The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - following relevant legislation and workplace procedures
 - designing a sequence of aerobatic manoeuvres that meets a specified requirement and includes practical transitions between aerobatic manoeuvres
 - identifying performance parameters that provide go-no-go guidance for safe completion of all manoeuvres above safety height
 - completing specified sequences of manoeuvres in accordance with aerobatic design
 - achieving performance parameters required for safe completion of manoeuvres prior to commencement
 - maintaining orientation with display axis
 - managing energy potential of aircraft to ensure completion of manoeuvres and sequence of manoeuvres within aircraft structure and minimum height limits
 - recognising failure to achieve performance parameters to complete a manoeuvre, and managing aircraft to regain control above safety height
 - maintaining height at or above a specified altitude

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

EVIDENCE GUIDE

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Tasks may be undertaken in:	<ul style="list-style-type: none"> • variable weather conditions in accordance with Day Visual Flight Rules (VFR)
Performance may be demonstrated in:	<ul style="list-style-type: none"> • single engine aircraft • multi engine aircraft • variable air traffic conditions • variable flight situations • abnormal situations • classes of airspace as designated by the Civil Aviation Safety Authority
Aircraft may include:	<ul style="list-style-type: none"> • fixed wing • helicopter • other commercial or military aircraft
Crew may include:	<ul style="list-style-type: none"> • single pilot • multi crew
Instruments may include:	<ul style="list-style-type: none"> • fitted flight instruments • heads up display
Limitations may be imposed by:	<ul style="list-style-type: none"> • local noise abatement requirements and curfews • airspace endorsements
Aerobatic sequence area may include:	<ul style="list-style-type: none"> • flight training area • aerobatic box • display lines • audience lines and display axis
Specified requirements may include:	<ul style="list-style-type: none"> • stakeholders • display area • audience composition
Practical transitions may include:	<ul style="list-style-type: none"> • wingovers • modified entry and/or exit speeds
Imposed limitations may include:	<ul style="list-style-type: none"> • environmental • aircraft configuration
Dependent on the type of organisation concerned and the local terminology used, workplace procedures may be referred to as:	<ul style="list-style-type: none"> • company procedures • enterprise procedures • organisational procedures • established procedures • standard operating procedures
Information/documents may	<ul style="list-style-type: none"> • relevant sections of Civil Aviation Safety Regulations and

RANGE STATEMENT

include:

- Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- Flight Manual/Pilot's Operating Handbook (POH)
- Manual of Standards - Pilot Licensing (MOS-PL)
- Aeronautical Information Publication (AIP)
- En Route Supplement Australia (ERSA)
- relevant sections of the Civil Aviation Advisory Publications (CAAP)
- charts
- operations manuals
- approved checklists
- workplace procedures and instructions and job specification
- induction and training materials
- conditions of service, legislation and industrial agreements including workplace agreements and awards
- relevant Bureau of Meteorology, International Civil Aviation Organization (ICAO) and or World Meteorology Organization (WMO) publications

Applicable regulations and legislation may include:

- relevant Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian Standards

Performance includes tolerances specified in either of:

- relevant licence and aircraft requirements of the Civil Aviation Safety Authority (CASA) such as:
- Day VFR syllabus
- Manual of Standards
- Relevant defence documentation such as:
- Defence Orders and Instructions
- approved curricula and training documentation

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to pilot an aircraft in formation flight safely while remaining within the aircraft's structural and engine limitations and the pilot's physiological limitations during visual flight. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) and/or ADF; airspace control requirements and Day Visual Flight Rules; and aircraft control principles, regulations, safety codes, protocols and procedures required to perform formation flight in an aircraft.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted within a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is nominally packaged at Certificate IV.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1 Fly close formation | 1.1 Specified echelon formation stations are maintained during flight manoeuvres and phases
1.2 Specified line astern formation station is maintained during aircraft flight manoeuvres and phases
1.3 Balanced flight is maintained
1.4 Clear and concise radiotelephony phraseology or hand signals are utilised to ensure precise advice to formation lead and other formation aircraft |
| 2 Perform station changes | 2.1 Aircraft is manoeuvred safely to specified alternative formation stations during flight manoeuvres as per briefed sequence and/or lead's direction
2.2 Clearance with other formation aircraft is maintained
2.3 Formation lead changes are conducted as required |
| 3 Perform breakaway and rejoin | 3.1 Loss of contact with formation or any other requirement to break away is recognised
3.2 Break away from the formation is implemented
3.3 Formation is rejoined at specified stations |
| 4 Manage abnormal and emergency situations during formation flight | 4.1 Control of aircraft is maintained
4.2 Abnormal or emergency situations are managed in accordance with standard operating procedures or Flight Manual/Pilot's Operating Handbook |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- In Defence context, relevant Defence Orders and Instructions
- Relevant OH&S and environmental protection procedures and regulations
- Reference points that are used to achieve the specified left and right echelon formation positions for the aircraft being flown with respect to specified formation position
- Reference points that are used to achieve the line astern position for the aircraft being flown with respect to specified formation position
- Procedure for flying close formation
- Procedure for performing station changes
- Non-verbal signals applicable to formation operations
- Procedure to follow when visual contact is lost with the lead aircraft
- Procedures to be followed during abnormal and emergency situations
- Procedures for performing straight and turning rejoins to a formation
- Formation Standard Operating Procedures (SOPs)
- Formation radio procedures

Required skills:

- Operate the aircraft within its limitations, achieving optimum performance
- Compensate for the secondary effects of controls
- Perform formation collision avoidance turns
- Select and use relevant equipment in formation flight situations
- Use instruments to monitor aircraft performance
- Recognise relative position changes with reference to the formation
- Communicate effectively with others when performing formation flight
- Read, interpret and follow instructions, regulations, procedures and other information relevant to performing formation flight in an aircraft
- Complete documentation related to performing formation flight
- Operate electronic communication equipment to required protocol
- Work collaboratively with other when performing formation flight
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing

REQUIRED KNOWLEDGE AND SKILLS

formation flight in accordance with regulatory requirements and workplace procedures

- Implement contingency plans for unexpected events that may arise when performing formation flight
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the performance of formation flight
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self, others or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform formation flight

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - following relevant legislation and workplace procedures
 - maintaining station during echelon and line astern formations
 - ensuring precise advice to formation lead and other formation aircraft by use of clear and concise radiotelephony, phraseology or hand signals
 - manoeuvring aircraft safely to perform station changes
 - maintaining clearance from other formation aircraft
 - conducting formation lead changes
 - recognising loss of contact with formation or any other requirement to break away
 - implementing break away from formation and rejoin at specified stations
 - maintaining aircraft control
 - managing abnormal or emergency situations in accordance with standard operating procedures or Flight Manual/Pilot's Operating Handbook

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be

EVIDENCE GUIDE

conducted through appropriate written/oral tests

- Practical assessment must occur:
- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

RANGE STATEMENT

may include:

- aircraft collision
- aircraft malfunction
- bird strike

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may be referred to as:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- standard operating procedures

Information/documents may include:

- relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders pertaining to formation flight
- in Defence context, relevant Defence Orders and Instructions
- Flight Manual/Pilot's Operating Handbook (POH)
- Manual of Standards - Pilot Licensing (MOS-PL)
- Aeronautical Information Publication (AIP)
- En Route Supplement Australia (ERSA)
- relevant sections of the Civil Aviation Advisory Publications (CAAP)
- charts
- operations manuals
- approved checklists
- workplace procedures and instructions and job specification
- induction and training materials
- conditions of service, legislation and industrial agreements including workplace agreements and awards
- relevant Bureau of Meteorology, International Civil Aviation Organization (ICAO) and/or World Meteorology Organization (WMO) publications

Applicable regulations and legislation may include:

- relevant Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian Standards

Performance includes tolerances specified in either of:

- relevant licence and aircraft requirements of the Civil Aviation Safety Authority (CASA) such as:
 - Day VFR syllabus
 - Manual of Standards
- Relevant defence documentation such as:

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan a formation flight	<p>1.1 Formation flight tasking requirements are identified</p> <p>1.2 Crews, briefing venue, timing and aircraft availability are coordinated</p> <p>1.3 Task is analysed to determine manoeuvres and formations that ensure safe outcome</p> <p>1.4 Flight route is planned to achieve formation outcomes in the time available and within performance capabilities of the flight</p> <p>1.5 All air traffic, area limitations and navigation requirements are complied with</p> <p>1.6 Actions in the event of abnormal or emergency situations involving the formation are planned</p>
2 Brief and de-brief formation pilots	<p>2.1 Ground and flight manoeuvres are briefed and confirmed with formation crews</p> <p>2.2 Timings, route(s), speeds and altitudes to be flown are specified</p> <p>2.3 Deputy leader responsibilities are briefed and confirmed</p> <p>2.4 Communication procedures, minimum fuel, abnormal and emergency procedures and method of return for landing are briefed and confirmed</p> <p>2.5 Achievements and any faults or errors that occurred during the formation flight are identified</p> <p>2.6 Guidance and feedback is provided to other formation members during the post-flight de-brief</p>
3 Lead a formation flight	<p>3.1 Lead aircraft is manoeuvred using controlled corrective action to ensure a stable platform for pilots flying in formation stations</p> <p>3.2 Formation is safely manoeuvred anticipating and allowing for formation size, proximity to obstructions, terrain, airspace limitations, weather conditions and air traffic, while ensuring compliance with regulatory requirements</p> <p>3.3 Formation is directed and controlled using precise standard radio phraseology, hand and other signal procedures</p> <p>3.4 Formation members' flight 'performances' and appropriate reactions to problems are monitored</p>
4 Manage abnormal and emergency situations whilst leading a formation flight	<p>4.1 Control of aircraft and formation when leading is maintained</p> <p>4.2 Abnormal or emergency situations are managed in accordance with standard operating procedures or Flight Manual/Pilot's Operating Handbook as flight leader</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- In Defence context, relevant Defence Orders and Instructions
- Relevant OH&S and environmental protection procedures and regulations
- Formation communication procedures (verbal and non-verbal)
- Air traffic, area limitations and navigation requirements for formation flight
- Planning and briefing requirements for formation flight
- Post-flight de-briefing techniques
- Formation manoeuvre safety limits considering formation size, proximity to obstructions, terrain, airspace limitations, weather conditions, air traffic and regulatory requirements
- Deputy formation leader's responsibilities
- Standard operating procedures for abnormal or emergency situations for formation flight

Required skills:

- Determine formation members possess the appropriate qualifications and currency
- Monitor formation pilots
- Recognise environmental conditions that impact the performance of the formation
- Conduct planning, briefing and de-briefing
- Communicate effectively with others when performing formation lead
- Read, interpret and follow instructions, regulations, procedures and other information relevant to performing formation lead, and prioritise workload
- Complete documentation related to performing formation lead
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing formation lead
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing formation lead in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing formation lead
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the performance of formation lead
- Monitor and anticipate operational problems and hazards and take appropriate action

REQUIRED KNOWLEDGE AND SKILLS

- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self, others or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform formation lead

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - following relevant legislation and workplace procedures
 - planning formation flight including all sub-tasks and actions in the event of abnormal or emergency situations
 - briefing and de-briefing formation pilots including all sub-tasks and deputy leader responsibilities
 - manoeuvring lead aircraft using controlled corrective action to ensure a stable platform for formation stations
 - manoeuvring formation safely by anticipating and allowing for all aspects of formation flying including compliance with regulatory requirements
 - controlling and directing formation using precise standard radio phraseology, hand and other signal procedures
 - monitoring formation members' flight 'performances' and appropriate reactions to problems
 - maintaining control and formation while leading aircraft
 - managing as flight leader abnormal or emergency situations in accordance with standard operating procedures or Flight Manual/Pilot's Operating Handbook

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

EVIDENCE GUIDE

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
- through activities in an appropriately simulated environment at the registered training organisation, and/or
- in an appropriate range of situations in the workplace

AVIY4066A Control aircraft in advanced flight manoeuvres

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to recognise and recover from abnormal attitude and fully developed spins while remaining within the aircraft's structural and engine limitations and the pilot's physiological limitations during visual flight. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) and/or ADF; airspace control requirements and Day Visual Flight Rules; and aircraft control principles, regulations, safety codes, protocols and procedures required to control an aircraft in advanced abnormal flight manoeuvres.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted within a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is nominally packaged at Certificate IV.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Recognise and recover from abnormal aircraft attitudes	1.1 Abnormal aircraft attitude is recognised 1.2 Abnormal aircraft attitude recovery procedures are conducted in accordance with Flight Manual/Pilot's Operating Handbook 1.3 Aircraft controllability checks are performed as required
2 Recover from an induced fully developed aircraft spin	2.1 Aircraft spin entry is induced 2.2 Aircraft fully developed spin is established and recognised 2.3 Direction of aircraft rotation is identified 2.4 Aircraft spin recover procedures are performed in accordance with Flight Manual/Pilot's Operating Handbook

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- In Defence context, relevant Defence Orders and Instructions
- Relevant OH&S and environmental protection procedures and regulations
- Procedures and requirements for performing pre-manoeuve checks
- Primary, secondary and tertiary effects of controls
- Types of abnormal aircraft attitudes
- Procedures and requirements for aircraft controllability checks
- Aerodynamic principles for entry into and exit from a fully developed spin and spiral dive
- Techniques to initiate and recover from abnormal aircraft attitudes, fully developed spin and spiral dive
- Physiological effects applicable to maximum performance flight
- Difference between a spin and a spiral dive
- Aircraft limitations for the type of aircraft flown including environmental factors
- Regulatory requirements applicable to performing advanced abnormal aircraft flight manoeuvre
- Pre-manoeuve checks

Required skills:

- Operate the aircraft within its limitations, achieving optimum performance
- Perform pre-manoeuve checks
- Maintain lookout using a systematic scan technique
- Compensate for the secondary and tertiary effects of controls
- Identify symptoms of fully developed spin and spiral dive
- Select and use relevant equipment in advanced abnormal aircraft flight situations
- Use instruments to monitor aircraft performance
- Communicate effectively with others when performing advanced abnormal aircraft flight manoeuvres
- Read, interpret and follow instructions, regulations, procedures and other information relevant to performing advanced abnormal aircraft flight manoeuvres
- Complete documentation related to performing advanced abnormal aircraft flight manoeuvres
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing advanced abnormal aircraft flight

REQUIRED KNOWLEDGE AND SKILLS

manoeuvres

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when navigating aircraft in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing advanced abnormal aircraft flight manoeuvres
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during the performance of advanced abnormal aircraft flight manoeuvres
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self, others or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform advanced abnormal aircraft flight manoeuvres

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - following relevant legislation and workplace procedures
 - recognising abnormal aircraft attitude and conduct recovery procedures in accordance with Flight Manual/Pilot's Operating Handbook
 - performing aircraft spin recovery procedures in accordance with Flight Manual/Pilot's Operating Handbook

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

- relevant Bureau of Meteorology, International Civil Aviation Organization (ICAO) and/or World Meteorology Organization (WMO) publications

Applicable regulations and legislation may include:

- relevant Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian Standards

Performance includes tolerances specified in either of:

- relevant licence and aircraft requirements of the Civil Aviation Safety Authority (CASA) such as:
 - Day VFR syllabus
 - Manual of Standards
- Relevant Defence documentation such as:
 - Defence Orders and Instructions
 - approved curricula and training documentation

Competency Field Y - Aircraft Operation and Traffic Management

AVIY5020A Conduct full instrument panel manoeuvres

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to perform all normal flight manoeuvres and recover from unusual attitudes using the full instrument panel under IMC. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures required to control an aircraft solely by reference to the full instrument panel as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Determine and monitor serviceability of flight instruments and instrument power sources	<p>1.1 Serviceability of flight instrument, pitot/static system and instrument power sources is determined before flight</p> <p>1.2 Functional checks of turn, heading and attitude indicators are performed while taxiing</p> <p>1.3 Flight instrument and instrument power source are monitored and any warnings, unserviceabilities or erroneous indications are reacted to appropriately</p>
2 Perform manoeuvres using full instrument panel	<p>2.1 Flight instrument indications are interpreted and reacted to appropriately in the time available to achieve and maintain specified flight profiles using full instrument panel</p> <p>2.2 Power and attitude are set and maintained by reference to the full instrument panel to achieve straight and level performance during normal cruise</p> <p>2.3 Power and attitude are set and maintained by reference to the full instrument panel to achieve straight and level performance in an aircraft approach configuration</p> <p>2.4 Power and attitude are set and maintained by reference to the full instrument panel to achieve nominated climb performance</p> <p>2.5 Power and attitude are set and maintained by reference to the full instrument panel to achieve nominated descent performance</p> <p>2.6 Power, attitude and bank during climb, descent and straight and level flight are set and maintained by reference to the full instrument panel to achieve rate one turns onto a nominated heading</p> <p>2.7 Aircraft is balanced</p> <p>2.8 Aircraft is trimmed</p> <p>2.9 Aircraft is levelled at a nominated altitude, from climb or descent during straight or turning flight</p>
3 Perform steep turns	<p>3.1 Power, attitude and bank are set to maintain level flight by reference to full instrument panel that achieves a steep turn</p> <p>3.2 Nominated angle of bank is maintained</p> <p>3.3 Turn is exited onto a nominated heading</p> <p>3.4 Aircraft is balanced</p>
4 Recover from unusual attitudes	<p>4.1 Unusual attitude is identified</p> <p>4.2 Controlled flight is resumed by reference to flight instruments using a full instrument panel</p> <p>4.3 Straight and level attitude is achieved without excessive oscillations at the horizon</p> <p>4.4 Aircraft is recovered to above LSALT</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- Relevant OH&S and environmental procedures and regulations
- Principles of aerodynamics
- Operation of the flight instruments and pitot/static system
- Flight instrument performance tolerances for IMC flights
- Functions and effects of all aircraft controls
- The function and limitations of flight instruments
- Pitot, airframe and carburettor icing and prevention/removal procedures
- Instrument failure warning flags and indications
- The physiological factors which may affect pilots during instrument flight
- The attitude and power requirements for respective conditions of flight
- Meteorological conditions impacting flight in IMC
- Instrument scan techniques
- Hazards that exist when controlling an aircraft by reference to the full instrument panel and related hazard control procedures and precaution
- Problems that may occur when controlling an aircraft by reference to the full instrument panel and action that should be taken in each case

Required skills:

- Perform manoeuvres and procedures solely by use of the full instrument panel
- Use instrument scan techniques applicable to the condition of flight
- Compensate for the secondary effects of controls
- Maintain orientation under simulated instrument flight conditions
- Control the aircraft by reference to the artificial horizon and gyro compass
- Maintain compliance with regulatory requirements
- Communicate effectively with others when controlling an aircraft by reference to full instrument panel
- Read and interpret instructions, regulations, procedures and other information relevant to controlling an aircraft by reference to full instrument panel
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to controlling an aircraft by reference to full instrument panel
- Operate electronic communication equipment to required protocol

REQUIRED KNOWLEDGE AND SKILLS

- Work collaboratively with others when controlling an aircraft by reference to full instrument panel
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when controlling an aircraft by reference to full instrument panel in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when controlling an aircraft by reference to full instrument panel
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when controlling an aircraft by reference to full instrument panel
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to when controlling an aircraft by reference to full instrument panel

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|-------------------------------------|---|
| Tasks may be undertaken in: | <ul style="list-style-type: none"> • IMC • VMC with simulated IMC conditions |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • single engine aircraft • multi engine aircraft • synthetic training device approved by the appropriate authority • variable air traffic conditions • variable weather conditions • variable flight situations • abnormal situations • classes of airspace as designated by the Civil Aviation Safety Authority |
| Aircraft may include: | <ul style="list-style-type: none"> • fixed wing • helicopter • other commercial or military aircraft |
| Crew may include: | <ul style="list-style-type: none"> • single pilot • multi crew |
| Instruments may be: | <ul style="list-style-type: none"> • flight instruments suitable for instrument flight • head up display suitable for instrument flight |
| Limitations may be imposed by: | <ul style="list-style-type: none"> • local noise abatement requirements and curfews • airspace endorsements |
| Classes of airspace may be: | <ul style="list-style-type: none"> • as designated by the regulator • restricted and danger areas • military control zones • Air Defence Identification Zones |

| Nominated descent may include: | <ul style="list-style-type: none"> • continual at a defined rate • standard-rate |
| Unusual attitudes may include | <ul style="list-style-type: none"> • nose high and low • varying angles of bank and power settings |

RANGE STATEMENT

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:

- unbalanced flight
- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- standard operating procedures

Information/documents may include:

- relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- Flight Manual/Pilot's Operating Handbook (POH)
- Manual of Standards - Pilot Licensing (MOS-PL)
- Aeronautical Information Publication (AIP)
- En Route Supplement Australia (ERSA)
- charts
- operations manuals
- approved checklists
- workplace procedures and instructions and job specification
- induction and training materials
- conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable regulations and legislation may include:

- relevant Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian Standards

Performance includes tolerances specified in either of:

- relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) such as:
- Manual of Standards
- relevant Defence documentation such as:
- Defence Orders and Instructions
- approved curricula and training documentation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Recognise failure of attitude indicator and/or stabilised heading indicator	<p>1.1 Flight instruments and instrument power sources are monitored</p> <p>1.2 Warning indicators or erroneous instrument indications are recognised</p> <p>1.3 Transitions to instrument flight by reference to limited panel flight instruments are established</p>
2 Perform manoeuvres using limited instrument panel	<p>2.1 Flight instrument indications are interpreted and reacted to, to achieve specified flight profiles using limited instrument panel</p> <p>2.2 Power and attitude are set and maintained by reference to the limited instrument panel to achieve straight and level performance during normal cruise</p> <p>2.3 Power and attitude are set and maintained by reference to the limited instrument panel to achieve straight and level performance in an aircraft approach configuration within nominated speed limits</p> <p>2.4 Power and attitude are set and maintained by reference to the limited instrument panel to achieve nominated climb performance</p> <p>2.5 Power and attitude are set and maintained by reference to the limited instrument panel to achieve nominated descent performance</p> <p>2.6 Power, attitude and bank during climb, descent and straight and level flight are set and maintained by reference to the limited instrument panel to achieve a rate one turn onto a nominated heading</p> <p>2.7 Aircraft is balanced</p> <p>2.8 Aircraft is trimmed</p> <p>2.9 Aircraft is levelled at a nominated altitude during a straight or turning flight whilst in a climb or descent</p>
3 Recover from unusual attitudes using limited flight instrument panel	<p>3.1 Unusual attitude is identified</p> <p>3.2 Controlled flight is resumed by reference to flight instruments using a limited instrument panel</p> <p>3.3 Straight and level attitude is achieved without excessive oscillations at the horizon</p> <p>3.4 Aircraft is recovered to above LSALT</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- In Defence context, relevant Defence Orders and Instructions
- Relevant OH&S and environmental procedures and regulations
- Principles of aerodynamics
- Operation of the flight instruments, power requirements and failure indications
- Functions and effects of all aircraft controls
- The need for flying using the limited instrument panel
- The function and limitations of limited panel flight instruments
- The interpretation of the limited panel instrument indications
- The physiological factors which may affect pilots during instrument flight
- Limited panel instrument scan techniques
- Hazards that exist when controlling an aircraft by reference to the limited instrument panel and related hazard control procedures and precaution
- Problems that may occur when controlling an aircraft by reference to the limited instrument panel and appropriate action that should be taken in each case

Required skills:

- Perform manoeuvres and procedures solely by use of the limited instrument panel
- Use instrument scan techniques applicable to the condition of flight
- Anticipate and allow for normal adverse physiological reaction to limited panel flight
- Maintain orientation in simulated instrument flight conditions
- Use limited instruments to monitor aircraft performance
- Achieve compliance with regulatory requirements
- Communicate effectively with others when controlling an aircraft by reference to the limited instrument panel
- Read and interpret instructions, regulations, procedures and other information relevant to controlling an aircraft by reference to the limited instrument panel
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to limited instrument panel manoeuvres
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when controlling an aircraft by reference to the limited instrument panel

REQUIRED KNOWLEDGE AND SKILLS

- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when controlling an aircraft by reference to the limited instrument panel in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when controlling an aircraft by reference to the limited instrument panel
- Apply precautions and required action to minimise, control or eliminate hazards that may exist while controlling an aircraft by reference to the limited instrument panel
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to control an aircraft by reference to the limited instrument panel

Competency field

Competency Field Y - Aircraft Operation and Traffic Management

AVIY5022B Manage traffic flow

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to work as part of a team and to conduct traffic sequencing and regulate traffic flow. This includes providing major delaying actions and minor flow adjustments to achieve the necessary spacing and order, and responding to changing conditions. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

This unit has application for air traffic control operators. In addition to separating airspace users, a safe, efficient and regular traffic flow is required to enable the effective use of aerodrome terminal facilities such as runways and taxiways.

Work must be carried out in compliance with the relevant air traffic services regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Work is performed under various levels of supervision dependent on workplace context, and in a team environment.

Traffic flow is managed using automated systems or by manual determination. If automated systems are used, human reasoning should be applied to ensure safety and the most suitable flow of traffic particularly in times of adverse weather and/or emergency and abnormal flight operations.

The controller must demonstrate an ability to establish traffic sequences, regulate traffic flow, and regulate workload in situations involving medium to high levels of traffic volume and complexity, and in adverse weather.

