 - multistep immunological technique.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- biological principles and concepts underpinning tests and procedures associated with job role:
 - basic classification and taxonomy of organisms including prokaryotes and eukaryotes, bacteria, viruses, fungi, plants, animals, parasites and prions
 - interrelationships of biological systems including the carbon cycle and energy cycle
 - basic structure and function of a plant and animal cell and the respective organelles (plant and animal)
 - cell membrane activity, including diffusion (passive, facilitated and active), osmosis, tonicity and plasmolysis
 - plant and animal tissue types
 - phases of the cell cycle including phases of mitosis
 - mendelian genetics including inheritance, meiosis, karyotypes, dominant and recessive traits, genotypes, phenotypes, and pedigrees
 - basic structure and function of chromosomes, nucleic acids and proteins
 - chemical and physical characteristics of organic molecules
 - basic structure and function of including carbohydrates, fats and amino acids
 - basic role of biological significance of ions, including calcium, iron, magnesium, sodium, potassium, chloride and phosphate
- purpose of procedures implemented (why they are used and what they demonstrate)
- calculation steps to give results in appropriate units and precision
- importance and appropriate use of controls and certified reference materials
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all clinical information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a standard laboratory equipped with appropriate test equipment and instruments, safety equipment, reagents and materials
 - standard operating procedures (SOPs) and testing methods
 - records, including:
 - test calibration results
 - equipment use, maintenance and servicing history
 - faulty or unsafe equipment
 - batch number, catalogue number and use-by-date for analytical kits.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL974034 Perform biological procedures

Modification History

Release 1. Supersedes and equivalent to MSL974021 Perform biological procedures. Element 3 removed as it was essentially knowledge. Minor changes to Performance Criteria. Clarification around allowing choice of multi-step staining method in Performance Evidence. Addition of test procedures and other minor changes to Knowledge Evidence.

Application

This unit of competency describes the skills and knowledge to interpret work requirements, prepare samples, and perform routine biological procedures. These procedures may involve several steps and are used to classify organisms or biologically active compounds by analysing their biological and/or chemical characteristics. This unit includes interpretation of results and troubleshooting obvious departures from standard procedures.

This unit of competency applies to technical assistants working in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

Nil.

Competency Field

Testing

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret and schedule work requirements	1.1 Review work request to identify samples, required procedures and materials equipment involved 1.2 Identify hazards and workplace control measures associated with the

Elements	Performance Criteria

	sample, preparation methods, reagents and/or equipment 1.3 Plan parallel work sequences to optimise throughput of multiple sets of samples
2. Receive and prepare biological samples	2.1 Register samples in accordance with workplace procedures, recording details that allow accurate tracking and chain of custody traceable to employee 2.2 Match sample provided to accompanying documentation and report any discrepancies in accordance with workplace procedures 2.3 Prepare samples in accordance with testing requirements
3. Perform biological techniques on samples	3.1 Set up and use equipment and reagents in accordance with the method 3.2 Perform techniques in accordance with the standard operating procedures
4. Maintain a safe work environment	4.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel 4.2 Safely dispose of biohazardous wastes 4.3 Clean, care for and store equipment and reagents in accordance with workplace procedures
5. Maintain laboratory records	5.1 Record data and results in accordance with workplace procedures 5.2 Follow procedures to support traceability of sample from receipt to reporting of results

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to MSL974021 Perform biological procedures.

Assessment Requirements for MSL974034 Perform biological procedures

Modification History

Release 1. Supersedes and equivalent to MSL974021 Perform biological procedures. Element 3 removed as it was essentially knowledge. Minor changes to Performance Criteria.

Clarification around allowing choice of multi-step staining method in Performance Evidence. Addition of test procedures and other minor changes to Knowledge Evidence.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely and accurately performed 3 different multistep biological procedures, using at least 2 different techniques from the following list:
 - multistep staining, either:
 - haematological
 - histological
 - microbiological
 - preparation and examination of samples to demonstrate mitosis microscopically
 - preparation and enumeration of microscopic samples
 - colorimetry
 - spectrophotometry
 - chromatography
 - electrophoresis
 - electrochemistry
 - multistep molecular technique
 - multistep immunological technique.
 -

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- biological principles and concepts underpinning tests and procedures associated with job role, including:
- basic classification and taxonomy of organisms including prokaryotes and eukaryotes, bacteria, viruses, fungi, plants, animals, parasites and prions
- basic structure and function of a plant and/or animal cell and the respective organelles
- cell membrane activity, including diffusion (passive, facilitated and active), osmosis, tonicity

- phases of the cell cycle including phases of mitosis
- mendelian genetics including inheritance, meiosis, karyotypes, dominant, recessive, codominant and sex-linked traits, genotypes, phenotypes
- basic structure and function of organic molecules including carbohydrates, lipids,
- basic role of biologically significant ions, including calcium, iron, magnesium, sodium, potassium, chloride and phosphate
- purpose of procedures implemented (why they are used and what they demonstrate)
- importance and appropriate use of controls and certified reference materials
- legal, ethical and work health and safety (WHS) requirements specific to the work task.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipped with appropriate laboratory equipment, safety equipment, reagents, materials and biological samples
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL974035 Prepare tissue or cell cultures

Modification History

Release 1. Supersedes and equivalent to MSL974025 Prepare tissue and cell cultures. Minor change to Title and to Title of prerequisite unit. Minor changes to Elements, Performance Criteria and Assessment Requirements to clarify that unit focus is tissue **or** cell cultures. Other minor rewording in Knowledge Evidence.

Application

This unit of competency describes the skills and knowledge to prepare primary tissue cultures for applications, such as maintenance of animal cell lines and propagation of plants by tissue culture, and basic subculture procedures. Personnel are required to manipulate equipment and materials and samples to prevent contamination at all preparation stages. They will have ready access to workplace procedures and will work under direct supervision.

This unit applies to technical assistants working in laboratories in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL973027 Perform techniques that prevent cross-contamination.

Competency Field

Testing

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Work safely according to the legal and regulatory	1.1 Identify hazards and workplace controls associated with the sample, preparation methods, reagents and equipment

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
framework	1.2 Select, fit and use personal protective equipment (PPE) 1.3 Address hazards and incidents as they arise in accordance with workplace procedures 1.4 Maintain a chain of custody, traceable to the worker, for all cells and tissues
2. Prepare and test cell or tissue culture media	2.1 Select and confirm media specifications and processes and methods 2.2 Prepare culture media to suit the application 2.3 Sterilise culture media and check for sterility 2.4 Perform quality control checks to ensure that culture media is fit for purpose 2.5 Store culture media in accordance with specifications
3. Use tissue or cell culture preparation techniques	3.1 Select tissue or cell sample to optimise growth and prepare it for culture 3.2 Add specified growth agents and/or nutrients 3.3 Inoculate culture medium using aseptic techniques
4. Monitor tissue or cell culture	4.1 Incubate culture in specified conditions 4.2 Monitor growth of culture and record appearance and characteristics 4.3 Identify expected cell types and recognise normal and abnormal cells 4.4 Report presence or absence of contamination 4.5 Subculture the culture to continue the cell line 4.6 Dispose of biohazardous and other laboratory waste safely
5. Maintain records	5.1 Maintain accurate records of batches of media 5.2 Complete records of tissue cultures so that they are retrievable, legible and accurate 5.3 Complete records in accordance with workplace and legal requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to MSL974025 Prepare tissue and cell cultures.

Assessment Requirements for MSL974035 Prepare tissue or cell cultures

Modification History

Release 1. Supersedes and equivalent to MSL974025 Prepare tissue and cell cultures. Minor change to Title and to Title of prerequisite unit. Minor changes to Elements, Performance Criteria and Assessment Requirements to clarify that unit focus is tissue **or** cell cultures. Other minor rewording in Knowledge Evidence.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely preparing at least 3 different primary tissue or cell cultures that are free of contamination using tissue or cell culture and basic subculture procedures, including:
 - manipulating equipment and materials and samples to prevent contamination at all preparation stages
 - performing routine maintenance and checks on raw materials and consumables, including use-by-date, possible contamination and storage conditions
 - growing cell lines or tissue to specifications without contaminating the original sample and the environment.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic classes and classification of culturable material including microorganisms, plant or animal cells and tissue
- structure and function of plant or animal cells and organelles
- cell structure, physiology and processes, including simple and facilitated diffusion, plasmolysis, osmosis, tonicity, active transport, energy production, mitosis, motility, phagocytosis and pinocytosis
- concepts and principles of cell growth, including the need for nutrients, the role of growth regulators and the removal of wastes
- types and sources of contamination
- importance of strict aseptic techniques and cleaning procedures
- common applications of plant tissue or cell culture
- common applications of animal tissue or cell culture
- typical methods for sterilisation and disposal of biohazardous, including:
 - steam and high-pressure air or steam
 - boiling, microwaving and autoclaving

- filtration
- gas, chemical and radiation
- methods to prepare a primary culture and subculture, and suitable culture conditions
- quality control checks and quality assurance procedures
- standard methods for preparing culture media
- technological advances in media preparation equipment
- workplace and/or legal traceability requirements
- environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - a laboratory equipped with appropriate equipment, samples, cell lines and reagents
 - equipment and facilities, including:
 - growth cabinets
 - culture vessels, growth chambers, sterile containers, culture plates, flasks and bottles
 - autoclaves
 - positive filtration apparatus
 - auto pipettes and pipette pumps
 - cell counting chambers and a haemocytometer
 - incubators, including specialised atmosphere carbon dioxide
 - binocular light inverted microscopes
 - centrifuges
 - specifications
 - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL975045 Perform laboratory-based ecological techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL975017 Perform laboratory-based ecological techniques. Changes to elements and performance criteria. Foundation skills information added. Range of conditions removed. Assessment requirements amended.</p>

Application

This unit of competency describes the skills and knowledge to participate in laboratory investigations involving animals, plants and related environmental parameters. The animals or plants might be single specimens, parts of specimens or be in culture or under propagation. The investigations might also be part of experimental models that examine interactions of animals and/or plants and their environments. Investigations would generally relate to taxonomy, physiology and pathology, and would be oriented to scientific research, food production and manufacture, and to investigation of biological environments and ecosystems.

This unit applies to laboratory technicians and technical officers working in biological, biotechnology and environmental industry sectors. It is expected that all work would conform to statutory and work health and safety (WHS) codes of practice. This unit of competency assumes that personnel perform tests and procedures under the close supervision of scientific staff and that the workplace will equip its workers with relevant animal handling skills should they be required. The unit does not cover procedures related to the handling of vertebrates that are subject to national and state/territory animal care and ethics regulations.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL974021 Perform biological procedures

Competency Field

Testing

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Process specimens and documentation	<p>1.1 Identify specimens and request forms that do not comply with minimum industry requirements for labelling, identification and test requests</p> <p>1.2 Record any discrepancies and indicate what action is required</p> <p>1.3 Log samples, recording details that allow accurate tracking and chain of custody</p>
2	Participate in the identification and classification of species	<p>2.1 Record macroscopic and/or microscopic details of specimens to assist in their identification and classification</p> <p>2.2 Use taxonomic keys to assist in the identification and classification of species</p> <p>2.3 Perform laboratory analyses that can assist in identification and classification of species</p> <p>2.4 Preserve specimens for future reference</p> <p>2.5 Label preserved specimens for storage and reliable retrieval from collections</p>
3	Maintain viability and integrity of specimens during experimentation	<p>3.1 Provide nutrients and environments to maintain viability of individual specimens and organisms being cultured or propagated</p> <p>3.2 Perform procedures and analyses to monitor the experimental environment</p> <p>3.3 Perform procedures and analyses to monitor the physiology of organisms in the experimental environment</p>

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>3.4 Adjust nutrient requirements and environmental conditions as indicated by monitoring data</p> <p>3.5 Report (to supervisors) data and phenomena that may risk viability of individual specimens or cultures</p> <p>3.6 Report (to supervisors) data and phenomena that are incompatible with the experimental design parameters</p>
4 Integrate laboratory and field data	<p>4.1 Locate field data relevant to the study or experiment</p> <p>4.2 Match field and laboratory data codes for tracking, reporting and chain of custody requirements</p> <p>4.3 Log field and laboratory data into information systems</p> <p>4.4 Assist with writing reports of experiments and related field studies</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Oral communication skills to interact effectively and use appropriate scientific terminology and technical concepts to report data and phenomena that may risk viability of individual specimens or cultures, or are incompatible with the experimental design parameters.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Equivalent to MSL975017 Perform laboratory-based ecological techniques, Release 1.

Assessment Requirements for MSL975045 Perform laboratory-based ecological techniques

Modification History

Release	Comments
Release 1	<p>This version was released in <i>MSL Laboratory Operations Training Package Release 2.0</i>.</p> <p>Supersedes and equivalent to MSL975017 Perform laboratory-based ecological techniques. Changes to elements and performance criteria. Foundation skills information added. Range of conditions removed. Assessment requirements amended.</p>

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively identified and classified at least 5 different animal and plant species for scientific and experimental purposes
- processed, labelled, preserved and stored at least 5 different kinds of specimens, taking care not to contaminate sterile environments or specimens
- performed procedures and analyses to monitor the physiology of 5 different organisms/specimens in the experimental environment and maintained their viability.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- growth requirements of organisms that are subjects of laboratory or greenhouse culture or propagation relevant to job role
- general anatomy of plants and animals that is useful as classification data
- processes that are essential for preservation of plant and animal material for use as reference material
- relationships between field and laboratory data that are useful in giving commentary on the integrity or distress in biological environments
- rationale for selection of techniques used to monitor the experimental environment and the effects of variables on organisms in the experimental environment
- uses of environmental impact statements that incorporate the results of field and laboratory analyses
- workplace and/or legal traceability requirements
- awareness of environmental sustainability issues as they relate to the work task

- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all client information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - equipment and resources for investigating the physiology of plants and animals in the laboratory
 - workplace procedures, sampling plans, test methods and equipment manuals
 - computers and programs for simulated experiments or data analysis
 - items of equipment, reagents, specimens and systems for botanical and zoological techniques
 - laboratory information management systems (LIMS), databases, record and filing systems, including specimen accessioning.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSL975060 Perform tissue or cell culture techniques

Modification History

Release 1. Supersedes and equivalent to MSL975033 Perform tissue and cell culture techniques. Minor Title change to clarify that scope is tissue or cell culture techniques. Minor changes to Performance Criteria and Performance Evidence to reflect scope.

Application

This unit of competency describes the skills and knowledge to prepare, maintain and preserve cells and cell lines for a variety of applications, such as large-scale culture, production of monoclonal antibodies, production of viral vaccines and amniocentesis studies. Personnel are required to optimise equipment set-up, media and growth techniques. They are required to detect and investigate contamination and take preventative and/or corrective actions under supervision.

This unit applies to laboratory technicians and technical officers working in laboratories in the biomedical, environmental, biotechnology and education industry sectors.

No licensing or certification requirements exist at the time of publication. However, regulations and/or external accreditation requirements for laboratory operations exist, so local requirements should be checked. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

Pre-requisite Unit

MSL973027 Perform techniques that prevent cross-contamination.

Competency Field

Testing

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret and schedule production requirements	1.1 Review client request and confirm quantity and nature of cells or tissue 1.2 Select appropriate media, materials, equipment and methods

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.3 Plan parallel work sequences to optimise production 1.4 Maintain a chain of custody, traceable to the worker, for all cells or tissues
2. Work safely according to the legal and regulatory framework	2.1 Identify hazards and workplace control measures associated with the sample, preparation methods, reagents and equipment 2.2 Select, fit and use personal protective equipment (PPE) 2.3 Address hazards and incidents as they arise in accordance with workplace procedures 2.4 Safely dispose of biohazardous materials and other laboratory waste
3. Assemble and maintain tissue culture equipment	3.1 Assemble, sterilise or decontaminate equipment according to workplace procedures 3.2 Perform pre-use and safety checks in accordance with relevant workplace and operating procedures 3.3 Identify faulty or unsafe components and equipment and report to appropriate personnel 3.4 Decontaminate area and equipment after use
4. Prepare and test cell or tissue culture media	4.1 Confirm media specifications and processes/methods 4.2 Prepare culture media to suit client request 4.3 Sterilise culture media and check for sterility 4.4 Perform quality control checks to ensure that culture media is fit for purpose 4.5 Store culture media in accordance with specifications
5. Obtain, monitor and maintain tissue or cell lines	5.1 Access the cell lines or tissue sample from fresh or preserved sources and prepare a culture 5.2 Select specified culture media and add any necessary growth agents or nutrients 5.3 Incubate cells or tissue in specified conditions 5.4 Inoculate the media with the specified amount of sample 5.5 Monitor growth of tissue or cell lines and products 5.6 Detect contamination/abnormalities and troubleshoot materials, equipment and techniques 5.7 Passage samples by subculturing to preserve or grow the line

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	5.8 Harvest tissue, cells or cell products to optimise yields
6. Preserve cells or tissues	6.1 Select the appropriate preservation method 6.2 Preserve the cell lines or tissue in accordance with the method 6.3 Check preserved tissue or cell lines regularly to ensure viability is maintained
7. Maintain records	7.1 Maintain accurate records of batches of media 7.2 Maintain accurate records of active and stored tissue or cell lines 7.3 Complete records so that they are retrievable, legible and accurate 7.4 Ensure records conform to the information management, records, quality system and legal requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for MSL975060 Perform tissue or cell culture techniques

Modification History

Release 1. Supersedes and equivalent to MSL975033 Perform tissue and cell culture techniques. Minor Title change to clarify that scope is tissue or cell culture techniques. Minor changes to Performance Criteria and Performance Evidence to reflect scope.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- safely prepared and maintained 3 different cell and/or tissue cultures to preserve cells and cell lines that are fit for purpose without contaminating the original sample, including:
 - subculturing cell or tissue cultures
 - preserving cell lines or tissue by freezing
 - confirming the identity of the cell lines or tissue and identifying abnormalities/contamination if present
- maintained accurate, traceable records of cell lines or tissue and logs of procedures and work completed.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- terminology, including cell lines, growth media, primary culture, passaging, passage number, subculture, anchorage dependent cells, suspension culture, monolayer, confluent, cell line, cell strain, contact inhibition, diploid and viability
- cell biology, including structure, physiology, function, physiological cell growth requirements, nutrient requirements, respiration, temperature and growth cycle
- general purpose of cell lines
- normal and abnormal cell morphology
- critical components of the cell environment and their effects on cell growth, including pH, temperature, buffering, atmosphere, osmotic pressure, osmolarity and viscosity
- types of tissue and cells used as source material
- techniques for characterising a cell line
- selection criteria for media, materials and equipment, including:
 - costs
 - ease of cleaning or sterilisation
 - maintenance of cell growth
- the differences between finite and continuous cell lines

- characteristics of cell culture media and substrates
- nature of substrates including solid, semi-solid, gel or sponge, glass, disposable plastics and three-dimensional matrices
- cell and tissue preservation methods
- chemical treatment techniques for pre-treating substrates relevant to the job role
- role of common ingredients in media including salts, carbohydrates, amino acids, vitamins, growth factors, serum and antimicrobial
- contaminants, including endotoxins, bacteria, yeast, fungi and mycoplasma
- typical requirements, problems and procedures associated with the production of specific cell lines relevant to the job role
- tissue culture and continuous culture systems
- methods to prepare primary cultures
- principles and purpose of techniques implemented
- methods to monitor growth of tissue and cell lines
- environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all client information, and laboratory data and records.
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - laboratory equipped with appropriate tissue culture equipment and facilities, test equipment, instruments, standards and reagents
 - specifications
 - workplace procedures and standard methods, test results and records.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- effectively identified and classified at least 5 different animal and plant species for scientific and experimental purposes
- processed, labelled, preserved and stored at least 5 different kinds of specimens, taking care not to contaminate sterile environments or specimens
- performed procedures and analyses to monitor the physiology of 5 different organisms/specimens in the experimental environment and maintained their viability.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- growth requirements of organisms that are subjects of laboratory or greenhouse culture or propagation relevant to job role
- general anatomy of plants and animals that is useful as classification data
- processes that are essential for preservation of plant and animal material for use as reference material
- relationships between field and laboratory data that are useful in giving commentary on the integrity or distress in biological environments
- rationale for selection of techniques used to monitor the experimental environment and the effects of variables on organisms in the experimental environment
- uses of environmental impact statements that incorporate the results of field and laboratory analyses
- workplace and/or legal traceability requirements
- awareness of environmental sustainability issues as they relate to the work task
- legal, ethical and work health and safety (WHS) requirements specific to the work task including traceability, confidentiality and security requirements of all client information, and laboratory data and records.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - equipment and resources for investigating the physiology of plants and animals in the laboratory
 - workplace procedures, sampling plans, test methods and equipment manuals
 - computers and programs for simulated experiments or data analysis
 - items of equipment, reagents, specimens and systems for botanical and zoological techniques
 - laboratory information management systems (LIMS), databases, record and filing systems, including specimen accessioning.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSMSUP280 Manage conflict at work

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Application

This unit of competency covers the skills and knowledge required to manage conflict in a range of personal conflict situations.

This unit of competency applies to personnel who are required to liaise and cooperate with other members of the team and to work towards finding common ground and opportunities for problem resolution. It applies to any interactions in the workplace, including interactions between co-workers, between staff and customer/client, and between staff and supervisor.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments and sectors within the industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Support

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- 1 **Identify potential sources of conflict**
 - 1.1 Identify actions which are likely to promote a reaction in others
 - 1.2 Assess the other person's needs and/or concerns
 - 1.3 Assess own ability to respond to the other person's needs
 - 1.4 Recognise possible causes of conflict
 - 1.5 Identify potential conflict situations

- 2 **Identify range of alternative approaches**
 - 2.1 Discuss with the other person their needs and concerns
 - 2.2 Identify own needs and concerns and discuss with other person
 - 2.3 Identify possible approaches through which the needs and concerns of both may be met
 - 2.4 Develop a range of alternative approaches for achieving goals

- 3 **Resolve conflicts**
 - 3.1 Identify areas of common ground or objectives that can be mutually supported
 - 3.2 Agree on an approach which will meet the majority of objectives for both parties
 - 3.3 Implement the approach
 - 3.4 Check that the agreed requirements are being met and that conflict has been resolved

- 4 **Respond to problems**
 - 4.1 Identify possible problems in the conflict management process
 - 4.2 Determine problems needing action
 - 4.3 Determine possible causes
 - 4.4 Rectify problem using appropriate solution within area

of responsibility

- 4.5 Follow through items initiated until final resolution has occurred
- 4.6 Report problems outside area of responsibility to designated person

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Conflict Conflict in the context of this unit refers to interpersonal conflict and may arise in any work-related context.

Potential sources of conflict Potential sources of conflict include conflicts arising from one or more of the following:

- different learning/problem solving styles
- different work or personal priorities
- different personality styles
- conflicting key performance indicators (KPIs), work goals or targets
- different social, cultural, religious or ethnic background or different gender of sexual preference
- different interpretation of requirements or 'the rules'

Approaches to resolving conflict

Approaches to resolving conflict will be based on direct communication and include one or more of the following:

- informal, face-to-face discussions
- formal/structured face-to-face discussions
- through the use of:
 - telephones and two-way radios
 - memos, faxes, letters or emails

Routine problems

Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- anger or aggression arising from industrial relations matters
- disagreements over processes or work practices
- variations in opinions about circumstances or events
- interpersonal disputes arising from changes in personal circumstances

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Links

Assessment Requirements for MSMSUP280 Manage conflict at work

Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP280A Manage conflict at work

Performance Evidence

- Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:
- recognise situations, actions and verbal and non-verbal communication that indicate potential or actual conflict
- communicate about needs and concerns of self and others and areas of common ground using:
 - appropriate verbal and non-verbal communication
 - statements that focus on issues and facts, not people and personalities
 - accurate reflection of people's needs and concerns
- implement conflict resolution approach and monitor its success
- apply known solutions to routine problems

manage conflict as it arises.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- likely sources of conflict in own job/workplace
- indicators of potential conflict
- communication approaches to resolving conflict
- conflict resolution skills relevant to own job/workplace.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
 - should occur over a range of situations which include typical disruptions to normal, smooth operations
 - will use one or a combination of:
 - totally off the job, in which case it will use case studies and role plays as well as questions
 - evidence drawn totally from performance in the workplace

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
 - walk-throughs
 - pilot plant operation
 - demonstration of skills
 - industry based case studies/scenarios
 - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

MSS015040 Conduct a sustainability energy audit

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Rang of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS015011 Conduct a sustainability energy audit.

Application

This unit describes the skills and knowledge required to identify sources and uses of energy for a process, calculate theoretical and actual energy use and identify and evaluate strategies to improve energy usage.

This unit applies to a process within an organisation or its value chain. Audits of multiple processes may be combined to provide broader results, for example, across a site or organisation.

This unit applies to team leaders, technical specialists, managers, or similar roles with the authority to identify and justify improvement options in consultation with a range of stakeholders.

This unit applies to any organisation.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Competency Field

Sustainable operations

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify all sources and uses of energy in process	1.1 Identify all sources of energy external to the site 1.2 Identify all sources of energy within the site 1.3 Consult with technical, operational and other relevant stakeholders to identify all uses of energy, energy type and intensity required by plant and/or equipment within process

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Calculate theoretical use of energy	2.1 Calculate theoretical net use of energy by type and intensity for plant and/or equipment 2.2 Calculate overall energy balance for process 2.3 Evaluate the need for energy consumption by process compared to alternative processes, plant and/or equipment
3. Measure actual use of energy	3.1 Determine actual net energy use for overall process 3.2 Determine actual net energy use for plant and/or equipment within process 3.3 Calculate difference between theoretical and actual energy use by plant and/or equipment and overall process 3.4 Identify actual energy type used by plant and/or equipment
4. Develop strategies to improve energy usage	4.1 Rank plant and/or equipment by difference between theoretical and actual energy use 4.2 Rank plant and/or equipment by actual energy use 4.3 Identify plant and/or equipment using higher intensity energy than required 4.4 Develop strategies to reduce energy consumption and/or use lower intensity energy
5. Prepare recommendation/s for improved energy usage	5.1 Consult with stakeholders to confirm or amend strategies 5.2 Identify any regulatory or other requirements that impact energy usage and amend strategies as needed to address requirements 5.3 Rank strategies by benefit/cost ratio 5.4 Short-list preferred energy reduction strategies 5.5 Prepare recommendation/s according to procedures and requirements for approval

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to identify variables and values for energy usage of plant and/or equipment

- Writing skills to document strategies and recommendations for improved energy usage
- Oral communication skills to consult with range of stakeholders
- Numeracy skills to calculate theoretical and actual energy usage.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS015011 Conduct a sustainability energy audit.

Assessment Requirements for MSS015040 Conduct a sustainability energy audit

Modification History

Release 1. Unit code changed. Application changed. Elements changed. Performance Criteria changed. Foundation Skills populated. Rang of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS015011 Conduct a sustainability energy audit.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- determine energy usage and wastage for at least 3 items of plant and/or equipment in a process drawn from:
 - mobile plant
 - fixed plant
 - industrial equipment
 - office equipment
 - heating, ventilation and air conditioning unit
- develop at least 1 recommendation to improve energy usage for each item.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic physics of energy types and measuring and calculating energy efficiency
- energy balancing techniques for process and process steps (sometimes known as heat balancing)
- calculating theoretical use of energy
- methods of measuring actual process amount/flows
- current and emerging approaches to energy waste reduction and energy efficiency in the industry or sector and related costs and effectiveness
- cost-benefit analysis
- regulatory and reporting requirements relevant to energy use and the industry.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS024032 Document simple geological information for a site

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Performance Criteria changed. Foundation Skills populated. Assessment Requirements changed. Workplace outcome changed. Supersedes and is not equivalent to MSS024020 Recognise common geological landforms and samples.

Application

This unit describes the skills and knowledge required to recognise, interpret and document geological landforms and related geological and ecosystem interactions of a site.

This unit applies to environmental technicians and similar roles who are required to recognise common geological landforms and relate these to basic geological processes and other ecosystem components of a site, obtain and classify near surface samples of common rocks, minerals and soils and identify factors that can affect site revegetation or rehabilitation.

This unit applies in a range of industry sectors including but not limited to environmental services; environmental compliance, auditing and inspection; groundwater and clean water management; solid and hazardous waste management; management of contaminated sites; site remediation or rehabilitation; geotechnical services and civil engineering; and natural resource management.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Elements and Performance Criteria

Elements	Performance Criteria
----------	----------------------

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for field work	<p>1.1 Review job request to identify the equipment involved, samples to be collected and test methods</p> <p>1.2 Identify hazards associated with the site, test methods and equipment used and read safe work procedures to determine action to be taken</p> <p>1.3 Confirm site location, access, timing and any client requirements</p> <p>1.4 Assemble all required equipment and materials and check that they are fit for purpose</p> <p>1.5 Stow equipment and materials to ensure their safe transport</p> <p>1.6 Arrange transport to site</p> <p>1.7 Liaise with relevant personnel on arrival at site to ensure safety and minimise disruption to others</p> <p>1.8 Seek input from colleagues and/or manager/s to confirm understanding of work requirements</p>
2. Recognise geological structures and processes	<p>2.1 Recognise common landforms and related geological processes</p> <p>2.2 Read and interpret simple geological maps, diagrams and aerial photos to identify topography and geological structures</p> <p>2.3 Apply principles of geological processes and the geological timescale to explain the formation and occurrence of common rocks, minerals, soils and aquifers</p>
3. Identify common rocks and minerals	<p>3.1 Sort handheld specimens of common sedimentary, igneous and metamorphic rocks by observing their textural, structural and mineralogical properties</p> <p>3.2 Identify handheld specimens of common rocks and minerals by comparing their physical properties with classification charts and tables</p>
4. Identify common soil types and their properties	<p>4.1 Obtain soil samples using specified sampling equipment and methods</p> <p>4.2 Examine soil colour, texture and properties of soil components to classify common soils</p> <p>4.3 Identify and describe simple soil profiles at field sites</p> <p>4.4 Recognise influences of rock type, drainage, age and climate on development of soil profiles</p> <p>4.5 Recognise common forms of soil degradation</p>
5. Relate local geology to flora and fauna and land use	<p>5.1 Interpret and describe sites in terms of basic relationships between parent material, climate, topography, soils and living ecosystem components</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	5.2 Recognise how local geology and relationships can influence the revegetation and rehabilitation of sites
6. Maintain a safe work environment	6.1 Use safe work procedures and protective equipment to ensure personal safety and that of others 6.2 Minimise environmental impacts of sampling and/or testing and generation of waste 6.3 Collect and/or dispose of all waste in accordance with environmental and quarantine requirements and workplace procedures
7. Report data and finalise documentation	7.1 Report field data in the required formats and expected time frame 7.2 Complete all required documentation 7.3 Maintain the security and confidentiality of data and documentation in accordance with workplace requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret job requests, workplace procedures, sampling and test methods
- Writing skills to record data and observations
- Oral communication skills to liaise with site personnel
- Numeracy skills to take readings and measurements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. No equivalent unit.

Links

Assessment Requirements for MSS024032 Document simple geological information for a site

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Performance Criteria changed. Foundation Skills populated. Assessment Requirements changed. Workplace outcome changed. Supersedes and is not equivalent to MSS024020 Recognise common geological landforms and samples.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- for at least 2 sites:
 - document simple geological information
 - identify at least 2 specimens of rock or minerals
 - classify at least 2 soil samples
 - identify geological factors that can affect site revegetation and rehabilitation.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- structure of the earth's core, crust and major components
- geomorphology and landforms, including agents of erosion and transportation, stability of rocks and minerals in different environments and depositional processes
- regolith, including physical and chemical weathering, climactic effects, stability of minerals, weathering processes, soil formation, common soil types and composition
- rock cycle
- fundamentals of:
 - igneous rocks, including origin of magma, movement of magma, volcanic, plutonic, types of volcanoes and simple tectonic setting
 - sedimentary rocks, including clastic, chemical, organic types, grain size and composition, sorting, roundness, lithification, sedimentary structures and environments of deposition
 - metamorphic rocks, including regional, contact, dynamic metamorphic zones, rock textures and fabrics
- structural geology concepts including folds, faults, tilts and uplifts
- overview of geological time, including eras, periods, relative time, stratigraphic methods for establishing relative ages of strata, and radiometric dating
- fundamentals of palaeontology, including preservation of fossils and their role in dating strata

- links between local geology, climate, topography and living components of ecosystems
- equipment commonly used to collect soil and handheld rock samples
- geological sampling and in-field test methods routinely used in job role, including:
 - pre-use checks and safe operating procedures for sampling and test equipment
 - sampling procedures
 - purpose, principles and measurement steps of testing
 - calculation steps to provide results
 - expected values for sample type
- common site hazards and control measures
- health, safety and environment requirements, including field safety and survival principles.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of facilities, equipment and resources, including:
 - maps, photos, diagrams of site
 - classification charts and tables for rocks, minerals and soils
 - relevant survey, sampling and testing equipment and methods
- modelling of industry operating conditions, including:
 - access to site/s.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSS025029 Perform sampling and testing for site contamination

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS025014 Perform sampling and testing of contaminated sites.

Application

This unit describes the skills and knowledge required to assist in site inspections, collect samples and conduct field tests and/or measurements to identify contamination in air, soil and water.

This unit applies to environmental technicians, environmental officers or other roles who are required to inspect site for potential contamination, sample and test air, water and soil, monitor risks and apply safety procedures, select equipment and materials and record and interpret data.

This unit applies in a range of industry sectors, including but not limited to environmental services (e.g. sampling and monitoring of air quality, water and soil); environmental compliance, auditing and inspection; management of pollution and contaminated sites; and site remediation or rehabilitation.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

MSS024032 Document simple geological information for a site

Competency Field

Environmental monitoring and technology

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assist with	1.1 Locate and review relevant legislative, regulatory and/or planning

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
preliminary site study	<p>requirements and register for contaminated sites</p> <p>1.2 Confirm the site location, scope and purpose of the investigation and assigned tasks with supervisor</p> <p>1.3 Source and review available site data, including site history, geology, hydrogeology and meteorology data</p> <p>1.4 Summarise information to assist with preparation of a site chronology and identification of gaps or inadequacies in data, potential contaminants and areas of possible contamination</p>
2. Prepare for site activities	<p>2.1 Confirm the scope and purpose of sampling, testing and/or monitoring activities and data requirements with supervisor</p> <p>2.2 Liaise with site controller to access site, identify locations of services and arrange for induction, clearances and/or permits</p> <p>2.3 Review risks posed by site contaminants and review the health and safety plan or safe work procedures specified for planned activities</p> <p>2.4 Review sampling plan and confirm sampling and test methods, sampling and test points, numbers and types of samples and/or measurements with supervisor</p> <p>2.5 Review specified sampling and test methods to confirm process details and sequence of steps</p> <p>2.6 Check the operation and, if required, calibration of sampling equipment, test and/or monitoring instruments in accordance with relevant methods, standards and manufacturer instructions</p> <p>2.7 Ensure required reagents, solutions and/or calibration standards are obtained and ready for field use</p> <p>2.8 Assemble and safely stow all sampling equipment, test instruments, materials, containers, safety equipment and personal protective equipment (PPE)</p> <p>2.9 Arrange suitable transport to, from and around site</p>
3. Assist with site inspection	<p>3.1 Sketch, map and/or photograph the site features relevant to site inspection</p> <p>3.2 Conduct a visual inspection to inform the selection and design of subsequent investigations</p> <p>3.3 Collect preliminary samples, as directed, to help characterise possible contamination hazards prior to detailed investigations</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
4. Conduct sampling as directed	<p>4.1 Locate sampling and test points and any services at the site</p> <p>4.2 Work effectively with other site personnel during drilling excavation and/or survey operations to collect reliable samples, logs and measurements, as necessary</p> <p>4.3 Follow specified procedures to minimise hazards and/or contamination of samples, self/others, equipment and environment</p> <p>4.4 Collect and preserve required samples in accordance with sampling plan, relevant methods and/or standards</p> <p>4.5 Record information and label samples in accordance with traceability requirements</p> <p>4.6 Record environmental conditions and/or atypical observations made during sampling that may impact on validity or integrity of samples</p> <p>4.7 Store and transport all samples back to base in accordance with specified method, chain of custody requirements and relevant codes</p>
5. Conduct field tests and/or monitoring as directed	<p>5.1 Obtain sample or sub-sample for designated field test</p> <p>5.2 Check that all equipment, instruments, reagents and calibration standards are fit for purpose</p> <p>5.3 Set up and calibrate (if required) instruments to ensure safe operation and valid results</p> <p>5.4 Operate equipment and/or instruments in accordance with test method requirements</p> <p>5.5 Follow specified procedures to minimise hazards and/or contamination of samples, self and others, equipment and environment</p> <p>5.6 Perform measurements and tests on samples and standards, if appropriate, in accordance with specified methods</p> <p>5.7 Keep accurate, complete and traceable records of field observations and test results</p>
6. Clean, decontaminate and/or dispose of contaminated equipment and materials	<p>6.1 Inspect equipment to assess the degree of contamination</p> <p>6.2 Use specified procedures to remove material from the exposed outer surfaces of sampling and test equipment and PPE</p> <p>6.3 Use specified procedures and reagents to neutralise, wash and/or rinse exposed surfaces</p> <p>6.4 Collect rinsate blanks for analysis and preserve and store in accordance with specified procedure or standard</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>6.5 Prepare and stow items for safe transport</p> <p>6.6 Safely collect all debris and sullage from decontamination in accordance with relevant regulations and codes</p>
7. Finalise site activities	<p>7.1 Arrange for the safe disposal of hazardous wastes in accordance with relevant regulations and codes</p> <p>7.2 Ensure site observations, sampling and test data and results are accurately transferred to the workplace information management system</p> <p>7.3 Store samples in accordance with test method, chain of custody requirements and any relevant codes</p> <p>7.4 Ensure samples are dispatched for analytical testing within recommended holding times</p>
8. Process and interpret data	<p>8.1 Review test and monitoring data noting atypical observations</p> <p>8.2 Calculate required quantities using relevant test method and ensure values are consistent with expectations</p> <p>8.3 Estimate and document uncertainty of measurement, if relevant, in accordance with workplace procedures</p> <p>8.4 Record processed results in accordance with workplace procedures</p> <p>8.5 Interpret trends in data and/or results and report atypical results promptly to relevant personnel</p> <p>8.6 Determine if obvious procedure or equipment problems have led to atypical data or results</p> <p>8.7 Compare results with established threshold levels or environmental quality concentration limits, as relevant</p> <p>8.8 Finalise reporting of results in accordance with workplace requirement</p>
9. Maintain a safe work environment	<p>9.1 Clean equipment, instruments, containers, work area and vehicles according to workplace procedures</p> <p>9.2 Check serviceability of all equipment and instruments before storage</p> <p>9.3 Use defined safe work practices and PPE to ensure personal safety and that of others</p> <p>9.4 Minimise the generation of waste and environmental impact according to procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret site information, test methods and manufacturer instructions
- Writing skills to record data, environmental conditions and observations
- Oral communication skills to confirm requirements with supervisor
- Numeracy skills to interpret sampling plan, take and interpret measurements and perform calculations.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS025014 Perform sampling and testing of contaminated sites.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for MSS025029 Perform sampling and testing for site contamination

Modification History

Release 1. Unit code changed. Unit title changed. Application changed. Performance Criteria changed. Foundation Skills populated. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to MSS025014 Perform sampling and testing of contaminated sites.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- identify and document key features and potential contamination hazards of at least one site
- collect, preserve and label a set of representative samples for at least one site in accordance with sampling plan
- prepare (sub)samples and conduct at least one test and analysis, using specified test methods, for each of the following:
 - air
 - water
 - soil
- apply cleaning and decontamination procedures for each test
- interpret trends in data and/or results and report atypical results on at least 3 occasions.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- scientific terminology covering the sampling and testing of air, water and soil at potentially contaminated sites as relevant to job role
- overview of legislation, regulations, standards and codes of practice related to contaminated sites, and threshold levels or environmental quality concentration limits for contaminants
- common site hazard and risks, risk assessment techniques and use of risk cards
- properties and health risks associated with groups of contaminants including at least 2 examples from each of the following groups:
 - particulates
 - chemicals
 - materials and substances
 - gases/vapours
- sampling plans for contaminated sites, including concepts of preliminary sampling, non-targeted/grid sampling, and targeted/judgemental sampling

- types of sampling strategies for gas, water and soil
- functions and operating principles of, and sampling equipment related to, test equipment and/or instruments including at least 2 from each of the following:
 - air testing
 - water testing
 - soil testing
- screening of gas/vapours, soil and water samples using:
 - colour and texture
 - bioluminescence/toxicity test kits
 - colorimetric methods and dye shake tests
 - pH, electrical conductivity, redox potential, temperature, dissolved oxygen and ammonia concentration
 - photo ionisation detectors (PID)
 - flame ionisation detectors (FID)
 - gas detectors
 - portable infrared analysers for methane and carbon monoxide (CO)
 - portable X-ray fluorescence spectrum analyses
 - field gas chromatography
 - measurement of radiation
- common procedure/equipment problems leading to atypical data/results
- traceability and/or chain of custody of samples and management of large volumes of data
- calculation of measurement uncertainty as relevant to tests being performed
- use of replicates, field and trip (transport) blanks, rinsate blanks and background samples
- data processing, recording and reporting procedures
- hazards, health, safety and environmental requirements relevant to site activities undertaken; use of safe work methods, safety equipment and personal protective equipment (PPE).
-

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - sampling plan
 - test methods and/or procedures
 - instrument calibration procedures, where relevant
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

MSTGN3023 Estimate and cost jobs

Modification History

Release 1. Unit code, Title and Application changed. Minor title change for consistency. Elements and Performance Criteria simplified. Foundation Skills field populated. Range of Conditions removed. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is equivalent to MSTGN3003 Estimate and cost job. Supersedes and is not equivalent to MSTTF3002 Gain customer acceptance of service proposal (covers costing content).

Application

This unit describes the skills and knowledge required to obtain job information, estimate the net cost of providing products and/or services and calculate the final cost to the customer. It includes the development of customer quotations.

This unit applies to workers in all sectors who cost the provision of products or services in accordance with established costing procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil

Competency Field

Generic

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Gather job information	1.1 Obtain details of customer requirements in line with job and workplace requirements 1.2 Record job specifications based on information gathered

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Estimate costs	2.1 Interpret technical information required to complete estimates 2.2 Estimate required materials types and quantities based on specification 2.3 Estimate labour requirements based on specification 2.4 Identify and estimate other costs that may be incurred based on specification
3. Calculate costs	3.1 Calculate and document total cost of providing product or service based on estimates 3.2 Determine and document allowances for overheads and mark-up percentages in accordance with workplace procedures 3.3 Calculate and document final cost to customer in accordance with workplace procedures
4. Complete final documentation	4.1 Check and verify costing details in accordance with workplace procedures 4.2 Identify and resolve costing errors of anomalies 4.3 Prepare accurate customer quotation in accordance with workplace formats 4.4 File and store costing and quotation documentation for future reference in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret technical product and/or service information as the basis for estimating costs
- Technology skills to use calculators and computer software for costings and preparing quotations

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTGN3003 Estimate and cost job.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

Assessment Requirements for MSTGN3023 Estimate and cost jobs

Modification History

Release 1. Unit code, Title and Application changed. Minor title change for consistency. Elements and Performance Criteria simplified. Foundation Skills field populated. Range of Conditions removed. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Supersedes and is equivalent to MSTGN3003 Estimate and cost job. Supersedes and is not equivalent to MSTTF3002 Gain customer acceptance of service proposal (covers costing content).

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- estimate and cost two jobs that each have different requirements in terms of:
 - scope and nature of products/services
 - labour costs
 - materials costs
- use the following mathematical processes correctly in estimating and costing the above two jobs:
 - estimation
 - calculation of percentage mark-ups
 - calculation of GST
- use workplace technology for the estimation and validation of job costs.
-

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- ways in which job information may be gathered, including:
 - inspection and measurement
 - customer discussion
 - review of documentation
- products and/or services for which costings are being prepared, including:
 - sources of information
 - features, options and suitability for different customer requirements
 - legal and ethical considerations
 - costs involved in providing products/services:

- materials
- labour rates and their components
- production time and cost
- transport and delivery
- overhead components
- industry sector and organisation costing and quoting procedures:
 - mark-up percentages
 - application of GST
 - documentation formats and inclusions for quotations
 - terms and conditions included in quotations
 - checking and approval processes
- mathematical processes used to estimate and cost jobs:
 - estimation
 - the four basic mathematical operations: addition, subtraction, multiplication, and division
 - calculation of percentage mark-ups
 - calculation of GST
- workplace procedures and protocols for:
 - establishing information on customer requirements
 - recording job specifications
 - checking and verifying costing details
 - filing and storing costing and quotation documentation.
 -

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - product/service information
 - costing and quotation procedures and documentation
 - technology for calculation of costs

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR005 Develop and review a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and review a surface water plan. It includes ensuring environmental considerations are met and source of supply is maintained. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to leaders working in water organisations with responsibility for the development and review of surface water resources including but not limited to rivers and streams, dam catchments, flood retarding, overland flow controls and related drainage. It does not include flood routing through storages.

Those undertaking this unit would work autonomously and lead personnel whilst performing sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Prepare for surface water flow and quality management**
 - 1.1** Identify hazards, assess risks and implement control measures associated with surface water flow requirements
 - 1.2** Identify, interpret and synthesise relevant data to monitor and test water flow, quality and quantity requirements, including release figures
 - 1.3** Identify, interpret and analyse historic source water flow and system capacity information
 - 1.4** Identify and interpret environmental factors impacting surface water flows and quality
 - 1.5** Identify, interpret and review resource and operational protocols
 - 1.6** Complete complex calculations and incorporate analysed results into the surface water plan
- 2 Develop the surface water plan**
 - 2.1** Identify and interpret surface water management requirements
 - 2.2** Identify, interpret and validate stakeholder requirements impacting surface water
 - 2.3** Develop a surface water plan according to relevant legislation, industry standards and workplace procedures
 - 2.4** Identify, investigate and report breaches of surface water management controls
- 3 Review the surface water plan**
 - 3.1** Analyse and report deviations from planned performance measures
 - 3.2** Review objectives of the management and implementation plans
 - 3.3** Review parameters for water usage and quality through monitoring and testing programs
 - 3.4** Report and recommend changes to plan objectives, workplace procedures and usage and quality parameters
 - 3.5** Provide advice and guidance to water users and stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR063 Develop and review surface water management plan.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for NWPIRR005 Develop and review a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- developing and reviewing a surface water plan to ensure environmental considerations are met and source of supply is maintained
- developing effective surface water plans addressing the water organisation's objectives and requirements
- gathering, interpreting and synthesising information including:
 - historical data
 - monitoring and testing results
 - relevant legislation, industry standards and workplace procedures
 - stakeholder requirements
- identifying and interpreting environmental factors
- identifying hazards, assessing risks and implementing control measures associated with surface water flow requirements
- preparing reports and recommendations for changes to the objectives of the surface water plan and its implementation
- reviewing the implementation and development plan
- reading and interpreting complex data and performing complex calculations to track and manage performance of surface water
- using data from testing and other monitoring arrangements to track the performance of the surface water plan and inform the review of the plan

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- climatic and weather characteristics and impacts
- changes to water flow and levels over time
- complex calculations
- hydraulic analysis
- physical assets associated with surface water management

- public and government reporting requirements
- relevant legislation, regulations, industry standards and workplace procedures relating to surface water
- relevant water data including:
 - flow
 - quality and quantity requirements
 - release figures
- rights of water authority control and management procedures
- risk management principles
- stakeholder requirements and rights associated with managing surface water
- surface water sources

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPIRR006 Develop and review an irrigation system plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and review an irrigation system plan.

It includes analysing total irrigation system performance, liaising with customers and stakeholders and reviewing and refining the irrigation system plan. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to leaders with responsibility for the development and review of plans for the management of irrigation systems. Those undertaking this unit would work autonomously and lead personnel whilst performing sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for irrigation system management

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Determine, interpret and analyse water quantity and quality requirements including release and flow rates

- 1.2 Access, interpret and synthesise historical irrigation system capacity and delivery performance information
 - 1.3 Identify and interpret legislative, organisational and environmental requirements and determine system constraints impacting the delivery of irrigation water
- 2 Develop an irrigation system plan**
 - 2.1 Identify and interpret irrigation system management requirements
 - 2.2 Identify and validate customer requirements for irrigated culture
 - 2.3 Consult and communicate with stakeholders and obtain input for the irrigation system plan
 - 2.4 Develop and document an irrigation system plan and an implementation strategy
 - 2.5 Identify, investigate and report breaches of customer entitlements and other usage provisions
- 3 Review and refine the irrigation system plan**
 - 3.1 Evaluate operations and maintenance activities and system performance and incorporate into the irrigation system plan review
 - 3.2 Review objectives of the irrigation system plan and implementation strategy
 - 3.3 Recommend changes to plan objectives and operational and maintenance procedures
 - 3.4 Provide advice and guidance to stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR062 Develop and review irrigation system management plan.

Assessment Requirements for NWPIRR006 Develop and review an irrigation system plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- assessing environmental impacts
- conducting investigations
- consulting and communicating with stakeholders and customers
- determining and interpreting water quantity and quality requirements
- developing and reviewing the operation and maintenance of irrigation systems
- developing effective irrigation system plans addressing the organisation's objectives and requirements
- gathering, interpreting and synthesising information for incorporating into the irrigation system plan including:
 - customer flow rates and usage
 - delivery performance
 - historical system capacity data
 - key indicators
 - stakeholder requirements
- interpreting and applying legislation, standards and policies
- preparing reports and recommendations for changes to the objectives of the plan
- reviewing the implementation and development plan
- using data from monitoring arrangements to track performance of the irrigation system plan

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- customer and stakeholder expectations and requirements
- irrigation operations and maintenance activities
- legislation and regulations including:
 - channel, pipe and pump
 - customer entitlements

- flow rates
- relevant workplace policies and procedures associated with irrigation system plans
- water quantity and quality requirements including release and flow rates
- water requirements for irrigated cultures within the system

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPIRR007 Implement and coordinate a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate a surface water plan.

It includes ensuring environmental and sustainability considerations are met, where appropriate source of supply is maintained and controls for surface water management including catchment land use, flow controls and retardation, release flows and managed usage are implemented and effectiveness monitored.

This unit applies to those working as leaders with responsibility for the management of surface water resources. Those undertaking this unit would work autonomously, leading staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Develop and implement monitoring and testing

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Develop an implementation strategy for the surface water plan according to workplace procedures

programs

- 1.2 Coordinate management plan activities relating to the surface water plan and determine responsibilities and timelines for implementation
 - 1.3 Plan, design and implement monitoring and testing programs
 - 1.4 Identify hazards, assess risks and implement control measures for monitoring and testing programs
 - 1.5 Gather historical surface water collection information and evaluate as input to the planning process
 - 1.6 Monitor water usage, water flow and water quality according to the plan
 - 1.7 Record and analyse test results and education programs
- 2 **Monitor and evaluate performance of surface water plans**
 - 2.1 Review objectives of the surface water and implementation plans
 - 2.2 Identify, investigate and report deviations of surface water flows and controls from management objectives
 - 2.3 Monitor and review environmental factors impacting the collection of surface water
 - 2.4 Make recommendations for changes to plan objectives and procedures and usage and quality parameters
 - 2.5 Provide advice and guidance to water stakeholders
- 3 **Report on monitoring and implementation activities**
 - 3.1 Identify and report deviations from the surface water plan
 - 3.2 Review and report operational problems of controls and regulations from the surface water and implementation plans
 - 3.3 Make recommendations for changes to plan objectives

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR072 Implement and coordinate surface water management plan.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for NWPIRR007 Implement and coordinate a surface water plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- designing and implementing testing processes and programs
- gathering, interpreting and synthesising information to underpin the implementation of a surface water plan including:
 - current legislation and standards
 - effectiveness of plan controls
 - historical data
 - stakeholder requirements
 - water quantity and quality test results
- implementing management plans for surface water to ensure environmental considerations are met and source of supply is maintained
- monitoring and evaluating the outcomes of the surface water plan
- preparing reports and recommendations for future action
- providing advice about water usage and communicating with stakeholders
- reading and interpreting numerical data related to surface water and environmental factors

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- climatic and weather characteristics and impacts
- environmental and sustainability considerations
- hydraulic analysis
- monitoring and performance procedures
- operation and interrelationships of surface water flows and controls
- operational and maintenance problems
- physical and regulatory control limitations
- relevant legislation, industry standards, regulations and workplace procedures
- risk management principles

- surface water system objectives

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPIWS002 Operate regulating devices in rural irrigation systems

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to operate regulating devices in rural irrigation systems.

It includes monitoring flows in irrigation systems, recording and reporting system adjustments and responding to contingencies.

This unit applies to those working as field or operational staff with responsibility for using flow control and metering devices according to workplace procedures. Those undertaking this unit would work in a team or under appropriate supervision using own familiar resources as required, while performing routine tasks in range of familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Monitor and regulate required flows in

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Access and apply operating requirements for flows in

irrigation systems	irrigation systems
	<ul style="list-style-type: none"> 1.2 Use and secure equipment to assist operational activities according to workplace procedures 1.3 Monitor, measure and record flows at designated locations according to work schedule 1.4 Identify potential operational problems and provide solutions 1.5 Adjust and maintain flow regulation and control mechanisms to increase and decrease flow according to workplace procedures
2 Record and report system adjustments	<ul style="list-style-type: none"> 2.1 Produce trend information relating to flow adjustments 2.2 Collect, record and report information on flows and abnormalities
3 Respond to contingencies	<ul style="list-style-type: none"> 3.1 Identify and assess potential risks and contingencies in the operation of regulating devices 3.2 Respond to potential and actual risks and contingencies 3.3 Inform relevant personnel of potential risks according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR002 Operate basic flow control and regulating devices in irrigation systems.

Assessment Requirements for NWPIWS002 Operate regulating devices in rural irrigation systems

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

- adjusting and maintaining flow system control mechanisms
- completing records and reports
- collecting and reporting system performance information
- identifying and reporting operational problems
- identifying flow requirements
- interpreting data
- producing information
- securing flow regulation devices
- using equipment relevant for controlling and regulating water flow for irrigation

Knowledge Evidence

- effects of weather conditions on system operation and worksite
- equipment operation, capacity and limitations
- methods for data collection and reporting
- irrigation system layout
- principles of hydraulics impacting on the operation of flows
- relevant legislation, regulations and workplace procedures
- relevant lock-out procedures for mechanical and electrical installations
- risk factors and potential hazards
- system flow control mechanisms

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS004 Install meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to install meters for rural water supplies.

It includes confirming conditions of the site for meter installation, installing meter facilities and restoring site.

This unit applies to those working as field or operational staff installing meters. Those undertaking this unit would work independently under appropriate supervision, while performing routine tasks ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Confirm conditions of the site for meter installation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify the location of the site and establish client information from work plans and job specifications

- 1.2 Identify access to the site and any conditions of access
 - 1.3 Assess the conditions of the site
 - 1.4 Set out the site for installation of meter according to workplace procedures
 - 1.5 Complete risk assessment and identify and control hazards
- 2 Install meter facilities**
- 2.1 Calculate installation elevations according to design
 - 2.2 Install meter as set out according to design and manufacturer specifications
 - 2.3 Check fittings, seals and operation according to workplace procedures
 - 2.4 Install ancillary equipment and check for operation and seal
 - 2.5 Check meter installation for compliance with manufacturer specifications
- 3 Restore site**
- 3.1 Backfill with suitable material, moisture content and compact
 - 3.2 Restore the site according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR014 Install meters for rural water supplies.

Assessment Requirements for NWPIWS004 Install meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- calculating pipe and meter pit elevation, fall and presentation
- checking power supply and links
- compacting backfill
- identifying faults, changes and failure indicators
- identifying risks
- installing ancillary equipment
- planning meter installation and construction
- restoring site
- undertaking a risk assessment and checking hazards and safety requirements

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- causes of flow disturbance
- different types of meters
- environmental impact guidelines
- meter manufacturer guidelines and installation manual for specific meters
- potential causes of meter failure
- relevant legislation, regulations and workplace procedures
- relevant meter standards
- relevant safety requirements
- requirements for checking the pattern approval of meters and compliance with meter installation standards
- workplace policies and procedures for water meter installation

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS006 Maintain meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to maintain meters for rural water supplies. It includes maintaining operational integrity of already installed meters, metering systems and components. It also includes corrective, predictive and preventative maintenance.

This unit applies to those working in the water industry as field or operational staff, maintaining meters for rural water supply. Those undertaking this unit would work under appropriate supervision, while performing routine tasks in familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Confirm meter type and location

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Obtain organisational maintenance plan and manufacturer guidelines
- 1.2 Locate meter facility according to workplace procedures

- | | | |
|----------|------------|---|
| | 1.3 | Confirm meter type and number match to maintenance plan |
| 2 | 2.1 | Conduct a risk assessment of a meter site according to workplace procedures |
| | 2.2 | Check metering components and identify faults according to workplace procedures |
| | 2.3 | Establish maintenance requirements according to workplace procedures |
| 3 | 3.1 | Repair or replace faulty components according to workplace procedures |
| | 3.2 | Identify faults which need to be rectified by a third party to relevant personnel |
| 4 | 4.1 | Ensure meter complies with standards |
| | 4.2 | Perform on-site re-test of meter according to workplace procedures |
| | 4.3 | Record faults and meter performance, maintenance and repairs |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR022 Maintain meters for rural water supplies.

Assessment Requirements for NWPIWS006 Maintain meters for rural water supplies

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying seals
- checking and reporting meter condition
- confirming location of worksite and meter
- identifying manufacturer instructions, plans, exploded drawings and parts catalogues
- identifying verification marks
- reading and analysing meter display
- replacing components
- reporting maintenance requirements
- working with low voltage wiring

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- checking pattern approval requirements
- location methods including:
 - GPS
 - maps
- manufacturer maintenance procedures for specific meter types
- meter types and accuracy limits
- relevant legislation, regulations and workplace procedures
- relevant workplace policies and procedures for water meter maintenance
- standards for non-urban metering
- work, health and safety (WHS) risk assessments

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS008 Monitor and conduct maintenance on rural irrigation assets

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor and conduct maintenance on rural irrigation assets.

This includes monitoring asset and equipment performance, conducting maintenance on assets and equipment and compiling process records and reports. It also includes pipelines and associated fittings.

This unit applies to those working as field staff with the responsibility for monitoring the operation of flow control, measuring and regulating devices, conducting maintenance and ensuring problems and anomalies are rectified by specialist technicians. Those undertaking this unit would work under appropriate supervision, performing routine tasks and ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Prepare for work | 1.1 Interpret work requirements for monitoring rural irrigation assets from plans, drawing specifications and instructions |
| | 1.2 Select and check equipment and tools to meet the safety requirements of the task and site |
| | 1.3 Select, fit and use required safety equipment, including personal protective equipment |
| | 1.4 Undertake risk assessment at worksite according to workplace procedures |
| 2 Monitor asset and equipment performance | 2.1 Identify rural irrigation assets and equipment |
| | 2.2 Check and interpret information and specifications on assets and equipment performance |
| | 2.3 Report on assets and equipment performance |
| 3 Conduct maintenance on assets and equipment | 3.1 Undertake routine maintenance according to maintenance schedule |
| | 3.2 Secure assets and equipment according to workplace procedures |
| | 3.3 Identify and report problems to relevant personnel for correction |
| | 3.4 Identify, select, place and join components and associated fittings |
| 4 Monitor asset and equipment performance | 4.1 Schedule and monitor routine inspections of system assets |
| | 4.2 Collect, analyse and report data on system asset performance and usage |
| 5 Compile process records and reports | 5.1 Identify process faults and monitor the operational condition of assets and equipment |
| | 5.2 Report on adjustment requirements according to workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR024 Monitor and conduct maintenance on flow control and metering devices.

Assessment Requirements for NWPIWS008 Monitor and conduct maintenance on rural irrigation assets

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- collecting and recording data on asset performance
- collecting and recording information on equipment performance
- conducting a risk assessment and identifying control measures
- conducting routine maintenance tasks and securing assets and equipment
- identifying and reporting on asset performance
- identifying and reporting operational problems
- inspecting rural irrigation assets and equipment
- interpreting plans and instructions
- interpreting policies, procedures and standards
- producing reports
- selecting appropriate equipment and tools, including personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- data collection and recording
- effects of weather and conditions on maintenance and assets
- equipment operation, capacity and limitations
- flow measurement procedures
- ground structure
- irrigation asset and equipment performance parameters
- lock out procedures
- relevant utilities and service bodies
- relevant legislation, regulations and workplace procedures
- risk factors, and potential hazards and control measures
- system hydraulics
- system layout

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS012 Monitor and schedule water deliveries

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to monitor and schedule water deliveries.

It includes scheduling water deliveries for irrigation and domestic or supply systems, including monitoring flows, analysing data, coordinating hydraulic processes and compiling operational reports.

This unit applies to those working as field staff and operators with a specific responsibility for ensuring water deliveries meet customer requirements. Those undertaking this unit would work under appropriate supervision, while performing routine tasks and ensuring minimum damage to the environment, in a familiar.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|----------|----------------------------------|------------|---|
| 1 | Schedule water deliveries | 1.1 | Identify and record customer water orders according to workplace procedures |
|----------|----------------------------------|------------|---|

- | | | |
|----------|--|---|
| | 1.2 | Analyse water orders to determine water delivery and flow rate requirements |
| | 1.3 | Schedule water deliveries to meet flow rate requirements and organisational standards for channel balance and capacity restraints |
| 2 | Monitor water delivery | |
| | 2.1 | Monitor channel flow rate, regulation and delivery according to customer requirements |
| | 2.2 | Maintain delivery performance records according to workplace procedures |
| | 2.3 | Analyse system performance using system data and records to determine actual and planned performance |
| 3 | Coordinate and control water delivery | |
| | 3.1 | Calculate system adjustments according to demand and organisational requirements |
| | 3.2 | Coordinate flow regulation, channel levels, security of flow devices and settings according to demand and organisational requirements |
| 4 | Compile records of water delivery | |
| | 4.1 | Compile reports from systems performance data |
| | 4.2 | Maintain appropriate measurement and delivery records according to workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR042 Monitor and schedule water deliveries.

Assessment Requirements for NWPIWS012 Monitor and schedule water deliveries

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- adjusting system according to demand
- analysing volumes and flow rates required for water deliveries
- completing relevant documentation
- coordinating flow regulating devices
- identifying and responding to operational problems
- identifying control system faults
- monitoring and regulating system performance
- monitoring channel flow
- performing work related calculations
- preparing schedules for water deliveries for customer orders for irrigation and domestic stock supply systems
- producing reports

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- control systems
- coordination processes
- effects of weather and conditions on operation of site plant
- environmental aspects of irrigation and/or stock and domestic supply system
- equipment operation, capacity and limitations
- flow measurement procedures
- gravity systems
- impact of the principles of hydraulics on the operation of flows
- policies and standard operating procedures
- principles of scheduling
- relevant legislation, regulations and workplace procedures

- system hydraulics
- system layout and operations
- water flow calculations

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPIWS014 Coordinate and monitor the operation of irrigation delivery systems

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to coordinate and monitor the operation of irrigation delivery systems.

It includes meeting operational and environmental performance standards including system maintenance and customer liaison.

This unit applies to those working as field or operational staff with a specific responsibility for ensuring the operation of irrigation systems complies with organisational and statutory requirements. Those undertaking this unit would work autonomously, usually with supervisory responsibilities, while performing complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Irrigation Water Supply

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Confirm performance measures in irrigation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Communicate with customers to identify irrigation

system's management plan	requirements
	1.2 Identify environmental factors impacted by the irrigation system
	1.3 Interpret historic system information and consult stakeholders
	1.4 Confirm performance requirements for an irrigation system management plan
2 Monitor and coordinate processes and resource targets	2.1 Monitor and test programs and identify, investigate and report any deviations from water quantity, quality, release or flow
	2.2 Evaluate the duration, volume and flow rates of water deliveries and identify, investigate and report deviations from agreed service levels
	2.3 Identify and plan maintenance requirements according to irrigation plan
	2.4 Identify and implement operational resources for the irrigation management plan
	2.5 Develop and implement an operational risk management plan
	2.6 Review the scheduling and flow calculations
3 Report outcomes of coordination and monitoring	3.1 Monitor and report the performance of the irrigation system
	3.2 Make recommendations for improvements in system performance and/or customer service

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for NWPIWS014 Coordinate and monitor the operation of irrigation delivery systems

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing and reporting data
- assessing environmental impact
- checking flows
- confirming performance requirements for an irrigation system management plan
- evaluating performance of water deliveries and investigating and reporting deviations from agreed service levels
- evaluating performance targets
- identifying and reporting problems
- identifying customer requirements and environmental factors that impact on the irrigation system
- implementing, monitoring and testing programs and investigating and reporting deviations from planned parameters
- interpreting historic system information and consulting stakeholders
- making recommendations for system performance or customer service improvements

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- coordination processes
- customer expectations and requirements
- environmental and topography influence on the operation area
- evaluation strategies for effectiveness of performance
- impact of the principles of hydraulics on the operation of flows
- irrigation SCADA systems
- maintenance contingencies
- operational contingencies
- operational risk factors
- principles of scheduling for supply

- relevant legislation, policies and procedures
- requirements for monitoring and testing programs
- system equipment operation, capacity and limitations
- system layout and operations
- water flow calculations
- workplace documentation including requirements for an operational risk management plan

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPNET019 Prepare and restore worksite

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to prepare and restore worksite.

