

Unit Mapping Information

Supersedes and is equivalent to BSBPMG512 Manage project time.

Supersedes but is not equivalent to BSBPMG603 Direct time management of a project program.

Assessment Requirements for BSBPMG531 Manage project time

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project time on at least two occasions.

In the course of the above, the candidate must:

- develop a project schedule using project management tools and techniques
- conduct a review of project scheduling and recommend improvements for the future.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- estimation techniques to determine task duration and resource effort
- procedures for identifying critical path
- procedures for managing project baselines, establishment and variance
- project life cycle phases
- best-practice time management methodologies, their capabilities, limitations, applications and outcomes
- key tools for project scheduling
- work breakdown structures and how they apply to project schedules.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- examples of project schedules, reports and feedback from project stakeholders regarding time management.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG532 Manage project quality

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to manage quality within projects. It involves determining quality requirements, implementing quality control and assurance processes, and using review and evaluation to make quality improvements in current and future projects.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine quality requirements	1.1 Identify quality objectives and standards with input from relevant stakeholders 1.2 Develop quality metrics for the project and any product output in a quality management plan 1.3 Select quality management methods and tools for resolving quality issues 1.4 Consult with project team and stakeholders on quality requirements
2. Implement quality processes	2.1 Perform quality assurance audit of project processes for compliance with agreed plans

ELEMENT	PERFORMANCE CRITERIA
	2.2 Assess quality control of project and product output according to agreed quality specifications 2.3 Identify causes of variance to quality metrics and undertake remedial action 2.4 Maintain a quality management system for timely recording of quality audit data
3. Implement project quality improvements	3.1 Review processes and implement agreed changes continually throughout the project life cycle 3.2 Review project outcomes against performance requirements 3.3 Identify and document lessons learned and recommended improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies, analyses and assesses textual information obtained from a range of sources and determines how content may be applied to requirements
Writing	<ul style="list-style-type: none"> Develops and documents quality requirements for project plan Records results of quality audits according to organisational requirements
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear language and appropriate non-verbal features to provide and seek relevant information Uses active listening and questioning techniques to elicit views and opinions of others
Numeracy	<ul style="list-style-type: none"> Interprets information to determine measurable objectives Interprets numerical information to measure outcomes against objectives Uses analytical skills to review and evaluate process and decide on future improvements
Self-management	<ul style="list-style-type: none"> Takes responsibility for identifying and following policies, procedures and standards
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate communication practices in a range of work contexts Collaborates with others to foster shared understanding of quality requirements

SKILL	DESCRIPTION
Planning and organising	<ul style="list-style-type: none">Sequences and schedules complex activities, monitors actions against goals, adjusting plans and resources where necessary
Technology	<ul style="list-style-type: none">Uses digital applications to access, organise, integrate and share relevant information in effective ways

BSBPMG533 Manage project cost

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to identify, analyse and refine project costs to produce a budget, and to use this budget as the principal mechanism to control project cost.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project costs	1.1 Identify resource requirements for individual tasks identified in the work breakdown structure in consultation with relevant stakeholders 1.2 Estimate project costs for project budget to be prepared within agreed tolerances 1.3 Develop a project budget 1.4 Develop a cost-management plan for project finances according to scope of responsibility
2. Monitor and control project costs	2.1 Implement agreed financial-management processes and procedures for monitoring actual expenditure against budget 2.2 Identify cost variations and evaluate alternative actions

ELEMENT	PERFORMANCE CRITERIA
	2.3 Implement and monitor agreed actions for maintaining financial objectives 2.4 Provide accurate and timely financial reports
3. Complete cost-management processes	3.1 Conduct activities to signify financial completion according to task and organisational requirements 3.2 Review project outcomes using available records 3.3 Review cost-management issues and document improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets and analyses textual information from a range of sources Reviews and interprets information related to budget
Writing	<ul style="list-style-type: none"> Drafts and develops documents using appropriate format and language for context
Oral Communication	<ul style="list-style-type: none"> Participates in verbal exchanges using clear language and appropriate tone and syntax to provide relevant information Uses active listening and questioning to elicit views and opinions of others
Numeracy	<ul style="list-style-type: none"> Uses mathematical formulae to calculate resources against predetermined budgets, solve variances and finalise project costs
Initiative and enterprise	<ul style="list-style-type: none"> Adheres to organisational policies and procedures and understands responsibilities of own role
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to confirm requirements, seek guidance or share information
Planning and organising	<ul style="list-style-type: none"> Plans and schedules complex activities, monitors implementation and manages relevant communication Monitors actions against goals, adjusting plans and resources where necessary Uses analytical skills to review and evaluate process and decide on future improvements Uses digital applications to access, organise, integrate and share relevant information in effective ways

Unit Mapping Information

Supersedes and is equivalent to BSBPMG514 Manage project cost.

Supersedes but is not equivalent to BSBPMG604 Direct cost management of a project program.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project cost on at least two occasions.

In the course of the above, the candidate must:

- monitor costs across a project's life cycle including solving cost variations and analysing possible alternatives
- record expenditure, create accurate financial reports and review cost-management processes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- appropriate budgeting processes, tools and techniques
- methods and tools for costing and cost analysis
- strategies for managing costs and their application in different situations
- processes for reviewing costs against outcomes
- cost-analysis methods and tools for identifying and evaluating cost variations
- key organisational policies and procedures applicable to this role.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources, including budgets and other financial documents

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPRC402 Negotiate contracts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to participate in the negotiation of contracts to procure goods and/or services.

It applies to individuals who undertake activities such as cost and market analysis, using information to support the planning of negotiations with suppliers to achieve best value. Individuals are required to plan, prepare and undertake effective contract negotiations while demonstrating high levels of personal effectiveness.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Procurement and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for contract negotiation with suppliers	1.1 Prepare for contract negotiation and research supplier organisation information, regulatory constraints and unique category considerations 1.2 Undertake market analysis to support contract negotiations and inform negotiation strategy 1.3 Seek legal advice on implications for procurement of goods and/ or services that may impact contract negotiations 1.4 Identify risks associated with contract negotiations

ELEMENT	PERFORMANCE CRITERIA
2. Establish negotiation processes	2.1 Determine the objectives and establish strategies for contract negotiation meeting 2.2 Establish resourcing requirements with organisation stakeholders 2.3 Access legal expertise to determine the legal requirements for the organisation and ensure they are compliant 2.4 Recognise the use and the content of contractual terms for procured goods and/ or services
3. Undertake contract negotiation	3.1 Establish the bargaining position with stakeholders to determine strength and weaknesses of organisational procurement capability 3.2 Define and evaluate the attributes of a good negotiator and apply them to effective negotiations 3.3 Employ a range of persuasive techniques and tactics to navigate difficult circumstances and achieve desired contract outcome 3.4 Use verbal and non-verbal communications in negotiation situations including reducing the potential for conflict
4. Finalise contracts	3.1 Ensure contracts are signed and exchanged between the organisation and suppliers 3.2 Develop and discuss the legalities and commercial considerations linked to the contract in accordance with organisational requirements 3.3 Ensure contracts and related documents are stored and safeguarded 3.4 Advise relevant stakeholders of contract requirements 3.5 Advise unsuccessful suppliers of non-acceptance of offers

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets and analyses textual information from a range of sources and identifies relevant key information to assist in the negotiation process

Writing	<ul style="list-style-type: none"> Develops material to convey explicit information and results using clear and detailed language appropriate to audience and context
Oral Communication	<ul style="list-style-type: none"> Uses clear language and suitable features to provide information to a variety of individuals Uses active listening and questioning techniques to convey and clarify information
Navigate the world of work	<ul style="list-style-type: none"> Monitors adherence to implicit and explicit organisational procedures and policies Recognises the implications of legal and regulatory responsibilities related to own work and is beginning to recognise some general legal principles applicable across work contexts
Interact with others	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Collaborates and negotiates with others as part of familiar routine activities
Get the work done	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks for efficient and effective outcomes Implements standard procedures to make routine decisions Recognises and takes responsibility for addressing predictable problems in familiar work contexts Understands the importance of secure information in relation to own work

Assessment Requirements for BSBPRC402 Negotiate contracts

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- prepare and conduct contract negotiations for the procurement of goods and/or services in accordance with organisational policies and procedures, including:
- using market analysis to evaluate suppliers
- determining objectives for contract negotiation
- arranging contract documentation and ensuring compliance
- using a range of effective and persuasive negotiation techniques
- demonstrating personal effectiveness in contract negotiation processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key provisions of relevant legislation, codes of practice and national standards that affect procurement of goods and/or services
- key principles of procurement contracts, including:
- organisational policies, procedures and relevant documentation for contract negotiation
- key legal requirements for the acquisition of goods and/or services
- organisation practices, policies and procedures for procurement
- procurement principles for:
 - accountability
 - probity and transparency
 - risk management
 - value for money.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the administration – procurement and contracting field of work and include access to:

- organisation policies and procedures
- procurement strategies and relevant procurement records
- sample contracts
- office equipment and supplies
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBPRC504 Manage a supply chain

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to manage a supply chain, including the commercial and technical capabilities to ensure outcomes achieve organisational objectives.

It applies to individuals who are responsible for managing a supply chain in an organisation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Procurement and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop and implement a supply chain strategy	1.1 Identify the organisation's objectives and the strategies for achieving them 1.2 Review current supply chain management strategy and how it delivers against organisational strategies 1.3 Assess supply chain opportunities that will add value to the organisation within the requirements of the strategy and budgetary allowance 1.4 Design and implement a supply chain strategy that increases effectiveness and achieves organisational objectives

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5 Gain commitment of stakeholders to implement supply chain strategy</p> <p>1.6 Assign responsibility to monitor supply chain strategy to relevant personnel</p>
2. Manage the flow of supplies through the supply chain	<p>2.1 Obtain information on the specifications of supplies in the supply chain</p> <p>2.2 Clarify the aims, objectives and plans of supplies against organisational policies and procedures</p> <p>2.3 Allocate supply chain tasks to self and other personnel</p> <p>2.4 Support personnel to achieve supply chain tasks and milestones</p> <p>2.5 Monitor and control the achievement of supply chain objectives against cost and timescales</p> <p>2.6 Present reports on the results of supply chain outcomes to stakeholders</p>
3. Manage supply chain relationships and activities	<p>3.1 Apply portfolio analysis techniques to assess relationships in supply chains in accordance with the supply chain management strategy</p> <p>3.2 Evaluate financial, technical and performance data of suppliers in accordance with supply chain strategies</p> <p>3.3 Identify opportunities to adjust supply chain strategies to respond to the changing needs of customers, supply chain and organisational objectives</p> <p>3.4 Design and implement a framework to promote collaboration with suppliers to achieve a competitive advantage</p> <p>3.5 Consult with organisation management to confirm progress of supply chain activities in accordance to organisational objectives</p>
4. Evaluate and improve supply chain effectiveness	<p>4.1 Review the effectiveness of current relationships within the supply chain in accordance with the supply chain management strategy</p> <p>4.2 Compare supply chain management models to determine most appropriate infrastructure to support organisational objectives</p> <p>4.3 Assess techniques to support the development of innovation in the supply chain</p> <p>4.4 Analyse cost reduction activities for a supply chain to achieve organisational objectives</p> <p>4.5 Consolidate analysis and evaluation results to improve future supply chain management strategies and seek feedback from</p>

ELEMENT	PERFORMANCE CRITERIA
	organisation management

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Gathers and analyses textual information from a range of sources and identifies relevant and key information to assist in the supply chain management process
Writing	<ul style="list-style-type: none"> Designs, develops and revises strategic documents appropriate to audience and context
Oral Communication	<ul style="list-style-type: none"> Uses clear language and appropriate features to provide information to a variety of individuals Uses active listening and questioning techniques to convey and clarify information
Numeracy	<ul style="list-style-type: none"> Analyses and compares financial information to assist in managing, evaluating and improving the supply chain
Navigate the world of work	<ul style="list-style-type: none"> Contributes to organisation's strategic directions by developing and revising organisational policies and procedures Complies with all legal requirements relevant to own responsibilities and considers the implications of these when negotiating, planning and undertaking work
Interact with others	<ul style="list-style-type: none"> Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	<ul style="list-style-type: none"> Develops plans to manage complex supply chain activities, with an awareness of how they contribute to strategic goals Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account Monitors outcomes of decisions, considering results from a range of perspectives, and identifying key concepts and principles that may be adaptable to future situations Actively identifies digital systems, devices and applications with potential to meet current or future needs

Assessment Requirements for BSBPRC504 Manage a supply chain

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- critically evaluate organisational supply chain management
- successfully manage a supply chain in accordance with organisational policies and procedures, including:
 - implement a supply chain strategy
 - monitor supply chain activities
 - co-ordinate staff and engage relevant stakeholders
 - liaise with suppliers to drive efficiencies
- evaluate and formulate recommendations to improve supply chain management strategy.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key features of organisational objectives and their relationship to the supply chain strategy
- key requirements relating to the management of a supply chain, including:
 - organisational policies and procedures for procurement, tendering and contracting
 - contracting and tendering
 - ethical behaviour
 - purchasing and procurement
 - supply chain management
- techniques to establish collaborative relationships

- relevant legislation, regulations, standards and organisation policies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the administration – procurement and contracting field of work and include access to:

- organisation policies and procedures
- supply chain strategies and relevant supply chain management records
- office equipment and supplies
- case studies and, where possible, real situations in the workplace.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Construct an applied research strategy	1.1 Clarify and confirm applied research purpose and needs of the target group 1.2 Determine policies and procedures in relation to conducting applied research 1.3 Establish mechanisms for collecting and maintaining data in a

ELEMENT	PERFORMANCE CRITERIA
	systematic manner 1.4 Analyse factors affecting the reliability and validity of data 1.5 Review relevant research ethics and codes of conduct 1.6 Prepare applied research strategy and hypothesis 1.7 Frame a research strategy in consideration of available tools and resources
2. Use a range of applied research techniques	2.1 Review and evaluate a range of applied research methods, theories and data collection techniques 2.2 Select appropriate methods to gather and analyse data 2.3 Use suitable technology and technology services to support data collection and analysis 2.4 Access appropriate sources of information and contributors relevant to the research 2.5 Optimise relevance of the research through integrity of the data collected and analysis tools used
3. Analyse and present findings	3.1 Evaluate how research findings such as trends and changes will impact on learning strategy 3.2 Review data and research findings for accuracy of details and adherence to any legal requirements 3.3 Collate and analyse data for relevance against the original applied research strategy 3.4 Document and present research findings in a clear and logical manner consistent with audience needs 3.5 Identify the need for and an appropriate approach to, further research

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.5	<ul style="list-style-type: none"> Evaluates and reflects on the need for further research to contribute to ongoing organisational improvement

Reading	1.1, 1.2, 1.5, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> Collects, analyses, compares and evaluates textual information from a range of resources to inform research strategies
Writing	1.6, 3.3, 3.4	<ul style="list-style-type: none"> Develops texts dealing with complex ideas and concepts Uses specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal, ethical and organisational requirements
Oral Communication	1.1, 3.4	<ul style="list-style-type: none"> Uses specialised vocabulary appropriate to context and audience to discuss and confirm research requirements Applies listening and questioning techniques to check or confirm understanding
Numeracy	3.2, 3.3	<ul style="list-style-type: none"> Applies knowledge of mathematical information to statistically analyse data and identify possible trends and confirm reliability
Navigate the world of work	1.2, 1.5, 3.2	<ul style="list-style-type: none"> Is highly autonomous, taking responsibility for determining applicable organisational policies and procedures and considering legal and ethical obligations Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others
Interact with others	3.4	<ul style="list-style-type: none"> Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals
Get the work done	1.1, 1.2, 1.3, 1.7, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3	<ul style="list-style-type: none"> Develops plans for complex activities, regularly reviewing priorities and performance during implementation, identifying and addressing issues as they arise Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks Uses formal analytical thinking to make informed decisions about research strategies and techniques, seeking input, advice and feedback as required

Assessment Requirements for BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
 - specific research questions or hypotheses
 - valid population or sample size
 - description of the geographical, cultural, social or institutional context within which the research will be carried out
 - full description of the data collection methods
 - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques

- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations .

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	<ul style="list-style-type: none"> Comprehends a variety of relatively complex texts Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	1.6, 1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> Develops textual material and organises content in a manner that effectively documents

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	2.2	<ul style="list-style-type: none"> Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 2.1, 4.3	<ul style="list-style-type: none"> Refers to organisational processes, procedures and requirements when making decisions about risk management
Interact with others	1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management Consults and negotiates with stakeholders about risk management processes and outcomes
Get the work done	1.2, 1.3, 1.5, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 4.6	<ul style="list-style-type: none"> Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication Systematically analyses information to decide on appropriate risk management treatments Uses digital technologies and systems to access information, document plans and communicate with others

Assessment Requirements for BSBR501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify the scope and context of the risk management process including:
 - stakeholder analysis
 - political, economic, social, legal, technological and policy context
 - current arrangements
 - objectives and critical success factors for the area included in scope
 - risks that may apply to scope
- consult and communicate with relevant stakeholders to identify and assess risks, determine appropriate risk treatment actions and priorities and explain the risk management processes
- develop and implement an action plan to treat risks
- monitor and evaluate the action plan and risk management process
- maintain documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- outline organisational policies, procedures and processes for risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBSMB403 Market the small business

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine marketing activity focus in line with objectives of the business plan
- evaluate customer base
- understand what is ethically and culturally appropriate
- determine a marketing mix according to market and business needs, including:
 - ability to optimise sales and profit
 - ability to evaluate costs and benefits
 - determine customer needs and promotional activities
- determine marketing strategies, including briefing appropriate personnel on their responsibilities
- identify marketing opportunities in the digital environment
- develop approaches to engage, respond and monitor customers in the digital space
- monitor and evaluate activities and performance, and correct performance gaps
- consult and communicate effectively with relevant people
- research and monitor ongoing changes and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss industry market trends
- identify performance evaluation methods
- explain methods of analysing costs and benefits of marketing strategies
- summarise methods of developing marketing objectives and marketing mix
- compare current digital devices, platforms and technologies for effectiveness in achieving marketing objectives
- outline methods of monitoring customer satisfaction
- identify relevant market analysis and research
- provide a detailed explanation of relevant marketing concepts and methods.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology
- software for analysis of data
- workplace documents and case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB406 Manage small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and review financial management strategies on a regular basis.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role interpret financial reports and other numerical data to develop financial management strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement financial plan	1.1 Identify financial information requirements and obtain specialist services, as required, to profitably operate the business in accordance with the business plan 1.2 Produce financial budgets or projections, including cash flow

ELEMENT	PERFORMANCE CRITERIA
	<p>estimates, as required for each forward period, and distribute to relevant people in accordance with legal requirements</p> <p>1.3 Negotiate, secure and manage business capital to best enable implementation of the business plan and to meet requirements of financial backers</p> <p>1.4 Develop and maintain strategies to enable adequate financial provision for taxation in accordance with legal requirements</p> <p>1.5 Develop, monitor and maintain client credit policies, including contingencies for debtors in default, to maximise cash flow</p> <p>1.6 Select key performance indicators to enable ongoing monitoring of financial performance</p> <p>1.7 Record and communicate financial procedures to relevant people to facilitate implementation of the business plan</p>
2. Monitor financial performance	<p>2.1 Regularly monitor and report on financial performance targets, and analyse data to establish extent to which the financial plan has been met</p> <p>2.2 Monitor marketing and operational strategies for their effects on the financial plan</p> <p>2.3 Calculate and evaluate financial ratios according to own or industry benchmarks</p> <p>2.4 Assess financial plan to determine whether variations or alternative plans are needed, and change as required</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1, 2.4	<ul style="list-style-type: none"> Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.2-1.5, 1.7, 2.1	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.3, 1.7, 2.1	<ul style="list-style-type: none"> Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to

		confirm understanding <ul style="list-style-type: none"> Participates in verbal negotiations using tone and language suitable to audience
Numeracy	1.1-1.5, 2.1, 2.3, 2.4	<ul style="list-style-type: none"> Interprets numerical information to calculate all relevant financial information
Navigate the world of work	1.2, 1.4	<ul style="list-style-type: none"> Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	1.7, 2.1	<ul style="list-style-type: none"> Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	1.1, 1.2, 1.4-1.6, 2.2, 2.4	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes

Assessment Requirements for BSBSMB406 Manage small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- operate the business according to the business plan, including:
 - adhering to legal requirements
 - meeting requirements of financial backers
 - defining strategies for debt collection and contingencies for debtors
 - managing cash flow
 - defining key performance indicators
 - communicating with relevant people
- monitor the business against financial plan and make changes as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss benchmarking
- explain financial decision-making relevant to the business
- summarise significant financial indicators
- outline purposes of financial reports
- clarify preparation and interpretation of budget/actual reports
- identify principles for preparing balance sheets and their interpretation
- outline debt collection procedures or strategies

- characterise principles for preparing profit and loss statements and their interpretation
- discuss stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB421 Manage small business finances

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 5.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- manage the business according to financial goals, including:
 - adhering to legal requirements
 - produce relevant financial projections, including cash flow estimates
 - develop a plan to negotiate and manage business assets and financial capital
 - defining strategies for debt collection and contingencies for debtors
 - managing cash flow
 - defining key performance indicators
 - communicating with relevant people
 - seeking specialist services where required
- monitor the business against financial plan and make changes as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Key features of benchmarking

- Key features of financial decision-making relevant to the business
- Key features of significant financial indicators
- Key purposes of financial reports
- Key features of balance sheet preparation and interpretation
- Key features of debt collection procedures or strategies
- Key features of profit and loss statement preparation and interpretation
- Key features of stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources, including business technology
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSTR301 Contribute to continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to support continuous improvement in an organisation. Particular emphasis is on actively encouraging teams to participate in the process, monitoring and reporting on specified outcomes and supporting opportunities for further improvements.

The unit applies to individuals who use initiative, and organisational and communication skills to influence the ongoing development of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Critical Thinking and Problem Solving – Business Strategy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Coordinate continuous improvement	1.1 Communicate objectives and continuous improvement processes of the organisation to team members 1.2 Establish roles and skills within the team and identify training needs and performance improvement opportunities 1.3 Encourage team members to participate in decision making processes and exercise initiative
2. Monitor and report specified outcomes	2.1 Monitor team progress using systems and technology of the organisation and identify ways planning and operations could be improved 2.2 Report changes to processes and training to relevant

ELEMENT	PERFORMANCE CRITERIA
	stakeholders 2.3 Develop plans, in collaboration with team members, to apply continuous improvement techniques and processes
3. Support opportunities for further improvement	3.1 Communicate recommendations for improvements in achieving organisational objectives to team members 3.2 Monitor work performance and support team members to identify further opportunities for improvement 3.3 Maintain records, reports and recommendations for improvement within the organisation's systems and processes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> Contributes to ongoing organisational improvement by mentoring others to support continuous improvement processes
Reading	<ul style="list-style-type: none"> Interprets everyday workplace documentation
Writing	<ul style="list-style-type: none"> Uses appropriate vocabulary and grammatical structures to achieve precise meaning in a range of documentation
Oral communication	<ul style="list-style-type: none"> Articulates information in a positive manner using appropriate terminology, tone and style appropriate to context and audience Uses questioning and listening techniques to exchange and clarify information
Enterprise and initiative	<ul style="list-style-type: none"> Identifies the nature and purpose of own role and associated responsibilities and how own role relates to others and contributes to broader work goals Takes responsibility for adherence to organisational processes and systems
Teamwork	<ul style="list-style-type: none"> Shares information and resources, offers assistance and facilitates effective group interactions
Planning and organising	<ul style="list-style-type: none"> Takes responsibility for routine low-impact decisions within familiar situations Evaluates effectiveness of decisions in terms of how well they meet stated goals
Technology	<ul style="list-style-type: none"> Uses a range of digitally based technology and applications to organise, monitor, manage and communicate relevant information effectively

Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBFLM309 Support continuous improvement systems and processes
- BSBINN201 Contribute to workplace innovation.

Assessment Requirements for BSBSTR301 Contribute to continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- coordinate, monitor and support the continuous improvement of a work task for a team or work area.

In the course of the above, the candidate must:

- identify options and benefits for improvements
- address barriers to continuous improvement
- use analysis work performance to identify improvement opportunities
- use technology to monitor operational progress
- apply recordkeeping processes.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- principles and techniques relating to:
 - continuous improvement systems and processes
 - benchmarking
 - best practice
- benefits and barriers to continuous improvement
- quality approaches that may be implemented in an organisation
- methods that can be used in continuous improvement
- organisational recording, reporting and recommendation processes.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documents and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSTR401 Promote innovation in team environments

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least two occasions assist a team to create an innovative team environment.

In the course of the above, the candidate must:

- encourage others to contribute to innovation
- identify ways of working
- implement and communicate improvements
- plan and schedule activities
- reflect on activities, feedback and challenges to identify improvement options
- model open and respectful communications
- contribute to the make-up and rules of the team.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- types of innovation and their benefits
- ways of working, including:
 - working hours
 - working spaces
 - agile working
- workplace policies and procedures
- internal and external factors that contribute to a team becoming and remaining innovative, including:
 - team characteristics
 - role of group dynamics and diversity
 - broader environmental factors

- activities that can encourage and hinder innovation in a team, including:
 - allocation of time and activities
 - modelling behaviour
 - rewards and recognition
 - communications
 - feedback.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSTR602 Develop organisational strategies

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- consult and communicate with relevant stakeholders, and develop and implement one strategic plan for an organisation on at least one occasion, including:
 - revising mission, vision and values
 - analysing and validating findings of research and analysis
 - obtaining input to and endorsement of strategic plans
 - brief relevant parties about strategic plan.

In the course of the above, the candidate must:

- analyse organisation's internal and external environment to formulate strategic plans, including:
 - background and research relevant to strategic plan
 - legislation, regulations and codes of practice, including for intellectual property
 - objectives, strategies and priorities
 - roles and responsibilities
 - performance indicators
 - timeframes
 - cost-benefit and risk analysis
- seek advice from appropriate experts
- monitor and evaluate the implementation of strategic plan and make refinements
- review effectiveness of planning processes and identify opportunities for improvement.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislation, regulations and codes of practice relevant to organisation's strategic plan

- organisation's strategic direction, vision and mission
- methods for conducting capability assessment
- organisation's strengths, weaknesses, opportunities and threats
- strengths and weaknesses of existing and potential competitors
- key features of cooperative ventures
- methods for conducting cost benefit analysis
- key features of due diligence processes
- risks and risk management strategies relevant to strategic planning, including:
 - intellectual property rights and responsibilities
 - other risks
- strategic planning methodologies, including:
 - political, economic, social and technological (PEST) analysis
 - strengths, weaknesses, opportunities and threats analysis (SWOT)
- internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
- techniques for developing organisational values.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS411 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to analyse and implement improvements to the environmental sustainability of work practices and monitor their effectiveness.

The unit applies to individuals with responsibility for the practices of a specific work area or who lead a work group or team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Competence – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish sustainable work contexts	1.1 Identify and assess organisational compliance against environmental legislation, regulations and standards 1.2 Collect data on environmental efficiency in organisational systems and processes 1.3 Analyse data on environmental efficiency and current purchasing strategies and identify areas for improvement 1.4 Consult stakeholders and external data sources on sustainability best practice 1.5 Develop efficiency targets and methods to monitor outcomes
2. Implement sustainable	2.1 Identify and source tools to set efficiency targets

ELEMENT	PERFORMANCE CRITERIA
work practices	<p>2.2 Implement and integrate efficiency targets with other operational activities</p> <p>2.3 Support team members to identify possible areas for improved resource efficiency in work areas</p> <p>2.4 Seek and act on feedback from stakeholders on implementation</p>
3. Monitor performance of sustainable work practices	<p>3.1 Assess outcomes using monitoring method developed</p> <p>3.2 Document and communicate outcomes to key personnel and stakeholders</p> <p>3.3 Identify changes required to targets and tools from strategies and improvement plans</p> <p>3.4 Promote successful strategies in development of new efficiency targets</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Analyses numerical information to measure usage and calculates metric measurements, quantities and ratios and financial data using appropriate tools
Oral communication	<ul style="list-style-type: none"> Presents information and seeks advice using structure and language appropriate to audience Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Reading	<ul style="list-style-type: none"> Identifies and analyses texts to determine legislative and regulatory requirements relevant to work area Reviews reported information to evaluate workplace strategies and improvement practices
Writing	<ul style="list-style-type: none"> Documents findings of investigations from written and oral sources according to organisational requirements Provides updates about progress using formats and language appropriate to the audience and context
Initiative and Enterprise	<ul style="list-style-type: none"> Identifies and follows legislative requirements and organisational policies and procedures associated with own role
Teamwork	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information

Skill	Description
	<ul style="list-style-type: none"> Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Planning and organising	<ul style="list-style-type: none"> Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation Uses systematic, analytical processes to set environmental targets, gather relevant information, identify and evaluate alternative approaches Evaluates outcomes of decisions to identify opportunities for improvement
Technology	<ul style="list-style-type: none"> Uses the main features and functions of digital tools to complete work tasks and access information

Unit Mapping Information

Supersedes and is equivalent to BSBSUS401 Implement and monitor environmentally sustainable work practices.

Supersedes but is not equivalent to:

- BSBSUS402 Implement an environmental management plan
- BSBSUS403 Measure, monitor and reduce carbon emissions
- BSBSUS404 Assess, implement, monitor and report on waste management
- BSBSUS405 Assess, monitor and reduce water use
- BSBSUS406 Identify and apply sustainability rating tools.

Assessment Requirements for BSBSUS411 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement and monitor at least three environmentally sustainable work practices.

In the course of the above, the candidate must:

- identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability in the workplace
- engage and consult with relevant stakeholders to develop and implement sustainability improvements, encourage feedback and to report on outcomes
- plan and organise work group activities to:
 - measure current resource usage
 - evaluate alternative solutions to workplace environmental issues
 - resolve workplace sustainability issues and generate ideas for improvements
 - evaluate and implement strategies to improve resource usage
 - comply with environmental requirements
- apply continuous improvement approaches to enhance organisation's sustainability performance
- apply change management techniques to support sustainability performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and sustainability issues
- relevant internal and external sources of information for the development of efficiency targets
- benchmarks for environmental and resource sustainability relevant to organisation

- Australian and international standards for corporate social sustainability
- continuous improvement approaches for workplace practices
- resources for monitoring sustainable work practices including:
 - questionnaires and surveys
 - visual calculations
 - supply records and invoices
 - previous internal and external audit documents
- organisational systems and procedures that relate to environmental and resource sustainability improvements, including:
 - supply chain, procurement and costing strategies
 - quality assurance
 - recommendation development and seeking approvals
 - sales strategies and operations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- environmental sustainability legislation, regulations, standards and codes
- workplace reference materials for environmental sustainability and practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC201 Use business software applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to select and use software and organise electronic information and data.

The unit applies to those who use a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare to use technology	1.1 Identify task purpose, audience, format and presentation requirements, and clarify with relevant personnel, where required 1.2 Select relevant technology and software applications to achieve requirements of the task 1.3 Adjust workspace, furniture and equipment to suit own ergonomic requirements
2. Input and process information or data	2.1 Identify and open application, according to task and organisational requirements 2.2 Enter information or data into application according to organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ensure information or data is checked and amended according to organisational and task requirements 2.4 Format information or data using appropriate application functions according to organisational and task requirements 2.5 Use relevant help functions to overcome simple issues
3. Finalise and store document	3.1 Review and edit final information or data, and prepare for storage in accordance with organisational and task requirements 3.2 Name and store document and exit application

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises and interprets information from familiar sources to determine job role and task requirements
Writing	<ul style="list-style-type: none"> Produces and amends files to meet task and organisational requirements Completes required documentation using organisational formats

Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU211 Produce digital text documents
- BSBITU212 Create and use spreadsheets
- BSBWOR204 Use business technology.

Supersedes but is not equivalent to BSBCUE301 Use multiple information systems.

Assessment Requirements for BSBTEC201 Use business software applications

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- select and use at least three business software applications on two occasions each.

In the course of the above, the candidate must:

- select and use technology safely and according to organisational requirements
- identify and address faults according to requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features of:
 - organisation's work health and safety requirements relevant to own role
 - organisation's requirements for file naming and storage
 - applications used for organising electronic information and data.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- electronic files, information and data
- workplace documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC202 Use digital technologies to communicate in a work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to effectively identify, select and use available methods of digital communication in a workplace context. These methods may include email, instant messaging and other similar platforms.

The unit applies to those who use digital technology to communicate with relevant stakeholders. This will be particularly relevant to individuals in teams that work remotely. The individual will use a limited range of practical skills and fundamental knowledge in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify purpose and methods of digital communication	1.1 Identify purpose for communication, intended audience and content of proposed communication 1.2 Identify available digital communication applications by accessing relevant sources of information and clarify with relevant personnel, where required 1.3 Select most appropriate application for communication according to available resources and relevant organisational policies and procedures

ELEMENT	PERFORMANCE CRITERIA
2. Implement procedures to send and receive digital communications	2.1 Access application for sending and receiving digital communications according to organisational policies and procedures 2.2 Create outgoing digital communication, check for accuracy and ensure that any required attachments are included according to application requirements and organisational policies and procedures 2.3 Identify urgent, confidential, personal, suspicious or dangerous digital communication and take appropriate action, clarify with relevant stakeholder, where required 2.4 Access and identify most appropriate action in response to incoming digital communications, according to organisational policies and procedures
3. Assist with managing digital communications	3.1 Follow established security levels and filters for incoming digital communications according to organisational policies and procedures 3.2 Assist relevant personnel to create plan for monitoring and maintaining digital communications across multiple applications according to organisational policies and procedures 3.3 Store digital communications and attachments according to organisational policies and procedures 3.4 Archive or permanently delete digital communications according to organisational policies and procedures 3.5 Create methods for communicating electronically with targeted groups of stakeholders as relevant to organisation

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises textual information within different materials and interprets information to determine requirements, as well as confirming accuracy of content
Writing	<ul style="list-style-type: none"> Records key information relevant to requirements and prepares simple correspondence using basic punctuation, text and correct spelling
Oral Communication	<ul style="list-style-type: none"> Obtains information through listening and questioning and uses clear and appropriate language suitable to audience

SKILL	DESCRIPTION
Self-management	<ul style="list-style-type: none">• Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Problem solving	<ul style="list-style-type: none">• Recognises and responds to routine problems in context of own work

Unit Mapping Information

Supersedes and is equivalent to BSBITU213 Use digital technologies to communicate remotely.

Assessment Requirements for BSBTEC202 Use digital technologies to communicate in a work environment

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on four occasions send digital communications
- on four occasions receive and process digital communications.

In the course of the above, the candidate must:

- follow organisational and technology provider requirements when communicating electronically across multiple digital applications, including in relation to security of communications
- follow organisational policy and procedures when managing all aspects of digital communication, including by storing, filing, archiving, and deleting inbound communications
- communicate electronically with targeted groups of colleagues, clients or similar as relevant to organisation.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- existing and emerging methods of digital communication, including strengths and limitations
- industry practice relating to digital communication etiquette in a workplace setting
- commercial sensitivities in relation to knowledge management
- organisational policies and procedures relating to the use of digital communication
- security levels and filters for digital communications.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- industry applications/platforms for communicating digitally
- relevant organisational policies and procedures
- relevant workplace documentation and resources.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC203 Research using the internet

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to plan, conduct and present research using the internet within an organisational context.

The unit applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of research in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan research	1.1 Confirm task requirements 1.2 Identify research objectives in consultation with relevant stakeholders 1.3 Identify potential sources for research information according to organisational policies and procedures 1.4 Select application and search engine according to organisational policies and procedures 1.5 Plan key search terms to be used in research
2. Conduct research	2.1 Power up digital device and access internet using selected application

ELEMENT	PERFORMANCE CRITERIA
	2.2 Open search engine according to research plan 2.3 Enter search terms according to research plan 2.4 Collect information according to research plan and organisational policies and procedures 2.5 Use relevant help functions to overcome simple issues, where required
3. Present research	3.1 Document information collected according to task requirements 3.2 Deliver document to relevant stakeholders according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises textual information within organisational and task requirements to determine work requirements
Writing	<ul style="list-style-type: none"> Records numerical and textual information in accordance with requirements of task
Oral Communication	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges with relevant stakeholders in an effort to clarify research purpose, audience and presentation requirements
Self-management	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Technology	<ul style="list-style-type: none"> Understands functions and features of specific digital applications and uses these to perform work tasks

Unit Mapping Information

No equivalent unit. New unit.

Supersedes but is not equivalent to BSBITU315 Purchase goods and services online.

Assessment Requirements for BSBTEC203 Research using the internet

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- on at least three occasions, plan, conduct, and present research on a work task using the internet.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key elements of basic research methods
- key functions of required applications
- relevant organisational policies and procedures
- key principles of documenting research.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- device user information
- relevant organisational policies and procedures
- workplace documentation and resources.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC301 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to design and produce various business documents. It includes selecting and using a range of functions on a variety of computer applications.

The unit applies to those who possess fundamental skills in computer operations. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Select and use technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Use basic design principles and ensure document design is consistent with organisational requirements 1.4 Discuss and clarify format and style with required stakeholder
2. Design document	2.1 Identify, open and create files according to task and organisational requirements 2.2 Design document and ensure efficient entry of information

ELEMENT	PERFORMANCE CRITERIA
	2.3 Use a range of functions to ensure consistency of design and layout
3. Produce document	3.1 Complete document production according to organisational policies, procedures and requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document 3.4 Use help function to overcome basic difficulties with document design and production, where required
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Modify document according to task requirements 4.3 Name and store document in accordance with organisational requirements and exit application 4.4 Present document according to task requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises and interprets textual information from a range of sources to determine and adhere to requirements
Writing	<ul style="list-style-type: none"> Develops documents using required format, accurate spelling and grammar and terminology specific to requirements Organises content to support purposes and audience of material, using clear and logical language
Self-management	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role

Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU306 Design and produce business documents
- BSBITU313 Design and produce digital text documents.

Supersedes but is not equivalent to:

- BSBINT305 Prepare business documents for the international trade of goods
- BSBITU309 Produce desktop published documents.

Assessment Requirements for BSBTEC301 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design, produce and finalise four different types of business documents, using at least two different software applications.

In the course of the above, the candidate must:

- comply with organisational policies and procedures for producing business documents
- adhere to task requirements when producing documents including:
 - applying basic design principles
 - applying consistent formatting
 - using appropriate styles
 - using correct layouts
 - proofreading
- use required data storage options.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- technology required to produce document
- key functions and features of contemporary computer applications
- organisational policies and procedures
- organisational requirements for document design, including style guide.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- relevant software applications
- style guide
- organisational policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC302 Design and produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to develop spreadsheets through the use of spreadsheet applications.

The unit applies to individuals employed in a range of environments who tend to be personally responsible for designing and working with spreadsheets under minimal supervision. These individuals are generally required to have intermediate knowledge and understanding of a number of spreadsheet applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Identify task purpose and audience 1.2 Identify task requirements according to data entry, storage, output, timeline and presentation format 1.3 Select most appropriate application to produce spreadsheet, according to available resources and organisational policies and procedures
2. Plan spreadsheet design	2.1 Design spreadsheet design to suit purpose, audience and information requirements of task 2.2 Confirm spreadsheet is designed to enhance readability and appearance, and is in accordance with organisational and task

ELEMENT	PERFORMANCE CRITERIA
	<p>requirements</p> <p>2.3 Use available application functions and confirm consistency of design and layout, adhering to organisational and task requirements</p>
3. Create spreadsheet	<p>3.1 Enter data, check and amend to maintain consistency of design and layout, in accordance with organisational and task requirements</p> <p>3.2 Format spreadsheet using application functions, according to organisational policies and procedures and presentation requirements</p> <p>3.3 Consult with relevant stakeholders and confirm formulae are tested and output meets task requirements</p> <p>3.4 Use required help functions and action issues as required</p>
4. Produce charts	<p>4.1 Select chart type and design that offers analysis of numerical data, and meets organisational and task requirements</p> <p>4.2 Create charts using required data range in spreadsheet</p> <p>4.3 Modify chart type and layout using formatting features, adhering to organisational and task requirements</p>
5. Finalise and present spreadsheets	<p>5.1 Review and edit final spreadsheet and accompanying charts, and prepare for delivery according to task requirements</p> <p>5.2 Deliver document to required stakeholders according to organisational requirements, policies and procedures</p> <p>5.3 Name and store spreadsheet according to organisational requirements and exit application</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises and interprets numerical and textual information to determine organisational and task requirements
Writing	<ul style="list-style-type: none"> Inputs numerical and key reporting information when creating and finalising spreadsheets Uses format, layout, style guides and standard naming conventions to organise data according to purpose and audience
Numeracy	<ul style="list-style-type: none"> Uses mathematical equations to create simple formulae and validate numerical data

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none">• Collaborates with others to achieve joint outcomes

Unit Mapping Information

Supersedes and is equivalent to BSBITU314 Design and produce spreadsheets.

Supersedes but is not equivalent to BSBITU311 Use simple relational databases.

Assessment Requirements for BSBTEC302 Design and produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, design, produce and finalise a spreadsheet on at least four occasions.

In the course of the above, the candidate must:

- produce spreadsheet documents that align to document purpose and appropriate to target audience
- design spreadsheets using:
 - formulas and functions with:
 - addition, subtraction, division, multiplication
 - brackets
- design spreadsheets that address a range of data and organisational requirements
- use software functions to create spreadsheets that adhere to organisational requirements relating to style and presentation
- use relevant help functions to rectify document issues
- produce spreadsheet document in appropriate format for review, including ability to create and modify intermediate-level charts that analyse the dataset.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key elements of formatting of spreadsheets appropriate to workplace documents, including the ability to calculate:
 - sum totals
 - averages
 - counts of values
- key features of spreadsheet applications, both cloud-based and non-cloud based

- key features of organisational guidelines on spreadsheet design and use
- organisational requirements for ergonomics, work periods and breaks, and sustainability in relation to spreadsheet production.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- industry software/applications for producing spreadsheets
- digital device user information
- relevant legislation and codes of practice
- relevant organisational policies and procedures
- workplace documentation and resources, including style guide.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC401 Design and produce complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to design and develop business documents using complex technical features of word processing software.

The unit applies to those who work in a range of business environments and have skills which may be applied in the provision of administrative support within an enterprise, or by technical experts responsible for producing their own word-processed documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Digital Competence - Technology Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to produce word processed documents	1.1 Identify ergonomics requirements and organise personal work environment 1.2 Use safe work practices to ensure ergonomic, energy and resource conservation requirements are met 1.3 Identify document purpose, audience and presentation requirements, and clarify with relevant stakeholders, where required 1.4 Identify organisational requirements for text-based business documents to ensure consistency of style and image 1.5 Evaluate complex technical functions of software for usefulness in fulfilling requirements of the task

ELEMENT	PERFORMANCE CRITERIA
2. Design complex documents	<p>2.1 Design document structure and layout according to purpose, audience and information requirements of task</p> <p>2.2 Design document to enhance readability and appearance, and to meet organisational and task requirements for style and layout</p> <p>2.3 Use complex software functions to enable efficient manipulation of information and other material, and ensure consistency of design and layout</p> <p>2.4 Use help function to overcome problems with document design and production</p>
3. Add complex tables and other data	<p>3.1 Insert a table into document, change cells according to information requirements</p> <p>3.2 Format rows and columns, where required</p> <p>3.3 Insert images and other data and format, where required</p>
4. Produce documents	<p>4.1 Develop documents, and achieve required results</p> <p>4.2 Preview, adjust and publish documents according to organisational and task requirements</p> <p>4.3 Name and store documents in accordance with organisational requirements and exit application</p> <p>4.4 Prepare document according to organisational requirements, policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Recognises and interprets textual information from a range of resources to determine and confirm requirements and to assist with document issues
Writing	<ul style="list-style-type: none"> Develops material using required format and incorporating technical functions to meet business needs
Self-management	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Teamwork	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes
Planning and organising	<ul style="list-style-type: none"> Applies formal processes when planning complex tasks, producing plans with logically sequenced steps

Unit Mapping Information

Supersedes and is equivalent to BSBITU401 Design and develop complex text documents.

Supersedes but is not equivalent to BSBITU404 Produce complex desktop published documents.

Assessment Requirements for BSBTEC401 Design and produce complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare design and produce at least four complex text documents.

In the course of the above, the candidate must:

- follow organisational and safe work practices
- adhere to organisational requirements for:
 - producing documents within designated timelines
 - naming and storing documents
- adhere to task requirements when producing complex documents including:
 - using appropriate styles and layout consistently throughout the document
 - using correct formatting and document structure
- use the following features:
 - mail merge
 - document styles
 - references (footnotes/endnotes)
 - Table of Contents
 - paragraph
 - line spacing
 - section breaks
 - alternating headers
 - footers
- resolve issues by referring to user documentation and online help
- apply knowledge of complex operation and functions of industry software applications.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- formatting styles and their effect on formatting, readability and appearance of documents
- organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- purpose and contents of an organisational style guide
- key aspects of organisational policies and procedures.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

- This includes access to:
- organisational policies and procedures
- workplace documentation and resources relevant to performance evidence
- industry software packages and user instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTWK401 Build and maintain business relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to establish, develop and maintain effective work relationships and networks through relationship building and negotiation skills required by workers. These workers may be within an organisation as well as freelance or contract workers.

The unit applies to individuals with a broad knowledge of networking and negotiation who contribute to creating solutions to unpredictable problems. They may have responsibility for and provide guidance to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Social Competence – Teamwork and Relationships

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish business relationships	1.1 Identify business development and networking objectives of the organisation and own role 1.2 Determine networking opportunities according to identified objectives and organisational policies and procedures 1.3 Confirm communication channels for information exchange with business contacts 1.4 Engage with business contacts using written and verbal communication to promote business opportunities
2. Maintain business	2.1 Use communication techniques to establish rapport with

ELEMENT	PERFORMANCE CRITERIA
relationships	business contacts 2.2 Identify barriers to business development opportunities 2.3 Use problem-solving techniques to negotiate solutions to identified situations 2.4 Seek specialist advice in the development of contacts, as required
3. Build and improve business relationships	3.1 Develop strategies to represent and promote organisational interests to contacts 3.2 Participate in formal and informal networks that promote the organisation 3.3 Communicate issues regarding relationships in writing and verbally to organisational personnel 3.4 Seek and respond to feedback from management on the quality of relationships with business contacts

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> Seeks opportunities to develop and extend expertise and identify areas for professional improvement
Reading	<ul style="list-style-type: none"> Sources and analyses information to establish networks that consistently promotes business opportunities
Writing	<ul style="list-style-type: none"> Uses appropriate vocabulary, layout and grammatical structure to convey ideas and information
Oral Communication	<ul style="list-style-type: none"> Uses persuasive language and appropriate non-verbal features to achieve mutually acceptable outcomes Uses active listening and questioning techniques to confirm understanding
Initiative and enterprise	<ul style="list-style-type: none"> Identifies and adheres to organisational policies and procedures
Teamwork	<ul style="list-style-type: none"> Looks for ways to establish connections and build genuine understanding with a diverse range of people Cultivates relationships with people with the knowledge, skills and influence to get things done or provide support

SKILL	DESCRIPTION
Planning and organising	<ul style="list-style-type: none">• Takes responsibility for planning, sequencing and implementing tasks required to build and maintain networks• Uses analytical processes to identify problems, gather relevant information, evaluate options and determine solutions

Unit Mapping Information

Supersedes and is equivalent to BSBREL401 Establish networks.

Supersedes but is not equivalent to:

- BSBREL402 Build client relationships and business networks
- BSBREL403 Implement international client relationship strategies
- BSBSMB411 Manage specialist external advisory services.

Assessment Requirements for BSBTWK401 Build and maintain business relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- communicate with others to build and maintain at least two different business relationships.

In the course of the above, the candidate must:

- promote professional business relationship using written and verbal communication techniques
- identify methods to improve business relationships
- participate in formal and informal networking opportunities that promote the business.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- strategies for establishing and maintaining business relationships
- methods of engaging with business contacts including through participation in professional networks and associations
- relevant networks, organisations, agencies, associations or individuals
- principles and techniques needed to negotiate positive outcomes
- organisational policies, plans and procedures relevant to business relationships
- methods for obtaining feedback on business relationships.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources

- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS302 Apply knowledge of WHS legislation in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the, skills and knowledge required to understand and comply with work health and safety (WHS) Acts, regulations and codes of practice in the workplace.

This unit applies to individuals who contribute to actions to achieve compliance with WHS legislation as part of their WHS responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the legal framework for WHS in	1.1 Identify and access current WHS legislation and related documentation relevant to the workplace, occupation and industry

ELEMENT	PERFORMANCE CRITERIA
the workplace	<p>1.2 Apply knowledge of the relationship between WHS Acts, regulations and codes of practice to assist in identifying WHS legislative requirements in the workplace</p> <p>1.3 Identify duty holders</p> <p>1.4 Identify legal obligations and duties for who to consult with regarding training of workers and health and safety representatives</p> <p>1.5 Identify consequences of non-compliance with WHS Acts, regulations, codes of practice, standards and organisational WHS policies, procedures, processes and systems</p>
2. Contribute to activity that reflects WHS legislative requirements	<p>2.1 Contribute to monitoring compliance with legislation</p> <p>2.2 Contribute to ensuring that workplace complies with legislation</p> <p>2.3 Identify and take appropriate action on non-compliance with legislation</p> <p>2.4 Recognise limits of own expertise and legal duties, and access help and advice when required</p>
3. Keep up-to-date with legislation and relevant publications	<p>3.1 Use relevant sources to keep up-to-date with legislation and relevant publications</p> <p>3.2 Communicate information on relevant legislative changes and relevant publications to others</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1	<ul style="list-style-type: none"> Identifies and evaluates information from formal and informal sources to update knowledge
Reading	1.1-1.5, 3.1	<ul style="list-style-type: none"> Interprets a range of textual information to determine regulatory and procedural requirements and necessary actions
Writing	2.3, 3.2	<ul style="list-style-type: none"> Documents WHS information in a sequential manner using required format, correct grammar and industry specific language
Oral	2.1, 2.2, 2.3, 3.2	<ul style="list-style-type: none"> Provides information or advice using language appropriate to audience

communication		<ul style="list-style-type: none"> • Uses listening and questioning to clarify and confirm understanding
Navigate the world of work	2.1- 2.3, 3.1	<ul style="list-style-type: none"> • Follows policies, procedures and legislative requirements relevant to own role • Keeps up to date on changes to legislation or regulations relevant to own role

Assessment Requirements for BSBWHS302 Apply knowledge of WHS legislation in the workplace

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and apply work health and safety (WHS) legislative requirements applicable to the workplace, occupation and industry, including keeping up to date with legislation and relevant publications
- identify and act on non-compliances with WHS legislation
- identify duty holders
- communicate WHS information to others
- refer issues of non-compliance to responsible persons or authorities and seek advice from appropriate sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the WHS legislative duties of self and others including limits on own expertise
- outline the key organisational WHS policies, procedures, processes and systems
- outline the key requirements in relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- identify obligations and duties for consultation and who must be consulted
- identify people who could be accessed for help
- identify the consequences of non-compliance
- explain ways to get information about compliance with legislation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans with information on compliance requirements
- relevant Acts, regulations, codes of practice, licensing requirements and standards
- guidance materials and alerts issued by the relevant WHS regulator
- relevant WHS data files
- appropriate office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS411 Implement and monitor WHS policies, procedures and programs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

The unit applies to those with supervisory responsibilities in a work area who have a broad knowledge of WHS policies and contribute well-developed skills in creating solutions to problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Provide information to work team about WHS policies and procedures	1.1 Identify and communicate relevant provisions about WHS laws to work team 1.2 Provide information about organisation's WHS policies, procedures and programs, and ensure it is readily accessible to work team 1.3 Communicate information about identified hazards and outcomes of risk assessment and control to work team
2. Implement and monitor work team consultative arrangements for managing WHS	2.1 Communicate importance of consultation mechanisms in managing WHS risks to work team 2.2 Apply consultation mechanisms to facilitate work team participation in managing work area hazards, according to organisational policies and procedures 2.3 Contribute to managing issues raised through consultation mechanisms, according to organisational consultation procedures and WHS legislative requirements 2.4 Communicate outcomes of consultation about WHS issues to work team
3. Implement and monitor organisational procedures for providing WHS training to work team	3.1 Identify and document team WHS training needs according to organisational requirements and WHS laws 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant stakeholders 3.3 Provide workplace learning opportunities to facilitate team and individual achievement of identified WHS training needs
4. Implement and monitor organisational procedures and legal requirements for identifying hazards, and assessing and controlling risks	4.1 Identify and report on hazards in work area according to organisational policies and procedures, and WHS legislative requirements 4.2 Contribute to managing and implementing hazard reports according to organisational policies and procedures, and WHS legislative requirements 4.3 Implement procedures to control risks using the hierarchy of control measures according to organisational policies and procedures, and WHS legislative requirements 4.4 Identify and report inadequacies in existing risk controls according to the hierarchy of control measures, and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, as required, to ensure prompt organisational response

ELEMENTS	PERFORMANCE CRITERIA
5. Implement and monitor organisational procedures for maintaining WHS records	<p>5.1 Complete and maintain WHS incident records of occupational injury and disease in work area according to organisational policies and procedures, and WHS legislative requirements</p> <p>5.2 Use aggregate information and data from work area records to meet organisational recordkeeping requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets and analyses WHS laws and organisational texts
Writing	<ul style="list-style-type: none"> Documents organisational WHS policies, procedures and programs according to WHS laws, using structure, layout and language suitable for audience Records WHS issues and actions taken according to reporting requirements Prepares and maintains required records using appropriate structure and vocabulary
Oral communication	<ul style="list-style-type: none"> Provides WHS organisational information and advice using structure and language suitable for audience Uses questioning and active listening to clarify understanding
Navigate the world of work	<ul style="list-style-type: none"> Adheres to legal and regulatory responsibilities, and organisational policies and procedures in relation to own WHS role and responsibilities Keeps up to date on changes to WHS laws, and related organisational policies and procedures relevant to own role
Interact with others	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols to facilitate consultation and provide feedback Initiates and contributes to facilitating consultative role: responding, explaining, clarifying and expanding on ideas and information as required Collaborates with others to achieve individual team member and team outcomes
Get the work done	<ul style="list-style-type: none"> Uses combination of logical planning and intuitive understanding of context to identify relevant information and risks, and to identify and evaluate alternative strategies Uses decision-making processes: sets and clarifies goals, gathers

Skill	Description
	<p>information, and identifies and evaluates choices against a set of criteria</p> <ul style="list-style-type: none">• Takes responsibility for reporting WHS risk control inadequacies• Uses processes to monitor implementation of WHS organisational procedures

Unit Mapping Information

Supersedes and is equivalent to BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements.

Assessment Requirements for BSBWHS411 Implement and monitor WHS policies, procedures and programs

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- implement and monitor the work health and safety (WHS) policies, procedures and programs for one work area in an organisation.

During the above, the candidate must:

- explain relevant WHS information clearly and accurately to work team
- provide work team with access to WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures, according to WHS legislative and organisational requirements, for:
 - consultation on and communication about WHS hazards and risks
 - WHS training needs and learning opportunities
 - WHS records
 - using WHS aggregate data relating to hazards and risk control.

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- key provisions of commonwealth and state/territory WHS laws that apply to the business, and procedures for their application in the work area
- organisational policies and procedures for:
 - consulting during WHS issue management
 - identifying hazards and managing risks, including using aggregate information and work area data
 - incident response, investigation and reporting

- legal responsibilities and duties of managers, supervisors, persons conducting a business or undertaking (PCBUs) and workers in relation to WHS risk management in the workplace
- procedures for assessing implications of near misses in relation to incidents, injuries and illnesses in the work area
- effective consultation mechanisms in managing health and safety risks in the workplace
- features of effective workplace learning opportunities, including coaching and mentoring assistance that facilitates team and individual achievement of WHS training needs
- key principles and components of the hierarchy of control measures
- procedures for applying the hierarchy of control measures in own work area.

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- actual workplace or simulated environment
- workplace equipment and resources
- examples of documents about workplace safety, hazard identification and risk assessment
- WHS laws and organisational documentation required to demonstrate the performance evidence
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS431 Develop processes and procedures for controlling hazardous chemicals in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to develop processes and procedures for controlling hazardous chemicals in the workplace, and then monitoring their effectiveness. The unit requires the application of knowledge associated with work health and safety (WHS) legislation, and organisational policies and procedures relating to controlling hazardous chemicals.

The unit applies to those who work under supervision and use some discretion and judgement to respond to monitoring hazardous chemicals in the workplace. It applies to hazardous chemicals with the potential to harm human health, which may be solids, liquids or gases – pure substances or mixtures. When used in the workplace these substances often generate vapours, fumes, dusts and/or mists.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.
3. For the purposes of this unit of competency ‘safe systems of work’ refers to a formal procedure that results from systematic examination of a task in order to identify all the hazards. It defines safe methods to ensure that hazards are eliminated or, where this is not possible, risks are minimised.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to develop processes and procedures to control hazardous chemicals in the workplace	1.1 Identify and source current WHS laws, and organisational policies and procedures relating to controlling hazardous chemicals 1.2 Identify hazardous chemicals used in, or created by, workplace 1.3 Identify workplace tasks involving hazardous chemicals 1.4 Use safety data sheets (SDSs) and other guidance to determine potential worker exposure to identified hazardous chemicals 1.5 Seek specialist advice during preparation phase, as required
2. Develop processes and procedures to control hazardous chemicals in the workplace	2.1 Assess risks associated with identified hazardous chemicals 2.2 Use information from workplace environmental monitoring to determine compliance with exposure standards, environmental requirements, storage specifications or associated risk management strategies 2.3 Develop safe systems of work that include suitable risk control measures, and processes and procedures for those systems 2.4 Seek and integrate feedback from required personnel about developed processes and procedures 2.5 Communicate and promote developed processes and procedures to required personnel
3. Monitor effectiveness of processes and procedures developed to control hazardous chemicals in the workplace	3.1 Review workplace implementation of control processes and procedures 3.2 Identify non-compliance with control processes and procedures 3.3 Implement training and development procedures and

ELEMENTS	PERFORMANCE CRITERIA
	protocols to address areas of identified non-compliance
4. Report on effectiveness of processes and procedures in controlling hazardous chemicals in the workplace	<p>4.1 Provide feedback on outcomes of workplace monitoring to required personnel</p> <p>4.2 Record outcomes of monitoring process and distribute to required personnel according to workplace policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Locates, interprets and analyses WHS legislative and workplace information about hazardous chemicals
Writing	<ul style="list-style-type: none"> Uses appropriate organisational formats and industry-specific vocabulary to document control processes and procedures
Oral communication	<ul style="list-style-type: none"> Uses structure and language suitable for audience to communicate information and contribute ideas about hazardous chemical control
Navigate the world of work	<ul style="list-style-type: none"> Adheres to legal and regulatory responsibilities, and organisational policies and procedures in relation to hazardous chemicals Keeps up to date on changes to WHS laws, and related organisational policies and procedures relevant to own role
Interact with others	<ul style="list-style-type: none"> Cooperates with others and contributes to specific activities requiring joint responsibility and accountability

Assessment Requirements for BSBWHS431 Develop processes and procedures for controlling hazardous chemicals in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- on at least two different occasions, develop processes and procedures to control hazardous chemicals in the workplace.

During each of these occasions, the candidate must:

- identify hazardous chemicals in the workplace through inspections and consultation with required personnel
- monitor and report on implementation of control processes and procedures
- communicate requirements and compliance associated with hazardous chemicals in the workplace
- comply with work health and safety (WHS) requirements for hazardous chemical monitoring
- implement training and development opportunities to address non-compliance
- identify WHS duty holders and their duties, and seek specialist advice as required.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- range of common workplace hazardous chemicals and the origin and nature of associated harm
- requirements for controlling hazardous chemicals as specified in:
 - relevant WHS laws, licences and permit conditions
 - organisational WHS policies, procedures, processes and systems

- documentation about the safe use, handling, processing, storage, transportation, and disposal of hazardous chemicals in the workplace, including safety data sheets (SDSs)
- risk control processes and procedures, including:
 - identifying hazards and assessing risks
 - responding to incidents involving hazardous chemicals
- organisational policies and procedures for:
 - accessing internal and external sources of WHS information and data
 - recording outcomes of monitoring process and distributing to required personnel according to workplace policies and procedures
- key features and components of controls for hazardous chemicals in the workplace, including:
 - workplace register for hazardous chemicals
 - labelling of hazardous chemicals
 - workplace signposting
 - current and complete SDSs for hazardous chemicals in the workplace
 - risk controls in line with the hierarchy of control measures
 - safe work practices that eliminate, or where this is not possible, minimise risks
- emerging issues about hazardous chemicals and identifying potential risks from exposure to hazardous chemicals
- hierarchy of control measures suited to identified hazardous chemicals
- training and development procedures and protocols.
-

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment and resources
- WHS laws, standards and guidelines required to demonstrate the performance evidence
- organisational policies, procedures, processes and systems required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to lead the management of work health and safety (WHS) risks in an organisation. The unit includes facilitating the identification of hazards and potential hazards, leading the assessment of associated risks, selecting and implementing suitable risk controls, and evaluating the overall effectiveness of the organisational WHS risk management process. It involves communicating with stakeholders throughout the process.

The unit applies to those in an organisation who provide specialised knowledge and guidance to a range of personnel when leading the management of WHS risks.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
----------	----------------------

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Facilitate identification of WHS risk management requirements	1.1 Identify and review internal and external sources of WHS information and data that apply to risk management processes 1.2 Identify legislative requirements for WHS risk management 1.3 Identify duty holders, individuals and/or parties to consult about and participate in risk management processes, according to organisational and legislative requirements 1.4 Identify and communicate roles and responsibilities of individuals and/or parties that impact on risk management 1.5 Identify organisation-specific factors that will impact on hazard identification, risk assessment and risk controls 1.6 Confirm that risk management scope is clearly defined according to organisational policies and procedures
2. Lead risk assessment	2.1 Lead hazard identification process according to organisational policies and procedures 2.2 Identify and document risk factors as they apply to identified hazards according to organisational policies and procedures 2.3 Apply knowledge of WHS laws, workplace WHS information and data, and identified hazards and risk factors to analyse and assess risk 2.4 Document risk assessment according to organisational policies and procedures, and legislative requirements 2.5 Communicate outcomes of risk assessment to required personnel according to organisational and legislative requirements
3. Lead risk control	3.1 Identify organisational risk control policies and procedures appropriate to identified hazards 3.2 Select suitable risk controls according to assessed level of risk, organisational WHS hazard and risk control policies and procedures, and WHS laws 3.3 Plan to implement selected risk controls according to organisation's WHS management system (WHSMS) and WHS information system (WHISIS) 3.4 Implement selected risk controls according to organisational policies and procedures

ELEMENTS	PERFORMANCE CRITERIA
	3.5 Document and communicate selected risk controls to required personnel, according to organisational and legislative requirements
4. Evaluate effectiveness of WHS risk management process	<p>4.1 Establish nature and scope of evaluation process and key performance indicators</p> <p>4.2 Review effectiveness of implemented risk management process according to organisation's WHSMS and legislative requirements</p> <p>4.3 Modify risk management process as required in response to evaluation</p> <p>4.4 Document risk management process according to WHSIS requirements</p> <p>4.5 Communicate evaluation findings according to organisational requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Organises, analyses and integrates information from a range of sources
Writing	<ul style="list-style-type: none"> Documents results of investigations using clear and comprehensible language and layout
Oral Communication	<ul style="list-style-type: none"> Uses listening and questioning techniques to clarify understanding of others' views Presents information with varying level of technical vocabulary to suit audience
Numeracy	<ul style="list-style-type: none"> Collates, interprets and compares mathematical and statistical information relevant to requirements
Navigate	<ul style="list-style-type: none"> Considers legal and regulatory

Skill	Description
the world of work	<p>responsibilities when implementing, monitoring or reviewing risk-management processes</p> <ul style="list-style-type: none"> Leads effective consultation and participation during all stages of WHS risk-management process
Interact with others	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with others Plays a lead role in situations requiring effective collaboration skills, demonstrating the ability to guide discussions and outcomes
Get the work done	<ul style="list-style-type: none"> Develops plans or processes to manage WHS risk management tasks, with an awareness of how they contribute to operational and strategic goals Determines whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process Applies problem-solving processes to determine solutions to WHS risk management issues Uses analytical and lateral thinking to review practices and suggest improvements Uses a range of digitally-based technology and applications to access, organise and share relevant information in effective ways

Unit Mapping Information

Supersedes and is equivalent to BSBWHS503 Contribute to the systematic management of WHS risk.

Assessment Requirements for BSBWHS513 Lead WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- plan, implement and evaluate a systematic process for managing work health and safety (WHS) risk in a work area.

During the above, the candidate must:

- identify, interpret and apply information from a range of sources, including organisational and legislative requirements
- review WHS risk-management process according to established scope and key performance indicators
- consult effectively with required stakeholders using appropriate interpersonal communication skills.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- commonwealth and state/territory WHS laws relating to WHS risk management, including WHS Acts, regulations, codes of practice and standards
- WHS information and data that applies to WHS risk-management process, including:
 - organisational and duty holder legal requirements
 - organisational policies and procedures relating to identifying hazards, assessing risks and implementing risk controls
 - key components of the work health and safety management system (WHSMS)
- internal and external sources of WHS information and data, and procedures for accessing them

- organisational behaviour and culture in relation to WHS risk management activities and their impact on WHS and the work team, including organisation's risk appetite
- key components of effective consultation and participation strategies
- tools and techniques to:
 - identify health and safety hazards
 - assess risks, taking into account nature and impact of risk, and likelihood of risk arising
 - identify and select suitable risk controls
 - facilitate effective communication and consultation processes, and identify key personnel related to communication
- application and limitations of techniques and tools for identifying hazards, and analysing and assessing risks
- hierarchy of control measures:
 - its use in establishing level of risk
 - factors limiting effectiveness of types of controls
 - role and limitations of procedural controls
 - use of personal protective equipment
- other functional areas in the organisation that impact on the management of WHS-related risks
- impact of workforce characteristics and composition on WHS risk and its management, including:
 - cultural background/diversity
 - gender
 - labour market changes
 - levels of language, literacy and numeracy skills in the workforce
 - workforce structure and organisation, including part-time, casual and contract workers, shift rosters and geographical location
 - workers with specific support needs and limitations
 - workplace cultural attitudes towards alcohol and other drug use
- principles of decision-making.
-

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment and resources
- WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS515 Lead initial response to and investigate WHS incidents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to lead the initial response to work health and safety (WHS) incidents. The unit also includes planning, conducting and reporting on investigations of WHS incidents that have resulted in, or have the potential to result in, injury or damage. This may include accessing specialist expertise.

The unit applies to those who work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts. It does not apply to those undertaking an investigation in order to provide legal advice or prepare for legal proceedings.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Lead the initial response to incident	1.1 Identify required initial response to incident according to established organisational response plan 1.2 Implement initial response according to plan, and organisational and legislative requirements 1.3 Confirm sufficiency and suitability of implemented initial response 1.4 Consult individuals and/or parties according to organisational policies and procedures
2. Develop and resource an incident investigation plan	2.1 Identify duty holders according to WHS laws and workplace policies, procedures and systems 2.2 Define scope and purpose of investigation appropriate to nature and scope of incident 2.3 Identify, document and secure required human and other resources appropriate to nature and scope of incident, including expert advice as required 2.4 Ensure participation of, and consultation with, required stakeholders, and determine agreed processes for investigation 2.5 Identify, address and document potential barriers to investigation according to organisational requirements 2.6 Document incident investigation plan according to organisational and WHS legislative requirements
3. Collect incident information and data	3.1 Identify and access relevant and reliable sources of incident information and data according to organisational policies and protocols, suitable causation model and legislative requirements 3.2 Inspect incident site, equipment and other evidence according to investigation plan, organisational procedures and legislative requirements 3.3 Present collected information and data in required format
4. Lead an incident investigation that is not part of providing legal advice or preparing for legal	4.1 Brief investigation team on investigation requirements and incident causation model 4.2 Construct and document timeline of events leading up

ELEMENTS	PERFORMANCE CRITERIA
proceedings	<p>to incident</p> <p>4.3 Coordinate investigation of key events, conditions and/or circumstances that contributed to incident</p> <p>4.4 Develop recommendations, interventions and practical measures for investigation report</p>
5. Record and report WHS incident investigation	<p>5.1 Document investigation evidence and basis for conclusions and recommendations</p> <p>5.2 Prepare investigation report according to organisational procedures and WHS legislative requirements</p> <p>5.3 Implement organisational and WHS legislative recordkeeping protocols and procedures in relation to investigation report</p> <p>5.4 Communicate report to required individuals and/or parties according to organisational policies and procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Reviews and interprets WHS legislative texts relating to WHS incidents Analyses reports and other material to determine required course of action
Writing	<ul style="list-style-type: none"> Documents procedures, plans and outcomes using appropriate organisational formats and industry-specific terminology Develops reports using structure, format and language appropriate for report purpose and audience
Oral communication	<ul style="list-style-type: none"> Uses appropriate language and non-verbal features to provide support, give instructions or

Skill	Description
Communication	<ul style="list-style-type: none"> request information Listens closely to extract main ideas and to evaluate initial responses for accuracy and validity
Numeracy	<ul style="list-style-type: none"> Extracts and evaluates the numerate and graphical information embedded in sources of incident information and data Performs calculations in relation to resource requirements, timelines and evaluation measures, and the impact and implications of incidents
Navigate the world of work	<ul style="list-style-type: none"> Develops, implements or modifies workplace procedures applicable to investigation contexts Keeps up to date on changes to WHS laws relevant to own role and responsibilities, and considers their implications when negotiating, planning and undertaking work
Interact with others	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with parties involved in various investigation stages Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction Takes a leadership role in developing team understanding of investigation requirements
Get the work done	<ul style="list-style-type: none"> Uses logical planning processes and understanding of context to: <ul style="list-style-type: none"> identify relevant information and risks identify and evaluate alternative strategies and resources for investigation processes Sequences and schedules complex activities, monitors implementation and manages relevant

Skill	Description

Assessment Requirements for BSBWHS515 Lead initial response to and investigate WHS incidents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- lead the initial response to one work health and safety (WHS) incident that complies with legislative and organisational requirements
- prepare, record and communicate incident investigation report that addresses immediate and underlying causes of incident and recommends practical prevention measures, according to organisational and WHS legislative requirements.

During the above, the candidate must:

- systematically develop and document a plan to investigate the incident
- collect, use and document information and data relevant to incident investigation
- establish key events, conditions and/or circumstances that contributed to the incident
- identify actions required to respond to the incident, including any recommendations for changes to WHS arrangements.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- WHS laws applicable to WHS incidents and their investigation
- organisational WHS policies, procedures, processes, systems, roles and responsibilities relating to responding to and investigating WHS incidents:
 - incident response plan that meets legislative and organisational requirements
 - protocols and procedures for investigation, including preserving incident site as required
 - protocols for maintaining objectivity, confidentiality, privacy and commercial requirements during investigation of WHS incident

- information and data collection procedures that ensure their validity, admissibility and accuracy
- due diligence and duty of care requirements when investigating WHS incidents
- required format for reporting incident investigations
- common industry-accepted causation models, and their use in informing data collection and analysis
- internal and external sources of WHS information and data relevant to WHS incident investigations
- key components of incident investigation plan, including:
 - duty holders, expert advisers and key stakeholders appropriate to incident
 - agreed timelines, objectives, responsibilities, roles, documentation, actions and outcomes
 - levels of accountability
 - protocols for ensuring privacy and sensitivity throughout investigation
- key components of investigation report, including:
 - identified incident root causes
 - recommended actions, interventions and practical measures arising from investigation
 - plans for implementing and evaluating recommendations
- techniques and tools for gathering information relating to incident investigation, including:
 - questioning and active listening
 - information collection
 - accurate note taking
- types and characteristics of WHS incidents and suitable incident response processes.
-

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment and resources
- WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS518 Manage WHS hazards associated with maintenance and use of plant

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to effectively manage work health and safety (WHS) hazards and to comply with WHS laws, as they apply to the management or control of items of plant being maintained and used in a workplace. It requires strong communication skills and systematic approaches to identify and resolve WHS issues associated with plant.

The unit applies to those who provide guidance to others in the workplace in managing WHS hazards associated with plant. The unit does not apply to the design, manufacture, supply, installation, construction or commissioning of plant or issuing of licences associated with plant.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify WHS hazards associated with plant	1.1 Access sources of WHS information, data and advice relating to items of workplace plant 1.2 Inspect items of plant and identify how they are to be used, according to organisational policies and procedures 1.3 Determine WHS hazards arising from plant use, condition, suitability, location and potential abnormal situations 1.4 Consult with others to confirm hazard identification 1.5 Record and report identified hazards according to organisational policies and procedures
2. Assess WHS risks associated with plant	2.1 Access sources of information, data and advice to assist with assessing WHS risks associated with identified plant hazards 2.2 Consult with others to inform WHS risk assessment according to organisational policies and procedures 2.3 Record and report on WHS risk assessment according to WHS laws and organisational policies and procedures
3. Control WHS risks associated with maintenance and use of plant	3.1 Access sources of information, data and advice to inform development of risk controls for safe maintenance and use of plant 3.2 Develop risk controls to be implemented according to the hierarchy of control measures, WHS legislative requirements and organisational policies and procedures 3.3 Consult with, and report to, required internal and specialist personnel in relation to risk controls to be implemented 3.4 Communicate rights, obligations and duties of workplace personnel in relation to identified hazards and risk controls associated with plant 3.5 Monitor effectiveness of implemented risk controls 3.6 Record and report on implemented risk controls according to WHS legislative requirements and organisational policies and procedures
4. Advise on registration,	4.1 Identify types of plant requiring registration and tasks

ELEMENTS	PERFORMANCE CRITERIA
licensing and certification issues associated with plant	<p>requiring operator licensing and/or certification according to WHS legislative requirements</p> <p>4.2 Document registration, licensing and certification requirements according to organisational procedures</p> <p>4.3 Monitor and report compliance with WHS regulatory requirements for registration, licensing and certification according to organisational procedures</p> <p>4.4 Communicate registration, licensing and certification requirements to required personnel</p>
5. Manage training requirements for plant maintenance and operation	<p>5.1 Identify WHS-related training needs associated with plant items, and applicable registration, licensing and certification requirements</p> <p>5.2 Identify skill gaps of those maintaining and using plant, and determine and communicate their associated training needs</p> <p>5.3 Ensure training is undertaken and completed prior to commencing work with new plant and/or new system of work</p> <p>5.4 Maintain training records according to WHS requirements and organisational policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses a wide range of WHS-related technical and non-technical information and data to determine actions, and adheres to requirements associated with plant maintenance and use
Writing	<ul style="list-style-type: none"> Uses appropriate formats, vocabulary and grammatical structures to record, report and present information associated with plant
Oral	<ul style="list-style-type: none"> Explains information clearly and

Skill	Description
Communication	involves others in collaborative discussions using listening and questioning techniques
Numeracy	<ul style="list-style-type: none"> Collates, interprets and compares mathematical and statistical information
Navigate the world of work	<ul style="list-style-type: none"> Follows WHS policies, procedures and legislative requirements, and identifies organisational implications of new WHS laws Modifies or develops systems of work to comply with legislative and organisational requirements
Interact with others	<ul style="list-style-type: none"> Establishes and uses appropriate conventions and protocols when communicating with others regarding management of WHS hazards associated with plant
Get the work done	<ul style="list-style-type: none"> Develops and applies organisational processes to aid compliance with WHS legislative requirements Sequences and schedules own activities, monitors implementation, records progress and manages relevant communication Systematically gathers and analyses information and evaluates options in order to make informed decisions Evaluates effectiveness of systems and processes to inform decisions on how to implement risk control improvements Fully utilises features of digital tools to complete tasks

Unit Mapping Information

No equivalent unit.

Supersedes and is equivalent to BSBWHS508 Manage WHS hazards associated with plant.

Assessment Requirements for BSBWHS518 Manage WHS hazards associated with maintenance and use of plant

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- develop and implement work health and safety (WHS) related risk controls for at least two different items of plant according to the hierarchy of control measures, WHS legislative requirements and organisational policies and procedures
- identify and manage licensing and training requirements associated with at least two different items of plant.

During the above, the candidate must:

- manage effective identification of hazards
- communicate, according to established protocols, to:
 - advise relevant personnel of their rights, obligations, and duties in relation to hazards and risk controls associated with plant
 - seek specialist advice as required.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- key features of WHS Acts, regulations, codes of practice and other instruments issued by WHS regulators relating to managing WHS hazards associated with plant, including role and duty of persons conducting a business or undertaking (PCBUs)
- organisational WHS policies, procedures, processes and systems relating to hazard management process, including:
 - identifying and accessing internal and external sources of WHS information and data
 - inspecting plant and its use
 - consulting with internal and external personnel

- recording and reporting identified WHS hazards
- recording and reporting risk assessment outcomes and risk controls
- developing risk controls and monitoring the effectiveness of their implementation
- documenting registration, licensing and certification requirements
- monitoring and reporting compliance with regulatory requirements for registration, licensing and certification
- basic principles of incident causation and injury processes relating to plant
- differences between a hazard and a risk
- factors that impact on risk
- hierarchy of control measures and its use in choosing between different risk controls
- strategies for identifying risk controls and monitoring their effectiveness, including:
 - workplace inspections
 - robotic and technological processes, and their potential risks and limitations
 - review of adequacy of plant operating procedures
- high-risk work licences required for specific plant
- methods for providing evidence of compliance with WHS laws
- plant-specific knowledge:
 - basic physics of fluids under pressure and pressure vessels, and behaviour of pressurised fluid when pressure is released
 - hazards associated with plant
 - systems of work associated with plant
 - industry practices related to permit to work, and isolation and tag-out systems
 - registration requirements of plant, licensing and certification competencies
- risk controls relating to operation of plant, including:
 - strategies for guarding moving parts in machinery
 - access and egress
 - dangerous parts
 - emergency stops and warning devices
- WHS-related training requirements for plant operators relating to:
 - items of new plant
 - new or changed systems of work associated with plant.
-

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
- sources of information, data and advice in relation to plant hazards

- workplace equipment and resources, including manufacturer manuals, specifications, and operational information and data
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBWRT311 Write simple documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, draft and finalise three different simple documents that accurately convey the required basic information in a format suitable for the intended audience and purpose according to organisational policies and procedures for document production.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- processes for checking:
 - basic readability, grammar, spelling, sentence and paragraph sequencing and structure, and punctuation
 - suitability of document for audience, purpose, and format
- organisational policies and procedures relating to written communication
- written communication methods, including:
 - general emails
 - procedures
 - business letters
 - meeting agendas
- different formats, styles and structures for documents.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources to assist in the production of documents

- organisational policies and procedures
- examples of documents to review.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBWRT411 Write complex documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, draft and finalise three different complex documents that convey the required information in a format suitable for the intended audience and purpose according to organisational policies and procedures for document production.

In the course of the above, the candidate must:

- review and analyse a range of information sources
- use business technology to apply formatting and incorporate graphics
- apply organisation style guide/house style.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisation style guide/house style
- format and its impact on readability, cohesion and appearance of document
- categories and logical sequences of information
- rules and conventions for written English
- key features of word processing software
- key features of written communication methods, including:
 - general emails
 - procedures
 - business letters
 - meeting agendas
- organisational policies and procedures relating to written communication
- process for checking:
 - suitability of document for audience, purpose, format, and structure

- grammar, spelling and style for accuracy and punctuation
- key text elements including basic design elements.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources
- organisational policies and procedures
- organisational style guides.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBXCMB01 Engage in workplace communication

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Application

This unit describes the skills and knowledge required to communicate (through written, oral and nonverbal form) in the workplace within an industry.

This unit applies to a wide range of workers, but has a specific focus on the communication skills required for workers with limited responsibility for others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cross Sector Skill

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan workplace communication	1.1 Establish audience and purpose of workplace communication 1.2 Identify information needs and communication requirements of intended recipients of workplace communication 1.3 Establish methods of communication available to convey message or information based on work context

	<p>1.4 Select appropriate method(s) of communication to convey messages or information</p> <p>1.5 Plan content of message or communication</p>
2. Undertake routine communication	<p>2.1 Communicate message or information according to organisational requirements and in a manner that is respectful and clear in meaning</p> <p>2.2 Adjust communication methods to enable effective communication with those from diverse backgrounds as required</p> <p>2.3 Receive workplace information and instructions, and interpret and clarify as needed</p> <p>2.4 Respond to communications according to requirements of the message</p> <p>2.5 Identify and report any communication challenges to appropriate person</p>
3. Participate in workplace communication	<p>3.1 Clearly contribute ideas and information to workplace discussions</p> <p>3.2 Support others to communicate in workplace discussions through courteous and professional behaviour</p> <p>3.3 Use active listening and questioning techniques to clarify issues in a group situation</p> <p>3.4 Seek feedback from others on effectiveness of communication</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Navigate the world of work	<ul style="list-style-type: none"> Understands nature and purpose of own role and associated responsibilities and how it contributes to organisational goals and outcomes
Get the work done	<ul style="list-style-type: none"> Uses problem-solving skills to identify and analyse issues or barriers, consider options and develop responses and opportunities for improvement Uses digital technology to find, record or communicate basic information

Unit Mapping Information

No equivalent unit. New unit.

Assessment Requirements for BSBXCM301 Engage in workplace communication

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria, and foundation skills of this unit, including on at least one occasion, evidence of the ability to:

- identify the most appropriate method of communication for the intended audience
- prepare written material that is clear in meaning and format according to organisational requirements
- demonstrate active listening and questioning techniques in a workplace discussion
- communicate information and ideas verbally in a workplace discussion, considering the needs of those from diverse backgrounds
- identify and report any communication challenges to superiors
- seek feedback from others on effectiveness of communication
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislative requirements relevant to workplace communication
- organisational requirements relevant to workplace communication (including digital form):
 - ethical behaviour guidelines from state or federal governments
 - workplace policies
 - codes of conduct
 - organisational reputation and culture
- techniques to resolve communication challenges

- methods and techniques to participate in workplace discussions, including active listening, questioning and providing feedback
- key principles of cross-cultural communication and communication with individuals with special needs or disabilities
- communication methods suited to audience and workplace requirement:
 - verbal means: telephones, mobile devices, video conference
 - written means: email, SMS, social media
 - Internet of Things (IoT)
- communication challenges relevant to performance evidence:
 - conflicts with clients or team members
 - potential risks or safety hazards
 - unethical or inappropriate communication
- key relevant features of:
 - different communication styles
 - different communication methods
 - relevant cross cultural communication techniques.