This unit of competency is packaged at Diploma level.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish traffic sequence	<p>1.1 Traffic order is established in accordance with runway mode and airspace configuration</p> <p>1.2 Automated and/or manually determined traffic sequence is observed and monitored and adjustments to traffic flow are made accordingly</p> <p>1.3 Traffic flow is adjusted in accordance with standard operating procedure when airways facilities are reduced and/or systems are in degraded mode</p> <p>1.4 Scan is maintained in area of jurisdiction at a rate determined by environmental factors</p>
2 Provide major delaying actions	<p>2.1 Aircraft are held in published holding patterns in accordance with standard operating procedure</p> <p>2.2 Aircraft are held outside published holding patterns in accordance with standard operating procedure</p> <p>2.3 Air traffic clearances are withheld or instructions are imposed to achieve the necessary delay</p> <p>2.4 Limits are imposed on air traffic clearances when necessary</p> <p>2.5 Major delaying actions are cancelled or relaxed when able and instructions are issued for onwards flight</p>
3 Provide minor flow adjustments	<p>3.1 Aircraft speeds are varied in accordance with standard operating procedure and control techniques to achieve the necessary traffic flow</p> <p>3.2 Aircraft route, track and/or heading is adjusted in accordance with standard operating procedure and control techniques to achieve the necessary traffic flow</p> <p>3.3 Conditions are imposed on air traffic clearances when necessary</p> <p>3.4 Minor flow adjustments are cancelled or relaxed when able</p>
4 Regulate traffic flow	<p>4.1 Instructions issued to regulate traffic flow always maintain safety</p> <p>4.2 Acceptable traffic flow for the given situation is achieved</p>
5 Respond to changing conditions	<p>5.1 Action in response to changing conditions always maintains safety</p> <p>5.2 Action to respond to changing conditions is completed in a satisfactory timeframe</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations
- Relevant OH&S and environmental procedures and regulations
- Principles of air traffic control
- Aircraft holding patterns published on charts and maps including sector entries
- Non-published aircraft holding techniques
- Air traffic clearances to hold, delay, limit and continue flight
- Methods used to adjust route, track, heading and speed of aircraft
- Conditional air traffic clearance
- Aircraft sequencing and spacing techniques and practices
- Techniques to adjust the flow of aircraft traffic during reduced facilities or when using degraded systems
- Aircraft performance characteristics and considerations while holding; varying the routing, tracking and heading of aircraft; and considerations while varying the speed of aircraft during climb, cruise and descent
- Airspace and route structures for holding and flow including feeder fixes
- Peak capacity for runway configurations including landing and departure rates; slot allocation; and factors affecting capacity including capped rates
- Systems and tools used for air traffic flow management including the Central Traffic Management System, Maestro and slot allocation
- Roles and responsibilities for managing the air traffic flow
- Aerodrome runway combinations and traffic requirements
- Capacity modelling for arriving traffic only, and arriving and departing traffic
- Airspace, route structures and procedures used to assist strategic air traffic flow management
- Sector/traffic hot spots
- Area of radar coverage
- Airspace geography and topography
- Classification and special use airspace
- Weather forecasting and aerodrome weather observations
- Relevant sections of the air traffic services procedures manual and local instructions
- Safety hazards and risks that exist when managing air traffic and related risk control procedures and precautions
- Problems that may occur when managing air traffic and appropriate action that should be taken in each case

REQUIRED KNOWLEDGE AND SKILLS

Required skills:

- Communicate effectively with others when managing traffic flow
- Actively listen when managing traffic flow
- Read and interpret instructions, regulations, procedures and other information relevant to managing traffic flow
- Interpret and follow operational instructions and prioritise work
- Perceive incoming information associated with strategic, tactical, geographic, spatial, system and environment components of a complex system
- Comprehend incoming information and develop the current airspace and flight path model
- Complete documentation related to managing traffic flow
- Provide leadership and work collaboratively with others when managing traffic flow
- Communicate in a team by exchanging information through assigning responsibility, acknowledgment, inquiring, and by recognising and noting facts that create team rapport and enhance team outputs
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when managing traffic flow in accordance with regulatory requirements and workplace procedures
- Demonstrate temperament reflecting a calm, composed and cooperative characteristic and emotional response under challenging situations
- Make decisions related to the prioritising of tasks and the projection of and planning for traffic and environmental events
- Conduct aeronautical decision making
- Project and develop future airspace and flight path scenarios
- Maintain a strategic traffic management goal for the jurisdiction airspace
- Adhere to procedures through a series of steps followed in a regular definite order or a traditional or established way of doing things when this is required
- Implement contingency plans for unexpected events that may arise when managing traffic flow
- Judge and form an opinion or evaluate situations by discerning and comparing information
- React to some form of treatment or stressful situation by a considered and measured response in a timely fashion
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when managing traffic flow
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self or others, or

REQUIRED KNOWLEDGE AND SKILLS

damage to goods or equipment

- Adapt to differences in equipment, systems and operating environment in accordance with standard operating procedures
- Be receptive to training for the skills, knowledge, or experiences acquired or gained over a career
- Implement OH&S procedures and relevant regulations
- Interpret airspace charts, maps and approach to land procedures associated with aircraft holding and flow procedures
- Formulate and issue onwards airways clearances, conditional clearances and clearance limits
- Maintain surveillance of airspaces and scanning techniques at the Human-machine Interface (HMI)
- Adjust the routing and tracking of aircraft
- Vary the heading of aircraft
- Vary the speed of aircraft and related speed control data
- Conduct the holding of aircraft and onwards processing
- Identify and use system tools and information to facilitate flow management
- Carry out runway mode change and consequent flow management
- Advise aircraft of delays by issuing set course time, stack departure time, estimated approach time and/or estimated time of landing
- Be confident but not complacent or reliant on automation and technology, and readily apply human reasoning to airspace and flight path scenarios
- Allocate attention according to demand and constantly switch between: managing the Human-machine Interface or equipment use; managing communications; and managing traffic

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|---|---|
| Operations may be conducted: | <ul style="list-style-type: none"> • by day or night • in variable weather conditions |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • simulated situations • an operational air traffic control workplace |
| Air Traffic Flow Management (ATFM) is established: | <ul style="list-style-type: none"> • to support ATC in ensuring an optimum flow of air traffic to, from, through or within defined areas during times when demand or expected demand exceeds the capacity of the system. Managing the traffic flow in this unit of competency is part of a control service and is not a discrete ATFM service |
| Systems and tools include: | <ul style="list-style-type: none"> • Maestro flow management system • Central Traffic Management System (CTMS) • slot allocation system • capped capacity • capacity modelling and international benchmarking • en route airspace design, feeder fixes and terminal area route structure • airline - ATS agreed capacity as a key performance indicator |

Y - Aircraft Operation and Traffic Management

AVIY5023A Operate multi-engine fixed wing aeroplane

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to carry out take-off and departure procedures as pilot-in-command of a multi-engine aeroplane during visual, instrument and night conditions in normal, abnormal and emergency situations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); and/or ADF, airspace control requirements and VFR, Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures required when operating a multi-engine fixed wing aeroplane.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit is nominally packaged at Certificate V.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate a multi-engine aeroplane in all phases of flight	<p>1.1 Normal operations of multi-engine aeroplane type on the ground and in flight are conducted in accordance with the aeroplane Flight Manual, Pilot's Operating Handbook (POH) and company operating procedures</p> <p>1.2 Asymmetric operations for all phases of flight are anticipated and contingencies are planned</p> <p>1.3 A plan of action is self-briefed or briefed to crew members that will ensure the safest outcome in the event of asymmetric operations</p>
2 Manage engine failure /malfunction in flight	<p>2.1 (In simulated conditions) Maintain and/or re-gain control of aeroplane</p> <p>2.2 Failed/malfunctioning engine is identified and confirmed</p> <p>2.3 Power set on serviceable engine/s and aeroplane configuration is adjusted to achieve desired aeroplane performance</p> <p>2.4 Failed/malfunctioning engine is managed in accordance with the aeroplane Flight Manual, Pilot's Operating Handbook (POH) and company operating procedures</p> <p>2.5 Indicated airspeed is maintained above V_{MCA}</p> <p>2.6 ATC or another agency capable of assistance are advised of situation and intentions</p> <p>2.7 Recovery to aerodrome is evaluated and conducted in accordance with the aeroplane Flight Manual, Pilot's Operating Handbook (POH) and company operating procedures</p>
3 Manage engine failure/malfunction after take-off	<p>3.1 (In simulated conditions) Engine failure/malfunction is managed in accordance with the aeroplane Flight Manual, Pilot's Operating Handbook (POH) and company operating procedures after take-off while heading is maintained</p> <p>3.2 Initial climb not less than best engine out angle of climb speed (V_x) or best engine out rate of climb speed (V_y) until clear of obstacles, then V_y is maintained</p> <p>3.3 Recovery to aerodrome is evaluated and conducted in accordance with the aeroplane Flight Manual, Pilot's Operating Handbook (POH) and company operating procedures</p>
4 Perform rejected take-off	<p>4.1 Take-off is aborted prior to V_1 or at a point during the take-off where the abort procedure can be initiated and the aeroplane stopped on the remaining runway/stopway</p> <p>4.2 Power is reduced smoothly and promptly</p> <p>4.3 Spoilers, prop fine/reverse, thrust reverse, wheel brakes and other drag and braking devices are activated</p> <p>4.4 Positive control is maintained to bring the aeroplane to a safe</p>

ELEMENT	PERFORMANCE CRITERIA
	stop
	4.5 Engine failure procedures and/or checklists are initiated and completed
5 Manage engine failure /malfunction during approach/landing	<p>5.1 (In simulated conditions) Control of aeroplane is maintained</p> <p>5.2 Engine inoperative approach is performed in accordance with the aeroplane Flight Manual, Pilot's Operating Handbook (POH) and company operating procedures</p> <p>5.3 Decision is made to continue or abort approach/landing</p> <p>5.4 Decision height for landing is nominated</p> <p>5.5 ATS or other agencies capable of providing assistance are advised of situation and intentions</p> <p>5.6 Flight profile is flown from which a controlled landing could be achieved</p>
6 Conduct go-around or missed approach with engine failure	<p>6.1 (In simulated conditions) Engine failure in a multi-engine aeroplane during a go-around or missed approach is identified and confirmed</p> <p>6.2 Control of aeroplane is maintained</p> <p>6.3 Engine inoperative go-around is performed from decision height in accordance with aeroplane Flight Manual, Pilot's Operating Handbook (POH) and company operating procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Airspeed limitations including: V_{NO} , V_A , V_X and V_Y , V_{NE} , V_{FE} , V_{LO} , V_{LE} , V_{LO2} (landing gear operations down), maximum crosswind, turbulence penetration speed and maximum load factor
- Emergency airspeeds including: V_{MCA} , V_{SSE} , engine(s) inoperative climb, approach and final speed, emergency descent and best glide range speeds
- Emergency procedures for: engine failure after take-off, engine fire on the ground and airborne, engine failure in the cruise, waste gate failure (if applicable) and propeller/turbine over-speed
- Safety implications of asymmetric flight below V_{MCA}
- Power, flight and configuration requirements that apply to V_{MCA}
- Methods of regaining control of an aeroplane with a failed engine that is flying at a speed less than V_{MCA}
- Conditions that would increase V_I
- Performance the aeroplane can achieve after reaching V_Y or V_2 during asymmetric flight
- Markings on the airspeed indicator that apply to failed engine operations
- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- In ADF context, relevant Defence Orders and Instructions
- Relevant OH&S procedures and regulations
- Normal and crosswind take-off/landing procedures: climb, cruise, descent procedures including, airspeeds, configurations, method of drift allowance, setting of flight instruments and non-normal/emergency procedures
- Technique and procedures used during engine failure on take-off, the appropriate reference airspeeds, and the specific pilot actions required
- Technique and procedure for carrying out a rejected take-off after a engine/system(s) failure/warnings, including related safety factors
- Technique and procedures used to conduct a go-around or missed approach during engine failure on take-off, the appropriate reference airspeeds, and the specific pilot actions required

Required skills:

- Calculate accelerate/stop distance
- Calculate V_I for any specified take-off conditions
- Calculate initial rate of climb and climb gradient for one engine inoperative after take-off
- Calculate fuel flow and true airspeed with one engine inoperative
- Determine if the range of the aeroplane increases or decreases following an engine failure

REQUIRED KNOWLEDGE AND SKILLS

- Calculate PNR and ETP/CP for one engine inoperative with maximum fuel
- Extract, calculate and apply all performance information applicable to the aeroplane
- Identify, and manage emergency and abnormal situations while maintaining control of the aeroplane, in accordance with Flight Manual/POH
- Identify the critical engine
- Control and manage the aeroplane during flight with failed engine(s), in accordance with Flight Manual/POH
- Maintain compliance with relevant regulatory requirements
- Set priorities and manage workload to ensure safe task completion in the time available
- Apply relevant air safety practices and regulations
- Communicate effectively with others when operating a multi-engine fixed wing aeroplane
- Read and interpret instructions, regulations, procedures and other information relevant to operating a multi-engine fixed wing aeroplane
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to operating a multi-engine fixed wing aeroplane
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a multi-engine fixed wing aeroplane
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when operating a multi-engine fixed wing aeroplane in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when operating a multi-engine fixed wing aeroplane
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when operating a multi-engine fixed wing aeroplane
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to operate a multi-engine fixed wing aeroplane

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Tasks may be undertaken in:	<ul style="list-style-type: none"> • VMC • IMC • VMC with simulated IMC conditions
Performance may be demonstrated in:	<ul style="list-style-type: none"> • multi-engine aeroplane • multi-engine synthetic training device approved by appropriate authority • variable air traffic conditions • variable weather conditions • variable flight situations • abnormal situations • classes of airspace as designated by the Civil Aviation Safety Authority
Crew may include:	<ul style="list-style-type: none"> • single pilot • multi crew
Instruments may be:	<ul style="list-style-type: none"> • fitted flight instruments • head up display
Limitations may be imposed by:	<ul style="list-style-type: none"> • local noise abatement requirements and curfews • airspace endorsements
Classes of airspace may be:	<ul style="list-style-type: none"> • as designated by the regulator • restricted and danger areas • military control zones • Air Defence Identification Zones
Conditions may include:	<ul style="list-style-type: none"> • a method of simulating IMC • simulated icing conditions • moderate turbulence • simulated hazardous weather • Autopilot/Flight Director • FMS/ other NAV system • simulation of emergency and abnormal procedures
Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:	<ul style="list-style-type: none"> • company procedures • enterprise procedures • organisational procedures • established procedures • standard operating procedures
Information/documents may	<ul style="list-style-type: none"> • relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders

RANGE STATEMENT

include:

- in ADF context, relevant Defence Orders and Instructions
- Manual of Standards - Pilot Licensing (MOS-PL)
- Flight Manual/ Pilot's Operating Handbook (POH)
- Aeronautical Information Publication (AIP)
- relevant sections of the Civil Aviation Advisory Publications (CAAP)
- performance charts
- operations manuals
- approved checklists
- workplace procedures and instructions and job specification
- induction and training materials
- conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable regulations and legislation may include:

- relevant Civil Aviation Safety Regulations and Civil Aviation Orders
- in ADF context, relevant Defence Orders and Instructions
- relevant state/territory OH&S legislation
- relevant Australian Standards

Performance includes tolerances specified in either of:

- relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) such as:
 - Day VFR Syllabus
 - Manual of Standards
- relevant Defence documentation such as:
 - Defence Orders and Instructions
 - approved curricula and training documentation

AVIY5024A Operate aircraft in the traffic pattern at night

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to take off, land and operate an aircraft safely in the traffic pattern at night. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Night Visual Flight Rules (NVFR); and aircraft control principles, regulations, safety codes, protocols and procedures required to operate aircraft in the traffic pattern at night as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Licensing/Regulatory Information

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Taxi at night	1.1 Instrument/cockpit lighting are adjusted to an appropriate level for taxiing 1.2 ATC instructions and manoeuvres of the aircraft on the ground at night within the approved movement area as defined by aerodrome ground lighting are complied with 1.3 Aircraft lighting to identify obstructions, other aircraft and taxiway and runway limits is used as required 1.4 Aircraft is taxied at a speed which allows for an adequate lookout to be maintained to avoid obstructions
2 Take off at night	2.1 Aircraft is lined up correctly in centre of runway in take-off direction 2.2 Line up checks appropriate to night take-off are completed 2.3 Take-off by reference to flare path/runway lighting and aircraft instruments is executed 2.4 Aircraft is rotated at manufacturers recommended speed 2.5 Climb attitude and control aircraft in climb, after take-off solely by reference to instruments is completed 2.6 Alignment with runway by visual reference and lookout is established and maintained 2.7 After take-off, checks are performed at a safe height
3 Land at night, with and without the use of aircraft landing lights	3.1 Circuit entry and pattern are performed with reference to runway environment 3.2 Safe altitude is maintain by reference to aircraft instruments and runway lighting 3.3 Aircraft is safely landed at night with and without landing lights 3.4 After landing checks are performed
4 Make go-around	4.1 The need to conduct a go-around is recognised 4.2 Go-around is performed from any point on base and final approach legs
5 Activate Pilot Activated Lighting (PAL)	5.1 Appropriate radiotelephone frequency is utilised to activate PAL system when within radio range 5.2 Transmit sequence is utilised to activate PAL system 5.3 Wind indicator lighting is monitored to determine end of activation period
6 Manage emergency situations at night	6.1 (In simulated conditions) Aircraft control is maintained 6.2 Emergency situation is managed in accordance with Flight Manual, POH and AIP 6.3 Electrical lighting and power sources are monitored

ELEMENT

PERFORMANCE CRITERIA

6.4 Electrical lighting and power source emergency procedures are conducted as appropriate

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Night circuit procedures
- Light signals used in the circuit area at night
- Colours and patterns of aerodrome lighting
- Method of activating an aerodrome frequency response unit with PAL options
- Time that PAL remains illuminated
- PAL system warning indications that the lights are about to be extinguished
- Operation and use of a VASI, PAPI system
- Identification of aerodromes with standby power
- Electrical system management as recommended in the applicable Flight Manual/POH
- Procedures for operating electronic communications equipment
- Requirements for completing relevant documentation
- Fuel tank capacity and range (where applicable)
- Communication equipment checks

Required skills:

- Utilise secondary lighting and power sources
- Utilise fault finding for system failures
- Communicate effectively with others when operating an aircraft in the traffic pattern at night
- Read and interpret instructions, regulations, procedures and other information relevant to operating an aircraft in the traffic pattern at night
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to operating an aircraft in the traffic pattern at night
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating an aircraft in the traffic pattern at night
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when operating an aircraft in the traffic pattern at night in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when operating an aircraft in the traffic pattern at night
- Apply precautions and required action to minimise, control or eliminate hazards that may exist

REQUIRED KNOWLEDGE AND SKILLS

while operating an aircraft in the traffic pattern at night

- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required while operating an aircraft in the traffic pattern at night

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1 Prepare for IMC arrival | 1.1 Applicable aerodrome weather, airfield conditions and traffic information is obtained and applied
1.2 Descent/approach checks and briefings are completed
1.3 Approach and landing configurations are established appropriate for the runway and meteorological condition |
| 2 Conduct IMC arrival to instrument approach point | 2.1 Ground track is maintained to ensure that the subsequent instrument approach or traffic pattern can be flown, taking into account any obstructions and Air Traffic Control (ATC) instructions
2.2 Obstacle clearance minima are maintained IAW AIP and/or ATC instructions
2.3 Existing wind conditions are verified making corrections for drift to maintain a precise ground track
2.4 Stabilised approach is maintained with the specified airspeed and rate of descent tolerances
2.5 Approach point intercepted IAW AIP requirements for commencing selected instrument approach |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Instrument arrival procedures and limitations
- Pilot's responsibilities during instrument arrival
- Instrument approach procedure or visual approach at end of an instrument arrival
- Instrument arrival radio procedures
- Loss of radio communication during an instrument arrival
- Procedures for abnormal operations and/or emergencies during an instrument arrival, including navigation aid failure

Required skills:

- Communicate effectively with others when performing an instrument arrival
- Read and interpret instructions, regulations, procedures and other information relevant to performing an instrument arrival
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to performing an instrument arrival
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing an instrument arrival
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing an instrument arrival in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing an instrument arrival
- Apply precautions and required action to minimise, control or eliminate hazards that may exist while performing an instrument arrival
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards

REQUIRED KNOWLEDGE AND SKILLS

- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform an instrument arrival

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1 Prepare for IMC arrival | 1.1 Applicable aerodrome weather, airfield conditions and traffic information is obtained and applied
1.2 Descent/approach checks and briefs are completed
1.3 Approach and landing configurations are established appropriate for the runway and meteorological condition |
| 2 Conduct IMC arrival using a STAR | 2.1 Current chart for the STAR to be flown is selected and navigation systems are configured
2.2 Approach applicable to the runway being used for the landing is correctly executed
2.3 Aircraft is correctly manoeuvred from an inbound route, to a fix at or near the destination aerodrome, using navigation aids and transition to an approach as instructed by Air Traffic Control (ATC)
2.4 Obstacle clearance minima are maintained IAW AIP and/or ATC instructions
2.5 Aircraft is manoeuvred within the tolerance specified in AIP
2.6 ATC instructions amending STAR procedure are correctly implemented |

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Methodologies for input, monitoring and amendment of FMS/NAV system data
- STAR procedures and limitations
- Pilot's responsibilities when STAR clearance is given or cancelled
- Instrument approach procedure or visual approach at end of STAR
- STAR radio procedures
- Loss of radio communication during STAR
- Procedures for abnormal operations and/or emergencies during STAR, including navigation aid failure

Required skills:

- Interpret STAR charts
- Manipulate FMS /NAV system data
- Adjust for deviation in aircraft vertical profile
- Communicate effectively with others when performing STAR
- Read and interpret instructions, regulations, procedures and other information relevant to performing STAR
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to performing STAR
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing STAR
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing STAR in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing STAR
- Apply precautions and required action to minimise, control or eliminate hazards that may exist while performing STAR
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self, or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard

REQUIRED KNOWLEDGE AND SKILLS

operating procedures

- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform STAR

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Competency field

Competency Field Y - Aircraft Operation and Traffic Management

AVIY5027A Perform instrument departure - non published procedure

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to plan and conduct a departure from an aerodrome without a published instrument departure procedure, i.e. non Standard Instrument Departure (SID) or Standard Radar Departure (SRD). It covers intercepting track within 5 nm, while maintaining obstacle clearance during climb to Lowest Safe Altitude (LSALT). This includes managing traffic separation using the radiotelephone in Instrument Meteorological Conditions (IMC)/simulated IMC under the Instrument Flight Rules (IFR). Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures relevant to performing an instrument departure - non published procedure as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Determine applicable standards for an instrument departure (non SID/SRD)	<p>1.1 Standard take-off minima is determined in accordance with the aerodrome using Aeronautical Information Publication (AIP)</p> <p>1.2 Departure is planned to ensure the aircraft can maintain obstacle and terrain clearance after take-off and during the climb to LSALT</p> <p>1.3 Ceiling minima is increased and/or track is planned to ensure terrain clearance is maintained when required</p>
2 Take off and climb to cruising altitude/level under the IFR (non SID/SRD)	<p>2.1 Appropriate checklist items are completed and confirmed to ensure the aircraft systems applicable to the instrument take-off are operating correctly</p> <p>2.2 Radios, navigation aids and flight instruments are set to the desired setting prior to initiating the take-off</p> <p>2.3 Track, altitude requirements and emergency procedures are reviewed and briefed for an instrument departure</p> <p>2.4 Climb to cruising altitude/level after take-off is achieved</p> <p>2.5 Obstacle and terrain clearance is maintained below LSALT while intercept track is maintained within 5 nm of the departure aerodrome</p> <p>2.6 Transitions from visual meteorological conditions to actual or simulated instrument meteorological conditions are performed without loss of control of the aircraft</p> <p>2.7 Radio transmissions are performed in accordance with AIP requirements</p> <p>2.8 Separation from other traffic is maintained</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Take-off minima for single or multi engine aircraft at aerodromes without suitable instrument departure procedures
- Obstacle and terrain clearance requirements after take-off and during the climb to LSALT
- Conditions required to effect a take-off with no meteorological forecast
- Departure procedure for a non-published instrument departure
- Transponder code requirements for the flight
- Requirement for establishing aircraft on departure track
- Content and timing of airborne and departure reports
- Pilot's responsibility in an IFR visual departure
- Procedures for loss of radio communication
- Procedures for abnormal operations and/or emergencies

Required skills:

- Calculate standard take-off minima
- Communicate effectively with others whilst performing a non published instrument departure
- Read, interpret and comply with instructions, regulations, procedures and other information relevant to performing a non published instrument departure
- Interpret and follow operational instructions and prioritise workload
- Complete documentation related to a non published instrument departure
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing a non published instrument departure
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing a non published instrument departure in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing a non published instrument departure
- Apply precautions and required action to minimise, control or eliminate hazards that may exist while performing a non published instrument departure
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments

REQUIRED KNOWLEDGE AND SKILLS

- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform a non published instrument departure

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

AVIY5028A Perform instrument departure - published procedures (SID/SRD)

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to perform an instrument departure using a published procedure. This includes determining the applicable take-off ceiling and visibility minima, calculating and maintaining the obstacle clearance limits for climb during flight to Lowest Safe Altitude (LSALT) while on climb to cruising altitude/level; and complying with published Standard Instrument Departure (SID) or Standard Radar Departure (SRD), graphic depiction or narrative requirements in Instrument Meteorological Conditions (IMC)/simulated IMC under Instrument Flight Rules (IFR). Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures relevant to perform instrument departure using published procedures (SID/SRD) as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Determine applicable standards for an instrument departure using published procedures	<ul style="list-style-type: none">1.1 Standard take-off minima is determined for the aerodrome in accordance with Aeronautical Information Publication (AIP)1.2 Plan is developed to ensure obstacle clearance requirements for the take-off area1.3 Aircraft performance is calculated to ensure minimum design climb gradient of the SID or SRD and any additional specified gradients can be achieved
2 Take off and climb to cruising level using published procedures	<ul style="list-style-type: none">2.1 Appropriate checklist items are completed and confirmed to ensure the aircraft systems applicable to the instrument take-off are operating correctly2.2 Radios, navigation aids/systems and flight instruments are set to the desired setting prior to initiating the take-off2.3 Track, altitude requirements and emergency procedures for an SID or SRD are reviewed and briefed2.4 Climb to cruising altitude/level after take-off is achieved from standard take-off ceiling2.5 Obstacle and terrain clearance is maintained while below LSALT/MSA to intercept track in accordance with SID or SRD requirements2.6 Transitions from visual meteorological conditions to actual or simulated instrument meteorological conditions are performed without loss of control of the aircraft2.7 Radio transmissions are performed in accordance with AIP requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Take-off minima for single and twin engine aircraft for aerodromes with a relevant instrument approach procedures
- Conditions required to effect a take-off with no meteorological forecast
- SID and SRD procedures and limitations
- SID and SRD tracking and performance requirements, and flight parameters assumed of the aircraft
- Pilot's responsibilities if SID or SRD tracking and performance requirements cannot be met
- Pilot's responsibilities when SID or SRD clearance is given or cancelled
- Radio reports requirements to be made in an SID or SRD
- Procedures for loss of radio communication during SID or SRD
- Procedures for abnormal operations and/or emergencies during SID, including navigation aid failure

Required skills:

- Interpret a SID or SRD chart
- Calculate standard take-off minima
- Communicate effectively whilst performing a published instrument departure
- Read and interpret instructions, regulations, procedures and other information relevant to a published instrument departure
- Interpret and follow operational instructions and prioritise workload
- Complete documentation related to a published instrument departure
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing a published instrument departure
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing a published instrument departure in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing a published instrument departure
- Apply precautions and required action to minimise, control or eliminate hazards that may exist while performing a published instrument departure
- Monitor and anticipate operational problems and hazards and take appropriate action

REQUIRED KNOWLEDGE AND SKILLS

- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform a published instrument departure

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- Tasks may be undertaken in:
- IMC
 - VMC with simulated IMC conditions
- Performance may be demonstrated in:
- single engine aircraft
 - multi engine aircraft
 - synthetic training device approved by the appropriate authority
 - variable air traffic conditions
 - variable weather conditions
 - variable flight situations
 - abnormal situations
 - classes of airspace as designated by the Civil Aviation Safety Authority
- Aircraft may include:
- fixed wing
 - helicopter
 - other commercial or military aircraft
- Crew may include:
- single pilot
 - multi crew
- Instruments may be:
- flight instruments suitable for instrument flight
 - head up display suitable for instrument flight
- Limitations may be imposed by:
- local noise abatement requirements and curfews
 - airspace endorsements
- Classes of airspace may be:
- as designated by the regulator
 - restricted and danger areas
 - military control zones
 - Air Defence Identification Zones
- Navigation aids may include:
- ADF (Automatic Direction Finder)
 - VOR (VHF Omni-directional Radio Range)
 - DME (Distance Measuring Equipment)
 - RADAR
 - GPS (Global Positioning System)
 - FMS (Flight Management Systems)
 - Moving Map Displays
 - TACAN
 - INS
- Conditions may include:
- a method of simulating IMC
 - simulated icing conditions

RANGE STATEMENT

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:	<ul style="list-style-type: none"> • moderate turbulence • simulated hazardous weather • Autopilot/Flight Director • FMS/ other NAV system • simulation of emergency and abnormal procedures • company procedures • enterprise procedures • organisational procedures • established procedures • standard operating procedures

AVIY5033A Perform visual circling approach

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to perform a visual circling approach. This includes determining the visual circling minima for the specified instrument approach, flying the circling approach, and conducting a missed approach. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures required to perform visual circling approach as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Determine minima applicable for visual circling for specified instrument approach	<p>1.1 Determine the requirement to conduct a circling approach in accordance with AIP</p> <p>1.2 Ceiling and visibility minima are determined for a circling approach appropriate for the instrument approach procedure and category of aircraft being used, in accordance with applicable instrument approach charts</p>
2 Conduct visual circling procedure following instrument approach, using appropriate visual cues	<p>2.1 Circling procedures are planned and briefed in relation to the position of the runway relative to the aircraft as it will appear to the pilot when approaching minima</p> <p>2.2 Circling approach is conducted in accordance with AIP</p> <p>2.3 Aircraft is controlled and maintained within altitude limitations by reference to instruments</p> <p>2.4 Aircraft position is controlled and maintained using visual cues</p> <p>2.5 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain</p>
3 Conduct missed approach from visual circling	<p>3.1 Conditions requiring a missed approach are recognised and missed approach is initiated</p> <p>3.2 Aircraft is manoeuvred to Missed Approach Point (MAPt) and a missed approach procedure is conducted in accordance with the applicable instrument approach chart</p> <p>3.3 Obstacle clearance in IMC/simulated IMC is maintained</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Conditions under which a circling approach must be discontinued and a missed approach initiated
- Procedure to conduct a missed approach from any nominated point within a circling area on a specified approach
- State when an aircraft may descend below the MDA (day and night)
- Briefing requirements for circling approach
- Requirements for completing relevant documentation
- Code of practice for working collaboratively with others
- Procedures for adjusting controls to optimise the operation of the equipment
- Procedures to be followed in the event of an emergency
- Relevant sections of national and state or territory regulatory requirements and codes of practice
- Relevant OH&S and environmental procedures and regulations