It includes following work instructions, using a range of equipment and tools to prepare a safe worksite and restoring worksite to the required condition.

This unit applies to those working as field and operational staff performing a wide range of functions and supporting construction, maintenance and operations processes. Those undertaking this unit would work under appropriate supervision, performing routine tasks, in mostly familiar contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Networks

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for work

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify and report potential hazards to public and environment and assess risks

1.2 Determine worksite preparation requirements from

- specifications, instructions and pre-work inspections
- 1.3** Perform a worksite check according to legislative and organisational requirements to identify risks and prevent damage to other utilities
 - 1.4** Source and check worksite equipment, tools and materials as appropriate to meet task and safety specifications
 - 1.5** Select, fit and use personal protective equipment
 - 1.6** Identify, notify and communicate with customers and stakeholders according to workplace procedures
- 2 Prepare worksite**
- 2.1** Position safety equipment and materials to prevent potential risks to public and environment
 - 2.2** Store and secure equipment and materials according to workplace procedures
 - 2.3** Use worksite equipment, excavation equipment, tools and materials according to manufacturer instructions and workplace procedures
 - 2.4** Drain and divert water flows from worksite to prevent damage to environment
- 3 Restore worksite**
- 3.1** Backfill and compact excavations according to specifications
 - 3.2** Restore worksite by landscaping, planting and materials
 - 3.3** Remove excess soil, debris and unwanted materials from worksite according to workplace procedures
 - 3.4** Restore worksite using equipment, tools and materials to meet environmental and workplace procedures
- 4 Review and report activities**
- 4.1** Tag and report faulty equipment, tools and advise appropriate personnel
 - 4.2** Store equipment, tools and materials according to manufacturer and workplace instructions
 - 4.3** Complete and process workplace records according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPNET002 Prepare and restore work site.

Assessment Requirements for NWPNET019 Prepare and restore worksite

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- cleaning, maintaining and storing equipment
- clearing and preparing worksite according to specifications
- communicating with appropriate environmental controls
- compacting and reinstating worksite
- excavating backfill
- identifying and responding to worksite issues
- interpreting and applying numerical data in specifications and plans
- interpreting plans, instructions, workplace procedures and work requirements
- planning worksite layout
- preparing worksite for planting and plant vegetation
- selecting, using, maintaining, cleaning, storing and securing materials and equipment
- using tools and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- communication systems
- effects of weather and conditions on construction worksite or plant
- environmental aspects of worksite preparation and restoration
- equipment operation, capacity and limitations
- excavation procedures and worksite restoration
- landscape and ground structure of work area
- relevant legislation, industry standards and guidelines
- relevant utilities and service bodies
- relevant workplace procedures
- risk factors and potential hazards of worksite preparation and restoration

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPNET029 Locate, identify and protect utilities

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to locate, identify and protect utilities.

It includes preparing to locate utility services at the worksite, locating utility assets by excavation, operating plant near underground or overhead utility assets. It also includes protecting and supporting utility assets during excavation and backfilling and initiating emergency procedures.

This unit applies to those involved in locating, constructing, repairing or installing underground utility infrastructure to prevent damage, injury, death or loss of service. Those undertaking this unit would work under appropriate supervision, performing routine tasks, in mostly familiar context ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Networks

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to locate utility services at worksite

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify utility assets or services by communicating with relevant authorities

- 1.2 Determine and mark worksite boundaries and requirements from plans, specifications and workplace instructions
 - 1.3 Determine type, size and likely configuration of all underground and overhead services from plans and typical or local installation practices
 - 1.4 Conduct risk assessment for environmental and safety factors including personal and protective equipment to ensure it is safe to commence work
 - 1.5 Identify yourself to your customers and determine customer needs
- 2 Operate pipe and cable locating equipment**
 - 2.1 Identify and select appropriate locating equipment
 - 2.2 Operate pipe and cable locating equipment according to manufacturer instructions
 - 2.3 Interpret false signals or interference with pipe and cable locating equipment and make appropriate adjustments
 - 2.4 Mark the approximate location of services on the surface of the worksite according to workplace procedures
 - 2.5 Conduct test excavation to visually confirm service location according to workplace procedures
- 3 Operate plant near underground or overhead utility assets**
 - 3.1 Monitor plant during work activities according to workplace procedures
 - 3.2 Identify potential or actual encroaches of plant on minimum clearances to assets
 - 3.3 Give instructions to plant operator using agreed signals
- 4 Protect and support utility assets during excavation and backfilling**
 - 4.1 Protect and support assets according to utility owner requirements to prevent damage
 - 4.2 Report damage to assets to utility owner according to workplace procedures
 - 4.3 Restore worksite using equipment, tools and materials to meet environmental and workplace procedures

- | | |
|--------------------------------------|--|
| 5 Maintain locating equipment | 5.1 Perform daily maintenance of equipment according to manufacturer instructions |
| | 5.2 Record maintenance details according to workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPNET011 Locate, identify and protect utilities.

Assessment Requirements for NWPNET029 Locate, identify and protect utilities

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- applying safe work methods for locating and protecting utilities at or near a worksite
- assessing and identifying risk of potential hazards associated with each utility
- communicating with stakeholders
- contacting relevant authorities for the correct location of utilities or services
- monitoring use of equipment
- protecting and supporting utility assets during performance of work tasks and during worksite restoration
- selecting and using tools and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- communication systems for locating utilities
- plans of underground and overhead services
- effects of weather and conditions on worksite or plant
- emergency response procedures
- environmental aspects of excavation
- equipment operation, capacity and limitations
- landscape and ground structure of work area
- relevant legislation, regulations and workplace procedures
- relevant utilities and service bodies to contact for the correct location of utilities or services including Dial Before You Dig
- risk assessment and identification of potential hazards associated with each utility

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

NWPSOU006 Develop and manage a flood plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to develop and manage a flood plan.

It includes analysing and modelling data relating to flooding, developing effective management and warning systems and communicating outcomes concisely. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to those working as leaders with responsibility for the preparation of flood management strategies and flood warning systems. Those undertaking this unit would work autonomously with leadership responsibilities, while performing complex tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Source

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and prepare for flood operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Access and interpret historical rainfall run-off and flooding regimes of specific catchments

- 1.2 Collate and analyse simulated, hypothetical and estimated rainfall intensity data and model catchment
 - 1.3 Estimate and record flood levels, extents and flow rates
 - 1.4 Identify and interpret storage asset specifications including regulatory requirements, industry standards and workplace procedures
 - 1.5 Identify resources, environment and stakeholders at risk during a flood event
- 2 Develop a flood plan**
 - 2.1 Consult with stakeholders to obtain input for flood planning
 - 2.2 Develop and document a plan for managing the flood impact on a storage asset
 - 2.3 Confirm performance measures for flood operations
 - 2.4 Develop plan components and activities for implementation
 - 2.5 Develop a flood plan according to relevant legislation, industry standards, workplace procedures and environmental requirements
- 3 Monitor and evaluate flood plan**
 - 3.1 Assess and record a flood event according to industry standards and workplace procedures
 - 3.2 Evaluate the roles of storage and retarding basins safety and flood attenuation strategies
 - 3.3 Evaluate current flood classifications and impacts according to flood plan
 - 3.4 Formulate planning controls for flood plain and waterway management
 - 3.5 Evaluate current flood warning systems according to flood plan
 - 3.6 Recommend and develop changes to existing flood plain and waterway management controls and warning systems
- 4 Report on implementation of the plan**
 - 4.1 Collate, analyse and record information according to workplace procedures

- 4.2 Prepare and present reports to relevant persons
- 4.3 Communicate findings and recommendations to stakeholders according to workplace procedures and relevant regulations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to NWPSOU028 Prepare and report on data related to flood operations.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for NWPSOU006 Develop and manage a flood plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing and developing flood mitigation warning systems and strategies
- analysing, interpreting and modelling flood data
- assessing and recording a flood event
- communicating flood planning findings with stakeholders and relevant persons
- developing a flood plan including:
 - documenting an implementation plan
 - identifying plan components and activities for completion
 - specifying environmental requirements
- developing critical flood warning systems
- developing strategies to mitigate the impact of potential future floods
- identifying and interpreting storage asset specifications

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- catchment hydrology principles including the roles of:
 - retarding basins
 - safety and flood attenuation strategies
 - water storage
- current flood classifications and flood warning systems
- performance measures for flood operations
- relevant documentation associated with developing and managing a flood plan including:
 - industry standards
 - workplace procedures
- relevant legislation and regulatory requirements associated with developing and managing a flood plan including:
 - by-laws

- environmental legislation
- work health and safety (WHS) legislation
- planning schemes
- storage asset specifications
- water flow measurement and flow routing models

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPSOU007 Implement and coordinate a catchment plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate a catchment plan.

It includes coordinating, monitoring and extending the development of the catchment plan to ensure all aspects are implemented and performance measures and objectives are met. It also includes applying and adhering to relevant legislation, industry regulations and workplace procedures.

This unit applies to those working as leaders with responsibility for management of water catchments. Those undertaking this unit work autonomously, leading staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Source

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan for catchment management

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Confirm performance measures for catchment plan

- 1.2 Identify and interpret legislative requirements and organisational policies for the management of water catchment
- 1.3 Identify and interpret catchment plan requirements
- 1.4 Identify stakeholder requirements impacting the catchment area
- 1.5 Gather historical catchment data and evaluate as input to the planning process
- 1.6 Identify, interpret and assess water quality and quantity requirements
- 1.7 Identify and interpret environmental and developmental factors impacting water catchment
- 2 **Develop the catchment plan**
 - 2.1 Develop catchment plan components and activities for implementation
 - 2.2 Coordinate catchment plan activities and determine responsibilities and timelines for implementation activities
 - 2.3 Communicate the catchment plan with relevant personnel and stakeholders according to regulations and workplace procedures
- 3 **Monitor and review catchment plan**
 - 3.1 Design and implement monitoring and testing programs and check for compliance against the catchment plan
 - 3.2 Analyse, interpret and record testing results according to workplace procedures
 - 3.3 Identify and investigate current and potential problems for catchment management
 - 3.4 Evaluate objectives and performance of the water catchment plan and report deviations
 - 3.5 Report investigation results and make recommendations according to workplace procedures
 - 3.6 Identify, investigate and report deviations from plan objectives
 - 3.7 Review objectives of the catchment and implementation plans

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to NWPIRR073 Implement and coordinate catchment management plan.

Assessment Requirements for NWPSOU007 Implement and coordinate a catchment plan

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing, interpreting and recording test results
- communicating responsibilities of the catchment plan with personnel and stakeholders
- confirming performance measures for the catchment plan
- designing and implementing monitoring and testing activities
- developing implementation plans including objectives and requirements specified in the catchment plan
- evaluating objectives and performance measures of the catchment plan and reporting deviations
- identifying and reporting investigation results
- gathering, interpreting and synthesising information for the water catchment plan including:
 - environmental impacts
 - historical data
 - plan components
 - relevant legislation and industry standards
 - stakeholder requirements
 - water quality test results
- implementing and managing activities in water catchments that impact on water yield and quality
- performing activities associated with implementing and managing catchment plan components
- preparing reports and recommendations for future action

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- environmental impacts of water catchment
- catchment plan development and components

- problem identification and investigation
- relevant information associated with implementing and coordinating a water catchment plan including:
 - historical records and data
 - water industry standards
 - water industry legislation and regulations
 - workplace policies and procedures
- risk management principles
- water quality determinants

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

NWPTRT028 Operate and control reclaimed water irrigation

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Application

This unit involves the skills and knowledge required to operate and control reclaimed water irrigation.

It includes assessing sites for reclaimed water irrigation and quality of reclaimed water for irrigation. It also includes implementing reclaimed water irrigation, responding to water or soil quality issues and compiling reclaimed water irrigation records.

This unit applies to staff members with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation. Those undertaking this unit would work under appropriate supervision, performing routine tasks in a familiar context, and ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Treatment

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Assess sites for reclaimed **1.1** Identify soil and water interactions and soil properties

- | | | |
|---|------------|--|
| water irrigation | | important for plant growth |
| | 1.2 | Identify soil sampling sites, collect samples and conduct soil testing according to workplace procedures |
| | 1.3 | Classify soils using field texture, pH and structure analysis |
| | 1.4 | Monitor and determine the water holding capacity of soil |
| 2 Assess quality of reclaimed water for irrigation | 2.1 | Sample and test reclaimed water and interpret quality parameters |
| | 2.2 | Determine crops suitable for the quality of reclaimed water and worksite conditions |
| 3 Implement reclaimed water irrigation | 3.1 | Identify features of irrigation systems |
| | 3.2 | Operate and maintain irrigation equipment according to manufacturer instructions |
| | 3.3 | Identify and apply irrigation scheduling options for reclaimed water |
| | 3.4 | Produce water budgets using crop factors and climate data |
| | 3.5 | Apply irrigation water and collect and monitor tail water or runoff |
| 4 Respond to water or soil quality issues | 4.1 | Develop irrigation management options to respond to water quality issues |
| | 4.2 | Identify and apply requirements and options for soil ameliorants |
| | 4.3 | Monitor infiltration and drainage |
| 5 Compile reclaimed water irrigation records | 5.1 | Compile reports from system data according to workplace procedures |
| | 5.2 | Report observations outside defined parameters for further action to relevant personnel |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to NWPTRT062 Operate and control reclaimed water irrigation.

Assessment Requirements for NWPTRT028 Operate and control reclaimed water irrigation

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- analysing critical aspects of reclaimed water reuse management relating to the project or site
- applying environmental policies, plans and procedures
- assessing environmental risks at the worksite
- identifying environment, health and safety risks and impact on soil, stock and operators
- identifying soil groups
- implementing reclaimed water reuse irrigation
- monitoring and managing soil
- monitoring, operating and controlling reclaimed water irrigation
- participating in and contributing to reviews of reclaimed water reuse procedures
- sampling and testing soil and water
- solving operational problems
- using safety and personal protective equipment (PPE)

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- best management practices for the use of reclaimed water for irrigation purposes
- community and agency roles and responsibilities in monitoring water quality
- effects of weather and conditions on operation of site or plant
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- interpretation and use of safety data sheets
- key characteristics of reclaimed water
- key principles of irrigation practices, including irrigation scheduling
- primary agencies involved in drinking water quality management
- reclaimed water usage licensing procedures and requirements
- relevant legislative requirements

- soil groups
- water hazardous agents and preventative strategies
- water quality performance indicators
- water supply system
- workplace procedures

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

PMBWELD301E Join polyethylene plastic pipelines using butt welding

Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to PMBWELD301 Butt weld polyethylene plastic pipelines.

Application

This unit describes the skills and knowledge required to join polyethylene (commonly referred to as PE) plastic pipelines using butt welding, both in the field and under factory conditions.

This unit applies to an experienced technician working alone or as part of a team.

The unit principally refers to the practical application of polymer material science to employ molecular diffusion across the pipe faces, under controlled conditions, to achieve welding across the joint.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Welding – Plastic Pipelines, Plastic Welding

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify compatibility of materials for welding	1.1 Identify materials as polyethylene from job specifications and worksite instructions 1.2 Check compatibility of polyethylene materials and pipes supplied with welding requirements from specifications
2. Calculate pipe welding	2.1 Identify welding machine type and operating data from job

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
parameters	specifications 2.2 Identify pipe materials and dimensions from job specifications 2.3 Perform welding parameter calculations, including those for durations and pressure, to reflect specifications of individual welding machines and pipe details 2.4 Prepare field operational sheets according to workplace procedures
3. Maintain and adjust welding equipment	3.1 Set up welding equipment and work area to suit job requirements 3.2 Ensure safety equipment is available and operational 3.3 Inspect equipment, and report on and rectify non-conforming equipment 3.4 Check operation of equipment and adjust heating, trimming, and pressure systems using equipment readings and specifications
4. Perform butt welding operations	4.1 Assemble pipeline components in welding machine as required to support welding task 4.2 Clean, align and trim pipe ends according to workplace procedures 4.3 Perform heating, welding, and cooling phases using calculated butt welding parameters 4.4 Monitor and accurately record achieved butt welding parameters for each joint 4.5 Clean-up equipment following completion of welding according to equipment instructions 4.6 Clean-up work area, and apply waste management strategies to dispose of scrap materials according to workplace procedures 4.7 Use personal protective equipment (PPE) according to workplace procedures
5. Visually inspect completed joints	5.1 Identify quality standards for visible characteristics of joints from job specifications 5.2 Assess joints against standards and report results, including non-conforming results 5.3 Accurately maintain records and logbooks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to calculate welding parameters, and interpret equipment readings and technical specifications.
- Reading skills to interpret job specifications and workplace procedures.
- Writing and oral communication skills to record and report on welding of polyethylene plastic pipelines using butt welding techniques.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to PMBWELD301 Butt weld polyethylene plastic pipelines.

Links

Companion Volume implementation guides are found in VETNet – -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=932aacef-7947-4c80-acc6-593719fe4090>

Assessment Requirements for PMBWELD301E Join polyethylene plastic pipelines using butt welding

Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to PMBWELD301 Butt weld polyethylene plastic pipelines.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- join polyethylene plastic pipelines using butt welding, at least once, to meet job specifications.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the functions and operating principles of butt welding equipment, components and ancillary equipment
- types of butt welding processes and their effect on the welded product
- Australian Standards relevant to the materials being used and products being made
- production workflow sequences and materials demand
- typical quality standards at each stage of the welding process
- key variables that may affect product quality, and how to manage them, including:
 - temperature
 - pressure
 - alignment
 - uniformity
 - weld bead appearance
 - tolerance for weld and joint
 - consistency of weld
 - mechanical strength of weld
- worksite environment factors that may affect weld quality and appropriate remedies
- typical process and product problems, including early warning signs, possible causes and corrective actions
- organisational procedures relevant to the work environment and job role
 - hazards that may arise in the job or work environment, and:
 - their possible causes
 - potential consequences.

- appropriate risk controls.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PMBWELD302E Join polyethylene plastic pipelines using electrofusion welding

Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to PMBWELD302 Electrofusion weld polyethylene plastic pipelines.

Application

This unit describes the skills and knowledge required to weld polyethylene (commonly referred to as PE) plastic pipes using electrofusion, both in the field and under factory conditions.

This unit applies to an experienced technician working alone or as part of a team.

The unit principally refers to a process that applies similar techniques to the applied science covered in PMBWELD301E Join polyethylene plastic pipelines using electrofusion welding, where the weld is achieved at the weld interface through polymer diffusion-mixing.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Pre-requisite Unit

Nil.

Competency Field

Welding – Plastic Pipelines, Plastic Welding

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify compatibility of commercial electrofusion control systems	1.1 Identify electrofusion welding control unit type and operating data from job specifications 1.2 Identify compatibility of polyethylene pipe material and dimension with electrofusion fittings requirements from job

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	specifications 1.3 Identify compatibility of control unit with electrofusion fitting control requirements from job specifications
2. Maintain and adjust electrofusion control unit equipment	2.1 Set up electrofusion welding equipment and work area to suit job requirements 2.2 Ensure safety equipment is available and operational for requirements 2.3 Inspect equipment, and report on and rectify non-conforming equipment 2.4 Check operation of equipment using equipment readings and specifications
3. Perform electrofusion welding operations	3.1 Prepare pipe and fitting according to specification 3.2 Perform heating, welding and cooling phases using calculated electrofusion welding parameters 3.3 Monitor and accurately record achieved electrofusion welding parameters for each joint according to workplace procedures 3.4 Clean-up and maintain equipment following completion of welding according to equipment instructions 3.5 Clean-up work area, and apply waste management strategies to dispose of scrap materials according to workplace procedures
4. Visually inspect completed electrofusion joints	4.1 Identify quality standards for visible characteristics of electrofusion joints from job specifications 4.2 Visually assess joints against job requirements and report results, including non-conforming results 4.3 Accurately maintain records and logbooks

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to calculate welding parameters, and interpret equipment readings and technical specifications.
- Reading skills to interpret job specifications and workplace procedures.

- Writing and oral communication skills to record and report on welding of polyethylene plastic pipelines using electrofusion welding techniques.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to PMBWELD302 Electrofusion weld polyethylene plastic pipelines.

Assessment Requirements for PMBWELD302E Join polyethylene plastic pipelines using electrofusion welding

Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to PMBWELD302 Electrofusion weld polyethylene plastic pipelines.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit of competency, and demonstrated the ability to:

- join polyethylene plastic pipelines using electrofusion welding, at least once, to meet job specifications, and including:
 - preparation of joint assemblies:
 - clamping
 - aligning
 - insertion
 - pipe peeling to be smooth and to the correct depth.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the function and operating principles of electrofusion welding equipment, components and ancillary equipment
- characteristics of materials and their behaviour in relation to welding process variables and stages of production
- typical quality standards required at each stage of production
- production workflow sequences and materials demand
- key variables that may affect product quality and production output, and how to manage them, including:
 - voltage
 - fusion time
 - cooling time
 - alignment
 - product output rate
- worksite environment factors that may affect joint quality and appropriate remedies
- typical process and product problems, including early warning signs, possible causes and corrective actions

- organisational procedures relevant to the work environment and job role.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCM007 Manage contracts

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPPROC414A Manage contracts.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to manage contracts. It includes undertaking preparations, establishing and maintaining contract management arrangements, monitoring and maintaining contract performance, and completing and reviewing contracts.

This unit applies to those working as public sector employees with responsibilities relating to contract management.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously with management responsibilities while performing complex tasks in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Procurement

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to manage a contract	<p>1.1 Confirm and clarify contract requirements, approvals and funding arrangements and identify obligations and limits of authority.</p> <p>1.2 Clarify and assist with contract administration issues by contacting specialists and stakeholders and confirm operational elements of the contract.</p> <p>1.3 Identify and clarify key contract clauses.</p> <p>1.4 Identify and confirm process, timings, and key performance indicators with stakeholders.</p> <p>1.5 Develop or review the risk management plan.</p> <p>1.6 Develop or obtain contract management strategy and enter key details from the contract.</p> <p>1.7 Form contract management team and allocate roles and responsibilities.</p>
2. Implement a contract management strategy	<p>2.1 Confirm and implement start-up or transition arrangements.</p> <p>2.2 Establish information and contractor and stakeholder communication strategies.</p> <p>2.3 Monitor and update risk management plan.</p> <p>2.4 Manage relationship with contractors and stakeholders.</p> <p>2.5 Obtain specialist expertise as necessary for progress meetings and for advice on or resolution of contract issues.</p> <p>2.6 Maintain contract information and documentation.</p>
3. Monitor and maintain performance of a contract	<p>3.1 Ensure obligations to contractor and stakeholders are met.</p> <p>3.2 Use monitoring and control measures and performance indicators to manage performance of contract and ensure that all obligations under the agreement are being met.</p> <p>3.3 Manage contract variations.</p> <p>3.4 Investigate and resolve or refer disputes and complaints.</p> <p>3.5 Manage negotiation of contract issues.</p> <p>3.6 Maintain communication with all stakeholders on the performance of the contract.</p>
4. Complete and review contract	<p>4.1 Confirm client satisfaction with contract deliverables.</p> <p>4.2 Finalise, amend, cancel or terminate contracts.</p> <p>4.3 Manage close-out, and renewal of contract or transition to a new contract.</p> <p>4.4 Review contract management, contractor performance, user</p>

	<p>satisfaction and audit results.</p> <p>4.5 Document and explain variances to measures or outcomes that are not met in full.</p> <p>4.6 Report on contractor performance and review contract management practice and make recommendations for improvement.</p>

Assessment Requirements for PSPPCM007 Manage contracts

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- consulting and negotiating with contractors and stakeholders, involving complex oral and written exchanges of information
- networking, within probity boundaries, with diverse stakeholders and contractors
- interpreting complex documents, including contracts, legislation and guidelines
- applying simple supply chain and supplier issues management techniques

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to contract management, including environmental purchasing and corporate social responsibility guidance
- contract performance management
- privacy and confidentiality issues
- probity principles and issues
- financial and accounting issues relevant to the contract

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Assessment Requirements for PSPPCY014 Support policy implementation

Modification History

Supersedes and is not equivalent to PSPPCY004 Support policy implementation.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and on at least one occasion:

- consult with relevant parties on a new policy or a change in policy being implemented to confirm interpretation and reporting requirements
- adjust communication to suit different audiences
- gather and analyse policy feedback.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- practices and procedures for policy implementation
- policy feedback mechanisms including relationships to:
 - policy guidelines
 - evaluation of the effectiveness of policy implementation
 - evaluation of policy impact on organisational outcomes
 - policy developers, legislation drafters and legal advisers
- key aspects of policy frameworks including the characteristics of:
 - inward and outward facing policy
 - organisational and government policy
- current organisational policies
- government policies and international policy obligations that impact on organisational policy
- organisational and government procedures and protocols
- public sector codes of ethics and codes of conduct which have an impact on policy implementation.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Assessment must ensure access to:

- policy documents
- resources and equipment of the working environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Competency Field

Regulatory

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Determine regulatory powers.
 - 1.1. Access and use current information relating to enabling legislation and regulations.
 - 1.2. Confirm powers provided under legislation and jurisdictional parameters of those powers.
 - 1.3. Identify and confirm compliance requirements of legislation, related regulations, standards, codes of practice and policy.
 - 1.4. Identify and confirm acts and omissions that comprise non-compliance or offences under the legislation.
2. Apply enabling legislation.
 - 2.1. Identify and analyse circumstances where regulatory powers will be exercised to determine response or measures to apply.
 - 2.2. Identify circumstances requiring the exercise of regulatory powers outside own limits and refer to others in accordance with organisation policies and procedures.
 - 2.3. Identify risks associated with exercise of regulatory powers and strategies to manage risks.
 - 2.4. Apply enabling legislation consistent with defined jurisdictional parameters.
3. Identify other applicable legislation and standards.
 - 3.1. Identify other legislation and standards which impact on regulatory powers and confirm their application and requirements.
 - 3.2. Resolve or refer apparently conflicting legislative directions.
4. Work collaboratively with other organisations.
 - 4.1. Identify organisations that have jurisdictions which overlap and establish and maintain relationships.
 - 4.2. Identify organisations available to provide assistance and advice and establish relationships for mutual benefit.
 - 4.3. Follow organisational protocols and procedures when working with other organisations.
 - 4.4. Refer compliance matters to other organisations for action when required.
 - 4.5. Follow lead agency protocols and lines of authority during operations involving more than one organisation.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">• identify requirements in legislation, guidelines and policy documents• interpret complex written materials and apply them to work practices.
Oral communication skills to:	<ul style="list-style-type: none">• engage in discussion involving exchanges of often complex information.
Writing skills to:	<ul style="list-style-type: none">• complete research and analysis reports with routine information related to the work role.

Unit Mapping Information

Assessment Requirements for PSPREG033 Apply regulatory powers

Modification History

Supersedes and is not equivalent to PSPREG003 Apply regulatory powers.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify regulatory responses and measures to address three different circumstances and justify each response against legislation, regulations, guidelines and policies.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and jurisdictional laws relating to the exercise of regulatory powers including the following aspects:
 - full range of regulatory powers and the limits to those powers
 - enabling legislation
 - offences under the legislation
 - aspects of criminal law, administrative law, industrial law, contract law applicable to regulatory compliance
 - statutory time limits
 - terminology used in legislation and procedures
- organisational policies, procedures and guidelines including referral and reporting processes
- principles of evidence-based decision-making including:
 - the nature of evidence
 - methods of collection.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Assessment must ensure access to:

- legislation, jurisdictional laws and regulations relating to regulatory powers
- organisational, policies, procedures and guidelines
- resources and equipment of the working environment

- assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for PSPREG036 Act on non-compliance

Modification History

Supersedes and is not equivalent to PSPREG008 Act on non-compliance.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- attend two situations where non-compliance is suspected or alleged and for each of the situations:
 - undertake risk assessment prior to attending situation
 - apply appropriate legislation and regulatory tools to the situation
 - identify action required
 - write a report using standard format.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation and regulation that applies to non-compliance for area of jurisdiction
- organisational policies, procedures and guidelines relating to suspected or alleged non-compliance visits
- organisational parameters for decision-making
- range of appropriate actions possible for different offences
- negotiation skills in the context of achieving compliance
- awareness of social and cultural issues.

Assessment Conditions

Skills must be demonstrated in the workplace or in a simulated environment that reflects workplace conditions.

Assessment must ensure access to:

- legislation and regulation that applies to non-compliance for area of jurisdiction
- organisational policies, procedures and guidelines relating to suspected or alleged non-compliance visits
- range of actions appropriate for non-compliance under the legislation, regulations and standards for area of jurisdiction
- resources and equipment of the working environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

PUACOM012 Liaise with media at a local level

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to liaise with media at an incident and for providing information about local events. It includes determining media requirements for providing information to publicise an event.

The unit is applicable to personnel of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Communication

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Determine media requirements

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Organisational procedures are followed when liaising with the media
- 1.2 Media's potential interest is assessed and arrangements are made to meet their needs

- | | | |
|---------------------------------------|------------|---|
| | 1.3 | Operational responsibilities are balanced against provision of information to the media |
| 2 Provide information to media | 2.1 | A positive image of the organisation is maintained when liaising with the media |
| | 2.2 | Every opportunity is used to promote the organisation, its services and personnel, in accordance with organisational requirements |
| | 2.3 | Information is supplied to the media when operational situation permits |
| 3 Publicise an event | 3.1 | Relationship is established with media contacts, in accordance with organisational requirements |
| | 3.2 | Event details and support materials are gathered and presented in a logical and concise manner to the media |
| | 3.3 | Information provided to media is recorded and maintained, in accordance with organisational requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUACOM012B Liaise with media at a local level.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUACOM012 Liaise with media at a local level

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- communicating facts
- determining media requirements
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- liaising with media and other organisations
- maintaining positive image of the organisation to the media
- prioritising between operational responsibilities and provision of information to media
- providing information to the media
- publicising an event

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication techniques and skills
- media relationships
- media requirements
- operational responsibilities
- opportunities for media interest and events
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and procedures relating to media liaison
- presentation of information in a newsworthy and informative manner
- provision of relevant and succinct information
- requirements of different media
- role of media in disseminating information

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, regulations, codes of practice and operation manuals.

PUAEMR005 Treat operational risk

Modification History

Release 2. This is the second release of this unit of competency in the PUA Public Safety Training Package.

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to identify, plan and implement treatment options to reduce risk. It includes making risk decisions by identifying, assessing and implementing risk control measures, treatment options and monitoring and reviewing risk mitigation processes.

The unit applies to personnel working in a relatively simple and routine workplace in which organisational policy and procedures are used. They would normally have local supervisory and/or management responsibility and will apply appropriate solutions to a variety of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

PUAEMR006 Assess operational risk

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Make risk decisions | 1.1 Hazards are identified and risks are assessed, in accordance with operational policies and procedures |
| | 1.2 Risk that is determined as unacceptable is documented and noted for treatment |
| 2 Identify and select treatment options | 2.1 Treatment options of known risks are identified and confirmed, in accordance with organisational standards, guidelines and supervisor's guidance |
| | 2.2 Treatment options under consideration are evaluated for effectiveness within the given context |
| | 2.3 Selected treatment options are documented and communicated, in accordance with organisational policies and procedures |
| 3 Implement treatment options | 3.1 Treatment plans incorporating selected options are implemented, in accordance with organisational policies and procedures |
| | 3.2 Treatment plans are communicated within the workplace, in accordance with organisational policies and procedures |
| 4 Monitor and review risks and process | 4.1 Effectiveness and efficiency of the treatment plan is monitored, reviewed and recorded, in accordance with organisational policies and procedures, to ensure compliance and validity |
| | 4.2 Residual risk is calculated and communicated to supervisors, so that a decision can be made whether to accept the risk or re-establish the risk management process |
| | 4.3 Treatments are adjusted and communicated following the review process |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR026 Treat operational risk.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUAEMR005 Treat operational risk

Modification History

Release 2. This is the second release of this unit of competency in the PUA Public Safety Training Package.

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least three separate occasions and includes

- communicating with personnel at all levels of organisation and risk management specialists
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- implementing and monitoring designated actions
- implementing treatment options including identifying and selecting treatment options
- interpreting information and data to identify areas for improvement
- making observations and recording outcomes accurately
- managing simple project implementation
- monitoring and reviewing risks mitigation processes
- undertaking basic research to access relevant information and data
- using consultation and negotiation skills in relation to developing plans

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- duty of care
- communication techniques
- legislation including regulations, codes of practice, associated standards and guidance material
- organisational documentation, policies, procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- guidelines relevant to risk
- risk assessment including
 - benefits to individual and organisation

- cost benefits from implementation of treatment
- cost of implementing treatment option
- risk management terminology and language relevant to industry standards including
 - acceptable risk
 - residual risk
 - unacceptable risk
- specified methods or tools for use in the identification and analysis of risk
- team work principles and strategies
- techniques and methods used to identify or analyse risk management information
- techniques for giving and receiving feedback in a constructive manner
- treatment options for risks including
 - avoidance of risk
 - changing consequences of an identified hazard impact
 - changing likelihood of an initiating event or source of risk occurring
 - hazard impacting on elements at risk
 - removing a risk source
 - retaining risk based on an informed decision
 - risk mitigation
 - sharing risk
 - treatment options may
- treatment plans including
 - budgeting
 - expected outcome of treatments
 - performance measures
 - responsibilities
 - review process to be used
 - schedules

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

situations that replicate workplace conditions.

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR006 Assess operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to identify and assess risk in an operational environment. It includes establishing the risk context by identify, analysing and evaluating risk.

The unit of competency applies to personnel at a relatively simple and routine level, in which they are using established organisational policy and procedures. Personnel would normally have local supervisory or management responsibility and apply appropriate solutions to a variety of predictable problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Establish the risk context

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Risk assessment objectives and scope are identified using organisational risk management procedures, industry standards and guidelines
- 1.2** Risk criteria are identified and confirmed, in accordance with organisational policies, procedures or with

supervisor's guidance

- 1.3 Structure for planning required to conduct a risk assessment is determined
 - 1.4 Stakeholder aims and objectives are identified and recorded, in accordance with organisational procedures and guidelines
- 2 Identify risk**
 - 2.1 Sources of risk which affect the situation or objectives are identified and recorded, in consultation with stakeholders
 - 2.2 Risks are identified using a specified methodology or tool, in accordance with organisational procedures and guidelines
 - 2.3 Risk statements describing consequences are generated, in accordance with organisational procedures
- 3 Analyse risk**
 - 3.1 Risks are analysed by estimating the likelihood of consequences, in accordance with organisational procedures
 - 3.2 Levels of risk are determined, documented and communicated, in accordance with organisational policies and procedures
- 4 Evaluate risk**
 - 4.1 Levels of risks are prioritised for control, in consultation with stakeholders
 - 4.2 Risk assessment rating is compared to established risk evaluation criteria and is communicated to the supervisor
 - 4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR027 Assess operational risk.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAEMR006 Assess operational risk

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least three separate occasions and includes

- analysing organisational information and data
- communicating with stakeholders
- contributing to the assessment of resources
- establishing risk context and identifying, analysing and evaluating risk
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- interpreting information and data to identify areas for improvement
- making observations including interactions between personnel, their activities, equipment, environment and systems
- preparing detailed reports for a range of target groups including WHS/OHS or risk committee, WHS/OHS representatives, managers and supervisors
- undertaking basic research including accessing information and data
- using consultation and negotiation skills in relation to developing plans and implementing and monitoring designated actions

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of

- communication techniques including language style and active listening
- concept of duty of care in emergency risk management
- organisational documentation, policies, procedures and guidelines including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- principles of operational risk assessment
- risk management terminology and language
- risk profiles or criteria including
 - how likelihood will be defined
 - level at which risk becomes acceptable or tolerable

- nature and types of causes and consequences that can occur and how they will be measured
- risk mitigation and how level of risk is determined
- roles and responsibilities in assessing risk
- timeframes of likelihood or consequences
- views of stakeholders
- whether combinations of multiple risks should be considered and if so how and which combinations should be considered
- specified methods and tools used in the identification and analysis of risk
- structure and forms of legislation including regulations, codes of practice, industry standards and guidance material
- techniques and methods used to identify and analyse information

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAFER008 Confine small emergencies in a facility

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to confine small emergencies in a facility and it applies to occupants who are required to have first attack firefighting skills. It includes preparing for emergency situations, identifying and assessing an emergency, safely confining emergencies, using initial response equipment and reporting on the facility's emergency response.

Small emergencies in a facility include incidents such as small fires that can be controlled using a fire extinguisher; chemical spills that can be controlled using facility personal protective clothing and equipment and a spill kit; or a vehicle accident where there is no significant injury or damage.

The unit has been developed to cover the facilities as specified in Australian Standard (AS) 3745 and AS4083. For this unit, as covered by AS3745 and/or AS4083, occupants are people attending a facility on a permanent or temporary basis such as an employee, contractor, student or resident, but not a visitor or patient and a facility is a building, structure or workplace that is, or may be, occupied by people (occupants).

All aspects of the unit must be undertaken in line with legislative requirements, organisational policies and procedures, and accepted safe work practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Facility Emergency Response

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for emergency situations

1.1 Possible facility emergency situations and responses are identified by the occupant

1.2 Emergency resources are identified and their location is ascertained

1.3 Problems with emergency resources are identified and reported to relevant personnel, in accordance with the facility emergency plan

2 Identify and assess emergency

2.1 Hazards are identified and effectiveness of initial response actions are assessed

2.2 Advice in relation to the emergency is sought, in accordance with the facility emergency plan

2.3 Where initial response actions are considered unsafe or inappropriate action is taken to discontinue, in accordance with the facility emergency plan

3 Safely confine emergencies

3.1 Facility emergency is confined to the immediate area, in accordance with facility emergency response procedures

3.2 Emergency resources are used, in accordance with facility emergency response procedures and safe work practices

3.3 Emergency resources are used, in accordance with facility emergency response procedures

4 Use initial response equipment

4.1 Initial response equipment is checked to ensure its serviceability prior to use

4.2 Equipment is selected and used in response to the facility emergency

4.3 Use of equipment is coordinated with other emergency actions, in accordance with the facility emergency plan

5 Report facility emergency response

5.1 Emergency and response is documented and reported, in accordance with the facility emergency plan

5.2 Use of initial response equipment is documented and

reported, in accordance with the facility emergency plan

- 5.3 Initial response equipment is marked or positioned after use, in accordance with the facility emergency plan and a report to relevant personnel is completed to indicate if any equipment requires servicing and/or replacing

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAWER008B Confine small facility emergencies.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFER008 Confine small emergencies in a facility

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with occupants, emergency personnel and stakeholders
- complying with facility policies and procedures
- confining emergencies safely
- giving and following instructions
- identifying and acting to avoid or control any associated hazards
- identifying and assessing an emergency
- implementing facility emergency response procedures
- preparing for emergency situations
- reporting facility emergency response
- restowing initial response equipment
- using initial response equipment
- utilising risk management processes

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- actions to be followed when initial response action is not safe
- facilities and equipment that may be used safely to confine emergencies
- facility emergency plan and emergency response procedures
- initial response actions including activation of response team, activation of suppression systems, use of alerts, containment of emergency, evacuation of area, removal of occupants from danger, removal of emergency, basic aid, shut down procedures, use of containment systems and use of portable fire extinguishers, fire blankets and/or hose reels
- kinds of emergency resources
- legislation, industry standards, codes of practice and regulations
- limitations of initial response equipment, emergency control equipment or facilities

- methods of extinguishment
- organisational/facility documentation, policies and procedures
- possible hazards types of emergencies
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant activities, exercises, case studies and/or simulations
 - reflective of a range of emergency situations that may be expected in a facility
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational policies, facility emergency plan and emergency response procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR008 Operate aerial ignition equipment in an aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, operate and maintain aerial ignition equipment in an aircraft. It includes preparing aerial ignition equipment, conducting aerial ignition operations and servicing, maintaining and storing ignition equipment.

Equipment may comprise automated incendiary machines and handheld manual incendiary injection. The ignition equipment is used to drop consumables such as incendiaries from a fixed wing aircraft, helicopter or a remotely piloted aircraft as part of aerial ignition operations.

Aerial ignition equipment introduces fire into the landscape in order to ignite either prescribed burn or burning as part of a fire suppression strategy. Because of the risks involved aerial ignition must be conducted in accordance with an approved burn plan or incident action plan with the ignition sequence and intervals planned and monitored.

The unit is applicable to a person required to operate ignition equipment in a helicopter in order to ignite either a prescribed burn or burning as part of a fire suppression strategy. An incendiary operations supervisor is responsible for supervising the aerial ignition.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR017 Work safely around aircraft

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare aerial ignition equipment

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Personal protection clothing and equipment and other safety equipment is checked and worn in accordance with organisational procedures
- 1.2 Requirements for aerial ignition operations are identified and confirmed with relevant personnel
- 1.3 Activities are undertaken in accordance with standards, legislation, organisational procedures and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- 1.4 Ignition equipment and consumables to be used are confirmed
- 1.5 Ignition equipment and consumables are stored and transported in accordance with organisational procedures and regulatory requirements
- 1.6 Ignition equipment is installed in aircraft in accordance with organisational procedures and aircraft operator requirements
- 1.7 Ignition equipment is inspected and tested to ensure correct operation, where required
- 1.8 Consumables are loaded into ignition equipment in accordance with organisational procedures

2 Conduct aerial ignition operations

- 2.1 Principles of team resources management are established and maintained for aerial ignition operations
- 2.2 Briefing is received from pilot on aircraft safety including aircraft emergency procedures
- 2.3 Response procedures for emergency situations involving ignition equipment or aircraft are confirmed with pilot

and incendiary operations supervisor

- 2.4** Communication with pilot and incendiary operations supervisor is maintained to ensure aerial ignition operations achieves burn prescription
 - 2.5** Ignition equipment is operated in accordance with organisational procedures and manufacturers' specifications
 - 2.6** Adjustments to ignition equipment are undertaken, as required or requested
 - 2.7** Ignition operations are conducted in accordance with burn plan
- 3 Service, maintain and store ignition equipment**
- 3.1** Ignition equipment is isolated or shut down in accordance with organisational procedures and manufacturers' guidelines prior to departure of aircraft from ignition site
 - 3.2** Excess incendiary devices are stored or disposed of in accordance with organisational procedures
 - 3.3** Ignition equipment is serviced, maintained and repaired within scope of authority
 - 3.4** Ignition equipment faults are documented and forwarded to appropriate personnel for action
 - 3.5** Ignition equipment is stored and forwarded to appropriate personnel for maintenance

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR312 Operate aerial ignition equipment in an aircraft.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUA FIR008 Operate aerial ignition equipment in an aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- adhering to safe working practices if machine or ignition equipment malfunctions
- applying organisation procedures for aerial ignition
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including aircraft or other emergency procedures
- checking and wearing of personal protective clothing and equipment
- conducting aerial ignition operations using approved ignition equipment and consumables
- demonstrating pre-flight testing and installation, where required, of aerial ignition equipment
- operating for extended periods in an aircraft
- operating ignition equipment from an airborne aircraft
- preparing and maintaining ignition equipment
- receiving briefing from pilot on aircraft safety
- reporting equipment malfunctions, accidents and incidents
- servicing, maintaining, repairing and storing equipment and consumables
- shutting down or isolating ignition equipment
- using communications equipment
- using ignition equipment
- working as a member of a team.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aircraft operator's policy and procedures for aerial ignition
- aircraft safety and emergency procedures
- characteristics and limitations of ignition equipment and consumables
- consumables such as capsules containing potassium permanganate and ethylene glycol (antifreeze)
- emergency procedures for equipment malfunction
- guidelines relating to safe use of ignition equipment used by organisation

- mechanical knowledge sufficient to service, maintain and repair aerial ignition equipment
- methods for disposal of excess consumables
- organisational policies and procedures for aerial ignition
- personal protection clothing and equipment for operating the aerial ignition equipment
- requirements for packing and transporting aerial ignition equipment and consumables
- risk mitigation and hazard identification
- roles and responsibilities of team involved in aerial ignition operations
- Team Resources Management (TRM) principles
- types and applications of aerial ignition equipment
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions. Assessment will take place in a simulated environment followed by an assessment by an accredited operator on the job.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of exercises, case studies and/or simulations
- appropriate materials, equipment and tools currently used in industry including
 - aerial ignition equipment and consumables
 - an aircraft
 - an area to conduct operations
 - personal protective clothing and equipment and relevant safety equipment
 - safe disposal facilities
 - suitable tools for testing, maintenance and inspection of equipment
 - transport of consumables and ignition equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR017 Work safely around aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply safe work practices when working around aircraft for organisational operations. It includes working safely in or around aircraft and facilitating safe ground support.

The unit is applicable to the provision of introductory training for personnel providing support services for aerial operations, noting that personnel undertaking specialist functions such as aircraft marshalling, aircraft refuelling, fire suppressant mixing and loading and ground-to-air radio communications will require further training. It also applies to the provision of safety training for operational personnel who may be required to utilise aircraft or work in the vicinity of aircraft in the performance of their work tasks and/or the provision of foundation training for all aviation related roles for fire, land management and emergency management.

Work is performed independently or under limited supervision as a single operator or within a team environment.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Work safely in and around aircraft

- 1.1 Site and job hazards are identified, risks are assessed and control measures are implemented
- 1.2 Personal protective clothing and equipment is worn and used correctly in accordance with organisational procedures
- 1.3 Appropriate clearances and permissions, where required, are obtained and procedures are adhered to whilst operating in aircraft movement areas
- 1.4 Any approach to an operating aircraft is made from an angle visible to the pilot or air crew and with approval of the pilot or air crew
- 1.5 Adequate clearance is maintained from propellers, rotors, engines, exhaust gases and engine intakes
- 1.6 Typical manoeuvring patterns of aircraft are anticipated and a safe distance is maintained
- 1.7 Instructions or signals from pilots or staff controlling aircraft are complied with in accordance with organisational procedures

2 Facilitate safe ground support

- 2.1 Briefing on safety and tasks are received and acknowledged from task supervisor
- 2.2 Appropriate approvals and precautions are observed when positioning vehicles or equipment close to aircraft
- 2.3 Instructions from pilots and/or authorised air crew coordinating aircraft operations are followed
- 2.4 Aircraft loading and other activities relating to the aircraft, where required, are conducted under pilot or authorised air crew supervision
- 2.5 Aircraft hazards and equipment defects are reported to pilot or approved task supervisor
- 2.6 Compliance is maintained around aircraft in accordance with air base regulations

- 2.7 Accidents are identified and reported to pilot and/or task supervisor
- 2.8 Directions from pilot or air crew are followed during an emergency

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR209 Work safely around aircraft.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUAFIR017 Work safely around aircraft

Modification History

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- complying with regulatory requirements and organisational procedures
- ensuring safety and quality procedures are applied
- following directions from pilot or air crew during an emergency
- identifying hazards and risks and acting to minimise, mitigate, control or eliminate
- implementing precautions and aviation emergency procedures, as required
- participating in briefings
- reporting accidents
- using personal protective clothing and equipment
- working safely around aircraft.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- actions to be taken in the event of an emergency
- air base site hazards
- airbase access and security requirements
- airbase layout, facilities and services including working zones and lighting facilities
- aircraft design features including 'no step' places
- aircraft features and movement characteristics
- aircraft operations including loading and refuelling precautions
- content of briefings
- correct selection, fitting and wearing of personal protective clothing and equipment for tasks to be performed
- hazards of working around aircraft
- organisational policies and procedures including safe work practices around aircraft
- risk identification and mitigation processes

- roles and responsibilities of personnel supervising, managing and supporting aircraft operations
- safety equipment including fire extinguisher and first aid kit
- types of aircraft which may include but is not limited to aeroplanes, helicopters, remotely piloted aircraft and their movement characteristics
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAFIR203 Respond to urban fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to an urban fire where offensive and defensive strategies are used. It includes proceeding to a fire, preparing extinguishing media and/or equipment for use, entering a structure, conducting search and rescues and combatting fires.

The unit applies to firefighting personnel who work as a member of a team, under direct supervision. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR207 Operate breathing apparatus open circuit

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1 Proceed to fire	1.1 Information received about the location and type of fire is confirmed
	1.2 Appropriate personal protective clothing and equipment is donned, in accordance with organisational procedures
	1.3 Most effective route to the fire is identified and navigated safely
2 Prepare extinguishing media and/or equipment for use	2.1 Water supplies at the incident to support firefighting are located
	2.2 Equipment to access and supply water to firefighting operations are identified and assembled, in accordance with organisational procedures
	2.3 Nominated extinguishing media and/or equipment is identified, obtained and accessed
	2.4 Extinguishing media and equipment are used, in accordance with manufacturers' specifications and organisational procedures
3 Enter the structure	3.1 Hazards are identified, monitored and controlled, in accordance with organisational procedures
	3.2 Personal protective clothing and equipment selected is appropriate to the hazards
	3.3 Organisational breathing apparatus procedures and safe work practices are followed
	3.4 Structure is entered, in accordance with organisational procedures and safety practices
	3.5 Safe paths of access and egress are identified and maintained throughout the incident
	3.6 Life is protected and damage to property and the environment is minimised, in accordance with organisational procedures
4 Conduct search and rescue	4.1 Systematic primary and secondary searches are conducted
	4.2 Rooms are searched and marked, in accordance with organisational procedures

- 4.3 Casualties are located, assisted and rescued, in accordance with organisational procedures
 - 4.4 Fatalities are located and protected, in accordance with organisational procedures and relevant legislation
 - 4.5 All persons are accounted for and information is reported utilising the organisations chain of command.
- 5 Combat fires**
 - 5.1 Personal safety is maintained, in accordance with organisational procedures and workplace health and safety guidelines
 - 5.2 Organisational firefighting objectives, strategies and tactics are received, confirmed and implemented as directed
 - 5.3 Firefighting considerations are taken into account when implementing firefighting tactics
 - 5.4 Equipment and extinguishing media used to combat the fire are appropriate to the class of fire and support firefighting requirements
 - 5.5 Firefighting equipment is positioned to achieve maximum effect in suppressing the fire, protecting exposures and preserving evidence of fire cause
 - 5.6 Extinguishing media is applied using appropriate application techniques
 - 5.7 Fire suppression techniques are applied to minimise hazards to occupants trapped or lost within the structure
 - 5.8 Communication with team members and the supervisor are maintained throughout the incident
- 6 Observe and react to changes in conditions and fire behaviour**
 - 6.1 Changing conditions at the fire are observed and their effects on fire behaviour are noted and reported
 - 6.2 Evidence of changing conditions at the fire are reported
 - 6.3 Firefighting tactics are adapted to meet changing conditions and fire behaviour
- 7 Participate in ancillary operations**
 - 7.1 Ancillary activities to complement firefighting operations and prevent further damage to the structure and its contents are undertaken

- | | |
|---|---|
| 8 Conclude firefighting operations | <p>7.2 Water runoff from the fire is monitored and conditions are reported</p> <p>7.3 Damage to the environment at the incident is minimised through appropriate firefighting and ancillary activities</p> <p>8.1 Firefighting equipment is collected and stowed at the incident</p> <p>8.2 Incident scene is made safe for the public</p> <p>8.3 Defective or missing equipment is identified and reported</p> <p>8.4 Incident information is record and completed, in accordance with organisational procedures</p> |
|---|---|

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

types of fire must include

- fires involving dangerous goods and/or hazardous substances
- mobile property
- non-structures
- structures

personal protective clothing and equipment must include

- breathing apparatus
- eye protection
- hearing protection
- turnout uniform and gloves

water supplies must include

- open
- reticulated
- static

equipment must include

- and may also include other extinguishing substances
- BA and control equipment
- branches, nozzles and monitors

- extinguishing media must include:
- fire extinguishers
 - forcible entry tools
 - hoses and hose fittings
 - ladders and rope lines
 - portable lights
 - radios
 - salvage gear
 - small gear and ancillary equipment
 - standpipes, hydrants and booster connections
- extinguishing media must include:
- extinguishing powder
 - foam
 - gaseous extinguishing agents
 - water
- hazards must include three or more of the following:
- electricity, including photovoltaic generation
 - gas
 - hazardous products and materials
 - industrial (machinery, equipment and products)
 - smoke, darkness and heat
 - structural collapse
 - structural hazards
 - unauthorised personnel
- assisted must include
- first aid
 - handing over to ambulance, medical or other organisational care
 - protecting from the elements
 - providing refreshments
- firefighting objectives must include
- confining the spread of fire
 - extinguishment
 - protecting exposures
 - rescuing occupants
 - salvage and overhaul
 - ventilation
- fire strategies must include
- defensive mode
 - direct attack
 - indirect attack
 - offensive mode
- firefighting tactics must include
- cooling the fuels
 - excluding oxygen
 - interrupting the chemical chain reaction
 - removing fuels

firefighting considerations must include

- ventilation
- available firefighting resources
- extinguishing media
- fire exposures
- indications of extreme fire behaviour
- signs of structural collapse
- size of fire
- stage of fire development
- topography
- type of fire
- weather

firefighting activities must include

- anticipating fire behaviour
- applying extinguishing media
- applying techniques to maximise effect and minimise damage
- ensuring safety
- hose stream techniques
- locating and accessing fire
- protecting and notifying supervisor of evidence of fire cause
- search and rescue

changing conditions at the fire must include

- fire spread
- flame colour and size
- impending structural collapse
- increase in heat
- increase or decrease in fuel available to fire
- increase or decrease in heat of fire
- increase or decrease in oxygen available to fire
- other materials becoming involved in fire
- signs of structural collapse
- smoke colour
- weather conditions

evidence of changing conditions at the fire must include

- fire spread
- flame colour and size
- impending structural collapse
- increase in heat
- smoke colour
- weather conditions

ancillary activities must include

- damming water run off
- guarding against hazards
- making up equipment

recording appropriate incident information must include

- overhaul
- salvage
- securing the area
- attendance records
- completing personal notebooks logs and/or report forms
- equipment used
- objectives set
- obtain relevant details
- owner or occupant details
- problems encountered

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR203B Respond to urban fire.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR203 Respond to urban fire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including maintaining the health and safety of self and others
- combating fires through implementing firefighting objectives, strategies and tactics
- concluding firefighting operations
- conducting search and rescue
- controlling fire environment by cooling fire gases
- entering structures affected by fire
- identifying hazardous materials
- instigating actions to avoid risk of injury
- moving in smoke and darkness
- observing and reacting to changes in conditions and fire behaviour
- obtaining water from reticulated or static water supplies
- operating a firefighting branch
- operating fire extinguishers
- participating in ancillary operations
- preparing extinguishing media and equipment for use
- proceeding to a fire
- recording incident information
- selecting and using firefighting equipment
- using extinguishing media on a fire
- using personal protective clothing and equipment
- using structural entry techniques
- utilising breathing apparatus, associated equipment and operational procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- ancillary activities
- basic signs of fire cause and activities for protecting evidence
- behaviour of a building or structure in a fire
- chain of command
- change in conditions at a fire caused by increase or decrease in
 - fuel available to fire
 - increase or decrease of oxygen available to fire
- different construction types and their behaviour in a fire
- equipment and tools used in fire suppression activities extinguishing media
- fire behaviour
- fire ground signals including audible and visual
- fire tetrahedron
- firefighting foams
- firefighting tasks, tactics and techniques
- hazardous materials identification
- hazards and actions to minimise, mitigate, control or eliminate
- identification of various building types including structural elements and materials, causes and signs of structural failure
- methods of heat transfer
- natural ventilation procedures
- navigation and map reading
- organisational documentation, policies and procedures including procedures for working with ladders, ropes, lines and tying knots
- portable fire extinguishers
- principles and methods of extinguishment
- salvage and overhaul
- signs of structural collapse
- water supplies
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety assessments and/or risk mitigation processes, safe work practices and personal protective clothing and equipment

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situation that reflects workplace conditions.

Competency should be assessed on the job and/or in a range of simulated fire environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- a relevant appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - range of controlled or simulated fires, firefighting equipment, extinguishing media and breathing apparatus and associated equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to respond to a wildfire, work as a safe and situationally aware member of a crew to attack and extinguish a fire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to firefighting personnel who work as a member of a team. It includes preparing to respond to fire; proceeding to fire; obtaining and using firefighting equipment and extinguishing media; combating wildfire; observing and reacting to wildfire and weather conditions; participating in mop up and patrol activities; supporting operations and recovering and storing equipment. Work at this level is undertaken under direct supervision, and with instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR210 Prevent injury

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to respond to fire

- 1.1 Information received about the location and type of wildfire is confirmed
- 1.2 Most effective route to the fire is identified and navigated safely
- 1.3 Appropriate personal protective clothing and equipment is donned, in accordance with organisational procedures

2 Proceed to fire

- 2.1 Location of the fire and type of fuel is confirmed on approach
- 2.2 Life is protected and damage to property and the environment is minimised, in accordance with organisational procedures
- 2.3 Evidence relevant to fire cause is noted and reported utilising the organisations chain of command, in accordance with organisational procedures
- 2.4 Indicators of fire behaviour are observed and reported

3 Obtain and use firefighting equipment and extinguishing media

- 3.1 Nominated extinguishing media and/or firefighting equipment are located and obtained
- 3.2 Extinguishing media and equipment are used, in accordance with manufacturers' specifications and organisational procedures

4 Combat wildfire

- 4.1 Instructions are received, firefighting strategies and tactics are confirmed and implemented
- 4.2 Suppression techniques, equipment and extinguishing media appropriate to wildfire conditions are used
- 4.3 Control lines are prepared as directed
- 4.4 Equipment is positioned, made ready for use and protected from damage
- 4.5 Fire is attacked taking into account wildfire hazards as directed

- 4.6** Evidence of fire cause and area of fire origin are protected
- 4.7** Communication is maintained at all times with all personnel
- 5 Observe and react to wildfire and weather conditions**
 - 5.1** Changing conditions at the fire are observed and their effects on fire behaviour are noted and reported
 - 5.2** Weather conditions and changes to fire behaviour are observed and reported
 - 5.3** Variations in topography, fuel features and fuel arrangements are observed and reported
 - 5.4** Escape routes and safety zones are confirmed and maintained throughout the incident
 - 5.5** Communication is maintained with other firefighting personnel throughout operational activities
- 6 Participate in mop up and patrol activities and support operations**
 - 6.1** Mopping up activities are carried out, as directed
 - 6.2** Patrol of the perimeter or sector of the fire is maintained, as directed
 - 6.3** Activities to support firefighting operations are carried out, as directed
- 7 Recover and store equipment**
 - 7.1** Equipment and consumables are recovered, as directed
 - 7.2** Firefighting equipment is collected and stored at the incident
 - 7.3** Cleaning and maintenance are carried out in accordance with organisational procedures
 - 7.4** Damaged or lost equipment is identified and reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

extinguishing media must include two of the following

- class A foam
- retardants
- soil
- water
- wetting agents

personal protective clothing and equipment must include

- eye and head protection
- turnout uniform and gloves

types of wildfire must include

- surface

types of fuel must include one of the following

- forest
- grass
- scrub

firefighting equipment must include

- hand tools
- hose and small gear
- pump
- tanker

firefighting tactics must include

- control line construction
- mopping up
- patrol
- use of extinguishing media

suppression techniques must include

- dry and wet firefighting

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR204B Respond to wildfire.

Assessment Requirements for PUAFIR204 Respond to wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- combating wildfires
- communicating on the fire ground using a range of tools
- detecting hot spots, hazardous trees, unsecured wildfire perimeter
- maintaining situational awareness
- maintaining health and safety of self and others in work area
- observing and reacting to wildfire and weather conditions
- obtaining and using firefighting equipment and extinguishing media
- participating in mop ups, patrol activities and support operations
- participating in entrapment safety procedures
- preparing to respond to a fire
- proceeding to a fire
- reacting to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- recovering, reinstating and storing equipment
- undertaking dry and wet wildfire attack
- undertaking operational activities safely, in accordance with organisational procedures
- using extinguishing media in wildfire control
- using wildfire control tools and equipment
- working with firefighting equipment
- working as a member of a team

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- communication on the fire ground using radio and telephone

- consumables including flagging tape, fuel, rubbish and signs
- extinguishing media, water, foam and suppressants
- escape routes including prepared tracks, roads, trails and waterways
- earth moving equipment such as bulldozers, graders and tractors with blades
- equipment for firefighting including chainsaw, ropes and lines, drip torch and knap sack
- evidence related to fire cause including fresh vehicle tracks, items or objects at scene, nature and behaviour of fire at the scene upon arrival, nature and colour of smoke and number of columns, people and vehicles leaving the scene and whether gates on access routes to the fire were closed, opened or locked
- fire behaviour
- fuel features including arrangement and distribution, moisture content, quantity, size and type
- indicators of fire behaviour including flame height and length, noise, rate of spread, smoke colour and density, spotting and extreme fire behaviour
- organisational documentation, policies and operating procedures
- safety zones including bare ground, burnt areas, clearings, rivers and site of recent wildfire or prescribed burn, static water bodies and defendable space
- support operations including providing and transporting food, water and equipment
- tactics for firefighting including backburning, burning out and patrol
- types of wildfire including crown and ground
- types of fuel including crop, heath, peat, coal, combustible soils and plantation
- strategies for firefighting including defensive, direct and indirect attack, offensive and parallel attack
- variations in topography including aspect, elevation, landscape features and slope
- weather conditions including atmospheric stability, relative humidity, temperature and variations to wind speed and direction
- wildfire control tactics and techniques
- wildfire hazards
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including health and fitness requirements, hygiene and wellbeing, safe work practices, safety assessments and risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that

reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR207 Operate breathing apparatus open circuit

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to select, don, operate and maintain breathing apparatus equipment in a hazardous atmosphere. It includes conducting pre-donning checks and tests of breathing apparatus; donning and checking of breathing apparatus; operating breathing apparatus and concluding breathing apparatus operations.

The unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct pre-donning checks and tests on breathing apparatus

1.1 Breathing apparatus is inspected for immediate use, in accordance with the organisational procedures

1.2 Faulty or damaged equipment is reported and recorded, in accordance with the organisational procedures

2 Don and check breathing apparatus

2.1 Breathing apparatus is donned, in accordance with the organisational procedures

2.2 Breathing apparatus is started and checked, in accordance with organisational procedures

2.3 Ancillary equipment required for tasks is selected for use

3 Operate breathing apparatus

3.1 Hazards are identified, monitored and controlled, in accordance with the organisational procedures

3.2 Communication is established and maintained with team members and other appropriate personnel throughout activity

3.3 Response activities are undertaken as a member of a team, demonstrating effective application of breathing apparatus, in accordance with the organisational procedures

3.4 Breathing apparatus control procedures are followed, in accordance with the organisational procedures

3.5 Entrapment procedures are implemented, in accordance with the organisational procedures

3.6 Personal safety is maintained, in accordance with organisational procedures

4 Conclude operations

4.1 Breathing apparatus set is shut down, in accordance with organisational procedures

4.2 Breathing apparatus set is removed, in accordance with organisational procedures

4.3 Cleaning and maintenance of breathing apparatus is

undertaken, in accordance with organisational procedures

4.4 Equipment is made ready for operational use, in accordance with organisational procedures

4.5 Participating in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- conducting pre-donning checks and tests on breathing apparatus
- donning and checking breathing apparatus
- following organisational policies and procedures including implementing entrapment and breathing apparatus emergency procedures
- inspecting breathing apparatus after its use
- inspecting breathing apparatus and concluding breathing apparatus operations
- moving in conditions of reduced visibility
- operating breathing apparatus
- participating in debriefing sessions
- returning breathing apparatus to operational status
- complying with organisational procedures for breathing apparatus use and maintenance

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- characteristics, component parts, operation of compressed air breathing apparatus
- how breathing apparatus supports personal protection
- industry standards for breathing apparatus
- operation of breathing apparatus
- operational testing, operating procedures and safe work practices when wearing breathing apparatus

- organisational documentation, policies and procedures including entrapment procedures
- performance of breathing apparatus control equipment
- personal protective clothing and equipment
- respiratory system and effects of hazardous atmospheres on the body
- types of hazardous atmospheres including heated, smoke or other suspended particles
- use of personal lines and tallies
- utilisation of distress signal unit
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safety assessments and risk mitigation

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - range of controlled or simulated scenarios, breathing apparatus and associated equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to identify and avoid workplace hazards and risks, to maintain personal safety and to report identified issues to supervisors and team members.

