**Assessment Requirements for AMPA3091
Implement a Quality Assurance program
for rendering plant**

Release: 1

Assessment Requirements for AMPA3091 Implement a Quality Assurance program for rendering plant

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must implement a Quality Assurance (QA) program in a rendering plant.

The candidate must:

- implement the QA program
- identify and implement corrective action
- verify the program using sampling, testing and auditing
- mentor staff implementing the procedures
- apply relevant communication skills relevant to work instructions and Standard Operating Procedures (SOPs)
- apply relevant workplace health and safety, regulatory and workplace requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- hazards likely to be encountered in a rendering plant
- critical control points for QA monitoring
- process flow chart for the rendering operation
- relevant workplace health and safety, regulatory and workplace requirements
- verification and validation procedures

Assessment Conditions

Competency must be assessed in an operating rendering plant.

Competency must be demonstrated when implementing a functioning QA program.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