Required skills:

- Interpret instrument approach charts
- Calculate ceiling and visibility minima for a circling approach
- Determine obstacle clearance requirements in the circling area
- Perform systematic scan techniques
- Determine the circling area applicable to the aircraft performance category being flown
- Communicate effectively with others when performing visual circling approach
- Read and interpret instructions, regulations, procedures and other information relevant to a visual circling approach
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to performing visual circling approach
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing visual circling approach
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing visual circling approach in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing visual circling approach

REQUIRED KNOWLEDGE AND SKILLS

- Apply precautions and required action to minimise, control or eliminate hazards that may exist during visual circling approach
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform visual circling approach

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Competency Field Y - Aircraft Operation and Traffic Management

AVIY5034A Perform non-directional beacon (NDB) instrument approach

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to conduct an instrument approach using the NDB approach procedure. This includes a descent from a route Minimum Safe Altitude (MSA) or Lowest Safe Altitude (LSALT) in accordance with altitude restrictions on a prescribed track to the Minimum Descent Altitude (MDA) applicable to the aircraft category, and conducting a published missed approach. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures relevant to perform non-directional beacon (NDB) instrument approach as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select approach and determine applicable minima	<p>1.1 Current Instrument Approach and Landing (IAL) chart for the NDB approach to be flown is selected</p> <p>1.2 IAL is reviewed and briefed in relation to directing entry to the approach; maintaining LSALT or MSA prior to entry approach; maintaining tracks, distances, timing and descent limitations for the approach</p> <p>1.3 Fuel availability and latest divert time procedures are enacted if required</p>
2 Monitor aid signal integrity	<p>2.1 NDB to be used for the selected approach is tuned and identified</p> <p>2.2 Morse code identification and NDB indications are monitored throughout the approach to ensure signal integrity</p>
3 Conduct initial approach	<p>3.1 Altimeter is set to appropriate QNH</p> <p>3.2 Inbound track at or above route MSA or LSALT is maintained in accordance with AIP, using the NDB</p>
4 Conduct holding pattern	<p>4.1 Holding pattern at or above LSALT or MSA is entered in accordance with the specified sector entry</p> <p>4.2 Holding pattern is performed in accordance with AIP, using the NDB</p>
5 Conduct instrument approach procedure	<p>5.1 Instrument approach is conducted in accordance with tolerances specified in AIP, using the NDB</p> <p>5.2 Landing runway is identified</p> <p>5.3 After establishing visual reference, a visual circling or runway approach is conducted for a landing on the selected runway, in accordance with AIP</p>
6 Conduct missed approach procedure	<p>6.1 Conditions requiring a missed approach are recognised and missed approach is initiated</p> <p>6.2 Aircraft is manoeuvred to Missed Approach Point (MAPt)</p> <p>6.3 Missed approach procedure is conducted in accordance with the IAL chart</p> <p>6.4 Obstacle clearance in IMC/simulated IMC is maintained</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- NDB instrument approach procedures and limitations
- Sector entry join procedures for entering the holding pattern of the NDB approach
- Tracking tolerance and altitude limitations for flying the published DME arc of the NDB approach procedure
- Procedure for joining the circuit from a NDB approach procedure
- Minimum obstacle clearance criteria during a NDB approach procedure/missed approach procedure
- Missed approach procedure for an NDB approach
- Radio procedures during a NDB approach
- Loss of radio communication during a NDB approach procedure
- Abnormal operations and/or emergencies procedures during a NDB approach, including navigation aid failure
- Operating electronic communications equipment
- Requirements for completing relevant documentation
- Code of practice for working collaboratively with others
- Steps involved in planning the work activities
- Procedures for adjusting controls to optimise the operation of the equipment
- Procedures to be followed in the event of an emergency
- Relevant sections of national and state or territory regulatory requirements and codes of practice
- Relevant OH&S and environmental procedures and regulations
- Procedures for managing and controlling hazardous situations when carrying out work activities
- Sources of information on differences in equipment and related standard operating and servicing procedures

Required skills:

- Interpret NDB instrument approach procedure chart
- Determine NDB approach procedure applicable minima for aircraft
- Determine conditions permitting descent below minima
- Perform systematic scan techniques
- Communicate effectively with others when performing NDB instrument approach
- Read and interpret instructions, regulations, procedures and other information relevant to NDB

REQUIRED KNOWLEDGE AND SKILLS

instrument approach

- Interpret and follow operational instructions and prioritise workload
- Complete documentation related to NDB instrument approach
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing NDB instrument approach
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing NDB instrument approach in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing NDB instrument approach
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when performing NDB instrument approach
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform a NDB instrument approach

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|-------------------------------------|---|

RANGE STATEMENT

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:

- simulation of emergency and abnormal procedures
- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- standard operating procedures

Information/documents may include:

- relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- Flight Manual/Pilot's Operating Handbook (POH)
- Manual of Standards - Pilot Licensing (MOS-PL)
- Aeronautical Information Publication (AIP)
- En Route Supplement Australia (ERSA)
- charts
- operations manuals
- approved checklists
- workplace procedures and instructions and job specification
- induction and training materials
- conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable regulations and legislation may include:

- relevant Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian Standards

Performance includes tolerances specified in either of:

- relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) such as:
- Manual of Standards
- relevant Defence documentation such as:
- Defence Orders and Instructions
- approved curricula and training documentation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select approach and determine applicable minima	<p>1.1 Instrument Approach and Landing (IAL) chart for the VHF omni-directional radio range (VOR) approach to be flown is selected</p> <p>1.2 IAL chart is reviewed and briefed in relation to directing entry to the approach; maintaining minimum altitude (LSALT or MSA) prior to approach entry; maintaining tracks, distances, timing and descent limitation for the approach</p> <p>1.3 Fuel availability and latest divert time procedures are enacted if required</p>
2 Monitor aid signal integrity	<p>2.1 VOR to be used for the selected approach is tuned and identified</p> <p>2.2 Warning flags and Course Deviation Indicators (CDI) indications are monitored throughout the approach to ensure signal integrity</p>
3 Conduct initial approach	<p>3.1 Altimeter is set to the appropriate QNH</p> <p>3.2 Inbound track at or above route MSA or LSALT is maintained in accordance with AIP, using the VOR</p>
4 Conduct holding pattern	<p>4.1 Holding pattern at or above LSALT or MSA is entered in accordance with the specified sector entry</p> <p>4.2 Holding pattern is performed in accordance with AIP, using the VOR</p>
5 Conduct instrument approach procedure	<p>5.1 Instrument approach is conducted in accordance with tolerances specified in AIP, using the VOR</p> <p>5.2 Landing runway is identified</p> <p>5.3 After establishing visual reference, a visual circling or runway approach is conducted for a landing on the selected runway, in accordance with AIP</p>
6 Conduct missed approach procedure	<p>6.1 Conditions requiring a missed approach are recognised and missed approach is initiated</p> <p>6.2 Aircraft is manoeuvred to Missed Approach Point (MAPt)</p> <p>6.3 Missed approach procedure is conducted in accordance with the IAL chart</p> <p>6.4 Obstacle clearance in IMC/simulated IMC is maintained</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- VOR or VOR/DME instrument approach procedures and limitations
- Sector entry join procedures for entering the holding pattern of the VOR or VOR/DME approach
- Tracking tolerance and altitude limitations for flying the published DME arc of the VOR or VOR/DME approach procedure
- Procedure for joining the circuit from a VOR or VOR/DME approach procedure
- Minimum obstacle clearance criteria during a VOR or VOR/DME approach procedure/missed approach procedure
- Missed approach procedure for an VOR or VOR/DME approach
- Radio procedures during a VOR or VOR/DME approach
- Loss of radio communication during a VOR or VOR/DME approach procedure
- Abnormal operations and/or emergencies procedures during a VOR or VOR/DME approach, including navigation aid failure
- Explain which navigation aid provides track guidance for a LLZ approach
- Explain what the full scale range on the CDI for a LLZ is
- Explain how to configure the CDI to achieve command guidance prior to conducting a back course LLZ
- Steps involved in planning the work activities
- Procedures for adjusting controls to optimise the operation of the equipment
- Procedures to be followed in the event of an emergency
- Relevant sections of national and state or territory regulatory requirements and codes of practice
- Relevant OH&S and environmental procedures and regulations
- Procedures for managing and controlling hazardous situations when carrying out work activities
- Sources of information on differences in equipment and related standard operating and servicing procedures

Required skills:

- Interpret VOR or VOR/DME instrument approach procedure chart
- Determine VOR or VOR/DME approach procedure applicable minima for aircraft
- Determine conditions permitting descent below minima
- Perform systematic scan techniques

REQUIRED KNOWLEDGE AND SKILLS

- Configure the CDI to achieve command guidance prior to conducting a back course LLZ
- Communicate effectively with others when performing a VOR or VOR/DME instrument approach
- Read and interpret instructions, regulations, procedures and other information relevant to a VOR or VOR/DME instrument approach
- Interpret and follow operational instructions and prioritise workload
- Complete documentation related to a VOR or VOR/DME instrument approach
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing a VOR or VOR/DME instrument approach
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing a VOR or VOR/DME instrument approach in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing a VOR or VOR/DME instrument approach
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during a VOR or VOR/DME instrument approach
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform a VOR or VOR/DME instrument approach

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

AVIY5036A Perform instrument landing system (ILS) instrument approach

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to conduct an instrument approach using the ILS approach procedure. This includes beginning with a descent from a route Minimum Safe Altitude (MSA) or Lowest Safe Altitude (LSALT) in accordance with any altitude restrictions; intercepting track on the Localizer (LLZ) using locating/marker beacons or Distance Measuring Equipment (DME/GPS); fixing a position on the LLZ track; descending by reference to the Glideslope (GS) to the Decision Altitude (DA); landing or conducting a published missed approach. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures required to perform instrument landing system (ILS) instrument approach as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select and prepare for the approach	<p>1.1 The current Instrument Approach and Landing (IAL) chart for the Instrument Landing System (ILS) approach to be flown is selected</p> <p>1.2 The instrument approach and missed approach procedure is planned</p> <p>1.3 Direct entry to the approach is reviewed, briefed and evaluated</p> <p>1.4 Entry via holding pattern is reviewed, briefed and evaluated</p> <p>1.5 Minimum altitude, LSALT or MSA prior to approach entry is reviewed and briefed in relation to tracks, distances, timing and descent limitations</p> <p>1.6 The applicable approach minima for the aircraft performance category and runway to be used is selected</p> <p>1.7 Pressure error correction to DA is selected</p> <p>1.8 The holding or diversion action if visual reference is not established is reviewed and briefed</p> <p>1.9 Fuel availability and latest divert time is selected if required</p> <p>1.10 Aircraft systems are configured for approach</p> <p>1.11 Altimeter is set to appropriate QNH</p>
2 Monitor aid signal integrity	<p>2.1 The ILS to be used for the selected approach is tuned and identified</p> <p>2.2 The warning flags and Course Deviation Indicators (CDI) for both LLZ and glide slope throughout the approach is monitored to ensure signal integrity</p> <p>2.3 Locator beacons for the approach are tuned and identified</p> <p>2.4 Marker beacon/s are tested and monitored for visual and aural indications during approach</p> <p>2.5 DME is tuned and identified or GPS configured for ILS approach if applicable</p> <p>2.6 DME/GPS is monitored for distance indications during applicable approach</p>
3 Conduct holding pattern	<p>3.1 Holding pattern at or above LSALT or MSA is entered in accordance with the specified sector entry</p> <p>3.2 Holding pattern is performed in accordance with instructions in AIP, using the LLZ and any other navigation aids</p> <p>3.3 Holding fix is identified</p>
4 Conduct approach procedure	<p>4.1 Aircraft is tracked to the initial approach fix using appropriate tracking aids or radar vectors at or above route MSA or LSALT to intercept the LLZ track</p> <p>4.2 ILS approach is conducted from the initial approach fix with</p>

ELEMENT

PERFORMANCE CRITERIA

- tracking by reference to the LLZ and descent by reference to the glidepath
- 4.3 Marker beacons, DME/GPS or approved alternative fix are used to provide distance indications
- 4.4 At least one specified altitude check on glide slope is performed
- 4.5 Continued descent on glide slope to the DA is performed in accordance AIP
- 4.6 Landing runway is identified
- 4.7 Runway or circling approach for a landing is conducted in accordance with AIP after visual reference is established
- 5 Conduct missed approach procedure**
- 5.1 Conditions requiring a missed approach are recognised and missed approach is initiated
- 5.2 Aircraft is manoeuvred to Missed Approach Point (MAPt)
- 5.3 Missed approach procedure is conducted in accordance with the IAL chart
- 5.4 Obstacle clearance in IMC/simulated IMC is maintained

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- ILS instrument approach procedures and limitations, including the minimum system components required to conduct an approach
- Sector entry join procedures for entering the holding pattern of the ILS approach
- Tracking tolerance and altitude limitations for flying the published DME arc of the ILS approach procedure
- Procedure for joining the circuit from an ILS approach
- Missed approach procedures for an ILS approach
- Radio procedures during a ILS approach
- Loss of radio communication during a ILS approach procedure
- Abnormal operations and/or emergencies procedures during a ILS approach, including navigation aid failure
- Principles of operation of a GPS
- Limitations, errors, warnings and messages of a GPS
- Requirements applicable to pilots and equipment for GPS operations
- Steps involved in planning the work activities
- Procedures for adjusting controls to optimise the operation of the equipment
- Procedures to be followed in the event of an emergency
- Relevant sections of national and state or territory regulatory requirements and codes of practice
- Relevant OH&S and environmental procedures and regulations
- Procedures for managing and controlling hazardous situations when carrying out work activities
- Sources of information on differences in equipment and related standard operating and servicing procedures

Required skills:

- Interpret ILS instrument approach procedure chart
- Determine ILS approach procedure applicable minima for aircraft
- Determine conditions permitting descent below minima
- Perform systematic scan techniques
- Communicate effectively with others when performing ILS instrument approach
- Read and interpret instructions, regulations, procedures and other information relevant to an ILS instrument approach

REQUIRED KNOWLEDGE AND SKILLS

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to performing ILS instrument approach
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing ILS instrument approach
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing ILS instrument approaches in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing ILS instrument approach
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during an ILS instrument approach
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform an ILS instrument approach

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to conduct a DME or GPS Arrival procedure from the Lowest Safe Altitude (LSALT), within a specified sector or on a specified track. This includes descending not below the distance/altitude descent steps specified for the procedure to the Minimum Descent Altitude (MDA) applicable to the aircraft category; conducting a published missed approach if visual reference is not achieved by the Missed Approach Point (MAPt); using Non-directional Beacon (NDB) or VHF Omni-directional Radio Range (VOR) for tracking and DME or GPS to provide distance indications. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures relevant to perform distance measuring equipment (DME)/global positioning system (GPS) Arrival as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Licensing/Regulatory Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select and prepare for approach	<p>1.1 The current Instrument Approach and Landing (IAL) chart for the DME/GPS approach to be flown is selected</p> <p>1.2 The instrument approach and missed approach procedure is planned</p> <p>1.3 MDA is determined</p> <p>1.4 Sector entry to the approach and holding pattern is selected, reviewed and briefed as appropriate</p> <p>1.5 Minimum altitude, LSALT or Minimum Safe Altitude (MSA) prior to approach entry is reviewed and briefed in relation to tracks, distances and descent limitations</p> <p>1.6 The applicable approach minima for the aircraft performance category and runway to be used is selected</p> <p>1.7 The holding or diversion action if visual reference is not established is reviewed and briefed</p> <p>1.8 Fuel availability and latest divert time is selected if required</p> <p>1.9 Altimeter is set to appropriate QNH</p>
2 Use appropriate tracking aid and distance information and monitor aid signal integrity	<p>2.1 DME is tuned and identified</p> <p>2.2 The reference Way-point (WPT) for GPS to be used for tracking inbound is selected</p> <p>2.3 The distance indication is checked</p> <p>2.4 Approach aid is monitored throughout the approach to ensure signal integrity</p> <p>2.5 DME or GPS is used to provide distance indications for descent via the distance/altitude steps of the approach</p> <p>2.6 Availability of receiver autonomous integrity monitoring (RAIM) is ensured before descending below LSALT or MSA</p>
3 Conduct approach procedure	<p>3.1 Initial approach is conducted not below the specified limiting altitude for the distance/altitude descent steps</p> <p>3.2 Arrival procedure is conducted while descending on the specified track or sector in accordance with AIP</p> <p>3.3 Landing runway is identified</p> <p>3.4 Runway or circling approach for a landing is conducted after visual reference is established</p>
4 Conduct missed approach procedure	<p>4.1 Conditions requiring a missed approach are recognised and missed approach is initiated</p> <p>4.2 Aircraft is manoeuvred to Missed Approach Point (MAPt)</p> <p>4.3 Missed approach procedure is conducted in accordance with the IAL chart</p> <p>4.4 Obstacle clearance in IMC/simulated IMC is maintained</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- DME or GPS Arrival procedures and limitations in all classes of airspace
- Pilot's responsibilities when DME or GPS Arrival is conducted outside controlled airspace
- Conditions and limitations for manoeuvring within a DME or GPS Arrival sector
- Procedure for joining the circuit from a DME or GPS Arrival
- DME or GPS Arrival missed approach
- Minimum obstacle clearance criteria during a DME or GPS Arrival missed approach procedure
- Radio procedures during a DME or GPS Arrival
- Loss of radio communication during a DME or GPS Arrival procedure
- Abnormal operations and/or emergencies during a DME or GPS Arrival, including navigation aid failure, loss of GPS RAIM, GPS RAIM warning, and disparity between VOR/NDB track and GPS track indication
- Operation of electronic communications equipment
- Requirements for completing relevant documentation
- Code of practice for working collaboratively with others
- Steps involved in planning the work activities
- Procedures for adjusting controls to optimise the operation of the equipment
- Procedures to be followed in the event of an emergency
- Relevant sections of national and state or territory regulatory requirements and codes of practice
- Relevant OH&S and environmental procedures and regulations
- Procedures for managing and controlling hazardous situations when carrying out work activities
- Sources of information on differences in equipment and related standard operating and servicing procedures

Required skills:

- Interpret a DME or GPS Arrival chart
- Determine DME or GPS Arrival applicable minima for aircraft
- Determine conditions permitting descent below minima
- Perform systematic scan techniques
- Communicate effectively with others when performing a DME/GPS Arrival
- Read and interpret instructions, regulations, procedures and other information relevant to a

REQUIRED KNOWLEDGE AND SKILLS

DME/GPS Arrival

- Interpret and follow operational instructions and prioritise workload
- Complete documentation related to a DME/GPS Arrival
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing a DME/GPS Arrival
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing a DME/GPS Arrival in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing a DME/GPS Arrival
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during a DME/GPS Arrival
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform a DME/GPS Arrival

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

AVIY5038A Perform global positioning system (GPS)/non-precision approach (NPA)

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to conduct a GPS/NPA instrument approach from route Lowest Safe Altitude (LSALT). This includes entering the GPS/NPA approach procedure in compliance with any altitude restrictions; tracking via the specified approach Way-point (WPT), descending in accordance with specified altitude limitations to a straight in or circling Minimum Descent Altitude (MDA), and performing a straight-in or circling approach or conducting a published missed approach if visual reference is not established by the Missed Approach Point (MAPt), using the GPS. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA); relevant airspace control requirements and Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures required to perform global positioning system (GPS)/non-precision approach (NPA) as part of commercial aircraft activities.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is packaged at AQF V.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Select approach and determine applicable minima	<p>1.1 The current Instrument Approach and Landing (IAL) chart for the GPS/NPA approach to be flown is selected</p> <p>1.2 The entry to and conduct of the instrument approach and missed approach procedure is reviewed and briefed</p> <p>1.3 The currency of the GPS receiver database is confirmed</p> <p>1.4 The applicable meteorological minima of the approach for the aircraft performance category is determined</p> <p>1.5 Fuel availability and holding or diversion action if visual reference is not established is reviewed and briefed</p>
2 Select, retrieve and activate approach from database	<p>2.1 GPS approach for the appropriate runway from the GPS receiver navigation database is selected</p> <p>2.2 Initial approach fix to be used to transition of the approach procedure is selected</p> <p>2.3 Aerodrome altimeter subscale setting to obtain elevation or altitude (QNH) in the GPS receiver is entered, and approach is activated</p> <p>2.4 Confidence check of tracks and distances between the approach Way-point (WPT) as calculated by the GPS receiver is performed</p> <p>2.5 Course Deviation Indicators (CDI) are checked and selected to GPS as applicable</p>
3 Monitor GPS signal integrity	<p>3.1 Receiver autonomous integrity monitoring (RAIM) is checked for availability on the approach</p> <p>3.2 RAIM indications are monitored throughout the approach</p>
4 Conduct initial approach	<p>4.1 Altimeter is set to appropriate QNH</p> <p>4.2 Track to the initial approach WPT is maintained at or above route MSA or LSALT</p>
5 Conduct holding pattern	<p>5.1 Automatic sequencing of the GPS is suspended</p> <p>5.2 Published holding pattern is conducted at the appropriate initial approach WPT using the prescribed sector entry procedure</p> <p>5.3 Automatic sequencing is resumed to continue the approach</p>
6 Conduct approach procedure	<p>6.1 GPS/NPA instrument approach is conducted while descending on the specified track to each approach WPT</p> <p>6.2 Approach altitude restrictions are complied with</p> <p>6.3 GPS receiver transitions to approach mode is confirmed no later than the Final Approach Point (FAP), WPT or discontinue approach</p> <p>6.4 Secondary navigation aid is utilised to maintain situational awareness</p>

ELEMENT

PERFORMANCE CRITERIA

7 Conduct missed approach procedure

- 6.5 Descent to not below the MDA while tracking to the missed approach point is conducted within tolerances
- 6.6 Landing runway is identified
- 6.7 Runway or circling approach for a landing is conducted after visual reference is established
- 7.1 Conditions requiring a missed approach are recognised and missed approach is initiated
- 7.2 Published missed approach procedure is executed if visual reference is not established before reaching the MAPt or RAIM
- 7.3 A missed approach is conducted on any other event specified in AIP or GPS operations manual
- 7.4 Aircraft is manoeuvred to Missed Approach Point (MAPt)
- 7.5 Missed approach mode is selected
- 7.6 Missed approach procedure is conducted in accordance with the IAL chart
- 7.7 GPS receiver is configured to conduct another approach or to hold or divert as required
- 7.8 Obstacle clearance in IMC/simulated IMC is maintained

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Explain GPS/NPA instrument approach procedure chart
- GPS system fundamentals and principles of operations
- Requirements applicable to pilots and equipment for GPS operations
- Cause and magnitude of typical GPS errors
- Human factors limitations associated with the use of GPS equipment
- Operating procedures which provide safeguards against GPS navigational errors
- GNSS operating procedures for navigation tasks
- GNSS operational and serviceability checks
- GPS warnings and messages
- Tracking tolerances, automatic Way-point sequencing, CDI sensitivity and RAIM availability parameters for entry, RAIM availability and approach segments
- Mode of operation required during each segment of a GPS/NPA
- Conditions required to transition to and operate in that mode of operation for the GPS/NPA, and the associated CDI sensitivity and RAIM protection provided
- Parameters applicable to RAIM warnings in the en route, terminal and approach modes
- Effects of availability or otherwise of baro-aiding on RAIM availability and prediction
- Effects of satellite unserviceability on the reliability of each type of prediction
- Effect of each type of RAIM prediction on operational requirements
- Prediction limitations that apply to availability of approach RAIM at the destination or alternate aerodrome
- Operational requirements which apply to planning a flight on the basis of conducting a RNAV (GNSS) procedure at the destination
- Factors that adversely affect the conduct of a GPS/NPA, and suitable pilot procedures to minimise such effects
- Operating procedures for GNSS equipment which reduce or eliminate errors
- Operating electronic communications equipment
- Requirements for completing relevant documentation
- Code of practice for working collaboratively with others
- Steps involved in planning the work activities
- Procedures for adjusting controls to optimise the operation of the equipment
- Procedures to be followed in the event of an emergency
- Relevant sections of national and state or territory regulatory requirements and codes of practice

REQUIRED KNOWLEDGE AND SKILLS

- Relevant OH&S and environmental procedures and regulations
- Procedures for managing and controlling hazardous situations when carrying out work activities
- Sources of information on differences in equipment and related standard operating and servicing procedures

Required skills:

- Interpret GPS/NPA instrument approach procedure chart
- Determine GPS/NPA approach procedure applicable minima for aircraft
- Determine conditions permitting descent below minima
- Perform systematic scan techniques
- Apply GNSS operating procedures to typical navigation tasks
- Predict RAIM availability at destination and ETA using aircraft GNSS receiver and, if available, an external RAIM prediction service
- Predict availability of approach RAIM at the destination or alternate aerodrome
- Communicate effectively with others when performing a GPS/NPA
- Read and interpret instructions, regulations, procedures and other information relevant to a GPS/NPA
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to a GPS/NPA
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when performing a GPS/NPA
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when performing a GPS/NPA in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when performing a GPS/NPA
- Apply precautions and required action to minimise, control or eliminate hazards that may exist during a GPS/NPA
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective clothing and equipment conforming to industry and

REQUIRED KNOWLEDGE AND SKILLS

OH&S standards

- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to perform a GPS/NPA

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

RANGE STATEMENT

Conditions may include:

- a method of simulating IMC
- simulated icing conditions
- moderate turbulence
- simulated hazardous weather
- Autopilot/Flight Director
- FMS/ other NAV system
- simulation of emergency and abnormal procedures

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- standard operating procedures

Information/documents may include:

- relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- Flight Manual/Pilot's Operating Handbook (POH)
- Manual of Standards - Pilot Licensing (MOS-PL)
- Aeronautical Information Publication (AIP)
- En Route Supplement Australia (ERSA)
- charts
- operations manuals
- approved checklists
- workplace procedures and instructions and job specification
- induction and training materials
- conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable regulations and legislation may include:

- relevant Civil Aviation Safety Regulations and Civil Aviation Orders
- in Defence context, relevant Defence Orders and Instructions
- relevant state/territory OH&S legislation
- relevant state/territory environmental protection legislation
- relevant Australian Standards

Performance includes tolerances specified in either of:

- relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) such as:
- Manual of Standards
- relevant Defence documentation such as:
- Defence Orders and Instructions
- approved curricula and training documentation

Unit Descriptor

Unit Descriptor

This unit provides the knowledge and an inventory of skills to provide air traffic control in airspaces within terminal areas. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

This unit is applied to specific terminal airspaces that offer varying levels of air traffic services according to the ICAO and national classifications of airspaces. The defining features of approach control are the safe release of aircraft on departure and the safe termination of flight for landing.

Persons exercising competence in this unit will need to fulfil the licensing and regulatory requirements of the Civil Aviation Safety Authority pertaining to air traffic controllers.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Work is performed under various levels of supervision dependent on workplace context, and might be in a team environment.

Work involves applying separation standards. It assesses the controller's ability to apply the full range of separation standards or provide traffic advice in situations involving medium to high levels of traffic volume and complexity and in adverse weather conditions.

