Camels**

Release: 2

Assessment Requirements for AMPA3125 Perform ante and post-mortem inspection - Camels

Modification History

Release	Comments
Release 2	This version released with AMP Australian Meat Processing Training Package Version 5.0.
Release 1	This version released with AMP Australian Meat Processing Training Package Version 2.0.

Performance Evidence

Candidates must perform ante-mortem and post-mortem inspection of camels to Australian Standards and other relevant regulatory requirements in a workplace environment under normal operating conditions.

The candidate must:

- identify the organs, skeletal structure and elements of the lymphatic, circulatory, digestive, urinary, nervous and respiratory systems relevant to meat inspection duties
 - perform ante-mortem inspection to Australian Standards and other relevant regulatory requirements
 - identify common diseases and conditions in camels seen at ante mortem inspection
 - describe appropriate dispositions for common diseases and conditions in camels
 - identify major emergency or notifiable diseases
 - demonstrate procedures for humane handling of livestock
 - identify suspect animals that may be suffering from a notifiable disease on ante-mortem examination according to Australian Standards
 - make disposition according to workplace and regulatory requirements
 - report notifiable diseases promptly and accurately according to regulatory requirements
 - perform post-mortem inspection in accordance with the Australian Standard and, where relevant, other importing country requirements
 - identify common diseases and conditions found at post-mortem
 - describe appropriate dispositions for common diseases and conditions in camels
 - treat carcasses and offal in accordance with the Australian Standard and/or importing country requirements
 - monitor stunning in order to detect, assess and report animal welfare issues
 - follow safe work practices as laid down in work place requirements
 - take and dispatch samples for mandated testing
-

-
- treat carcasses being held for test results in accordance with regulatory or importing country requirements
 - perform inspection duties in accordance with workplace health and safety requirements.

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- the physiology and anatomy of camels
- the Australian Standard procedures for the post and ante mortem inspection of camels
- additional inspection procedures relevant to the plant where assessment of the trainee is taking place
- the potential impact of emergency diseases
- common diseases and their symptoms as seen at ante and post-mortem inspection
- humane and efficient slaughtering techniques
- procedures for retaining carcasses
- carcass sampling and testing
- workplace health and safety hazards and work place requirements
- principles and procedures for humane handling of camels
- regulatory requirements for suspect camels, hygiene and sanitation standards, and workplace standards associated with ante-mortem inspection
- segregation requirements for suspect animals
- steps and procedures for humane destruction, emergency and suspect kills
- steps in ante-mortem inspection and recognise abnormal conditions
- symptoms of major emergency or notifiable diseases
- regulatory requirements associated with emergency or notifiable diseases
- the relevant registration processes and procedures for meat inspectors at their specific plant.

Assessment Conditions

Assessment of ante and post-mortem inspection must be conducted in a slaughtering establishment and assessment of post mortem inspection must be at chain speed.

As a minimum, assessment must consist of the following three forms of assessment:

- a workplace referee report which documents at least 10 practice ante-mortem inspections and 100 hours of post-mortem inspection practice on the chain under the supervision of a qualified meat inspector or on plant veterinary officer (note that this may be reduced to 50 hours if this is the second post-mortem inspection unit selected). The candidate must diarise the practice including the number of livestock / carcasses inspected and conditions detected and this has to be verified by a workplace supervisor or mentor.
- knowledge test which must include an assessment of the candidates knowledge of common diseases and conditions as well as emergency and notifiable diseases
- on-the-job assessment with assessor observation.

Assessors must satisfy the current standards for RTOs.