Assessment Conditions

Mandatory conditions for assessment include:

- A safe working or simulated environment

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

CHCCDE018 Develop and implement community programs

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop community programs to maximise participation.

This unit applies to workers using a community development approach to carry out work in health, community services and other sectors. Workers at this level are part of a professional team and are responsible for the supervision of others.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Community Development

Unit Sector

Community Services

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Develop program parameters.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Analyse issues of community concern to develop a community position and to ascertain the priorities for new program.
- 1.2. Confirm support and capacity for a coordinated effort and identify factors affecting service provision.

- 1.3. Undertake research to identify key stakeholders, priorities to be addressed, possible strategies and options for action.
- 1.4. Identify measures of program success and determine how to evaluate.
- 1.5. Document program parameters according to organisational policies and procedures.
2. Design programs with the community.
 - 2.1. Evaluate available program options to identify those which meet parameters.
 - 2.2. Collaborate with stakeholders to confirm preferred program options.
 - 2.3. Ensure program options for areas of high priority and relating to targeted communities meet stakeholder needs.
 - 2.4. Develop program plan in collaboration with communities and stakeholders and document according to organisational policies and procedures.
 - 2.5. Seek help from participating agencies for implementation arrangements.
 - 2.6. Develop and implement promotion and marketing strategies.
 - 2.7. Develop and maintain systems and resources for administrative support of community programs.
 - 2.8. Identify and seek resources required for implementation of programs.
3. Implement programs.
 - 3.1. Conduct and evaluate program pilot and adjust plan as required to achieve objectives.
 - 3.2. Implement and monitor programs in accordance with the program plan.
4. Evaluate programs.
 - 4.1. Evaluate program design and outcomes according to criteria and specifications identified in the program plan.
 - 4.2. Engage key stakeholders in program evaluation.
 - 4.3. Use results of evaluation for ongoing development and update of programs according to organisational policies and procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:

- interpret a variety of text to determine and confirm task

- Numeracy skills to:
- requirements.
 - select and interpret mathematical information that is relevant to budget of strategic planning.

Unit Mapping Information

Supersedes and is not equivalent to CHCCDE002 Develop and implement community programs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5e0c25cc-3d9d-4b43-80d3-bd22cc4f1e53>

Assessment Requirements for CHCCDE018 Develop and implement community programs

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop, implement and evaluate at least one community program, including:
 - developing program parameters to meet community priorities
 - collaborating with key community stakeholders to design program
 - implementing program successfully
 - evaluating and updating program.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- Commonwealth, State or Territory legislation and public policies impacting on community development processes
- social, community and youth issues impacting the local community
- contemporary economics and politics and their impact on community development
- community development approaches and frameworks:
 - asset-based
 - rights-based
 - needs-based
 - gap-based
- human rights perspectives related to:
 - gender
 - race
 - class
- key stakeholders involved in the development implementation of programs
- principles and practices of community development work:
 - structural disadvantage and inequality
 - social justice and human rights:
 - individual
 - family

- community
- society
- processes for development of community programs:
 - identification of stakeholders
 - identification of priorities
 - strategies for encouraging community collaboration
 - strategies for communicating with stakeholders
 - risk assessment and mitigation strategies
 - funding and resourcing options
- processes for implementation of community programs:
 - promotion and marketing
 - provision of administration support for programs
 - conducting program pilots
 - monitoring implementation outcomes
 - evaluating implementation outcomes
- organisational policies and procedures for:
 - documentation of plans and programs
 - updating programs.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Assessment must ensure:

- access to facilities, equipment and resources that reflect real working conditions and model industry operating conditions and contingencies
- access to Commonwealth, State or Territory legislation and public policies impacting on community development processes
- access to organisational policies and procedures
- opportunities for engagement with stakeholders and agencies involved in delivery of community programs.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Competency Field

Community Development

Unit Sector

Community Services

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Develop community engagement plan.
 - 1.1. Document the purpose and scope of the community engagement.
 - 1.2. Identify documents and community stakeholders involved in the engagement process.
 - 1.3. Analyse and determine the level of impact that stakeholders have on decisions and public participation.
 - 1.4. Specify the engagement tools and methods to be used within specified timeframes.
 - 1.5. Identify barriers to participation and strategies to address barriers.
 - 1.6. Identify and document evaluation mechanisms.
 - 1.7. Identify required resources and develop a budget proposal.
 - 1.8. Present the completed plan to management and the community for revision and endorsement.
2. Implement the engagement plan.
 - 2.1. Organise the participation activity according to the plan.
 - 2.2. Proactively identify and address the specific priorities of individuals who are disengaged.
 - 2.3. Identify and use communication methods that meet the needs of stakeholders to promote participation.
 - 2.4. Undertake the engagement activity using relevant tools and techniques.
 - 2.5. Encourage all group members to contribute their ideas constructively and respectfully during group discussions.
 - 2.6. Use strategies that enhance effective group interactions and communication.
 - 2.7. Respond to stakeholder questions and concerns according to organisational policies and procedures.
 - 2.8. Document participation feedback from stakeholders according to organisational policies and procedures.
3. Evaluate and review the outcomes and effectiveness of the engagement plan.
 - 3.1. Conduct an evaluation of the participation activities.
 - 3.2. Review the engagement activities in comparison with the plan objectives to determine effectiveness.
 - 3.3. Document the outcomes and evaluation feedback according to organisational policies and procedures.
 - 3.4. Report evaluation and review information to relevant stakeholders.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

CHCCDE028 Work within organisation and government structures to enable community development outcomes

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to work within community and government structures to enable community development processes.

This unit applies to workers using a community development approach to carry out work in the health, community services or other sectors. Workers at this level are part of a professional team and have the responsibility of supervision of others.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Community Development

Unit Sector

Community Services

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Work within the structures and processes of the organisation.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify and work within the management and governance structure, philosophy and purpose of own organisation.
- 1.2. Work within lines of decision making and accountability in contributing to planning processes in relation to

- organisation's community development activities.
- 1.3. Ensure decisions and processes are documented according to organisational policies and procedures and accessible to all involved.
2. Assess extent to which organisation supports community development work.
 - 2.1. Identify organisation policies and procedures of the local community.
 - 2.2. Use a strengths-based approach to community development work.
 - 2.3. Develop and use strategies to address identified barriers.
 3. Utilise all levels of government for community development activities and projects.
 - 3.1. Research all levels of government to identify current and future funding sources for community resources and programs.
 - 3.2. Identify potential government policy barriers and work with community stakeholders to determine strategies to address.
 - 3.3. Develop strategic alliances between the organisation, community members and relevant government agencies to support community development activities.
 - 3.4. Proactively seek opportunities to influence government decision and policy making which relates to community issues and priorities.
 - 3.5. Ensure community development activities and projects adhere to relevant Commonwealth, State or Territory legal requirements.
 - 3.6. Regularly update information about current legal requirements and develop proposals to modify organisational policies and procedures in relation to community development activities.
 4. Maintain the profile of community development work within the organisation.
 - 4.1. Use formal and informal networks to communicate the organisation's community development activities and achievements.
 - 4.2. Use communication media and activities to convey information about community development activities and achievements of the organisation to encourage support and interest.
 - 4.3. Seek and utilise opportunities to promote the organisation and its community development work and activities.
 - 4.4. Display sensitivity in details, content and extent of public comment on organisation's activities, in accordance with organisational policies and procedures for privacy and confidentiality.
 5. Maintain management support for community development activities and projects.
 - 5.1. Identify and advise management of political, social, cultural and economic trends that may impact on community development activities and projects.
 - 5.2. Ensure community development activities and project work

is carried out in accordance with the policies and procedures of the organisation.

- 5.3. Promptly address problems in implementing defined procedures to ensure resolution.
- 5.4. Identify and seek to resolve conflict between organisational policies and procedures and community and public issues.
- 5.5. Ensure information about community development activities and projects is provided within the management structures to facilitate effective and informed deliberations and decision making.
- 5.6. Prepare and present a community development activities and projects report according to organisational policy and procedures.

Assessment Requirements for CHCCDE028 Work within organisation and government structures to enable community development outcomes

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- assess aspects of at least one organisation's management structure, philosophy policies and procedures, which support community development work and the potential barriers to that work
- prepare at least one comprehensive and accurate report on community development activities and projects and present to relevant stakeholders and management.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- Commonwealth, State or Territory legislation and public policies impacting on community development processes
- structures and systems that support or present barriers to community development
- principles of participatory democracy
- management and governance structures operating with the community services industry
- key aspects of social, economic, political, cultural and economic development in the local community
- funding sources for community resources and programs at all levels of government
- managerial processes and approaches:
 - management systems and principles
 - performance standards
 - service quality development
 - consumer focus
 - enterprise agreements
 - performance monitoring and review
- change management principles
- organisational policies and procedures for:
 - completion of community development activities and project work
 - documentation

- privacy and confidentiality.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Assessment must ensure:

- access to facilities, equipment and resources that reflect real working conditions and model industry operating conditions and contingencies
- access to Commonwealth, State or Territory legislation and public policies impacting on community development processes
- access to organisational policies and procedures
- opportunities for engagement with community stakeholders.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

CHCDIV002 Promote Aboriginal and/or Torres Strait Islander cultural safety

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.</p>

Application

The unit describes the skills and knowledge required to identify Aboriginal and/or Torres Strait Islander cultural safety issues in the workplace, model cultural safety in own work practice, and develop strategies to enhance cultural safety.

This unit applies to people working in a broad range of roles including those involved in direct client service, program planning, development and evaluation contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

Elements define the essential outcomes

1. Identify cultural safety issues in the workplace

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element

1.1 Identify the potential impact of cultural factors on service delivery to Aboriginal and/or Torres Strait Islander clients

1.2 Identify critical issues that influence relationships and communication with Aboriginal and/or Torres Strait

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

Islander people

1.3 Establish key aspects of cultural safety in consultation with Aboriginal and/or Torres Strait Islander people

1.4 Evaluate the extent to which cultural safety is integrated in own work and workplace

2. Model cultural safety in own work

2.1 Ensure work practices are grounded in awareness of one's own cultural bias

2.2 Reflect awareness of own and other cultures in work practices

2.3 Use communication techniques and work practices that show respect for the cultural differences of Aboriginal and/or Torres Strait Islander people

2.4 Engage with Aboriginal and/or Torres Strait Islander interpreters and colleagues as cultural brokers, according to situation needs

3. Develop strategies for improved cultural safety

3.1 Support the development of effective partnerships between staff, Aboriginal and/or Torres Strait Islander people and their communities

3.2 Identify and utilise resources to promote partnerships

3.3 Devise and document ways to support the delivery of services and programs that are culturally safe and encourage increased participation

3.4 Integrate strategies that encourage self-determination and community control in services and programs

4. Evaluate cultural safety strategies

4.1 Agree outcomes against which cultural safety strategies can be measured

4.2 Involve Aboriginal and/or Torres Strait Islander people in evaluations

4.3 Evaluate programs and services against desired outcomes

ELEMENT

Elements define the essential outcomes

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element

4.4 Revise strategies based on evaluation with appropriate engagement of Aboriginal and/or Torres Strait Islander people

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Links

Assessment Requirements for CHCDIV002 Promote Aboriginal and/or Torres Strait Islander cultural safety

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- promoted Aboriginal and/or Torres Strait Islander cultural safety in the context of at least 1 workplace
- researched culture and history, the impact of European settlement, loss of land and culture and the importance of lore and kinship
- evaluated ways to improve communication with Aboriginal and/or Torres Strait Islander peoples who may be clients or colleagues.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- concept of Aboriginal and/or Torres Strait Islander cultural safety in the community services and health context, and its relationship with:
 - cultural awareness
 - cultural competence
- legislative context for Aboriginal and/or Torres Strait Islander cultural safety
- the diversity of Aboriginal and/or Torres Strait Islander cultures
- historical, social, political and economic issues affecting Aboriginal and/or Torres Strait Islander people and their engagement with community services and health systems, including:
 - impact of European settlement

- loss of land and culture
- racism and discrimination
- past and present power relations
- own culture, western systems and structures and how these impact on Aboriginal and/or Torres Strait Islander people and their engagement with services
- factors that contribute to Aboriginal and/or Torres Strait Islander ill health and common diseases experienced by these groups of people:
 - impact of trauma on individuals' ability for:
 - decision-making
 - communicating
 - understanding
 - retaining information
- ways to involve Aboriginal and/or Torres Strait Islander people in the planning and delivery of services and programs

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessment must involve persons approved of by relevant local community elders.

CHCMGT004 Secure and manage funding

Modification History

Release	Comments
Release 1	This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages. New Unit.

Application

This unit describes the skills and knowledge required to secure and manage funding for an organisation, program or project.

Workers may be responsible for determining the amount of funding required, identifying funding sources, developing funding proposals and managing ongoing compliance with funding agreements. This role would typically be undertaken by a senior worker or manager.

This unit applies to a range of health and community service contexts and relates to both government and non-government funding and tenders.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes

Performance criteria specify the performance needed to demonstrate achievement of the element

1. Identify funding requirements and context

- 1.1 Identify scope and purpose of funding
- 1.2 Calculate funding requirements, including budget, current funding arrangements and future projections
- 1.3 Identify potential avenues and sources of funding
- 1.4 Research and gather information on all potential funding avenues and sources

ELEMENT	PERFORMANCE CRITERIA
<i>Elements define the essential outcomes</i>	<i>Performance criteria specify the performance needed to demonstrate achievement of the element</i>
	1.5 Determine if funding requirements are feasible and sustainable
2. Develop a funding submission	2.1 Determine funding source requirements 2.2 Prepare funding submission in accordance with funding source requirements 2.3 Determine optimum method of presenting proposal to identified funding sources 2.4 Seek legal, taxation and regulatory advice when required and ensure submission is checked by appropriate persons to ensure it meets compliance requirements 2.5 Establish how deliverables and outcomes will be evaluated and measured
3. Present proposal and negotiate with funding sources	3.1 Present proposal to funding sources using appropriate presentation methods and techniques 3.2 Negotiate with funding source representatives to clarify terms and conditions of funding agreement 3.3 Evaluate submission to identify strengths and weaknesses to inform subsequent submissions
4. Manage funding agreement	4.1 Finalise funding agreement documentation and circulate to all parties 4.2 Establish procedures to monitor ongoing compliance and reporting requirements in accordance with funding agreement 4.3 Maintain ongoing relations with funding source to ensure mutual satisfaction with funding arrangement
5. Evaluate funding agreement	5.1 Evaluate project outcomes against predetermined measures 5.2 Identify lessons learned and opportunities for continuous improvement 5.3 Identify opportunities for future funding

ELEMENT

Elements define the essential outcomes

PERFORMANCE CRITERIA

Performance criteria specify the performance needed to demonstrate achievement of the element arrangements as appropriate

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCMGT004 Secure and manage funding

Modification History

Release	Comments
Release 1	This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages. New Unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified at least 3 potential sources of funding
- determined the feasibility and sustainability of 3 sources of funding
- developed 1 funding proposals in accordance with funding source requirements

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- funding environment
- organisation funding strategy
- government tender processes
- private and corporate grants and funding
- compliance issues
- appropriate sources and avenues for funding
- types of funding, including:
 - ongoing
 - one-off
 - in kind contributions
 - co-payments
- channels where funding and grant opportunities are publicised
- funding issues and challenges
- relationship between funding and strategic direction or organisation

- feasibility and sustainability principles
- budgets and budget pitfalls
- negotiation techniques

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including access to funding information, documentation, technology
- modelling of industry operation conditions

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCMGT007 Work effectively with the Board of an organisation

Modification History

Release	Modification History
Release 1	This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages. New Unit

Application

This unit covers the skills required to work effectively with the Board or committee of an organisation or facility.

This unit applies to senior workers in a range of sectors and settings who are required to work with and provide information to Board or committee members.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Unit Sector

Elements and Performance Criteria

ELEMENT

Elements define the essential outcomes

1. Plan for working with Board

PERFORMANCE CRITERIA

Performance criteria specify the performance needed to demonstrate achievement of the element.

- 1.1 Differentiate and document the member, governance and management issues of the organisation in the organisation's governance policy guidelines
- 1.2 Identify and document the relationships between governance issues and management issues
- 1.3 Identify and document roles, responsibilities and

Assessment Requirements for CHCMGT007 Work effectively with the Board of an organisation

Modification History

Release	Modification History
Release 1	This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages. New Unit

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed a Governance Policy for at least one organisation
- prepared Board Papers that included:
 - o progress against the organisation's strategic plan and/or business plan
 - o information and recommendations for at least 2 governance issues and 2 management issues
- participated in a Board meeting, including:
 - o communicating concerns and recommendations for at least 2 issues
 - o obtaining a decision on future directions for at least 2 issues
 - o recording minutes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- different types of Boards
- purpose, structure and requirements of business plan and strategic plans
- legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation
- roles and responsibilities of particular functions on the Board
- role policies and procedures play in the effective running of an organisation

- separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)
- human resource management practices as they relate to the development of effective working relationships between paid staff and volunteer and/or paid Boards
- organisation's governance policy guidelines including policies and procedures in:
 - o role of Board
 - o Board structure
 - o role of individual Directors
 - o role of Chairperson
 - o role of Company Secretary
 - o role of Chief Executive Officer (CEO)
 - o Board meetings
 - o Board meeting agenda
 - o Board papers
 - o Board minutes
 - o the Board calendar
 - o delegation of authority
 - o monitoring
 - o strategy formulation
 - o service and advice
 - o contacts
 - o Chief Executive Officer (CEO) evaluation
 - o Director protection
 - o Board evaluation
 - o Director development
 - o Director selection and induction

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCVOL003 Recruit, induct and support volunteers

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Application

This unit describes the skills and knowledge required to recruit, orientate, develop and support volunteer workers in an agency, service or program. Workers at this level will be responsible for the ongoing coordination and supervision of volunteers who may be working in a range of contexts.

This unit applies to a range of sectors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Plan and develop a volunteer recruitment program

1.1 Develop and implement processes and procedures to support the identification of volunteer roles

1.2 Apply models of volunteering to develop volunteering roles within the organisation

1.3 Plan and develop recruitment, selection and induction policies and procedure

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

2. Select and induct volunteers

2.1 Develop appropriate advertising strategies ensuring compliance with organisation policy and legal requirements

2.2 Undertake appropriate screening, interviewing and selection processes

2.3 Develop and implement volunteer induction program

3. Develop and implement volunteer support systems

3.1 Develop and implement training appropriate for volunteer roles

3.2 Establish and maintain regular communication with volunteers

3.3 Regularly review roles and performance and provide feedback to the volunteer

3.4 Review recruitment, induction and support systems and identify areas for continuous improvement

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCVOL003 Recruit, induct and support volunteers

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned and implemented all aspects of the recruitment of 2 volunteers
- developed and implemented 1 induction program for volunteers, that included:
 - organisation purpose and services
 - role of volunteers in the organisation
 - insurance
 - rights & responsibilities of all parties including work health and safety (WHS)
 - organisation structure and lines of communication and authority
 - expenses and reimbursements processes
 - relevant policies and procedures and codes of conduct
- conducted a performance review for 1 volunteer

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies relating to the employment of unpaid workers
- rights and responsibilities of both organisation and volunteer
- implications of differences in attitudes and values in working in the organisation

- *Universal declaration on volunteering* and current national volunteering codes and standards
- definitions of volunteering
- paid versus unpaid role responsibilities and the delineation of these roles
- structure of volunteer sector including support and recruitment agencies
- role of government and government bodies in volunteering
- motivations of volunteers, what can de-motivate volunteers and how volunteer motivation changes over time
- different models of volunteering taken from an organisation perspective, including the involvement of volunteers as service providers, fundraisers, corporate volunteering, activist and in community development
- range of diverse sectors and roles where volunteers are involved
- screening processes, including police checks, interviews, application forms, referee checks and meetings
- current trends and issues in volunteering
- engagement strategies for volunteering
- performance appraisal methods and techniques
- recognition and rewards for volunteers

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CPCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Typographical error corrected in the Knowledge Evidence. Word 'detects' corrected to read 'defects'.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to access, interpret and apply relevant building codes and standards applicable to the National Construction Code (NCC) Classes 1 and 10 buildings, to a maximum of two storeys. It includes knowledge of the structure of the NCC, as well as the ability to access relevant information from the code as applicable to various building projects.

It applies to builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards related to residential construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Classify building. | 1.1 Determine nature of building, its use and arrangement from construction plans and specifications. |
| | 1.2 Access, read and interpret relevant Australian Standards and codes for residential building and construction projects. |
| | 1.3 Define classification of building from the NCC. |
| | 1.4 Identify and interpret multiple classifications from the NCC. |
| 2 Determine construction compliance requirements. | 2.1 Identify NCC Performance Requirements relevant to Class 1 and 10, up to two storeys, building projects. |
| | 2.2 Determine range of criteria to ensure that construction methods comply with NCC Performance Requirements. |
| | 2.3 Identify and document non-conforming construction methods against NCC Performance Requirements. |
| | 2.4 Propose and discuss Performance Solution with design and building and construction professionals. |
| | 2.5 Analyse and apply Assessment Methods to determine compliance with Performance Solution or Deem-to-Satisfy Solution (DTS). |

- | | | |
|---|-----|--|
| | 2.6 | Meet the evidence of suitability requirements for building materials and products stated in the NCC. |
| | 2.7 | Complete relevant documentation to meet NCC requirements. |
| 3 Determine fire protection requirements. | 3.1 | Identify NCC and other legislative requirements for passive and active fire control elements in buildings. |
| | 3.2 | Determine level of fire resistance required for the construction of various buildings. |
| | 3.3 | Check existing buildings for compliance with passive and active fire protection requirements. |

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- problem-solving skills to:
 - analyse non-conforming construction methods, define key problem and produce appropriate solution
 - seek clarification of appropriate solution to meet construction method compliance
- technology skills to:
 - use digital tools and devices to communicate and collaborate effectively with others
 - use equipment and programs to access, extract information and develop relevant documentation.

Unit Mapping Information

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Assessment Requirements for CPCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Typographical error corrected in the Knowledge Evidence. Word 'detects' corrected to read 'defects'.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying codes and standards to the construction process of one Class 1 or 10 building project, to a maximum of two storeys.

In doing this, the candidate must:

- determine type of construction and use of building from construction plans and specifications and class of building using National Construction Code (NCC) classifications
- identify current building and construction codes and Australian Standards relevant to the building project
- apply NCC Performance Requirements in relation to the design and construction of the building:
 - energy efficiency
 - damp and weatherproofing
 - fire safety
 - health and amenity

- structure
- safe movement and access
- ancillary provisions
- apply Performance Solutions to ensure that construction complies with NCC Performance Requirements
- identify faults and problems and propose actions to rectify
- inspect a building to determine fire protection compliance with NCC and other legislative requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building legislation, codes and standards:
 - the NCC:
 - Performance Requirements and General Requirements
 - Performance Solutions and Assessment Methods
 - Performance Hierarchy
 - evidence of suitability for building materials and products
 - classes of building and types of construction
- organisational policies and procedures, quality systems and best practice approaches
- workplace safety requirements
- properties, characteristics and limitations of specified building materials and components
- processes, procedures and techniques of construction
- basic building design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- causes and implications of building defects related to failure of applying building codes and standards to residential and commercial buildings
- extent of remedial work required for various defects cause by inadequate design and application of building codes and practices
- environmental requirements and sustainability principles and concepts
- project plans, specifications, working drawings and structural details
- construction terminology.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction regulations
- current building and construction codes and standards
- NCC Volume 2
- construction drawings, site plans and specifications
- organisational policies and procedures and other quality documentation to undertake the performance criteria and assessment requirements
- digital technology devices, applications and software to source and document information.

CPCBC4002 Manage work health and safety in the building and construction workplace

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 2.4 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4002A Manage occupational health and safety in the building and construction workplace. Title change. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to inspect workplaces for hazards and conduct work health and safety (WHS) risk analyses. It includes the development and implementation of appropriate responses to mitigate risks to meet government legislation and regulations.

This unit of competency applies to builders, site managers and forepersons who are responsible for the management of risk in building and construction workplaces.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|--|
| 1 Assess workplace risk. | 1.1 Evaluate construction site safety and identify potential risk areas. |
| | 1.2 Assess on site worker's health and safety. |
| | 1.3 Identify hazards and determine control measures that comply with legislative requirements and organisational policies. |
| | 1.4 Consult with workers to evaluate effectiveness of existing control measures and WHS experts, as necessary, to contribute to an inspection report. |
| | 1.5 Complete a workplace inspection report with recommended actions to minimise workplace incidents and mitigate risk. |
| 2 Establish and implement safety plans. | 2.1 Establish a workplace safety plan incorporating information from the workplace inspection report to raise safety awareness and support safe workplace practices. |
| | 2.2 Implement processes to identify hazards, rate the risks and put control measures in place. |
| | 2.3 Establish educational programs specific to the building and construction workplace to ensure workers carry out safe work practices. |
| | 2.4 Negotiate and resolve safety issues and conflicts. |
| 3 Monitor workplace safety. | 3.1 Monitor and audit workplace safety to ensure compliance with WHS regulations and workplace safety requirements. |
| | 3.2 Record findings and recommend and implement actions to address non-compliance. |

- 3.3 Review effectiveness of educational programs to ensure all workers have been inducted and maintain safe work practices.
- 3.4 Monitor, review and document effectiveness of control measures to determine changes and improvements as required.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCBC4002A Manage occupational health and safety in the building and construction workplace

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCBC4002 Manage work health and safety in the building and construction workplace

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 2.4 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4002A Manage occupational health and safety in the building and construction workplace. Title change. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting a workplace safety audit for a construction worksite.

In doing this, a candidate must:

- access and interpret relevant government work health and safety (WHS) legislation and regulations
- identify faults, problems and non-compliances and their impact on workplace safety
- introduce safety systems allowing for ease of reporting safety issues, controlling hazards and maintaining worker safety and competence.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- current WHS Acts and regulations
- relevant safety codes, standards and guidelines
- organisation's workplace safety policies and procedures:
 - workplace safety and reporting requirements
- inspection, auditing and investigation processes
- hazards arising from:
 - high-risk construction work:
 - crane operation
 - dogging and rigging
 - concrete pumping

- tilt-up panel construction
- scaffolding
- operation of plant and equipment
- demolition
- asbestos removal and exposure to asbestos fibres
- exposure to silica
- airborne contaminants
- exposure to excessive noise
- electrical work
- working at heights
- hazardous materials and substances
- working in confined spaces
- safe work practices:
 - emergency, first aid and evacuation procedures
 - waste management and environmental practices
 - personal protective equipment (PPE)
- educational programs:
 - worker site-specific induction training
 - contractor detailed WHS induction
 - WHS induction for visitors
 - Health and Safety Representative (HSR) training
- mental health first aid and welfare of workers
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract, integrate and compile information.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- WHS legislation and regulations
- safety codes, standards and guidelines
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- workplace incident data and incident reports
- business equipment to collect and record data, and produce reports

- digital devices, applications and software to research, transmit and receive information electronically.

CPCBC4003 Select, prepare and administer a construction contract

Modification History

- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0.
Performance Criteria 3.1 updated to provide clarity.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Typographical error in Element and Performance Criteria 3.3 corrected.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes but is not equivalent to CPCBC4003A Select and prepare a construction contract. Combines CPCBC4003A Select and prepare a construction contract and CPCBC4016A Administer a construction contract.
Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to select, prepare and administer contracts for commercial and residential construction projects. It includes contract selection, administration of a range of documents related to the contract and identifying causes of breach of contract.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

It applies to builders, estimators and project and site managers who interpret complex documents and communicate clearly and succinctly during contract negotiations.

This unit of competency is suitable for people operating with autonomy. A person working at this level would be expected to take responsibility for selecting and preparing construction contracts.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Identify and analyse business contracts. | 1.1 Recognise various types of building and construction contracts, their legal requirements and application. |
| | 1.2 Analyse the importance of the intention to create legal relations. |
| | 1.3 Read and interpret essential contract elements, terms, sections and clauses of a valid construction contract. |
| | 1.4 Evaluate rights, obligations and liabilities of all parties. |
| | 1.5 Identify and analyse circumstances that constitute a breach of contract. |
| | 1.6 Identify factors involved in the termination of contracts. |
| | 1.7 Identify legislative requirements and procedures. |
| 2 Select appropriate contract. | 2.1 Communicate clearly and directly with all parties to confirm the capacity to form a binding agreement. |
| | 2.2 Prepare and compile the range of documents that collectively make up the contract. |
| | 2.3 Establish factors and special conditions associated with the parties' consent to a contract. |
| | 2.4 Recognise and apply the requirements associated with an |

- offer and acceptance of a contract.
- 2.5 Select a contract appropriate to the type of construction.
- 3 Prepare the contract.
- 3.1 Prepare selected contract draft with relevant details, in consultation with relevant personnel and in accordance with the accepted processes of the organisation and legal requirements.
- 3.2 Assess and schedule progress payments, including processes for applying for extension of time.
- 3.3 Ensure any discrepancies or disagreements are resolved prior to contract preparation.
- 3.4 Ensure legality and validity of draft contract in consultation with relevant persons.
- 3.5 Prepare final contract in accordance with the organisation's legal process.
- 4 Administer the contract.
- 4.1 Process progress payments accurately as due under the contract.
- 4.2 Process applications for extension of time in accordance with organisational policies and contract conditions.
- 4.3 Identify, negotiate and document variations to contract.
- 4.4 Act to minimise liquidated damages or penalties nominated in the contract.
- 4.5 Administer contract and resolve contractual disputes in accordance with contract and relevant legislation and regulations.
- 4.6 Assess conditions for issuing a final certificate.
- 5 Finalise a contract.
- 5.1 Apply process for practical completion of contract.
- 5.2 Finalise defects liability under a building or construction contract.
- 5.3 Finalise contract in accordance with relevant legislation

and contract provisions.

- 5.4 Issue appropriate certificate upon completion of the contract work.
- 5.5 Complete and secure documentation arising from finalisation of a contract for records purposes.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

- Supersedes and is not equivalent to CPCBC4003A Select and prepare a construction contract
- Supersedes and is not equivalent to CPCBC4016A Administer a construction contract.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCBC4003 Select, prepare and administer a construction contract

Modification History

- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0.
Performance Criteria 3.1 updated to provide clarity.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Typographical error in Element and Performance Criteria 3.3 corrected.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes but is not equivalent to CPCBC4003A Select and prepare a construction contract. Combines CPCBC4003A Select and prepare a construction contract and CPCBC4016A Administer a construction contract. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by selecting, preparing and administering one contract for a construction project.

In doing this, the candidate must:

- select the correct contract by analysing identified legislative requirements and construction type
- prepare the construction contract specifying requirements for contract termination and special conditions agreed by all parties
- administer the contract following government legal and regulatory requirements and to the organisation's standards
- monitor price and time variations and negotiate with various parties to resolve contract anomalies
- collect all related construction contract and final inspection documentation and issue completion certificate.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian legal system and its relevance to contracts

- various types of housing and construction industry contracts and the circumstances they cover
- definitions and interpretations commonly applied to contracts
- Australian Standards
 - *AS2124 General conditions of contract*, and
 - *AS4000 General conditions of contract series*
- relationships between the organisation and its clients
- range of documents associated with a contract:
 - equipment, site accommodation and services information
 - human resource projections
 - materials lists
 - construction drawings and specifications
 - project timelines
 - schedules
- digital tools and devices to communicate and collaborate effectively with others
- range of digitally-based technology and applications to access, extract, integrate and compile information.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction and contract legislation
- current building and construction codes and standards
- relevant construction industry contracts
- construction drawings and specifications
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to transmit and receive information electronically.

CPCBC4004 Identify and produce estimated costs for building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to establish estimated costs associated with the acquisition of materials and labour for building and construction projects. It includes factoring in relevant overhead costs and margins.

This unit of competency applies to estimators, builders, managers and trade contractors within the construction industry responsible for producing estimated costs on various residential and commercial construction projects within their scope of work as a trade contractor or builder.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Establish project requirements. | <ul style="list-style-type: none"> 1.1 Read and interpret construction drawings and specifications in conjunction with relevant building and construction regulations, codes and standards. 1.2 Identify building site features, type of building and method of construction, and specified building materials. 1.3 Establish site facilities, and communication and temporary boundary fencing requirements. 1.4 Identify waste removal requirements and apply waste management site fees. 1.5 Identify additional project-specific statutory, approvals or compliance costs. |
| 2 Calculate materials and labour costs. | <ul style="list-style-type: none"> 2.1 Produce a materials and consumables quantity list and obtain a price from supplier. 2.2 Identify and estimate off-site production costs, including delivery. 2.3 Identify numbers of contractors, sub-contractors and employees appropriate for the project and work rates. 2.4 Estimate labour hours and calculate labour costs, including on-costs and worker insurance costs. |
| 3 Identify type and cost of physical resources. | <ul style="list-style-type: none"> 3.1 Identify physical resources required for the project. 3.2 Determine limitations, conditions, operational costs and timeframes for hire of physical resources. 3.3 Obtain supplier prices, including transport of physical resources. 3.4 Identify, itemise and cost plant, equipment and machinery. |

- 4 Produce estimated project costs.
 - 4.1 Review and compile materials, consumables and off-site production costs and delivery charges.
 - 4.2 Compile labour costs inclusive of rates and entitlements.
 - 4.3 Compile costs of physical resources.
 - 4.4 Apply organisational overhead recovery and margins.
 - 4.5 Produce estimated project costs for inclusion in a tender or bill.
 - 4.6 Manage and mitigate risks associated with estimating project costs.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCBC4004A Identify and produce estimated costs for building and construction projects.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCBC4004 Identify and produce estimated costs for building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by estimating the cost of one residential or commercial building and construction project.

In doing this, the candidate must:

- estimate project costing from construction drawings, specifications and written information
- list physical resources appropriate for the construction of the project
- produce project cost using an appropriate software program.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction regulations
- building and construction standards and codes
- the National Construction Code (NCC)
- organisational policies and procedures
- organisational scope, processes and requirements for using employee and subcontractor labour
- Environmental Protection Authority (EPA) regulations
- construction drawings and specifications
- relevant physical resources and requirements for their operations:
 - earth moving and excavation equipment
 - hoists and lifting equipment
 - mobile cranes
 - compressors
 - generators
 - pumps

- calculating unit costs:
 - construction cost per square metre
 - laying of foundation per metre
 - laying of slabs per square metre
 - masonry walls per square metre
 - laying of steel tray roofing per square metre
 - installation of pipes per metre
 - installation of sanitary ware per unit
 - tiling per square metre
 - painting per square metre
- a range of digitally-based technology and applications to estimate quantities, calculate costs and maintain records
- workplace procedures, workplace safety and environmental requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- building and construction standards and codes
- government building and construction regulations
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- calculating technology, online applications and software to produce building and construction costs.

CPCBC4005 Produce labour and material schedules for ordering

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4005A Produce labour and material schedules for ordering. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to produce schedules for physical and human resources and materials for residential or commercial projects. It includes monitoring project schedules and tracking and recording costs as they are incurred.

This unit of competency applies to site managers and forepersons, estimators, project managers and builders in the construction industry with responsibility for producing schedules for ordering materials and allocating labour.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | | |
|---|-----|--|
| 1 Assess physical and human resource requirements. | 1.1 | Check conditions of approval from local government and regulatory bodies and project commencement dates. |
| | 1.2 | Identify variations to scope of works and contractual terms and arrangements by the client. |
| | 1.3 | Compile a list of nominated and approved suppliers and contractors and develop channels for effective communication. |
| | 1.4 | Confirm availability of materials with suppliers and labour with contractors. |
| | 1.5 | Enter critical project information into project schedule. |
| 2 Produce schedules. | 2.1 | Prepare electronic call forward sheet and site files containing necessary site documentation. |
| | 2.2 | Break down project into stages and tasks and set milestones and timeframes for commencement and completion. |
| | 2.3 | Itemise materials and labour required for the stages of construction. |
| | 2.4 | Sequence material delivery dates and commencement times for labour. |
| | 2.5 | Factor in unplanned delays. |
| 3 Monitor project costs and maintain project files. | 3.1 | Monitor construction stage progression costs and approved variation costs against estimated project cost. |
| | 3.2 | Manage and monitor project progress against scheduled timelines. |

- 3.3 Record unscheduled and approved variations, changes to the approved plan and specifications and delays to the project.
- 3.4 Resolve issues, within scope of responsibilities, and maintain a cost analysis against final estimated project cost.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
 - use digital devices to communicate and collaborate effectively with suppliers, contractors and others
 - use equipment and programs to prepare and access electronic call forward sheets and files.

Unit Mapping Information

Supersedes and is equivalent to CPCBC4005A Produce labour and material schedules for ordering

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCBC4005 Produce labour and material schedules for ordering

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4005A Produce labour and material schedules for ordering. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by producing a schedule for the ordering of materials and allocation of labour for a residential or commercial building and construction project.

In doing this, the candidate must:

- produce a labour and materials schedule across the life of the project
- develop and manage efficient communications between staff, contractors and suppliers
- monitor, maintain and record project progress and variations, estimated and increased costs and changes to construction drawings and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building legislation and regulations
- building and construction codes and standards
- construction drawings and specifications
- building and construction contractor and supplier contracts
- local authority building application processes, approval and conditions
- organisational policies and procedures:
 - costing and ordering materials
 - selecting and engaging suppliers
 - approving and contacting contractors

- projects costs:
 - organisational and subcontractor labour
 - organisation overheads
 - public liability, professional indemnity and workers' compensation
 - temporary electrical, plumbing and draining services
 - temporary site facilities, storage facilities and boundary fencing
 - communications
 - project administration
- workplace procedures, workplace safety and environmental requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- relevant organisational policies and procedures
- various construction industry contracts
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to set up electronic call forward sheets, compile site files and create channels of communication with internal and external stakeholders.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCBC4006 Select, procure and store construction materials for building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4006B Select, procure and store construction materials for low rise projects. Title change. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to supervise the systems through which construction materials are typically selected, acquired and stored on site for residential and commercial building and construction projects. It includes knowledge of relevant building and construction materials and technologies, environmental effects on materials and identifying non-compliant materials to ensure the delivered construction materials meet National Construction Code (NCC) requirements and contract and service specifications.

It applies to NCC classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys and
- Commercial - Class 2 to 9, Type C only constructions.

It applies to builders, managers and industry professionals responsible for applying quality standards when procuring and supervising on-site storage of compliant construction materials.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Identify and evaluate building materials.

- 1.1 Identify and read current and relevant project plans, specifications, codes and construction requirements.
- 1.2 Identify properties of specified materials and assess their suitability for the building project in the region.
- 1.3 Evaluate materials based on their quality, compatibility and compliance.
- 1.4 Establish environmental impacts of materials.
- 1.5 Determine impact of allowable tolerances on the conversion of naturally occurring materials.
- 1.6 Establish material assembly and installation tolerances to meet requirements of relevant construction industry standards.

2 Select and procure building material.

- 2.1 Select materials that are structurally adequate and appropriate for the building system specified in the contract.
- 2.2 Select materials for their safety, fire resistance rating, suitability, durability, serviceability and cost effectiveness.
- 2.3 Consider short and long-term degradation of materials in relation to the building's proposed life cycle.
- 2.4 Evaluate and consider alternative materials if specified materials are unavailable or unsuitable.
- 2.5 Finalise selection of materials for use in accordance with contractual requirements and in consultation with relevant professionals and the client.
- 2.6 Procure and order materials following organisation's purchasing requirements.

- 2.7 Collect evidence of suitability from suppliers or manufacturers to ensure non-compliant materials are not used.
- 3 Supervise on-site delivery and storage of materials.
- 3.1 Determine limitations and effects of transportation on materials and components and take action to limit potentially damaging circumstances.
- 3.2 Check delivered materials are compliant with specifications, are not damaged and correspond with delivery order.
- 3.3 Allocate on-site storage space, supervise safe handling of materials and ensure the security and protection of materials to meet manufacturer specifications.
- 3.4 Implement processes for inspecting all materials delivered on site for quantity, quality, defects, or damage and store safely.
- 3.5 Inform relevant persons of actions relating to quality and inconsistencies of delivered building materials.
- 3.6 Instruct relevant persons of established workplace safety requirements when accepting and storing delivered materials.
- 3.7 Maintain records of deliveries, damaged and inferior materials and variations to specified materials.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
 - use digital tools and devices to communicate and collaborate effectively with others
 - use equipment and programs to access and extract information and develop relevant documentation
- communication skills to:
 - use written and verbal communication with manufactures and suppliers, and other building professionals.

Unit Mapping Information

Supersedes and is equivalent to CPCBC4006B Select, procure and store construction materials for low rise projects.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCBC4006 Select, procure and store construction materials for building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4006B Select, procure and store construction materials for low rise projects. Title change. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by selecting, procuring and supervising the delivery and on-site storage of materials for one construction project for a residential or commercial building up to a maximum of two storeys.

In doing this, the candidate must:

- analyse reports, manufacturer specifications and other reference material regarding material technologies, sustainability and environmental efficiency
- test and measure products against relevant industry standards
- develop, supervise and maintain systems to select, acquire and store project materials on site
- seek expert advice from manufacturers, architects, designers and engineers about selecting and procuring alternative materials.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction legislation
- relevant project plans, specifications, standards and codes
- the National Construction Code (NCC):
 - evidence of suitability relating to non-conforming building materials and products
- properties, applications and limitations of specified building materials, products and components:
 - cements
 - ceramics
 - concrete

- engineered timber products
- flooring
- framing
- glass
- mortars
- paints and coatings
- plasterboard
- plaster
- roofing
- structural steel
- environmental effects on materials, and preservation and protection methods:
 - timber
 - ferrous and non-ferrous metals
- alternative sustainable materials:
 - structural insulated panel systems
 - mud brick, straw bale and hemp
- construction supply processes and systems
- processes, procedures and techniques for:
 - identifying materials from plans and specifications
 - selecting and ordering compliant materials
 - external quality testing or inspection of materials to meet industry standards
 - referencing external reports and manufacturer specifications
 - seeking expert appraisal from architects, designers, engineers and relevant industry experts
 - refusing to accept non-compliant or substandard materials and taking appropriate action
- operational and functional features of materials handling equipment
- digital technology and applications to access, extract, integrate and compile information
- workplace safety:
 - relevant work health and safety (WHS) Act and regulations
 - hierarchy of control
 - hazardous manual tasks
 - mechanical material handling
 - licensing and competency for operating mechanical material handling equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current relevant government legislation
- the NCC and other relevant codes and standards
- construction drawings, site plans and specifications
- organisational policies, procedures and other quality documentation to undertake the performance criteria and evidence requirements
- manufacturer reports on materials
- digital devices, applications and software to research, transmit and receive information electronically.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCBC4008 Supervise site communication and administration processes for building and construction projects

Modification History

- Release 5 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.
Changes to Foundation Skills, Knowledge Evidence and Performance Evidence.
- Release 4 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.
Correction to version release numbering.
- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.0.
Typographical error in Element 4 corrected.
Element 4.2 corrected from; Conduct onsite inspections for project monitoring according to schedule using relevant inspection checklists to:
4.2 Conduct onsite project monitoring and inspection of work quality
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Typographical corrections in Performance Evidence.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCBC4008B Conduct on-site supervision of building and construction projects. Title change for clarity purposes. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to supervise site communications, monitor and maintain compliance with codes and standards and implement project administration processes on a building and construction project.

It is strongly recommended that the site, as specified in the performance evidence, is 'live' (see Companion Volume for guidance).

This unit of competency specifies the skills and knowledge required to supervise the administration of quality control compliance and the use of site communications and record keeping systems; and conduct onsite inspections to complete the required project administration processes.

This unit applies to National Construction Code (NCC) classifications:

- Residential - Class 1 buildings to a maximum of two storeys
- Commercial - NCC Class 2 to 9, Type C only constructions.

This unit of competency is suitable for builders, site managers, forepersons and other construction industry professionals using specialised knowledge and skills to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program, specified in the model Code of Practice for Construction Work, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | | |
|---|-----|---|
| 1 Supervise the administration of quality control compliance. | 1.1 | Identify project quality control compliance requirements. |
| | 1.2 | Communicate organisational quality control processes and industry requirements to relevant personnel. |
| | 1.3 | Develop processes to ensure onsite work performance meets industry regulatory framework, jurisdictional requirements and quality control standards. |
| | 1.4 | Confirm that regulatory, jurisdictional and organisational compliance and quality control requirements have been met. |
| | 1.5 | Access or develop schedules and checklists detailing specific inspections to be conducted at appropriate stages |

of construction.

- | | | | |
|---|--|-----|--|
| 2 | Supervise the administration of projects. | 2.1 | Identify project administration requirements. |
| | | 2.2 | Authorise payment of material and contractor invoices, drawing against contract allowances and back-charges, as required. |
| | | 2.3 | Authorise variations to contracts and take corrective action as required. |
| | | 2.4 | Process insurance claims for site loss or damage. |
| 3 | Supervise the use of site communications and record keeping systems. | 3.1 | Develop and implement systems for effective communication between onsite and offsite staff, contractors and suppliers that systematically gather onsite information. |
| | | 3.2 | Develop and implement construction project recording systems to capture relevant project details. |
| | | 3.3 | Maintain a daily communications diary and key events. |
| | | 3.4 | Record information relating to certifier inspections, union and legislative matters. |
| 4 | Conduct onsite project monitoring and inspection of work quality | 4.1 | Apply workplace safety requirements and project administration procedures during onsite visit. |
| | | 4.2 | Conduct onsite project monitoring and inspection of work quality. |
| | | 4.3 | Inspect and record quality of work, notify relevant people of defects and issue rectification notice. |
| | | 4.4 | Develop systems to monitor rectified work to ensure compliance with organisational quality control requirements, building standards and client satisfaction. |
| 5 | Complete project administration processes. | 5.1 | Record work defects notified by external parties, establish liabilities and remedial action required, and develop inspection checklist. |

- 5.2 Notify client of rectification, and record client's response to completed work.
- 5.3 Instigate procedures that will result in client approval and acceptance where this was not the client's initial response.
- 5.4 Confirm contract requirements are fulfilled with relevant company personnel and client.
- 5.5 Arrange for local authority completion inspection.
- 5.6 Prepare certificates and appropriate client handover information, including all guarantees, warranties and termite protection forms.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria, including:

- technology skills to:
 - use communication tools and devices to communicate and collaborate effectively with others
 - use equipment and programs to access, extract information and develop relevant documentation

Unit Mapping Information

Supersedes and is equivalent to CPCBC4008B Conduct on-site supervision of building and construction projects.

Element 4.2 corrected from; Conduct onsite inspections for project monitoring according to schedule using relevant inspection checklists to:
4.2 Conduct onsite project monitoring and inspection of work quality
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Typographical corrections in Performance Evidence.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCBC4008B Conduct on-site supervision of building and construction projects. Title change for clarity purposes. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by:

1. Developing a plan to supervise the administration processes for one building and construction project which is either a:
 - Class 1 to a maximum of two storeys, or

- Class 2 to 9, Type C building

In doing this, the candidate must:

- a. Create a plan to implement, administer, maintain and monitor site quality control.
 - b. Read and understand thoroughly the Site Safety Plan used on site.
 - c. Outline the communication systems that will be used on site.
 - d. Outline how systematic gathering of onsite information will be recorded.
 - e. Develop a progress inspection checklist for at least two trades for a section of building.
2. Conducting at least one site inspection to evaluate safety, project progress and work quality for at least one section of a building. This worksite must be for a building and construction project which is either a:
- Class 1 to a maximum of two storeys, or
 - Class 2 to 9, Type C building

In doing this, the candidate must submit the following two documents:

- a. The inspection checklist used
- b. The rectification plan which outlines:
 - i. What must be rectified
 - ii. Why it must be rectified (with reference to appropriate standard, code or plan specification, etc)
 - iii. The recommended order in which rectifications should be done
 - iv. Expected duration of each rectification and when they are expected to be rectified by
 - v. Who will carry out the rectification and how they will be notified
 - vi. Will any rectifications affect the work remaining schedule, if yes - who did you notify.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- construction methodologies

- workplace procedures
- work health and safety (WHS):
 - hierarchy of control
 - duty of care
 - risk assessment
- organisational quality management systems related to:
 - communicating with regulatory authorities
 - worker and contractor payment systems
 - issuing of completion certificates and appropriate documentation
 - finalising project contractual agreements
- onsite communication:
 - emails
 - face-to-face verbal communication
 - telephone contacts
 - site diaries
 - written reports and memoranda

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated workplace is one that fully replicates the resources, environment and any time and productivity pressures that exist in the actual workplace, and which meets industry standards for safety and environmental practices. The simulated workplace environment must be developed in consultation with industry stakeholders. (see Companion Volume for guidance).

Candidates must have access to:

- relevant jurisdictional safety legislation and regulations
- building and construction codes and standards
- relevant project plans and specifications
- organisational quality control documentation relevant to supervising the administration of quality control compliance, communications and recording systems, and work progress and quality
- business and safety equipment and materials to supervise administration processes for a building and construction project onsite.

CPCBC4009 Apply legal requirements to building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4009B Apply legal requirements to building and construction projects. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to apply legal requirements to residential and commercial building and construction projects. It includes meeting licensing requirements, complying with financial and insurance laws and meeting the conditions of building contracts.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial --Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers, forepersons, estimators and other construction industry personnel responsible for applying legal requirements to residential or commercial building and construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to legal requirements of building and construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Identify legislation relating to the construction project. | 1.1 Identify legal requirements from relevant government Acts and regulations appropriate to the type of building and construction project. |
| | 1.2 Identify legal requirements for building contracts, construction insurance, industrial relations obligations and payroll systems. |
| | 1.3 Determine class of building for the project and check for limitations of builder's registration and licence. |
| | 1.4 Identify any construction activity restrictions, limitations and conditions from building approvals and permits for the project. |
| | 1.5 Check licensing requirements or competencies for subcontractors, site supervisors and managers. |
| | 1.6 Identify sustainability, environmental and waste management legislated requirements. |
| | 1.7 Identify work health and safety (WHS) legislation and requirements of Construction work Code of Practice. |
| 2 Apply site safety requirements. | 2.1 Apply all the relevant requirements of WHS regulations that apply to the project. |
| | 2.2 Adapt organisation's workplace procedures and workplace safety requirements to align with the project. |
| | 2.3 Implement strategies to ensure all workers are inducted, informed and regularly updated of their on-site safety responsibilities. |
| 3 Apply legal | 3.1 Apply contract law in accordance with common law principles, relevant state or territory laws and |

- requirements. regulations, and fair trading legislation.
- 3.2 Apply the contract agreements and meet all the conditions during construction of the project.
 - 3.3 Confirm all mandatory building, subcontractor and worker's compensation insurances are current and applied to comply with legal requirements.
 - 3.4 Administer payroll system which incorporates employee and contractor payments, deduction of taxes, including goods and services tax (GST), tracking of transactions and calculating wages.
- 4 Apply industrial relations.
- 4.1 Apply workplace and subcontractor agreements and relevant awards to comply with industrial relations legislation.
 - 4.2 Identify and apply provisions for training agreements and make information available to all workers.
 - 4.3 Take proactive measures to ensure discrimination and harassment are not practiced in the workplace.
- 5 Resolve disputes and complaints.
- 5.1 Apply dispute resolution processes following organisational policies.
 - 5.2 Address complaints promptly, consult with complainant and resolve issue with the best solution for all.
 - 5.3 Record dispute outcome and maintain documentation.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCBC4009B Apply legal requirements to building and construction projects

Assessment Requirements for CPCBC4009 Apply legal requirements to building and construction projects

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4009B Apply legal requirements to building and construction projects. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying legal requirements to one residential or commercial building and construction project.

In doing this, the candidate must:

- identify and apply relevant legislative requirements applicable to the building and construction project
- apply legal obligations for:
 - insurance covering workers, materials and building
 - industrial relations, financial transactions, payment of wages and payment of subcontractor and supplier invoices
 - contractual agreements
- apply building and construction standards and codes during construction.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- builder registration and licensing
- Construction work Code of Practice
- appropriate government legislation:
 - business registration and licensing
 - industrial relations
 - work health and safety (WHS)
 - taxation and financial transactions
 - insurance
 - waste management and environmental protection

- organisational policies and procedures.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction legislation
- current building and construction codes and standards
- relevant construction industry contracts
- organisational policies and procedures, insurance, industrial relations and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to obtain legal and building and construction information and record outcomes of disputes.

CPCBC4010 Apply structural principles to residential and commercial constructions

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Correction to mapping.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes but is not equivalent to CPCBC4010B Apply structural principles to residential low rise constructions.

Combines CPCBC4010B Apply structural principles to residential low rise constructions and CPCBC4011B Apply structural principles to commercial low rise constructions.

Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to apply structural principles to the construction of residential or commercial structures. This unit includes applying structural principles to footing, floor, wall and roof systems.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers, forepersons and other managers in the building and construction industry who apply structural principles to the demolition or construction of structures.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to building application approvals.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

- CPCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings
- CPCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Analyse the structural integrity of building project. | 1.1 Determine the class of building, intended use of building and climate zone from the NCC. |
| | 1.2 Analyse project for compliance with NCC bushfire, high wind, earthquake and alpine environment requirements. |
| | 1.3 Analyse building design and structural integrity from project plans and specifications, building standards and codes. |
| | 1.4 Determine the effect of section properties on various materials. |
| | 1.5 Determine if structural performance meets the General Requirements and Performance Requirements of NCC. |
| | 1.6 Confirm analysis with relevant industry professionals. |
| | 1.7 Conduct pre-commencement site inspection to confirm analysis. |
| | 1.8 Assess new and emerging building technologies for application to the construction process and their compliance with NCC requirements and relevant Australian Standards. |
| 2 Plan, coordinate and | 2.1 Identify earthworks and footing or slab configuration |

- manage the laying of footings.
- 2.2 Establish cut and fill, excavation and compaction compliance with geotechnical report.
 - 2.3 Assess performance of reinforcement, concrete and other elements which contribute to structural integrity of specified footings.
 - 2.4 Determine compliance with building and construction regulations, standards and codes.
 - 2.5 Set out footings in accordance with project plans and specifications.
- 3 Plan, coordinate and manage laying of flooring systems.
- 3.1 Identify flooring systems materials, components and configuration from project plans and specifications.
 - 3.2 Establish footing type and tie-down details.
 - 3.3 Assess suspended flooring system component sections' compliance with standards and codes' span requirements.
 - 3.4 Determine if floor framing and flooring is compliant with NCC Performance Requirements for climate zone, fire resistance and rising damp requirements.
 - 3.5 Supervise and check laying of specified floor system complies with project documentation.
- 4 Plan, coordinate and manage the building of wall systems.
- 4.1 Identify and analyse structural and non-structural wall systems used in the planning of the building and construction project.
 - 4.2 Determine materials used for timber and steel framing and structural steel members meet the Performance Requirements of the NCC and timber framing complies with *AS 1684 Residential timber-framed construction*.
 - 4.3 Identify, implement and check processes for erecting structural and non-structural wall systems comply with manufacturer's specifications and building and construction standards and codes.
 - 4.4 Plan, implement and check requirements for application of bracing, tie-downs, tolerances, allowances, and fixing

and installation of wall frame components for compliance with relevant Australian Standards, codes and manufacturer specifications.

- 4.5 Manage processes to ensure quality of the frame, whether factory pre-cut and pre-nailed, factory pre-cut and assembled on site, or cut and assembled on site.
 - 4.6 Identify and implement allowances for services to be installed.
 - 4.7 Check compliance of installation of windows and doors with building and construction standards and code and manufacturer's specifications.
- 5 Plan, coordinate and manage the building of structural roof systems.
- 5.1 Identify type of structural roof system and components and determine compliance with Performance Requirements of NCC.
 - 5.2 Plan, implement and check erection of structural roof, roof trusses or hand cut roof members comply with building and construction standards and codes and accepted industry construction practices.
 - 5.3 Plan, implement and check installation of roof sarking and cladding, skylights, roof ventilators and service penetrations comply with building standards, codes and manufacturer specifications.
 - 5.4 Manage processes to ensure roof systems' quality finish.
- 6 Plan, coordinate and manage wall cladding.
- 6.1 Assess structural performance of cladding to be used for bracing in the frame construction for compliance with building and construction standards, codes and manufacturer specifications.
 - 6.2 Determine cladding, vapour permeable sarking or waterproof membrane and components meet the Performance Requirements of NCC.
 - 6.3 Supervise and check installation of specified cladding complies with building and construction standards, codes and industry-accepted industry practices.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is not equivalent to CPCBC4010B Apply structural principles to residential low rise constructions.

Supersedes and is not equivalent to CPCBC4011B Apply structural principles to commercial low rise constructions.

Assessment Requirements for CPCCBC4010 Apply structural principles to residential and commercial constructions

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Correction to mapping.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes but is not equivalent to CPCCBC4010B Apply structural principles to residential low rise constructions.

Combines CPCCBC4010B Apply structural principles to residential low rise constructions and CPCCBC4011B Apply structural principles to commercial low rise constructions.

Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying structural principles to the construction of one building project.

In doing this, the candidate must:

- assess the structural integrity of the construction project
- apply technical construction principles and concepts to the appropriate selection, integration and building of construction elements and components
- coordinate, plan, implement and check the construction of the structure
- plan and document the structural principles of the construction of a building.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction legislation and regulations
- industry building and construction standards and codes
- the NCC
- classes of buildings described in the NCC
- standards and codes for timber framing
- structural principles:
 - behaviour of structural materials

- dead, live and wind loads
- performance of beams
- performance of columns
- performance of roof trusses
- section properties
- solution of force systems
- wind bracing
- project documentation:
 - approval project plans and specifications
 - structural designs and specifications
 - engineer's footing design and specifications
 - registered plans
 - contour site plan
 - geotechnical report
 - underpinning, rock anchors and shoring design and specifications
 - retaining wall and tanking design and specifications
 - structural, floor, wall and roof systems
- organisational quality documentation:
 - policies and procedures
 - workplace procedures, workplace safety and environmental requirements
 - various construction contracts
- footing systems:
 - bored pier footings
 - columns or stumps
 - concrete slab floors
 - reinforced piers and beams
 - drilled and driven piles
 - mass concrete piers
 - screw piles
 - waffle pod slabs
 - brick bases
- floor system and components:
 - suspended and slab on ground concrete floors
 - suspended timber, metal and steel floor frames
 - engineered floor joists
 - platform floor construction
 - fitted (cut-in) floors
 - compressed sheet wet area flooring
 - sheet flooring
 - tongue and groove flooring

- autoclaved aerated concrete (AAC) panel systems
- structural wall systems:
 - composite walls featuring tilt-up slab, engineered timber products and lightweight AAC
 - framed walls incorporating timber, engineered timber products and lightweight section steel
 - masonry walls incorporating cavity brick, single-leaf masonry and AAC
- wall cladding:
 - weather boards
 - coatings over base materials
 - corrugated metal sheeting
 - fibre cement and compressed wood panelling
 - tilt-up slab
 - unfired and fired AAC masonry
- structural roof systems:
 - timber and metal pre-fabricated trusses
 - hand cut timber
- roof types:
 - box gable
 - dual pitch
 - Dutch gable and Dutch hip
 - gable end
 - hip and valley
 - north light
 - skillion
 - rafter and purlin
- roof cladding:
 - concrete, clay and metal tiles
 - shakes and shingles
 - short and long run, various profile and metal sheeting
- AAC floor and wall systems
- causes and implications of structural defects related to failure of applying structural principles to residential and commercial buildings
- extent of remedial work required for various defects cause by inadequate design and application of structural principles.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction legislation
- current building and construction codes and standards
- the NCC
- material manufacturer's specifications
- construction drawings and specifications and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to obtain and research information electronically and exchange information with other stakeholders.

CPCBC4012 Read and interpret plans and specifications

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4012B Read and interpret plans and specifications. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to read and interpret plans and specifications applicable to residential and commercial projects. It includes identifying site characteristics, features of the proposed building and details of the construction.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

The unit of competency applies to site managers, forepersons, estimators, builders, managers and other building and construction industry personnel who read and interpret plans and specifications for quantity surveying, costing and tendering and construction of building and construction projects.

This unit is suitable for people with specialised knowledge, completing routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|------------------------------------|--|
| 1 Identify types of plans. | 1.1 Confirm plans, specifications and amendments are the current version. |
| | 1.2 Identify types of plans and aspects of the drawings specific for the intended purpose. |
| | 1.3 Confirm details on plans comply with the specifications. |
| 2 Read and interpret the plan. | 2.1 Distinguish key features on the plans. |
| | 2.2 Identify building location from site plan. |
| | 2.3 Identify building layout, spaces and dimensions from floor plan. |
| | 2.4 Examine detail drawings to determine sizes, thickness and methods of construction. |
| | 2.5 Identify internal linings, external cladding and roof materials from plans and specifications. |
| 3 Identify structural details. | 3.1 Identify concrete footing and slab sizes and position and type of reinforcing. |
| | 3.2 Identify load bearing points of the building. |
| | 3.3 Identify wind bracing and tie-down requirements. |
| 4 Identify non-structural details. | 4.1 Identify provisional sum (PS) and prime cost (PC) items. |
| | 4.2 Locate installation and connection points of services to the building. |
| | 4.3 Identify location of fixtures from plans and details of finishes from specifications. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCBC4012B Read and interpret plans and specifications

Links

Companion volumes to this training package are available at the VETNet website -

Assessment Requirements for CPCBC4012 Read and interpret plans and specifications

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4012B Read and interpret plans and specifications. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by identifying and interpreting building and construction information from a set of plans and specifications.

In doing this, the candidate must:

- identify orientation of structures, site contours, datum and reduced levels, and site features to be removed or retained
- identify structural load bearing information of the building and compare information from specification
- check wind bracing materials and tie-down methods for accuracy against the wind bracing table
- interpret essential elements from two-dimensional to three-dimensional format, and apply to estimation, planning and supervisory tasks.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- types of plans:
 - concept drawing/sketches
 - architectural
 - structural
 - civil
 - mechanical
 - electrical
 - plumbing and draining
- parts of a plan:
 - site plan
 - floor plan

- elevations
- sections
- details
- drawing conventions:
 - datum and reduced levels (RL)
 - title block
 - scale
 - dimensions
 - abbreviations
- utilities and services plans and specifications
- isometric drawings, oblique drawings, perspective drawings and orthographic drawings
- computer-aided design (CAD) drawings
- building and construction regulations, standards and codes
- classes of buildings
- the NCC
- building information modelling (BIM)
- building and construction methods and terminology
- workplace processes, workplace safety and environmental requirements.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- plans and specifications and other quality documentation required to undertake the performance criteria and assessment requirements
- relevant government building and construction and contract legislation
- current building and construction codes and standards
- National Construction Code
- computers, applications and software to access CAD.

CPCBC4026 Arrange building applications and approvals

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4026A Arrange building applications and approvals. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to prepare and submit building applications to appropriate authorities for approval and manage the submission through to its final approval. It includes communicating effectively with clients, building professionals and planning officers.

The unit of competency applies to builders, project managers and related construction industry professionals responsible for coordinating and managing the building approval process for residential and/or commercial projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to building application approvals.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Assessment Requirements for CPCBC4026 Arrange building applications and approvals

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4026A Arrange building applications and approvals. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing, submitting and managing one residential and one commercial building and construction application for approval.

In doing this, the candidate must:

- develop a submission plan, which includes:
 - stages and dates for submission of applications
 - forms, documents and supporting evidence required to be submitted
 - application fees, charges and costs.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building legislation, codes and standards
- plans, specifications and contracts
- local authority building application processes:
 - full approval
 - staged approval
 - development applications
 - sustainability requirements
 - fees and levies
 - complaints and appeals
- documentation requirements of building approval submissions:
 - design briefs
 - specialist's reports
 - working drawings, plans, details and specifications
- organisational quality assurance processes and practices:

- authorities and approval delegations
- document control
- specialist services for certification of documentation:
 - building surveyors, quantity surveyors and site surveyors
 - geotechnical and environmental specialists
 - structural, mechanical and electrical engineers.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must be provided with:

- relevant government regulations, codes and standards
- current project plans, specifications and manufacturer's product information
- organisational quality assurance documents
- local authority building approval processes and application forms
- sufficient materials and equipment to facilitate arrange building applications and approvals.

CPCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to access, interpret and apply relevant building codes and standards applicable to National Construction Code (NCC) Class 2 to 9 Type C building projects. It includes knowledge of the structure of the NCC, as well as the ability to access relevant information from the code as applicable to various building projects.

It applies to builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards related to Class 2 to 9 Type C construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Pre-requisite Unit

Nil.

Unit Sector

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Classify buildings. | 1.1 Determine nature of building, its use and arrangement from construction plans and specifications. |
| | 1.2 Access, read and interpret relevant Australian Standards for commercial building and construction projects. |
| | 1.3 Define classification of building from NCC. |
| | 1.4 Identify and interpret multiple classifications from NCC. |
| 2 Determine construction compliance requirements from NCC. | 2.1 Identify NCC Performance Requirements relevant to Class 2 to 9 Type C building projects. |
| | 2.2 Determine range of criteria to ensure that construction methods comply with NCC Performance Requirements. |
| | 2.3 Identify and document non-conforming construction methods with NCC Performance Requirements. |
| | 2.4 Propose and discuss Performance Solution with design and building and construction professionals. |
| | 2.5 Analyse and apply Assessment Methods to determine compliance with Performance Solution or Deem-to-Satisfy Solution. |
| | 2.6 Meet the evidence of suitability requirements for building materials and products stated in the NCC. |
| | 2.7 Complete relevant documentation to meet NCC requirements. |

- | | |
|---|--|
| 3 Determine fire protection requirements. | 3.1 Identify NCC and other legislative requirements for passive and active fire control elements in buildings. |
| | 3.2 Determine level of fire resistance required for the construction of various buildings. |
| | 3.3 Check existing building for compliance with passive and active fire protection requirements. |

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
 - use digital tools and devices to communicate and collaborate effectively with others
 - use equipment and programs to access, extract information and develop relevant documentation.

Unit Mapping Information

Supersedes and is not equivalent to CPCBC4001A Apply building codes and standards to the construction process for low rise building projects.

CPCBC4001A Apply building codes and standards to the construction process for low rise buildings has been split into two units, one for residential low-rise buildings and one for commercial low-rise buildings.

Attainment of both CPCBC4001 and CPCBC4053 is equivalent to CPCBC4001A.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes but is not equivalent to CPCCBC4001A Apply building codes and standards to the construction process for low rise building projects.

Unit has been separated into two units for residential low rise and commercial low rise.

Attainment of both CPCCBC4053 and CPCCBC4001 is equivalent to CPCCBC4001A. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying codes and standards to the construction process of two Type C building projects:

- one Class 2, 3 or 9
- one Class 5 to 8.

In doing this, the candidate must:

- determine the type of construction and the use of the building from construction plans and specifications and class of building using National Construction Code (NCC) classifications
- identify current building and construction codes and Australian Standards relevant to the building project
- apply NCC Performance Requirements in relation to the design and construction of the building:
 - structure
 - fire protection
 - access and egress
 - services and equipment
 - health and amenities
 - ancillary provisions
 - energy efficiency
- apply Performance Solutions to ensure that construction complies with Performance Requirements

- identify faults and problems and propose actions to rectify
- inspect a building to determine fire protection compliance with NCC and other legislative requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building legislation, codes and standards
- the NCC:
 - Performance Requirements and General Requirements
 - Performance Solutions and Assessment Methods
 - Deem-to-Satisfy Solution (DTS)
 - Performance Hierarchy
 - evidence of suitability for building materials and products
 - classes of building and types of construction
- Assessment Methods stated in the NCC:
 - comparison with DTS provisions
 - evidence of suitability
 - Expert Judgement
 - Verification Method
- below ground construction:
 - methods
 - structural sufficiency
 - water ingress
 - water proofing
 - work health and safety (WHS)
- organisational policies and procedures, quality systems and best practice approaches
- workplace safety requirements
- properties, characteristics and limitations of specified building materials and components
- processes, procedures and techniques for construction of wide span and complex designed buildings
- basic commercial building design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- causes and implications of building defects related to failure of applying building codes and standards to residential and commercial buildings
- extent of remedial work required for various defects caused by inadequate design and application of building codes and practices
- environmental requirements and sustainability principles and concepts
- project plans, specifications and structural details
- construction terminology.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction regulations
- current building and construction codes and standards
- NCC Volume 1
- construction drawings, site plans and specifications
- organisational policies and procedures and other quality documentation to undertake the performance criteria and assessment requirements
- digital technology devices, applications and software to source and document information.

CPCCB2002 Use bricklaying and blocklaying tools and equipment

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCB2002A Use bricklaying and blocklaying tools and equipment. Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to safely and effectively use bricklaying and blocklaying tools and equipment. It includes understanding the functional features and applying the operational requirements of tools and equipment.

The unit is suitable for people with basic skills and knowledge who undertake routine bricklaying and blocklaying tasks under the direction of more experienced workers on new or existing structures.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Bricklaying and Blocklaying

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Plan the work.
 - 1.1 Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
 - 1.2 Read and interpret work plans and specifications.
 - 1.3 Follow requirements in workplace safety and environmental documentation and workplace procedures.
 - 1.4 Identify potential hazards and determine and implement control measures.
 - 1.5 Clarify job priorities and sequence tasks with others on site.
- 2 Prepare for work.
 - 2.1 Select plant, equipment and tools for the task.
 - 2.2 Identify any limitations of plant, equipment and tools from manufacturer's instructions.
 - 2.3 Check equipment and tools to ensure guards, guides, controls and switches are fitted and functional.
 - 2.4 Examine hoses for damage and check electrical leads and power tools are tagged.
 - 2.5 Inspect clamps, guides, and equipment used for holding and supporting materials during operation, for faults.
 - 2.6 Set aside, tag and report damaged equipment and tools.
- 3 Use plant, equipment and tools.
 - 3.1 Level and stabilise static equipment in appropriate location.
 - 3.2 Connect electrical tools to a residual current device (RCD).
 - 3.3 Use plant, equipment and tools safely and effectively and only for their intended purpose.
 - 3.4 Disconnect portable electrical equipment from source and place in a safe location when not in use.
- 4 Clean up.
 - 4.1 Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental

requirements.

- 4.2 Clean tools and equipment, check for serviceability and report damage or faults.
- 4.3 Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- technology skills to:
 - use digital tools and devices to source job information and communicate effectively with others.

Unit Mapping Information

Supersedes and is equivalent to CPCCB2002A Use bricklaying and blocklaying tools and equipment

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCL2002 Use bricklaying and blocklaying tools and equipment

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCL2002A Use bricklaying and blocklaying tools and equipment. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by assisting in at least one bricklaying or blocklaying project.

In doing this, the candidate must:

- conduct a pre-operation check on equipment
- set up and safely use the following tools and equipment:
 - wheelbarrow
 - hand brick grab to load the job
 - cement mixer to mix consistent mortar for the project
 - wet cut brick saw to cut bricks and blocks accurately to varying sizes and shapes
 - hand and power assisted tools and equipment appropriate for the project
- use hand tools to achieve three different joint finishes
- wear appropriate personal protective equipment:
 - hearing protection
 - mask or appropriate respirator for the cutting task/s.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- terminology relating to bricklaying and blocklaying tools and equipment
- basic construction terminology
- features and purpose of plans and specifications
- manufacturer's specifications and instructions for tools and equipment:
 - safety requirements during operation
 - location and purpose of parts
 - uses and limitations

- cleanliness and maintenance
- troubleshooting problems
- functional and operational features of plant, equipment and hand and power tools:
 - wheel barrow
 - spirit, pocket and water level
 - automatic and laser level
 - trowels and jointing tools
 - corner blocks and string lines
 - tingle plate
 - profiles and straight edges
 - bolster chisels
 - mash hammer/lump hammer
 - builder square and sliding bevels
 - power drills
 - battery operated tools
 - pallet trolleys
 - materials hoist
 - brick buggies
 - elevators
 - small petrol or diesel engines, compressors or mixers
 - forklifts
- the characteristics and application of specified materials for bricklaying and blocklaying
- processes and techniques for:
 - manual handling
 - mechanical handling
- workplace safety:
 - job safety and environmental analysis (JSEA)
 - electrical safety
 - noise reduction
 - dust suppression
 - working at heights
 - exposure to silica
 - exposure to loud noise
- environmental requirements relating to workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCCA2002 Use carpentry tools and equipment

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA2002B Use carpentry tools and equipment. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to select and safely use and maintain carpentry tools and equipment, meeting all relevant requirements of national construction codes, Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes hand tools, power tools, pneumatic tools and equipment.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Carpentry and Joinery

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--|--|
| 1 Plan and prepare. | 1.1 Review work instructions to use tools and equipment. |
| | 1.2 Plan all work to comply with laws and regulations, national construction codes, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements. |
| | 1.3 Select and use personal protective equipment (PPE) for each part of the task. |
| | 1.4 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades. |
| 2 Select, check and use tools and equipment. | 2.1 Select equipment and hand, power and pneumatic tools for the carpentry task, identify their functions and operations, check for serviceability and report any faults. |
| | 2.2 Use equipment and hand, power and pneumatic tools following WHS requirements and manufacturers' recommendations. |
| | 2.3 Sharpen and maintain tools. |
| 3 Clean up. | 3.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling. |
| | 3.2 Check, maintain, store and secure tools and equipment and report any faults. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCA2002B Use carpentry tools and equipment.

Links

Companion volumes to this training package are available at the VETNet website -

Assessment Requirements for CPCCCA2002 Use carpentry tools and equipment

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA2002B Use carpentry tools and equipment. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must safely and effectively, across three different carpentry tasks, use and maintain all of the listed tools and equipment at least once:

- hand tools:
 - retractable tape measure
 - folding or steel ruler
 - combination square
 - string line
 - chalk line
 - hand saw
 - coping saw
 - carpenters hammer / claw hammer
 - wood chisel
 - hand plane
 - trimming knife
 - clamps
 - bevels
 - spirit level
 - tin snips
- power/battery/pneumatic tools and equipment:
 - circular saw
 - reciprocating saw
 - sliding compound saw

- jigsaw
- angle grinder
- planer
- laminate trimmer or router
- drill
- rotary hammer drill
- impact driver
- nail gun
- bench grinder
- extension lead
- portable residual current device
- air compressor and hoses.

The candidate must also:

- replace blades/cutters/grinding discs in:
 - a power saw
 - a powered planer
 - a router
 - grinder
- grind, sharpen and hone a hand plane blade
- grind, sharpen and hone a chisel.
-

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace quality policies and standards for using carpentry tools and equipment
- safety requirements for using carpentry tools and equipment
- types of tools and equipment and their characteristics, uses and limitations:
 - hand tools including:
 - retractable tape measure
 - folding or steel ruler
 - combination square
 - spirit level
 - string line
 - chalk line
 - hand saw
 - coping saw
 - carpenters hammer/claw hammer
 - wood chisel
 - hand plane

- metal trimming knife
- clamp
- bevel
- tin snips
- power/battery/pneumatic tools and equipment:
 - bench grinder
 - circular saw
 - reciprocating saw
 - sliding compound saw
 - jigsaw
 - angle grinder
 - mobile plane
 - laminate trimmer or router
 - drill
 - rotary hammer drill
 - impact driver
 - nail gun
 - extension lead
 - portable residual current device
 - air compressor and hoses
- processes to safely grind, sharpen and hone a hand plane blade and a chisel.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCCA3018 Construct, erect and dismantle formwork for stairs and ramps

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3018A Construct, erect and dismantle formwork for stairs and ramps. Updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to construct, erect and dismantle formwork for stairs and ramps to provide access between floors and landings, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

It includes:

- establishing required levels on site
- constructing timber, metal or prefabricated formwork to contain wet poured concrete until it is completely cured
- stripping the formwork
- preparing and storing formwork for re-use.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Unit Sector

Carpentry and Joinery

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---------------------|---|
| 1 Plan and prepare. | 1.1 Read and interpret work instructions and plan sequence of work. |
| | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications. |
| | 1.3 Select tools and equipment, check for serviceability and report any faults. |
| | 1.4 Select and use personal protective equipment (PPE) for each part of the task. |
| | 1.5 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades. |
| | 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use. |
| 2 Set out formwork. | 2.1 Check formwork location for accuracy against plans and specifications. |
| | 2.2 Check design of stairs or ramp and method of joining formwork, and determine levels from drawings, specifications and site inspection. |
| | 2.3 Determine rise, going and pitch of stairs and ramp from drawings, specifications, site inspection, rise measurements, and requirements of the National Construction Code (NCC). |
| | 2.4 Calculate full size of stairs or ramp and set out. |
| | 2.5 Set out materials for formwork, including stringer form, to pitch of stairs with rises not exceeding specified space between treads. |

- | | |
|--------------------------------|---|
| 3 Assemble and erect formwork. | 3.1 Place, fix and brace landing bearers and joists. |
| | 3.2 Erect and brace stairs or ramp formwork soffit. |
| | 3.3 Cut, install and brace formwork for stringers. |
| | 3.4 Locate and fix formwork stringers for stairs and ramps. |
| | 3.5 Set out, cut square to length, and fix material for face of treads. |
| | 3.6 Brace risers at mid-span to prevent deflection under the load of wet concrete. |
| 4 Strip formwork. | 4.1 Strip formwork and bracing sequentially and safely. |
| | 4.2 Check formwork for reusability and dispose of damaged components. |
| | 4.3 Safely de-nail, clean, oil and store or stack reusable formwork components. |
| 5 Clean up. | 5.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling. |
| | 5.2 Check, maintain and store tools and equipment and report any faults. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCA3018A Construct, erect and dismantle formwork for stairs and ramps.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for CPCCCA3018 Construct, erect and dismantle formwork for stairs and ramps

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3018A Construct, erect and dismantle formwork for stairs and ramps. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by constructing, erecting, stripping and dismantling the formwork for:

- one flight of stairs, freestanding or against a wall with a minimum rise of 1800 mm
- one ramp with a minimum rise of 400 mm and 5.6 metres long.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to constructing, erecting and dismantling formwork for stairs and ramps
- workplace quality policies and standards for constructing, erecting and dismantling formwork for stairs and ramps
- safety requirements for constructing, erecting and dismantling formwork for stairs and ramps
- line, level and plumb for constructing, erecting and dismantling formwork for stairs and ramps
- common formwork faults, problems and rectification methods
- materials used to construct and erect formwork
- fixings for formwork
- techniques to construct, erect and strip and dismantle formwork
- contents, terms and symbols used in plans, specifications and drawings for constructing, erecting and dismantling formwork for stairs and ramps
- types and uses of tools and equipment used to erect and strip and dismantle formwork
- processes for measuring and setting out formwork
- processes for calculating material requirements for constructing and erecting formwork for stairs and ramps
- regulations on stair and ramp construction for safe use, including disability access

- processes to construct stairs and ramps.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCCA3028 Erect and dismantle formwork for footings and slabs on ground

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Equivalency changed to non-equivalent.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA2003 Erect and dismantle formwork for footings and slabs on the ground. Updated to reflect current industry terminology, tools and equipment.

Application

This unit of competency specifies the skills and knowledge required to erect and dismantle formwork for slabs on ground, rebates to slabs on ground, and steps to strip footings, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes:

- establishing required levels on site and constructing formwork using boxing materials, including timber, metal, masonry, fibre cement sheeting or reconstituted timber products, and fixings to contain wet poured concrete until it is completely cured
- stripping the formwork and preparing and storing it for re-use.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Carpentry and Joinery

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---------------------|---|
| 1 Plan and prepare. | 1.1 Read and interpret work instructions and plan sequence of work. |
| | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications. |
| | 1.3 Select tools and equipment, check for serviceability and report any faults. |
| | 1.4 Select and use personal protective equipment (PPE) for each part of the task. |
| | 1.5 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades. |
| | 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use. |
| 2 Erect formwork. | 2.1 Clear work area and prepare surface for safe erection of formwork. |
| | 2.2 Measure, set out and level formwork. |
| | 2.3 Apply fixing and fasteners to ensure stable formwork construction. |
| | 2.4 Construct and erect edge rebate. |
| | 2.5 Check and brace formwork for accuracy of square and dimension. |
| | 2.6 Install block-outs and cast-in services to specified locations. |

- 2.7 Apply release agent to formwork face following manufacturers' specifications.
- 3 Strip formwork and prepare for reuse.
 - 3.1 Strip edge boxing and bracing support sequentially and safely.
 - 3.2 Check formwork for re-usability and dispose of damaged components to meet safety and environmental requirements.
 - 3.3 Safely de-nail, clean, oil and store or stack reusable formwork components.
- 4 Clean up.
 - 4.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
 - 4.2 Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is not equivalent to CPCCCA2003 Erect and dismantle formwork for footings and slabs on the ground.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCCA3028 Erect and dismantle formwork for footings and slabs on ground

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Equivalency changed to non-equivalent.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA2003 Erect and dismantle formwork for footings and slabs on the ground. Updated to reflect current industry terminology, tools and equipment.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by erecting and dismantling formwork for one slab on ground with:

- a minimum area of 30 square metres
- a minimum thickness of 100 millimetres
- an edge rebate and an internal corner.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to erecting and dismantling formwork for footings and slabs on ground
- workplace quality policies and standards relating to formwork
- safety requirements for erecting and dismantling formwork for footings and slabs on ground
- environmental requirements for erecting and dismantling formwork for footings and slabs on ground
- types and uses of tools and equipment for erecting and dismantling formwork for footings and slabs on ground
- types, characteristics and applications of formwork materials
- formwork techniques
- types of plans, specifications and drawings relating to formwork
- symbols and notations used on plans, specifications and drawings for formwork
- processes for measuring and setting out formwork

- processes for calculating material requirements for erecting formwork for footings and slabs on ground
- requirements for line, level and plumb for erecting formwork for footings and slabs on ground.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCCO2013 Carry out concreting to simple forms

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms. Updated to meet the Standards for Training Packages.

Application

This unit of competency specifies the skills and knowledge required to safely install formwork, reinforcement and place and finish concrete for the construction of minor slabs, pathways and other minor works to a specified design finish, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Unit Sector

Concreting

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--------------------------------|--|
| 1 Plan and prepare. | <p>1.1 Read and interpret work instructions and plan sequence of work.</p> <p>1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.</p> <p>1.3 Select tools and equipment, check for serviceability and report any faults.</p> <p>1.4 Select and use personal protective equipment (PPE) for each part of the task.</p> <p>1.5 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.</p> <p>1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.</p> |
| 2 Erect simple formwork. | <p>2.1 Prepare substrate.</p> <p>2.2 Review formwork design from drawings.</p> <p>2.3 Erect formwork.</p> <p>2.4 Install vapour barrier.</p> |
| 3 Place and tie reinforcement. | <p>3.1 Handle, cut and position reinforcing components.</p> <p>3.2 Position reinforcing bars and mesh.</p> <p>3.3 Position bar chairs and spacers with minimum edge cover.</p> |
| 4 Place concrete. | <p>4.1 Clean formwork or excavation of excess material and</p> |

- debris before concrete placement.
- 4.2 Transport concrete by wheelbarrow.
 - 4.3 Place concrete in formwork to specified depth.
 - 4.4 Screed concrete to the alignment of formwork and specified datums.
 - 4.5 Finish surface of concrete to specifications.
- 5 Strip simple formwork.
- 5.1 Denail timber components following stripping of formwork.
 - 5.2 Clean and stack components and store for reuse or bundle for removal.
 - 5.3 Remove formwork components from site.
- 6 Clean up.
- 6.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal, materials handling and protection of the environment.
 - 6.2 Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCCO2013 Carry out concreting to simple forms

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by carrying out concreting to a simple form slab of at least 1 square metre and 100 mm in depth by:

- preparing substrate
- erecting formwork
- cutting, placing and tying reinforcement
- placing and hand-screeding concrete to the required finished level and job specification.