This unit of competency is packaged at Diploma level.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage terminal airspaces	<p>1.1 Traffic priorities are applied according to standard operating procedure</p> <p>1.2 Service priorities are applied according to which is most safety critical</p> <p>1.3 Control practices and procedures are adjusted with changing airspace environment factors</p> <p>1.4 Surveillance of airspaces and air routes is maintained using systematic scan technique at a rate determined by environment factors</p> <p>1.5 Standard routing is facilitated when able</p> <p>1.6 Documented instructions and agreements applicable to the area of jurisdiction are observed</p> <p>1.7 Unauthorised use of airspaces and operational deviation from control instruction and procedure are recognised and rectified</p> <p>1.8 Terrain and obstacle clearance is provided</p> <p>1.9 User-preferred altitudes or flight levels are facilitated when able</p> <p>1.10 Aircraft are authorised to use terminal airspaces</p> <p>1.11 Control services are provided according to airspace classification and status</p> <p>1.12 Airspaces are administered according to user activity</p> <p>1.13 Flight diversions are facilitated where necessary</p> <p>1.14 Runway mode agreed is suitable and efficient for traffic flow</p> <p>1.15 Aircraft release for departure is authorised in accordance with runway mode and airspace configuration</p> <p>1.16 Aircraft approach to land is authorised in accordance with runway mode and airspace configuration</p>
2 Assure separation	<p>2.1 Aircraft conflicts are recognised and resolved</p> <p>2.2 Aircraft separation is provided</p> <p>2.3 Jurisdiction for maintaining aircraft separation is agreed and assigned</p> <p>2.4 Alternative aircraft separation is provided when required</p> <p>2.5 Aircraft separation is adjusted if required when systems are degraded or airways facilities are reduced</p> <p>2.6 Aircraft separation is most appropriate taking into account safety, expedition and the method of control and surveillance</p> <p>2.7 Compromised separation is recognised and recovered and administrative actions are taken in accordance with workplace procedure</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations
- International and national air law including facilitation of international flight
- Relevant OH&S and environmental procedures and regulations
- Principles of effective air traffic control
- National operating standards, recommendations and system safety relevant to air traffic management
- National airspace system and standard route structure
- Rules of the air governing visual and instrument flight
- Principles of flight; operation and functioning of aircraft power-plants; systems and aircraft performance relevant to approach control services
- Meteorological documentation, terms and definitions, information and the origin and characteristics of weather phenomena affecting flight operations including local phenomena
- Principles and procedures of altimetry
- Principles, limitations and accuracy of air navigation; navigation systems and visual aids, including terms and definitions; and required navigation performance relevant to approach control services
- Basic time, distance and speed navigation solutions; track error, closing angles, drift and track made good
- Traffic Collision and Avoidance Systems
- Aeronautical documentation and safety practices associated with the planning and conduct of flight
- Provision of air traffic services (air traffic control, flight information service and search and rescue alerting), aeronautical information services, air traffic flow management and airspace management including terms and definitions
- Air traffic services and air traffic flow management communication phraseologies and procedures
- Security against acts of unlawful interference
- Air traffic management corporate aspiration, mission, service and culture
- Aircraft type recognition and associated wake turbulence and performance categories
- Air traffic priorities
- Airspace service priorities and the safety imperative
- Aeronautical charts and maps used in aviation
- Organisational and licensing administration
- Safety occurrence reporting and just culture in the air traffic management workplace

REQUIRED KNOWLEDGE AND SKILLS

- Jurisdiction and adjacent airspace characteristics
- Standard route structures and associated procedures, reporting, lowest safe heights, cruising levels and transfer of control points
- Flexible tracking and user-preferred routing
- Terrain and prominent landmarks affecting flight operations within terminal airspace
- Characteristics of terminal airspace air traffic patterns and traffic flows including hotspots, congestion and location of aerodromes and runways within and adjacent to jurisdiction airspace
- Goals and characteristics of military flight operations
- Prioritisation of approach control tasks to achieve the safety critical imperative
- Recovering from compromised aircraft separation and unauthorised use of airspaces
- Division of responsibilities for air traffic services and air traffic flow management between terminal airspaces and other interfacing elements
- Aircraft conflict recognition and resolution in terminal airspaces
- Provision of air traffic services and air traffic flow management during system degradation including facility failures and restoration of system components
- Approach control separation standards and techniques and wake turbulence separation
- Procedures for recording and/or annotating operational information
- Coordination of air traffic services and air traffic flow management information
- Departure and approach to land procedures and transition from instrument flight to visual flight and terrain protection
- Conditional air traffic clearance
- Adjusting route, track, heading and speed of aircraft
- Handover-takeover procedures and practices
- Human-machine Interface (HMI) states and associated interactions
- Formation flight configurations, separation and procedures and practices

Required skills:

- Communicate effectively with others when providing approach control services
- Actively listen when providing approach control services
- Perceive incoming information associated with strategic, tactical, geographic, spatial, system and environment components of a complex system
- Comprehend incoming information and develop the current airspace and flight path model
- Read and interpret instructions, regulations, procedures and other information relevant to approach control services
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to approach control services

REQUIRED KNOWLEDGE AND SKILLS

- Operate electronic communication equipment to required protocol
- Work collaboratively with others when providing approach control services
- Communicate in a team by exchanging information through assigning responsibility, acknowledgment, inquiring, and by recognising and noting facts that create team rapport and enhance team outputs
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when providing approach control services in accordance with regulatory requirements and workplace procedures
- Make decisions when providing approach control services
- Implement decisions using knowledge-based, rule-based and skill-based activities
- Demonstrate an attitude to error management that limits unintentional deviation from work practices and maintains accuracy through application of disciplined procedures and practices and a methodical work ethic
- Conduct aeronautical decision making
- Project and develop future airspace and flight path scenarios
- Maintain a strategic traffic management goal for the jurisdiction airspace
- Implement contingency plans for unexpected events that may arise when providing approach control services
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when providing approach control services
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Anticipate and prepare for work tasks
- Adhere to procedures through a series of steps followed in a regular definite order or a traditional or established way of doing things when this is required
- Modify activities dependent on differing workplace contingencies, situations and environments
- Judge and form an opinion or evaluate situations by discerning and comparing information
- React to some form of treatment or stressful situation by a considered and measured response in a timely fashion
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Be receptive to training for the skills, knowledge, or experiences acquired or gained over a career
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to provide approach control services

REQUIRED KNOWLEDGE AND SKILLS

- Separate aircraft using approach control techniques and standards
- Separate aircraft using wake turbulence standards
- Formulate and authorise the release of aircraft for departure
- Formulate and authorise the approach to land for aircraft
- Agree the runway mode with aerodrome control
- Operate sectorised terminal airspaces with discrete functions
- Facilitate unusual flight operations
- Assign separation to the pilot
- Process military aircraft
- Interpret charts, maps and operational documentation associated with planning and conduct of flight
- Facilitate in-flight diversions and/or changes of altitude and flight level
- Maintain surveillance of terminal airspaces
- Scan the Human-machine Interface (HMI)
- Formulate airways clearance and control instruction
- Adjust route and track of aircraft
- Vary heading of aircraft
- Vary speed of aircraft
- Record and annotate flight information and messages
- Interpret display information and symbology
- Coordinate flight information
- Use checklists
- Perform handover-takeover
- Plan and prioritise tasks according to the safety imperative
- Interpret and evaluate current traffic events
- Project and predict future traffic scenarios
- Execute control actions
- Apply human reasoning to airspace and flight path scenarios
- Allocate attention according to demand and constantly switch between: managing the Human-machine Interface or equipment use; managing communications; and managing traffic

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| Operations may be conducted: | <ul style="list-style-type: none"> • by day or night • in variable weather conditions |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • simulated situations, and/or • an operational air traffic control workplace |
| Conflict of air traffic: | <ul style="list-style-type: none"> • is a situation in which, in the opinion of air traffic services personnel, the distance between aircraft as well as their relative positions and speed might compromise the safety of the aircraft operations • can occur between: aircraft, aircraft and obstructions, aircraft and vehicles/pedestrians, and aircraft and airspace boundaries |
| Recognising air traffic conflict might include: | <ul style="list-style-type: none"> • maintaining situational awareness • scanning techniques • system tools for recognising conflicts • Graphic Display Tools • Flight Progress Strip (FPS) placement and manipulation and Flight Data Records (FDR) |
| System tools for recognising comprised separation may include: | <ul style="list-style-type: none"> • Short Term Conflict Alert (STCA) • Danger Area Infringement Warning (DAIW) • Minimum Safe Altitude Warning (MSAW) • Route Adherence Monitoring (RAM) • Cleared Level Adherence Monitoring (CLAM) • ADS Route Conformance Warning (ARCW) • Bearing and Range Line |
| Separation standards include: | <ul style="list-style-type: none"> • vertical separation standards (including with terrain) • reduced vertical separation standards (RVSM) • longitudinal separation standards • lateral separation standards • radar separation standards • ADS and ADS (B) standards • wake turbulence separation standards • visual separation standards • sight and follow standard • runway separation standards • emergency separation standards (vertical) |
| Alternative methods of resolving | <ul style="list-style-type: none"> • pilot responsibility for separation |

RANGE STATEMENT

conflicts might include:

- adjusting route, track, heading or speed of aircraft
- delaying clearances, including clearance to enter particular classifications of airspace
- conditional clearances, requirements and limits
- use of recommended headings under RADAR outside controlled airspace
- refusing requests from pilots and/or other controllers
- passing traffic information

Compromised separation might include:

- situations where less than the applicable separation minima occurs between: aircraft; an aircraft and a hazard; or an aircraft and airspace boundaries
- situations where separation assurance is not achieved (Loss of Separation Assurance - LOSA)
- situations where one aircraft is subject to an emergency, i.e. emergency descent or forced landing

Administrative actions might include:

- incident reporting procedures
- 'stand-down' procedures

Tactical separation assurance is defined as that which is achieved through:

- proactive application of separation standards to avoid rather than resolve conflicts
- planning traffic to guarantee rather than achieve separation
- executing the plan so as to guarantee separation
- monitoring the situation to ensure that plan and execution are effective

Strategic separation assurance is defined as that which:

- places emphasis on the designing of airspace, air routes, air traffic management plans and air traffic control practices to reduce the likelihood aircraft will come into conflict

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- standard operating procedures
- regulatory standards and recommended practices

Information/documents may include:

- Civil Aviation Safety Authority (CASA) regulations and Manuals of Standards (MOS)
- Local Instructions (LI) and Temporary Local Instructions (TLI)
- training curricula and syllabi
- equipment manufacturers specifications and instructions
- Manual of Air Traffic Services (MATS)
- Aeronautical Information Publication (AIP)

RANGE STATEMENT

Applicable regulations and legislation may include:

- workplace procedures, instructions
- Training Standards Manual (TSM)
- ICAO Document 4444, ATM/501, Procedures for Air Navigation Services, Air Traffic Management
- occupational specification for air traffic controllers
- industrial certified agreements and awards
- training and assessment records
- documented learning and assessment strategies
- International Civil Aviation Organization (ICAO) Standards and Recommended Practices (SARP)
- Civil Aviation Safety Regulations (CASR) and Manuals of Standards (MOS)
- relevant Defence Orders and Instructions
- Airservices Act (Cth) 1995
- OH&S Legislation (state and federal)
- Civil Aviation Act (Cth) 1988 and the Civil Aviation Amendment Act 1995

Unit Descriptor

Unit Descriptor

This unit provides the knowledge and an inventory of skills and behaviours specific to providing air traffic services in airspaces within en route areas. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

This unit is applied to specific airspaces that offer varying levels of air traffic services according to the ICAO and national classifications of airspaces.

Persons exercising competence in this unit will need to fulfil the licensing and regulatory requirements of the Civil Aviation Safety Authority pertaining to air traffic controllers.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Work is performed under various levels of supervision dependent on workplace context, and might be in a team environment.

Work involves applying separation standards. It assesses the controller's ability to apply the full range of separation standards or provide traffic advice in situations involving medium to high levels of traffic volume and complexity and in adverse weather conditions.

This unit of competency is packaged at Diploma level.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage en route airspaces	<p>1.1 Traffic priorities are applied according to standard operating procedure</p> <p>1.2 Service priorities are applied according to which is most safety critical</p> <p>1.3 Control practices and techniques are adapted to changing airspace environment factors</p> <p>1.4 Surveillance of airspaces and air routes is maintained using systematic scan technique at a rate determined by environment factors</p> <p>1.5 Standard routing and/or user preferred routing is facilitated when able</p> <p>1.6 Documented instructions and agreements applicable to the area of jurisdiction are observed</p> <p>1.7 Unauthorised use of airspaces and operational deviation from control instruction and procedure are recognised and rectified</p> <p>1.8 Terrain and obstacle clearance is provided where necessary</p> <p>1.9 Pilot requested altitudes or flight levels are facilitated when able</p> <p>1.10 Aircraft are authorised to use en route airspaces</p> <p>1.11 Control services are provided according to airspace classification and status</p> <p>1.12 Airspaces are administered according to user activity</p> <p>1.13 Flight diversions are facilitated where necessary</p>
2 Assure separation	<p>2.1 Aircraft conflicts are recognised and resolved</p> <p>2.2 Aircraft separation is provided</p> <p>2.3 Jurisdiction for maintaining aircraft separation is agreed and assigned</p> <p>2.4 Alternative aircraft separation is provided when required</p> <p>2.5 Aircraft separation is adjusted if required when systems are degraded or airways facilities are reduced</p> <p>2.6 Aircraft separation is most appropriate taking into account safety, expedition and the method of control and surveillance</p> <p>2.7 Compromised aircraft separation is recognised and recovered and administrative actions are taken in accordance with workplace procedure</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations
- International and national air law including facilitation of international flight
- Relevant OH&S and environmental procedures and regulations
- Principles of effective air traffic control
- National operating standards, recommendations and system safety relevant to air traffic management
- National airspace system and standard route structure
- Rules of the air governing visual and instrument flight
- Principles of flight, operation and functioning of aircraft power-plants; systems and aircraft performance relevant to area control services
- Meteorological documentation, terms and definitions, information and the origin and characteristics of weather phenomena affecting flight operations including local phenomena
- Principles and procedures of altimetry
- Principles, limitations and accuracy of air navigation; navigation systems and visual aids, including terms; and definitions and required navigation performance relevant to area control services
- Basic time, distance and speed navigation solutions; track error, closing angles, drift and track made good
- Traffic Collision and Avoidance Systems
- Aeronautical documentation and safety practices associated with the planning and conduct of flight
- Provision of air traffic services (air traffic control, flight information service and search and rescue alerting), aeronautical information services, air traffic flow management and airspace management including terms and definitions
- Air traffic services and air traffic flow management communication phraseologies and procedures
- Security against acts of unlawful interference
- Air traffic management corporate aspiration, mission, service and culture
- Aircraft type recognition and associated wake turbulence and performance categories
- Air traffic priorities
- Airspace service priorities and the safety imperative
- Aeronautical charts and maps used in aviation
- Organisational and licensing administration
- Safety occurrence reporting and just culture in the air traffic management workplace

REQUIRED KNOWLEDGE AND SKILLS

- Jurisdiction and adjacent airspace characteristics
- Standard route structures and associated procedures, reporting, lowest safe heights, cruising levels and transfer of control points
- Flexible tracking and user-preferred routing
- Terrain and prominent landmarks affecting flight operations within en route airspace
- Characteristics of en route sector air traffic patterns and traffic flows including hotspots, congestion and location of aerodromes and runways within and adjacent to jurisdiction airspace
- Goals and characteristics of military flight operations
- Prioritisation of area control tasks to achieve the safety critical imperative
- Recovering from compromised aircraft separation and unauthorised use of airspaces
- Division of responsibilities for air traffic services and air traffic flow management between en route airspaces and other interfacing elements
- Aircraft conflict recognition and resolution in en route airspaces
- Provision of air traffic services and air traffic flow management during system degradation including facility failures and restoration of system components
- Area control separation standards and techniques and wake turbulence separation
- Procedures for recording and/or annotating operational information
- Coordination of air traffic services and air traffic flow management information
- Departure and approach to land procedures and transition from instrument flight to visual flight and terrain protection
- Conditional air traffic clearance
- Adjusting route, track, heading and speed of aircraft
- Handover-takeover procedures and practices
- Human-machine Interface (HMI) states and associated interactions
- Formation flight configurations, separation and procedures and practices

Required skills:

- Communicate effectively with others when providing area control services
- Actively listen when providing area control services
- Perceive incoming information associated with strategic, tactical, geographic, spatial, system and environment components of a complex system
- Comprehend incoming information and develop the current airspace and flight path model
- Read and interpret instructions, regulations, procedures and other information relevant to area control services
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to area control services

REQUIRED KNOWLEDGE AND SKILLS

- Operate electronic communication equipment to required protocol
- Provide leadership and work collaboratively with others when providing area control services
- Communicate in a team by exchanging information through assigning responsibility, acknowledgment, inquiring, and by recognising and noting facts that create team rapport and enhance team outputs
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when providing area control services in accordance with regulatory requirements and workplace procedures
- Make decisions when providing area control services
- Implement decisions using knowledge-based, rule-based and skill-based activities
- Demonstrate an attitude to error management that limits unintentional deviation from work practices and maintains accuracy through application of disciplined procedures and practices and a methodical work ethic
- Conduct aeronautical decision making
- Maintain a strategic traffic management goal for the jurisdiction airspace
- Implement contingency plans for unexpected events that may arise when providing area control services
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when providing area control services
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Anticipate and prepare for work tasks
- Adhere to procedures through a series of steps followed in a regular definite order or a traditional or established way of doing things when this is required
- Modify activities dependent on differing workplace contingencies, situations and environments
- Judge and form an opinion or evaluate situations by discerning and comparing information
- React to some form of treatment or stressful situation by a considered and measured response in a timely fashion
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Be receptive to training for the skills, knowledge, or experiences acquired or gained over a career
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to provide area control services
- Separate aircraft using area control techniques and standards
- Separate aircraft using wake turbulence standards

REQUIRED KNOWLEDGE AND SKILLS

- Assign separation to the pilot
- Process military aircraft
- Interpret charts, maps and operational documentation associated with planning and conduct of flight
- Facilitate in-flight diversions and/or changes of altitude and flight level
- Maintain surveillance of en route airspaces
- Scan the Human-machine Interface (HMI)
- Formulate airways clearance and control instruction
- Adjust route and track of aircraft
- Vary heading of aircraft
- Vary speed of aircraft
- Record and annotate flight information and messages
- Use checklists
- Maintain surveillance in degraded mode
- Plan and prioritise tasks according to the safety imperative
- Interpret and evaluate current traffic events
- Project and predict future traffic scenarios
- Execute control actions
- Apply human reasoning to airspace and flight path scenarios
- Allocate attention according to demand and constantly switch between: managing the Human-machine Interface or equipment use; managing communications; and managing traffic

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations
- International and national air law including facilitation of international flight
- Relevant OH&S and environmental procedures and regulations
- Principles of effective air traffic control
- National operating standards, recommendations and system safety relevant to air traffic management
- National airspace system and standard route structure
- Rules of the air governing visual and instrument flight
- Principles of flight, operation and functioning of aircraft power-plants; systems and aircraft performance relevant to aerodrome control services
- Meteorological documentation, terms and definitions, information and the origin and characteristics of weather phenomena affecting flight operations including local phenomena
- Principles and procedures of altimetry
- Principles, limitations and accuracy of air navigation; navigation systems and visual aids, including terms and definitions; required navigation performance relevant to aerodrome control services
- Basic time, distance and speed navigation solutions; track error, closing angles, drift and track made good
- Traffic Collision and Avoidance Systems
- Aeronautical documentation and safety practices associated with the planning and conduct of flight
- Provision of air traffic services (air traffic control, flight information service and search and rescue alerting), aeronautical information services, air traffic flow management and airspace management including terms and definitions
- Air traffic services and air traffic flow management communication phraseologies and procedures
- Security against acts of unlawful interference
- Air traffic management corporate aspiration, mission, service and culture
- Aircraft type recognition and associated wake turbulence and performance categories
- Air traffic priorities
- Airspace service priorities and the safety imperative
- Aeronautical charts and maps used in aviation
- Organisational and licensing administration
- Safety occurrence reporting and just culture in the air traffic management workplace

REQUIRED KNOWLEDGE AND SKILLS

- Jurisdiction and adjacent airspace characteristics
- Standard route structures and associated procedures, reporting, lowest safe heights, cruising levels and transfer of control points
- Flexible tracking and user-preferred routing
- Terrain and prominent landmarks affecting flight operations within aerodrome traffic zone and terminal airspace
- Characteristics of aerodrome traffic zone patterns and traffic flows including critical positions
- Goals and characteristics of military flight operations
- Prioritisation of aerodrome control tasks to achieve the safety critical imperative
- Recovering from compromised aircraft separation and unauthorised use of airspaces
- Division of responsibilities for air traffic services and air traffic flow management between en route airspaces and other interfacing elements
- Aircraft conflict recognition and resolution in the aerodrome traffic zone
- Provision of air traffic services and air traffic flow management during system degradation including facility failures and restoration of system components
- Aerodrome control separation standards and techniques and wake turbulence separation
- Procedures for recording and/or annotating operational information
- Coordination of air traffic services and air traffic flow management information
- Departure and approach to land procedures and transition from instrument flight to visual flight and terrain protection
- Conditional air traffic clearance
- Adjusting route, track, heading and speed of aircraft
- Handover-takeover procedures and practices
- Human-machine Interface (HMI) states and associated interactions
- Physical characteristics of aerodrome and runways
- Obstructions
- Aerodrome and runway markings
- Aerodrome lighting
- Formation flight configurations, separation and procedures and practices

Required skills:

- Communicate effectively with others when providing aerodrome control service
- Actively listen when providing aerodrome control service
- Perceive incoming information associated with strategic, tactical, geographic, spatial, system and environment components of a complex system
- Comprehend incoming information and develop the current airspace and flight path model
- Read and interpret instructions, regulations, procedures and other information relevant to

REQUIRED KNOWLEDGE AND SKILLS

aerodrome control service

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to aerodrome control service
- Operate electronic communication equipment to required protocol
- Provide leadership and work collaboratively with others when providing aerodrome control service
- Communicate in a team by exchanging information through assigning responsibility, acknowledgment, inquiring, and by recognising and noting facts that create team rapport and enhance team outputs
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when providing aerodrome control service in accordance with regulatory requirements and workplace procedures
- Project and develop future airspace and flight path scenarios
- Maintain a strategic traffic management goal for the jurisdiction airspace
- Make decisions related to the provision of aerodrome control service
- Implement decisions using knowledge-based, rule-based and skill-based activities
- Demonstrate an attitude to error management that limits unintentional deviation from work practices and maintains accuracy through application of disciplined procedures and practices and a methodical work ethic
- Conduct aeronautical decision making
- Implement contingency plans for unexpected events that may arise when providing aerodrome control service
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when providing aerodrome control service
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Anticipate and prepare for work tasks
- Adhere to procedures through a series of steps followed in a regular definite order or a traditional or established way of doing things when this is required
- Modify activities dependent on differing workplace contingencies, situations and environments
- Judge and form an opinion or evaluate situations by discerning and comparing information
- React to some form of treatment or stressful situation by a considered and measured response in a timely fashion
- Work systematically with required attention to detail without injury to self or others, or damage to aircraft or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures

REQUIRED KNOWLEDGE AND SKILLS

- Be receptive to training for the skills, knowledge, or experiences acquired or gained over a career
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required to provide aerodrome control service
- Separate aircraft using aerodrome control techniques and standards
- Separate aircraft using wake turbulence standards
- Determine runway mode
- Operate runways dependently
- Operate runways independently
- Operate taxiways
- Assign separation to the pilot
- Conduct runway visual range observation
- Conduct general and sector meteorological observation
- Process military aircraft
- Facilitate unusual flight operations
- Interpret charts, maps and operational documentation associated with planning and conduct of flight
- Maintain surveillance of aerodrome traffic zone and aerodrome
- Scan the Human-machine Interface (HMI)
- Formulate airways clearance and control instruction
- Adjust route and track of aircraft
- Vary heading of aircraft
- Vary speed of aircraft
- Record and annotate flight information and messages
- Use checklists
- Plan and prioritise tasks according to safety imperatives
- Interpret and evaluate current traffic events
- Project and predict future traffic scenarios
- Execute control actions
- Apply human reasoning to airspace and flight path scenarios
- Allocate attention according to demand and constantly switch between: managing the Human-machine Interface or equipment use; managing communications; and managing traffic

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| Operations may be conducted: | <ul style="list-style-type: none"> • by day or night • in variable weather conditions |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • simulated situations, and/or • an operational air traffic control workplace |
| Conflict of air traffic is: | <ul style="list-style-type: none"> • a situation in which, in the opinion of air traffic services personnel, the distance between aircraft as well as their relative positions and speed might compromise the safety of the aircraft operations |
| Conflict can occur between: | <ul style="list-style-type: none"> • aircraft • aircraft and obstructions • aircraft and vehicles/pedestrians • aircraft and airspace boundaries |
| Resolution of air traffic conflicts requires: | <ul style="list-style-type: none"> • the determination of alternative flight paths which would be free from conflicts and the selection of one of these flight paths for use |
| Recognising air traffic conflict might include: | <ul style="list-style-type: none"> • maintaining situational awareness • scanning techniques • system tools for recognising conflicts • Graphic Display Tools • Flight Progress Strip (FPS) placement and manipulation and Flight Data Records (FDR) |
| System tools for recognising comprised separation may include: | <ul style="list-style-type: none"> • Flight Progress Strips • visual identification • displays • pilot reports |
| Separation standards include: | <ul style="list-style-type: none"> • vertical separation standards (including with terrain) • reduced vertical separation standards (RVSM) • longitudinal separation standards • lateral separation standards • radar separation standards • ADS and ADS (B) standards • wake turbulence separation standards • visual separation standards • sight and follow standard • runway separation standards • emergency separation standards (vertical) |

RANGE STATEMENT

Alternative methods of resolving conflicts might include:

- pilot responsibility for separation
- delaying aircraft
- delaying clearances, including clearance to enter particular classifications of airspace
- use of vectoring under RADAR control
- refusing requests from pilots and/or other controllers
- passing traffic information

Compromised separation might include:

- situations where less than the applicable separation minima occurs between: aircraft; an aircraft and a hazard; or an aircraft and airspace boundaries
- situations where separation assurance is not achieved
- situations where one aircraft is subject to an emergency, i.e. emergency descent or forced landing

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures
- standard operating procedures
- regulatory standards and recommended practices
- incident reporting procedures
- 'stand-down' procedures

Administrative actions might include:

Tactical separation assurance is defined as that which is achieved through:

- proactive application of separation standards to avoid rather than resolve conflicts
- planning traffic to guarantee rather than achieve separation
- executing the plan so as to guarantee separation
- monitoring the situation to ensure that plan and execution are effective

Strategic separation assurance is defined as that which:

- places emphasis on the designing of airspace, air routes, air traffic management plans and air traffic control practices to reduce the likelihood aircraft will come into conflict

Information/documents may include:

- Civil Aviation Safety Authority (CASA) regulations and Manuals of Standards (MOS)
- Local Instructions (LI) and Temporary Local Instructions (TLI)
- training curricula and syllabi
- equipment manufacturers specifications and instructions
- Manual of Air Traffic Services (MATS)
- Aeronautical Information Publication (AIP)
- workplace procedures, instructions
- Training Standards Manual (TSM)

RANGE STATEMENT

Applicable regulations and legislation may include:

- ICAO Document 4444, ATM/501, Procedures for Air Navigation Services, Air Traffic Management
- occupational specification for air traffic controllers
- industrial certified agreements and awards
- training and assessment records
- documented learning and assessment strategies
- International Civil Aviation Organization (ICAO) Standards and Recommended Practices (SARP)
- Civil Aviation Safety Regulations (CASR) and Manuals of Standards (MOS)
- relevant Defence Orders and Instructions
- Airservices Act (Cth) 1995
- OH&S Legislation (state and federal)
- Civil Aviation Act (Cth) 1988 and the Civil Aviation Amendment Act 1995

Unit Sector(s)

Competency field

Competency Field

Y - Aircraft Operation and Traffic Management

AVIY5065A Operate a multi-engine helicopter

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to carry out take-off and departure procedures as a pilot in command of a multi-engine helicopter during visual, instrument and night conditions in normal, abnormal and emergency situations. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) and/or ADF; airspace control requirements and Day Visual Flight Rules (Day VFR), Night VFR, Instrument Flight Rules (IFR); and aircraft control principles, regulations, safety codes, protocols and procedures required when operating a multi-engine helicopter.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Operations are conducted as part of commercial or military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited supervision.