It is designed as an introduction to safe work practices and is specifically relevant to a workplace requiring personnel to be involved in incidents, prescribed burns and/or operational aspects of emergency management. It includes identifying, implementing and monitoring effectiveness of workplace hazards and risk control procedures.

The unit applies to personnel who work as a member of a team. Work at this level is undertaken under direct supervision and instruction.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

outcomes.

demonstrate achievement of the element.

1 Identify workplace hazards and risks, and advise others

- 1.1 Procedures and practices are followed to identify hazards and risks in the workplace
- 1.2 Identified hazards and risks in the work area are communicated to team members and supervisors
- 1.3 Identified risk factors which may create or escalate the immediate risk to life, property or the environment are reported, in accordance with organisational procedures

2 Implement hazard and risk control procedures

- 2.1 Personal protective clothing and equipment is selected and donned, in accordance with organisational procedures
- 2.2 Hazard identification and risks controls are implemented, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines and organisational procedures
- 2.3 Equipment appropriate for dealing with a hazard is selected for use and checked, in accordance with organisational procedures
- 2.4 Personal health and welfare is managed, in accordance with organisational policy

3 Monitor effectiveness of hazard and risk control procedures

- 3.1 Situation awareness is maintained to ensure the continued effectiveness of hazard and risk control procedures
- 3.2 Changes in incident behaviour and conditions are reported immediately through the chain of command, in accordance with organisational procedures
- 3.3 Activities and debriefings regarding hazard and risk control procedures are participated in, as appropriate

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for PUA FIR210 Prevent injury

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying safe work practices in accordance with organisational Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) policies and procedures
- identifying hazards and using risk control measures
- identifying workplace hazards and risks and advising others
- implementing hazard and risk control procedures
- monitoring effectiveness of hazard and risk control procedures
- selecting equipment pertinent to incidents, prescribed burning and/or operational aspects of emergency management
- working with organisational procedures including the selection and use of personal protective equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- basic principles of a dynamic risk assessment and safe person approach
- hazards, including heat illness, fire, structural, aerial operations, hazardous materials and vehicles
- methods of hazard identification, risk control reporting and debriefing
- organisational documentation, policies and procedures for hazard and risk management
- personal protective clothing and equipment requirements
- risks to life, community, property and the environment
- situational awareness actions that support safety in the work place
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including occupational hazards and risks encountered in the workplace, safety assessments, risk mitigation processes and risk control measures such as eliminate, isolate and substitute

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR302 Suppress urban fire

Modification History

Release 2. Updated superseded HLT Pre-requisite unit.

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to work as a member of a team under limited supervision when suppressing an urban fire. It includes responding to fires and determining extinguishing media, equipment and structural fire behaviour. It also includes protecting people; how to attack fires, ventilate structures, observe and react to fire conditions; undertake ancillary firefighting operations and complete operations.

The unit applies to personnel required to suppress a range of different types of structure and non-structure fires where there is the potential for multiple hazards to be present.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

HLTAID011 Provide First Aid

PUAFIR203 Respond to urban fire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Initiate response to fire

- 1.1 Fire details are received and initial response is determined, in accordance with organisational procedures
- 1.2 Firefighting personal protective clothing and equipment requirements are determined and used, based on available information
- 1.3 Changes to fire conditions are reported and acted on to determine firefighting tactics
- 1.4 Firefighting considerations are taken into account when determining tactics

2 Determine extinguishing media and equipment

- 2.1 Available static or reticulated water supplies to support firefighting operations are identified and capacity is determined
- 2.2 Selection of hose and equipment is sufficient to support firefighting operations
- 2.3 Extinguishing media are selected, in accordance with the type of fire within the area of operation
- 2.4 Breathing apparatus is used within its' safe work limitations, in accordance with manufacturers' specifications and organisational procedures

3 Determine structural fire behaviour

- 3.1 Combustion processes taking place in the structure are determined
- 3.2 Tactics for terminating combustion processes are determined
- 3.3 Presence of hazardous materials located in the fire area are identified and an appropriate plan of action is determined

4 Protect people

- 4.1 Primary and secondary searches are planned, conducted and supported, in accordance with organisational procedures
- 4.2 Appropriate priority and support is allocated to fire

rescue and evacuation activities

4.3 Casualties are treated and/or handed into the care of medical personnel once clear of threat of fire

5 Attack fire

5.1 Firefighting strategies and tactics are prioritised, implemented and monitored, in accordance with organisational procedures

5.2 Firefighting extinguishing media are selected, in accordance with the type of fire and the actual or potential hazards identified within the area of operations

5.3 Fire is located and access is gained in the safest and most effective manner to minimise damage to property or the risk of injury to others or self, in accordance with organisational procedures

5.4 Potential fire behaviour is anticipated and action is taken to protect the safety of self and others and to achieve determined strategies

5.5 Breathing apparatus procedures are complied with, in accordance with organisational requirements

5.6 Fire is attacked using a range of extinguishing media and application techniques appropriate to type and size of fire, in accordance with manufacturers' specifications and organisational procedures

5.7 Evidence of fire cause is protected and action is taken, in accordance with organisational procedures

5.8 Firefighting suppression activities, including extinguishing media, are used to contain spread of fire and damage to the environment and property

5.9 Burning and smouldering materials are identified and extinguished, in accordance with organisational requirements

5.10 Communication is maintained and monitored throughout firefighting operations, in accordance with organisational procedures

5.11 Firefighting ancillary activities are undertaken to avoid or minimise risk of environmental damage

6 Ventilate structure

6.1 Structures are ventilated, as required, using the most appropriate natural and mechanical ventilation

		techniques, in accordance with organisational procedures
	6.2	Structures are ventilated without endangering personnel or increasing the spread of fire, in accordance with organisational procedures
7 Observe and react to fire conditions	7.1	Fire is continually monitored and significant changes affecting the status of the fire and effectiveness of selected firefighting strategies are reported, in accordance with organisational procedures
	7.2	Firefighting strategies and tactics are modified and adjusted, in accordance with organisational procedures, the changing conditions at the fire or as directed
8 Undertake ancillary firefighting operations	8.1	Firefighting and ancillary activities undertaken at the incident ensure that the risk of injury to the public, other personnel and self is avoid or minimised
	8.2	Salvage and overhaul activities are undertaken to support the conclusion of firefighting operations, in accordance with organisational procedures
9 Complete operations	9.1	Equipment is made ready for operational use, in accordance with organisational procedures
	9.2	Damaged or missing equipment is replaced, recorded and/or reported, in accordance with organisational procedures
	9.3	Participate in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

fire must include

- fires involving electricity
- industrial complex
- mobile property fires

personal protective clothing and equipment must include	<ul style="list-style-type: none">• multi-storey structures• structure and non-structure fires which may also include<ul style="list-style-type: none">• fires involving fuels and chemicals• ship fires• breathing apparatus• distress alarms• structural fire protective clothing
reporting of changes to fire condition must include	<ul style="list-style-type: none">• initial reports at scene• reports of achievement during firefighting e.g. completion of rescue and fire under control etc.• reports of significant changes in conditions• Situation Reports (SITREPS)
equipment must include	<ul style="list-style-type: none">• branches/nozzles• breathing apparatus and control equipment• fire extinguishers• forcible entry tools• hand tools• hoses and hose fittings• ladders and rope lines• portable lighting• radios• salvage gear• small gear and ancillary equipment• stand pipes, hydrants and booster connections• ventilation equipment
extinguishing media must include	<ul style="list-style-type: none">• extinguishing powders• foams• gaseous extinguishing agents• water
firefighting strategies must include	<ul style="list-style-type: none">• confining the spread of fire• extinguishment• protecting exposures• protection of area of fire origin and evidence of cause• rescuing occupants• salvage and overhaul
access must include	<ul style="list-style-type: none">• forcible entry• normal entry• roof access from ladders and/or aerial

- application techniques must include
- appliance
 - defensive mode
 - direct attack
 - direction of attack
 - indirect attack
 - offensive mode
- ancillary activities must include three or more of the following
- damming and/or draining water runoff
 - guarding against hazards
 - making up equipment
 - overhaul
 - protecting the ignition site
 - salvage
 - securing the area
 - supply of materials
- structures to be ventilated must include
- commercial
 - high rise buildings
 - mobile structures i.e. road, rail, aviation and marine vehicles
 - multi-storey
 - residential

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR302B Suppress urban fire.

Assessment Requirements for PUAFIR302 Suppress urban fire

Modification History

Release 2. Updated superseded HLT Pre-requisite unit.

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- attacking fires
- completing operations
- controlling fire environment by cooling fire gases
- determining extinguishing media and equipment
- firefighting tactics including cooling the fuels, interrupting the chemical chain reaction, removing fuels, excluding oxygen and ventilation
- firefighting suppression activities including locating and accessing the fire, search and rescue, anticipation of fire behaviour, ensuring safety, applying extinguishing media, applying techniques to maximise the effect and minimise the damage and identifying and protecting area of fire origin and evidence of cause
- initiating response to fire
- observing and reacting to fire conditions whilst maintaining situational awareness
- operating breathing apparatus
- operating firefighting equipment
- participating as a firefighting team member
- performing ancillary firefighting operations
- protecting people
- recognising fire behaviour indicators
- undertaking salvage and overhaul
- using natural and mechanical ventilation techniques
- utilising firefighting strategies and tactics for rescue, exposures, confinement, extinguishment, overhaul, ventilation and salvage
- working with a range of extinguishing media

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the

requirements of the elements, performance criteria and range of conditions and includes knowledge of

- combustion processes including spontaneous heating combustion and ignition
- damage to the environment from fire suppression activities including air pollution, hazards to flora and fauna, soil and water pollution
- structural fire behaviour and factors which impact on spread
- fire behaviour indicators
- firefighting tactics including cooling fuels, interrupting chemical chain reaction, removing fuels, excluding oxygen and ventilation
- firefighting considerations including available firefighting resources, extinguishing media, fire exposures, signs of structural collapse, size of fire, topography, type of fire and weather
- hazardous materials including those defined by the Australian Dangerous Goods Code and other fire extinguishing substances
- organisational documentation, policies and procedures including reporting and recording incident details and breathing apparatus control procedures
- personal protective clothing and equipment requirements including breathing apparatus
- purpose of ventilation techniques including assisting in fire suppression activities, facilitating evacuation of occupants, maximising visibility within a structure, minimising damage, preventing build up of toxic or explosive atmospheres and providing clean air
- strategies and methods of attack for extinguishing fires in a range of structures
- types of media for firefighting and their suitability for different classes of fire
- use of firefighting equipment and application of techniques
- ventilation techniques including horizontal, hydraulic, mechanical, natural and vertical
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed on the job or in a simulated environment.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations

- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - firefighting equipment, breathing apparatus, control equipment and extinguishing media
 - firefighting, ventilation and salvage equipment
 - range of controlled or simulated fires
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work as a member of a crew to apply appropriate fire control strategies and safe work practices to extinguish a wildfire, participate in mop ups and patrol operations and prepare equipment for the next crew.

The unit applies to personnel who work as a member of a crew or team. Work at this level is often undertaken without direct supervision and instruction. There may be some level of supervision of other members of the crew at this level.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

demonstrate achievement of the element.

- | | |
|---|--|
| 1 Receive and report details of wildfire | 1.1 Details of the wildfire including location, type, behaviour and developments are received and recorded |
| | 1.2 Fire details are reported, in accordance with organisational requirements |
| 2 Prepare to respond to fire | 2.1 Location of wildfire is confirmed and safest access route is determined |
| | 2.2 Personal protective clothing and equipment, apparel, food and water are obtained before departure, in accordance with organisational requirements |
| | 2.3 Most appropriate appliance or vehicle is selected and used |
| 3 Proceed to fire | 3.1 Location of wildfire is confirmed by observation or from instructions while on approach |
| | 3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or environmentally sensitive areas |
| | 3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of appropriate authorities |
| | 3.4 Navigational aids are used for planning and operational purposes |
| | 3.5 Notification of arrival and appropriate report is provided |
| 4 Protect people and assets | 4.1 As far as conditions allow the number, location and safety of people and assets in the threatened area is determined and assessed |
| | 4.2 Appropriate protective procedures are implemented, under direction, to protect persons in the path of a wildfire |
| | 4.3 Access by the public and personnel to hazardous locations is controlled, as directed, in accordance with organisational procedures |
| | 4.4 Defensibility of property and assets is considered and, if appropriate, assistance is provided to help occupiers |
| | 4.5 Safety of people and assets in the threatened area is |

- monitored
- 4.6** Safety of people and security of assets in the area is checked and reported after the fire
- 5 Combat wildfire**
- 5.1** Briefing is received including area of operations, strategies and tactics to be employed
- 5.2** Escape routes and safety zones are confirmed and communicated to personnel
- 5.3** Firefighting media and equipment are selected and used in accordance with organisational procedures
- 5.4** Fire hazards are identified and action is taken to minimise the risks of injury to the public, personnel and self
- 5.5** Firefighting strategies and tactics are implemented to achieve objectives and to minimise overall damage and impact on assets and the environment
- 5.6** Fuel, weather and topographical factors are observed and potential fire behaviour is anticipated and acted upon to ensure safety
- 5.7** Communication is maintained with supervisor through the chain of command and with other firefighters in the work area
- 5.8** Fire control activities are undertaken to minimise overall damage and impact on assets and the environment
- 5.9** Potential fire behaviour is considered and acted upon to ensure safety and achievement of objectives
- 5.10** Fire reports are provided to supervisor, as required
- 5.11** Area of origin and evidence of fire cause are protected and brought to the attention of supervisor or relevant authority, in accordance with organisational procedures
- 6 Conduct mop up and patrol activities**
- 6.1** Mop up activities are carried out, in accordance with organisational procedures
- 6.2** Patrol of the fire is maintained
- 7 Recover and maintain equipment**
- 7.1** Equipment is made ready for operational use, in accordance with organisational procedures

- 7.2 Damaged or missing equipment is replaced, recorded and/or reported, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for PUAFIR303 Suppress wildfire

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- anticipating and reacting to changing wildfire behaviour
- applying Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assessing risk to life, property and the environment
- contributing to the implementation of firefighting strategies
- combating wildfires, performing firefighting tactics, and using firefighting equipment and extinguishing media
- communicating and working with team members
- conducting mop ups and patrol activities
- detecting hot spots and hazardous trees
- implementing and monitoring firefighting strategies and tactics
- interpreting fire weather, fuels and terrain and predicting likely impact on fire behaviour
- maintaining safety and health of self, other workers and people in a wildfire area
- participating in briefings and confirming instructions
- preparing to respond to wildfires, using navigation equipment
- proceeding to wildfires
- receiving, recording and reporting information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- crew protective procedures
- access to wildfires
- recognition of environmentally sensitive areas and actions to minimise damage
- escape routes including prepared tracks, roads, trails and waterways
- fire behaviour and its response to different fuels, topography and weather conditions
- fire cause

- fireground hazards
- fire report requirements
- fuel types and factors that impact fire development
- media and equipment for firefighting
- means of transport to fire ground
- navigational aids including aerial photographs, compass, global positioning systems and maps
- organisational documentation, policies and procedures
- potential fire behaviour including fire development, flame height and intensity, fuel load and arrangement, rate of speed, spotting, change due to terrain, topography, changes due to weather conditions, winds and fire winds.
- protective procedures including alerts and warnings, insitu protection and relocation
- safety zones including bare ground, burnt areas, clearings, rivers, site of recent wildfire or prescribed burns and static water bodies
- strategies for firefighting including offensive strategies including direct attack, indirect attack, parallel attack and combined attack and defensive strategies including community and asset protection
- tactics for firefighting including back burning and burning out, control line construction - hand and machine and direct suppression and extinguishment
- tasks for firefighting including application of firefighting media, control line construction, mopping up and patrol
- topographical factors that affect fire development
- types of fires including crown, ground and surface
- types of assets that require protection
- weather factors that influence fire development
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safety near vehicles and machines

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - access to wildfire or prescribed burns and/or approved field based environment
 - firefighting equipment and extinguishing media
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR310 Operate specialist appliance

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to operate a specialist appliance at an incident.

A specialist appliance is a vehicle designed for a specific purpose which may include hazardous materials response, mobile communication, heavy rescue, salvage or specialist mechanical support.

The unit applies to personnel who are required to safely operate specialist appliances in emergency response and firefighting situations. It should be noted that individuals may be required to demonstrate competence to organisational standards to be deemed an operator of a specific specialist vehicle.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Site specialist appliance

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Specialist appliance and ancillary equipment is sited, in accordance with organisational procedures, to minimise

hazards which may impact on safe working operations

- 1.2 Specialist appliance is positioned, in accordance with organisational procedures, to support operational requirements and to prevent injury to personnel or damage to equipment and facilities
 - 1.3 Personal protective clothing and equipment is selected and worn, in accordance with organisational procedures and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines
 - 1.4 Specialist appliance equipment is deployed, in accordance with organisational procedures and WHS/OHS guidelines
- 2 Operate specialist appliance**
 - 2.1 Specialist appliance is operated, in accordance with organisational procedures and manufacturers' specifications
 - 2.2 Safe clearances are maintained to ensure that personnel are not injured by the operation of specialist appliance
 - 2.3 Performance of specialist appliance is monitored and adjusted, as required, in response to changed conditions and to achieve determined strategies and objectives
 - 2.4 Action is taken to rectify any deficiencies in the operation of specialist appliance, as required
 - 2.5 Specialist appliance is operated in a manner that prevents injury to personnel or damage to equipment and facilities
 - 2.6 Fire spread, onsite hazards and atmospheric conditions including potential impact on specialist appliance operations are monitored and relevant information is referred to appropriate personnel
 - 2.7 Communication is established and maintained through the chain of command
- 3 Conclude specialist appliance operations**
 - 3.1 Ancillary equipment is collected and stowed, in accordance with organisational procedures and WHS/OHS guidelines
 - 3.2 Specialist appliance is checked and maintained, and any faults or deficiencies are reported, in accordance with organisational procedures

3.3 Participate in debriefing sessions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR318 Operate specialist appliance.

Assessment Requirements for PUAFIR310 Operate specialist appliance

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- checking and maintaining equipment and reporting faults
- concluding specialist appliance operations
- identifying and avoiding hazards
- implementing safe work practices
- operating specialist appliance
- operating equipment located on specific appliances
- siting specialist appliance
- using approved communication methods
- working with ancillary equipment
- wearing personal protective clothing and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- ancillary equipment
- communication methods on fire ground
- hazards including atmospheric conditions such as wind direction and strength, fire explosion, fire spread, hazardous atmospheres such as smoke and toxic gases and structural collapse
- impact of weather on operation of specialist appliance
- organisational documentation, policies and procedures for use in specialist appliances
- personal protective clothing and equipment
- potential hazards
- principal features and components of specialist appliance
- safe working operations including compliance with manufacturers' specifications, organisational operational procedures and WHS/OHS guidelines
- specialist appliance including breathing apparatus unit, command unit, firefighting appliance

either non-water or foam, foam or water tender, HAZMAT (hazardous materials) response unit, hose layer, lighting and salvage units and rescue tender

- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare, conduct and evaluate simple prescribed burns in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for preparing, conducting and evaluating a simple prescribed burn on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare to burn

- 1.1 Burn operations for a simple prescribed burn are identified and undertaken, in accordance with approved prescribed burn plan, burn plan objectives, organisational procedures and legislative and regulatory requirements
- 1.2 Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
- 1.3 Burn notifications and plans are issued to persons or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
- 1.4 Control lines, including secondary control lines, are specified and prepared, in accordance with organisational procedures
- 1.5 Prescribed burn plan operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works are completed
- 1.6 Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
- 1.7 Fuel conditions are monitored, in accordance with organisational procedures and prescribed burn plan
- 1.8 Resource requirements are confirmed with reference to burn plan

2 Conduct burn

- 2.1 Prescribed burn notifications are issued, in accordance with organisational procedures
- 2.2 Pre-burn checks are conducted, in accordance with organisational procedures
- 2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
- 2.4 Resources are gathered and personnel are briefed, in accordance with prescribed burn plan and contingency

arrangements

- 2.5 Burn ignition strategies, including lighting techniques patterns and sequences are implemented, in accordance with organisational procedures and prescribed burn plan
 - 2.6 Burning is monitored, patrol activities are conducted and operational changes made, as required
 - 2.7 Contingencies are implemented, in accordance with prescribed burn plan, as required
 - 2.8 Burn documentation is kept, in accordance with organisational procedures
 - 2.9 Burn operations are concluded and burn security is implemented, in accordance with organisational procedures
 - 2.10 Crews are debriefed and resources released from the burn
 - 2.11 Incidents are reported and investigated, in accordance with organisational procedures
- 3 Conduct post burn activities**
- 3.1 Outcomes of the burn are assessed against burn objectives, in accordance with organisational procedures
 - 3.2 Variations from the burn plan are reported, in accordance with organisational procedures
 - 3.3 Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
 - 3.4 Prescribed burn records are submitted, in accordance with the organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include

- approval of plan for the conduct of prescribed burning
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

personnel or organisation must include one or more of the following

- personnel or organisations who
 - have an interest in adjacent land to which a burn could spread
 - have an interest in managing the consequences of a burn
 - have an interest in specific assets
 - have an interest in the area to be burned
 - may be concerned by evidence of a burn

resources must include one or more of the following

- contingency resources
- crews for control, suppression and ground ignition
- equipment and supplies
- logistical support
- other vehicles
- tankers

burn ignition strategies and tactics must include

- contingency arrangements
- fire behaviour to be achieved
- ignition methods, lighting patterns, sequencing and timing of ignition

lighting techniques must include one or more of the following

- hand held
- vehicle mounted propelled incendiaries
- wind and waterproof matches

lighting techniques and patterns must include

- contour lighting
- echelon
- grid
- line

- lighting sequence must include one or more of the following
- multi-line
 - spot
 - lighting sequences that considers
 - fuel arrangement
 - fuel moisture
 - slope
 - time of day
 - wind direction
- monitoring burn must include one or more of the following
- fire shape and spread
 - flame height
 - fuel moisture content
 - predictions
 - rate of spread
 - recording
 - safety considerations
 - smoke development
 - weather observation
 - wind speed and direction
- concluding operations and burn security must include one or more of the following
- mitigating hazards for public safety
 - mopping up and black out
 - patrolling burn area
 - reopening roads
 - transfer of responsibility, as per organisational procedures
- outcomes of the burn must include one or more of the following
- achievement of burn objectives
 - escapes
 - external impacts
 - levels of scorch
 - percentage of area burnt
 - reporting and storage of burn documentation

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR412 Conduct simple prescribed burns.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR402 Conduct simple prescribed burns

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including hazards, risk mitigation and safety of personnel
- checking burn and crew activities
- completing burn notifications
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings, safe burns utilising resources and post burn activities including operations and security
- confirming resources, location, construction and suitability of control lines for prescribed burns
- identifying and implementing restoration and rehabilitation activities
- implementing contingency arrangements
- interpreting and implementing simple prescribed burn plans
- interpreting simple prescribed burn plans and objectives, fire behaviour conditions and existing and forecast weather conditions
- monitoring equipment
- planning for contingencies
- preparing for a simple prescribed burn
- recording actions taken
- using fire prediction tools and resources

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- briefing and debriefing content and processes
- burn notification including verbal and written notification
- characteristics of a simple prescribed burn including completed in one shift, involves

minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area

- conclusion of simple prescribed burns including operations and security
- contingency arrangements including command structure, safety considerations such as escape routes and safety zones, actions to take in the event of unexpected fire behaviour changes, resolution of escapes, special resources and secondary control lines, resource requirements, resolution of resource breakdowns, injury on fire line and burn targets not met
- contingency plans
- fire prediction tools
- ground ignition patterns and techniques
- impact of conditions at simple prescribed burns on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative and organisational authorisations required
- organisational documentation, policies and procedures
- outcomes of simple prescribed burn
- personnel and organisations involved in simple prescribed burn activities
- required permits
- resource requirements
- restoration and rehabilitation
- seasonal restrictions on simple prescribed burns
- simple prescribed burn and securing burn monitoring
- techniques, patterns and sequencing for lighting
- types of property and assets
- types of simple prescribed burns, prescribed burn plans and objectives
- weather conditions including: temperature, relative humidity, weather changes, atmospheric stability, drought index, fire danger index, weather forecasts, actual or anticipated changes in conditions and progress targets not met
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in a range of actual and/or field based workplace environments with evidence collected from undertaking a simple prescribed burn being required.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - fire management and contingency plans
 - lighting and suppression crews
 - lighting and suppression equipment
 - simple prescribed burn plans
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop simple prescribed burn plans for specified burn areas and to prepare the plans to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. A simple prescribed burn is characterised by low risk, low intensity, small area, low potential impact on assets, completion in one shift and minimal variation of fuel and terrain.

A prescribed burn plan is an approved plan for the conduct of prescribed burning, it includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

The unit is applicable to personnel responsible for the development of simple prescribed burn plans.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify burn areas and burn objectives

1.1 Areas requiring simple prescribed burning are identified, in accordance with organisational procedures

1.2 Burn objectives are identified, in accordance with organisational procedures

1.3 Target groups are identified and consultation process is undertaken, in accordance with organisational procedures

1.4 Legislative and regulatory requirements are identified and complied with throughout planning process

2 Prepare prescribed burn plan for simple burn

2.1 Key features of the burn area are identified including variations in terrain, fuel types and quantities control lines and weather

2.2 Risks from proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environment and ecological risks

2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures

2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined

2.5 Burn ignition strategies and tactics required for fire behaviour, intensity and that are suitable for location are determined, in accordance with organisational procedures

2.6 Lighting techniques and lighting patterns are identified

2.7 Hazard and risk mitigation are determined and asset protection works are identified

2.8 Strategies for mitigating hazards and risks are identified and required preparatory works are identified

2.9 Strategies and tactics for controlling prescribed burn are identified

- 2.10 Type and quantity of resources required are identified
 - 2.11 Prescriptions for implementation of burn plan strategies and tactics are documented, in accordance with organisational procedures
 - 2.12 Contingencies are outlined in the prescribed burn plan
 - 2.13 Prescribed burn plan is prepared, in accordance with organisational procedures
- 3 Gain approval of prescribed burn plan**
- 3.1 Prescribed burn plan is submitted for approval, in accordance with organisational procedures and legislative requirements
 - 3.2 Modifications and amendments to prescribed burn plan are made based on feedback received
 - 3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

simple prescribed burn plan must include

- an approved plan for conduct of simple prescribed burn
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

simple prescribed burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- management of cultural sites and activities
- protection of fire sensitive ecological communities

target consultation groups must include one or more of the following

- vegetation management
- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- groups or individuals that may be adversely affected
- other groups and people within prescribing organisation

lighting techniques must include

- hand held
- wind and/or waterproof matches

lighting patterns include one or more of the following

- contour lighting
- echelon
- grid
- line
- multi-line
- spot

operational hazards must include two or more of the following

- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous material
- high fuel loads
- ignition methods
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following

- impact of smoke on vulnerable communities near burn area
- safety of any people permanently or temporarily in burn area
- safety of people involved with burn implementation
- safety of people on areas adjacent to burn area

property and assets must include two or more of the following that are near the burn area

- camps or recreational areas
- commercial land use such as crops or industry
- cultural sites or historical buildings
- other property and assets
- plantations

environmental and ecological risks must include

- research plots and reference areas
- stock
- urban areas
- utilities - power and telephone lines, water supply structures and communications towers
- impact on
 - native flora and fauna including rare and endangered species
 - smoke
 - soil
 - use of chemical fire suppressants
 - water quality or supply
- crews for ground ignition and suppression
- equipment backup
- ignition and suppression equipment and supplies
- logistical support
- other vehicles
- tankers

resources must include one or more of the following

Assessment Requirements for PUA FIR406 Develop simple prescribed burn plans

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- assessing fuel types and quantities in burn area
- determining actions to minimise impacts of simple prescribed burn
- developing contingency arrangements
- developing pre-burn work schedule
- gaining simple prescribed burn approval
- identifying and working with resources
- identifying burn areas including developing timelines for planning and conduct of simple prescribed burn, simple prescribed burn objectives, strategies and tactics to meet simple prescribed burn objectives, ignition strategies and lighting techniques and patterns for ignition
- identifying resources
- identifying, assessing and mitigating operational hazards and risks
- identifying, assessing and mitigating risks to people, property and assets, ecological and environmental risks
- implementing legislation and regulations
- interpreting map of area and identifying key features
- predicting anticipated fire behaviour and intensity in burn area
- preparing plans and map for simple prescribed burning
- targeting consultation groups are identified, liaised with and consulted

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- accumulated fuels
- characteristics of simple prescribed burns including completed in one shift, involves minimal variation of fuels and terrain, low intensity, low potential impact on assets, low risk and small area
- contingencies
- effects of fire on vegetation, fauna, people, property, assets, ecology and the environment
- fire behaviour for fuel type being prescribed
- fire prediction tools
- ignition strategies and tactics
- legislative, regulatory, organisational and permit requirements for simple prescribed fires
 - notification requirements
 - organisational documentation, policies and procedures
 - planned burn hazards and risks
 - resource requirements and capabilities
- simple prescribed burn plans
- simple prescribed burning ignition and suppression strategies
- smoke management
- target groups and community
- traffic management plan requirements
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated in a range of actual and/or field based workplace environments.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - area requiring application of fire under prescribed conditions

- existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR504 Assist with formulation and implementation of plans and policies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to consult on, develop, implement and evaluate a policy or plan for an organisation. It applies to personnel required to contribute, both individually and as part of a work team, to the formulation and implementation of organisational policies and plans.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Monitor administration of organisational policies, procedures and plans

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Requirements for the administration of organisational policies, procedures and practices are identified and monitored

- 1.2 Policies and plans that are no longer relevant are identified and recommendations for change are made, in accordance with organisational procedures
 - 2 Identify and consider stakeholder concerns**
 - 2.1 Stakeholders are identified and consulted, in accordance with organisational procedures
 - 2.2 Organisation is represented at stakeholder meetings and external events with policies, procedures and plans explained
 - 2.3 Meetings with stakeholders are conducted on a regular basis or as required, in accordance with organisational procedures
- 3 Facilitate policy change within the organisation**
 - 3.1 Policies, procedures and plans are facilitated, in accordance with organisational procedures
 - 3.2 Personnel are encouraged to participate in and comment on proposed changes to policies, procedures and plans
 - 3.3 Formal submissions on policies, procedures, plans and operational issues are drafted based on feedback
 - 3.4 Submissions are written and submitted, in accordance with organisational procedures
- 4 Contribute to strategic and operational planning process**
 - 4.1 Contributions are made to organisational forward planning initiatives
 - 4.2 Contributions to strategic and operational planning processes are focused on activities relevant to the organisation
- 5 Assist in the preparation and implementation of organisational business plans**
 - 5.1 Development of strategic plan is contributed to and linked to organisational business planning
 - 5.2 Organisational objectives and plans are implemented through activities and projects related to legislation, industry awards and agreements and policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR504B Assist with formulation and implementation of plans and policies.

Assessment Requirements for PUA FIR504 Assist with formulation and implementation of plans and policies

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- assisting in the development, implementation and evaluation of policies, procedures or plans
- assisting in the preparation and implementation of organisational business plans
- contributing to strategic and operational planning processes
- developing and proposing submissions
- facilitating policy and plan change within the organisation
- following consultative processes
- identifying and considering stakeholder concerns
- implementing change management strategies to deal with resistance to policy development
- monitoring the administration of organisational policies, procedures and plans

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- concepts involved in the policy cycle
- consultative procedures and processes in the policy cycle
- methods for implementing and evaluating policies, procedures and plans
- organisational documentation, policies and procedures including submissions
- reasons for resistance to policy development and strategies for dealing with issues that arise
- role of management, employees and stakeholders in policy and plan development
- stakeholders and external organisations
- submission types
- types of operational plans
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be demonstrated over time and in a range of contexts; the evaluation of the development and implementation of organisational plans and policies may require a few months.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR506 Conduct complex prescribed burns

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to prepare and conduct complex prescribed burns, in accordance with approved burn plans.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area and at the time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. A burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. A prescribed burn may require several separate ignitions (ground and/or aerial) possibly over several days. It may have several high value assets requiring complex protection actions.

The unit applies to personnel responsible for preparing, conducting and evaluating complex prescribed burns on public and private land.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to burn

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Complex prescribed burn operations are identified and undertaken, in accordance with approved prescribed burn plan, burn objectives, organisational procedures, and legislative and regulatory requirements
- 1.2** Permits are obtained, in accordance with organisational procedures and legislative and regulatory requirements
- 1.3** Burn notifications and plans are issued to personnel or organisations, in accordance with prescribed burn plan, organisational procedures and legislative requirements
- 1.4** Control lines, including secondary control lines are specified and prepared, in accordance with organisational procedures
- 1.5** Prescribed burn plan, operational hazards and risks to safety of people, property, assets, ecology and environment are identified and risk mitigation works completed
- 1.6** Forecast weather conditions are monitored, recorded and assessed, in accordance with organisational procedures
- 1.7** Fuel conditions are monitored, in accordance with organisational procedures
- 1.8** Resource requirements are confirmed with reference to burn plan and anticipated conditions
- 1.9** Forecast weather conditions are monitored throughout prescribed complex burn

2 Conduct burn

- 2.1 Burn notifications are issued, in accordance with organisational procedures
- 2.2 Pre-burn checks are conducted, in accordance with organisational procedures
- 2.3 Local weather conditions for day of burn are monitored and contingency arrangements actioned and communicated accordingly
- 2.4 Resources are gathered and personnel briefed, in accordance with prescribed burn plan and contingency arrangements
- 2.5 Burn ignition strategies and tactics are implemented, in accordance with prescribed burn plan and organisational procedures including lighting techniques for ground and/or aerial ignition, as relevant to the specific burn, lighting patterns and lighting sequence
- 2.6 Burning is monitored, patrol activities are conducted and operational changes made, as required
- 2.7 Contingencies are implemented, as required, in accordance with prescribed burn plan
- 2.8 Burn documentation is kept, in accordance with organisational procedures
- 2.9 Burn operations are concluded and burn security is implemented in accordance with organisational requirements
- 2.10 Crews are debriefed and resources released from the burn
- 2.11 Incidents are reported and investigated in accordance with organisational procedures

3 Conduct post burn activities

- 3.1 Outcomes of burn are assessed and reported against burn objectives, in accordance with organisational procedures
- 3.2 Variations from burn plan are reported, in accordance with organisational procedures
- 3.3 Restoration and rehabilitation works are identified and carried out, in accordance with organisational procedures
- 3.4 Complex prescribed burn records are submitted, in

accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

prescribed burn plan must include

- an approved plan for conduct of prescribed burning
- map identifying the area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset protection
- biodiversity protection
- community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

operational hazards must include one or more of the following

- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- ignition methods
- plant
- road traffic
- vegetation

environmental and ecological risks must include three or more of the following

- impact of smoke
- impact of use of any chemical fire suppressants
- impact on native flora and fauna, including rare and endangered species
- impact on soil
- impact on water quality or supply

contingency arrangements must include

- actions to take in the event of unexpected weather
- command structure
- dealing with escapes
- resource breakdowns
- resource requirements
- safety considerations including escape routes and safety zones
- special resources and/or secondary control lines
- wind changes

personnel or organisations must include one or more of the following

- personnel or organisations who
 - have an interest in managing the consequences of a burn
 - have an interest in preventing health impacts from smoke e.g. nursing homes, health departments
 - have an interest in specific assets
 - have an interest in the area to be burned
 - may be adversely affected by the burn
 - may be concerned by evidence of a burn
 - may have adjacent land to which a burn could spread

resource requirements must include one or more of the following

- contingency resources
- crews for
 - aircraft ground support
 - control and suppression
 - ground ignition

burn ignition strategies and tactics must include:

- equipment and supplies
- logistical support
- tankers and other vehicles
- contingency arrangements
- fire behaviour to be achieved
- ignition methods, lighting patterns, sequencing and timing of ignition

lighting techniques for ground and aerial ignition must include three or more of the following

- hand held drip torch
- aerial drip torch
- aerial incendiaries
- hand held propelled incendiaries
- vehicle mounted propelled incendiaries
- vehicle mounted incendiaries
- wind and/or waterproof matches

lighting patterns must include two or more of the following

- backing fire ignition
- spot or grid ignition
- strip ignition
- flank fire ignition

lighting sequence must include

- fuel arrangement
- fuel moisture
- slope
- time of day
- wind direction

monitoring complex prescribed burn must include four or more of the following

- fire development, shape and spread
- flame height
- fuel moisture content
- predictions
- rate of spread
- safety considerations
- smoke development
- weather observations

conclusion and complex prescribed burn security activities must include

- mitigating hazards for public safety
- mopping up and blacking out
- patrolling burn area
- reopening roads
- transfer of responsibility procedures

outcomes of the complex prescribed burn must include two or more of the following

- achievement of burn objectives
- escapes
- external impacts
- levels of scorch
- percentage of area burnt
- reporting and storage of burn documentation
- all those involved with burn implementation
- any in areas adjacent to burn area
- any permanently or temporarily in burn area
- impact of smoke on vulnerable communities near burn area

safety of people must include

Unit Mapping Information

Assessment Requirements for PUA FIR506 Conduct complex prescribed burns

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- concluding burn operations and implementing burn security
- conducting operational briefings and debriefings
- conducting post burn activities
- conducting safe complex prescribed burn operations by utilising appropriate resources (ground and air)
- confirming location, construction and suitability of control lines for prescribed burns
- confirming resources required
- evaluating outcomes against objectives
- identifying and protecting assets
- implementing contingency arrangements
- interpreting and implementing complex prescribed burn plans
- interpreting existing and forecast weather conditions and fire behaviour conditions
- issuing verbal and written burn notifications
- monitoring burn and patrol activities
- preparing to burn
- recording actions taken
- responding to changing conditions
- restoring and rehabilitating sites
- using fire prediction tools
- using monitoring equipment
- utilising lighting techniques and sequencing
- working with ignition patterns and techniques

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- characteristics of complex prescribed burns including involvement of a variety of fuels and terrain, medium to large areas, moderate to high risk, range of fire intensity and significant potential impact on assets
- contingency plans
- evaluation of burn outcomes against objectives
- fire prediction tools and their use
- fuel sampling techniques
- ground and aerial ignition patterns and techniques
- impact of conditions of a complex prescribed burn on potential fire behaviour
- legislation, industry standards, codes of practice and regulations
- legislative, regulatory and organisational authorisations
- organisational documentation, policies and procedures
- permit requirements
- procedures for monitoring, concluding and securing burn
- resource requirements and capabilities
- restoration and rehabilitation activities including site stabilisation and recording and reporting future restoration and rehabilitation requirement
- seasonal restrictions on prescribed complex burns
- smoke modelling and smoke impacts
- techniques, patterns and sequencing for lighting
- traffic management plans
- types of prescribed complex burns
- types of property and assets within or near burn area including urban areas, commercial land use such as crops or industry, any cultural sites or historical buildings, other property and assets, stock, utilities such as power and telephone lines, water supply, structures and communications towers, camps or recreational areas, plantations and research plots and reference areas
- verbal and written burn notifications
- weather conditions including temperature, relative humidity, wind, atmospheric stability, drought index, fire danger index, weather forecasts and actual or anticipated changes in conditions
- weather monitoring techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions. Competency should be demonstrated in an operational environment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - an area for proposed complex prescribed burn
 - authorisation to light burn
 - fire management plans
 - lighting and suppression crews
 - lighting equipment
 - prescribed burn plans including plan for proposed assessment burn
 - suppression equipment
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR515 Develop complex prescribed burn plans

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop complex prescribed burn plans for specified burn areas to achieve identified objectives.

A prescribed burn is the controlled application of fire under specified environmental conditions to a predetermined area at a time, intensity and rate of spread required to attain planned resource management objectives. An approved prescribed burn plan includes a map identifying the area to be burned and incorporates the specifications and conditions under which the operation is to be conducted.

Complex prescribed burns are characterised by moderate to high risk, a range of fire intensity, being in medium to large areas, having significant potential impact on assets and involving a variety of fuels and terrain. The burn operation may involve a large number of resources requiring the establishment of a formal management and support structure. It may require several separate ignitions, ground and/or aerial, possibly over several days and it may include a number of high value assets requiring complex protection actions.

The unit is applicable to personnel responsible for developing complex prescribed burn prescriptions.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR303 Suppress wildfire

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify burn area and burn objectives

- 1.1 Areas requiring complex prescribed burn plans are identified, in accordance with organisational and permit procedures and legislative and regulatory requirements
- 1.2 Burn objectives are identified and consultation process is undertaken, in accordance with organisational procedures
- 1.3 Target consultation groups are identified, and consultation process is initiated, in accordance with organisational procedures
- 1.4 Legislative and regulatory requirements are identified and complied with throughout planning process

2 Prepare prescribed burn plan for a complex burn

- 2.1 Key features of burn area are identified including variations in terrain, fuel types and quantities, control lines and weather
- 2.2 Risks from the proposed burn, both on and off site, are assessed and considered in planning process including operational hazards, safety of people, protection of property, assets, environmental and ecological risks
- 2.3 Results of consultation are factored into the planning process, in accordance with organisational procedures
- 2.4 Fire behaviour to meet burn objectives and to account for variations in fuel, terrain and weather is determined
- 2.5 Burn ignition strategies and tactics suited to location that provide required fire behaviour and intensity are determined, in accordance with organisational

procedures

- 2.6 Lighting techniques and patterns for both ground based and/or aerial ignition for specific burn are identified
 - 2.7 Strategies for mitigating hazards and risks are identified and preparatory works are planned
 - 2.8 Strategies and tactics for controlling prescribed burn are identified
 - 2.9 Type and quantity of resources required are identified
 - 2.10 Conditions for implementation of burn ignition strategies and tactics are specified, in accordance with organisational procedures
 - 2.11 Prescribed burn plan is prepared, in accordance with organisational procedures
 - 2.12 Contingencies are outlined in prescribed burn plan
- 3 Gain prescribed burn plan approval**
- 3.1 Prescribed burn plan is submitted for approval, in accordance with legislative and organisational requirements
 - 3.2 Modifications and amendments to prescribed burn plan are made, based on feedback received
 - 3.3 Prescribed burn plan approval is gained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

complex prescribed burn plans must include

- approved plan for conduct of prescribed burning
- map identifying area to be burned
- specifications and conditions under which operation is to be conducted

burn objectives must include one or more of the following

- asset, biodiversity and community protection
- habitat management
- hazard reduction
- management of cultural sites and activities
- protection of fire sensitive ecological communities
- vegetation management

target consultation groups must include one or more of the following

- adjacent land owners or managers
- commercial operations within impact zone
- community groups with specific interests
- government organisations including local, state and federal
- other groups and people within the prescribing organisation
- people that may be affected by burn
- contingency planning

burn ignition strategies and tactics must include

- fire behaviour to be achieved
- ignition methods, sequencing and timing of ignition

lighting techniques for ground and aerial ignition must include three or more of the following

- hand held drip torch
- aerial drip torch
- aerial incendiaries
- hand held propelled incendiaries
- vehicle mounted propelled incendiaries
- vehicle mounted incendiaries
- wind and/or water proof matches

lighting patterns must include two or more of the following

- backing fire ignition
- spot or grid ignition
- strip ignition
- flank fire ignition

operational hazards must include two or more of the following

- adjoining land use and proximity to urban areas
- adverse terrain or weather conditions
- crew size
- falling trees and limbs
- hazardous materials
- high fuel loads
- ignition method
- plant
- powerlines
- road traffic
- vegetation type

safety of people must include two or more of the following

- impact of smoke on vulnerable communities near the burn area
- safety of any people permanently or temporarily in burn area
- safety of people involved with burn implementation
- safety of people on areas adjacent to burn area

property and assets must include two or more of the following

- any of the following that are in or near the burn area
 - camps or recreational areas
 - commercial land use such as crops or industry
 - cultural sites or historical buildings
 - other property and assets
 - plantations
 - research plots and reference areas
 - stock
 - urban areas
 - utilities - power and telephone lines, water supply structures and communications towers

environmental and ecological risks must include

- impact of native flora and fauna including rare and endangered species
- impact of smoke
- impact of soil
- impact of use of chemical fire suppressants
- impact on water quality or supply

resources required must include one or more of the following

- aircraft and crews including incendiary operations supervisors and machine operators for aerial ignition
- aircraft ground support
- control line standards
- crews and supervisors for ground ignition, control and patrol work
- equipment and supplies including fuel and incendiaries
- planning and logistical support
- pre-burn work schedule
- tankers, other ignition and suppression vehicles, equipment and fuel

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR513 Develop complex prescribed burn plans.

Assessment Requirements for PUA FIR515 Develop complex prescribed burn plans

Modification History

Release 2.0 This is the second release of this unit of competency in the PUA Public Safety Training Package.

Editorial update.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying legislative, regulatory, organisational and permit requirements
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risks mitigation and safe work practices
- assessing characteristics of multiple fuel types, terrain and weather
- developing a pre-burn work schedule
- developing contingency arrangements
- documenting complex prescribed burn plans including objectives
- gaining complex prescribed burn approval
- identifying actions to minimise impacts of complex prescribed burn preparation
- identifying resources
- identifying, assessing and mitigating operational hazards and risks including to people, property, assets, ecology and environment
- identifying, liaising and consulting with target consultation groups
- interpreting maps of area and identifying key features
- predicting fire behaviour and intensity in burn area
- preparing maps for complex burn operational use
- preparing plans for complex prescribed burns including developing lighting techniques and patterns for ground and/or aerial ignition, tactics involving multiple fuel types, ignition strategies, burn objectives, strategies and tactics to meet objectives and timelines for planning and conduct of burn
- recommending actions and communicating them
- responding to feedback and adjusting plans for approval

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- accumulated fuels
- burn feasibility
- characteristics of complex prescribed burn including medium to large areas, moderate to high risk, range of fire intensity, significant potential impact on assets and variety of fuels and terrain
- complex prescribed burning ignition and suppression strategies including ignition patterns and sequences for ground and aerial
- contingency arrangements
- control line suitability
- effects of fire on people, property, assets, ecology and environment
- fire prediction tools
- fuel sampling techniques
- legislative, regulatory, organisational and permit requirements
- organisational documentation, policies and procedures including pre-burn procedures
- planned burn hazards and risks
- resource capabilities
- smoke modelling
- traffic management
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation and safe work practices
- written and verbal notification requirements

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including

- area requiring application of fire under prescribed conditions
- existing management plans and data relevant to area being prescribed
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR601 Develop and administer organisational policies, procedures and practices

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to administer policies, procedures and practices to support the achievement of organisational and operational objectives.

The unit applies to personnel required to lead a team to develop policies and supporting procedures to meet identified organisational needs. Policies developed will require integration into the organisation's strategic and business planning.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR504 Assist with the formulation and implementation of plans and policies

Competency Field

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Identify and develop policies, procedures and practices

- 1.1 Need for new or review of policies, procedures and practices is identified in consultation with stakeholders
- 1.2 Consultative processes are used to exchange information with stakeholders about policies, procedures and practices to assist in problem solving and decision making, in accordance with organisational procedures
- 1.3 Cooperation and input is obtained from stakeholders
- 1.4 Policies, procedures and practices are reviewed or developed with stakeholders, in accordance with organisational procedures
- 1.5 Reviewed or new policies, procedures and plans are submitted, in accordance with organisational procedures

2 Manage the implementation of policies, procedures and practices

- 2.1 Reviewed or new policies, procedures and practices are integrated into organisational strategic and business plans
- 2.2 Reviewed or new organisational policies, practices and procedures are implemented and monitored for adherence and compliance
- 2.3 Administration procedures are updated to reflect reviewed or new policies, procedures and processes
- 2.4 Communication about reviewed or new policies, procedures and processes to stakeholders is facilitated, in accordance with organisational procedures
- 2.5 Policies and procedures information is gathered, stored and safely secured with confidentiality maintained, in accordance with organisational procedures
- 2.6 Copyright provisions are observed, in accordance with organisational procedures

3 Review policies, procedures and practices

- 3.1 Policies, procedures and practices are reviewed to ensure they are current and meet organisational business and strategic plans
- 3.2 Decisions and actions about policies, procedures and practices are recorded, in accordance with organisational

procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Assessment Requirements for PUA FIR601 Develop and administer organisational policies, procedures and practices

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- disseminating information about reviewed or new policies, procedures and processes to stakeholders
- documenting reviewed or new policies, procedures and processes
- identifying and developing policies, procedures and practices
- integrating reviewed or new policies, procedures and processes in business and strategic plans
- managing the implementation of policies, procedures and practices
- reviewing policies, procedures and practices
- undertaking consultation during the preparation, development and review of policies, procedures and practices
- utilising liaising skills
- working with a variety of communication methods and techniques to make presentations and submissions to stakeholders

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- business and strategic plans
- communication methods and techniques
- internal and external stakeholders
- organisational documentation, policies, procedures and practices
- policy cycle
- strategies for implementing organisational policies, procedures and practices
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

PUALAW001 Protect and preserve incident scene

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to conduct an initial assessment on receipt of a call, when enroute and/or at the incident and to then take action to maintain public safety, preserve scene and record details and information on arrival at the scene of an accident or incident.

The unit is applicable personnel who are the first to arrive at the scene of an accident or incident. It applies to public safety personnel at an incident who need to understand the importance of maintaining the legal integrity of a scene.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify project scope

1.1 Identify and record scope, objectives and outcomes of project

1.2 Strategy to achieve project objectives, outcomes and client requirements is developed

1.3 A risk management system is developed and applied to ensure project objectives can be met within organisational accountability frameworks

2 Acquire project resources

2.1 Project resources and equipment are identified, acquired and allocated

2.2 Project scope and objectives are analysed to determine tasks to achieve agreed outcomes on time and within budget

2.3 Process for monitoring, evaluating and reporting performance against objectives are developed and applied

2.4 Roles and responsibilities of team members and stakeholders are identified and agreed

3 Manage project activities

3.1 Project is initiated, in accordance with organisational policies and strategic direction, in consultation with stakeholders

3.2 Tasks are implemented, in accordance with project plan and organisational procedures

3.3 Communication process is established including responsibilities for conflict resolution

3.4 Progress is monitored to ensure time, performance, cost and quality of project is achieved

3.5 Proposed variations are investigated and negotiated, in consultation with stakeholders

4 Finalise project and evaluate and report on activities

4.1 Project is completed, outcomes are recorded and opportunities for future improvement are established

- 4.2 Evaluation of completed project is undertaken against agreed objectives and is reported to stakeholders

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

PUAOIL202 Use basic equipment operations for oil spill response

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to operate, deploy, monitor and recover basic (Level 1) oil spill response equipment, whilst working as a team member.

An oil spill is the release of liquid petroleum hydrocarbon into the environment, either aquatic or on land. There are three categorised levels of oil spills; Level 1 spills are mild, causing localised damage in marine and or land environments.

The unit is applicable to personnel deployed to operate basic (Level 1) oil spill response equipment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Marine Pollution Response

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Undertake a health and safety site review

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify and communicate potential oil spill hazards and risks

1.2 Report hazards and risks, in accordance with

- organisational procedures
- 1.3** Select and use personal protective clothing and equipment, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) guidelines and Safety Data Sheet (SDS) requirements
- 2 Prepare Level 1 equipment for use**
- 2.1** Use the incident action plan and/or site specific deployment plan to identify and select oil spill response equipment, in accordance with organisational requirements and supervisor's instructions
- 2.2** Use organisational procedures and manufacturers' specifications, in the management of routine preoperational checks of equipment
- 2.3** Report unsafe or faulty equipment, in accordance with organisational procedures, and set aside for repair and/or replacement
- 3 Operate and/or deploy Level 1 equipment**
- 3.1** Operate and maintain equipment, in accordance with organisational procedures and manufacturers' specifications
- 3.2** Complete work tasks, in accordance with organisational procedures, WHS/OHS requirements and the incident action plan
- 3.3** Identify, action and monitor environmental implications associated with oil spill response and maintenance of equipment
- 3.4** Monitor oil spill environmental conditions, in conjunction with operational activities
- 4 Check, clean and store Level 1 equipment**
- 4.1** Report equipment use, in accordance with organisational procedures, site specific deployment plan and incident action plan requirements
- 4.2** Clean, secure and store equipment, including personal protective clothing and equipment, in accordance with organisational procedures, manufacturers' specifications and maintenance manuals
- 4.3** Report equipment faults or damage to supervisor, in accordance with organisational procedures
- 4.4** Maintain and clean workplace, in accordance with organisational procedures and WHS/ OHS guidelines

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOIL201 Use basic equipment operations for oil spill response.

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- checking, cleaning and storing Level 1 equipment including monitoring their performance
- communicating with team members and organisational personnel
- following organisational policies and procedures
- identifying hazards including chemical, operational and working environments
- loading and unloading materials safely
- modifying activities in relation to risk and environment
- operating and deploying Level 1 equipment
- preparing Level 1 equipment for use including preoperational checks
- reading and interpreting Safety Data Sheets (SDS)
- recognising and addressing problems when dismantling, inspecting and assembling equipment
- undertaking a health and safety site review including identifying and assessing potential risks
- using personal protective clothing and equipment
- working in a team to safely deploy and monitor basic (Level 1) equipment for the containment, recovery and storage of oil from a spill

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- characteristics and liabilities of Level 1 oil spill equipment including operation of and environmental impact of the equipment
- environmental conditions and implications of oil spill including oil spill response equipment required
- organisational documentation, policies and procedures
- personal protective clothing and equipment

- potential hazards
- preoperational checks
- safe working procedures and practices
- Safety Data Sheets (SDS)
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply health, safety and risk controls when working on an oiled shoreline. It includes identifying potential hazards, following procedures for risk control, supporting safety guidelines for working with oil and reporting on hazards, injuries and near misses.

The unit is applicable to shoreline supervisors and/or coordinators responsible for health, safety and risk controls to ensure the wellbeing of all responders reacting to an oiled shoreline incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Marine Pollution Response

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify potential hazards

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Identify and analyse hazards at oiled shoreline before and during incident

1.2 Complete a risk assessment for identified hazards in

accordance organisational procedures and Work, Health and Safety (WHS)/ Occupational Health and Safety (OHS) requirements

- 1.3 Identify and apply controls for hazards
 - 1.4 Review effectiveness of controls within the shoreline supervisor or coordinator's scope of authority
 - 1.5 Identify and report on any remaining risks to relevant personnel and organisations or agencies
- 2 Follow procedures for risk control**
- 2.1 Select, use and maintain personal protective clothing and equipment, in accordance with Safety Data Sheet (SDS) requirements
 - 2.2 Develop site specific health and safety plan and continuously review throughout incident
 - 2.3 Coordinate induction training for oil spill responders attending incident
- 3 Follow safety guidelines for working with oil**
- 3.1 Explain contact procedures for personnel involved in oil spill response
 - 3.2 Follow approved safety procedures and use personal protective clothing and equipment, as specified, in accordance with organisational procedures
 - 3.3 Implement safety procedures when operating near volatile oil substances
- 4 Report hazards, injuries, near misses**
- 4.1 Communicate and apply reporting requirements for hazards, injuries and near miss incidents
 - 4.2 Implement remediation strategies and practices, as required, following completion of incident report
 - 4.3 Complete organisational documentation and reports, in accordance with organisational procedures and forward to relevant personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOIL301 Apply health, safety and risk controls when working on oiled shorelines.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAOIL303 Apply health, safety and risk controls when working on oiled shorelines

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including applying health and safety practices when working in oiled shoreline environments
- assessing risks
- complying with safety guidelines for working with oiled shorelines
- developing and reviewing site specific health and safety plans
- ensuring tasks are performed to meet safety requirements and quality systems
- following procedures for risk control
- identifying, documenting and managing health and safety, potential hazards and associated risks for oiled shorelines and continually review
- implementing controls for hazardous in oiled shoreline situations
- implementing emergency provisions
- implementing organisational policies and procedures
- recognising potential emergency situations and communicating promptly
- reporting hazards, injuries and near misses
- using personal protective clothing and equipment and material safety data sheets

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- correct use of equipment for handling materials
- environmental impacts and risks to individuals and the community
- hazards and hazardous areas including chemical, operational and working environments
- operational characteristics of oil spill equipment
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- risk mitigation processes including controls for hazards
- Safety Data Sheets (SDS)

- severity of risks from materials
- site specific health and safety planning
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Simulations will be required for the timely assessment of this unit of competency. Simulations should be based on potential work environment and should include the use of case studies and scenarios using what if questions and answers.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUAOIL304 Use advanced equipment operations for oil spill response

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to safely deploy, operate, monitor and recover advanced oil spill response equipment.

The unit is applicable to personnel responsible for the choices and deployment of appropriate advanced oil spill response equipment to meet the type of oil spill operations and environmental conditions for Level 1, 2 or 3 responses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Marine Pollution Response

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Manage safety of operation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Identify hazards and risks for the site and equipment use through a job safety analysis
- 1.2 Apply the hierarchy of controls to manage hazards and risks

- 1.3** Select, use, maintain and store personal protective clothing and equipment, in accordance with Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) and Safety Data Sheet (SDS) requirements
- 2 Communicate with work team and incident management team**
 - 2.1** Prepare site specific deployment plans based on the incident action plan
 - 2.2** Plan, prepare and present briefs and debriefs to relevant personnel
 - 2.3** Maintain communication channels with all stakeholders involved in the deployment and recovery of oil spill response equipment
 - 2.4** Ensure oil spill response personnel can deploy equipment in a team environment
- 3 Prepare equipment for use**
 - 3.1** Identify required advanced oil spill response equipment using the incident action plan and/or site specific deployment plan
 - 3.2** Conduct routine preoperational checks of equipment using organisational procedures and manufacturers' specifications
 - 3.3** Identify and segregate faulty equipment for repair or replacement
 - 3.4** Identify equipment requiring licensed operators
- 4 Operate and/or deploy equipment**
 - 4.1** Use equipment, in accordance with state, territory and Commonwealth licensing requirements
 - 4.2** Operate and monitor equipment, in accordance with organisational procedures, manufacturers' specifications and supervisor's instructions
 - 4.3** Carry out work, in accordance with organisational procedures, WHS/OHS requirements and the incident action plan
 - 4.4** Identify and record the use of equipment consumables
- 5 Monitor operations**
 - 5.1** Monitor, assess and reassess the effectiveness of equipment and/or the recovery operation

- 5.2 Identify, action and monitor environmental implications associated with the operation and maintenance of equipment
- 5.3 Identify any changes to response as a result of ongoing monitoring of operations
- 6 **Check, clean and store equipment**
 - 6.1 Maintain records of equipment use, in accordance with organisational procedures, the incident management system and incident action plan
 - 6.2 Clean, secure and store equipment, in accordance with organisational procedures, manufacturers' specifications, maintenance manual and/or supervisor's instructions
 - 6.3 Report and take action on equipment malfunction, fault, wear or damage, in accordance with organisational procedures
 - 6.4 Maintain and clean workplace, in accordance with organisational procedures, WHS/OHS requirements and demobilisation plan

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOIL302 Use advanced equipment operations for oil spill response.

Assessment Requirements for PUAOIL304 Use advanced equipment operations for oil spill response

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (OHS)/Occupational Health and Safety (OHS) requirements
- checking, cleaning and storing advanced equipment
- communicating with work team, incident management team and stakeholders including conducting briefings and debriefings
- completing maintenance records
- conducting pre-operational checks
- demonstrating safe deployment and operation of equipment to contain, recover and store oil
- ensuring safety and hazard control procedures are implemented
- following organisational policies and procedures
- handling and using equipment safely including loading and unloading of equipment and materials
- identifying hazardous situations and taking appropriate action
- identifying hazards including chemical and operational and working environments
- managing the safety of oil spill operation
- modifying activities dependent on risk and environment
- monitoring and reassessing situations to ensure response meets environmental conditions
- monitoring equipment performance including identifying equipment requiring licensed operators
- performing risk assessments
- preparing advanced equipment for use
- reading and interpreting Safety Data Sheets (SDS)
- recognising and addressing problems when dismantling, inspecting and assembling equipment
- using personal protective clothing and equipment
- working safely

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- communication methods and techniques including briefing and debriefing processes
- deployment plans
- environmental implications
- hazards including chemical and operational and working environments
- hierarchy of controls
- incident action plans
- operational characteristics of advanced oil spill response equipment
- organisational documentation, policies and procedures
- personal protective clothing and equipment
- safe operation of equipment
- Safety Data Sheets (SDS)
- WHS/OHS requirements and responsibilities including risk mitigation processes

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUAOPE015 Conduct briefings and debriefings

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to lead and conduct a briefing and/or a debriefing in operational and nonoperational situations, in a range of environments. It includes planning and preparing for briefings and debriefings, conducting briefings and debriefings and concluding briefings and debriefings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and prepare for briefing and debriefing

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Content and format for briefing and debriefing are determined
- 1.2 Briefing and debriefing plan is prepared, in accordance with organisational policies and procedures
- 1.3 Personnel involved in the activity are identified and informed of briefing and debriefing requirements

- | | | |
|---|------------|---|
| | 1.4 | Safe and appropriate location for the briefing and debriefing is selected |
| 2 Conduct briefing and debriefing | 2.1 | Purpose and structure of the briefing and debriefing is outlined to incident personnel |
| | 2.2 | Understanding is sought and clarifications are provided, as required |
| | 2.3 | Contributions during the debriefing and evaluation by personnel of their anticipated or actual roles in the activity is encouraged |
| | 2.4 | Briefing is conducted using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS) |
| | 2.5 | Briefing and debriefing checklist is used, as appropriate, in accordance with organisational policies and procedures |
| 3 Conclude briefing and debriefing | 3.1 | Contributions of personnel are acknowledged in a positive way |
| | 3.2 | Briefing and debriefing follow up action is identified and acted upon in a timely manner |
| | 3.3 | Debriefing activity is reviewed against the policies, procedures and training of the organisation to identify lessons learnt and opportunities for continuous improvement |
| | 3.4 | Briefing and debriefing findings are summarised and recorded, in a format suitable for subsequent action |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

content and format for briefings and

- adapting language to suit audience

debriefings must include

- collaborative approach
- descriptive and illustrative
- facilitator led
- predetermined Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- problem based

Unit Mapping Information

This unit replaces and is equivalent to PUAOPE015A Conduct briefings and debriefings.

Assessment Requirements for PUAOPE015 Conduct briefings and debriefings

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- communicating with personnel in a group setting
- concluding briefings and debriefings including follow up and subsequent actions
- conducting briefings and debriefings using Situation, Mission, Execution, Administration/logistics, Command/control and Safety (SMEACS)
- eliciting and encouraging contributions to briefings and debriefings in a constructive and positive way
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- planning and preparing for the briefings and debriefings including content, format and location
- preparing briefing and debriefing checklist and plan

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements performance criteria and range of conditions and includes knowledge of

- appropriate follow up and subsequent actions after a briefing or debriefing
- briefing and debriefing plans
- content and format for conducting briefings and debriefings
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- personnel roles and responsibilities
- personnel who may participate in briefings and debriefings including contractors, local, state, territory and federal government employees, operations personnel, support personnel, volunteers and personnel from other organisations and/or agencies
- safe and appropriate locations to conduct briefings and debriefings
- types of briefings and debriefings
- use of Situation, Mission, Execution, Administration/logistics, Command/control and Safety

(SMEACS) in briefings

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAOPE016 Manage a multi-team sector

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage a multi-team response at an incident which may be time critical and/or potentially threatening to life, property or the environment.

An individual performing in this role has the title of Sector or Division Commander and/or Level 1 Operations Officer and is delegated responsibility by either the Incident Controller or Operations Officer. The individual is responsible for managing a sector or division at an incident.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

One of the following

PUAFIR302 Suppress urban fire

PUAFIR303 Suppress wildfire.