All work must be planned and performed using appropriate tools and equipment to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to concreting to simple forms
- workplace quality policies and standards relevant to concreting to simple forms
- safety requirements for concreting to simple forms
- types and uses of tools and equipment required for concreting to simple forms
- uses of concreting materials, including:
 - bar chairs
 - bracing

- edge form and boards
- fabric sheet mesh
- pegs
- spacers
- reinforcing bars
- vapour barriers
- concreting techniques, including:
 - placing
 - screeding
 - finishing
 - floating
- simple forms of concrete, including:
 - beam thickeners
 - channels
 - garden edges
 - pathways
 - post holes
 - simple concrete aprons and slabs
- finishing, including:
 - broomed
 - trowelled
 - trowelling machine finish
 - wood-floated
- properties and use of concrete relevant to concreting to simple forms, including:
 - uses and limitations at differing strength levels
 - ingredients and proportions
 - maintaining design strength during placement
 - mixing techniques
 - curing techniques
 - vibrating and over-vibration
- levelling techniques for concreting to simple forms
- materials storage and environmentally friendly waste management
- plans, drawings and specifications for concreting to simple forms
- processes for the calculation of material requirements for concreting to simple forms, including volume of concrete
- quality requirements for concreting to simple forms
- simple formwork and reinforcing componentry.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Links

Companion Volume implementation guides are found in VETNet -

CPCDDO3011 Perform dogging

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCDDO3011A Perform dogging. Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to undertake basic dogging work for the purpose of shifting loads mechanically both in sight and out of sight of the crane operator. The unit includes selecting sling types and sizes and maintaining the stability of the load.

It applies to workers using dogging tools and equipment, who would be expected to take responsibility for organising and completing work tasks with a high degree of self direction.

Completion of the general construction induction training program, specified in the Safe Work Australia model Code of Practice: Construction Work, is required by anyone carrying out construction work. Achievement of CPCCWHS1001 Prepare to work safely in the construction industry meets this requirement.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Dogging

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and prepare to perform dogging.

1.1 Interpret work order and associated documentation and clarify requirements with relevant persons.

- 1.2 Plan all work to comply with relevant legislation, regulations, standards, codes, work health and safety, environmental and workplace requirements.
 - 1.3 Select tools and equipment required for work tasks, check for serviceability and rectify or report identified faults.
 - 1.4 Confirm task sequencing schedule with relevant persons to ensure coordination.
 - 1.5 Calculate load mass and confirm using load charts and standard calculations.
 - 1.6 Calculate loads in slings and equipment to suit task requirements.
- 2 Sling load.
- 2.1 Erect required safety signage and barricades and select and fit personal protective equipment (PPE).
 - 2.2 Assemble lifting devices and erect for load movement.
 - 2.3 Sling load to lifting device ready for lifting, using appropriate load slinging method.
- 3 Shift load.
- 3.1 Shift load to ensure stability, in compliance with safe work method statement (SWMS).
 - 3.2 Direct load to landing position using appropriate communications in accordance with relevant Australian Standards and workplace requirements.
 - 3.3 Land load in required position on packing or bearers.
- 4 Remove dogging equipment from load.
- 4.1 Dismantle load shifting equipment and inspect for wear. Complete required logbook and site records in accordance with workplace requirements.
 - 4.2 Dismantle load shifting equipment and inspect for wear. Complete required logbook and site records in accordance with workplace requirements.

- 5 Clean up.
- 5.1 Clear work area and dispose of, reuse or recycle materials in accordance with regulatory and workplace requirements.
 - 5.2 Clean, check, maintain and store tools and equipment in accordance with manufacturer and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to interpret non-verbal communication such as hand signals.

Unit Mapping Information

Supersedes and is equivalent to CPCDDO3011A Perform dogging.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCDO3011 Perform dogging

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCDO3011A Perform dogging. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by performing dogging to sling, load, direct and land three loads including:

- one flexible load with a minimum of three lifting points
- one load out of sight of the lifting device operator.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace and regulatory requirements for performing dogging under applicable Commonwealth, state or territory work health and safety (WHS) legislation, Australian Standards and codes of practice:
 - job safety and environmental analyses (JSEAs)
 - safe work method statements (SWMSs)
 - safety data sheets (SDSs)
 - safety manuals and instructions for plant, tools and equipment
 - signage and barricades
 - personal protective equipment (PPE)
 - environmental and worksite safety plans
 - reporting problems
- mathematical processes for calculating load mass
- assessment of weather and ground conditions relating to performing dogging
- types, characteristics, uses and limitations of dogging and lifting equipment
- load-slinging techniques
- dogging techniques
- safe working load tags
- lifting equipment operations and limitations
- signalling methods
- safe working at heights requirements and fall arrest systems

- processes for completion of logbooks and site records
- requirements for cleaning up work area, maintaining and storing tools, equipment and materials, and for environmentally friendly waste management.

Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- industry-standard equipment required to perform the tasks specified in the Performance Evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCOM2001 Read and interpret plans and specifications

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM2001 Read and interpret plans and specifications. Updated to reflect current industry terminology, tools and equipment

Application

This unit of competency specifies the skills and knowledge required to read and interpret plans and specifications relevant to construction operations at a basic level.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit CPCCWHS1001 Prepare *to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Explain features and 1.1 Explain the key features and functions of each of the

- | | |
|---|--|
| functions of plans /drawings and specifications. | main types of plans/drawings used in the construction industry. |
| | 1.2 Locate and explain the purpose of the legend on <i>plans/drawings</i> used in the construction industry. |
| | 1.3 Explain the meaning of construction symbols and abbreviations used on plans/drawings in the construction industry. |
| | 1.4 Check title panels on plans/drawings and specifications to verify latest amendments are included, and report inconsistencies. |
| 2 Locate key features on a site from site plan/drawings. | 2.1 Select and use personal protective equipment (PPE) required to enter a proposed construction site. |
| | 2.2 Orientate the site plan with the site. |
| | 2.3 Locate existing services, key features and boundaries of the site from the site plan and associated drawings. |
| 3 Identify project requirements from plans/drawings and specifications. | 3.1 Identify construction types, project dimensions and nominated locations from project plans/drawings and specifications. |
| | 3.2 Identify environmental requirements, controls and locations from environmental plans, project plans/drawings and specifications. |
| | 3.3 Identify standards of work, finishes and tolerances from project plans/drawings and specifications. |
| | 3.4 Identify required materials from project plans/drawings and specifications. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCM2001 Read and interpret plans and specifications

Assessment Requirements for CPCCOM2001 Read and interpret plans and specifications

Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM2001 Read and interpret plans and specifications. Updated to reflect current industry terminology, tools and equipment

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by reading, interpreting and describing, at a basic level, the requirements for a proposed construction project from a set of plans/drawings and specifications.

All work must be performed to the standard required in the workplace and must comply with work health and safety (WHS) requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- features and functions of different types of plans, drawings and specifications at a basic level, including:
 - construction plans
 - cross-sectional plans
 - dimensions and notes
 - illustrations
 - project specifications including structural detail and specification providing illustrations and dimensions
 - site plans
 - engineering plans
 - legends, symbols and abbreviations used on construction plans and drawings
 - title panels

- processes for:
 - checking amendments to plans, drawings and specifications at a basic level
 - orientating site plans to sites
 - determining information from site plans, drawings and specifications, including:
 - site locations
 - key features
 - construction types
 - project dimensions,
 - environmental requirements
 - materials types.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed while undertaking workplace tasks:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

CPCCON3041 Place concrete

Modification History

- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCCO3041 Place concrete.

Application

This unit of competency specifies the skills and knowledge required to place concrete into prepared formwork or foundations. It includes receiving and checking concrete against specifications, calculating the required volume of concrete, moving concrete from the truck to the pour location, and placing and screeding concrete.

A person who has achieved this unit of competency would be expected to take responsibility for organising and completing these tasks with a high degree of self-direction.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Concreting

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---------------------------------------|---|
| 1 Plan and prepare to place concrete. | 1.1 Interpret specifications for concrete placement and clarify requirements with relevant persons. |
|---------------------------------------|---|

- 1.2 Assess work site to check scope of work against specifications.
 - 1.3 Plan work tasks to comply with relevant legislation, regulations, standards, codes, work health and safety (WHS), environmental and workplace requirements.
 - 1.4 Calculate required material quantities including volume of concrete to meet specifications.
 - 1.5 Estimate and record required time for concrete pour based on size of area to be concreted, volume of concrete, weather conditions and other relevant site factors.
 - 1.6 Select plant, tools and equipment, check for serviceability and rectify or report any faults.
 - 1.7 Select and fit required personal protective equipment (PPE).
- 2 Prepare location for concrete placement.
- 2.1 Inspect work site, assess hazards and apply risk controls including required signage and barricades around pour location.
 - 2.2 Determine location for concrete placement from specifications.
 - 2.3 Discuss implications for concrete placement near existing structures with relevant persons and define separation or connection requirements.
 - 2.4 Check that location for placement is free of debris and waste.
 - 2.5 Ensure site access is clear to allow concrete to be received.
- 3 Receive concrete.
- 3.1 Check concrete delivery docket for accuracy against order.
 - 3.2 Direct concrete delivery vehicle to location of discharge.
 - 3.3 Identify slump tolerance against specifications and relevant standards for minimum grade.

- 3.4 Monitor concrete discharged via chute into appropriate receptacle and communicate with relevant persons to maintain safety and quality in accordance with workplace requirements.
- 4 Carry out concrete placement activities.
 - 4.1 Use required plant, tools and equipment to place concrete in horizontal layers into location in accordance with indicated levels.
 - 4.2 Ensure vertical drop of concrete is less than two metres to avoid segregation of concrete materials.
 - 4.3 Consolidate poured concrete using required compaction or vibration method.
 - 4.4 Carry out measurements and calculations throughout pour to ensure sufficient concrete is delivered to fill placement area, and place order for any shortfall in accordance with workplace requirements.
 - 4.5 Check finished levels against datum using levelling device and rectify incorrect levels.
 - 4.6 Screed concrete to required levels and grades in accordance with specifications.
- 5 Clean up.
 - 5.1 Clear work area and dispose of, reuse or recycle materials in accordance with regulatory and workplace requirements.
 - 5.2 Clean, check, maintain and store plant, tools and equipment in accordance with manufacturer and workplace requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCO3041 Place concrete.

Links

Companion volumes to this training package are available at the VETNet website -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCON3041 Place concrete

Modification History

- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and is equivalent to CPCCCO3041 Place concrete.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by placing concrete in either a non-precast work environment or a precast work environment:

- for the non-precast work environment, placing concrete at five different sites:
 - each site must measure at least 100 square metres
 - one site must include a fall of at least 25 millimetres over 1 metre in distance
- for the precast work environment, on five different occasions, placing concrete for a minimum of three panels involving more than one truck load of concrete.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- basic science of concrete involving cement chemical reaction (hydration) dependent on water content, temperature and time:
 - effect on plastic state performance:
 - benefits and non-benefits of admixture types and doses
 - plastic shrinkage cracking risk
 - effect on hardened state performance:
 - early age and later age strength development
 - drying shrinkage and cracking
- compliance requirements of legislation, regulations, codes and Australian Standards relevant to concrete placement tasks:
 - damp proofing
 - environmental protection and waste disposal
 - material specifications and placement tolerances
 - minimum and maximum temperature limits for pouring concrete
 - work health and safety (WHS)
- concrete placement techniques:
 - horizontal layering

- controlling vertical drop
- cold joints and how to manage them effectively
- consolidation
- concrete reinforcement
- levelling
- screeding
- correct positioning of reinforcement for different concrete products to ensure reinforcement is free from movement and has the correct cover within tolerance
- correct concrete compaction and vibration techniques and risks associated with improper vibration
- effects of temperature, wind and low humidity on the properties of concrete:
 - detrimental effect of water addition to concrete properties
 - precautions that should be taken to minimise any potential adverse effects when placing concrete
- health risks associated with silica dust exposure
- preparation requirements of concrete placement locations:
 - single slab
 - multi-level slab
 - set down and wet areas
 - temporary formwork
- processes for calculating material requirements at various times throughout a concrete pour
- processes for determining levels indicated by:
 - level pegs
 - lines
 - markers
- purpose and importance of slump testing and the impact to concrete strength and durability of adding water on site:
 - drying shrinkage
 - early age strength
 - density
 - cracking
 - discolouration
- specifications used to interpret concrete placement requirements:
 - methods for calculating concrete quantities
 - methods for checking minimum strength and mix specifications
 - types and applications of concrete materials
- types and purpose of concrete additives
- types, characteristics, uses and limitations of plant, tools, equipment and materials used when placing concrete
- workplace requirements for placing concrete:

- cleaning up the work area
- maintaining and storing plant, tools and equipment
- placing orders for shortfalls in materials
- quality
- reporting problems
- safety requirements including personal protective equipment (PPE).

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to documentation, specifications, work sites, materials, plant, tools and equipment required to achieve the performance evidence.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCON3042 Finish concrete

Modification History

- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCCO3042 Finish concrete.

Application

This unit of competency specifies the skills and knowledge required to finish placed and screeded concrete surfaces to specification. It requires using manual and mechanical finishing techniques including edge finishing.

A person who has achieved this unit of competency would be expected to take responsibility for organising and completing these tasks with a high degree of self-direction.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Concreting

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Plan and prepare to finish concrete. | 1.1 Interpret specifications for concrete finishing and clarify requirements with relevant persons. |
|--|---|

- 1.2 Plan work tasks to comply with relevant legislation, regulations, standards, codes, work health and safety (WHS), environmental and workplace requirements.
 - 1.3 Select and fit required personal protective equipment (PPE).
 - 1.4 Inspect work site, assess hazards and apply risk controls, including required signage and barricades.
 - 1.5 Select plant, tools and equipment, check for serviceability and rectify or report any faults.
- 2 Apply concrete finishing techniques.
- 2.1 Leave concrete untouched until bleed water has come to the surface and evaporated.
 - 2.2 Assess concrete surface during curing process and maintain level surface to allow manual and mechanical trowelling to be applied.
 - 2.3 Assess strength of setting concrete using basic thumb test to ensure weight of mechanical trowel and operator can be accommodated.
 - 2.4 Apply mechanical trowelling in multiple overlapping lines to consolidate and densify the setting concrete surface.
 - 2.5 Install jointing system, finish edges, and trowel concrete to specifications.
 - 2.6 Finish concrete and check compliance with specifications and workplace requirements.
- 3 Clean up.
- 3.1 Clear work area and dispose of, reuse or recycle materials in accordance with regulatory and workplace requirements.
 - 3.2 Clean, check, maintain and store tools and equipment in accordance with manufacturer and workplace requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCO3042 Finish concrete.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCON3042 Finish concrete

Modification History

- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and is equivalent to CPCCCO3042 Finish concrete.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by finishing concrete in either a non-precast work environment or a precast work environment:

- for the non-precast work environment, finishing five different concrete surfaces with each surface measuring at least 100 square metres
- for the precast work environment, on five different occasions, finishing a minimum of three concrete panels involving more than one truck load of concrete.

Finishing techniques must include textured or non-slip and one other technique selected from the list below:

- edging and jointing system
- steel trowel.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of legislation, regulations, codes and Australian Standards relevant to concrete finishing tasks:
 - environmental protection and waste disposal
 - work health and safety (WHS)
- concrete finishing techniques:
 - edging and jointing systems
 - steel trowel
 - textured or non-slip
- effects of temperature, wind and low humidity on the properties of concrete:
 - detrimental effect of water addition to concrete properties
 - precautions that should be taken to minimise any potential adverse effects when finishing concrete
- health risks associated with silica dust exposure
- methods for assessing the strength of setting concrete using the basic thumb test

- properties of concrete to be able to correctly identify when finishing techniques should be applied to minimise waste, delay and faults in finished concrete
- purpose and importance of construction, contraction, control and expansion joints:
 - doweling systems
 - installation methods
 - role in the long-term serviceability of concrete pavements
- types, characteristics, uses and limitations of plant, tools and equipment used to finish concrete
- types of drawings and specifications used to interpret concrete finishing requirements
- workplace requirements for finishing concrete:
 - cleaning up the work area
 - maintaining and storing plant, tools and equipment
 - reporting problems
 - quality
 - safety requirements including personal protective equipment (PPE).

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to documentation, specifications, concrete surfaces, plant, tools and equipment required to achieve the performance evidence.

CPCCON3043 Cure concrete

Modification History

- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCCO3043 Cure concrete

Application

This unit of competency specifies the skills and knowledge required to carry out the initial curing process to poured concrete in order to control moisture evaporation from finished concrete. It includes using curing agents and techniques in accordance with engineering specifications.

A person who has achieved this unit of competency would be expected to take responsibility for organising and completing these tasks with a high degree of self-direction.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Concreting

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--------------------------------------|---|
| 1 Plan and prepare to cure concrete. | 1.1 Interpret specifications to confirm concrete curing methods and clarify requirements with relevant persons. |
|--------------------------------------|---|

- 1.2 Plan work tasks to comply with relevant legislation, regulations, standards, codes, work health and safety (WHS), environmental and workplace requirements.
 - 1.3 Identify necessary preventative barriers to comply with regulatory and workplace requirements.
 - 1.4 Select and fit required personal protective equipment (PPE).
 - 1.5 Inspect work site, assess hazards and apply risk controls, including required signage and barricades.
 - 1.6 Select tools and equipment, check for serviceability and rectify or report any faults.
 - 1.7 Calculate and acquire required material quantities for specified curing methods and safely locate materials ready for use.
- 2 Carry out concrete curing activities.
- 2.1 Install and maintain preventative barriers to stop curing agents from affecting the surrounding environment.
 - 2.2 Assess weather and climatic conditions, calculate curing duration and make any adjustments necessary to achieve required curing outcome.
 - 2.3 Apply and maintain curing method on concrete surface in accordance with manufacturer and workplace requirements.
 - 2.4 Protect concrete during curing process in accordance with workplace requirements.
- 3 Clean up.
- 3.1 Clear work area and dispose of, reuse or recycle materials in accordance with regulatory and workplace requirements.
 - 3.2 Clean, check, maintain and store materials, tools and equipment in accordance with manufacturer, regulatory and workplace requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCCO3043 Cure concrete

Assessment Requirements for CPCCON3043 Cure concrete

Modification History

- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCCCO3043 Cure concrete

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by curing concrete in either a non-precast work environment or a precast work environment:

- for the non-precast work environment, curing concrete at five different sites, each measuring at least 100 square metres
- for the precast work environment, curing a minimum of three panels on five different occasions.

A total of two curing techniques must be used:

- curing compound
- another technique selected from the following:
 - covering
 - flooding or ponding
 - fogging
 - steaming.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- basic science of concrete involving cement chemical reaction (hydration) dependent on water content, temperature and time:
 - effect on plastic state performance
 - benefits and non-benefits of admixture types and doses
 - plastic shrinkage cracking risk
 - effect on hardened state performance:
 - early age and later age strength development
 - drying shrinkage and cracking
- compatibilities of curing compounds with different floor finishes including vinyl, timber and natural stone products

- compliance requirements of legislation, regulations, codes and Australian Standards relevant to concrete curing tasks:
 - environmental protection and waste disposal
 - work health and safety (WHS)
- concrete curing techniques:
 - covering
 - curing compound
 - flooding or ponding
 - fogging
 - steaming
- effects of temperature, wind and low humidity on the properties of concrete:
 - detrimental effect of water addition to concrete properties
 - precautions that should be taken to minimise any potential adverse effects when curing concrete
- health risks associated with silica dust exposure
- methods for calculating curing duration
- specifications used to interpret material quantities and concrete curing requirements
- types and applications of materials and compounds used when curing concrete
- types, characteristics, uses and limitations of tools and equipment used when curing concrete
- ways to minimise moisture loss during curing using different curing methods
- workplace requirements for curing concrete:
 - cleaning up the work area
 - maintaining and storing materials, tools and equipment
 - quality
 - reporting problems
 - safety requirements including personal protective equipment (PPE).

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to documentation, specifications, materials, tools and equipment required to achieve the performance evidence.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCST2001 Prepare for stonemasonry construction process

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCST2001A Prepare for the stonemasonry construction process. Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to undertake the preparation processes required to support the laying or placement of stone. It includes assisting in stonemasonry work by preparing materials and using a range of tools and equipment.

The unit is suitable for people with basic skills and knowledge who undertake routine stonemasonry work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Stonemasonry

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan the work.

1.1 Read, interpret and apply stonemasonry construction requirements from current plans, specifications, standards and codes and confirm information with

- relevant person.
- 1.2 Source information and communicate with others using digital technology.
 - 1.3 Follow requirements in workplace safety and environmental documentation and workplace procedures.
 - 1.4 Clarify job priorities and sequence job tasks in consultation with others on site.
 - 1.5 Identify potential hazards and determine and implement control measures.
 - 1.6 Use measurements and apply formulas to calculate material quantities.
- 2 Prepare the work.
- 2.1 Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
 - 2.2 Check conformity of materials against the job requirements.
 - 2.3 Select and blend stone colours as instructed and position materials ready for use.
 - 2.4 Select and check condition of equipment and tools required for the job and report damage or faults to supervisor.
 - 2.5 Prepare equipment and materials for mixing of mortar or adhesives.
 - 2.6 Set up cement mixer, locate mortar boards and clear pathways for supply of mortar.
- 3 Assist with stonemasonry work.
- 3.1 Maintain a supply of mortar to boards and stone to stacks.
 - 3.2 Use hand and power tools to clean, cut and prepare stone for laying.
 - 3.3 Assist in the set out, erection and stabilising of the scaffold.
 - 3.4 Clean finished stonework prior to mortar drying.

- 4 Clean up.
 - 4.1 Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
 - 4.2 Clean tools and equipment, check for serviceability and report damage or faults.
 - 4.3 Store and secure tools and equipment following workplace procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCST2001A Prepare for stonemasonry construction process

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCST2001 Prepare for stonemasonry construction process

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCST2001A Prepare for the stonemasonry construction process. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by assisting with two stone masonry laying project on two different sites.

In doing this, the candidate must:

- clear the work area, position masonry materials ready for laying
- mix mortar or adhesive to job specifications and maintain sufficient quantities on mortar boards
- maintain a clean and safe workplace.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of specified materials for stonemasonry construction
- igneous, metamorphic and sedimentary rocks and the appropriate tools to work on these type of rocks
- construction terminology relating to stonemasonry construction
- mortar and adhesive ingredients and consistency
- functional and operational features of equipment and hand and power tools:
 - angle grinders
 - masonry saws
 - hand tools
 - wheelbarrows
- types and safe use of stone lifting equipment
- workplace practices relating to stonemasonry
- workplace safety:
 - job safety and environmental analysis (JSEA)

- exposure to silica dust
- exposure to loud noise
- hazardous manual tasks
- processes and techniques for:
 - material protection and storage
 - stonemasonry construction work
 - locating and loading mortar boards
 - work area preparation
 - laying stone
- environmental requirements for workplace processes and waste disposal.
- key features of plans and specifications
- stonemasonry regulations, standards and codes.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Application

This unit specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in all on- or off-site construction workplaces.

It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

The unit covers fundamental WHS requirements necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

It applies to workers in the construction industry.

This unit also relates directly to the general construction induction training requirements of the Model Work Health and Safety Regulations 2011 and relevant occupational health and safety regulations for Victoria and for Western Australia. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* covers these induction training requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and assess risks.	<p>1.1 Identify, assess and report hazards in the work area to designated personnel.</p> <p>1.2 Report safety risks in the work area based on identified hazards, to designated personnel.</p> <p>1.3 Follow safe work practices, duty of care requirements and safe work instructions for controlling risks.</p> <p>1.4 Contribute to WHS, hazard, accident or incident reports in accordance with workplace procedures, Australian government and state or territory WHS legislation, and relevant information.</p>
2. Identify hazardous materials and other hazards on work sites.	<p>2.1 Correctly identify and, if appropriate, handle and use hazardous materials on a work site in accordance with legislative requirements, and workplace policies and procedures.</p> <p>2.2 Apply measures for controlling risks and construction hazards effectively and immediately.</p> <p>2.3 Use appropriate signs and symbols to secure hazardous materials that have safety implications for self and other workers, immediately they are identified.</p> <p>2.4 Identify asbestos-containing materials on a work site and report to designated personnel.</p>
3. Plan and prepare for safe work practices.	<p>3.1 Identify, wear, correctly fit, use and store correct personal protective equipment and clothing for each area of construction work in accordance with workplace procedures</p> <p>3.2 Select tools, equipment and materials, and organise tasks in conjunction with other personnel on site and in accordance with workplace procedures.</p> <p>3.3 Determine required barricades and signage, and erect at the appropriate site location.</p> <p>3.4 Apply material safety data sheets (MSDSs), job safety analyses (JSAs) and safe work method statements (SWMSs) relevant to the work to be performed.</p>
4. Apply safe work practices.	<p>4.1 Carry out tasks in a manner that is safe for operators, other personnel and the general community, in accordance with legislative requirements, and workplace policies and procedures.</p> <p>4.2 Use plant and equipment guards in accordance with manufacturers' specifications, work site regulations and Australian Standards.</p> <p>4.3 Follow procedures and report hazards, incidents and injuries</p>

	<p>to relevant authorities.</p> <p>4.4 Recognise and do not use prohibited tools and equipment in areas containing identified asbestos.</p> <p>4.5 Identify and follow requirements of work site safety signs and symbols.</p> <p>4.6 Clear and maintain work site area to prevent and protect self and others from incidents and accidents, and to meet environmental requirements.</p>
<p>5. Follow emergency procedures.</p>	<p>5.1 Identify designated personnel in the event of an emergency for communication purposes.</p> <p>5.2 Follow safe workplace procedures for dealing with accidents, fire and other emergencies, including identification and use, if appropriate, of fire equipment within scope of own responsibilities.</p> <p>5.3 Describe, practice and effectively carry out emergency response and evacuation procedures when required.</p> <p>5.4 Carry out emergency first aid treatment of minor injuries and, as soon as possible, accurately report treatment details to designated personnel.</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must apply WHS requirements, policies and procedures on three separate and different occasions in the construction industry.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations
- workplace requirements for undertaking all aspects of applying WHS requirements, policies and procedures in the construction industry including interpreting work orders and reporting problems
- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos, in the workplace
- procedures for following safe practices when dealing with hazards and hazardous materials, and controlling risks associated with them
- use of appropriate protective equipment and clothing, choice of tools, use of barricades and signage, and the necessity of following relevant safety procedures as indicated
- methods of safely performing tasks in accordance with legislative requirements and workplace policies and procedures
- procedures for reporting hazards, incidents and injuries
- necessity for keeping work site clear of risks to prevent accidents and to meet environmental requirements
- policies and procedures to be followed in an accident, fire or other type of emergency.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- appropriate documents, materials, tools, equipment and personal protective equipment currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CPCPCM2040 Read plans, calculate quantities and mark out materials

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is not equivalent to CPCPCM2040A Read plans and calculate plumbing quantities, and CPCPCM2050A Mark out materials.
Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to read and interpret construction and plumbing plans and specifications and obtain dimensions to calculate material quantities and mark out materials.

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-requisite Unit

CPCPCM2043 Carry out WHS requirements

CPCPCM3024 Prepare simple drawings

Unit Sector

Plumbing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Establish job requirements.

1.1 Access, read and determine requirements from plumbing plans and specifications, relevant Australian Standards, codes, manufacturer's specifications and jurisdictional requirements.

- 1.2 Obtain, interpret and follow organisational work health and safety (WHS) and environmental requirements.
 - 1.3 Identify amendments to ensure plans and specifications are the most current version.
 - 1.4 Confirm drawing conventions used and their application.
 - 1.5 Select appropriate tools and equipment.
 - 1.6 Determine type of materials.
 - 1.7 Calculate dimensions and material quantities.
 - 1.8 Document materials list to workplace requirements.
- 2 Mark out job.
- 2.1 Read and determine job dimensions from relevant plans and specifications.
 - 2.2 Mark out materials using appropriate marking tools.
 - 2.3 Check markings for accuracy and compliance with planned dimensions.
- 3 Clean up.
- 3.1 Clear the work area, and dispose of, reuse or recycle materials in accordance with state/territory legislation and workplace policies and procedures.
 - 3.2 Clean tools and equipment, check for serviceability and report any damage, and store and secure.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is not equivalent to CPCPCM2040A Read plans and calculate plumbing quantities, and CPCPCM2050A Mark out materials.

Links

Companion volumes to this training package are available at the VETNet website -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCPCM2040 Read plans, calculate quantities and mark out materials

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is not equivalent to CPCPCM2040A Read plans and calculate plumbing quantities, and CPCPCM2050A Mark out materials.

Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by referring to plans and specifications for at least three different plumbing or plumbing services tasks to:

- develop a full materials and specifications list, including lengths, diameters and quantities
- transfer requirements from the plans to accurately mark out materials.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- types of plans and their purpose
- parts of a plan and their function
- conventions and scales used in plans and specifications
- calculation principles used in the plumbing sector:
 - converting millimetres to metres
 - converting metres to millimetres
 - length
 - perimeter
 - circumference
 - area
 - volume
 - pressure
 - addition, subtraction, multiplication and division
 - ratio
 - percentage
- how to access relevant information, including codes and standards

- tools, materials and equipment used to read plans, calculate quantities and mark out materials
- work health and safety (WHS) requirements for reading plans, calculating quantities and marking out materials.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCPCM2043 Carry out WHS requirements

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Knowledge Evidence formatted for clarity.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCPCM2043A Carry out WHS requirements. Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to carry out work health and safety (WHS) requirements in a plumbing and services work environment.

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-requisite Unit

Nil.

Unit Sector

Plumbing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Participate in workplace induction procedures. | 1.1 Familiarise self on workplace induction procedures. |
| | 1.2 Identify location of emergency equipment, designated personnel and current workplace emergency and evacuation procedures. |

- 2 Plan and prepare for safe work practices.
 - 2.1 Identify and apply safe work practices when preparing for and undertaking work process.
 - 2.2 Select personal protective equipment (PPE) and ensure it is correctly fitted and used according to the requirements of the job.
 - 2.3 Select tools and equipment consistent with safe work requirements and check for serviceability, reporting any faults.
 - 2.4 Determine and erect required barricades, hoardings and signage at job location where required.
 - 2.5 Identify and apply relevant safety data sheets (SDSs), job safety analyses (JSAs), safe work method statements (SWMSs) and standard operating procedures (SOPs).

- 3 Identify and assess risks.
 - 3.1 Identify, assess and report hazards in the work area to designated personnel.
 - 3.2 Report safety risks in the work area based on identified hazards to designated personnel.
 - 3.3 Follow safe work practices, duty of care requirements and safe work instructions for controlling risks.
 - 3.4 Contribute to WHS, hazard, accident or incident reports in accordance with workplace procedures, Australian government and state/territory WHS legislation, and relevant information.

- 4 Identify hazardous materials and other hazards on work sites.
 - 4.1 Identify and apply appropriate procedures to handle and use hazardous materials on a work site in accordance with legislative requirements and workplace policies and procedures.
 - 4.2 Apply measures for controlling risks and construction hazards effectively and immediately.
 - 4.3 Use appropriate signs and symbols to secure hazardous materials that have safety implications for self and other workers immediately after they are identified.

- 5 Apply safe work practices.
- 5.1 Carry out tasks in a manner that is safe for operators, other personnel and the general community, in accordance with legislative requirements and workplace policies and procedures.
 - 5.2 Use fit-for-purpose tools, plant and equipment in accordance with manufacturers' specifications, work site regulations and Australian Standards.
 - 5.3 Follow procedures and report any hazards, incidents and injuries to designated personnel.
 - 5.4 Identify and follow requirements of work site safety signs and symbols.
 - 5.5 Clear and maintain work site area to prevent and protect self and others from incidents and accidents and to meet environmental requirements.
 - 5.6 Follow workplace emergency procedures where required.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCPCM2043A Carry out WHS requirements.

Assessment Requirements for CPCPCM2043 Carry out WHS requirements

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Knowledge Evidence formatted for clarity.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCPCM2043A Carry out WHS requirements. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by:

- applying work health and safety (WHS) requirements, policies and procedures on three separate and different occasions in the plumbing and services work environment.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos and silica in the workplace
- job safety analyses (JSAs) and safe work method statements (SWMSs)
- safe manual handling techniques
- purpose and application of safety data sheets (SDSs) when working with different materials
- relevant legislation, regulations and workplace requirements relating to WHS, including hazard reduction and personal safety
- the requirements for working in confined spaces
- the requirements for working at heights, including on roofs
- electrical safety requirements, including but not limited to:
 - tag and test
 - residual current devices
 - equipotential (electrical) bonding
 - electrical earthing
- risk assessment processes
- safe work practices in a normal working environment:

- handling of materials
- hand tools
- power tools
- hazard control procedures and procedures for handling hazardous materials and substances
- personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices
- selection and use of firefighting equipment
- first aid procedures
- workplace induction requirements
- workplace response to emergencies.

CPCPCM2047 Carry out levelling

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCPCM2047A Carry out levelling.

Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to plan and use levelling equipment.

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-requisite Unit

CPCPCM2043 Carry out WHS requirements

Unit Sector

Plumbing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Identify levelling requirements.	1.1 Access, read and determine levelling requirements from relevant job plans and specifications, codes, Australian standards, manufacturer's specifications and jurisdictional requirements.
	1.2 Identify and apply workplace, work health and safety (WHS) and environmental requirements.
2 Prepare for work.	2.1 Select and check serviceability of appropriate tools, equipment and personal protective equipment (PPE).
	2.2 Check levelling equipment for current calibration in

accordance with state and territory legislation and workplace policies and procedures.

- 3 Perform levelling.
 - 3.1 Identify levels to be transferred from relevant job plans and specifications.
 - 3.2 Set up and operate levelling equipment according to manufacturer's specifications, workplace procedures and standards.
 - 3.3 Record and mark levels according to job requirements and workplace procedures, ensuring the required tolerance and specifications.
- 4 Clean up.
 - 4.1 Clear the work area and dispose of, reuse or recycle materials in accordance with state and territory legislation and workplace policies and procedures.
 - 4.2 Clean tools and equipment, check for serviceability and report any damage, and store and secure.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCPCM2047A Carry out levelling.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCPCM2047 Carry out levelling

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCPCM2047A Carry out levelling.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by:

- using either a pipe laser, rotary laser or automatic level
- grading a pipe or gutter for a minimum of 5 metres to a tolerance of + or - 5 mm.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- different types of levelling tools and equipment and their application and method of operation:
 - laser level
 - automatic level
 - spirit level
 - water level
 - string line
 - staff
- safe work procedures relating to the use, handling and storage of levelling equipment
- process of establishing, recording and checking levels and alignment
- basic calculations relating to carrying out levelling
- how to access relevant information, including relevant job plans and specifications, codes and standards manufacturer's specifications and jurisdictional requirements
- tools, materials and equipment used to carry out levelling operations
- work health and safety (WHS) requirements for carrying out levelling operations.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCPCM3023 Fabricate and install non-ferrous pressure piping

Modification History

- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.
Amended Performance Criteria 3.2.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Changes to Element and Performance Criteria 2.2 and 3.5.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCPCM3023A Fabricate and install non-ferrous pressure piping. Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to fabricate and install non-ferrous pressure piping.

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, and regulatory or certification requirements.

Pre-requisite Unit

CPCPCM2043 Carry out WHS requirements

Unit Sector

Plumbing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---------------------------------------|---|
| 1 Identify installation requirements. | 1.1 Access, read and determine requirements to fabricate and install non-ferrous pressure piping from relevant job plans and specifications, codes, Australian standards, |
|---------------------------------------|---|

- manufacturer's specifications and jurisdictional requirements.
- 1.2 Identify and apply workplace policies and procedures, work health and safety (WHS) and environmental requirements.
- 2 Prepare for work.
 - 2.1 Create a materials list and collect materials.
 - 2.2 Set up silver brazing equipment according to workplace and WHS procedures.
 - 2.3 Select and check serviceability of appropriate tools and equipment including personal protective equipment (PPE).
- 3 Fabricate, install and test pipe system.
 - 3.1 Set out pipelines and connection points according to drawings and specifications or job instructions.
 - 3.2 Use silver brazing equipment according to workplace and WHS procedures.
 - 3.3 Install pipework in accordance with relevant job plans and specifications, codes, Australian standards, manufacturer's specifications and jurisdictional requirements.
 - 3.4 Test installed pipework according to relevant codes, Australian standards, manufacturer's specifications and jurisdictional requirements.
 - 3.5 Shut down and dismantle silver brazing equipment according to workplace and WHS procedures.
- 4 Clean up.
 - 4.1 Clear the work area, and dispose of, reuse or recycle materials in accordance with state and territory legislation and workplace policies and procedures.
 - 4.2 Clean tools and equipment, check for serviceability reporting any damage, store and secure.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCPCM3023A Fabricate and install non-ferrous pressure piping.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCPCM3023 Fabricate and install non-ferrous pressure piping

Modification History

Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.

Amended Performance Criteria 3.2.

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Changes to Element and Performance Criteria 2.2 and 3.5.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCPCM3023A Fabricate and install non-ferrous pressure piping. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by:

- fabricating, installing and testing a DN20 copper line from a supply point to three fixed outlets, supported and clipped according to relevant job plans and specification, codes, Australian Standards, manufacturer's specifications and jurisdictional requirements with a minimum:
 - one 15 mm mechanical bend
 - one 20 mm mechanical bend
 - one 15 mm spring bend
 - one 20 mm spring bend
 - one 15 mm capillary elbow
 - one 20 mm capillary elbow
 - one expanded silver brazed joint
 - one silver brazed copper to brass joint
 - two branch formed silver brazed joints
 - one mechanical flared joint
 - branches connecting at least two other non-ferrous materials, ensuring branches and bends are square.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- fabrication, installation and testing process for non-ferrous pressure pipe systems
- relevant statutory authorities' requirements and standards related to fabricating, installing and testing non-ferrous pressure pipe systems
- effect of heat and other products on the properties of polymer pipe
- types of non-ferrous materials, including joining techniques
- hot works permit
- how to access relevant information, including codes and standards
- tools, materials and brazing equipment used to fabricate and install non-ferrous pressure piping
- work health and safety (WHS) requirements to fabricate and install non-ferrous pressure piping.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Links

CPCPPS5027 Design irrigation systems

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCPPS5027A Design irrigation systems.
Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to design irrigation systems to relevant Australian Standards, codes, the National Construction Code (NCC) and other relevant legislative requirements to meet occupier needs and industry standards.

This unit covers requirements for work in a consultancy or supervisory capacity in relation to the design of irrigation systems for residential, commercial, industrial, sporting ovals and agricultural properties with or without connection to reticulated supply.

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-requisite Unit

Nil.

Unit Sector

Plumbing and Fire Services

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Evaluate design parameters.	1.1 Identify and confirm the scope of work for irrigation systems.
	1.2 Determine design requirements from relevant Australian Standards, codes, plans, specifications and client brief.
	1.3 Conduct cost-benefit analysis comparing a range of pipe materials and system designs.

- 1.4 Interpret, analyse and apply statutory and regulatory requirements and relevant Australian Standards and codes for the design of irrigation systems.
 - 1.5 Obtain trade and technical manuals and interpret manufacturer requirements for irrigation systems.
 - 1.6 Conduct research to outline design parameters.
 - 1.7 Conduct flow and pressure tests for the irrigation systems.
 - 1.8 Establish water sources, volumes and areas to be irrigated.
 - 1.9 Analyse and categorise soil types, documenting the impacts on irrigation systems as per workplace procedures.
- 2 Plan and detail system components.
- 2.1 Plan layout of pipework systems including the type and location of fittings, valves and controls.
 - 2.2 Detail the type, location and requirements for backflow prevention devices.
 - 2.3 Calculate pipe sizes, velocities, flows and pressures for a range of applications.
 - 2.4 Specify the approved materials and jointing methods for irrigation systems.
 - 2.5 Detail sections and components of the irrigation system.
 - 2.6 Design pipe supports for a range of applications.
 - 2.7 Size and detail pump enclosure and control requirements.
 - 2.8 Specify installation requirements for irrigation management system.
 - 2.9 Determine water storage requirements.
 - 2.10 Make allowance for pipe movement.
- 3 Design and size systems
- 3.1 Analyse requirements and consider options available to design irrigation systems.

- 3.2 Design delivery systems and layout.
 - 3.3 Design and size irrigation systems.
 - 3.4 Determine required water application to establish and maintain plant life.
 - 3.5 Apply sustainability principles and concepts throughout the design process.
- 4 Prepare documentation.
- 4.1 Prepare and document client brief of the desired design.
 - 4.2 Prepare and document plans and specifications for a range of irrigation systems.
 - 4.3 Prepare testing and commissioning schedule.
 - 4.4 Produce operation and maintenance manual.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCPPS5027A Design irrigation systems.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPCPPS5027 Design irrigation systems

Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCPPS5027A Design irrigation systems.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by:

- designing, sizing and documenting layout details of an irrigation system including specification for a:
 - sports oval incorporating stormwater collection and use, with a mains pressure drinking water top-up and with chemical additives
 - a landscaped area for a mixed development site connected to a main pressure recycled (non-drinking) water main
- evaluating and documenting design parameters to relevant Australian Standards and codes, and regulatory, client and manufacturer requirements
- planning and detailing system components that include:
 - backflow prevention devices
 - irrigation management-control system
 - pumping requirements
 - water delivery outlets
 - piping requirements
- designing and sizing two irrigation systems, using appropriate calculations and computer software for specific applications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- statutory and regulatory requirements related to designing irrigation systems including:
 - Commonwealth government
 - state or territory governments
 - local authorities
 - AS/NZS 3500 National plumbing and drainage
 - AS2200 Design charts for water supply and sewerage

- National Construction Code (NCC)
- state or territory health departments
- common terminology and definitions used in the design of irrigation systems
- design requirements including:
 - architectural plans
 - backflow requirements
 - interpretation and application of irrigation services, drawings and symbols
 - irrigation management system
 - owner requirements
 - precipitation and evaporation rates
 - pumping requirements
 - required water application to establish and maintain plant life
 - source of irrigation water
 - sprinkler head systems
 - system requirements
 - water storage requirements
- cost-benefit analysis comparing the range of suitable materials and system choices available to enable cost-effective choices without compromising the integrity of the project
- manufacturer requirements including:
 - irrigation management system
 - material specification
 - pump tables
 - sprinkler head performance
 - sub-surface irrigation
 - technical and trade manuals
- nature of materials used and effects of performance under various conditions including:
 - composite pipework
 - copper (Cu)
 - cross-linked polyethylene (PE-X)
 - polypropylene (PP)
 - polybutylene (PB)
 - polyvinyl chloride (PVC)
- characteristics and application of different backflow prevention devices including:
 - double-check valve assembly (DCV)
 - dual-check valve with intermediate vent (DuCV)
 - pressure type vacuum breaker (PVB)
 - reduced pressure zone device (RPZD)
 - registered air gap (RAG)
 - registered break tank (RBT)

- reduced pressure detector assembly (RPDA)
- reduced pressure zone device (RPZD)
- other approved backflow prevention devices
- layout of pipework systems including:
 - distribution
 - dual feed systems
 - range pipes
 - ring main
 - single pipe
 - control stations
- sections and components of the irrigation systems including:
 - irrigation stations
 - manifold systems
 - sensors
 - automatic controls
 - sprinklers, drippers and irrigators
 - sprinkler patterns
- testing and commissioning schedule requirements including:
 - defect inspection
 - hydrostatic
 - mains pressure
 - performance
 - quality assurance (QA) audit
 - system certification
 - flow test
 - leak check
 - pressure test
 - system defect
 - system functions as per design
 - valve and system operation
- operation and maintenance manual requirements including:
 - as installed drawings
 - results of commissioning test
 - certification documentation
 - maintenance schedules
 - manufacturer brochures and technical information
 - operational procedures
 - valve function
- installation requirements including:
 - pipe connection

- bedding and backfilling
- corrosion
- cover
- ground stability
- impact
- level of workmanship
- manufacturer recommendations
- pipe support
- provision for pipe movement
- serviceability and access
- delivery systems and layout requirements including:
 - main delivery
 - number and design control
 - design:
 - avoiding obstacles
 - irregular shapes
 - minimising water wastage
 - range of irrigation applications
 - range pipes
 - ring mains
 - size and water delivery of sprinklers
 - sprinkler head patterns and placement
- plans and specification requirements including:
 - plans:
 - axonometrics
 - cross-sections
 - details
 - elevations
 - isometrics
 - schematics
 - sections
 - specifications:
 - bedding
 - flow requirements
 - irrigation management control system
 - jointing
 - manufacturer requirements
 - materials
 - pumps
 - residual pressures

- work health and safety (WHS)
 - specialised components
 - sprinkler head selection
 - storage tanks
 - support
 - testing
 - valve selection
 - water treatment
 - workmanship
- principles of technology used in the design of irrigation systems for a range of applications
 - characteristics of different soil types and the impact on the irrigation systems design
 - characteristics and application of different fittings, valves and controls
 - characteristics and application of different jointing methods
 - flow and pressure testing procedures
 - information required to undertake a desktop study to outline design parameters
 - pipe support design requirements
 - sustainability principles and concepts including:
 - selecting appropriate material to ensure minimal environmental impact
 - efficient use of material
 - efficient energy usage/capital outlay comparison
 - water efficiency
 - re-use of water, such as rainwater, grey water and recycled non-drinking water
 - consideration of the Green Building Council of Australia rating scheme.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCPWT3027 Install backflow prevention devices

Modification History

- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2.
Correction to prerequisite unit code from *CPCPCM2043A Carry out WHS requirements* to *CPCPCM2043 Carry out WHS requirements*.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Typographical error in Elements and Performance Criteria 1 corrected.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCPWT3027A Connect irrigation systems from drinking water supply. Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to install backflow prevention devices. It does not include the commissioning or testing of backflow prevention devices or arrangements.

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-requisite Unit

CPCPCM2043 Carry out WHS requirements

CPCPCM3023 Fabricate and install non-ferrous pressure piping.

Unit Sector

Plumbing and Fire Services

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|---------------------------------------|---|
| 1 Identify installation requirements. | 1.1 Access, read and determine backflow prevention device installation requirements from relevant job plans and specifications, codes, Australian standards, manufacturer's specifications and jurisdictional requirements. |
| | 1.2 Identify and apply workplace, work health and safety (WHS) and environmental requirements. |
| 2 Prepare for work. | 2.1 Create a materials list and collect materials. |
| | 2.2 Select and check serviceability of appropriate tools and equipment including personal protective equipment (PPE). |
| 3 Connect and test system. | 3.1 Set out and install backflow prevention device according to relevant from relevant job plans, specifications, codes, Australian standards, manufacturer's specifications and jurisdictional requirements. |
| | 3.2 Test installed pipework according to relevant job specifications, codes, Australian standards, manufacturer's specifications and jurisdictional requirements. |
| 4 Clean up. | 4.1 Clear the work area and dispose of any materials in accordance with state and territory legislation and workplace procedures. |
| | 4.2 Clean, check for serviceability and store and secure plant, equipment and tools reporting any damage to appropriate personnel. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCPWT3027A Connect irrigation systems from drinking water supply.

Assessment Requirements for CPCPWT3027 Install backflow prevention devices

Modification History

- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2.
Correction to prerequisite unit code from CPCPCM2043A Carry out WHS requirements to CPCPCM2043 Carry out WHS requirements.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Typographical error in Elements and Performance Criteria 1 corrected.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCPWT3027A Connect irrigation systems from drinking water supply. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by:

- installing three different backflow prevention devices one being low hazard rating, one being a medium hazard rating, and one being a high hazard rating from the list below, including pipework to inlet of the backflow device and ancillary equipment.
- Low hazard device defined as:
 - dual-check valve with atmospheric port
 - dual-check valve
 - dual-check valve with intermediate vent
 - atmospheric vacuum breaker
 - single check valve (testable)
 - single check detector assembly (testable).
- Medium hazard testable device defined as:
 - double-check valve assembly
 - double-check detector assembly
 - pressure type vacuum breaker.
- High hazard testable device defined as:
 - registered break tank

- registered air gap
- reduced pressure zone device
- reduced pressure detector assembly.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- pressure and flow rates
- types of backflow prevention devices such as:
 - testable
 - non-testable
- backflow hazard ratings
- suitability of backflow prevention devices
- types of irrigation systems
- how to access relevant information, including codes and standards
- tools, materials and equipment used to install backflow prevention devices
- work health and safety (WHS) requirements to install backflow prevention devices.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

Pre-requisite Unit

Nil

Unit Sector

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify health and safety legislative 1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to **jurisdictional**

requirements of construction work.		health and safety legislative requirements.
	1.2.	Duty of care requirements are identified.
	1.3.	Construction safe work practices are identified and explained.
2. Identify construction hazards and risk control measures.	2.1.	Basic principles of risk management are identified.
	2.2.	Construction hazards are identified and discussed.
	2.3.	Purpose and use of PPE are identified and demonstrated.
	2.4.	Measures for controlling hazards are identified.
3. Identify health and safety communication and reporting processes.	3.1.	Health and safety documents are identified and discussed.
	3.2.	Roles of designated health and safety personnel are identified and explained.
	3.3.	Safety signs and symbols are identified and explained.
	3.4.	Procedures for reporting hazards, incidents and injuries are identified.
4. Identify incident and emergency response procedures.	4.1.	Procedures for responding to incidents and emergencies are identified and explained.
	4.2.	Procedures for accessing first aid are identified.
	4.3.	Types and purpose of fire safety equipment are identified and discussed.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
-------	---------------------

Numeracy skills to:	<ul style="list-style-type: none"> locate and recognise numbers commonly used in safety signs.
Oral communication skills to:	<ul style="list-style-type: none"> ask questions to clarify instructions listen to instructions to identify key safety information tell another person about a construction problem or hazard.
Reading skills to:	<ul style="list-style-type: none"> follow simple pictorial safety instructions follow simple safety instructions that are written in English.
Problem-solving skills to:	<ul style="list-style-type: none"> select risk control measures.
Written skills to:	<ul style="list-style-type: none"> complete a basic form.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Jurisdictional health and safety legislative requirements must include at least one of the following state and territory Acts or their equivalent:

- Australian Capital Territory: Work Health and Safety Act 2011
- New South Wales: Work Health and Safety Act 2011
- Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011
- Queensland: Work Health and Safety Act 2011
- South Australia: Work Health and Safety Act 2012
- Tasmania: Work Health and Safety Act 2012
- Victoria: Occupational Health and Safety Act 2004
- Western Australia: Occupational Safety and Health Act 1984.

Unit Mapping Information

Supersedes and is equivalent to CPCCWHS1001 Prepare to work safely in the construction industry.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
 - fire blankets
 - fire-extinguishers, including water, carbon dioxide, powder and foam
 - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- explain the roles of the following designated health and safety personnel:
 - first aid officers
 - work health and safety (WHS) representatives
 - WHS committee members
 - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat
- high visibility vest, shirt or jacket.

Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms 'hazard' and 'risk'
- basic principles of risk management, including the following five steps in order:
 - identify hazard
 - assess risk
 - consult and report
 - control hazard
 - review
- basic procedures for accessing first aid

- construction hazards, including those relating to:
 - asbestos
 - confined spaces
 - electrical: power lines, cords and equipment
 - excavations and trenches, including underground services
 - dust
 - falling objects
 - hazardous substances and dangerous goods
 - hot and cold work environments
 - manual handling
 - noise
 - plant and equipment operation
 - traffic and mobile plant
 - unplanned collapse
 - ultraviolet (UV) radiation
 - working at heights, including scaffolding
- construction work that requires a high-risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and UV protective clothing and sunscreen
- construction emergencies, including:
 - chemical spill
 - fire
 - injury to personnel
 - structural collapse
 - toxic or flammable vapour emission
 - vehicle or mobile plant accident
- construction incidents, including:
 - incidents resulting in personal injury or damage to property
 - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
 - accessing and using site amenities for drinking water, hand washing and toilets
 - following safety procedures when performing work tasks and using equipment
 - identifying and reporting hazards, incidents and injuries in the workplace
 - keeping the work area clean, tidy and free from debris
 - not using or being affected by drugs and/or alcohol while at work
 - preventing bullying and harassment in the workplace
 - selecting and using required PPE

- smoking only in designated areas
- storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
 - emergency information signs: exits, emergency equipment and first aid
 - fire signs: location of fire alarms and firefighting equipment
 - hazard signs and symbols: danger and warning
 - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
 - safety and lockout tags: danger and out-of-service tags.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - all of the PPE listed in the performance evidence
- specifications:
 - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment must reflect a range of methods including practical demonstration, oral and written reporting.

The assessment of performance evidence must be conducted by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Assessors must hold the unit *CPCWHS2001 Apply WHS requirements, policies and procedures in the construction industry*, or its successor.

CPPFES2005 Demonstrate first attack firefighting equipment

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 13.0.

Supersedes and is equivalent to CPPFES2005A Demonstrate first attack firefighting equipment. Unit updated to meet the Standards for Training Packages 2012.

Application

This unit of competency specifies the skills and knowledge required to demonstrate first attack firefighting equipment. It includes demonstrating and explaining to clients how to correctly and safely use portable fire extinguishers, fire hose reels and fire blankets in emergency situations.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

Nil.

Unit Sector

Fire Protection Inspection and Testing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Demonstrate and explain correct use of portable fire extinguisher to extinguish simulated	1.1 Explain purpose and use of different types of fire extinguishers to relevant persons.
	1.2 Identify fire type and classification.
	1.3 Select fire extinguisher according to fire type and

fire.	classification.
	1.4 Demonstrate safe and correct use of fire extinguisher to attack fire according to manufacturer requirements.
2 Demonstrate and explain correct use of fire hose reel.	2.1 Explain purpose and use of fire hose reel to relevant persons.
	2.2 Unroll fire hose reel according to manufacturers' instructions.
	2.3 Operate fire hose reel nozzle to direct water stream at selected target.
	2.4 Turn off water in approved sequence and check hose reel for leaks according to manufacturers' instructions.
	2.5 Rewind fire hose reel after use according to manufacturer requirements.
3 Demonstrate and explain use of fire blanket.	3.1 Explain purpose and use of fire blanket to relevant persons.
	3.2 Demonstrate safe and correct use of fire blanket to attack fire according to manufacturer requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPPFES2005A Demonstrate first attack firefighting equipment.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

Assessment Requirements for CPPFES2005 Demonstrate first attack firefighting equipment

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 13.0.

Supersedes and is equivalent to CPPFES2005A Demonstrate first attack firefighting equipment. Unit updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by demonstrating and explaining the correct and safe use of first attack firefighting equipment, including:

- selecting an appropriate extinguisher and demonstrating correct extinguishment methods for the following simulated fires:
 - one class A, C or F type fire involving two different types of equipment or materials
 - one class A, C or F type fire involving potentially energised electrical equipment
 - one class B type fire
 - one class D type fire
- attacking a fire using a fire hose reel where the fire is located more than 10 metres from the installed location of the hose reel
- attacking a fire using a fire blanket.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- basic methods of locating a fire
- correct use of fire extinguishers and hose reels on different classes of fire and implications of incorrect use
- how fire can be spread by conduction, convection, radiation and direct burning
- how water pressure influences the discharge distance for hose reels
- key actions in a fire emergency, commonly known by the acronym RACE:
 - rescue
 - activate alarm
 - confine fire
 - evacuate or extinguish

- meaning of secondary damage
- reasons why cooking oil and fat fires require special attention
- theory of fire, including the triangle of combustion
- types and operation of fire protection equipment classified as first attack equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit of competency could be assessed by practical demonstration, using simulated fire situations. Due to safety and cost factors, methods of extinguishing class D, E and F fires are confined to oral explanations and role play or simulations only.

All practical demonstrations involving the use of simulated fires must adhere to the safety and environmental regulations relevant to each state or territory.

Candidates must have access to documentation, first attack firefighting equipment and simulated fire situations required to achieve the performance evidence.

CPPREP4301 Confirm and market livestock for sale

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is not equivalent to CPPDSM4068A Prepare livestock for sale at saleyards and CPPDSM4075A Select livestock for sale.

Merged to reduce duplication. Updated to the Standards for Training Packages.

Application

This unit specifies the skills and knowledge required to confirm and market livestock for sale.

It includes confirming livestock characteristics, ownership and preferred method of sale, identifying potential buyers, preparing promotional material for livestock and arranging delivery of livestock for sale.

The unit applies to people currently working in or seeking to work in the real estate stock and station sector.

State or territory licensing requirements may apply to this unit.

Pre-requisite Unit

Nil

Unit Sector

Real estate

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Confirm vendor requirements for livestock sale.	1.1	Confirm livestock ownership and method of sale.
		1.2	Document type, condition and characteristics of livestock.

- 1.3 Discuss market conditions and impact on price.
 - 1.4 Complete sales documentation according to legislative requirements.
- 2 Prepare for agreed method of sale.
 - 2.1 Prepare description of livestock.
 - 2.2 Prepare promotional material for livestock, according to agreed method of sale.
 - 2.3 Identify and document potential buyers.
 - 2.4 Organise sale date and location.
 - 2.5 Organise opportunities for inspection of livestock.
 - 2.6 Identify risk and risk controls for sale of livestock.
- 3 Arrange delivery of livestock for sale.
 - 3.1 Confirm and document transport requirements according to agreed method of sale.
 - 3.2 Arrange delivery of livestock according to seller instructions.
 - 3.3 Prepare documentation associated with delivery of livestock according to legislative requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to:

- CPPDSM4068A Prepare livestock for sale at saleyards
- CPPDSM4075A Select livestock for sale.

Links

Companion volumes to this training package are available at the VETNet website -

Assessment Requirements for CPPREP4301 Confirm and market livestock for sale

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes and is not equivalent to CPPDSM4068A Prepare livestock for sale at saleyards and CPPDSM4075A Select livestock for sale.

Merged to reduce duplication. Updated to the Standards for Training Packages.

Performance Evidence

To demonstrate competency in this unit, a person must plan to and sell livestock on two different occasions using two of the methods below:

- private treaty
- auction
- sale yards
- on farm.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- livestock
 - breed, age, sex, condition, classes, weights, pregnancy status
- livestock selling methods:
 - private treaty
 - auction
 - sale yards
 - on farm
- sale price and conditions:
 - price per head
 - price per kilo dress weight
 - price per kilo live weight
 - sale to abattoir
 - live export
 - feedlots

- livestock transportation
- livestock welfare
- assessment of livestock
- quarantine
- curfews
- prescribed documentation in the state or territory of operation
- legislation and regulations in the state or territory of operation
- livestock inspection requirements
- procedures for identifying and verifying ownership of livestock
- encumbrances on livestock:
 - livestock mortgages
 - bills of sale
 - agent's fees
 - overdrafts
 - removal of encumbrances
- pre- and post-saleyard procedures
- role of the agent in providing livestock sale services
- risks and risk management strategies associated with sale of livestock
- ethical practices associated with sale of livestock
- agency forms and documentation required for sale of livestock
- agency livestock records
- processes to determine price range expectations for livestock
- market indicators for livestock value.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- livestock records and databases
- sources of information about livestock condition and ownership
- market indicator information
- procedures, forms and documents for sale of livestock
- details of at least two lots of livestock for sale by two different methods of sale

Links

CPPREP4302 Prepare livestock for sale

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 8.0.

Supersedes but is not equivalent to CPPDSM4077A Sell livestock by private sale.

Updated to the Standards for Training Packages.

Application

This unit specifies the skills and knowledge required to prepare for the sale of livestock.

It includes preparing livestock for sale including establishing and confirming requirements and details for the National Livestock Identification System (NLIS), taking delivery of livestock and organising transportation of livestock including confirming requirements and details for the Livestock Production Assurance National Vendor Declaration (LPA NVD).

This unit applies to people working in or seeking to work in the real estate stock and station sector.

State or territory licensing requirements may apply to this unit.

Pre-requisite Unit

Nil

Unit Sector

Real estate

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Arrange transport of livestock according to sales method.	1.1	Plan and document with client, transport arrangements and delivery schedule for movement of livestock.
		1.2	Identify, assess and manage risk associated with the transport, delivery, drafting and penning of livestock

- according to agency and legislative requirements.
- 1.3 Confirm transport arrangements with carrier according to delivery schedule.
- 2 Prepare livestock for sale.
 - 2.1 Organise adequate staff to take delivery of livestock.
 - 2.2 Record delivery details of livestock in line with site requirements.
 - 2.3 Arrange receipt penning to ensure availability for delivery.
 - 2.4 Prepare pre-sales catalogues according to requirements of sale, LPA NVD and NLIS.
- 3 Organise drafting and penning of livestock.
 - 3.1 Arrange supplementary branding as required.
 - 3.2 Coordinate drafting and, as required, weighing of livestock prior to final penning according to sale requirements.
 - 3.3 Coordinate placement of livestock in final allocated pens according to sale requirements.
 - 3.4 Display information about livestock as required by agency and saleyard.
 - 3.5 Record details of livestock in sales register according to sale requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- reading skills and analytical skills to interpret source documents, including the NLIS and the LPA NVD
- technology skills to access information via the internet, databases, business records management systems (particularly for the NLIS)
- numeracy skills to draft and weigh livestock as required.

Unit Mapping Information

No equivalent unit.

Supersedes but is not equivalent to CPPDSM4077A Sell livestock by private sale.

Links

CPPSSI2012 Assist in collecting basic spatial data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

Supersedes and is equivalent to CPPSIS2012 Assist in collecting basic spatial data.

Application

This unit specifies the skills and knowledge required to assist surveying and spatial information services team members to collect basic spatial data in the field. Basic spatial data refers to measurements of distances, angles and heights. It includes participating in spatial data gathering activities, recording data in the correct format, using equipment in a safe manner, and completing and storing data and documentation.

This unit is suitable for individuals who are operating under supervision and preparing to enter the workforce. They use basic mathematical, cognitive, technical and communication skills to follow instructions and apply appropriate methods, tools, materials and information to undertake defined activities in a restricted range of contexts.

All work must be carried out to comply with workplace procedures, in accordance with relevant state/territory regulations that govern surveying work, as well as work health and safety (WHS) legislation and regulations that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Surveying and Spatial Information Services

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to collect basic 1.1 Clarify task requirements with supervisor.

- spatial data.
- 1.2 Select tools and equipment to meet task requirements as instructed.
 - 1.3 Identify requirements for safe use of equipment.
 - 1.4 Select appropriate safe work methods and personal protective equipment (PPE) for the task.
- 2 Collect basic spatial data in specified format.
- 2.1 Use equipment according to task and safety requirements and manufacturer specifications.
 - 2.2 Record clear and accurate measurements that can be interpreted by a third party.
 - 2.3 Use mathematical knowledge to check that data collected is reasonable and measures what is required.
 - 2.4 Seek assistance from supervisor or appropriate person as required.
 - 2.5 Communicate with colleagues using a communication device.
- 3 Finalise spatial data collection tasks.
- 3.1 Check and store equipment safely according to organisational requirements and manufacturer specifications.
 - 3.2 Report unsafe or faulty equipment according to organisational requirements.
 - 3.3 Use organisational proformas to accurately record measurements and data.
 - 3.4 Store data and documentation according to organisational requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPPSIS2012 Assist in collecting basic spatial data.

Links

Companion volumes to this training package are available at the VETNet website -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSSI2012 Assist in collecting basic spatial data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

Supersedes and is equivalent to CPPSIS2012 Assist in collecting basic spatial data.

Performance Evidence

To demonstrate competency a candidate must meet the elements and performance criteria of this unit by collecting basic spatial data, under supervision, for two surveying field projects.

For each project, a total station and one item from the following list must be used:

- clinometer or device to measure vertical angles
- compass
- data recording equipment
- digital or hard copy map
- distance measuring tape
- distance measuring wheel
- level
- scientific calculator
- simple global positioning system (GPS) device to determine position
- simple laser measuring device
- communications device.

Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- types and application of spatial data collection equipment
- industry-accepted standards for recording surveying measurements and data
- organisational procedures and requirements relating to:
 - accessing manufacturer instructions
 - collecting spatial data
 - formats for records and documentation
 - reporting problems
 - types and uses of communications equipment.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- equipment for data collection
- equipment operating manuals and manufacturer instructions
- documentation relating to work tasks
- supervisor and other appropriate persons for assistance with work tasks.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

CPPSSI2013 Store and retrieve basic spatial data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

Supersedes and is equivalent to CPPSIS2013 Store and retrieve basic spatial data.

Application

This unit specifies the skills and knowledge required to assist surveying and spatial information services team members to store and retrieve basic spatial data. Basic spatial data refers to recorded surveying measurements or datasets of objects with coordinates. It includes following instructions to record, maintain and retrieve spatial data from paper or digital sources.

This unit is suitable for individuals who are operating under supervision and preparing to enter the workforce. They use basic mathematical, cognitive, technical and communication skills to follow instructions and apply appropriate methods, tools, materials and information to undertake defined activities in a restricted range of contexts.

All work must be carried out to comply with workplace procedures, in accordance with relevant state/territory regulations that govern surveying work, as well as work health and safety (WHS) legislation and regulations that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Surveying and Spatial Information Services

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Store basic spatial data 1.1 Clarify task requirements with supervisor.

- as instructed.
- 1.2 Identify data privacy and licensing requirements relating to data storage.
 - 1.3 Prepare and check computer and software to meet task requirements.
 - 1.4 Comply with organisational requirements for safe screen-based work.
 - 1.5 Follow organisational procedures to record data in index.
 - 1.6 Report problems to appropriate persons.
- 2 Retrieve basic spatial data as instructed.
- 2.1 Access and retrieve specified spatial data source according to task and organisational requirements.
 - 2.2 Identify data privacy and licensing requirements relating to data retrieval.
 - 2.3 Extract and compare spatial data.
 - 2.4 Report problems to appropriate persons.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPPSIS2013 Store and retrieve basic spatial data.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSSI2013 Store and retrieve basic spatial data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

Supersedes and is equivalent to CPPSIS2013 Store and retrieve basic spatial data.

Performance Evidence

To demonstrate competency a candidate must meet the elements and performance criteria of this unit by storing and retrieving basic spatial data, under supervision, for two different surveying field projects.

Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- organisational procedures and requirements relating to:
 - data privacy and licensing requirements
 - preparing and using computers and software
 - reporting problems with spatial data availability and formats
 - working safely when using screen-based equipment.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- computer and software required to collect basic spatial data
- documentation of organisational procedures and documentation relating to data privacy and licensing
- supervisor and other appropriate persons for assistance with work tasks.

CPPSSI3011 Produce basic maps

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS3011 Produce basic maps.

Application

This unit specifies the skills and knowledge required to use mapping software, such as geographic information system (GIS) functionality, to produce a basic map. It includes activities to prepare and process basic spatial data and produce a basic map that includes simple marginal information and content.

This unit is suitable for surveying or spatial information services assistants working under supervision. They use cognitive, technical and communication skills to select and apply a range of methods, tools, materials and information to complete routine activities and provide solutions to predictable and sometimes unpredictable problems.

All work must be carried out to comply with workplace procedures, in accordance with relevant state/territory regulations that govern surveying work, as well as work health and safety (WHS) legislation and regulations that apply to the workplace.

Cadastral surveying must be undertaken under the supervision of a registered surveyor. Users must check with the relevant regulatory state/territory authority before delivery.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Surveying and Spatial Information Services

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to create basic 1.1 Clarify task requirements with appropriate persons.

- map.
- 1.2 Select appropriate software for the task.
 - 1.3 Determine the required purpose and format of the map.
 - 1.4 Identify and retrieve the data required for the map.
- 2 Assemble map content.
- 2.1 Interpret and manipulate spatial data for display according to task requirements.
 - 2.2 Label marginal information and content according to task requirements and industry practice.
- 3 Finalise basic map production.
- 3.1 Check map content and format against task requirements.
 - 3.2 Confirm final map with appropriate persons.
 - 3.3 Complete map in required format and with required content, and document according to organisational requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPPSIS3011 Produce basic maps.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSSI3011 Produce basic maps

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS3011 Produce basic maps.

Performance Evidence

To demonstrate competency a candidate must meet the elements and performance criteria of this unit by using suitable software and spatial data retrieved from internal sources to produce two basic maps, each containing:

- two artificial features and two natural features with appropriate symbology
- at least one dataset containing points, lines and polygons
- simple marginal information, including:
 - data sources
 - coordinate reference system
 - legend
 - north point
 - scale.

While producing the above basic maps, the candidate must:

- set scale
- change symbology
- use simple point, line and polygon data
- label features
- symbolise features by attributes.

Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- different types of maps, including topographical maps, thematic maps, and survey maps
- use of points, lines and polygons to portray different geographic features
- typical scales, spatial referencing systems and symbology used on different types of maps
- functions of mapping software used for making basic maps
- work health and safety (WHS) for using screen-based equipment.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- computers and software relevant to basic map production.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

CPPSSI4035 Apply GIS software to spatial problems

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS4035 Apply GIS software to solve spatial data problems.

Application

This unit specifies the skills and knowledge required to use geographic information system (GIS) software applications to show spatial patterns and relationships for identified issues. It includes integrating various sources of spatial information using spatial overlay techniques and analysis of data.

The unit also includes using univariate statistics to explore datasets, and spatial and attribute queries to generate results and reports.

This unit is suitable for entry-level technicians who use a broad range of cognitive, technical and communication skills to select and apply a range of methods, tools, materials and information to complete routine and non-routine activities and provide and transmit solutions to a variety of predictable and sometimes unpredictable problems.

Surveying and spatial information skills are applied in a range of industry contexts, including town planning, civil construction, mining, engineering, health, agriculture and defence.

All work must be carried out to comply with workplace procedures, in accordance with relevant state/territory regulations that govern surveying work, as well as work health and safety (WHS) legislation and regulations that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Surveying and Spatial Information Services

Elements and Performance Criteria

Elements describe the Performance criteria describe what needs to be done to

- essential outcomes. demonstrate achievement of the element.
- 1 Prepare for spatial analysis.
 - 1.1 Clarify task requirements to address the issue under consideration with appropriate persons.
 - 1.2 Apply appropriate work practices for safe screen-based work.
 - 1.3 Access, interpret and manipulate spatial datasets to confirm they are in acceptable format to meet task requirements.
 - 1.4 Identify and resolve routine spatial data problems or irregularities with geometry and attributes and resolve with appropriate persons.
 - 1.5 Use spatial and attribute queries to select features from vector and aspatial text databases.
 - 1.6 Determine accuracy of query results on vector and raster datasets by cross-referencing in tabular and cartographic view.
 - 1.7 Generate and use univariate statistics to explore the dataset.
 - 2 Undertake spatial analysis.
 - 2.1 Manipulate existing data and integrate new data according to task requirements.
 - 2.2 Use vector and raster geoprocessing techniques to generate results relating to spatial task.
 - 2.3 Check that outputs of analysis are correct and applicable.
 - 3 Produce reports.
 - 3.1 Compile information on the limitations and assumptions of the datasets and the geoprocessing techniques used according to task and organisational requirements.
 - 3.2 Present summary statistics and results using tabular, cartographic and graphic methods according to task requirements.
 - 3.3 Incorporate results for all sources into reports according to organisational requirements.
 - 3.4 Comply with legislative and ethical requirements for

producing reports based on spatial data analysis.

- 4 Finalise data analysis.
 - 4.1 Check output spatial data for completeness and manipulate where necessary according to organisational requirements.
 - 4.2 Create metadata according to organisational requirements.
 - 4.3 Store spatial data in a secure location and record details according to organisational requirements.
 - 4.4 Comply with organisational requirements for documentation and storage relating to audit trails, naming standards, templates and version control.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPPSIS4035 Apply GIS software to solve spatial data problems.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSSI4035 Apply GIS software to spatial problems

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS4035 Apply GIS software to solve spatial data problems.

Performance Evidence

To demonstrate competency a candidate must meet the elements and performance criteria of this unit by using geographic information system (GIS) software applications to integrate data and show spatial patterns and relationships for identified issues for two different projects.

The candidate must manage and manipulate the following, presenting the results accurately and meaningfully using maps, tables and graphs:

- thematic and continuous raster datasets
- aerial and satellite imagery
- point, line and polygon vector datasets
- aspatial text datasets.

Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- key features of spatial reference systems
- metadata fields relating to accuracy, currency, extent, availability and datasets
- legislative requirements for accessing, manipulating, reporting and archiving spatial data, including data privacy, copyright and licensing
- querying and browsing techniques for obtaining information from datasets
- calculation and interpretation of univariate statistics:
 - average, median and mode
 - maximum and minimum
 - range
 - standard deviation
 - variance
- graphical methods for representing distributions
- vector and raster data models
- raster geoprocessing techniques:

- reclassifying
- resampling
- combining raster datasets
- extracting from raster datasets
- vector geoprocessing techniques:
 - buffer
 - clip
 - dissolve
 - intersect
 - merge
 - union
 - erase
 - reproject
- file formats for map production
- spatial data storage technology.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- computer with access to GIS software applications
- printer and other hardware necessary for work tasks.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

CPPSSI5035 Create spatial data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is not equivalent to CPPSIS5035 Obtain and validate spatial data.

Application

This unit specifies the skills and knowledge required to validate spatial data and create a metadata statement. It includes evaluating project requirements and determining appropriate quality checks for the data. The unit also includes applying industry-accepted methodologies to assess the validity and integrity of data.

This unit is suitable for skilled surveying technicians and skilled spatial information system (SIS) technicians who use a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex surveying/spatial information problems.

Surveying and spatial information skills are applied in a range of industry contexts, including town planning, civil construction, mining, engineering, health, agriculture and defence.

All work must be carried out to comply with workplace procedures, in accordance with relevant state/territory regulations that govern surveying work, as well as work health and safety (WHS) legislation and regulations that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Surveying and Spatial Information Services

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Prepare to create spatial data.
 - 1.1 Confirm project requirements in consultation with appropriate person.
 - 1.2 Determine acceptance levels of data quality required for project in consultation with appropriate person.
 - 1.3 Select data creation methods and resources including source data to meet project requirements.
 - 1.4 Select data validation methods to meet project requirements.
 - 1.5 Comply with legislative requirements, including data privacy, copyright and licensing while undertaking the project.

- 2 Create spatial data.
 - 2.1 Access required data resources.
 - 2.2 Create spatial data using geographic information system (GIS) application tools.
 - 2.3 Use topological rules to define permissible relationships between features.
 - 2.4 Resolve numerical and topological errors arising through processing.
 - 2.5 Store spatial data according to organisational requirements.

- 3 Validate spatial data quality.
 - 3.1 Use industry-accepted methods for evaluating the consistency, precision, accuracy and completeness of spatial data according to project specifications.
 - 3.2 Resolve data quality issues in spatial data.
 - 3.3 Identify and record the limitations of the spatial data according to organisational requirements.

- 4 Prepare metadata statement.
 - 4.1 Document the validated dataset by completing a metadata statement according to organisational requirements.
 - 4.2 Complete and file documentation according to

organisational requirements.

- 4.3 Advise relevant users of the availability of the metadata according to organisational requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is not equivalent to CPPSIS5035 Obtain and validate spatial data.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSSI5035 Create spatial data

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is not equivalent to CPPSIS5035 Obtain and validate spatial data.

Performance Evidence

To demonstrate competency a candidate must meet the elements and performance criteria of this unit by creating and validating three spatial datasets comprising the spatial data types of point, line and polygon.

Each of the spatial datasets must incorporate attribute data and use geoprocessing functions of:

- merge
- clip
- dissolve
- buffer
- intersect
- union.

Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- spatial data quality features
- AS/NZS ISO 19115-1:2015 Geographic information – Metadata Fundamentals:
 - title
 - identifier
 - abstract
 - time
 - responsible party
 - access, use, security
 - status
 - lineage
 - topic category
 - keywords
- key features of spatial reference systems

- geometry and attributes of spatial datasets
- methods for validating spatial datasets
- reliable source of data
- spatial data types
- spatial data capture methodologies
- spatial data formats and structures
- industry-accepted standards relating to validating spatial data
- metadata standard AS/NZS ISO 19115.1:2015 Geographic information – Metadata Fundamentals.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- computer with appropriate software for spatial data management
- organisational procedures relating to data privacy, copyright and licensing.

CPPSSI5064 Conduct complex spatial data analysis

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS5064 Coordinate GIS data manipulation and analysis.

Application

This unit specifies the skills and knowledge required to coordinate spatial data manipulation and analysis to meet task specifications. It includes analysing task needs and geographic information system (GIS) data format requirements, assessing potential analysis tools and models, and identifying the limitations of analysis results. The unit also includes verifying data source integrity, manipulating and analysing data, and preparing results to inform decision-making.

This unit is suitable for skilled surveying technicians and skilled spatial information system (SIS) technicians who use a broad range of cognitive, technical and communication skills to select and apply methods and technologies to analyse information and provide solutions to sometimes complex surveying/spatial information problems.

Surveying and spatial information skills are applied in a range of industry contexts, including town planning, civil construction, mining, engineering, health, agriculture and defence.

All work must be carried out to comply with workplace procedures, in accordance with relevant state/territory regulations that govern surveying work, as well as work health and safety (WHS) legislation and regulations that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPPSSI5064 Conduct complex spatial data analysis

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 12.0.

This unit supersedes and is equivalent to CPPSIS5064 Coordinate GIS data manipulation and analysis.

Performance Evidence

To demonstrate competency a candidate must meet the performance criteria of this unit by conducting spatial data manipulation and analysis for two different projects:

- one project must be a vector-based project
- one project must be raster-based project.

Both projects must involve complex multi-stage analysis that will be used to inform decision-making.

Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- sources of spatial information
- spatial querying and browsing techniques for obtaining information from data
- vector and raster analysis techniques
- univariate statistics for spatial data
- methods of verifying integrity of data
- data reduction and manipulation techniques
- types of spatial data formats
- methods for creating layers on maps.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- computer and software appropriate for manipulating geographic information system (GIS) data.

CPPWMT3004 Comply with environmental protection requirements when transporting waste

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes and is equivalent to CPPWMT3042A Follow environmental policies and procedures when transporting waste.

Application

This unit specifies the skills and knowledge required to comply with environmental protection requirements when transporting waste using vehicles and equipment. It includes minimising the effects of pollution caused when operating and maintaining waste vehicles and equipment and following routes and workplace instructions to safely transport environmentally hazardous waste. It also includes understanding the impact of waste loads on the environment and identifying ways to improve work processes to protect the environment when transporting waste.

A person who achieves this unit of competency is expected to take responsibility for completing these tasks with a high degree of self-direction.

Candidates must hold a current, nationally recognised licence to operate the vehicle or equipment being used to transport waste. For further information, check with the relevant regulatory authority.

Pre-requisite Unit

Nil.

Unit Sector

Waste management

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Identify and apply environmental

1.1 Identify legislative and regulatory compliance requirements for protecting the environment when

- | | | |
|--|-----|--|
| protection requirements. | | transporting waste. |
| | 1.2 | Identify hazards and risks associated with transporting waste and apply required controls according to workplace and regulatory requirements. |
| | 1.3 | Review job schedule and workplace procedures for transporting waste and confirm arrangements. |
| | 1.4 | Apply methods to reduce environmental impact when transporting waste. |
| 2 Minimise effects of pollution caused by waste vehicle and equipment. | 2.1 | Inspect waste vehicle and equipment and take required precautions to ensure fuel, lubricants and chemicals do not pollute the environment. |
| | 2.2 | Contain waste load securely according to workplace and regulatory requirements to ensure the surrounding environment is not contaminated or littered. |
| | 2.3 | Monitor telematics and fuel usage and operate waste vehicle and equipment efficiently to minimise air pollution. |
| | 2.4 | Clean waste vehicle and equipment according to workplace and site-specific requirements. |
| 3 Safely transport environmentally hazardous waste. | 3.1 | Follow planned route for waste vehicle and equipment carrying environmentally hazardous load to minimise risk to the environment in the event of accident or spillage. |
| | 3.2 | Review and follow workplace instructions to transport environmentally hazardous waste. |
| | 3.3 | Complete documentation recording waste transport details according to workplace and regulatory requirements. |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPPWMT3042A Follow environmental policies and procedures when transporting waste.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPWMT3004 Comply with environmental protection requirements when transporting waste

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes and is equivalent to CPPWMT3042A Follow environmental policies and procedures when transporting waste.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- minimising effects of pollution caused by waste vehicle and equipment by:
 - transporting waste and monitoring average fuel use per kilometre on two occasions using similar vehicles and waste weights
 - identifying efficiencies gained by comparing average fuel use on each trip
- following specific site procedures to clean the waste vehicle at two different sites:
 - a site associated with the workplace
 - an external site
- reviewing and assessing potential hazards/risks for two routes planned for transporting hazardous materials.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- areas to avoid when transporting regulated or prescribed and environmentally hazardous waste
- legislative and procedural requirements applicable to waste transportation and relevant to the workplace:
 - commonwealth, state and territory legislation and regulations, including work health and safety (WHS)
 - chain of responsibility requirements
 - classifications of dangerous goods and hazardous substances
 - duty of care
 - environmental protection
 - load restraint requirements
 - licensing requirements for transporting waste using vehicles, plant and equipment
- driving techniques that minimise pollution

- impact of waste on the environment
- impact on the environment of waste vehicles and equipment and techniques and methods for minimising pollution
- methods for securing waste vehicle loads
- types of precautions that can be taken to protect the environment when operating and cleaning waste vehicles and equipment
- types of vehicles and equipment used to transport waste
- workplace and site-specific requirements for cleaning waste vehicles and equipment
- workplace policies and procedures for waste transportation and environmental protection:
 - documentation and reporting
 - waste vehicle and equipment operation and maintenance
 - WHS:
 - hazard identification, risk assessment and control using the hierarchy of control
 - injury, dangerous occurrence and incident response
 - personal protective equipment
 - signalling techniques.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, job schedules, documentation, vehicle, equipment and waste required to achieve the performance evidence.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

CPPWMT5045A Develop site safety plans

Modification History

Revised unit

Unit updated and equivalent to PRMWM45B Develop site safety plan

Unit Descriptor

This unit of competency specifies the outcomes required to develop an on-site safety plan for a waste management environment. It requires the ability to plan activity for safe work practices.