This unit of competency is nominally packaged at Diploma.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Operate a multi-engine helicopter in all phases of flight	<p>1.1 Normal multi-engine helicopter operations on ground and in flight are conducted in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook</p> <p>1.2 Single engine operations contingencies for all phases of flight are anticipated and planned for</p> <p>1.3 Single engine operations contingency plan is briefed to crew members as required</p>
2 Manage engine failure/malfunction	<p>2.1 Helicopter control is maintained and/or regained (in simulated conditions)</p> <p>2.2 Failed/malfunctioning engine is identified and confirmed</p> <p>2.3 Power set on serviceable engine/s and helicopter configuration is adjusted to achieve desired aircraft performance</p> <p>2.4 Failed/malfunctioning engine is managed in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook</p> <p>2.5 Decision to continue or abort approach/landing is made</p> <p>2.6 Decision height for landing is nominated</p> <p>2.7 Indicated airspeed is maintained at or above minimum level flight speed for one inoperative engine</p> <p>2.8 Air Traffic Control (ATC) or another agency capable of assistance is advised of situation and intentions</p> <p>2.9 Flight profile is flown from which a controlled landing could be achieved</p> <p>2.10 Recovery to a suitable landing site is evaluated and conducted in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook</p>
3 Perform rejected take-off with engine failure	<p>3.1 Requirement for a rejected take-off is recognised (in simulated conditions)</p> <p>3.2 Rejected take-off procedures are implemented in accordance with Flight Manual/Pilot's Operating Handbook</p> <p>3.3 Contingency power on remaining engine(s) is applied if applicable</p> <p>3.4 Controlled landing in the rejected take-off distance available is performed</p>
4 Conduct go-around or missed approach with engine failure	<p>4.1 Requirement for a go-around or missed approach is identified and confirmed (in simulated conditions)</p> <p>4.2 Control of the helicopter is maintained</p> <p>4.3 Engine inoperative go-around is performed from decision height in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- Relevant OH&S and environmental procedures and regulations
- In Defence context, relevant Defence Orders and Instructions
- Aircraft performance limitations
- Markings on the performance instruments that apply to failed engine operations
- Normal and crosswind take-off/landing procedures
- Climb, cruise, descent procedures including airspeeds, configurations, method of drift allowance, setting of flight instruments and non-normal/emergency procedures
- Technique and procedures used during engine failure on take-off, the appropriate reference airspeeds, and the specific pilot actions required
- Technique and procedures for carrying out a rejected take-off after a engine/system(s) failure/warnings, including related safety factors
- Technique and procedures used to conduct a go-around or missed approach during engine failure on take-off, the appropriate reference airspeeds, and the specific pilot actions required

Required skills:

- Extract, calculate and apply all performance information applicable to the aircraft
- Identify and manage emergency and abnormal situations while maintaining control of the aircraft in accordance with Flight Manual/Pilot's Operating Handbook
- Identify the critical engine
- Control and manage the aircraft during flight with failed engine(s) in accordance with Flight Manual/Pilot's Operating Handbook
- Maintain compliance with relevant regulatory requirements
- Set priorities and manage workload to ensure safe task completion in the time available
- Apply relevant air safety practices and regulations
- Read and interpret instructions, procedures and information relevant to operating a multi-engine helicopter
- Communicate effectively with others when operating a multi-engine helicopter
- Complete documentation related to operating a multi-engine helicopter
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when operating a multi-engine helicopter
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

REQUIRED KNOWLEDGE AND SKILLS

- Promptly report and/or rectify any identified problems that may occur when operating a multi-engine helicopter in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when operating a multi-engine helicopter
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when operating a multi-engine helicopter
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required when operating a multi-engine helicopter

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of:
 - applying the underpinning knowledge and skills
 - following relevant legislation and workplace procedures
 - operating a multi-engine helicopter in all phases of flight in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook
 - managing an engine failure/malfunction in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook
 - performing a rejected take-off with engine failure in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook
 - conducting a go-around or missed approach with engine failure in accordance with workplace procedures and Flight Manual/Pilot's Operating Handbook

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation,

EVIDENCE GUIDE

and/or

- in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|-------------------------------------|--|
| Tasks may be undertaken in: | <ul style="list-style-type: none"> • variable weather conditions in accordance with Day Visual Flight Rules and Night Visual Flight Rules • simulated Instrument Meteorological Conditions (IMC) • IMC |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • multi-engine helicopter • multi-engine synthetic training device • variable air traffic conditions • variable weather conditions • variable flight situations • abnormal situations • classes of airspace as designated by the Civil Aviation Safety Authority |
| Night VFR environment may include: | <ul style="list-style-type: none"> • unaided • aided utilising night vision devices |
| Crew may include: | <ul style="list-style-type: none"> • single pilot • multi crew |
| Instruments may include: | <ul style="list-style-type: none"> • fitted flight instruments • head up display |
| Limitations may be imposed by: | <ul style="list-style-type: none"> • local noise abatement requirements and curfews |
| Classes of airspace are: | <ul style="list-style-type: none"> • those designated by the Civil Aviation Safety Authority • restricted and danger areas • Military control zones • Air Defence identification zones |
| Conditions may include: | <ul style="list-style-type: none"> • simulated IMC • simulated icing conditions • moderate turbulence • simulated hazardous weather • autopilot/flight director • FMS/other NAV system • simulation of emergency and abnormal procedures |
| Engine failures may occur: | <ul style="list-style-type: none"> • in flight • on ground • in hover • after take-off • during approach |

RANGE STATEMENT

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:	<ul style="list-style-type: none"> • during landing • company procedures • enterprise procedures • organisational procedures • established procedures • standard operating procedures
Information/documents may include:	<ul style="list-style-type: none"> • relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders pertaining to multi-engine helicopter operations • in Defence context, relevant Defence Orders and Instructions • Flight Manual/Pilot's Operating Handbook (POH) • Manual of Standards - Pilot Licensing (MOS-PL) • Aeronautical Information Publication (AIP) • relevant sections of Civil Aviation Advisory Publications (CAAP) • performance charts • operations manuals • approved checklists • workplace procedures and instructions and job specification • induction and training materials • conditions of service, legislation and industrial agreements including workplace agreements and awards
Applicable regulations and legislation may include:	<ul style="list-style-type: none"> • relevant Civil Aviation Safety Regulations and Civil Aviation Orders • in Defence context, relevant Defence Orders and Instructions • relevant state/territory OH&S legislation • relevant Australian Standards
Performance includes tolerances specified in either of:	<ul style="list-style-type: none"> • relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) such as: • Day VFR syllabus • Manual of Standards • relevant Defence documentation such as: • Defence Orders and Instructions • approved curricula and training documentation

AVIZ1005B Maintain basic situation awareness in the aviation workplace

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills, knowledge and attitudes required to manage basic situation awareness in aviation workplaces, including being aware of and assessing situations, making appropriate decisions, setting appropriate work priorities, carrying out workplace tasks, and communicating/working with others in accordance with workplace procedures and relevant regulatory requirements. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the regulatory requirements.

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Work is performed under limited supervision.

Work involves the application of safety and security policies, regulations, safety codes, protocols and procedures to maintain and manage situation awareness in aviation workplaces across a variety of operational contexts within the Australian aviation industry.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain basic situation awareness	<p>1.1 Continuous monitoring is demonstrated of all critical factors relevant to the safety and security of an aviation workplace</p> <p>1.2 All relevant indications of an unsafe or insecure situation are recognised and appropriate action is taken to alert relevant personnel and/or take appropriate action in accordance with workplace procedures and regulatory requirements</p>
2 Assess situations and take appropriate action	<p>2.1 Factors that may adversely affect the safety and security of an aviation workplace are identified</p> <p>2.2 Relevant information concerning the safety and security of an aviation workplace is recognised and interpreted and timely action is taken in accordance with workplace procedures</p> <p>2.3 Risks to workplace safety and security are recognised and appropriate action is taken to control the risk in accordance with workplace procedures and regulatory requirements</p> <p>2.4 Changes to workplace environment and related risks are monitored and managed to ensure a safe outcome to workplace operations</p> <p>2.5 A safe alternative plan of action is formulated and implemented where necessary as a result of changed circumstances and risks</p>
3 Set priorities and manage work tasks	<p>3.1 Priorities are set and workload is organised to ensure completion of all assigned tasks relevant to the safety and security of the workplace</p> <p>3.2 Appropriate tasks are prioritised and implemented to maintain ongoing workplace operations and achieve workplace objectives</p> <p>3.3 Relevant information is accessed and used to ensure the safety and security of the workplace when completing workplace tasks</p> <p>3.4 Tasks critically essential for the safety and security of the workplace are given priority over less important activities and are completed in accordance with workplace procedures, checklists and regulatory requirements</p> <p>3.5 Situation awareness is maintained at all times during workplace activities</p> <p>3.6 Symptoms of fatigue are recognised and appropriate action is taken to reduce its effects</p>
4 Work with others in the management of situation awareness	<p>4.1 Communication with relevant personnel is undertaken in an effective and efficient manner to achieve situation awareness and all requirements for the safety and security of the workplace</p> <p>4.2 Team members and others in the workplace are encouraged to participate in and contribute to the safety and security of the workplace</p> <p>4.3 Effective interpersonal skills are used when working with others</p>

ELEMENT

PERFORMANCE CRITERIA

to maintain awareness and the safety and security of the workplace

- 4.4 Appropriate action is taken in conjunction with others to cooperatively correct any identified unsafe and/or insecure situations which may develop during workplace activities

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant safety, security and environmental regulations, policies, procedures and rules
- Other relevant regulatory requirements
- Procedures for maintaining situation awareness
- Weather information and its implications for workplace operations
- Communication procedures and protocols
- Safety and security problems that may be identified when maintaining and managing situation awareness and action that can be taken to overcome them
- Safety and security hazards and risks that may be identified in the aviation workplace and ways of controlling those hazards and associated risks

Required skills:

- Communicate effectively with others when maintaining basic situation awareness in the aviation workplace
- Read and interpret instructions, regulations, procedures and other information relevant to maintaining basic situation awareness in the aviation workplace
- Interpret and follow operational instructions and prioritise work
- Complete documentation related to basic situation awareness in the aviation workplace
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when maintaining basic situation awareness in the aviation workplace
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour, communication and interactions with others
- Promptly report and/or rectify any identified problems that may occur when maintaining basic situation awareness in the aviation workplace in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when maintaining basic situation awareness in the aviation workplace
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when maintaining basic situation awareness in the aviation workplace
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

REQUIRED KNOWLEDGE AND SKILLS

- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required when maintaining basic situation awareness in the aviation workplace

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|---|---|
| Operations may be conducted: | <ul style="list-style-type: none"> • by day or night • in variable weather conditions |
| Aviation workplaces may include: | <ul style="list-style-type: none"> • airports • aircraft • other aviation facilities |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • appropriately simulated work situations • an operational aviation workplace |
| Factors that may adversely affect the safety and/or security situation of an aviation workplace may include but are not restricted to: | <ul style="list-style-type: none"> • changes in the wind and weather conditions • equipment or facility breakdown, malfunction or failure • persons committing criminal acts • breaches of security regulations and procedures • safety hazards in the workplace such as rotating equipment and propellers, jet blast, slippery surfaces, exposed electrical leads and connections, toxic materials, etc. • poor housekeeping in the workplace • security threat • equipment exceeding nominated operating parameters and tolerances • moving vehicles and aircraft in the workplace environs • a workplace emergency such as a fire, flood, chemical/toxic spill, crash, personnel injury, etc. |
| Information/indicators concerning the potential safety/security problems in an aviation workplace may include, but are not restricted to: | <ul style="list-style-type: none"> • weather and other meteorological information that indicates a potential threat to workplace operations and/or personnel in the workplace • information of deteriorating or faulty equipment or facility performance obtained through routine checks of equipment and facilities • persons acting suspiciously • observed breaches of security regulations and procedures • recognition of safety hazards in the workplace and/or breaches of safety policies and procedures • observed rubbish/untidiness in the workplace • indications of a poorly maintained workplace and related facilities • observation and recognition of a security threat • indications that equipment is, or may be, exceeding operating parameters and tolerances |

RANGE STATEMENT

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Maintain situation awareness	<p>1.1 Continuous monitoring is demonstrated of all critical factors relevant to the safe progress of a flight</p> <p>1.2 Situation awareness is demonstrated through application of an effective visual scan, use of radio communication, use of traffic information and use of aircraft systems where applicable</p> <p>1.3 Trends towards an unsafe situation are recognised and appropriate corrective action is employed in accordance with workplace procedures and regulatory requirements</p> <p>1.4 Breakdown in situation awareness is identified from errors or discrepancies and is rectified by ensuring safe operation of the aircraft and situation</p>
2 Assess situations and make decisions	<p>2.1 Problems are identified and analysed</p> <p>2.2 Solutions are identified and risks assessed</p> <p>2.3 A course of action is chosen to ensure a safe outcome to a flight or manoeuvre</p> <p>2.4 The plan of action is communicated and tasks are allocated, if appropriate</p> <p>2.5 Actions are taken to achieve optimum outcomes</p> <p>2.6 Progress is monitored against plan</p> <p>2.7 The plan is re-evaluated to achieve optimum outcomes</p> <p>2.8 Operational changes and related risks are monitored and managed to ensure a safe outcome to a flight or manoeuvre</p>
3 Set priorities and manage tasks	<p>3.1 Priorities and workload are organised to ensure completion of all tasks relevant to the safety of the flight</p> <p>3.2 Safe and effective operation of the aircraft is prioritised ahead of competing tasks</p> <p>3.3 Technology is appropriately used to reduce workload and improve ability to perform mental and manipulative activities</p> <p>3.4 Fixation on single actions/functions is avoided</p> <p>3.5 Symptoms of fatigue are recognised and appropriate action is taken to reduce its effects</p> <p>3.6 Critical events and tasks are anticipated and completed in the time available</p>
4 Work with others in the management of situation awareness	<p>4.1 A level of assertiveness is demonstrated which ensures the safe completion of a flight</p> <p>4.2 Effective and efficient communications and interpersonal relationships are established and maintained with all stakeholders to ensure the safe outcome of the flight</p> <p>4.3 Passengers and crew members are encouraged to participate in</p>

ELEMENT

PERFORMANCE CRITERIA

- and contribute to the safe outcome of a flight
- 4.4 Appropriate action is taken in conjunction with others to cooperatively correct any identified unsafe situations which may develop during an aircraft flight

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- In Defence context, relevant Defence Orders and Instructions
- Relevant OH&S and environmental procedures and regulations
- The principles of aircraft flight
- Procedures for maintaining situation awareness
- Use of the navigational computer
- Aircraft fuel usage rates
- Traffic rules and procedures
- Air navigation techniques
- Aircraft communication procedures and protocols
- Standard radiotelephony phraseology as detailed in the Flight Radiotelephone Operator Licence (FROL) syllabus and the Aeronautical Information Publication (AIP)
- Problems that may occur when managing situation awareness and action that can be taken to overcome them
- Procedures for transferring aircraft control between crew members
- Operational hazards that may be identified when managing situation awareness and ways of controlling those hazards and associated risks

Required skills:

- Maintain and manage an aircraft's situation both alone and in conjunction with others
- Assess situations and make appropriate decisions
- Set priorities and manage tasks
- Maintain all necessary communications
- Maintain compliance with regulatory requirements
- Select and use appropriate instruments, communications equipment and aids
- Source and interpret aviation weather forecast products appropriate to flight planning and navigation procedures
- Apply air safety practices and regulations
- Transfer aircraft control between crew members
- Communicate effectively with others when managing situation awareness in aircraft flight
- Read and interpret instructions, regulations, procedures and other information relevant to managing situation awareness in aircraft flight

REQUIRED KNOWLEDGE AND SKILLS

- Interpret and follow operational instructions and prioritise work
- Complete documentation related to managing situation awareness in aircraft flight
- Operate electronic communication equipment to required protocol
- Work collaboratively with others when managing situation awareness in aircraft flight
- Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- Promptly report and/or rectify any identified problems that may occur when managing situation awareness in aircraft flight in accordance with regulatory requirements and workplace procedures
- Implement contingency plans for unexpected events that may arise when managing situation awareness in aircraft flight
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when managing situation awareness in aircraft flight
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required when managing situation awareness in aircraft flight

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| Tasks may be undertaken in: | <ul style="list-style-type: none"> • variable weather conditions in accordance with Day Visual Flight Rules • VMC with simulated IMC • IMC |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • single engine aircraft • multi engine aircraft • synthetic training device approved by the appropriate authority • variable air traffic conditions • variable flight situations • abnormal situations • classes of airspace as designated by the Civil Aviation Safety Authority |
| Aircraft may include: | <ul style="list-style-type: none"> • fixed wing • helicopter • commercial balloons • other commercial or military aircraft |
| Crew may include: | <ul style="list-style-type: none"> • single pilot • multi crew |
| Instruments may be: | <ul style="list-style-type: none"> • fitted flight instruments • head up displays |
| Limitations may be imposed by: | <ul style="list-style-type: none"> • local noise abatement requirements and curfews • airspace endorsements |
| Classes of airspace may be: | <ul style="list-style-type: none"> • as designated by the regulator • restricted and danger areas • military control zones • Air Defence Identification Zones |
| Factors that may adversely affect the safe outcome of a flight or manoeuvre may include: | <ul style="list-style-type: none"> • changes in the wind and weather conditions en route • changes in the wind and weather conditions at the destination • engine or equipment malfunction or failure • instrument malfunction or failure • air traffic in the vicinity of the aircraft • running out of fuel • errors in navigation • becoming lost |

RANGE STATEMENT

Dependent on the type of organisation concerned and the local terminology used, workplace procedures may include:	<ul style="list-style-type: none"> • security threat on board aircraft • exceeding nominated operating parameters and tolerances for the aircraft • company procedures • enterprise procedures • organisational procedures • established procedures • standard operating procedures
Information/documents may include:	<ul style="list-style-type: none"> • relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders pertaining to the management of situation awareness during an aircraft flight • in Defence context, relevant Defence Orders and Instructions • Manual of Standards - Pilot Licensing (MOS-PL) • Flight Manual/Pilot's Operating Handbook (POH) • Aeronautical Information Publication (AIP) • En Route Supplement Australia (ERSA) • relevant sections of the Civil Aviation Advisory Publications (CAAP) • performance charts • operations manuals • approved checklists • workplace procedures and instructions and job specification • induction and training materials • conditions of service, legislation and industrial agreements including workplace agreements and awards
Applicable regulations and legislation may include:	<ul style="list-style-type: none"> • relevant Civil Aviation Safety Regulations and Civil Aviation Orders • in Defence context, relevant Defence Orders and Instructions • relevant state/territory OH&S legislation • relevant state/territory environmental protection legislation • relevant Australian Standards
Performance includes tolerances specified in either of:	<ul style="list-style-type: none"> • relevant licence and aircraft rating requirements of the Civil Aviation Safety Authority (CASA) such as: • Day VFR Syllabus • Manual of Standards • relevant Defence documentation such as: • Defence Orders and Instructions • approved curricula and training documentation

Unit Sector(s)

Competency field

Competency Field	Z - Situation Awareness
-------------------------	-------------------------

AVIZ5049A Manage situational awareness in the air traffic control environment

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

This unit involves the skills and knowledge required to work as an individual and as part of a team to correctly establish and maintain situational awareness in an air traffic control (ATC) environment. Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Application of the Unit

Application of the Unit

Work must be carried out in compliance with the relevant air traffic control regulatory requirements of the Civil Aviation Safety Authority (CASA).

Use for ADF Aviation is to be in accordance with relevant Defence Orders and Instructions and applicable CASA compliance.

Work is performed under various levels of supervision dependent on workplace context, and in a team environment.

This unit of competency is packaged at Diploma level.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Establish and maintain situational awareness	1.1 Incoming information and cues are noticed and received 1.2 Information is comprehended and prioritised 1.3 Status of the ATC environment is established 1.4 Status of the elements within the ATC environment are projected to the future and consequences are established 1.5 ATC environment is monitored and status of elements is updated
2 Identify and rectify loss of situational awareness	2.1 Factors affecting situational awareness are understood 2.2 Loss of situational awareness identifiers are recognised 2.3 Actions are taken to recover situational awareness
3 Manage team situational awareness	3.1 Factors affecting team situational awareness are understood 3.2 Required information is recognised and shared 3.3 Team situational awareness is established 3.4 ATC environment is monitored and the status of the elements is updated to relevant team members

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

- Relevant sections of Civil Aviation Safety Regulations
- Relevant OH&S and environmental procedures and regulations
- Principles of effective air traffic control
- Separation standards and traffic information requirements and conditions for their use
- Procedures for managing situational awareness in the air traffic control environment
- Relevant control zone, airspace/route structure and traffic patterns
- Classification and special use airspace
- Radar coverage
- Sector/traffic hot spots
- Sector/control zone geography and topography
- Aircraft performance characteristics
- Weather phenomena affecting flight operations and safety
- Responsibilities of air traffic controllers when managing situational awareness in the air traffic control environment
- Area of responsibility
- The impact on adjacent area/s of responsibility
- Local procedures
- Relevant sections of the air traffic services procedures manual
- Safety hazards and risks that exist when managing situational awareness in the air traffic control environment
- Problems that may occur when managing situational awareness in the air traffic control environment
- The impact of adverse weather events and specific weather phenomena

Required skills:

- Communicate effectively with others when managing situational awareness in the air traffic control environment
- Actively listen when managing situational awareness in the air traffic control environment
- Read and interpret instructions, regulations, procedures and other information relevant to managing situational awareness in the air traffic control environment
- Interpret and follow operational instructions and prioritise work
- Perceive incoming information associated with strategic, tactical, geographic, spatial, system

REQUIRED KNOWLEDGE AND SKILLS

and environment components of a complex system

- Comprehend incoming information and develop the current airspace and flight path model
- Complete documentation related to managing situational awareness in the air traffic control environment
- Provide leadership and work collaboratively with others when managing situational awareness in the air traffic control environment
- Communicate in a team by exchanging information through assigning responsibility, acknowledgment, inquiring, and by recognising and noting facts that create team rapport and enhance team outputs
- Promptly report and/or rectify any identified problems that may occur when managing situational awareness in the air traffic control environment in accordance with regulatory requirements and workplace procedures
- Demonstrate temperament reflecting a calm, composed and cooperative characteristic and emotional response under challenging situations
- Make decisions related to managing situational awareness in the air traffic control environment
- Conduct aeronautical decision making
- Project and develop future airspace and flight path scenarios
- Maintain a strategic traffic management goal for the jurisdiction airspace
- Adhere to procedures through a series of steps followed in a regular definite order or a traditional or established way of doing things when this is required
- Implement contingency plans for unexpected situations that may arise when managing situational awareness in the air traffic control environment
- Judge and form an opinion or evaluate situations by discerning and comparing information
- React to some form of treatment or stressful situation by a considered and measured response in a timely fashion
- Apply precautions and required action to minimise, control or eliminate hazards that may exist when managing situational awareness in the air traffic control environment
- Monitor and anticipate operational problems and hazards and take appropriate action
- Monitor work activities in terms of planned schedule
- Modify activities dependent on differing workplace contingencies, situations and environments
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Adapt to differences in equipment and operating environment in accordance with standard operating procedures
- Be receptive to training for the skills, knowledge, or experiences acquired or gained over a career
- Implement OH&S procedures and relevant regulations
- Identify and correctly use equipment required when managing situational awareness in the air traffic control environment

REQUIRED KNOWLEDGE AND SKILLS

- Be confident but not complacent or reliant on automation and technology, and readily apply human reasoning to airspace and flight path scenarios
- Allocate attention according to demand and constantly switch between: managing the Human-machine Interface (HMI) or equipment use; managing communications; and managing traffic

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
- Resources for assessment include:
 - a range of relevant exercises, case studies and/or other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and equipment, and
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
- As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
- Practical assessment must occur:
 - through activities in an appropriately simulated environment at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

- | | |
|--|--|
| Operations may be conducted: | <ul style="list-style-type: none"> • by day or night • in variable weather conditions |
| Performance may be demonstrated in: | <ul style="list-style-type: none"> • simulated situations, and/or • an operational air traffic control workplace |
| Air traffic control workplace may be a workstation in: | <ul style="list-style-type: none"> • Area Control • Approach Control • Aerodrome Control |
| Situation awareness (SA): | <ul style="list-style-type: none"> • involves an awareness of airspace and flight path history, an awareness of the current airspace model and awareness of the probable future airspace and flight path situation • involves the ability to notice incoming information and cues • involves the integration and comprehension of the information leading to • involves the projection and prediction of future airspace and flight path scenarios • must be present at all times while providing ATS • must also exist in teams where team members share critical information to achieve team goals and synergy |
| Factors affecting situational awareness include: | <ul style="list-style-type: none"> • the projection and prediction of future airspace and flight path scenarios • individual - abilities, knowledge, skills, health, attitude, training and experience • environment - system capabilities and interface, stress, workload, complexity, automation, fatigue and distraction |
| Loss of situational awareness identifiers include: | <ul style="list-style-type: none"> • ambiguity or confusion • fixation or channelled attention • poor R/T communication • failure to meet targets • failure to stay ahead of the traffic |
| Loss of situational awareness prevention techniques include: | <ul style="list-style-type: none"> • delegation during high workload • solicit information and input from team • verbalise important conditions • avoid preoccupation and fixation - rotate attention • monitor and evaluate current status relative to plan • project ahead and consider contingencies |

RANGE STATEMENT

Factors affecting team situational awareness include:

- create visual and aural reminders for interrupted tasks
- speak up when SA appears to be breaking down
- level of communication and coordination
- degree of information sharing
- assertiveness of team members
- personality conflict
- level of team experience and training

Information/documents may include:

- training curricula and syllabi
- relevant sections of Civil Aviation Safety Regulations
- relevant CASA Manuals of Standards (MOS)
- air traffic control Local Instructions (LI) and Temporary Local Instructions (TLI)
- Manual of Air Traffic Services (MATS)
- Aeronautical Information Publication (AIP)
- Training Standards Manual (TSM)
- ICAO Document 4444, ATM/501, Procedures for Air Navigation Services, Air Traffic Management
- workplace procedures and instructions
- occupational specification for air traffic controllers
- equipment manufacturers specifications and instructions
- induction and training materials
- conditions of service, legislation and industrial agreements including workplace agreements and awards
- training and assessment records
- operator's handbook and system manuals
- documented learning and assessment strategies
- International Civil Aviation Organization (ICAO) Standards and Recommended Practices (SARP)
- Civil Aviation Safety Regulations (CASR) and Manuals of Standards (MOS)
- relevant Defence Orders and Instructions
- Airservices Act (Commonwealth) 1995
- OH&S Legislation (state and federal)
- Civil Aviation Act (Commonwealth) 1988 and the Civil Aviation Amendment Act 1995

Applicable regulations and legislation may include:

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review auditee documentation	<p>1.1. Where applicable, review auditee's previous quality audits to establish possible impact on the conduct of the current audit</p> <p>1.2. Request relevant organisational documents from auditee, and review and check the adequacy of these documents</p> <p>1.3. Amend reviewed documents, and determine and source any further documentation required</p> <p>1.4. Resolve issues which arise with auditee and relevant parties</p>
2. Participate in developing audit schedules	<p>2.1. Access or prepare appropriate checklists/tools and audit related documentation</p> <p>2.2. Confirm schedules and required resources with auditee before beginning auditing activities</p> <p>2.3. Anticipate possible issues and outline strategies to address these issues, should they arise</p> <p>2.4. Ensure preparation activities and documentation correspond to the <i>audit plan</i></p> <p>2.5. In consultation with auditing team, determine appropriate <i>methods and techniques</i></p> <p>2.6. Assist lead auditor in creating entry and exit meeting agendas</p>
3. Gather and analyse information	<p>3.1. Access a range of potential <i>sources of information</i></p> <p>3.2. Collect and make an initial assessment of <i>sample documentation</i></p> <p>3.3. Interview <i>appropriate persons</i> in relation to <i>relevant documentation</i></p> <p>3.4. Identify and report patterns, trends, interrelationships and areas of risk</p> <p>3.5. Identify aspects of the audit that require the use of specialists and request appropriate assistance</p>
4. Evaluate information	<p>4.1. Evaluate information against prescribed benchmarks</p> <p>4.2. Form a defensible opinion as to the meeting of these benchmarks by the auditee</p> <p>4.3. Ensure opinions are formed from and supported by available information</p>
5. Report findings	<p>5.1. Formulate findings and prepare a corrective action report if discrepancies or non-compliances are detected</p>

ELEMENT	PERFORMANCE CRITERIA
	5.2.Examine results/findings against audit objectives and present to lead auditor 5.3.Report recommendations for improvements as applicable
6. Participate in exit meeting	6.1.Prepare for exit meeting 6.2.Ensure reporting arrangements are agreed upon and documented during the meeting 6.3.Ensure context and consequences of audit are explained, and follow-up is discussed

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to listen to clients and other audit team members and to clarify points with them as necessary
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- interpersonal skills to establish rapport with clients and to liaise with other audit team members
- literacy skills to read, write, edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- organisational and time management skills to sequence tasks, meet timelines and arrange meetings
- problem-solving skills to identify any issues that have the potential to impact on the auditing process or outcome and to develop options to resolve these issues when they arise
- teamwork skills
- technology skills to use a range of equipment required to conduct quality auditing activities.