Competency Field

Operations

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct assessment of incident

- 1.1 Initial briefing is obtained, in accordance with organisational procedures
- 1.2 Risk assessment of all factors relevant to the sector is conducted
- 1.3 Resources for the incident are identified
- 1.4 Constraints which may impede the response are identified
- 1.5 Initial response options are identified and assessed

2 Take command of sector

- 2.1 Command of all sector personnel is established and maintained, in accordance with organisational policies and procedures
- 2.2 Communications systems are used, in accordance with organisational policies and procedures
- 2.3 Reporting processes are activated, in accordance with organisational policies and procedures, to provide continuous monitoring and evaluation of incident

3 Implement operations portion of IAP

- 3.1 Incident Action Plan (IAP) is communicated to teams, in accordance with organisational procedures
- 3.2 Resources are deployed within area of operations to ensure portion of the IAP is implemented, in accordance with organisational procedures
- 3.3 Operations are conducted and monitored, in accordance with the IAP
- 3.4 Operational reports are issued, in accordance with organisational policies and procedures
- 3.5 Operations are modified, as required, to suit the situation

4 Manage and monitor sector operations

- 4.1 Sector is managed, in accordance with organisational policies and procedures
- 4.2 Safe work practices and health and welfare procedures

and arrangements are implemented and monitored

- 4.3 Strategies are implemented, and tactics are determined, in accordance with the IAP
 - 4.4 Team leaders are briefed on Incident Controller's intent and are tasked, in accordance with the IAP
 - 4.5 Specific tasks are reviewed and modified, as required
 - 4.6 Regular exchange of information is maintained within the chain of command on incident situation, progress, achievement of incident objectives and identified risks
 - 4.7 Unexpected situations that require a quick and decisive response are recognised and responded to in accordance with the Incident Controller's intent
 - 4.8 Situation reports are provided through the chain of command on required modification to the IAP, including additional resources required, surplus resources and hazards present
 - 4.9 Need for logistical support is identified and communicated through the chain of command
 - 4.10 IAP activities are coordinated with adjacent sectors
- 5 Manage post incident operations**
- 5.1 Resources are accounted for and demobilised, in accordance with organisational requirements
 - 5.2 Post operational documentation is completed, in accordance with organisational procedures
 - 5.3 Sector debriefing is conducted, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAOPE016A Manage a multi-team sector.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for PUAOPE016 Manage a multi-team sector

Modification History

Release 2.0 This is the second release of this unit of competency in the Public Safety Training Package.

Editorial adjustments and clarification of text in Assessment Conditions.

Release 1.0 This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- accessing information and support the chain of command
- adapting tactics
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- assessing effectiveness of strategies and tactics on sector or division
- briefing and debriefing personnel
- completing documentation
- conducting an assessment of the area of operation
- deploying and managing human and physical resources
- establishing command of sector or division
- following organisational policies and procedures
- identifying and assessing risks
- implementing operations portion of the incident action plan
- leading teams
- maintaining shared situational awareness
- making decisions, negotiating and resolving conflict
- managing and monitoring sector or division operations
- managing post incident operations including demobilisation arrangements
- providing reports through the chain of command
- using communications systems.

Knowledge Evidence

- Australasian Inter-service Incident Management System (AIIMS) structure
- constraints on actions that may limit available options
- equipment and personnel capabilities for incident type

- human and physical resources available for the incident
- incident action plan objectives, strategies and tactics including Incident Controller's intent
- incident site layouts
- initial response options
- organisational command structure
- organisational policies, procedures and documentation for managing operations
- post operational procedures
- processes for implementing, monitoring, amending and reviewing strategies and tactics
- requirements for reporting and recording
- risk assessment
- types of incidents
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in operational situations or in simulated operational training situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUASES008 Undertake storm and water damage operations

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to undertake storm and water damage operations as a member of a response team.

Flooding whether caused by slow river rise, storm water, storm surge or flash flooding, has a similar impact in terms of water damage. Techniques for minimising the effects of water entry into properties are common to storm, flood and other water damage events.

The unit applies to personnel responding as a member of a team to storm and/or water damage operations in rural and urban environments which can range in intensity and impact from localised thunderstorm or windstorm events to tropical cyclones. Evacuation and rescue by boat are not considered in this unit.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

SES Sector

Unit Sector

State/Territory Emergency Services

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for storm and water operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Operation and task information is obtained through situational awareness and command structure at an

incident site

- 1.2** Hazard identification, risk assessment and control measures are undertaken, in accordance with organisational policies and procedures
 - 1.3** Equipment is selected based on incident information and is checked to ensure it is ready for operational use
 - 1.4** Personal protective clothing and equipment is selected and appropriately worn
 - 1.5** Work area isolation methods are applied to ensure safety, in accordance with organisational policies and procedures
 - 1.6** Support for safe and timely evacuation is provided
- 2 Provide information which assists with operations**
- 2.1** Liaison with stakeholders is undertaken to provide information which increases awareness of incident situation, safety and to facilitate operational requirements
 - 2.2** Information is provided to crew/team leader
- 3 Undertake storm and water operations**
- 3.1** Safety is ensured when undertaking and completing operational tasks, by working safely in conjunction with other team members
 - 3.2** Debris is removed, cleared and/or controlled to minimise risk of injury and any further damage to structure and to ensure safe access to and from incident site
 - 3.3** Techniques for temporary repairs and/or improvised support are applied, in accordance with organisational procedures
 - 3.4** Sandbagging techniques are used to minimise further damage
 - 3.5** Water diversions are created to mitigate the effects of damage
 - 3.6** Support is provided to personnel undertaking roof repairs and/or working at height through the setup, placement and access to appropriate tools and equipment
 - 3.7** Trees causing a hazard to life or property are secured,

removed and/or reported, in accordance with organisational policies and procedures

4 Complete operations

- 4.1** Equipment is recovered, cleaned and serviced, in accordance with organisational procedures and manufacturers' guidelines
- 4.2** Equipment failure and/or deficiency is reported, in accordance with organisational procedures
- 4.3** Signs and symptoms of operational stress in self and others are recognised and reported to relevant personnel
- 4.4** Information for operational documentation and equipment logs is contributed to
- 4.5** Debriefing is participated in, as required, in accordance with organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUASES008A Undertake storm and water damage operations.

Links

Assessment Requirements for PUASES008 Undertake storm and water damage operations

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying work area isolation techniques
- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating with stakeholders about situational awareness, safety and operational requirements
- completing operations including participating in operational debriefs
- completing organisational documentation
- constructing sandbag barriers and temporary repairs
- identifying and using equipment and tools
- identifying hazards and implementing risk assessment and control measures
- meeting reporting requirements
- preparing for storm and water operations including using task information
- providing information which assists with operations
- recognising and reporting operational stress
- removing debris safely
- returning equipment to operational readiness after use
- supporting roof and height crews to complete operations
- taking precautions against electrical hazards
- undertaking situational awareness
- undertaking storm and water operations
- undertaking water diversions
- using initiative to operate effectively under direction
- using mitigation techniques to minimise and/or restrict water damage
- utilising temporary structural weather proofing techniques to minimise further damage and to make safe
- wearing appropriate personal protective clothing and equipment working safely

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- anchors either constructed or improvised characteristics and limitations of equipment and tools
- emergency public information and warning techniques
- equipment and tools including types of pumps and power tools suitable for use
- hazard identification and risk control techniques
- height operations
- legislation related to storm and water operations including entry into property and/or workplaces
- operational and task information requirements
- organisational documentation, policies and procedures
- organisational policies and procedures including performance standards, personnel roles and responsibilities and Work, Health and Safety (WHS)/Occupational Health and Safety requirements, practices and guidelines
- potential stakeholders
- processes and procedures for debriefings
- resources and techniques for communicating with the community
- safety principles and practices
- set up, placement and access to tools and equipment including using safe access techniques
- signs and symptoms of operational stress
- situational awareness processes
- storm and water damage mitigation techniques
- structural integrity
- support organisations and agencies
- water diversions techniques including earth walls, fabricated barriers, work area isolation, temporary repairs and sandbagging
- working at height systems

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that

reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations including
 - storm damage and flood mitigation operations and/or scenarios as a member of a team acting under direction and supervision
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - access to a response team
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to work with others whilst making a positive contribution to the effectiveness and efficiency of a team in a work environment, when under direct supervision. Limited responsibility towards others is required.

The unit applies to personnel working in public safety and is particularly pertinent to new staff in assisting with integration into the team culture of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Team work

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Contribute to team activities

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Roles and responsibilities of team members are recognised
- 1.2 Contribution is made to identifying team goals and objectives

- 1.3 Work activities are completed to required standards and within stated timeframes, in accordance with organisational policies and procedures
 - 1.4 Assistance in the completion of tasks is requested from other team members
 - 1.5 Team members are assisted to ensure efficient and safe completion of tasks, in accordance with organisational policies and procedures
 - 1.6 Participation by team members is encouraged and acknowledged
 - 1.7 Changes in allocated roles and responsibilities are implemented, in accordance with organisational procedures
 - 1.8 Team meetings are attended regularly, punctually and are contributed to, in accordance with organisational procedures
- 2 **Share knowledge and information**
 - 2.1 Information related to work is communicated with team members to enable efficient completion of tasks, in accordance with the organisational policies and procedures
 - 2.2 Knowledge and skills are shared between team members
- 3 **Give and receive support to or from team members**
 - 3.1 Feedback or assistance is given to other team members in an appropriate and timely manner
 - 3.2 Team members are supported in achieving organisational goals
 - 3.3 Feedback from other team members is acted upon, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUATEA001B Work in a team.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUATEA001 Work in a team

Modification History

Release 1. This is the first release of this unit of competency in the Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- attending and working in a variety of team situations
- completing organisational documentation
- contributing to organisational goals and team activities, team meetings and the achievement of tasks consistent with goals
- displaying interpersonal skills and encouraging team members
- following instructions
- following organisational policies and procedures
- giving and receiving support to and from team members
- identifying work conditions and types of activities to be undertaken
- listening and using a variety of communication skills
- providing appropriate suggestions, feedback and information to team members
- reporting information
- requesting assistance from appropriate personnel
- sharing knowledge and information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- composition of teams including roles and responsibilities of members
- nonoperational and operational communication processes
- organisational documentation, policies and procedures
- organisational goals and activities
- potential work task conditions
- techniques for assisting and supporting others
- techniques for giving and receiving feedback in a constructive manner
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

RIICAR301D Rehabilitate exploration site

Modification History

Release	Comment
1	This unit replaces RIICAR301A Rehabilitate exploration site
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to rehabilitate exploration sites in Drilling and Metalliferous mining.

This unit is appropriate for those in operational or technical specialist roles

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Drilling

Metalliferous mining

Elements and Performance Criteria

1. Plan and prepare for site rehabilitation	<p>1.1 Access, interpret and apply exploration site rehabilitation documentation and ensure the work activity is compliant</p> <p>1.2 Access, read, interpret and apply the rehabilitation plan and Environmental Work Procedures (EWP)</p> <p>1.3 Identify, address and report potential hazards and risks</p> <p>1.4 Select and wear personal protective equipment appropriate for the work activity</p> <p>1.5 Obtain map of area and identify location of sites to be rehabilitated</p>
---	---

	1.6 Establish communication system and protocols 1.7 Carry out rehabilitation plant and equipment pre-start checks
2. Rehabilitate exploration site	2.1 Assess and address hydrocarbon spills at drill site 2.2 Ensure saline or contaminated water sumps are completely dry 2.3 Identify and address waste materials according to rehabilitation plan and Environmental Work Procedures (EWP) 2.4 Operate plant and machinery to scarify all cleared areas 2.5 Retrieve cleared vegetation and return to rehabilitated site 2.6 Remove and dispose of all rubbish 2.7 Re-vegetate area, if required 2.8 Record rehabilitation details 2.9 Inspect rehabilitated site for compliance
3. Cap drill holes	3.1 Excavate hole collar to suitable depth 3.2 Pour excess drill chips into drill hole 3.3 Select and insert hole plug firmly into hole opening/collar, and ensure water ingress and future erosion is prevented 3.4 Backfill excavated soil onto plug and compact firmly, allowing for subsidence and run off 3.5 Peg hole site and mark with ID number
4. Rehabilitate access tracks	4.1 Remove all windrows 4.2 Scarify tracks 4.3 Retrieve cleared vegetation and restore to access track 4.4 Block or disguise the entrance to the track

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIICAR301A Rehabilitate exploration site

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIICAR301D Rehabilitate exploration site

Modification History

Release	Comment
1	This unit replaces RIICAR301A Rehabilitate exploration site
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of exploration site rehabilitation including:
 - selecting and using the required tools and equipment
 - correctly following rehabilitation procedures
 - identifying and applying hole-capping methods
- demonstrates completion of rehabilitating exploration sites that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - correctly interpreting a rehabilitation plan and Environmental Work Procedures
 - marking the location of sites to be rehabilitated on a map of the area
 - completing plant and equipment pre-start checks
 - identifying, recording and reporting hazards and risks
 - completing rehabilitation operations

Knowledge Evidence

The candidate must demonstrate knowledge in rehabilitating exploration sites through:

- relevant state or territory regulations
- rehabilitation principles and practices
- environmental work procedures

- types and operational characteristics of plant/equipment used in rehabilitation operations
- re-vegetation methods and types
- hole-capping methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors	

	assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.
--	--

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIICAR302D Rehabilitate small mine site

Modification History

Release	Comment
1	This unit replaces RIICAR302A Rehabilitate small mine site.
2	Editorial corrections. Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to rehabilitate small mine sites in Extractive and Metalliferous mining.

This unit is appropriate for those working in operational or technical specialist roles.

No licensing, legislation, or certification requirements apply to this unit at the time of publication.

Unit Sector

Extractive

Metalliferous mining

Elements and Performance Criteria

1. Plan and prepare for small mine site rehabilitation	<p>1.1 Access, interpret and apply small mine site rehabilitation documentation and ensure the work activity is compliant</p> <p>1.2 Access, read, interpret and apply the rehabilitation plan and Environmental Work Procedures (EWP)</p> <p>1.3 Identify rehabilitation and vegetation removal requirements</p> <p>1.4 Identify natural water flow/water courses around the site</p>
--	--

	<p>1.5 Ensure removal of all recoverable equipment no longer required</p> <p>1.6 Identify specific equipment, materials and operations required</p> <p>1.7 Identify, address and report hazards</p> <p>1.8 Identify plan to minimise rehabilitation time and residual damage</p>
2. Rehabilitate site	<p>2.1 Apply WHS procedures and information throughout the work</p> <p>2.2 Identify and address site environmental concerns</p> <p>2.3 Select and use correct equipment and materials</p> <p>2.4 Remove abandoned materials and rubbish from site</p> <p>2.5 Restore surface in accordance with rehabilitation plan</p> <p>2.6 Remove residual mullock to designated location</p> <p>2.7 Establish run-off and drainage channels</p> <p>2.8 Maintain communication systems and protocol</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIICAR302A Rehabilitate small mine site

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIICAR302D Rehabilitate small mine site

Modification History

Release	Comment
1	This unit replaces RIICAR302A Rehabilitate small mine site.
2	Editorial corrections. Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for safe, effective and efficient small mine site rehabilitation including:
 - selecting and using the required tools and equipment
 - correctly following rehabilitation procedures
- demonstrates completion of rehabilitating small mine sites that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - correctly interpreting a rehabilitation plan and Environmental Work Procedures
 - identifying, recording and reporting hazards and risks
 - completing rehabilitation operations
 - correctly operating and using equipment and materials

Knowledge Evidence

The candidate must demonstrate knowledge in small mine site rehabilitation through:

- identifying non-native plants
- relevant internal and external bodies

- accessing, reading and interpreting written material appropriate for local conditions
- graphic information
- identifying faults
- procedures for the disposal of environmentally sensitive fluids and materials
- planning for rehabilitation
- ground-water procedures and handling

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years

Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.
---------------	--

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIENV401E Supervise dust and noise control

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to supervise dust and noise control in the resources and infrastructure industries.

It applies to those working in supervisory roles. They are generally responsible for the output of others, contribute to the development of technical solutions to non-routine problems and apply management plans to the workplace.

Licensing, legislative and certification requirements may apply to this unit and can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Access and share requirements and procedures	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to supervise dust and noise control 1.3 Communicate clearly to relevant personnel 1.4 Explain the health and environmental implications of non-conformance to all relevant personnel
2. Plan and implement site requirement	2.1 Plan control measures and work practices with colleagues to ensure compliance 2.2 Implement control measures and work practices to ensure compliance 2.3 Plan and implement dust and noise monitoring according to workplace procedures 2.4 Identify dust and noise control training needs and implement training as required
3. Monitor, adjust and	3.1 Identify, rectify and report actual/potential dust and noise problems

ELEMENT	PERFORMANCE CRITERIA
report	<p data-bbox="555 304 1136 338">promptly and decisively to ensure compliance</p> <p data-bbox="507 349 1347 416">3.2 Manage activities so that potential non-compliance issues are minimised</p> <p data-bbox="507 427 1442 495">3.3 Submit recommendations on improvements in dust and noise control according to workplace procedures</p> <p data-bbox="507 506 1430 573">3.4 Inform individuals/teams of the results of improvements in dust and noise control</p> <p data-bbox="507 584 1318 651">3.5 Maintain systems, written records and reporting procedures according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul data-bbox="517 1021 1394 1088" style="list-style-type: none"> • Identifies and interprets information from workplace procedures, policies, documentation and systems
Oral communication	<ul data-bbox="517 1111 1433 1211" style="list-style-type: none"> • Presents information or assistance using industry specific vocabulary • Uses listening and questioning to clarify and confirm understanding
Problem solving	<ul data-bbox="517 1234 1449 1335" style="list-style-type: none"> • Identifies a range of factors that impact on a decision, including own values and principles, the needs, power, values, beliefs and assumptions of stakeholders

Unit Mapping Information

Supersedes and is equivalent to RIIENV401D Supervise dust and noise control.

Links

Companion Volume implementation guides is found on VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIENV401E Supervise dust and noise control

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- supervise dust and noise control on at least two occasions, including:
 - accessing and interpreting compliance documentation
 - investigating and implementing control measures
 - implementing dust and noise monitoring
 - processing written reports and records
 - identifying recommendations and communicating to the work team.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for supervising dust and noise control
- work effectively with others to supervise dust and noise control in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to supervise dust and noise control
- key policies, procedures and documentation required to supervise dust and noise control
- the organisation and site requirements and procedures
- harmful dust and noise levels

- the health and environmental implication of non-conformance
- potential dust and noise problems
- dust and noise control measures
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to supervising dust and noise control
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes

Companion Volume implementation guides is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

RIIHAN309F Conduct telescopic materials handler operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to conduct telescopic materials handler operations.

This unit applies to those working in site-based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

Unit Sector

Coal mining

Extractive

Metalliferous mining

Drilling

Civil Infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for telescopic materials handler operations	1.1 Access, interpret and apply telescopic materials handler documentation 1.2 Obtain, interpret, clarify and confirm work requirements 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	activities 1.5 Identify, obtain and apply signage requirements in line with workplace procedures 1.6 Select required telescopic materials handler equipment or attachments and confirm the suitability of the work activities 1.7 Coordinate and communicate planned activities with other at the site prior to commencement of work activity
2. Operate telescopic materials handler in line with established requirements	2.1 Perform pre-start and start-up check in line with workplace procedures 2.2 Check telescopic materials handler controls, brakes, attachments and other implements for manoeuvrability and serviceability and ensure faults are rectified or reported within scope of own responsibility and according to workplace procedures 2.3 Assess site and operating hazards and apply safe operating techniques 2.4 Operate telescopic materials handler using techniques suited to equipment capabilities, site and work conditions, and according to workplace procedures
3. Attach, secure, lift, carry and place materials to complete work activity	3.1 Use load handling communication methods as per standard operating procedures with all parties 3.2 Communicate with dogman to establish the weight of the load 3.3 Communicate with dogman to ensure safe working load requirements have been assessed and appropriate slings and lifting gear has been selected, attached and secured in line with workplace procedures 3.4 Locate machinery to ensure stable and effective shift of materials according to work requirements 3.5 Shift the load safely and effectively, using hand, audible and communication signals, in line with workplace procedures 3.6 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
4. Select, remove, fit and use attachments for a telescopic materials handler	4.1 Select attachment for the task and move and fit attachment in line with workplace procedures 4.2 Test and confirm correct fitting and operation 4.3 Use attachment within design limits and in accordance with

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace procedures 4.4 Remove, clean and store attachment in line with workplace procedures
5. Relocate the telescopic materials handler	5.1 Prepare machine and equipment for relocation in line with safe work practices 5.2 Transport machine and equipment safely between worksites, observing relevant site codes and traffic management requirements
6. Conduct housekeeping activities	6.1 Clean-up work area and dispose or recycle materials according to workplace procedures. 6.2 Manage and/or report hazards to maintain a safe working environment 6.3 Complete and file or distribute documentation in a manner that complies with workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skill	Description

Assessment Requirements for RIIHAN309F Conduct telescopic materials handler operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of telescope materials handler operations that safely, effectively and efficiently follow workplace procedures to carry out work activity on at least two occasions, and include:

- performing pre-start, start-up and shutdown procedures
- checking controls, brakes and attachments for manoeuvrability and serviceability and rectifying or reporting faults
- operating the telescopic materials handler
- attaching and securing appropriate lifting gear
- shifting the load
- selecting, fitting, testing, using and removing attachments, which must be certified and approved in line with workplace procedures
- transporting the machine and equipment between work sites
- parking and securing equipment

In the course of the above the candidate must also:

- locate and apply required documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting potential hazards and environmental issues, and assess risks
- access, interpret and apply technical information
- apply fault finding techniques
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with telescopic materials handler operations

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for telescopic materials handler operations, including those relating to:

- isolation and traffic control responsibilities and authorities
- safety data sheet and hazardous materials handling methods
- development and compliance with job safety analyses and safe work method statement
- maintenance and basic diagnostic
- recyclable materials
- housekeeping activities
- environmental management plan

Key factors affecting work activities described in performance evidence above, including:

- telescopic materials handler types, characteristics, technical capabilities and limitations
- calculating safe working loads
- methods of changing machine attachments
- safe operating techniques in varying terrain
- telescopic materials handler and attachment operating techniques

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - telescopic materials handler
 - attachments
 - personal protective equipment
- be conducted in a safe environment and,
- be assessed in context of this sector's work environment and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed and
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided, and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant	

	regulation.
--	-------------

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMEX201E Suppress dust in open-cut environments

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to suppress dust in open-cut environments in coal mining, metalliferous mining and extractive industries. It involves carrying out and adjusting dust suppression activities based on the site's application schedule and prevailing weather conditions.

The unit applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take some responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Unit Sector

Coal mining

Extractive

Metalliferous mining

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for dust suppression	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply dust suppression documentation 1.3 Select and wear personal protective equipment required for work activities 1.4 Identify potential hazards and environmental issues,

ELEMENT	PERFORMANCE CRITERIA
	implement control measures within scope of own role and escalate where required 1.5 Obtain and interpret emergency procedures and identify steps required to respond to emergencies 1.6 Select, access and interpret appropriate dust suppression procedure for the work activity and site conditions 1.7 Carry out pre-start and start-up according to manufacturer specifications and site requirement
2. Apply dust suppressant and rehabilitation measures	2.1 Apply selected dust suppression methods according to site requirements 2.2 Adjust dust suppression activities to the application schedule and weather conditions 2.3 Communicate and coordinate activities with others prior to, during and on completion of the work activity 2.4 Confirm dust creation is minimised 2.5 Apply rehabilitation measures to stabilise dumps and tailings sites
3. Carry out post-operational procedures for suppressing dust	3.1 Carry out park up, shutdown and secure equipment procedures according to manufacturer specifications and site requirements 3.2 Carry out operator maintenance and servicing according to manufacturer specifications and site requirements 3.3 Complete records and reports according to site requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Calculates basic measurements including mass and dimensions
Oral communication	<ul style="list-style-type: none"> Conveys information and requirements clearly and listens actively
Reading	<ul style="list-style-type: none"> Identifies and interprets specific information from workplace documentation
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none">• Completes records and reports using sector specific vocabulary, grammatical structures and conventions

Unit Mapping Information

Supersedes and is equivalent to RIIMEX201D Suppress dust in open-cut environment.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for RIIMEX201E Suppress dust in open-cut environments

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- suppress dust in open-cut environments on at least two occasions, including:
 - identifying situations requiring dust suppression, including any hazards and environmental considerations
 - applying rehabilitation measures to stabilise dumps and tailings sites.

During the above, the candidate must:

- locate and apply required documentation, policies and procedures
- implement the requirements, procedures and techniques to suppress dust safely, effectively and efficiently in an open-cut environment, including:
 - using vehicle directions and signals
 - applying equipment operating requirements and procedures
 - identifying and addressing hazards
 - interpreting plans, reports, maps and specifications
 - working while wearing protective equipment
- work effectively with others to undertake and complete dust suppression in an open-cut environment that meets the required outcomes, including:
 - communicating with others to receive and clarify work instructions
 - completing written and verbal records and reports
 - applying decision making and troubleshooting techniques.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- policies, procedures and documentation required to suppress dust in open-cut environments, including those relating to:
 - basic geological and technical data relating to rock formations
 - environmental protection
 - fire, accident and emergency
 - personal protective equipment
 - site maintenance records and reporting requirements
 - site operational, quality and communication requirements
 - site product characteristics
 - work health and safety
- types, characteristics, technical capabilities and limitations of plant and equipment required to suppress dust in open-cut environments, including:
 - pre-start, start-up and operating techniques
 - isolation and shutdown procedures
- principles, methods and techniques for suppressing dust in open-cut environments, including:
 - interpreting plans, reports, maps and specifications
 - interpreting required data
 - applying rehabilitation measures to stabilise dumps and tailing sites
 - using vehicle directions and signals.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - an environment where dust prevention is required
 - dust prevention equipment
 - simulated or actual documentation of work requirements and reports
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

***While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO206D Conduct bulk water truck operations

Modification History

Release	Comments
1	This unit replaces RIIMPO206B Conduct bulk water truck operations. Performance Criteria amended to make requirements more explicit; Manoeuvring, Driving and Parking Up added; Operator Maintenance element added.
2	Modification History added.
3	Editorial corrections; removed repetition from Performance Criteria; amend reference to Licensing requirements in Unit Application.
4	Performance Criteria 3.6 amended for clarity. Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Performance Criteria 3.6 and Performance Evidence grammatical corrections. No new content.

Application

This unit describes a participant's skills and knowledge required to conduct bulk water truck operations in the Coal and Metalliferous mining and Extractive.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Extractive

Coal mining

Metalliferous mining

Elements and Performance Criteria

<p>1. Plan and prepare for bulk water truck operations</p>	<p>1.1 Access, interpret and apply bulk water truck operations documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify and address potential risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for work activities</p> <p>1.5 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency</p>
<p>2. Operate truck</p>	<p>2.1 Carry out pre-start, start-up, park-up, shutdown, and secure equipment procedures</p> <p>2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity</p> <p>2.3 Select and modify the operating technique to appropriately meet changing work conditions</p> <p>2.4 Drive truck within recommended speed, engine capability and limitations</p> <p>2.5 Act on or report monitoring systems and alarms</p> <p>2.6 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p>
<p>3. Load, haul and distribute water</p>	<p>3.1 Position water cart at load and discharge/distribution points</p> <p>3.2 Load water cart to within the authorised carrying capacity and to suit the site and task conditions</p> <p>3.3 Carry out water haulage operations efficiently, safely and smoothly avoiding surge and sway</p> <p>3.4 Discharge/distribute water efficiently in accordance with requirements and procedures</p> <p>3.5 Monitor and maintain discharge and distribution systems throughout the operations</p> <p>3.6 Complete the work plan within the operating capacity of the equipment</p>
<p>4. Carry out machine operator maintenance</p>	<p>4.1 Prepare machine for maintenance</p> <p>4.2 Conduct inspection and fault finding</p> <p>4.3 Carry out scheduled maintenance tasks</p> <p>4.4 Return machine to service</p>

	4.5	Process written maintenance records
5. Conduct housekeeping activities	5.1	Clear work area and dispose of or recycle materials
	5.2	Manage/report hazards, and maintain a safe working environment
	5.3	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

No equivalent unit

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIMPO206D Conduct bulk water truck operations

Modification History

Release	Comments
1	This unit replaces RIIMPO206B Conduct bulk water truck operations. Performance Criteria amended to make requirements more explicit; Manoeuvring, Driving and Parking Up added; Operator Maintenance element added.
2	Modification History added.
3	Editorial corrections; removed repetition from Performance Criteria; amend reference to Licensing requirements in Unit Application.
4	Performance Criteria 3.6 amended for clarity. Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Performance Criteria 3.6 and Performance Evidence grammatical corrections. No new content.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of bulk water truck operations including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - carrying out vehicle refuelling requirements and procedures
 - driving and operating the vehicles and equipment to site conditions and requirements

- applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
- applying problem solving and troubleshooting techniques
- works effectively with others to undertake and complete bulk water truck operations that meets all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - complying with written and verbal reporting requirements and procedures
- demonstrates completion of conducting bulk water truck operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - correctly positioning water cart at load and discharge/distribution points and load water cart to capacity
 - distributing water efficiently across haul roads
 - adjusting driving and operating techniques to suit the work environment and ground conditions
 - completing a minimum of 500 metres bulk water truck operations

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting bulk water truck operations:

- identifying equipment processes, technical capability and limitations
- identifying, interpreting and using geological and technical data (basic)
- using mine operational systems
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- applying chemical and fuel safety measures
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,

- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

RIIMPO317F Conduct roller operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 3.3.

Application

This unit describes the skills and knowledge required to operate a roller to compact material.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare roller operations	1.1 Access, interpret and apply roller operations documentation 1.2 Obtain, interpret, clarify and confirm work requirements 1.3 Identify hazards and environmental issues, assess the risks and implement control measures in line with workplace policies 1.4 Select and wear personal protective equipment required for work

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	activities 1.5 Identify, obtain and implement traffic management signage requirements according to standard operating procedures and safe work practices 1.6 Select required roller equipment and confirm suitability for work activities 1.7 Obtain and interpret emergency procedures for rollers, and be prepared for fires, accidents and emergencies 1.8 Coordinate and communicate planned activities with others at the site prior to commencement of work activity
2. Operate roller in line with established requirements to complete work activity	2.1 Carry out prestart and start-up checks in line with workplace procedures 2.2 Identify faults or defects and rectify or report within scope of own responsibility and according to workplace procedures 2.3 Drive and operate roller using techniques suited to equipment capabilities, site and work conditions, and according workplace procedures 2.4 Perform work activity within the operating capacity of the equipment 2.5 Adjust accesories in line with workplace procedures 2.6 Engage and disengage the compacting device 2.7 Identify, remove or manage contaminants in a safe manner incorporating safe work practices 2.8 Monitor hazards and risks during operations, and ensure safety of self, other personnel, plant and equipment 2.9 Monitor and manage equipment performance using indicators and alarms 2.10 Park up, shut down, secure and carry out post operational inspection of equipment in line with workplace procedures
3. Prepare to relocate the roller	3.1 Prepare the roller for relocation 3.2 Move the machine safely within and/or between work areas, observing relevant codes and traffic management requirements 3.3 Assist loading and unloading machine from float/trailer as required by workplace procedures

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
4. Conduct housekeeping activities	4.1 Clear work area and dispose or recycle materials according to workplace procedures 4.2 Manage and/or report hazards to maintain a safe working environment 4.3 Complete and file or distribute documentation in a manner that complies with workplace practices

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Skill	Description
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Numeracy	<ul style="list-style-type: none"> Uses equipment operating capacity schedule to confirm safe weight load limits

Assessment Requirements for RIIMPO317F Conduct roller operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 3.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of roller operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations using at least two different material types and include the mandatory tasks of:
 - compacting materials to pattern and density
 - sealing and finishing
 - adjusting at least two of the following:
 - interchangeable drums
 - spray bars
 - scraper bars
 - wheel/drum brooms
 - drag brooms
 - blades
- assisting with loading and unloading unit plant type from float/trailer
- parking and securing of equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures

- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply operating techniques for levelling and compacting
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for roller operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- operational, maintenance and basic diagnostics
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- personal protective equipment
- recyclable materials
- housekeeping activities
- machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations

- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - roller
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO318F Conduct civil construction skid steer loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 5.3.

Application

This unit describes the skills and knowledge required operate a skid steer loader to load, haul and distribute materials.

This unit applies to those working in site based roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

Assessment Requirements for RIIMPO318F Conduct civil construction skid steer loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 5.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment to site conditions
- completion of operations to specification using at least two different material types (i.e. one different material per occasion) including:
 - stripping/spreading materials
 - backfilling
 - excavations
 - mixing materials
- selecting, fitting, testing, using and removing attachments on at least two occasions (i.e. one attachment per occasion), the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
 - multipurpose bucket
 - forks
 - dozer blade
 - backhoe
 - auger
 - chain digger
 - power broom
 - profiler

- tiller/mixer
- rotary hoe
- hammer
- asphalt cutter/saw
- concrete cutter/saw
- rake
- assisting with loading and unloading skid steer loader from float/trailer
- safely parking and securing equipment

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operations, including those relating to:

- isolation requirements for skid steer loader
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment

- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - a skid steer loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment

- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Assessment Requirements for RIIMPO319E Conduct backhoe/loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	This version was released with RII Resources and Infrastructure Industry Training Package Version 7.1. Editorial amendments to Performance Evidence to clarify task requirements.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of loader/backhoe operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types (i.e. one different material type per occasion) including:
 - mixing materials
 - stripping/spreading materials
 - trench excavation
 - backfilling
 - lifting and carry materials
 - loading dump trucks, wagons, hoppers or chutes
 - cutting/boxing
- selecting, fitting, testing, using and removing at least two attachments (i.e. one attachment per occasion), which must be certified and approved in line with workplace procedures and could include, but are not limited to, the following:
 - extending devices
 - tilt bucket
 - buckets

- compaction wheel
- ripper
- plate compactor
- rock breaker
- auger
- broom
- mower/slasher
- forklift
- 4 in 1 bucket and free/rock grab
- parking and securing of equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- select and use the required tools and equipment
- work safely around other machines and personnel
- apply methods of changing machine attachments
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements
-

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for backhoe/loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities

- project quality requirements
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - backhoe/loader
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided

- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of excavator operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to site conditions
- completing operations to specification using at least two different material types and activities including:
 - loading, cutting/boxing
 - stripping/spreading
 - lifting and carry materials
 - bulk excavation
 - mixing/backfilling
 - trench excavation
 - stockpiling
 - battering
 - benching
 - site clean up

- selecting, fitting, testing, using and removing at least three attachments, the attachment must be certified and approved in line with workplace procedures and could include, but not limited to, the following:
 - tilt bucket
 - buckets
 - lifting device
 - vibrating compaction wheel
 - ripper/tyne
 - compaction plate
 - compaction wheel
 - rock breaker
 - auger
 - ground engaging tools
- assisting with loading and unloading plant type from float/trailer
- parking and securing equipment

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues
- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- select and use the required tools and equipment
- apply methods of changing machine attachments
- establish weight of load
- manage changes in the loads centre of gravity during transportation
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for excavator operations, including those relating to:

- isolation requirements

- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - excavator
 - attachments
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being	

	assessed and, where no industry standard is specified, should comply with any relevant regulation.
--	--

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIMPO321F Conduct civil construction wheeled front end loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Application

This unit describes the skills and knowledge required to conduct wheeled front end loader operations.

This unit applies to those working in site- based roles.

Where equipment being assessed requires the fitting and removal of attachments to be demonstrated an integrated tool carrier unit should be used.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors, and must be sourced from state jurisdictions prior to applying this unit.

This unit alone does not provide sufficient skill to independently load and unload equipment. To perform this activity safely, personnel must either complete or be assisting someone who has completed RIIHAN308F Load and unload plant or equivalent.

Unit Sector

Civil infrastructure

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

Assessment Requirements for RIIMPO321F Conduct civil construction wheeled front end loader operations

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial corrections.
Release 3	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of wheeled front end loader operations that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating the equipment, and adjusting techniques to suit site conditions
- completion of operations to specification using at least two different material types including:
 - mixing materials
 - stripping/spreading materials
 - loading, cutting/boxing
 - backfilling
- lifting and carrying materials
- assisting with loading and unloading wheeled front end loader from float/trailer
- site clean-up on
- parking and securing equipment.

In the course of the above the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- apply safe work practices, identifying and reporting all potential hazards, risks and environmental issues

- apply problem solving and troubleshooting techniques when operating equipment
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply levelling techniques
- establish weight of load
- select and use the required tools and equipment
- use a range of communication techniques and equipment essential to the safe completion of work activity, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with equipment operations
- organise work activities to meet all task requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for front end loader operations, including those relating to:

- isolation requirements
- fires, accidents and emergencies
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- chain of responsibility for loading and unloading of equipment
- operational, maintenance and basic diagnostics
- personal protective equipment
- recyclable materials
- housekeeping activities

Key factors affecting work activities described in performance evidence above, including:

- equipment processes, technical capability and limitations
- drawings and sketches
- ground conditions
- materials characteristics, including density and viscosity

Key features associated with civil construction works, including:

- civil construction terminology
- basic principles of material technology and material compaction for civil works
- basic earthworks calculations
- civil construction activity sequences of road construction, earthworks and drainage.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - wheeled front end loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Assessment Requirements for RIIMPO335E Conduct skid steer loader operations without attachments

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 3.0.
Release 2	Editorial and other amendments made to clarify requirements in Application and Performance Criteria 4.3.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements and performance criteria of this unit.

The candidate must demonstrate completion of skid steer loader operations without attachments that safely, effectively and efficiently follows workplace procedures to carry out work activity on at least two occasions, and include:

- conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
- driving and operating skid steer loader, and adjusting techniques to suit site conditions
- shifting loads to the correct location, carrying them as close to the ground as possible
- performing at least one of the following skid steer loading tasks on each occasion (i.e. two different tasks in total):
 - stripping and spreading materials
 - backfilling
 - loading vehicles
 - excavations
 - mixing materials
 - site clean up
 - lifting and carrying materials
 - using communication methods to confirm activity, direction of travel, and process to safely move and transport load
 - shifting and placing materials
- assisting with loading and unloading skid steer loader from float/trailer
- park up, shut down and prepare machine for maintenance

In the course of the above work the candidate must also:

- locate and apply relevant documentation, policies and procedures
- select and wear personal protective equipment required for work activities
- carry out vehicle refuelling requirements and procedures where applicable
- apply safe work practices and identify and report potential hazards and environmental issues, and assess risks
- monitor and manage equipment performance using indicators and alarms
- identify common equipment faults
- apply problem solving and troubleshooting techniques when operating equipment
- select and use required tools and equipment
- inspect and prepare work area
- manage changes in the loads centre of gravity during transportation
- use a range of communication techniques and equipment essential to the safe completion of work instruction, including hand, audible and other signals
- meet written and verbal reporting requirements and procedures associated with skid steer loader operations

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes:

Key policies and procedures, legislation and established requirements for skid steer loader operation without attachments, including those relating to:

- materials handling using safety data sheets
- environmental protection
- fire, accident and emergency
- work health and safety, including signs of operator fatigue and how it should be managed
- site isolation and traffic control responsibilities and authorities
- project quality requirements
- maintenance and basic diagnostics
- housekeeping activities
- personal protective equipment
- chain of responsibility for loading and unloading of equipment
- machine guidance systems

Key factors affecting work activities described in performance evidence above, including:

- technical capabilities and limitations
- equipment specifications
- ground conditions
- type and weight of load
-

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - a skid steer loader
 - materials to be shifted
 - personal protective equipment
- be conducted in a safe environment; and,
- be assessed in context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 Year
	2	2 Years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 Years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the RII Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIISAM203E Use hand and power tools

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to use hand and power tools in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of own work outcomes.

Licensing, legislative and certification requirements may apply to this unit and can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare to use hand and power tools	1.1 Obtain, interpret, and confirm work requirements 1.2 Access, interpret and apply documentation and procedures 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Select and wear personal protective equipment required for work activity 1.5 Obtain and interpret emergency procedures, and be prepared for emergency situations
2. Select and use hand tools	2.1 Select hand tools appropriate for the work activity 2.2 Inspect tools for serviceability and report faults 2.3 Clamp or fix materials in position for hand tool application according to workplace procedures 2.4 Use hand tools safely and correctly

ELEMENT	PERFORMANCE CRITERIA
	2.5 Store hand tools safely when not in immediate use
3. Select and use power tools	3.1 Select power tools and equipment appropriate for the work activity 3.2 Inspect tools for serviceability and report faults 3.3 Inspect power leads and hoses for serviceability and report faults 3.4 Establish a clear route for the safe placement and connection of power leads and hoses 3.5 Clamp or fix material in position for power tool application according to workplace procedures 3.6 Use power tools safely and correctly 3.7 Store power tools safely when not in immediate use
4. Conduct housekeeping activities	4.1 Clear work area and dispose of materials 4.2 Clean, maintain and inspect the serviceability of the equipment, and address and report any issues to relevant personnel 4.3 Complete written records and reports according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> Calculates resource requirements, including use of basic addition, subtraction, multiplication and division
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities

Unit Mapping Information

Supersedes and is equivalent to RIISAM203D Use hand and power tools.

Links

Companion Volume Implementation Guides is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIISAM203E Use hand and power tools

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use hand and power tools on at least two occasions, including:
 - selecting and checking hand tools and power tools for serviceability
 - clamping or fixing material
 - ensuring power leads and cords are safely placed
 - using hand and power tools appropriately for the job activity
 - storing the hand and power tools appropriately when not in use
 - clearing the work area
 - cleaning and maintaining equipment.

During the above, the candidate must:

- locate and apply relevant documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques required to use hand and power tools
- work with others to undertake the use of hand and power tools
- communicate with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key policies, procedures and documentation required to use hand and power tools, including those relating to:
 - work health and safety procedures

- environmental issues
- emergency procedures
- compliance with safety data sheets and required records
- equipment types, characteristics, technical capabilities and limitations, including:
 - hand tools, including:
 - cutting tools
 - tightening tools
 - impact tools
 - digging tools
 - measuring tools
 - clamping tools
 - portable power tools, including:
 - hammers
 - saws
 - drills
 - screwdrivers
 - grinders
 - wrenches
 - planers
 - sanders
 - scalers
 - associated materials with hand and power tool use
- energy and power sources
- use of industry and worksite terminology.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal and protective equipment
 - equipment required to use hand and power tools
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should	

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
	be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIISAM205E Cut, weld and bend materials

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Application

This unit describes the skills and knowledge required to cut, weld and bend materials in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements may apply to this unit and can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare to cut, weld and bend materials	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to cut, weld and bend materials 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Identify and implement signage and barricade requirements 1.6 Select appropriate plant, tools and equipment for the job, inspect them for serviceability and rectify or report any faults prior to commencement of work activities

ELEMENT	PERFORMANCE CRITERIA
	1.7 Calculate material quantity requirements in accordance with plans and specifications within scope of own job role 1.8 Obtain and interpret emergency procedures and be prepared for emergency situations
2. Set up and test equipment	2.1 Select, locate and ensure accessibility to the fire extinguisher prior to and during operations according to workplace procedures 2.2 Attach regulators to Oxy and Acetylene bottles according to manufacturer specifications 2.3 Purge lines prior to lighting up according to manufacturer specifications 2.4 Test equipment for leaks and undertake corrective action or report faults to relevant personnel according to workplace procedures 2.5 Select correct pressures and cutting tips
3. Cut material using oxyacetylene	3.1 Measure and mark material, and secure the material for cutting according to workplace procedures 3.2 Light torch according to manufacturer specifications 3.3 Adjust setting of flame for cutting according to workplace procedures 3.4 Ensure correct cutting position during cutting to set out mark according to workplace procedures
4. Cut and weld materials using electric welding equipment	4.1 Complete and verify test runs according to workplace procedures 4.2 Complete welding and cutting according to workplace procedures 4.3 Clean welds using appropriate tools and techniques according to workplace procedures 4.4 Confirm weld and cut specifications by visual inspection and defects identified and repair according to workplace procedures
5. Heat and bend material	5.1 Measure and mark material, and secure the material for bending 5.2 Light torch according to manufacturer specifications 5.3 Control heat to specified material and minimise weakening effects of the heating process 5.4 Bend material to specification and cool correctly according to workplace procedures
6. Shutdown	6.1 Switch off torch according to manufacturer specifications 6.2 Shut off gas supply according to manufacturer specifications
7. Clean up	7.1 Clear work area and dispose of materials according to workplace procedures 7.2 Clean and maintain the plant and equipment, inspect for ensure serviceability and rectify or report any faults or issues to relevant personnel 7.3 Process written maintenance records according to workplace

ELEMENT	PERFORMANCE CRITERIA
	procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation and regulations
Writing	<ul style="list-style-type: none"> Produces and completes written documents required for workplace procedures and legislative requirements
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities

Unit Mapping Information

Supersedes and is equivalent to RIISAM205D Cut, weld and bend materials.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for RIISAM205E Cut, weld and bend materials

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- cut, weld and bend materials on at least two occasions, including:
 - identifying and matching cutting equipment with job task
 - setting up oxyacetylene, electric welding and bending equipment in the correct sequence
 - testing the equipment
 - accurately marking and securing or clamping the material ready for bending and cutting
 - lighting the torch correctly and safely
 - adjusting the setting of flame for cutting
 - controlling the heat of the torch to suit the materials being bent
 - adopting correct cutting position during cutting to set out mark
 - welding and cutting materials cleanly
 - cleaning and visually inspecting the welds for defects
 - bending materials to job task requirements
 - shutting down the torch and gas supply in sequence.

During the above, the candidate must:

- locate and apply relevant documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for cutting, welding and bending materials
- work effectively with others to cut, weld and bend materials in a way that meets all required outcomes

- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key policies, procedures and documentation required to cut, weld and bend materials
- principles and techniques for cutting, welding and bending materials, including:
 - types
 - techniques
 - characteristics
 - use
 - limitation
 - plant and equipment
- principles and techniques for steel fixing, including:
 - types
 - materials
 - properties
 - terminology
- principles and techniques for identifying types, characteristics, uses and limitations of manual metal arc welding, oxyacetylene, LPG heating and cutting equipment types
- principles and techniques for the calculation of material requirements
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to cutting, welding and bending materials
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert	

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
	experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

RIIWH202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare for working in confined space	<p>1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant</p> <p>1.2 Obtain, confirm, clarify and apply work instructions and agreed procedure</p> <p>1.3 Obtain, confirm, clarify and apply safety requirements</p>
--	---

	<p>1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements</p> <p>1.5 Confirm the emergency response procedure is with the stand-by person and understood</p> <p>1.6 Identify, obtain and implement signage and barrier requirements</p> <p>1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults</p> <p>1.8 Identify, confirm and apply the environmental protection requirements</p> <p>1.9 Position rescue equipment by the entry permit</p>
2 Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Ensure that the atmosphere is tested and monitored for harmful elements</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space correctly</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3 Exit confined space	<p>3.1 Exit confined space correctly</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined space</p> <p>3.4 Secure access to the confined space</p> <p>3.5 Remove tagging and lock-out</p> <p>3.6 Accurately complete confined space entry permit</p>
4 Clean up	<p>4.1 Clear work area and dispose of or recycle materials</p> <p>4.2 Clean, check, maintain and store tools and equipment</p> <p>4.3 Remove, clean and store barriers and signs</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS202A Entering and working in confined spaces

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIIWHS202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - obtain appropriate entry permit and instructions for performing work in confined space
 - interpreting and applying safe work method statements
 - apply tagging and lock out
 - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
 - entering the confined space
 - using atmospheric monitoring devices prior to entering the confined space
 - working in the confined space
 - using atmospheric monitoring devices during confined space activity
 - applying safe materials handling methods
 - exiting the confined space
 - remove tagging and lock out

Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWH5202E Enter and work in confined spaces

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Application

This unit describes the skills and knowledge required to enter and work in confined spaces in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for working in confined space	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to enter and work in confined spaces 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Obtain and confirm authorisation of a confined space entry permit

ELEMENT	PERFORMANCE CRITERIA
	<p>that meets regulatory requirements</p> <p>1.5 Select and wear appropriate personal protective equipment for planned work activities</p> <p>1.6 Obtain and interpret emergency procedures with the stand-by person, and be prepared for emergency situations</p> <p>1.7 Identify, obtain and implement signage and barrier requirements according to workplace procedures</p> <p>1.8 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults to relevant personnel</p> <p>1.9 Position rescue equipment by the entry permit</p>
2. Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Test and monitor the atmosphere for harmful elements according to workplace procedures</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space according to workplace procedures</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3. Exit confined space	<p>3.1 Exit confined space according to workplace procedures</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined spaces according to workplace procedures</p> <p>3.4 Remove tagging and lock-out procedures</p> <p>3.5 Complete confined space entry permit requirements according to workplace procedures</p>
4. Clean up	<p>4.1 Clear work area and dispose of materials according to workplace procedures</p> <p>4.2 Remove, clean and store barriers and signs</p> <p>4.3 Conduct equipment inspections to identify faults according to manufacturer specifications and workplace procedures and report to relevant personnel</p> <p>4.4 Conduct routine operational servicing, lubrication and housekeeping activities according to workplace procedures</p> <p>4.5 Process written maintenance records according to workplace procedures</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none">Identifies and interprets information from workplace procedures, documentation and regulations
Writing	<ul style="list-style-type: none">Produces and completes written documents required for workplace procedures
Self-management	<ul style="list-style-type: none">Monitors and minimises own exposure to worksite risks and hazards during activities
Oral communication	<ul style="list-style-type: none">Uses a range of communication techniques and systems to communicate with others

Unit Mapping Information

Supersedes and is equivalent to RIIWHS202D Entering and working in confined spaces.

Links

Companion Volume Implementation Guide is found on VETNet -

Assessment Requirements for RIIWHS202E Enter and work in confined spaces

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.
Release 2	Minor amendment to Knowledge Evidence to correct typographical error.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- enter and work in confined spaces on at least two occasions, including:
 - obtaining the required entry permit and instructions for performing work in confined spaces
 - interpreting and applying workplace procedures
 - applying tagging and lock out procedures
 - selecting, wearing and caring for personal protective equipment
 - using atmospheric monitoring devices prior to entering the confined space
 - entering the confined space
 - working in the confined space
 - using atmospheric monitoring devices during confined space activity
 - applying safe materials handling methods
 - exiting the confined space
 - removing tagging and lock out.

During the above, the candidate must:

- locate and apply relevant legislation, documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for entering and working in confined spaces
- work effectively with others to enter and work in confined spaces in a way that meets all required outcomes

- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation relevant to enter and work in confined spaces
- key policies, procedures and documentation required to enter and work in confined spaces, including:
 - entry and exit procedures, risks and regulations
 - site and equipment safety requirements
 - site isolation and site control responsibilities and authorities
 - safety data sheets
 - incidents and emergency response documentation
- principles and techniques for identifying and responding to:
 - areas that constitute confined spaces
 - types of air contaminants and toxic gases
 - limitations of breathing apparatus
 - relevant hazards and emergencies
- equipment types, characteristics, technical capabilities and limitations
- principles and techniques for using confined space and industry terminology
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to entering and working in confined spaces
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert	

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
		experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to work safety at heights in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Identify work requirements	<p>1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant</p> <p>1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards</p>
-------------------------------	--

	<p>1.3 Adhere to WHS requirements</p> <p>1.4 Identify, select and check safety equipment for serviceability</p> <p>1.5 Identify, manage and report potential risks and hazards</p>
2. Identify work procedures and instructions	<p>2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability</p> <p>2.2 Select, wear and care for personal protective equipment</p> <p>2.3 Inspect/install fall protection and perimeter protection equipment</p> <p>2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights</p> <p>2.5 Ensure safety system has been installed correctly</p> <p>2.6 Select and install appropriate signs and barricades</p>
3. Access and install equipment	<p>3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted</p> <p>3.2 Ensure all required equipment is installed</p> <p>3.3 Use recommended methods to access work area for people, tools and equipment</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate</p> <p>4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with authorised personnel to ensure safety system is dismantled and removed</p> <p>5.2 Clear work area and dispose of or recycle materials</p> <p>5.3 Clean, check, maintain and store tools and equipment</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

Assessment Requirements for RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risk associated with working at heights and implement control methods
 - selecting wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
 - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials

- complying with equipment manufacturer’s instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWH204E Work safely at heights

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to work safely at heights in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work under supervision to undertake a prescribed range of functions involving known routines and procedures and take responsibility for the quality of work outcomes.

Licensing, legislative and certification requirements that apply to this unit can vary between states, territories and industry sectors. Users must check requirements with relevant body before applying the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Obtain, interpret and confirm work requirements 1.2 Access, interpret and apply documentation required to work safely at heights 1.3 Identify and address potential risks, hazards and environmental issues, and implement control measures according to workplace procedures 1.4 Inspect worksite to determine layout and physical condition, condition of structures and equipment requirements 1.5 Adhere to legislative requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>1.6 Select appropriate plant, tools and equipment for the job, inspect them for serviceability and rectify or report any faults prior to commencement of work activities</p> <p>1.7 Select and wear personal protective equipment appropriate for work activities</p> <p>1.8 Obtain and interpret emergency procedures, and be prepared for emergency situations</p>
2. Identify work procedures and instructions	<p>2.1 Consult with relevant personnel to select materials, tools and equipment required for the work activities</p> <p>2.2 Inspect and install fall protection and perimeter protection equipment</p> <p>2.3 Identify methods of moving tools and equipment to the work area according to workplace procedures</p> <p>2.4 Ensure the safety system has been installed according to workplace procedures</p> <p>2.5 Select and install appropriate signs and barricades according to workplace procedures</p>
3. Access and install equipment	<p>3.1 Consult with relevant personnel to ensure anchor fall protection and associated equipment is fitted and adjusted according to workplace procedures</p> <p>3.2 Ensure all required equipment is installed according to workplace procedures</p> <p>3.3 Access work area for people, tools and equipment according to workplace procedures</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe according to workplace procedures</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment according to workplace procedures</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed according to workplace procedures</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate according to workplace procedures</p> <p>4.7 Reassess risk control measures, as required, in accordance with workplace procedures and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with relevant personnel to ensure safety system is dismantled and removed according to workplace procedures</p> <p>5.2 Clear work area and dispose of materials</p>

ELEMENT	PERFORMANCE CRITERIA
	5.3 Clean and maintain the plant and equipment, inspect for ensure serviceability and rectify or report any faults or issues to relevant personnel 5.4 Process written maintenance records according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation and regulations
Self-management	<ul style="list-style-type: none"> Monitors and minimises own exposure to worksite risks and hazards during activities
Oral communication	<ul style="list-style-type: none"> Uses a range of communication techniques and systems to communicate with others

Unit Mapping Information

Supersedes and is equivalent to RIIWH5204D Working safely at heights.

Links

Companion Volume implementation guides is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIWHS204E Work safely at heights

Modification History

Release	Comments
Release 1	This version first released with RII Resources and Infrastructure Industry Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- work safely at heights on at least two occasions, including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risks associated with working at heights and implementing control methods
 - selecting, wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking the correct fitting, adjusting and anchoring of fall protection and associated equipment
 - performing work safely at heights.

During the above, the candidate must:

- locate and apply relevant documentation, policies and procedures and confirm that the work activity is compliant
- implement the requirements, procedures and techniques for working safely at heights
- work effectively with others to work safely at heights in a way that meets all required outcomes
- communicate clearly and concisely with others to receive and clarify work instructions and to determine coordination requirements prior to commencing and during work activities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key legislation required to work safely at heights

- key policies, procedures and documentation required to work safely at heights, including:
 - statutory and regulatory authority requirements
- principles and techniques for work safely at heights, including:
 - heights safety systems
 - safe work methods
- principles and techniques for identifying names and functions of equipment, components and materials
- principles and techniques for complying with equipment manufacturer instructions and specifications
- safe shifting and handling of tools and materials
- principles and techniques for identifying relevant hazards and emergencies
- techniques for coordinating and communicating job activities with others.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - personal protective equipment
 - equipment related to working safely at heights
 - relevant documentation
- be conducted in a safe environment; and,
- be assessed in the context of this sector's work environment; and,
- be assessed in compliance with relevant legislation/regulation and using policies, procedures and processes directly related to the industry sector for which it is being assessed; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment

- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Infrastructure	1	1 year
	2	2 years
Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Infrastructure	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation.	

*Guidance on simulated environments has been stipulated in the Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

RIIWH5205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWH5205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Application

This unit describes the skills and knowledge required to control vehicle and pedestrian traffic using stop-slow bats, hand signals and approved communication devices in the resources and infrastructure industries.

It applies to those working in operational roles. They generally work in teams in live traffic environments under some degree of supervision.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented registered training organisations are advised to contextualise the unit of competency by referring to the existing state/territory OHS legislative requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to control traffic	1.1 Select and wear personal protective equipment required for work activities 1.2 Access, interpret and confirm work instructions and plan work 1.3 Access, interpret and apply required workplace policies, procedures, jurisdictional safety and environmental protection requirements 1.4 Obtain and interpret site emergency procedures and prepare for accidents and emergencies 1.5 Select tools and equipment, check for serviceability, and rectify faults and report according to workplace policies and procedures
2. Control traffic and operate	2.1 Adjust approved communication devices according to site

communication devices	<p>requirements</p> <p>2.2 Direct traffic using hand held stop-slow bat and visibly clear and unobstructed hand signals as required</p> <p>2.3 Monitor traffic, make adjustments for changing traffic conditions and position waiting vehicles as required</p> <p>2.4 Communicate messages to other personnel, confirm recipient understanding and clarify as required</p> <p>2.5 Check and perform maintenance on approved communication devices according to requirements</p> <p>2.6 Check communications contact after nominated period of non-contact</p> <p>2.7 Report traffic offenders according to workplace policies and procedures</p>
3. Conduct housekeeping activities	<p>3.1 Confirm and remove signs and devices in line with job requirements and cover as required</p> <p>3.2 Clean, check and store tools and equipment</p> <p>3.3 Report environmental damage and potential for future damage as required</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	<ul style="list-style-type: none"> Applies basic mathematical problem solving processes, including simple addition, subtraction, multiplication and division
Oral communication	<ul style="list-style-type: none"> Listens to short, explicit instructions for work procedures and asks questions to clarify and confirm
Reading	<ul style="list-style-type: none"> Identifies and interprets information from workplace procedures, documentation, legislation and regulations
Technology	<ul style="list-style-type: none"> Identifies purposes, specific functions and key features of common digital systems and tools and operates them as required
Writing	<ul style="list-style-type: none"> Produces and completes workplace reports using appropriate vocabulary, grammatical structures and conventions

Unit Mapping Information

Supersedes and is equivalent to RIIWHS205D Control traffic with stop-slow bat.

Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIWHS205E Control traffic with stop-slow bat

Modification History

This unit replaces RIIWHS205D Control traffic with slow-stop bat. Significant endorseable amendments have been made to Elements, Performance Criteria, Foundation Skills, Performance Evidence and Knowledge Evidence to better reflect current industry practices and clarify training outcomes.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Control traffic with a stop-slow bat according to traffic guidance schemes in a manner that is safe and follows workplace policies and procedures on at least two occasions, including:
 - directing pedestrian traffic, including at least one of the following:
 - ~ pedestrians with mobility issues
 - ~ pedestrians with prams
 - ~ cyclists
 - using approved communication devices to transmit message and report traffic offenders, including the use of at least one of the following devices:
 - ~ hand held radios
 - ~ telephones.

During the above, the candidate must:

- coordinate operations with pilot vehicle in a shuttle flow work arrangement
- participate in risk assessment and management processes
- identify the type and scope of hazards and their impact and recommend risk control measures
- identify key environmental protection issues and describe required solutions
- locate and complete at least one incident report
- complete housekeeping requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- risk assessment processes and hierarchy of control
- work instructions and procedures for planning work
- jurisdictional safety requirements relevant to temporary traffic management

- environmental protection requirements
- site emergency procedures
- site and equipment safety requirements
- traffic control requirements and procedures for directing the following pedestrian traffic groups:
 - pedestrians with mobility issues
 - pedestrians with prams
 - cyclists
- traffic guidance scheme and traffic management plan compliance
- communication device operations, including:
 - hand held radios
 - telephones
- traffic control equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- site isolation and traffic control responsibilities and authorities
- the effects of travel speed and vehicle mass on stopping distances.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
 - stop-slow bat
 - personal protective equipment
 - hand held radio or telephone
- be conducted in a safe environment; and
- be assessed in context of this sector's work environment on a real live road setting under supervision; and
- be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and
- confirm consistent performance can be applied in a range of relevant workplace circumstances

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

Assessor Requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory competency standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/Australian Quality Training Framework mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements. This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing a high level of RII training product knowledge
- having an understanding and knowledge of legislations and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence as outlined in this unit of competency, and
- the minimum years of current** work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must hold the relevant vocational competencies and have current industry skills directly relevant to the training and assessment being provided and must work alongside a trainer and/or assessor to conduct the assessment. This means the industry subject matter expert should hold the unit being assessed (or an equivalent unit), and must also demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

Industry sector	AQF indicator level***	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 year
	2	2 years
Drilling, Coal Mining and Extractive (Quarrying), Metalliferous Mining and Civil Construction	3-6	3 years
Other sectors	Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any	

	relevant regulation.
--	----------------------

*Guidance on simulated environments has been stipulated in the RII Companion Volume Implementation Guide located on VETNet.

**Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

*** While a unit of competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.

SFICRO302 Conduct crocodile surveys

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to plan and conduct crocodile field surveys in natural crocodile habitats.

The unit applies to individuals who work under broad direction to collect information about crocodile activity in Australian waterways.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Unit Sector

Crocodile (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan crocodile field survey activity	1.1 Determine crocodile management program aims and the importance of records 1.2 Determine crocodile field survey objectives and site location(s)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Plan logistic and supply requirements according to location, duration and size of crocodile surveying field trip</p> <p>1.4 Access maps, photographs or global positioning system (GPS) or other available data</p> <p>1.5 Determine crocodile field survey activity incorporating teamwork, humane treatment of crocodiles and waterway safety procedures</p> <p>1.6 Determine legislation and regulations, biosecurity and environmental standards, and risks and contingencies associated with crocodile survey activity</p> <p>1.7 Select and prepare equipment and supplies according to field survey objectives</p>
2. Carry out crocodile field survey activity	<p>2.1 Prepare vehicle(s) and load equipment and supplies</p> <p>2.2 Locate crocodile field survey site and conduct survey activity according to timeframes and crocodile waterway safety procedures</p> <p>2.3 Communicate with team members while conducting designated roles</p> <p>2.4 Maintain accurate raw data, including accurate crocodile size estimates during field survey activity</p> <p>2.5 Minimise environmental impact and biosecurity risks during crocodile field survey activity</p>
3. Finalise crocodile field survey activity	<p>3.1 Unload, clean and check equipment for faults</p> <p>3.2 Report any faults to appropriate personnel and store as per workplace requirements</p> <p>3.3 Complete required documentation according to field survey requirements</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description

Skill	Description
Reading	<ul style="list-style-type: none"> Interpret technical information relating to crocodile species
Writing	<ul style="list-style-type: none"> Use appropriate technical information to document survey findings relating to crocodile species
Oral communication	<ul style="list-style-type: none"> Communicate clearly, concisely and in a culturally sensitive manner

Assessment Requirements for SFICRO302 Conduct crocodile surveys

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- planned and conducted at least three crocodile survey activities
- documented data relating to crocodile survey activities on at least three occasions.

In doing the above, there must also be evidence that the individual has:

- worked effectively in a team
- followed crocodile risk and safety standards
- treated crocodiles humanely
- complied with legislation and regulation associated with crocodiles
- complied with biosecurity and environmental standards.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- crocodile survey data on:
 - population
 - habitat
 - nesting
 - sizes of crocodiles
- resources required to scope crocodile data:
 - data collection equipment
 - cyber tracking devices
 - global positioning system (GPS)
 - suitable software applications to record crocodile data
 - cyber tracking devices

- drones
- crocodile waterway safety procedures
- risk factors working with crocodiles and around crocodiles
- appropriate action if confronted by an aggressive crocodile
- culturally sensitive communication protocol
- team protocol during collection of data via survey:
 - roles of team members
 - importance of interaction between team members
 - the use of appropriate communication methods
- crocodile management program or policy aims, including:
 - maintenance of a healthy population of saltwater crocodiles in their natural habitat
 - promotion of the saltwater crocodile as a natural resource that has economic use and benefit if used sustainably
 - respect for the cultural values of the Indigenous population's crocodile management
 - management of concentrated numbers in areas where there is a high risk to people, livestock and pets
 - provision for crocodile awareness and information in parks, reserves and conservation areas
 - working with other government groups, business and industry to make locals and visitors aware of crocodiles
 - encouragement for everyone to be responsible in activities near the natural environment of crocodiles
- state and territory legislation, regulations and codes of practice associated with crocodile habitats and crocodile activity
- key features of biosecurity guidelines for crocodile waterways, including not contaminating waterways:
 - survey data documenting and processing methods.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to crocodile waterways
 - equipment and supplies to undertake field survey in crocodile habitats
- specifications:
 - crocodile safety documentation, policies and procedures
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO305 Prepare to work with crocodiles

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to prepare to work with crocodiles.

