Assessment Requirements for AMPA3100 Perform manual chemical lean testing

Release: 1

Assessment Requirements for AMPA3100 Perform manual chemical lean testing

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

The candidate must perform chemical lean (CL) testing on carton meat.

The candidate must:

- select, take, prepare and test samples according to workplace requirements
- accurately use the formula for calculating CL
- apply relevant regulatory requirements
- prepare and use testing scales and taring scales (if required) according to manufacturer's specifications and workplace requirements
- apply communication skills relevant to work instructions and Standard Operating Procedures (SOPs) and problem-solving skills

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- concept of CL and why it is important in specifications
- corrective actions required if CL results are not within specification
- work instruction for sampling and testing
- relevant regulatory requirements

Assessment Conditions

Assessment should be performed in an operating boning room and across the full range of product specifications.

Competency must be demonstrated at the normal speed of production.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