Required knowledge

- auditing codes of practice or ethics
- auditing methods and techniques
- auditing regulations and standards including:
 - AS/NZS ISO 9000:2006 Quality management systems - Fundamentals and vocabulary
 - AS/NZS ISO 19011:2003 Guidelines for quality and/or environmental management systems auditing
- current audit practices
- industry products and/or services
- quality auditing principles and techniques
- relevant legislation affecting business operation, including appropriate occupational health and safety, environmental, and privacy legislation
- terminology relating to quality auditing.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- preparation of multiple audit plans for a range of quality audits containing information on the audit schedule, proposed activities, methods, and techniques; risk analysis and proposed treatment of identified risks; entry and exit meeting agendas
- participation in audits as a member of an audit team
- gathering of data and information by a variety of methods
- knowledge of relevant legislation and national standards
- developing a comprehensive report for the exit meeting, which analyses findings and information gathered to arrive at the findings.

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace undertaking a quality audit or a simulated workplace environment
- access to workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence by third party workplace reports of on-the-job performance by the candidate
- demonstration of quality auditing techniques
- observations of participation in exit meetings
- oral or written questioning to assess knowledge of audit preparation activities
- assessment of organisational documentation reviewed for the audit
- analysis of reports developed - with clear, comprehensive findings

EVIDENCE GUIDE	
	<ul style="list-style-type: none">• observation of performance in role plays.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none">• other quality auditing units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Audit plan</i> may include:	<ul style="list-style-type: none"> • audit requirements and/or identification of relevant quality system documentation • auditee provision of personnel for audit • confidentiality requirements • contingency actions • distribution of reports • entry meeting • exit meeting • follow-up procedures • measurement criteria • reporting procedures • resource requirements • safety of auditors • sampling techniques • scope and objectives of audit • time lines and schedules
<i>Methods and techniques</i> may include:	<ul style="list-style-type: none"> • advanced management information systems • analysis • determining information flows • evaluating the effectiveness of system controls • questioning • sampling • scanning • tracing • trend analysis
<i>Sources of information</i> may include:	<ul style="list-style-type: none"> • activities • internal documentation • interview results • records, such as meeting minutes, reports or log books • reports from external sources, such as external laboratory reports and vendor ratings

RANGE STATEMENT	
<i>Appropriate persons</i> may include:	<ul style="list-style-type: none"> • persons from different levels within the auditee's organisation such as management, administrative personnel and work floor personnel • persons performing activities or tasks under consideration in the audit process
<i>Sample documentation</i> may include:	<ul style="list-style-type: none"> • documented procedures • log books • meeting minutes • previous audit reports • reports • reports from external sources • systems specifications • test results • user requirements definitions • work instructions
<i>Relevant documentation</i> may include:	<ul style="list-style-type: none"> • audit procedures • checklists • forms for documenting conformance and non-conformance evidence • forms for recording information • organisational charts • previous audit reports • quality standards • records of meetings • sampling plans defined in documented procedures or in audit plan • schedules

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Respond to complaints	<p>1.1.Process <i>customer complaints</i> using <i>effective communication</i> in accordance with organisational procedures established under organisational policies, legislation or codes of practice</p> <p>1.2.Obtain, <i>document</i> and review necessary reports relating to customer complaints</p> <p>1.3.Make decisions about customer complaints, taking into account applicable legislation, organisational policies and codes</p> <p>1.4.Negotiate resolution of the complaint and obtain agreement where possible</p> <p>1.5.Maintain a register of complaints/disputes</p> <p>1.6.Inform customer of the outcome of the investigation</p>
2. Refer complaints	<p>2.1.Identify complaints that require referral to other personnel or external bodies</p> <p>2.2.Make <i>referrals</i> to appropriate personnel for follow-up in accordance with individual level of responsibility</p> <p>2.3.Forward all documents and investigation reports</p> <p>2.4.Follow-up appropriate personnel to gain prompt decisions</p>
3. Exercise judgement to resolve customer service issues	<p>3.1.Identify implications of issues for customer and organisation</p> <p>3.2.Analyse, explain and negotiate appropriate options for resolution with customer</p> <p>3.3.Propose viable options in accordance with appropriate legislative requirements and enterprise policies</p> <p>3.4.Ensure matters for which a solution cannot be negotiated are referred to appropriate personnel</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify trends and positions of products and services
- communication skills to interpret customer complaints, and to monitor and advise on customer service strategies and resolutions
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
- problem-solving skills to deal with customer enquiries or complaints, to apply organisational procedures to a range of situations and to exercise judgement in this application.

Required knowledge

- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- importance of good communication skills and the individual's role in processing customer complaints
- organisational procedures and standards for processing complaints and recommending appropriate action.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • applying judgement in the application of industry and/or organisational procedures • working with customer complaints • knowledge of organisational procedures and standards for processing complaints.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of customer complaints • examples of documents relating to customer complaints policies and procedures.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • analysis of responses to case studies and scenarios • demonstration of techniques • observation of presentations • oral or written questioning to assess knowledge of individual's role in processing customer complaints • review of documentation outlining necessary reports relating to customer complaints • review of complaints/disputes register.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • customer service units • other general administration units.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Customers</i> may include:	<ul style="list-style-type: none"> • customers with routine or specific requests • internal or external customers • people from a range of social, cultural or ethnic backgrounds • people who may be unwell, drug affected or emotionally distressed • people with varying physical and mental abilities • regular and new customers
<i>Complaints</i> may include:	<ul style="list-style-type: none"> • different types of severity, formality and sources • scenarios where external bodies such as police are required • straightforward customer dissatisfaction • level of documentation required
<i>Effective communication</i> may include:	<ul style="list-style-type: none"> • giving customers full attention • maintaining eye contact (for face-to-face interactions), except where eye contact may be culturally inappropriate • speaking clearly and concisely • using appropriate language and tone of voice • using clear written information/communication • using non-verbal communication e.g. body language, personal presentation (for face-to-face interactions)
<i>Documenting</i> reports relating to customer complaints may include:	<ul style="list-style-type: none"> • completed forms and written reports • using audio-visual tapes • using computer-based systems
<i>Referrals</i> may include:	<ul style="list-style-type: none"> • external bodies e.g. Ombudsman, Independent Commission Against Corruption (ICAC), police • relevant superiors in the organisational hierarchy

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare a presentation	<p>1.1. Plan and document presentation approach and intended outcomes</p> <p>1.2. Choose <i>presentation strategies, format and delivery methods</i> that match the <i>characteristics</i> of the target audience, location, resources and personnel needed</p> <p>1.3. Select <i>presentation aids, materials and techniques</i> that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas</p> <p>1.4. Brief others involved in the presentation on their roles/responsibilities within the presentation</p> <p>1.5. Select <i>techniques to evaluate presentation effectiveness</i></p>
2. Deliver a presentation	<p>2.1. Explain and discuss desired outcomes of the presentation with the target audience</p> <p>2.2. Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas</p> <p>2.3. Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes</p> <p>2.4. Use persuasive communication techniques to secure audience interest</p> <p>2.5. Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences</p> <p>2.6. Summarise key concepts and ideas at strategic points to facilitate participant understanding</p>
3. Review the presentation	<p>3.1. Implement <i>techniques to review the effectiveness</i> of the presentation</p> <p>3.2. Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation</p> <p>3.3. Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- facilitation and presentation skills to communicate central ideas of a message in an informative and engaging manner, and to utilise verbal and non-verbal techniques to sustain participant engagement
- literacy skills to prepare presentation information and to write in a range of styles for different target audiences.

Required knowledge

- data collection methods that will support review of presentations
- industry, product/service
- key provisions of relevant legislation from all forms of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - environmental issues
 - occupational health and safety
- principles of effective communication
- range of presentation aids and materials available to support presentations.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • preparation, delivery and evaluation of the effectiveness of at least two presentations related to the candidate's occupation or area of interest • knowledge of the principles of effective communication.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment, documentation and resources.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • demonstration of preparation, delivery and evaluation of a presentation • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of presentations • review of selected presentation aids, materials and techniques • review of briefing provided for others involved in the presentation • evaluation of techniques implemented to review the effectiveness of the presentation.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other general administration units.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Presentation strategies</i> may involve:</p>	<ul style="list-style-type: none"> • case studies • demonstration • discussion • group and/or pair work • oral presentations • questioning • simulations and role-play
<p><i>Presentation format and delivery methods</i> may include:</p>	<ul style="list-style-type: none"> • advertising copy • audio • direct marketing copy • individual presentation • public relations copy • scripts • storyboards • team presentation • verbal presentation • video • visuals
<p><i>Characteristics</i> may include:</p>	<ul style="list-style-type: none"> • age • cultural and language background • educational background or general knowledge • gender • language, literacy and numeracy needs • physical ability • previous experience with the topic
<p><i>Presentation aids and materials</i> may include:</p>	<ul style="list-style-type: none"> • computer simulations and presentations • diagrams, charts and posters • models • overhead projector • paper-based materials • video and audio recordings • whiteboard

RANGE STATEMENT	
<i>Presentation techniques</i> may include:	<ul style="list-style-type: none"> • animation • comparative advertising • live action • music • signature elements such as: <ul style="list-style-type: none"> • slogans • logotypes • packaging • sound effects • use of a guest speaker • use of black and white • use of colour • use of humour
<i>Techniques to evaluate presentation effectiveness</i> may include:	<ul style="list-style-type: none"> • action research • critical friends • focus group interviews • one-on-one interviews with participants and other personnel involved in the presentation • written feedback provided by participants

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify customer needs	<p>1.1. Use <i>appropriate interpersonal skills</i> to accurately identify and clarify <i>customer needs and expectations</i></p> <p>1.2. Assess customer needs for urgency to determine priorities for service delivery in accordance with <i>organisational requirements</i></p> <p>1.3. Use <i>effective communication</i> to inform customers about available choices for meeting their needs and assist in the selection of preferred options</p> <p>1.4. Identify limitations in addressing customer needs and seek appropriate assistance from <i>designated individuals</i></p>
2. Deliver a service to customers	<p>2.1. Provide prompt service to customers to meet identified needs in accordance with organisational requirements</p> <p>2.2. Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery</p> <p>2.3. Sensitively and courteously handle <i>customer complaints</i> in accordance with organisational requirements</p> <p>2.4. Provide assistance or respond to customers with <i>specific needs</i> in accordance with organisational requirements</p> <p>2.5. Identify and use available <i>opportunities</i> to promote and enhance services and products to customers</p>
3. Monitor and report on service delivery	<p>3.1. Regularly review customer satisfaction with service delivery using <i>verifiable evidence</i> in accordance with organisational requirements</p> <p>3.2. Identify opportunities to enhance the quality of service and products, and pursue within organisational requirements</p> <p>3.3. Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements</p> <p>3.4. Regularly seek customer feedback and use to improve the provision of products and services</p> <p>3.5. Incorporate evidence of customer satisfaction in decisions to modify products or services, ensuring they are within organisational requirements</p> <p>3.6. Ensure reports are clear, detailed and contain recommendations focused on critical aspects of</p>

ELEMENT	PERFORMANCE CRITERIA
	service delivery

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read and understand a variety of texts; to prepare general information and papers according to target audience; and to edit and proofread texts to ensure clarity of meaning and accuracy of grammar and punctuation
- technology skills to select and use technology appropriate to a task
- communication skills to monitor and advise on customer service strategies
- problem-solving skills to deal with customer enquiries or complaints
- analytical skills to identify trends and positions of products and services.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - financial legislation
 - occupational health and safety (OHS)
- organisational policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- public relations and product promotion
- techniques for dealing with customers, including customers with specific needs.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- identifying needs and priorities of customers
- distinguishing between different levels of customer satisfaction
- treating customers with courtesy and respect
- responding to and reporting on, customer feedback
- knowledge of organisational policy and procedures for customer service.

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of customer complaints
- examples of documents relating to customer service standards and policies.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of reports on customer service delivery
- analysis of responses to case studies and scenarios
- demonstration of techniques
- oral or written questioning to assess knowledge of customer service strategies.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- sales units
- other customer service units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Appropriate interpersonal skills</i> may include:	<ul style="list-style-type: none"> • listening actively to what the customer is communicating • providing an opportunity for the customer to confirm their request • questioning to clarify and confirm customer needs • seeking feedback from the customer to confirm understanding of needs • summarising and paraphrasing to check understanding of customer message • using appropriate body language
<i>Customers</i> may include:	<ul style="list-style-type: none"> • corporate customers • individual members of the organisation • individual members of the public • internal or external • other agencies
<i>Customer needs and expectations</i> may include:	<ul style="list-style-type: none"> • accuracy of information • advice or general information • complaints • fairness/politeness • further information • making an appointment • prices/value • purchasing organisation's products and services • returning organisation's products and services • specific information
<i>Organisational requirements</i> may include:	<ul style="list-style-type: none"> • access and equity principles and practice • anti-discrimination and related policy • defined resource parameters • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs

RANGE STATEMENT	
	<ul style="list-style-type: none"> • payment and delivery options • pricing and discount policies • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals • replacement and refund policy and procedures • who is responsible for products or services
<i>Effective communication</i> may include:	<ul style="list-style-type: none"> • giving customers full attention • maintaining eye contact, except where eye contact may be culturally inappropriate • speaking clearly and concisely • using active listening techniques • using appropriate language and tone of voice • using clear written information/communication • using non-verbal communication e.g. body language, personal presentation (for face-to-face interactions) • using open and/or closed questions
<i>Designated individuals</i> may include:	<ul style="list-style-type: none"> • colleagues • customers • line management • supervisor
<i>Customer complaints</i> may include:	<ul style="list-style-type: none"> • administrative errors such as incorrect invoices or prices • customer satisfaction with service quality • damaged goods or goods not delivered • delivery errors • product not delivered on time • service errors • warehouse or store room errors such as incorrect product delivered
<i>Specific needs</i> of customers may relate to:	<ul style="list-style-type: none"> • age • beliefs/values • culture • disability • gender • language • religious/spiritual observances
<i>Opportunities</i> to promote and enhance services and products	<ul style="list-style-type: none"> • extending time lines • packaging procedures

RANGE STATEMENT	
may include:	<ul style="list-style-type: none"> • procedures for delivery of goods • returns policy • system for recording complaints • updating customer service charter
<i>Verifiable evidence</i> may include:	<ul style="list-style-type: none"> • customer satisfaction questionnaires • audit documentation and reports • quality assurance data • returned goods • lapsed customers • service calls • complaints

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan financial management approaches	<p>1.1. Access <i>budget/financial plans</i> for the work team</p> <p>1.2. Clarify budget/financial plans with <i>relevant personnel</i> within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible</p> <p>1.3. Negotiate any changes required to be made to budget/financial plans with relevant personnel within the organisation</p> <p>1.4. Prepare <i>contingency plans</i> in the event that initial plans need to be varied</p>
2. Implement financial management approaches	<p>2.1. Disseminate relevant details of the agreed budget/financial plans to team members</p> <p>2.2. Provide <i>support</i> to ensure that team members can competently perform <i>required roles</i> associated with the management of finances</p> <p>2.3. Determine and access <i>resources and systems</i> to manage financial management processes within the work team</p>
3. Monitor and control finances	<p>3.1. Implement <i>processes</i> to monitor actual expenditure and to control costs across the work team</p> <p>3.2. Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns</p> <p>3.3. Implement, monitor and modify contingency plans as required to maintain financial objectives</p> <p>3.4. <i>Report</i> on budget and expenditure in accordance with organisational protocols</p>
4. Review and evaluate financial management processes	<p>4.1. Collect and collate for analysis, <i>data and information on the effectiveness of financial management processes</i> within the work team</p> <p>4.2. Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes</p> <p>4.3. Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- numeracy skills to read and understand a budget and to update a budget
- technology skills to use software associated with financial record keeping.

Required knowledge

- basic accounting principles
- organisational requirements related to financial management
- relevant legislation and current requirements of the Australian Taxation Office, including GST
- requirements for organisational record keeping and auditing
- principles and techniques involved in:
 - budgeting
 - cash flows
 - electronic spreadsheets
 - GST
 - ledgers and financial statements
 - profit and loss statements.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> financial skills required to work with and interpret budgets, ageing summaries, cash flow, petty cash, GST, and profit and loss statements knowledge of the record keeping requirements for the ATO and for auditing purposes.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> assessment of written reports indicating broad knowledge of managing budgets and managing financial resources in the organisation demonstration of techniques using financial record keeping software direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate oral or written questioning to assess knowledge of requirements for organisational record keeping and auditing review of contingency plans review of identification of cost variations and expenditure overruns evaluation of documentation reporting on budget and expenditure review of documentation identifying and recommending improvements to financial management processes.
Guidance information for assessment	Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other units from the Diploma of Management.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Budget/financial plans may include:

- cash flow projections
- long-term budgets/plans
- operational plans
- short-term budgets/plans
- spreadsheet-based financial projections
- targets or key performance indicators for production, productivity, wastage, sales, income and expenditure

Relevant personnel may include:

- financial managers, accountants or financial controllers
- supervisors, other frontline managers

Contingency plans may include:

- contracting out or outsourcing human resources and other functions or tasks
- diversification of outcomes
- finding cheaper or lower quality raw materials and consumables
- increasing sales or production
- recycling and re-using
- rental, hire purchase or alternative means of procurement of required materials, equipment and stock
- restructuring of organisation to reduce labour costs
- risk identification, assessment and management processes
- seeking further funding
- strategies for reducing costs, wastage, stock or consumables
- succession planning

Support may include:

- access to specialist advice
- documentation of procedures
- help desk or identified experts within the organisation
- information briefings or sessions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • intranet-based information • training including mentoring, coaching and shadowing
Required roles may include:	<ul style="list-style-type: none"> • arranging for use of corporate credit cards • banking • debt collection • ensuring security, accuracy and currency of financial operations • invoicing clients, customers and consumers • maintaining journals, ledgers and other record keeping systems • maintaining petty cash system • purchasing and procurement • wages and salaries payments and record keeping
Resources and systems may include:	<ul style="list-style-type: none"> • hardware and software • human, physical or financial resources • record keeping systems (electronic and paper-based) • specialist advice or support
Processes to monitor actual expenditure and to control costs across the work team include:	<ul style="list-style-type: none"> • reporting of: <ul style="list-style-type: none"> • assets • consumables • equipment • expenditure • income • stock • wastage
Reporting may include data from:	<ul style="list-style-type: none"> • bank statements • credit card statements • financial reports • invoices and receipts • ledgers and journals • logs • petty cash records • spreadsheet-based records

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine development needs	<p>1.1. Systematically identify and implement <i>learning and development needs</i> in line with <i>organisational requirements</i></p> <p>1.2. Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and implemented</p> <p>1.3. Encourage individuals to self-evaluate performance and identify areas for improvement</p> <p>1.4. Collect <i>feedback on performance</i> of team members from relevant sources and compare with established team learning needs</p>
2. Develop individuals and teams	<p>2.1. Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry</p> <p>2.2. Ensure that <i>learning delivery methods</i> are appropriate to the learning goals, the learning style of participants, and availability of <i>equipment and resources</i></p> <p>2.3. Provide workplace learning opportunities, and <i>coaching and mentoring assistance</i> to facilitate individual and team achievement of competencies</p> <p>2.4. Create development opportunities that incorporates a range of activities and support materials appropriate to the achievement of identified competencies</p> <p>2.5. Identify and approve resources and time lines required for learning activities in accordance with organisational requirements</p>
3. Monitor and evaluate workplace learning	<p>3.1. Use feedback from individuals or teams to identify and implement improvements in future learning arrangements</p> <p>3.2. Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support</p> <p>3.3. Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning</p> <p>3.4. Document and maintain records and reports of competency according to organisational requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to receive and report on feedback, to maintain effective relationships and to manage conflict
- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- leadership skills to gain trust and confidence of clients and colleagues
- literacy skills to read, write and understand a variety of texts; and to edit and proofread documents to ensure clarity of meaning, accuracy and consistency of information
- negotiation skills to achieve mutually acceptable outcomes
- technology skills to support effective communication and presentation.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- facilitation techniques to encourage team development and improvement
- organisational policies, plans and procedures
- career paths and competency standards relevant to the industry.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> identifying and implementing learning opportunities for others giving and receiving feedback from team members to encourage participation in and effectiveness of team creating learning plans to match skill needs knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to an actual workplace or simulated environment access to office equipment and resources examples of learning and development plans, policies and procedures examples of documents relating to diversity policies and procedures.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate analysis of responses to case studies and scenarios oral or written questioning to assess knowledge of career paths and competency standards relevant to the industry review of records and reports of competency.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> management units other learning and development units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Learning and development needs</i> may include:</p>	<ul style="list-style-type: none"> • career planning/development • coaching, mentoring and/or supervision • formal/informal learning programs • internal/external training provision • performance appraisals • personal study • recognition of current competence/skills recognition • work experience/exchange/opportunities • workplace skills assessment
<p><i>Organisational requirements</i> may include:</p>	<ul style="list-style-type: none"> • access and equity principles and practices • anti-discrimination and related policy • business and performance plans • confidentiality and security requirements • defined resource parameters • ethical standards • goals, objectives, plans, systems and processes • legal and organisational policies, guidelines and requirements • OHS policies, procedures and programs • quality and continuous improvement processes and standards • quality assurance and/or procedures manuals
<p><i>Feedback on performance</i> may include:</p>	<ul style="list-style-type: none"> • formal/informal performance appraisals • obtaining feedback from clients • obtaining feedback from supervisors and colleagues • personal, reflective behaviour strategies • routine organisational methods for monitoring service delivery
<p><i>Learning delivery methods</i> may include:</p>	<ul style="list-style-type: none"> • conference and seminar attendance • formal course participation • induction

RANGE STATEMENT	
	<ul style="list-style-type: none"> • involvement in professional networks • on-the-job coaching or mentoring • presentations/demonstrations • problem-solving • work experience
<i>Equipment and resources</i> may include:	<ul style="list-style-type: none"> • facilities • funding • guest speakers • technological tools and equipment • time • training equipment such as whiteboards and audio-visual equipment
<i>Coaching and mentoring assistance</i> may include:	<ul style="list-style-type: none"> • fair and ethical practice • non-discriminatory processes and activities • presenting and promoting a positive image of the collective group • problem-solving • providing encouragement • providing feedback to another team member • respecting the contribution of all participants and giving credit for achievements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Model high standards of management performance and behaviour	1.1.Ensure management performance and behaviour meets the organisation's requirements 1.2.Ensure management performance and behaviour serves as a positive role model for others 1.3.Develop and implement performance plans in accordance with organisation's goals and objectives 1.4.Establish and use key performance indicators to meet organisation's goals and objectives
2. Enhance organisation's image	2.1.Use organisation's standards and values in conducting business 2.2.Question, through established communication channels, standards and values considered to be damaging to the organisation 2.3.Ensure personal performance contributes to developing an organisation which has integrity and credibility
3. Make informed decisions	3.1.Gather and organise information relevant to the issue/s under consideration 3.2.Facilitate individuals and teams active participation in decision making processes 3.3.Examine options and assess associated risks to determine preferred course/s of action 3.4.Ensure decisions are timely and communicate them clearly to individuals and teams 3.5.Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams 3.6.Use feedback processes effectively to monitor the implementation and impact of decisions

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and presentation skills to represent the organisation, to explain its work to others and to model professionalism
- decision making skills to demonstrate good judgement and follow through.

Required knowledge

- basic theory of group behaviour
- leadership styles and concepts.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- articulation of organisational values and expectations of behaviour
- instances where leadership and decision making have been demonstrated and which have led to positive changes in the workplace
- knowledge of leadership styles and concepts.

Context of and specific resources for assessment

Assessment must ensure:

- access to workplace documents.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of performance in role plays
- observation of presentations
- review of performance plans
- oral or written questioning to assess knowledge of leadership styles
- evaluation of communication of expectations, roles and responsibilities
- review of documentation examining options and assessing associated risks to determine preferred course/s of action.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- other units from the Certificate IV in Frontline Management.

Range Statement

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement operational plan	<p>1.1.Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers</p> <p>1.2.Implement operational plans to contribute to the achievement of organisation's performance/business plan</p> <p>1.3.Identify and use key performance indicators (KPIs) to monitor operational performance</p> <p>1.4.Undertake contingency planning and consultation processes</p> <p>1.5.Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes</p>
2. Implement resource acquisition	<p>2.1.Recruit and induct employees within organisation's policies, practices and procedures</p> <p>2.2.Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel</p>
3. Monitor operational performance	<p>3.1.Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets</p> <p>3.2.Analyse and use budget and actual financial information to monitor profit/productivity performance</p> <p>3.3.Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies</p> <p>3.4.Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely</p> <p>3.5.Present recommendations for variation to operational plans to the designated persons/groups and gain approval</p> <p>3.6.Implement systems, procedures and records associated with performance in accordance with organisation's requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- coaching and mentoring skills to provide support to colleagues
- literacy skills to access and use workplace information, and to prepare reports
- planning and organising skills to monitor performance and to sequence work of self and others to achieve planned outcomes.

Required knowledge

- principles and techniques associated with:
 - contingency planning
 - methods for monitoring and reporting on performance
 - monitoring and implementing operations and procedures
 - problem identification and methods of resolution
 - relevant budgeting and financial analysis, interpretation and reporting requirements
 - resource management systems at the tactical implementation level
 - resource planning and acquisition
 - tactical risk analysis including identification and reporting requirements.

BSBMGT502A Manage people performance

Modification History

Not applicable.

Unit Descriptor

This unit covers the ability of managers to manage the performance of the staff who report to them directly. Development of **key result areas** and **key performance indicators** and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management. It is a unit that all managers/prospective managers who have responsibility for other employees should strongly consider undertaking.