The unit applies to individuals who prepare for work with crocodiles on farms, research facilities, wildlife parks or in crocodile habitats. While this unit relates mostly to saltwater crocodiles, it also entails comparisons with other crocodile species.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Unit Sector

Crocodiles (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify key features of crocodile anatomy and physiology	1.1 Determine the key physical characteristics of saltwater and freshwater crocodiles

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Identify the key features and functions of crocodile anatomy 1.3 Source information about common crocodile health issues
2. Identify behavioural patterns of different crocodile species	2.1 Identify the key drivers that affect crocodile behaviour 2.2 Identify key behavioural characteristics of saltwater and freshwater crocodiles
3. Determine and follow safety requirements in crocodile habitats	3.1 Source information about features of crocodile habitats 3.2 Identify key risk factors in crocodile habitats 3.3 Use appropriate communication method to inform relevant personnel and/or members of the public to obey crocodile warning signs and follow safety procedures
4. Access information about crocodile operations in controlled environments	4.1 Determine the reasons for crocodile farming and the importance of crocodile skin quality 4.2 Identify reasons for crocodile research and the functions of a crocodile research facility 4.3 Determine the reasons for caring for crocodiles in a wildlife park 4.4 Identify crocodile handling requirements when working with crocodiles in controlled environments
5. Identify legislation, regulations and management programs relating to the protection of crocodiles	5.1 Determine appropriate crocodile and animal protection legislation/regulation and codes of practice 5.2 Identify and observe crocodile management program aims 5.3 Determine biosecurity issues associated with working with crocodiles in controlled environments and in the wild

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Communicate clearly, concisely and in a culturally sensitive manner

Unit Mapping Information

Assessment Requirements for SFICRO305 Prepare to work with crocodiles

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- observed crocodile operational and safety requirements on farms, wildlife parks, research facilities or crocodile habitats on at least five different occasions.

In doing the above, there must be evidence that the individual has:

- identified the differences in crocodile species
- identified risks associated with working with crocodiles
- followed legislation/regulation and codes of practice associated with crocodiles
- followed biosecurity guidelines
- located and applied required documentation, policies and procedures
- communicated appropriately and respectfully with others.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- species of crocodylians around the world, including:
 - Indo-Pacific/estuarine/saltwater crocodiles – *Crocodylus porosus*
 - freshwater crocodiles – *Crocodylus johnstoni*
 - alligators and caimans
 - gharials
- the characteristics of saltwater crocodiles and freshwater crocodiles
- key features of crocodile anatomy
- crocodile behavioural patterns
- key drivers that affect crocodile behaviour
- crocodile health issues, including:

- diseases
- thermal stress – where the animal is unable to thermoregulate correctly
- capture stress – when the animal is caught and handled
- social stress – arising out of competition and the inability of adults to establish a territory (e.g. enclosure too small, densities too high)
- low temperatures causing impediments to food digestion
- environmental hygiene
- risk factors working with crocodiles and around crocodiles
- crocodile waterway safety procedures
- the use of appropriate communication methods
- culturally sensitive communication protocol
- crocodile management program or policy aims, including:
 - ecological maintenance of a large and healthy population of saltwater crocodiles living in their natural habitat
 - promotion of the saltwater crocodile as a natural resource that has economic use and benefit if used sustainably
 - respect for the cultural values of the Indigenous population with regard to crocodile management
 - management of concentrated numbers in areas where there is a high risk to people, livestock and pets
 - provision for crocodile awareness and information in parks, reserves and conservation areas
- reasons for crocodile farming:
 - crocodile skin/leather to produce goods with emphasis on skin quality
 - crocodile meat
- crocodile research facility purposes:
 - to expand knowledge about crocodiles as a species
 - to assist with the profitability and sustainability of commercial crocodile production
- reasons for caring for crocodiles in wildlife parks:
 - education
 - conservation
 - research
 - tourism
- state and territory legislation, regulations and codes of practice associated with crocodile waterways and crocodile welfare
- biosecurity guidelines for Australian waterways and crocodile-controlled environments.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:

- skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to a crocodile farm, wildlife park, research facility or crocodile habitat
- specifications:
 - crocodile safety documentation, policies and procedures
- relationships:
 - relevant personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO306 Work safely in crocodile habitats

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to work safely in crocodile habitats.

The unit applies to individuals who work in various industries, capacities and roles where crocodiles are found.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Assessment Requirements for SFICRO306 Work safely in crocodile habitats

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has followed safe crocodile habitat procedures on at least two occasions.

In doing the above, there must also be evidence that the individual has:

- identified the differences in crocodile species
- treated crocodiles humanely
- adhered to all crocodile risk and safety standards and notices
- observed legislation and regulations associated with crocodiles
- complied with biosecurity guidelines.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the existence of different ‘crocodilian’ species, including:
 - Indo-Pacific/estuarine/saltwater crocodiles – *Crocodylus porosus*
 - freshwater crocodiles – *Crocodylus johnstoni*
- the characteristics of saltwater crocodiles and freshwater crocodiles
- crocodile behavioural patterns
- key drivers that affect crocodile behaviour
- use of communication equipment
- culturally sensitive communication protocol
- state and territory legislation, regulations and codes of practice associated with crocodile habitats and crocodile welfare and activity
- environmental biosecurity guidelines
- crocodile habitat safety procedures.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - access to crocodile habitats
- specifications:
 - crocodile safety material.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO401 Manage minor crocodile incidents in the wild

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to manage minor incidents relating to human interactions with crocodiles. This does not include managing incidents with human fatalities. It includes working with various agencies in relation to the incidents.

The unit applies to individuals who work with crocodiles in crocodile habitats. While this unit relates mostly to saltwater crocodiles, it may also entail incidents with other crocodile species.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Assessment Requirements for SFICRO401 Manage minor crocodile incidents in the wild

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has:

- managed at least five simulated minor crocodile incidents
- conducted at least one simulated media interview.

In doing the above, there must also be evidence that the individual has:

- complied with crocodile risk and safety standards
- treated crocodiles humanely
- complied with biosecurity and health and safety guidelines
- communicated with relevant parties.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- risk factors in crocodile habitats
- types of potential incidents involving crocodiles
- potential hazards and risks at the site of a crocodile incident:
 - crocodile weight and size (if it is still at the scene or in the vicinity)
 - other crocodiles in the vicinity
 - unpredictable behaviour
 - environmental hazards and contamination
 - peoples' actions
- basic features of incident management system, including:
 - roles of team members, including medical personnel
 - chain of command and communication
 - sequence of action to be followed

- incident zones – hot, warm, cold
- incident barricade procedures
- briefing and debriefing processes
- media communication:
 - getting background information about the interview/key areas of focus/the interviewer
 - preparing by mapping out key message(s)
 - staying factual in information delivery, not speculating
 - explaining events in a manner that can be understood by the audience
 - remaining even-tempered
 - not answering hypothetical questions
- agency liaison, including:
 - medical
 - government
 - national parks
- safe working practices, including:
 - personal protective equipment (PPE)
 - hygiene and biosecurity procedures
 - basic manual handling techniques
- biosecurity guidelines for crocodile habitats, including not contaminating waterways
- culturally sensitive communication protocol.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources:
 - policies relating to media interviews
- specifications:
 - crocodile safety documentation, codes of practice, policies and procedures
- relationships:
 - relevant parties.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SFICRO403 Capture, transport and release crocodiles

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Application

This unit of competency describes the skills and knowledge required to use recognised manual manipulation techniques to capture, transport and release a crocodile working in a team. While this unit relates mostly to saltwater crocodiles, it may also entail incidents with other crocodile species

The unit applies to individuals who work as team members to assist in crocodile operational activity.

All work must be carried out to comply with workplace procedures, according to state/territory health and safety, biosecurity and environmental regulations, legislation and standards that apply to the workplace and the capture and release of crocodiles.

Licences or permits may be required for the use of firearms or restricted drugs on crocodiles or if operating vehicles.

Pre-requisite Unit

Nil

Unit Sector

Crocodiles (CRO)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for capture, transport and release of a crocodile	1.1 Identify appropriate legislation/regulation and codes of practice for safe and humane capture, transport and release of crocodiles 1.2 Discuss the different methods of capture, transport and release

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>depending on the crocodile's size with relevant personnel</p> <p>1.3 Discuss team roles for capturing, transporting and releasing crocodiles with relevant personnel</p> <p>1.4 Select and fit appropriate personal protective equipment (PPE) and check first aid kit is complete</p> <p>1.5 Prepare operational equipment required for the capture, transport and release of crocodiles, incorporating safety, biosecurity, environmental and regulatory requirements</p> <p>1.6 Conduct a full rehearsal of the operation and establish the required communication processes according to workplace procedures</p>
2. Capture a crocodile	<p>2.1 Prepare the crocodile trap or device to be used for crocodile capture</p> <p>2.2 Locate crocodile to be captured and estimate its length</p> <p>2.3 Monitor crocodile behaviour and consult with appropriate personnel to determine if chemical restraint is required</p> <p>2.4 Capture the crocodile according to standard operating procedures (SOPs)</p> <p>2.5 Restrain the crocodile's jaw according to SOPs to prevent the animal from striking or lunging</p> <p>2.6 Cover the crocodile's eyes to limit sight and calm the animal</p> <p>2.7 Load the crocodile according to workplace procedures and safe work practices</p>
3. Transport a crocodile	<p>3.1 Prepare crocodile for transport according to workplace transport and biosecurity SOPs</p> <p>3.2 Monitor crocodile behaviour and vitals at all stages and maintain situational awareness to ensure safety of self, others and crocodile, and report any abnormal conditions or crocodile behaviour to appropriate personnel</p> <p>3.3 Maintain transport environment in a manner that is conducive to crocodile welfare and according to the appropriate crocodile code of practice</p>
4. Use manual manipulation techniques to move a crocodile	4.1 Safely manoeuvre the crocodile to the agreed location using appropriate equipment and physical effort in a haul team when required

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.2 Cooperate and communicate with team members to ensure safety and minimal stress to the crocodile
5. Release a crocodile	5.1 Remove crocodile constraints according to SOPs, maintaining safe work practices and avoiding unnecessary stress to the crocodile 5.2 Reposition crocodile in a planned location and monitor during recovery phase
6. Review and debrief information relating to crocodile capture, transport and release	6.1 Participate in crocodile capture, transport and release debrief session 6.2 Discuss processes and identify possible procedural improvements with team members or appropriate personnel

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Provide brief and clear procedural information Communicate in a culturally sensitive manner

Assessment Requirements for SFICRO403 Capture, transport and release crocodiles

Modification History

Release	Comments
Release 1	This version released with SFI Seafood Industry Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has worked in a team:

- capturing, transporting and releasing at least five crocodiles.

In doing the above, there must also be evidence that the individual has:

- complied with crocodile risk and safety standards
- treated crocodiles humanely
- worked in a team environment
- used appropriate equipment correctly
- complied with regulation associated with crocodile care
- complied with biosecurity guidelines and environmental standards
- communicated with relevant parties.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types of equipment and how to use, including:
 - vehicles
 - rescue straps/webbing, ropes, slings
 - harpoons
 - glide mats or similar improvised equipment
 - head/eye protection for crocodiles
 - wooden dowel
 - first aid kit
 - tape
 - traps, cages or other crocodile relocation devices

- key features of crocodile anatomy and physiology, including:
 - different crocodile species size
 - the animal's sensory organs
 - the animal's muscular jaw
 - the animal's muscular tail
- techniques involved in the manoeuvring of crocodiles, including:
 - roles of team members, including first aiders
 - communication
 - sequence of action to be followed
- variations to methods in crocodile capturing techniques depending on the size of the crocodile
- ways to restrain crocodiles, including:
 - using a crocodile trap with a gate that is secured and is appropriate for a large crocodile
 - working in a team that enables operators to restrain a crocodile and secure its jaws
 - covering the crocodile's eyes to limit sight so as to calm the animal
 - hauling the crocodile into the transport vehicle using the appropriate haulage methods for a large crocodile
 - when to seek advice from appropriate personnel regarding the use of chemical restraint
- crocodile habitat safety procedures, including:
 - never swimming or wading through any water in northern Australian waterways
 - only crossing rivers at shallow water sites or rocky areas in the narrowest section, no more than 30 cm (knee deep)
 - carrying some form of communication equipment
 - being careful when walking through long grass and when near banks
- appropriate action if confronted by an aggressive crocodile:
 - maintain sight of crocodile while retreating as rapidly as possible
 - raise the alarm and identifying location of crocodile to others
 - ensure all team members are accounted for and uninjured
 - use communication systems to inform others
- state and territory regulations and codes associated with crocodile habitats and crocodile activity
- biosecurity guidelines for crocodile habitats:
 - not contaminating waterways
 - observing standard operating procedures (SOPs)
- culturally sensitive communication protocol.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - crocodiles
 - equipment required for manual manipulation techniques
- specifications:
 - crocodile safety documentation, codes of practice, policies and procedures
- relationships:
 - team members.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Maintain stock handling and storage

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Maintain cleanliness of stock handling and storage areas.
- 1.2.Ensure correct environmental conditions for storage of

- areas. perishable and other stock to prevent loss or damage as required.
- 1.3. Remove and dispose of waste to minimise safety risks and environmental impacts.
 - 1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.
 - 2.1. Check incoming stock quantities against order documentation.
 - 2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.
 - 2.3. Record stock delivery, and report discrepancies with orders as required.
 - 2.4. Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.
 - 2.5. Store or display stock promptly in designated location.
 3. Replenish stock levels.
 - 3.1. Rotate, replenish and present stock according to organisational requirements for stock levels.
 - 3.2. Record stock waste or shrinkage according to organisational procedures.
 - 3.3. Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - plain English documents that outline organisational policies and procedures for stock control
 - basic order and delivery documentation and stock labels.
- Numeracy skills to:
- calculate stock levels.
- Planning and organising skills to:
- complete stock control activities in a logical and time efficient sequence.
- Technology skills to:
- use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
 - receive and process incoming stock
 - store retail stock
 - maintain retail stock levels
 - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
 - stock quality is poor
 - stock quantity errors
 - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
 - rotation and replenishment
 - product life cycle
- organisational stock control policies and procedures for:
 - receiving stock from suppliers
 - recording incoming stock
 - recording and reporting stock discrepancies and quality issues
 - recording stock waste and shrinkage
 - stock quality standards
 - unpacking, storage and display of stock
 - damaged or missing stock

- key features of retail products that relate to handling and storage:
 - handling techniques to minimise damage
 - general care
 - optimum storage conditions
 - features of damaged or spoiled stock
 - correct disposal methods
- safe manual handling techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
 - delivery dockets
 - orders
 - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRINV002 Control stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor stock receipt and dispatch.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.
- 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

- correctly.
- 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
 - 1.4. Act on variations to quantity and quality of delivered stock.
 - 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.
 - 2.1. Monitor stock and maintain stock at required levels.
 - 2.2. Maintain, monitor and adjust stock reorder cycles as required.
 - 2.3. Provide clear information to team members about individual stock recording responsibilities.
 - 2.4. Maintain stock storage and movement records.
 - 2.5. Record and report stock discrepancies.
 - 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.
 - 3.1. Process and raise stock orders according to organisational procedures.
 - 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
 - 3.3. Liaise with suppliers to ensure continuity of supply.
 - 3.4. Resolve routine supply problems or refer to appropriate personnel for action.
 - 3.5. Distribute stock within the organisation according to required allocations.
 - 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.
 - 4.1. Regularly check storage of stock and ensure its protection.
 - 4.2. Identify, record and report stock losses.
 - 4.3. Identify avoidable losses and establish reasons for them.
 - 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.
 - 5.1. Explain procedures for stocktake and cyclical counts to team members.
 - 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
 - 5.3. Provide team members with clear directions for performance of each task.
 - 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.
Numeracy skills to:	<ul style="list-style-type: none">calculate:<ul style="list-style-type: none">supplier costs and complex order costscomplex details of stock on hand and stock losses and produce complex numerically-based reportsreconcile incoming stock and invoices against purchase orders.

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
 - receipt
 - dispatch
 - ordering
 - stock level monitoring
 - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - receipt and dispatch of goods, including inspection for quantity and quality
 - stock ordering and reordering
 - stock replenishment
 - stock rotation
 - reporting of stock discrepancies, damage and loss
 - safe transport, handling and storage of goods
 - stock control
 - stocktaking and cyclical counts
 - pricing, labelling and packaging
 - stock security
- key aspects of legislation and codes of practice relevant to stock control:
 - Australian Consumer Law
 - Work Health and Safety (WHS)

- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
 - rotation and replenishment
 - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER001 Produce visual merchandise displays

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to display retail merchandise. It requires the ability to prepare, produce and maintain merchandise displays in accordance with visual merchandising requirements.

This unit applies to all businesses that sell retail merchandise. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller businesses, senior personnel might also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Prepare to produce visual merchandise display.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Review visual merchandising display guidelines, and seek clarification as required.
- 1.2. Obtain merchandise, materials and equipment required for

- the display.
- 1.3. Prepare product labels and price tickets from in-house documents and according to organisational requirements.
 - 1.4. Unpack merchandise according to manufacturer instructions.
2. Display merchandise.
- 2.1. Produce display following visual merchandising display guidelines.
 - 2.2. Ensure merchandise is displayed according to manufacturer instructions where specific requirements for display and storage exist.
 - 2.3. Display merchandise labels and price tickets according to organisational requirements.
 - 2.4. Handle and move stock and equipment according to safe manual handling guidelines to prevent injury to self.
 - 2.5. Promptly return excess stock to storage area, and store according to organisational requirements.
 - 2.6. Check and ensure area around the display remains clear of debris.
3. Maintain display.
- 3.1. Review displays against visual merchandising display guidelines, and refine as required.
 - 3.2. Maintain clear and correct product and pricing information for merchandise.
 - 3.3. Identify damaged or out of date stock, and remove from display as required.
 - 3.4. Rotate and replenish merchandise to maintain optimum stock levels.
 - 3.5. Monitor the display regularly to maintain appearance and cleanliness of display and display area.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret plain English documents that outline organisational policies and procedures related to display of merchandise.
- Numeracy skills to:
- estimate dimensions of display areas and appropriate size of displays from display documentation.
- Planning and organising skills to:
- prepare for display and complete display activities in a logical and time-efficient sequence.
- Technology skills to:
- prepare product labels and price tickets.

Unit Mapping Information

Assessment Requirements for SIRRMER001 Produce visual merchandise displays

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines and organisational procedures to prepare and produce three merchandise displays, from the following list, of varying sizes and complexities:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- maintain each of the above displays and display area, adequate stock level and appearance of display.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- basic principles of visual merchandising as they relate to producing retail visual merchandise displays
- visual merchandise display guidelines and how they are used in creating a retail displays
- organisational procedures for:
 - correct manual handling techniques for protection of self and merchandise
 - correct storage of merchandise and equipment
 - damaged or out of date stock
 - maintenance of display areas
 - merchandise rotation and replenishment
 - product labelling and pricing
 - unpacking merchandise.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a range of retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- organisational visual merchandise display guidelines
- organisational procedures for:
 - manual handling techniques for protection of self and merchandise
 - storage of merchandise and equipment
 - damaged or out of date stock
 - maintenance of display areas
 - merchandise rotation and replenishment
 - product labelling and pricing
 - unpacking merchandise
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Coordinate visual merchandise requirements.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Access and interpret organisational visual merchandising guidelines, and policies and procedures.
- 1.2. Communicate visual merchandising standards and display

- requirements to team members.
- 1.3. Plan appropriate timing for producing and dismantling visual merchandise displays.
 - 1.4. Communicate roles and responsibilities for visual merchandising to team members.
 - 1.5. Plan and coordinate promotional and special event displays as directed by management.
2. Supervise visual merchandise activities.
 - 2.1. Supervise construction and maintenance of displays to achieve balance and visual impact.
 - 2.2. Ensure display information accurately depicts product or service being promoted.
 - 2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow.
 - 2.4. Ensure displays meet organisational standards and visual merchandise guidelines.
 - 2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.
 3. Review impact of visual merchandise activities.
 - 3.1. Evaluate promotions or special event displays and determine impact on sales results.
 - 3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Problem solving skills to: • overcome difficulties relevant to the display of merchandise.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- for each of the above visual merchandising activities:
 - communicate requirements with team members
 - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
 - types of displays and their impact

- display location
- display lighting
- display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
 - customer complaints
 - profitability
- safe work practices for displaying merchandise with particular emphasis on:
 - safe use of equipment
 - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
 - price
 - features
 - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
 - organisational visual merchandise display guidelines
 - organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
 - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- team members; these can be:
 - individuals in an industry workplace, or

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
 - customers from diverse backgrounds
 - resolution of two routine customer problems
 - provision of accurate information to address two general customer enquiries
 - referral of unresolved customer enquiry
 - use of effective communication techniques and positive body language.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
 - open and closed questioning
 - paraphrasing
 - effective listening
 - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
 - positive customer service
 - poor customer service

- organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- customers from a diverse range of backgrounds; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to manage the use of social media platforms to interact with customers and promote products and services.

It applies to individuals working in customer service management roles in a diverse range of industry sectors and business contexts that have a social media presence. They operate independently with some responsibility for decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Marketing

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Prepare to use social media.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Review organisational social media requirements and policies and procedures.
- 1.2. Research various social media platforms, and identify and compare their audience, functionality and reach.

- 1.3. Research emerging trends in social media platform use.
- 1.4. Select social media platforms that meet brand needs and reach target customer.
- 1.5. Source information and content from internal and external sources for use on social media platforms
- 1.6. Develop content in line with target audience, brand cultures and social media requirements as required.
- 1.7. Source or create a social media calendar.
2. Use social media to enhance customer engagement.
 - 2.1. Create opportunities to attract and promote user-generated content.
 - 2.2. Respond to customers in a timely manner, directing them to relevant information as required.
 - 2.3. Identify potential brand damage, and take action to prevent escalation.
 - 2.4. Promptly respond to customer complaints and issues according to social media policies and procedures.
 - 2.5. Adhere to legal and ethical practices for social media use.
3. Promote products and services.
 - 3.1. Identify social media marketing opportunities and curate and post content to promote products and services.
 - 3.2. Use social media to promote special offers, events and promotions as required.
 - 3.3. Post content according to social media policies and procedures.
4. Review social media use.
 - 4.1. Track social media activity using monitoring tools.
 - 4.2. Identify opportunities to improve customer experience, and recommend to relevant personnel.
 - 4.3. Update the look and feel of the social media account to maximise effectiveness.
 - 4.4. Report on social media engagement and reach to relevant personnel.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

- Reading skills to:
- interpret technical terminology relevant to the use of social media platforms.

- Writing skills to:
- use correct spelling and grammar in social media posts.
- Technology skills to:
- upload images, text files, PDF files, audio files, video files and link associated files
 - import and export software functions
 - conduct online research for appropriate content
 - compare social media platform functionality.

Assessment Requirements for SIRXMKT002 Use social media to engage customers

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- research four social media platforms and select two platforms for use, appropriate to business needs and target customer
- use the above two social media platforms to engage the customer by:
 - curating and posting written and visual content appropriate to the target customer
 - promote one organisational marketing activity
 - respond to two of the following types of customer social media posts:
 - customer reviews
 - user generated content
 - questions
 - complaints
 - troll
- review effectiveness of social media platform across a one month period by:
 - reporting on social media activity
 - making at least one recommendation for continuous improvement of social media use.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for social media use
- rules and regulations and terms of use of specific social media platforms:
 - privacy
 - spamming
 - copyright
 - creative commons
- social media trends:
 - trending platforms
 - consumer behaviour
 - trending content

- various social media platforms:
 - demographic of primary users
 - key features and uses
 - integration into business activity
 - useability
 - privacy and security features
 - costs
- legal and ethical practices for use of social media:
 - responsible use of platforms
 - responsible marketing practices
 - fair competition guidelines
 - duty of care
 - bullying and harassment policy
- types of social media users and their impacts:
 - troll
 - angry customer
 - misguided customer
 - unhappy customer
 - complimentary customers
 - brand advocates
- techniques for:
 - marketing the business using social media platforms:
 - promoting products
 - promoting special events
 - creating brand awareness
 - responding to customer posts on social media:
 - customer reviews
 - user generated content
 - questions
 - complaints
 - troll
- social media tools, and their use, for:
 - monitoring
 - scheduling social media content
 - capturing engagement and reach data
- commercial impact of social media platform both favourable and unfavourable:
 - importance of consumer reviews and user generated content
 - value of building a community of advocates on a social media platform
 - types of crisis issues or conflicts that can arise on social media locally, nationally and internationally

- sources and types of social media content:
 - product information
 - images and photos
 - links to other websites
 - videos
 - text and graphics
 - current trends
 - Internet.

Assessment Conditions

Skills must be demonstrated in:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for social media use
 - legal and ethical use of social media
- social media content calendar that details:
 - key events and promotions
 - milestones and relevant dates
 - content for release
- files for use across social media platforms:
 - image files
 - text files
 - PDF files
 - audio files
 - video files
 - link associated files
- computer or mobile device with Internet access
- social media monitoring tools
- social media platforms
- customer postings on social media platforms
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXPDK001 Advise on products and services

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop product and service knowledge and provide information to customers.

This unit applies to individuals working in frontline customer service and sales roles in a diverse range of industry and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Product Knowledge

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Develop product and service knowledge.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify and access sources of information on products and services.
- 1.2. Interpret information about availability, features and benefits of products and services.

- | | |
|----------------------------------|--|
| | 1.3. Compare products and services based on product information. |
| | 1.4. Identify and use opportunities to update knowledge for the product and service range. |
| 2. Respond to customer requests. | 2.1. Answer customer questions about products and services with current and accurate information. |
| | 2.2. Use questions to clarify customer information needs. |
| | 2.3. Explain product and service details using clear communication. |
| | 2.4. Source additional information when answer to customer request is unknown or refer to relevant colleagues. |
| 3. Enhance information provided. | 3.1. Identify situations where additional information may assist the customer. |
| | 3.2. Advise on alternative products or services that may meet customer needs when requested item is not available. |
| | 3.3. Recommend complementary products, specials, new lines and promotions to customers according to their needs. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Numeracy skills to:

- interpret pricing information.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRXPDK001 Advise on products and services

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- access and interpret sources of information on four different products or services
- respond to four different customer inquiries for product or service information that individually or cumulatively require provision of information on all of the following:
 - features and benefits
 - price
 - alternative products or services
 - complementary products or services.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - interactions with customers
 - product or service pricing
- basic key aspects of legislation that impact provision of information for the product or service range:
 - Australian Consumer Law
 - product or service specific legislation
- interpersonal communication techniques:
 - active listening and questioning
 - communication methods which convey information clearly and concisely
- product and service information for the product or service range:
 - features and benefits
 - price
 - care and handling of products
 - availability
 - storage requirements, shelf life and use by date
 - warranties

- ingredients or materials contained in product
- origins
- alternative products and services
- complementary products and services.

Assessment Conditions

Skills must be demonstrated in a services industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a product or service range
- sources of product information
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators outlining factors that impact provision of information for the product or service range
 - price lists
 - organisational policies and procedures relevant to product and service advice
- customers; these can be:
 - customers in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXRSK002 Maintain store security

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to maintain store security in a retail environment.

It applies to individuals working in frontline management roles in a diverse range of industry sectors and business contexts. They operate independently with some responsibility for others and decision making, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Risk Management and Security

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor and maintain store security.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Implement organisational policies and procedures to ensure store security is maintained.

1.2. Monitor and review security procedures continually and act on opportunities to improve store security.

1.3. Maintain security of merchandise, cash, points of sale and

- keys.
- 1.4.Ensure store security equipment is used and in correct working order.
 - 1.5.Report matters impacting store security to relevant personnel.
 - 1.6.Document breaches of security as required.
2. Facilitate security awareness.
- 2.1.Inform team members of organisational policies and procedures for security.
 - 2.2.Provide team members with feedback on their implementation or non-implementation of security procedures.
 - 2.3.Provide team members with ongoing supervision and training to facilitate security awareness.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
 - monitoring adherence to organisational security policies and procedures
 - responding to two occurrences of non-adherence to security policies and procedures
 - communicating security policies and procedures to one team member
 - ensuring security equipment is utilised and in correct working order
 - reporting on opportunities for improved store security.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - use of security equipment
 - suspicious customer behaviour
 - suspicious team member behaviour
 - armed robbery
 - cash and non-cash security
 - merchandise security
 - theft
 - responding to security breaches
 - reporting security risks and breaches
 - surveillance of merchandise
 - personal security
 - general store security
 - team members' security training
 - security for opening and closing premises
 - reporting problems and faults
 - security of visitors, sales representatives, contractors and vendors
 - security risks likely to endanger customers or team members

- legislation as relevant to store security and own level of responsibility:
 - privacy laws
 - Australian Consumer Law
 - reporting procedures
- impacts of security breaches on individuals and organisation:
 - emotional distress
 - financial loss
 - commercial impacts
- common security risks within the retail workplace and techniques to:
 - identify risk
 - minimise risk
- types of store alarms and security systems used in industry.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant equipment:
 - alarm systems
 - surveillance equipment
 - point-of-sale equipment
 - communication equipment
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
 - organisational policies and procedures as listed in the Knowledge Evidence
- customers and team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Sales

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Establish customer needs.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Connect with the customer within designated response times and establish rapport.
- 1.2. Use questioning and active listening to facilitate effective two-way communication.

- 1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.
- 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.
 - 2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.
 - 2.2. Clearly explain and promote product and service features and benefits where relevant.
 - 2.3. Advise on promotional events where relevant.
 - 2.4. Provide additional information to address customer questions and objections.
 - 2.5. Offer comparisons to competitor product or service range as required.
 - 2.6. Collaborate with the customer to determine product or service option most suited to their needs.
 - 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.
 - 3.1. Select and use appropriate techniques to close sale.
 - 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.
 - 3.3. Farewell customer on leaving, and invite to return.
 - 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - detailed in-house and supplier product information documents
 - plain English documents that outline organisational customer service policy and procedures.
- Numeracy skills to:
- interpret basic fee information from in-house documents and complete basic pricing calculations.
- Problem-solving skills to:
- respond to customer objections and provide appropriate solutions to satisfy customer needs.
- Technology skills to:
- use technologies equipped with search functionality and information systems to source product and service information.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

Assessment Requirements for SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
 - appropriate communication
 - establishment and clarification of customer needs, wants and expectations
 - product and/or service knowledge
 - appropriate sales approach to sell benefits and features of products and/or services
 - overcome objections and close sales
 - upsell and/or cross sell additional products and/or services that complement the sale
 - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
 - cultural diversity
 - special needs
- sales techniques:
 - opening techniques
 - recognising buying signals
 - strategies to focus customer on specific products and services
 - selling add-ons and complementary products
 - overcoming customer objections
 - closing techniques

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
 - professional service standards and protocols for retail industry personnel
 - attitudes and attributes expected by the retail industry to work with customers
 - different customer service needs and expectations
- for the particular retail organisation:
 - product and service knowledge:
 - product and service range offering
 - product specifications, features and benefits
 - designated response times for providing customer service
 - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for:
 - customer service
 - sale of products and services
 - resolving customer complaints
 - collection and storage of customer details
 - organisational product information and price lists
 - supplier brochures, information sheets and price lists
 - promotional activity information
 - current plain English regulatory documents distributed by government regulators for:
 - consumer protection law
 - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Links

SIRXSL002 Follow point-of-sale procedures

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to follow point-of-sale work systems, process transactions and complete sales.

It applies to individuals working in frontline operational roles in a diverse range of industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Sales

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Follow point of sale work systems.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Open and close point-of-sale terminal at designated times and according to organisational procedures.
- 1.2.Clear point-of-sale terminal and transfer cash.
- 1.3.Handle cash according to organisational policies and

- procedures.
- 1.4.Maintain supplies of change at agreed levels in point-of-sale terminal to agreed levels.
 - 1.5.Maintain adequate supplies of consumables.
2. Process point-of-sale transactions.
 - 2.1.Identify transaction type and required procedure to be followed.
 - 2.2.Correctly interpret sale price information.
 - 2.3.Make accurate calculations for pricing and collection of payment.
 - 2.4.Enter accurate sale information into point-of-sale equipment.
 - 2.5.Confirm price to customer and check customer payment against sale value.
 - 2.6.Provide correct change for cash payments.
 - 2.7.Identify transaction errors, follow procedures for resolution and complete accurate records.
 3. Complete sales.
 - 3.1.Generate and complete documentation associated with the sale.
 - 3.2.Confirm and process any purchase follow up activities.
 - 3.3.Acknowledge and thank customer in line with organisational policy.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information from various sources and calculate accurately with or without the use of a calculator. • measure or estimate quantities to calculate costs. • calculate percentage discounts.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for SIRXSL002 Follow point-of-sale procedures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow procedures for set up, maintenance and close of point-of-sale area/terminal on three different occasions
- perform three point-of-sale transactions for each of the following:
 - cash sales
 - non-cash sales
- perform three point-of-sale transactions for each of the following:
 - refunds
 - exchanges
- make six accurate financial calculations relating to product pricing that individually or cumulatively involve:
 - multiple products
 - products of varying prices
 - products with percentage discounts
- follow procedures to complete four sales that require post purchase activity.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
- basic key aspects of legislation that impact point-of-sale activities:
 - Australian Consumer Law
- features of products sold by the organisation
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - clearance of terminal and transference of tender

- recording takings
- consumables required by system
- security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- procedures for non-cash transactions:
 - credit cards
 - EFTPOS
 - vouchers
- types of purchase follow up activities and associated organisational policies and procedures:
 - placing of orders
 - delivery
 - issuing of invoices
 - issuing of receipts
 - wrapping and packing.

Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for point-of-sale activities
- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation that impact point-of-sale activities as listed in the Knowledge Evidence
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan and complete recreational SCUBA dives to a maximum depth of 18 metres and to respond to problematic and emergency situations involving self and dive buddy. It also requires the ability to assemble and disassemble equipment and to complete basic maintenance at the water's edge.

It applies to dive leaders, usually known as divemasters, or instructors and to assistant instructors who use these skills when leading participants in SCUBA diving activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

In order to procure air, equipment, and other services to engage in recreational open water diving without supervision, divers must hold certification (C-Card) issued by an industry authorised organisation. That industry certification may or may not be issued concurrently with an Australian Qualification Framework (AQF) qualification or Statement of Attainment identifying achievement of competency in this unit. C-Card certification would be required to gain employment as a divemaster or instructor.

Those delivering training and assessment to support this unit should consult the relevant industry bodies to determine any partnership arrangements for courses, trainers and assessors that can lead to joint AQF and industry regulated C-Card certification.

Pre-requisite Unit

Nil

Competency Field

SCUBA Diving

Unit Sector

Outdoor Recreation

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Plan dives.

2. Prepare for the dive.

3. Complete dives.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Determine site, depth and duration of dives.

1.2. Identify hazards and medical problems and assess risks associated with use of equipment, site, depth and duration of dives.

1.3. Prepare dive plans for single and repetitive dives according to industry technical and safety criteria.

1.4. Calculate no decompression limits and maximum operating depth.

1.5. Use dive computer or dive tables, as required, to plan requirements.

2.1. Select and assemble dive equipment suited to conditions and dive requirements, and check for safe working condition.

2.2. Utilise dive computers or dive tables, as required, to finalise details of dive, according to industry technical and safety criteria.

2.3. Confirm activity safety and emergency response procedures to ensure compliance during activities.

2.4. Confirm protocols for communications between divers buddy and activity leaders.

2.5. Fit and adjust equipment and exposure suit to self, in conjunction with buddy, to ensure comfort and safety.

2.6. Complete buddy cross checks for all equipment.

2.7. Participate in pre-dive roll call.

3.1. Utilise techniques to enter and exit the water according to conditions and own ability.

3.2. Execute controlled descents and ascents with buddy and equalise at appropriate times.

3.3. Adjust and maintain positive, neutral and negative buoyancy at appropriate times during dive.

3.4. Control underwater swimming and navigate a basic course.

3.5. Monitor depth and time throughout dive, according to

- planned dive tables or use of dive computer data.
- 3.6. Monitor air supply, check pressure gauges regularly and communicate supplies with buddy.
 - 3.7. Use techniques that minimise damage to the diving environment throughout all activities.
 - 3.8. Participate in post-dive roll call and ensure dive log is completed.
 - 3.9. Disassemble SCUBA gear on completion of dive.
4. Maintain safety and complete rescues.
 - 4.1. Safely approach, and negotiate obstacles and hazards to minimise risk of injury.
 - 4.2. Maintain buddy contact, cooperation and communication throughout dive.
 - 4.3. Identify problematic or emergency situations promptly, and assist buddy with rescues.
 - 4.4. Self-rescue from problematic or emergency situations.
 - 4.5. Use an alternate air source and make controlled air sharing ascents.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • interpret detailed and familiar organisational safety and emergency response procedures.
Oral communication skills to:	<ul style="list-style-type: none"> • use clear and unambiguous verbal and non-verbal communications to make intent known with diving buddy and support crew.
Numeracy skills to:	<ul style="list-style-type: none"> • interpret and calculate numerical data involving pressures, percentages and depths.
Teamwork skills to:	<ul style="list-style-type: none"> • work in harmony with a buddy diver to plan and complete safe dives.
Planning and organising skills to:	<ul style="list-style-type: none"> • manage own timing to complete activities within planned timeframes.
Self-management skills to:	<ul style="list-style-type: none"> • critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and complete four open water dives each for different parameters
- prior to each dive, and at the water's edge:
 - assemble own diving equipment
 - inspect all equipment for safety and serviceability
 - fit and adjust equipment to self, including appropriate weights, in conjunction with buddy
 - complete a BWRAF (buoyancy, weights, releases, air, final) check in conjunction with buddy
- during each dive, use effective techniques to control:
 - entry and exit
 - descent and ascent
 - underwater swimming
 - buoyancy both underwater and at the surface
 - mouthpiece clearing for both snorkel and regulator
 - exchanges between regulator and snorkel, in-water at the surface
 - swimming at the surface using snorkel; fully geared
 - buddy contact, cooperation and communication, using correct signals for communication
 - navigation of a basic course with an underwater compass
- across all dives, collectively participate in simulations to respond to problematic and emergency situations and:
 - clear partially and fully flooded masks
 - remove and replace mask underwater
 - remove and replace SCUBA system in-water at the surface
 - remove and replace weight system and SCUBA kit in water too deep in which to stand
 - use an alternate air source to provide air to and receive air from a diver, and make controlled air sharing ascents
 - provide buddy assistance for two situations
- after each dive, disassemble SCUBA gear.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for diving activities
- factors to consider when planning a dive:
 - dive location
 - objectives
 - abilities of self and buddy
 - depth and duration of dive
 - contingencies
- features of diving environments, particularly those relevant to local conditions, sufficient to understand the impacts on diving activities and locations:
 - water conditions:
 - temperature and thermocline
 - visibility
 - movements, currents, waves, tides
 - density of fresh and salt water
 - topography; bottom and shoreline
 - aquatic life; animals and plants
 - weather conditions
 - hazards and techniques used to safely negotiate these:
 - surface hazards
 - overhead obstructions
 - entanglement and entrapment in natural and constructed features
 - special environmental features, including any cultural and heritage features, minimal impact techniques specific to diving environments, and why these are important to conservation
 - any local regulations specific to diving
- how to use dive computers to
 - determine no-decompression limits for single and repetitive dives
 - properly plan and execute a dive
- features, function and operation of dive computers, and advantages of dive computers over dive tables when planning and completing dives
- the physics of diving; the physical principles of matter and their application to diving activities and hazards:
 - sound
 - light
 - buoyancy
 - pressure and gas laws
 - temperature

- for the following medical problems related to diving, the causes, prevention, symptoms, first aid and treatment:
 - direct effects of pressure during descent, types of squeezes and barotrauma:
 - mask
 - suit
 - ears
 - sinuses
 - lungs
 - teeth
 - direct effects of pressure during ascent:
 - gas expansion – ears, sinuses, lungs, stomach, intestines and teeth
 - lung over pressurization and overexpansion injuries
 - vertigo
 - indirect physiological effects of pressure:
 - decompression illness
 - nitrogen narcosis
 - carbon dioxide excess and relationship to overexertion
 - oxygen toxicity
 - shallow water blackout and relationship to hyperventilation
 - issues related to contaminated air
 - other physiological and psychological problems:
 - drowning and secondary drowning
 - carotid sinus reflex
 - inadequate ventilation (hypoventilation)
 - atmospheric issues – hypothermia, hyperthermia, sunburn
 - bite and sting injuries from aquatic animals and plants
 - issues related to use of medication, drugs and alcohol
 - fatigue and exhaustion
 - stress and panic
 - over confidence
- for the following diving equipment, identifying features, functions, operation and, where relevant, how to fit and adjust for comfort and safety:
 - fins
 - face masks
 - snorkels
 - buoyancy control devices
 - exposure suits, booties and gloves of different grades suited to different conditions
 - weight ballast systems
 - cylinders and valves, cylinder support systems
 - regulators

- submersible pressure gauges
- alternative air sources of different types
- timing devices
- depth gauges
- underwater compasses
- floats and flags
- lights
- emergency equipment carried by dive operators:
 - signalling devices, acoustical and visual
 - first aid kits
 - oxygen kits
- for all of the above equipment, how to inspect for safety and serviceability
- the purpose and importance of pre and post-dive roll calls
- inclusions of personal diving log books and the importance of completing after each dive
- communication protocols used between divers, buddies and activity leaders:
 - hand signals
 - noise signals such as rapping on cylinder
 - use of slates
 - use of signalling devices, acoustical and visual
- dive buddy systems and procedures used to:
 - cross check gear
 - maintain contact and cooperation
 - maintain common safety
- techniques used to:
 - enter and exit the water
 - descend and ascend using safety stops
 - swim underwater and at the surface in diving gear
 - maintain buoyancy both underwater and at the surface
 - use an alternate air source to provide air to and receive air from a diver, and make controlled air sharing ascents
 - rescue self and buddy from problematic and emergency situations.

Assessment Conditions

Skills must be demonstrated in an open water site during daylight hours. Dives can be completed from either a boat or from the shore.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction

- the first two of the four required open water dives must include at least 20 minutes at a depth between 5 and 12 metres
- the last two of the four required open water dives must include at least 20 minutes at a depth between 5 to 18 metres
- no more than three dives can be completed in any one day
- the following resources must be available to replicate industry conditions of operation and also for the purpose of assessing the candidate's ability to identify features and operational use:
 - first aid equipment
 - oxygen equipment
 - communication equipment for emergency response
 - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- a diving buddy with whom the candidate can dive
- fins
- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits suitable for conditions
- timing devices
- depth gauges
- underwater compasses
- signalling devices, acoustical and visual
- dive computers
- organisational safety and emergency response procedures for diving activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess open water diving skills and to authorise the issuance of C-Card certification.

SISOSCB006 Perform diver rescues

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to both lead, and complete diver rescues using a range of dive specific techniques. It requires the ability to fully assess the situation, determine a response and complete rescues using methods and equipment appropriate for the situation. It also covers the administration of in-water rescue breathing, and oxygen.

This unit does not require the provision of first aid, which is covered in other units, but does require the recognition and assessment of common diving related illnesses and injuries.

It applies to dive leaders, usually known as divemasters or instructors who work independently in the field using discretion and judgement to manage problems and emergencies when they arise.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

Competency Field

SCUBA Diving

Unit Sector

Outdoor Recreation

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Determine rescue requirements and prepare for rescue.
2. Rescue divers.
3. Use supplemental oxygen.
4. Debrief and complete

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify divers in need of rescue and determine their condition.
- 1.2. Assess situation, identify hazards promptly, assess risks and manage to avoid injury to self and others.
- 1.3. Determine appropriate rescue methods and techniques for situation, according to degree of urgency and condition of divers in need of rescue.
- 1.4. Select rescue equipment according to requirements.
- 1.5. Assess abilities, establish a chain of command and allocate roles and responsibilities to others.
- 1.6. Provide clear and concise instructions and confirm rescue crew understanding of roles, communication protocols and rescue actions.
- 1.7. Implement rescue operations according to organisational policies and procedures for emergency response.
- 2.1. Use equipment and rescue techniques appropriate to situation.
- 2.2. Provide reassurance and clear and concise instructions to divers being rescued.
- 2.3. Rescue divers on surface, using techniques appropriate to situation.
- 2.4. Assist responsive divers to surface and to reach boat or shore.
- 2.5. Bring unresponsive divers to the surface, provide in-water rescue breathing, and tow to boat or shore.
- 2.6. Maintain safety of self, others and rescuees throughout rescue operations.
- 2.7. Evaluate and monitor condition of rescued divers and determine need for first aid, medical treatment or evacuation.
- 2.8. Utilise underwater search patterns to locate missing divers.
- 3.1. Assess diver casualty to identify need for supplemental oxygen.
- 3.2. Administer oxygen, as authorised by organisation and allowed under local law.
- 4.1. Participate in incident management debrief and identify

reports.

future response improvements.

4.2. Complete required incident reports according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> interpret detailed familiar organisational policies and procedures for emergency response.
Writing skills to:	<ul style="list-style-type: none"> record detailed and accurate factual information about rescue responses.
Oral communication skills to:	<ul style="list-style-type: none"> use clear and unambiguous verbal and non-verbal communications to make intent known.
Teamwork skills to:	<ul style="list-style-type: none"> pro-actively and cooperatively direct and work within teams to coordinate rescue logistics, solve arising problems and effect efficient rescues.
Self-management skills to:	<ul style="list-style-type: none"> critically analyse all circumstances and implications to coordinate a considered response to rescue requirements.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISOSCB006 Perform diver rescues

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and complete a range of simulated rescue operations:

- collectively cover responses to all of the following diver issues:
 - panicked diver at the surface and underwater
 - over exerted diver at the surface and underwater
 - vertigo
 - cramping
- complete two surface non-swimming assisted rescues and collectively use reach and extension techniques
- complete two surface swimming assisted rescues while consistently entering the water without losing sight of the diver in need and:
 - establish diver's buoyancy
 - execute rescues with and without floatation devices
 - execute towing with and without equipment removal
 - use two towing techniques
- complete two underwater rescues while consistently maintaining buoyancy of self and rescued diver both underwater and at the surface:
 - use an alternate air source to provide air to a diver, and make a controlled air sharing ascent
 - bring an unresponsive diver to the surface
- provide one surface in-water rescue, using two of the following breathing techniques while consistently controlling an open airway:
 - mouth-to-pocket mask
 - mouth-to-mouth
 - mouth-to-nose
- assist divers to exit the water as follows:
 - one responsive diver without assistance
 - one responsive diver with assistance from team members
 - one unresponsive diver without assistance
 - one unresponsive diver with assistance from team members
- for at least one simulated rescue bring together multiple elements of rescue operations to include:
 - bringing an unresponsive diver to the surface

- establishing buoyancy both underwater and at the surface
- providing on surface in-water rescue breathing
- towing diver
- assisting diver to exit the water
- set up oxygen equipment on one occasion
- administer oxygen using a pocket mask on one occasion (where not prohibited by local legal requirements)
- complete one underwater search for missing divers using a search pattern to be chosen from the following list:
 - linear
 - circular
 - U pattern
 - jack stay
 - expanding square
- for each rescue operation:
 - consistently negotiate hazards safely and effectively
 - establish a chain of command, allocate and communicate roles and responsibilities to team members and participants to effectively complete rescues
 - participate in a debrief and complete an incident report.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response
- principles of a chain of command as relevant to dive rescue operations
- roles and responsibilities that can be allocated to team members and participants to effectively complete a diver rescue
- communication protocols for dive rescue operations:
 - hand signals
 - calls
 - whistles
- diver issues that can occur during SCUBA diving activities:
 - panicked diver
 - over exerted diver
 - drowning
 - vertigo
 - cramping
 - temperature related problems including hypothermia and hyperthermia
 - pressure related injuries including decompression sickness, arterial gas embolism and other lung overexpansion injuries

- stings or bites from marine animals
- diver low or out of air
- equipment related problems including over weighting
- missing diver
- for the above issues:
 - signs that indicate need for rescue and or first aid
 - how they affect choice of rescue techniques
 - appropriate actions and communications with the rescued diver
 - risks related to the rescue diver
 - first aid treatments for those that relate to illness or injury
- for surface non-swimming assisted rescues, features, functions and techniques used with rescue equipment:
 - reach equipment
 - throw bags, lifebuoys and slings
 - throw ropes
- for surface swimming assisted rescues, techniques for:
 - entering water without losing sight of diver in need
 - using floatation equipment
 - removing equipment from rescued diver and considerations for doing this
 - towing with and without equipment removed
- for underwater rescues, techniques used for:
 - establishing and maintaining buoyancy of rescued diver, both underwater and at the surface
 - using an alternate air source to provide air to a diver, and making controlled air sharing ascents
 - assisting responsive divers to the surface
 - bringing unresponsive divers to the surface while controlling buoyancy
- techniques for providing in-water rescue breathing:
 - removing equipment
 - opening the airway
 - mouth-to-pocket mask
 - mouth-to-mouth
 - mouth-to-nose
- techniques for:
 - assisting responsive divers to exit the water, with and without assistance from team members
 - exiting unresponsive divers from the water, with and without assistance from team members
- for oxygen administration:
 - situations that require the use of oxygen and benefits to divers
 - features, functions and operation of oxygen delivery systems, pocket masks

- appropriate flow rates
- hazards associated with the administration of oxygen and methods used to manage these
- team members that are authorised to administer oxygen and any legal requirements applicable in the local state or territory
- options that are available post rescue, when these might be used and how to contact authorities to assist:
 - assisted treatment via remote communications
 - emergency evacuation and medical treatment
 - hyperbaric chamber
- underwater search patterns used to locate lost divers, advantages and disadvantages of each:
 - linear
 - circular
 - U pattern
 - jack stay
 - expanding square
- format, inclusions and use of incident reports.

Assessment Conditions

Skills must be demonstrated in an open water site during daylight hours. Dives can be completed from either a boat or from the shore.

Assessments, for rescues, can only be completed through simulated activities. Simulations must incorporate time critical requirements.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction
- surfacing an unresponsive diver can only be completed at a maximum depth of 9 metres
- the following resources must be available to replicate industry conditions of operation:
 - first aid equipment
 - communication equipment for emergency response
 - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues
- fins

- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits suitable for conditions
- timing devices
- depth gauges
- underwater compasses
- rescue equipment:
 - reach equipment
 - throw bags, lifebuoys or slings
 - throw ropes
- oxygen equipment:
 - oxygen delivery systems
 - pocket masks or other barrier devices
- template incident reports
- organisational policies and procedures for emergency response.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess diver rescues.

SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan and conduct work in open spaces while upholding sustainable practices. This unit requires the ability to conduct research of the current land condition, capability, uses and practices, and develop and implement strategies to achieve sustainable practices for outdoor programs and activities.

This unit applies to operation or program managers who are responsible for planning, implementing and evaluating sport, recreation or fitness programs and activities across a range of activity areas. They work autonomously with responsibility for management of resources and upholding of sustainable work practices.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Resource Management

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Plan sustainable

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Determine opportunities and options for using open space

- activities for work in open spaces.
- within the local community.
- 1.2 Review and document relevant codes of practice and local government requirements for use of open space.
 - 1.3 Consult with colleagues and other stakeholders about issues of responsibility for environmental and social sustainability.
2. Conduct minimal impact activities.
 - 2.1 Select and use minimal impact techniques and procedures appropriate to the area.
 - 2.2 Conduct activities using positive sustainable outcomes for local communities and environments.
 - 2.3 Advise clients of appropriate behaviours in open space environments and address any unacceptable behaviours.
 3. Monitor impacts and changes.
 - 3.1 Monitor and record changes in the natural environment using appropriate technology.
 - 3.2 Collect environmental information on behalf of environmental agencies or local government as required.
 - 3.3 Advise appropriate authorities of environmental and social change promptly.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • analyse data on conservation strategies • research usage and potential usage.
Writing skills to:	<ul style="list-style-type: none"> • develop a plan to improve efficiency while drawing on data analysis.
Learning skills to:	<ul style="list-style-type: none"> • maintain currency of information related to sustainable practices in open spaces.
Problem-solving skills to:	<ul style="list-style-type: none"> • assess threats and opportunities • compare conservation strategies and select appropriate strategies • monitor and evaluate the effectiveness of strategies and develop alternative strategies where appropriate • identify current use of resources • develop strategies to maximise efficiency of resource use.
Planning and organising skills to:	<ul style="list-style-type: none"> • work within identified timeframes and budgets • plan, implement and monitor strategies for optimal resource use

- establish criteria to evaluate open spaces.
 - apply sustainable work practices on an ongoing basis.
- Self-management skills to:

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct at least three sessions in two or more open space environments to minimise environmental impacts of sport, fitness or recreation activities
- for each of the sessions incorporate:
 - local government requirements
 - industry codes of practice
 - provision of advice to clients regarding the use of open spaces
 - management of client behaviour in open spaces
- provide feedback on the environmental impact of at least five sport, fitness or recreation activities conducted in open spaces.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation, regulations and land management requirements and guidelines:
 - permits in national parks or on land under control of traditional owners
 - restrictions on camp site operations and use of open fires
- global environmental issues, in particular a layperson understanding of the science associated with:
 - climate change
 - energy
 - land management
 - waste and consumption
 - water
- environmental and social impacts of sport, fitness or recreation industry in relation to global environmental issues in particular sites and communities
- practical sustainability considerations for sport, fitness or recreation operations, incorporating those related to:
 - environmentally or culturally sensitive areas and associated minimal impact practices
 - handling and disposal of waste, including human waste

- industry codes of practice
- use of water sources
- minimal impact techniques and procedures in relation to:
 - activity-specific guidelines
 - energy use
 - group size
 - interaction with wildlife
 - local customs and courtesies
 - noise
 - setting of camps
 - souveniring
 - use of tracks
 - waste disposal
- biophysical and socio-cultural elements in an environment and the relationship between them
- information collection techniques for monitoring environmental and social impact, including what is observed and measured and how specific data is recorded.

Assessment Conditions

Skills must be demonstrated in:

- an outdoor space that could be used for sport, recreation or fitness work purposes.

Assessment must ensure access to:

- areas or locations containing natural systems or components of these systems
- resources and information relevant to the natural system
- relevant information impacting on conservation of natural systems
- relevant stakeholder and local government information regarding the use of open spaces
- industry code of ethical practice
- organisational documentation relevant to open space planning.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITTGDE013 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to share information about a specific local Australian Indigenous culture. It is this localised focus that distinguishes this unit from SITTGDE019 Research and share information on Australian Indigenous cultures.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of local cultural knowledge, appropriate behaviour and local community consultation.

This unit applies to those people who are able to share local Australian Indigenous cultural knowledge with others. They may work at many different levels, as cultural knowledge has no direct relationship with organisational levels of responsibility.

The local Australian Indigenous cultural knowledge necessary to achieve competency in this unit may only be accessible to those individuals who identify as elders or who are authorised by local elders on behalf of their communities.

There are many different Australian Indigenous language groups in Australia, therefore the focus of cultural interpretation will vary and should ultimately be decided in consultation with elders on behalf of the local community.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru-Kata Tjuta National Parks in the Northern Territory.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Guiding

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Source information about the local Australian Indigenous community.
2. Share information about local Australian Indigenous culture.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify relevant stakeholders in the local Australian Indigenous community.
- 1.2. Research ways in which cultural information can be used to make tour activities authentic to the local area.
- 1.3. Prepare for tour activities taking into consideration obligations to the local Australian Indigenous community.
- 1.4. Recognise potential conflicts of tour content with the local Australian Indigenous community and identify solutions.
- 2.1. Seek consent from relevant stakeholders to share information about the local Australian Indigenous community.
- 2.2. Share accurate information about aspects of Australian Indigenous culture with customers.
- 2.3. Advise customers about culturally appropriate behaviour.
- 2.4. Show respect for Australian Indigenous cultures and values through promoting culturally sensitive behaviour during activities.
- 2.5. Provide information about traditional and contemporary practices to customers.
- 2.6. Use local Australian Indigenous language and share with customers.
- 2.7. Invite customers to participate and share in Australian Indigenous cultural experiences respecting cultural guidelines.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance

criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Writing skills to:	<ul style="list-style-type: none">• make notes about Australian Indigenous culture to share with others.
Oral communication skills to:	<ul style="list-style-type: none">• liaise with customers and local Australian Indigenous community members.
Teamwork skills to:	<ul style="list-style-type: none">• work effectively with the local Australian Indigenous community or with those who are authorised by elders on behalf of the community with regard to the preparation of appropriate information and activities.

Unit Mapping Information

Supersedes and is equivalent to SITTGDE001 Interpret aspects of local Australian Indigenous culture.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=68c40a93-e51d-4e0f-bc06-899dff092694>

Assessment Requirements for SITTGDE013 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify relevant stakeholders within the local Australian Indigenous community and follow protocols to obtain information on local Australian Indigenous culture and incorporate into at least one tour activity
- share information on aspects of local Australian Indigenous culture with customers on at least two different occasions and at two different sites.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- protocols within a local Australian Indigenous community that address:
 - the type of information that can be shared
 - who can provide information
 - who can receive the information
 - what activities are appropriate
 - who should be involved in activities
 - appropriate use of imagery
- aspects of a local Australian Indigenous culture as appropriate to specific community:
 - art
 - bush foods and medicine
 - dance
 - music
 - storytelling
 - tools and implements
- copyright and intellectual property issues associated with providing information about local Australian Indigenous cultures
- processes for seeking permission to include local Australian Indigenous culture in tour activities

Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace; or
- a simulated industry environment or activity, set up for the purposes of assessment.

Assessment must ensure access to:

- sites where Australian Indigenous cultural experiences take place
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE014 Work as a guide

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to work effectively as a guide. It covers key legal, ethical, safety, environmental and professional development issues that guides must consider in their day-to-day work.

This unit applies to guides who may work across multiple industry sectors as employees, volunteers, or independent contractors. They may operate within a single site, or in a particular city, region or tourist precinct, but often move across sites, cities and regions.

Guides apply discretion and judgement within established organisational procedures, and take a lead role without supervision when guiding a tour or activity. Sometimes guides are the owner-operators of small tour operations.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru-Kata Tjuta National Parks in the Northern Territory.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Guiding

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Plan guiding activity.

2. Communicate with tourism industry operators.

3. Guide tours or activities.

4. Develop guiding skills and knowledge.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Identify key guide information sources and contacts.

1.2. Review required roles and responsibilities for prospective guiding activity.

1.3. Plan resource, labour and logistical aspects of the guiding activity.

1.4. Use industry knowledge and guide networks to enhance the quality of guiding services provided to customers.

2.1. Liaise with internal and external stakeholders to organise all aspects of the guiding activity.

2.2. Negotiate with tourism industry operators to achieve mutual understanding and agree on details relevant to guiding activities.

2.3. Provide accurate information and explanations about customer requirements and special requests.

2.4. Identify nature and key facts of operational problems and provide appropriate solutions in consultation with tourism operator.

3.1. Conduct guiding activities according to legal, industry and safety requirements.

3.2. Actively participate in risk assessment as an integral part of work activities.

3.3. Take account of ethical considerations for particular contexts.

3.4. Support sustainable work practices.

4.1. Identify and use opportunities to update knowledge and skills required by guides.

4.2. Maintain knowledge of technologies used by guides.

4.3. Identify and access sources of guide support when required.

4.4. Share knowledge with colleagues to enhance quality of service provided to customers.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">• read and interpret industry codes of practice and regulations.
Writing skills to:	<ul style="list-style-type: none">• complete risk assessment documentation.
Oral communication skills to:	<ul style="list-style-type: none">• liaise with internal and external stakeholders and customers when carrying out job tasks.
Problem-solving skills to:	<ul style="list-style-type: none">• evaluate legal, ethical, safety and sustainability issues and requirements for guiding activities• make decisions on appropriate behaviours and actions.
Initiative and enterprise skills to:	<ul style="list-style-type: none">• make contingency plans when required, to deal with unexpected circumstances.
Teamwork skills to:	<ul style="list-style-type: none">• work effectively with industry operators.

Unit Mapping Information

Supersedes and is equivalent to SITTGDE002 Work as a guide.

Assessment Requirements for SITTGDE014 Work as a guide

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct three guiding activities with different customers or groups which involve:
 - liaising with one or more tourism industry operators
 - identifying potential operational problems and appropriate solutions
 - incorporating client requirements and special requests
- undertake a full risk assessment for each of the above guiding activities that:
 - identifies inherent risks
 - identifies hazards
 - reports on hazards and risks
- meet legal, ethical, safety and sustainability requirements in the planning of each of the above guiding activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- interrelationship between tour operations and wholesaling sectors and the role of guiding in the tourism industry
- cultural considerations in dealing with industry colleagues, customers, suppliers and local communities
- roles and responsibilities for guides, and the specific roles of each of these types of guides:
 - day tour guide
 - extended tour guide
 - hospitality desk guide
 - city host
 - driver guide
 - meet and greet guide
 - site guide
 - tour manager

- roles and services provided to guides by peak guiding bodies and industry associations to assist in developing guiding knowledge
- industry and legal compliance requirements that affect guiding operations:
 - consumer protection law
 - national, state/territory and local licensing and industry accreditation requirements for guides
 - contents of various guiding codes of conduct or practice and the impacts of non-compliance
 - public liability and the guide's duty of care
 - environmental laws
 - permit requirements for operating in protected areas
 - work health and safety
- different types of technologies and their uses in tour guiding
- opportunities to update own knowledge as a guide
- tourism operators that work in collaboration with guides:
 - inbound tour operators
 - other guides
 - retail outlets
 - suppliers of tourism products or services that are components of the touring itinerary
- safety issues that affect guiding operations in particular contexts, including customer safety in different environments
- ethical considerations for guides:
 - industry codes of conduct
 - cultural considerations
 - dealings with local communities
 - dealings with Australian Indigenous communities
 - provision of services as promoted or confirmed
 - relationships with industry colleagues, customers and suppliers
 - avoiding unconscionable conduct
- sustainable work practice considerations for:
 - business sustainability
 - environmental sustainability
 - social impact.

Assessment Conditions

Skills must be demonstrated in an operational guiding environment. This can be:

- an industry workplace; or
- a simulated industry environment or activity set up for the purposes of assessment.

Assessment must ensure access to:

- an environment in which guiding activities take place

- organisational specifications:
 - codes of conduct
 - procedures for liaising with tourism industry operators that are involved in the operation of guided activities
 - running sheets for tours and activities
 - incident report templates
 - passenger lists
 - risk assessment template
- communications technology as required by the tour
- props and signage
- customer groups of a size and nature that reflect the commercial environment in which the guide operates
- tourism industry operators with whom the individual can interact; these can be:
 - those involved in organising a tour or activity who interact with the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context
- participants undertaking a tour or activity for whom the individual can act as guide; participants can be:
 - those participating in a tour or activity who interact with the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE019 Research and share information on Australian Indigenous cultures

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to research and share information about Australian Indigenous cultures in an appropriate way. It focuses on information that is widely available to the general community.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of culturally appropriate behaviour and local community consultation.

This unit applies across many industry sectors. It is particularly relevant to cultural tourism operations and to individuals who work in customer service and guiding roles with differing levels of responsibility. Information could apply to Australian Indigenous communities and cultures across Australia, or to a specific Australian Indigenous community and culture.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru-Kata Tjuta National Parks in the Northern Territory.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Competency Field

Guiding

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Research general information on Australian Indigenous cultures.
2. Share general information on Australian Indigenous cultures.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify key information sources on Australian Indigenous cultures.
- 1.2. Select and use formal and informal research techniques to access current, accurate and relevant information about Australian Indigenous cultures.
- 1.3. Obtain information in a culturally appropriate way.
- 2.1. Identify and use Australian Indigenous interpreters where required.
- 2.2. Provide guidance to customers on appropriate behaviour when interacting with Australian Indigenous people.
- 2.3. Share clear and accurate information on Australian Indigenous cultures to enhance cultural awareness, ensuring acknowledgment of the diversity of cultures.
- 2.4. Share information in a manner respectful of local community values and customs.
- 2.5. Answer questions according to community wishes about what information can be shared.
- 2.6. Respond to culturally inappropriate behaviour by customers to minimise the likelihood of causing offence.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

Writing skills to:

- make notes about Australian Indigenous culture to share with others.

Learning skills to:

- develop own knowledge and understanding of Australian Indigenous cultures.

