Assessment Requirements for AVIC4002 Administer airside driving

Release: 1

Assessment Requirements for AVIC4002 Administer airside driving

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective clothing and equipment conforming to industry and WHS/OHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self, others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- braking and safety system procedures
- cleaning requirements
- communications equipment checks
- controls, instruments and indicators and their purpose, location and use
- emergency procedures
- external features of equipment that must be checked during a pre-operational visual inspection
- fuel tank capacity and range
- functions of all supervisory indicators and controls and related checks for correct operation
- functions of ancillary systems and related checks for correct operation
- lubrication requirements
- operating controls
- operating procedures
- pre-operational checks
- principles, purpose and location of controls, monitoring devices, and systems
- procedures for adjusting controls to optimise equipment operation
- procedures for checking fluid levels and carrying out lubrication processes
- procedures for identifying equipment defects and assessing for appropriate action
- procedures for managing and controlling hazardous situations when carrying out work activities
- procedures for operating electronic communications equipment
- procedures for servicing and minor maintenance
- procedures for starting and operating ancillary systems
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- relevant sections of national and state/territory regulatory requirements and codes of practice
- relevant WHS/OHS and environmental procedures and regulations
- requirements for completing relevant documentation
- sources of information on differences in equipment and related standard operating and servicing procedures
- start-up procedures
- steps involved in planning work activities
- typical defects that can occur and related action that should be taken
- visual inspection procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
