  - selecting and using personal protective equipment (PPE)
  - using chemical cleaning and lubricating agents
- environmental requirements, including procedures for trapping, storing and disposing of chemicals and fluids released when assembling competition vehicles
- methods of determining competition vehicle design, quality, and material, equipment and quantities from team instructions, supplementary regulations and manufacturer specifications
- procedures for analysing rules, regulations, vehicle specifications and tolerances for competitive advantage
- procedures for developing preparation schedules, including:
  - assembly and preparation processes applicable to competition vehicle
  - procedures for analysing team member capability for tasks
  - documentation procedures for preparation schedule
  - procedures for determining work area layout
- procedures for supervising vehicle preparation, including:
  - procedures for developing and monitoring assembly inspection processes

- methods of evaluating and remedying problems with work area and equipment operation.

## Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the motor sport vehicles that they have prepared, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- motor sport workplace
- one motor sport competition vehicle requiring pre-event preparation
- motor sport team with knowledge of competition vehicle pre-event preparation procedures
- tools and equipment required for the preparation of a competition vehicle.