Consider co-assessment with BSBMGT604A Manage business operations.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Allocate work	<ul style="list-style-type: none">1.1 Relevant groups and individuals are consulted on work to be allocated and resources to be deployed1.2 Work is allocated in accordance with operational plans1.3 Allocation of work is cost effective and appropriate in terms of the use of internal/external labour1.4 Performance standards, Code of Conduct and work outputs and processes are confirmed prior to commencement1.5 Performance indicators are developed for key result areas and are agreed prior to commencement of work1.6 Risk analyses are undertaken in accordance with the organisational risk management plan and legal requirements
2 Assess performance	<ul style="list-style-type: none">2.1 Performance management and review processes are designed to be consistent with organisational objectives and policies2.2 Participants in the performance management and review process are trained2.3 Performance management processes are implemented in accordance with planning and timelines2.4 Performance is monitored and evaluated on a continuous basis
3 Provide feedback	<ul style="list-style-type: none">3.1 Informal feedback is given in a regular, timely manner3.2 Poor performance is identified promptly and brought to the attention of the appropriate person3.3 On-the-job coaching is provided when necessary, both to improve performance and confirm excellence in performance

- 3.4 Documentation of performance is in accordance with the performance management system
- 3.5 Formal structured feedback sessions occur as necessary and in accordance with organisational policy
- 4 Manage follow-up
 - 4.1 Performance improvement and development plans are developed in accordance with organisational policies
 - 4.2 Assistance is sought from human resource specialists where appropriate
 - 4.3 Excellence in performance is reinforced through recognition and continuous feedback
 - 4.4 Individuals not meeting expectations are provided with the necessary coaching and re-training and monitored closely
 - 4.5 Support services are provided to meet individual needs and circumstances
 - 4.6 Individuals who continue to perform below expectations are counselled and, where necessary, placed within the disciplinary process
 - 4.7 Terminations occur where serious misconduct or on-going under-performance occurs
 - 4.8 Terminations are in accordance with organisational and legal requirements
 - 4.9 Performance feedback systems are evaluated regularly and revised as necessary
 - 4.1 Selection, induction and training systems are
 - 0 evaluated regularly and improved

Required Skills and Knowledge

Not applicable.

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statement.

Critical Aspects of Evidence

Direct evidence of the performance management processes being undertaken is essential in the assessment of this unit, including the linking of performance indicators to the allocation of work and assessment of performance against performance standards

Workplace coaching (informal feedback) coupled with formal performance feedback, resulting in performance improvement

OHS considerations may include:

establishment and maintenance of OHS training, records, induction processes
performance against OHS legislation and organisation's OHS system, especially policies, procedures and work instructions

Underpinning Knowledge*

* At this level the learner must demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas.

Relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

Relevant awards and certified agreements

Performance measurement systems utilised within the organisation

Key result areas of the organisation

Human resource specialist assistance available

Organisational plans and objectives (strategic, tactical and operational)

Human resource planning

All legislation relevant to the organisation which impacts on people performance (including EEO and anti discrimination laws)

Organisational support services for employees (external and internal)

Unfair dismissal rules and due process

Staff development strategies

Underpinning Skills

Communication/consultation skills to ensure all relevant groups and individuals are advised of what is occurring and are provided with an opportunity for input

Performance measurement skills to develop and manage key performance indicators

Risk management skills to analyse, identify and develop mitigation strategies for identified risks

Coaching and training skills to remediate any under-performance present in the work group or individuals

Counselling/interviewing skills to conduct formal performance feedback sessions including counselling and disciplinary interviews where required

Evaluative skills to review and improve performance management systems

Ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

Resource Implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace

Consistency of Performance

In order to achieve consistency of performance, evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and variety of situations

Context/s of Assessment

Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statement

Assessment must take account of the endorsed assessment guidelines in the Business Services Training Package

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment

Assessment should reinforce the integration of the key competencies and the business services common competencies for the particular AQF level. Refer to the Key Competency Levels at the end of this unit

Key Competency Levels

Collecting, analysing and organising information (Level 3) - to provide feedback

Communicating ideas and information (Level 3) - to ensure that expectations are clearly understood

Planning and organising activities (Level 3) - to undertake risk analysis

Working with teams and others (Level 3) - to assess performance

Using mathematical ideas and techniques (Level 2) - to measure performance

Solving problems (Level 3) - to facilitate improvement where under-performance occurs

Using technology (Level 2) - to support the performance management systems

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies. The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statement.

Critical Aspects of Evidence

Direct evidence of the performance management processes being undertaken is essential in the assessment of this unit, including the linking of performance indicators to the allocation of work and assessment of performance against performance standards

Workplace coaching (informal feedback) coupled with formal performance feedback, resulting in performance improvement

OHS considerations may include:

establishment and maintenance of OHS training, records, induction processes
performance against OHS legislation and organisation's OHS system, especially policies, procedures and work instructions

Underpinning Knowledge*

* At this level the learner must demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas.

Relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

Relevant awards and certified agreements

Performance measurement systems utilised within the organisation

Key result areas of the organisation

Human resource specialist assistance available

Human resource planning

All legislation relevant to the organisation which impacts on people performance (including EEO and anti discrimination laws)

Organisational support services for employees (external and internal)

Unfair dismissal rules and due process

Staff development strategies

Underpinning Skills

Communication/consultation skills to ensure all relevant groups and individuals are advised of what is occurring and are provided with an opportunity for input

Performance measurement skills to develop and manage key performance indicators

Risk management skills to analyse, identify and develop mitigation strategies for identified risks

Coaching and training skills to remediate any under-performance present in the work group or individuals

Counselling/interviewing skills to conduct formal performance feedback sessions including counselling and disciplinary interviews where required

Evaluative skills to review and improve performance management systems

Ability to relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities

Resource Implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace

Consistency of Performance

In order to achieve consistency of performance, evidence should be collected over a set period of time which is sufficient to include dealings with an appropriate range and variety of situations

Context/s of Assessment

Competency is demonstrated by performance of all stated criteria, including paying particular attention to the critical aspects and the knowledge and skills elaborated in the Evidence Guide, and within the scope as defined by the Range Statement

Assessment must take account of the endorsed assessment guidelines in the Business Services Training Package

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment

Assessment should reinforce the integration of the key competencies and the business services common competencies for the particular AQF level. Refer to the Key Competency Levels at the end of this unit

Key Competency Levels

Collecting, analysing and organising information (Level 3) - to provide feedback

Communicating ideas and information (Level 3) - to ensure that expectations are clearly understood

Planning and organising activities (Level 3) - to undertake risk analysis

Working with teams and others (Level 3) - to assess performance

Using mathematical ideas and techniques (Level 2) - to measure performance

Solving problems (Level 3) - to facilitate improvement where under-performance occurs

Using technology (Level 2) - to support the performance management systems

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies

Range Statement

The Range Statement provides advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. The following variables may be present for this particular unit:

Legislation, codes and national standards relevant to the workplace which may include:

award and enterprise agreements and relevant industrial instruments
relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
relevant industry codes of practice

Key result areas means:

those areas of business performance which are critical to the overall success of the business (or section of a business)

Key performance indicators means:

those measures developed to gauge performance outcomes against targets

Performance standards means:

the level of performance sought of an individual or group which may be expressed either quantitatively or qualitatively

Code of Conduct means:

an agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or customers

Risk analysis means:

a determination of the likelihood of a negative event preventing the organisation meeting its objectives and the likely consequences of such an event on organisational performance

Performance management means:

a process or set of processes for establishing a shared understanding of what an individual or group is to achieve, and managing and developing individuals in a way which increases the probability it will be achieved in both the short and longer term
in accordance with relevant industrial agreements

Excellence in performance means:

regularly and consistently exceeding the performance targets established whilst meeting the organisation's performance standards

Coaching refers to:

informal on-the-job and off-the-job advice and training to improve performance

Termination means:

a cessation of the contract of employment between an employer and an employee, at the initiative of the employer within relevant industrial agreements

Relevant groups and individuals include:

employees, employee representatives, employer representatives, line managers and human resource personnel

The Range Statement provides advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. It relates to the unit as a whole and facilitates holistic assessment. The following variables may be present for this particular unit:

Legislation, codes and national standards relevant to the workplace which may include:

award and enterprise agreements and relevant industrial instruments

relevant legislation from all levels of government that affects business operation, especially in regard to Occupational Health and Safety and environmental issues, equal opportunity, industrial relations and anti-discrimination

relevant industry codes of practice

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Allocate work	<p>1.1.Consult relevant groups and individuals on work to be allocated and resources available</p> <p>1.2.Develop work plans in accordance with operational plans</p> <p>1.3.Allocate work in a way that is efficient, cost effective and outcome focussed</p> <p>1.4.Confirm <i>performance standards, Code of Conduct</i> and work outputs with relevant teams and individuals</p> <p>1.5.Develop and agree <i>performance indicators</i> with relevant staff prior to commencement of work</p> <p>1.6.Conduct <i>risk analysis</i> in accordance with the organisational risk management plan and legal requirements</p>
2. Assess performance	<p>2.1.Design <i>performance management</i> and review processes to ensure consistency with organisational objectives and policies</p> <p>2.2.Train participants in the performance management and review process</p> <p>2.3.Conduct performance management in accordance with organisational protocols and time lines</p> <p>2.4.Monitor and evaluate performance on a continuous basis</p>
3. Provide feedback	<p>3.1.Provide informal feedback to staff on a regular basis</p> <p>3.2.Advise relevant people where there is poor performance and take necessary actions</p> <p>3.3.Provide on-the-job coaching when necessary to improve performance and to confirm <i>excellence in performance</i></p> <p>3.4.Document performance in accordance with the organisational performance management system</p> <p>3.5.Conduct formal structured feedback sessions as necessary and in accordance with organisational policy</p>
4. Manage follow up	<p>4.1.Write and agree performance improvement and development plans in accordance with organisational policies</p> <p>4.2.Seek assistance from human resources specialists where appropriate</p> <p>4.3.Reinforce excellence in performance through recognition and continuous feedback</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4. Monitor and coach individuals with poor performance</p> <p>4.5. Provide support services where necessary</p> <p>4.6. Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary</p> <p>4.7. <i>Terminate</i> staff in accordance with legal and organisational requirements where serious misconduct occurs or ongoing poor-performance continues</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to articulate expected standards of performance, to provide effective feedback and to coach staff who need development
- risk management skills to analyse, identify and develop mitigation strategies for identified risks
- planning and organisation skills to ensure a planned and objective approach to the performance management system.

Required knowledge

- relevant legislation from all levels of government that affects business operation, especially in regard to occupational health and safety and environmental issues, equal opportunity, industrial relations and anti-discrimination
- relevant awards and certified agreements
- performance measurement systems utilised within the organisation
- unlawful dismissal rules and due process
- staff development options and information.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> documented performance indicators and a critical description and analysis of performance management system from the workplace techniques in providing feedback and coaching for improvement in performance knowledge of relevant awards and certified agreements.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> analysis of responses to case studies and scenarios assessment of written reports demonstration of techniques in providing feedback and coaching direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate review of work plans, performance indicators, risk analysis, performance management and review processes, performance improvement and development plans.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> other management units.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Performance standards</i> mean:	<ul style="list-style-type: none"> level of performance sought from an individual or group which may be expressed either quantitatively or qualitatively
<i>Code of Conduct</i> means:	<ul style="list-style-type: none"> agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or an agreed (or decreed) set of rules relating to employee behaviour/conduct with other employees or customers
<i>Performance indicators</i> mean:	<ul style="list-style-type: none"> measures against which performance outcomes are gauged
<i>Risk analysis</i> means:	<ul style="list-style-type: none"> determination of the likelihood of a negative event preventing the organisation meeting its objectives and the likely consequences of such an event on organisational performance
<i>Performance management</i> means:	<ul style="list-style-type: none"> in accordance with relevant industrial agreements process or set of processes for establishing a shared understanding of what an individual or group is to achieve, and managing and developing individuals in a way which increases the probability it will be achieved in both the short- and long-term
<i>Excellence in performance</i> means:	<ul style="list-style-type: none"> regularly and consistently exceeding the performance targets established while meeting the organisation's performance standards
<i>Termination</i> means:	<ul style="list-style-type: none"> cessation of the contract of employment between an employer and an employee, at the initiative of the employer within relevant industrial agreements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify marketing opportunities	<p>1.1. Analyse <i>information on market and business needs</i> to identify <i>marketing</i> opportunities</p> <p>1.2. Research potential <i>new markets</i> and assess opportunities to enter, shape or influence the market in terms of likely <i>contribution to the business</i></p> <p>1.3. Explore entrepreneurial, innovative approaches and creative ideas for their potential business application, and develop into potential marketing opportunities</p>
2. Investigate marketing opportunities	<p>2.1. Identify and analyse opportunities in terms of their likely fit with organisational goals and capabilities</p> <p>2.2. <i>Evaluate</i> each opportunity to determine its impact on current business and customer base</p> <p>2.3. Use an assessment of <i>external factors</i>, costs, benefits, risks and opportunities to determine the financial viability of each marketing opportunity</p> <p>2.4. Determine probable return on investment and potential competitors</p> <p>2.5. Describe and rank marketing opportunities in terms of their viability and likely contribution to the business</p>
3. Evaluate required changes to current operations	<p>3.1. Identify and document changes needed to current operations to take advantage of viable marketing opportunities</p> <p>3.2. Ensure organisational changes to service an increased or different customer base include provision for continued quality of service to existing customers</p> <p>3.3. Estimate <i>resource requirements</i> for changed operations</p> <p>3.4. Determine and communicate viability of making changes to current operations to <i>key stakeholders</i></p> <p>3.5. Document newly identified marketing opportunities and required changes</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- culturally appropriate communication skills to relate to people from diverse backgrounds and people with diverse abilities
- literacy skills to identify and interpret market information, to write in a range of styles for different audiences and to document outcomes and requirements
- numeracy skills to calculate and evaluate financial information on new marketing options
- research and evaluation skills to gain information on and interpret market trends to identify marketing opportunities.

Required knowledge

- key provisions of relevant legislation from all forms of government, codes of practice and national standards that may affect aspects of business operations such as:
 - anti-discrimination legislation and the principles of equal opportunity, equity and diversity
 - ethical principles
 - marketing codes of practice and conduct such as the Australian Direct Marketing Association (ADMA) Direct Marketing Code of Practice; Free TV Australia Commercial Television Industry Code of Practice; and the Australian E-commerce Best Practice Model
 - privacy laws
 - Trade Practices Act
- organisational marketing plan, structure, products and services
- principles of marketing and the marketing mix
- statistical methods and techniques to evaluate marketing opportunities, including forecasting techniques.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Provide information to the workgroup about OHS policies and procedures	<p>1.1. Accurately explain relevant provisions of <i>OHS legislation and codes of practice</i> to the workgroup</p> <p>1.2. Provide information to the workgroup on the <i>organisation's OHS policies, procedures and programs</i>, ensuring it is readily accessible by the workgroup</p> <p>1.3. Regularly provide and clearly explain information about <i>identified hazards and the outcomes of risk assessment</i> and control to the workgroup</p>
2. Implement and monitor participative arrangements for the management of OHS	<p>2.1. Explain the importance of effective consultative mechanisms in managing health and safety risks</p> <p>2.2. Implement and monitor consultative procedures to facilitate participation of workgroup in management of work area hazards</p> <p>2.3. Promptly deal with issues raised through consultation, in accordance with <i>organisational consultation procedures</i></p> <p>2.4. Promptly record and communicate to the workgroup the outcomes of consultation over OHS issues</p>
3. Implement and monitor the organisation's procedures for providing OHS training	<p>3.1. Systematically identify OHS training needs in line with organisational requirements</p> <p>3.2. Make arrangements to meet OHS training needs of team members in consultation with relevant individuals</p> <p>3.3. Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate team and individual achievement of identified training needs</p> <p>3.4. Identify and report to management the costs associated with providing training for work team, for inclusion in financial plans</p>
4. Implement and monitor procedures for identifying hazards and assessing risks	<p>4.1. Identify and report on hazards in work area in accordance with OHS policies and procedures</p> <p>4.2. Promptly action team member hazard reports in accordance with organisational procedures</p>
5. Implement and monitor the organisation's procedures for	<p>5.1. Implement <i>procedures to control risks</i> using the hierarchy of controls and organisational requirements</p> <p>5.2. Identify and report inadequacies in existing risk control measures in accordance with the hierarchy of</p>

ELEMENT	PERFORMANCE CRITERIA
controlling risks	controls 5.3. Monitor outcomes of reported inadequacies, where appropriate, to ensure a prompt organisational response
6. Implement and monitor the organisation's procedures for maintaining OHS records for the team	6.1. Accurately complete and maintain OHS records of incidents of occupational injury and disease in work area in accordance with OHS legal requirements 6.2. Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to identify hazards, to assess risks in the work area and to review data relating to monitoring and evaluating incidents (accidents), environmental issues and the effectiveness of risk control measures
- literacy skills to comprehend documentation and to interpret OHS requirements
- coaching and mentoring skills to provide support to colleagues.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - environmental issues
 - OHS
- legal responsibilities of employers, supervisors and employees in the workplace
- hazards and associated risks which exist in the workplace
- organisational policies and procedures relating to hazard management, fire, emergency, evacuation, incident (accident) investigating and reporting
- relevance of consultation as a key mechanism for improving workplace culture.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applying organisational management systems and procedures to OHS within workgroup area
- applying procedures for assessing and controlling risks to health and safety associated with those hazards, in accordance with the hierarchy of controls
- providing specific, clear and accurate information and advice on workplace hazards to workgroup
- knowledge of legal responsibilities of employers, supervisors and employees in the workplace.

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to office equipment and resources
- examples of documentation relating to hazards in the workplace
- examples of documents relating to workplace safety, hazard identification and risk assessment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- review of records communicating the outcomes of consultation over OHS issues to the workgroup
- analysis of responses to case studies and scenarios
- demonstration of techniques
- review of reports to management on the costs associated with providing training for the work team
- oral or written questioning to assess knowledge of workplace safety and hazards
- examples of risk assessments
- evaluation of actioning of team member hazard

EVIDENCE GUIDE	
	<p>reports</p> <ul style="list-style-type: none">• review of OHS records of occupational injury and disease incidents in work area.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none">• management units• other OHS units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>OHS legislation and codes of practice</i> may include:</p>	<ul style="list-style-type: none"> • common law duties to meet the general duty of care requirements • health and safety representatives and health and safety committees • prompt resolution of health and safety issues • provision of information, induction and training • regulations and approved codes of practice relating to hazards present in work area • relevant state/territory legislation • requirements for the maintenance and confidentiality of records of occupational injury and disease
<p><i>Organisation's OHS policies, procedures and programs</i> may include:</p>	<ul style="list-style-type: none"> • consultative arrangements for employees in work area • dangerous goods transport and storage • emergency and evacuation procedures • first aid provision/medical practitioner contact and attention • hazard reporting procedures • hazardous substances use and storage • incident (accident) investigation • OHS arrangements for on site contractors, visitors and members of public • OHS audits and safety inspections • plant and equipment maintenance and use • procedures for hazard identification • procedures for risk assessment, selection and implementation of risk control measures • purchasing policy and procedures • safe operating procedures/instructions • site access • use and care of personal protective equipment

RANGE STATEMENT

Identified hazards and the outcomes of risk assessment may include:

- checking equipment before and during work
- consulting work team members
- daily informal employee consultation and regular formal employee meetings
- housekeeping
- OHS audits and review of audit reports
- review of health and safety records including hazard reports, hazardous substances and dangerous goods registers, injury records
- workplace inspections in area of responsibility

Organisational consultation procedures may include:

- attendance of health and safety representatives at management and OHS planning meetings
- counselling/disciplinary processes
- early response to employee suggestions, requests, reports and concerns put forward to management
- election of health and safety representatives in accordance with legislative requirements
- formal and informal meetings
- health and safety committees
- other committees, for example, planning and purchasing

Procedures to control risks may include:

- consultation with employees and their representatives
- job/process/workplace re-design e.g. introduce mechanical handling equipment, re-arrange material flow/timing/scheduling, raise/lower work platforms
- removing the cause of a risk at its source (eliminating the hazard) e.g. removing stored goods permanently from emergency exit passageways
- selecting control measures in accordance with the hierarchy i.e. work through hierarchy from most effective to least effective control

OHS records may include:

- audit and inspection reports
- consultation e.g. meetings of health & safety committees, workgroup meeting agendas including OHS items and actions
- first aid/medical post records
- hazardous substances registers
- induction, instruction and training

RANGE STATEMENT

	<ul style="list-style-type: none"> • manufacturer's and supplier's information including dangerous goods storage lists • plant and equipment maintenance and testing reports • workers compensation and rehabilitation records • workplace environmental monitoring records

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine requirements or modifications	<p>1.1. Identify and document core business, supporting activities, resources, business and social context, using observation and consultation</p> <p>1.2. Determine security and access requirements for business or records system content from analysis of organisation's activities</p> <p>1.3. Analyse organisational reporting and accountability requirements in the context of the business documentation</p> <p>1.4. Identify organisational functions and activities for which records must be kept, from analysis of business and context documentation</p> <p>1.5. Determine nature, detail, and format of records (content and metadata) for each organisational function from analysis of the business and its context</p>
2. Devise an appropriate recordkeeping system	<p>2.1. Determine metadata needed to manage records (store, locate and retrieve) in a business or records system</p> <p>2.2. Select scale, and number of business or records systems appropriate to scale and nature of business operations</p> <p>2.3. Select technological requirements of business or records systems appropriate to scale and nature of business operations</p> <p>2.4. Select cost structure for business or records systems appropriate to scale, nature, and organisational cash flow requirements</p> <p>2.5. Ensure maintenance, disposal and updating requirements of business or records system conform to scale, nature, and culture of the organisation</p> <p>2.6. Select business or records system suited to the projected growth of the organisation</p>
3. Develop an implementation plan	<p>3.1. Identify and document recordkeeping responsibilities of individual personnel or organisational units</p> <p>3.2. Develop measurable performance indicators for recordkeeping activities</p> <p>3.3. Develop procedures and guidelines for capturing and controlling records</p> <p>3.4. Communicate an implementation plan to users of the system and other relevant organisational staff</p>

ELEMENT	PERFORMANCE CRITERIA
4. Monitor and review business or records system	<p>4.1.<i>Monitor</i> and notify staff in accordance with approved timeframes, frequency, and <i>organisational policies and guidelines</i> where applicable</p> <p>4.2.Record details of <i>variation</i> from business or records system's rules, standards and procedures that exceed agreed limits</p> <p>4.3.Provide required <i>reports</i> to <i>appropriate authority</i> relating to use and maintenance of records</p> <p>4.4.Designate responsibilities to staff for record creation and capture activities in accordance with organisational policies</p>
5. Identify and respond to problems and changes	<p>5.1.Identify any <i>problems and changes</i> that require a <i>systemic response</i> using the monitoring reports and external events</p> <p>5.2.Make recommendations for <i>revisions</i> to systems, procedures, and strategic plans in response to identified variations, changes and problems</p> <p>5.3.Devise amendments to systems and implementation or other plans where required</p> <p>5.4.Prepare recommendations for system amendments, planning and implementation</p> <p>5.5.Authorise or gain authorisation, for procedures for using the business or records systems, and for any subsequent alterations and amendments to the procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to explain and clarify procedures, and to interview users to identify their records or information needs
- literacy skills to read and interpret nature of record content, functions and problems
- negotiation skills to achieve suitable results for the organisation's recordkeeping practices
- problem-solving and analysis skills to interpret and apply recordkeeping principles and practices
- research skills to investigate changes and innovation in design and operation of business or records system
- self management skills to accurately record metadata.

Required knowledge

- construction and use of language in the organisation in relation to recordkeeping (past and present)
- key provisions of relevant legislation from all forms of government, regulations, standards and documentation that may affect aspects of business operations, such as:
 - AS 5044.1:2002 AGLS Metadata element set
 - AS 5090:2003 Work process analysis for recordkeeping
 - AS ISO 15489:2004 Records management
 - AS ISO 23081.1:2006 Information and documentation - Records management processes - Metadata for records - Principles
 - Australian Stock Exchange(ASX) Principles of Good Corporate Governance
 - ethical principles
 - codes of practice
 - privacy and freedom of information
 - archives and records legislation
 - occupational health and safety
- general principles and processes of records management and records management systems, such as:
 - systems of control
 - records continuum theory
 - mandate and ownership of business process
- organisational business functions, structure and culture
- organisational policies, strategies and procedures, particularly those relating to records access and security.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • translating organisational needs into a business or records system • developing business or records system specifications and performance indicators to monitor and address system effectiveness • knowledge of relevant organisational policies, strategies and procedures.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • access to examples of records, recordkeeping systems and policies • access to workplace reference materials such as procedural manuals and company policies.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • demonstration of techniques • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of reports provided to appropriate authority relating to use and maintenance of records • oral or written questioning to assess knowledge of principles and processes of recordkeeping systems.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • administration units • other knowledge management units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Documenting core business may involve identifying:

- diagrammatic representations
- formal documents
- hand written documents
- informal communications
- online instructions or computer-based format instructions that can be updated
- paper-based manuals
- other texts

Resources may include:

- human resources and their availability
- location of resources currently in operation
- physical resources
- technological resources
- those available for purchase or development

Business and social context may include:

- clients or customers and their expectation
- codes of ethics and codes of professional conduct specific to industry sector
- industry sector characteristics and reporting requirements of that sector
- internal and external accountability requirements
- internal and external stakeholders whose interests must be taken into account
- other relevant legislation and regulations, including those covering:
 - business activity reporting
 - business and income (PAYE) taxation
 - corporation law reporting requirements
 - environmental protection and waste management
 - goods and services tax collection
 - industrial relations
 - occupational health and safety
 - privacy protection

RANGE STATEMENT	
	<ul style="list-style-type: none"> • statutory access rights and freedom of information • superannuation • internal and external stakeholders whose interests must be taken into account • social and ethical standards the community expects the organisation to meet
<i>Consultation</i> may include organisation's:	<ul style="list-style-type: none"> • head office • local management • principals • staff
<i>Organisational functions and activities</i> that may be documented may include:	<ul style="list-style-type: none"> • asset management • conventional and email correspondence • customer relationship management • human resources management • invoicing and sales • legislative, regulatory and licensing compliance • marketing and promotion • purchasing and expenditure • research and development • risk management • stock control
<i>Metadata</i> are those records which are maintained about the records themselves and may include:	<ul style="list-style-type: none"> • activity classification terms • date, time, and location of record creation or registration into the system • identity of record creator • indexing and descriptive terms • record format • security and access information • unique identifiers for each record
<i>Business or records systems</i> may include:	<ul style="list-style-type: none"> • archival control systems • business systems • cash register-based systems • characteristics relating to: <ul style="list-style-type: none"> • aggregations • context • entities • metadata • current business or records systems

RANGE STATEMENT	
	<ul style="list-style-type: none"> • electronic records and document management system (ERDMS) • informal • paper-based accumulation and card systems • PC-based accounting systems, employee and tax records systems • proprietary recordkeeping package • storage facilities systems
<i>Measurable performance indicators</i> may be developed:	<ul style="list-style-type: none"> • from a strategic plan • in consultation with those who will undertake the specific tasks
<i>Measurable performance indicators</i> may include:	<ul style="list-style-type: none"> • disposal (percentage of records, unsentenced records, those overdue for disposal action and functions or records not covered by disposal schedules) • parameters for tracking of records • retrieval and access (security and access rules, response to request time limits, service levels for requests) • records creation and capture performance
<i>Procedures and guidelines</i> may include:	<ul style="list-style-type: none"> • acceptable range of variation for compliance • system requirements
<i>Monitoring</i> may relate to:	<ul style="list-style-type: none"> • broad accumulation and growth monitoring • checking spelling, spacing and numbering • continuing relevance of classification • disposal schedule applicability • examining titling and indexing at item level • new records specifications • number of systems • observation of localised rules and continuing relevance of classification • records creation and capture performance targets • single records management system
<i>Organisational policies and guidelines</i> may include:	<ul style="list-style-type: none"> • actions in relation to freedom of information legislation • actions or accumulations of records above or below anticipated levels • audit trail or log of users and activity in systems • changes in use of classification and indexing

RANGE STATEMENT	
	<ul style="list-style-type: none"> terms access rules disposal procedures procedures in relation to disparity, sentencing difficulties or gaps in retention and disposal schedule coverage procedures in relation to disputes arising from any matters, particularly access questions failures in tracking or increases in lost items input of metadata requirements legal precedents requiring changes to systems privacy requirements quality of recordkeeping about records records of authorisation of destruction procedures in relation to reliability of optical character recognition techniques retention of records in relation to a schedule scanned images security requirements specified access restrictions, in the public sector storage standards and maintenance schedules
<i>Variations</i> may include:	<ul style="list-style-type: none"> increases or decreases in the use of particular technologies variations from the business or records system's performance or capacity variations within the agreed limit which are inconsistent
<i>Reports</i> may include:	<ul style="list-style-type: none"> compliance maintenance record capture record creation records use
<i>Appropriate authority</i> may include:	<ul style="list-style-type: none"> audit committee board of directors committee of management business owner chief executive officer delegated individual external public authority nominated senior management representative

RANGE STATEMENT	
	<ul style="list-style-type: none"> • recordkeeping professionals • senior management team
<i>Problems and changes</i> may include:	<ul style="list-style-type: none"> • case-law precedents • changes in administrative changes to functions and activities • changes of government • changes to organisational structures • closures and bankruptcy • legislative or other regulatory changes • outsourcing and privatisation • takeovers, amalgamations or relocation • technological change and implementation
<i>Systemic responses</i> may include:	<ul style="list-style-type: none"> • amendment/s to the classification system • bulk movement of records to control • migration of systems • new classification and controlled language • new disposal classes or retention periods • new legal liabilities and other risks identified requiring changes to records specifications • new organisational or business unit functions
<i>Revisions</i> may be made to:	<ul style="list-style-type: none"> • access rules and procedures • classification and indexing schemes • disposal schedules • records specifications • storage projections and requirements

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise and complete own work schedule	<p>1.1.Ensure that <i>work goals and objectives</i> are understood, negotiated and agreed in accordance with <i>organisational requirements</i></p> <p>1.2.Assess and prioritise workload to ensure tasks are completed within identified timeframes</p> <p>1.3.Identify <i>factors affecting the achievement of work objectives</i> and incorporate contingencies into work plans</p> <p>1.4.Use <i>business technology</i> efficiently and effectively to manage and monitor scheduling and completion of tasks</p>
2. Monitor own work performance	<p>2.1.Accurately monitor and adjust personal work performance through self-assessment to ensure achievement of tasks</p> <p>2.2.Ensure that <i>feedback on performance</i> is actively sought and evaluated from colleagues and clients in the context of individual and group requirements</p> <p>2.3.Routinely identify and report on variations in the quality of service and products in accordance with organisational requirements</p> <p>2.4.Identify <i>signs of stress</i> and effects on <i>personal wellbeing</i></p> <p>2.5.Identify <i>sources of stress</i> and access appropriate <i>supports and resolution strategies</i></p>
3. Coordinate personal skill development and learning	<p>3.1.Identify personal learning needs and skill gaps using self-assessment and advice from colleagues and clients in relation to role and organisational requirements</p> <p>3.2.Identify, prioritise and plan opportunities for undertaking personal skill development activities in liaison with work groups and relevant personnel</p> <p>3.3.Access, complete and record <i>professional development opportunities</i> to facilitate continuous learning and career development</p> <p>3.4.Incorporate formal and informal feedback into review of further learning needs</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- literacy skills to read and understand the organisation's procedures, own work goals and objectives
- planning skills to organise work priorities and arrangements
- problem-solving skills to solve routine problems
- communication skills to give and receive constructive feedback relating to development needs.