Application of the Unit

This unit of competency supports individuals responsible for developing on-site safety plans. It includes contributing to the development of operational procedures, in addition to safety principles.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|---|
| 1 | Review site safety requirements. | 1.1 | <i>Details of site and site requirements</i> are obtained and reviewed to determine specific safety requirements. |
| | | 1.2 | <i>Organisational requirements</i> , occupational health and safety (OHS) regulations and <i>legislation and codes</i> are identified. |
| | | 1.3 | <i>Site safety requirements</i> are identified according to organisational requirements. |
| 2 | Determine site safety requirements. | 2.1 | Safety information necessary to ensure safety of personnel and general public is included in the on-site safety plan. |
| | | 2.2 | <i>Site areas</i> are identified and classified in safety plan. |
| | | 2.3 | Exact locations of <i>first aid and emergency facilities</i> are identified in on-site safety plan. |
| | | 2.4 | <i>Wastes on site</i> are clearly identified in on-site safety plan by location and type. |
| | | 2.5 | <i>Emergency and personal protective equipment (PPE)</i> requirements and <i>potential hazards and risks</i> are identified for specific site areas in on-site safety plan. |
| | | 2.6 | <i>Emergency response action or procedures</i> are identified according to on-site safety plan. |
| | | 2.7 | On-site safety plan is reviewed following feedback from stakeholders. |
| 3 | Communicate on-site safety plan to personnel. | 3.1 | On-site safety plan is communicated promptly and clearly to relevant personnel according to organisational requirements, OHS regulations and legislation and codes. |
| | | 3.2 | Personnel's understanding of all aspects of on-site safety plan is confirmed through questioning and observation. |
| | | 3.3 | Feedback from personnel is obtained and integrated into on-site safety plan. |

- 3.4 On-site safety plan is kept in an accessible place, according to organisational requirements, OHS regulations and legislation and codes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - determine site safety options
 - review operations
- basic illustration skills for drawing simple site maps
- interpersonal skills to:
 - manage consultation processes
 - present safety plan
- management skills to:
 - apply change management techniques
 - conduct strategic problem solving
 - plan work practices
 - identify and minimise hazards and risks
 - organise work methodically
 - apply quality assurance practices
 - use information technology to complete tasks
 - use emergency and personal protective equipment
- reading skills to interpret:
 - work or material requirements
 - materials safety data sheets (MSDS)
- written communication skills to:
 - write reports
 - prepare complex strategic documentation
- critical thinking skills to develop on-site safety plan, identifying:
 - resource needs
 - hazards and risks
- oral communication skills to:
 - ask and answer questions
 - explain on-site safety plan to personnel

- give instructions
- seek feedback
- listen actively

Required knowledge

- environmental issues relating to:
 - life cycle of products: re-new, re-use and recycle
 - environmental regulations
- features required for on-site safety plan pertaining to:
 - site contract requirements
 - waste disposal methods
 - waste minimisation
 - waste prevention
 - waste segregation
 - work procedures
 - environmental issues
 - education and training outline
 - recycling and recovery requirements
 - monitoring personnel performance following safety training
 - quality control checks
 - review of effectiveness of new procedures and processes
- identification of safety issues pertaining to:
 - waste types, streams and characteristics and level of associated danger
 - waste non-conformances
 - unanticipated waste
 - waste non-conformance procedures
 - waste contaminants
 - hazardous waste
 - waste containment
 - waste disposal and recovery routes
- OHS requirements relating to:
 - dangerous goods and hazardous substances
 - OHS hierarchy of control
- waste audit, including:
 - analysing waste safety practices
 - analysing previous audit plans and audit processes pertaining to safety
- waste management provision, including:
 - organisational requirements in relation to safety
 - organisational structure and reporting requirements
 - legislation, regulations and codes of practice applicable to specific waste management

functions

- waste management safety options

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by demonstration of site safety plans developed.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.</p> <p>In particular the person should demonstrate the ability to:</p> <ul style="list-style-type: none"> • identify site safety requirements • specify all necessary PPE required to undertake work safely in each site area • gather necessary information to develop on-site safety plan following consultation with stakeholders • apply OHS requirements and duty of care to provide safe environment for personnel and general public.
Context of and specific resources for assessment	<p>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> • work plans and approved specifications • forms and procedures manuals.
Method of assessment	<p>An on-site safety plan must be developed in line with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of the plan.</p> <p>Assessment methods must:</p> <ul style="list-style-type: none"> • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

	<ul style="list-style-type: none"> reinforce the integration of employability skills with workplace tasks and job roles confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>This unit could be assessed on its own or in combination with other units of competency relevant to the job function, for example:</p> <ul style="list-style-type: none"> CPPCMN3001B Participate in environmentally sustainable work practices CPPCMN4007A Manage workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Details of site and site requirements</i> may include:	<ul style="list-style-type: none"> areas allowing access to general public organisational and site OHS requirements number of personnel on site potential hazards and risks, including level of risk waste incoming waste present at site.
<i>Organisational requirements</i> may include information found in:	<ul style="list-style-type: none"> briefing papers job sheets letters memos operations manuals quality assurance documents tender and contract documents verbal or written instructions work procedures.
<i>Legislation and codes</i>	<ul style="list-style-type: none"> codes, including:

<p>may include:</p>	<ul style="list-style-type: none"> • Australian Code for the Transport of Dangerous Goods by Road and Rail • industry • commonwealth, state and territory legislation, including: <ul style="list-style-type: none"> • anti-discrimination • environmental protection • equal employment opportunity • freedom of information • industrial • OHS • trade practices • road laws.
<p><i>Site safety requirements</i> must include:</p>	<ul style="list-style-type: none"> • all necessary requirements to ensure the safety of: <ul style="list-style-type: none"> • environment • equipment • general public • personnel • structures.
<p><i>Site safety requirements</i> may also include:</p>	<ul style="list-style-type: none"> • awareness of potential hazards and risks • communication requirements • confined space awareness • emergency procedure guides • emergency response equipment • emergency shut-down and lock-out procedures • evacuation area • first aid • induction • PPE requirements • site security • training • warning signs and barriers.
<p><i>Site areas</i> may include:</p>	<ul style="list-style-type: none"> • evacuation areas • first aid bays • general public access areas • restricted areas.
<p><i>First aid and emergency facilities</i> may include:</p>	<ul style="list-style-type: none"> • breathing apparatus • eye baths • fire extinguishers • first aid kits.
<p><i>Wastes on site</i> may</p>	<ul style="list-style-type: none"> • solid (non-hazardous), e.g. construction and demolition

include:	<ul style="list-style-type: none"> • liquid (non-hazardous), e.g. chemical and aqueous • hazardous – regulated, prescribed, quarantined, medical and clinical • recoverable resources, e.g. recyclable and green waste.
<i>Emergency and personal protective equipment</i> must include:	<ul style="list-style-type: none"> • communications equipment • eye protection, such as goggles and protective glasses • eyewash kit • fire extinguishers • first aid kit • footwear • gloves • overalls and protective clothing.
<i>Emergency and personal protective equipment</i> could also include:	<ul style="list-style-type: none"> • breathing apparatus • emergency procedure guides • face shields or masks • hard hats • hearing protection • MSDS • spill kit.
<i>Personal protective equipment</i> must be:	<ul style="list-style-type: none"> • cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements • worn when required according to organisational requirements • stored according to organisational requirements.
<i>Potential hazards and risks</i> are those identified by the organisation that may lead to:	<ul style="list-style-type: none"> • damage to plant, vehicle or property • harm to the environment • illness or injury to employees, contractors or the public • injuries resulting from manual handling and repetitive work.
<i>Potential hazards and risks</i> may include:	<ul style="list-style-type: none"> • broken glass • broken metal • compaction equipment • contamination • dust • fire • gases and fumes • hazardous waste (e.g. sharps) • narrow driveways • other vehicles and equipment • overhanging signs • projectiles • spark-producing equipment • unguarded conveyor belts

	<ul style="list-style-type: none">• weather.
<i>Emergency response action or procedures</i> may include:	<ul style="list-style-type: none">• cleaning up• containing emergency• isolating or shutting down equipment or plant• evacuation• first aid• making site safe• notifying authorities• using PPE.

CUAACD312 Produce computer-aided drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to use different computer-aided design and drafting (CADD) program functions to produce drawings and documentation. It involves preparing to undertake the work, understanding the object or project brief parameters and measurements and finalising drawings according to requirements. The focus of this unit is on the technical skills required to operate CADD, not on design skills.

The unit applies to those who use computer-aided drawing skills in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Art, Craft and Design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for computer-aided drawing work	1.1 Clarify drawing requirements and objectives in concept or project information 1.2 Identify hardware, software, tools and equipment required for computer-aided design and drafting projects 1.3 Set up hardware and software according to operating instructions and organisational procedures as required 1.4 Identify and retrieve digitised information required for projects
2. Gather object parameters and measurements	2.1 Establish and record critical dimensions and data for required designs

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify requirements in relation to accuracy, tolerances and other information according to drawing requirements
3. Prepare plots or drawings	3.1 Access and use CADD functions and features according to operating instructions 3.2 Access and use peripheral equipment required for projects 3.3 Prepare and review preliminary drawings in consultation with required personnel
4. Finalise drawings	4.1 Check designs against project objectives and specifications and mark up documentation according to organisational procedures 4.2 Identify and make required adjustments to designs in consultation with required personnel 4.3 Store data files according to operating instructions and organisational procedures 4.4 Submit final drawings within agreed time parameters

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets and evaluates detailed information, instructions and technical specifications in different formats when preparing for and producing computer aided drawings Reviews accuracy of drawings against specifications and project information
Writing	<ul style="list-style-type: none"> Records key design information using industry standard conventions and terminology
Oral Communication	<ul style="list-style-type: none"> Elicits information and opinions from others using questioning and careful listening
Numeracy	<ul style="list-style-type: none"> Identifies and records measurements and other numerically expressed specifications required for drawings Operates numerical functions of computer aided drawing equipment and produces drawings to scale and measurements that meet drawing requirements
Self-management	<ul style="list-style-type: none"> Takes responsibility for following necessary organisational procedures when planning and undertaking work

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none"> • Participates in review of work progress with required personnel
Planning and organising	<ul style="list-style-type: none"> • Plans and organises required equipment, software and data in logical steps according to workplace and project requirements • Prepares preliminary drawings for evaluation by others and makes recommended refinements • Manages time to complete final drawings within established timeframes
Technology	<ul style="list-style-type: none"> • Produces, edits, stores and retrieves drawings using features of digital systems and tools

Unit Mapping Information

Supersedes and is equivalent to CUAACD302 Produce computer-aided drawings.

Assessment Requirements for CUAACD312 Produce computer-aided drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use features and functions of a computer-aided design and drafting (CADD) program to produce at least three different computer-aided drawings that meet project objectives.

In the course of the above, the candidate must:

- select CADD hardware and software to suit project requirements
- follow operating instructions and organisational procedures
- use feedback from others to refine and produce final drawings within specified timelines.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- software, peripheral equipment and tools used for CADD
- ways in which CADD is used within the specific workplace situation
- typical features and functions of CADD programs, including:
 - drawing tools to support methods for drawing lines, arcs, polylines, texts, dimensions
 - view displays
 - edit functions
 - working with layers
 - plotting and printing.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- CADD equipment and software
- project or concept information
- operating instructions and organisational procedures
- required personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUAACD313 Produce technical drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to apply different techniques to produce technical drawings that meet required standards and conventions. It involves planning and preparing for technical drawing activities, creating technical drawings and finalising them according to project requirements.

The unit applies to those who use technical drawings in different contexts to meet project requirements

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual Communication – Art, Craft and Design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for technical drawing work	1.1 Identify drawing requirements with reference to project documentation in consultation with required personnel 1.2 Identify factors that may impact on technical drawing work 1.3 Select techniques to fit the purpose of drawings 1.4 Prepare equipment and materials according to workplace procedures and safety requirements
2. Create technical drawings	2.1 Produce and review preliminary drawings according to drawing requirements 2.2 Apply applicable conventions and standards to technical drawings

ELEMENT	PERFORMANCE CRITERIA
	2.3 Discuss drawings with required personnel and confirm required amendments 2.4 Amend drawings according to drawing requirements
3. Finalise technical drawings	3.1 Check drawings against project objectives and drawing requirements according to organisational procedures 3.2 Finalise and submit technical drawings within agreed timeframes

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Interprets project documentation and other applicable information when identifying drawing requirements and constraints
Oral Communication	<ul style="list-style-type: none"> Elicits information and opinions from others using questioning and careful listening
Numeracy	<ul style="list-style-type: none"> Interprets numerical and spatial concepts related to drawing standards and conventions
Self-management	<ul style="list-style-type: none"> Takes responsibility for following workplace procedures and safety requirements when planning and undertaking work
Teamwork	<ul style="list-style-type: none"> Participates in review of work progress with required personnel
Planning and organising	<ul style="list-style-type: none"> Plans tasks in a logical sequence and manages time to complete final drawings within established timeframes

Unit Mapping Information

Supersedes and is equivalent to CUAACD303 Produce technical drawings.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

Assessment Requirements for CUAACD313 Produce technical drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce technical drawings according to at least three different project requirements.

In the course of the above, the candidate must:

- show a command of selected techniques
- adhere to technical drawing standards and conventions
- satisfy specified drawing purposes and concepts
- follow workplace procedures and safety requirements
- use feedback from others to refine and produce final drawings
- meet deadlines.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- technical drawing techniques and their application to a range of contexts and subject matter
- common standards and conventions for technical drawing
- work health and safety requirements relating to preparing technical drawing materials and equipment.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment and materials required to produce technical drawings
- documented technical drawing requirements
- workplace documentation
- required personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUADES305 Source and apply information on the history and theory of design

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to source information on design history and theory, and to apply that information in the individual's design work.

It applies to individuals who work in design and need to develop and maintain a general knowledge of design history and theory.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information on design history and theory	1.1 Identify and access applicable sources of information on design history and theory 1.2 Organise research material and findings for use in design practice, facilitating easy access and cross-referencing
2. Apply information to own area of work	2.1 Evaluate information in the context of current design practice 2.2 Assess which aspects of information on design history and theory could be used or adapted to inform current practice 2.3 Apply understanding of own area of work using applicable information in culturally appropriate way

ELEMENT	PERFORMANCE CRITERIA
3. Update and maintain knowledge of design trends	3.1 Identify and use opportunities to update and expand knowledge of design trends and developments 3.2 Incorporate and integrate knowledge into design activities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies, interprets and evaluates information on historical and current design trends from different sources
Writing	<ul style="list-style-type: none"> Notes findings and sources of information for design knowledge, trends and developments Documents information for colleagues and peers as requested
Oral Communication	<ul style="list-style-type: none"> Asks questions and clarifies information, listens to responses and shares ideas with others
Self-management	<ul style="list-style-type: none"> Understands main tasks, responsibilities and boundaries of own role Takes responsibility for routine low-impact decisions within familiar situations
Planning and organising	<ul style="list-style-type: none"> Plans and implements required tasks
Initiative and enterprise	<ul style="list-style-type: none"> Contributes to new approaches within immediate work environment
Technology	<ul style="list-style-type: none"> Follows routine procedures for using digital technology to enter, store and retrieve information directly applicable to role

Unit Mapping Information

Supersedes and is equivalent to BSBDES305 Source and apply information on the history and theory of design.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

Assessment Requirements for CUADES305 Source and apply information on the history and theory of design

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify features of the history and theory of design and how they can be adapted and applied to own work.

In the course of the above, the candidate must:

- source and organise research findings on history and theory of design applicable to own work
- identify one or more opportunities to expand on maintain currency of theoretical and design knowledge.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- current design trends in industry contexts applicable to that of one's own work
- evolution of design in industry contexts applicable to that of one's own work
- organisational information practices and their application in industry contexts applicable to that of one's own work
- sources of information on design history and theory applicable to own design work.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sources of information on applicable industry history and theories of design.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CUADES413 Develop and extend design skills and practice

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer. It involves obtaining and developing conceptual and technical skills, developing an individual style in these skills and evaluating the use of these skills in own work tasks. Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

The unit applies to those who work as a designer, in any industry context, either independently or employed by an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Acquire and develop technical skills	1.1 Plan strategies for development of applicable technical skills in design practice 1.2 Plan and use opportunities to develop and assess technical skills 1.3 Identify and use practice, feedback, discussion and evaluation opportunities to continuously improve technical skills 1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment 1.5 Identify and use applicable media to stimulate technical and professional development

ELEMENT	PERFORMANCE CRITERIA
2 Develop conceptual skills and ideas	2.1 Engage in ongoing experimentation and exploration of different ideas and techniques 2.2 Discuss ideas with others and apply knowledge gained to own work 2.3 Stimulate conceptual and technical skills development using studies of others work 2.4 Research and share ideas across different design disciplines 2.5 Identify and use different opportunities to develop own skills and keep informed about current design practice
3 Develop own voice	3.1 Explore and experiment with new ideas in making and interpreting design work 3.2 Develop own voice and expand practice using technology where required
4 Evaluate own work	4.1 Seek and apply constructive criticism from others 4.2 Evaluate own work against planned strategy for own practice 4.3 Evaluate own work in the context of work by others 4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes
5 Research work opportunities	5.1 Identify sources of information relating to work opportunities for designers 5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities 5.3 Incorporate research results and information into own work and career planning

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> Identifies and implements improvements in own creative and technical design skills and practice
Reading	<ul style="list-style-type: none"> Researches and evaluates a variety of textual information from different sources
Writing	<ul style="list-style-type: none"> Documents ideas, feedback and research results using clear and specific language
Oral	<ul style="list-style-type: none"> Participates in different verbal exchanges and presentations using applicable tone and vocabulary to suit the audience

SKILL	DESCRIPTION
Communication	<ul style="list-style-type: none"> Clarifies and confirms understanding using active listening techniques
Self-management	<ul style="list-style-type: none"> Determines importance of developing technical skills and of learning from feedback and self-reflection Broadens areas of interest and focus, seeks new challenges and understands expertise can be adapted and applied in diverse contexts
Teamwork	<ul style="list-style-type: none"> Cultivates relationships with people with the knowledge, skills and influence to provide collaborative support
Planning and organising	<ul style="list-style-type: none"> Takes responsibility for planning and implementing required tasks
Initiative and enterprise	<ul style="list-style-type: none"> Applies basic principles of lateral thinking to generate new or innovative ideas Recognises potential of new approaches to enhance work practices and outcomes Evaluates effectiveness of decisions on how well they meet stated goals
Problem-solving	<ul style="list-style-type: none"> Analyses and evaluates information to aid in decision making and problem solving
Technology	<ul style="list-style-type: none"> Understands principles and concepts underpinning the design and operation of digital systems and applies these when seeking to understand the potential of new technology

Unit Mapping Information

Supersedes and is equivalent to BSBDES403 Develop and extend design skills and practice.

Assessment Requirements for CUADES413 Develop and extend design skills and practice

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and use strategies to develop or extend skills, ideas and a unique voice.

In the course of the above, the candidate must:

- identify adjustments to work processes as a result of peer feedback and self-evaluation
- research work options, networking and promotional opportunities and identify how to incorporate information into own work and career development.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- current and emerging designers in the applicable design discipline
- current and emerging trends and technologies in the applicable design discipline, and the opportunities and challenges they represent
- professional development information and resources available to designers in the applicable design discipline
- sources of information relating to work opportunities and career planning.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, resources and equipment used in the development of technical and conceptual skills in the design context.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CUADES511 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. It involves confirming the proposed solution, gathering resources required to implement the solution, testing the solution and developing a prototype, and presenting the prototype to required personnel.

The unit applies to those who work as a designer, in any industry context, either independently or employed by an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise resources for realising the design solution	1.1 Confirm nature and scope of the proposed design solution 1.2 Research resources required for developing the design concept to implementation stage 1.3 Investigate different factors impacting the selection and use of resources 1.4 Select and prepare resources based on research and other legislative or organisational requirements
2. Test the design solution	2.1 Experiment with the design solution using different techniques and processes 2.2 Evaluate, challenge and refine testing processes

ELEMENT	PERFORMANCE CRITERIA
	2.3 Gain input and feedback from required personnel during testing 2.4 Document outcomes of testing according to organisational and design solution requirements 2.5 Select final design solution based on outcomes of testing and input from others
3. Develop prototype	3.1 Create prototype based on agreed approaches 3.2 Select and organise materials, tools and equipment according to chosen design solution as required 3.3 Expose model to quality checks and ongoing analysis, enhancement and refinement 3.4 Compare completed prototype against identified needs and other considerations and make adjustments as required
4. Present prototype or model	4.1 Identify required personnel design should be presented to 4.2 Select format for presentation based on nature of audience and design 4.3 Present prototype and optimise clarity, conciseness and appeal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Researches and interprets textual information from different sources
Writing	<ul style="list-style-type: none"> Documents research, resource requirements and testing outcomes using applicable language and formats
Oral Communication	<ul style="list-style-type: none"> Participates in different verbal exchanges and presentations using tone and vocabulary to suit audience Gains input and feedback using active listening and questioning techniques
Numeracy	<ul style="list-style-type: none"> Interprets and applies numeric information applicable to design solution Compares numerical data gathered from testing
Self-management	<ul style="list-style-type: none"> Understands and adheres to organisational policies, procedures and legislative requirements during planning and implementation of design solution

SKILL	DESCRIPTION
Teamwork	<ul style="list-style-type: none"> • Takes audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how
Planning and organising	<ul style="list-style-type: none"> • Sequences and schedules routine and complex activities, monitors implementation, and manages required communication
Initiative and enterprise	<ul style="list-style-type: none"> • Makes different critical and non-critical decisions in relatively complex situations, taking client requirements and different into account • Creates new and innovative ideas through exploration, analysis and critical thinking
Problem-solving	<ul style="list-style-type: none"> • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process

Unit Mapping Information

Supersedes and is equivalent to BSBDES501 Implement design solutions.

Links

Companion Volume Implementation Guide is found on VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

Assessment Requirements for CUADES511 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement solutions according to at least two different designs.

In the course of the above, the candidate must:

- undertake critical analysis, testing and development of a prototype or aspect of a design solution to meet an identified need
- present prototype to required personnel using applicable best practice methods.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- elements and principles of design and their application in the applicable design context
- key features of the wider industry, with economic, social and historical context for the design solution
- design trends and technologies including other designs and the work of other design practitioners in the applicable design context
- sources of information that support the development of technical and other knowledge in the applicable design context
- technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- other people to discuss the collaborative nature of the design process
- resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CUADES512 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief. It involves determining design requirements with stakeholders, developing and refining the design brief and finalising the terms and conditions of the brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish design requirements	1.1 Identify and make contact with required stakeholders for the design project, in addition to the client 1.2 Identify and source information and references required for design project 1.3 Undertake critical analysis of sources and extract key information to inform the design project 1.4 Determine overall objectives and parameters for design project in

ELEMENT	PERFORMANCE CRITERIA
	<p>collaboration with client and other key stakeholders</p> <p>1.5 Seek, review and act on information needed to inform constructive communication with client</p>
2. Develop and refine design brief	<p>2.1 Develop concepts and ideas for inclusion in design brief</p> <p>2.2 Undertake own analysis of concept and challenge ideas and approaches taken</p> <p>2.3 Present ideas in applicable format/medium and discuss, debate and critically analyse in collaboration with key stakeholders</p> <p>2.4 Re-evaluate and refine options based on own analysis and discourse with others</p> <p>2.5 Establish and agree on final nature and scope of design brief with client and document details according to organisational policies, procedures and standards</p>
3. Negotiate terms and conditions	<p>3.1 Negotiate and agree terms and conditions of brief in accordance with applicable organisational and professional standards</p> <p>3.2 Clarify, agree and document roles and responsibilities of those involved in the project</p> <p>3.3 Confirm agreements in writing in accordance with organisational policies and procedures</p> <p>3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek required assistance</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets textual information from various sources
Writing	<ul style="list-style-type: none"> Develops different documents using applicable vocabulary, context and formatting for different audiences
Oral Communication	<ul style="list-style-type: none"> Participates in discussions and elicits views of others using questions and listening techniques Presents ideas and seeks feedback from others using applicable tone, vocabulary and language structures
Numeracy	<ul style="list-style-type: none"> Interprets and applies numeric information applicable to design brief
Self-management	<ul style="list-style-type: none"> Identifies and adheres to organisational policies and procedures, industry standards and legislative requirements during planning and

	design of design solution
Teamwork	<ul style="list-style-type: none"> • Seeks information from stakeholders using applicable communication conventions and protocols • Uses a range of collaborative techniques to clarify and refine ideas and negotiate agreeable outcomes with others • Clarifies and refines ideas and negotiates agreeable outcomes with others using different collaborative techniques
Planning and organising	<ul style="list-style-type: none"> • Sequences and schedules complex activities, monitors implementation, and manages required communication
Problem-solving	<ul style="list-style-type: none"> • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process
Initiative and enterprise	<ul style="list-style-type: none"> • Makes different critical and non-critical decisions in complex and non-complex situations, taking client and organisational requirements and possible constraints into account • Generates new and innovative ideas and concepts through exploration, analysis and critical thinking

Unit Mapping Information

Supersedes and is equivalent to BSBDES502 Establish, negotiate and refine a design brief.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for CUADES512 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and finalise at least two different design briefs for a specific industry purpose.

In the course of the above, the candidate must:

- identify and establish brief requirements with client and key stakeholders.
- determine and include the following information and references to the design brief:
 - legislative and regulatory context
 - financial and budgetary information
 - organisational materials
 - technical reports and data
 - schedules and timelines
- participate in a discussion to clarify, negotiate and agree on terms and conditions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legal issues that affect negotiations and contracts in the applicable work context
- the design process within the specific industry context/design discipline
- scope, nature and potential variations that occur within design briefs applicable to a specific context
- sources of information to assist the development of design concepts within a specific industry context.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- required equipment and media to communicate and present ideas
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

CUAPHB16 Capture images using drone technology

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to capture images using drone technology in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It applies to individuals who produce photographs for print or electronic media and for different contexts including weddings, special events, portraits, forensics, art photography and specialist publications. At this level, work would be undertaken independently, but within established parameters and under supervision and guidance.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

Unit Sector

Visual communication – photo imaging

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to capture images	1.1 Discuss photographic project with required personnel and select required camera and accessories 1.2 Confirm digital camera features meet project requirements 1.3 Prepare required flight maps, aeronautical charts and weather briefings 1.4 Plan for effects of wind velocity, adverse environmental conditions and contingency actions 1.5 Plan digital camera features, lighting, photographic design elements and photographic techniques according to project

ELEMENT	PERFORMANCE CRITERIA
	requirements
2. Capture images	2.1 Conduct drone technology departure procedures 2.2 Operate digital camera according to manufacturer specifications 2.3 Set digital camera preferences and use photographic techniques according to desired results 2.4 Adjust planned shots as required and experiment with different ways of achieving desired results 2.5 Identify effects of wind velocity and adverse environmental and respond as required 2.6 Land drone in defined landing zone in accordance with requirements 2.7 Perform documented shutdown procedures
3. Review images	3.1 Download digital images using required digital imaging software 3.2 Rotate, cull, sort and rename images to meet requirements 3.3 Apply metadata and key words to images as required 3.4 Back up files of images and archive as required 3.5 Seek feedback from others on quality of original captures and note areas for improvement
4. Complete post-shoot activities	4.1 Clean and care for equipment according to manufacturer instructions 4.2 Report damage to equipment to required personnel according to procedures 4.3 Transport and store equipment according to procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> Participates in discussions with others using clear and relevant language to determine requirements Requests feedback and confirms understanding using listening and questioning techniques
Reading	<ul style="list-style-type: none"> Operates equipment using straightforward information from required sources
Writing	<ul style="list-style-type: none"> Records file identification information and completes required process documentation using clear, specific and industry

SKILL	DESCRIPTION
	terminology
Teamwork	<ul style="list-style-type: none"> Clarifies project requirements using accepted communication practices and procedures
Initiative and enterprise	<ul style="list-style-type: none"> Discusses work progress using accepted communication practices and procedures Identifies camera features and functions required to meet desired results and project requirements
Planning and organising	<ul style="list-style-type: none"> Plans and organises routine tasks with familiar goals and outcomes in methodical sequence
Self-management	<ul style="list-style-type: none"> Observes workplace safety practices when performing tasks Follows correct procedures for equipment cleaning and storage Complies with CASA standard operating conditions and air traffic regulations
Technology	<ul style="list-style-type: none"> Uses drone technology and digital tools to capture, identify and store digital images

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CUAPHI316 Capture images using drone technology

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- capture images using drone technology on at least three different occasions according to project requirements.

In the course of the above, the candidate must:

- apply drone piloting skills according to requirements during departure and landing
- use digital camera to capture photo images according to requirements
- store images and equipment according to workplace requirements
- comply with regulatory requirements of Civil Aviation Safety Authority (CASA) and national operating standards.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- basic techniques for planning shots using drone technology
- features of standard digital cameras and how these impact on photographic capability
- elements and principles of design for photo images
- cleaning techniques for drones, cameras and accessories
- issues that may arise in context of drone photographic shoots, and how to deal with these, including potential impacts of weather on drone technology
- techniques and principles for operating drone technology
- industry-standard drone technology used to capture images
- work health and safety, regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards relating to operating drone technology for photographic shoots
- ways to use metadata for categorising photographic images.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, tools and materials used to capture images using drone technology
- required information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG2002 Operate the carton erection process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated carton packing equipment.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for operating and monitoring a carton erection process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Bottling and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to operate carton erection equipment	1.1 Confirm work instructions and identify potential health and safety in the workplace hazards and controls with supervisor 1.2 Select, fit and use appropriate personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Ensure that product and dry goods are available and ready for use 1.4 Ensure that services are available and ready for operation 1.5 Prepare carton erection equipment and check to confirm readiness for use 1.6 Set equipment to meet carton erection requirements
2. Operate and monitor the carton erection process	2.1 Start-up carton erection equipment according to operating instructions 2.2 Monitor control points to confirm performance is maintained within equipment operation specification 2.3 Erect cartons according to specifications 2.4 Monitor carton erection equipment to confirm operating condition 2.5 Identify, rectify and report out-of-specification end product, process and equipment performance according to workplace procedures 2.6 Liaise with operators in other work areas to ensure ongoing packaging process runs efficiently and effectively
3. Shut down the carton erection process	3.1 Shut down carton erection equipment according to operating instructions 3.2 Prepare carton erection equipment for cleaning according to workplace procedures
4. Conduct housekeeping activities	4.1 Carry out cleaning procedures 4.2 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures according to workplace procedures 4.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for FBPBPG2002 Operate the carton erection process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared for, started up, operated, and shut down all items of equipment involved in the carton erection process on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
 - cleaning and sanitation processes are completed
 - carton magazines and guides are operational
 - insert magazines and guides are operational
 - any adjacent coding equipment is set up and operational
 - line controls (conveyors) are operational
 - line lube is operational and being correctly applied
 - all hot melt guns or jets are operational
 - equipment is set for correct carton dimensions
 - vacuum pump is operational
 - carton feeds are set up and accurately aligned for 6 or 12 pack cartons
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
 - compressed air pressure is at correct level
 - vacuum pressure is at correct level
 - hot melt units are maintained with correct wax level
 - carton supply is maintained
 - carton inserts are maintained
 - vacuum cups are picking up properly
 - hot glue strokes are correct length and producing a firm seal
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved the packaging process

- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of the carton erection equipment
- key features of carton erection equipment and components
- links to related work areas in the packaging process
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and methods of monitoring control points
- common causes of variation and corrective action required
- workplace health and safety hazards and controls
- routine maintenance requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - carton erection equipment
 - carton erection resources and consumables
 - tools and equipment for adjusting and maintaining equipment
 - personal protective equipment
- specifications:
 - work procedures and operator manuals or instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPBPG2004 Operate the palletising process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down the all items of equipment in the palletising process on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
 - cleaning and sanitation processes are completed
 - vacuum is operational
 - pallet pattern is set to specifications
 - slip sheets for export are available
 - plastic shrink wrapper is loaded and operational
 - pallet identification equipment is operational
 - sufficient and correct pallets are available
 - carton turning equipment is operational
 - pallet tacking hot glue is operational
 - infeed guides and gates are operational
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
 - compressed air pressure is at correct level
 - vacuum pressure is correct
 - cartons are going onto stripping plate according to set pattern
 - the ongoing quality and appearance of shrink wrapping
 - the ongoing quality and appearance of pallet identification
 - the ongoing quality and appearance of pallets and slip sheets
 - stacks are square on pallets
 - the ongoing quality and appearance of stacked pallets
- taking corrective action in response to typical faults and inconsistencies

- liaising with other work areas involved the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of palletising equipment
- key features of palletising equipment and components
- links to related processes
- effect of process stages on end product
- quality characteristics and uses of end product
- effect of product and materials on process outcomes
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant

FBPBPG2008 Perform basic packaging tests and inspections

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to carry out the tests and inspections required to monitor product and process at various control points on an operating packaging line.

The unit applies to individuals who work under general supervision in bottling and packaging and are responsible for applying basic quality assurance principles to product.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Assessment Requirements for FBPBPG2008 Perform basic packaging tests and inspections

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed basic packaging tests and inspections at a minimum of two different critical control points on an operating packaging line, including:

- confirming test equipment is ready for operation, including:
 - recognising and rejecting contaminated or faulty glassware and equipment
 - conducting safety checks
 - replacing consumables
 - setting instrument and calibration
- operating test equipment according to workplace procedures and manufacturer instructions
- carrying out routine tests
- reading and interpreting results
- recording results as required
- monitoring the process and test equipment to identify out-of-specification results or non-compliance
- taking corrective action in response to out-of-specification results, anomalies or non-compliance
- reporting and/or recording corrective action according to workplace procedures
- following procedures to repeat or validate results
- liaising with other work areas involved the packaging process
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- common bottling and packaging techniques
- enterprise policy and procedure with regard to:
 - packaging line quality assurance testing
 - health and safety in the workplace
- purpose and principles of the test
- relevant standards and specifications, and basic legislative requirements (e.g. quality, health, safety, labelling and equipment) and their implications
- procedure specification and operating parameters
- effect of sampling and testing stages on results or outcomes
- start-up and set-up procedures required
- common causes and knock-on effects of inaccuracies and preventive or corrective action required
- normal range of results on products or packaging items tested
- emergency procedures for a range of operational problems
- procedures and responsibility for reporting problems
- health and safety in the workplace hazards and controls
- cleaning and sanitising requirements of equipment and work area
- sampling plan and procedures relevant to work task.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - tools and equipment for conducting tests
 - personal protective equipment
 - instructions, information, specifications and schedules
 - products and materials on which to conduct tests
- specifications:
 - work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG2012 Operate a packaging process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a packaging process or sub-system.

This unit applies to individuals who work under general supervision and operate and monitor a packaging process and associated equipment in a processing packaging environment. A packaging process may relate to primary and secondary packaging activities. It typically requires the operation of a series of related items of equipment to achieve the required outcome.

The unit only applies in a processing packaging environment where no other specific packaging unit is available. It should not be delivered in a qualification that includes another specific packaging unit.

All work must be carried out to comply with workplace procedures, in accordance with state/territory health and safety and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Bottling and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work in processing area	1.1 Interpret work instructions and clarify where required 1.2 Identify health and safety hazards and inform supervisor 1.3 Wear appropriate personal protective equipment (PPE) and ensure correct fit 1.4 Confirm that packaging components and consumables, materials and items to be packaged are available to meet operating requirements 1.5 Identify and confirm equipment is clean and not locked out
2. Prepare the equipment and process for operation	2.1 Fit and adjust machine components and related attachments 2.2 Confirm operating parameters to meet safety and production requirements 2.3 Load or position materials, product and packaging components and consumables according to safety and operating requirements 2.4 Check and adjust equipment performance according to operating and job requirements 2.5 Carry out pre-start checks according to operator instructions
3. Operate and monitor the process	3.1 Start, operate and monitor the process for variation in operating conditions according to safe work procedures 3.2 Monitor the process to confirm that specifications are met 3.3 Identify, adjust and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.4 Follow and apply workplace cleaning procedures and environmental requirements
4. Shut down the process	4.1 Identify the appropriate shutdown procedure 4.2 Shut the process down safely according to operating procedures 4.3 Report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace and standard operating procedures relevant to work task Interpret production requirements
Writing	<ul style="list-style-type: none"> Record processing data using digital and/or paper-based formats
Oral communication	<ul style="list-style-type: none"> Ask questions to clarify understanding or seek further information
Numeracy	<ul style="list-style-type: none"> Monitor and interpret production and process control indicators and data Monitor supply and flow of materials to and from the process

Assessment Requirements for FBPBPG2012 Operate a packaging process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a packaging process to package at least one batch of products to specification, including:

- starting, operating, monitoring and adjusting packaging equipment to achieve required outcomes, including:
 - packaging components/consumables and/or product
 - monitoring control points as required to confirm process remains within specification
- following safe work procedures
- addressing routine processing issues.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the packaging process, including:
 - the purpose and characteristics required of packaging materials used
 - the principles of the packaging process used (where methods involve vacuum or map packaging, this includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of equipment, including:
 - main equipment components
 - status and purpose of guards
 - equipment operating capacities and applications
 - the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available

- the flow of processes supplying the packaging process, and the effect of outputs on downstream processes
- quality characteristics required of the packaging process, including seal integrity requirements
- effect of variation in inputs, including packaging components/consumables, materials and/or services, on process performance
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam-up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment, and early warning signs of potential problems
- methods used to monitor the packaging process, including visual inspecting, and measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements (including weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity)
- contamination/cross-contamination and safety risks related to stages in the packaging process, and related control measures
- common causes of variation, and corrective action required
- health and safety hazards and controls relevant to the packaging process
- requirements of different shutdowns as appropriate to the packaging process, including:
 - emergency and routine shutdowns and procedures to follow in the event of a power outage
 - conducting basic equipment referencing where required
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- cleaning and sanitisation procedures for packaging equipment
- recording requirements for traceability of product.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a packaging workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - packaging equipment and related services
 - personal protective equipment
 - materials to be packaged, and packaging components/consumables

- cleaning materials and equipment
- specifications:
 - work procedures, including advice on safe work practices, quality and environmental requirements
 - information on equipment capacity and operating parameters
 - specifications, control points and operating parameters
 - recording requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBPG3002 Operate the labelling process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate and shut down a range of semi-automated and automated product labelling equipment.

This unit applies to individuals who work under broad direction and exercise autonomy and judgement, and are responsible for applying basic principles to the operation and monitoring of a labelling process and associated equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Bottling and Packaging (BPG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to operate labelling equipment	1.1 Interpret work instructions and identify potential health and safety in the workplace hazards and controls 1.2 Select, fit and use appropriate personal protective equipment

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Ensure that product and materials are available to meet labelling requirements 1.4 Prepare product and materials to meet labelling requirements 1.5 Ensure that services are available and ready for operation 1.6 Prepare product labelling equipment and check to confirm readiness for use according to operating instructions 1.7 Set equipment to meet labelling requirements
2. Operate and monitor the labelling process	2.1 Start up labelling equipment according to operating instructions 2.2 Monitor control points to confirm performance is maintained within specification 2.3 Products are labelled according to specification 2.4 Monitor labelling equipment to confirm operating condition 2.5 Identify, rectify and report out-of-specification end product, process and equipment performance 2.6 Liaise with operators in other work areas to ensure ongoing packaging process runs efficiently and effectively
3. Shut down the labelling process	3.1 Shut down labelling equipment according to operating instructions 3.2 Prepare labelling equipment for cleaning and maintenance according to workplace procedures
4. Conduct house-keeping activities	4.1 Collect, treat and dispose of or recycle waste generated by both the process and cleaning procedures according to workplace procedures 4.2 Conduct work according to workplace environmental guidelines 4.3 Record workplace information according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Oral communication	<ul style="list-style-type: none"> Report out of specification details clearly using language, tone and pace appropriate to audience
Get the work done	<ul style="list-style-type: none"> Respond to predictable routine problems, faults and out of specification issues, and implements standard or logical solutions

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down an automated or semi-automated product labelling system on a minimum of one occasion, including:

- confirming equipment is ready for operation, including:
 - heating glue to correct temperature
 - checking glue meets specification according to label type
 - confirming dryness of container in readiness for labels
 - checking labels meet specification of product
 - inserting labels, correctly orientated in magazine
 - feeding label web through application mechanism
- monitoring and adjusting process equipment to achieve required quality outcomes, ensuring:
 - label adhesion
 - label orientation
 - label damage
 - label positioning
 - smooth versus bubbled labels
 - misprinted labels
 - any label or product coding applied as part of the process
- taking corrective action in response to typical faults and inconsistencies
- liaising with other work areas involved in the packaging process
- completing workplace records as required
- applying safe work practices and identifying health and safety in the workplace hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of labelling equipment
- key features of labelling equipment and components
- links to related processes
- effect of process stages on end product
- quality characteristics of end product
- product and materials preparation requirements and effect of variation on the process which may include effect on end results of:
 - glue temperature
 - glue type
 - wet containers
 - faulty label feed
 - incorrect or inaccurate labels
- emergency and troubleshooting procedures
- process specification, procedures and operating parameters
- equipment and instrumentation components, purpose and operation
- basic operating principles of process control systems where relevant
- services required
- significance and method of monitoring control points within the process
- common causes of variation and corrective action required
- routine maintenance requirements
- health and safety in the workplace hazards and controls
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- shutdown and cleaning requirements associated with changeovers and types of shutdown
- waste handling requirements and procedures
- recording requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - a product labelling context
 - work procedures and instructions
 - personal protective equipment
 - products, consumables and materials

- documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPBSH201 Participate in wild harvesting of native plants for food processing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 8.0.

Application

This unit of competency describes the skills and knowledge required to gather and harvest native plants for processing as Australian bush food. Native plants may include fruit, nuts, leaves and/or seed.

The unit applies to individuals who work with Aboriginal and/or Torres Strait Islander people to gather, forage, harvest and prepare local native plants for processing and commercial sale.

Legislation, regulations, and by-laws relating to the collection and removal of plant materials from public and private land apply. Users are advised to check with the local, relevant authority.

Pre-requisite Unit

Nil

Unit Sector

Bush Foods (BSH)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify local native plants to be harvested	1.1 Investigate main types and traditional uses of native plants 1.2 Identify scientific and local Aboriginal and/or Torres Strait Islander plant name 1.3 Consult with local Aboriginal and/or Torres Strait Islander people

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	to ensure cultural protocols are followed
2. Harvest required plants	2.1 Confirm season and location have been considered and plants are suitable for harvest 2.2 Prepare harvesting equipment according to supervisor instruction 2.3 Follow workplace processes for safely harvesting plants 2.4 Collect identified plants using appropriate method 2.5 Remove any foreign material and clean plants in preparation for storage 2.6 Dispose of waste according to supervisor instruction
3. Prepare and store harvested plants	3.1 Confirm plants have been inspected for disease or pests with supervisor 3.2 Ensure plants are labelled according to supervisor's instruction 3.3 Package plants following relevant food safety standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Document labels and record information
Oral communication	<ul style="list-style-type: none"> Use culturally appropriate language

Assessment Requirements for FBPBSH201 Participate in wild harvesting of native plants for food processing

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has on at least one occasion:

- followed supervisor instructions for harvesting plants
- worked in partnership with local Aboriginal and/or Torres Strait Islander people
- followed Aboriginal and/or Torres Strait Islander cultural protocols
- Identified at least three Australian native food products and their traditional and cultural uses relevant to workplace
- selected and used relevant equipment for harvesting of plants
- harvested plants according to season and location
- separated plants from waste materials
- labelled and documented harvested plants
- stored plants according to workplace processes
- packaged food to relevant food safety standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the importance of ensuring free, prior and informed consent from local Aboriginal and/or Torres Strait Islander people prior to harvesting native plants
- climate and seasonal changes for harvesting location
- traditional and cultural uses of plants for food, botanicals and medicines
- plants which may become toxic at certain times of the year or in certain locations
- safe use of harvesting equipment
- basic legislative requirements relevant to harvesting plants from public and private land, including:
 - relevant commonwealth, state or territory laws

- licensing requirements
- key requirements of state/territory food safety legislation, relevant to workplace
- principles for plant collection related to work instruction, including:
 - processes for the safe collection, treatment and storage of plants
 - environmental requirements in relation to waste disposal
 - methods to separate plants from waste materials
 - viruses and/or pests which may affect plants
 - labelling plants and the need for accurate recording
 - plant treatments and storage requirements for collected species.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on Country and/or within an Aboriginal and/or Torres Strait Islander Community or an environment that accurately represents these conditions
- resources, equipment and materials:
 - tools and equipment specific to the plant type and location
 - Commonwealth, state or territory legislation
- specifications:
 - workplace instructions relevant to collection of plants
- relationships:
 - supervisor
 - local Community Elders and/or Custodians.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards. In addition, the following specific assessor requirements apply to this unit:

- assessment must be undertaken by an assessor who is:
 - an Aboriginal and/or Torres Strait Islander Elder and/or Custodian

or:

- accompanied by, and in communication with, an Aboriginal and/or Torres Strait Islander person who is a recognised member of the community with experience and knowledge of local native plants.

FBPEGG2004 Operate egg grading and packing floor equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 6.0.

Application

This unit of competency describes the skills and knowledge required to operate and monitor specialist egg washing, grading and packaging equipment.

This unit applies to individuals who work under general supervision, and who apply basic operating principles to the operation and monitoring of equipment directly in contact with eggs, including washing station, denester and backpack workstations.

All work must be carried out to comply with workplace procedures, in accordance with state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Egg (EGG)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Operate and monitor egg receiving equipment	1.1 Check production schedules for egg type requirements 1.2 Wear appropriate personal protective equipment, and ensure correct fit

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Conduct pre-start checks on egg receiving equipment according to operator instructions</p> <p>1.4 Place eggs requiring manual loading onto conveyor</p> <p>1.5 Check conveyor, finger sorter and other egg receiving equipment for jams and faults</p> <p>1.6 Check primary and secondary wash and rinse machines and dryers for correct operation</p> <p>1.7 Check passage of eggs through crack and leak detectors and weighing stations to confirm that faulty eggs are being identified and dropped out</p> <p>1.8 Monitor sorting of eggs into different size lots for conformance to enterprise and job specification</p>
<p>2. Operate and monitor denester side egg packing lanes</p>	<p>2.1 Load printed packaging onto lane take off holders according to production instructions or orders</p> <p>2.2 Ensure ink in egg stamper is correct temperature</p> <p>2.3 Supply the correct number of size and grade of egg pallets and packs to each lane according to customer order</p> <p>2.4 Enter packing order requirements, including number of eggs per carton or tray, and number of cartons or trays per order type, into each lane through key pad terminal</p> <p>2.5 Ensure individual eggs are stamped with weight, in line with Food Standards Code</p> <p>2.6 Undertake mechanical setting of the lane machinery for different size trays where required</p> <p>2.7 Check setting of best before date printer</p> <p>2.8 Monitor lanes to ensure that lanes do not run out of egg trays</p>
<p>3. Operate and monitor backpack side egg packing lanes</p>	<p>3.1 Determine number of cartons per order from lane boards or other job instructions</p> <p>3.2 Monitor packing lanes to ensure trays are being packed into correct outer packaging, and adjust or report any out-of-specification outcomes according to workplace requirements</p> <p>3.3 Stack trays not requiring packing into outer containers</p> <p>3.4 Undertake quality checks of eggs throughout all stages of process for compliance with food safety standards and workplace requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Process damaged and faulty eggs	4.1 Collect and transport containers of faulty eggs from washers, and damaged eggs from packing machines, to liquid egg processing station 4.2 Sort eggs into edible and inedible waste product according to food safety standards and workplace requirements 4.3 Weigh and record edible waste product within specified time intervals 4.4 Feed faulty and damaged edible eggs to egg breaking or egg pulping machine 4.5 Start egg pulping machine according to workplace procedures 4.6 Monitor temperature of egg pulping machines and report any over-temperatures 4.7 Monitor and adjust speed of pumps to suit pulping and container filling operations 4.8 Weigh, record and dispose of inedible egg waste product according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> • Interpret standard operating procedures for operating egg grading and packing floor equipment • Interpret safety data sheets for cleaning chemicals
Writing	<ul style="list-style-type: none"> • Complete processing records using digital and/or paper-based formats
Numeracy	<ul style="list-style-type: none"> • Monitor supply and flow of eggs through washing and packing equipment • Check egg weights and best before dates • Interpret Haugh unit readings

Assessment Requirements for FBPEGG2004 Operate egg grading and packing floor equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated grading and packing floor equipment over the period of at least one work shift, including:

- undertaking quality checks of egg grading, washing and packing process
- addressing routine processing issues
- applying safe work practices
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- grading floor layout, including conveyors, washing, drying, weighing and checking equipment, lanes, denester side, backpack side, lane boards and other instruction boards, store rooms and cool rooms
- basic operating principles of equipment, including main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters
- Food Standards Code requirements for eggs and egg products
- typical equipment faults and related causes, including signs and symptoms of faulty equipment, and early warning signs of potential problems
- inspection or test points (control points) and the related procedures and recording requirements
- requirements for different types of eggs, including cage, barn laid, free range and organic
- common causes of variation in mechanical settings, and corrective action required

- food safety risks present in egg pulp and egg products, including biological, chemical, physical and allergenic risks
- measures used to control food safety risks
- method used for communicating daily orders, including lane boards
- purpose of best before dates for egg packaging
- method of setting best before date printer for egg packaging
- types and implication of cracks in eggs
- location and contents of all material safety data sheets (SDS) for chemicals used in washing and cleaning processes
- types of trays, outer packaging, buckets and other containers used on grading floor, and system used to identify containers used for first grade, seconds and defective eggs
- determining first grade, seconds and defective eggs
- maximum collection times for seconds and defective eggs from grading floor collection points
- quality checks, including checks on outer quality, date printing, eggs weights, cleanliness, Haugh unit reading and misshapen and cracked eggs in cartons
- procedures to record traceability of product.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - an egg grading and packing workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment
 - egg washing, grading and packing equipment
 - eggs to be processed
- specifications:
 - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
 - production schedule/batch instructions
 - documentation and recording requirements and procedures
 - cleaning procedures, materials and equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY2002 Apply food safety procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to maintain food safety, workplace cleanliness and personal hygiene, and conduct work tasks where work involves operation of production and/or packaging equipment and processes.

This unit applies to individuals who participate in and comply with safety programs in the food processing sector. It does not apply to the pharmaceutical industry.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Pre-requisite Unit

Nil

Unit Sector

Food Safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement the food safety program	1.1 Identify food handling requirements of the work task 1.2 Carry out food handling, and control food safety hazards according to the food safety program 1.3 Report any incident where food safety control requirements, including for food allergens, are not met, and take corrective action as

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	directed 1.4 Record food safety information to meet requirements of the food safety program 1.5 Maintain workplace cleanliness and sanitation to meet workplace standards 1.6 Conduct work to comply with workplace environmental guidelines
2. Participate in maintaining and improving food safety	2.1 Monitor work area, materials, equipment and product to ensure compliance with food safety requirements 2.2 Identify and report processes, practices or conditions that could result in a food safety breach, and take corrective action as directed 2.3 Report food safety issues to supervisor
3. Comply with personal hygiene standards	3.1 Ensure personal hygiene meets the requirements of the food safety program 3.2 Report health conditions and illness as required by the food safety program 3.3 Wear appropriate clothing and footwear for the food handling task 3.4 Move around the workplace in compliance with the food safety program

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information relating to food safety and environmental guidelines
Numeracy	<ul style="list-style-type: none"> Monitor and interpret food safety information and data

Assessment Requirements for FBPFYSY2002 Apply food safety procedures

Modification History

Release	Comments
Release 1	This version released with FBPF Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively implemented the food safety program and procedures on two separate occasions in a food processing and/or food packaging environment, including:

- identifying own responsibilities with regard to food safety, including food allergen management
- identifying food safety risks in the workplace, and the control measures used to manage them
- applying control measures in own work
- monitoring compliance with food safety standards
- identifying and acting on non-compliances.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of critical control point (CCP)-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including:
 - workplace policies and procedures to implement responsibilities
 - the relationship between the quality system and the food safety program
 - the role of internal and external auditors
 - procedures followed to investigate contamination and cross-contact allergenic events
- Food Standards Code and why it exists, relevant to work role

- good manufacturing practices (GMP) relevant to work role
- state/territory food legislation, relevant to workplace
- common microbiological, physical, chemical and allergen hazards related to the foods handled in the work area
- handling and storage requirements of ingredients, materials and products handled and used
- methods used to monitor that food safety is under control, including the purpose of sampling
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records, and the recording requirements of the food safety program
- methods used in the workplace to isolate or quarantine food that may be unsafe or non-conforming
- product and ingredient recall procedures where required by work responsibilities
- personal protective clothing and footwear, clothing maintenance, laundering and storage requirements
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitisation procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a food or beverage processing workplace or an environment that accurately represents actual workplace conditions
- resources, equipment and materials:
 - food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods
 - personal protective equipment and clothing
- specifications:
 - work instructions and procedures relevant to work task
 - cleaning and sanitisation policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Links

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=78b15323-cd38-483e-aad7-1159b570a5c4>

FBPFSY2003 Maintain food safety when loading, unloading and transporting food

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to maintain food safety when loading and transporting temperature-sensitive ingredients and products.

This unit applies to loading, unloading and transport activities where the transport operator does not have direct physical contact with food.

All work must be carried out to comply with workplace procedures, in accordance with state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Food Safety (FSY)

Assessment Requirements for FBPF SY2003 Maintain food safety when loading, unloading and transporting food

Modification History

Release	Comments
Release 1	This version released with FBPF Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has maintained food safety when loading, unloading and transporting food for at least one delivery of temperature-sensitive ingredient or product, including:

- applying safe work practices
- completing records accurately.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls, including the purpose and limitations of protective clothing and equipment
- food safety critical control points (CCPs) in the loading/unloading and transportation of food materials and product, and related methods of control
- characteristics of food transported and related transport environment requirements
- key requirements of the Food Standards Code in relation to product transported
- microbiological, physical, chemical and allergenic hazards that can occur when loading, transporting and unloading food, appropriate to nature and method of food transported, including the types of hazards likely to occur, the conditions under which they occur, and possible consequences
- methods and procedures used to control food safety hazards (this depends on the type of controls and equipment used), including the purpose and operation of equipment procedures in place to maintain food safety, and workplace records, such as temperature control charts and cleaning and sanitisation records
- procedures used to confirm that transportation and related food safety equipment is operational and appropriate for use, such as equipment capacity to maintain a given temperature environment appropriate to the food product

- cleaning and sanitation requirements for maintaining food safety when loading, unloading and transporting food
- potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported, where contamination by osmosis is a possibility.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace information, including temperature charts and cleaning records
 - personal protective clothing and equipment
 - food storage vehicles, containers and receptacles
 - food ingredient and/or product to be loaded/unloaded and transported
- specifications:
 - work procedures relevant to loading/unloading and transportation, including advice on required temperature parameters to be maintained
 - food safety requirements
 - loading/unloading and transport advice/schedules
 - documentation and recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY3002 Participate in a HACCP team

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to participate in the development and review of a hazard analysis critical control point (HACCP)-based food safety program.

The unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others, and who participate in the development of a food safety program typically limited to their immediate work area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Identify and review food safety hazards	<p>2.1 Identify processes to be covered by the food safety program, and recognise the steps within each process</p> <p>2.2 Identify food safety hazards that are reasonably expected for each critical control point</p> <p>2.3 Review safety handling methods, processing techniques and existing support programs used in the workplace as part of a team</p>
3. Establish or review methods to monitor and control food safety hazards	<p>3.1 Establish acceptable methods of control for each food safety hazard that is reasonably expected to occur</p> <p>3.2 Validate control methods against safety standards</p> <p>3.3 Establish or review procedures for taking preventative action</p> <p>3.4 Establish or review appropriate methods for monitoring that processes remain within control</p> <p>3.5 Establish required corrective action to respond to situations where hazards are not effectively controlled</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has actively participated in a food safety team on a minimum of two occasions, including:

- identifying food safety hazards in the critical control points (CCPs) of production processes
- establishing and validating control standards and methods for a minimum of two potential hazards
- applying food safety procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and intent of food safety legislation, including Food Standards Code
- the roles and responsibilities for developing and maintaining the food safety program, including roles of internal and external auditors and authorised officers
- techniques for applying critical control point principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- common microbiological, physical, chemical and allergen hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence

- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredients and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area, and their effect on food safety
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards and contamination likely to occur given product type and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition and time and temperature as relevant to food handled
- acceptable control methods for identified hazards, and required corrective actions when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability, and personal hygiene, and how they can be used as part of a food safety program
- validation and verification processes and techniques and responsibilities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - workplace food safety program documentation
- specifications:
 - review/audit arrangements
 - advice on quality and food safety legislation
 - procedures for developing or modifying specifications and other advice on food safety requirements
 - reporting/recording system
- relationships (internal and/or external):
 - interactions with team members.

FBPFSY3003 Monitor the implementation of food safety and quality programs

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to provide a leadership role in supporting day-to-day implementation of the food safety (including food allergen management) and quality programs and procedures in a work area.

The unit applies to individuals who monitor, maintain and oversee quality standards and food safety programs, and take corrective action in response to non-compliance. It does not apply to the pharmaceutical industry.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Assessment Requirements for FBPFYSY3003 Monitor the implementation of food safety and quality programs

Modification History

Release	Comments
Release 1	This version released with the FBPF Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively monitored the implementation of food safety and quality programs on two different occasions, including:

- confirming food safety and quality program requirements, risks and control measures of the work area
- confirming that control measures are in place and that personnel in the work area are equipped and informed to implement programs, including controls for managing allergens
- identifying, addressing and following up on non-compliances
- identifying causes of non-compliance
- conducting risk assessments and recommending responsive actions
- providing support to others to implement the food safety and quality programs
- completing and maintaining documentation, including observations and test results.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- procedures and responsibilities for food safety relevant to the workplace
- principles of a critical control point (CCP) analyses approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control, and confirming that controls are met
- Food Standards Code and its purpose, relevant to work role
- state/territory food legislation, relevant to workplace
- consumer legislation, relevant to food
- food quality requirements relevant to workplace
- basic concepts of food safety and quality assurance, including hazards, risk assessment and control methods

- methods to manage and support food safety and quality in the workplace, including systems for maintaining and updating documents, including operating procedures and specifications
- personal protective clothing and footwear, clothing maintenance, laundering and storage requirements
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitisation procedures
- common microbiological, physical, chemical and allergen hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
- options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses, and level of responsibility for decision-making
- waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, including hazardous waste
- traceability requirements relevant to the food items produced
- recall procedures within level of responsibility
- documentation system and procedures, including recordkeeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
- internal and external auditing arrangements, roles and responsibilities as they relate to own work responsibilities
- appropriate communication skills and techniques to convey information on food safety and quality requirements to others in the workplace.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a food or beverage processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective clothing and equipment
 - reporting and monitoring systems
- specifications:
 - food safety program for the work area that identifies critical control points, control measures and corrective actions
 - quality policy, system and procedures

- relationships:
 - interactions with work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY4001 Supervise and maintain a food safety plan

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to maintain and implement a hazard analysis critical control point (HACCP) based food safety plan. It includes the ability to monitor the implementation of a food safety plan, to revise, verify and validate the system, and to respond to audit findings for the system.

This unit applies to individuals who monitor and maintain a food safety plan in the workplace.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Pre-requisite Unit

Food Safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review the existing food safety plan	1.1 Collect data and results from critical control point (CCP) records to verify the food safety system 1.2 Identify major and minor non-conformances to the food safety

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	plan 1.3 Monitor critical control points to confirm performance 1.4 Analyse problem areas and suggest corrective actions and strategies to prevent recurrence of the problem 1.5 Document required amendments to the food safety plan 1.6 Report recommendations and amendments to appropriate personnel
2. Communicate the requirements of the food safety plan	2.1 Explain food safety principles, food safety procedures and requirements, including regulatory requirements, to the team 2.2 Develop commitment to and responsibility for food safety through work team communication 2.3 Define, document and implement procedures to support the food safety plan 2.4 Provide training and mentoring to the team to assist implementation
3. Monitor the implementation of the food safety plan	3.1 Monitor team's implementation of the food safety plan 3.2 Monitor personal behaviour, including hygiene, housekeeping and use of clothing and equipment, and correct where necessary 3.3 Complete and maintain records and reports 3.4 Take prompt action to correct non-conformance 3.5 Identify and analyse causes of non-conformance 3.6 Implement control measures to prevent future non-conformance 3.7 Report non-conformance to appropriate personnel
4. Maintain the food safety plan	4.1 Seek feedback from all personnel to identify potential hazards, corrective actions and controls 4.2 Identify processes or conditions that could result in breaches of food safety procedures, and take preventive or corrective action 4.3 Update corrective action and control procedures to improve food safety 4.4 Complete safety plan documentation

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 3.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively supervised and maintained a critical control point (CCP) food safety program in a food processing environment, working with a small team on at least one occasion, including:

- reviewing a food safety plan for a food processing operation
- communicating the requirements of a food safety plan to workers
- demonstrating safe food handling work practices
- completing records and reports related to the implementation of food safety
- responding to non-compliances and taking corrective actions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Food Standards Code and relevant food legislation
- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents
- common microbiological, physical and chemical hazards to food safety, and related control methods
- the way changes in equipment and/or processing methods can affect food safety hazards and level of risk
- the objectives of a hazard analysis critical control point (HACCP) based food safety program
- the steps in the development of a CCP-based food safety plan
- the steps in the systematic introduction of a HACCP-based food safety program

- workplace recall and traceability procedures
- purpose of the CCP development and review process
- the document controls associated with a procedure change
- the purpose of standard operating procedures and work instructions
- the process of auditing and verifying a HACCP-based food safety program
- the importance of role-modelling good personal hygiene, safe food handling and quality procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - food processing equipment
 - methods and related software systems for collecting data, analysing data and compiling a report
- specifications:
 - workplace operating procedures
 - a CCP-based food safety plan for the food processing workplace
- relationships:
 - interactions with work team and supervisor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY5001 Develop a HACCP-based food safety plan

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to develop a hazard analysis critical control point (HACCP)-based food safety plan and to oversee its implementation and monitoring.

This unit applies to individuals who develop HACCP-based food safety plans in a workplace setting.

Legislative and regulatory requirements apply to food safety and are enforced through state/territory jurisdictions. Users must check with the relevant regulatory authority before delivery.

Pre-requisite Unit

Nil

Unit Sector

Food safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Describe the product, and scope the food safety plan	1.1 Obtain the appropriate product-specific knowledge and expertise 1.2 Specify the segment of the food chain and processes involved 1.3 Identify the scope of the HACCP plan and specify the class of hazards 1.4 Draw up a full description of the product

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Identify the intended use and client group for the product
2. Construct a flow diagram of production and confirm its applicability	<p>2.1 Include all steps in the operation, from primary production, processing, manufacture and distribution to the consumer</p> <p>2.2 Use standard symbols and nomenclature to describe the processes and steps in the operation as a flow diagram</p> <p>2.3 Specify the steps preceding and following a new operation</p> <p>2.4 Validate the flow diagram against the operation at all stages of production</p>
3. Analyse all potential hazards for each step and consider control measures	<p>3.1 Identify hazards that can reasonably be expected to occur at each step</p> <p>3.2 Analyse hazards and identify the risks posed to the production of safe food</p> <p>3.3 Consider control measures for each hazard</p>
4. Determine critical control points and the critical limits for each	<p>4.1 Follow a process of decision-making to determine critical control points</p> <p>4.2 Check hazards at each critical control point to ensure a control measure can be put in place</p> <p>4.3 Modify the product or process where control measures are not available to allow a control measure at another stage</p> <p>4.4 Specify critical limits for each critical control point that are either measured or sensory</p>
5. Establish a monitoring system for each critical control point	<p>5.1 Establish appropriate monitoring methods for each critical control point</p> <p>5.2 Design monitoring methods to indicate the critical limit has been reached or is trending towards it</p> <p>5.3 Monitor frequently to ensure that the critical control point is in control</p> <p>5.4 Make adjustments on the basis of the monitoring of critical limits to prevent deviation and hazards occurring</p>
6. Establish and record corrective actions and verification procedures	<p>6.1 Design specific corrective actions to deal with deviations in the critical control point as they occur</p> <p>6.2 Document procedures for treating or disposing of product for occasions when critical limits are exceeded</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	6.3 Develop verification procedures 6.4 Carry out verification to ensure the HACCP system is working effectively
7. Establish documentation and recordkeeping requirements	7.1 Document all HACCP procedures 7.2 Maintain records, including the collection of continuous monitoring data if required 7.3 Access records to determine that procedures in place are maintaining critical limits at each critical control point 7.4 Access HACCP procedures and review as part of continuous improvement 7.5 Design food safety systems and documentation to meet the requirements of auditing standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Measure and record non-conformance with specifications and food safety program
Navigate the world of work	<ul style="list-style-type: none"> Apply knowledge of regulations and policies relevant to workplace HACCP-based food safety program Monitor adherence to legal and regulatory standards and responsibilities for self and others
Get the work done	<ul style="list-style-type: none"> Devise and implement solutions for the development of a HACCP-based food safety plan, including a system for ongoing monitoring and review Use problem-solving skills to respond to situations where hazard may not be effectively controlled

Assessment Requirements for FBPFYS5001 Develop a HACCP-based food safety plan

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has developed, implemented and monitored a minimum of one effective hazard analysis critical control point (HACCP)-based food safety plan that incorporates a minimum of four critical control points.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and intent of food safety legislation, including Food Standards Code
- product traceability
- allergen labelling
- purpose and responsibilities for maintaining records as required by legislation and workplace procedures
- roles and responsibilities for development and maintenance of the food safety program, including internal and external auditors, and authorised officers
- seven basic steps of HACCP: conduct a hazard analysis, identify critical control points, establish critical limits, establish monitoring procedures, establish corrective actions, establish verification procedures, establish recordkeeping procedure
- procedures for establishing the critical limits and monitoring data or processes
- techniques used to map operations and analyse food safety requirements, such as the preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredients and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements

- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards/contamination likely to occur given the type of product and processing methods used, including allergens
- conditions required for bacterial food poisoning to occur, such as aw (water activity), pH, composition, time and temperature, as relevant to food handled
- acceptable control methods for the hazards identified, and required corrective action when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, and personal hygiene, and how they can be used as part of a food safety program
- validation and verification processes, and techniques and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - a food processing operation with a defined product and consumer
 - resources and equipment to set and monitor critical limits
 - reporting/recording system
- specifications:
 - workplace food safety program documentation
 - organisational policies on food safety and risk management
 - procedures for developing or modifying specifications and other advice on food safety requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPFSY5003 Design a traceability system for food products

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to design a traceability system to track any food through all stages of production, processing and distribution. This system allows for the efficient withdrawal or recall of products that have been identified as unsafe and is a requirement under Food Standards Australia and New Zealand (FSANZ).

This unit applies to individuals who are responsible for food product development and who undertake roles in product design, quality assurance or production management.

All work must be carried out to comply with workplace procedures, in accordance with state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Food Safety (FSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research traceability requirements and systems	1.1 Identify food and/or beverage product to be tracked 1.2 Identify regulatory and industry requirements for tracking

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>processed food or beverages</p> <p>1.3 Investigate traceability systems available on the free market, and assess their suitability for food product</p> <p>1.4 Investigate the development of a customised system to track product</p>
2. Develop and test system	<p>2.1 Devise system to track details of food item, including supply of product ingredients and/or raw materials, processing details, packaging and distribution</p> <p>2.2 Test system by conducting a traceability exercise to ensure product and ingredients can be identified through recall</p> <p>2.3 Adjust system details to ensure efficient recall of product</p> <p>2.4 Ensure system meets the requirements of the Food Standards Code for specified product</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Problem-solve issues that arise with traceability
Reading	<ul style="list-style-type: none"> Interpret regulatory and industry traceability requirements
Writing	<ul style="list-style-type: none"> Determine product and ingredient details for labels and/or product specifications

Assessment Requirements for FBPFYS5003 Design a traceability system for food products

Modification History

Release	Comments
Release 1	This version released with FBPFYS5003 Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has designed a traceability system for at least one manufactured food or beverage product, that includes identification of records for:

- production
- supplied ingredients and/or materials
- volume or quantity of products manufactured or supplied
- batch or lot identification (or other markings)
- where products are distributed
- any other relevant production records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- traceability requirements for food businesses identified in the Food Standards Code, particularly Standard 3.2.2 and any standards relevant to the items produced at the organisation
- the requirement for food businesses to be able to recall unsafe food through readily accessible records that include:
 - production records
 - what products are manufactured or supplied
 - volume or quantity of products manufactured or supplied
 - batch or lot identification (or other markings)
 - where products are distributed
- specific traceability requirements of food or beverage produced at the organisation
- different types of traceability systems used in the food processing environment, including bar codes, radio frequency identification, paper-based systems

- industry and government initiatives for improving traceability systems
- consumers' requirement to know more about the products they buy, including information about:
 - food safety
 - animal and plant pest and disease status
 - provenance
 - authenticity
 - social matters such as sustainability and animal/worker welfare practices.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a food or beverage processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - food or beverage products
- specifications:
 - food and ingredient labels or specifications
 - food/ingredient packaging
 - workplace production records
 - guidelines for traceability.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPGPS3001 Operate and monitor a creamed honey manufacture process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to set up, monitor and adjust a process to produce creamed honey.

This unit applies to individuals who apply operating principles to the operation and monitoring of machines and equipment used to cream honey in a production environment within the honey processing industry.

All work must be carried out to comply with workplace procedures, in accordance with state/territory health and safety and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Grocery and Product Supplies (GPS)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare the equipment and process for operation	1.1 Confirm liquid and seed honey are available to meet production requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.2 Identify and confirm cleaning and maintenance requirements have been met according to health, safety and food safety procedures</p> <p>1.3 Wear appropriate personal protective clothing and ensure correct fit</p> <p>1.4 Fit and adjust machine components and related attachments according to operating requirements</p> <p>1.5 Enter processing or operating parameters to meet safety and production requirements</p> <p>1.6 Conduct pre-start checks according to operator instructions</p>
2. Operate and monitor equipment	<p>2.1 Start up and operate the honey manufacture process according to safe work procedures</p> <p>2.2 Monitor equipment to ensure optimal operations</p> <p>2.3 Identify variation in equipment operation, and troubleshoot to identify solution</p> <p>2.4 Confirm that product specifications are met at each stage according to production requirements</p> <p>2.5 Identify, rectify or report out-of-specification product and process outcomes according to workplace procedures</p> <p>2.6 Maintain the work area according to safe work and food safety procedures</p> <p>2.7 Complete workplace records including traceability and biosecurity records, according to workplace procedures</p>
3. Shut down the creamed honey manufacture process	<p>3.1 Identify the appropriate shutdown procedure</p> <p>3.2 Shut down the process safely according to operating procedures</p> <p>3.3 Identify and report maintenance requirements according to workplace procedures</p> <p>3.4 Ensure waste is disposed of in line with environmental requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret standard operating procedures for the creamed honey manufacturing process
Writing	<ul style="list-style-type: none"> Record product and processing information using digital and/or paper-based formats
Numeracy	<ul style="list-style-type: none"> Monitor control points for ambient and processing temperatures, agitation speeds, and holding times and temperatures

Assessment Requirements for FBPGPS3001 Operate and monitor a creamed honey manufacture process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated and monitored a creamed honey manufacturing process to produce at least one batch of creamed honey to product specification, including:

- applying safe work practices
- applying food safety procedures to work practices
- taking corrective action in response to typical faults and inconsistencies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic principles of crystallisation, including:
 - an understanding of crystal structure and methods to reduce crystal size, where appropriate
 - the effects of temperature and agitation on crystal formation
 - appropriate ratio of seed to liquid honey
 - factors that influence the crystallisation process, including moisture content and crystal size
- basic operating principles of equipment, including:
 - main equipment components
 - status and purpose of guards
 - equipment operating capacities and applications
 - purpose and location of sensors and related feedback instrumentation
- services required for creamed honey manufacture, and action to take if services are not available
- good manufacturing practices (GMP) relevant to work task

- quality and organoleptic characteristics of honey processed
- quality characteristics to be achieved by the final product, and related test methods used to confirm quality
- quality requirements of seed and liquid honey used, and the effect of variation on the final product
- honey floral blend to use based on the honey colour, flavour, type of grain in the seed blend
- hardness required of end product and the effect of seasonal temperatures
- operating requirements, parameters and corrective action required where the process is outside specified operating parameters (including ambient and processing temperatures, agitation speeds, and holding times and temperatures)
- typical equipment faults and related causes, including:
 - signs and symptoms of faulty equipment
 - early warning signs of potential problems
- methods used to monitor each stage of the production process, including inspecting, measuring and testing as required
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/cross-contamination and food safety risks associated with the process and related control measures (this relates specifically to air inclusion and moisture content, and related methods of control)
- common causes of variation, and corrective action required
- factors that affect the stability and shelf-life of the finished product, and options to extend shelf-life, including storage conditions for packed product
- health and safety hazards and controls, including the purpose and limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including:
 - emergency and routine shutdowns
 - procedures to follow in the event of a power outage
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and waste disposal
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures for creamed honey manufacturing equipment
- cleaning and sanitisation procedures for creamed honey manufacturing equipment
- procedures to track traceability of product
- procedures to ensure biosecurity requirements are met.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a food processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - processing equipment and related services
 - seed and liquid honey
 - personal protective equipment
 - sampling schedules, and test procedures and equipment
 - cleaning materials and equipment
- specifications:
 - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
 - information on equipment capacity and operating parameters
 - production schedule and batch instructions
 - recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2065 Conduct routine maintenance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to inspect equipment and carry out routine maintenance and adjustment using a limited range of hand tools.

This unit applies to individuals who perform routine maintenance in a food and beverage environment. It typically targets the production worker responsible for conducting simple and routine maintenance tasks to support the operation of machines or equipment.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Conduct routine inspection of plant and equipment	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify health and safety hazards in the workplace and tell supervisor 1.3 Wear appropriate personal protective equipment and ensure correct fit

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Inspect equipment to identify signs of wear 1.5 Assess the nature of maintenance requirement
2. Prepare to conduct routine maintenance	2.1 Assess the maintenance task to determine tools and services required 2.2 Prepare equipment for maintenance 2.3 Select hand tools according to task requirements 2.4 Check tools before use and report unsafe and faulty items 2.5 Plan and schedule maintenance in consultation with affected work areas to minimise disruption to production
3. Carry out routine maintenance	3.1 Carry out routine maintenance on equipment 3.2 Report maintenance activities in line with workplace procedures
4. Complete maintenance tasks	4.1 Return equipment to operating order when maintenance is complete 4.2 Store tools and materials 4.3 Notify the relevant personnel of maintenance completion 4.4 Maintain a clean and tidy workplace

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Interact effectively with staff members
Get the work done	<ul style="list-style-type: none"> Make routine decisions to correct simple and familiar problems Apply routine fault finding methods to trace and identify equipment faults and implement standard and familiar solutions

Assessment Requirements for FBPOPR2065 Conduct routine maintenance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively conducted routine maintenance on a minimum of two different items of plant and/or equipment, including:

- identifying routine maintenance tasks for machine or equipment
- monitoring operation and identifying need for maintenance tasks
- carrying out routine maintenance tasks according to workplace procedures
- on completion of maintenance tasks, returning equipment to operational order, including confirming that all equipment parts, nuts and bolts are accounted for and correctly tightened
- scheduling maintenance tasks that are beyond one's own job role and communicating requirements with affected personnel
- selecting and using appropriate tools to undertake routine maintenance within scope of own job role
- assessing readiness for returning machine or equipment to operation or referring for further attention
- completing maintenance documentation
- applying safe work practices and identifying health and safety hazards and controls in the workplace.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems and programs in place to manage routine maintenance of plant and equipment in the workplace
- responsibilities for participating in the maintenance program, including operator role and the role of others
- procedures for raising maintenance orders where requirements are outside operator role

- basic operating principles of equipment to be maintained
- signs and symptoms of faulty equipment and early warning signs of potential problems
- basic checks used to confirm the nature of maintenance requirements, including distinguishing between mechanical and electrical faults and identifying probable causes or conditions that may increase maintenance requirements of equipment used
- procedures for issuing, maintaining and storing tools used
- safe use of hand tools and measuring instrumentation relevant to maintenance responsibilities
- lubrication requirements, including requirements to use food grade lubricants as required, and consequences of using incorrect type or amount of lubricants
- safe work procedures, including appropriate signage of maintenance activities, use of appropriate personal protective equipment, and awareness of safety hazards and controls relating to maintenance tasks
- methods used to render equipment safe to work on or clean including lock out/tag out and isolation procedures (in some cases this may involve liaising with other maintenance operators)
- procedures and inspections to be carried out to confirm that equipment is in operating order and all parts are accounted for
- food safety risks arising from poor personal hygiene, cleaning and housekeeping practices and procedures associated with routine maintenance
- maintenance planning, scheduling and recording procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - maintenance tools and equipment
 - operational machinery and equipment
 - safety equipment
 - spares and consumables
- specifications:
 - operation procedures
 - service equipment and maintenance instructions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2066 Apply sampling procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to interpret sampling plans, and to collect and transfer samples to retain sample integrity.

This unit applies to individuals who would typically be required to follow specific sampling procedures under general supervision.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for sampling	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify health and safety hazards in the workplace and inform supervisor 1.3 Wear appropriate personal protective equipment and ensure correct fit 1.4 Identify sampling requirements in the sampling plan

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Prepare sampling equipment, containers and labels
2. Collect samples	2.1 Collect samples as specified in the sampling plan 2.2 Handle and prepare samples to preserve sample and source integrity 2.3 Identify and report defects or abnormalities in source material and sample 2.4 Record sample information in line with workplace requirements 2.5 Maintain a clean and tidy workplace

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Writing	<ul style="list-style-type: none"> Record sample information accurately
Get the work done	<ul style="list-style-type: none"> Solve familiar and generally predictable problems within workplace guidelines

Assessment Requirements for FBPOPR2066 Apply sampling procedures

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively taken 10 samples, in line with the sampling plan, including:

- accessing and interpreting sampling plan to identify requirements
- selecting, fitting and using personal protective equipment
- preparing for sampling to ensure required tools, containers and labels are available
- following sampling procedures and the sampling plan to collect samples from the designated points, in the quantities and at the times specified
- identifying atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules
- completing sample records according to workplace requirements, such as labelling samples as required
- transferring samples for testing
- maintaining work area to meet housekeeping standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of personal protective equipment
- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples, and related handling and preparation requirements and responsibilities

- characteristics of materials sampled, and common contaminants and related conditions under which contamination is likely to occur
- sampling techniques relevant to samples collected, such as sterilisation methods and procedures
- the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
- procedures and responsibility for reporting and recording sampling information, including legislative requirements
- procedures for preparing samples.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - sampling plan
 - recording and reporting system
 - sampling equipment and containers as required
 - product/source material to be sampled.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2067 Work in a food handling area for non-food handlers

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to conduct work in a food handling area where the work does not involve direct food contact.

This unit applies to individuals who typically work in stores, warehousing, cleaning and maintenance roles. This unit is not appropriate for a person who has direct contact with food or raw materials or ingredients. Where this is a requirement, refer to relevant food safety units.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain food safety while working in a food handling area	1.1 Read or listen to work instructions from supervisor and clarify where needed 1.2 Identify health and safety hazards in the workplace and inform supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Wear appropriate personal protective equipment and ensure correct fit 1.4 Identify and follow food safety requirements related to work tasks 1.5 Carry out work responsibilities so that the safety of food is maintained 1.6 Identify and report procedures or practices which are inconsistent with requirements of the workplace food safety program
2. Maintain food handling area in clean and orderly state	2.1 Confirm that equipment and the food handling area meet the cleaning and sanitation requirements of workplace food safety program 2.2 Collect and dispose of waste according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for FBPOPR2067 Work in a food handling area for non-food handlers

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked safely and effectively in a food handling area, in a non-food handling role, to effectively maintain food safety standards on at least two different occasions, including:

- accessing and applying workplace information on food safety policies and procedures relevant to own work
- fitting and using appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- checking own work area to identify food safety hazards
- carrying out work responsibilities to ensure that food safety is not compromised
- taking necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognising and reporting situations or procedures that could compromise food safety
- sorting and disposing of waste according to workplace procedure
- maintain workplace standards in work area.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including the purpose and limitations of protective clothing and equipment
- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non-food handling areas

- suitable standard for materials and equipment used in the food handling area, including materials that are unsuitable for use
- methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised
- the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring
- cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area
- waste collection, recycling and handling procedures
- workplace standards to be maintained in the work area.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - work area and related equipment to undertake work function
 - waste collection, treatment, recycling and/or disposal equipment
- specifications:
 - food safety policies and procedures relevant to work role
 - work procedures, including procedures for entering and exiting food handling areas.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2068 Operate a process control interface

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate a computer-based interface to modify and/or interrogate a control system.

This unit applies to individuals who work under general supervision. This includes identifying and providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Navigate the process control interface	1.1 Confirm the readiness of the control interface and related components for operation 1.2 Use the hardware provided to operate the interface 1.3 Use page links to move between screens 1.4 Acknowledge messages and alarms 1.5 Access required information from screen displays

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.6 Record interface system malfunctions and report to supervisor
2. Use interface system to operate and maintain a process within required parameters	2.1 Start, monitor and shut down individual items of equipment and processes using the control interface 2.2 Select equipment, alter status and enter settings to meet operating requirements 2.3 Activate sequences to initiate process operation 2.4 Recognise equipment giving a bad signal or bad measurements and take responsive action
3. Analyse data to predict and control performance	3.1 Select and analyse trends to identify performance patterns 3.2 Identify causes of abnormal or unacceptable performance and take corrective action 3.3 Record information in workplace format

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> • Access and interpret process control panels and system

Assessment Requirements for FBPOPR2068 Operate a process control interface

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated a process control interface on at least two occasions, including:

- recognising and responding to error messages and alarms
- accessing relevant performance data using the control system, including locating and interpreting performance trend information
- recording log information using the interface system according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- processes and equipment being controlled, including required processing sequences
- operating principles of process control and interface system, including the relationship between control panels, systems and the physical equipment, and where relevant, operating conditions required for accurate information input from sensors and related instrumentation
- action required to respond to error messages and alarms
- typical faults that can occur when operating a process control interface and corrective action required
- performance data collected by the control interface system and its application to troubleshoot performance, including the ability to identify and investigate related trend data to track cause and effect
- recording requirements and responsibilities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - process control interface hardware and software
 - work station or equipment to be controlled
 - process to be controlled
 - communication systems and equipment
 - workplace information recording systems, requirements and procedures
- specifications:
 - operating procedures and related advice on equipment operation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2069 Use numerical applications in the workplace

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively used numerical applications for work purposes, on at least two different occasions, including:

- identifying whether a calculation or estimation is required to meet workplace requirements
- performing calculations involving basic addition, subtraction, division and multiplication to support work role (this may involve use of a calculator and conversion tables)
- using estimation techniques to check quantities, ratios, speed and other required data estimates
- using estimation techniques to check calculated results and workplace data
- recording calculations and measurement information accurately, according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- mathematical processes, including addition, subtraction, multiplication and division
- application of calculation and estimation techniques to meet work requirements
- units of measurement used in the workplace, including whole numbers, fractions and decimals to one decimal point (this may include use of conversion charts)
- representation of numerical information relevant to work requirements, including charts, graphs and tables
- recording requirements and responsibilities relevant to work role.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - real or simulated work tasks requiring simple estimation and calculation
 - conversion tables, calculators and measuring instruments.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2070 Apply quality systems and procedures

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0.

