Assessment Requirements for AVIF2019 Work in aircraft confined spaces

Release: 1

Assessment Requirements for AVIF2019 Work in aircraft confined spaces

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying safe and effective operational use of tools, equipment and personal protective equipment
- applying safe preparation, entry and exit performance and application of all appropriate procedures
- communicating effectively with others
- completing relevant documentation
- complying with organisational policies and procedures
- identifying and correctly using aircraft confined space tools and equipment
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- planning and preparing for work in an aircraft confined space
- reading, interpreting and following relevant instructions, regulations, procedures, information and signs
- reporting and/or rectifying problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and using required personal protective clothing and equipment conforming to industry and WHS/OHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self, others or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aircraft confined space management and reporting procedures
- common hazards associated with working in aircraft confined spaces
- manufacturer instructions for aircraft confined space tools and personal protective equipment
- organisational defect reporting procedures
- problems that may occur when working in an aircraft confined space, and appropriate action that should be taken in each case
- regulations, legislation, organisational policy and procedures in relation to working in aircraft confined spaces
- relevant WHS/OHS and environmental procedures and regulations
- risks that exist when working in an aircraft confined space, and related risk control procedures and precautions
- safe manual handling techniques in confined spaces
- workplace procedures for working in an aircraft confined space.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