Teamwork skills to:

- work respectfully with Australian Indigenous interpreters and Australian Indigenous communities or with those who are authorised by elders on behalf of the community with regard to the preparation of appropriate information and activities.

Unit Mapping Information

Supersedes and is equivalent to SITTGDE007 Research and share general information on Australian Indigenous cultures.

Assessment Requirements for SITGDE019 Research and share information on Australian Indigenous cultures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify at least three relevant sources of information within the local Australian Indigenous community and follow protocols to obtain information on local Indigenous culture
- using above relevant sources of information, undertake research on Australian Indigenous culture relevant to the regional context to develop current knowledge of:
 - art and music
 - bushcraft, bush food and bush medicine
 - contemporary Australian Indigenous life and culture
 - cultural centres, galleries and natural sites
 - dance
 - history, pre- and post-European contact
 - land ownership
 - tools and implements
 - traditional life and culture
- using culturally acceptable practices and protocols, share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and using at least three different locations.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on Australian Indigenous cultures:
 - artworks
 - events
 - exhibitions
 - experiences of self or others
 - films
 - images
 - internet

- music
- performances
- Indigenous people
- traditional owners
- presentations
- professional associations
- printed texts
- culturally acceptable practices and protocols for researching and sharing information about Australian Indigenous cultures that address:
 - the type of information that can be shared
 - who can provide information
 - who can receive the information
 - what activities are appropriate
 - who should be involved in activities
 - appropriate use of imagery
- fundamental Australian Indigenous intellectual property issues:
 - strong links between intellectual property and cultural heritage
 - issues associated with the reproduction and sale of Indigenous cultural works
- processes for seeking permission to include local Australian Indigenous culture in tour activities.

Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace; or
- a simulated industry environment or activity, set up for the purposes of assessment.

Assessment must ensure access to:

- sites where Indigenous cultural experiences take place
- information sources verified or supported by Indigenous communities
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

Assessment Requirements for SITTGDE020 Prepare specialised interpretive content on flora, fauna and landscape

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- prepare three different presentations and with each presentation:
 - use at least four credible and reliable sources of information
 - include information about flora, fauna and landscape as listed in the knowledge evidence
 - use appropriate ecological terminology and concepts
 - incorporate interpretive themes and messages
 - organise information in a logical and suitable manner for presentation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of interpretation in creating a powerful customer experience
- current interpretive theory, methods and media
- key methods to structure information for different audiences
- sources of information on flora, fauna and landscape in the relevant geographic context
- landscapes of interest within a local region and their general characteristics
- key ecological terminology and concepts:
 - biodiversity and abundance
 - biotic and physical factors
 - carbon cycle
 - community relations
 - energy flow
 - food web
 - life cycles
 - nutrient cycle
 - populations
 - succession
 - water cycle

- zonation
- interrelationships between parts of the ecosystem:
 - developmental processes related to the formation of local landscapes:
 - geological formations and history
 - soil composition and its relation to plant and animal life and water catchment areas
- principles of Gondwana theory and the impact of Gondwana on plant and animal communities
- major landscape types and their characteristics:
 - alpine
 - coastal
 - desert
 - outback
 - temperate
 - tropical
- major species of flora and fauna within the local landscape:
 - characteristics
 - commonalities
 - interactions between species and the environment
 - nature of species and where it is found
 - nutrition and life cycles
 - roles of individual species
 - species harmful to humans
- identification techniques for flora and fauna
- environmental influences that affect landscape
- human impact on landscape
- management regimes and codes of practice for local landscape
- Australian Indigenous perspective on local landscape
- information sources used by guides.

Assessment Conditions

Skills must be demonstrated in an operational guiding environment. This can be:

- an industry workplace; or
- a simulated industry environment or activity, set up for the purposes of assessment.

Assessment must ensure access to:

- sources of information used by guides
- interpretive resources
- equipment used to source, record and store information:
 - computer and software
 - internet

- data storage equipment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD013 Develop interpretive activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives for an activity; develop operational aspects; and evaluate the success of the activity. The actual presentation of activities is covered in the unit *SITTGDE017 Prepare and present tour commentaries or activities*.

The unit applies to many industry sectors and has particular relevance in tourism, sport and recreation, and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and developing interpretive activities may be for a series of activities in a venue or tour operation, or for a one-off activity. It could be the responsibility of the person delivering the activity, or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|-----------------------------------|--|
| 1. Establish need for activities. | 1.1. Identify need for interpretive activities, based on customer, organisation and community needs. |
| | 1.2. Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues. |
| 2. Create activities. | 2.1. Identify and evaluate potential information and resources, including other specialists as required. |
| | 2.2. Develop interpretive framework for activities. |
| | 2.3. Generate and select ideas for potential messages, themes and storylines. |
| | 2.4. Identify relationships between themes, storylines and the site. |
| | 2.5. Incorporate interpretive media that matches the site. |
| | 2.6. Conduct a risk assessment and incorporate controls into activity development. |
| | 2.7. Evaluate and integrate legal, ethical and sustainability considerations. |
| | 2.8. Develop resources to support activities. |
| | 2.9. Develop activity within budget to meet agreed objectives. |
| 3. Evaluate activities. | 3.1. Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities. |
| | 3.2. Modify activities according to feedback received. |
| | 3.3. Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:

- evaluate wide ranging information and tease out creative themes and messages for activities
- analyse and interpret complex information and communicate it creatively to customers.

Oral communication skills to:

- consult with colleagues about development issues for interpretive activities.

- Numeracy skills to:
- calculate costs in order to work within established budgets.
- Planning and organising skills to:
- coordinate creative and practical aspects of activities.
- Technology skills to:
- use software to develop products that support the delivery of educational and commercial interpretive activities in both real and virtual contexts.

Unit Mapping Information

Supersedes and is equivalent to SITTPPD002 Develop interpretive activities.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for SITTPD013 Develop interpretive activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and develop one single interpretive activity and one series comprising at least three interpretive activities combined into an overall program, for at least two of the following:
 - attractions
 - guided activities or walks
 - sporting activities
 - theme parks
 - virtual activities
- plan and develop the above interpretive activities using at least two of the following themes:
 - cultural
 - heritage
 - historical
 - nature
- ensure above interpretive activities include key messages that reflect subject matter knowledge and meet the needs of different customer groups and commercial and operational constraints
- identify and implement review mechanisms for above interpretive activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- subject matter around which activities are developed
- influential principles and theories of interpretation
- physical and digital interpretive media
- resource considerations for the development of interpretive activities:
 - apps and other digital content
 - costumes
 - guest speakers
 - handouts

- information and communications technology
- natural resources
- props
- professional organisations
- special interest organisations
- specialists:
 - actors and performers
 - creative designers
 - cultural advisers
 - designers
 - environmental educators
 - heritage specialists
 - historians
 - interpretation consultants
 - marketers
 - subject matter experts
 - technical experts
- practical processes that support activity development:
 - budgeting
 - evaluation
 - needs analysis
 - resource development
 - scheduling
- creative communication techniques for interpretive activities:
 - games
 - illustrated talks
 - role-playing
 - sensory awareness exercises
 - storytelling
 - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes:
 - determining overall risk level
 - determining exposure to the risk
 - estimating probability of negative impacts identifying consequences that could result from the identified risk
- legal, ethical and sustainability considerations for activity development:
 - cultural appropriateness
 - duty of care
 - minimal impact

- minimising waste and conserving resources.

Assessment Conditions

Skills must be demonstrated in an operational tourism environment. This can be:

- an industry workplace; or
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- a real or simulated environment for which interpretive activities can be planned and developed
- information sources on subject matter of interpretive activities, resources and other specialists
- current technology for use in activity development
- customers sufficient in number to reflect different customer, organisational or community needs and locations for interpretive activities. These can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD018 Develop environmentally sustainable tourism operations

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan strategically for environmentally sustainable operations. This is subject to a range of regulatory requirements that relate to environmental sustainability at land management agency and federal, state or territory, and local government level. It requires the ability to establish and operate a sustainable operation and to monitor its environmental impact.

The unit applies to those in the tourism industry with managerial responsibilities in strategic planning and product development. Planning may be for a whole region or local area or for a particular venue, organisation, event or product. The unit applies to any operation with a strong focus on environmental sustainability.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for SITTPD018 Develop environmentally sustainable tourism operations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop a plan for one tourism operation that supports environmental sustainability and includes:
 - analysis of key environmental issues
 - consultation with key stakeholders
 - evaluation of proposed operation
 - development of strategies and operational approaches that maximise positive impacts
 - integration of current legislation, regulations, guidelines and industry codes of practice
- implement the above plan, complying with environmentally sustainable practices, guidelines and legal requirements
- monitor and evaluate the environmental impact of the above tourism operation including:
 - community consultation and involvement
 - internal and external education programs
 - implementing sustainable operational initiatives:
 - regularly reviewing optimal group sizes
 - scheduling for optimal weather conditions and seasons
 - selecting most appropriate equipment and transport modes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- current research trends in the area of environmentally sustainable tourism operations
- current and emerging issues and trends relevant to above operation and the environment
- global environmental issues, including layperson's level science associated with:
 - climate change
 - energy
 - land management
 - waste and consumption
 - water

- relevance of environmental issues to the area or region of work and the specific features and vulnerabilities of the local environment
- methods of environmental evaluation:
 - environmental impact study (EIS)
 - evaluation of organisational capacity to comply with:
 - environmental and community protection laws
 - industry and ecotourism codes of practice
 - social sustainability
 - site studies
- consultation and communication mechanisms used by organisations in the product development process
- strategic frameworks and operational systems and procedures that support environmentally sustainable operations
- ways of balancing ecological sustainability and the economic viability of an operation
- key stakeholders in the area and their roles in the tourism planning process:
 - consumer representatives
 - host community
 - investors
 - government authorities
 - land management agencies
- suppliers of environmentally-friendly products
- potential negative environmental impacts:
 - disturbance of flora and fauna
 - introduction of exotic and feral species
 - physical damage
 - pollution
 - visual impacts
 - waste issues
- laws, regulations and land management requirements and guidelines:
 - need for permits in national parks or on land under control of traditional owners
 - restrictions on operations in relevant areas.

Assessment Conditions

Skills must be demonstrated in a destination, location, organisation or event for which an environmentally sustainable operation can be established. This can be:

- an industry workplace; or
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- current information about environmental practices:
 - legislation

- guidelines
- industry codes of practice
- current information and communications technology to support the research and planning process
- stakeholders with whom consultations can take place. These can be:
 - real stakeholders; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITXCCS010 Provide visitor information

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to access general information on facilities, products and services available in the local area and to provide this to visitors.

The unit applies to frontline service personnel working in a range of tourism, travel, hospitality, events, entertainment and cultural contexts. Information is often provided face-to-face, but may be by telephone or other remote mechanisms.

It applies to frontline service personnel who routinely respond to visitor requests for general local area information. They may be working independently or with guidance from others in restaurants, hotels, wineries, attractions, entertainment venues, tour operations, visitor information centres and at tour desks.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1. Access and update visitor information. | 1.1. Identify and access sources of visitor information.
1.2. Obtain general information on local facilities, products and services to meet different visitor needs.
1.3. Share information with colleagues to support the efficiency and quality of service.
1.4. Identify and use opportunities to update and maintain local area knowledge. |
| 2. Provide information to visitors. | 2.1. Identify specific information and assistance needs of visitors, including those with special needs.
2.2. Provide appropriate scope and depth of information to meet visitor needs.
2.3. Identify and use opportunities to promote internal products and services. |
| 3. Seek feedback on information provision. | 3.1. Proactively seek visitor feedback to ensure required information has been provided.
3.2. Follow procedures for any formal visitor evaluation.
3.3. Provide information on visitor feedback to relevant colleagues. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • interpret sometimes detailed product and local area information • research, sort and use relevant information.
Writing skills to:	<ul style="list-style-type: none"> • record simple notes and basic information on local facilities, products and services for visitors.
Oral communication skills to:	<ul style="list-style-type: none"> • listen and respond to range of visitor requests, asking questions to clarify and confirm.
Learning skills to:	<ul style="list-style-type: none"> • review own knowledge of information required to assist visitors and participate in activities that continuously update it.

Unit Mapping Information

Supersedes and is equivalent to SITXCCS002 Provide visitor information.

Assessment Requirements for SITXCCS010 Provide visitor information

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information about local area features to three different visitors
- provide above information and assistance in a culturally appropriate manner and according to organisational service standards
- extend personal knowledge of relevant facilities, products and services to above visitors
- seek formal and informal feedback from visitors on above services.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on the available local area facilities, products and services
- information on the local area features:
 - accommodation options
 - dining options
 - entertainment venues
 - local attractions
 - local personal services facilities
 - local shopping facilities
 - local transport options
 - organisation-specific information
 - road conditions
 - sporting facilities
 - tours, local outings and trips
 - travelling routes
 - weather conditions
- methods to update and maintain local area knowledge
- organisational service procedures and standards:
 - designated response times for acknowledging customers and their enquiry
 - personal presentation and hygiene standards

- awareness of customs and practices of various social and cultural groups of visitors to assist with meeting visitor needs and expectations in regard to:
 - modes of greeting, farewelling and conversation
 - body language and body gestures
 - formality of language
 - clothing
- methods of collecting feedback:
 - formal:
 - surveys
 - interviews
 - structured questioning
 - informal:
 - observation
 - casual discussion
- organisational service procedures and standards.

Assessment Conditions

Skills must be demonstrated in an operational customer service environment in a service based industry where information is sourced and provided to visitors. This can be:

- an industry workplace; or
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- sources of information on the local area facilities, services and general products, and their availability
- organisational specifications for customer service standards
- visitor surveys and feedback forms
- visitors from different cultural backgrounds with whom the individual can interact. These can be:
 - visitors to an industry workplace during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITXCCS014 Provide service to customers

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to communicate effectively with and provide quality service to both internal and external customers. It requires the ability to establish rapport with customers, determine and address customer needs and expectations, and respond to complaints.

The unit applies to those frontline service personnel who deal directly with customers on a daily basis and who operate with some level of independence and under limited supervision.

This includes individuals working in a range of tourism, travel, hospitality and events contexts.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Communicate with internal and external

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Communicate with customers in a professional manner within designated response times using appropriate verbal

- customers. and non-verbal communication.
- 1.2. Observe and respond to non-verbal communication of customers.
 - 1.3. Use active listening and questioning to facilitate effective two-way communication.
 - 1.4. Select a medium of communication appropriate for the customer and situation.
2. Follow defined organisational standards when delivering service.
 - 2.1. Practise high standards of personal presentation and hygiene according to organisational requirements.
 - 2.2. Follow organisational customer service policies and procedures.
 - 2.3. Adhere to professional standards expected of service industry personnel.
 3. Provide service to customers.
 - 3.1. Establish rapport with customer to promote goodwill and trust during service delivery.
 - 3.2. Identify customer needs and expectations, including customers with special needs.
 - 3.3. Promptly meet all reasonable customer needs and requests.
 - 3.4. Identify and anticipate operational problems and take action to minimise the effect on customer satisfaction.
 - 3.5. Recognise and act upon opportunities to deliver additional levels of service beyond customer's immediate request.
 4. Respond to customer complaints.
 - 4.1. Proactively recognise customer dissatisfaction and take swift action to avoid escalation to a complaint.
 - 4.2. Respond to customer complaints in a professional manner.
 - 4.3. Identify solutions in consultation with customer.
 - 4.4. Resolve complaints according to own level of responsibility and organisational policy.
 - 4.5. Escalate complex service issues to higher level staff for action.
 5. Provide internal feedback on customer service practices.
 - 5.1. Provide ongoing internal feedback on service practices, policies and procedures, and suggest improvements.
 - 5.2. Identify individual and recurring complaints and provide internal feedback to avoid future occurrence.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
--------	-------------

- Reading skills to:
- interpret messages, notes, letters, online communications, and policies and procedures.
- Writing skills to:
- record clear and concise messages, notes, emails and letters.
- Self-management skills to:
- deal with customer enquiries in a logical sequence while accommodating other work commitments.
- Technology skills to:
- use electronic communication media.

Unit Mapping Information

Supersedes and is equivalent to SITXCCS006 Provide service to customers.

Assessment Requirements for SITXCCS014 Provide service to customers

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- identify customer requirements and provide quality customer service to three different internal and three different external customers to meet requirements
- provide service to above customers in line with organisational customer service standards and within designated organisational response times
- apply procedures to respond to and resolve three different customer complaints according to organisational policies and procedures
- use effective communication techniques with the above internal and external customers, including at least one with special needs
- seek formal and informal feedback from customers on above service.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- principles of quality customer service and positive communication
- appropriate non-verbal communication for customer service:
 - body language
 - culturally specific communication customs and practices
 - dress and accessories
 - gestures and mannerisms
 - use of space
 - voice tonality and volume
- methods for enhancing service delivery in response to staff and customer feedback
- professional service standards expected of service industry personnel
- attitudes and attributes expected by the service industries to work with customers
- standards of personal presentation and hygiene
- different customer service and communication expectations, including those with special service needs
- types of customers
 - external

- internal
- new
- regular or repeat
- visitors
- designated response times for acknowledging customers and their enquiry
- customer service policies and procedures, including those for:
 - acknowledging and greeting customers
 - complaint and dispute management
 - empowerment of different levels of personnel to resolve complaints, disputes, service issues and customer compensation
 - loyalty programs
 - presentation standards for customer environment, customer service personnel, and documents and promotional materials
 - pricing guarantees
 - product quality
 - refunds and cancellation fees
 - response times
 - service guarantees
 - training staff for customer service and complaint handling
- awareness of special needs, customs and practices of various social and cultural groups of customers in regard to:
 - modes of greeting, farewelling and conversation
 - body language and body gestures
 - formality of language
 - clothing
- considerations when selecting a mode of communication:
 - assistive technology requirements
 - use of interpreters
 - two-way communication systems
- methods of collecting feedback:
 - formal:
 - surveys
 - interviews
 - structured questioning
 - informal:
 - observation
 - casual discussion
- essential features, conventions and use of different types of communication techniques and equipment.

Assessment Conditions

Skills must be demonstrated in an operational business environment where customers are served. This can be:

- an industry workplace; or
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- organisational policies, procedures and templates relating to:
 - customer service standards
 - designated response times
 - presentation standards
 - procedures for dealing with customer complaints
 - customer surveys and feedback collection
 - recording and reporting customer feedback
- internal and external customers with different service needs with whom the individual can interact. These can be:
 - customers in an industry workplace during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITXMG T006 Manage projects

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop project plans, implement project activities, monitor progress to ensure objectives are achieved, and evaluate all aspects of projects.

The unit applies to all tourism, travel, hospitality and event sectors and the project could relate to event planning and execution, product development, research or initiatives such as the introduction of new workplace systems or technologies.

It applies to senior personnel who operate independently or with limited guidance from others and who are responsible for making a range of operational business and project management decisions.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Define project scope.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Identify project objectives, budget, scope of activities and

- deliverables.
- 1.2. Clarify relationship of project to others and to overall organisational objectives.
 - 1.3. Identify stakeholders and their requirements for consultation and involvement in project activities.
 - 1.4. Confirm administrative structure for project management, individual responsibility and reporting hierarchy.
 - 1.5. Determine required resources for the project.
2. Develop project plan.
 - 2.1. Consult with stakeholders to facilitate input and to achieve approval for project plan.
 - 2.2. Determine risk, regulatory and sustainability issues and incorporate into plan.
 - 2.3. Integrate quality, financial, human and physical resource specifications for project activities.
 - 2.4. Develop and integrate project evaluation methods.
 - 2.5. Plan internal and external communications, public relations and marketing approaches.
 - 2.6. Document integrated project management plan.
 - 2.7. Communicate plan and roles and responsibilities to all involved.
 3. Administer and monitor project.
 - 3.1. Implement project activities according to plan and in conjunction with stakeholders and project team members, providing support and assistance as required.
 - 3.2. Implement financial and quality control systems according to project plan.
 - 3.3. Monitor progress to ensure objectives, deliverables, timelines, cost and quality of project are achieved.
 - 3.4. Identify deviations from plan, assess and take action to re-align project activities to meet objectives.
 - 3.5. Determine and act on the need for project variations, including additional project resources.
 - 3.6. Provide progress and final reports according to project requirements.
 - 3.7. Complete project within agreed timelines.
 4. Evaluate project.
 - 4.1. Assess project effectiveness at specified stages using agreed evaluation methods.
 - 4.2. Evaluate completed project for administrative efficiency, quality and achievement of objectives.
 - 4.3. Report outcomes to stakeholders and use information to enhance future project planning and management activities.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">interpret reports, comparing project outcomes against planned deliverables.
Writing skills to:	<ul style="list-style-type: none">write quantitative and qualitative evaluation criteria.
Numeracy skills to:	<ul style="list-style-type: none">interpret project budgets for diverse componentsdevelop resource specifications within budgetary parameters.
Problem-solving skills to:	<ul style="list-style-type: none">evaluate and respond to factors within project management activities.
Planning and organising skills to:	<ul style="list-style-type: none">manage interrelated aspects of a project and project timelines.
Technology skills to:	<ul style="list-style-type: none">use computers, word processing and software packages for project management.

Assessment Requirements for SITXMGF006 Manage projects

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and implement a plan for a project addressing one or more of the following objectives:
 - community or industry development
 - economic or social benefits
 - education or training
 - profit
 - research
- administer and monitor the following components of the above project:
 - dedicated project budget and financial control system
 - administrative components involving individual responsibility and reporting hierarchy for at least two of the following:
 - advisory or reference group
 - consultants, contractors or suppliers
 - organisational management
 - project management committee
 - secretariat
 - progress against project objectives
 - quality control system
 - risk, regulatory and sustainability issues
- lead a project team and liaise with a wide range of stakeholders during the planning and implementation phases of the above project, providing at least two of the following forms of support and assistance as appropriate:
 - additional resources
 - formal training opportunities
 - informal coaching and feedback
 - moderation and joint planning sessions
 - regular meetings and briefings
 - representing team interests in wider forums
- apply sound administrative processes when planning and implementing the above project within required timeframes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- project management processes and the project life cycle:
 - planning and requirements of project plans:
 - objectives
 - deliverables, scheduling and milestones
 - allocation of roles and responsibilities
 - documentation and role of technology
 - monitoring and control systems
 - evaluation criteria, both quantitative and qualitative, and methods for measuring the success of project objective
- project management plan inclusions:
 - budget
 - consultation strategies
 - internal and external communication processes and channels
 - key milestones
 - marketing strategies
 - objectives and outcomes
 - quality assurance process
 - reporting requirements
 - responsibilities of project personnel and stakeholders
 - risk management and contingency plans
 - safety initiatives
 - selection or tendering process
 - sponsors
 - stages
 - sustainability considerations
 - timeframes
- role of project management personnel and stakeholders in the management of projects
- reporting hierarchies
- administrative structures
- risk, regulatory and sustainability issues for project management:
 - financial management
 - human resource management
 - physical resource management
- potential stakeholders in a project:
 - community agencies
 - customer or client
 - funding bodies

- government departments or statutory authorities
- industry associations
- internal personnel
- management
- media
- sponsors.

Assessment Conditions

Skills must be demonstrated in an operational business environment. This can be:

- an industry workplace; or
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- projects to be managed by the individual
- information and communications technology currently used to manage projects
- physical and financial resources to support the project
- project team and stakeholders with whom the individual can interact. These can be:
 - those in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

TAEASS311 Contribute to assessment

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEASS301 Contribute to assessment.

Application

This unit describes the skills and knowledge required to contribute to the assessment process by collecting evidence for assessment against nationally recognised units of competency and according to organisational requirements.

The unit applies to a person with technical or vocational expertise who is in a supervisory, mentoring or coaching role in a workplace, and whose role is to assist in collecting assessment evidence rather than being to make an assessment judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify own role and responsibilities in the assessment process	1.1 Discuss and confirm purpose of assessment with qualified assessor 1.2 Discuss and clarify units of competency to be used for assessment with the qualified assessor 1.3 Discuss and clarify plan for assessment with the qualified assessor

ELEMENTS	PERFORMANCE CRITERIA
	1.4 Discuss and clarify own responsibilities in gathering evidence and the types of evidence to be gathered with the qualified assessor
2. Confirm organisational arrangements for evidence gathering	<p>2.1 Access and confirm assessment system policies and procedures, and organisational requirements relevant to contributing to assessment</p> <p>2.2 Discuss and clarify assessment tools and evidence gathering methods with qualified assessor to ensure that procedures to be followed and instruments to be used are clear</p> <p>2.3 Discuss and clarify with qualified assessor the assessment context, candidate characteristics, and any need for reasonable adjustments</p> <p>2.4 Confirm and arrange resource requirements in consultation with qualified assessor</p>
3. Collect evidence	<p>3.1 Explain assessment process to candidate and responsibilities of the parties involved</p> <p>3.2 Identify and refer candidate issues and concerns to the qualified assessor before undertaking assessment activities</p> <p>3.3 Use assessment instruments to gather and document evidence according to organisational requirements</p> <p>3.4 Organise and provide gathered evidence to the qualified assessor in a format suitable for analysis according to organisational requirements</p> <p>3.5 Discuss with the qualified assessor whether the principles of assessment and the rules of evidence were met</p>
4. Review assessment contribution	<p>4.1 Seek and document feedback from others involved in the assessment</p> <p>4.2 Document areas for improvement in collecting evidence for future assessment activities</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Sources and interprets procedural and compliance information
Writing	<ul style="list-style-type: none"> Completes required workplace documentation using appropriate language and format

Skill	Description
Oral communication	<ul style="list-style-type: none">• Communicates information and process requirements clearly, based on techniques appropriate to audience and environment• Obtains information to support the assessment process
Planning and organising	<ul style="list-style-type: none">• Organises work according to defined requirements, taking some responsibility for decisions regarding the format of information

Assessment Requirements for TAEASS311 Contribute to assessment

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEASS301 Contribute to assessment.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- carry out at least 3 evidence-gathering activities.

In the course of each of the above, the individual must:

- gather evidence from at least 3 different candidates
- gather at least 2 different types of evidence
- use documentation provided by qualified assessor
- document evidence in a clear and concise manner.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- assessment system policies and procedures and organisational requirements relevant to contributing to assessment, including:
 - policies and procedures relating to vocational education and training regulatory requirements
 - work health and safety (WHS) responsibilities
- key features of competency-based assessment
- principles of assessment and their indicators
- key purposes of assessment
- rules of evidence and their indicators
- key features of types of evidence
- evidence-gathering methods, including:

- purpose and key features
- potential barriers
- purpose and features of assessment tools.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated vocational education and training environment.

This includes access to:

- assessment system
- current and validated assessment tools for assessment
- a qualified assessor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL311 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL301 Provide work skill instruction.

Application

This unit describes the skills and knowledge required to conduct individual and small group work skill instruction using existing support materials and demonstration of work skills as a training strategy; and assess the success of training and one's own training performance. It focuses on the training being driven by the work process and context.

The unit applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Prepare simple session plan for work skill instruction and demonstration objectives 1.4 Access and review support materials for their suitability and

ELEMENTS	PERFORMANCE CRITERIA
	relevance 1.5 Organise access to physical support material required for instruction and demonstration 1.6 Notify learners of planned work skill instruction
2. Conduct instruction and demonstration	2.1 Interact with learners to establish a safe and comfortable learning environment 2.2 Brief learners on work health and safety (WHS) procedures and requirements prior to, and during, training 2.3 Follow plan for work skill instruction and cover all learning objectives 2.4 Use facilitation techniques to structure, pace and enhance learning, and explain and demonstrate work skills 2.5 Apply coaching techniques to assist learning 2.6 Use communication techniques to provide information, engage and instruct learners and demonstrate work skills 2.7 Monitor professional relationship with learner, and adjust to suit learner needs 2.8 Provide opportunities for learners to practise the work skill
3. Check training performance	3.1 Use observation and questioning to check learner acquisition and use of new skills and knowledge 3.2 Provide feedback on learner performance to support learning 3.3 Monitor learner progress and outcomes in consultation with the learner
4. Review training performance	4.1 Gather feedback from learners on work skill instruction according to organisational procedures 4.2 Reflect on own practice in providing instruction and demonstration, and identify strategies for improvement 4.3 Maintain, store and secure learner records, according to organisational and legal requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Sources and interprets processes and procedures, support materials, and information relevant to providing work instruction

Skill	Description
Writing	<ul style="list-style-type: none"> Completes required workplace documentation using appropriate language and format
Oral communication	<ul style="list-style-type: none"> Uses communication techniques to build rapport, monitor progress and provide feedback to learners
Numeracy	<ul style="list-style-type: none"> Interprets and uses scheduling and sequencing information, and estimates time
Initiative and enterprise	<ul style="list-style-type: none"> Asks questions to clarify understanding, and to provide and seek feedback Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches
Planning and organising	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes
Teamwork	<ul style="list-style-type: none"> Builds rapport and establishes productive working relationships to achieve learning outcomes

Unit Mapping Information

Supersedes and is equivalent to TAEDEL301 Provide work skill instruction.

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>

Assessment Requirements for TAEDEL311 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL301 Provide work skill instruction.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- provide at least 3 work skill instruction sessions, with each session being of at least 30 minutes duration and involving:
 - a different work skill for each session
 - delivery of at least 1 session to an individual learner
 - delivery of at least 1 session to a small group of at least 2 learners.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational procedures for gathering feedback from learners on work skill instruction
- learner characteristics and needs
- information included in a plan for work skill instruction:
 - session plan, consisting of:
 - session objectives
 - content to be covered
 - delivery approach to be used
 - task breakdown
 - timing
- sources, availability and content of suitable support materials
- training facilitation and coaching techniques to support adult learning relevant to work skill instruction, and when to use them
- overview of adult learning principles and their application to work skill instruction

- key steps for practising self-reflection on own work skill instruction to identify opportunities for improvement
- sources of assistance relating to contextualising support materials to the workplace
- work health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - WHS policies and procedures, including those relating to:
 - hazard and risk identification
 - safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated vocational education and training environment. Evidence gathered for assessment may include that collected in real time or via a submitted recording.

This includes access to:

- learners requiring work skill instruction
- support materials relating to the work skill instruction sessions described in performance evidence
- access to information about the plan for work skill instruction, including session plan, task breakdown and timing.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL412 Facilitate workplace-based learning

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL402 Plan, organise and facilitate learning in the workplace.

Application

This unit describes the skills and knowledge required to prepare for, plan and facilitate workplace-based learning for learners in the workplace. It includes customising and implementing existing learning plans and resources based on products that are nationally recognised or aligned with other recognised frameworks, and reviewing own practice.

The unit applies to entry-level vocational education and training (VET) teachers and trainers who use facilitation and technical skills to facilitate learning in the workplace based on products that are nationally recognised or aligned with other recognised frameworks.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to facilitate workplace-based learning	1.1 Clarify and confirm workplace-based learning objectives and scope 1.2 Analyse position descriptions and work routines to determine that learning objectives can safely be met in the

ELEMENTS	PERFORMANCE CRITERIA
	workplace-based learning 1.3 Establish workplace environment for learning 1.4 Identify personnel to be involved in the workplace-based learning and their job roles and responsibilities.
2. Develop plan for workplace-based learning	2.1 Arrange for integration and monitoring of workplace-based learning activities 2.2 Identify phases and duration for learners' work-based learning 2.3 Identify need for support personnel within work-based learning 2.4 Draft plan for workplace-based learning that meets learning objectives, uses a range of learning opportunities, and outlines required safety arrangements 2.5 Obtain agreement from required personnel to finalise and implement the plan for workplace-based learning
3. Establish the learning relationship	3.1 Conduct initial meeting with learner to commence work-based learning and explain learning objectives and processes 3.2 Discuss and agree planned learning opportunities and activities according to any regulatory requirements 3.3 Select techniques for facilitating learning in the workplace to meet learners' needs and explain intended approach to learners 3.4 Discuss and organise required support for foundation skill and learning needs within scope of own job role; and access specialist support where required 3.5 Monitor supervisory arrangements appropriate to learners' levels of knowledge, skill and experience, provide support and encouragement, and ensure learners' health and safety
4. Implement workplace-based learning	4.1 Prepare learning environment and check equipment prior to use 4.2 Monitor and address work health and safety (WHS) hazards and risks before and during training 4.3 Oversee learning activities in workplace following the sequence of the workplace-based learning plan 4.4 Implement techniques that facilitate learners' application of skills and knowledge to workplace activities
5. Develop the learning relationship	5.1 Observe learner cues and change approaches where necessary to engage learners and maintain momentum 5.2 Encourage learners to take responsibility for learning and to use self-reflection

ELEMENTS	PERFORMANCE CRITERIA
	5.3 Monitor effectiveness of learning relationship through regular interaction
6. Close and evaluate the workplace-based learning	<p>6.1 Use interpersonal and communication techniques to close the learning relationship</p> <p>6.2 Seek feedback from learners and workplace stakeholders on outcomes achieved and value of the learning relationship</p> <p>6.3 Evaluate effectiveness of workplace-based learning against objectives, and the processes and techniques used</p> <p>6.4 Review and reflect on own facilitation of workplace-based learning and identify areas for improvement</p> <p>6.5 Recommend improvements to own workplace-based learning practice based on review process</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Digital literacy	<ul style="list-style-type: none"> • Uses main features and functions of digital tools and electronic applications required in own role to access and exchange information
Reading	<ul style="list-style-type: none"> • Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace
Writing	<ul style="list-style-type: none"> • Maintains documentation relevant to workplace-based learning according to organisational and workplace requirements
Oral communication	<ul style="list-style-type: none"> • Uses oral communication techniques to identify needs, build rapport, agree on learning, facilitate learning and monitor practice • Selects appropriate vocabulary adjusting language, tone and pace to promote effective interactions, and to build learner engagement • Asks questions to clarify understanding, and seeks feedback and further information
Numeracy	<ul style="list-style-type: none"> • Interprets and uses scheduling and sequencing information, and estimates time and risk
Planning and organising	<ul style="list-style-type: none"> • Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes
Problem solving	<ul style="list-style-type: none"> • Identifies and responds to problems and opportunities for improvement, considering options for different approaches

Skill	Description
	<ul style="list-style-type: none"> • Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs
Self-management	<ul style="list-style-type: none"> • Follows organisational protocols, policies and procedures in the management of records • Recognises and responds to contractual and ethical requirements associated with own role
Teamwork	<ul style="list-style-type: none"> • Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm outcomes meet requirements

Unit Mapping Information

Supersedes and is equivalent to TA EDEL402 Plan, organise and facilitate learning in the workplace.

Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>

Assessment Requirements for TAEDEL412 Facilitate workplace-based learning

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL402 Plan, organise and facilitate learning in the workplace.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop a workplace-based learning plan for at least 3 different learners, with each plan incorporating activities sequenced to ensure safe and effective learning that leads to the required standard of work performance
- facilitate workplace-based learning for at least 1 of the above learners using products that are nationally recognised or aligned with other recognised frameworks on at least 3 different occasions, where each occasion must:
 - be of at least 30 minutes' duration
 - address a different performance outcome from the workplace-based learning plan.

In the course of the above, the individual must:

- demonstrate communication skills to build rapport with the learners
- liaise with required workplace personnel.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- regulatory requirements relating to facilitating learning in the workplace
- organisational procedures relating to facilitating learning in the workplace
- systems for identifying skill development needs in the workplace
- key components of a workplace learning plan, including:
 - learning activities and objectives
 - required safety arrangements

- dimensions of competency and how they guide workplace-based learning practices
- strategies and processes for identifying and organising foundation skills support for learners, including language, literacy, numeracy, digital literacy and employability skills, including use of current authorised Australian foundation skills frameworks
- facilitation techniques appropriate to facilitating learning in the workplace, and strategies for encouraging, including and engaging those who learn in different ways, including:
 - demonstration
 - instruction
 - questioning
 - coaching
 - supervised practice
- strategies and techniques for engaging and liaising with other workplace stakeholders
- types of workplace constraints and distractions and how to manage them
- learning theories and adult learning principles and their application to facilitating learning in the workplace
- strategies and techniques for identifying and supporting workplace-based learners with additional learning needs, including:
 - reasons that some learners may require additional support
 - support strategies for different types of need
- evaluation, review and reflection techniques
- workplace training pathways, including apprenticeships and traineeships
- work health and safety (WHS) responsibilities relating to workplace-based learning, including supervision and support.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated workplace environment. Evidence gathered for assessment may include that collected in real time or via a submitted recording.

This includes access to:

- learners requiring workplace-based learning
- organisational procedures for facilitating workplace-based learning of nationally recognised training products.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>

TAEDEL414 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL404 Mentor in the workplace.

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace. It includes the skills and knowledge to plan and prepare for the mentoring, and implement strategies suited to the mentee, the workplace and the mentoring relationship.

The unit applies to workplace supervisors or other work colleagues who work under limited supervision and have responsibility for mentoring individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for mentoring relationship	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Develop and document mentoring plan according to organisational requirements

ELEMENTS	PERFORMANCE CRITERIA
	1.3 Establish ground rules and negotiate realistic expectations with the mentee 1.4 Establish and maintain confidentiality of the mentoring relationship according to legislative requirements and organisational policies and procedures
2. Facilitate mentoring relationship	2.1 Undertake activities intended to develop mentee's confidence and trust in the mentoring relationship 2.2 Share personal experiences and knowledge with mentee according to agreed objectives 2.3 Support mentee to develop and use skills in problem solving and decision making 2.4 Use personal and professional networks to assist the mentee 2.5 Provide information, and guidance to enhance engagement in the workplace 2.6 Use techniques for resolving differences without damaging the mentoring relationship, and obtain assistance according to organisational procedures
3. Monitor mentoring relationship	3.1 Provide planning assistance and guidance as requested by the mentee in a form and style to suit their requirements 3.2 Provide feedback to the mentee on progress towards achieving the expectations and goals of the mentoring process 3.3 Recognise and discuss changes in the mentoring relationship with stakeholders 3.4 Negotiate and manage closure of the mentoring arrangement
4. Review mentoring	4.1 Establish and discuss benefits gained from the mentoring process 4.2 Reflect on and articulate the personal benefits gained from providing mentoring 4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational procedures to improve the mentoring system or program

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
-------	-------------

Skill	Description
Digital literacy	<ul style="list-style-type: none"> • Uses main features and functions of digital tools and electronic applications required in own role to access and exchange information
Reading	<ul style="list-style-type: none"> • Sources and interprets texts relevant to mentoring context, including organisational policies and learner information
Writing	<ul style="list-style-type: none"> • Develops content and documents information relevant to mentoring plan
Oral communication	<ul style="list-style-type: none"> • Uses appropriate communication techniques to: <ul style="list-style-type: none"> • build rapport, trust and engagement • provide guidance and feedback
Problem solving	<ul style="list-style-type: none"> • Identifies and responds to problems, considering options for different approaches
Self-management	<ul style="list-style-type: none"> • Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring
Teamwork	<ul style="list-style-type: none"> • Collaborates with mentee to build rapport and achieve joint outcomes and effective interaction • Provides mentoring and role modelling to achieve agreed outcomes • Cooperates and consults with mentee to clarify understanding and seek feedback

Unit Mapping Information

Supersedes and is equivalent to TAEDEL404 Mentor in the workplace.

Assessment Requirements for TAEDEL414 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 5.0. Supersedes and is equivalent to TAEDEL404 Mentor in the workplace.

Performance Evidence

The individual must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- negotiate and document an agreed mentoring plan with 1 mentee that sets out clear objectives and a timeframe for the mentoring relationship
- facilitate at least 3 mentoring sessions of at least 30 minutes each with 1 mentee.

Knowledge Evidence

The individual must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures and codes of practice relating to the provision of workplace mentoring, including:
 - equal employment opportunity, equity and diversity responsibilities
 - work health and safety (WHS) responsibilities
- key features of a mentoring plan suited to mentee needs and workplace context
- key methods and strategies for working with a mentee, including:
 - using active listening and open questions to build rapport
 - encouraging self-reflection and confidence
- acceptable behaviour in a mentoring relationship.

Assessment Conditions

Skills in this unit must be demonstrated in a real or simulated workplace environment. Evidence gathered for assessment may include that collected in real time or via a submitted recording.

This includes access to:

- mentoring plan template
- at least 1 mentee.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA0015 Organise receipt and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise receipt and despatch operations in accordance with regulations, codes of practice and workplace requirements in the transport and logistics industry.

It includes planning and organising receipt operations, storing received stock, despatching ordered stock and completing documentation and records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan and organise receipt and despatch operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Product characteristics and workplace procedures are applied to stock analysis

1.2 Resources are identified to match product characteristics

- 1.3 Timeframes are scheduled to enable receipt or despatch of stock according to workplace procedures
 - 1.4 Work processes are planned to meet specified timeframes
- 2 **Organise the storage and despatch of stock**
 - 2.1 Employees, equipment and storage areas are allocated and supervised
 - 2.2 Individuals are informed of work requirements and deadlines
 - 2.3 Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) requirements
 - 2.4 Discrepancies in stocks are noted and reported in accordance with workplace procedures
- 3 **Complete documentation**
 - 3.1 Documentation and records regarding receipt and despatch operations are confirmed
 - 3.2 Documentation and records are completed and proofread
 - 3.3 Documentation and records are processed in accordance with workplace procedures and relevant regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces but is not equivalent to TLIA3018 Organise despatch operations and TLIA3019 Organise receipt operations.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIA0015 Organise receipt and despatch operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying contingency plans in accordance with workplace procedures
- applying relevant legislation and workplace procedures
- communicating and working with others
- estimating size, shape and special requirements of goods and loads
- identifying relevant stock and goods coding and labelling
- monitoring work activities in terms of specified deadlines
- operating and selecting equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, labels, information and signs
- selecting and using relevant equipment and communications technology
- selecting and using required personal protective equipment (PPE) and conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- discrepancies and appropriate actions to resolve
- documentation and record requirements for receipt and despatch operations
- equipment used for organising receipt and despatch operations including safety precautions and procedures
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for organising receipt and despatch operations
- regulations relevant for organising receipt and despatch operations, or other legislative requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for organising receipt and despatch operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA0020 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to package goods.

It includes selecting materials, packing, and labelling packaged goods to the required labelling standards and regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select materials and pack goods

1.1

Packaging specifications and order packaging documentation are obtained and interpreted

1.2

Packaging equipment suitable for the goods to be packed is selected and checked for safe operational use

		1.3	Packaging materials are identified and matched to specifications
		1.4	Work plan is followed, materials are used economically, and appropriate packaging is used and secured to minimise loss and damage in transit or storage
		1.5	Work is conducted in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements
		1.6	Completed packed goods are stacked to minimise damage in accordance with workplace procedures
		1.7	Hazards and control measures are identified and implemented prior to commencing work
2	Label packaged goods	2.1	Workplace labelling standards are identified and followed
		2.2	Appropriate goods handling, labelling and other identification symbols are used
		2.3	Relevant documentation is attached in accordance with workplace procedures
		2.4	Workplace documentation is completed according to workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2011 Package goods.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIA0020 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, and performance criteria on at least one occasion and include:

- applying safety precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- attaching and completing relevant documentation to goods
- checking and monitoring equipment performance
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when conducting work
- completing documentation related to work activities when packaging goods
- following work activities in terms of planned schedule
- reading and interpreting instructions, procedures and labels
- selecting and using relevant materials
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- differences in equipment
- documentation requirements for packaging goods such as a workplan
- housekeeping standards and procedures
- operational work systems and equipment for packaging goods problems associated with packaging goods and appropriate action to resolve these problems
- potential problems and possible solutions relating to packaging goods
- relevant legislation, regulations, codes of practice, industry guidelines and workplace policies and procedures for packaging goods
- relevant WHS/OHS and environmental protection procedures and guidelines

- site layout and obstacles
- size, shape and special requirements estimations of goods.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements and relevant regulations, as part of work activities within the transport and logistics industries.

It includes identifying products in a subsection of a warehouse or other storage area, examining quality, reporting on products, as well as using inventory and labelling systems to identify and locate products.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify products in a

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products are identified against specified criteria in

subsection of a warehouse or other storage area	accordance with workplace procedures
	1.2 Storage and handling characteristics are identified and applied consistently
	1.3 Products are described to internal customers identifying features that may affect location, safety or storage requirements
2 Examine quality and report on products	2.1 Products are inspected in accordance with workplace quality assurance procedures
	2.2 Workplace procedures are followed to replace, return or dispose of stock/products that are not useable
	2.3 Non-conforming products are recorded/reported in accordance with workplace procedures
3 Use inventory and labelling systems to identify and locate products	3.1 Inventory and labelling systems are used to locate products within the workplace
	3.2 Goods are physically located and identified

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2014A Use product knowledge to complete work operations.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in products and services in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when handling, transporting and storing products and providing information on products and services
- completing documentation related to work activities
- estimating the size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- reading and comprehending simple statements in English
- reading, interpreting and following instructions, procedures, information and signs relevant to handling, transporting, storing products and providing information on products and services
- selecting and using relevant communications, computing and load handling equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations relevant to products being identified, handled, transported, stacked and/or stored as part of work operations
- categories or groups of products and requirements for special handling, stacking and storage
- documentation requirements including reports and records concerning damaged or contaminated goods
- focus of operation of work systems, equipment, management and site operating systems for packaging goods
- housekeeping standards and procedures
- purpose and use of cataloguing and labelling systems
- site layout and obstacles
- strategies to seek out sources of product knowledge and to use this information to inform work
- types of equipment and storage areas appropriate for different categories of goods including perishable, fragile, dangerous, composition/state goods
- workplace procedures and policies for identifying, handling, stacking and storing particular categories of products.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIB0012 Maintain and use hand tools

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain and use hand tools in accordance with workplace procedures and safe working codes of practice across a variety of operational workplace contexts within the transport and logistics industry.

It includes selecting and using hand tools to complete workplace tasks, maintaining basic hand tools in accordance with manufacturer instructions, and securing and storing hand tools in accordance with workplace procedures.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Select and use hand tools

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Correct tools are chosen to complete workplace tasks
- 1.2 Appropriate personal protection equipment (PPE) is selected and used to minimise personal injury risk

- | | | |
|----------|------------------------------------|---|
| | 1.3 | Hand tools are used in accordance with manufacturer specifications or workplace procedures to prevent damage and personal injury |
| 2 | Maintain hand tools | |
| | 2.1 | Hand tool are cleaned and maintained in accordance with manufacturer specifications and/or local instructions to ensure correct ongoing functionality of hand tools |
| | 2.2 | Unserviceable tools are repaired, replaced or reported to relevant personnel to ensure correct functionality |
| 3 | Secure and store hand tools | |
| | 3.1 | Tools are transported in a safe, secure, efficient manner to minimise risk of injury to personnel and damage to equipment |
| | 3.2 | Tools are stored and secured according to manufacturer or workplace procedures to prevent damage to, and losses of, equipment |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB1028 Maintain and use hand tools.

Assessment Requirements for TLIB0012 Maintain and use hand tools

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- identifying and selecting at least three different types of hand tools and related materials or equipment suitable for the required task
- using at least three different types of hand tools and related materials or equipment safely
- reading, interpreting and following relevant instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- workplace emergency procedures
- materials for maintaining hand tools and the procedures and precautions for their care, use and storage
- problems that may occur maintaining and using hand tools and related action that should be taken
- relevant work health and safety (WHS)/occupational health and safety (OHS), and environmental procedures and regulations
- relevant sections of state/territory regulations, codes of practice and safe working system requirements
- workplace documentation and records requirements
- workplace procedures and policies for maintaining and using hand tools.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIC0023 Operate four wheel drive vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a four wheel drive vehicle.

It includes driving a four wheel drive vehicle on roads, traversing gradients, ascending and descending steep gradients, and operating in rugged terrain.

It also includes using vehicle equipment/controls and completing pre-start and post-operational checks safely in accordance with the relevant state/territory legislated roads and traffic licence requirements.

Full or provisional driver licence must be held prior to commencing this unit of competency.

Driving involves the application of four wheel drive vehicle operating principles and procedures to maintain the safety and operation of a four wheel drive vehicle across a variety of on-road and off-road contexts.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the

Performance criteria describe the performance needed to demonstrate

essential outcomes.

achievement of the element.

1 Operate four wheel drive vehicles

- 1.1** Pre-start checks of vehicle and equipment are carried out in accordance with manufacturer specifications and roadworthy requirements
- 1.2** Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.3** Tyres are checked for pressure suitable for terrain and/or changed in accordance with manufacturer and workplace procedures
- 1.4** Vehicle fuel, water and any ancillary equipment are checked before starting vehicle journey in accordance with manufacturer and workplace procedures
- 1.5** Loads are secured in accordance with workplace and safety requirements
- 1.6** Vehicle is driven on-road and off-road in accordance with legislative and workplace requirements at appropriate operating speeds for road or track conditions and hazards
- 1.7** Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation in surrounding terrain
- 1.8** Road conditions are constantly monitored, negotiated and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 1.9** Vehicle is parked and shut down in accordance with workplace and manufacturer requirements

2 Operate vehicle on or across a gradient

- 2.1** Intended vehicle path is inspected prior to negotiating gradient
- 2.2** Loads are secured in accordance with workplace and safety requirements
- 2.3** Appropriate gear and/or range are selected, and engine revolutions are maintained to ensure constant traction
- 2.4** Vehicle is driven on-road and off-road in accordance with legislative and workplace requirements at appropriate speeds for conditions and gradient hazards
- 2.5** Vehicle equipment/controls are set and operated in

- accordance with manufacturer instructions for operation on or across a gradient
- 2.6** Gradient conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 3 Operate vehicle ascending a steep gradient**
- 3.1** Intended vehicle path is inspected prior to negotiating ascent
- 3.2** Appropriate gear and/or range are selected to ascend grade, and engine revolutions are maintained to ensure constant traction
- 3.3** Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation while ascending a steep gradient
- 3.4** Stall recovery techniques are applied in accordance with manufacturer and workplace procedures
- 3.5** Ascent conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 4 Operate vehicle descending a steep gradient**
- 4.1** Intended vehicle path is inspected prior to negotiating gradient
- 4.2** Appropriate gear and/or range are selected to descend grade, and engine revolutions are maintained to ensure constant traction
- 4.3** Vehicle equipment/controls are set and operated in accordance with manufacturer instructions for operation while descending a steep gradient
- 4.4** Stall recovery techniques are applied in accordance with manufacturer and workplace procedures
- 4.5** Descent conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 5 Operate vehicle in rugged terrain**
- 5.1** Intended vehicle path is inspected prior to negotiating rugged terrain
- 5.2** Appropriate gear and range are selected to negotiate rugged terrain and engine revolutions are maintained to ensure

- constant traction
- 5.3 Vehicle equipment and controls are set and operated in accordance with manufacturer instructions for operation in surrounding terrain
 - 5.4 Vehicle chains are fitted in accordance with manufacturer instructions and environmental conditions, as required
 - 5.5 Vehicle load is inspected, positioned and secured to maximise traction for four wheel driving
 - 5.6 Rugged conditions are constantly monitored, and appropriate operations and control techniques are used to ensure safe vehicle operation and no injury to people or damage to vehicle, tracks or loads is sustained
- 6 Complete post-operations check**
- 6.1 Vehicle is parked and shut down in accordance with workplace procedures and manufacturer requirements
 - 6.2 Faults or malfunctions are recorded and/or reported in accordance with workplace procedures
 - 6.3 Vehicle and equipment are cleaned and stored after use in accordance with manufacturer and workplace procedures
 - 6.4 Documentation and journey reports are completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC2025 Operate four wheel drive vehicle.

Links

Companion Volume Implementation Guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIC0023 Operate four wheel drive vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- cleaning and storing vehicles and equipment
- communicating effectively with others
- completing relevant documentation
- conducting pre-start checks
- demonstrating low-risk driving behaviours
- identifying and reporting operational faults
- identifying job hazards and taking required action
- implementing contingency plans
- interpreting and following operational instructions
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, procedures, information and signs
- recording and reporting any identified problems, faults or malfunctions promptly in accordance with workplace procedures
- using and adjusting vehicle equipment/controls, as required:
 - brakes
 - electronic traction control
 - freewheeling hubs
 - gears/range
 - heating and cooling systems
 - jacks
 - tyres
- working with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- documentation and record keeping requirements
- effect of hard surface driving (such as transmission wind up) on a four wheel drive system
- effect of loads while negotiating a gradient
- efficient driving techniques and safe driving strategies
- environmental impact of four wheel driving
- hazards and risks associated with traversing cross gradients
- hazards that may exist when operating a four wheel drive vehicle in on-road and off-road situations, and action to minimise, control or eliminate identified hazards
- low risk driving behaviours:
 - creating and maintaining crash avoidance space
 - protecting crash avoidance space
 - road rules and directions
 - space and time management
- pre- and post-operational checks and related action
- problems that may occur when operating a four wheel drive vehicle, and action that can be taken to report or resolve the problems
- relevant land management procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- vehicle equipment/controls, instruments and indicators, and their use
- vehicle handling procedures and techniques for a range of road and track conditions
- workplace procedures for operating a four wheel drive vehicle in both on-road and off-road situations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions in a four wheel drive vehicle typical of that which is driven in the workplace.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises and case studies
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor unit Application change to clarify terms
- PC 1.2 Minor terminology change
- Minor word changes in Performance Evidence
- Minor word changes in Knowledge Evidence.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific codes of practice, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Special load is the collective term for those items of cargo which, due to their nature or value, will require special treatment and/or equipment during the transport activities.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Load and unload vehicle

2 Secure and protect vehicle and load

3 Complete documentation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
- 1.2 Hazardous and specialised cargo are identified and handled in accordance with required workplace procedures, work health and safety (WHS)/occupational health and safety (OHS) requirements
- 1.3 Vehicle is loaded in consultation with relevant personnel and required documentation in accordance with vehicle loading regulations and workplace safety requirements
- 1.4 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
- 1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
- 1.6 Ancillary equipment is operated in accordance with workplace procedures and manufacturer instructions during loading and unloading operations
- 2.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions
- 2.2 Load is protected in accordance with legal and workplace safety requirements
- 2.3 Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity
- 2.4 Loaded vehicle is inspected and checked for security to travel
- 3.1 Documentation is completed and proofread in accordance with workplace procedures

- 3.2** All required cargo transportation documentation is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3014 Load and unload vehicles carrying special loads.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0001 Load and unload vehicles carrying special loads

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor unit Application change to clarify terms
- PC 1.2 Minor terminology change
- Minor word changes in Performance Evidence
- Minor word changes in Knowledge Evidence.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating and working collaboratively effectively with others when loading and unloading special loads
- completing relevant documentation
- complying with dangerous goods systems and relevant regulatory requirements, as required
- estimating size, shape and special requirements of loads
- identifying and correctly using load handling equipment when loading and unloading hazardous cargo and/or specialised cargo
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of relevant documentation
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- using manual handling techniques safely.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of special loads such as:
 - controlled waste
 - powders
 - raw grain product
- housekeeping standards and workplace procedures
- methods for securing special loads
- National Transport Commission (NTC) Load Restraint Guide
- relevant dangerous goods systems and dangerous goods regulation requirements, including emergency information panels, their meaning and implications for loading and unloading processes
- risks and hazards when loading and unloading special loads, and related precautions to control the risk
- site layout considerations and obstacles to unloading operations
- WHS/OHS procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, handling equipment and PPE currently used in industry
- applicable documentation, including workplace procedures, regulations, NTC Load Restraint Guide, codes of practice and operation manuals.

TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and care for livestock in transit, in accordance with relevant regulations and industry codes of practice for caring for livestock in transit.

It includes preparing to transport livestock, caring for and controlling livestock in transit, using appropriate animal husbandry techniques, and completing relevant documentation as required.

Work is performed under limited or minimum supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to transport livestock

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Health condition and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace procedures

- 1.2 Vehicle is checked that it is positioned correctly on loading dock, hazards are identified and required action is taken to minimise, control or eliminate identified hazards in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and workplace procedures
 - 1.3 Livestock crate drainage system is inspected to ensure drainage of livestock effluent from the vehicle is in accordance with regulatory requirements and workplace procedures
 - 1.4 Livestock crate is checked for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit in accordance with regulatory requirements and workplace procedures
 - 1.5 Poor quality livestock is identified and reported to specified person/s in accordance with workplace procedures
 - 1.6 Feed provisions and other requirements including veterinary products for livestock, prior to and during transit, are identified and organised
 - 1.7 Portable stockyards are assembled as required in accordance with regulatory requirements and workplace procedures
 - 1.8 National vendor declaration is obtained and checked for accuracy in accordance with regulatory requirements
 - 1.9 Loaded livestock is visually assessed to ensure correct density of livestock within the pen and adjustments are made as required in accordance with regulatory requirements and workplace procedures
- 2 Care for and control livestock in transit**
- 2.1 Wellbeing of livestock is regularly monitored during loading, transit and unloading, and appropriate action is taken in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
 - 2.2 Relevant handling equipment is used to aid handling of livestock during loading and unloading operations, in accordance with regulations and workplace procedures
 - 2.3 Action is taken for care and wellbeing of livestock in an

- accident during transit
- 2.4** Distressed livestock is identified and handled in an appropriate manner in accordance with regulatory requirements and workplace procedures
- 3 Use animal husbandry techniques**
- 3.1** Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
- 3.2** Prescribed medication is administered to livestock in accordance with veterinary directions and workplace procedures
- 4 Completion of documentation**
- 4.1** National vendor declaration transport section is completed correctly and clearly by transport operator
- 4.2** National vendor declaration is given to the appropriate person upon reaching destination on the declaration

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3020 Care for livestock in transit.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0002 Care for livestock in transit

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- inspecting vehicle to ensure livestock crate drainage system is in place and is effective in control of livestock effluent
- checking livestock crate for cleanliness and any hazards that could injure or damage livestock during loading, unloading and transit
- loading livestock to ensure correct density of livestock within the pen
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) requirements and guidelines and workplace procedures
- communicating effectively and working collaboratively with others in the care of livestock in transit
- completing relevant documentation including relevant sections of National Vendor declaration
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit

- insurance rights and requirements of clients
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- WHS/OHS/OSH requirements and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID0015 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and/or cargo.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation in accordance with relevant state or territory roads and traffic authority regulations and permit requirements.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Load and unload goods/cargo

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures

1.2 Job hazards are identified and required actions taken to minimise, control or eliminate identified hazards

- 1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations and permit requirements, as required
 - 1.4 Load is packed and unpacked to make safe and effective use of available spaces
 - 1.5 Goods and/or cargo are loaded and unloaded in accordance with relevant mass and loading regulations and workplace procedures
 - 1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
 - 1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
 - 1.8 Goods requiring special handling and/or documentation are identified, and workplace procedures are followed
 - 1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
- 2 Secure, check and protect load**
 - 2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
 - 2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
 - 2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
 - 2.4 Load is protected in accordance with legal and workplace safety requirements
- 3 Complete documentation**
 - 3.1 Load is inspected and checked for security to travel in accordance with relevant regulations and permit requirements and current ADG Code, as required
 - 3.2 All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2004 Load and unload goods/cargo.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLID0015 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) Code and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action, as required
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- National Transport Commission (NTC) Load Restraint Guide
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations, including state or territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, NTC Load Restraint Guide, codes of practice, workplace procedures and operation manuals.

TLID0016 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

Operation of a forklift is performed under supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check forklift condition

1.1 Forklift pre-start is documented and completed prior to commencement of work and relevant to equipment

1.2 Forklift is checked for compliance in accordance with relevant legislation, manufacturer specifications and workplace procedures

- 1.3 Correct personal protective equipment (PPE) is selected and worn relevant to workplace procedures
 - 1.4 Equipment attachments are selected, checked against data plate, secured correctly and appropriate to the task and terrain
 - 1.5 Equipment faults and non-compliances are reported to relevant personnel
- 2 Drive forklift**
- 2.1 Route is planned in accordance with traffic management plans for the worksite
 - 2.2 Forklift is accessed correctly, using three points of contact, seatbelt is correctly worn and fastened, and mirrors and seats are adjusted for safe operation by driver
 - 2.3 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations, manufacturer instructions and workplace procedures
 - 2.4 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
 - 2.5 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
 - 2.6 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
- 3 Operate forklift to handle loads**
- 3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and allowed attachments selected
 - 3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and workplace procedures
- 4 Monitor site conditions**
- 4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
 - 4.2 Site conditions are continuously monitored to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
- 5 Monitor and maintain forklift performance**
- 5.1 Performance and efficiency of vehicle operation is monitored during use
 - 5.2 Defective/irregular performance and malfunctions are reported to relevant personnel

5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

6 Perform shutdown

6.1 Forklift is parked, shut down, checklist completed and equipment secured in accordance with manufacturer specifications, regulations and workplace procedures

6.2 Defective/irregular performance, malfunctions or maintenance are recorded and reported to relevant personnel

6.3 PPE is stored correctly in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to TLID2010 Operate a forklift.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0016 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- conducting pre-start and shutdown procedures
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures (SOPs)
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift, including attachments
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of forklift and related equipment, and taking appropriate action, as required
- operating and adapting to differences in equipment in accordance with SOPs
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- correct lifting techniques to prevent excessive wear and tear on equipment
- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high-risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational and shutdown checks carried out on forklift and related actions
- principles of stress management when driving a forklift, including fatigue
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- relevant workplace procedures
- site layout and obstacles.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLID0020 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift materials safely using manual handling methods.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess risks associated with relocating load

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

1.2 Storage locations are determined and potential routes to be

followed are identified

- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
- 1.6 Worksite hazards are identified, and corrective action is taken prior to commencing shifting products, goods or materials
- 1.7 Risks in potential routes are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of products, goods or materials
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered when moving loads
- 1.11 Appropriate personal protective equipment (PPE) is identified and used
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned consistent with the code of practice for manual handling and in accordance with the risk assessment
- 2.2 Process for relocating load is proposed, including predicting and planning for potential difficulties
- 2.3 Proposed process is checked for compliance with codes of practice and workplace procedures

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
- 3.2 Team lifting tasks are coordinated
- 3.3 Planned process and route are followed
- 3.4 Relocated products, goods or materials are set down without

damage to goods, personnel or equipment and are checked for stability

- 3.5 Relocation is checked to ensure it meets work requirements and variances are reported to relevant personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001 Shift materials safely using manual handling methods.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID0020 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying and following relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures
- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling products, goods or materials
- communicating effectively with others when manually lifting and handling products, goods or materials
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and products, goods or materials in accordance with workplace procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of products, goods or materials
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling products, goods or materials
- working systematically with required attention to detail without injury to self or others, or damage to products, goods, materials, or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- relevant WHS/OHS workplace procedures, codes of practice and industry guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling products, goods or materials and related precautions to control the risk, including:
 - controlled actions on a movement during lifting
 - distance over which load is to be shifted
 - frequency of shifting operations
 - load on the spine during lifting
 - postures and positions during lifting
 - rotation and side movement of the spine during lifting
 - time allowed for shifting the load
 - type, weight and position of the load, including loose, liquid, dangerous or hazardous products, goods or materials
- site layout and obstacles
- work layout.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLID2022 Conduct weighbridge operations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct weighbridge operations.

It includes setting up for weighbridge operations, weighing loaded and unloaded vehicles, finalising weighbridge operations, and completing required records and documentation in accordance with workplace procedures and regulatory requirements.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Set up for weighbridge operations

- 1.1 Weighbridge systems, including equipment, computer and recording arrangements, are checked for operational status
- 1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturer instructions and relevant legislation
- 1.3 Accurate reporting of results of inspection and testing is kept in accordance with statutory requirements, workplace procedures and industry guidelines
- 1.4 Hazards are identified, risks are assessed, and control measures are implemented
- 1.5 Faults and discrepancies in weighbridge operation are identified and appropriate action is undertaken in accordance with workplace procedures

2 Weigh loaded vehicles

- 2.1 Vehicles are directed onto platform to obtain accurate weight
- 2.2 Weight of loaded stationary vehicle is registered against vehicle and load identification
- 2.3 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement
- 2.4 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

3 Weigh unloaded vehicles

- 3.1 Vehicles are directed onto platform to obtain accurate weight
- 3.2 Weight of unloaded stationary vehicle is registered against vehicle
- 3.3 Proposed load weight is assessed for conformance to statutory requirements
- 3.4 Loading operations are commenced in accordance with legal loading weight, customer requirements and workplace procedures, and vehicle is re-weighed to establish final load weight, as required
- 3.5 Vehicle and load information are entered into workplace recording system and invoice is issued to driver, as required
- 3.6 Weighbridge documents, invoices or receipts are obtained in

accordance with statutory and workplace requirements

3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures

4 Complete weighbridge operations

4.1 Weighbridge systems, including equipment, computer and recording arrangements, are secured or made ready for next shift

4.2 Record of operations is maintained and filed in accordance with workplace procedures and statutory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2022A Conduct weighbridge operations.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2022 Conduct weighbridge operations

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Performance Criteria
- Minor changes to Performance Evidence
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- identifying, selecting and efficiently and effectively using weighbridge equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of weighbridge equipment
- operating and adapting to differences in equipment in accordance with workplace procedures
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems, errors or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- setting up and maintaining weighbridge equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- calculation method and approaches for metric and imperial systems
- classification procedures
- correct weighing procedures, including statutory and workplace requirements
- emergency response procedures
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- problems that may occur when conducting weighbridge operations and appropriate actions that can be taken to resolve these problems
- records and documentation requirements for weighbridge operations
- relevant regulations for conducting weighbridge operations, including relevant dangerous goods systems and dangerous goods regulation requirements
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout
- weights and measures regulations
- workplace procedures for conducting weighbridge operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including legislation, regulations, National Transport Commission (NTC) Load Restraint Guide, relevant dangerous goods systems and dangerous goods regulation requirements, codes of practice, workplace procedures and operation manuals.