Application

This unit of competency describes the skills and knowledge required to monitor quality of work outcomes to maintain and improve quality in a processing context.

This unit applies to individuals who work under general supervision and exercise limited autonomy.

All work must be carried out to comply with workplace procedures according to state/territory health and safety, environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor quality of work outcome	1.1 Identify quality requirements of work process

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Inspect inputs to confirm capability to meet quality requirements 1.3 Conduct work to produce required outcomes 1.4 Monitor work processes to confirm quality of output and/or service 1.5 Adjust processes to maintain outputs within specification
2. Participate in maintaining and improving quality at work	2.1 Monitor work area, materials, processes and product to ensure compliance with quality, health and safety requirements 2.2 Conduct work in accordance with workplace environmental guidelines 2.3 Identify and report non-conformance in inputs, process, product and/or service according to workplace reporting requirements 2.4 Take corrective action within level of responsibility to maintain quality standards 2.5 Raise quality issues with designated personnel 2.6 Record quality data in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret basic quality directions and instructions
Oral communication	<ul style="list-style-type: none"> Discuss and report quality information to relevant personnel
Numeracy	<ul style="list-style-type: none"> Read and interpret gauges and scales

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has applied quality systems and procedures on at least two separate occasions, including:

- identifying control points or inspection points for own work, and related methods used to monitor quality
- maintaining quality of own work, including relevant checks and inspections where required in order to monitor control points and check and inspect equipment, materials, product, packaging consumables, processing conditions and service standards relevant to own work
- determining when and how to make adjustments to maintain output within specified parameters
- identifying and responding to out-of-specification or unacceptable inputs and/or outputs
- recording quality data in required format.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- quality policy, procedures and responsibilities
- quality system used in the workplace, sources of information on quality requirements, the role of internal and external auditors, as appropriate, and performance improvement processes
- traceability requirements
- recall procedures for products that do not meet safety standards

- basic concepts of quality assurance, including hazards, risk assessment and control methods
- requirements of internal and external customers
- control points for own work, including the purpose of the control point, the risk if not controlled, and the method of control used
- monitoring, testing and inspection procedures relating to process control requirements
- scope to correct/control variation within equipment and process capacity parameters
- evidence of out-of-specification or unacceptable performance
- procedures for responding to out-of-specification or unacceptable performance/outcomes, including procedures for identifying or isolating materials or product of unacceptable quality
- systems used to trace product ingredients as relevant to own work
- requirements to report and record quality information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - sampling and test procedures and related equipment
 - systems for recording quality information
- specifications:
 - work instructions
 - quality policy, system and procedures, including company codes of practice/good manufacturing practices (GMP).

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPOPR2071 Provide and apply workplace information

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 1.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively provided and applied workplace information on at least one occasion, including:

- identifying and accessing information to undertake work responsibilities
- ascertaining or clarifying information requirements by asking questions
- preparing and presenting simple written or verbal presentations that structure and present information in a logical sequence
- working effectively with others to achieve work outcomes
- respecting and, where appropriate, representing the views of others
- recording information in required format.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- communication channels, including consultative arrangements established in the workplace
- common colloquial and technical terms relating to work function
- sources of information and advice relating to work responsibilities
- methods and technologies used to access, record and store workplace information, including print, and screen-based systems as relevant to the workplace
- presentation techniques to convey information on a range of typical workplace subjects appropriate to the audience
- recognition of different personal communication styles and appropriate communication options

- recognition of cultural diversity as appropriate in the workplace
- reporting roles and responsibilities
- traceability and recall information and requirements
- interpersonal skills, including active listening, questioning, seeking and responding to feedback
- basic meeting procedures to identify and achieve meeting/discussion outcomes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - advice on work roles and responsibilities
 - typical workplace information
 - standard forms and equipment for recording workplace information, as required.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2074 Carry out manual handling tasks

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to identify manual handling requirements of a work function, use manual handling aids to lift or move items, and identify and assess manual handling risks.

This unit applies to individuals who work under supervision in most situations and exercise limited autonomy.

All work must be carried out to comply with workplace procedures according to state/territory health and safety, environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Participate in processes to identify and assess manual handling	1.1 Identify the manual handling components of a work task 1.2 Identify manual handling risks to self and others within level of responsibility, and inform supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Contribute to manual handling risk minimisation	2.1 Determine approximate weight of item to be handled 2.2 Identify whether manual handling equipment is required and, if so, select appropriate equipment 2.3 Check that manual handling equipment is available and ready for use 2.4 Ensure that personal protective equipment (PPE), including clothing and footwear, is fit for use 2.5 Follow safe work procedures
3. Plan and conduct manual handling	3.1 Identify hazards involved with manual handling task 3.2 Use appropriate PPE and clothing, and ensure correct fit 3.3 Modify workplace layout and environment within area of control to minimise manual handling risk 3.4 Modify work tasks within area of control to minimise the risk of injury 3.5 Use manual handling aids according to workplace procedures 3.6 Use movement and postures to minimise the risk of injury within the limits of the work environment and the demands of the task

Assessment Requirements for FBPOPR2074 Carry out manual handling tasks

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively carried out a minimum of three different manual handling tasks, including:

- identifying the risks (to self and others) associated with each manual handling task
- eliminating risks, including through movement, posture and effectively using equipment provided
- modifying work to eliminate or minimise risk
- applying safe work procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- different types of manual handling activities, including lifting, reaching, pushing, pulling, holding, restraining, throwing and carrying
- types of injuries that can result from manual handling
- aspects of manual handling that may be risks (hazard identification), including:
 - repetitive or sustained application of force
 - repetitive or sustained awkward posture
 - repetitive or sustained movement
 - application of high force
- manual handling of unstable or unbalanced loads, such as liquids or animals
- workplace procedures and responsibilities for identifying and reporting manual handling hazards
- factors to be considered when assessing manual handling risks relevant to work role (referring to workplace risk assessment sheets and code of practice advice where available), including:

- postures
- movements
- force required
- duration and frequency of manual handling activity
- environmental conditions, such as hot and cold work environments
- procedures and responsibilities for conducting risk assessments of manual handling tasks
- typical options for eliminating or controlling manual handling risks associated with work functions, including principles of hierarchy of control and the advantages and disadvantages of different options
- types of equipment and/or techniques used to eliminate or reduce manual handling risks in the workplace, including when and how to use each type of technique/equipment relevant to manual handling tasks in work role
- level of authority to address health and safety issues related to manual handling and related workplace arrangements for managing safety issues
- sources of advice on manual handling relevant to work function
- equipment available to assist manual handling, related inspections required to identify faulty equipment, and related reporting procedures
- personal protective equipment (PPE) checks, including checking:
 - correct fit
 - appropriate for task
 - undamaged
- movement and postures that increase the risk of injury, and movements and postures to minimise the force in the body as applied to specific tasks in the workplace.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - personal protective clothing and equipment
 - work procedures, including advice on manual handling requirements and safe work practices
 - manual handling equipment

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2094 Clean equipment in place

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to prepare process equipment for cleaning in place (CIP) or in-line. It applies to food processing equipment that is fixed in place and cannot be moved to a cleaning station. It requires the operator to initiate, monitor and control variables during cleaning.

This unit applies to individuals who work in food processing facilities performing a defined range of activities, most of which are routine and predictable.

All work must be carried out to comply with workplace procedures according to state/territory health and safety, environmental and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for cleaning	1.1 Receive instructions from supervisor and clarify where required 1.2 Identify health and safety hazards in the workplace and inform

Elements	Performance Criteria

Assessment Requirements for FBPOPR2094 Clean equipment in place

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively cleaned food processing equipment that is fixed in place, on a minimum of two occasions, including:

- applying safe work practices and identifying health and safety hazards and controls in the workplace
- applying food safety procedures.
- shutting down equipment and preparing for cleaning
- preparing and using chemicals according to safe work requirements
- cleaning equipment to meet work standards
- monitoring cleaning and reporting or addressing any non-compliances
- flushing equipment and disposing of waste according to environmental guidelines
- completing required documentation

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of cleaning in place (CIP) and cleaning out of place (COP), including the use and functions of caustic and acid solutions, and cleaning sequence and stages as required in the workplace
- difference between cleaning and sanitising, why each are done and when
- cleaning and sanitising requirements, including different levels of cleaning requirements
- purpose and use of cleaning equipment and chemicals used
- cleaning schedules/cleaning matrices for equipment being cleaned
- terminology relating to the chemical solutions used
- safe work procedures, including appropriate signage of cleaning activities, and safe handling and storage of cleaners and sanitisers used

- health and safety workplace procedures, including purpose and limitations of personal protective equipment
- common microbiological, physical, chemical and allergen hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
- characteristics of cleaning and sanitising chemicals used, including basic composition as well as compatibility of chemicals with types of equipment
- methods used to render equipment safe to clean, including the status and purpose of equipment guards, relevant lock-out/tag-out and isolation procedures
- equipment settings required for cleaning and operating
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- inspection points for cleaning and sanitising
- methods to verify that cleaning has been effective, including adenosine triphosphate (ATP) or protein swabbing
- consequences of contamination of process flows by cleaning solutions, and related safeguards
- types of waste generated by both the production and the cleaning process and related collection, treatment and disposal requirements
- environmental consequences of incorrect cleaning waste disposal procedures
- requirements to liaise with/advise related work areas
- reporting and recording systems.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a food or beverage processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment
 - equipment to be cleaned, and related CIP system
 - chemicals and/or automated chemical addition system
- specifications:
 - workplace standard operating procedures and task-related documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR2095 Clean and sanitise equipment

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to clean, sanitise and carry out related procedures for food processing production equipment.

This unit applies to individuals who are primarily responsible for cleaning or where a more detailed knowledge of cleaning and sanitisation processes is required in order to carry out cleaning responsibilities. This unit applies to both wet and dry cleaning methods.

All work must be carried out to comply with workplace procedures according to state/territory health and safety, environmental and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for cleaning	1.1 Receive instructions from supervisor and clarify where required 1.2 Identify health and safety hazards in the workplace and inform supervisor

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Wear appropriate personal protective equipment (PPE) and ensure correct fit 1.4 Confirm that cleaning and sanitising agents and services are available and ready for use 1.5 Prepare chemicals and products in line with safety guidelines 1.6 Clear equipment of product and packaging consumables in preparation for cleaning 1.7 Render equipment safe to clean 1.8 Liaise with other work areas about timing of cleaning
2. Clean and sanitise equipment to meet workplace requirements	2.1 Clean and sanitise equipment according to safe work procedures 2.2 Inspect equipment to confirm operating condition and cleanliness 2.3 Verify that cleaning has been effective 2.4 Identify, rectify and report unacceptable equipment condition 2.5 Store cleaning equipment and chemicals 2.6 Dispose of waste from cleaning process in line with environmental guidelines 2.7 Restore equipment to operating order 2.8 Complete documentation according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for FBPOPR2095 Clean and sanitise equipment

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively cleaned and sanitised a minimum of two different items of equipment, including:

- applying safe work practices and identifying health and safety hazards and controls in the workplace
- applying food safety procedures.
- preparing equipment for cleaning
- preparing and using chemicals according to safe work requirements
- cleaning and sanitising equipment to meet work standards
- monitoring cleaning, and reporting or addressing any non-compliances
- disposing of waste according to environmental guidelines
- completing required documentation

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose of cleaning and sanitisation, and importance in maintaining food safety
- the difference between cleaning and sanitisation, when each is used and why
- the difference between wet and dry cleaning
- functions of cleaners, sanitisers and related equipment
- safe work procedures, including appropriate signage of cleaning activities, safe handling and storage of cleaners and sanitisers used, and safety when using cleaning methods
- health and safety requirements in the workplace, including purpose and limitations of personal protective equipment (PPE)
- cleaning and sanitisation requirements relating to work responsibilities, including the need for different levels of cleaning

- different products and PPE used for different equipment
- impact that cleaning and sanitising products have on food
- common microbiological, physical, chemical and allergen hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences, and control methods to prevent occurrence
- procedures for preparing cleaners and sanitisers as required
- cleaning methods to be followed relating to workplace procedures
- other work areas/operators who need to be consulted/advised on timing of cleaning
- methods used to render equipment safe to clean, including understanding the status and purpose of equipment guards, relevant lock-out/tag-out and isolation procedures and related equipment settings for both cleaning and operating as required
- procedures for cleaning and sanitising
- types of waste generated by the cleaning process, and related collection, treatment and disposal requirements
- potential environmental impact of incorrect waste handling
- inspection, cleaning and storage requirements of cleaning equipment used
- inspection points and methods for confirming the effectiveness of cleaning and sanitisation, including visual inspection and, where required, recording of cleaning conducted
- inspection requirements to confirm equipment condition, including acceptable equipment condition, ability to identify faulty or unacceptable equipment, and take required corrective action
- methods to verify that cleaning has been effective, including adenosine triphosphate (ATP) or protein swabbing
- recording requirements and responsibilities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - cleaning and sanitising equipment according to workplace requirements
 - cleaning equipment and chemicals
 - PPE
- specifications:
 - workplace standard operating procedures and task-related documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR3004 Set up a production or packaging line for operation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up a production or packaging line for operation.

This unit applies to individuals who work under broad direction and take responsibility for their own work.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for line setup	1.1 Confirm materials are available to meet production requirements 1.2 Confirm availability of tools, equipment and related accessories according to job requirements 1.3 Select and fit personal protective equipment according to job requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Identify processing parameters and settings for production or packaging according to workplace procedures
2. Set-up the line for operation	2.1 Identify and confirm cleaning and maintenance requirements 2.2 Inspect equipment according to workplace procedures 2.3 Enter processing or packaging parameters and select or adjust machine settings according to workplace procedures 2.4 Check and adjust equipment performance 2.5 Conduct pre-start checks, adjust equipment performance and confirm equipment is ready and safe to operate, notifying relevant personnel of completion 2.6 Complete line setup to match production or packaging schedule and operating requirements 2.7 Complete records according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace and standard operating procedures relevant to job role Interpret production requirements
Numeracy	<ul style="list-style-type: none"> Interpret production and process control indicators and data

Assessment Requirements for FBPOPR3004 Set up a production or packaging line for operation

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up a production or packaging line on at least one occasion, in line with production schedule, including:

- conducting pre-start checks on machinery used for production to determine cleaning, maintenance and operation readiness
- determining production parameters and requirements
- setting up line according to production requirements
- taking corrective action in response to typical faults and inconsistencies
- completing workplace records and communicate line status with other personnel as required
- applying safe work practices and identifying hazards and controls.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- operating principles of equipment and related accessories, including equipment adjustment points, range and location/alignment requirements of sensors and related feedback instruments, and status and purpose of guards
- operating capacities of equipment used in the work area, including different types of equipment and/or components by processing operations
- nature of set-up/changeover requirements, including product compatibility and related cleaning requirements, impact of variation in materials or product on set-up requirements, and equipment and/or attachment changeovers related to given products
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- pre-start checks required by set-up/changeover

- related processes and personnel dependent on line set-up, and communication responsibilities
- isolation, lock-out and tag out procedures and responsibilities
- health and safety hazards and controls in the workplace
- procedures and responsibility for reporting equipment performance information
- operating principles of process control, including the relationship between control panels and systems and the physical equipment.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - personal protective equipment
 - production/packaging schedule and related advice on setup/changeover requirements
 - process/packaging equipment and related accessories and services
 - materials/consumables required of the process
 - hand tools
- specifications:
 - information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR3010 Operate and monitor a filtration process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and shut down a filtration process to filter products such as juice, milk and edible oils. The unit includes the use of membrane and other filter systems.

This unit applies to individuals who work in a food processing environment. It typically applies to the production worker responsible for applying basic operating principles to the operation and monitoring of a filtration process and associated equipment.

All work must be carried out to comply with workplace procedures according to state/territory health and safety, environmental and food safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work in processing area	1.1 Confirm materials are available to meet product specification 1.2 Confirm cleaning and maintenance requirements and status

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	according to health, safety and food safety requirements 1.3 Wear appropriate personal protective clothing and ensure correct fit
2. Prepare the filtration equipment and process for operation	2.1 Fit machine components and related attachments, and adjust to meet operating requirements 2.2 Enter processing and operating parameters to meet safety and production requirements 2.3 Carry out pre-start checks according to safe work procedures
3. Operate and monitor equipment	3.1 Start, operate and monitor the process according to safe work procedures 3.2 Monitor the process to confirm that solids are separated from liquid, and specifications are met 3.3 Take samples and test to ensure product meets specifications 3.4 Identify, rectify and report out-of-specification equipment, product or process outcomes according to workplace requirements 3.5 Follow and apply workplace housekeeping and environmental requirements
4. Shut down the filtration process	4.1 Identify the appropriate shutdown procedure 4.2 Shut down the process according to safe work procedures 4.3 Identify and report maintenance requirements according to workplace procedures 4.4 Maintain workplace records according to workplace procedures

Foundation Skills

Assessment Requirements for FBPOPR3010 Operate and monitor a filtration process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated a filtration process to filter at least one batch of product to meet product specifications, including:

- applying safe work procedures
- following food safety procedures
- conducting pre-start checks, including:
 - inspecting equipment/filter condition to identify any signs of wear
 - selecting appropriate settings and/or related parameters
 - cancelling isolation or lock-outs
 - confirming that equipment, including pumps, valves and pipework, is clean and correctly configured for the filtration requirements
 - confirming sensors and controls are correctly positioned
 - confirming all safety guards are in place and operational
- starting, operating, monitoring and adjusting membrane processing equipment to achieve required outcomes, including monitoring control points and conducting inspections to confirm process remains within specification, including monitoring:
 - temperatures
 - flow rates
 - total solids
 - pressure/vacuum
- taking corrective action in response to typical faults and inconsistencies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of filtration or membrane processing, including:
 - particle size of component of product
 - methods used to achieve the outcome
- basic operating principles of filtration processing equipment, including:
 - main equipment components
 - status and purpose of guards
 - equipment operating capacities and applications
 - purpose and location of sensors and related feedback instrumentation
 - material composition of membranes and filters used in the workplace, and related operating, cleaning and storage requirements
- the flow of the filtration process, including the different processing streams and the effect of the filtration outputs on downstream processes
- good manufacturing practices (GMP) relevant to work task
- quality characteristics required of the filtration processing outputs
- the effect of variation in raw material characteristics on filtration performance
- operating requirements and parameters, and corrective action required where operation is outside specified operating parameters, including the effect of variation in processing parameters, including temperature, pressure, total solids and flow rates on filtration performance
- typical equipment faults and related causes, including signs and symptoms of faulty equipment, and early warning signs of potential problems
- techniques used to monitor filtration, including inspecting filters or membranes, measuring and testing by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/cross-contamination and food safety risks associated with the process, and related control measures
- common causes of variation, and corrective action required when operating a membrane process
- health and safety hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to filtration and workplace production requirements, including emergency and routine shutdowns, and procedures to follow in the event of a power outage and shutdown
- cleaning and sanitisation requirements required for filtration equipment and filters/membranes
- isolation, lock-out and tag-out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to filtration, including waste collection and handling procedures related to the process
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- recording requirements to ensure traceability of product.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a food processing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective clothing and equipment
 - filtration equipment and related services
 - product to be filtered
 - cleaning and sanitisation materials and equipment
- specifications:
 - work procedures, including advice on safe work practices, food safety, quality and environmental requirements
 - information on equipment capacity and operating parameters
 - production schedule and batch specifications, control points and processing parameters
 - recording requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR3019 Operate and monitor interrelated processes in a production or packaging system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to set up, operate, adjust and monitor interrelated processes in a production, processing or packaging system. A production or packaging system typically involves a series of interrelated processes that must be coordinated and concurrently operated to produce the required outcome.

This unit applies to workers who have responsibility for the operational requirements of the production, processing or packaging system for the industry in which it is applied. These individuals may have some responsibility for others, and address routine, predictable problems.

All work must be carried out to comply with workplace procedures according to state/territory health and safety, environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPOPR3019 Operate and monitor interrelated processes in a production or packaging system

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has operated interrelated processes in a production or packaging system, to process at least one batch of goods or packaged products to meet specification, including:

- applying safe work practices
- applying quality standards to work practices
- taking corrective action in response to typical faults and inconsistencies.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and basic principles of the production or packaging system, including the system process flow, the interrelationships of each process to identify the impact of variation on related processes, and optimisation options
- basic operating principles of equipment and related accessories used by the system, including equipment adjustment points, status and purpose of guards, and range and location/alignment requirements of sensors and related feedback instruments
- good manufacturing practices (GMP) relevant to work task
- contamination/cross-contamination associated with the process, and related control measures
- operating capacities of equipment used in the system, including different types of equipment and/or components, by processing/packaging operations
- related systems and responsibilities for interaction, including related production systems, services supply, packaging/warehousing, maintenance, laboratory/quality assurance and planning and scheduling

- product characteristics and common types of variation in materials and/or ingredients used, including the effect of variation on each stage of the system, and scope to adjust or correct
- typical production related problems, including equipment faults, common causes and warning signs, incorrect or poor supply of materials, incorrect settings and poor operator control
- relevant procedures, specifications and operating parameters for the system and the individual processes
- isolation, lock-out and tag-out procedures and responsibilities
- hazards, risks, controls and methods for monitoring processes within the system, including health and safety in the workplace, quality and environmental hazards and risks
- workplace system and approach to equipment maintenance
- troubleshooting procedures and problem-solving techniques
- communication responsibilities to inform related work areas/support functions and other shifts of operational status and production issues
- traceability procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a production or packaging workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment
 - production or packaging system equipment and related accessories and services
 - materials/consumables required by the process
- specifications:
 - production schedule and batch instructions
 - information on equipment capacity and operating parameters.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPOPR4001 Apply principles of statistical process control

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to collect statistical information and interpret data in order to inform work processes.

This unit applies to individuals who are required to collect, interpret and record data to inform work. This typically includes plotting data on run charts and statistical process control (SPC) charts; and identifying trends and variations according to given limits.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Operational (OPR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect statistical information	1.1 Identify data collection requirements and confirm with supervisor 1.2 Gather data using available collection equipment 1.3 Accurately record data to meet data collection requirements
2. Interpret data	2.1 Analyse data to identify variations and trends 2.2 Carry out calculations to determine unknown values

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.3 Determine corrective action requirements based on data 2.4 Document and store data according to workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Use statistical analysis techniques to calculate, compare and manipulate data
Writing	<ul style="list-style-type: none"> Record data and present information in required format
Get the work done	<ul style="list-style-type: none"> Make decisions based on analysis of available data Use manual and computer-based methods to interpret data and identify trends

Assessment Requirements for FBPOPR4001 Apply principles of statistical process control

Modification History

Release	Comments
Release 1	This version released with the FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit.

There must be evidence that the individual has applied the principles of statistical process control to at least two different sets of data, including:

- identifying data needed for collection
- gathering and accurately recording required data
- applying statistical analysis techniques and identifying variations, trends and any necessary corrective actions
- presenting a range of statistical data in appropriate workplace format.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- data sampling methods, including the nature of the sample on which data is based, and the reasons for different sampling requirements that may apply in a given situation
- concept of variation, including the difference between common and special causes of variation, and consequent options for reducing variation and remaining within a given range
- the purpose and process of establishing targets and limits
- the concept of standard distribution/standard deviation
- methods used to interpret statistical data, including methods to determine the average, median and mean, and what these measures indicate
- a variety of calculations to determine unknown values
- using binomial theorem
- using variability and probability to estimate and interpret outcomes in both numerical and qualitative terms

- situations in which corrective action is required.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - statistical process control data
 - related data collection and analysis systems
 - calculator.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM3003 Work in a controlled environment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare to enter, work and exit a controlled environment in a pharmaceutical manufacturing facility.

The unit applies to individuals who apply Good Manufacturing Practice (GMP) requirements and operating principles to working in a controlled environment. Individuals work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pharmaceutical (PHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to enter a controlled environment	1.1 Obtain workplace information, including workplace procedures related to working in a controlled environment 1.2 Remove jewellery and makeup according to workplace procedures 1.3 Wash hands according to workplace procedures 1.4 Source and fit personal protective equipment (PPE) and contamination prevention clothing prior to entering controlled

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	environment 1.5 Check controlled environment operating conditions prior to entry
2. Work in a controlled environment	2.1 Enter controlled environment according to workplace procedures 2.2 Take commodity items into the controlled environment according to workplace procedures 2.3 Conduct work activities to minimise risk of contamination
3. Maintain a controlled environment	3.1 Identify controlled environment contamination risks 3.2 Control environmental contamination according to GMP requirements and workplace procedures 3.3 Maintain controlled environment work area according to workplace cleaning standards and environmental requirements 3.4 Report practices inconsistent with GMP according to workplace procedures
4. Exit a controlled environment	4.1 Follow workplace procedures to exit a controlled environment 4.2 Remove PPE and contamination prevention clothing according to workplace procedures 4.3 De-gown according to workplace procedures 4.4 Check, store and dispose of PPE according to manufacturer specifications, environmental and work health and safety requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret signs, symbols, checklists, production schedules, cleaning schedules and other technical information relevant to working in controlled environments Access and interpret GMP information relevant to working in controlled environments

Skill	Description
Writing	<ul style="list-style-type: none"> Complete workplace documentation using appropriate language and in required format
Interact with others	<ul style="list-style-type: none"> Report GMP concerns to relevant personnel using required communication method
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements and GMP, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Controlled environment must include at least one of the following:	<ul style="list-style-type: none"> controlled, non-classified environment cleanrooms that are controlled environments that have been certified as meeting an internationally recognised standard.
Contamination prevention clothing must include at least one of the following:	<ul style="list-style-type: none"> facility suits for controlled, non-classified environment disposable and reusable garments for controlled, classified cleanroom environments.

Assessment Requirements for FBPPHM3003 Work in a controlled environment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked in at least one controlled environment, and demonstrated that they have:

- accessed workplace information to identify controlled environment work requirements
- read and interpreted workplace procedures, including pictorial and written signs/instructions applicable to working in a controlled environment
- checked operating conditions of the controlled environment according to workplace and Good Manufacturing Practice (GMP) requirements
- maintained good personal hygiene and cleanliness appropriate to working in a controlled environment, consistent with GMP requirements, including:
 - making team leader or supervisor aware of reportable illness
 - removal of jewellery
 - removal of makeup
 - following changing procedures
- cleaned and sanitised hands using recognised procedures for:
 - washing with soap and water
 - rubbing with an alcohol-based formulation
- used facility suits and personal protective equipment appropriate for the grade of controlled environment or cleanroom in a manner that does not generate additional contaminants
- entered and exited a controlled environment in a manner to minimise contamination
- identified and reported any condition that may cause shedding of abnormal numbers or types of contaminants
- identified contamination hazards typically encountered in pharmaceutical manufacturing environments and took steps to prevent identified hazards

- cleaned and maintained work area to meet workplace cleaning standards and environmental requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- international nomenclature and classification of controlled environments and cleanrooms
- GMP grades of cleanrooms and their relationship to the International Organization for Standardization (ISO) classification system
- GMP requirements for the qualification of cleanrooms
- key design requirements for controlled environments and cleanroom for product protection:
 - layout and architecture
 - product and process requirements for clean air
 - filtration, including High Efficiency Particulate Air (HEPA) filters and the theory of particle filtration
 - airlocks for materials, equipment and people
 - turbulent and laminar air flows
 - pressure differentials
 - box-within-a-box principle
 - cleanability and maintainability
- how controlled environments operate to control contamination, including:
 - clean rooms, including how they are certified
 - controlled, non-classified environments
 - clean zones
 - monitor and test systems
 - isolator technology
 - at rest and in operation
 - gowning and cleaning
- GMP requirements and workplace procedures for working in controlled environments and cleanrooms, including:
 - requirements for approving and taking commodity items into the cleanroom
 - restrictions on movement of personnel to minimise cross-contamination
 - cleanroom garments, including types, materials, processing and reprocessing
 - personal hygiene requirements
 - clothing and footwear requirements for working in and moving between work areas
 - personal clothing use, storage and disposal requirements
 - workplace cleaning standards and environmental requirements relating to own work
 - responsibilities of general cleaning staff and how to work with a cleaning team

- the role of cleaning and sanitising in preventing contamination of materials and products and protection of personnel, including:
 - how improper cleaning of a controlled environment or cleanroom can lead to product contamination
 - the need for proper selection of equipment and materials for proper cleaning
- controlled environment operating conditions, including:
 - differentials pressures
 - particle counts
 - microbial sampling
 - laminar air flow
 - humidity
 - temperature
 - room status
 - cleanliness status
- hygiene and basic elements of microbiology
- sources of contamination, including:
 - product
 - people
 - tools
 - facilities
 - equipment
- risks associated with controlled environment and cleanroom operators:
 - physical behaviour, including how to walk and stand in a cleanroom
 - personal hygiene
 - psychological
 - workplace attitudes and habits
 - communications between workers
 - electrostatic discharge
- contamination risks associated with controlled environment and clean room operations, including:
 - number of personnel in the controlled environment
 - activities being undertaken
 - leaks
 - malfunctioning equipment
 - low differential pressures
 - high particle counts
 - incorrect air flow and velocity
 - humidity
 - temperature
 - room status inactive or in alarm

- lack of cleanliness
- common practices inconsistent with GMP found in controlled environment and clean room operations, including:
 - damage to plant or equipment
 - failure of cleaning regime
 - signs of pest infestation
 - missing or inaccurate records
 - failure to follow workplace procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a pharmaceutical manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment and contamination prevention clothing
 - cleaning materials and equipment associated with working in a controlled environment
- specifications:
 - workplace procedures related to working in a controlled environment including gowning/de-gowning procedures that comply with GMP requirements
 - workplace cleaning standards and environmental requirements related to working in a controlled environment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM3004 Clean and sanitise facilities and equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to plan, prepare, clean and sanitise processing facilities and equipment in a pharmaceutical manufacturing facility.

The unit applies to individuals who apply Good Manufacturing Practice (GMP) requirements and operating principles to the cleaning and sanitising of facilities and equipment. Individuals work under broad direction and take responsibility for their own work.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pharmaceutical (PHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare to clean pharmaceutical processing areas and equipment	1.1 Obtain cleaning task requirements, including job specifications and workplace procedures for sampling and testing cleaning outcomes 1.2 Identify surfaces and soil and dirt types and select appropriate cleaning techniques 1.3 Select and prepare cleaning chemicals required for job 1.4 Select and check cleaning equipment and consumables for

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>serviceability and compliance with cleaning and sanitation requirements of GMP cleaning program</p> <p>1.5 Rectify or report faults before starting work</p> <p>1.6 Confirm services are available and ready for operation</p> <p>1.7 Source and fit personal protective equipment (PPE) according to procedures for health and safety in the workplace</p> <p>1.8 Obtain cleaning consumables to meet anticipated usage patterns</p> <p>1.9 Select and install signs and barricades according workplace procedures</p> <p>1.10 Set the plant for automated cleaning cycle or initiate a manual clean</p>
2. Remove waste	<p>2.1 Collect and dispose of waste according to procedures and legislative requirements for the environment and health and safety in the workplace</p> <p>2.2 Clean and sanitise rubbish bins and insert new replacement bin liners according to workplace procedures</p>
3. Clean and sanitise pharmaceutical processing surfaces	<p>3.1 Change status label of area and equipment and check status prior to cleaning</p> <p>3.2 Remove loose dirt and debris from pharmaceutical processing surfaces prior to applying cleaning treatment</p> <p>3.3 Follow cleaning steps according to workplace procedures</p> <p>3.4 Apply cleaning chemicals to pharmaceutical surfaces according to manufacturers' specifications and workplace procedures</p> <p>3.5 Thoroughly rinse and dry surfaces according to workplace procedures</p> <p>3.6 Apply chemical disinfectants and sanitisers to surfaces according to workplace procedures</p> <p>3.7 Report practices inconsistent with GMP according to workplace procedures</p>
4. Clean and sanitise pharmaceutical processing equipment	<p>4.1 Clean and sanitise processing equipment according to GMP requirements and workplace procedures</p> <p>4.2 Monitor the cleaning process and identify and report deviations from job specifications according to workplace procedures</p> <p>4.3 Inspect and confirm equipment cleanliness status against</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>acceptance criteria and take appropriate action to rectify non-conformances</p> <p>4.4 Confirm relevant sampling or testing methods including sampling or testing points, types of samples and measurements requirements</p> <p>4.5 Take, collect, store and transport samples according to sampling plan, relevant methods and standards</p> <p>4.6 Return equipment to operating order</p> <p>4.7 Record and certify data and information about equipment cleaning and sanitising, including cleaning status, sampling and testing according to workplace procedures and GMP requirements</p>
5. Return plant to operating condition	<p>5.1 Remove signs and barricades according to workplace procedures and work health and safety</p> <p>5.2 Clean, check and store cleaning equipment and PPE according to manufacturers' specifications, environmental and workplace health and safety requirements</p> <p>5.3 Store and dispose of unused chemicals according to manufacturers' specifications, and workplace health and safety requirements</p> <p>5.4 Order and replenish cleaning consumables</p> <p>5.5 Document tasks completed according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and follow signs, symbols, checklists, production schedules, cleaning schedules and other technical information relevant to cleaning and sanitising facilities and equipment Identify and follow workplace information, specifications and safety data sheets (SDS) Identify and interpret GMP information relevant to cleaning and sanitising facilities and equipment
Writing	<ul style="list-style-type: none"> Complete checklists, standard forms and reports relating to

Skill	Description
	practices inconsistent with GMP
Oral communication	<ul style="list-style-type: none"> Use clear language to report contamination risks and practices inconsistent with GMP Participate in verbal exchanges to respond to questions and clarify information
Numeracy	<ul style="list-style-type: none"> Interpret measurements and numerical symbols in SDSs Record data and information using mathematical symbols and conventions
Navigate the world of work	<ul style="list-style-type: none"> Recognise and follow workplace requirements, including safety requirements and GMP, associated with own role and area of responsibility

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

PPE must include:	<ul style="list-style-type: none"> one of the following: <ul style="list-style-type: none"> protective gown scrubs smock statcoat cleanroom coverall disposable coverall plus all of the following: <ul style="list-style-type: none"> disposable overshoes or cleanroom boots hair net goggles or safety glasses.
Waste must include:	<ul style="list-style-type: none"> cleaning material or product waste hazardous waste general processing and laboratory waste.
Monitoring of the cleaning process must include:	<ul style="list-style-type: none"> chemical strength cycle time(s) temperature contact time rinse water quality.
Sampling or testing	<ul style="list-style-type: none"> visual inspection

methods must include:	<ul style="list-style-type: none"> • pH tests of final rinse water • swabbing of equipment surfaces for presence of contamination.

Assessment Requirements for FBPPHM3004 Clean and sanitise facilities and equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, the individual has cleaned and sanitised facility surfaces and equipment of at least one manufacturing environment, including:

- accessed cleaning schedules or other workplace information to identify cleaning requirements
- interpreted workplace procedures applicable to cleaning operations, including pictorial and written signs/instructions
- identified soil types present in the following work surfaces, and selected cleaning equipment and agents required to clean the surfaces:
 - floors
 - walls
 - ceilings
 - benches
 - outer surfaces of equipment
 - door handles and door frames
 - light switches
 - vents
 - grills
 - pass-through cabinets
- identified hazards and controlled risks, including contamination hazards encountered in pharmaceutical manufacturing environments
- confirmed supply of necessary cleaning and sanitising equipment and services
- replenished different types of consumables used in cleaning processes
- selected and prepared cleaners and sanitisers according to workplace procedures
- selected, fitted and used personal protective equipment (PPE) required for tasks

- prepared equipment for cleaning according to manufacturers' instructions, including:
 - rendered equipment safe to clean
 - cleared product and waste materials
 - covered motors and instrumentation where steam or water hoses are used
 - dismantled and reassembled equipment parts for cleaning according to operation and maintenance manual
- applied correct cleaning and sanitising procedures to equipment and surfaces
- taken samples and conducted tests according to workplace procedures
- inspected equipment to identify equipment condition and cleanliness
- stored cleaners, sanitisers and related equipment according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- responsibilities of cleaning staff and procedures for cleaning teams
- common types of microbiological, physical and chemical contaminants in pharmaceutical processing facilities
- Good Manufacturing Practice (GMP) requirements and role of cleaning and sanitising in preventing contamination of materials and products, and in the protection of personnel and external contractors
- risks associated with cleaning and sanitising operations and cross contamination prevention
- personal hygiene, clothing and footwear requirements,
- clothing storage and disposal for working in and moving between work areas
- terminology relating to chemical cleaning and decontamination, including:
 - cleaners
 - disinfectants
 - sanitisers
 - sterilants
 - fogging
 - fumigation
- services used in a pharmaceutical manufacturing process, including:
 - potable and purified water
 - steam
 - compressed and instrumentation air
- types of cleaning equipment suitable for use in a pharmaceutical processing environment, including their use and storage,
- different cleaning methods:
 - clean-in-place (CIP)
 - clean-out-of place (COP)
 - manual cleaning

- purpose and basic principles of CIP, including the use and functions of caustic and acid solutions, and cleaning sequence and stages
- advantages and disadvantage of automated and semi-automated CIP systems
- types of cleaning equipment include:
 - CIP spray balls
 - bottle brushes
 - disinfecting solutions
 - non-shedding wipes
- hygienic vs unhygienic design features of facilities and equipment, including inserts and dead legs
- the differences between:
 - cleaning
 - disinfecting
 - sanitising
 - sterilising
- properties and functions of different cleaning and sanitising agents for pharmaceutical industry
- different levels of cleaning requirements depending on the reason for cleaning, and whether equipment is dedicated or shared
- the influence of the time between manufacture and cleaning (dirty hold time), and the time between cleaning and use (clean hold time) on a cleaning process
- acceptance criteria used to evaluate cleaning quality, including:
 - how cleaning is measured
 - commonly used sampling and testing
- considerations when choosing and using cleaning chemicals including:
 - the correct selection of chemicals for the surface being cleaned
 - the chemical and physical properties of the soils or residues to be removed
 - the interactions between cleaning chemicals and the surfaces they may adhere to
 - the solubility of the soil/residue in the cleaning solution
 - the need to rotate sanitisers
 - the frequency of cleaning and sanitising
- manual, semi-automated and fully automated cleaning methods
- the variable factors that influence cleaning effectiveness and performance
- critical parameters in a cleaning and sanitising process including:
 - time
 - temperature
 - concentration
 - GMP requirements for the validation of cleaning processes
- waste related to pharmaceutical manufacturing processes, including:
 - cleaning material
 - product waste

- hazardous waste
- general processing and laboratory waste
- waste collection, recycling and handling procedures relevant to own work responsibilities
- procedures for responding to out-of-limits or unacceptable performance or outcomes
- common practices inconsistent with GMP found in cleaning and sanitising operations, including:
 - damage to plant or equipment
 - failure of cleaning regime
 - signs of pest infestation
 - missing or inaccurate records
 - failure to follow workplace procedures
- purpose of keeping records and the recording requirements of GMP, including the legal significance of certifying and verifying GMP records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a commercial pharmaceutical or complementary medicine manufacturing workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment
 - equipment and surfaces to be cleaned
 - chemicals and/or automated chemical addition system services and their related safety data sheets
 - data collection forms and information recording systems
- specifications:
 - cleaning procedures and related advice on equipment operation that comply with GMP requirements
 - workplace health and safety procedures related to cleaning and sanitising pharmaceutical manufacturing equipment
 - cleaning schedule
 - data collection and information recording requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM3020 Apply Good Manufacturing Practice requirements

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to comply with relevant Good Manufacturing Practice (GMP) requirements and workplace quality standards in a pharmaceutical manufacturing facility.

The unit applies to individuals who apply GMP requirements to undertake pharmaceutical manufacture work. Individuals work under broad direction and take responsibility for their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pharmaceutical (PHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify requirements of GMP related to own work	<p>1.1 Locate sources of information on GMP requirements and regulatory obligations of employees relevant to work role from current Australian and other applicable regulatory frameworks for manufacturing pharmaceuticals</p> <p>1.2 Identify GMP requirements for pharmaceutical manufacture tasks</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Confirm specific GMP requirements for own work</p> <p>1.4 Identify GMP non-compliant situations and risks to product quality</p> <p>1.5 Alert relevant personnel and take appropriate action according to GMP requirements and workplace procedures</p>
2. Complete workplace documentation to support GMP	<p>2.1 Use workplace procedures to identify GMP requirements for documentation</p> <p>2.2 Record required information, calculations and test results according to workplace reporting procedures and GMP requirements</p> <p>2.3 Certify records according to GMP requirements</p>
3. Identify and follow biosecurity requirements	<p>3.1 Identify information appropriate to work role relating to biosecurity requirements</p> <p>3.2 Follow workplace biosecurity requirements and responsibilities related to work role</p>
4. Apply GMP requirements when carrying out work activities	<p>4.1 Identify common forms of contamination relevant to own work activities</p> <p>4.2 Conduct work according to workplace environmental procedures</p> <p>4.3 Maintain workplace cleanliness and tidiness to meet GMP requirements</p> <p>4.4 Identify and report signs of unacceptable plant, equipment condition or calibration status</p> <p>4.5 Identify GMP requirements for routinely monitoring work area, materials, equipment and product</p> <p>4.6 Complete documentation according to workplace procedures</p>
5. Apply hygiene and entry and exit procedures to meet GMP requirements	<p>5.1 Maintain personal hygiene to meet GMP requirements</p> <p>5.2 Carry out hand washing according to best practice hygiene standards</p> <p>5.3 Prepare, use, store and dispose of personal protective equipment and contamination prevention clothing according to GMP requirements and workplace procedures</p> <p>5.4 Comply with area entry and exit procedures when moving around the workplace</p>
6. Participate in	6.1 Identify processes, practices or conditions which are inconsistent

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
improving GMP	with GMP requirements and report according to workplace procedures 6.2 Identify elements of GMP that help improve products and processes 6.3 Implement corrective action within level of responsibility

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information about GMP compliance requirements in workplace documentation
Writing	<ul style="list-style-type: none"> Record workplace information using appropriate language and in required format

Assessment Requirements for FBPPHM3020 Apply Good Manufacturing Practice requirements

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has applied Good Manufacturing Practice (GMP) requirements, and demonstrated each of the following points **on one or more occasions**:

- read and interpreted relevant instructions and labels applicable to GMP operations, including pictorial and written signs and instructions
- followed workplace information relating to GMP responsibilities
- completed forms and reports according to GMP requirements and workplace procedures
- recorded calculations and test results
- identified and responded to:
 - out-of-calibration equipment
 - out-of-specification or unacceptable raw materials, packaging components, final or part processed product
- maintained workplace cleanliness and tidiness to meet GMP requirements
- maintained personal hygiene consistent with GMP requirements, including:
 - making team leader or supervisor aware of reportable illness
 - removal of jewellery
 - removal of makeup
- cleaned and sanitised hands using recognised procedures for:
 - washing with soap and water
 - rubbing with an alcohol-based formulation
- used personal protective clothing and equipment and contamination prevention clothing according to GMP requirements
- provided accurate verbal and written descriptions of incidents or situations that did or could have:
 - compromised GMP compliance or product quality
 - provided the potential for product contamination.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- GMP as a regulatory concept, including regulatory obligations of employees, and the potential implications of non-compliance
- applicable sections of Australian and other applicable regulatory frameworks relevant to pharmaceutical manufacturing:
 - Therapeutic Goods Act (TGA)
 - Manufacturing Principles
 - Guide to GMP
- the relationship between GMP and the quality system, including:
 - personnel responsible for designing and managing GMP
 - personal role to maintain GMP
 - the role of internal and external auditors
 - quality procedures
 - quality assurance
 - quality control
 - risk management procedures
- personal clothing use, storage and disposal requirements and hygiene requirements, including:
 - informing team leader or supervisor of reportable illness
 - removal of jewellery
 - removal of makeup
- personal clothing and footwear requirements for working in and moving between work areas
- workplace cleaning standards and responsibilities relating to own work, including:
 - waste collection
 - recycling, safe handling and disposal for different types of waste
 - safe handling and disposal of hazardous waste
- awareness of common contaminants relevant to the work process, including:
 - microbiological, from materials, equipment, environment and personnel
 - physical, from equipment, environment and personnel
 - chemical, from other products or materials, including cleaning agents
- quality control methods and procedures, including the purpose of control and the consequence if not controlled
- properties, handling and storage requirements of raw materials, packaging components and final product
- GMP requirements for maintaining plant and process equipment
- GMP requirements for transferring of equipment and material between areas
- GMP requirements for equipment status labelling
- documentation systems and procedures, including:

- recordkeeping to meet both workplace and legal requirements
- responsibilities for reporting and recording information
- batch documentation
- cleaning records
- training records
- product and materials traceability procedures
- controls and methods for ensuring electronic data integrity and paper data integrity
- significance of certifying and verifying GMP records
- procedures for responding to out-of-specification or unacceptable process performance or outcomes
- awareness of controls to protect personnel and the environment from contamination by products and materials.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a pharmaceutical manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment and contamination prevention clothing
 - alcohol based hand cleanser
 - soap and water
 - pharmaceutical production and packaging equipment
- specifications:
 - GMP requirements
 - workplace reporting procedures
 - workplace procedures related to GMP
 - workplace biosecurity requirements
 - workplace environmental procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPPHM4001 Monitor and maintain Good Manufacturing Practice requirements

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 7.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has monitored and maintained Good Manufacturing Practice (GMP) requirements of one or more work teams, including:

- communicated information on GMP requirements to others in the work area, including demonstrating:
 - two-way communication
 - active listening
 - constructive responses to feedback
- accessed and used document management systems
- demonstrated personal hygiene according to GMP requirements and workplace procedures
- monitored recorded data to meet GMP recording requirements according to workplace procedures
- documented GMP requirements for a specific work area
- provided training and support to others in the work area to implement responsibilities according to GMP requirements and to workplace procedures
- determined actions required to respond to GMP non-compliance according to workplace procedures
- participated in improvement processes, including investigating actual and potential GMP non-compliance
- participated in, or reviewed, practices and procedures to prevent or minimise the likelihood of unacceptable performance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the role of GMP in preventing contamination, including:
 - its relationship to legal requirements of pharmaceutical manufacturers
 - potential implications of non-compliance
- GMP requirements, including:
 - relevant GMP codes of practice
 - related workplace procedures
 - organisational structures for implementing these requirements
 - quality assurance
- principles and process of effective communication and consultation
- workplace training and coaching system and responsibilities
- personal clothing use, storage and disposal requirements and hygiene requirements, including:
 - making team leader or supervisor aware of reportable illness
 - removal of jewellery
 - removal of makeup
- personal clothing and footwear requirements for working in and moving between work areas
- current technical and process knowledge required to monitor and maintain GMP and participate in investigating GMP non-compliance including:
 - common microbiological, physical and chemical contaminants
 - conditions under which types of contamination, including cross-contamination are likely to occur
 - purpose of equipment calibration
 - control methods and procedures, including the purpose of control and the consequences if not controlled
- recall and traceability procedures relevant to the work area, including:
 - reconciliation
 - line clearance
 - stored versus dedicated
- procedures followed to investigate contamination events and performance improvement processes, including:
 - root cause analysis (RCA)
 - corrective action or preventive action (CAPA)
- documentation systems and procedures, including:
 - record keeping to meet both company and legal requirements
 - responding to out-of-specification, or unacceptable, performance and outcomes
 - procedures for identifying and isolating, or quarantining, materials or products of unacceptable quality

- processes for developing or reviewing workplace procedures
- document control systems used in the workplace
- responsibilities for reporting and recording information
- workplace cleaning standards and responsibilities relating to own work, including:
 - waste collection
 - recycling, safe handling and disposal for different types of waste
 - safe handling and disposal of hazardous waste.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a pharmaceutical manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment and contamination prevention clothing
 - document management system
- specifications:
 - GMP requirements
 - workplace cleaning standards
 - workplace reporting procedures
 - workplace procedures related to GMP
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPPHM4002 Prepare and review workplace documentation to support Good Manufacturing Practice requirements

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has reviewed and developed workplace documentation to support the Good Manufacturing Practice (GMP) requirement of at least one workplace, including:

- identified workplace documentation requiring development or review using workplace documentation management process
- reviewed and developed workplace documentation, suitable for purpose and audience, including:
 - ensuring compliance with workplace procedures and GMP requirements
 - reporting improvements
 - reviewing and updating existing documentation
 - developing new documentation
 - applying documentation control procedures when submitting or amending documents
- accessed and used document management systems
- consulted with relevant stakeholders in the preparation and review process and ensured changes are effectively communicated
- communicated information on documentation requirements to others in the work area, including demonstrating:
 - two-way communication
 - active listening
 - constructive responses to feedback.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace procedures and GMP requirements
- types of documentation requiring development or review, including:
 - procedures
 - instructions
 - records
- situations requiring documentation development or review, including:
 - general review
 - process change
 - inspection findings
 - deviations
- procedures and responsibilities for developing and altering documents, including:
 - version control
 - good documentation design and the use of templates
 - an understanding of system security and access levels
 - controls systems, including individual roles and responsibilities
 - document authorisation requirements and responsibilities of signatories
 - systems for recording and storing data and authorised levels of access to electronic systems
- use of documentation, including documents that can be used as evidence during audit processes
- requirements for completion of workplace documentation.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a pharmaceutical manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - document management system
- specifications:
 - information about GMP requirements
 - workplace procedures related to GMP.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM4003 Facilitate contamination control

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 5.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to identify and implement contamination control measures in a pharmaceutical manufacturing facility.

The unit applies to individuals with specialised skills and knowledge of Good Manufacturing Practice (GMP) requirements who are responsible for overseeing the implementation of contamination control programs within pharmaceutical manufacturing operations and have responsibility for the output of others. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Pharmaceutical (PHM)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review contamination risks and related control measures to meet GMP	1.1 Identify hazards that could present contamination risks by type, origin and product association

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	1.2 Review hazards and risk control measures to confirm they meet GMP requirements 1.3 Conduct risk assessment according to GMP requirements and workplace procedures 1.4 Confirm control measures
2. Implement procedures used to control risk of cross contamination	2.1 Identify effective barriers and control systems to minimise risk of contamination according to GMP requirements and workplace procedures 2.2 Conduct in-process and environmental monitoring according to GMP requirements and workplace procedures 2.3 Validate cleaning processes according to workplace procedures 2.4 Confirm line clearance procedures 2.5 Ensure personal hygiene and conduct of personnel in work area meets GMP requirements 2.6 Ensure operators have the skills and knowledge required to apply contamination control measures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret key information from in-process and environmental monitoring test results Interpret key information about GMP requirements in workplace procedures relevant to facilitating contamination control
Writing	<ul style="list-style-type: none"> Record contamination information in document management systems
Oral communication	<ul style="list-style-type: none"> Use appropriate language and communication skills to ensure that contamination management procedures are understood and implemented
Numeracy	<ul style="list-style-type: none"> Monitor data to determine instances of contamination according to GMP requirements

Assessment Requirements for FBPPHM4003 Facilitate contamination control

Modification History

Release	Comments
Release 2	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 5.0.
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has facilitated contamination control in at least one process, including:

- identified and investigated occurrences that could present contamination hazards and risks by:
 - type
 - origin
 - product association
- confirmed contamination control measures, including:
 - critical limits
 - monitoring and recording requirements
- interpreted Good Manufacturing Practice (GMP) requirements and workplace procedures related to contamination control
- used document management systems to:
 - access and review documents including the Contamination Control Strategy
 - monitor and record data according to GMP requirements
 - ensure procedures are understood and implemented
- reviewed workplace documents to determine contamination control measures, including:
 - equipment drawings
 - piping and instrumentation diagrams
 - process flow charting
- monitored gowning, cleaning, access and refresher training according to workplace procedures

- provided training and support to others in work area to implement contamination control according to GMP requirements and workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of contamination, including:
 - microbiological
 - chemical
 - physical
 - product cross-contamination
- microbiological limits as per GMP Guide, monitoring methods and reporting and recording formats and requirements
- non-viable particle limits as per GMP Guide, monitoring methods and reporting and recording formats and requirements
- line clearance procedures, roles and responsibilities
- personal hygiene and clothing requirements, including:
 - informing team leader or supervisor of reportable illness
 - removal of jewellery
 - removal of makeup
 - personal clothing use, storage and disposal
 - personal clothing and footwear requirements for working in and moving between work areas
 - decontamination
 - laundering requirements
- GMP requirements and workplace procedures relevant to contamination control
- environmental issues and workplace controls relevant to contamination control, including:
 - the principles of workflow design to minimise risk of contamination
 - ventilation system requirements
 - production facility segregation requirements
 - storage requirements of raw materials prior to their use in manufacture
 - time limits and conditions for storing finished products prior to packaging
 - requirements relevant to product range
- workplace cleaning standards and responsibilities, including:
 - types of cleaning agents and what they do
 - waste collection
 - recycling, safe handling and disposal of different types of waste
 - safe handling and disposal of hazardous waste
- requirements for completion of workplace documentation
- active air samplers and particle counters used in environmental monitoring cleanrooms.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a pharmaceutical manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - document management system
 - equipment drawings, piping and instrumentation diagrams and process flow charts
- specifications:
 - recording requirements and procedures
 - workplace procedures related to contamination control
 - GMP requirements related to contamination control
 - workplace cleaning procedures
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM4005 Participate in validation of pharmaceutical manufacturing processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to use qualification and validation processes to meet Good Manufacturing Practice (GMP) requirements in a pharmaceutical manufacturing facility.

The unit applies to individuals with specialised skills and knowledge of GMP requirements who participate in validation process relevant to pharmaceutical manufacturing operations as part of a multi-disciplinary team and have responsibility for the output of others. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPPHM4005 Participate in validation of pharmaceutical manufacturing processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all the elements and performance criteria of this unit.

There must be evidence that the individual has participated in the validation processes of at least one workplace, including:

- identified procedures for developing and implementing qualification processes for a:
 - design qualification
 - installation qualification
 - operational qualification, and
 - performance qualification
- applied principles of risk management to identify critical facilities, systems and equipment
- communicated information on qualification process requirements to others in the work area, including demonstrating:
 - two-way communication
 - active listening
 - constructive responses to feedback
- implemented training to support others in the work area to implement responsibilities according to qualification process requirements
- interpreted Good Manufacturing Practice (GMP) requirements and workplace procedures related to qualification and validation requirements
- managed the impact of qualification and validation procedures on:
 - related processes
 - work areas
 - personnel
- developed workplace procedures to support qualification and validation according to GMP requirements and workplace procedures
- documented qualification and validation processes according to GMP requirements and workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the procedures for developing and implementing qualification processes
- types of qualification processes, including:
 - design
 - installation
 - operational
 - performance
- validation objectives and procedures, including:
 - prospective validation
 - concurrent validation
 - re-validation
 - circumstances that justify not undertaking a validation process prior to commencing production
 - procedure updates and sampling requirements
- workplace training systems and responsibilities
- GMP requirements and workplace procedures relevant to qualification and validation processes
- documentation systems and procedures, including:
 - record keeping to meet both company and legal requirements
 - processes for developing or reviewing workplace procedures
 - document control systems used in the workplace
 - responsibilities for reporting and recording information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a pharmaceutical manufacturing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - qualification and validation process documentation
- specifications:
 - workplace procedures relating to validation
 - GMP requirements related to validation
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPHM4006 Respond to non-conformance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to identify and respond to non-conformance and review processes to minimise risk of recurrence to meet Good Manufacturing Practice (GMP) requirements in a pharmaceutical manufacturing facility.

The unit applies to individuals with specialised skills and knowledge of GMP requirements who respond to non-conformance relevant to pharmaceutical manufacturing operations and have responsibility for the output of others. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FBPPHM4006 Respond to non-conformance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all the elements and performance criteria of this unit.

There must be evidence that the individual has responded to at least one non-conformance, including:

- identified workplace procedures and documentation relating to non-conformance
- interpreted Good Manufacturing Practice (GMP) requirements and workplace procedures related to non-conformance
- identified workplace non-conformance change management procedures and responsibilities, including:
 - corrective and preventive actions (CAPA)
 - investigating possible causes of non-conformance
 - root cause analysis (RCA)
 - risk assessment
 - repeat incident
 - isolated incident
 - impact assessment
 - recording requirements
- reviewed responses to previous incidents to assess effectiveness and developed recommendations on appropriate workplace procedures
- communicated implementation plan requirements to others in the work area, including demonstrating:
 - two-way communication
 - active listening
 - constructive responses to feedback.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace non-conformance change management procedures and responsibilities, including:
 - CAPA
 - investigating possible causes of non-conformance
 - RCA
 - risk assessment
 - repeat incident
 - isolated incident
 - impact assessment
 - recording requirements
- the provisions of the Therapeutic Goods Act relating to identifying non-conformance, including customer complaints, product recalls and auditing
- consultation and communication methods used to communicate implementation plan requirements to others in the work area, including demonstrating:
 - two-way communication
 - active listening
 - providing constructive responses to feedback
- GMP requirements and workplace procedures relevant to responding to non-conformance
- documentation systems and procedures, including:
 - record keeping to meet both company and legal requirements
 - processes for developing or reviewing workplace procedures
 - document control systems used in the workplace
 - responsibilities for reporting and recording information.

FBPPPL2001 Participate in work teams and groups

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to work effectively with others in structured teams and informal work groups to complete work activities.

This unit applies to individuals who work under general supervision and whose role includes identifying and providing solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

People, Planning and Logistics (PPL)

Elements and Performance Criteria

Assessment Requirements for FBPPPL2001 Participate in work teams and groups

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively participated in work teams or groups of at least three people, on a minimum of two different occasions, including:

- actively participating in discussion about identifying team goals and expectations
- planning work to maximise outcomes for team
- applying communication skills to engage with other participants
- participating in and supporting the achievement of team goals.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to plan work to maximise outcomes for team
- appropriate communication skills to engage with other participants
- procedures for establishing team goals and performance standards
- methods used to measure achievement of personal and team goals
- team goals and personal role to achieving work outcomes
- common group communication processes, including:
 - basic negotiation skills
 - conflict resolution
 - giving and receiving feedback
- importance of team goals and expectations and personal role within the team
- oral communication skills and language, including:
 - questioning
 - active listening

- asking for clarification
- seeking advice from supervisor
- working in a culturally diverse workforce.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - workplace arrangements for establishing company, workplace and team goals
- relationships:
 - opportunities to participate in team processes.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPPPL3003 Participate in improvement processes

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has actively participated in processes to improve work outcomes on at least two different occasions, including:

- planning investigation and data collection methods
- developing objectives and parameters for investigation
- collecting and analysing data and evidence to test ideas
- presenting improvement plans with evidence to support rationale
- implementing and monitoring improvement processes
- ensuring improvement plans reflect overall organisational objectives.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- objectives to be addressed by improvement proposals, including quality, work health and safety, environmental management, cost, efficiency and job satisfaction
- the context in which improvement occurs, including capital expenditure and labour budgets, equipment capacity and production targets
- workplace improvement processes
- data collection and analysis techniques appropriate to the nature of the improvement opportunity and the workplace
- communication techniques to support data collection, consultation and teamwork required to participate in improvement processes
- problem solving strategies
- resources required to support investigation, including:
 - internal and external resources

- negotiating access to resources
- identifying expertise
- recognising improvement requirements in team members
- the importance of providing and gaining feedback
- issues that may occur in a culturally diverse workforce.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - information storage and retrieval systems
- specifications:
 - relevant technical information and personnel resources
 - relevant workplace documentation
- relationships (internal and/or external):
 - opportunities to interact with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPPL3005 Participate in an audit process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required for individuals to participate in auditing, where it occurs in an area that the person is not directly responsible for and where they are required to follow a formal, structured process. It is designed to support participation in auditing a range of programs designed to identify hazards, assess risk and implement control measures.

At this level, the person would typically work under direction and may be required to operate within established audit procedures. Participation implies that the person can participate in all stages of an audit but is not responsible for negotiating audit scope, allocating audit tasks to others or reporting on audit outcomes.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for FBPPPL3005 Participate in an audit process

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has participated in an audit process on at least one occasion, including:

- collecting, assessing and providing information as required by the audit process
- acting on risk identified in the audit process
- following up on audit outcomes by developing action plans
- communicating outcomes to work personnel.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements and procedures for participating in an audit
- the purpose and scope of an audit, including the stages involved in the audit process
- roles and responsibilities of individuals involved in an audit process
- types of information required for a range of audit situations, including:
 - health and safety in the workplace
 - quality
 - environmental
- techniques for collecting information, including options, relevance and strengths and weaknesses of each method to ensure data is adequate and representative
- data analysis methods relevant to the audit process
- communication skills and techniques appropriate to the workplace to inform other personnel of audit outcomes and modified work practices
- technical knowledge relevant to the program being audited in order to:

- verify compliance
- assess adequacy of control measures
- relevance to industry standards
- purpose and responsibilities for maintaining records
- process to transition audit deficiencies into corrective action plans.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace to collect data and observe compliance
- resources, equipment and materials:
 - workplace program documentation
 - information systems and data collection technology
- specifications:
 - audit procedures and standards as applied in the workplace
 - relevant legislation, industry standards and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPPPL3006 Report on workplace performance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to collate and maintain workplace records to enable the monitoring and reporting of workplace performance.

The unit applies to individuals who work as team leaders with responsibility for monitoring and reporting on performance of a work area or section. This includes working in a range of known contexts and completing routine activities.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPPPL3006 Report on workplace performance

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has reported on workplace performance on at least one occasion, including:

- confirming the reporting and recording systems and procedures for a specific work area
- recording information on work performance in accordance with reporting procedures
- reporting variances and inconsistencies
- maintaining security of work documentation.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and responsibilities for the information records and reports to be maintained or produced, including accuracy levels and timelines
- types of information to be recorded, including but not limited to:
 - timesheets
 - log sheets
 - recipes/specifications
 - operating procedures
 - production statistics
 - downtime
 - labour
 - materials usage levels
- techniques used to collate and assess information, including typical recording outcomes to identify unusual or incorrectly recorded information

- likely causes of variation and related reporting responsibilities
- information system access levels and codes, such as levels within software
- effective communication strategies relevant to reporting role
- relevant regulatory and licensing, legislative requirements, industrial awards and agreements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - performance data
 - recording/reporting formats and systems
- specifications:
 - workplace policies, codes of practice and procedures
 - relevant information on licensing, legislation and industrial awards and agreements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPPPL3007 Support and mentor individuals and groups

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has supported and mentored at least one individual, and at least one group (of at least three people), to achieve agreed outcomes, including:

- modelling behaviour and performance consistent with company policy and procedures
- effectively supporting others
- providing meaningful feedback on individual and group performance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- company policies and procedures as they apply to the work area
- regulations and legislative requirements, including:
 - sexual discrimination
 - harassment and bullying
 - equal employment opportunity
 - anti-discrimination
 - racial vilification
 - work health and safety
 - food safety
 - environmental management
- industry awards and workplace agreements to develop an awareness of the main issues covered as they affect day-to-day work arrangements
- techniques for structuring and explaining work-related information to meet the needs of people in the work area

- interpersonal communication skills, including appropriate questioning, listening and feedback techniques
- communication strategies for working effectively with both individuals and groups
- workplace arrangements for training and assessment and related responsibilities
- boundaries of responsibility and related procedures for feedback, counselling and disciplinary procedures
- formal arrangements and responsibilities for mentoring others relating to work role
- meeting procedures and recording requirements relevant to the workplace
- basic group process facilitation procedures, including:
 - planning group processes
 - identifying the purpose
 - confirming the appropriate attendance
 - decision making
 - documenting basic group processes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - systems and programs for supporting development and mentoring of others
 - resources to support mentoring role
- specifications:
 - regulatory, licensing and legislative requirements
 - industrial awards and agreements
 - workplace policies, codes of practice and procedures
 - workplace systems and procedures for consultation, feedback, counselling and discipline
 - information systems, including recording and retrieval systems
- relationships:
 - individuals and team members as specified in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPTEC4002 Apply principles of food packaging

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to oversee packaging operations in a food and beverage processing environment and to assess the nature, and likely causes, of packaging problems.

The unit applies to senior operators and managers who are responsible for overseeing packaging processes and work within known parameters. They provide and communicate solutions to a range of predictable or unpredictable problems.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing or certification requirements apply to this unit at the time of publication. However, legislative and regulatory requirements for food processing exist so local requirements must be checked.

Pre-requisite Unit

Assessment Requirements for FBPTEC4002 Apply principles of food packaging

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has analysed and evaluated at least two types of food packaging, including (for each):

- analysing packaging system components, including:
 - materials used and interaction with product
 - costs
 - processes
 - legal and customer requirements
 - environmental and handling implications
- analysing and confirming safety aspects of processes and equipment
- analysing non-conformances and packaging problems and determining probable cause
- proposing improvements to the packaging system.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of packaging and the properties of packaging materials designed to protect products and extend shelf-life, including the role of packaging in providing:
 - protection of products from contamination (microbial, pest infestation and physical damage)
 - barriers (atmospheric, moisture, flavour and light)
 - package seal ability and seal integrity
 - easy-to-open access to products
 - information to consumers about products

- market appeal
- materials and their properties
- packaging interactions with food products
- costs
- features of packaging design that preserve products
- legislative requirements relating to packaged products and food safety
- requirements of products handled in the workplace, including coated packaging products, and active/interactive packaging films
- factors that influence the selection of packaging materials
- corrective actions to prevent packaging non-conformance
- characteristics of products, and their behaviour when packaged, across the shelf-life of the product
- typical problems that occur in the packaging process, and likely causes and appropriate response options including:
 - pathogens and spoilage that occur in packaged food and the conditions required for their occurrence
 - intrinsic features of food type, including pH, water activity, nutrient content, presence of microbiological compounds, respiration rate (fresh fruit and vegetables) and biological structure
 - extrinsic factors, including processing method, temperature, water loss and humidity, maturity (applies to maturity of fruit and vegetables when harvested), handling, cleaning, sanitation and personal hygiene practices, and gaseous composition of storage atmosphere
 - food spoilage indicators, including microbial contamination, enzymic browning and sensory degradation of characteristics, such as flavour, aroma, colour and texture
 - the effect of gas composition for modified atmosphere packaging processes, including knowledge of the role of the most commonly used gases in food packaging (carbon dioxide, oxygen, nitrogen), reactions between gases, packaged products and packaging materials
- quality assurance systems to ensure that packaged products meet customer and legal requirements
- relevant sources of technical expertise and related authority levels to address packaging issues.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace setting or an environment that accurately represents a real workplace
- resources, equipment and materials:
 - product, packaging components and consumables
 - packaging process equipment

- specifications:
 - relevant standard operating procedures
 - packaging specifications
 - workplace information recording systems, requirements and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2001 Bench graft vines

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to select appropriate vine material, prepare cuttings, graft and undertake post-graft treatment and storage.

The unit applies to individuals in wine grape nurseries who work under general supervision, with limited autonomy and accountability for their own work.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPVIT2001 Bench graft vines

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared to bench graft vines, bench grafted vines and completed the bench grafting activities at least once, including:

- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment according to job requirements
- selecting and preparing appropriate vine material for grafting, including disbudding
- performing bench grafting of vines according to workplace practices
- following workplace requirements for grafting and post-grafting treatment and packing of vines
- monitoring grafted vines by identifying, rectifying or reporting out-of-specification vine grafts
- identify and address non-conformance
- cleaning up and storing equipment according to workplace requirements
- disposing of waste according to environmental policies and workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and principles of grafting and disbudding
- criteria for successful grafting:
 - variety and clone
 - matching cambium
 - matching bevels and sizes
 - wood diameters
 - customer or workplace requirements

- importance of selection and use of rootstock and vinifera
- advantages of using clonal and registered vine improvement rootstock material
- criteria for selecting parent vines for scion material
- procedures and optimum conditions for the storage of grafting material
- preparing vine material for grafting, including:
 - removal from cold storage
 - soaking
 - heat treatment
 - disbudding
 - hydration
 - grading
- procedures for monitoring the grafting process and equipment operation to identify non-conformance
- purpose and components of grafting equipment and cleaning equipment
- packing, labelling and storing grafted vines relevant to:
 - cold room layout
 - cold room temperature variations
 - customer requirements
 - storage time requirements
 - care of vines to minimise damage by moisture and disease
- procedures and responsibility for reporting problems
- environmental issues and controls, including:
 - identifying, rectifying and reporting environmental non-conformance
 - sorting, collecting, treating, recycling or disposing of waste
- cleaning requirements and procedures for work area and equipment
- reporting and recording required information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - appropriate personal protective equipment
 - equipment, services and corresponding information
 - products and materials
 - cleaning procedures, materials and equipment
 - documentation and recording requirements and procedures
- specifications:

- work procedures, including advice on company practices, safe work practices, quality and environmental requirements
- workplace grafting specifications
- work instructions and schedules
- legislative and local quarantine regulations and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPVIT2002 Carry out potting operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has carried out at least two potting operations involving potting propagated material and post-potting treatment including:

- using personal protective equipment (PPE), safety data sheets (SDS) and following health and safety requirements in the workplace
- ensuring materials are available and ready for potting process
- selecting and mixing potting media and treatments according to workplace procedures
- cleaning pots and work surfaces according to workplace procedures
- preparing cuttings before potting including waxing or grading methods
- potting cuttings and labelling trays according to workplace procedures
- transferring potted cuttings to a growing environment
- maintaining hydration requirements
- disposing of waste according to workplace procedures
- completing records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including:
 - purpose and application of PPE
 - SDS
 - operating equipment according to workplace procedures
 - safe handling and preparation of equipment, potting media and chemicals
- process for preparing cuttings for potting, including:
 - grading

- waxing
- dipping in hormones
- hydrating
- potting process and standards of potting, including:
 - resources and materials used for the potting process
 - selecting, operating, maintaining and storing equipment according to workplace procedures
 - planting cuttings, according to workplace procedures
 - labelling trays according to workplace procedures
 - watering potted cuttings
- process of transferring and placing potted cuttings to growing environment
- report and address non-conformances according to workplace procedures
- principles of nursery hygiene, including:
 - cleaning requirements and techniques for work area and equipment
- maintenance of work area and equipment according to workplace procedures including:
 - report and address environmental non-compliance
 - waste disposal requirements and procedures
- processes for reporting, recording and maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - nursery shed or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment
 - equipment, services and corresponding information
 - potting products and materials
 - cleaning procedures, materials and equipment
 - system for recording information
- specifications:
 - work procedures, including advice on company practices, safe work practices, and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2003 Hand prune vines

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to hand prune vines using a variety of hand-operated or handheld equipment.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with hand pruning of vines.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative, or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for hand pruning	1.1 Confirm job requirements 1.2 Confirm environmental guidelines and identify potential health and safety hazards and controls according to workplace procedures 1.3 Select and fit personal protective equipment relevant to the job

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements 1.4 Ensure pruning equipment is ready for use according to workplace procedures
2. Hand prune vines	2.1 Start and operate pruning equipment safely and according to workplace procedures 2.2 Monitor equipment performance 2.3 Prune vines according to workplace procedures 2.4 Identify and address non-conformance according to workplace procedures 2.5 Maintain equipment in good working order according to workplace procedures
3. Complete hand pruning operations	3.1 Shut down equipment safely according to workplace procedures 3.2 Clean and store equipment 3.3 Dispose of vine cuttings according to environmental and workplace procedures 3.4 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Comprehend information from a variety of workplace documents
Oral Communication	<ul style="list-style-type: none"> Converse clearly to confirm job requirements and seek assistance where required
Navigate the world of work	<ul style="list-style-type: none"> Apply workplace procedures to own role and responsibilities Follow clear instructions within defined level of responsibility
Get the work done	<ul style="list-style-type: none"> Respond to routine problems by referring to workplace procedures

Assessment Requirements for FBPVIT2003 Hand prune vines

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively prepared for hand pruning, hand pruned vines and completed hand pruning operations at least once including:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE)
- following pruning equipment safety procedures
- starting and operating hand pruning equipment safely according to workplace procedures
- pruning correctly according to workplace procedures
- identify and address non-conformances
- performing shut down procedures according to workplace procedures
- following environmental procedures
- disposing of cuttings according to workplace procedures
- maintaining records according to workplace guidelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic components of and the purpose for pruning vines, including:
 - basic difference between cane and spur pruning
 - pruning requirements
 - different parts of the vine, including vine trunk and permanent framework, canes and cordons, tendrils and buds
- techniques and principles of pruning vines:
 - selecting the best possible spurs and canes
 - positioning spurs or canes
 - cleanly removing sucker shoots
 - leaving the correct quantity of spurs, rods and buds

- making cuts correctly and cleanly
- recognising and removing unwanted growth
- rolling and securing extension canes onto trellis wire
- health and safety hazards and controls in the workplace including purpose and application of PPE
- correct operating procedures for pruning equipment, including:
 - handling pruning equipment safely
 - oiling moving parts and sharpening procedures
 - safe handling of pruning equipment
 - starting up and operating automatic pruning equipment as required
 - monitoring and recognising performance problems with pruning equipment
 - cleaning and storage requirements of pruning equipment
 - using appropriate cleaning techniques
- shut down procedures
- processes for the routine preventive maintenance of equipment
- identifying, rectifying and reporting environmental non-compliance
- processes for maintaining work area:
 - environmental issues and controls
 - disposal requirements of vine cuttings
- procedures and responsibility for reporting problems and anomalies
- recording workplace information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a vineyard workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - pruning equipment, services and corresponding information
 - products and materials
 - cleaning procedures, materials and equipment
 - documentation and recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, quality and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPVIT2005 Maintain callusing environment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared cuttings for callusing and maintained the callusing environment on at least two separate occasions including:

- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment (PPE)
- observing hygiene and housekeeping standards including cleaning and sanitising of work area, equipment and boxes
- preparing callusing media and boxes to specification
- preparing cuttings and applying pre-callusing treatment
- placing cuttings into callusing boxes
- monitoring and maintaining callusing environment to specification
- monitoring cuttings for correct callusing and reporting problems according to procedures
- applying post-callusing treatments
- removing callused cuttings
- recording appropriate information.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace, including:
 - purpose of PPE
 - correct operating procedures for equipment
 - safe and effective handling of equipment
 - safe preparation and handling of chemicals
- cleaning requirements and procedures for work area and equipment
- principles of nursery hygiene

- environmental considerations and required controls
- waste disposal requirements and procedures
- correct procedures for preparing cuttings for callusing
- correct procedures for placing cuttings into boxes
- effects of variety, clone and source of cuttings on the placement and labelling of cuttings in boxes
- purpose and benefit of carrying out pre- and post-callusing treatments
- procedures used to carry out pre- and post-callusing treatments
- procedures for preparing pre-mixed callusing media
- factors in a controlled callusing environment that affect the vine cutting:
 - methods of pasteurising and treating callusing media
 - temperature
 - relative humidity
 - moisture levels of growing medium
- methods for setting, monitoring and maintaining the required temperature and relative humidity
- correct procedures for preparing callusing boxes
- quality control process in the callusing environment
- common problems that occur during callusing and how to resolve them
- procedures and responsibilities for reporting problems and anomalies
- procedures for maintaining workplace records
- procedures for selecting, operating, maintaining and storing the required equipment
- correct procedures for removing and transferring callused cuttings.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - equipment, services and corresponding information relevant to callusing
 - products and materials for callusing
 - cleaning procedures, materials and equipment
 - documentation, recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, quality and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2006 Obtain and process rootlings

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to dig and process vine rootlings.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with obtaining and processing rootlings.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPVIT2006 Obtain and process rootlings

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the following for obtaining and processing rootlings from a field nursery, a sand bed and a callusing room, including:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE) according to job requirements
- handling and using treatments and disinfectants
- selecting and mixing treatments to required concentrations
- sanitising equipment and work surfaces according to workplace procedures
- set up and operate equipment according to workplace procedures
- treating, bundling, storing and labelling rootling according to workplace procedures
- preparing, packing and loading rootling for dispatch according to workplace procedures
- identifying and reporting non-conformances
- treating and disposing of waste according to workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- safe equipment operation, storage and maintenance requirements according to workplace procedures
- principles of nursery hygiene for equipment and cleaning requirements
- methods for handling rootlings in different environments
- processes for treating rootlings:
 - hydration of all rootlings

- chemical treatment of all rootlings
- common features of vine rootlings health
- procedures for monitoring the standard of rootlings, and grading and sorting them for:
 - diameter of stem
 - appearance
 - length and number of shoots
 - strength of graft union
- package, storage requirements and procedures for rootlings ready for sale, including:
 - cold room layout and temperature variations
 - customer requirements
 - storage time requirements
- procedures for checking stock against orders, including:
 - quantity of stock
 - varieties and clones
 - quality of stock is within specifications
 - procedures and responsibilities for reporting problems and anomalies
- procedures for dispatching stock, including:
 - correct manual handling
 - correct use of mechanical transfer equipment
- procedures for collecting and disposing of waste
- environmental issues and controls
- recording workplace information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - equipment, services and corresponding information
 - products and materials
 - cleaning procedures, materials and equipment
 - system for recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2007 Tend containerised nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to tend containerised nursery plants.

The unit applies to individuals in wine grape nurseries who complete nursery activities such as treating plants and maintaining nursery facilities.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain nursery facilities	1.1 Confirm job requirements 1.2 Identify potential health and safety hazards and controls according to workplace procedures 1.3 Select, fit and use personal protective equipment according to the job requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Undertake work according to safety data sheets and workplace environmental procedures 1.5 Maintain irrigation system according to workplace procedures 1.6 Check temperature controls according to workplace procedures
2. Treat plants to maintain growth	2.1 Select and prepare materials, equipment and tools according to job requirements 2.2 Select, mix and apply chemical treatments according to workplace procedures 2.3 Apply irrigation according to workplace procedures 2.4 Recognise and report non-conformances according to workplace procedures
3. Carry out post-treatment operations	3.1 Collect and dispose of waste according to workplace procedures 3.2 Shut down, clean and store equipment according to workplace procedures 3.3 Clean and sanitise facilities according to workplace procedures 3.4 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Assessment Requirements for FBPVIT2007 Tend containerised nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has tended to containerised nursery plants by treating plants to maintain growth and maintaining nursery facilities and demonstrating the following on at least one occasion:

- using personal protective equipment (PPE)
- identifying and following safety data sheets and health and safety in the workplace procedures
- sanitising equipment and following hygiene procedures
- selecting, mixing and applying chemical treatments according to workplace procedures
- monitoring irrigation system
- irrigating and monitoring plants according to workplace procedures
- identifying and reporting non-conformances
- maintaining workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- principles and operations of irrigation systems used in tending plants in nurseries
- maintaining irrigation system:
 - fixing blockages, leaking heads and hoses
 - servicing irrigation system components
 - identifying and reporting non-compliances
- recognising underperformance of the irrigation system, including:
 - dry spots

- water dumping
- abnormal water flow
- principles and practices of tending nursery plants:
 - weed control
 - removing dead or diseased plant materials
- workplace procedures for operating equipment:
 - calibrating and adjusting equipment
 - carrying out pre-operational checks
 - applying particular settings
 - shut down procedures
- environmental issues and controls including waste disposal
- workplace procedures for reporting non-conformances
- procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - irrigation and maintenance equipment, services and corresponding information
 - products and materials
 - cleaning materials and equipment
 - system for recording information
- specifications:
 - workplace procedures, including advice on company practices, safe work practices, quality and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPVIT2008 Train vines

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared for vine training, trained vines and completed vine training activities on at least one occasion including:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE) according to job requirements
- setting up and operating equipment according to workplace procedures
- training vines according to instructions, including heading height, selection of appropriate laterals, positioning of laterals, securing of laterals, removing unwanted laterals from trunk and crown
- identifying and addressing non-conformances
- cleaning up and storing equipment according to workplace procedures
- maintaining records according to workplace procedures
- disposing of waste according to environmental guidelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- safe and effective handling of equipment
- maintenance and storage of equipment according to workplace procedures
- range of vine training techniques, features, benefits and procedures
- different parts of the grapevine, including vine trunk and permanent framework, laterals, canes and cordons, tendrils and buds, and fruit
- how to report and address non-conformances according to workplace procedures
- responsibilities for identifying and controlling environmental issues
- cleaning and storage requirements and procedures for equipment

- workplace procedures and responsibility for:
 - reporting problems
 - cleaning up
 - maintenance
 - handling and disposing of waste
 - reporting required information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a vineyard workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - vine training equipment, services and corresponding information
 - range of grape vine varieties
 - cleaning procedures, materials and equipment
 - system for recording information
- specifications:
 - work procedures, including advice on company practices, safe work practices, and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2010 Take and process vine cuttings

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to take and process vine cuttings using a variety of hand-operated equipment.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with taking and processing vine cuttings.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Take vine cuttings	1.1 Confirm job requirements 1.2 Identify health and safety hazards and environmental controls according to workplace procedures and regulations 1.3 Select, fit and use personal protective equipment according to job requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Select and prepare materials and equipment according to workplace procedures 1.5 Select and take vine cuttings according to job requirements 1.6 Identify and address non-conformances according to workplace procedures
2. Complete vine cutting operations	2.1 Collect and grade vine cuttings according to job requirements 2.2 Clean and store equipment according to workplace procedures 2.3 Collect and dispose of waste according to environmental and workplace procedures
3. Prepare to process cuttings	3.1 Clean and sanitise facilities to minimise risk of contamination 3.2 Ensure materials are ready to meet requirements 3.3 Select and prepare materials and equipment according to workplace procedures
4. Process cuttings	4.1 Treat and bundle cuttings according to workplace procedures 4.2 Label, pack and store bundles according to workplace procedures 4.3 Collect and dispose of waste according to environmental and workplace procedures 4.4 Recognise and address and non-conformances according to workplace procedures 4.5 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Comprehend information from a variety of workplace documents
Writing	<ul style="list-style-type: none"> Produce workplace documents using industry-based vocabulary, grammar and conventions

Skill	Description
Numeracy	<ul style="list-style-type: none"> Calculate numerical information relating to estimating materials, labelling and storing
Navigate the world of work	<ul style="list-style-type: none"> Follow clear instructions within defined level of responsibility Apply workplace procedures to own role and responsibilities
Get the work done	<ul style="list-style-type: none"> Respond to routine problems by referring to workplace procedures

Assessment Requirements for FBPVIT2010 Take and process vine cuttings

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively taken and processed vine cuttings using hand-operated equipment on at least two separate occasions including:

- following health and safety procedures in the workplace
- selecting, fitting and using personal protective equipment (PPE)
- selecting cuttings and cutting according to workplace procedures
- using a variety of hand-operated or handheld cutting equipment
- treating, bundling, and labelling cuttings according to workplace procedures
- identifying and addressing non-conformances in cutting propagation of grape vines
- disposing of waste according to workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and environmental controls in the workplace
- purpose and application of PPE
- selection, setup and maintenance of vine cutting equipment
- vine components:
 - vine trunk and permanent framework
 - canes and cordons
 - tendrils and buds
- procedures for selecting and taking vine cuttings:
 - correct length and diameter
 - correct number of buds on the cutting

- degree of straightness
- cuts made correctly and cleanly
- top cut at 45° angle or bottom bud flat, 1-2 cm from nearest bud
- number of buds left on the vine
- treating cuttings procedures:
 - hydration of all cuttings
 - removing unwanted plant material
 - mixing treatments
- collecting and storing vine cuttings procedures:
 - numbers per bundle
 - all lying the same way in the bundle (basal and distal ends)
 - secure tying and labelling of bundles
 - maintaining hydration of cuttings
- cutting propagation techniques for grape vines:
 - identification of vine cuttings
 - cutting collection and storage requirements, including hydration
- features of healthy and unhealthy vine cuttings used to grade cuttings
- packing and storing cuttings:
 - cold room layout and temperature variations
 - storage time requirements
- cleaning requirements and environmental procedures for work area and equipment
- identifying and addressing non-compliances
- maintaining workplace records
- legislation, regulations and codes of practice related to handling of vine cuttings.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a vineyard workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - equipment, services and corresponding information
 - cuttings and treatments
 - cleaning procedures, materials and equipment
 - system for recording information
- specifications:
 - work procedures, including advice on company practices, safe work practices and environmental requirements
 - legislative and local quarantine regulations and codes of practice

- work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2011 Operate vineyard equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to operate a range of general vineyard equipment that does not require specialised calibration.

