AUMGTM008 Bond and repair fibreglass components

Release: 1

AUMGTM008 Bond and repair fibreglass components

Modification History

| Release | Comment |
|-----------|---|
| Release 1 | Unit updated to reflect the new standards for Training Packages Replaces AUMGTM3008 Bond and repair components using fibreglass reinforced plastic techniques |

Application

This unit describes the performance outcomes required to bond and repair components using fibreglass reinforced plastics (FRP) techniques.

It applies to those in an automotive and related component manufacturing environment and involves the application of skills and knowledge at a specialist level.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency Field

Manufacturing - Bus, Truck and Trailer

Unit Sector

Technical - Manufacture

| Elements | Performance Criteria |
|--|--|
| Elements describe the essential outcomes | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section |
| 1. Plan the job | 1.1 Items to be bonded and repaired are identified from work orders |
| | 1.2 FRP <i>materials and equipment</i> are identified, selected and prepared |
| | 1.3 Component surface area is calculated and FRP materials are prepared |
| | 1.4 Required quantities of gel-coat, resins, catalyst and matting |

Elements and Performance Criteria

| Elements | Performance Criteria |
|----------------------------------|--|
| | are calculated |
| | 1.5 Correct set-up and facilities of ventilated work area are confirmed and faults and non-compliances are reported |
| 2. Bond and repair components | 2.1 Workplace procedures are identified and followed |
| | 2.2 FRP edges and surfaces are prepared according to workplace procedures |
| | 2.3 FRP materials are mixed in approved containers |
| | 2.4 FRP materials are applied according to workplace procedures |
| | 2.5 Components are finished according to workplace quality procedures |
| 3. Complete work processes | 3.1 Equipment is cleaned and stored according to workplace procedures |
| | 3.2 Work area is cleaned, and waste materials are disposed of or recycled according to workplace procedures |
| | 3.3 Completed FRP component is checked against job specifications |
| | 3.4 Workplace documents are completed according to procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

| Skills | Description |
|-------------------------------|--|
| Reading skills to: | • interpret work health and safety (WHS) and workplace procedures, job instructions and component specifications |
| | • interpret safety data sheets (SDS) |
| | • information about FRP application processes. |
| Writing skills to: | legibly complete faulty equipment tags |
| | complete work sheets and FRP materials list |
| | • prepare an FRP repair plan. |
| Oral communication skills to: | • use FRP terminology in the workplace |
| | • report faulty FRP application equipment. |
| Numeracy skills to: | calculate and record surface area |
| | calculate and record required FRP materials, quantities and percentages |
| | identify component specifications |
| | • identify part numbers. |

| Skills | Description |
|------------------------------------|--|
| Digital literacy skills to: | use digital scalesuse workplace computer systems. |
| Planning and organising skills to: | prepare FRP application equipment, materials and work area ensure FRP materials are correctly calculated and identified. |
| Problem-solving skills to: | resolve FRP problems and meet job outcomes interpret and apply work instructions to ensure FRP materials are correctly mixed. |

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

| Materials and equipment | • catalyst |
|-------------------------|--|
| must include: | • FRP specialist tools |
| | • gel-coats and pigments |
| | • measuring equipment for bonding and repairing fibreglass |
| | components |
| | • mixing containers for bonding and repairing fibreglass |
| | components |
| | reinforced matting |
| | release agents |
| | • resins. |
| Workplace procedures | • use of FRP equipment |
| must include: | • WHS requirements to bond and repair fibreglass components. |

Unit Mapping Information

No equivalent unit.