TLID3035 Operate a boom type elevating work platform

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a boom type elevating work platform less than 11 metres boom length, in accordance with relevant state/territory licence/permit requirements and regulations, in a variety of operational contexts.

It includes inspecting and testing elevating work platform, assessing job and work requirements, planning work and setting up for lift, and carrying out elevation. It also includes implementing planned hazard controls and strategies, and packing up work platform after operations.

Work is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Inspect and test elevating work platform

- 1.1 Work platform is visually inspected prior to operation for evidence of damage, structural weakness or interference in accordance with pre-operational safety check procedures
- 1.2 Routine pre-operational equipment checks are carried out in accordance with available checklists
- 1.3 Work platform logbook is checked, service requirements are noted and maintenance personnel are advised of requirements
- 1.4 Elevating work platform is started in accordance with manufacturer guidelines and start-up procedures for operations, and abnormal noise or movement is reported to authorised person for corrective action
- 1.5 Start-up checks are conducted in accordance with manufacturer specifications and company procedures to ensure work platform and equipment are operating correctly
- 1.6 Faults are corrected or reported to authorised person for corrective action in accordance with company procedures
- 1.7 Operating and emergency controls are checked for correct operation in accordance with manufacturer specifications, including use of emergency decent device
- 1.8 Boom is lowered under simulated emergency conditions to check for operational effectiveness
- 1.9 Gear and accessories are checked and damaged or worn gear is segregated and reported to authorised person for testing/repair/destruction
- 1.10 Results of inspections are recorded and reported in accordance with company procedures

2 Assess job requirements and work

- 2.1 Briefing, handover details, authorisations and clearances are received, interpreted and clarified in accordance with company and site procedures, and legislative requirements
- 2.2 Work area is inspected, potential hazards are identified and appropriate elimination or control measures are selected
- 2.3 Weight of load including personnel and equipment, is correctly estimated to ensure job is within limits of work platform capacity

- 3 Plan work and set up for lift**
- 3.1 Work plan is developed and agreed with relevant workplace personnel, including hazard prevention/control measures, and safety and emergency procedures in line with applicable Australian Standards
 - 3.2 Suitable firm and level standing is chosen and prepared for location of elevating work platform
 - 3.3 Outriggers and stabilisers are correctly deployed and positioned in accordance with manufacturer instructions and appropriate Australian Standards
 - 3.4 Appropriate plates or packing are correctly used under footplates as required to adequately distribute loading
 - 3.5 Ground is checked before and after packing is installed to ensure it is firm enough to bear load
 - 3.6 Job plan is developed including hazard prevention/control measures and safety procedures in accordance with applicable Australian Standards and equipment manufacturer specifications
 - 3.7 Work platform load chart is located and information on permissible loads, radii and heights is taken into account in planning job
 - 3.8 Job requirements, and workplace rules and procedures are taken into account in job plan
 - 3.9 Job plan is discussed and confirmed with relevant personnel
 - 3.10 Work gear and tools are properly stowed in elevating work platform in accordance with Australian Standards, company procedures and guides
- 4 Carry out elevation**
- 4.1 Configuration and operation of elevating work platform are checked as required to ensure safe lift
 - 4.2 Operation of work platform is carried out in accordance with job plan, appropriate Australian Standard and manufacturer specifications
- 5 Implement planned hazard control strategies**
- 5.1 Load is constantly monitored to ensure safety of personnel, load and structural stability
 - 5.2 Unplanned situations are responded to in accordance with company procedures, in a manner that minimises risk to personnel and equipment

- 5.3 Required signals are correctly given, interpreted and followed in accordance with appropriate Australian Standards
- 6 Pack up work platform**
- 6.1 Elevating work platform is shut down using correct sequence of procedures in accordance with manufacturer instructions
- 6.2 Routine post-operational equipment checks are carried out in accordance with manufacturer instructions and available checklists, and defects are recorded and reported in accordance with company procedures
- 6.3 Elevating work platform is dismantled in accordance with job plan, manufacturer instructions and relevant statutory regulations
- 6.4 Outriggers and stabilisers are secured and stowed in accordance with manufacturer instructions
- 6.5 Elevating work platform is correctly stowed and secured in accordance with manufacturer instructions and company procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3035A Operate a boom type elevating work platform.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID3035 Operate a boom type elevating work platform

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using equipment, processes and procedures
- implementing contingency plans
- interpreting and following operational instructions
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of equipment
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- planning own work, predicting consequences and identifying improvements
- reading and interpreting relevant instructions, procedures, regulations, codes of practice and manuals
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and workplace operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- boom type elevating work platform applications, capacities, configurations, safety hazards and control mechanisms
- capability on boom type elevating work platform compliance plate
- operational work systems and equipment
- problems that may arise when operating a boom type elevating work platform and actions that should be taken to prevent or solve these problems
- relevant road rules, regulations, permit and licence requirements for boom type elevating work platform operation
- relevant WHS/OHS and environmental procedures and regulations
- risks and hazards involved in operating a boom type elevating work platform and associated action that can be taken to eliminate or minimise the risk/hazards concerned
- wind speed equipment capability (wind loading)
- workplace procedures for operating a boom type elevating work platform less than 11 metres boom length, at a worksite.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIE0002 Process workplace documentation

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to process workplace documentation and gather data in accordance with workplace requirements. Processing documentation/data is carried out as an integral part of work operations in the context of the workplace concerned.

It includes planning and completing documentation and data gathering to fulfil an identified purpose, including legislative obligations.

Work may be performed in a team or autonomous working situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan documentation/data **1.1** Purpose of workplace documentation/data gathering is

gathering	identified and confirmed in accordance with legislative obligations and workplace procedures
	1.2 Information needed for completing workplace documentation/data is identified as required in accordance with legislative obligations and workplace procedures
2 Complete documentation/data gathering	2.1 Data is gathered, required documentation is prepared and forms are completed, in accordance with workplace policies and procedures
	2.2 Information/data is gathered and entered into computerised system, as required, in accordance with regulatory requirements and workplace procedures
	2.3 Workplace documents and electronic applications and systems are maintained accurately and in a timely manner in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE2008 Process workplace documentation.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE0002 Process workplace documentation

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) legislation and workplace procedures
- completing workplace documentation and forms
- ensuring processed information and data is checked for relevance, accuracy and completion
- operating and adapting to differences in electronic applications and systems in accordance with operating procedures
- reading, interpreting and organising information and data needed for completing and processing workplace documentation and forms
- working collaboratively with others when completing and processing workplace documentation, data and forms
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- writing and entering information and data into electronic applications and systems in a timely manner.

Knowledge Evidence

- procedures for processing workplace documentation and data using relevant workplace technology
- relevant procedures and duty of care requirements
- relevant WHS/OHS legislation, regulatory requirements and workplace responsibilities
- requirements and sources for workplace documentation, including:
 - data
 - diaries
 - forms
 - logs

- typical problems in processing workplace documentation and data and appropriate action and solutions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, electronic applications and systems, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

TLIE0008 Calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to calculate mass, area and quantify dimensions.

It includes calculating loads to be transported or placed in storage, calculating load limits of transport and/or storage systems, and organising the loading in accordance with relevant legislation and workplace requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation.

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Calculate loads for transport or storage

1.1 Order forms and work orders are read, and requirements are noted

1.2 Shape, balance characteristics, dimensions and mass of load/s are identified

1.3 Weights and volumes are totalled to calculate load

requirements of transport or storage system

- 2 Calculate load limits of transport and/or storage**
- 2.1** Allowable load limits for storage and/or transport systems are identified in accordance with legislative requirements and workplace procedures
 - 2.2** Capacity of transport and storage systems in terms of mass, area and volume is calculated
- 3 Organise loads**
- 3.1** Loads are restricted to allowable range
 - 3.2** Loads are spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
 - 3.3** Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002 Estimate/calculate mass, area and quantify dimensions.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE0008 Calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- calculating volume and safely moving liquids
- identifying, selecting and using relevant calculation equipment
- interpreting and following operational instructions and prioritising work
- performing mathematical operations required when calculating mass, area and volumes of loads and transport/storage facilities
- reading and interpreting relevant instructions, procedures and information
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- limitations of loads for storage and/or transport systems
- national and international codes and regulations relevant to workplace activities
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate actions that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- requirements for safely moving liquids
- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIE3004 Prepare workplace documents

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan workplace

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose and audience for document are identified

document

- | | | |
|-------------------------------------|------------|--|
| | 1.2 | Appropriate format for document is established to meet workplace requirements |
| | 1.3 | Relevant information is identified and selected for inclusion in document |
| 2 Prepare workplace document | 2.1 | Document is drafted in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary appropriate for reader/s |
| | 2.2 | Document is edited and presented in a final version appropriate to task |
| 3 Complete workplace forms | 3.1 | Work related form/s is interpreted to identify information required for its completion |
| | 3.2 | Required information for completion of form is gathered from relevant sources in accordance with workplace procedures |
| | 3.3 | Form/s is completed in accordance with workplace policy and procedures, and applicable regulations and codes |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3004A Prepare workplace documents.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing documentation related to work activities
- reading and interpreting relevant instructions, procedures, information and labels
- reading, writing and comprehending simple statements in English
- working collaboratively with others
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- conventions for sentence construction, grammar, spelling, style and punctuation
- equipment and materials required for completing documents and forms, and instructions and precautions for their use
- format and layout of various documents and forms used in workplace activities
- relevant Australian and international codes of practice and regulations relevant to documents and/or forms being prepared
- relevant work health safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- workplace procedures and policies for completing documents/forms.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

TLIF2010 Apply fatigue management strategies

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS PERFORMANCE CRITERIA

Elements describe the Performance criteria describe the performance needed to demonstrate

essential outcomes. achievement of the element.

- | | |
|---|---|
| 1 Identify and act on signs of fatigue | 1.1 Potential causes of fatigue are identified and actions taken to minimise their effects in accordance with workplace procedures |
| | 1.2 Personal warning signs of fatigue are recognised, and necessary steps are taken in accordance with workplace procedures, to ensure that effective work capability and alertness are maintained |
| 2 Implement strategies to minimise fatigue | 2.1 Workplace procedures are assessed to minimise fatigue |
| | 2.2 Factors that increase the risk of fatigue-related accidents and incidents are minimised |
| | 2.3 Fatigue management strategies are implemented in accordance with workplace policy and procedures |
| | 2.4 Lifestyle choices are made that promote the effective long-term management of fatigue |
| | 2.5 Effective practices in combating fatigue are adopted and applied |
| | 2.6 Personal fatigue management strategies are communicated to relevant people |
| | 2.7 Appropriate counter measures are planned to combat fatigue |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2010A Apply fatigue management strategies.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIF2010 Apply fatigue management strategies

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

- Minor changes to unit Application
- Minor changes to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures (SOPs) as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required actions to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate actions in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance

- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective (PPE) equipment currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIG2007 Work in a socially diverse environment

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply cultural awareness, communication principles and problem-solving techniques to facilitate working in a socially diverse environment. This is done in accordance with workplace procedures, relevant anti-discrimination and equal employment opportunity (EEO) regulations.

It includes communicating with customers and colleagues from diverse backgrounds and dealing with cross-cultural misunderstandings.

Work is performed with limited or minimum supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

G – Teamwork

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Communicate with customers and colleagues from diverse backgrounds

- 1.1 Customers and colleagues from all cultural groups are valued and treated with respect and sensitivity
- 1.2 Cultural differences are accommodated in verbal and non-verbal communication
- 1.3 Where language barriers exist, efforts are made to communicate through use of gestures or simple words in the other person's language
- 1.4 Assistance from colleagues, reference material or outside organisations is obtained as required

2 Deal with cross-cultural misunderstandings

- 2.1 Issues that may cause conflict or misunderstanding in the workplace are identified
- 2.2 Difficulties are addressed with the appropriate people and assistance is sought from team leader/supervisor as required
- 2.3 When difficulties or misunderstandings occur, possible cultural differences are considered
- 2.4 Efforts are made to resolve misunderstandings, taking account of cultural considerations
- 2.5 Issues and problems are referred to the appropriate team leader/supervisor for follow-up

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIG2007A Work in a socially diverse environment.

Assessment Requirements for TLIG2007 Work in a socially diverse environment

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- communicating and working effectively with others when working in a socially diverse environment
- completing documentation related to working in a socially diverse environment
- reading, interpreting and applying instructions, legislation, procedures, information and signs relevant to working in a socially diverse environment
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- awareness of the culture of Australia's Indigenous and non-Indigenous peoples
- cultural awareness
- principles of equal employment opportunity (EEO) and anti-discrimination legislation as they apply to individual employees
- principles that underpin cultural awareness
- recognition of the different cultural groups in Australian society
- recognition of various international customer groups (appropriate to the sector and individual workplace)
- typical cross-cultural misunderstandings and problems, and appropriate ways of dealing with them
- typical modifications or reasonable adjustments that can occur in a workplace

- workplace policies and procedures relevant to socially diverse work environment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations and codes of practice.

TLIH0005 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to interpret road maps and navigate pre-determined routes as part of transport operations.

It includes identifying and determining the most appropriate route and completing required route documentation in accordance with operational requirements.

It involves the application of map reading principles and procedures when interpreting street maps which includes either a road map, directory or global positioning system (GPS) device; and following pre-determined routes.

Work is performed under general or limited supervision.

Work must be carried out in accordance with relevant state or territory roads and/or traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate

essential outcomes.

achievement of the element.

1 Identify and complete pre-planned route

- 1.1 Pre-determined route documentation is accessed and interpreted
- 1.2 Relevant street maps are identified and accessed for pre-planned route
- 1.3 Street map symbols for pre-planned route are recognised and interpreted
- 1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate street map
- 1.5 Pre-determined route directions are interpreted, and route is traced using street map
- 1.6 Key intersections and other landmarks along route are identified for use in following planned route
- 1.7 Alternative contingency routes are identified for emergencies or traffic delays
- 1.8 Pre-determined route is correctly followed

2 Complete necessary documentation

- 2.1 Required route documentation is completed in accordance with workplace procedures, as required
- 2.2 Required route documentation is filed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH2001 Interpret road maps and navigate pre-determined routes.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIH0005 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- completing documentation related to route navigation, as required
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job task
- reading and interpreting relevant instructions, procedures, information and signs
- using street maps and other route documentation to complete and navigate pre-determined routes, as required, and in accordance with workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- current route information about accidents or emergencies that might close or restrict traffic
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations and rest stops as required
- operational procedures for interpreting road maps, using global positioning system (GPS) devices and navigating routes
- relevant state or territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- traffic conditions at various times of the day and night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate actions that should be taken

- workplace requirements for recording and documenting route information, as required.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry to navigate routes
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIH0006 Plan and navigate routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to plan and navigate routes.

It includes interpreting information from a street map which includes either a road map, directory or global positioning system (GPS) device; planning the most appropriate route taking into account pertinent factors; and completing required trip documentation in accordance with workplace procedures as part of transport operations, in accordance with relevant state and/or territory roads and traffic authority regulations.

This unit relates to the work of a commercial vehicle driver in the transport industry.

Work is performed under general or limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Interpret street maps

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Symbols on a street map are recognised and interpreted for navigating routes

- 2 Plan routes**
 - 1.2** Destination location is identified using a street map
 - 2.1** Given a location and a destination, the most direct and alternative routes between two points are identified using a street map
 - 2.2** Hazards are identified, risks are assessed, and control measures are implemented
 - 2.3** Information on height, width and load limits of road infrastructure and other restrictions on thoroughfares is accessed, interpreted and taken into account when planning a route for a journey, as required
 - 2.4** Suitable route is selected to ensure the most efficient, safe, secure and legal transport operation
- 3 Follow planned route**
 - 3.1** Planned route is correctly followed with aid of a street map
 - 3.2** Route documentation is completed in accordance with workplace policies and procedures, as required
 - 3.3** Parking is conducted in accordance with workplace policies and procedures, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH3002 Plan and navigate routes.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIH0006 Plan and navigate routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and interpreting required information and developing contingency routes, including road restrictions, traffic conditions and service stations/rest stops
- applying fatigue management techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant workplace policies and procedures
- completing relevant documentation, as required
- interpreting and following workplace instructions and prioritising work
- interpreting information to allow effective route planning
- modifying route planning activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- planning and navigating a route effectively, including:
 - alternative routes for contingencies such as road works, emergencies or delays
 - transport routes to meet workplace policies and procedures
 - planning routes in accordance with workplace policies and procedures
- reading and interpreting relevant instructions, procedures, information and signs, including:
 - estimating route distances using map information
 - identifying roads and intersections
 - identifying town and suburb locations
 - reading and interpretation of map symbols
- reporting and/or rectifying identified problems promptly in accordance with workplace procedures.
-

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on particular routes
- features and contents of street maps, and techniques for their use in transport navigation
- known traffic conditions at various times of the day along specific routes
- location of service stations and rest stops
- physical hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards on long routes
- workplace procedures for planning and navigating transport routes
- workplace policies and procedures for recording and documenting route information.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.
- A simulator or online assessment is not suitable for the final assessment of this unit of competency.

TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use infotechnology devices in the workplace in accordance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures, within the transport and logistics industry.

It includes identifying infotechnology equipment and systems; setting up, using and shutting down computer-based equipment and systems; and inputting, storing and presenting files/data. It also involves implementing workplace procedures for managing and securing data.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Identify infotechnology systems**
 - 1.1 Types of infotechnology equipment used in the work area are identified
 - 1.2 Functions of equipment, component parts and accessories are identified
 - 1.3 Applications for workplace activities of different infotechnology equipment and systems are interpreted
 - 1.4 Routine faults in operating systems, software applications and operator errors are identified
 - 1.5 Sources of information on rectifying/reporting faults with operating equipment, systems and application are identified
- 2 Access and operate computer-based equipment and systems**
 - 2.1 Work environments and equipment are adjusted to meet ergonomic requirements and workplace policies and procedures
 - 2.2 Systems are accessed and checked, as required, for viruses
 - 2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturer guidelines
 - 2.4 Infotechnology equipment and software operating manuals and/or help screens are used to inform work practices
 - 2.5 Required application software packages and accessories are selected and accessed
 - 2.6 Required file and/or data to be accessed is identified
 - 2.7 Files/data are filed in accordance with workplace procedures
 - 2.8 Shut-down procedures for files, applications and equipment are followed
- 3 Input, store and present files/data**
 - 3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader, touch screen or other system
 - 3.2 Accurate input is confirmed
 - 3.3 Files are accessed in accordance with workplace

- procedures
- 3.4 Data is manipulated to suit work requirements and is checked for accuracy
 - 3.5 Saved files are accessed through relevant directories
 - 3.6 Information and disk/s are stored, as required
 - 3.7 Information is presented using computerised projection facilities as required
- 4 Implement workplace procedures for managing and securing data**
- 4.1 Security procedures are followed in accordance with workplace procedures
 - 4.2 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIK2010A Use infotechnology devices in the workplace.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and/or completing electronic documentation through the use of infotechnology devices in the workplace
- adapting to differences in software and hardware equipment in accordance with operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices in the workplace
- applying relevant legislation and workplace procedures
- identifying and using computer equipment, software, processes and procedures required within the job context
- identifying fault-finding procedures
- implementing contingency plans when using infotechnology devices in the workplace including using security and backup software and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- operating infotechnology devices used within the workplace in accordance with operational requirements
- reading and interpreting instructions, procedures, information, operational instructions and manuals relevant to using infotechnology devices in the workplace
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

the requirements of the elements and performance criteria and include knowledge of:

- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines for using computer equipment in the workplace
- typical problems that can occur when using infotechnology devices and computer applications in the workplace and related appropriate action that can be taken to prevent or solve these problems
- WHS/OHS risks and hazards when using computer equipment for work tasks, and ways of controlling these risks/hazards
- workplace procedures for using computer equipment and application software appropriate for work role.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIL3003 Conduct induction process

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct an induction process for new workers and trainees commencing employment in the workplace, in accordance with relevant regulatory requirements, operational policies and procedures for the workplace concerned.

It includes outlining the relationship between the employee and the company, establishing and explaining the requirements of the position, and completing relevant workplace documentation.

Work involves planning, coordinating and conducting an induction program to prepare workers to enter and participate in the work activities of a workplace.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Outline the relationship between employee and the company**
 - 1.1 Employee is greeted and introduced to key personnel and areas in the workplace
 - 1.2 Workplace objectives, operating systems and workplace structures are explained
 - 1.3 Relationship between employee's position, and the workplace structure and objectives is identified
 - 1.4 Required work health and safety (WHS)/occupational health and safety (OHS), workplace procedures and employment conditions are explained
 - 1.5 Sources of information and assistance for employee are identified
 - 1.6 Emergency procedures are explained
- 2 Establish requirements of position**
 - 2.1 Job role, responsibilities and reporting relationships are explained
 - 2.2 Immediate work colleagues are introduced
 - 2.3 Workplace facilities and layout are shown to employee and flow of work/materials/goods and functions carried out in the area/s are explained
 - 2.4 Initial training in relevant WHS/OHS, equipment and work systems is provided in accordance with workplace procedures
 - 2.5 Employee rights and responsibilities in terms of equal employment opportunity, sexual harassment and anti-discrimination are explained
 - 2.6 Training opportunities are organised to develop individual job roles
 - 2.7 Workplace expectations of work functions and outputs are clarified
 - 2.8 Opportunities for employee to clarify concerns and ask questions are provided
- 3 Complete relevant workplace documentation**
 - 3.1 Workplace personnel records are completed in accordance with workplace requirements
 - 3.2 Tax declaration and other relevant documentation are checked for compliance with requirements

- 3.3 Employee is requested to provide any additional information needed and notes are taken of any additional actions required
- 3.4 Workplace-specific documentation is submitted to appropriate personnel as required, in accordance with workplace requirements
- 3.5 Requirements of commonwealth and state/territory legislation on equal employment opportunity, sexual harassment and anti-discrimination are fulfilled

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL3003A Conduct induction process.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIL3003 Conduct induction process

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- identifying and correctly using relevant equipment
- interpreting and following operational instructions
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- prioritising work
- reading interpreting and following relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- customer service standards and procedures
- emergency procedures and related equipment
- employee conditions of service
- instructional methods and resources required to conduct an induction program

- personal protective equipment and instructions for its use
- site or workplace layout
- WHS/OHS policies and procedures
- workplace documentation and record keeping procedures and requirements
- workplace hazards and related hazard minimisation procedures
- workplace induction procedures and documentation requirements
- workplace structures and employee roles and responsibilities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor transport logistics in accordance with relevant regulatory requirements, standards and codes of practice, including the Australian Dangerous Goods (ADG) Code and workplace procedures.

It includes mobilising resources, coordinating multi-modal transport activities, monitoring consignment/s and implementing a contingency management strategy.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Mobilise resources**
 - 1.1 Optimal resource level is acquired to meet operational schedule requirements
 - 1.2 Relevant regulatory and insurance requirements are determined and implemented
 - 1.3 Allocated resources are assessed and monitored to ensure operational effectiveness and efficiency
 - 1.4 Changes to resource allocation are undertaken where deficiencies or over-supply are apparent, in accordance with enterprise procedures
- 2 Coordinate multi-modal transport activities**
 - 2.1 Facilities, personnel and equipment are made ready to accommodate interchange functions
 - 2.2 Security arrangements are invoked as required
 - 2.3 Loading and unloading operations are conducted in accordance with operational schedule and applicable statutory requirements, codes of practice and enterprise procedures
 - 2.4 Relevant documentation is completed/updated in accordance with operational schedule and reporting requirements
- 3 Monitor consignment tracking**
 - 3.1 Consignment tracking systems are monitored against workplace quality standards
 - 3.2 Variations from workplace quality standards are identified and appropriate action is initiated to rectify identified problems or to institute required improvements
- 4 Implement contingency management strategy**
 - 4.1 Operational schedule is continually reviewed in taking into account information updates, reports and feedback
 - 4.2 Nature, extent and impact of issues or incidents are identified and assessed against contingency management strategy
 - 4.3 Relevant information is processed to establish priorities and responses for dealing with issues or incidents
 - 4.4 Operations are redirected and controlled to meet changes in transport environment and tasks, in accordance with enterprise procedures
 - 4.5 Liaison is initiated and maintained with organisations/individuals affected by changed operational schedules

4.6 Actions undertaken are clearly documented and filed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL5019A Implement and monitor transport logistics.

Links

Assessment Requirements for TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and monitoring transport logistics
- completing documentation related to implementing and monitoring transport logistics
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communication equipment to required protocol
- prioritising work and coordinating self and others in relation to transport logistics activities
- providing leadership and working collaboratively with others
- reading and interpreting transport schedules, regulatory requirements, customer instructions, workplace procedures and manuals relevant to implementing and monitoring transport logistics
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and applying appropriate application of technology, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant Australian standards and associated certification requirements
- business policies, procedures and plans including procedures for outsourcing components of operations and engaging additional resources
- code, regulatory, permit and licence requirements relevant to transport logistics
- operational transport logistics systems, resources, management and workplace operating systems
- problems that may occur when implementing and monitoring transport logistics and action that can be taken to resolve or report these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and regulations
- relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to transport logistics
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- risks and hazards related to implementing and monitoring transport logistics and ways of controlling the risks involved
- transport and equipment applications, capacities, configurations, safety hazards and control mechanisms
- workplace policies and procedures, including those covering issue resolution and grievance
- workplace procedures for implementing and monitoring transport logistics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Pre-requisite Unit

Not applicable

Competency Field

LIC - Licencing Units

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work/task

- 1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and site inspection is conducted in accordance with workplace procedures
- 1.2 Work area operating surface is assessed to determine suitability for operational use of forklift truck in accordance with workplace procedures
- 1.3 Suitability of forklift truck and attachment working load limit (WLL) is determined for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
- 1.4 Working area is inspected and appropriate paths for operating the forklift truck and moving and placing load/s in work area are assessed and managed in accordance with workplace procedures
- 1.5 Hazard and risk control measures are identified and reported to relevant person/s in accordance with workplace procedures
- 1.6 Traffic management plan implementation is confirmed in accordance with workplace procedures
- 1.7 Appropriate communication procedures are identified with relevant people in accordance with workplace procedures
- 1.8 All work is confirmed to ensure coverage of work/task requirements for the relevant work area is in accordance with workplace procedures

- 2 Prepare for work/task**
- 2.1** Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures
 - 2.2** Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures
 - 2.3** Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures
 - 2.4** Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures
 - 2.5** Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures
 - 2.6** Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements
 - 2.7** Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures
 - 2.8** Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures
 - 2.9** Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures
- 3 Perform work/task**
- 3.1** Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures

- 3.2 Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures
 - 3.3 Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures
 - 3.4 Unplanned and unsafe situations are responded to in accordance with safe work procedures
 - 3.5 Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures
 - 3.6 Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures
- 4 Pack Up**
- 4.1 Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures
 - 4.2 Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2001 Licence to operate a forklift truck

Links

Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
 - maintaining safe operating speed
 - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
 - battery charge as required by manufacturer requirements
 - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
 - checking for signs of paint separation and stressed welds indicating potential structural weakness
 - document evidence of damage
 - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
 - ensuring availability of correct forklift truck logbook and updating records as required
 - ensuring forklift truck tyres or other attachment/s are securely fitted
 - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
 - fluid leaks
 - lights are working effectively
 - safety equipment checks
 - signage and labels to ensure they are visible and legible
 - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
 - insufficient lighting
 - other specific hazards including dangerous goods
 - overhead hazards and fixed structures, roof beams and doorways
 - restricted and poorly ventilated areas

- surface suitability based on forklift truck and task requirements
- the risk of collision with people, moving plant and fixed structures
- weather conditions
- complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
- conducting operational checks, which must ensure:
 - all controls are located, identified and tested for functionality
 - all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
 - hazard warning systems (e.g. reversing beepers, lights and horns) are functional
 - recording and maintaining accurate information relating to forklift truck operations
 - safety devices as fitted
 - start-up is in accordance with manufacturer requirements
 - steering, transmission and brake functions comply with operating requirements
 - there are no unusual noises
- confirming and following traffic management plan procedures relevant to their role in the work area
- conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
- determining relevant lifting attachment to perform work/task
- determining lift requirements including:
 - positioning of unusually balanced/shaped loads
 - centre of gravity
 - dynamic nature of load
 - tyre/attachment positioning
 - weight
- ensuring risk control measures within the work area are effective as per workplace procedures
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various environmental conditions
- maintaining communication with other workplace personnel through using worksite procedures including:
 - audible and visual warning devices
 - signage
 - two-way radio
 - verbal instructions
 - written instructions
- maintaining three points of contact whilst accessing and egressing forklift truck and ensuring

- rungs / steps are free of hazards
- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
 - aligning tynes/attachment to load
 - carrying out a lift to 75% of the maximum height
 - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
 - correctly using horns and mirrors in workplace
 - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
 - driving applicable to conditions and moving loads safely
 - driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
 - an 'S' bend with a minimum 90 degrees left and right turn
 - ensuring load/s remains stable through pick up, transport and placement
 - forklift truck speed is appropriate to load and surroundings
 - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
 - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
 - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
 - tilting mast (or forks if applicable) to ensure balance of load
 - using gluts/dunnage appropriately and lowering load safely
 - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
 - reporting to relevant person/s on site risk control measures that are not in place or are deficient
 - setting up an exclusion zone
 - securely parking forklift truck and isolating in appropriate position including:
 - minimising possible access by unauthorised person/s
 - tynes/attachment lowered to required position in accordance with manufacturer requirements
 - park brake applied
 - switching off, isolating fuel/power source and removing key according to workplace procedures
 - shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
- communication procedures including:
 - audible and visual warning devices
 - hand signals
 - questioning techniques
 - signage
 - traffic warning systems
 - two-way radio
 - written instructions
- forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
- impact of the following on the operation of the forklift truck including:
 - failure/loss of control including brakes and steering
 - failure of equipment during forklift truck operations
 - forklift truck instability causes including:
 - deterioration of ground condition
 - overloading
 - pick up and placement of load
 - irregular loads
 - operating on ramps and uneven surfaces and in restricted spaces
 - use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
 - labels on the actual load
 - markings on the actual load
 - paperwork such as consignment notes, running sheets and weighbridge dockets
 - weighing a carton and calculating load
- manufacturer requirements, instructions and operator's manual
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
 - wind
 - lightning
 - water/ice impacted surface/ground
 - rain
 - extreme heat
 - Ultra violet (UV) exposure
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
 - lock out and tag out procedures
- relevant procedures for refuelling and recharging forklift truck using appropriate PPE

including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling
- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
 - bale clamps
 - carpet spike for carpet rolls
 - drum carrier
 - jib attachment
 - paper roll clamps
 - personnel work platforms
 - rotators
 - slippers/fork extensions on tynes
- suitability and lifting capability of the attachment to be used
- shut down procedures for a forklift truck in accordance with manufacturer requirements
- traffic management plan procedures and requirements
- typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
- workplace procedures including work plan which may be verbal, documented/written, or electronically generated
- work area operating surface suitability including issues with:
 - backfilled ground
 - bitumen (damaged, cracked)
 - concrete (damaged, cracked)
 - hard compacted soil
 - potholes
 - railway tracks
 - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
 - soft soils
 - trench covers
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety

and Health (OSH) requirements, safe work and workplace procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
 - approved codes of practice and relevant guidance material
 - relevant Australian technical standards
 - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to safely operate a boom-type Elevating Work Platform (EWP) where the length of the boom is 11 metres or more in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a Risk Work Licence (HRWL) to operate this plant.

Boom-type elevating work platform means a telescoping device, hinged device, or articulated device, or any combination of these, used to support a platform on which personnel, equipment and materials may be elevated.

A person performing this work is required to hold a boom-type elevating work platform HRWL.

This unit requires a person operating an EWP to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up.

Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

Pre-requisite Unit

Competency Field

LIC - Licencing Units

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work/task

- 1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and a site inspection is completed in accordance with workplace procedures
- 1.2 Work area ground/operating surface is assessed to determine suitability for operational use of EWP in accordance with manufacturer requirements and workplace procedures
- 1.3 EWP capabilities are established for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
- 1.4 Appropriate paths for operating the EWP and moving in work area are assessed and determined in accordance with workplace procedures
- 1.5 Relevant hazard and risk control measures are applied and advised to relevant person/s in accordance with workplace procedures

- 1.6** Traffic management plan implementation is confirmed in accordance with workplace procedures
 - 1.7** Appropriate communication procedures are identified, with relevant people in accordance with workplace procedures
 - 1.8** All work is confirmed to ensure coverage of work/task requirements for the relevant work area in accordance with workplace procedures
- 2 Prepare for work/task**
- 2.1** Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with workplace procedures
 - 2.2** Risk control measures for hazards identified are checked for implementation in accordance with workplace procedures
 - 2.3** Safety equipment including Personal Protective Equipment (PPE) are inspected, fitted correctly and used in accordance with manufacturer requirements and safe work procedures
 - 2.4** EWP is accessed in a safe manner in accordance with manufacturer requirements and safe work procedures
 - 2.5** Pre-start EWP checks are carried out in accordance with manufacturers requirements and safe work procedures
 - 2.6** EWP is started and is checked for any abnormal noises in accordance safe work procedures
 - 2.7** EWP is positioned correctly as per work plan in work area in accordance with relevant manufacturer requirements and safe work procedures
 - 2.8** EWP is stabilised appropriately in accordance with the workplan, relevant manufacturer requirements and safe work procedures

- 2.9** Operational checks from base controls are carried out in accordance with relevant manufacturer requirements and safe work procedures
 - 2.10** All platform controls are located, identified and tested in accordance with manufacturer requirements and safe work procedures
 - 2.11** All damage and defects are reported and appropriate action is taken to rectify in accordance with manufacturer requirements and safe work procedures
 - 2.12** EWP logbook is inspected and is correct for the EWP, is completed and signed in accordance with manufacturer requirements and safe work procedures
 - 2.13** Weather and work environmental conditions are assessed to determine any impact on EWP operation and positioning as per workplan in accordance with manufacturer requirements and safe work procedures
- 3 Perform work/task**
- 3.1** Relevant hazard prevention/control measures identified are checked for implementation in accordance with safe work procedures
 - 3.2** EWP is safely located at point of work in work area in accordance with safe work procedures
 - 3.3** EWP platform is positioned for work tasks and stability and all operations are monitored constantly in accordance with safe work procedures
 - 3.4** Work gear and tools are stowed and secured in accordance with safe work procedures
 - 3.5** EWP is operated using all movements in accordance with safe work procedures and manufacturer requirements
 - 3.6** Unplanned and unsafe situations are responded to in accordance with safe work procedures

- 3.7 All communication signals are correctly interpreted and followed whilst EWP is operated in accordance with safe work procedures
 - 3.8 EWP platform is accessed and egressed in accordance with safe work procedures and manufacturer requirements
 - 3.9 EWP is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures
- 4 Pack up**
- 4.1 Post-operational EWP checks are carried out in accordance with manufacturer requirements and safe work procedures
 - 4.2 EWP boom is retracted, lowered, stowed and secured in accordance with manufacturer requirements and safe work procedures
 - 4.3 Safety equipment and PPE is disconnected from platform in accordance with safe work procedures
 - 4.4 Relevant motion locks and brakes are applied as required in accordance with manufacturer requirements and safe work procedures
 - 4.5 Outriggers and/or stabilisers, plates or packing if fitted are stowed and secured in accordance and with manufacturer requirements and safe work procedures
 - 4.6 EWP is shut down in accordance with manufacturer requirements and safe work procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Links

Assessment Requirements for TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes in unit Application
- Minor changes and re-ordering of Performance Evidence
- Minor re-ordering of Knowledge Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- advising relevant person/s on site in relation to any hazards and risk elimination/control strategies
- applying safe operating procedures for an Elevating Work Platform (EWP) including all functions within the safe working rated capacity including:
 - boom/s as low as possible and fully retracted whilst travelling (self propelled EWP only)
 - boom/s in line with EWP where practical whilst travelling (self propelled EWP only)
 - EWP stability
 - gently accelerating and braking to minimise boom/s swing (self propelled EWP only)
 - maintaining safe operating speed in relation to the work condition
 - travelling with work platform raised to an appropriate height for the terrain and visibility in relation to direction of travel (self propelled EWP only and in accordance with manufacturers specifications)
- applying emergency procedures
- applying traffic management plan procedures relevant to their role in the work area
- carrying out operational checks on EWP including:
 - testing of all EWP safety devices
 - all controls are located, identified and tested for functionality from the base controls and platform controls
 - hazard warning systems including travel beepers and lights are functional
 - start-up is in accordance with manufacturer requirements
 - steering, transmission and brake functions comply with operating requirements (self

- propelled EWP only)
- there are no unusual noises
- carrying out pre-start checks, including visual inspection which must include:
 - battery fluid level as required by manufacturer requirements
 - checking compliance plate is relevant to the load/s being used on the EWP
 - engine / mechanical fluid level checks as required by manufacturer requirements
 - ensuring availability of correct logbook and updating records as required
 - ensuring EWP platform and attachment/s fitted in platform are secured
 - evidence of damage
 - fluid leaks
 - lights are working effectively (where fitted)
 - safety equipment checks
 - signage and labels to ensure they are visible and legible
 - structural weaknesses including paint separation or stressed welds
 - wheels and tyres for damage/correct inflation if applicable
- checking compliance plate and load chart for reach requirements and load suitability
- clarifying workplan and checking understanding
- complying with Commonwealth, State and/or Territory work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) legislation and regulations
- controlling and operating a boom type elevating work platform ensuring movements and control functions are safe, smooth and comply with operating requirements including:
 - any combination of the movement of the extending boom used to support a platform on which personnel, equipment and materials are elevated to perform the work task/s
 - avoidance of ground depressions
 - correctly using observer guidance of work platform, main chassis and extending boom
 - demonstrating the safe operation of an EWP in forward and reverse, while maintaining visibility (where applicable)
 - driving (where applicable) applicable to conditions and moving platform and load/s safely
 - ensuring warning devices are functioning correctly
 - interpreting directional arrows correctly on platform controls during forward, reverse, left and right
 - lowering boom to its resting position
 - monitoring platform, main chassis and extending boom movement constantly ensuring safe work procedures are followed
 - raising platform and slewing within manufacturer requirements
 - raising platform to its full extent or 75% of the maximum height capacity (whichever is greater)
 - stability of the EWP and the work platform
 - manoeuvring and positioning the platform to perform work task/s safely whilst at its full extent or a minimum height of 75% of the maximum capacity (whichever is greater)

- conducting and applying hazard identification and risk elimination or minimisation strategies including:
 - barricades and controls to prevent the risk of collision with people, moving vehicles and fixed structures
 - environmental conditions including:
 - wind
 - lightning
 - water impacted ground
 - rain
 - extreme heat
 - Ultra Violet (UV) exposure
 - ground conditions (surface and slopes) and assessing work area operating surface suitability based on machine and task requirements
 - overhead hazards including electric lines and service pipes
 - personal protective equipment (PPE)
 - restricted areas and crush points from work platform and external surroundings
 - safety related tags on electrical switches/isolators that have an impact on point of work of EWP operator
 - sufficient lighting
 - suitable area for set-up, positioning and safely operating EWP
 - suitable firm and stable operating surface
 - use of safety observer
- entering work platform correctly including:
 - lowering platform safely and stably to appropriate height to access safely
 - clipping on of fall restraint/arrest device
 - accessing platform safely
- exiting work platform correctly including:
 - lowering platform safely and stably to appropriate height to egress safely
 - unclipping of fall restraint/arrest device
 - exiting platform safely
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- inspecting and using relevant safety equipment, including:
 - anchor point/s
 - emergency retrieval system from base controls and platform controls where fitted
 - energy absorber/s
 - lanyard/s
 - safety harness/es
- interpreting and confirming relevant documentation, workplace instructions, safety information and emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various work environmental conditions

- maintaining communication with other workplace personnel using appropriate workplace procedures including procedures to ensure all movements are conveyed clearly and succinctly including:
 - 2-way radio
 - audible and visual warning devices
 - making and interpreting hand signals
 - questioning to confirm understanding
 - signage
 - written instructions
- recording and maintaining accurate information relating to EWP operations
- reporting to relevant person/s on site risk control measures that are not in place or deficient
- stabilising procedures for an EWP including:
 - checking levels
 - removing obstacles and obstructions
 - deploying and retracting outriggers (if fitted)
 - establishing correct size plates for packing (if required)
- shutting down a boom type EWP in accordance with manufacturer requirements and workplace procedures
- using and interpreting EWP manufacturer requirements and data, including compliance plate and load chart, to enable correct EWP selection for task including:
 - boom
 - platform
 - weight including outrigger load or wheel load.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards, codes of practice and guidelines to safely operate an EWP (boom length 11 metres or more) including:
 - nominal reach, measured horizontally from centre point of rotation to outer edge of platform in its most extended position
 - vertical distance from floor of platform to surface supporting elevating work platform with platform at its maximum height
- appropriate mathematical calculations to estimate loads ensuring EWP is not overloaded
- appropriate workplace communication procedures including:
 - 2-way radio
 - audible and visual warning devices
 - questioning techniques
 - signage
 - hand signals

- traffic warning systems
- written instructions
- compliance with permit condition requirements including:
 - from electrical supply authority
 - if operating on roads or footpaths
- EWP characteristics and capabilities, manufacturer requirements and instructions
- hazards including:
 - all ground and /or operating surface hazards
 - traffic including pedestrians, vehicles, other mobile plant and building structures
 - overhead hazards including electric lines, service pipes, doorways, roof beams, and lights
 - obstacles or obstructions
 - insufficient lighting
 - other relevant hazards
- identification and avoidance of person/s potential crush or entrapment points
- identification and avoidance of potential contact with overhead electrical conductor's
- identification and avoidance of potential contact with structures near work platform/boom or chassis
- impact of the following on the operation of the EWP including:
 - failure/loss of control including brakes and steering
 - failure of equipment including hydraulic system
 - EWP and platform instability due to:
 - deterioration of ground/operating surface condition
 - gradient of operating surface
 - overloading
 - poor load placement
 - irregular loads
 - emergency procedures and safety equipment, including the use of:
 - safety harness/es
 - energy absorbers
 - lanyard/s
 - anchor point/s
 - emergency retrieval systems
- lock out and tag out procedures
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions
- procedures for recording, reporting and maintaining workplace records and information
- relevant manufacturer requirements and instructions
- relevant procedures for refuelling/recharging EWP using appropriate PPE
- risk assessment process including hierarchy of control:
 - elimination

- substitution
- isolation
- engineering controls
- administrative controls
- personal protective equipment (PPE)
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations
- procedures for shutting down a boom type EWP in accordance with manufacturer requirements
- relevant documentation requirements
- suitability and lifting capability of the EWP to be used
- traffic management plan procedures and requirements
- typical routine problems encountered operating a EWP and adjustments required for correction
- wind speed factors that affect stability of EWP as per manufacturer requirements
- work area operating surface suitability including issues with:
 - backfilled ground
 - bitumen (damaged, cracked)
 - concrete (damaged, cracked)
 - hard compacted soil
 - potholes
 - railway tracks
 - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
 - soft soils
 - trench covers
- work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and codes of practice requirements for boom type elevating work platforms
- work plan which may be verbal, documented/written, or electronically generated

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace

conditions.

- Simulators must not be used in the assessment of this unit of competency

Resources for assessment must include access to:

- appropriate boom-type elevating work platform (boom length 11 metres or more) in a safe/serviceable condition in accordance with manufacturer requirements
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
 - approved codes of practice and relevant guidance material
 - relevant Australian technical standards
 - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable).

TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck high risk work (HRW) licence.

This unit requires a person operating a forklift truck to plan the work, conduct routine checks on a forklift truck, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work

- 1.1 Potential workplace hazards are identified
- 1.2 Risk control measures are identified consistent with regulatory requirements and the hierarchy of control
- 1.3 Appropriate forklift truck is selected in accordance with load and workplace conditions
- 1.4 Working area is inspected to determine appropriate paths for moving loads and forklift truck in accordance with workplace conditions
- 1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures

2 Conduct routine checks

- 2.1 Prior to operation, forklift truck is visually checked for any damage or defects
- 2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard
- 2.3 All controls are located, identified and confirmed
- 2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
- 2.5 Forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise
- 2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures

- 2.7 All forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures
- 2.8 Issues, defects and damage identified during routine checks are reported and recorded in accordance with workplace procedures, and appropriate action is taken

3 Shift load

- 3.1 Weight of load is assessed to ensure compliance with forklift truck data plate specifications
- 3.2 Appropriate hazard prevention/control measures are implemented and communicated to personnel in the work area
- 3.3 Forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures
- 3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards
- 3.5 Load movement is monitored constantly to ensure safety of personnel and load, and structural stability
- 3.6 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans

4 Shut down and secure forklift truck

- 4.1 Forklift truck is parked to avoid hazards
- 4.2 Forklift truck is shut down in accordance with manufacturer specifications and workplace procedures
- 4.3 Routine post-operational forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures
- 4.4 Forklift truck is secured to prevent unauthorised access/use
- 4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

Skill	Performance feature
Employment skills to:	<ul style="list-style-type: none"> • operate a forklift truck in different types of workplaces transferring key principles of safe operation to different contexts • improve own performance in safely and efficiently operating a forklift truck by incorporating learnings from different workplaces and different conditions into current performance
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information including: <ul style="list-style-type: none"> • selecting appropriate forklift in accordance with load and workplace conditions • load weight assessment, to ensure compliance with forklift truck data plate specifications • controlling and monitoring instrument readings
Language skills to:	<ul style="list-style-type: none"> • use and interpret vocabulary specific to forklift truck operations and workplace procedures to communicate with other workplace personnel • use non-verbal feedback to support effective communication • use relevant communications conventions
Literacy (reading) skills to:	<ul style="list-style-type: none"> • interpret documentation that includes technical specificity including: <ul style="list-style-type: none"> • forklift truck data plate • plant operation manuals and manufacturer specifications • workplace procedures, including emergency plan • workplace signage and labels
Literacy (writing) skills to:	<ul style="list-style-type: none"> • accurately record and maintain information relating to operating a forklift truck, including: <ul style="list-style-type: none"> • incident reports • vehicle checking and maintenance records
Self-management skills	<ul style="list-style-type: none"> • implement risk control measures • initiate emergency management strategies

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2001A Licence to operate a forklift truck

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a forklift truck and satisfy all of the unit elements, performance criteria and foundations skills requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating a forklift truck
- carrying out post-start operational checks, which must ensure:
 - attachment movements and control functions are smooth and comply with operating requirements
 - hazard warning systems (e.g. lights and horns) are functional
 - safety devices are checked, including
 - deadman's switch
 - emergency descent device (hydraulic)
 - reversing beepers
 - start-up is in accordance with procedures
 - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
 - battery charge checks, as required
 - ensuring availability of logbook, records, handbook and/or operating manuals
 - fitting and interpreting forklift truck data plate
 - fluid checks
 - forklift truck attachment security checks
 - identifying approved modifications and/or attachments fitted, to manufacturer specifications in accordance with forklift truck or attachment data plate
 - locating, identifying and confirming all controls
 - safety equipment checks
 - signage and label visibility and legibility checks
 - updating records as required
- communicating with other workplace personnel through
 - using appropriate worksite protocols

- listening
- making and interpreting hand signals
- questioning to confirm understanding
- signage
- verbal and non-verbal language
- written instructions
- complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
- conducting and monitoring safe forklift truck operations that include moving loads safely, driving and manoeuvring, picking up and placing loads at various stack heights and carrying out all functions to the maximum height and load capacity
- driving a forklift truck with load in forward and reverse, while maintaining visibility
- planning and preparing for forklift truck operations including:
 - conducting a workplace risk assessment
 - identifying hazards associated with operating a forklift truck, which must include
 - forklift truck instability (e.g. due to overloading, poor load placement, irregular loads)
 - ground conditions (e.g. condition of pavement, slopes)
 - insufficient lighting
 - overhead hazards (e.g. electric lines, service pipes)
 - traffic (e.g. pedestrians, vehicles, other plant) and the risk of collision with people, moving plant and fixed structures
 - weather conditions (e.g. wind, lightning, rain)
 - selecting hazard prevention strategies in accordance with the hierarchy of control
 - putting in place effective controls for identified hazards
 - visually checking a forklift truck for any damage or defects prior to operation including
 - evidence of damage
 - leaks
 - structural weaknesses (including paint separation or stressed welds)
- receiving and interpreting workplace instructions, safety information and emergency procedures
- shutting down a forklift truck in accordance with manufacturer specifications and workplace procedures including
 - parking in a suitable location away from dangerous areas
 - correctly positioning fork arms (tips down, tilted forward, lowered to ground)
 - selecting appropriate transmission/gear for parking (relevant to transmission type)
 - applying hand/parking brake
 - turning off engine power
 - removing ignition key as required
 - shutting off LPG gas cylinder valve as required

- securing equipment in accordance with manufacturer specifications and against unauthorised operation
- securing site
- ensuring access ways are clear
- identifying and segregating defective equipment and reporting to authorised personnel
- connecting batteries to charger as required
- verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including
 - environmental conditions (e.g. wind, lightning, storms)
 - failure/loss of control (e.g. brakes and steering)
 - failure of equipment (e.g. hydraulic system)
 - forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards relevant to operating a forklift truck
- Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one's own responsibilities
- forklift truck characteristics and capabilities (including use of load data plates)
- forklift truck operations and safe operating techniques
- hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
 - control labels
 - forklift data plates/labels
 - forklift warning decals
- organisational and workplace standards, requirements, policies and procedures for operating a forklift truck
- procedures for recording, reporting and maintaining workplace records and information
- relevant Australian and industry standards, codes of practice and guidelines to safely

- operate a forklift truck
- risk control measures including:
 - barricades and traffic control (e.g. traffic management plan)
 - compliance with permit condition requirements from electrical supply authority, including
 - adequate illumination
 - disconnected power
 - excavation safeguards
 - insulated electric lines
 - maintaining safety observer zone
 - movement of obstructions
 - observing limits of approach
 - pedestrian control (barricades, signs, etc.)
 - power disconnection or compliance with electrical supply authority requirements
 - safety tags on electrical switches/isolators
 - using safety observer inside exclusion zone
 - using personal protective equipment
- selecting forklift truck to suit load and workplace conditions
- typical routine problems encountered operating a forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for *Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements.

If the working zone is located at a 'live' site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must **not** be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring that candidates have access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of Performance Assessment
- relevant workplace procedures and standards for operating a forklift truck, including:
 - approved codes of practice and guidance
 - relevant Australian and international technical standards
 - manufacturer guidelines (instructions, specifications or checklists) for the purpose of Performance Assessment
 - relevant industry standards and operating procedures (where applicable)
 - safe work method statements (SWMS), as required.

TLILIC2014 Licence to drive a light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to obtain a licence to drive a light rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of light rigid vehicles include:

- a rigid truck above 4.5 tonnes GVM but less than or equal to 8 tonnes GVM or
- a rigid bus with less than or equal to 8 tonnes GVM or seats more than 12 adults, including the driver.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

This unit applies to driving that is carried out in accordance with relevant state/territory driver licensing authority licence requirements and regulations for light rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and to operate a light rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Light Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Light Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm other eligibility requirements before undertaking training and/or assessment.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Drive a light rigid vehicle

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Light rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations, manufacturer instructions and relevant vehicle handling procedures
- 1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage
- 1.3 Braking system of light rigid vehicle is managed and operated efficiently to ensure effective control of vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 Light rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.6 Light rigid vehicle is parked, shutdown and safely secured in accordance with traffic regulations
- 1.7 Load is safely and effectively restrained

2 Monitor traffic and road conditions

- 2.1 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
- 2.2 Interaction with other road users is conducted courteously in accordance with road rules to ensure safe and efficient traffic flow

3 Monitor and

- 3.1 Vehicle performance is maintained through pre-operational

maintain vehicle performance

inspections and vehicle checks

- 3.2 Appropriate signage, lights and equipment are checked for operational effectiveness and for conformity to prescribed traffic regulations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLILIC2014B Licence to drive a light rigid vehicle.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLILIC2014 Licence to drive a light rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- anticipating and monitoring traffic hazards and taking appropriate action
- applying precautions and required action to eliminate, minimise or control identified hazards
- applying relevant procedures that reflect legislative requirements
- carrying out pre-operational vehicle checks including:
 - checking and topping up fluid levels
 - checking:
 - brakes
 - operation of vehicle lights and indicators
 - tyre pressures
 - visually checking vehicle
- communicating effectively with others
- handling vehicle including:
 - accelerating and braking
 - managing engine performance
 - operating vehicle controls, instruments and indicators
 - positioning and stopping a vehicle
 - reversing a vehicle
 - starting a vehicle
 - steering and manoeuvring a vehicle
 - using defensive driving techniques
- negotiating a range of complex traffic infrastructure (such as roundabouts, traffic lights, stalemate intersections, railway level crossings)
- reading and interpreting relevant instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- light rigid vehicle controls, instruments and indicators, and their use
- light rigid vehicle handling procedures
- pre-operational checks carried out on vehicle and related action
- relevant state/territory driver licensing authority road rules, regulations, permit and licence requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Practical driving aspects must be assessed in a vehicle typical of the class as approved by the state/territory driver licensing authority. The use of simulators for driver testing is not permitted.

The assessor must use the mandatory assessment tool provided by the state/territory driver licensing authority to conduct the assessment for this unit, in accordance with licensing authority requirements

The state/territory driver licensing authority may prescribe approved routes, which must be used for the final assessment.

Assessment must occur in the following traffic and road conditions:

- on open and/or private roads with moderate inclines and declines
- typical weather conditions.

and may also include traffic and road conditions at a depot, base or warehouse.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- appropriate range of relevant on-road operational or workplace situations
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLILIC2015 Licence to drive a medium rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to obtain a licence to drive a medium rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of medium rigid vehicles include:

- two axle rigid trucks, not being a prime mover, above 8 tonnes GVM or
- a two axle bus above 8 tonnes GVM.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

This unit applies to driving that is carried out in accordance with relevant state/territory driver licensing authority licence requirements and regulations for medium rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and to operate a medium rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Medium Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Medium Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm other eligibility requirements before undertaking training and/or assessment.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Drive a medium rigid vehicle

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations, manufacturer instructions and relevant vehicle handling procedures
- 1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage
- 1.3 Braking system of medium rigid vehicle is managed and operated efficiently to ensure effective control of vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 Medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.6 Medium rigid vehicle is parked, shutdown and safely secured according to traffic regulations
- 1.7 Load is safely and effectively restrained

2 Monitor traffic and road conditions

- 2.1 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
- 2.2 Interaction with other road users is conducted courteously in accordance with road rules to ensure safe and efficient traffic flow

3 Monitor and

- 3.1 Vehicle performance is maintained through pre-operational

maintain vehicle performance

TLILIC2016 Licence to drive a heavy rigid vehicle

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package.

Modification of assessment conditions to remove an implementation barrier.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to obtain a licence to drive a heavy rigid vehicle. It includes systematically and efficiently controlling all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Heavy rigid vehicle includes:

- a rigid vehicle, not being an unladen prime mover, with a minimum of three axles and a minimum 15 tonnes GVM or
- a modified three axle prime mover with a certified detachable tray (with capacity to carry 75% of its specified GVM) with a GVM of 15 tonnes and holds dual registration (HC & HR) or
- a three axle articulated bus or
- a three axle bus above 15 tonnes GVM.

Assessment of this unit will be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory driver licensing authority.

This unit applies to driving that is carried out in accordance with relevant state/territory driver licensing authority licence requirements and regulations for heavy rigid vehicles.

Driving is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain safety and to operate a heavy rigid vehicle across a variety of driving contexts.

The primary legislative requirements applicable to this unit of competency are state/territory legislation in relation to road use and driver licensing.

This unit addresses the knowledge and skills necessary for the granting of a Heavy Rigid Driver Licence.

Being awarded this unit of competency is a necessary requirement to obtain a Heavy Rigid Driver Licence but is only one of several criteria. Prospective licence applicants should check with the state/territory driver licensing authority for other criteria (such as licence tenure and medical fitness) to confirm other eligibility requirements before undertaking training and/or

assessment.

TLIO5017 Manage security of storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage security of storage facilities as part of work undertaken in various contexts within the transport and logistics industry.

It includes assessing security risks, specifying security requirements and implementing, monitoring and reviewing storage security plan performance.

The unit generally applies to those who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O - Security

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess security risks

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Records of security breaches, thefts and damage are reviewed to identify past security storage incidents
- 1.2 Potential risks to the security of stock, personnel, facilities, information and equipment are identified, considering

- internal and external factors
- 1.3 Discrepancies between identified risk and current storage security situations are noted
- 2 Specify security requirements**
- 2.1 Decisions and adjustments to storage security equipment and procedures are made based on risk assessment
- 2.2 Questions and feedback from stakeholders are sought and responded to promptly
- 2.3 Finalised storage security plan offering optimal security of storage facility is devised taking into account all feedback and assessments of security risks
- 3 Implement storage security plan**
- 3.1 Storage security plan is implemented and appropriate workplace personnel are informed
- 3.2 Staff competency requirements to implement security plan are addressed with required training
- 3.3 Equipment and needs for improvements are allocated and/or obtained
- 3.4 Storage security plan, policies and procedures are trialled in conjunction with a system for feedback to identify and suggest further improvements
- 4 Monitor and review storage security plan performance**
- 4.1 Security reports are collated and categorised
- 4.2 Reports are compared to identify trends in breaches
- 4.3 Security procedures are modified to rectify identified gaps

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIO5017A Manage security of storage facilities.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIO5017 Manage security of storage facilities

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- assessing, implementing, monitoring and reviewing security plan
- communicating effectively with others when completing work activities to ensure security approaches are understood and implemented
- completing documentation related to work activities including documentation of loss, damage or other security issues
- monitoring performance of equipment or technology designed to enhance security
- monitoring work activities in terms of planned schedule
- working collaboratively with others to enhance security awareness.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- business policies for security provision, including out-sourcing components of operations and engaging additional resources
- focus of operation of security systems, resources, management and workplace operating systems
- licence and permit requirements relevant to security procedures
- problems that may occur when planning and managing security procedures and action that can be taken to resolve these problems
- regulations, codes of practice and legislative requirements relevant to planning and managing workplace security procedures
- relevant Australian standards and certification requirements
- resource availability including the competencies of individuals in the team/group

- risks and hazards related to planning and managing security procedures and ways of controlling these risks
- workplace procedures for planning and managing security procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIR0004 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to negotiate a contract.

It includes negotiating contract specifics with contractors, completing contract negotiations and completing enterprise contract requirements.

The unit generally applies to those with procurement responsibilities.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Negotiate contract specifics with

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Preferred suppliers are verified prior to contract negotiations through a prequalification process

- | | |
|--|---|
| contractor | <ul style="list-style-type: none"> 1.2 Requirements of the contract are clearly documented and agreed to by the relevant parties 1.3 Areas of ambiguity or concern are clarified and resolved 1.4 Contract negotiations are conducted in accordance with relevant legislation and workplace policies and procedures 1.5 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor, including the determination of key performance indicators (KPIs) |
| 2 Complete contract negotiations | <ul style="list-style-type: none"> 2.1 Contract documentation is drafted in accordance with relevant legislation, workplace policies and procedures and negotiated conditions of service and supply 2.2 Technical and legal support in drafting contracts is accessed, as required 2.3 Contract documentation is signed and exchanged between relevant parties |
| 3 Complete enterprise contract requirements | <ul style="list-style-type: none"> 3.1 Documentation systems are established to ensure that the contractual terms and KPIs are met 3.2 Quality assurance procedures for supplied goods/services are initiated 3.3 Workplace systems that require interaction with contractors are identified and actioned 3.4 Contract and ancillary documentation are completed and stored, as required, in accordance with workplace policies, procedures and regulatory requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

Assessment Requirements for TLIR0004 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace policies and procedures
- communicating and working collaboratively and effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying a contract to cater for variations in service and/or supply of goods/services
- monitoring compliance with agreed key performance indicators (KPIs)
- reading and interpreting procedures and regulatory requirements relevant to negotiating a contract.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- key principles of contracts, including:
 - key legal requirements for the acquisition of service and/or supply of goods/services
 - workplace policies, procedures and relevant documentation for contract negotiation
- key provisions of relevant legislation, codes of practice and national standards that affect contracts for the service and/or supply of goods/services
- knowledge of the service and/or supply of goods/services being supplied
- prequalification processes, including work health and safety (WHS)/occupational health and safety (OHS) and chain of responsibility compliance
- techniques for negotiation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 2. This is the second release of this unit of competency in the TLI Transport and Logistics Training Package:

- Minor statement changes to PC 2.2, 2.4 and 2.7
- Minor statement changes from Performance Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Rail sector.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Analyse supply requirements

2 Evaluate potential contractors

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose and specifications of required goods/services are identified

1.2 Criteria to evaluate potential or existing contractor performance is established

1.3 Quantities of required goods/services are determined

1.4 Frequency of ordering/requesting of goods/services is identified

2.1 Contractors of requested goods/materials/services are identified

2.2 Comparative costings for goods/materials/services are obtained in accordance with regulatory and organisational policies and procedures

2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed

2.4 Contractors are evaluated in relation to established criteria and in accordance with regulatory and organisational policies and procedures

2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service

2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors

2.7 Information and data generated during selection process is filed and maintained in accordance with organisational policies and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and logistics Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4002A Source goods/services and evaluate contractors.

- Minor statement changes from Performance Evidence
- Minor statement changes in Assessment Conditions.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace policies and procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors,

and related appropriate action that can be taken

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services and evaluating potential supply contractors.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to administer inventory systems. It includes identifying inventory systems, tracking inventory, planning and administering inventory systems and completing inventory audits and reports.

Inventory is defined as the quantity of goods owned and stored by an organisation that is intended either for resale or is raw materials and components used in producing goods that are then sold.

Inventory systems provide visibility and integration in the supply chain and they are used to record transactions associated with receiving, reducing or writing inventory off. An inventory system can include desktop software, barcode scanners, barcode labels, mobile devices and applications.