The unit applies to individuals who are required to follow workplace procedures to operate general vineyard equipment.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPVIT2011 Operate vineyard equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively operated at least three different types of vineyard equipment and for each type has demonstrated the following:

- identifying health and safety hazards and controls in the workplace
- using personal protective equipment (PPE)
- selecting and confirming availability of equipment, and preparing according to workplace procedures
- setting up, starting up, operating and shutting down equipment according to workplace procedures
- adjusting equipment operation to meet workplace conditions including yard, weather and terrain
- identifying and addressing non-conformances
- sorting, collecting, treating and disposing of waste according to environmental and workplace procedures
- maintaining records according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in all operating conditions
- selecting, fitting and using appropriate PPE
- basic equipment used and operated in a vineyard environment
- purpose, features, components and operational safety requirements of equipment:
 - all-terrain vehicles
 - tractor-mounted forklift
 - front-end loader

- towed equipment (e.g. gondola)
- three-point linkage equipment (e.g. discs)
- power take-off driven equipment (e.g. slasher)
- equipment with hydraulics (e.g. tipping trailer)
- confirming equipment status and condition, including:
 - fuel
 - water
 - oil (e.g. engine, gearbox and hydraulics)
 - belts
 - air intake
 - tyre pressure
 - metal fatigue or wear and tear
- following equipment shut down procedures
- identify and address non-conformances
- required weather conditions for equipment operation
- types of workplace terrain
- significance and methods of monitoring equipment performance
- procedures and responsibility for reporting problems and maintaining workplace records
- environmental issues and controls
- identifying, rectifying and reporting environmental non-compliance
- cleaning and storing according to workplace procedures
- collecting, treating and recycling or disposing of waste
- routine maintenance procedures for equipment
- recording requirements and procedures
- legislation and quarantine codes of practice related to vineyard operations.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a vineyard workplace or simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
 - appropriate PPE
 - vineyard equipment and associated attachments
 - cleaning materials and equipment
- specifications:
 - work procedures, including advice on company practices, safe work practices and environmental requirements
 - legislative and local quarantine regulations and codes of practice
 - system for recording requirements and procedures

- work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2012 Identify and treat nursery plant disorders

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0

Application

This unit of competency describes the skills and knowledge required to recognise common nursery plant disorders, monitor and record the severity of the disorder, and apply a range of treatments.

The unit applies to individuals who are required to follow workplace procedures in completing tasks to identify and treat nursery plant disorders.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPVIT2012 Identify and treat nursery plant disorders

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has identified and treated at least two different plant disorders including:

- complying with health and safety and environmental policies and procedures
- selected and fitted personal protective equipment (PPE)
- reading and interpreting safety data sheets (SDS)
- following other specified health and safety procedures, including safe handling of chemicals
- identifying common plant disorders and implementing corrective actions
- selecting, mixing and applying treatments according to instructions
- taking corrective action in response to non-conformances
- conducting work according to environmental and health and safety requirements
- disposing of waste according to environmental policies and workplace procedures
- recording treatments according to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and controls in the workplace
- purpose and application of PPE
- safe preparation and handling of chemicals
- correct workplace procedures for equipment used to treat disorders:
 - safe and effective handling of equipment
 - preparing equipment
 - calibrating equipment
 - cleaning equipment

- applying particular settings
- health and safety in the workplace and environmental regulations affecting the use of chemicals for treating disorders:
 - environmental issues and controls
 - using appropriate cleaning techniques
 - identifying, rectifying and reporting environmental non-compliance
- characteristics of common vine disorders:
 - common plant disorders occurring in vine nurseries
 - life cycles of common vine disorders
- different types of control measures and their uses, including integrated pest management
- implementing appropriate control measures
- procedures for preparing treatments:
 - setting up application equipment
 - measuring treatment rates
 - mixing treatments to ensure homogenous mix
 - interpreting treatment label information
 - interpreting SDS information
- procedures and responsibilities for reporting problems and anomalies
- reporting and recording requirements and procedures
- principles of nursery hygiene
- cleaning requirements and procedures for work area and equipment
- waste disposal requirements and procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE used for treating vine disorders
 - equipment, services and corresponding information
 - products and materials to be treated
 - equipment cleaning procedures and materials
 - documentation and recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, quality and environmental requirements
 - legislative and local quarantine regulations and codes of practice
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2016 Carry out hot water treatment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to treat grape vine cuttings with hot water to meet industry standards.

The unit applies to individuals who are required to follow workplace procedures to use hot water treatment for cuttings in a vineyard.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FBPVIT2016 Carry out hot water treatment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared hot water treatments, treated cuttings and carried out the post-treatment procedures on at least two separate occasions and demonstrated the following:

- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment according to job requirements
- applying current viticulture industry standards to heat treatment of cuttings
- handling and treating cuttings according to workplace procedures
- monitoring treatment processes and responding according to workplace procedures
- disposing of waste according to instructions and workplace procedures
- maintaining records according to industry and workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and process of hot water treatment
- how to set up equipment for hot water treatment according to workplace procedures
- how to prepare cuttings for treatment or re-hydration
- how to prepare water for cool down, hot water treatment and hydration:
 - testing and adjusting chlorination levels
 - checking and adjusting temperature levels
- current industry standards, legislation and workplace specifications for hot water treatments
- reasons for using different specifications for hot water treatments
- how to monitor the dipping process to ensure compliance according to workplace procedures including:

- monitoring critical control points for compliance with specifications
- analysing readouts from data logging devices
- maintaining level of agitation in the tanks
- maintaining chlorine level
- recalibrating thermometers
- procedures for storing treated cuttings:
 - separating from untreated cuttings to prevent contamination
 - covering with clean covers
 - placing cuttings in vented plastic bags to prevent dehydration
 - placing cuttings in the cold room
- workplace health and safety hazards and controls when undertaking hot water treatments
- principles of nursery hygiene
- cleaning requirements and procedures for work area and equipment
- environmental issues and controls:
 - identifying, rectifying and reporting environmental non-compliance
 - waste disposal requirements and procedures
- reporting and recording workplace procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment used for heat treatment of vines
 - equipment, services and corresponding information
 - products and materials to be treated
 - equipment cleaning procedures and materials
 - system for recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices and environmental requirements
 - legislative and local quarantine regulations and codes of practice and industry standards for heat treatment of grape vines
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT2018 Support mechanical harvesting operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to collect grapes from a mechanical harvester and deliver them to the receival point.

The unit applies to individuals who are required to follow workplace procedures in supporting operations for mechanical harvesting.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- AHCMOM202 Operate tractors

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for harvest support activities	1.1 Confirm job requirements 1.2 Confirm environmental guidelines and identify potential health and safety hazards and controls according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Select and fit personal protective equipment relevant to the job requirements 1.4 Check, maintain and set equipment to meet workplace procedures
2. Collect grapes from harvester	2.1 Operate machinery and equipment safely with trailer or gondola attached alongside mechanical harvester 2.2 Monitor collection activities to confirm performance is maintained according to workplace procedures 2.3 Recognise and address non-conformances according to workplace procedures 2.4 Maintain equipment in good working order according to workplace procedures
3. Transfer grapes to despatch location	3.1 Add treatments to grapes according to workplace procedures 3.2 Comply with relevant legislation and quarantine codes of practice 3.3 Deliver grapes to receipt point to meet workplace procedures
4. Complete harvest support activities	4.1 Shut down equipment safely and according to operator instructions 4.2 Clean equipment according to workplace procedures 4.3 Collect, sort and dispose of waste generated by the process or cleaning procedures according to workplace practices 4.4 Record workplace information accurately in the appropriate format

Foundation Skills

Assessment Requirements for FBPVIT2018 Support mechanical harvesting operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the following on at least two separate occasions when supporting mechanical harvesting operations including:

- accessing workplace information to identify job requirements
- identifying health and safety hazards and controls in the workplace
- selecting, fitting and using personal protective equipment (PPE)
- checking and confirming readiness of equipment before operation
- starting and operating equipment according to instructions
- monitoring harvesting operation to achieve job requirements
- identify and address non-conformances
- treating and delivering grapes according to task requirements
- shutting down equipment according to workplace procedures
- cleaning and storing equipment according to workplace procedures
- sorting, collecting, treating and disposing of waste according to environmental and workplace procedures
- maintaining appropriate records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key factors that will affect grape and wine quality, including:
 - temperature
 - oxidation
 - material other than grapes collected
 - speed of processing
 - treatment requirement

- health and safety hazards and controls in the workplace
- how to select, fit and use appropriate PPE
- procedures for identifying and addressing environmental issues
- procedures for carrying out pre-operational checks of equipment
- procedures for selecting, attaching, setting up and operating harvesters and tractor trailers used in the workplace
- procedures for collecting grapes to avoid damage to grapes, equipment, vines, trellises or fences
- procedures for shutting down, cleaning and maintaining equipment
- common problems during grape collection activities and methods for avoiding addressing and reporting them, including:
 - equipment breakages or malfunction
 - vine or trellis damage
 - grape quality and quantity
 - matter other than grapes collected
 - load weight
 - treatment application to fruit loads
 - collection accuracy of grapes
 - tipping accuracy of grapes at receival point
 - congestion or backlog at receival point
- recording requirements and procedures
- legislation and quarantine codes of practice related to vineyard products.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a vineyard workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - appropriate PPE
 - equipment with attached gondola or trailer
 - products and materials to be collected and delivered
 - cleaning procedures, materials and equipment
 - system for recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices and environmental requirements
 - legislative and local quarantine regulations and codes of practice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT3001 Coordinate vineyard operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to coordinate vineyard operations in a range of day-to-day activities in areas such as harvesting, nursery, pruning or canopy management.

The unit applies to individuals who coordinate operations within a vineyard. They work under broad direction and exercise autonomy and judgement where required.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to coordinate vineyard activities	1.1 Interpret and confirm job requirements 1.2 Confirm environmental guidelines and identify potential health and safety hazards and controls according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Select and fit personal protective equipment according to the job requirements 1.4 Identify and clarify activity goals and job requirements with supervisor 1.5 Ensure appropriate personnel required are available 1.6 Ensure materials and equipment are available and ready
2. Coordinate vineyard activities	2.1 Confirm work targets, timelines and processes to achieve activity goals and job requirements 2.2 Allocate individual work tasks and roles to ensure activity goals and job requirements are met 2.3 Instruct workers and contractors according to workplace procedures 2.4 Monitor activities to ensure quality, timelines and job requirements are maintained according to workplace procedures 2.5 Identify and address barriers to achieving targets and job requirements
3. Complete coordination of vineyard activities	3.1 Monitor activities to ensure compliance with relevant workplace procedures on completion, shutdown and waste disposal 3.2 Debrief personnel according to workplace procedures 3.3 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Comprehend information from a variety of workplace documents
Writing	<ul style="list-style-type: none"> Record workplace information in required format
Oral Communication	<ul style="list-style-type: none"> Converse clearly with workplace personnel to confirm job requirements, monitor activities and provide feedback on performance of daily tasks

Skill	Description
Numeracy	<ul style="list-style-type: none"> Timetable and schedule vineyard work tasks according to required timeframes
Navigate the world of work	<ul style="list-style-type: none"> Apply workplace procedures and legislative requirements relevant to own role
Interact with others	<ul style="list-style-type: none"> Use required communication mode to report operational information to relevant personnel
Get the work done	<ul style="list-style-type: none"> Identify and solve problems by referring to workplace procedures Plan and organise tasks to achieve job requirements

Assessment Requirements for FBPVIT3001 Coordinate vineyard operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively coordinated operations in a vineyard involving day-to-day activities in areas of harvesting, nursery, pruning or canopy management at least once, including:

- complying with health and safety requirements in the workplace
- selecting and fitting personal protective equipment (PPE)
- determining activities required of the vineyard processes and individuals in order to meet job targets
- allocating activities and monitoring their implementation
- providing team leadership and instruction for vineyard personnel
- identifying and addressing non-conformances
- completing workplace records.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace planning processes:
 - planning and scheduling vineyard activities
- personnel requirements:
 - equipment and materials required
 - location
 - transport
 - timing
 - environmental conditions
 - other vineyard activities

- quality and quantity requirements
- vineyard health and safety hazards and controls in the workplace
- vineyard environmental issues and controls
- team leadership communication principles and strategies
- procedures for monitoring and reporting on individual and team performance
- vineyard activities to be monitored:
 - compliance with workplace, environmental and quality procedures
 - individual and team performance
 - achievement of targets, timelines and performance requirements
 - team members' learning needs
 - instructing individuals and groups
 - providing feedback to individuals and groups
 - resolving conflicts
- how to recognise, correct and report non-conformances
- how to maintain workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a vineyard workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - vineyard equipment, services and corresponding information
 - products and materials required for vineyard work
 - system for recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, people management, quality and environmental requirements
 - work instructions and schedules
- relationships (internal and/or external):
 - small work groups or teams to coordinate.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT3003 Operate spreading and seeding equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to attach, set up and detach spreading and seeding equipment that requires calibration.

The unit applies to individuals who complete spreading and seeding activities such as planting cover crops and ensuring deep incorporation of ameliorants and fertilisers.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Assessment Requirements for FBPVIT3003 Operate spreading and seeding equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down seed spreading equipment at least once and demonstrated the following, including:

- recognising health and safety hazards and applying controls in the workplace
- selecting and using personal protective equipment (PPE)
- ensuring availability of specified materials and preparing according to workplace requirements
- selecting, attaching, setting up and calibrating equipment to meet job requirements
- starting, operating and shutting down equipment in accordance with workplace procedures
- monitoring spreading or seeding operations to achieve specified result
- shutting down the equipment according to workplace procedures
- taking corrective action in response to non-conformance results
- disposing of waste materials according to workplace and environmental policies
- recording information accurately.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and application of spreading and seeding operations within the vineyard growing system, including:
 - soil ameliorants
 - inter-row cropping species and varieties
 - inter-row cropping practices and techniques
 - inorganic and organic fertilising materials
 - process specifications, procedures and operating parameters
- application parameters for seed or spreading materials:

- correct variety or type of seed and fertiliser
- correct soil ameliorant and treatment
- application rate
- volume
- application depth
- density
- coverage
- required weather conditions for activity
- soil characteristics as they apply to spreading and seeding operations
- purpose and operation of seeding and spreading equipment and instrumentation components:
 - common causes of non-conformance and corrective action required
 - significance and methods of monitoring equipment performance
 - storage procedures for equipment and materials
 - routine maintenance procedures for equipment
 - start up and shutdown sequence
- equipment status and condition:
 - belts and chains
 - lubricants
 - hydraulics
 - air intake
 - tyre pressure and wear
 - wear and tear
- how to select, attach, set up and calibrate equipment to meet job requirements
- how to select, prepare and load materials according to job requirements
- how to start up, operate and monitor equipment
- how to conduct routine maintenance of equipment according to workplace procedures
- local environment and operating conditions
- health and safety hazards and controls in the workplace
- PPE
- procedures and responsibility for reporting non-conformances
- procedures for collecting, sorting, treating, disposing of and recycling waste to meet environmental compliance
- equipment cleaning requirements and procedures
- storage requirements associated with temporary or seasonal breaks in activity
- procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:

- an agricultural or horticultural workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - spreading and seeding equipment, services and corresponding information
 - spreading and seeding products and materials
 - cleaning procedures, materials and equipment
 - documentation and recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, equipment calibration and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT3004 Monitor and maintain nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to monitor and maintain containerised nursery plants.

The unit applies to individuals who carry out workplace procedures in completing tasks associated with maintaining nursery plants.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- FBPVIT2012 Identify and treat nursery plants and disorders

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor environmental parameters	1.1 Confirm job requirements 1.2 Identify potential health and safety hazards and controls according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Select and fit personal protective equipment according to the job requirements 1.4 Monitor environmental parameters against the production plan 1.5 Alter environmental parameters to meet the needs of the plants 1.6 Maintain nursery hygiene to comply with industry and workplace procedures
2. Determine daily water requirements	2.1 Identify plant water requirements to maintain required health and growth according to workplace procedures 2.2 Irrigate plants according to workplace procedures 2.3 Monitor water requirements according to workplace procedures 2.4 Maintain nursery irrigation system to meet plant production plan
3. Implement treatments to promote plant growth	3.1 Test potting media according to workplace procedures 3.2 Monitor overall health of plants according to workplace procedures 3.3 Implement plant treatments according to production plans 3.4 Identify and address non-conformances according to workplace procedures
4. Monitor the dispatch of stock	4.1 Confirm availability of stock and timing of dispatch with customers according to workplace procedures 4.2 Prepare plants for dispatch in line with customer requirements 4.3 Check stock to ensure it meets quality specifications 4.4 Check orders against stock being dispatched to ensure compliance 4.5 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Assessment Requirements for FBPVIT3004 Monitor and maintain nursery plants

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively monitored and maintained three different containerised nursery plants and demonstrated the following:

- identifying and following health and safety in the workplace procedures
- selecting and using personal protective equipment (PPE)
- identifying environmental factors and their effect on plant growth and health
- monitoring and controlling irrigation and treatments to meet production outcomes
- identifying and addressing non-conformances
- confirming available stock levels to meet customer requirements
- preparing stock for dispatch
- dispatching nursery plant stock to meet customer requirements
- completing documentation to workplace requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic vine physiology, as it applies to:
 - transpiration
 - water intake
 - nutrient uptake
 - photosynthesis
 - respiration
 - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality:

- buds, nodes and tendrils
- cambium, epidermis, phloem and xylem
- leaf blade, bract and petiole
- bunch, berries and flowers
- key grape varieties and their distinguishing features:
 - berry and bunch characteristics
 - frost and disease resistance
 - flavour and style
- annual grapevine growth stages:
 - budburst
 - flowering
 - on set of ripening
 - maturity
- irrigation systems and methods including:
 - methods of calculating daily water needs
 - methods for monitoring water use
 - relationship between water needs of nursery plants and environmental parameters
- maintenance of irrigation systems:
 - fixing blockages
 - servicing irrigation system components
 - identifying and reporting faults in the irrigation system
 - fixing leaking heads and hoses
 - monitoring water requirements
 - using soil moisture devices
- checking plants for physical signs of water stress or waterlogging
- types of potting media, their characteristics and effect on plant growth
- tests to determine quality of potting media:
 - pH, drainage, aeration
 - salinity
 - nitrate levels
 - water repellence
- maintenance of work area to meet workplace hygiene standards:
 - removing weeds
 - removing dead or diseased plant materials
 - washing work area on transfer of plants
 - disinfecting tools, equipment and work areas
 - using foot baths on entry to different work areas
- procedures for applying treatments to vines:
 - fungicides
 - fertilisers

- insecticides
- hormones
- pruning
- hardening off
- preparing, mixing and using chemicals
- quality parameters for nursery plants
- treatments required by plants at different growth stages
- health and safety hazards and controls in the workplace:
 - selecting, fitting and using appropriate PPE
 - identifying potential and existing hazards in the work area and implementing safe work procedures to minimise hazards
- procedures for monitoring and preparing stock for dispatch:
 - packing, dispatching and handling techniques of nursery plants
 - labelling containers
 - checking orders against stock prepared
 - hydrating stock
- procedures and responsibility for reporting problems and anomalies
- procedures for liaising with customers
- procedures for maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a plant nursery or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - equipment, services and corresponding information
 - nursery stock
 - hygiene procedures, materials and equipment
 - system for recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, plant quality and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPVIT3005 Install and maintain vine trellis

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively installed and maintained a vine trellis at least twice and demonstrated the following:

- identifying health and safety hazards and controls in the workplace
- using and fitting personal protective equipment (PPE)
- carrying out trellis repairs according to workplace procedures
- laying out posts and supports according to workplace procedures
- cutting, securing, positioning and tensioning wires according to workplace procedures
- storing unused materials according to workplace procedures
- collecting and disposing of waste according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose, features and components of the trellis system:
 - trellis installation process
 - maintenance requirements of vineyard trellising and how to repair them
 - addressing non-conformances in trellis installation
 - selecting appropriate materials, including type and quantity
- health and safety hazards and controls in the workplace:
 - safe handling of materials and equipment
 - purpose and application of PPE
- how to repair a trellis, including:
 - positioning and depth of posts and strainers
 - positioning and number of wires

- tightness and grade of wire
- practices to lay out posts and supports, including:
 - spacing
 - type
 - numbers
 - positioning
- practices to run out wire including:
 - positioning
 - cutting correct length
 - erecting trellis ends and assemblies
 - securing of ends
- methods of attaching foliage and trellis wires including:
 - spacing
 - alignment
 - height
 - tension
 - fixing method
 - joining systems
- operation of trellising equipment:
 - checking equipment
 - using hand tools
- environmental issues, controls and reporting requirements
- cleaning and storage requirements and procedures for equipment and materials.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a grape growing workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - trellising equipment, services and corresponding information
 - trellising materials
 - cleaning and storing procedures, materials and equipment
 - documentation and recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FBPVIT3006 Field graft vines

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively grafted vines in the field on at least two separate occasions including:

- selecting and preparing vine material for grafting, including disbudding
- using and fitting personal protective equipment (PPE)
- carrying out grafting of vines in the field according to workplace procedures
- conducting post-grafting treatment and packing of vines
- monitoring grafted vines, identifying and reporting non-compliances
- disposing of waste according to environmental workplace procedures
- recording and reporting results of grafting according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of grafting
- various methods of budding and grafting
- criteria for successful grafting
- criteria for selecting parent vines for scion material:
 - variety and clone
 - matching cambium
 - matching bevels and sizes
 - viable buds
 - achievement of tight unions
- preparing vine material for grafting:
 - soaking buds
 - working appropriate incisions

- hot water treatment of cuttings
- virus tests
- compatibility tests
- hydration of cuttings
- cutting to size
- grafting vines in the field:
 - bud location to graft
 - cohesion of graft union
- vine treatments after grafting:
 - securing with tape
 - painting
- waxing
- storing unused grafting material
- correct procedure and optimum conditions for the storage and handling of vine material until required for grafting
- advantages of using clonal and registered vine improvement material
- importance of selection and use of rootstock
- stages of the grafting procedure and their purpose
- procedures for monitoring the process and equipment operation to identify out-of-specification results or non-compliance:
 - percentage take
 - weather conditions
 - pests and diseases
 - common problems and corrective action required
- purpose, components and operation of grafting equipment:
 - routine maintenance procedures for equipment
- methods of callusing vine cuttings and the criteria for best callus development
- procedures and responsibilities for reporting problems
- work health and safety (WHS) hazards and controls:
 - selecting, fitting and using appropriate personal protective clothing and equipment
- environmental issues and controls
- cleaning requirements for work area and equipment
- recording requirements and procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a grape growing workplace or an environment that accurately represents workplace conditions

- resources, equipment and materials:
 - PPE
 - field grafting equipment and services
 - grape vines
 - cleaning procedures, materials and equipment
 - system for recording information
- specifications:
 - workplace procedures, including advice on company practices, safe work practices, and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT3007 Operate specialised canopy management equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to attach, set up, operate and detach canopy management equipment.

The unit applies to vineyard workers who carry out the operation of specialised equipment used in grape growing and take responsibility for their own work using discretion and judgement in the selection and use of available resources.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Prerequisite unit of competency for this unit is:

- AHCMOM202 Operate tractors

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for canopy management activities	1.1 Interpret and confirm job requirements 1.2 Confirm environmental guidelines and identify potential health

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>and safety hazards and controls according to workplace procedures</p> <p>1.3 Select and fit personal protective equipment according to job requirements</p> <p>1.4 Identify and plan canopy management requirements</p> <p>1.5 Select and ensure canopy management equipment is available and suitable according to workplace procedures</p> <p>1.6 Set, maintain and attach equipment to meet production requirements according to workplace procedures</p>
2. Operate canopy management equipment	<p>2.1 Start up equipment safely according to workplace procedures</p> <p>2.2 Apply canopy management techniques according to vine vigour, capacity and local conditions</p> <p>2.3 Monitor equipment performance to confirm canopy management is maintained within job requirements</p> <p>2.4 Identify and address non-conformances</p>
3. Shut down canopy management equipment	<p>3.1 Shut down, detach and clean canopy management equipment according to workplace procedures</p> <p>3.2 Clear, tidy and store materials and equipment from site on completion of canopy management activities according to workplace procedures</p> <p>3.3 Collect and dispose of waste generated by canopy management activities according to environmental and workplace practices</p> <p>3.4 Record workplace information according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information from a variety of workplace documents

Assessment Requirements for FBPVIT3007 Operate specialised canopy management equipment

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely and effectively set up, operated and shut down specialised canopy management equipment on at least one occasion including:

- recognising health and safety hazards in the workplace and applying controls
- selecting and using personal protective equipment (PPE)
- attaching and setting up equipment to meet job requirements
- starting, operating, and shutting down equipment safely and according to workplace procedures
- taking corrective action according to non-conformances
- disposing of waste according to workplace procedures
- recording information according to workplace procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- key factors affecting the canopy management technique, including:
 - climate, forecast and current weather conditions
 - vineyard aspect and terrain
 - grape variety and vigour
 - grape quality and characteristics required
 - trellis design
 - harvesting techniques
 - disease risk and occurrence
 - stage of maturity and development
- canopy management equipment, operating parameters and procedures

- factors influencing vine vigour:
 - grape variety
 - trellis design
 - vine spacing
 - fertilisers
 - irrigation
 - rootstock
- features and benefits of a range of canopy management styles and techniques and their respective effect on grape quality, cropping yield and wine production requirements, including techniques to manage:
 - light penetration and shading
 - air circulation and disease reduction
 - annual growth stages of vine development
 - crop quality and quantity
- significance and method of monitoring canopy management activities
- purpose and basic components of canopy management equipment
- operational procedures for equipment:
 - attaching equipment to tractor
 - setting up equipment to meet requirements
 - confirming equipment status and condition
 - operating equipment to meet requirements
 - starting and shutting down equipment
 - recognising equipment performance problems and rectifying and reporting
 - cleaning and storing equipment
 - detaching equipment from tractor
 - using appropriate cleaning techniques
 - carrying out routine maintenance of equipment
- monitoring canopy management activities:
 - width of canopy
 - speed of tractor and power take-off rpm
 - density of foliage
 - air circulation
 - light penetration or shade
 - bud numbers, spur length
 - vine damage
 - rate of progress
- health and safety hazards and controls in the workplace
- selecting, fitting and using PPE
- environmental issues and controls
- basic vine canopy problems or anomalies

- taking corrective action in response to non-conformances
- system for reporting problems
- cleaning and storage requirements and procedures for equipment
- maintaining workplace records.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a vineyard or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - canopy management equipment, services and corresponding information
 - vines requiring canopy management
 - cleaning procedures, materials and equipment
 - documentation and recording requirements and procedures
- specifications:
 - work procedures, including advice on company practices, safe work practices, canopy management and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FBPVIT3008 Operate a mechanical harvester

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to set up and operate a mechanical harvester to meet harvesting requirements.

The unit applies to individuals who are required to follow workplace procedures in completing tasks associated with the operation of a mechanical harvester.

All work must be carried out to comply with workplace procedures according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Viticulture (VIT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for mechanical harvesting	1.1 Confirm job requirements 1.2 Identify potential health and safety hazards and environmental controls according to workplace procedures 1.3 Select, fit and use personal protective equipment according to job requirements

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Ensure materials and equipment are ready for use according to workplace procedures 1.5 Set up and maintain equipment according to workplace procedures
2. Operate mechanical harvester	2.1 Start up and operate equipment according to workplace procedures 2.2 Monitor equipment performance 2.3 Adjust equipment operation according to workplace procedures 2.4 Identify and address non-conformances
3. Complete mechanical harvesting operations	3.1 Shut equipment down according to workplace procedures 3.2 Clean and store equipment according to workplace procedures 3.3 Collect, treat, dispose of waste according to environmental and workplace procedures 3.4 Record workplace information according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret information from a variety of workplace documents
Oral Communication	<ul style="list-style-type: none"> Converse clearly to confirm job requirements

Assessment Requirements for FBPVIT3008 Operate a mechanical harvester

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has set up and safely operated a mechanical harvester to meet harvesting requirements on at least one occasion including:

- following health and safety in the workplace procedures
- selecting, fitting and using personal protective equipment (PPE)
- preparing, attaching and setting up equipment according to workplace procedures
- starting, operating and shutting down equipment according to workplace procedures
- adjusting operation to suit weather and terrain conditions
- identifying and addressing non-conformances
- managing the disposal of waste according to environmental workplace procedures
- recording information according to procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- health and safety hazards and environmental controls in the workplace
- PPE
- key grape varieties and their distinguishing features for harvesting:
 - berry and bunch characteristics
 - frost and disease resistance
 - flavour and style as it applies to harvest
 - factors that affect grape ripening
 - effect of fruit quality on wine
- purpose of mechanical harvester components and operation including:
 - crop level

- grape variety
- vine age
- row height, width and trellis design
- slope, angle of row
- visibility
- monitoring mechanical harvester operation:
 - vine damage
 - grape quality and maturity
 - harvesting effectiveness (amount of fruit left in fruiting zone)
 - matter other than grape (MOG) collected
- maintenance procedures for equipment
- procedures and responsibility for non-conformances
- cleaning and storage procedures.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a wine agricultural or horticultural workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE
 - equipment, services and corresponding information
 - cleaning procedures, materials and equipment
 - a system for recording information
- specifications:
 - work procedures, including advice on equipment operations, company practices, safe work practices and environmental requirements
 - work instructions and schedules.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FDFGR3002A Demonstrate knowledge of animal nutrition principles

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the animal nutrition knowledge required by stockfeed milling operators who are required to liaise with nutritionists, other technical and professional staff and customers.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to stockfeed operators who are required to have knowledge of animal nutrition principles and the effect of stockfeed on animal performance. This knowledge would be applied in liaison with professional and technical staff on customer requirements and in liaison directly with customers.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify nutrition purpose of stockfeed product	<p>1.1. Target species, animal type and phase of animal growth supported by stockfeed product are identified</p> <p>1.2. Production purpose of animal raising and range of desired products are identified</p> <p>1.3. Particle size, pellet quality and other factors affecting palatability for target animals are identified</p> <p>1.4. Impact of stockfeed on animal performance is identified</p>
2. Identify key quality factors affecting stockfeed performance	<p>2.1. Feed safety requirements for target species and phase of animal production are identified</p> <p>2.2. Type and proportion of raw materials in stockfeed and their effect on animal performance are identified</p> <p>2.3. The purpose of additives on animal performance and stockfeed quality are identified</p> <p>2.4. Effects of processing on stockfeed nutrition quality and animal performance are identified</p> <p>2.5. Substitution guidelines, including the effect of substitution on stockfeed performance, are understood</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and interpret workplace information, including standard operating procedures (SOPs), labels, recipes, customer supplied information and material data safety sheets (MSDS)
- use and application of workplace terminology
- sequence information against production processes
- assess quality standards
- identify resources in the enterprise for further information, including nutritionists, other technical and professional specialist and reference materials

Required knowledge

Knowledge of:

- typical nutrition requirements of animals supported by stockfeed, including horses, beef cattle, dairy cattle, pigs, sheep, poultry (both meat and egg production) and marine animals (aquaculture). Knowledge would be restricted to standard daily requirements of main food groups (proteins, carbohydrates etc), typical daily volume of feed required and type of feed (e.g. solid, liquid, plant or animal based)
- how nutritional needs of target animal may vary according to species, gender, health, pregnancy, lactation, age, season, geography, production purpose and form of production and feeding, e.g. feedlot, free range, use of stock feed for supplementary or full feeding
- factors affecting animal acceptance of stockfeed, including palatability and presentation
- range of raw materials typically used in stockfeed, including grains, molasses/liquids, proteins (vegetables and animal), additives (vitamins, minerals and medications) and fibre
- impact of operator controlled factors on stockfeed quality, including temperatures, moisture, sizing, sieving and liquid additions
- impacts of stockfeed on animal performance, including positive effects on animal performance and effects of incorrect feed on animal safety, animal performance and export contamination

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Evidence is required of animal nutrition and performance requirements that are affected by stockfeed related factors, such as ingredients, recipe, processing and presentation. Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • identify and interpret customer requirements from stockfeed • relate stockfeed type to animal nutrition and production requirements • liaise with nutritionist and other professional and technical staff on animal nutrition requirements of stockfeed.
Context of and specific resources for assessment	The candidate is to be assessed on animal nutrition and production knowledge relevant to the stockfeed products and processes in the workplace.
Method of assessment	Evidence may include third party report, portfolio, work documentation, response to questions, and so on, that address the performance criteria and critical aspects for assessment.
Guidance information for assessment	Performance against this standard must be assessed in an industry context. For valid and reliable assessment the activity should closely replicate the work environment, circumstances and equipment likely to be encountered in a workplace.

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Stockfeed production

Stockfeeds commercially produced by enterprises as well as customer provided formulations.

The range of stockfeed can include:

- pellets
- liquids
- mashes
- blocks

Target species

Target species may include:

- land and marine animals raised commercially for meat, skin products and milk

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the grinding equipment and process for operation	<p>1.1. Materials are confirmed and available to meet production requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the grinding process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted according to environmental standards</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the grinding process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services to the grinding process
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- operate stockfeed control panel to transfer and grind product
- monitor and adjust the grinding process and equipment operation to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, and running adjustments to hammer mills and roller mills
- monitor supply and flow of materials to and from the grinding process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- demonstrate batch/product changeovers
- sort, collect, treat, recycle or dispose of waste
- maintain work area to meet housekeeping standards
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the grinding process, including the characteristics of materials, which can be reduced to a suitable form for product such as stockfeed
- basic operating principles of equipment, such as main equipment components, bulk materials transfer systems and equipment, dust collection equipment, grinding equipment operating capacities and applications, and the purpose and location of magnets, sensors and related feedback instrumentation
- services required and action to take if services are not available
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- the flow of the grinding process and the effect of product output on downstream processes
- quality characteristics and uses of grinding process outputs
- effect of the grinding process on the end product
- effect of raw material characteristics on grinding process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the grinding process and related control measures

REQUIRED SKILLS AND KNOWLEDGE

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the risk of dust explosion and an understanding of the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for grinding
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards

EVIDENCE GUIDE	
	<p>and controls</p> <ul style="list-style-type: none"> • safely shut down equipment • apply food safety procedures to work practices.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions • specifications, control points and processing parameters • production schedule/batch instructions • information on equipment capacity and operating parameters • grinding and related equipment and services • stock required for the grinding process • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standard Code, including the labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • conveyors/elevators • augers • magnets • fans • sieves • hammer mills • roller mills • breaker bars • cyclones
Materials	<p>Materials include:</p> <ul style="list-style-type: none"> • grains

RANGE STATEMENT	
	<ul style="list-style-type: none"> • pulses Pulses are legumes typically include: <ul style="list-style-type: none"> • peas • beans • lentils
Shutdown procedures	Shutdown procedures may include: <ul style="list-style-type: none"> • cleaning(in some cases cleaning may be carried out by a dedicated cleaning crew)
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: <ul style="list-style-type: none"> • power • steam • water • vacuum • compressed and instrumentation air

FNSFMK512 Apply knowledge of emissions markets

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to participate in and provide specialist advice on defined financial products in the emissions markets.

It applies to individuals who use specialised knowledge (including the mandatory knowledge outlined in ASIC RG146 Appendix A2.11), analytical skills and systematic approaches to manage the provision of advice to clients.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the FNS Implementation Guide Companion Volume or the relevant regulator for specific guidance on requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Comply with regulatory framework unique to emissions markets	1.1 Identify domestic and international regulatory framework within which emissions reduction schemes are placed 1.2 Identify key legislation, regulation and industry codes of practice relevant to operating within Australian emissions markets 1.3 Comply with relevant legal and regulatory principles when operating in emissions markets 1.4 Discuss regulatory risk for both voluntary and regulated

ELEMENT	PERFORMANCE CRITERIA
	emissions markets, and determine possible impacts of pending regulatory or legislative change
2. Evaluate scope and impact of emissions markets	2.1 Identify regulated and voluntary carbon markets and outline how they operate 2.2 Distinguish respective supply and demand drivers for voluntary and regulated markets 2.3 Describe price drivers for emissions products 2.4 Differentiate participants in carbon markets and motivations for their participation 2.5 Distinguish functions of primary and secondary emissions markets 2.6 Discuss auction types and processes 2.7 Describe functions, requirements and rules for registries
3. Identify types of emissions products, their characteristics and liabilities	3.1 Compare different types of emissions products and instruments traded in compliance and voluntary markets 3.2 Identify key features of compliance market products 3.3 Describe risks inherent within each product and their potential impact in given context 3.4 Describe transactional processes for each product, including acquiring, transferring and surrendering 3.5 Describe tax treatment of emissions products, including deductibility of costs where relevant
4. Apply knowledge of emissions products	4.1 Determine relevant information influencing the market 4.2 Analyse relevant information when selecting products for emissions markets transaction 4.3 Devise strategies for using emissions market products 4.4 Seek advice, guidance and specialist expertise when required 4.5 Apply knowledge of financial market transactional processes when operating in emissions markets 4.6 Complete relevant documentation and complete any additional organisational processes
5. Maintain emissions market knowledge	5.1 Review relevant emissions trading markets sources regularly and apply any changes in daily work 5.2 Maintain professional competence in market knowledge in accordance with codes of conduct and/or organisational

ELEMENT	PERFORMANCE CRITERIA
	requirements 5.3 Implement processes for maintaining up-to-date knowledge of relevant aspects of emissions trading markets

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.4, 5.2, 5.3	<ul style="list-style-type: none"> Actively updates and maintains knowledge of changes to regulation, markets and emissions
Reading	1.1, 1.2, 2.1, 2.4-2.7, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> Accurately interprets and analyses complex information from a range of sources and consolidates information relevant to requirements
Writing	3.3-3.5, 4.6	<ul style="list-style-type: none"> Prepares documents, incorporating clear and detailed information organised sequentially for internal reference
Oral Communication	3.3-3.5	<ul style="list-style-type: none"> Uses language, terminology and concepts appropriate to the audience and purpose Participates in verbal exchanges to share, convey and clarify information
Numeracy	2.3	<ul style="list-style-type: none"> Uses mathematical equations to perform calculations to interpret pricing information
Navigate the world of work	1.3, 1.4, 2.5-2.7, 5.2	<ul style="list-style-type: none"> Identifies and follows relevant legislative requirements, and explicit and implicit protocols, policies and procedures, and meets expectations associated with own role Keeps up to date on changes to legislation or regulations and considers implications on work outcomes
Interact with others	4.4	<ul style="list-style-type: none"> Liaises with others, shares information, and seeks advice and guidance
Get the work done	4.3, 4.5, 4.6, 5.1	<ul style="list-style-type: none"> Plans and sequences complex tasks, and monitors and adapts work to incorporate changes in compliance issues

Assessment Requirements for FNSFMK512 Apply knowledge of emissions markets

Modification History

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- research, analyse and update information, including regulatory changes impacting on emissions markets and operations
- provide and apply specialist knowledge relating to emissions markets to daily work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and describe types of products and their characteristics including:
 - types of emissions units, and their characteristics (encompassing carbon units, Australian carbon credit units and eligible international emissions units)
 - characteristics of emissions units including their status as personal property, and how they are typically derived from inception to the point of acquiring status as a financial product
 - risks associated with each type of emission unit, including rating, restrictions on their use, transfer and bankability for future use
 - processes for acquiring, transferring and surrendering emissions units, including compliance with the requirements of the Australian National Registry of Emissions Units
- outline the operation of regulated and voluntary carbon markets including:
 - geopolitical context of carbon markets, including the influence of political and economic factors and corporate social responsibility
 - main participants in carbon markets, and their key objectives and participation behaviours as factors influencing market activity

- emissions unit supply and demand factors and regulated price factors influencing market activity and prices
- issue of carbon units via auction, and auction types
- types of transactions in carbon markets, including transactions relating to the carbon pricing mechanism and in voluntary markets, and the function of financial markets facilitating such trading (including internationally)
- potential trading strategies and their implementation in carbon markets (e.g. hedging and investment strategies)
- risks associated with carbon markets, including liquidity, pricing, credit, operational and regulatory risks
- carbon market transaction documentation, including documentation used for different types of counterparties and transactions, their key terms and conditions, and advantages and disadvantages
- explain the regulated emissions legal environment including disclosure and compliance, covering:
 - domestic regulatory framework for the carbon pricing mechanism, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units
 - domestic regulatory framework for the Carbon Farming Initiative, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units
 - international regulatory framework for carbon trading, including the Clean Development Mechanism
 - relevant legal principles (e.g. Corporations Act, ASIC Act, Privacy Amendment (Private Sector) Act, Australian National Registry of Emissions Units Act, National Greenhouse and Energy Reporting Act, Carbon Credits (Carbon Farming Initiative) Act, Clean Energy Act)
 - the relationship between ethical and regulatory requirements (e.g. good faith, utmost good faith, full disclosure of remuneration and/or fees and any other conflicts of interest that may influence the adviser's recommendation), and the application of these requirements in professional practice
 - relevant industry standards and codes of conduct
 - regulators' guidelines, including ASIC Regulatory Guide (RG)146 requirements
 - dispute resolution procedures (external and internal)
- outline the taxation obligations in the emissions market including:
 - taxation treatment of emissions units and taxation issues relating to emissions units
 - deductibility of costs associated with emissions units.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial markets field of work and include access to:

- office equipment, technology, software and consumables
- emissions markets information.

Assessors must satisfy NVR/AQF assessor requirements.

FSKNUM023 Estimate, measure and calculate measurements for work

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge to estimate and measure quantities, to convert units within the metric system and between metric and non-metric units, to calculate area and volume including compound shapes, and to use Pythagoras' theorem. It includes extracting and interpreting measurement information, applying problem solving processes to complete workplace measurement tasks, and communicating workplace measurement information.

An individual performing these tasks works independently and uses support from a range of established resources.

This unit applies to individuals who use, or are preparing to use, numeracy skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit should be integrated and contextualised with vocational training to support achievement of vocational competency.

This unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) numeracy core skill indicators .09, .10 and .11 at level 4 in the workplace and employment domain of communication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Numeracy

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Element	Performance Criteria
1. Extract and interpret complex workplace measurement information	<p>1.1 Extract a range of measurement information embedded in workplace tasks and texts in order to complete workplace measurement task</p> <p>1.2 Interpret a range of measurement information embedded in workplace tasks and texts in order to complete workplace measurement task</p>
2. Complete workplace measurement tasks	<p>2.1 Select mathematical and problem solving strategies to undertake workplace measurement task</p> <p>2.2 Estimate measurements and outcomes to complete workplace task</p> <p>2.3 Select and use relevant measurement equipment to take accurate workplace measurements</p> <p>2.4 Calculate with measurements to complete workplace task, including conversions of metric units</p> <p>2.5 Check and reflect on mathematics used, outcomes, initial estimates and workplace implications using estimation and evaluation techniques</p>
3. Communicate workplace measurement information	<p>3.1 Use formal, informal and some specialised written mathematical representation to document, interpret and communicate workplace measurement processes, results and implications</p> <p>3.2 Use formal, informal and some specialised mathematical language to discuss and explain workplace measurement processes, results and implications</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Sequencing multi-step calculations
Technology	<ul style="list-style-type: none"> Using a scientific calculator

Mapping Information

Supersedes and is equivalent to FSKNUM23 Estimate, measure and calculate measurements for work.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for FSKNUM023 Estimate, measure and calculate measurements for work

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- extract and interpret metric and relevant non-metric measurement information and units of measurement embedded in a complex workplace text or task related to area and volume
- perform complex measurements to complete a workplace task, including:
 - identifying and selecting relevant measurement tools and equipment appropriate to the workplace task
 - estimating the expected outcome prior to undertaking measurement and calculation
 - performing calculations with measurements, including:
 - converting between metric units
 - converting between metric and routine non-metric units
 - calculating the sides of right angle triangles using Pythagoras' theorem
 - 2D shapes, one of which must be a compound shape, using relevant routine formulas compound shape
 - calculating the volume of prisms and compound 3D shapes using relevant routine formulas compound 3D shapes.

In the course of the above the candidate must demonstrate use of relevant technology, such as calculators or spreadsheets.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- purpose of workplace measurement relevant to meeting workplace objectives
- purpose and meaning of metric and non-metric unit prefixes
- purpose, function, selection, set up and safe use of routine measurement tools and equipment

- methods to estimate, measure and calculate measurements
- names and basic properties of a range of 2D and 3D shapes
- relevant routine formulae to calculate areas and volumes
- purpose and application of Pythagoras' theorem
- mathematical symbols relevant to the task undertaken in the performance evidence
- estimation and evaluation processes
- implications of measurements, calculations and results for workplace tasks
- specialised, formal and informal mathematical written and oral language and symbolism of measurement
- relevant technology, such as calculators or spreadsheets.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Assistive technologies can be utilised to assist with oral and written communication.

Skills must be demonstrated using complex texts and tasks that reflect those typically found in a workplace.

The following resources are to be made available:

- a calculator
- measuring equipment relevant to workplace
- range of established familiar support resources.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, numeracy, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.

FSKRDG004 Read and respond to short and simple workplace information

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to identify and respond to information in short and simple workplace texts in printed or digital formats, such as short messages (SMS, email, handwritten), notices, simple procedures and instructions, short forms, rosters, simple diagrams and tables.

An individual performing these tasks works alongside an expert or mentor where prompting and advice can be provided as needed.

This unit applies to individuals who use, or are preparing to use, reading skills to complete workplace activities. This includes existing workers and individuals preparing for employment through vocational education and training. This unit can be integrated and contextualised with vocational training to support achievement of vocational competency.

This unit is aligned to, but does not fully address, the Australian Core Skills Framework (ACSF) reading core skill indicators .03 and .04 at level 1 in the workplace and employment domain of communication.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Reading

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to read short	1.1 Identify personally relevant reason for reading workplace text

Element	Performance Criteria
and simple workplace text	1.2 Identify text type 1.3 Identify audience and highly explicit purpose of text 1.4 Identify key text features
2. Interpret information in text	2.1 Locate relevant information in text for initial understanding 2.2 Identify high-frequency vocabulary in the information 2.3 Use reading strategies to interpret relevant information and construct meaning
3. Check and identify response to text	3.1 Check information has been correctly understood 3.2 Identify appropriate response to information in text

Foundation Skills

This section describes language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to FSKRDG04 Read and respond to basic workplace information and FSKRDG03 Read and respond to basic workplace instructions.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=f572fe10-a855-4986-9295-3852c771f178>

Assessment Requirements for FSKRDG004 Read and respond to short and simple workplace information

Modification History

Release	Comments
Release 1	This version first released with FSK Foundation Skills Training Package Version 2.0.

Performance Evidence

Evidence of the ability to complete tasks outlined in the elements, performance criteria, and foundation skills of this unit, including on at least one occasion, evidence of the ability to:

- interpret and identify appropriate responses to specific information in at least two different short and simple workplace texts, with at least one being workplace instructions.
-

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- personally relevant reasons for reading short and simple workplace texts
- types of short and simple workplace texts and forms
- clear, simple and familiar purpose and uses of short and simple workplace texts
- common features of short and simple workplace texts and their uses
- techniques to navigate short and simple workplace texts to locate general and specific information
- high-frequency words, basic sight words and common phrases
- reading strategies to support recognising and interpreting information in short and simple workplace texts
- methods to check understanding of text
- suitable responses to short and simple workplace information.
-

Assessment Conditions

Competency is to be assessed in the workplace, a workplace simulated environment or a vocational training context.

Skills must be demonstrated using short and simple information and texts that reflect those typically found in a workplace.

The following resources are to be made available:

- an expert or mentor to provide prompting and advice to learner, as needed
- pictorial or bilingual dictionary
- own familiar support resource
- short and simple workplace information.

Assessors must:

- satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards, and
- have sound knowledge of the ACSF and performance features of the ACSF level being assessed, and
- have demonstrable expertise, knowledge and skills in the vocational contextualisation and assessment of the core skill, reading, and
- have completed the following or equivalent:
 - TAESS00009 Address Foundation Skills in Vocational Practice Skill Set; or
 - a higher level education qualification, such as:
 - TAE80113 Graduate Diploma of Adult Language, Literacy and Numeracy Practice (and its equivalent TAE70111); or
 - Bachelor of Education, Graduate Certificate or Graduate Diploma of Education, or higher. This may include qualifications relating to TESOL, adult education or vocational education.
 -

FWPCOT2236 Fall trees manually (basic)

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess and manually fall small trees with a low level of complexity and to complete operator maintenance.

Basic trees typical to the scope of this unit may include the following characteristics:

- lean and distribution of the crown weight does not create a complex situation to assess or fell
- small dimensions relative to local forest size distribution
- no excessive lean
- no visible damage or defect
- species that are not prone to free splitting and adverse reactions during felling
- single stem or non-complex multi-stems
- diameter of tree is less than chainsaw bar length
- grown on terrain and slope that does not add significant complexity to the operation

The unit applies to those in a forest, agricultural, local council, emergencies services and other government agency environment. With the exception of minor forest produce, it is not relevant to commercial harvesting operations.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS <i>Elements describe the essential outcomes.</i>	PERFORMANCE CRITERIA <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for felling	1.1 Identify and adhere to work specifications and site environmental protection measures relevant to felling basic trees in line with organisational requirements and relevant regulations 1.2 Review and check job requirements with appropriate personnel 1.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations 1.4 Identify trees to be retained and felled 1.5 Establish and maintain communication with others according to WHS requirements
2. Prepare for felling	2.1 Review location and stability for conditions likely to affect felling activities 2.2 Identify and report site environmental conditions to appropriate personnel 2.3 Identify and control potential and existing risks and hazards 2.4 Monitor and exclude location and activity of other personnel on the work site
3. Assess tree and plan felling	3.1 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required 3.2 Confirm that tree is safe to fell 3.3 Visually assess tree for felling characteristics, defects and stresses 3.4 Assess and check required falling direction and possible deviation 3.5 Plan sequence of cuts to fell tree according to standard felling procedures 3.6 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements
4. Apply tree felling techniques	4.1 Fell individual trees using selected cutting techniques according to WHS and job requirements 4.2 Adjust cutting technique in response to movement and condition of tree

ELEMENTS	PERFORMANCE CRITERIA
	<p>4.3 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable</p> <p>4.4 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen</p> <p>4.5 Identify and implement procedures for removal of trees that are hung-up</p> <p>4.6 Dispose of waste materials in line with environmental and operational requirements</p>
5. Maintain equipment	<p>5.1 Inspect equipment on completion of trimming and cutting activities</p> <p>5.2 Identify damaged saws and cutting attachments for repair or replacement according to organisational requirements and manufacturer recommendations</p> <p>5.3 Remove, clean, adjust or replace chain and other components according to manufacturer recommendations</p> <p>5.4 Maintain tools and equipment according to WHS requirements and manufacturer recommendations</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	<ul style="list-style-type: none"> • estimate tree dimensions, including height, length, diameter and volume • complete routine calculations and report on size, length, diameter of felled trees.
Oral communication skills to:	<ul style="list-style-type: none"> • select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees • interpret hand signals with other operators to ensure safe tree felling
Reading skills to:	<ul style="list-style-type: none"> • interpret: <ul style="list-style-type: none"> • workplace health and safety and other organisational procedures • work orders • manufacturers' maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> • complete accurate basic records for tree felling process, equipment faults and maintenance requirements.

Planning and organising skills to:	<ul style="list-style-type: none">• identify an unsafe tree• efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.

Assessment Requirements for FWPCOT2236 Fall trees manually (basic)

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at a basic level
- comply with organisational policies and procedures relevant to felling trees manually at a basic level
- comply with applicable licensing or certification requirements relevant to felling trees manually
- effectively communicate and use safe working practices, including maintaining an awareness of activity by other personnel in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at a basic level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route

- fell basic trees using a appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up
- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at a basic level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
 - PPE and clothing
 - safety equipment
 - first aid equipment
 - firefighting equipment
 - hazard and risk control procedures
 - fatigue management procedures
 - appropriate signage
 - elimination of hazardous materials and substances procedures
 - safe forest practices, including required actions relating to fire
 - techniques for manual handling, including shifting, lifting and carrying
- types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
 - shakes
 - insect defects
 - knots and resin pockets
 - pipe
 - drysides
- identifying trees:
 - that contain hazards and are deemed unsafe to fell
 - considered outside own skill level
 - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
 - uneven and unstable terrain
 - unsafe trees
 - fires
 - overhead and underground services

- excavations
- traffic
- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
 - native vegetation
 - soil and water
 - heritage and archeological artefacts
 - flora and fauna
 - geomorphologic features
 - landscape
 - external site pollution
 - recreational opportunities
 - regeneration opportunities
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on basic tree felling activities:
 - general forest lean
 - ground growth
 - ground hazards and obstacles
 - ground slope
 - gullies
 - presence and density of seed and habitat trees
 - water courses
 - wet and adverse weather conditions
 - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
 - warning signs
 - chainsaw and components
 - PPE and clothing
 - first aid equipment
 - maintenance requirements
 - support tools.

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment that contains small trees with a low level of falling complexity
- PPE and clothing including:
 - safety helmet
 - safety gloves
 - protective footwear
 - eye protection
 - hearing protection
 - high visibility clothing
 - leg protection (trousers or chaps)
- materials and equipment including:
 - warning signs
 - chainsaw and components
 - first aid equipment
 - maintenance tools and equipment
 - support tools
 - manufacturers' instructions for use and maintenance of equipment
 - radio or communication device
 - fire fighting equipment (if prescribed)
- specifications and work instructions, including
 - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
 - policy and procedures for work health and safety (WHS)
 - risk assessment plan
 - general and specific environmental requirements
 - relevant state or territory logging code of practice
 - emergency and evacuation procedures
 - fire protocols
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2237 Maintain chainsaws

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to maintain engine or electrically operated hand-held chainsaws. It includes sharpening chains and completing routine and frequently required service requirements as well as periodic servicing. Work is completed in a variety of work settings including a forest environment, agricultural, workshop, arboretum and horticultural settings.

The unit applies to chainsaw operators.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Common Technical

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for chainsaw maintenance	1.1 Select appropriate personal protective, maintenance and repair equipment and check for operational effectiveness in line with manufacturer's recommendations.

ELEMENTS	PERFORMANCE CRITERIA
	1.2 Plan repair and maintenance activities in line with manufacturer's instructions and recommendations and organisational requirements
2. Complete chainsaw maintenance	2.1 Follow organisational safety procedures to lock out equipment. 2.2 Complete routine and frequently required service requirements on chainsaws in line with manufacturer's instructions and organisational requirements 2.3 Complete periodic service requirements on chainsaws in line with manufacturer's recommendations and organisational requirements 2.4 Check chain for bluntness or damage. 2.5 Remove, sharpen, adjust and replace chain and other components in line with manufacturer's recommendations. 2.6 Identify, diagnose, tag and report chainsaw faults, malfunctions or irregular operation for repair or replacement. 2.7 Reassemble serviced chainsaw components, check for operational effectiveness, tag and store.
3. Complete maintenance records and clean up	3.1 Complete, process and maintain records and reports in line with organisational procedures. 3.2 Clear and clean work area and tools, and dispose of and recycle waste materials in line with environmental protection practices.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> • calculate ratios and measure quantities of oils and fuels.

Assessment Requirements for FWPCOT2237 Maintain chainsaws

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement. This is the first release of this unit in the new standards format.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete these routine and frequently required service requirements on chainsaws in line with manufacturer's instructions:
 - removing, checking and cleaning air filter for damage and penetration of foreign material
 - cleaning saw body, air intake vents and cooling fins
 - cleaning chain brake
 - inspecting chain and guide bar
 - checking screws and nuts for tightness
 - checking safety devices
 - filling fuel tanks and chain oil tanks
- complete these types of periodic service requirements on chainsaws in line with manufacturer's instructions:
 - replacing drive sprocket
 - cleaning or replacing and setting spark plug
 - checking and replacing fuel filter
 - checking chain brake, oil system, flywheel assembly, anti-vibration system, muffler and spark arrestor
 - inspecting and replacing starter cord and starter spring

- matching pitches and gauges of cutting components
- dressing and cleaning cutter bar
- cleaning fly wheel
- removing and cleaning exhaust and fire screen
- complete these activities to check and sharpen chain saw chains in line with manufacturer's instructions:
 - inspecting and adjusting chain
 - inspecting and replacing chain that is worn, damaged or incorrectly sharpened
 - sharpening chain types and setting of depth gauges.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- types, purpose, features and operation of chainsaws for which repairs are completed
- features and names of different parts of chainsaws
- purpose, features and operation of tools and equipment used to repair and maintain chainsaws
- specifications and types of bars, chains and sprockets
- differences between frequent and periodic chainsaw maintenance requirements
- techniques for:
 - removing chains and other chainsaw components
 - assessing chain condition
 - sharpening chains to specified requirements
 - reassembling chainsaw components
- hazards for maintaining chainsaws and methods to minimise associated risks:
 - loud noise and exhaust fumes
 - mechanical vibration
 - handling hazardous substances
 - cuts and hot surfaces
 - rotating parts
- organisational procedures specific to repairing and maintaining chainsaws:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection practices for repairing and maintaining chainsaws:
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials
 - disposing of hazardous substances.

Assessment Conditions

The following resources must be made available:

- engine or electrically operated hand-held chainsaws
- tools and equipment used to repair and maintain chainsaws
- consumable chainsaw parts, oil and fuel
- personal protective equipment suitable for repairing and maintaining chainsaws including:
 - Safety boots
 - Safety helmet
 - Cut resistant leg protection
 - First aid kit
 - Hearing protection
 - High visibility clothing
 - Eye protection
 - Apron
 - Chain mesh gloves
- manufacturers' instructions and recommendations for repair and maintenance of chainsaws
- template documents for recording repairs, maintenance activities and equipment faults.
- organisational procedures for repairing and maintaining chainsaws.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2239 Trim and cut felled trees

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit describes the outcomes required to trim and cut felled trees with a chainsaw and to complete operator maintenance. It applies to situations where the production of timber is not the primary focus of the activity.

The unit applies to a forestry worker, chainsaw operator, forest harvester, harvesting technician and arboriculture worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Assessment Requirements for FWPCOT2239 Trim and cut felled trees

Modification History

Release	Comments
Release 3	This version released with FWP Forest and Wood Products Training Package Version 5.0.
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit.

There must be evidence that, on at least one occasion, the individual has:

- safely and efficiently used a chainsaw to complete these activities:
 - trim and cut hardwood or softwood trees
 - delimb trees
 - trim branches
 - trim burls and other small growths
- used the following cutting techniques:
 - bridging cuts
 - swinging cuts
 - side bind cuts
 - boring
 - wedge cut
 - ripping cuts
- trimmed and cut trees in varied weather conditions
- completed the following maintenance activities on a chainsaw:
 - sharpening
 - refuelling
 - inspection, identification and replacement of bar, chain, drive sprockets
 - bar oil checks and top up

- air filter, check, clean and replacement
- cleaning of saw body, air intake vents and cooling fans
- fitting spare chain and tension chain.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection measures including:
 - action to limit the impact of noise, wind speed and direction, fallen trees, ground slope, ground hazards and obstacles, general forest lean
 - action to limit the impact to ground growth, canopy, density of trees
 - action to limit the impact on flora, fauna and habitat
 - soil and water protection
- cleaning plant, tools and equipment
- disposing of, recycling and reusing timber and other waste
- key features of these varying site conditions and effects on tree cutting and trimming activities:
 - ground growth
 - ground hazards and obstacles
 - ground slope
- key features of these varying weather conditions and effects on tree cutting and trimming activities:
 - dry, wet and adverse weather conditions
 - low and moderate wind speed and direction
- typical tree defects and how they affect tree cutting activities:
 - splits
 - falling damage
 - fire damage
 - insect infestation
 - pipe
 - shake
 - twist
 - knots and resin pockets
 - the presence of foreign bodies such as stakes and nails
- typical tree stresses and how they affect tree cutting activities:
 - tension (fibres being stretched)
 - compression (fibres being squashed)
 - neutral fibres
- range of chainsaw cutting techniques:
 - bridging cuts

- swinging cuts
- side bind cuts
- delimiting
- boring
- wedge cut
- ripping cuts
- cutting patterns used to optimise time and recovery of product from trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- purpose, features, operation and basic non-specialist repair and maintenance of chainsaws
- methods for assessing chain condition
- organisational procedures specific to tree trimming and cutting activities:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting tree cutting outcomes, equipment faults and maintenance requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
 - chainsaws
 - chainsaw fuel and oil containers
 - support tools appropriate for work tasks (hammer, wedges, logging tape, cant hook and/or breaking bar)
 - mobile plant and equipment appropriate for work tasks (wood chipper and/or loaders)
 - maintenance tools and equipment for chainsaws
 - personal protective equipment suitable for cutting trees and maintaining chainsaws
- specifications:
 - manufacturer's instructions for use and maintenance of equipment
 - work order with specific instructions for tree cutting activities
 - template reports for recording tree cutting outcomes, equipment faults and maintenance requirements
 - organisational procedures for tree trimming and cutting activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2254 Maintain chainsaws

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the knowledge and skills required to maintain fuel or electrically powered hand-held chainsaws. The unit includes completing routine maintenance service as well as periodic maintenance servicing and chain sharpening.

The unit applies to individuals who maintain chainsaws for or as part of arboriculture, forestry, horticulture, agriculture, conservation and land management, local government, emergency services and other government agency operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT2254 Maintain chainsaws

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, on one occasion, the individual has:

- completed the routine and frequently required service requirements for one chainsaw according to manufacturer instructions
- completed the periodic service requirements for one chainsaw according to manufacturer instructions
- checked and sharpened at least two chains according to manufacturer instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types, purpose, features and operation of chainsaws
- features and names of different parts of fuel powered and electrically powered chainsaws
- purpose, features and operation of tools and equipment used in chainsaw maintenance activities
- specifications and types of bars, chains and sprockets
- differences between frequent and periodic chainsaw maintenance requirements
- techniques for:
 - removing chains and other chainsaw components
 - assessing chain condition
 - sharpening chains to specified requirements
 - reassembling chainsaw components
 - assessing battery condition, if applicable, and visually inspecting state of electrical cords and plugs for electrically powered chainsaws
- hazards associated with maintaining chainsaws, and methods to minimise associated risks:
 - noise
 - fumes

- mechanical vibration
- hazardous substances
- cuts
- burns
- rotating parts
- electric shock for electrically powered chainsaws
- workplace procedures specific to maintaining chainsaws:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
 - communication reporting lines
 - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection practices relevant to maintaining chainsaws:
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials
 - disposing of hazardous substances.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a workplace location or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - fuel or electrically powered hand-held chainsaws
 - tools and equipment used to maintain chainsaws
 - consumable chainsaw parts, oil and fuel
 - PPE required in chainsaw maintenance activities
- specifications:
 - access to work order or instruction detailing chainsaw maintenance activities to be carried out by operator
 - access to workplace safety and environmental policies and procedures applicable to chainsaw maintenance activities
 - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT2273 Trim and cut felled trees

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Application

This unit describes the skills and knowledge required to trim and cut felled trees with a chainsaw, and complete operator maintenance.

For the purpose of this unit of competency, a felled tree is any tree or part thereof, including, but not limited to, a tree trunk, branch or limb that has fallen or has been felled and is laying on the ground in a bushland, plantation, forested or other setting, including parkland, roadways and urban areas.

The unit applies to individuals who trim and cut felled trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation, standards and industry codes of practice that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPCOT2273 Trim and cut felled trees

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed and planned trimming and cutting of one felled tree
- trimmed branches and cut sections of felled tree using all cuts listed below:
 - bridging cuts
 - swinging cuts
 - boring cuts
 - wedge cuts
 - ripping cuts
 - stagger or step cuts.

In performing this task, the individual has:

- followed workplace policies and procedures, current workplace health and safety legislation, regulations and related industry standards and codes of practice applicable to trimming and cutting felled tree operations
- checked and sharpened or changed a saw chain post trimming and cutting on one occasion according to manufacturer instructions.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection measures suitable for a worksite where trimming and cutting operations are performed, including:
 - noise control
 - protection of flora, fauna and habitat

- protection of soil
- protection of water
- disposal, recycling and reuse of waste
- cleaning of plant, equipment and tools
- protection of adjacent land uses and fixed assets
- vehicle control
- access restrictions
- fire prevention
- protection of cultural heritage
- hazard control measures suitable for a worksite where trimming and cutting operations are performed, related to:
 - trees and other vegetation
 - ground conditions
 - noise
 - fire and other emergency situations
 - vehicle and traffic access
 - foot access
 - plant, tools and equipment
 - weather conditions
 - adjacent land uses
 - dangerous goods
- tree defects and how they affect tree cutting activities, including:
 - splits
 - falling damage
 - fire damage
 - insect infestation
 - pipe
 - shake
 - twist
 - knots and resin pockets
 - the presence of foreign bodies such as stakes and nails
- felled tree stresses and how they affect tree cutting activities, including:
 - tension (fibres being stretched)
 - compression (fibres being squashed)
 - neutral fibres
- chainsaw cutting techniques and associated hazards, including:
 - bridging cut
 - swinging cut
 - side bind cut
 - boring cut

- wedge cut
- ripping cut
- stagger or step cut
- cutting patterns used to optimise time and recovery of product from felled trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- purpose and procedures for routine operator maintenance of chainsaws
- procedures used to free a pinched or stuck chainsaw
- methods for assessing chain condition
- workplace procedures specific to felled tree trimming and cutting activities, including:
 - workplace health and safety, with particular emphasis on equipment lock-out and use of personal protective equipment (PPE)
 - communication reporting lines
 - reporting felled tree cutting outcomes, equipment faults and maintenance requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chainsaw and accessories
 - suitable felled trees to trim and cut
 - PPE required in trimming and cutting felled trees
 - communication system
- specifications:
 - access to workplace health and safety and environmental protection policies and/or procedures applicable to trimming and cutting operations and chainsaw use
 - access to workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to navigate in untracked, remote areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids.

The unit applies to a Forestry Worker, Plantation Worker, Forest Harvester, Harvesting Technical Forestry Technician, Tree Planter, Mobile Equipment Operator and Arboriculture Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>

1. Prepare for navigation	<p>1.1 Identify and gather information and relevant factors and check with appropriate personnel.</p> <p>1.2 Select suitable maps, equipment and navigation aids and check for accuracy, currency and operational effectiveness.</p> <p>1.3 Detect and correct faults or errors in maps and equipment.</p> <p>1.4 Establish communication with others in line with WHS and organisational requirements</p>
2. Plan the route	<p>2.1 Plan route in line with work instructions and WHS requirements.</p> <p>2.2 Examine maps to identify relevant symbols, information, navigation data and environmental requirements.</p> <p>2.3 Calculate accurate grid and magnetic bearings using maps and equipment in line with assignment instructions.</p> <p>2.4 Plan emergency exit routes and contingencies to combat other risks.</p>
3. Conduct navigation	<p>3.1 Undertake navigation in line with planned route and schedule.</p> <p>3.2 Orientate maps are correctly to surroundings in line with planned route.</p> <p>3.3 Use equipment and navigation aids in line with manufacturer recommendations.</p> <p>3.4 Navigate alternative routes to bypass obstacles and improve efficiency of course.</p> <p>3.5 Minimise impact on the environment as a result of navigation.</p> <p>3.6 Record and report navigation activities.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> • interpret scales, symbols, grid references, distance and data included on maps and navigation equipment • estimate travel time and distances • locate own position on a map.
Planning and organising skills to:	<ul style="list-style-type: none"> • estimate resource and equipment requirements • effectively bypass obstacles.
Problem solving skills to:	<ul style="list-style-type: none"> • identify and solve problems with equipment and navigation route.

Assessment Requirements for FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow organisational policies and procedures for navigating in a remote or trackless area
- select, interpret, and use maps and other written and diagrammatic information for navigation
- use maps, compass and navigation aids to plan routes and navigate in remote or trackless area which must be either:
 - standard magnetic compass using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
 - global positioning system (GPS)
 - cadastral maps (maps that show the boundaries and ownership of land parcels)
 - topographic maps
 - general maps
- plan and conduct an efficient navigation, effectively bypassing obstacles within designated timeframes
- maintain navigation tools and equipment
- establish and maintain effective communication with appropriate personnel as required
- record navigation activities.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for navigating in a remote or trackless area

- environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition on completion of activity
- organisational and site standards, requirements, policies and procedures for navigating in remote or trackless areas
- factors that may affect navigation, including:
 - types of terrain and gradient
 - weather conditions
 - obstacles
 - distance
 - estimated travelling time
 - availability of resources, including water, rest stops, camp sites
 - access and exit routes
- use and features of various maps, images and charts including:
 - cadastral and topographic maps
 - charts
 - guide books
 - photographs and other digital imagery
 - sketches
 - diagrams
- representation of topographic features on maps and plans, including:
 - grid lines and numbers
 - contour lines
 - magnetic variation
 - scale
 - map legend
 - local features
 - markers and beacons
 - water depth
- common scales and reference information used on maps and plans
- features and uses of environmental navigation aids:
 - survey markers
 - track markers and beacons
 - signs
 - arrows
 - natural landmarks and reference points
- purpose, features and operation of navigation equipment, and procedures for their safe use and maintenance, including
 - global positioning system (GPS) device
 - magnetic compass, including adjustment for local magnetic variation
 - locator beacons

- personal protective equipment and clothing
- techniques for estimating distance travelled within a particular activity context
- established communication modes, methods and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- site to navigate
- navigation equipment
- work order, workplace requirements and site standards for navigating in remote or trackless areas.
- communication devices.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3238 Operate a pole saw

Modification History

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Application

This unit of competency describes the outcomes required to trim high branches reachable with a power driven pole saw and to promote tree growth by trimming and felling excess branches.

Power driven pole saw in this unit refers to professional standard pole-mounted chain saws that are typically fuel types, but may be battery powered, and generally telescopic.

It applies to those who operate a pole saw in a forest environment and includes equipment maintenance.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Elements and Performance Criteria

Element	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for	1.1 Identify and follow WHS, environmental, legal and organisational

trimming	<p>requirements for operating a pole saw.</p> <p>1.2 Review work order and clarify with appropriate personnel.</p> <p>1.3 Select equipment appropriate to work requirements and check for serviceable condition in line with manufacturer recommendations.</p> <p>1.4 Carry out pre-startup checks of pole saw in line with site requirements.</p> <p>1.5 Establish and maintain communication with others to ensure safety.</p>
2. Assess trees	<p>2.1 Identify and assess tree type, location and stability for safe working conditions.</p> <p>2.2 Plan the trim of a tree in line with site procedures and environmental conditions.</p> <p>2.3 Identify trees unable to be trimmed safely and refer to appropriate personnel.</p> <p>2.4 Determine whether the height of the branch is within safe reach when using the pole saw</p> <p>2.5 Establish general falling direction of branches and limbs to be trimmed and identify clear escape route.</p>
3. Trim trees	<p>3.1 Trim accessible branches and knots to specifications in line with manufacturer recommendations and organisational safe work practices for angle and height allowances.</p> <p>3.2 Monitor movement and whereabouts of other personnel to ensure work site is safe.</p> <p>3.3 Undertake sequence of cuts to trim tree branches.</p> <p>3.4 Operate pole saw in line with safety regulations, adjusting technique in response to condition of the tree.</p> <p>3.5 Diagnose unexpected characteristics of a tree during trimming operations and review tree assessment if required.</p> <p>3.6 Complete cutting once initiated, to minimise splitting.</p> <p>3.7 Clear cut branches from the site in line with standard operating procedures and environmental requirements.</p> <p>3.8 Record and report trimming activity.</p>
4. Conduct operator maintenance	<p>4.1 Follow lock-out procedures in line with WHS legislation and site procedures.</p> <p>4.2 Inspect condition of saw and other equipment on completion of trimming activities.</p> <p>4.3 Remove, sharpen, adjust or replace chain and other components, in line with manufacturer recommendations.</p> <p>4.4 Recycle, re-use or dispose of blunt or damaged chain and other</p>

	<p>components in line with environmental requirements.</p> <p>4.5 Clear pole saw of dust, shavings and debris and check to make sure it meets relevant operational standards.</p> <p>4.6 Record and report equipment faults and maintenance activity.</p>
--	---

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> sharpen chain with files set to correct angles.
Writing skills to:	<ul style="list-style-type: none"> record trimming activity and maintenance records.
Problem solving skills to:	<ul style="list-style-type: none"> to identify problems and equipment faults and select treatments identify appropriate branches to be trimmed assess the capacity and suitability of equipment to the task of trimming trees.

Release	Comments
Release 2	This version released with FWP Forest and Wood Products Training Package Version 3.0.
Release 1	This version released with FWP Forest and Wood Products Training Package Version 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- undertake trimming with a pole saw to correctly and safely demonstrate competency in the following:
 - assess trees and site conditions to work safely
 - correct use of safety attire and protective equipment
 - conduct pre-operational checks of pole saw
 - trim trees at safe height and angle in line with manufacturer recommendations and organisational safe working practices
 - select/adjust trimming sequence and cutting techniques in response to various tree characteristics and site conditions
 - conduct operator maintenance.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements and site standards for carrying out pole saw operations
- environmental risks and hazards associated with trimming trees with a pole saw
- characteristics of trees and timber defects
- Branch Bark Ridge (BBR) and Bark Branch Collar (BBC)
- appropriate trimming sequence and cutting techniques
- manufacturer recommendations and organisational safe working practices for operating a pole saw at safe height and angle limits
- methods for assessing condition of pole saw chain
- established communication channels and protocols

- problem identification and resolution strategies, and common fault finding techniques
- procedures for recording and reporting workplace information.
-

Assessment Conditions

The following resources must be made available:

- a professional standard fuel or battery powered pole-mounted chain saw with telescopic extension
- work order, workplace requirements and site standards for conducting pole saw operations
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3301 Trim trees using a pole saw

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to use a fuel or battery powered pole saw to trim tree branches within safe height and angle limits.

The unit applies to individuals who operate pole saws to trim tree branches as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPCOT3301 Trim trees using a pole saw

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed, planned and conducted the trimming of the accessible branches of six trees within safe height and angle limits using a pole saw
- followed workplace policies and procedures, current workplace health and safety legislation, regulations and related industry standards and codes of practice in completing the tree trimming work
- inspected and carried out routine operator maintenance on one pole saw on one occasion, including removing, sharpening, replacing and adjusting the chain, according to manufacturer requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and components of pole saws
- uses of pole saws to trim trees
- procedures for pole saw operations
- risks and hazards associated with trimming trees with a pole saw
- characteristics of trees and timber defects
- trimming sequence and pole saw cutting techniques for trimming trees
- safe height and angle limits for pole saw use when trimming trees
- criteria for assessing condition of pole saw chain
- procedures for removing, sharpening, adjusting or replacing pole saw chain and other components
- established communication channels and protocols for trimming trees with a pole saw
- problem identification and resolution strategies related to trimming trees with a pole saw

- procedures for recording and reporting workplace information related to trimming trees with a pole saw.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - an industry standard fuel or battery powered pole saw
 - tools and equipment used to maintain pole saws
 - consumable pole saw parts, oil and fuel
 - personal protective equipment required in pole saw operations
- specifications:
 - access to workplace safety and environmental policies and procedures applicable to use of pole saws for trimming branches
 - access to workplace procedures and forms for recording pole saw maintenance and faults
 - access to workplace standard operating procedures or operator manual for pole saws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for FWPCOT3314 Comply with soil and water protection

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- implemented either a soil or a water protection procedure in an operational work setting on one occasion
- followed workplace policies and procedures, current legislation, regulations and related industry standards and codes of practice applicable to soil and water protection operations
- monitored work practices in one operational work setting for consistency with soil and water protection requirements and made at least one recommendation on ways of improving work practices to enhance soil and water protection.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- regulations, standards, codes of practice and established safe practices for soil and water protection procedures
- applicable regulations from all levels of government that affect operations in relation to soil and water protection:
 - regional agreements
 - relevant codes of practice
 - operational plans
- workplace standards, requirements, policies and procedures relevant to soil and water protection
- techniques and measures relevant to erosion mitigation:
 - walk-over techniques
 - minimal disturbance techniques
 - crown and cross fall drainage

- cross bank drainage
- relief culverts on roads
- mitre and table drains on roads
- armouring/gravelling of roads
- crossing and draining surfaces
- batter stabilisation
- contour banks and channels
- gabions
- sediment basins
- riparian buffer zones
- outlet protection structures
- revegetation
- factors that are likely to influence soil and water protection measures:
 - track and road maintenance
 - drainage structures
 - setting of contour lines
 - slope measurement techniques
 - boundaries and survey markers
 - site preparation techniques
 - site cultivation techniques
 - disposal of logging waste materials
 - windrowing placement and techniques
 - tree selection and felling techniques
 - log dump locations and techniques
 - log extraction and haulage techniques
 - clearing techniques
 - soil types
- environmental features that can be adversely affected if soil erosion occurs, or if inundated with sediment of other pollutants:
 - trees, understorey and other vegetation
 - drainage lines and drainage depressions
 - water course, creeks and rivers
 - lakes, swamps and wetlands
 - aquatic species
 - steep slopes
 - caves
 - historic and cultural heritage sites
 - road and water supply infrastructure
- other pollution control measures:
 - fuel containment barriers

- chemical spillage barriers
- containment and removal of work waste, rubbish litter and human waste
- risks and hazard identification relevant to soil and water protection
- established communication channels and protocols for compliance with soil and water protection
- procedures for recording and reporting workplace information related to soil and water protection activities.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tools, equipment and machinery required for soil and water protection operations
 - personal protective equipment used in soil and water protection operations
 - communication system
- specifications:
 - access to workplace policies and procedures applicable to soil and water protection operations
 - access to operational plans
 - access to access to workplace procedures and forms for recording soil and water protection activities.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3325 Operate four wheel drive vehicle on unsealed roads

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the outcomes required to safely operate a four wheel drive vehicle on unsealed roads.

The unit applies to individuals who operate four wheel drive vehicles in a variety of work settings and industry sectors, including forestry, agriculture, construction, tourism and energy.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

Individuals must hold a driver licence or a provisional driver licence prior to commencing this unit of competency.

