Assessment Requirements for AMPA2153 Process slink by-products

Release: 1

Assessment Requirements for AMPA2153 Process slink by-products

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must process slinks and package the by-products.

The candidate must:

- use vacuum pumps to recover blood (where applicable)
- process slink by-products in accordance with workplace requirements and customer specifications
- process slink by-products to workplace health and safety requirements
- pack and store slink by-products to workplace requirements
- apply relevant regulatory requirements
- use communication skills relevant to work instructions and Standard Operating Procedures (SOPs)

Knowledge Evidence

The candidate must demonstrate a basic factual, technical and procedural knowledge of:

- methods of packaging slink by-products for effective storage to meet workplace requirements and customer specifications
- packaging and labelling requirements for slink by-products to meet customer specifications and workplace requirements
- procedures for processing slink by-products
- storage requirements
- uses of slink by-products
- correct disposal of slink
- workplace health and safety requirements for processing slink
- workplace health and safety hazards related to processing slink by-products
- relevant regulatory requirements

Assessment Conditions

Competency must be demonstrated under normal production conditions.

Assessment must be conducted in a slink room in a meat processing plant.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