The unit is applicable to those with responsibilities for inventory systems within a supply chain. No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X - Logistics

Unit Sector

Cross sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Identify inventory systems**
 - 1.1 Software, applications and devices used in the inventory system are identified
 - 1.2 Third party inventory control operations are verified
 - 1.3 Demand forecasting methods and tools are determined
 - 1.4 Inventory system policies, procedures and processes are confirmed
- 2 Plan and administer inventory**
 - 2.1 Inventory characteristics are ascertained
 - 2.2 Stock specifications, locations, labels and reference numbers are validated using the inventory system
 - 2.3 Receipt and despatch stock is securely stored in designated locations and the inventory system is updated, as required
 - 2.4 Stock is monitored and reordered to meet optimum replenishment requirements, in accordance with organisational inventory procedures
 - 2.5 Stock is requisitioned and documentation is updated on the inventory system, as required
 - 2.6 Stock sorting, recycling and disposal is undertaken, in accordance with organisational inventory procedures
 - 2.7 Stock damage and losses against forecasts are assessed and investigations are completed into unacceptable cases
 - 2.8 Stock security is maintained, in accordance with organisational inventory procedures
- 3 Track inventory**
 - 3.1 Inventory is monitored and tracked using the inventory system
 - 3.2 Buyers are kept informed of stock levels, in accordance with organisational inventory procedures
 - 3.3 Inventory transactions are monitored, in accordance with organisational inventory procedures
 - 3.4 Reorder cycles are adjusted to maintain consistent

supply, as required

- 3.5 Discrepancies, out of specification and redirection opportunities are managed and reported using the inventory system
 - 3.6 Inventory reports are analysed and corrective action is taken, as required
 - 3.7 Vendor Managed Inventory (VMI) systems are used to manage inventory, as required
- 4 Complete inventory audits and reports**
- 4.1 Inventory audits and cycle counts are performed, in accordance with organisational inventory procedures
 - 4.2 Report on inventory system management is produced, in accordance with organisational inventory procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to TLIA3016 Use inventory systems to organise stock control.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIX0004X Administer inventory systems

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing and managing stock quality including analysing discrepancies, out of specification and redirection opportunities
- categorising and labelling stock
- checking inventory specifications
- ensuring handling, sorting, disposal and recycling of stock is performed
- following organisational inventory policies and procedures
- identifying inventory characteristics
- maintaining and managing optimum stock levels
- meeting inventory system documentation requirements
- monitoring stock security
- reading and interpreting information and data related to inventory systems
- recording and maintaining inventory information
- undertaking quality control
- using the inventory system including inventory software and applications
- utilising Vendor Managed Inventory (VMI) systems
- validating third party inventory control operations.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- features of inventory systems
- financial implications of inventory management
- inventory documentation and reporting requirements including those for discrepancies, out of specification and redirection opportunities
- inventory loss and damage control
- inventory policies and procedures
- inventory tracking and security
- layout of inventory storage areas

- maintenance and monitoring of stock quality and levels
- methods for categorising and labelling inventory
- principles of inventory management
- principles of quality control
- reorder cycles
- storage conditions for the maintenance of inventory including product life cycles, maximising use, rotation and replenishment requirements
- third party inventory control operations
- types of inventory systems
- valuation methods for different inventory items
- Vendor Managed Inventory (VMI) systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
 - inventory systems and stock control equipment and tools
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit of competency describes the skills and knowledge required to maintain stock control and receivals. It includes establishing supply arrangements, monitoring and maintaining stock, processing receivals and storing stock, determining stock wastage and discrepancies and performing stock audits and reporting.

Stock control involves the monitoring and managing of an organisation's stock. It applies to all stock at every stage of the production process from purchasing and delivery to using and reordering stock.

Receivals is the function of checking items delivered as new stock or supplies. It requires the inspection of goods and materials for quality, condition and quantity and the allocating of space in the storage facility or warehouse.

The unit is applicable to those with responsibilities for stock control and/or receivals within a supply chain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

X - Logistics

Unit Sector

Cross sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Establish supply arrangements

- 1.1** Approved business data, forecasting methods and measures to calculate stock levels for standard business periods, peak seasons and special events are established
- 1.2** Optimum supply arrangements are sourced and negotiated using approved purchasing specifications
- 1.3** Stock quantities and cost effective terms of purchase are established
- 1.4** Agreements are recorded, in accordance with stock control and receipt procedures

2 Monitor and maintain stock

- 2.1** Stock control systems and equipment to administer and monitor ordering processes and procedures, including real time tracking information from stock handling and data collection technologies, are used
- 2.2** Stock levels and reorder cycles are monitored and maintained using approved forecasting methods and tools
- 2.3** Evaluation of stock against specifications, including adjusting sources of supply, is undertaken, as required
- 2.4** Optimal safety stock placement and service level optimisation is monitored, in accordance with the continuity plan and stock control and receipt procedures
- 2.5** Stock levels are recorded and reported, in accordance with stock control and receipt procedures

3 Process receivals and store stock

- 3.1** Orders for stock are processed and documented, including checking and recording receivals, against purchase and supply agreements
- 3.2** Stock is distributed, transported and stored in an approved storage area using safe manual handling techniques
- 3.3** Stock is inspected for quality, use by dates and damage
- 3.4** Stock is labelled and any excess is reported, in accordance with stock control and receipt

- procedures
- 4 Determine stock wastage and discrepancies**
- 4.1** Control system and procedures for stock with high wastage or loss is implemented
 - 4.2** Stock is rotated for maximum use and minimum wastage, as required
 - 4.3** Excess or spoilt stock, including hazardous substances, is disposed of safely, in accordance with stock control and receival procedures
 - 4.4** Stock losses and discrepancies are recorded, in accordance with stock control and receival procedures, and security measures are reviewed
- 5 Perform stock audits and report**
- 5.1** Stock audits are performed and reports are produced within designated timeframes
 - 5.2** Audit findings and discrepancies in stock and receivals are reported to approved personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to TLIA3038 Control and order stock and TLIA3039 Receive and store stock.

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIX0013X Maintain stock control and receivals

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- assessing stock loss, wastage, excesses and discrepancies
- completing stock orders and receivals within established timelines
- disposing of stock safely including hazardous substances
- forecasting stock and receivals using approved methods and tools
- identifying supply sources for different types of products
- identifying third party inventory control operations
- implementing cost effective stock purchasing and control systems
- maintaining stock and receipt data and records
- monitoring optimal safety stock placement and service level optimisation
- monitoring stock control systems, stock quality and cost effectiveness of supplies
- performing stock audits
- producing stock control reports
- receiving, storing, monitoring and maintaining stock levels over life cycle periods
- undertaking supplier and customer relationship management
- utilising stock handling, receivals and data collection technologies
- working with continuity plan and stock control and receipt policies and procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- continuity plans
- contractual and preferred supplier arrangements
- disposal methods for stock and waste including hazardous substances
- stock control and receivals policies and procedures
- principles of stock control including:
 - approaches to calculating stock levels and replenishment requirements
 - factors that may influence purchase specifications

- forecasting methods for calculating inventory consumption
- methods and tools for calculating cost effective stock quantities including
 - methods of stock control including FIFO (First In, First Out) and LIFO (Last In, First Out)
 - standard measures and formulas for yield testing
 - stock control systems including bin card system, imprest system, integrated point of sale system and ledger systems
- product life and storage requirements for specific stock
- real time information using stock data technologies
- report requirements on stock loss, wastage, excesses and discrepancies
- safe manual handling techniques
- safe stock placement and service level optimisation
- security measures for stock including storage and tracking
- stock control audits
- stock ordering and delivery processes
- stock quality control
- stock reorder cycles for standard business periods, peak seasons and special events
- supplier and customer relationship management
- supply sources for different types of products
- types of computerised stock control systems, their functions and features.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to a range of

- exercises, case studies or other simulations
- materials, tools and equipment used in industry including:
 - access to suppliers with whom the learner can interact, commercial purchase specifications, stock control procedures and reports and costs and contractual documentation used for the purchase of stock
 - stock control software systems and applications
- documentation including organisational policies and procedures, industry standards, regulations, codes of practice, operational manuals and equipment specifications.

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Application

This unit involves the skills and knowledge required to apply work health and safety (WHS)/occupational health and safety (OHS) regulations and codes of practices in the electrotechnology workplace.

It includes applying safe working practices, following workplace procedures for hazard identification and risk control. It also includes electrotechnology worker responsibilities and application for health and safety, risk management and adherence to safety practices as part of electrotechnology work functions when preparing to enter a work area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Cross Discipline

Unit Sector

Electrotechnology

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to enter an electrotechnology workplace

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Work area access permits are obtained from appropriate person/s in accordance with workplace procedures

- 1.2** Relevant workplace WHS/OHS safety regulations and codes of practices are identified and followed when entering the electrotechnology work area
 - 1.3** Safe work methods for controlling risks are obtained, read and applied prior to undertaking work activity in accordance with WHS/OHS workplace procedures
 - 1.4** Preparation for electrical and non-electrical isolation is carried out to prevent creation of hazards from loss of machine/system/process control in accordance with WHS/OHS workplace procedures
 - 1.5** Tools, equipment and chemicals required for the electrotechnology work are checked for safety and correct functionality in accordance with workplace procedures and regulatory requirements
 - 1.6** Personal protective equipment (PPE) is worn appropriate to the electrotechnology work area and in accordance with workplace procedures
- 2 Apply safe electrotechnology working practices**
 - 2.1** Risk control work measures are implemented in accordance with WHS/OHS workplace procedures
 - 2.2** Procedures for dealing with accidents, fires and emergencies are followed in accordance with workplace procedures, scope of responsibility and capabilities
 - 2.3** Safe work methods are applied when working at heights including safe and effective use of safety equipment
 - 2.4** Safe work methods are used when undertaking lifting, lowering, pushing, pulling, carrying or otherwise moving, holding or restraining workplace tasks in accordance with relevant code of practice
 - 2.5** Safe work methods for removing an electric shock victim from a live electrical situation are demonstrated in accordance with workplace emergency management procedures
 - 2.6** Working area is kept clean, neat and tidy in accordance with workplace housekeeping procedures
- 3 Follow electrotechnology workplace procedures for hazard identification and**
 - 3.1** Hazards are identified, control measures implemented and reviewed through regular active participation in the consultation process with employer and other employees

risk control

- 3.2** Hazards in the work area are identified and reported to relevant person/s in accordance with workplace procedures
- 3.3** WHS/OHS documentation and incident records are completed in accordance with regulatory requirements and workplace procedures
- 3.4** Workplace instructions are followed in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UEENEEE101A Apply Occupational Health and Safety regulations, codes and practices in the workplace.

Links

Companion Volume implementation guides are found in VETNet - -

Assessment Requirements for UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS) regulations, legislation, codes of practices and procedures in the workplace, including:
 - identifying typical hazards associated with work environments and assessing risk/s in an electrotechnology workplace
 - applying and reviewing risk control measures to minimise, control or eliminate identified hazards
 - reporting hazards to relevant person/s
 - applying safe working practices/methods
 - contributing to WHS/OHS consultative processes
- following relevant workplace emergency management procedures and instructions relating to WHS/OHS and emergency incidents
- selecting and using appropriate personal protective equipment (PPE)
- applying correct manual handling techniques
- confirming (safe) isolation of an electrical supply and isolation of potential electrical and non-electrical hazards has been completed by an authorised person
- demonstrating safe methods of removing an electric shock victim from a live electrical situation
- selecting an appropriate ladder for a given situation and performing a safety check before use
- completing relevant WHS/OHS documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- effective verbal and written communication techniques
- electrotechnology work environment, including:
 - appropriate fire extinguisher for a given type of fire
 - commonly used workplace safety signs

- relevant industry standard for safe workplace procedures
- risk assessment documentation
- typical hazards associated with a range of work environments
- use of fire extinguishers
- housekeeping and potential hazards in relation to improper housekeeping
- workplace procedures used to control the risks associated with workplace hazards
- legal requirements relevant to WHS/OHS in the workplace, including:
 - appropriate personal protective equipment (PPE)
 - asbestos awareness and reporting hazardous gases, including supervisory requirements and duty of care
 - difference between hazards and risks
 - duty holder responsibilities, as specified in WHS/OHS Acts, regulations and codes of practice
 - employer and employee responsibilities, rights and obligations
 - general aims and objectives of the relevant state or territory legislation relating to WHS/OHS
 - hazards that may be present in the electrotechnology workplace, the harm they can cause and how this harm occurs
 - housekeeping and potential hazards in relation to improper housekeeping
 - major functions of safety committees and representatives
 - powers of health and safety inspectors
 - relevant WHS/OHS regulations, codes and practices
 - underlying principles of WHS
- life support - cardiopulmonary resuscitation (CPR) in the workplace, including:
 - first aid
 - responsibilities of the first aider
 - priorities of first aid management for any accident or injury
 - procedures required at an accident scene
 - legal and ethical issues, which may impact on the management of care
 - 'duty of care'
 - examination of a casualty for injuries
 - effect of cardiopulmonary arrest on the body
 - managing simulated conditions of airway obstruction, respiratory arrest and cardiopulmonary arrest
 - single and two-person CPR
 - signs and symptoms of an altered level of consciousness
 - management of simulation of a casualty with an altered level of consciousness
 - signs and symptoms of shock
 - management of simulation of a casualty in shock
- relevant safe work method statements (SWMS)/job safety analysis (JSA) or risk mitigation processes, including:

- emergency management plan
- hierarchy of WHS/OHS hazard risk control measures
- principles of risk assessment/management and required documentation
- typical hazards associated with electrotechnology work environments and their control, including:
 - asbestos, including:
 - common types of asbestos containing building materials
 - warning signs used to identify the presence of asbestos
 - effects of asbestos on the human body
 - requirements for reporting the presence of asbestos
 - silica, including:
 - types of materials that contain crystalline silica (silica dust)
 - methods of releasing silica dust
 - recommended levels of exposure to crystalline silica
 - effects of crystalline silica on the human body
 - hazardous gases
 - chemicals in the workplace, including:
 - hazardous substances and dangerous goods and their classifications
 - labelling and storage requirements for chemicals
 - purpose and interpretation of safety data sheets (SDS)/material safety data sheets (MSDS)
 - confined spaces, including:
 - control measures for working in a designated confined space
 - hazards associated with working in a confined space
 - workplace situations that could be classified as a confined space
 - physical and psychological hazards, including excessive noise, vibration, thermal stress, radiation, lasers, occupational overuse syndrome, stress, drugs and alcohol
 - safe manual handling principles, including:
 - procedures and methods for manual handling
 - situations that may cause manual handling injuries
 - types of manual handling injuries and their effect
 - working at heights, including:
 - hazards and precautions associated with working on ladders, elevated work platforms (EWP) and scaffolds
 - identification of work area as a height risk and use appropriate safety equipment to prevent a fall
 - working safely with electricity, including:
 - effects of electric shock on the human body
 - protection offered by a residual current device (RCD)
 - need for ensuring the (safe) isolation of an electrical supply

- appropriate method of removing an electric shock victim from a live electrical situation
- precautions that can minimise the chance of electric shock (earthing, extra-low voltage (ELV), fuses, circuit breakers and RCDs)
- common causes of electrical accidents.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, emergency management plan, equipment specifications, regulations, codes of practice and operation manuals
- relevant WHS/OHS legislation, regulations and codes of practice related to hazards management in the electrotechnology industry and workplace.

UEERL0001 Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Application

This unit involves the skills and knowledge required to attach flexible cord and plug to electrical equipment for connection to a single phase supplies up to 230 volts (V) alternating current (a.c.) supply.

It includes planning and attaching flexible cord and plug, using test equipment for inspection and safety testing. It also includes locating, inspecting, testing and repairing faults in flexible cords and plugs.

This unit does not cover the knowledge and skills necessary for work associated with high current faults on complex electrical apparatus, circuits and electrical work; in hazardous areas or on electrical equipment that is part of an explosion-protection technique; nor, work associated with fixed wiring.

The skills and knowledge described in this unit require a licence or permit to practice in the workplace where work is carried out on electrical installations which are designed to operate at voltages greater than 50 V a.c. or 120 V direct current (d.c.).

Competency development activities in this unit are subject to regulations directly related to licensing. Where a licence or permit to practice is not held, a relevant contract of training, such as an Australian Apprenticeship, is required.

Additional and/or other conditions may apply in some jurisdictions subject to regulations related to electrical work. Practice in the workplace and during training is also subject to work health and safety (WHS)/occupational health and safety (OHS) regulations.

Pre-requisite Unit

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

Competency Field

Restricted Licensing

Unit Sector

Electrotechnology

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan electrical equipment connection

2 Attach flexible cord and plugs

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Work is planned, sequenced and prepared in accordance with WHS/OHS requirements and workplace procedures
- 1.2 Condition and ratings of cord and plugs are in accordance with workplace procedures and work instruction from appropriate person/s
- 1.3 Flexible cords and plugs are selected in accordance with relevant industry standards and workplace procedures for condition and rating
- 1.4 Materials necessary to complete work are obtained and checked in accordance with workplace procedures and work instructions
- 1.5 Tools, equipment and testing devices needed to carry out work are obtained in accordance with workplace procedures and checked for correct operation and safety
- 1.6 Flexible cord and plugs are prepared without damage to insulation and conductors and in accordance with relevant industry standards
- 2.1 WHS/OHS workplace policies and procedures are followed
- 2.2 Single insulated metal framed equipment is earthed in accordance with relevant industry standards and workplace procedures
- 2.3 Double insulated equipment is inspected and maintained in accordance with relevant industry standards and workplace procedures
- 2.4 Conductors are connected to terminals ensuring required polarity is in accordance with relevant industry standards

- | | | |
|--|------------|--|
| 3 Inspect and test equipment for operation and safety | 3.1 | Electrical installation and operation of cord and plug/s connected to electrical equipment are inspected and tested in accordance with relevant industry standards, work instructions and workplace procedures |
| | 3.2 | Quality checks of work are undertaken in accordance with workplace procedures |
| 4 Locate and repair fault in flexible cord and plug/s | 4.1 | Electrical equipment and attached flexible cord and plug/s are isolated in accordance with WHS/OHS requirements and workplace procedures |
| | 4.2 | WHS/OHS workplace policies and procedures are followed |
| | 4.3 | Quality checks of the attached flexible cord and plug/s are undertaken in accordance with workplace procedures to detect any abnormal, damage or fault |
| | 4.4 | Faults in attached flexible cord and plug/s are determined and details of components to be replaced are recorded in accordance with workplace procedures |
| | 4.5 | Faults in attached flexible cord and plug/s are repaired, as required, in accordance with workplace procedures |
| | 4.6 | Repairs are inspected and tested for compliance with industry standards |
| | 4.7 | Unplanned events are referred to supervisor for direction in accordance with workplace procedures |
| | 4.8 | Status report/s is completed and supervisor notified in accordance with workplace procedures |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UEE Electrotechnology Training Package Companion Volume Implementation Guide.

Attaching cords and plugs to electrical equipment must include:

- any cord, cable and plug connected to equipment and cord extension leads intended for single phase supplies up to 230 V

Safe working procedures within in the scope of this unit must:

- be in accordance with AS/NZS 4836 Safe working on low-voltage electrical installations

Unit Mapping Information

This unit replaces and is equivalent to UEENEEP024A Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply.

Links

Companion Volume implementation guides are found in VETNet - -

Assessment Requirements for UEERL0001 Attach cords and plugs to electrical equipment for connection to a single phase 230 Volt supply

Modification History

Release 1. This is the first release of this unit of competency in the UEE Electrotechnology Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least two separate occasions and include:

- applying relevant industry standards
- applying relevant work health and safety (WHS)/occupational health and safety (OHS) requirements, including using risk control measures
- applying quality to workplace procedures and instructions
- attaching flexible cord/s and plug/s and without damage
- inspecting flexible cords and plugs for damage, faults or abnormalities
- dealing with unplanned events in accordance with problem-solving techniques and workplace procedures
- determining the current rating of a range of commonly used flexible cords
- drawing of a basic electrical circuit using correct symbols
- testing flexible cords, plugs and connected equipment for operation and safety up to 230 volts (V) alternating current (a.c.), including polarity and continuity testing
- finding and repairing faults in attached flexible cords and plugs in accordance with established procedures
- preparing to attach flexible cord and plug supplies up to 230 V a.c. supply
- providing status report/s
- using testing equipment
- selecting appropriate flexible cords for a range of single phase appliances relating to application, load and service duty
- identifying correct plug and socket polarities for the range of commonly used 230 V plug socket combinations
- selecting the correct plug and socket combinations for a range of applications, including use in damp areas
- fitting a range of various plugs and sockets with attention to requirements, colour code, polarity and correct termination of conductors with the sheath well into the body, and the cord grip anchored
- terminating cords to several appliances utilising the appropriate cord type and rating.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- electrical safety requirements, including the requirements of AS/NZS 4836 Safe working on low-voltage electrical installations
- basic electrical circuits, including:
 - simple electric circuit (supply, control device and load)
 - industry standard symbols, units of measurement and the abbreviation for electromotive force, potential difference, current and resistance
 - using multiples and sub-multiples for voltage, current and resistance values
 - a.c and direct current (d.c.) supplies
 - single phase electrical loads
 - electrical circuit protection devices
- relationships in an electrical circuit, including:
 - relationship between voltage, current and resistance (Ohm's Law)
 - changes in circuit parameters for altered values of voltage, current and resistance
 - electrical power in relationship to d.c. or resistive a.c. circuits
- test equipment - resistance measurement, including:
 - types of electrical test equipment used for resistance measurement (analogue and digital multimeters, insulation resistance testers and continuity testers)
 - selection of appropriate electrical test instrument for continuity and insulation resistance measurement
 - using analogue and digital multimeters for resistance measurement (ensuring zero setting, correct scale selection, avoidance of parallax error and estimation of between division readings for analogue multimeters)
 - continuity tests and using a continuity tester to check the polarity of a three-core extension cord
 - insulation resistance tests and minimum values for insulation resistance for low voltage (LV) equipment
 - reasons for insulation resistance testing is conducted at higher than supply voltage to relevant industry standards
 - using insulation resistance handheld tester
 - care and storage of electrical instruments
 - regulatory requirements relating to the maintenance and testing of test instrumentation for resistance measurement
- selection of flexible cords and plugs to suit given applications, including:
 - types, structures and applications of common cores, including:
 - parallel two core unsheathed ('figure 8')
 - cords, light duty sheathed
 - ordinary duty sheathed

- heavy duty sheathed
- textile braided
- service duty
- purpose of colour coding and the recommended single phase colour code
- conventional code used in the most common alternative colours
- factors affecting the choice of plugs and sockets, including ingress protection (IP) rating
- connecting flexible cords and plugs to appliances, including:
 - design features of plugs and sockets which protect the conductor terminations from undue force when disconnecting a cord - tortuous path
 - cord preparation - not to mark/damage the inner core when stripping the sheath for termination, double the end of the conductor to be terminated
 - purpose of earthing
 - structure of double insulated appliances, symbol, reasons they should not be earthed, and maintenance of the integrity of the double insulation
 - preparation of the surfaces at an earthing connection before and after completion of the termination, including terminations exposed to corrosion, and those for which no specific earthing terminal is provided
 - techniques for fitting plugs and sockets
 - techniques for terminating cords and conductors including consequences of poor electrical terminations
- testing, including:
 - importance of conducting both visual and electrical tests to ensure leads are safe and appropriate for connection to supply in regard to physical condition
 - checking the polarity of plug, and for any abnormal or obvious damage or fault
 - minimum acceptable value of insulation resistance between active neutral and earth
 - conducting insulation resistance and continuity tests prior to, and after, connecting cords and plugs to appliances
 - visually checking that the cord/plug assembly has a suitable IP rating for the operating environment
 - visual checks to ensure that arrangements for protection against dangers of mechanical movement as relevant are undamaged and in place
 - techniques for fault finding attached cords and plugs, and cord extension leads
- producing documentation and reports, including:
 - nature and content of, and the need to produce, status reports and documents
- relevant WHS/OHS legislated requirements including inspection and testing of electrical equipment
- relevant industry standards
- relevant manufacturer specifications and operating instruction for tools, equipment and testing devices
- relevant safe job safety assessments or risk mitigation processes
- relevant workplace policies, procedures and instructions, including relevant workplace quality procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated suitable workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, equipment specifications, regulations, relevant industry standards, codes of practice and operation manuals.

UETDREL006 Work safely in the vicinity of live electrical apparatus as a non-electrical worker

Modification History

Release 2. Amended Competency Field.

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 2.0.

Application

This unit involves the skills and knowledge required to work safely in the vicinity of live electrical apparatus as a non-electrical worker.

It includes compliance with safe approach distances for the worker, plant, tools and equipment.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace.

Other conditions may also apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Entry Level

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to work safely in the vicinity of live

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Legislation, regulations, standards, codes of practice and organisational workplace requirements for the work to

- electrical apparatus** be performed are referred to and confirmed
- 1.2** Work plan is obtained and confirmed in accordance with workplace requirements
 - 1.3** Materials required for work are determined and obtained in accordance with work plan and workplace requirements
 - 1.4** Plant, tools, equipment and personal protective equipment (PPE) required for work are determined, obtained and confirmed in working order
 - 1.5** Hazards are identified, risks assessed and control measures identified and applied
 - 1.6** Work permits are received and signed in accordance with workplace requirements
 - 1.7** Safety observer role and responsibilities are discussed and confirmed in accordance with workplace requirements
 - 1.8** Communication method between the workers and safety observer is determined and confirmed in accordance with workplace requirements
 - 1.9** Worksite is prepared in accordance with the work plan and workplace requirements
 - 1.10** Electricity infrastructure assets and associated voltages are identified and confirmed
 - 1.11** Safe approach distances for the work to be performed are determined and confirmed in accordance with workplace requirements
- 2 Work safely in the vicinity of live electrical apparatus**
- 2.1** Legislation, regulations, standards, codes of practice and organisational workplace requirements for the work to be performed are applied and monitored
 - 2.2** Lifting, working at heights and the use of plant, tools, equipment and PPE are carried out in accordance with workplace requirements
 - 2.3** Hazard control measures are monitored in accordance with workplace requirements
 - 2.4** Safety observer is positioned to observe the work in accordance with workplace requirements

- 2.5 Communication methods between workers and safety observer are used in accordance with workplace requirements
 - 2.6 Safe approach distances are maintained when the work is being performed
 - 2.7 Incidents or unplanned events are responded to in accordance with workplace requirements
- 3 Complete work and documentation**
- 3.1 Incidents or unplanned events are reported in accordance with workplace requirements
 - 3.2 Work permits are signed off in accordance workplace requirements
 - 3.3 Works records, reports and documentation are completed, and appropriate personnel notified in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to UETTDREL14 Working safely near live electrical apparatus as a non-electrical worker.

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=229bace1-b7bc-4653-9300-dffb13ecfad7>

Assessment Requirements for UETDREL006 Work safely in the vicinity of live electrical apparatus as a non-electrical worker

Modification History

Release 2. Amended Competency Field.

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 2.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying relevant legislation, regulations, standards, codes of practice and organisational workplace requirements, including:
 - work health and safety (WHS)/occupational health and safety (OHS)
- identifying hazards, assessing risks, identifying, applying and monitoring control measures
- obtaining, inspecting and using relevant personal protective equipment (PPE)
- determining communication method with safety observer
- confirming safety observer is in position in accordance with workplace requirements
- confirming and maintaining the safe approach distance, including:
 - mobile plant, tools and equipment
 - personal
- determining electricity network voltages, including:
 - low voltage (LV)
 - high voltages (HV)
- identifying electricity network assets
- obtaining and signing on and off relevant work permits in accordance with workplace requirements
- dealing with an unplanned event on at least one (1) occasion
- completing relevant work records, reports and documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant legislation, regulations, standards, codes of practice and organisational workplace requirements, including:
 - WHS/OHS

- safe approach distances
- emergency procedures
- hazard, risk assessment and risk control requirements, including potential hazards
- types and application of PPE
- safe use of plant, tools and equipment, including:
 - earthing of mobile plant
- application, purpose and types of work permits
- events constituting an unplanned event or incident
- procedures for responding to an unplanned event or incident
- safety observer:
 - role and responsibilities
 - communication methods
- basic electrical principles, including:
 - voltage, current and resistance
 - typical effects of current, including physiological effects and induced voltages
 - consequences of short circuits, including arc flash and touch and step potentials
- electricity networks, including:
 - LV
 - HV
 - earthing systems
 - associated assets
 - asset identification
 - layouts and configuration
 - basic protection
 - relationship between an overhead and underground supply system
- terminology related to working safely in the vicinity of live electrical apparatus.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations, where it is appropriate to do so.

Where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace requirements, equipment specifications, regulations, codes of practice and operation manuals.

UETDRMP004 Perform elevated work platform controlled descent escape

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

Application

This unit involves the skills and knowledge required to perform an elevated work platform (EWP) controlled descent escape in an electricity supply industry (ESI) environment.

It includes the organisational workplace requirements for the self-rescue from a raised EWP, and how it applies to ESI workers to meet work health and safety (WHS)/occupational health and safety (OHS), mobility and mutual aid requirements.

Note: Those holding an existing ESI or Electrotechnology qualification or equivalent meet the prerequisite unit requirements.

Refer to the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide for equivalency definition.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace.

Other conditions may also apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

or

TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Competency Field

Mobility and Portability

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to perform EWP controlled descent escape

2 Carry out EWP controlled descent escape

3 Complete the EWP controlled descent escape

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Workplace requirements for controlled descent escape are identified and confirmed

1.2 Controlled descent escape equipment is obtained and inspected in accordance with workplace requirements

2.1 Situation is assessed, and response is activated in accordance with workplace requirements

2.2 Controlled descent escape equipment is used to evacuate an EWP in accordance with workplace requirements

3.1 Incident site is secured and entry controlled in accordance with workplace requirements

3.2 Incident is reported in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to UETDRRF08 Perform EWP controlled descent escape.

Assessment Requirements for UETDRMP004 Perform elevated work platform controlled descent escape

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on one occasion and include:

- identifying organisational controlled descent requirements
- identifying hazards, assessing risks and applying control measures
- obtaining, inspecting, securing and attaching controlled descent equipment in accordance with workplace requirements
- evacuating the elevated work platform (EWP) and descending to the ground in accordance with workplace requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- organisational procedures for EWP controlled descent escape including:
 - inspection and placement of controlled descent equipment
 - assessment and control hazards to self and others
 - safe approach distances (SAD) appropriate to EWP controlled descent escape
 - assessment of situation
 - activation of emergency response, where appropriate
 - fitting and use of controlled descent escape equipment
 - incident site security
 - reporting requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so.

Where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate equipment currently used in industry for performing EWP controlled descent escapes
- applicable documentation, including workplace requirements, relevant industry standards, equipment specifications, and operation manuals.

UETDRMP005 Perform elevated work platform rescue

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

Application

This unit involves the skills and knowledge required to perform an elevated work platform (EWP) rescue in the electricity supply industry (ESI) environment.

It includes the organisational workplace requirements for the inspection and use of EWP retrieval systems, and how it applies to ESI workers to meet work health and safety (WHS)/occupational health and safety (OHS), mobility and mutual aid requirements.

Note: Those holding an existing ESI or Electrotechnology qualification or equivalent meet the prerequisite unit requirements.

Refer to the UET Transmission, Distribution and Rail Sector Training Package Companion Volume Implementation Guide for equivalency definition.

The application of the skills and knowledge described in this unit may require a licence/registration to practice in the workplace.

Other conditions may also apply under state and territory legislative and regulatory licensing requirements which must be confirmed prior to commencing this unit.

Pre-requisite Unit

HLTAID009 Provide cardiopulmonary resuscitation

and

UEECD0007 Apply work health and safety regulations, codes and practices in the workplace

or

TLILIC0005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

or

UETDREL006 Work safely in the vicinity of live electrical apparatus as a non-electrical worker

Competency Field

Mobility and Portability

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to perform EWP rescue procedures	<p>1.1 Workplace requirements for the rescue are identified and confirmed</p> <p>1.2 EWP retrieval systems are inspected for operational serviceability in accordance with workplace requirements</p>
2 Carry out EWP rescue procedures	<p>2.1 Situation is assessed, and rescue response is activated in accordance with workplace requirements</p> <p>2.2 EWP retrieval systems are accessed in accordance with workplace requirements</p> <p>2.3 EWP retrieval systems are used to rescue casualty in accordance with workplace requirements</p>
3 Complete the EWP rescue procedure	<p>3.1 Casualty is assessed in accordance with workplace requirements</p> <p>3.2 Incident site is secured and entry controlled in accordance with workplace requirements</p> <p>3.3 Incident is reported in accordance with workplace requirements</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the UET Transmission, Distribution and Rail Sector

Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is not equivalent to UETDRRF002 Perform EWP rescue.

Assessment Requirements for UETDRMP005 Perform elevated work platform rescue

Modification History

Release 1. This is the first release of this unit of competency in the UET Transmission, Distribution and Rail Sector Training Package Release 4.0.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on one occasion and include:

- identifying organisational elevated work platform (EWP) rescue requirements
- identifying hazards, assessing risks and applying control measures
- identifying and inspecting EWP retrieval systems for operational serviceability
- performing EWP rescue in accordance with workplace requirements
- removing the casualty from the EWP to the ground in accordance with workplace requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- EWP retrieval systems
- organisational EWP rescue procedures including:
 - inspection and operational serviceability of EWP retrieval systems
 - assessment and control hazards to rescuer and personnel
 - safe approach distances (SAD) appropriate to EWP rescue
 - activation of emergency rescue response
 - removal of casualty from the EWP to the ground
 - relocation of casualty to safe location
 - incident site security
 - reporting requirements.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so.

Where this is not appropriate, assessment must occur in simulated conditions involving realistic and authentic activities that replicate operational workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate EWP retrieval systems currently used in industry for performing EWP rescue
- applicable documentation, including workplace procedures, equipment specifications and operation manuals.

AHC Agriculture, Horticulture and Conservation and Land Management Training Package

Modification History

Version	Release Date	Comments
1.0	22 June 2016	Initial release Includes 97 qualifications, 878 units of competency and assessment requirements and 46 Skill Sets.

Credit Arrangements

Qualification	Credit Arrangements
AHC10115 Certificate I in Conservation and Land Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC10216 Certificate I in AgriFood Operations	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC10316 Certificate I in Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC10416 Certificate I in Permaculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC20116 Certificate II in Agriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC20316 Certificate II in Production Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC20416 Certificate II in Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC20510 Certificate II in Arboriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC20616 Certificate II in Parks and Gardens	At the time of endorsement of this Training Package no national credit arrangements exist.

AHC20716 Certificate II in Production Nursery	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC20816 Certificate II in Retail Nursery	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC20916 Certificate II in Sports Turf Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21016 Certificate II in Conservation and Land Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21116 Certificate II in Irrigation	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21216 Certificate II in Rural Operations	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21316 Certificate II in Shearing	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21416 Certificate II in Wool Handling	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21516 Certificate II in Floriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21616 Certificate II in Landscaping	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC21716 Certificate II in Permaculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC30116 Certificate III in Agriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC30216 Certificate III in Agriculture (Dairy Production)	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC30416 Certificate III in Pork Production	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC30516 Certificate III in Poultry Production	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC30616 Certificate III in Production Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.

AHC30716 Certificate III in Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC30716 Certificate III in Landscape Construction	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC30816 Certificate III in Arboriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31016 Certificate III in Parks and Gardens	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31116 Certificate III in Production Nursery	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31216 Certificate III in Retail Nursery	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31316 Certificate III in Sports Turf Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31416 Certificate III in Conservation and Land Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31516 Certificate III in Indigenous Land Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31616 Certificate III in Lands, Parks and Wildlife	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC31716 Certificate III in Natural Area Restoration	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32116 Certificate III in Commercial Seed Processing	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32216 Certificate III in Commercial Composting	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32316 Certificate III in Conservation Earthworks	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32416 Certificate III in Irrigation	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32516 Certificate III in Aboriginal Sites Work	At the time of endorsement of this Training Package no national credit arrangements exist.

AHC32616 Certificate III in Rural Machinery Operations	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32716 Certificate III in Rural Merchandising	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32816 Certificate III in Rural Operations	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC32916 Certificate III in Shearing	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33016 Certificate III in Wool Clip Preparation	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33116 Certificate III in Advanced Wool Handling	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33216 Certificate III in Floriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33316 Certificate III in Feedlot Operations	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33416 Certificate III in Seed Production	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33516 Certificate III in Seed Testing	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33616 Certificate III in Pest Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33816 Certificate III in Permaculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC33916 Certificate III in Beekeeping	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC40116 Certificate IV in Agriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC40316 Certificate IV in Production Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC40416 Certificate IV in Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.

AHC40516 Certificate IV in Parks and Gardens	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC40616 Certificate IV in Production Nursery	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC40716 Certificate IV in Retail Nursery	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC40816 Certificate IV in Sports Turf Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC40916 Certificate IV in Conservation and Land Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41016 Certificate IV in Agribusiness	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41116 Certificate IV in Irrigation	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41316 Certificate IV in Wool Classing	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41416 Certificate IV in Seed Production	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41516 Certificate IV in Seed Testing	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41616 Certificate IV in Organic Farming	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41716 Certificate IV in Pest Management	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC41916 Certificate IV in Arboriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC42016 Certificate IV in Landscape	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC42116 Certificate IV in Permaculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC42216 Certificate IV in Shearing Contracting	At the time of endorsement of this Training Package no national credit arrangements exist.

AHC50116 Diploma of Agriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC50216 Diploma of Pork Production	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC50316 Diploma of Production Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC50416 Diploma of Horticulture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC50510 Diploma of Arboriculture	At the time of endorsement of this Training Package no national credit arrangements exist.
AHC50616 Diploma of Landscape Design	At the time of endorsement of this Training Package no national credit arrangements exist.

AHCSS00029 Cotton Industry Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0. Skill set updated to replace superseded first aid unit, as approved by the AISC in consultation with ASQA.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Description

Not applicable.

Pathways Information

These units provide credit towards AHC20116 Certificate II in Agriculture.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBAC202 Assist agricultural crop maintenance
- AHCMOM202 Operate tractors
- AHCMOM304 Operate machinery and equipment
- AHCWHS201 Participate in work health and safety processes
- AHCWRK202 Observe environmental work practices
- AHCWRK204 Work effectively in the industry
- HLTAID010 Provide basic emergency life support

Target Group

Those working as farm hands in the cotton production industry.

Suggested words for Statement of Attainment

These competencies meet the minimum industry requirements for cotton industry work.

AHCSS00030 Farm Business Management Skill Set

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0. Qualifications and unit codes and titles updated.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.1.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Description

This skill set covers the skills and knowledge to plan and manage a farm business and the associated risks.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC41019 Certificate IV in Agribusiness
- AHC51419 Diploma of Agribusiness Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS512 Develop and implement family business structures and relationships
- AHCBUS516 Develop and review a business plan
- AHCBUS517 Monitor and review business performance
- BSBRSK501 Manage risk

Target Group

This skill set is for individuals who plan and manage a farm business and the associated risks.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *BSB Business Services Training Package* meet the requirements for those responsible for farm business planning and management, including risk management.

AHCSS00042 Organic Crop Management Skill Set

Modification History

Release	Comments
Release 3	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0. Updated qualifications pathways information and unit codes.
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0. Updated elective code.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Description

This skill set is designed to meet industry requirements for workers who manage organic crop production.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40122 Certificate IV in Agriculture
- AHC50122 Diploma of Agriculture
-

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB518 Develop climate risk management strategies
- AHCBAC417 Manage agricultural crop production
- AHCBAC509 Plan and manage long-term weed, pest and disease control in crops

- AHCORG411 Manage organic soil improvement

Target Group

This skill set is for individuals responsible for planning, implementing and managing organic crop production.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for managing organic crop production.

AHCSS00045 Spray Operator Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 10.0. Skill Set requirements updated.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Description

This skill set provides the skills and knowledge required to safely plan and prepare for a specific weed management program.

Pathways Information

These units provide credit towards *Certificate II in Conservation and Ecosystem Management* and *Certificate III in Conservation and Ecosystem Management*.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCHM304 Transport and store chemicals
- AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases
- AHCPMG203 Work effectively in a pest management environment
- AHCPMG301 Control weeds
- AHCPMG302 Control plant pests, diseases and disorders

Target Group

This skill set is for individuals who plan and prepare for a specific weed management program.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for those who work with team members to carry out a specific weed management program.

AHCSS00046 Organic Livestock Management Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 9.0. Updated qualifications in the pathways information and updated codes and titles.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

Description

This skill set provides the skills and knowledge required to develop strategies to manage climate risk, implement soil improvement programs and manage livestock production for an organic farming enterprise.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package, including:

- AHC40122 Certificate IV in Agriculture
- AHC50122 Diploma of Agriculture
-

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB518 Develop climate risk management strategies
- AHCLSK510 Develop production plans for livestock
- AHCORG410 Manage organic livestock production

- AHCORG411 Manage organic soil improvement
-

Target Group

This skill set is for individuals responsible for managing organic livestock production systems.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for managing organic livestock production systems.

AHCSS00063 Production Horticulture Administration Officer Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards a Certificate III in Production Horticulture.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
BSBFIA302	Process payroll
BSBITU304	Produce spreadsheets
BSBWHS302	Apply knowledge of WHS legislation in the workplace
SIRRINV001	Receive and handle retail stock

Target Group

Individuals working as administration officers in the production horticulture sector

Suggested words for Statement of Attainment

These competencies meet the industry requirements for administration officers working in the production horticulture sector.

AHCSS00064 Production Horticulture Administration Supervisor Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Version created to correct typographical errors and update unit codes and titles.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Description

This skill set provides the skills and knowledge required to supervise administration officers in the production horticulture industry.

Pathways Information

These units of competency provide credit towards *AHC40320 Certificate IV in Production Horticulture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- BSBESB402 Establish legal and risk management requirements of new business ventures
- BSBHRM416 Process payroll
- BSBLDR414 Lead team effectiveness
- BSBOPS401 Coordinate business resources

Target Group

This skill set is for individuals responsible for supervising administration officers working in the production horticulture industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for supervisors of administration officers working in the production horticulture industry.

AHCSS00068 Production Horticulture Technology Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0. Version created to correct typographical errors and update BSB code and title.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

Description

This skill set provides the skills and knowledge required to use technology in the production horticulture industry.

Pathways Information

These units provide credit towards *AHC30620 Certificate III in Production Horticulture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS301 Use hand held e-business tools
- AHCMOM305 Operate specialised machinery and equipment
- AHCMOM311 Operate precision control technology
- BSBTEC201 Use business software applications

Target Group

This skill set is for individuals responsible for using technology in the production horticulture industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for using technology in the production horticulture industry.

AHCSS00072 Pest Management Planning Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to <i>AHCSS00043 Vertebrate Pest Management Planning Skill Set</i> . Minor edits, title changed, and units of competency updated to current versions.

Description

This skill set prepares individuals working in the rural and land management sector who are required to consult with stakeholders and design and develop pest management plans.

Pathways Information

These units of competency provide credit towards *AHC30318 Certificate III in Rural and Environmental Pest Management* and *AHC41716 Certificate IV in Pest Management*.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCPMG306 Determine pest control techniques
- AHCPMG409 Implement a pest management plan
- AHCPMG412 Develop a pest management plan
- AHCPMG413 Define the pest problem
- BSBPMG418 Apply project stakeholder engagement techniques

Target Group

This skill set is for individuals who are:

- Authorised Control Officers in NSW and the ACT
- Agency biosecurity officers
- Local government officers

- Land owners
- Land managers.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meets the industry standards for applying a strategic planning approach to the principles of integrated pest management.

AHCSS00074 Agricultural Chemical Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to <i>AHCSS00027 Agricultural Chemical Skill Set</i> . Minor editing changes.

Description

This skill set describes the skills and knowledge required to transport, handle, store, prepare and apply chemicals.

Pathways Information

These units of competency provide credit towards qualifications in Certificate II, Certificate III and Certificate IV in various sectors of the horticulture and agriculture industry including the following broad industries:

- Production Agriculture
- Production Horticulture
- Amenity Horticulture (Arboriculture, Parks and Gardens, Landscaping)
- Nursery Production and Retail
- Turf Management
- Animal Breeding and Racing
- Beekeeping
- Pest Management (Vertebrate, Weeds and Invertebrate)
- Conservation and Land Management (Lands, Parks and Wildlife, Natural Area Restoration)
- Irrigation
- Indigenous Land Management.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCHM304 Transport and store chemicals
- AHCCHM307 Prepare and apply chemicals to control pest, weeds and diseases

Target Group

This skill set is for individuals responsible for applying agricultural chemicals.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet state/territory licensing requirements for the application of agricultural chemicals.

AHCSS00075 Basic Beekeeping Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0. Supersedes and is equivalent to <i>AHCSS00028 Basic Introduction to Beekeeping Skill Set</i> . Minor edits.

Description

This skill set describes the basic skills and knowledge required to operate a beehive or small apiary.

Pathways Information

These units of competency provide credit toward the *AHC31818 Certificate III in Beekeeping*.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK203 Open and reassemble a beehive
- AHCBEK205 Prepare and use a bee smoker
- AHCBEK206 Assemble and maintain beekeeping components
- AHCBEK302 Manipulate honey bee brood
- AHCBEK304 Remove a honey crop from a hive
- AHCBEK313 Manage pests and disease within a honey bee colony

Target Group

This skill set is for entry level workers in the beekeeping industry and for hobbyist beekeepers.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the basic requirements for the maintenance and monitoring of beehives.

AHCSS00076 Australian Native Stingless Bees Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Description

This skill set describes the basic skills and knowledge required to identify, procure, establish and maintain a hive of Australian native stingless bees.

Pathways Information

This unit of competency provides credit toward a range of qualifications from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*.

Licensing/Regulatory Information

No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

AHCNRM301 Establish an Australian native stingless bee colony

Target Group

This skill set is for individuals seeking to expand their skills and knowledge in bee husbandry to include Australian native stingless bees.

Suggested words for Statement of Attainment

This unit of competency from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meets the basic requirement for the maintenance and monitoring of Australian native stingless bees.

AHCSS00077 Pollination Services Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Description

This skill set describes the advanced skills and knowledge required to conduct a commercial business in pollination services within the beekeeping industry.

Pathways Information

These units of competency provide credit toward the *AHC31818 Certificate III in Beekeeping*, *BSB42615 Certificate IV in New Small Business* and *BSB42515 Certificate IV in Small Business Management*.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK405 Select and establish an apiary site
- AHCBEK408 Provide bee pollination services
- BSBSMB403 Market a small business
- BSBSMB406 Manage small business finances

Target Group

This skill set is for experienced beekeepers seeking to develop specialist beekeeping and business skills.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* and the *BSB Business Services Training Package* meet the basic requirements for conducting a contracting pollination service.

AHCSS00078 Queen Bee Breeding Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC, Agriculture, Horticulture and Conservation and Land Management Training Package Version 3.0.

Description

This skill set describes the advanced skills and knowledge required to commercially breed queen bees for the beekeeping industry.

Pathways Information

These units of competency may provide credit toward the *AHC31818 Certificate III in Beekeeping*.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to beehive ownership and biosecurity codes of practice apply in some states and territories.

Skill Set Requirements

- AHCBEK402 Perform queen bee artificial insemination
- AHCBEK409 Rear queen bees

Target Group

This skill set is for experienced beekeepers seeking to expand into specialist queen bee breeding.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the basic requirements for queen bee breeding.

AHCSS00079 Carbon Farming Services Advisor (CFSA) Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers the skills and knowledge required of consultants and advisors who provide guidance and advice on the establishment of a carbon farming project to generate carbon credits. It also applies to carbon farming project managers.

Note the term 'advice' referred to in this skill set does not relate to financial advice which requires an Australian Financial Services License (AFSL). This skill set does not address the skills or the generic knowledge requirements in 'ASIC Regulatory Guide 146: Training of financial product advisors'.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC50116 Diploma of Agriculture
- AHC51216 Diploma of Community Coordination and Facilitation
- AHC51419 Diploma of Agribusiness Management
- AHC60319 Advanced Diploma of Agribusiness Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project
- AHCCFP501 Advise on carbon farming project planning and implementation
- FNSFMK512 Apply knowledge of emissions markets
- LGALAND503A Develop agreements with native title holders/traditional owners

Target Group

This skill set is for agribusiness consultants and advisors who provide guidance and advice on the establishment of a carbon farming projects to generate carbon credits.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package*, *Financial Services Training Package* and the *Local Government Training Package* meet the requirements for individuals who provide advice on carbon farming projects to generate carbon credits.

AHCSS00084 Carbon Farming Vegetation Method Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers planning a carbon farming project for individuals who are considering the establishment of a land-based, carbon farming project to generate carbon credits, utilising a vegetation method.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC40916 Certificate IV in Conservation and Land Management
- AHC41019 Certificate IV in Agribusiness

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP402 Prepare to comply with measuring and modelling requirements of a carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project
- AHCCFP405 Increase carbon using vegetation and/or agricultural approaches
- FWPFGM5219 Undertake carbon stock sampling of forests and plantations

Target Group

This skill set is for individuals who are considering the establishment of a land-based carbon farming project to generate credits, utilising a vegetation method.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *FWP Forest and Wood Products Training Package* meet the requirements for individuals to plan a land-based, carbon farming project to generate carbon credits, utilising a vegetation method.

AHCSS00085 Carbon Farming Soil-based Method Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers planning a carbon farming project for land owners, land holders or land managers, who are considering the establishment of a soil-based, carbon farming project to generate carbon credits

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC40916 Certificate IV in Conservation and Land Management
- AHC41019 Certificate IV in Agribusiness

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP401 Increase soil organic carbon using land management practices
- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project

Target Group

This skill set is for land owners, land holders or land managers, who may undertake work on a land-based carbon farming project.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the requirements for land owners, land holders or land managers, who may undertake work on a land-based carbon farming project.

AHCSS00086 Carbon Farming Agricultural Method Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers planning a carbon farming project for individuals who are considering the establishment of a land-based, carbon farming project to generate carbon credits, utilising an agricultural method.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC40916 Certificate IV in Conservation and Land Management
- AHC41019 Certificate IV in Agribusiness

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCCFP402 Prepare to comply with measuring and modelling requirements of carbon farming methods
- AHCCFP403 Identify opportunities and risks in carbon farming projects
- AHCCFP404 Plan a land-based carbon farming project
- AHCCFP405 Increase carbon using vegetation and/or agricultural approaches

Target Group

This skill set is for individuals who are considering the establishment of a land-based carbon farming project to generate credits, utilising an agricultural method.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the requirements for individuals to plan a land-based, carbon farming project to generate carbon credits, utilising an agricultural method.

AHCSS00087 Farm Business Finances Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set covers the skills and knowledge to plan and manage farm business finances.

Pathways Information

These units of competency provide credit towards a number of qualifications in the AHC Agriculture, Horticulture, Conservation and Land Management Training Package, including:

- AHC40116 Certificate IV in Agriculture
- AHC41019 Certificate IV in Agribusiness
- AHC51419 Diploma of Agribusiness Management

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBUS406 Administer finance, insurance and legal requirements
- AHCBUS408 Operate within a budget framework
- AHCBUS515 Prepare estimates, quotes and tenders
- BSBSMB421 Manage small business finance

Target Group

This skill set is for individuals who plan and manage farm business finances.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and the *BSB Business Services Training Package* meet the requirements for those responsible for farm business finances.

AHCSS00090 Introduction To Sports Turf Maintenance Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Land Management Training Package Version 4.0.

Description

This skill set provides a range of basic skills appropriate for volunteer and casual workers engaged in the sports turf industry.

Pathways Information

These units of competency provide a pathway and credit towards AHC20919 Certificate II Sports Turf Management.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMOM203 Operate basic machinery and equipment
- AHCTRF205 Assist in the preparation of turf surfaces for play
- AHCTRF207 Renovate grassed areas

Target Group

This skill set is for individuals who assist in sports turf maintenance activities for sporting clubs as a volunteer or casual worker.

Suggested words for Statement of Attainment

These competencies are from the *AHC Agriculture, Horticulture and Land Management Training Package* and meet the industry requirements for supporting the setup and basic maintenance of a sports turf surfaces.

AHCSS00092 Irrigation Retailer Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 10.0. Skill Set requirements updated.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0. Supersedes and is not equivalent to <i>AHCSS00037 Irrigation Retailer Skill Set</i> . Skill set requirements amended, new and additional units required for completion of skill set.

Description

This skill set provides the skills and knowledge required to recommend irrigation products and services, provide irrigation sales and service, design domestic urban irrigation systems, coordinate visual merchandising, build customer relationships and loyalty and advise on products and services within an irrigation retail operations environment.

Pathways Information

These units of competency provide credit towards a number of qualifications in the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, including *Certificate III in Irrigation Technology*.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG349 Recommend irrigation products and services
- AHCMER306 Sell products and services
- ICTWOR304 Manage spare parts
- MEM12024 Perform computations

- SIRRINV001 Receive and handle retail stock
- SIRRINV002 Control stock
- SIRRMER003 Coordinate visual merchandising activities

Target Group

This skill set is for individuals responsible for irrigation retail operations.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, *SIR Retail Services Training Package*, *ICT Information and Communications Technology Training Package* and *MEM Manufacturing and Engineering Training Package* meet the industry requirements for irrigation retail operations within the irrigation industry.

AHCSS00100 Irrigation Systems Efficiency Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 4.0.

Description

This skill set provides the skills and knowledge required to operate pressurised irrigation systems, troubleshoot irrigation systems and measure irrigation delivery system performance within the irrigation industry.

Pathways Information

These units of competency provide credit towards *AHC31119 Certificate III in Irrigation Technology*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCIRG337 Measure irrigation delivery system performance
- AHCIRG338 Troubleshoot irrigation systems
- AHCIRG346 Operate pressurised irrigation systems

Target Group

This skill set is for individuals responsible for maintaining irrigation systems efficiency.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for maintaining irrigation systems efficiency within the irrigation industry.

AHCSS00103 Basic Tree Worker Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 7.0. Skill set updated to replace superseded first aid unit, as approved by the AISC in consultation with ASQA.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Description

This skill set provides the basic knowledge and skills required to operate chainsaws to cut and trim felled trees, remove tree materials and control traffic in support of a ground based arboricultural work team.

Pathways Information

These units of competency provide pathways into the Certificate II in Arboriculture and Certificate III in Arboriculture.

Licensing/Regulatory Information

Licensing, legislative, regulatory, or certification requirements apply to the following units in some states and territories and may differ according to jurisdiction:

- FWPCOT2239 Trim and cut felled trees
- RIIWHS205E Control traffic with stop-slow bat

Skill Set Requirements

- FWPCOT2237 Maintain chainsaws
- FWPCOT2239 Trim and cut felled trees
- FWPHAR2206 Operate a mobile chipper/mulcher
- HLTAID011 Provide First Aid
- RIIWHS205E Control traffic with stop-slow bat

Target Group

This skill set is for individuals wanting to enter the arboriculture industry with basic mechanical skills required to support ground based arboricultural work.

Suggested words for Statement of Attainment

These competencies from the *FWP Forest and Wood Products*, *HLT Health and RII Resources and Infrastructure Training Packages* meet the minimum standards for supporting ground based arboriculture work.

AHCSS00104 Introduction to Arboriculture Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Description

This skill set provides arborist skills and knowledge to identify, prune and maintain trees.

Pathways Information

These units of competency provide a pathway and credit towards AHC30820 Certificate III in Arboriculture and meet the entry requirements for AHC50520 Diploma of Arboriculture.

Licensing/Regulatory Information

Legislation, regulations and by-laws relating to the treatment and removal of trees apply in some States and Territories.

Skill Set Requirements

- AHCARB314 Implement a tree maintenance program
- AHCARB316 Perform pruning operations
- AHCARB323 Identify trees

Target Group

This skill set is for individuals with an existing horticultural or agricultural qualification and/or experience without a current Certificate III in Arboriculture and who want to meet the entry requirements for AHC50520 Diploma of Arboriculture. It is also for individuals that are seeking entry level work in Arboriculture or a pathway into AHC30820 Certificate III in Arboriculture.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* provides arborist skills and knowledge to identify, prune and maintain trees.

AHCSS00105 Arborist Works Coordinator Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.

Description

This skill set provides qualified arborists with the practical skills and knowledge required to function as an Arborist Works Coordinator on an arboricultural work site.

Pathways Information

These units of competency provide direct credit towards the Certificate III in Arboriculture (Arborist Works Coordinator) specialisation. The unit *AHCARB408 Perform a ground-based tree defect evaluation* provides direct credit towards *AHC50520 Diploma of Arboriculture*.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCARB316 Perform pruning operations
- AHCARB406 Verify pruning specifications
- AHCARB407 Supervise and audit tree operations
- AHCARB408 Perform a ground-based tree defect evaluation
- AHCARB409 Conduct a safety audit

Target Group

This skill set is for individuals with an existing trade level arborist qualification and experience who want to develop skills to function as an Arborist Works Coordinator on an arboricultural work site.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the minimum standards required to meet the needs of an Arborist Works Coordinator.

AHCSS00106 Digital Agronomy Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge required to provide digital agronomic advice on system types, purchase and use.

Pathways Information

These units of competency provide credit towards *AHC51920 Diploma of Applied Agronomy* from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* and provide specialist skills in digital agronomy.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB516 Select and implement a GIS for sustainable agricultural systems
- AHCAGB523 Interpret and use agricultural data

Target Group

This skill set is for agricultural professionals who require specialist skills in digital agronomy.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture, Conservation and Land Management Training Package* meet the industry requirements for agricultural professionals in providing digital agronomic advice and expertise.

AHCSS00110 Basic Biosecurity Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the basic knowledge and skills required to support biosecurity activity and compliance for a property, farm or land management situation for animal husbandry, plant production or land and aquatic environment management, including businesses, volunteer groups and government and non-government agencies and organisations.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHC BIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity
- AHC BIO204 Follow site biosecurity procedures
- AHC BIO301 Identify and report signs of unusual disease or pest
- AHC BIO303 Apply biosecurity measures

Target Group

This skill set is for individuals, new employees or existing workers who work in a horticulture, agriculture or conservation and land management environment where biosecurity is an important part of the job role for the prevention of diseases and pests.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the basic industry requirements for complying with biosecurity procedures in the workplace.

AHCSS00111 Medicinal Cannabis Manager Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to implement and monitor regulatory and quality requirements in the medicinal cannabis industry.

Pathways Information

These units of competency provide credit towards a range of qualifications from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package, including AHC42320 Certificate IV in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC401 Apply security measures for medicinal cannabis
- AHCMDC402 Monitor medicinal cannabis production for compliance and quality

Target Group

This skill set is for of individuals who work in the medicinal cannabis industry at the supervisory or managerial level.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for implementing and monitoring regulatory and quality requirements in the medicinal cannabis industry.

AHCSS00112 Site Manager for Biosecurity Emergency Response Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the knowledge and skills required for farm managers or site managers to understand the link between on-farm biosecurity implementation and management, and their role within a biosecurity emergency response agency.

Pathways Information

These units of competency provide pathways into a range of qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCBER302 Work effectively in a biosecurity emergency response
- AHCBER503 Manage active operational emergency disease or pest sites
- AHC BIO204 Follow site quarantine procedures
- AHC BIO401 Plan and implement a biosecurity program

Target Group

This skill set is for individuals employed as farm or property managers where there is a potential for a biosecurity threat and the need to work with government agencies during a biosecurity emergency response.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the industry requirements for working with biosecurity emergency response agency staff during a biosecurity emergency response.

AHCSS00114 Design Roof Gardens, Vertical Gardens and Green Facades Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set is designed to cover the knowledge and skills required to design roof gardens, vertical gardens and green facades for commercial and or residential projects, in consultation with building, landscape and horticultural professionals. It includes applying knowledge of the functions, benefits and characteristics of roof gardens, vertical gardens and green walls, national, state, territory and local authorities' policy, procedure and permit requirements, building regulations and horticultural requirements to designs, as well as the selection of growing media and plants, planning for maintenance requirements and producing project plans.

Pathways Information

These units of competency provide credit towards a range of qualifications in the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, including:

- AHC42020 Certificate IV in Landscape
- AHC50416 Diploma of Horticulture
- AHC50616 Diploma of Landscape Design.

These units of competency also build on skills and knowledge attained in AHC Certificates III and IV in Landscape Construction, Landscape and Horticulture from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* to provide specialist skills in roof garden, vertical garden and green facade infrastructure.

Licensing/Regulatory Information

Licensing, legislative or certification requirements may apply to the work undertaken in this skill set in some jurisdictions. Users are advised to check with the relevant regulatory authorities.

Skill Set Requirements

- AHCGRI501 Design roof gardens
- AHCGRI502 Design vertical gardens and green facades
- AHCPCM512 Design specialised landscape

Target Group

This skill set is for experienced horticultural, landscaping, landscape design and/or construction workers, builders or developers who design roof gardens, vertical gardens and green facades in association with specialists and building professionals.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet industry requirements for planning and designing roof gardens, vertical gardens and green facades.

AHCSS00116 Maintain Roof Gardens, Vertical Gardens and Green Facades Skill Set

Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 10.0. Skill Set requirements updated.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0

Description

This skill set is designed to cover the knowledge and skills required to maintain green infrastructure specific to commercial and or residential roof gardens, vertical gardens and green facades.

Pathways Information

These units of competency provide credit towards a range of qualifications in the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package*, including:

- Certificate III in Agriculture
- Certificate III in Horticulture
- Certificate III in Landscape Construction
- Certificate III in Parks and Gardens
- Certificate IV in Landscape Construction Management.

These units of competency also build on skills and knowledge attained in Certificate III in Landscape Construction from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* to provide specialist skills in roof garden, green wall and green facade infrastructure.

Licensing/Regulatory Information

Licensing, legislative or certification requirements may apply to this unit in some jurisdictions, depending on the location of work and/or plant and equipment used. Users are advised to check with the relevant regulatory authorities.

Skill Set Requirements

- AHCGRI301 Maintain roof gardens, vertical gardens and green facades
- AHCPGD310 Implement a landscape maintenance program
- AHCPMG301 Control weeds
- AHCPMG302 Control plant pests, diseases and disorders
- RIIWHS204E Work safely at heights

Target Group

This skill set is for horticulture workers responsible for maintaining roof gardens, vertical gardens and green facades.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* and the *RII Resources and Infrastructure Training Package* meet industry requirements for maintaining roof gardens, vertical gardens and green facades.

AHCSS00117 Introduction to Conservation and Ecosystem Management Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides basic skills and knowledge for individuals to recognise common plants and animals in natural landscapes and to undertake basic conservation and ecosystem works in the conservation and ecosystem management industry.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCECR203 Perform basic ecological restoration works
- AHCFAU202 Recognise fauna
- AHCPCM204 Recognise plants

Target Group

This skill set is for individuals who wish to develop basic skills as means to enter the conservation and ecosystem management industry, or develop basic skills in identifying common native plants and animals and support conservation works.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for performing basic conservation and ecosystem works.

AHCSS00119 Induction to Work in the Medicinal Cannabis Industry Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to apply regulatory and quality requirements to work in the medicinal cannabis industry

Pathways Information

These units of competency provide credit towards the AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC301 Apply security regulatory requirements to work in the medicinal cannabis industry
- AHCMDC302 Apply regulatory and quality requirements to the production of medicinal cannabis

Target Group

This skill set is for individuals entering the medicinal cannabis industry, including those with or without previous experience in agriculture or horticulture.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for induction to work in the medicinal cannabis industry.

AHCSS00120 Medicinal Cannabis Cultivation and Production Assistant Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to assist in cultivation and production operations in the medicinal cannabis industry.

Pathways Information

These units of competency provide credit towards a range of qualifications from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package, including AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC201 Assist with propagation of medicinal cannabis
- AHCMDC202 Assist with care and maintenance of medicinal cannabis
- AHCMDC203 Assist with harvest and pre-processing of medicinal cannabis
- AHCMDC301 Apply security regulatory requirements to work in the medicinal cannabis industry

Target Group

This skill set is for individuals entering the medicinal cannabis industry, including those with or without previous experience in agriculture or horticulture.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for cultivation assistants in in the medicinal cannabis industry.

AHCSS00121 Medicinal Cannabis Cultivation and Production Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the skills and knowledge to undertake skilled work in cultivation and production operations in the medicinal cannabis industry.

Pathways Information

These units of competency provide credit towards the AHC33920 Certificate III in Medicinal Cannabis Cultivation and Production.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCMDC301 Apply security regulatory requirements to work in the medicinal cannabis industry
- AHCMDC302 Apply regulatory and quality requirements to the production of medicinal cannabis
- AHCMDC303 Undertake propagation of medicinal cannabis
- AHCMDC304 Undertake care and maintenance of medicinal cannabis
- AHCMDC305 Undertake harvest and pre-processing of medicinal cannabis

Target Group

This skill set is for individuals entering the medicinal cannabis industry, including those with or without previous experience in agriculture or horticulture.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet industry requirements for undertaking skilled work in cultivation and production operations in the medicinal cannabis industry.

AHCSS00127 Milking Equipment Maintenance Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set describes the skills and knowledge required to identify faults of milking equipment that do not require the services of qualified trades people, carry out routine adjustments and maintenance of equipment to rectify poor performance and ensure compliance with food safety standards and requirements.

Pathways Information

These units of competency provide credit towards the AHC30221 Certificate III in Dairy Production and a number of AHC Certificate IV qualifications.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHCAGB405 Analyse and interpret production data
- AHCDRY304 Carry out routine service of milking equipment
- AHCDRY305 Conduct mechanical tests on milking machines

Target Group

This skill set is for individuals who undertake routine servicing, maintenance and troubleshooting of milking equipment for the dairy production industry.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for undertaking routine servicing and maintenance of milking equipment.

AHCSS00128 Design Brief for Therapeutic Horticulture Garden Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Description

This skill set provides the skills and knowledge required to develop a design brief for a therapeutic horticulture garden.

Pathways Information

These units of competency provide credit towards *AHC40416 Certificate IV in Horticulture and AHC42421 Certificate IV in Landscape Design*.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHPCPM404 Recommend plants and cultural practices
- AHCTHH401 Develop a therapeutic horticulture design brief

Target Group

This skill set is for experienced horticulture or landscaping design contractors responsible for providing professional design services for therapeutic horticulture garden design in the capacity of a sole trader or small business.

Suggested words for Statement of Attainment

These competencies from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meet the industry requirements for developing a therapeutic horticulture design brief as a horticulture or landscape design contractor.