Pre-requisite Unit

Nil

Unit Sector

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for operations	1.1 Access, interpret and apply vehicle manufacturer information relevant to operating a four wheel drive vehicle on unsealed roads 1.2 Identify the structural and handling differences between a

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	conventional two wheel drive vehicle and a four wheel drive vehicle 1.3 Determine type of operation and ensure safe operating conditions 1.4 Identify, fit and use suitable personal protective equipment 1.5 Perform pre-start checks 1.6 Establish and check communication with others, including convoy procedures 1.7 Secure loads according to safety, environmental and regulatory requirements 1.8 Research weather and topography for a planned trip on unsealed roads
2. Operate vehicle on unsealed roads	2.1 Check and change tyre pressure suitable for unsealed road according to workplace procedures 2.2 Continually monitor the track to identify hazards, assess risks and select the best route according to safety and environmental requirements 2.3 Identify situations where the engagement of four wheel drive is required and engage front hubs or centre differential lock where fitted 2.4 Use range, gear, speed, driving and braking technique appropriate to surface conditions while maintaining control of vehicle at all times 2.5 Check brake operation and undercarriage after operating vehicle on unsealed road conditions 2.6 Park and shut down vehicle
3. Ascend and descend slopes less than 15 degrees	3.1 Inspect intended vehicle path before negotiation of slope 3.2 Use appropriate range, gear, speed, driving and braking technique to negotiate a slope while maintaining control of vehicle 3.3 Use appropriate braking methods, user applied and vehicle controlled function, where fitted, to descend a slope 3.4 Maintain traction and minimise wheel spin 3.5 Apply appropriate automatic and manual techniques when vehicle cannot proceed any further on a slope
4. Complete operation	4.1 Conduct a post-trip inspection of vehicle 4.2 Complete post-trip documentation, including maintenance and minor repairs reports

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and comprehend basic factual information on four wheel drive vehicle equipment labels and in manufacturer manuals
Writing	<ul style="list-style-type: none"> Complete workplace forms using required format, industry terminology and structure
Oral communication	<ul style="list-style-type: none"> Use effective verbal communication techniques to convey instructions to people involved in four wheel drive operation
Numeracy	<ul style="list-style-type: none"> Estimate time of a journey and fuel consumption

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed each of the following tasks while driving a four wheel drive vehicle on unsealed roads:

- driven three separate ascents and three separate descents less than 15 degrees. In conducting this task, the individual has:
 - selected appropriate range and gearing
 - used foot brake effectively to control descent speed
 - used vehicle hill descent or similar function where available
 - used the most appropriate wheel placement
- used on one occasion traction aids and brakes when driving ascents and descents less than 15 degrees
- performed on two occasions a forward and a reverse stop start recovery on an incline according to the type of transmission
- demonstrated on one occasion the setting of vehicle controls for operation on unsealed roads. This may include:
 - the use of free wheel hubs if fitted
 - selection of low range in either manual or automatic vehicles
 - use of terrain selection system if fitted
 - use of differential locks if fitted
 - activation of traction control or terrain selection mode if fitted and where effective
- driven vehicle and operated vehicle controls and technology to avoid traction loss on unsealed roads in three of the following conditions:
 - loose gravel
 - ruts
 - loose material in centre and sides of track
 - corrugations

- mud
- rocky
- sand
- snow
- side slopes
- rutted
- water crossing
- fitted and used personal protective equipment (PPE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- structural differences between conventional two wheel drive and a four wheel drive, including:
 - purpose and use of front wheel hubs
 - factors affecting tyre selection and pressure
- environmental protection requirements affecting four wheel drive operations
- common unsealed road surface hazards:
 - loose gravel
 - ruts
 - loose material in centre and sides of track
 - corrugations
- pre-start checks for four wheel drive vehicle
- types of communication equipment, including:
 - personal location beacon (PLB)
 - phone
 - radio
 - vehicle/personnel tracking devices
- safe operating conditions for a four wheel drive vehicle:
 - interpreting weather conditions to determine suitability for driving
 - selecting routes to minimise damage to the environment
 - visibility
 - loading of four wheel drive, including techniques to reduce overloading
 - braking techniques
 - cornering techniques
- types of environmental risks and hazards associated with operating a four wheel drive vehicle on unsealed roads, including:
 - rocks and other unexpected obstacles
 - damage to vehicle
 - animals and objects in vehicle path

- slippery surfaces
- overhead tree limbs
- other vehicles
- fallen trees, limbs and logs
- flood
- poor visibility
- tyre pressure management principles for varying terrain types
- principles for effective self-recovery of vehicle via driving skills (not the use of recovery equipment such as straps or winches)
- communication channels and protocols
- techniques for travelling in convoy
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site with access to unsealed roads
 - manual or automatic four wheel drive vehicle or all-wheel drive vehicle
 - PPE required for operating a four wheel drive on unsealed roads
 - relevant personnel for the purposes of communicating information
- specifications:
 - workplace safety and environmental policies and procedures applicable to forestry operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3326 Recover four wheel drive vehicle

Modification History

Release	Comments
Release 2	This version released with Forest and Wood Products Training Package Version 8.0.
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to use recovery equipment to recover four wheel drive vehicles in difficult terrain conditions.

The unit applies to individuals who recover four wheel drive vehicles in a variety of work settings and industry sectors, including forestry, agriculture, construction, tourism and energy.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

Individuals must hold a driver licence or a provisional driver licence prior to commencing this unit of competency.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- performed two kinetic rope and/or strap recoveries
- performed one of each of the following winch recoveries:
 - single line
 - double line
 - change of direction.

In conducting each of the above tasks, the individual has:

- estimated the recovery load using a recognised formula
- determined the Gross Vehicle Mass (GVM) of the vehicle/s in the recovery
- determined the rating of the equipment being used
- determined the most appropriate recovery strategy to be used
- assessed why the vehicle is bogged, taken action to ensure vehicle is in four wheel drive, taken action to clear obstructions from the vehicle, taken action to use traction boards where available, determined safest method of recovery if straps or winches are to be used
- determined the appropriate equipment to be used given the GVM, equipment rating and chosen strategy.

There must also be evidence that on one occasion the individual has joined two kinetic ropes and/or straps.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- safety procedures during recovery operations
- recognised formula used to estimate the recovery load and what variables apply to this formula
- reasons and procedures for establishing exclusion zone
- Gross Vehicle Mass (GVM):
 - identifying which vehicle's GVM should be used in relation to kinetic recovery
- ratings used on recovery equipment:
 - MBS (Minimum Breaking Strength) of ropes, straps and soft shackles
 - WLL (Working Load Limit) of hard shackles
 - drag chains
 - pulley blocks
 - pulley rings
 - winches (wire and/or rope)
- anchor point selection
- number, location and weighting of strap dampeners
- rated recovery points:
 - characteristics and purpose of rated recovery points
 - location of rated recovery points
 - what is and what is not a rated recovery point
- kinetic recovery:
 - kinetic recovery procedure
 - manufacturer recommendations on recovery techniques and equipment
- winches:
 - types, main components, ratings and manufacturer recommendation for use
 - effect of the layers of wrap of rope or wire on a winch drum
 - effects of a ring or snatch block on the load on a winch
 - impact of angle of rope or cable on recovery operation
 - procedures for easing the load on a winch
 - the reasons for not driving while winching
- maintenance of recovery gear:
 - straps/ropes
 - winches.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a work environment or an environment that accurately represents workplace conditions
 - work environment must include varied terrains and conditions from which to recover vehicle
- resources, equipment and materials:
 - four wheel drive to recover
 - rated recovery equipment for four wheel drive vehicle
 - relevant personnel for the purposes of communicating information
 - personal protective and safety equipment required for recovering a four wheel drive vehicle
- specifications:
 - workplace safety and environmental policies and procedures applicable to the recovery of four wheel drive vehicle.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3329 Perform complex four wheel drive operations

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to safely operate four wheel drive vehicles in difficult terrain. Difficult terrain has surface conditions that include frequent steeps and/or rocks, slippery or sandy track sections, and including possible water crossings.

The unit applies to individuals who operate four wheel drive vehicles in a variety of work settings and industry sectors, including forestry, agriculture, construction, tourism and energy.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

Individuals seeking to undertake this unit should have prior experience in operating four wheel drive vehicles on unsealed surfaces.

Individuals must hold a driver licence or a provisional driver licence prior to commencing this unit of competency.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed three separate ascents and three separate descents greater than 15 degrees for the safest route and the most appropriate wheel placement
- driven three separate ascents and three separate descents greater than 15 degrees, having selected appropriate range and gearing and using the most appropriate wheel placement
- used traction aids and/or brakes when driving ascents and descents greater than 15 degrees on one occasion
- performed a forward and a reverse stop start recovery on an incline according to the type of transmission on two occasions
- demonstrated the setting of vehicle controls for operation in complex terrain on one occasion. This must include:
 - the use of free wheel hubs, if fitted
 - selection of low range in either manual or automatic vehicles
 - use of differential locks, if fitted
 - activation of traction control or terrain selection mode, if fitted and where effective
- driven vehicle in difficult terrain and operated vehicle controls and technology to avoid traction loss in three of the following conditions:
 - mud
 - rocky
 - sand
 - side slopes
 - rutted
- completed two water crossing of at least axle depth
- recorded and reported repairs or replacement or damaged items on two occasions
- fitted and used personal protective equipment (PPE).

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- four wheel drive systems:
 - differences between four wheel drive, two wheel drive and all-wheel drive vehicles
 - types and operating principles of different four wheel drive systems
- planning trips
- sources of information for weather forecasts and road/track conditions:
 - water and food requirements for trip
 - emergency communication methods
 - first aid and first aid kit
- procedures for:
 - pre-departure vehicles check
 - track assessment
 - wheel placement over rutted, broken ground
 - using traction aids
 - driving ascents and descents greater than 15 degrees
 - performing a safe stop and start forward down a slope (greater than 15 degrees) and in reverse down a slope in manual or automatic vehicle
 - performing a water crossing of at least axle depth
 - driving in loose ground such as mud and sand
 - vehicle shutdown
- vehicle selection for complex four wheel drive activity:
 - high and low range or similar capability
 - requirement for wading depth according to manufacturer specifications
 - types, purpose and use of traction aids
 - types and uses of tyres for complex four wheel drive activity
 - impact of tyre pressure on traction
 - Gross Vehicle Mass (GVM) or Gross Vehicle Weight (GVW)
 - impact of loading and accessories on GVM or GVW
- type and use of personal protective equipment required for complex four wheel drive activity
- type of emergency equipment used in complex four wheel drive activity
- type and use of communications equipment used in remote locations
- purpose and procedures for securing loads
- types of road surfaces and impact on traction when ascending or descending steep slopes
- impact of wet weather on track conditions
- environmental impact of four wheel drive use on wet unsealed roads
- techniques for four wheel driving in difficult terrain
- reasons and procedure for post-trip vehicle inspection

- water crossings:
 - assessment of water crossings, including water base, water depth, flow rate and debris
 - vulnerable aspects of vehicle when completing water crossings
 - environmental impact of water crossings.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - site with access to a water crossing and difficult terrain with safe entry into and out of a waterway, shallow run-ins and a firm base. Simulated water crossings are acceptable for assessment if no suitable crossing is available due to little or no water level or flooded and unsafe to cross
 - manual or automatic four wheel drive vehicle with a low range transmission or equivalent
 - PPE required for operating a four wheel drive in difficult conditions and waterways
- specifications:
 - workplace safety and environmental policies and procedures applicable to the use of four wheel drive vehicles in difficult conditions and waterways.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3350 Fell trees manually (intermediate)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to assess, plan and safely carry out manual felling of intermediate trees using a chainsaw. This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

The unit applies to individuals who possess existing proficiency in operating a chainsaw and are required to fell intermediate trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

Individuals competent in this unit should be able to effectively fell most trees, except advanced trees and/or those with significant defects and/or characteristics that cause excessive complexity.

Trees typical to the scope of this unit may have some of the following characteristics:

- lean and where weight distribution that can be assessed and readily adapted to falling direction with the use of wedges and/or controlled with hinge wood of a larger size than typical for the local environment
- limited visible damage or defect
- multi-stems
- forward lean, backward lean or side lean
- small or medium size diameter trees that can be safely felled with intermediate felling techniques
- dead trees with minimal visible damage or defects that do not add significant complexity to the cutting technique
- various dimensions relative to other trees when working in a forest environment
- in local site conditions that add additional complexity to the felling operation, including site conditions that impact the working position of the operator or the natural direction of fall of the tree.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for FWPCOT3350 Fell trees manually (intermediate)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted a complete hazards and risks assessment of site, surroundings, and trees, planned risk control measures, selected appropriate cutting techniques, and conducted the felling of a minimum of four trees with intermediate characteristics.

The trees must be chosen according to the following criteria:

- at least one tree must have a diameter, measured at the point where the scarf cut is made, that is smaller than chainsaw bar length
- at least one tree must have a diameter, measured at the point where the scarf cut is made, that exceeds chainsaw bar length
- at least one tree must have a leaning characteristic and a diameter, measured at the point where the scarf cut is made, that is smaller than chainsaw bar length
- at least one tree must have a leaning characteristic and a diameter, measured at the point where the scarf cut is made, that exceeds chainsaw bar length.

In performing this task, the individual has used a chainsaw with a bar length appropriate to the tree's diameter and has applied:

- two different scarf cutting techniques
- two different back cutting techniques, which must be for either forward leaning, side leaning or back leaning trees
- the wedge technique, on one occasion, to ensure that the tree falls in the direction of the scarf cut.

The scarfing methods must be selected from the following:

- Standard
- Humboldt
- 90 degree scarf
- V scarf.

In performing all cuts, the individual must have complied with the following criteria:

- direction – the scarf must be in the direction of the desired fell
- depth – the depth of the scarf is 1/4 to 1/3 of the diameter of the tree
- size (width) of opening – 2/3 across the front of the tree
- top and bottom scarf cuts – the two cuts should meet without overcutting or undercutting, the scarf line is level and the scarf line is at 90 degrees to the intended direction of fall
- back cut height – the back cut is level and above the scarf line by about 1/10 (or 10%) of the tree diameter
- hinge wood thickness is about 1/10 (or 10%) of the tree diameter.

There must also be evidence that the individual has documented risk assessment for at least one of the felled trees. This documentation must detail localised hazards and risks associated with tree felling and specify methods to minimise these risks.

In addition, there must be evidence that the individual has conducted risk assessment for a minimum of two trees, in addition to the initial four.

In completing this work, the individual must demonstrate correct use of personal protective equipment and that, for each tree, the felling technique was consistent with current Australian Standards and industry codes of practice applicable to tree felling operations.

There must also be evidence that the individual has sharpened one chain, inspected and carried out routine maintenance on one occasion on one chainsaw and its cutting attachments according to manufacturer requirements.

This work must comply with workplace policy and procedures and current workplace health and safety legislation and regulations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australian Standards and codes of practice applicable to tree felling operations
- hazards and risks related to felling trees with chainsaws, and methods to minimise associated risks, including:
 - physical conditions of the site
 - unsafe/hazardous trees
 - fire and other emergency situations
 - overhead and underground services
 - nearby structures
 - standing vegetation in the intended direction of fall
 - falling branches
 - weather conditions
 - impediments of escape routes
 - vehicle and traffic access
 - people on or near worksite

- machinery on or near worksite
- carrying and transporting a chainsaw
- user fatigue
- hazards related to maintaining chainsaws, and methods to minimise associated risks
- features of unsafe/hazardous intermediate trees and defects of trees and how they affect tree felling activities
- types and purposes of cuts to fell intermediate trees, including:
 - scarf cuts
 - back cuts using different methods to provide hinge wood and wedges to maintain control of tree
- characteristics of intermediate trees
- methods used to identify intermediate trees:
 - that contain hazards and are deemed unsafe to fell
 - that are considered outside own skill level
 - where cuts made may lead to loss of control of tree in felling
- methods used to remove trees that are hung up, and procedures for removal
- methods for assessing chain condition
- types, safe use, operation and maintenance of chainsaws, support tools and attachments
- workplace procedures specific to felling trees with chainsaws, including:
 - workplace health and safety, with particular emphasis on deactivating and isolating equipment, use of personal protective equipment (PPE), safe manual handling and fire prevention measures
 - communication reporting lines
 - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection requirements and/or procedures that meet legal obligations and requirements of the industry, state and local standards and/or codes of practice for felling trees with chainsaws, including:
 - protection of natural and cultural assets
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials
 - disposing of hazardous substances.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chainsaw and accessories
 - suitable trees to fell

- tools and equipment to fell trees
- PPE required in tree felling operations
- communication system
- specifications:
 - workplace health and safety and environmental policies and/or procedures applicable to tree felling and chainsaw operations
 - workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPCOT3351 Fell trees manually (advanced)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 9.0.

Application

This unit of competency describes the skills and knowledge required to assess, plan and safely carry out manual felling of trees with advanced characteristics using a chainsaw. This unit covers the felling procedures for advanced trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.

The unit applies to individuals who possess existing proficiency in operating a chainsaw and are required to fell advanced trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.

Individuals competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.

Trees typical to the scope of this unit may have some of the following characteristics:

- lean and with weight distribution that adds significant complexity yet can be assessed and adapted to site requirements
- large diameter trees, but not exclusively, that can be safely felled with complex felling techniques
- heavy forward lean
- lean in a direction away from the fall zone or side-leaning to the available fall zone
- damage or defect that requires complex felling techniques, including trees with visible lightning damage, burnt out trees and those with fire damaged butts
- hung up trees that can be removed safely
- multi-legged, hollow butts, culls and stags
- species prone to free splitting and adverse reactions during felling
- complex multi-stems
- terrain, slope and environment that can add significant complexity to the operation.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Common Technical (COT)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for felling	<p>1.1 Determine job requirements from work order or instruction and, where required, seek clarification from appropriate personnel</p> <p>1.2 Confirm workplace health and safety and environmental protection practices and/or procedures for task</p> <p>1.3 Identify hazards, assess risks, determine appropriate control measures and record findings to mitigate risks and hazards associated with felling advanced trees by conducting a documented risk assessment according to workplace procedures</p> <p>1.4 Identify, assess and determine felling requirements of trees to fell according to work order or instruction</p> <p>1.5 Consult and maintain communication with team members and other appropriate personnel to ensure that work is coordinated effectively with others in the workplace</p> <p>1.6 Select, fit and use personal protective equipment</p> <p>1.7 Obtain tools and equipment needed for the work, and check for correct operation and safety</p>
2. Assess site conditions and surroundings	<p>2.1 Inspect site for conditions likely to affect safe implementation of felling activities</p> <p>2.2 Identify and report site environmental conditions to appropriate personnel</p> <p>2.3 Determine fall zone and implement control measures to minimise risks and hazards in the zone according to safe work procedures</p> <p>2.4 Monitor location and activity of other personnel on the work site,</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	and implement control measures according to workplace safety procedures
3. Assess tree and plan felling	<p>3.1 Identify trees considered outside own skill level, and seek assistance from appropriate personnel where required</p> <p>3.2 Assess tree visually to identify felling characteristics</p> <p>3.3 Assess trees and site to determine complexity of felling requirements</p> <p>3.4 Confirm tree is safe to fell</p> <p>3.5 Assess and progressively plan tree-felling sequence for individual trees</p> <p>3.6 Assess and check required felling direction and possible deviation</p> <p>3.7 Plan suitable escape routes, and clear routes of growth and other obstacles according to environmental care, workplace and regulatory requirements</p> <p>3.8 Plan sequence of cuts to fell tree according to standard felling procedures</p> <p>3.9 Assess need, safety and suitability of an industry approved technique and associated equipment to control tree fall</p> <p>3.10 Confirm planned escape route according to workplace procedures</p>
4. Apply tree-felling techniques	<p>4.1 Fell individual trees using planned and appropriate techniques according to current Australian Standards and industry codes of practice at a safe distance from other personnel, machinery, infrastructure and other assets in the work area</p> <p>4.2 Apply an industry approved technique and equipment to ensure that the tree falls in the direction of the scarf</p> <p>4.3 Adjust cutting technique in response to movement and condition of tree</p> <p>4.4 Use planned escape route when tree starts to fall, and monitor the fall of the tree until all movement has stopped</p> <p>4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen or is stable enough to allow safe access back into the felling area</p> <p>4.6 Identify procedures for removal of trees that are hung-up if safe to do so</p> <p>4.7 Dispose of waste materials according to workplace environmental</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	protection and operational practices and/or procedures
5. Maintain chainsaw and cutting attachments	5.1 Follow workplace health and safety procedures and manufacturer instructions to deactivate and isolate equipment 5.2 Inspect chainsaw on completion of activities 5.3 Inspect for damage to chainsaw and cutting attachments, and tag for repair, service or replacement according to workplace requirements and manufacturer recommendations 5.4 Remove, clean, adjust, sharpen or replace chain and other components according to workplace requirements and manufacturer recommendations

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret workplace documentation to determine requirements
Writing	<ul style="list-style-type: none"> Use technical and workplace specific vocabulary to accurately and legibly complete workplace records and forms
Oral communication	<ul style="list-style-type: none"> Select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees Interpret hand signals with other operators to ensure safe tree felling
Numeracy	<ul style="list-style-type: none"> Complete routine calculations and report on size, length and diameter of felled trees

Assessment Requirements for FWPCOT3351 Fell trees manually (advanced)

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 9.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has conducted a complete hazard and risk assessment of site, surroundings, and trees, planned risk control measures, selected appropriate cutting techniques and felled a minimum of six trees with advanced characteristics following workplace policies and procedures and current workplace health and safety legislation and regulations.

The trees must be chosen according to the following criteria:

- at least one tree to be selected from:
 - tree with a lean and a weight distribution that adds significant complexity, yet can be assessed and adapted to site requirements
 - tree leaning in a direction away from the fall zone, or side-leaning towards the available fall zone
- at least one tree with a heavy forward lean
- at least one tree that can be safely felled using one of the following complex felling techniques:
 - centre scarf technique
 - executing cuts from both sides of the tree during the scarf and back cut
- at least one tree exhibiting damage, defect or complex structure that requires complex felling techniques to be selected from the following:
 - tree with visible lightning damage
 - tree that is burnt out or has a fire-damaged butt
 - trees with complex multi-stems
 - tree with multi-legged growth or large multiple leaders
 - tree with a hollow
 - tree that is stag-dead or alive but in an advanced stage of decay
 - tree with complex large low branches.

There must also be evidence that the individual has documented a risk assessment for at least one of the felled trees. This documentation must detail localised hazards and risks associated with tree felling and specify methods to minimise these risks.

In completing this work, the individual must demonstrate correct use of personal protective equipment and that, for each tree, the felling technique used was appropriate and consistent with current Australian Standards and industry codes of practice applicable to tree felling operations.

There must also be evidence that the individual has sharpened one chain, inspected and carried out routine maintenance on one chainsaw and its cutting attachments on one occasion according to manufacturer requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Australian Standards and codes of practice applicable to tree felling operations
- hazards and risks related to felling trees with chainsaws, and methods to minimise associated risks, including:
 - physical conditions of the site
 - unsafe/hazardous trees
 - fire and other emergency situations
 - overhead and underground services
 - nearby structures
 - standing vegetation in the intended direction of fall
 - falling branches
 - weather conditions
 - impediments of escape routes
 - vehicle and traffic access
 - people on or near worksite
 - machinery on or near worksite
 - carrying and transporting a chainsaw
 - user fatigue
- hazards related to maintaining chainsaws, and methods to minimise associated risks
- features of unsafe/hazardous advanced trees and defects of trees and how they affect tree felling activities
- types and purposes of cuts to fell advanced trees:
 - scarf cut
 - back cut using different methods to provide hinge wood and wedges to maintain control of tree
- characteristics of advanced trees, considering features or factors that include:
 - lean and weight distribution

- heavy forward lean
- lean direction relative to fall zone
- tree diameter
- trees that have fallen but remain caught on other trees or structures
- damage or defects to trees from lightning, fire, or other causes
- structural particularities in trees
- species prone to splitting or reacting unpredictably during felling
- physical environment, including the terrain and slope where the tree is situated
- methods used to identify advanced trees, including those:
 - that contain hazards and are deemed unsafe to fell
 - that are considered outside own skill level
 - where cuts made may lead to loss of control of tree in felling
- methods used to remove trees that are hung up, and procedures for removal
- methods for assessing chain condition
- types, safe use, operation and maintenance of chainsaws, support tools and attachments
- workplace procedures specific to felling trees with chainsaws, including:
 - health and safety, with particular emphasis on deactivating and isolating equipment, use of personal protective equipment (PPE), safe manual handling and fire prevention measures
 - communication reporting lines
 - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection requirements and practices that meet legal obligations and requirements of the industry, state and local standards and/or codes of practice for felling trees with chainsaws, including:
 - protection of natural and cultural assets
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials
 - disposing of hazardous substances.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - chainsaw and accessories
 - suitable trees to fell
 - tools and equipment to fell trees
 - PPE required in tree felling operations

- communication system
- specifications:
 - workplace health and safety and environmental protection policies and/or procedures applicable to tree felling and chainsaw operations
 - workplace standard operating procedures or operator manual for chainsaws.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPFGM5219 Undertake carbon stock sampling of forests and plantations

Modification History

Release	Comment
1	Replaces superseded equivalent unit FPIFGM5219 Undertake carbon stock sampling which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the outcomes required to assess forests and plantations for current and future carbon stocks, including the use of growth modelling techniques to estimate future stocks. Work is completed in a variety of settings including native forest environments, hardwood or softwood plantations and agroforestry and farm forestry.

The unit applies to job roles including Forest Auditor, Forest Planner, Environmental Manager, Environmental Planner Forest Sustainability Manager And Sustainability Manager.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>

ELEMENTS	PERFORMANCE CRITERIA
1. Plan for carbon stock sampling activities	<p>1.1 Confirm purpose, objectives and scope of sample collection activity through stakeholder discussions and consultations.</p> <p>1.2 Conduct desktop study of existing forests and plantations.</p> <p>1.3 Design measurement program and confirm sampling site locations and where required, obtain approval for site access.</p> <p>1.4 Evaluate characteristics of sites for impact on sampling and testing method.</p> <p>1.5 Determine and arrange human and physical resource requirements.</p>
2. Prepare for carbon stock sampling activities	<p>2.1 Locate forests and plantations using site maps and plans and identify areas for sampling.</p> <p>2.2 Complete administrative requirements, arrange contractors and obtain approvals in line with organisational procedures.</p> <p>2.3 Complete a risk assessment for the sample site and activities.</p>
3. Conduct carbon stock sampling collection	<p>3.1 Inspect and test sampling equipment to ensure operational effectiveness.</p> <p>3.2 Coordinate sampling activities at sites prior to commencement of and during the work activity.</p> <p>3.3 Conduct surveys and sampling in line with organisational safety procedures.</p> <p>3.4 Record results of samples and surveys, in line with sampling plan.</p> <p>3.5 Monitor sampling activities on a regular basis against sampling plan, and implement modifications or improvements as required.</p>
4. Interpret results	<p>4.1 Estimate forest carbon stocks from collected data.</p> <p>4.2 Review data against assessment program in line with organisational procedures.</p> <p>4.3 Analyse data to determine effectiveness of assessment.</p> <p>4.4 Prepare recommendations for future programs based on analysis.</p> <p>4.5 Record and report assessment processes and improvement suggestions to appropriate personnel.</p>
5. Use growth models to predict biomass and carbon stocks	<p>5.1 Select appropriate growth model.</p> <p>5.2 Predict biomass growth and carbon stocks from data</p>

ELEMENTS	PERFORMANCE CRITERIA
	<p>assessments and incorporate in growth model.</p> <p>5.3 Analyse data to determine comparability of predicted forest carbon stocks to current available data.</p>

Foundation Skills

<i>This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.</i>	
Numeracy skills to:	<ul style="list-style-type: none"> • Interpret numerical data and symbols on maps. • Collect, analyse and record complex statistical data. • Identify and extract relevant information from complex diagrams, graphs and charts. • Use complex numerical modelling calculations to predict biomass growth and carbon stock growth.
Reading skills to:	<ul style="list-style-type: none"> • Interpret complex information in a range of internal and external source documents to plan for sampling activities.
Oral communication skills to:	<ul style="list-style-type: none"> • Hold high-level consultative discussions to generate ideas for and negotiate purpose, objectives and scope of sampling program.
Writing skills to:	<ul style="list-style-type: none"> • Prepare detailed and accurate reports involving qualitative and quantitative content where precise meaning is required. • Report on effectiveness of programs and potential improvements including rationale for recommendations.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0d96fe23-5747-4c01-9d6f-3509ff8d3d47>

Assessment Requirements for FWPFGM5219 Undertake carbon stock sampling of forests and plantations

Modification History

Release	Comment
1	<p>Replaces superseded equivalent unit FPIFGM5219 Undertake carbon stock sampling which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Design two measurement programs for two individual sites to calculate current and expected biomass and carbon stocks of:
 - trees above and below ground
 - other vegetation
 - litter layer
 - soil.
- Complete survey and sampling activities for one of those sites using the measurement plan designed.
- Record and analyse all data collected for the site, estimate current carbon stocks, select a growth model and predict and document biomass growth and carbon stocks.
- Complete a report on survey and sampling activities recommending improvements for future processes.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Requirements for obtaining permits and licences for site sampling activities and the authority from whom approval must be obtained.
- Characteristics and growth habits of local vegetation.
- Soil characteristics and topography of local area.

- Purpose, features and application of measurement programs used to calculate current and expected biomass and carbon stocks of the following:
 - trees above and below ground
 - other vegetation
 - litter layer
 - soil
 - wood products.
- Data collection and sampling methods for estimating carbon stocks.
- Statistical analysis techniques applicable to biomass and carbon assessments.
- Methods used to predict biomass growth and carbon stock growth, specifically the use of growth models.
- Purpose, features and operation of survey and assessment equipment and tools, including:
 - geographic information systems
 - interpretation of topographic maps and aerial photography
- Organisational procedures specific to carbon stock sampling, including:
 - workplace health and safety with particular emphasis on risk assessment and control
 - communication reporting lines
 - recording and reporting sampling data.

Assessment Conditions

The following resources must be made available:

- topographic maps
- aerial photography
- geographic information systems
- documents and commonly used proformas for recording sampling data
- organisational procedures for carbon stock sampling.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Assessment Requirements for FWPFRM5003 Contribute to and implement a forest inventory program

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that, under the supervision of a senior forester, the individual has planned, implemented and assessed one forest inventory program.

In undertaking this activity, the individual has:

- followed workplace policies and procedures relevant to planning and managing an inventory program
- planned and implemented an inventory assessment process that involves:
 - calculating the current and expected wood volume and yield within a forest, or
 - establishing a monitoring process to enable reporting against marketing, strategic and business plans
- implemented an inventory program in line with documented plan and budget and making adjustments to plan or program
- selected sampling techniques and created sampling designs
- reviewed inventory program and used findings to document improvements to future assessments
- prepared and presented a detailed report, including costs, processes and analysis of findings of the program.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- requirements for an inventory program
- site factors impacting on forest inventory programs
- timeline and budget for inventory program
- sampling techniques, methods of measurement and frequency of inventory assessment
- stakeholder consultation techniques

- structure and format of inventory program and performance indicators
- resources and authorisations required for inventory programs
- monitoring processes for reporting against marketing, strategic and business plans
- monitoring procedures for compliance with environmental, safety, workplace and legislative requirements
- procedures for recording and reporting workplace information.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - computing hardware and software for documenting forest inventory program
 - reference materials for data, images, geographic and topographic information, maps and diagrams relating to inventory assessments
- specifications:
 - requirements for a forest inventory program
 - workplace standards, policies and procedures for forest inventory planning
 - workplace safety and environmental policies and procedures applicable to forestry operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPHAR2206 Operate a mobile chipper/mulcher

Modification History

Release	Comment
1	Replaces equivalent unit FPIHAR2206B Operate a mobile chipper/mulcher, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate a mobile chipping or mulching unit to chip or mulch timber refuse such as branches and other timber waste left after felling operations. Work is completed in a forest or forest farm setting.

The unit applies to those who operate a mobile chipping or mulching unit in a forest environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting and Haulage

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for mobile chipping or mulching.	<p>1.1 Review work order and where required check with appropriate personnel.</p> <p>1.2 Select appropriate personal protective and other equipment and check for operational effectiveness.</p> <p>1.3 Identify type and quantity of timber refuse to be chipped or</p>

	<p>mulched.</p> <p>1.4 Plan chipping or mulching activities in line with work order.</p>
2. Chip or mulch timber refuse	<p>2.1 Reject timber refuse assessed as unsuitable for chipping or mulching and dispose of or recycle in line with environmental protection practices.</p> <p>2.2 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection requirements.</p> <p>2.3 Position, secure and set up chipping and mulching unit in line with manufacturer's specifications and required size.</p> <p>2.4 Direct timber refuse into chipper or mulcher at rate applicable to machine capacity.</p> <p>2.5 Chip timber refuse to chip sizes specified in work order.</p> <p>2.6 Respond to critical situations requiring emergency shutdown to prevent personal injury or damage to machine or product.</p>
3. Complete operator maintenance.	<p>3.1 Follow organisational safety procedures to lock out equipment.</p> <p>3.2 Check cutters for wear and damage at appropriate or recommended intervals.</p> <p>3.3 Remove, replace and dispose of cutters in line with manufacturer's recommendations, site procedures and environmental protection practices.</p> <p>3.4 Complete operator maintenance tasks in line with manufacturer's recommendations and site procedures.</p> <p>3.5 Record and report production outcomes and equipment faults to appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> identify quantities of required material within work orders read basic numerical machine settings and choose according to chip size complete routine production records involving quantities tallied against orders.
Oral communication skills to:	<ul style="list-style-type: none"> ask questions and actively listen to clarify contents of work orders.

Reading skills to:	<ul style="list-style-type: none"> interpret workplace health and safety and other organisational procedures work orders manufacturers' instructions and maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> complete accurate basic records for production outcomes and equipment faults.
Planning and organising skills to:	<ul style="list-style-type: none"> efficiently and logically sequence the stages of preparation and processing activities using work order to guide activities.

Assessment Requirements for FWPHAR2206 Operate a mobile chipper/mulcher

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIHAR2206B Operate a mobile chipper/mulcher, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete chipping and mulching jobs in line with individual work orders which prescribe different quantities of timber refuse and different chip sizes
- complete operator maintenance, including fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement to manufacturer recommendations and site procedures.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest and forest farm settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber
- types of timber refuse suitable and unsuitable for chipping and mulching
- purpose, features and operation of mobile chipping and mulching units
- capacity of chippers and mulchers to cope with differing sizes and diameters of branch
- feed rates at which waste is fed into chippers and mulchers to optimise output without damaging or blocking machinery
- methods for checking cutting blade condition

- operator maintenance procedures including for fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement
- common hazards associated with chipping and mulching operations and methods to minimise associated risks
- organisational procedures specific to chipping and mulching timber refuse:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting production outcomes and equipment faults.
 -

Assessment Conditions

The following resources must be made available:

- mobile chipping and mulching units feeding into a truck or other form of transportation:
 - truck mounted
 - trailer mounted
- tools and consumables for operator maintenance
- tools and equipment for removing and replacing cutters
- consumable cutters
- personal protective equipment suitable for chipping and mulching timber refuse
- timber refuse for processing
- manufacturers':
 - instructions for equipment use
 - recommendations for operator maintenance
- work order with specific instructions for chipping or mulching timber refuse
- template documents for recording production outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for chipping and mulching timber refuse.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence
-

FWPHAR2208 Operate a mobile chipper/mulcher

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Application

This unit of competency describes the skills and knowledge required to operate a hand-fed or machine-fed mobile chipping or mulching unit to chip or mulch timber refuse such as branches and other timber waste.

The unit applies to individuals who operate mobile chippers/mulchers as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting and Haulage (HAR)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for chipping or mulching	1.1 Determine job requirements from work order or instruction and, where required, seek clarification from appropriate personnel 1.2 Confirm safety and environmental protection requirements for the

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	task according to workplace procedures 1.3 Identify, assess and take actions to mitigate risks and hazards associated with operating mobile chippers/mulchers 1.4 Identify type and quantity of material to be chipped or mulched 1.5 Plan chipping/mulching activities according to work order or instruction and environmental conditions 1.6 Consult and maintain communication with team members and other appropriate personnel to ensure that work is coordinated effectively with others in the workplace 1.7 Select, fit and use personal protective equipment 1.8 Obtain tools and equipment needed for the work, and check for correct operation and safety
2. Chip or mulch material	2.1 Reject material assessed as unsuitable for chipping or mulching, and dispose of or recycle according to workplace and environmental protection practices 2.2 Use equipment according to workplace safety procedures, manufacturer instructions and environmental protection requirements 2.3 Position, secure and set up chipping and mulching unit according to manufacturer specifications and required size 2.4 Direct material into chipper or mulcher at rate applicable to machine capacity using safe methods for loading and feeding 2.5 Respond to critical situations requiring emergency shutdown to prevent personal injury or damage to machine or product 2.6 Direct chipped or mulched material onto stock pile or transport vehicle if required
3. Complete operator maintenance	3.1 Follow workplace safety procedures and manufacturer instructions to lock out equipment 3.2 Complete operational safety checks according to manufacturer recommendations 3.3 Check cutters for wear and damage as required or at intervals recommended by manufacturer 3.4 Check and replenish fuel and lubricants according to manufacturer recommendations 3.5 Clean and store chipper/mulcher 3.6 Record and report production outcomes and equipment faults to

Assessment Requirements for FWPHAR2208 Operate a mobile chipper/mulcher

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- assessed, planned and conducted the chipping or mulching of two different species of material
- followed workplace policy and procedures and current workplace health and safety legislation, regulations and related industry standards and codes of practice applicable to wood chipping or mulching operations
- inspected and carried out routine operator maintenance on one mobile chipper/mulcher on one occasion according to manufacturer requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- environmental protection practices related to wood chipping or mulching operations:
 - energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing waste products
- types of material suitable and unsuitable for chipping and mulching
- types, purpose, features and operation of mobile chipping and mulching units
- capacity of chippers and mulchers to cope with differing sizes and diameters of branch
- feed rates at which material is fed into chippers and mulchers to optimise output without damaging or blocking machinery
- feeding techniques to minimise operator exposure to injury
- techniques for loading chipped/mulched material into truck or transport vehicle
- criteria and methods for checking cutting blade condition

- operator maintenance procedures for fuelling, safety checks, cleaning, lubricating, operational adjustments and cutter inspection for wear or damage, replacement and disposal
- common hazards associated with chipping and mulching operations and methods to minimise associated risks
- workplace procedures specific to chipping and mulching:
 - workplace health and safety, with particular emphasis on equipment lock-out, use of personal protective equipment (PPE) and safe manual handling
 - communication reporting lines
 - recording and reporting production outcomes and equipment faults.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
 - mobile chipper or mulcher
 - truck or transport vehicle suitable for transporting chipped/mulched material if required by site requirements
 - material to chip or mulch
 - PPE required in chipping and mulching operations
 - communication system
- specifications:
 - access to workplace safety and environmental protection policies and procedures applicable to chipping or mulching operations
 - access to workplace standard operating procedures or operator manual for mobile chippers or mulchers.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

FWPNSY3002 Extract, clean, store and despatch tree seeds

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to extract, clean, store and despatch tree seeds.

The unit applies to individuals who are involved in tree nursery operations.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Nursery Production (NSY)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for processing tree seeds	1.1 Determine job requirements from work order or instruction, and where required seek clarification from appropriate personnel 1.2 Confirm safety and environmental requirements, including use of personal protective equipment, for the task according to workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with extracting, cleaning, storing and despatching tree seeds</p> <p>1.4 Identify emergency and evacuation procedures to follow in the event of an incident or accident</p> <p>1.5 Consult with appropriate personnel to ensure that work is coordinated effectively with others in the workplace</p> <p>1.6 Select tools, equipment and materials, and check for serviceability according to workplace procedures</p>
2. Extract tree seed	<p>2.1 Receive and visually assess seed bearing material, and ensure species is identified on container label</p> <p>2.2 Weigh and allocate identifiers according to workplace procedures</p> <p>2.3 Select appropriate extraction units and equipment, and check for operational effectiveness</p> <p>2.4 Operate and monitor seed extraction systems to extract maximum seed yield</p> <p>2.5 Inspect seed capsules and reprocess as required to ensure maximum yield</p> <p>2.6 Clean, maintain and calibrate extraction units and equipment, and report abnormal operation or faults in equipment for corrective action</p> <p>2.7 Dispose of residue and other waste material according to workplace procedures</p> <p>2.8 Clean and maintain work areas according to workplace procedures</p> <p>2.9 Record and report results of seed extraction process</p>
3. Clean, treat and store tree seed	<p>3.1 Separate seeds from other materials, weigh and store according to workplace procedures</p> <p>3.2 Treat seeds to prevent deterioration according to seed species and workplace procedures</p> <p>3.3 Record seed information onto inventory system accurately according to workplace procedures</p> <p>3.4 Package seed for storage according to workplace procedures</p>
4. Prepare tree seed sample for viability testing	<p>4.1 Identify and check seed sample for testing according to work order</p> <p>4.2 Remove seed sample from lot and prepare for testing according to workplace procedures</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.3 Clearly label and package representative seed sample for despatch to testing body according to workplace procedures</p> <p>4.4 Record seed sample information onto inventory system accurately according to workplace procedures</p>
5. Despatch tree seed	<p>5.1 Interpret and check seed request specifications with appropriate personnel</p> <p>5.2 Retrieve seed from storage, and calculate quantities and species of seed to meet request specifications</p> <p>5.3 Weigh, document and place each seed species in an appropriate container in line with request requirements and workplace procedures</p> <p>5.4 Mix multiple seed lots thoroughly, as required in line with request specifications</p> <p>5.5 Label seed and seed mixtures according to workplace procedures</p> <p>5.6 Organise and undertake despatch of seed in line with request specifications and workplace procedures</p> <p>5.7 Record seed processing results onto inventory system according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Read and follow information on equipment and in workplace procedure manuals on safety and environmental requirements when processing seed Interpret instructions combining written and pictorial information on equipment or in operational manuals
Writing	<ul style="list-style-type: none"> Complete seed records and labels accurately and legibly using correct technical and enterprise specific vocabulary
Oral communication	<ul style="list-style-type: none"> Ask open and closed questions and use active listening techniques to clarify contents of work orders

Skill	Description
Numeracy	<ul style="list-style-type: none"> Calculate seed weight and quantity using scales Identify and calculate percentages in specifications for seed mix Estimate impact of time on storage of seed Estimate time to complete work tasks when processing seed Undertake numerical calculations on seed processing equipment

Assessment Requirements for FWPNSY3002 Extract, clean, store and despatch tree seeds

Modification History

Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has extracted, cleaned, stored and despatched one batch of tree seeds.

In undertaking this activity, the individual has:

- extracted tree seed using appropriate items of equipment selected from:
 - kilns operated by gas, solar energy, oil or electricity
 - sieves of various sizes
 - air-drying racks and trays
 - conveyor belt
 - computer controlled extraction systems
- cleaned, treated and stored one batch of tree seed
- prepared one tree seed sample for viability testing
- despatched one batch of seed in line with seed request specifications
- complied with safety requirements, including use of personal protective equipment (PPE)
- recorded seed processing information and results.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- tree seed species and structure
- tree seed source classes
- methods to treat seed
- methods for testing, packaging and storing tree seed species using:
 - vacuum sealing
 - use of inert atmospheres, including nitrogen and carbon dioxide

- methods for controlling the packing environment, including temperature, light and moisture
- types, operation and maintenance procedures for seed processing equipment, including electric and manual scales, packaging material, seed cleaning machine, seed lot mixing device, lifting equipment
- seed separation methods:
 - hand selection
 - wind separation and winnowing
 - sieving
 - vibrating
 - flotation
 - drying
 - crumbling of husks
 - computer controlled extraction systems
- seed despatch process:
 - seed species
 - seed batching and mixing
 - pure graded seed
 - sowing rate
 - despatch container
 - method of despatch
 - sowing equipment to be used
- methods for recording seed processing information and results and maintaining workplace information
- impact and application procedures of seed treatments, including fungicides and cleaning
- hazards associated with the storage, treatment and despatch of seed
- seed species and treating, packaging and storage processes
- seed treatments and storage requirements for different seed species
- types of diseases and pests likely to infect the species
- workplace procedures for recording and reporting workplace seed information, including:
 - species
 - time and date of harvest
 - time and date of receipt into the store
 - place or origin of seed
 - container identifier
- request specifications, including:
 - seed species
 - percentage of seed mix
 - pure graded seed
 - rate of sown
 - dispatch container

- method of dispatch
- sowing equipment to be used
- appropriate container criteria:
 - length of time seed will be stored
 - method to be used to transport seed
 - equipment to be used for sowing seed
 - quantity of seed
 - size of individual seeds
- methods for viability testing tree seed samples.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - tree seed bearing material
 - workplace location or simulated workplace, required to extract, treat, store and despatch tree seed
 - materials and equipment relevant to tree seed extraction and processing work
 - PPE suitable for work involving the extraction, cleaning, storing and despatching of tree seeds
- specifications:
 - workplace health, safety and environmental policies and procedures applicable to tree seed extraction and processing work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volumes, including Implementation Guides, are available at VETNet: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0d96fe23-5747-4c01-9d6f-3509ff8d3d47>

HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to all persons who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for cardiopulmonary resuscitation (CPR).
- 1.4. Seek assistance from emergency services.

2. Perform CPR procedures.

- 2.1. Perform CPR in accordance with the ARC guidelines.
- 2.2. Display respectful behaviour towards casualty.
- 2.3. Operate an automated external defibrillator (AED) according to manufacturers' instructions.

3. Communicate details of the incident.

- 3.1. Accurately convey incident details to emergency services.
- 3.2. Report details of incident in line with appropriate workplace or site procedures.
- 3.3. Maintain privacy and confidentiality of information in line with statutory or organisational policies.

4. Review the incident.
- 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID001 Perform cardiopulmonary resuscitation

Assessment Requirements for HLTAID009 Provide cardiopulmonary resuscitation

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
 - handing over to emergency services
 - providing an accurate verbal report of the incident
 - reviewing the incident
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - relevant ARC guidelines to managing the unconscious breathing and non-breathing casualty and provision of CPR
 - potential incident hazards and risk minimisation processes when providing first aid

- infection control procedures, including use of standard precautions and resuscitation barrier devices
- requirements for currency of skill and knowledge
- first aid codes of practice
- appropriate workplace or site procedures relevant to the provision of first aid
- legal, workplace and community considerations, including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- AED training devices
- personal protective equipment (PPE).

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID010 Provide basic emergency life support

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to recognise and respond to life-threatening emergencies in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

This unit applies to all persons who may be required to provide an emergency response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid equipment according to manufacturers' instructions.
- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

3. Communicate details of the incident.
 - 3.1. Accurately convey incident details to emergency services.
 - 3.2. Report details of incident in line with appropriate workplace or site procedures.
 - 3.3. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.
 - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID002 Provide basic emergency life support

Assessment Requirements for HLTAID010 Provide basic emergency life support

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - shock
- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE)

- providing appropriate first aid treatment
- conveying incident details to emergency services or advising casualty on any required post incident action
- providing an accurate verbal report of the incident
- reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

guidelines and procedures including:

- ARC guidelines relevant to the provision of first aid
- first aid guidelines from Australian national peak clinical bodies
- potential incident hazards and risk minimisation processes when providing first aid
- infection control procedures, including use of standard precautions and resuscitation barrier devices
- requirements for currency of skill and knowledge
- first aid codes of practice
- appropriate workplace or site procedures relevant to the provision of first aid
- contents of first aid kits
- legal, workplace and community considerations, including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- Signs, symptoms and management of the following conditions or injuries:

- allergic reaction
- anaphylaxis
- asthma
- non-life-threatening and life-threatening bleeding
- cardiac conditions, including chest pain
- choking
- shock
- stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- workplace first aid kit
- adrenaline auto-injector training device
- AED training devices
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE).

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid equipment according to manufacturers' instructions.
- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

3. Communicate details of the incident.
 - 3.1. Accurately convey incident details to emergency services.
 - 3.2. Report details of incident in line with appropriate workplace or site procedures.
 - 3.3. Complete applicable workplace or site documentation, including incident report form.
 - 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.
 - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
 - 4.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

Assessment Requirements for HLTAID011 Provide First Aid

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
 - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
 - minor wound cleaning and dressing
 - nosebleed
 - shock

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally

- rate, ratio and depth of compressions and ventilations
- correct hand positioning for compressions
- basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening and life-threatening bleeding
 - burns
 - cardiac conditions, including chest pain
 - choking
 - diabetes
 - drowning
 - envenomation - all current treatments
 - eye injuries
 - fractures, dislocations, strains and sprains
 - head, neck and spinal injuries
 - hypothermia
 - hyperthermia
 - minor wounds
 - nose-bleed
 - poisoning
 - seizures
 - shock
 - sharps injuries
 - stroke.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in a remote or isolated site over an extended period of time until medical assistance is provided, or evacuation occurs.

This unit applies to any site where medical assistance is likely to be delayed.

First aid is to be provided in line with guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1. Prepare equipment for first aid response in remote or isolated site. | 1.1. Evaluate information about remote or isolated site and identify potential injuries and illnesses requiring extended management.
1.2. Select first aid equipment and resources to manage a range of potential incidents, according to organisational emergency response and first aid procedures.
1.3. Select communication equipment to facilitate emergency response in remote or isolated site.
1.4. Complete pre-departure safety and serviceability checks on equipment. |
| 2. Assess the situation. | 2.1. Recognise and assess an emergency situation.
2.2. Ensure safety for self, bystanders and casualty.
2.3. Assess casualty to determine extent of first aid response.
2.4. Identify need for medical assistance and relay initial and |

- concise information.
- 2.5. Triage when multiple casualties are involved.
3. Apply appropriate first aid procedures.
- 3.1. Perform single-rescuer or two-rescuer cardiopulmonary resuscitation (CPR) in accordance with the ARC guidelines and availability of rescuers.
- 3.2. Provide first aid in accordance with established first aid principles.
- 3.3. Display respectful behaviour towards casualty.
- 3.4. Obtain consent from casualty where possible.
- 3.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 3.6. Operate first aid equipment according to manufacturers' instructions.
- 3.7. Monitor the casualty's condition and respond in accordance with first aid principles.
- 3.8. Assess need to evacuate casualty, ability to transport to medical assistance or need for external assistance.
- 3.9. Administer medication as required according to medical instructions.
4. Communicate details of the incident.
- 4.1. Accurately convey incident details to emergency services.
- 4.2. Report details of incident in line with appropriate workplace or site procedures.
- 4.3. Complete applicable workplace or site documentation, including incident report form.
- 4.4. Maintain privacy and confidentiality of records and information in line with applicable statutory or organisational policies.
5. Coordinate evacuation and first aid activities until assistance arrives.
- 5.1. Determine need, in consultation with external services, to evacuate casualty.
- 5.2. Provide accurate information about location of incident, number of casualties, their condition and their position to enable deployment of appropriate resources.
- 5.3. Continue to provide treatment using available resources until help arrives.
- 5.4. Prepare site for evacuation of patient.
- 5.5. On approach, assist emergency services to locate the site of the incident.
- 5.6. Follow instructions and provide assistance to emergency services personnel during evacuation.
6. Review the incident.
- 6.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
- 6.2. Contribute to a review of the first aid response as required.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and not equivalent to HLTAID005 Provide first aid in remote situations.

Links

Assessment Requirements for HLTAID013 Provide First Aid in remote or isolated site

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) guidelines and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performing at least 2 minutes of ventilation and at least 2 minutes of compressions during a two-rescuer procedure on an adult resuscitation manikin placed on the floor
 - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
 - responding appropriately in the event of regurgitation or vomiting
 - demonstrating a rotation of operators with minimal interruptions to compressions
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
 - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - choking
 - minor wound cleaning and dressing
 - nosebleed
 - shock
 - envenomation, using pressure immobilisation
 - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques for remote situations and appropriate equipment improvisations

- head, neck and spinal injuries
- hypothermia and hyperthermia
- life threatening bleeding requiring use of tourniquets and haemostatic dressings
- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
 - identifying the casualty's illness or injury through history, signs and symptoms
 - using personal protective equipment (PPE) as required
 - conducting a secondary survey assessment
 - assessing vital signs respirations, pulse, temperature
 - level of consciousness
 - providing appropriate first aid treatment
 - conveying incident details to emergency services or advising casualty on any required post incident action
 - providing an accurate verbal and written report of the incident
 - reviewing the incident
- conducted a basic triage for a multiple casualty incident.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to the provision of first aid
 - first aid guidelines from Australian national peak clinical bodies including those relevant to remote or isolated sites
 - potential incident hazards and risk minimisation processes when providing first aid
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - requirements for currency of skill and knowledge
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
- legal, workplace and community considerations including:
 - duty of care requirements
 - own skills and limitations
 - consent and how it relates to the conscious and unconscious casualty
 - privacy and confidentiality requirements
 - awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of medication

- legal requirements
- the five rights
- the responsibilities of the first aider
- considerations when providing CPR, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions or injuries:
 - allergic reaction
 - anaphylaxis
 - asthma
 - non-life-threatening bleeding
 - burns
 - cardiac conditions, including chest pain
 - choking
 - diabetes
 - drowning
 - envenomation - all current treatments
 - eye injuries
 - fractures, dislocations, sprains and strains
 - head, neck and spinal injuries
 - hypothermia
 - hyperthermia
 - minor wounds
 - nose-bleed
 - poisoning
 - seizures
 - shock
 - sharps injuries
 - stroke
 - life threatening bleeding including use of tourniquets and haemostatic dressings

- considerations when providing first aid including:
 - assessment, interpretation and documentation of vital signs, including normal clinical values for respirations, temperature, pulse and level of consciousness
 - how to conduct a secondary assessment of a casualty
 - basic triage processes
 - ongoing care requirements of casualty beyond initial treatment
- remote considerations in the provision of first aid, including:
 - the nature of remote or isolated sites and how this may impact on first aid management
 - key features, functions and limitations of different types of emergency communication equipment used in remote or isolated sites, and factors that affect choice:
 - radio equipment
 - mobile phones
 - satellite phones
 - alerting and tracking devices including personal locator beacons (PLBs)
 - management options relating to transporting casualty, including aero-medical evacuation
 - specific considerations contextualised to alpine, desert, marine, rural or remote settings and tropical environments
 - methods used to assist emergency services to locate incident sites and the key features, functions and limitations of resources used to assist:
 - verbal directions
 - flags
 - flares or smoke
 - fires
 - use of man-made and natural resources to supplement first aid equipment
 - content of remote area first aid kits
 - content of remote area medication boxes
- psychological impacts of first aid incidents on rescuers and how to seek help.
-

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Scenarios must concentrate on the significance of remote or isolated site circumstances.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikin following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training devices
- placebo bronchodilator and spacer device
- haemostatic dressings
- haemostatic wound packing trainer
- thermometers
- tourniquets
- tourniquet trainer
- different types of wound dressings and bandages
- blankets and items to manage a casualty for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other appropriate workplace or site incident report form, which includes space for recording vital signs of casualties
- remote first aid kits
- immobilisation devices.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTAID015 Provide advanced resuscitation and oxygen therapy

Modification History

Release	Comments
Release 2	Minor grammatical changes to ensure clarity. Equivalent outcome. Updated mapping details.
Release 1	HLTAID015 Provide advanced resuscitation and oxygen therapy supersedes and is not equivalent to HLTAID007 Provide advanced resuscitation.

Application

This unit describes the skills and knowledge required to use specialised equipment in the provision of resuscitation and oxygen therapy in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to persons who may be required to use specialised equipment to provide resuscitation or oxygen therapy in a range of complex situations, including community and workplace settings.

Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Pre-requisite Unit

HLTAID011 Provide First Aid

Elements and Performance Criteria

ELEMENT

Elements define the essential outcomes.

1. Respond to an emergency situation.

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3 Assess the casualty and recognise the need for CPR,

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

	advanced resuscitation response or oxygen therapy.
	1.4. Manage life-threatening bleeding.
	1.5. Seek assistance from emergency services.
	1.6. Ensure environment is safe for delivery of oxygen.
2. Perform resuscitation procedures.	2.1. Perform single-rescuer cardiopulmonary resuscitation (CPR) or two-rescuer resuscitation procedures, including use of oxygen, in accordance with the ARC guidelines and availability of rescuers.
	2.2. Display respectful behaviour towards casualty.
	2.3. Use available resources and equipment according to manufacturers' instructions.
3. Deliver oxygen therapy.	3.1. Identify need for oxygen therapy, including by using a pulse oximeter.
	3.2. Use appropriate delivery device to provide oxygen.
	3.3. Monitor casualty condition and rectify issues preventing adequate treatment.
4. Communicate details of the incident.	4.1. Accurately convey incident details to emergency services.
	4.2. Report details of incident in line with appropriate workplace or site procedures.
	4.3. Complete applicable documentation, including incident report form.
	4.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
5. Review the incident.	5.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
	5.2. Contribute to a review of the first aid response as required.
	5.3. Check, maintain and clean equipment ready for future use.

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and

employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

HLTAID015 Provide advanced resuscitation and oxygen therapy supersedes and is not equivalent to HLTAID007 Provide advanced resuscitation.

Links

Assessment Requirements for HLTAID015 Provide advanced resuscitation and oxygen therapy

Modification History

Release	Comments
Release 2	Minor grammatical changes to ensure clarity, equivalent outcome. Updated mapping details.
Release 1	HLTAID015 Provide advanced resuscitation and oxygen therapy supersedes and is not equivalent to HLTAID007 Provide advanced resuscitation.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult including:
 - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performing at least 2 minutes of bag-valve-mask (with oxygen) ventilation and at least 2 minutes of compression during resuscitation procedures involving at least two rescuers on an adult resuscitation manikin placed on the floor
 - selecting and inserting an appropriate basic airway adjunct
 - responding appropriately using positioning and suctioning in the event of regurgitation or vomiting
 - demonstrating a rotation of operators with minimal interruptions to compressions
 - following the prompts of an Automated External Defibrillator (AED) to deliver at least one shock
 - managing oxygen equipment appropriately
 - handing over to emergency services
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:

- performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed a casualty with life-threatening bleeding requiring use of tourniquets and haemostatic dressings
- used personal protective equipment (PPE) as required
- managed a conscious casualty who requires supplemental oxygen, including:
 - assessing vital signs respirations, pulse, oxygen saturation
 - level of consciousness
 - selecting and preparing correct oxygen equipment
 - checking area for ventilation and sources of ignition
 - administering oxygen safely at correct flow rate
 - managing an equipment malfunction
 - providing an accurate verbal and written report of the incident
 - reviewing the incident
- monitored and coordinated maintenance of resuscitation equipment and oxygen therapy equipment, including:
 - dismantling
 - storage
 - disposal
 - cleaning and decontamination
 - checking and diagnosis of faults.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
 - ARC guidelines relevant to life threatening bleeding, managing the unconscious breathing and non-breathing casualty and provision of CPR and oxygen therapy
 - potential incident hazards and risk minimisation processes when providing first aid, including Oxygen Therapy and Advanced Resuscitation Techniques
 - infection control procedures, including use of standard precautions and resuscitation barrier devices
 - safe work practices to deal with oxygen cylinders and associated equipment
 - first aid codes of practice
 - appropriate workplace or site procedures relevant to the provision of first aid
 - contents of first aid kits
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
 - duty of care requirements

- own skills and limitations
- consent and how it relates to the conscious and unconscious casualty
- privacy and confidentiality requirements
- awareness of potential need for stress management techniques and available support for rescuers
- in relation to the administration of oxygen:
 - legal requirements
 - the five rights
 - the responsibilities of the first aider
- considerations when providing resuscitation, including:
 - upper airway and effect of positional change
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - safety and maintenance procedures for an AED
 - chain of survival
 - how to access emergency services
 - use of suction devices
 - benefits, contraindications and complications with the use of a basic airway adjunct
- techniques for providing CPR to adults, children and infants including:
 - how to recognise that a casualty is unconscious and not breathing normally
 - rate, ratio and depth of compressions and ventilations
 - correct hand positioning for compressions
 - basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- assessment and interpretation of vital signs including normal clinical values for respirations, pulse, oxygen saturation
- level of consciousness
- how to use a suction device
- signs, symptoms and management of life-threatening bleeding including use of tourniquets and haemostatic dressings
- considerations when providing oxygen to a casualty, including:
 - circumstances and conditions where oxygen is beneficial
 - circumstances and conditions where oxygen should not be used
 - contraindications and complications associated with providing oxygen
 - benefits, contraindications and complications of suction during advanced resuscitation
 - complications with the use of a bag-valve-mask device and suitable strategies to minimise these
 - selection and operation of oxygen masks and other appropriate oxygen therapy devices
- methods for cleaning, replenishing, recharging and maintaining resuscitation and oxygen equipment including:
 - actions to rectify problems

- procedures to ensure operational readiness as per manufacturers' guidelines and site procedures
- storage, cleaning, decontamination and safe disposal of consumables
- troubleshooting to identify minor and major faults
- psychological impacts of first aid incidents on rescuers and how to seek help.

Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment. Evidence of the learner's currency as required by the first aid codes of practice must be confirmed prior to assessment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- anatomical model for use with a basic airway adjunct
- AED training devices
- bag-valve-mask
- basic airway adjunct
- oxygen resuscitation system with oxygen cylinder and regulator
- pulse oximeter
- selection of oxygen masks and tubes
- suction devices
- personal protective equipment (PPE)
- haemostatic dressings
- haemostatic wound packing trainer
- tourniquet trainer
- tourniquets
- workplace incident, injury, trauma or illness record or other appropriate workplace or site incident report form, which includes space for recording vital signs of casualties.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

HLTPO032 Monitor and maintain dog health in the community

Modification History

Release	Comments
Release 2	Release 2. HLTPO032 Monitor and maintain dog health in the community supersedes and is equivalent to Release 1. HLTPO032 Monitor and maintain dog health in the community. Minor changes. Mapping Info Table Notes added for superseded unit HLTPO010 Monitor and maintain dog health in the community.
Release 1	Release 1. HLTPO032 Monitor and maintain dog health in the community supersedes and is equivalent to HLTPO010 Monitor and maintain dog health in the community.

Application

This unit describes the skills and knowledge required to monitor dog health and dog population in the community and develop the necessary strategies and plans to address issues of concern.

This unit applies to work in a public health context and workers at this level will work under supervision and within defined guidelines.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Monitor dog health and dog population in the community.

- 1.1. Discuss the need to monitor dog health and population with dog owners and community members to gain support.
- 1.2. Consult with dog owners and community members to gather information on the health, population and condition of dogs.
- 1.3. Record all findings in accordance with organisation guidelines and procedures.
- 1.4. Report nature and extent of problem in accordance with organisation guidelines and procedures.

- 2. Contribute to a dog health and dog population control plan.
 - 2.1. Discuss possible strategies for dog health and population control with other staff, community and relevant others.
 - 2.2. Analyse preferred strategies to determine feasibility and appropriateness to the community.
 - 2.3. Negotiate options with dog owners and community members.
 - 2.4. Support the establishment of a plan of action with other staff, community and relevant others.
 - 2.5. Identify the roles and responsibilities of self, other staff, community and other key people in the strategies discussed.
 - 2.6. Contribute to the coordination of the plan in accordance with job role organisational requirements.

- 3. Implement dog health and dog population control plan.
 - 3.1. Apply safe work practices and procedures in performing own role in accordance with the dog health and dog population control plan.
 - 3.2. Assist community, organisation and relevant key people with implementation of their roles in accordance with the plan.
 - 3.3. Maintain and access effective networks which contribute to the achievement of the plan.
 - 3.4. Record results in relation to the implementation of the plan in accordance with organisation policy and procedure.
 - 3.5. Implement follow-up measures to maintain community dog health and dog population control.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Release	Comments
Release 2	Release 2. HLTPOP032 Monitor and maintain dog health in the community supersedes and is equivalent to Release 1. HLTPOP032 Monitor and maintain dog health in the community. Minor changes. Mapping Info Table Notes added for superseded unit HLTPOP010 Monitor and maintain dog health in the community.
Release 1	Release 1. HLTPOP032 Monitor and maintain dog health in the community supersedes and is equivalent to HLTPOP010 Monitor and

	maintain dog health in the community.

Assessment Requirements for HLTPO P032 Monitor and maintain dog health in the community

Modification History

Release	Comments
Release 2	Release 2. HLTPO P032 Monitor and maintain dog health in the community supersedes and is equivalent to Release 1. HLTPO P032 Monitor and maintain dog health in the community. Minor changes. Mapping Info Table Notes added for superseded unit HLTPO P010 Monitor and maintain dog health in the community.
Release 1	Release 1. HLTPO P032 Monitor and maintain dog health in the community supersedes and is equivalent to HLTPO P010 Monitor and maintain dog health in the community.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- collaborate with at least one community to gain support and approval to develop and implement dog health and dog population monitoring strategies and control plans, including consulting with at least two dog owners and other key stakeholders.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational requirements relating to dog health and population needs, including:
 - national, State or Territory and local health policies, goals, targets and priorities relevant to identifying health needs
 - scope of own role and responsibilities
 - key people or agency responsibilities
 - points of contact to assist with the implementation of strategies which are outside own area of responsibility
- common dog diseases, including:
 - flea infestation
 - tick infestation
 - worm infestation

- infected sores or wounds
- mange
- eye and ear infections
- ringworm infection
- hydatid tapeworm infection
- hookworm infection
- factors that can lead or contribute to dogs becoming unhealthy, including:
 - hungry dogs
 - too many dogs
 - dogs whose nutritional requirements are not met
 - dogs that are not properly groomed and checked regularly for conditions such as fleas, ticks, ringworms, sores and wounds
 - dogs that are not treated for conditions that may cause infection and affect their health
 - dogs without access to clean and dry shelter
 - dogs that are not wormed and immunised
- potential health issues in relation to dogs and population health, including:
 - secondary injury as a result of bites from aggressive dogs
 - potential disease risks and infections from dog bites, including tetanus
 - community members giving food to dogs and going without themselves
 - dogs as vectors or carriers of disease, including when dog plays in sewage waste and then plays with or licks children
 - allergies due to dog mange causing or contributing to skin disease
 - gastrointestinal infections
 - roundworm and hookworm larval migration
- the roles and responsibilities of community, dog owner, organisations and other key people or specialists in the implementation of the plan
- strategies to monitor dog health and dog population in the community and to develop the necessary plans to address issues of concern, including:
 - nutritional food sources
 - the provision of clean and dry shelter
 - dog health issues:
 - flea and tick treatment
 - wound and sore treatment
 - mange treatment
 - eye and ear infection treatment
 - immunising and worming dogs
 - washing dogs
 - seeking help and support for sick dogs
 - reducing the number of internal and external parasites
 - dog sterilisation and contraception

- euthanasia
- cultural issues which may impact on strategies
- culturally appropriate information provision
- traditional and non-traditional responsibilities and benefits of owning a dog.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies.

Assessment must ensure access to:

- suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

ICTICT214 Operate application software packages

Modification History

Release	Comments
Release 2	This version first released with the Information and Communications Technology Training Package Version 8.0. Minor typographical correction in Knowledge Evidence.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Application

This unit describes the skills and knowledge required to identify, select and operate commercial software packages, including a word-processing and a spreadsheet application package.

It applies to individuals who utilise different software applications within a small to large office environment to produce diverse documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

General ICT

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to operate software packages	1.1 Set up workstation according to work health and safety standards and organisational requirements 1.2 Determine word-processing software task requirements 1.3 Determine spreadsheet software task requirements 1.4 Determine software application according to task

ELEMENT	PERFORMANCE CRITERIA
	requirements 1.5 Identify document purpose, audience and presentation requirements and clarify with required personnel
2. Use word-processing software	2.1 Identify document purpose, audience and presentation requirements and clarify with required personnel 2.2 Determine text-based business document style guide requirements 2.3 Finalise documents using software and technical functions and formatting according to task requirements 2.4 Name, save and print to a Portable Document Format (PDF) according to task requirements
3. Use spreadsheet software	3.1 Identify document purpose, audience and presentation requirements and clarify with personnel as required 3.2 Enter formulas and functions and customise spreadsheet settings according to task requirements 3.3 Name, save and print to PDF document according to task requirements
4. Use third application software package	4.1 Select software application package according to task requirements 4.2 Determine purpose, audience and presentation requirements 4.3 Use technical functions, other data and formatting to finalise document 4.4 Name, save and print to PDF document according to task requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Adds, subtracts, multiplies and divides whole numbers and decimals, identifying and selecting formulas and functions to use Applies order of operations in calculations
Oral communication	<ul style="list-style-type: none"> Clarifies work requirements using required language, questioning and active listening techniques
Reading	<ul style="list-style-type: none"> Interprets textual information and determines organisational standards and job requirements Identifies and applies symbols, icons and text associated with

Skill	Description
	applications software
Writing	<ul style="list-style-type: none"> Enters both written and verbally received information and data into a format applicable to software application Selects vocabulary, syntax, terminology, labelling and naming conventions applicable to program
Planning and organising	<ul style="list-style-type: none"> Plans routine tasks with goals and outcomes, taking some limited responsibility in decisions regarding sequencing
Self-management	<ul style="list-style-type: none"> Follows routine procedures in using digital technology and enters, stores and retrieves information directly applicable to own role
Technology	<ul style="list-style-type: none"> Identifies and evaluates purposes, specific functions and key features of basic digital systems and tools Operates digital systems and tools in completing routine tasks and adapting some functions

Unit Mapping Information

Supersedes and is equivalent to ICTICT203 Operate application software packages.

Assessment Requirements for ICTICT214 Operate application software packages

Modification History

Release	Comments
Release 2	This version first released with the Information and Communications Technology Training Package Version 8.0. Minor typographical correction in Knowledge Evidence.
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce three workplace documents using three different software packages including word processing, spreadsheets and one additional software application package on at least one occasion.

In the course of the above, the candidate must:

- apply workplace health and safety (WHS) principles and responsibilities
- follow organisational requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational application software packages
- technical terminology applicable to reading help files and responding to system help prompts
- industry standard business practices applicable to preparing reports
- features and functions of commercial computing packages and of the industry standard software
- functions and features of Portable Document Formats (PDFs)
- import and export software functions
- document linking functions
- WHS principles and responsibilities

- purpose of input and output devices.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- required hardware device
- industry standard software
- documents detailing organisational style guide and policy
- data required in developing software application documents.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to manage spare parts in all areas of telecommunications and includes maintenance of a database, stock control and dispatch.

It applies to individuals who may be involved in assessing installation requirements, planning and performing installations, testing installed equipment and fault finding. It involves a degree of autonomy and may include limited supervision of others.

Work functions in the occupational areas where this unit may be used are subject to regulatory requirements. Refer to the ICT Implementation Guide Companion Volume or the relevant regulator for details of licensing, legislative or certification requirements.

Unit Sector

Telecommunications – workplace effectiveness

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage receipt and dispatch of spare parts	<p>1.1 Obtain relevant legislation, codes, regulations and standards, and follow work health and safety (WHS) and environmental requirements for given work</p> <p>1.2 Identify hazards and make worksite safe according to relevant safety legislation and company work practices, and use personal</p>

	<p>protective equipment</p> <p>1.3 Unload, unpack and store incoming spare parts using appropriate methods and enterprise procedures, and check off delivered items on documentation</p> <p>1.4 Package, label and relocate outgoing spare parts ready for dispatch using enterprise procedures</p> <p>1.5 Update parts database to reflect current spare parts movements and holdings, following each dispatch or delivery, and complete any other administrative task required by enterprise</p>
2. Store spare parts	<p>2.1 Label spare parts using appropriate identification scheme and place in predefined storage locations</p> <p>2.2 Observe antistatic precautions when handling equipment susceptible to damage by electrostatic discharge</p> <p>2.3 Display, maintain and update material safety data sheets (MSDS) on site</p>
3. Manage stock flow	<p>3.1 Action spare parts requests by checking database for availability and location, and organise the dispatch</p> <p>3.2 Monitor levels of spare parts stock by examining database reports against enterprise usage and replenishing stock when necessary</p> <p>3.3 Investigate and keep records of alternative suppliers of spare parts to minimise impact of availability and cost issues with regular suppliers</p> <p>3.4 Monitor spare parts with limited shelf life, and dispose of and replace when necessary</p> <p>3.5 Audit spare parts holdings for ready supply of items to minimise disruptions to job completions</p> <p>3.6 Update database from appropriate documentation each time a store's transaction occurs to maintain validity of data</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.2, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Recognises and interprets written and visual text to determine key information, and specific requirements and responsibilities

Writing	1.3-1.5, 2.1, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Develops material for a specific audience, using clear and detailed language to convey explicit information, requirements and recommendations • Uses expected writing conventions and forms
Oral Communication	3.1	<ul style="list-style-type: none"> • Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning
Numeracy	1.3-1.5, 3.2-3.5	<ul style="list-style-type: none"> • Uses mathematical skills to estimate materials and evaluate and predict resource requirements
Navigate the world of work	1.1-1.4, 2.1-2.3	<ul style="list-style-type: none"> • Takes personal responsibility for adherence to legal and regulatory requirements relevant to spare parts work context, and draws attention to any issues that may affect self or others • Recognises and follows explicit and implicit company and health and safety protocols, and meets expectations associated with own role
Get the work done	All	<ul style="list-style-type: none"> • Takes responsibility for planning and organising own workload, identifying ways of sequencing and combining elements for greater efficiency, when managing receipt and dispatch, storage and stock flow • Uses systematic, analytical processes when monitoring and auditing, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Initiates standard problem solving procedures when identifying hazards within immediate context • Seeks to improve a future response through investigating alternative suppliers • Uses database systems and tools to access, organise, analyse and display information relevant to role

Assessment Requirements for ICTWOR304 Manage spare parts

Modification History

Release	Comments
Release 1	This version first released with ICT Information and Communications Technology Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- safely apply spare parts management procedures
- efficiently arrange for storage and ordering of spare parts
- research alternative parts replacements
- accurately update spare parts management database.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain computer and database operation
- describe handling of:
 - chemicals and dangerous materials
 - sensitive electronic equipment using antistatic procedures and safeguards
- outline modern storage practices and identification of parts location
- outline work health and safety (WHS) procedures
- identify service level agreements
- describe stocktake and audit of spare parts holdings
- identify telecommunications components and assemblies.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the telecommunications – workplace effectiveness field of work and include access to:

- a site where work may be conducted
- current equipment
- a database for relevant regulations
- organisational procedures
- equipment documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

LGACOR007 Conduct community consultations

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan, conduct and report on community consultations.

It requires the ability to engage and consult with communities to recognise and respond to the needs of the community in a timely and effective manner.

This unit applies to individuals who work in local government.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Competency Field

Not applicable.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Research consultation.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Monitor issues of public interest and concern to identify issues for community consultation.
- 1.2. Research and analyse issues to determine purpose and scope of community consultation.
- 1.3. Review purpose and scope of community consultation to determine consultation process and identify and define target groups.

2. Plan consultation.
 - 2.1. Evaluate and select consultation methods to suit target group.
 - 2.2. Develop consultation tools tailored to target group needs and test to maximise response rate and feedback quality.
 - 2.3. Select data gathering, analysis and storage methods according to data handling procedures.
 - 2.4. Select and set measurable milestones and targets for monitoring community consultation progress.
 - 2.5. Select and develop evaluation process for reviewing community consultation outcomes.
 - 2.6. Allocate resources and estimate costs required to implement community consultation.
 - 2.7. Identify and assess community consultation risks and develop strategies for managing risks.
 - 2.8. Develop and document community consultation plan to meet legislative requirements and organisational policies and procedures.
3. Conduct consultation.
 - 3.1. Brief individuals involved in conducting consultations on processes and methods of consultation.
 - 3.2. Implement community consultation processes and methods according to community consultation plan.
 - 3.3. Develop community consultation information to support equitable access of target group.
 - 3.4. Promote consultation to target groups to raise community consultation awareness and maximise response rate.
 - 3.5. Collect and store community consultation feedback according to data gathering and storage methods.
 - 3.6. Monitor community consultation against milestones and targets and make adjustments to maximise outcomes.
 - 3.7. Evaluate community consultation to identify areas for improvement.
4. Report on consultation results.
 - 4.1. Analyse, synthesise and summarise community consultation findings.
 - 4.2. Calculate and prepare report on community consultation costs.
 - 4.3. Develop, document and disseminate community consultation summaries to interested parties.
 - 4.4. Identify and direct community issues raised during consultation to authorised personnel for action.
 - 4.5. Document and present community consultation findings to support informed decision making.
 - 4.6. Document overall effectiveness of the consultation

process and act on recommendation for improvements within scope of own job role.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed below.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> interpret written responses to community consultations.
Writing skills to:	<ul style="list-style-type: none"> prepare community consultation documents and reports for internal and external audiences.
Oral communication skills to:	<ul style="list-style-type: none"> present community consultation information to internal and external audiences.
Numeracy skills to:	<ul style="list-style-type: none"> interpret, use, analyse, discuss, represent and report on statistical information determine sample sizes estimate and calculate community consultation costs.
Problem-solving skills to:	<ul style="list-style-type: none"> identify and address access and equity issues and engage difficult to reach target groups.
Planning and organising skills to:	<ul style="list-style-type: none"> meet consultation plan timeframes.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for LGACOR007 Conduct community consultations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan, conduct and report on one community consultation that involves:
 - maintaining council's reputation
 - producing information to support informed decision making.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational plans, policies and procedures relevant to conducting community consultations
- legislation relevant to conducting community consultations
- types of consultation issues:
 - strategy
 - policy
 - operations and services
 - projects
 - performance
 - amount required by legislation
- consultation plan structure
- access and equity issues:
 - subject matter
 - manner in which consultations are conducted
 - physical accessibility
 - community profile
 - diverse language needs
 - culture, including Indigenous, youth and non-English speaking background
- consultation processes
- types, strengths and weaknesses of consultation methods:
 - public meetings

- telephone surveys
- online surveys
- mailed surveys
- focus groups
- council meetings
- interviews
- expert panels
- social media
- methods for collecting, storing, analysing and summarising data:
 - quantitative data
 - qualitative data
- evaluation methods:
 - outcomes
 - process
 - impact on decision making
 - participant satisfaction
- types of community consultation targets:
 - response rate
 - representative sample
 - quality of feedback
 - timing
 - cost
- types of resources and methods for estimating and calculating costs:
 - human
 - financial
 - technical
- types of target groups and methods for identifying and defining:
 - community groups
 - authorities
 - community members
 - emergency authorities including police, fire and ambulance
 - private sector business interests
 - special interest groups
 - experts.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated work environment that reflects workplace conditions in a local government environment.

Assessment must ensure access to:

- computer with access to the internet
- consultation plan template
- target groups relevant to the community consultation issue
- organisational policies and procedures relevant to conducting community consultations.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

LGALAND503A Develop agreements with native title holders/traditional owners

Modification History

LGALAND503A Release 2: Layout adjusted.

LGAGLAND503A Release 1: Primary release.

Unit Descriptor

This unit covers developing agreements with traditional owners about native title and other matters of mutual concern.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Conduct background research to identify traditional owners	1.1 <i>Protocols for consultation</i> with Aboriginal or Torres Strait Islander people are researched and documented. 1.2 <i>Appropriate research</i> is undertaken to identify the correct traditional owners, including consultation with the relevant native title representative body and the National Native Title Tribunal (NNTT). 1.3 Expert advice is sought where appropriate.
2 Identify key stakeholders	2.1 NNTT is consulted about the requirements for registering an Indigenous land use agreement (ILUA). 2.2 <i>Other stakeholders</i> or potential parties to the agreement are identified through consultation with relevant government agencies. 2.3 Other Indigenous people with interests are identified. 2.4 Meetings are held with traditional owners to establish rapport and credibility.
3 Negotiate with traditional owners	3.1 The range of issues to be addressed through an agreement is clarified with council. 3.2 Highly desirable, unacceptable, or possible trade-off positions on each issue are identified for discussion with the traditional owners. 3.3 The scope of the negotiations is identified and agreed with traditional owners. 3.4 <i>Culturally appropriate protocols</i> for negotiations are established. 3.5 Levels of confidentiality and liaison with the media are agreed. 3.6 Processes and timing for consultation with the wider community are agreed. 3.7 Arrangements for liaison with the media are agreed. 3.8 Negotiations are appropriately managed and focussed on mutual outcomes. 3.9 Agreement is reached through negotiation and terms and conditions of agreement are drafted.
4 Register the agreement	4.1 <i>Expert advice</i> is sought on the draft terms and conditions of the agreement. 4.2 Draft terms and conditions of the agreement are documented. 4.3 NNTT is consulted about requirements prior to lodging an ILUA registration. 4.4 Application for registration is lodged with <i>appropriate</i>

ELEMENT**PERFORMANCE CRITERIA**

agencies and any queries or additional requirements are satisfied.

4.5 The agreement is registered.

4.6 *Arrangements* are established for implementation and fulfilment of commitments detailed in the agreement.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- oral and written communication
- research
- evaluation
- decision making
- negotiation
- consultation
- media liaison

Required Knowledge

- cultural context
- location and resources
- legal requirements
- organizational processes
- equity and diversity principles
- council policies and procedures
- state or territory and commonwealth government departments and agencies
- Indigenous land use agreements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also

required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- conduct appropriate research to identify traditional owners
- identify key stakeholders and establish rapport and credibility to facilitate the negotiation process
- conduct negotiations with traditional owners to reach agreement
- register an Indigenous land use agreement.

Context of assessment

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units(prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

Evidence required for demonstration of consistent performance

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

Resource implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Protocols for consultation*** may include:
- use of interpreters
 - talking to the appropriate people
 - respecting cultural differences
 - respecting family, kinship and clan relationships
 - allowing sufficient time for the parties to receive, absorb and respond to information
- Appropriate research*** may include:
- register searches
 - consultation with the relevant native title representative body
 - NNTT decisions and records
 - state or territory government policies
- Other stakeholders*** may include:
- other landholders
 - lessees
 - state or territory government agencies
 - commonwealth departments and agencies
 - other Aboriginal or Torres Strait Islander people with historical connections to the area
- Culturally appropriate protocols*** may include:
- representation and mandate
 - methods of communication in face to face meetings
 - time frames
 - meeting times
 - venues
 - use of interpreters
 - levels of confidentiality
- Expert advice*** may include:
- solicitors and barristers
 - native title representative bodies
 - native title holders/applicants
 - NNTT
 - the federal court
 - state or territory governments
 - other professionals with relevant expertise, including anthropologists, archaeologists, valuers, planners and mediators
- Appropriate agencies*** may include:
- federal court
 - NNTT
 - federal attorney-general's department
 - native title representative bodies

Arrangements may include:

- state or territory governments
- formal or registered agreements
- informal agreements

Unit Sector(s)

Land Management

LGAPLA005 Protect heritage and cultural assets

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to establish an inventory, assess opportunities and threats, and develop strategies for heritage and cultural assets.

This unit applies to individuals who work in local government.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Competency Field

Not applicable.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Prepare heritage and cultural asset inventory.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify community heritage and cultural assets and associated council expectations and requirements.
- 1.2. Assess heritage and cultural asset significance according to criteria and community expectations.
- 1.3. Conduct field investigation and research to obtain information base of significant places.
- 1.4. Research information sources to collect data on heritage and

- cultural assets.
- 1.5. Prepare inventory of heritage and cultural assets.
2. Assess threats and opportunities.
 - 2.1. Identify heritage and cultural asset threats and opportunities.
 - 2.2. Interpret and apply council and community input to establish criteria for assessing heritage and cultural threats and opportunities.
 - 2.3. Assess and prioritise heritage and cultural asset threats and opportunities.
 3. Develop heritage and cultural asset protection strategies.
 - 3.1. Consult with the community and property owners on heritage and cultural asset protection.
 - 3.2. Establish framework for legal protection of heritage and cultural assets.
 - 3.3. Develop heritage and cultural asset protection strategies to conserve heritage and cultural assets in response to community needs.
 - 3.4. Benchmark heritage and cultural asset protection strategies to assess effectiveness of strategies
 - 3.5. Determine policy elements of proposed heritage and cultural asset protection strategies.
 4. Implement heritage and cultural asset protection strategies.
 - 4.1. Consult with the community and property owners about proposed heritage and cultural asset protection strategies.
 - 4.2. Estimate and procure financial resources for heritage and cultural asset protection according to budget cycles
 - 4.3. Select, assign and train personnel to undertake heritage and cultural asset protection tasks.
 - 4.4. Select and procure physical facilities and equipment for heritage and cultural asset protection according to budget cycles.
 - 4.5. Prepare and distribute community education and information materials to support heritage and cultural asset protection strategies.
 - 4.6. Incorporate heritage and cultural asset protection strategies into organisational policies and procedures.
 - 4.7. Set timetable and priorities for implementation of heritage and cultural asset protection strategies.
 - 4.8. Implement heritage and cultural asset protection strategies.
 5. Evaluate heritage and cultural asset protection strategies.
 - 5.1. Monitor implementation of heritage and cultural asset protection strategies.
 - 5.2. Evaluate heritage and cultural asset protection strategies to identify areas for improvement.
 - 5.3. Prepare heritage and cultural asset protection report according to organisational requirements.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed below.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">• research and interpret legislation applicable to heritage and cultural asset protection• research and interpret heritage and cultural asset information from local, national and international sources.
Writing skills to:	<ul style="list-style-type: none">• write heritage and cultural asset protection reports.
Oral communication skills to:	<ul style="list-style-type: none">• consult with the community and property owners.
Numeracy skills to:	<ul style="list-style-type: none">• interpret, use, discuss, estimate, calculate and document financial information relevant to budgets and lifecycle costings.
Technology skills to:	<ul style="list-style-type: none">• use information systems relevant to development planning.

Unit Mapping Information

LGAPLEM612B Protect heritage and cultural assets.

Assessment Requirements for LGAPLA005 Protect heritage and cultural assets

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- protect heritage and cultural assets including:
 - preparing one inventory of heritage and cultural assets
- protect one heritage and cultural asset including:
 - assessing threats and opportunities:
 - political emphasis
 - reductions in maintenance
 - lack of planning
 - other authorities' planning
 - competing interests
 - community attitudes
 - consulting the community and property owners
 - developing, documenting, implementing and monitoring heritage and cultural asset protection strategies.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures applicable to protecting heritage and cultural assets
- legislative requirements applicable to protecting heritage and cultural assets
- types of heritage and cultural assets:
 - cultural and environmental significance
 - national and local area significance
 - danger component of heritage element and structure
 - cultural assets
- asset classification systems
- community needs and expectations applicable to protecting heritage and cultural assets
- significance of heritage and cultural assets:
 - aesthetic, historical, scientific and social aspects

- community expectations
- national
- state
- regional
- local
- contributory
- places of significance:
 - buildings
 - structures
 - plantings
 - subsurface remains
- types of criteria for significance of heritage and cultural assets:
 - community preference
 - budget constraints
 - legislative provisions
 - resources
 - time frames
 - age
 - outstanding craftsmanship
 - architectural style
 - construction technology
 - an association with important events or figures
 - building type
 - rarity
 - technical and creative achievement
 - representing a way of life
 - artistic
 - religious and cultural associations
- sources of information for heritage and cultural assets:
 - survey information
 - historical information
 - reports, studies and texts.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated work environment that reflects workplace conditions in a local government environment.

Assessment must ensure access to:

- organisational policies and procedures applicable to protecting heritage and cultural assets

- legislative requirements applicable to protecting heritage and cultural assets
- information systems relevant to development planning.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

MARC037 Operate inboard and outboard motors

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to operate inboard and outboard motors, and to diagnose basic faults.

This unit applies to people working in the maritime industry in the capacity of:

- coxswain on vessels <12 m in length, with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine, operating in inshore or designated waters or
- coxswain on tenders or auxiliary vessels operating within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and a Coxswain Grade 1 NC, as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012.

Pre-requisite Unit

Not Applicable

Competency Field

C – Equipment Operations

Unit Sector

Not Applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Operate inboard and outboard motors

- 1.1 Pre-start checks are performed on the motor
- 1.2 Fuel is checked to ensure there is adequate fuel, including a reserve, on board
- 1.3 Motor is started and stopped safely and correctly
- 1.4 Motor controls are used to manoeuvre the vessel safely to complete work tasks
- 1.5 Motor is operated within safe limits during normal manoeuvres

2 Secure vessel on completion of work task

- 2.1 Vessel is moored safely
- 2.2 Fuel system is closed down
- 2.3 Vessel is secured
- 2.4 Fuel is stored to minimise environmental and fire hazards as appropriate
- 2.5 Unserviceable equipment is reported and tagged out as unserviceable

3 Maintain inboard and outboard motors

- 3.1 Fuel filters are drained of excess water
- 3.2 Batteries and connections are maintained to ensure reliable electrical supply to the motor
- 3.3 Engine and gearbox oil is checked and lubrication is applied
- 3.4 Engine mounting gear is checked as necessary

- 4 Identify basic inboard and outboard motor faults**
- 4.1** Operating difficulties caused by fuel-related factors are identified
 - 4.2** Electrical faults are identified, tagged out and reported
 - 4.3** Motor propulsion faults are identified, tagged out and reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARC005 Operate inboard and outboard motors.

Links

Assessment Requirements for MARC037 Operate inboard and outboard motors

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- conducting pre-start checks, including checking:
 - fuel
 - lubricating oil
 - cooling system
 - motor attachment points
 - water depth
- conducting shutdown checks on inboard and outboard motors, and tagging out and reporting faults
- estimating fuel consumption
- reading and interpreting company standard operating procedures (SOPs) about operating inboard and outboard engines
- storing inboard or outboard motors
- using inboard and outboard motor steering system.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- battery connection and hazards
- International Convention for the Prevention of Pollution from Ships (MARPOL) requirements as it applies to operating inboard and outboard motors
- motor:
 - cooling systems
 - fuel systems
 - lubricating systems
- risks associated with portable fuel tanks

- standard procedures to tag out and report faults
- starting motors
- troubleshooting techniques
- WHS/OHS requirements and work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management system, workplace procedures and operational manuals
- a vessel ≥ 5.0 metres in length with propulsion power of ≥ 75 kW, or appropriate engine ashore
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARF027 Apply basic survival skills in the event of vessel abandonment

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply basic survival skills in the event of vessel abandonment. This unit applies to people working in the maritime industry in a deck and or engine room capacity on vessels up to 80 m and with propulsion power <3000 kW within the exclusive economic zone (EEZ). They could be working independently or as part of a vessel crew.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a General Purpose Hand NC, Coxswain Grade 2 NC, Coxswain Grade 1 NC, Marine Engine Driver Grade 3 NC, Master (Inland waters), Master <24 m NC, Marine Engine Driver Grade 2 NC, Mate <80m NC, Master < 35 m NC and Marine Engine Driver Grade 1 NC, as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012 or relevant skills and experience.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|--|
| 1 Prepare to abandon vessel | <p>1.1 Nature of emergency is determined to minimise potential dangers and threats</p> <p>1.2 Muster and abandon vessel signals are responded to according to vessel safety procedures</p> <p>1.3 Survival equipment is organised to maximise chances of survival</p> <p>1.4 Emergency position indicating radio beacon (EPIRB) is operated to transmit distress signal</p> <p>1.5 Distress calls are made using radio equipment on distress call frequency, if time allows, to communicate the nature of the emergency</p> <p>1.6 Others are assisted to maximise their chances of survival</p> |
| 2 Determine operational safety requirements | <p>2.1 Relevant maritime legislation is identified and implemented</p> <p>2.2 Safety requirements for a range of near coastal vessels are identified, accessed and reviewed</p> <p>2.3 Lifesaving and survival equipment required on board a near coastal vessel are accurately identified</p> <p>2.4 Lifesaving equipment on board is checked and confirmed as serviceable</p> <p>2.5 Lifesaving and survival equipment certificates and documentation are checked for validity</p> <p>2.6 Vessel safety management systems (SMS) and plans are located, interpreted and applied</p> |
| 3 Practise survival techniques | <p>3.1 Typical emergency alarms and types of alarm systems are accurately identified</p> |

- 3.2 Need to abandon vessel is determined according to established safety practice and procedures
 - 3.3 In-water survival techniques are implemented according to established safety practice and procedures
 - 3.4 Threats to survival are identified and treatment options are outlined
- 4 Apply survival techniques**
 - 4.1 Lookout for vessels and aircraft is maintained and distress signals are released on sighting
 - 4.2 During an emergency, work is carried out collaboratively with other shipboard personnel and passengers as required
 - 4.3 During emergency and survival situations, appropriate communication skills and techniques are implemented
 - 4.4 Instructions given by rescue personnel to safely access rescue craft are followed
- 5 Operate lifesaving and survival equipment**
 - 5.1 Range of pyrotechnic and distress signals are operated according to established safety practice and procedures
 - 5.2 Survival equipment is operated according to instructions and accepted survival practice
 - 5.3 Survival radio equipment is operated according to manufacturer instructions and regulatory protocols
 - 5.4 Lifejackets and other lifesaving equipment are operated and used according to instructions
- 6 Participate in abandon vessel drills**
 - 6.1 Regulatory requirements and company procedures for musters and drills are identified and implemented
 - 6.2 Actions required for a range of muster signals are correctly identified
 - 6.3 Action is taken promptly to address problems that may arise when following vessel abandonment procedures
 - 6.4 Hazards are identified that may occur when abandoning vessel risks are minimised according to SMS, and established safety practice and procedures
 - 6.5 Information relevant to use of lifesaving equipment is accessed and applied

6.6 Range of emergencies that may lead to vessel abandonment are outlined

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARF001 Apply basic survival skills in the event of vessel abandonment.

Links

Assessment Requirements for MARF027 Apply basic survival skills in the event of vessel abandonment

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- collecting, managing and interpreting information on the use of lifesaving equipment and procedures to be followed when order to abandon vessel is given
- communicating effectively with other personnel and passengers during simulated and/or actual abandon vessel musters and emergencies
- determining type and extent of emergency and appropriate survival action to be taken
- donning a lifejacket in water and:
 - assisting a survivor to don a lifejacket
 - holding heat escape lessening posture for at least 5 minutes
 - maintaining a group huddle for at least 10 minutes
 - swimming in a group conga line for a minimum of 50 metres
 - swimming in a lifejacket for a minimum of 50 metres
 - towing with a life jacket for a minimum of 25 metres
- ensuring behaviour reflects statutory requirements pertaining to lifesaving appliances
- operating radio equipment, including very high frequency (VHF) or high frequency (HF) radios
- operating and using lifesaving and survival equipment, including:
 - orange smoke flares or red handheld flares
 - life buoys
 - life jacket or personal floatation devices
- planning timing and sequence of individual survival actions to be appropriate to prevailing circumstances and conditions of emergency, and minimising potential dangers and threats to other survivors
- reading and interpreting instructions on emergency procedures, safety management systems (SMS) and plans
- recognising and interpreting alarms and muster signals appropriately
- remaining afloat without a lifejacket for at least 5 minutes.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate techniques for:
 - first aid
 - maritime communication
 - survival with a swamped, semi-submerged tender or dingy
 - using survival equipment
- action to be taken in an emergency situation
- certificates and documentation, including:
 - instructions for use of lifesaving equipment
 - lifesaving and survival equipment certificates
 - pyrotechnic expiry dates
 - record of inspection of equipment
- crew and passenger safety briefing
- construction, outfit and particular characteristics of various types of applicable survival equipment
- distress signals, their use and penalty for misuse
- emergency muster and abandon vessel signals
- emergencies that may lead to vessel abandonment
- established safety practice and procedures
- hazards, including:
 - expired pyrotechnics
 - inaccessible lifejackets
 - no defined abandon ship procedures established
 - poorly maintained equipment
- importance of being ready for any shipboard emergency, including initial actions for survival on vessel; abandonment
- location of:
 - lifesaving appliances on a vessel
 - survival equipment on vessel
- maintenance of lifesaving appliances
- person overboard combination light and smoke float
- purpose and use of relevant personal protective equipment (PPE)
- procedures for:
 - abandoning vessel
 - correctly operating and using lifesaving appliances on board vessels and survival craft, specifically donning a lifejacket, using a lifejacket light and whistle and using handheld pyrotechnics
 - emergency response on board vessels, including abandoning vessel

- regulatory requirements and company procedures for musters and drills
- relevant manufacturer guidelines relating to operating and using survival equipment, including instructions on equipment capability and limitations
- relevant maritime regulations related to required survival equipment on a vessel
- relevant work health and safety (WHS)/occupational health and safety (OHS) legislation and policies, including SMS, plans, processes and techniques
- signs of hypothermia and appropriate treatment
- search and rescue transponders (SARTs)
- standard safety symbols
- steps taken after collision, grounding or other marine casualty and resulting hull damage
- symptoms of hypothermia, its prevention and treatment and related use of protective covers and garments
- threats to survival after abandoning vessel, including dehydration and ingestion of seawater and:
 - appropriate strategies for countering these threats
 - how to minimise dangers
- using survival equipment, including:
 - emergency position indicating radio beacons (EPIRBs)
 - immersion suits
 - SARTs
- value of training and emergency drills for enhancing chances of survival at sea
- ways of maximising detectability using pyrotechnic distress signals, portable high frequency (HF) radios and EPIRBs.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management systems, workplace procedures and operational manuals, including:
 - abandon vessel procedures
 - emergency procedures

- information on the use of lifesaving equipment
- instructions for the use of lifesaving and survival equipment
- lifesaving and survival equipment certificates
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARF028 Follow procedures to minimise and fight fires on board a vessel

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply defined policies and procedures when carrying out fire minimisation procedures and fighting a fire on board a vessel. This unit applies to people working in the maritime industry in a deck and or engine room capacity on vessels up to 80 m and with propulsion power <3000 kW within the exclusive economic zone (EEZ). They could be working independently or as part of a vessel crew.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a General Purpose Hand NC, Coxswain Grade 2 NC, Coxswain Grade 1 NC, Marine Engine Driver Grade 3 NC, Master (Inland waters), Master <24 m NC, Marine Engine Driver Grade 2 NC, Mate <80 m NC, Master <35 m NC and Marine Engine Driver Grade 1 NC, as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012 or relevant skills and experience.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Carry out fire minimisation procedures

1.1 Fire hazards and risks on board vessel are identified and reported to designated personnel according to workplace procedures

1.2 Workplace procedures and work instructions for controlling fire risks are followed

1.3 Firefighting equipment is regularly checked and appropriate action is taken to ensure it is operational

1.4 Participation in fire drills and musters is undertaken to ensure readiness for fire emergencies

2 Follow instructions during response to a fire emergency

2.1 Location and class of fire are identified and alarm is raised and or responded to according to workplace procedures

2.2 Appropriate personal protective equipment (PPE) requirements are made ready

2.3 Instructions to contain the spread of fire and smoke are acted upon

2.4 Fire is attacked using appropriate method, firefighting equipment and extinguishing media or agent according to instructions

2.5 Collaboration and communication is maintained with others to support the safety and efficiency of the firefighting operation

3 Support post-fire operations

3.1 Fire watch is carried out as instructed to prevent further outbreak

3.2 Equipment is restored to operational condition according to workplace instructions

3.3 Assistance is provided to preserve fire scene prior to

investigation, as required

3.4 Information relevant for fire incident debrief is provided

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARF002 Follow procedures to minimise and fight fires on board a vessel.

Links

Assessment Requirements for MARF028 Follow procedures to minimise and fight fires on board a vessel

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying extinguishing media to a fire, including:
 - water
 - dry chemical powder
- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- communicating and working collaboratively as a member of a team in a firefighting operation
- correctly using vessel closure and shutdown systems
- conducting effective boundary cooling
- identifying fire hazards and risks
- using fire hose lines (jet spray to fog stream)
- using a fire blanket to extinguish a fire.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chemistry of fire and its relationship to flash point, vapour density, auto ignition temperature and spontaneous combustion
- classes of fire applicable to Australian and New Zealand Standards, including:
 - A – Carbonaceous solids
 - B – Flammable liquids
 - C – Flammable gases
 - E – Electrically energised equipment
 - F – Cooking fats or oils
- detection and suppression systems, including fixed firefighting systems
- extinguishing media, and their use, including:

- extinguishing powders
- firefighting foams
- gaseous extinguishing agents
- water
- fire alarms and signals during on-board fire emergency
- firefighting tactics, techniques and procedures, including team dynamics
- fire hazards and risks, including:
 - cargo
 - clothing
 - cooking oils
 - cordage
 - electrical arcing
 - fuels and lubricants
 - furnishings
 - paints
 - poor housekeeping
 - poor work practices
 - smoking
 - spontaneous combustion
- hazards and threats to life or health during on-board firefighting operations
- international shore connections
- methods of heat transfer
- on-board fire emergency response organisation and procedures
- portable fire extinguishers – colour codes and suitability for class of fire
- principles underlying spread of fire on a vessel
- principles and methods of extinguishment of each class of fire
- fire pumps
- procedure for restoring equipment to operational condition, including:
 - cleaning
 - re-stowing
- types of fire detection, firefighting equipment and systems used on vessels, their features, principles of operation, procedures for their use and problems that can occur
- using a fire bucket
- ventilation procedures
- vessel construction as it relates to fire prevention or protection
- WHS/OHS requirements and safe work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a

minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, workplace procedures and operational manuals
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) that are currently used in industry.

MARF030 Survive at sea using survival craft

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to survive at sea using survival craft. This unit applies to people working in the maritime industry in a deck and or engine room capacity on vessels up to 80 m and with propulsion power <3000 kW within the exclusive economic zone (EEZ). They could be working independently or as part of a vessel crew.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a General Purpose Hand NC, Coxswain Grade 1 NC, Marine Engine Driver Grade 3 NC, Master <24 m NC, Marine Engine Driver Grade 2 NC, Mate <80 m NC, Master < 35 m NC and Marine Engine Driver Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012 or relevant skills and experience.

| 1 Prepare to abandon vessel | <p>1.1 Nature of emergency is determined to minimise potential dangers and threats</p> <p>1.2 Muster and abandon vessel signals are responded to according to vessel safety procedures</p> <p>1.3 Survival equipment is organised to maximise chances of survival</p> <p>1.4 Emergency position indicating radio beacon (EPIRB) is operated to transmit distress signal</p> <p>1.5 Distress calls are made using radio equipment</p> <p>1.6 Others are assisted to maximise their chances of survival</p> <p>1.7 Prevailing circumstances and emergency conditions are used as the basis for timing and sequencing individual survival actions, and potential dangers and threats to other survivors are minimised</p> |
| 2 Operate lifesaving and survival equipment | <p>2.1 Location and accessibility of lifesaving and survival equipment is established</p> <p>2.2 Survival craft is launched in a timely and effective manner</p> <p>2.3 Survival equipment is operated according to instructions and accepted survival practice</p> <p>2.4 Survival radio equipment is operated according to manufacturer instructions and regulatory protocols</p> <p>2.5 Lifejacket and other lifesaving equipment are correctly used according to instructions</p> |
| 3 Abandon vessel safely | <p>3.1 Need to abandon vessel is established according to safety management system (SMS) or plan</p> |

- 3.2 Survival craft is launched according to instructions
 - 3.3 Survival craft is checked to ensure it is safe to board
 - 3.4 Survival craft is boarded observing safety of other survivors
 - 3.5 Survival craft is released from abandoned vessel
 - 3.6 Exposure cover is deployed on survival craft according to accepted survival practice and manufacturer instructions
- 4 Apply survival techniques**
- 4.1 Survival craft is checked for seaworthiness
 - 4.2 Sea anchors and drogues are deployed according to accepted nautical practice
 - 4.3 Occupants are checked for signs of hypothermia or other injuries and first aid is applied as required
 - 4.4 Water and food is rationed
 - 4.5 Lookout for vessels and aircraft in vicinity is maintained and distress signals are released on sighting
 - 4.6 Instructions given by rescue personnel are followed to safely access rescue craft

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARF005 Survive at sea using survival craft.

Links

Assessment Requirements for MARF030 Survive at sea using survival craft

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying appropriate handling strategies to manoeuvre survival craft in rough weather and sea conditions
- boarding a life raft unassisted while wearing a lifejacket and assisting others to board
- collecting, managing and interpreting information on the use of lifesaving equipment
- communicating with other crew members
- determining type and extent of emergency
- jumping safely from a height into the water while wearing a lifejacket and according to established survival practice
- operating radio equipment
- participating in training, musters and emergency drills
- reading and interpreting instructions for emergency procedures and for use of lifesaving and survival equipment
- recognising and interpreting muster signals
- righting an inverted life raft unassisted while wearing a lifejacket according to established survival practice
- swimming while wearing a lifejacket and floating without a lifejacket according to established survival practice
- using a rescue quoit to assist a person to the life raft
- using paddles to manoeuvre survival craft
- using survival equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action to be taken in emergency situations
- calculations required to ration food and water
- technique used to deploy a sea anchor or drogue from the survival craft

- emergency muster and abandon vessel signals
- equipment found in survival craft, its function and procedures for correct operation
- established survival practice
- first aid techniques
- how to launch survival craft
- importance of being ready for shipboard emergencies
- International Convention for the Safety of Life at Sea (SOLAS) regulations
- location of survival equipment on vessel
- maintenance of lifesaving appliances
- means of activating gas release line to inflate life raft
- procedures for abandoning vessel including use of:
 - inflatable life raft
 - life buoys
 - life jackets
- relevant maritime regulations relating to required survival equipment on a vessel
- relevant work health and safety (WHS)/occupational health and safety (OHS) legislation and policies
 - search and rescue transponders (SARTs)
- steps to be taken after collision, grounding or other marine casualty and resulting hull damage
- survival at sea techniques
- survival craft:
 - characteristics of different types of survival craft
 - construction
- techniques for using survival equipment
- time required to make distress calls safely
- threats to survival on vessel abandonment and appropriate strategies for countering these threats
- use and purpose of personal protective equipment (PPE)
- use of distress signals, including flares and penalty for misuse.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe,

impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, workplace procedures, instructions for use of lifesaving and survival equipment, emergency procedures and operational manuals
- survival craft
- tools, equipment, machinery, materials and relevant PPE currently used in industry.

MARI003 Comply with regulations to ensure safe operation of a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply current Commonwealth, state and territory Acts, legislation, codes of practice and other publications pertaining to the safe operation of a vessel up to 12 m in length.

This unit applies to people working in the maritime industry commanding and operating the engines of a commercial vessel:

- <12 m in length
- with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine
- in inshore waters or designated waters or
- as a tender or auxiliary vessel within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and a Coxswain Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, or deck officer, issued under the Navigation Act 2012.

Pre-requisite Unit

Not Applicable

Competency Field

I – Regulations and Port Operations

Unit Sector

Not Applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Determine relevant rules and regulations impacting on work practices

2 Comply with industry and professional codes of practice

3 Apply legislative and regulatory requirements to the operation of the vessel

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 International Regulations for Preventing Collisions at Sea are comprehended and implemented

1.2 Responsibilities as the person in charge of a vessel are identified and recorded

1.3 Relevant Commonwealth, state, territory and local legislation governing the vessel and the passage are comprehended

2.1 Relevant industry and professional codes of practice are sourced

2.2 Commitment to comply with industry and professional codes of practice is demonstrated through own behaviour

3.1 Regulatory requirements relating to operational aspects of the vessel are recognised and appropriate procedures are developed

3.2 Situations where rules must be applied in order to avoid collisions are recognised

3.3 Safety requirements are implemented according to legislative and regulatory requirements

3.4 Compliance with all relevant rules and legislation is demonstrated while operating the vessel

- | | | |
|---|------------|--|
| 4 Identify changes in laws and regulations and their implications for vessel operation | 4.1 | Changed legislation and regulations are accessed |
| | 4.2 | Changes in regulatory requirements are identified and applied |
| | 4.3 | Operational procedures are reviewed to reflect changes in legislation and regulations |
| 5 Maintain statutory records | 5.1 | Copies of relevant records are maintained |
| | 5.2 | Evidence of current authorisation, training and relevant licences is maintained according to legislative and regulatory requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARI001 Comply with regulations to ensure safe operation of a vessel up to 12 metres.

Assessment Requirements for MARI003 Comply with regulations to ensure safe operation of a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying regulations pertaining to the safe operation of a vessel
- applying safety management plan
- conducting inductions for crew
- demonstrating an understanding of the duties and responsibilities of a Coxswain
- obtaining and complying with information from Commonwealth, state and territory Acts, legislation, codes of practices and other publications relating to the safe navigation of a vessel.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action that must be taken when assisting vessels in distress
- certificates on board a vessel
- contents of marine notices, annual notices to mariners
- distress signals
- duties and responsibilities of a Coxswain
- function of risk assessments
- International Association of Lighthouse Authorities (IALA) Buoyage System A
- International Regulations for Preventing Collisions at Sea, including:
 - large commercial traffic
- lifesaving and firefighting appliances
- logbook or vessel record book
- *Marine Safety (Domestic Commercial Vessel) National Law Act 2012*, *Marine Safety (Domestic Commercial Vessel) National Law Regulation 2013* and marine orders
- marine pollution prevention
- National Standard for Commercial Vessels (NSCV), in particular, Part B, Part C Section 7, Part D and Part E

- operational areas and classifications of vessels
- safety management systems
- state and territory marine legislation
- work health and safety (WHS)/occupational health and safety (OHS) legislation.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation such as legislation, regulations, codes of practice, workplace procedures and operational manuals including:
 - International Regulations for Preventing Collisions at Sea
 - marine orders 500 series
 - *Marine Safety (Domestic Commercial Vessel) National Law Act 2012*
 - *Marine Safety (Domestic Commercial Vessel) National Law Regulation 2013*
 - National Standard for Commercial Vessels (NSCV), in particular, Part B, Part C Section 7, Part D and Part E
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARK007 Handle a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to manoeuvre a vessel up to 12 metres in length. This includes the ability to berth, moor, anchor and manoeuvre a vessel during emergencies.

This unit applies to people working in the maritime industry in the capacity of:

- coxswain on vessels <12 m in length, with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine, operating in inshore or designated waters or
- coxswain on tenders or auxiliary vessels operating within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and Coxswain Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master or deck officer, issued under the Navigation Act 2012.

Pre-requisite Unit

Not Applicable

Competency Field

K – Manoeuvring Vessels

Unit Sector

Not Applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Handle vessel in normal conditions

- 1.1 Features of vessel that relate to its handling characteristics are recognised
- 1.2 Details of manoeuvres are communicated to relevant personnel clearly and concisely using standard maritime vocabulary
- 1.3 Situational awareness is maintained to ensure safety of manoeuvres
- 1.4 Manoeuvres are completed to meet passage requirements
- 1.5 Propulsion equipment is used and monitored to assist in completing manoeuvres safely
- 1.6 Safe operating limits of propulsion and steering equipment are not exceeded

2 Handle vessel in adverse weather conditions

- 2.1 Nature of adverse weather conditions is identified and potential impact on the manoeuvrability of the vessel is determined
- 2.2 Appropriate action is determined to ensure the safety of the vessel
- 2.3 Correct use of propulsion equipment is established to assist in completing manoeuvres safely
- 2.4 Safe operating limits of propulsion and steering equipment are not exceeded
- 2.5 Situational awareness is maintained at all times to review actions and ensure the safety of the vessel

3 Handle vessel in emergencies

- 3.1 Nature of emergency is established and required action is determined

- 3.2 Risks to vessel and safety of persons on board are assessed and safety of required action is confirmed
 - 3.3 Details of action are communicated to relevant personnel clearly and concisely using standard maritime vocabulary
 - 3.4 Appropriate manoeuvres are made during the emergency to maintain the safety of the vessel and those on board, and any other vessels or persons involved
 - 3.5 Propulsion equipment is used and monitored to assist in completing manoeuvres safely
 - 3.6 Safe operating limits of propulsion and steering equipment are not exceeded
- 4 Tow and be towed**
- 4.1 Preparations for towing are made safely according to established nautical practice
 - 4.2 Correct towing procedures and precautions are applied when towing and being towed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARK001 Handle a vessel up to 12 metres.

Assessment Requirements for MARK007 Handle a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- anchoring a vessel
- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- handling a disabled or partially disabled vessel
- manoeuvring a vessel to:
 - berth and leave a berth
 - come to and leave a mooring
 - maintain a steady course
 - retrieve a person overboard
 - steer astern
 - turn short around
 - turn a vessel across the tide and across the wind
- maintaining situational awareness
- undertaking preparations for towing, including:
 - crew briefings that include the task at hand and risks to persons on both vessels
 - ensuring means of communication between the two vessels is available
 - ensuring tow ropes are in good condition and of adequate strength and length for the proposed tow
 - ensuring tow line is of sufficient length to minimise shock loading on tow-line
 - making tow fast to the towing vessel to ensure steerage can be maintained
 - making provision for rapid slipping of the tow in emergency situations
 - preparing messenger ropes for passing tow lines
- towing and being towed
- using appropriate communication.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- adverse weather conditions, including:
 - fog and restricted visibility
 - tropical revolving storms
 - wind and sea conditions that may affect the safety of the vessel
- avoidance of tropical revolving storm activity
- elliptical turn
- features of a vessel that relate to its handling characteristics, and their effects, including:
 - displacement and planing hulls
 - propellers
 - propulsion units, including:
 - jet units
 - inboard engines
 - outboard motors
 - rudders
 - trim and displacement
- manoeuvring in the event of emergencies, including:
 - collision
 - disabled or partially disabled vessel
 - grounding
 - person overboard
- manoeuvring characteristics of small power-driven vessels
- manoeuvring a vessel in the vicinity of large vessels
- manoeuvring to beach and re-float the vessel
- manoeuvring a vessel in adverse weather conditions, including:
 - altering course to minimise the effect of wind and sea
 - berth and leave a berth in various wind and tidal conditions
 - deploying a sea anchor to keep vessel head to sea
 - heading to wind and sea to ride out the adverse weather
 - reduction of speed
 - seeking shelter
- procedures for towing and being towed
- stability of a small vessel and stability terms
- techniques for crossing a coastal bar with and against the sea
- techniques for handling a vessel in heavy swell and surf
- trim and displacement
- use of a sea anchor

- Williamson turn
- WHS/OHS requirements and work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management system (SMS), workplace procedures, operational manuals and maritime publications and procedures relating to emergency response
- a vessel ≥ 5.0 m in length
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MARN008 Apply seamanship skills aboard a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Application

This unit involves the skills and knowledge required to apply practical seamanship skills and techniques as part of work duties aboard a vessel up to 12 m in length.

This unit applies to people working in the maritime industry in the capacity of:

- coxswain on vessels <12 m in length, with propulsion power that is unlimited for an outboard engine or <500 kW for an inboard engine, operating in inshore or designated waters or
- coxswain on tenders or auxiliary vessels operating within 3 nautical miles (nm) of a parent vessel within the exclusive economic zone (EEZ).

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit. This unit is one of the requirements to obtain Australian Maritime Safety Authority (AMSA) certification as a Coxswain Grade 2 NC and Coxswain Grade 1 NC as defined in the National Standard for Commercial Vessels (NSCV) Part D. The AMSA mandated practical assessment (AMPA) is a requirement for AMSA certification. The Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) will cover a range, but not all, of the requirements identified in the Performance Evidence and Knowledge Evidence. The AMPA shall be undertaken in accordance with its instructions.

Assessors of AMPA must hold as a minimum:

- a current certificate of competency issued under Marine Safety (Domestic Commercial Vessel) National Law Act 2012 at the same level as the qualification being assessed with at least 12 months relevant sea service, or
- a relevant seafarer certificate, as master, engineer or deck officer, issued under the Navigation Act 2012.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Use and maintain ropes	<p>1.1 Rope types and common areas of use are correctly identified</p> <p>1.2 Ropes are checked for wear and repairs are undertaken according to manufacturer guidelines</p> <p>1.3 Ropes are coiled and stowed correctly</p> <p>1.4 Knots and hitches are tied neatly and securely, and are used according to their correct application</p> <p>1.5 Ropes are spliced neatly and securely according to their correct application</p> <p>1.6 Rope ends are whipped where appropriate to maintain good condition</p>
2 Secure vessel at anchor	<p>2.1 Prior to letting go, anchor and equipment are prepared</p> <p>2.2 Quantity of anchor cable run out or recovered is appropriate to the depth of water, weather and sea conditions, and tidal range in area of operation</p> <p>2.3 During operation, control of cable is maintained within safe operating limits</p> <p>2.4 Degree to which anchor and equipment are secured on completion of anchoring operations is appropriate to forecast conditions</p> <p>2.5 During all operations, anchoring area is kept free of loose ropes, wires and debris</p>
3 Secure vessel at a berth	<p>3.1 At all times, mooring lines and associated equipment are handled safely</p>

- 3.2 Throughout operations, mooring area is kept free of loose ropes, wires and debris
 - 3.3 Tension on ropes is maintained at an appropriate level for the stage and nature of the operation
 - 4 **Check condition and seaworthiness of vessel**
 - 4.1 Coverage and frequency of checks and inspections on vessel seaworthiness are undertaken according to workplace procedures and organisational safety management system
 - 4.2 Watertight integrity is checked and appropriate action is taken to prepare for prevailing and forecast weather and sea conditions
 - 4.3 Degree to which vessel is secured is appropriate to prevailing and forecast conditions
 - 4.4 Irregularities are identified and appropriate action is taken to rectify the situation
 - 4.5 Irregularities beyond ability to rectify are reported in time to enable remedial action to be taken
 - 4.6 Reports of condition are completed according to workplace procedures
 - 5 **Conduct refuelling operations**
 - 5.1 All personal protective equipment (PPE) is accessed and used
 - 5.2 Safety boundary for the refuelling process is established
 - 5.3 Spill prevention systems are correctly deployed
 - 5.4 Refuelling operations are performed safely and according to organisational safety management system

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to MARN002 Apply seamanship skills aboard a vessel up to 12 metres.

Links

Assessment Requirements for MARN008 Apply seamanship skills aboard a vessel up to 12 metres

Modification History

Release 1. New unit of competency. Licensing/regulatory information has been incorporated in accordance with Regulatory requirements. Assessment Requirements have been strengthened in accordance with Regulatory requirements.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying work health and safety (WHS)/occupational health and safety (OHS) requirements and work practices
- checking seaworthiness and general condition of a vessel up to 12 metres
- coiling and stowing ropes
- handling ropes
- identifying deterioration and causes in hull and fittings
- performing an eye splice
- performing common whipping on ropes
- performing preparations for and letting go and weighing anchor
- preparing and throwing a heaving line
- securing a vessel alongside using vessel mooring lines, including:
 - bow and stern lines
 - fore and aft springs
- securing anchor and equipment on completion of anchoring operations
- tying reef knot, bowline, clove hitch, round turn and two half hitches, rolling hitch and sheet bend - single and double.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- anchors, types and characteristics
- basic structural parts of a small vessel
- considerations to make when selecting an anchorage
- correct application of common knots and hitches
- coverage and frequency of checks of vessels seaworthiness
- factors affecting the safety and integrity of vessel; its equipment and materials on board
- how to make a vessel watertight

- identifying and rectifying irregularities in the condition and seaworthiness of the vessel
- large objects likely to move in a sea way
- loading, discharging and movement of weights
- maintenance of synthetic and natural fibre ropes
- materials on deck and below
- mooring line arrangements for securing at a berth
- openings including hatch covers and all other openings that water can enter
- principles of maintaining watertight integrity
- process for checking seaworthiness and general condition of a vessel up to 12 metres including:
 - accommodation and storage spaces
 - anchors
 - galley, stores and equipment
 - large objects likely to move in a sea way
 - materials on deck and below
 - opening
- procedure for anchoring
- refuelling a vessel according to safety regulations and organisational safety management system requirements
- rope types, characteristics and applications, dynamic and non-dynamic, including:
 - braided
 - natural fibre
 - plaited
 - polyester
 - wire core rope
 - wire rope
- safety precautions and pollution control measures during refuelling
- securing a vessel for sea
- types of anchors used on small vessels up to 12 metres
- WHS/OHS requirements and work practices.

Assessment Conditions

Assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment. Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Practical assessment must occur in a workplace, or realistic simulated workplace, under the normal range of workplace conditions. Simulations and scenarios may be used where situations cannot be provided in the workplace or may occur only rarely, in particular for situations relating

to emergency procedures and adverse weather conditions where assessment would be unsafe, impractical or may lead to environmental damage. With the exception of whipping, splicing and knot tying, the Australian Maritime Safety Authority (AMSA) mandated practical assessment (AMPA) must be undertaken on a vessel ≥ 5.0 metres in length.

Resources for assessment must include access to:

- applicable documentation, such as legislation, regulations, codes of practice, safety management system, workplace procedures and operational manuals
- a vessel ≥ 5.0 m in length
- tools, equipment, machinery, materials and relevant personal protective equipment (PPE) currently used in industry.

MEM07032 Use workshop machines for basic operations

Modification History

Release 1. Supersedes and is equivalent to MEM07032B Use workshop machines for basic operations

Application

This unit of competency defines the skills and knowledge required to use workshop machines for basic operations in maintenance or jobbing environment.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measurement is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information
MEM18001	Use hand tools

Competency Field

Machine and process operations

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-----------------------------------|-----|---|
| 1 | Determine job requirements | 1.1 | Follow standard operating procedures (SOPs) |
| | | 1.2 | Comply with work health and safety (WHS) requirements at all times |
| | | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs |
| | | 1.4 | Identify job requirements from specifications, sketches, job sheets or work instructions |
| 2 | Set up machine | 2.1 | Select appropriate machine and tools to meet work requirements |
| | | 2.2 | Sharpen cutting tools, as required |
| | | 2.3 | Install tools according to procedures |
| | | 2.4 | Set guards and adjust, as required |
| 3 | Operate machine | 3.1 | Mount material to be machined and secure using clamping device/ appropriate to the material and work requirements |
| | | 3.2 | Operate machine to suit work and material requirements |
| | | 3.3 | Check machined component against work requirements and predetermined finish |
| | | 3.4 | Make adjustments, as required |

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, accessibility of the item, and local industry and regional contexts) are included.

Machines include one (1) or more of the following:

- lathe
- radial arm drill
- mill

Cutting tools include one (1) or more of the following:

- lathe tools
- milling cutters
- drills

Materials include one (1) or more of the following:

- ferrous
- non-ferrous

Clamping devices include one (1) or more of the following:

- chucks
- vices
- clamps
- bars and packing

Release 1. Supersedes and is equivalent to MEM07032B Use workshop machines for basic operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and interpreting specifications and work instructions for machine operations
- setting up machines and selecting, sharpening and mounting tools required for the required job
- mounting the material to be processed and safely operating the machine
- checking machined components to ensure it meets specifications and making adjustments, as required.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- cutting tool sharpening methods and techniques
- units of measurement, tool geometry and numerical operations required for basic machining operations
- safe operation of tool sharpening equipment and consequences of incorrect sharpening
- machine set-up and consequences of incorrect speeds and feeds
- procedures for operating workshop machines
- reasons for poor surface finish.

Assessment Conditions

- Assessors must:
 - have vocational competency in using workshop machines for basic operations at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Application

This unit of competency defines the skills and knowledge required to lift and move materials manually and/or using basic manual handling equipment in a wide range of environments.

Maximum manual lifting weight is limited to Safe Work Australia recommendations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Materials handling

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, job sheets or work instructions</p>
2 Lift materials manually	<p>2.1 Determine material weight correctly utilising most appropriate technique, and assess risks associated with lifting</p> <p>2.2 Undertake lifting techniques to Safe Work Australia recommended procedures and having regard to types of movement, methods, storage, height and position</p>
3 Move/shift materials manually	<p>3.1 Select appropriate equipment, as required</p> <p>3.2 Place material safely and securely on moving equipment</p> <p>3.3 Relocate material ensuring safety of personnel and security of material</p> <p>3.4 Unload material and place in a safe and secure manner</p>

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Material weight includes

- determined using scales

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

one (1) or more of the following:

- interpreting signage

Lifting techniques include one (1) or more of the following:

- individual
- team lifting
- use of appropriate lifting equipment

Appropriate equipment includes one (1) or more of the following:

- hand trolleys
- wheelbarrows
- motorised/hand pallet trucks (not sit on)
- hand carts
- dedicated production or process lifting equipment
- baskets, spreader bars, cradles or the like attached to lifting equipment

Unit Mapping Information

Assessment Requirements for MEM11011 Undertake manual handling

Modification History

Release 1. Supersedes and is equivalent to MEM11011B Undertake manual handling

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- assessing the risks associated with lifting materials manually and determining the most appropriate technique
- selecting and using the appropriate equipment to move/shift materials ensuring safety of personnel and security of material.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- manual handling techniques, including individual or team lifting
- appropriate equipment associated with move/shift materials
- hazards of incorrect procedures
- Safe Work Australia standards for manual handling.

Assessment Conditions

- Assessors must:
 - have vocational competency in undertaking manual handling at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Application

This unit of competency defines the skills and knowledge required to estimate approximate answers to arithmetical problems, carry out calculations involving percentages and proportions, and determine simple ratios and averages.

It also covers producing and interpreting simple charts and graphs in manufacturing, engineering or related environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 3

Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

Competency Field

Measurement

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. requirements at all times
1.3	Identify job requirements from specifications, sketches, job sheets or work instructions
1.4	Establish required calculation outcomes from job instructions
1.5	Determine required calculation method to suit the application, including selection of relevant arithmetic operations and/or formulae
1.6	Estimate expected results, including rounding off, as appropriate
2	Perform calculations
2.1	Apply calculation method
2.2	Obtain answer and check against estimation to ensure it is correct
3	Produce charts and graphs from given information
3.1	Transpose data to produce charts or graphs
3.2	Ensure charts or graphs reflect data on which they are based to meet specifications

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Calculations are performed using one (1) or more of the following:

- pen and paper
- a calculator
- tables
- tablets
- computers

Relevant sources include one (1) or more of the following:

- charts
- graphs
- diagrams
- measurement data
- reference manuals
- specifications

Applications include computations associated with one (1) or more of the following:

- pressure
- volume
- temperature
- heat
- speed
- power
- elasticity
- density
- mass
- force

Arithmetic operations include the following:

- application of subtraction, addition, multiplication and division
- manipulation of decimals, fractions and mixed numbers and whole numbers
- using formulas
- determining percentages
- calculation of proportions and ratios

Charts and graphs include one (1) or more of the following:

- simple histograms
- control charts
- pie charts

Assessment Requirements for MEM12024 Perform computations

Modification History

Release 1. Supersedes and is equivalent to MEM12024A Perform computations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- obtaining and interpreting data from job instructions and relevant sources to establish required outcomes
- determining the appropriate calculation method to suit the application
- performing calculations and confirming answer/s
- producing and interpreting simple charts and graphs from given data.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- formulae applicable to the determination of perimeter, area and volume of simple geometric shapes and the reasons for using dimensions with the same units
- techniques and procedures for rounding off figures when estimating approximate answers
- features and use of mixed numbers, decimals, fractions and whole numbers
- procedures for carrying out calculations involving fractions and using each of the four basic rules of addition, subtraction, multiplication and division
- concept of percentage and procedures to be followed in converting a decimal and fraction to a percentage
- concepts and calculations of ratio and proportion
- scales applicable to the axes of the graphs or charts
- types of charts and/or graphs used in the individual's field of work
- upper and lower limits of acceptability applicable to data entered on a graph or chart
- trends indicated by the slope or gradient of a graph
- action to be taken when given trends occur or set limits are approached on graphs or charts
- procedures for drawing 'lines of best fit'
- trends indicated by the graphs or charts drawn.

Assessment Conditions

- Assessors must:
 - have vocational competency in performing computations at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Application

This unit of competency defines the skills and knowledge required to work effectively in manufacturing and engineering work situations, including planning routine work and participating in and following work health and safety (WHS) procedures. The unit applies to working either individually or in a team situation and includes contributing to work-related group activities in a manufacturing or engineering workplace.

This unit covers WHS skills associated with carrying out routine operational activities safely and in compliance with legislative and regulatory requirements.

The unit covers the skills associated with participation in quality systems, communication and cooperation with others. The unit applies to workplaces with informal or formal quality management and improvement systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

Nil.

Competency Field

Work health and safety

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Identify goals, objectives and task requirements and clarify with appropriate persons, where required
		1.2	Prioritise task requirements
2	Review and modify plan	2.1	Adjust timelines, priorities and other planning components to respond to contingencies, as necessary
		2.2	Re-examine results of work activity against the plan and identify possible improvements to future performance of work tasks
3	Work effectively with others in the workplace	3.1	Identify own role and responsibilities and relationship to other employees, including employees performing related/interdependent activities
		3.2	Identify supervisors and other sources of advice and assistance for own work
		3.3	Apply effective interpersonal skills to interact with others and contribute to activities and objectives
		3.4	Review and modify own work progress to complement the work of others
		3.5	Report own work progress to supervisors and where required to fellow employees using standard operating procedures (SOPs)
4	Follow safe work practices	4.1	Check for and identify hazards in the work area before and during work
		4.2	Follow procedures for avoiding or controlling hazards already identified in instructions, signage or other workplace communication
		4.3	Identify and report risks and hazards not covered by procedures

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<ul style="list-style-type: none"> 4.4 Select, use and maintain relevant personal protective equipment (PPE) by procedures, as required 4.5 Recognise emergency situations and take appropriate initial emergency action 4.6 Follow procedures for responding to emergencies 4.7 Report incidents, injuries and other WHS non-conformances according to procedures
5 Work within a quality system	<ul style="list-style-type: none"> 5.1 Follow instructions and procedures and perform duties in accordance with standard operating procedures or quality system requirements 5.2 Ensure conformance of product and process to specifications 5.3 Report defects and non-conformance to specifications according to procedures 5.4 Participate in process improvement procedures, where required
6 Participate in workplace health and safety procedures	<ul style="list-style-type: none"> 6.1 Identify workplace health and safety policies and procedures relevant to own work and work area 6.2 Identify relevant WHS managers and representatives for own work area 6.3 Provide input to minimise hazards in work area in line with organisation WHS procedures and participative arrangements

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Quality systems include one (1) or more of the following

- quality planning
- quality assurance
- quality control
- quality improvement procedures and processes

Task requirements include one (1) or more of the following:

- timeframe
- quality requirements
- outcome and performance requirements
- job history
- checks
- reporting requirements
- tools and equipment
- materials and parts
- supporting documents

Specifications include one (1) or more of the following:

- task lists
- instructions
- manufacturer manuals
- diagrams and schematics
- sketches
- parts lists
- SOPs

Planning includes one (1) or more of the following:

- preparing a plan to complete the task
- organising task into manageable steps including appropriate order and timing
- monitoring the progress of processes related to own responsibilities
- applying relevant WHS instructions
- collecting, sorting, recording results of work
- seeking advice and guidance on setting priorities and timeframes

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- seeking feedback from supervisor, trainer or mentor

Unit Mapping Information

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering

Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and avoiding or controlling hazards
- reporting hazards, incidents, injuries and other work health and safety (WHS) non-conformances following SOPs
- recognising and responding to emergencies following SOPs
- identifying and obtaining, instructions and information on job requirements, including one or more of the following:
 - verbal or written job instructions
 - specifications
 - SOPs
 - charts
 - lists
- identifying and responding to contingencies, including:
 - equipment breakdowns
 - non-conforming components
 - safety hazards
- recording information into proforma workplace documents, including:
 - production tally forms
 - quality control forms
 - safety incident forms
- performing assigned tasks and checking outcome of own work for conformance to specifications
- identifying own responsibilities within the workplace quality system
- giving and receiving feedback on own and group work
- seeking assistance from supervisors and mentors.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use and application of personal protective equipment
- basic quality system terminology and concept, including:
 - quality assurance
 - quality control
 - quality improvement
- procedures to be followed in performing own work
- objectives, requirements and specifications to which the individual's work is to comply
- costs and consequences of poor quality
- effective interpersonal skills:
 - effective listening
 - basic speaking skills
 - use of workplace terminology and jargon
 - giving and receiving feedback
 - checking and clarifying task-related information
 - verbal, visual and written instructions
 - appropriate modes and methods of communication
- barriers to effective communication
- sources of technical expertise/assistance
- hazards and control measures associated with workplace activities.

Assessment Conditions

- Assessors must:
 - have vocational competency in working safely and effectively in manufacturing and engineering at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Application

This unit of competency covers the skills and knowledge required to access, organise and communicate information related to production, maintenance or associated processes or tasks that apply in manufacturing, engineering or related environments.

For accessing and recording of data requiring system knowledge and judgement, Unit MEM16008 Interact with computing technology should be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

Competency Field

Communication

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|---------------------------|-----|---|
| 1 | Access information | 1.1 | Determine information requirements of tasks and access relevant information from a range of sources |
| | | 1.2 | Recognise and use workplace terminology correctly |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2 Organise and analyse information	2.1 Interpret information and organise in accordance with work requirements
	2.2 Determine relevance and implications for immediate work requirements
3 Communicate organised information using established workplace methods	3.1 Identify purpose of communication and appropriate communication method
	3.2 Communicate information using established workplace methods

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Range of sources include using one (1) or more of the following:

- job instructions
- specifications
- standard operating procedures (SOPs)
- charts
- lists
- documents
- computer data
- drawings
- sketches
- tables

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- technical manuals and/or charts
- other applicable reference material

Determining relevance of information includes one (1) or more of the following:

- checking relevance of information to own work
- selecting task relevant information from a larger document or from a diagram
- preparing an opinion based on analysis of simple facts
- expressing an opinion on the cause of faults

Workplace terminology refers to one (1) or more of the following:

- equipment
- processes
- workplace areas
- staff
- procedures

Established workplace methods include using one (1) or more of the following:

- proforma reports
- data entry
- verbal
- drawings

Purpose of communication includes one (1) or more of the following:

- simple incident/non-conformance report
- maintenance request
- production records
- material usage records
- work records
- other standard workplace records

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Assessment Requirements for MEM16006 Organise and communicate information

Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- accessing and recording relevant information from a range of sources
- recognising and using workplace appropriate terminology
- reading, interpreting and following information in workplace documentation
- checking and clarifying information
- organising, categorising and sequencing information
- communicating using appropriate methods and procedures for a variety of situations.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- types of information relevant to the workplace and required tasks
- terminology used in the workplace relevant to own work
- available sources of information
- information analysis techniques appropriate to tasks and position
- methods of categorising and organising information including correct sequencing of information
- methods of recording and communicating information.

Assessment Conditions

- Assessors must:
 - have vocational competency in organising and communicating information at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Application

This unit of competency defines the skills and knowledge required to use a range of hand tools for a variety of general engineering applications.

This unit should not be selected if the hand tool is dedicated to a single operation or machine or when a machine-specific/customised tool is used.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use of power tools/hand held operations is required unit MEM18002 Use power tools/hand held operations should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Use hand tools for general engineering applications	2.1	Select hand tools appropriate to the task requirements
		2.2	Use hand tools to produce outcomes that meet job specifications
		2.3	Identify unsafe or faulty tools and mark for repair according to designated procedures before, during and after use
		2.4	Undertake routine maintenance of tools using engineering principles, tools, equipment and procedures
		2.5	Store hand tools safely in appropriate location according to procedures and manufacturers' recommendations

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Hand tools include one (1) or more of the following:

- hacksaws
- hammers
- punches
- screwdrivers
- sockets
- wrenches
- scrapers
- chisels
- gouges
- wood planes
- files of all cross-sectional shapes and types
- hand held taps and dies

Applications include one (1) or more of the following:

- adjusting
- dismantling
- assembling and finishing of items or components
- finishing, cutting, scraping of metallic and non-metallic material to size and shape
- tapping/retapping and threading/rethreading new/damaged threads

Drawings include one (1) or more of the following:

- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
- work specifications that include graphic representations that do not require interpretation

Job specifications include one (1) or more of the following:

- finish
- tension
- size
- shape

Routine maintenance includes one (1) or more of the following:

- cleaning
- lubricating
- tightening
- simple tool repairs
- adjustments

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MEM18001 Use hand tools

Modification History

Release 1. Supersedes and is equivalent to MEM18001C Use hand tools

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using hand tools to produce the desired outcome to job specifications
- following designated procedures for dealing with unsafe or faulty tools
- undertaking routine maintenance and cleaning of hand tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and applications of different hand tools used in a general engineering context, including hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and sizes
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools, including lubricating, tightening, simple tool repairs and adjustments using engineering principles and relevant equipment
- storage location and procedures for a range of hand tools.

Assessment Conditions

- Assessors must:
 - have vocational competency in using hand tools at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Application

This unit of competency defines the skills and knowledge required to use a range of hand held power tools and fixed power tools for hand held operations used in a variety of general engineering applications.

This unit should not be selected if the power tools used are dedicated to an operation or machine, e.g. nut-runner, air drill and power driver.

Where the interpretation of technical drawings is required unit MEM09002 Interpret technical drawing should also be selected.

Where the selection and use of engineering measuring equipment is required unit MEM12023 Perform engineering measurements should also be selected.

Where the selection and use hand tools is required unit MEM18001 Use hand tools should also be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Band: A

Unit Weight: 2

Pre-requisite Unit

MEM11011 Undertake manual handling

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information

Competency Field

Maintenance and diagnostics

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Use power tools for general engineering applications	2.1	Select power tools appropriate to the task requirements
		2.2	Use power tools for a determined sequence of operations to produce desired outcomes to job specifications
		2.3	Identify unsafe or faulty tools and mark for repair before, during and after use according to SOPs
		2.4	Undertake operational maintenance of tools according to principles, techniques and SOPs
		2.5	Store power tools safely in appropriate location according to manufacturers' recommendations and SOPs

Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Power tools include one (1) or more of the following:**
- electric or pneumatic/hydraulic drills
 - grinders
 - jigsaws
 - nibblers
 - cutting saws
 - sanders
 - planers
 - routers
 - pedestal drills
 - pedestal grinders
- Power tool operations include one (1) or more of the following:**
- clamping
 - alignments
 - adjustments
- Applications include one (1) or more of the following:**
- loosening and fastening items or components
 - shaping, finishing, cutting, grinding of metallic and non-metallic materials and/or tool bits to size and shape
- Drawings include one (1) or more of the following:**
- drawings and sketches not covered by AS 1100 Technical drawing or AS 1102 Graphical symbols for electrotechnical documentation, and their equivalents
 - work specifications that include graphic representations that do not require interpretation
- Clamping includes one (1) or more of the following:**
- multigrips
 - vices
 - jigs and fixtures
 - clamps
- Job specifications include one (1) or more of the following:**
- finish
 - size
 - shape
- Operational maintenance includes one (1) or more of the following:**
- cleaning
 - lubricating
 - tightening

Unit Mapping Information

Assessment Requirements for MEM18002 Use power tools/hand held operations

Modification History

Release 1. Supersedes and is equivalent to MEM18002B Use power tools/hand held operations

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- selecting and using a range of hand held and fixed power tools for a variety of general engineering applications
- following designated procedures for dealing with unsafe or faulty power tools
- undertaking routine maintenance and cleaning of power tools, including storage.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- features and application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements and cleaning of a range of power tools
- storage location and procedures of a range of power tools.

Assessment Conditions

- Assessors must:
 - have vocational competency in using power tools/hand held operations at least to the level being assessed with relevant industry knowledge and experience
 - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires

- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MEMPE001 Use engineering workshop machines

Modification History

Release 1. Supersedes and is equivalent to MEMPE001A Use engineering workshop machines.

Application

This unit of competency defines the skills and knowledge required to set up machine components using appropriate machines. Tooling might need to be re-sharpened but not ground up from a blank. The setting for the machines are calculated by the individual from given formulas, surface speeds and feed rates.

This unit describes entry-level skills and knowledge in preparation for employment within the metal, engineering, manufacturing and associated industries and is suitable for use in institutional-based vocational programs. Skills development takes place under direct supervision.

It is not to be used in a traineeship or apprenticeship training program or associated qualifications. It is only to be used in employment preparation programs and carries no direct credit towards apprenticeship/trade and other qualification types in manufacturing and engineering.

This skills in this unit are intended to be developed in combination with the project unit, MEMPE006 Undertake a basic engineering project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Pre-employment

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare a job plan	1.1 Comply with work health and safety (WHS) requirements at all times 1.2 Identify job requirements from work information in consultation with a supervisor 1.3 Identify appropriate machines in accordance with job requirements 1.4 Identify appropriate tooling in accordance with job requirements 1.5 Calculate cutting speeds and feeds 1.6 Prepare a job plan showing machines, tooling, cutting speeds and feeds and an appropriate sequence of operations 1.7 Confirm plan with a supervisor
2. Prepare for machining	2.1 Obtain appropriate tooling and materials 2.2 Set up tools and materials to meet job requirements 2.3 Set required speeds and feeds
3. Perform machining	3.1 Use and wear appropriate personal protective equipment (PPE) in accordance with procedures 3.2 Follow safe machining practices 3.3 Machine materials to job requirements 3.4 Use measuring equipment 3.5 Store completed work in a manner which will prevent/minimise potential damage
4. Complete work requirements	4.1 Clear work area of waste and clean according to requirements 4.2 Maintain and/or store machines, tools and equipment according to instructions

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.	
Appropriate machines includes two or more of the following:	<ul style="list-style-type: none"> • lathes • milling machines • cut off saws • pedestal grinders • fixed position drilling machines • computer-controlled machines.
Work information includes one or more of the following:	<ul style="list-style-type: none"> • drawings • sketches • job instructions • schematics • diagrams • technical manuals.
Measuring equipment includes one or more of the following:	<ul style="list-style-type: none"> • micrometers • vernier scaled measuring devices • rules • calipers • gauges.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MEMPE001A Use engineering workshop machines.

Assessment Requirements for MEMPE001 Use engineering workshop machines

Modification History

Release 1. Supersedes and is equivalent to MEMPE001A Use engineering workshop machines.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- following work instructions and safe work practices
- preparing a job plan on at least two occasions
- preparing for machining
- calculating speeds and feeds
- performing machining on at least two occasions
- using appropriate measuring equipment
- cleaning and storing of equipment.

Note: Where a volume and/or frequency is not specified, demonstration must be provided at least once.

Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- machines used to cut metal
- safe machine operation procedures
- material and equipment preparation requirements
- basic marking out techniques
- use and care of measuring tools
- types of machines for cutting, grinding, drilling, turning and milling
- work and tool holding methods for each machine.

Assessment Conditions

- Assessors must:
 - have vocational competency in using engineering workshop machines at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015 or its replacement* and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring State as the case requires.
- This unit must be assessed in a learning institution and must cover the successful use of a lathe and other relevant workshop machines and the skills developed would usually be developed by an individual working alone under direct supervision.
- Assessment must be in conjunction with assessment of the project unit and other units integrated into the project.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

MSFFL3127 Install synthetic textile floor coverings in indoor and outdoor facilities

Modification History

Release 1. Supersedes and is equivalent to MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces. Changes to title, application, elements and performance criteria to improve clarity and consistency across MSFFL units. Changes to assessment requirements.

Application

This unit describes the skills and knowledge required to install synthetic turf and needle-punch floor coverings in indoor and outdoor facilities, including the preparation, cutting, laying out, joining, fixing and finishing of the synthetic textile floor covering material.

Workers with this competency undertake routine tasks on residential and non-residential/commercial sites according to job instructions and workplace procedures using discretion, judgement and problem-solving to identify and resolve routine issues. They work with a high degree of self-direction under routine supervision, and they are responsible for their output.

The work described in this unit requires a licence or certification in some jurisdictions, and state or territory authorities should be consulted to determine the current status. Workers on construction sites are required by law to complete induction training. They must also comply with Australian Standards, codes and manufacturer installation instructions.

Competency Field

Flooring technology

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to install synthetic textile floor coverings	<p>1.1 Interpret floor covering installation requirements from job and manufacturer instructions and calculate the quantities of materials required</p> <p>1.2 Identify hazards relating to the work site, work practices, materials, tools and equipment, and check risk treatments are in place and</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>operating</p> <p>1.3 Select and check all required tools and equipment are ready to use, and organise to fix any deficiencies according to workplace procedures</p> <p>1.4 Gather the floor coverings and other materials required by job instructions, and check they meet quality requirements and are prepared and ready to install according to manufacturer instructions</p> <p>1.5 Confirm the subfloor is clean and suitable for installing the synthetic floor covering material, and fix or report any deficiencies according to workplace procedures</p>
2. Cut, fit and fasten synthetic textile floor coverings	<p>2.1 Cut and lay required shock padding/underlay for the floor covering according to job instructions, manufacturer instructions and workplace procedures</p> <p>2.2 Determine the set out and laying direction of the floor covering according to job instructions to minimise waste and joins, consider the direction of the pile and ensure an efficient, quality installation</p> <p>2.3 Establish the skirting point and seam placements for the floor covering</p> <p>2.4 Lay out the synthetic floor covering material and check it for size, direction of pile and pattern match</p> <p>2.5 Measure, mark, cut, seal and join the synthetic floor covering material according to workplace procedures and manufacturer instructions</p> <p>2.6 Position, stretch and fasten the synthetic floor covering according to workplace procedures</p> <p>2.7 Fit the synthetic floor covering material to finishing strips, trim excess material to walls and finish installing the material according to workplace procedures</p> <p>2.8 Check the synthetic floor covering material is installed correctly according to job instructions and quality requirements, and fix any deficiencies</p> <p>2.9 Check the floor covering is installed correctly according to job instructions and quality requirements, and fix any deficiencies</p>
3. Complete the task according to workplace procedures	<p>3.1 Clean up the work area, identify items for recycling and dispose of waste</p> <p>3.2 Identify, tag and report any damage to equipment and tools</p> <p>3.3 Check, clean and perform routine maintenance on equipment and</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	tools and store them and unused materials 3.4 Complete task outcome documentation

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces.

Assessment Requirements for MSFFL3127 Install synthetic textile floor coverings in indoor and outdoor facilities

Modification History

Release 1. Supersedes and is equivalent to MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces. Changes to title, application, elements and performance criteria to improve clarity and consistency across MSFFL units. Changes to assessment requirements.

Performance Evidence

There must be evidence the candidate has completed the tasks in the elements and performance criteria of this unit of competency and has demonstrated the ability to complete according to job instructions:

- at least two installations of synthetic textile floor coverings that also require the preparation of the subfloor including:
 - one synthetic turf grass to an outdoor installation or recreational or sports area
 - one synthetic needle-punch to an indoor installation or recreational or sports area
 - installation of synthetic textile floor coverings — where the stairs have been adequately prepared — on a box step stairway with at least three steps, including the fitting of appropriate stair nosing.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- manufacturer installation and use instructions for:
 - bonded foam, latex foam, rubber and styrene-butadiene rubber (SBR) underlay and/or shock pads
 - synthetic textile floor coverings, including needle punch carpet, PVC-backed carpet, rubber-backed carpet and unfilled, sand-filled and rubber-filled synthetic turf
 - adhesives, including plasticised and rubber resin acrylic adhesive, solvent-based outdoor / grass adhesive, two-part polyurethane and water, solvent-based and solvent-free adhesives
- the safe and correct use of, and maintenance requirements for tools and equipment for, installing synthetic textile floor covering
- the safe and correct handling of heavy synthetic textile floor covering loads
- the most common issues that can arise when installing synthetic textile floor coverings and how to avoid and respond to them
- workplace policies and procedures relevant to their job role and responsibilities including for:
 - installing synthetic textile floor coverings

- communication and reporting
- environmental protection and sustainability, including maximising resource utilisation and minimising waste
- quality indicators for completed work and process improvements
- work health and safety, including the use of personal protective equipment and safety data sheets
- work planning
- how to identify if a subfloor is suitable for installing synthetic textile floor coverings
- how to identify if synthetic textile floor coverings are installed correctly.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - locations in which to install synthetic textile floor coverings
 - synthetic floor covering
 - equipment and tools required for the activities set out in the elements and performance criteria, including those to control hazards
 - job instructions and workplace procedures.

MSL913004 Plan and conduct laboratory/field work

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL913002 Plan and conduct laboratory/field work. Range of conditions removed. Assessment requirements amended. Equivalent outcome.</p>

Application

This unit of competency describes the skills and knowledge to plan and complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available guidelines and advice. Work plans may need to be modified with supervisor agreement to suit changing conditions and priorities.

This unit of competency applies to instrument operators, laboratory assistants and technical assistants working in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL Laboratory Operations Companion Volume Implementation Guide is available from VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5c63a03b-4a6b-4ae5-9560-1e3c5f462baa>

Assessment Requirements for MSL913004 Plan and conduct laboratory/field work

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL913002 Plan and conduct laboratory/field work. Range of conditions removed. Assessment requirements amended. Equivalent outcome.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively planned, prioritised and completed 2 laboratory/field work tasks on 2 separate occasions, including:
 - working independently
 - working in a team context.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures/guidelines for work
- ethical and professional work performance
- problem-solving strategies
- effective interpersonal communication and conflict resolution techniques
- effective team operations for groups
- strategies to maintain work flow
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- workplace procedures
- equipment and materials for relevant technical tasks.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL924005 Process and interpret data

Modification History

Release 1. Supersedes and equivalent to MSL924003 Process and interpret data. Minor changes to Performance Criteria, including moving of list in Element 4 to Performance Evidence. Performance Evidence significantly reworked for improved clarity with examples removed. Minor wording changes to Knowledge Evidence.

Application

This unit of competency describes the skills and knowledge to retrieve data, evaluate formulae, perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

This unit of competency applies to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil.

Competency Field

Data

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Retrieve and check data	1.1 Retrieve data using appropriate files and/or application software 1.2 Verify the quality of data using workplace procedures 1.3 Rectify errors in data using workplace procedures

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Calculate scientific quantities	2.1 Calculate statistical values for given data 2.2 Calculate scientific quantities using given formulae and data 2.3 Ensure calculated quantities are consistent with estimations and expectations 2.4 Report all calculated quantities using the appropriate units and correct number of significant figures
3. Present data	3.1 Present data in clearly labelled tables, charts and graphs 3.2 Graph data using appropriate scales to span the range of data or display trends 3.3 Report all data using the appropriate units and number of significant figures
4. Interpret data	4.1 Correctly interpret significant features of tables, charts and graphs 4.2 Recognise and report significant points, anomalies and trends in data
5. Keep accurate records	5.1 Transcribe information accurately 5.2 Verify the accuracy of records, following workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL924005 Process and interpret data

Modification History

Release 1. Supersedes and equivalent to MSL924003 Process and interpret data. Minor changes to Performance Criteria, including moving of list in Element 4 to Performance Evidence. Performance Evidence significantly reworked for improved clarity with examples removed. Minor wording changes to Knowledge Evidence.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- calculated scientific and statistical quantities with or without a calculator or computer software, including the following items:
 - converting units involving multiples and submultiples
 - scientific notation, significant figures, round off, estimate and approximate
 - transposing and evaluating formulae
 - fractions
 - decimals
 - proportions
 - percentages
 - mean
 - median
 - mode
 - ratios
 - range
 - standard deviation
- performed at least 4 of the following calculations:
 - dimensions of 2D shapes, including perimeters and areas
 - dimensions of 3D shapes, including areas and volumes
 - logarithmic functions
 - trigonometric functions, including trigonometric ratios (sin cos tan) and Pythagoras theorem
 - absolute and relative uncertainties in measurements and test results
 - industry specific quantities
 - concentration
 - enumeration of microbiological organisms
 - process variables

- food properties
- mechanical properties
- presented accurate results in the required format (significant figures, uncertainty units)
- performed sort, filter and basic calculations using computer software
- prepared and presented data in at least 5 of the following formats using computer software:
 - tables
 - line graphs
 - scatter plot
 - pie charts
 - bar charts
 - control charts
 - semi-quantitative observations expressed on a scale: 1 to 4 or + to ++++
- recognised and interpreted the following significant features in data:
 - gradients
 - intercepts
 - maximum and minimum values
 - limit lines
 - anomalies and trends.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concepts of metrology, including:
 - that all measurements are estimates
 - difference between error and correction
 - repeatability, precision, accuracy and uncertainty associated with each measurement result
 - sources of error and uncertainty
 - metrological traceability
 - significant figures
- the international system of units (SI)
- existence and purpose of national measurement regulations and guidelines and how this relates to job role
- scientific quantities and calculations relevant to job role
- types of data processing software
- workplace procedures for:
 - coding, entering, storing, retrieving and communicating data
 - verifying data and rectifying mistakes
 - maintaining and filing records and maintaining security of data.

-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - data sets and records
 - calculator, computer and relevant software or laboratory information management system
 - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL933005 Maintain the laboratory/field workplace fit for purpose

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL933001 Maintain the laboratory/field workplace fit for purpose. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to clean laboratory work surfaces, clean and store laboratory equipment and monitor laboratory stocks under direct supervision.

This unit of competency applies to laboratory assistants and instrument operators working in all industry sectors. It forms a major part of the work of laboratory assistants, who work in accordance with work instructions and standard operating procedures (SOPs) which incorporate all relevant aspects of work health and safety (WHS) legislation and the codes, guidelines, regulations and Australian Standards applying to environmental hazards and dangerous goods.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil

Competency Field

Quality

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Clean work preparation areas | 1.1 | Clean preparation areas using appropriate cleaning agents and equipment according to workplace procedures |
| | | 1.2 | Remove spillages using appropriate agents, personal protective equipment (PPE) and workplace procedures |
| | | 1.3 | Collect and segregate wastes in accordance with workplace procedures, relevant codes and regulations |
| 2 | Clean and store equipment | 2.1 | Collect used equipment, inspect for faults and, where necessary, remove from service |
| | | 2.2 | Use appropriate agents, apparatus and techniques to clean equipment |
| | | 2.3 | Store clean equipment in the designated locations and manner |
| 3 | Monitor stocks of materials and equipment | 3.1 | Perform stock checks and maintain records of usage as directed |
| | | 3.2 | Store labelled stocks for safe and efficient retrieval |
| | | 3.3 | Inform appropriate personnel of impending stock shortages to maintain continuity of supply |
| 4 | Maintain a safe work environment | 4.1 | Use established safe work practices and PPE to ensure personal safety and that of other personnel |
| | | 4.2 | Report potential hazards and/or maintenance issues in own work area to designated personnel |
| | | 4.3 | Minimise the generation of waste and environmental impacts |
| | | 4.4 | Dispose of waste in accordance with workplace procedures, relevant codes and regulations |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL933005 Maintain the laboratory/field workplace fit for purpose

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL933001 Maintain the laboratory/field workplace fit for purpose. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- appropriately cleaned laboratory work surfaces on 2 occasions
- cleaned 2 items of laboratory/field equipment
- monitored stocks of a workplace at least 2 separate occasions
- maintained a safe work environment.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant hazards, work health and safety (WHS) requirements
- workplace procedures for:
 - the cleaning of work preparation areas, materials and equipment
 - minimisation and disposal of waste
 - monitoring of laboratory stocks
- typical equipment used in a laboratory
- typical materials used in a laboratory
- typical hazards and risks presented in a laboratory
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and WHS requirements specific to the work task.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - work preparation areas, stocks, materials and equipment, cleaning, decontamination and/or disinfection agents and equipment
 - personal protective equipment (PPE).

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973025 Perform basic tests

Modification History

Release 1. Supersedes and equivalent to MSL973013 Perform basic tests. Minor changes to Performance Criteria. Duplicating items removed from Knowledge Evidence.

Application

This unit of competency describes the skills and knowledge to prepare samples and perform tests and measurements using standard methods with access to readily available advice from supervisors.

This unit of competency applies to laboratory/field assistants working in all industry sectors. In general, they do not calibrate equipment and make only limited adjustments to the controls. They do not interpret or analyse results or troubleshoot equipment problems.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Competency Field

Testing

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret test requirements	1.1 Review test request to identify samples to be tested, test method and equipment involved 1.2 Identify hazards and workplace controls associated with the sample, preparation methods, reagents and/or equipment
2. Prepare sample	2.1 Match sample provided to accompanying documentation and report any discrepancies in accordance with workplace procedures 2.2 Prepare sample in accordance with workplace procedures
3. Check equipment	3.1 Set up test equipment in accordance with test method

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
before use	3.2 Perform pre-use and safety checks in accordance with workplace procedures and manufacturer instructions 3.3 Identify faulty or unsafe equipment and report to appropriate personnel 3.4 Check calibration status of equipment and report any out-of-calibration items to appropriate personnel
4. Perform tests on samples	4.1 Identify, prepare and weigh or measure sample and standards to be tested 4.2 Conduct tests in accordance with workplace procedures 4.3 Record data in accordance with workplace procedures 4.4 Perform any required calculations on data 4.5 Identify and report out of specification or atypical results promptly to appropriate personnel 4.6 Shut down equipment in accordance with operating procedures
5. Maintain a safe work environment	5.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel 5.2 Minimise the generation of wastes and environmental impacts 5.3 Ensure safe disposal of laboratory and hazardous wastes 5.4 Clean, care for and store equipment and reagents in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to calculate simple quantities using appropriate equations, units and precision.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Supersedes and is equivalent to MSL973013 Perform basic tests.

Assessment Requirements for MSL973025 Perform basic tests

Modification History

Release 1. Supersedes and equivalent to MSL973013 Perform basic tests. Minor changes to Performance Criteria. Duplicating items removed from Knowledge Evidence.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared samples using at least 2 different processes
- performed at least 3 different basic tests or measurements using standard methods and procedures.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic measurement concepts, including repeatability, precision, accuracy and significant figures
- international system of units (SI)
- purpose of tests performed as part of job role and principles of the standard methods/specifications used
- sample preparation processes relevant to job role
- function of key components of the test equipment, pre-use equipment and safety checks
- sources of uncertainty in measurement and methods for control
- workplace and/or legal traceability requirements
- interpretation and recording of test result, including simple calculations
- procedures for recognising and reporting of unexpected or unusual results
- legal, ethical and work health and safety (WHS) requirements specific to the work task.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a standard laboratory equipped with basic test equipment, common measuring instruments and materials
 - safety data sheets (SDS)

- equipment manuals
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973027 Perform techniques that prevent cross-contamination

Modification History

Release 1. Supersedes and equivalent to MSL973016 Perform aseptic techniques. Title changed to indicate broader scope. Two Performance Criteria removed from Element 2 to reflect increasing use of single-use items. Slight adjustment to Performance Evidence to include additional sample type. Addition to Knowledge Evidence in relation to handling specimens and processing samples for molecular analysis. Removal of some example detail from Assessment Conditions.

Application

This unit of competency describes the skills and knowledge to perform techniques that prevent cross-contamination to maintain the integrity of both the sample source, and the sample and protect people and the environment. It applies to sampling techniques in tissue culture, generic microbiological, molecular and chemical procedures.

This unit of competency applies to laboratory assistants and technicians working in the field or laboratory in the biomedical, biological, food processing and environmental industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Competency Field

Testing

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for sampling or transfer	1.1 Check the sampling procedure conforms with the required sampling plan 1.2 Use specified personal protective equipment (PPE) 1.3 Prepare the work area for safe and effective sample workflows 1.4 Select equipment and materials specified by the procedure

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Organise equipment to minimise contamination during manipulations 1.6 Label containers for clear identification 1.7 Record details in relevant log or database 1.8 Macroscopically assess media and/or reagents to confirm integrity before use
2. Transfer materials	2.1 Protect the integrity of the sample source 2.2 Perform transfer while minimising opportunities for contamination and/or cross-infection 2.3 Protect the integrity of the sample source and destination after transfer, and before sealing the transport or culture vessel 2.4 Perform quality control checks to confirm contaminate-free transfer was successful 2.5 Label transport or culture vessels for clear identification
3. Maintain work area and equipment to prevent cross-infection and contamination	3.1 Place disposable and reusable items into relevant receptacles 3.2 Clean, disinfect and/or sterilise work area and equipment after use 3.3 Transport disposable and reusable contaminated materials to relevant areas for disinfection, sterilisation and cleaning or disposal 3.4 Follow personal hygiene procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to MSL973016 Perform aseptic techniques.

Links

MSL Laboratory Operations Companion Volume Implementation Guide is available from VETNet – -

Assessment Requirements for MSL973027 Perform techniques that prevent cross-contamination

Modification History

Release 1. Supersedes and equivalent to MSL973016 Perform aseptic techniques. Title changed to indicate broader scope. Two Performance Criteria removed from Element 2 to reflect increasing use of single-use items. Slight adjustment to Performance Evidence to include additional sample type. Addition to Knowledge Evidence in relation to handling specimens and processing samples for molecular analysis. Removal of some example detail from Assessment Conditions.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely and effectively performed techniques that prevent cross-contamination when performing at least 3 different types of sample transfers, with at least 3 from the following list:
 - bacterial cultures
 - body fluids (or simulated body fluids)
 - sterile liquid culture media
 - purified reagents
 - water
 - soil
 - sterile pharmaceuticals
 - fungi
 - dairy product
 - swabs
 - smears
 - propagation tissue
 - plant material
 - fermented foods
 - fermented beverages
 - Fresh animal tissue
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles of aseptic techniques
- growth requirements of microorganisms including bacteria and fungi in terms of their laboratory culture
- relationship between sterile practices, hygiene procedures and the ability to obtain samples free of contamination
- relationship between sterile practices and accurate test results
- importance of pure culture techniques and aseptic transfer to the successful microbiological investigation and correct interpretation of laboratory results
- cleaning and sanitising requirements of equipment and work area, and effects of physical and chemical agents on microbial growth and death
- requirements for handling specimens and processing samples for molecular analysis including nucleic acids and amplified specimens.
- principles of workflow isolation to minimise contamination
- sterilisation techniques, including:
 - flaming instruments and vessel openings
 - high temperature, boiling and autoclaving
 - membrane filtration
 - radiation, gas and/or chemical treatments
- disinfection and sterilisation procedures used in the collection, processing and safe disposal of samples and materials
- principles of infection control related to work health and safety (WHS), and sampling and transfer of materials in microbiological investigations including how to minimise the generation of aerosols when flaming
- relevant hazards and how to deal with the risks presented, including:
 - injuries from sharps, burners, molten agar
 - ultraviolet (UV) light sources
 - exposure to hazardous substances and/or infectious agents
- types and purpose of chemical and biological fume and safety cabinets
- environmental sustainability issues as they relate to the work task
- legal, ethical and WHS requirements specific to the work task.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a standard laboratory
 - test samples
 - appropriate equipment, including:
 - transfer equipment
 - storage equipment

- laminar flow units or biohazard cabinets as required
- swabs
- appropriate materials, including:
 - solid and/or liquid media
 - disinfecting agents
 - consumables
 - receptacles for safe disposal of wastes and for processing of reusable materials
- workplace schedules and procedures, safety data sheets (SDS) and documented safe work practices.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL973028 Perform microscopic examination

Modification History

Release 1. Supersedes and equivalent to MSL973019 Perform microscopic examination. Unit refocused on using the microscope with general content covered in other units removed. Significant simplification of Performance Evidence for clarity.

Application

This unit of competency describes the skills and knowledge to set up a light microscope for optimum resolution, to prepare routine samples and to observe, identify and report sample characteristics.

This unit of competency applies to laboratory assistants and technicians in all industry sectors. The unit of competency covers limited interpretation and analysis of results. Troubleshooting of equipment and procedures is not required.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Competency Field

Testing

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare samples for examination	1.1 Use personal protective equipment (PPE) to ensure safety and minimise cross-contamination? 1.2 Prepare samples for microscopic examination in accordance with workplace procedures
2. Set up and use a light microscope	2.1 Carry and use a microscope correctly, preventing damage to the equipment and ensuring operator safety 2.2 Perform pre-use and safety checks to ensure equipment is fit for purpose

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.3 Check external lenses to ensure they are clean 2.4 Set up the microscope for optimum resolution and even illumination 2.5 Select the appropriate objectives and filter for the sample being examined 2.6 Place sample correctly on the stage
3. Observe and identify sample characteristics	3.1 Recognise and identify significant sample characteristics 3.2 Perform required counts and measurements 3.3 Collect and dispose of all wastes safely

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to:
 - perform counts on samples using grids or counting chambers
 - take basic measurements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Supersedes and is equivalent to MSL973019 Perform microscopic examination.

Assessment Requirements for MSL973028 Perform microscopic examination

Modification History

Release 1. Supersedes and equivalent to MSL973019 Perform microscopic examination. Unit refocused on using the microscope with general content covered in other units removed. Significant simplification of Performance Evidence for clarity.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- set up a microscope for Köhler illumination on 10x, 40x and 100x magnification on at least 3 occasions
- safely prepared, examined, and taken basic measurements and/or recorded observations of different sample types, including 3 of the following:
 - stained smear or film with a monolayer of cells
 - wet mount
 - sample in a counting chamber
 - hand-cut samples.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of samples, sample preparation methods, methods of examination and associated hazards relating to the job role
- parts and functions of a light microscope and steps taken to optimise the resolution of images
- procedures and reporting requirements for spills, faulty or unsafe equipment, hazards and incidents
- causes and basic troubleshooting of common artefacts or incorrect results in microscopy
- vernier measurement and micrometry techniques
- sample characteristics restricted to what can be viewed by light microscopy, including:
 - shape and size of particles
 - presence of contamination
 - colour
 - number of cells
 - type of cells
 - colour/staining and morphology

- applications of different types of microscopes/setups including compound light, dark field, phase contrast, fluorescent, electron, polarising and stereomicroscope (dissecting)
- traceability requirements
- legal, ethical and work health and safety (WHS) requirements specific to the work task.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a standard laboratory equipped with appropriate equipment, including light microscopes, samples and materials
 - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL974021 Perform biological procedures

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL974006 Perform biological procedures. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to interpret work requirements, prepare samples, and perform routine biological procedures. These procedures may involve several steps and are used to classify organisms and biologically active compounds by analysing their biological and/or chemical characteristics. This unit includes interpretation of results and troubleshooting obvious departures from standard procedures.

This unit of competency applies to technical assistants working in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Interpret and schedule work requirements	1.1 Review work request to identify samples, required procedures and materials/equipment/instruments involved
	1.2 Identify hazards and workplace control measures associated with the sample, preparation methods, reagents and/or equipment
	1.3 Plan parallel work sequences to optimise throughput of multiple sets of samples
2 Receive and prepare biological samples	2.1 Log samples using standard operating procedures (SOPs)
	2.2 Record sample description, compare with specification and note and report discrepancies
	2.3 Prepare samples in accordance with testing requirements
3 Perform techniques that assist in the classification of organisms	3.1 Identify characteristics used to classify organisms
	3.2 Use dichotomous keys to identify organisms
4 Perform biological procedures	4.1 Set up and use equipment and reagents in accordance with the method
	4.2 Perform techniques in accordance with the standard operating procedures
5 Maintain a safe work environment	5.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
	5.2 Minimise the generation of waste
	5.3 Safely dispose of biohazardous wastes

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	5.4 Clean, care for and store equipment and reagents as required
6 Maintain laboratory records	6.1 Record entries on report forms or into a laboratory information management system, accurately calculating, recording or transcribing data as required
	6.2 Ensure traceability of sample from receipt to reporting of results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL974021 Perform biological procedures

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL974006 Perform biological procedures. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- classify 2 organisms from 2 different kingdoms to species level using a dichotomous approach
- safely and accurately performed 3 multistep biological procedures, using a minimum of 2 different techniques from the following list:
 - multistep staining:
 - haematological
 - histological
 - microbiological
 - preparation and examination of samples to demonstrate mitosis microscopically
 - preparation and enumeration of microscopic samples
 - colorimetry
 - spectrophotometry
 - chromatography
 - electrophoresis
 - electrochemistry
 - multistep molecular technique