Required knowledge

- key provisions of relevant legislation from all levels of government that may affect aspects of business operations, such as:
 - anti-discrimination legislation
 - ethical principles
 - codes of practice
 - privacy laws
 - occupational health and safety (OHS)
- organisational policies, plans and procedures
- methods to elicit, analyse and interpret feedback
- principles and techniques of goal setting, measuring performance, time management and personal assessment
- competency standards and how to interpret them in relation to self
- methods to identify and prioritise personal learning needs.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • preparing work plans • scheduling and prioritising work objectives and tasks • knowledge of the principles and techniques of goal setting, measuring performance, time management and personal assessment.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to an actual workplace or simulated environment • access to office equipment and resources • examples of work schedules and performance improvement plans.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • review of self-assessment documentation outlining learning and development needs • analysis of responses to case studies and scenarios • demonstration of techniques • oral or written questioning to assess knowledge of methods to identify and prioritise personal learning needs • evaluation of planning for personal skill development activities and professional development opportunities.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p> <ul style="list-style-type: none"> • other industry capability units.

Range Statement

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan to achieve team outcomes	<p>1.1. Identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members</p> <p>1.2. Support team members in meeting expected outcomes</p>
2. Develop team cohesion	<p>2.1. Provide opportunities for input of team members into planning, decision making and operational aspects of work team</p> <p>2.2. Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3. Provide feedback to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4. Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required</p>
3. Participate in and facilitate work team	<p>3.1. Actively encourage team members to participate in and take responsibility for team activities and communication processes</p> <p>3.2. Give the team support to identify and resolve problems which impede its performance</p> <p>3.3. Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers</p>
4. Liaise with management	<p>4.1. Maintain open communication with line manager/management at all times</p> <p>4.2. Communicate information from line manager/management to the team</p> <p>4.3. Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken</p> <p>4.4. Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - boost team morale
 - deal with team conflict
 - deliver messages from management
 - facilitate discussion
 - mentor and coach
- leadership skills
- planning and organising skills.

Required knowledge

- organisational goals, objectives and plans
- organisational policy and procedures framework
- organisational structure, including organisational chart
- principles and techniques associated with:
 - delegation and work allocation
 - goal setting
 - group dynamics and processes
 - individual behaviour and difference
 - leadership
 - motivation
 - negotiation
 - planning.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to facilitate all aspects of teamwork within the organisation. It involves taking a leadership role in the development of team plans, leading and facilitating teamwork and actively engaging with the management of the organisation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit applies to managers and addresses the need for managers to facilitate work teams and to build a positive culture within work teams. The unit takes a systematic and planned approach to developing teams. It includes the soft skills as well as more structured approaches to the management of teams.

At this level, work will normally be carried out within complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

	fail to abide by agreements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to advocate, consult, negotiate and mediate conflict
- innovation and problem-solving skills to manage sensitive and important issues
- planning and time management skills to meet critical deadlines, to sequence tasks, to prepare submissions and to present cases.

Required knowledge

- enterprise and workplace bargaining processes
- key entities in the Australian industrial relations system, including courts and tribunals, trade unions, employer bodies
- relevant industrial, occupational health and safety, equal opportunity and anti-discrimination legislation in both the Commonwealth and state jurisdictions.

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the following is essential:</p> <ul style="list-style-type: none"> • demonstrated understanding of contemporary industrial issues and legislation • documented strategies and procedures for dealing with grievances and disputes • performance of negotiation/conflict resolution techniques • knowledge of relevant legislation.
Context of and specific resources for assessment	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> • access to appropriate documentation and resources normally used in the workplace.
Method of assessment	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> • analysis of responses to case studies and scenarios • assessment of written reports on industrial issues • direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate • observation of demonstrated techniques in negotiation and case presentation • observation of presentations • oral or written questioning to assess knowledge of industrial relations legislation • review of documentation outlining long-term industrial relations objectives • review of implementation plan and contingency plan • evaluation of documentation communicating key issues about procedures for addressing grievances and conflict.
Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:</p>

EVIDENCE GUIDE

- other units from the Diploma of Human Resource Management.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Long-term industrial relations objectives</i> may relate to:</p>	<ul style="list-style-type: none"> • effective management of grievances, conflict situations and dispute resolution procedures • employee commitment • employee satisfaction • job design • negotiation outcomes • organisational culture • relations with unions or other peak bodies • restructuring • salary, remuneration, benefits or bonuses • workforce planning • workplace reform
<p><i>Cost benefit</i> means:</p>	<ul style="list-style-type: none"> • calculation to determine whether the results/outcomes of a particular course of action are sufficient to justify the costs and risks in taking that action
<p><i>Risk analysis</i> means:</p>	<ul style="list-style-type: none"> • determination of the likelihood of a negative event preventing the organisation meeting its objectives and the likely consequences of such an event on organisational performance
<p><i>Implementation plan</i> may include:</p>	<ul style="list-style-type: none"> • documented objectives, methodology and timeframe • project plan
<p><i>Associated industrial relations activities</i> may include:</p>	<ul style="list-style-type: none"> • clarification of terms and conditions of employment of those persons affected • consultation with employee representatives including unions and elected staff representatives • ensuring the legality of proposed strategies, policies and initiatives • referring to employer representatives for advice and support
<p><i>Conflict management</i></p>	<ul style="list-style-type: none"> • controlling difficult situations using legal remedies

RANGE STATEMENT	
<i>techniques/procedures</i> may include:	<ul style="list-style-type: none"> dispute resolution procedures negotiating/bargaining
<i>Certify</i> refers to:	<ul style="list-style-type: none"> Australian Workplace Agreements workplace collective agreements

CHCCAR501B Conduct career guidance interview

Modification History

Not Applicable

Unit Descriptor

Descriptor

This unit describes the knowledge and skills required to work with clients to assist them to identify their career interests and options and to assist them to make decisions to match informed career decisions

Application of the Unit

Application

This unit applies to assisting clients in career guidance

Service delivery may take place in a range of settings

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Not Applicable

Employability Skills Information

Employability Skills

This unit contains Employability Skills

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in *italics* are elaborated in the Range Statement.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Initiate exploratory activities with the client

- 1.1 Put in place *client interview arrangements* to facilitate interactive sessions and to establish rapport with the client
- 1.2 Greet client and establish areas of interest
- 1.3 Clarify the role of the career guidance worker and client expectations of the client of the organisation
- 1.4 Explain rights and responsibilities of client
- 1.5 Clarify client's expectations and needs to ensure their issues and motivations are suited to career guidance situation
- 1.6 Collect and document client information in accordance with organisation procedures
- 1.7 Apply appropriate questioning techniques and reflective listening to identify needs and interests of the client
- 1.8 Use a range of appropriate career exploratory activities to assist clients to focus their career search activities
- 1.9 Apply current knowledge of labour market and *career information* to conduct client interview
- 1.10 Implement processes to maintain client confidentiality in accordance with organisation policies and procedures

ELEMENT**PERFORMANCE CRITERIA****2. Facilitate client identification of career interests and needs**

- 2.1 Provide appropriate *career exploration activities* and *career self-assessment instrument/s* for self administration by the client, according to the scope of work role and organisation requirements
- 2.2 Modify self-assessment instrument/s if required, to match client needs and cultural variations
- 2.3 Provide appropriate guidance, support and monitoring to ensure self administration of career assessment instruments can proceed
- 2.4 Conduct follow up interviews with the client to confirm outcomes of self-assessment and assist clients to explore options that match to their self assessment outcomes
- 2.5 Assist client to identify areas where they want to take action

3. Assist client to develop a strategy to address their needs and interests

- 3.1 Assist client to prioritise areas for further investigation
- 3.2 Provide client with information about how their self assessment relates to job profiles, educational and training pathway requirements and employment opportunities
- 3.3 Assist client to identify workable strategies to address their priority interest areas
- 3.4 Assist client to develop their own action plans to address their preferences and needs
- 3.5 Identify areas where clients may require referral to specialists agencies or other professionals
- 3.6 Identify the range of support services able to be provided to the client by the organisation and other organisations
- 3.7 Develop and implement an ongoing plan with the client defining any additional support required
- 3.8 Implement processes to evaluate the effectiveness of services and support provided to the client

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Accepted methods for defining jobs
- Theoretical foundations and framework that underpin career guidance activities
- Factors influencing individual decision-making
- Current labour market trends
- Occupational groups, clusters and networks
- Pathways to occupational areas
- Law and policy that impacts on employment
- Good working knowledge of local employment options and support networks available
- Role and responsibilities of self and other staff in the organisation
- Clients rights and responsibilities in the organisation
- Knowledge specific to working with people from culturally and linguistically diverse backgrounds
- Knowledge of education and training options and pathways

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Apply a knowledge of career guidance theory and practice
- Apply a current knowledge of the world of work
- Collect relevant financial information to determine client's needs and interests
- Provide accurate and relevant information particularly in respect to career matters
- Assess the need of the client to be referred to other services

In addition, the candidate must be able to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include the ability to:

REQUIRED SKILLS AND KNOWLEDGE

- Conduct research to maintain currency of information, including effective use of relevant information technology in line with occupational health and safety (OHS) guidelines
- Apply high level computer skills
- Demonstrate a non-judgemental approach to working with people
- Work with cultural sensitivity
- Apply verbal and non-verbal communication skills
- Demonstrate referral skills
- Apply problem solving and analytical skills

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- This unit is best assessed in the workplace or in a simulated workplace under the normal of range conditions
- Assessment should be gathered on one or more occasions but must reflect the normal range of client situations encountered in the workplace

EVIDENCE GUIDE

- Access and equity considerations:*
- All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work
 - All workers should develop their ability to work in a culturally diverse environment
 - In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people
 - Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities
- Context of and specific resources for assessment:*
- This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged
 - Resources required for assessment include:
 - access to appropriate workplace where assessment can take place, or simulation of realistic workplace setting for assessment
- Method of assessment:*
- Assessment may include observation, questioning and evidence gathered from the workplace environment
 - Workplace evidence can be testimonials, portfolios or copies of completed workplace records/documentation
- Related units:*
- This unit of competency is recommended to be assessed in conjunction with related units:
- CHCCOM403A Use targeted communication skills to build relationships
 - CHCES411A Collect, analyse and apply labour market information

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Career exploration activities include:

- Discussion and simple inventories on interests, values, skills and motivation

Client interview arrangements include:

- Arranging seating
- Access to computers
- Ready access to career information
- Establishing timeframes for the session
- Establishing roles and responsibilities

Response to requests for information will take into consideration the client's:

- Language and literacy level
- Cultural factors
- Previous contact
- Disabilities

Career self assessment instrument/s may be:

- Paper based and computer generated

Modify self assessment instrument may include:

- Translation
- Explaining terminology
- Removing culturally biased information
- Contextualisation to local conditions

RANGE STATEMENT

Career information includes:

- National job information and data
- Local employment information
- Information on employment conditions
- Information on training requirements

Information on the service and other relevant services may be delivered in the form of:

- Informal discussion
- Published material, newsletters/circulars, leaflets/brochures
- Correspondence/written reports
- Audio-visual
- Posters/graphic representation

Information may be given about the following types of services:

- Government and non government services e.g. education/training, employment, social/recreation, counselling, financial, self help, advocacy, transport
- People with relevant special qualities, knowledge and/or expertise
- Government allowances, pensions and benefits
- Cross cultural services

Appropriate services may include:

- Centrelink
- Support agencies for mental health, domestic violence, alcohol and other drugs (AOD) issues etc.
- Accommodation agencies including emergency housing agencies
- Local community support networks
- Financial assistance agencies
- Emergency relief agencies
- Dispute Resolution Services
- Recruitment services

Unit Sector(s)

Not Applicable

HLTFA201A Provide basic emergency life support

Modification History

Unit Descriptor

This unit of competency describes the skills and knowledge required to recognise and respond to life threatening emergencies using basic life support measures only

Application of the Unit

The skills and knowledge described here enable a first aider to provide an initial response to an emergency in line with practised actions and Australian Resuscitation Council (ARC) Guidelines and/or state/territory regulations, legislation and policies and accepted industry guidelines

Application should be contextualised as required to reflect workplace and community requirements relating to specific risks and hazards and associated injuries

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in *italics* are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Respond in an emergency situation	<ul style="list-style-type: none">1.1 Recognise emergency situation and identify hazards to health and safety of self and others1.2 Minimise immediate risk to health and safety of self, casualty and others by isolating any hazard(s)1.3 Assess casualty and identify injuries, illnesses and conditions1.4 Assess the need for assistance
2 Apply identified first aid procedures	<ul style="list-style-type: none">2.1 Reassure casualty in a caring and calm manner and make comfortable using available resources2.2 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort2.3 Seek consent from casualty or significant other prior to applying first aid management2.4 Respond to the casualty in a culturally aware, sensitive and respectful manner2.5 Use identified first aid procedures as required in accordance with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements2.6 Use safe manual handling techniques as required
3 Communicate details of the incident	<ul style="list-style-type: none">3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances and using available means of communication3.2 Accurately convey assessment of casualty's condition and first aid procedures undertaken to emergency services/relieving personnel3.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness

- 3.4 Provide reports, where applicable, in a timely manner, presenting all relevant facts according to established procedures
 - 3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
- 4 Evaluate own performance
 - 4.1 Seek feedback from **appropriate clinical expert**
 - 4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents
 - 4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

Basic anatomy and physiology relating to:

severe bleeding

absence of signs of life:

unconscious

unresponsive

not moving

not breathing normally

choking/airway obstruction

shock

First aid procedures for:

bleeding control

care of unconscious

infection control as it relates to standard precautions

airway management

chest pain

casualty with no signs of life

shock

respiratory distress, including asthma

severe allergic reaction

Chain of survival

How to access emergency response support services/personnel

Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

State/territory regulations, legislation and policies, ARC Guidelines and accepted industry

practice relating to currency of skill and knowledge
Privacy and confidentiality requirements
Duty of care requirements
Need to be culturally aware, sensitive and respectful
Relevant workplace hazards
Own skills and limitations
Awareness of stress management techniques and available support

Essential skills:

Ability to:

Demonstrate first aid casualty management principles:

assess and minimise danger
check for response
maintain casualty's airway, breathing and circulation.

Assess vital signs and responses of casualty

Demonstrate:

safe manual handling of casualty.
consideration of the welfare of the casualty
correct procedures for CPR on a resuscitation manikin
implementation of standard precautions

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or state/territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own level of skills and knowledge

Call an ambulance and/or medical assistance, according to circumstances and report casualty's condition

Identify and minimise hazards to health and safety of self and others in the immediate workplace or community environment

Report details of emergency incident and first aid provided

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team.

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of CPR knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:

For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Condition of the casualty must include, but is not limited to:

Severe bleeding
Absence of signs of life:
unconscious
unresponsive
not moving
not breathing normally

Choking/airway obstruction
Severe allergic reaction

Identified first aid procedures must include:

Cardiopulmonary Resuscitation (CPR)
Control severe bleeding
Airway management
Provide assistance with self-administered medications, such as auto-injector, puffer/inhaler in line with state/territory regulations, legislation and policies and any available medical/pharmaceutical instructions
Care of the unconscious person

Resources and equipment may include:

First aid kit
Resuscitation mask or barrier
Casualty's medication
Manikin
AED (if available)
Auto-injector
Puffer/inhaler

A hazard is:

A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

Appropriate clinical expert may include:

Supervisor/manager

Ambulance officer/paramedic

Other medical/health worker

Unit Sector(s)

HLTFA301B Apply first aid

Modification History

Unit Descriptor

This unit of competency describes the skills and knowledge required to provide first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance

Application of the Unit

These skills and knowledge may be applied in a range of situations, including community and workplace settings

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

A current Senior First Aid, Workplace Level 2 or Level 2 qualification may provide evidence of skills and knowledge required by this competency unit. However, as with all evidence of competence, evidence must be assessed against the requirements specified in the competency unit

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in *italics* are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess the situation	<ul style="list-style-type: none">1.1 Identify assess and minimise hazards in the situation that may pose a risk of injury or illness to self and others1.2 Minimise immediate risk to self and casualty's health and safety by controlling any hazard in accordance with occupational health and safety requirements1.3 Assess casualty and identify injuries, illnesses and conditions
2 Apply first aid procedures	<ul style="list-style-type: none">2.1 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness2.2 Use available resources and equipment to make the casualty as comfortable as possible2.3 Respond to the casualty in a culturally aware, sensitive and respectful manner2.4 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort2.5 Seek consent from casualty prior to applying first aid management2.6 Provide first aid management in accordance with established first aid principles and Australian Resuscitation Council (ARC) Guidelines and/or State/Territory regulations, legislation and policies and industry requirements2.7 Seek first aid assistance from others in a timely manner and as appropriate2.8 Correctly operate first aid equipment as required for first aid management according to manufacturer/supplier's instructions and local policies and/or procedures

- 2.9 Use safe manual handling techniques as required
- 2.1 Monitor **casualty's condition** and respond in accordance with effective first aid principles and procedures
- 2.1 Finalise casualty management according to casualty's needs and first aid principles
- 3 Communicate details of the incident
 - 3.1 Request ambulance support and/or appropriate medical assistance according to relevant circumstances using relevant **communication media and equipment**
 - 3.2 Accurately convey assessment of casualty's condition and management activities to ambulance services /other emergency services/relieving personnel
 - 3.3 Prepare reports as appropriate in a timely manner, presenting all relevant facts according to established procedures
 - 3.4 Accurately record details of casualty's physical condition, changes in conditions, management and response to management in line with established procedures
 - 3.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies
- 4 Evaluate own performance
 - 4.1 Seek feedback from **appropriate clinical expert**
 - 4.2 Recognise the possible psychological impacts on rescuers of involvement in critical incidents
 - 4.3 Participate in debriefing/evaluation as appropriate to improve future response and address individual needs

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

ARC Guidelines relating to provision of first aid as outlined

Working knowledge of:

basic principles and concepts underlying the practice of first aid

procedures for dealing with major and minor injury and illness

priorities of management in first aid when dealing with life threatening conditions

basic occupational health and safety requirements in the provision of first aid

infection control principles and procedures, including use of standard precautions

chain of survival

first Aiders' skills and limitations

Understanding of the use of an Automated External Defibrillator (AED), including when to use and when not to

First aid management of:

abdominal injuries

allergic reactions

altered and loss of consciousness

bleeding

burns - thermal, chemical, friction, electrical

cardiac arrest

casualty with no signs of life

chest pain

choking/airway obstruction

injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

envenomation - snake, spider, insect and marine bites

environmental impact such as hypothermia, hyperthermia, dehydration, heat stroke

fractures

medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

near drowning

poisoning and toxic substances (including chemical contamination)

respiratory distress

seizures

shock

stroke

substance misuse - common drugs and alcohol, including illicit drugs

Awareness of stress management techniques and available support

Social/legal issues:

duty of care

need to be culturally aware, sensitive and respectful

importance of debriefing

confidentiality

own skills and limitations

Essential skills:

Ability to:

Conduct an initial casualty assessment

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills

Demonstrate correct procedures for performing CPR using a manikin, including standard precautions (i.e. as per unit **HLTCPR201A Perform CPR**)

Apply first aid principles

Infection control, including use of standard precautions

Follow OH&S guidelines

Demonstrate:

safe manual handling

consideration of the welfare of the casualty

ability to call an ambulance

site management to prevent further injury

Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available medical/pharmaceutical instructions

Administer medication in line with state/territory regulations, legislation and policies

Prepare a written incident report or provide information to enable preparation of an incident report

Communicate effectively and assertively in an incident

Make prompt and appropriate decisions relating to managing an incident in the workplace

Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition

Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Evaluate own response and identify appropriate improvements where required

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package. The evidence guide supplements assessment requirements that apply to all units in this Training Package. Users of this evidence guide should first read the package's assessment guidelines.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Context and resources required for assessment:

Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge

For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with Australian Resuscitation Council Guidelines

Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

Focus on first aid management of specific types of injury

First aid provision under specific constraints or circumstances (e.g. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

Established first aid principles include:	Preserve life Prevent illness, injury and condition(s) becoming worse Promote recovery Protect the unconscious casualty
Vital signs include:	Consciousness Breathing Circulation
A hazard is:	A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these
Hazards may include:	Physical hazards Biological hazards Chemical hazards Hazards associated with manual handling
Risks may include:	Risks from equipment, machinery and substances Risks from first aid equipment Environmental risks Exposure to blood and other body substances Risk of further injury to the casualty Risks associated with the proximity of other workers and bystanders Risks from vehicles

Casualty's condition is managed for:

Abdominal injuries

Airway obstruction

Allergic reactions

Altered and loss of consciousness

Bleeding

Burns - thermal, chemical, friction, electrical

Chest pain/cardiac arrest

Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

Near drowning

Envenomation - snake, spider, insect and marine bites

Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke

Fractures

Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

No signs of life

Poisoning and toxic substances (including chemical contamination)

Respiratory distress/arrest

Seizures

Shock

Stroke

Substance misuse - common drugs and alcohol, including illicit drugs.

First aid management must take into account applicable aspects of:

The setting in which first aid is provided, including:

workplace policies and procedures

industry/site specific regulations, codes etc.

OHS requirements

state and territory workplace health and safety legislative requirements

location and nature of the incident

situational risks associated with, for example, electrical and biological hazards, weather, motor vehicle accidents

location of emergency services personnel.

The use and availability of first aid equipment and resources

Infection control

Legal and social responsibilities of first aider

Resources and equipment are used appropriate to the risk to be met and may include:

AED

First aid kit

Auto-injector

Puffer/inhaler

Resuscitation mask or barrier

Spacer device

Communication media and equipment may include but are not limited to:

Telephones, including landline, mobile and satellite phones

HF/VHF radio

Flags

Flares

Two way radio

Email

Electronic equipment

Hand signals

Appropriate clinical expert may include:

Supervisor/manager

Ambulance officer/paramedic

Other medical/health worker

Documentation may include:

Injury report forms

Workplace documents as per organisation requirements

Documentation may include recording:

Time

Location

Description of injury

First aid management

Fluid intake/output, including fluid loss via:
blood

vomit

faeces

urine

Administration of medication including:

time

date

person administering

dose

Vital signs

Unit Sector(s)

HLTFA402B Apply advanced first aid

Modification History

Unit Descriptor

This unit deals with the provision of advanced first aid response, life support, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance, and provision of support to other providers

This unit builds on HLTFA301B: Apply first aid to include additional skills and use of a range of equipment

Application of the Unit

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

Licensing/Regulatory Information

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in *italics* are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess the situation	<ul style="list-style-type: none">1.1 Identify, assess and minimise hazards that may pose a risk of injury or illness to self and others1.2 Assess risks to first aider and others and determine appropriate response to ensure prompt control of situation1.3 Ascertain and prioritise need(s) for emergency services/medical assistance and undertake triage where required1.4 Deploy resources to appropriate locations as required in line with workplace procedures
2 Manage the casualty(s)	<ul style="list-style-type: none">2.1 Determine and explain the nature of casualty's injury/condition and relevant first aid procedures to provide comfort2.2 Respond to the casualty in a culturally aware, sensitive and respectful manner2.3 Seek consent for management of the casualty's injury/illness from person(s) where relevant2.4 Determine and implement welfare procedure according to casualty(s) needs2.5 Control effects of injury and determine and apply appropriate first aid management to meet the needs of the casualty and situation2.6 Assist with self-medication in accordance with State/Territory regulations, legislation and policies and manufacturer's/supplier's instructions and subject to casualty's regime2.7 Monitor casualty's condition and respond in a timely manner in accordance with effective first aid principles2.8 Correctly operate basic life support equipment where appropriate according to relevant legislation and manufacturer's/supplier's instructions

- 2.9 Apply safety procedures for operation of pressurised gases
 - 2.1 Use safe manual handling techniques
 - 0
 - 2.1 Finalise **management** according to casualty's needs and first aid principles
 - 1
- 3 Coordinate first aid activities until arrival of medical assistance
 - 3.1 Identify available **resources** required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate
 - 3.2 Deploy correct amount of **resources** to appropriate locations in an effective manner to ensure timely arrival of required resources
 - 3.3 Document the provision of resources and recommend modifications as required
 - 3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures
 - 3.5 Coordinate evacuation of casualties according to relevant evacuation procedures
 - 3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures
- 4 Communicate essential incident details
 - 4.1 Maintain communication with relevant personnel using appropriate media and equipment
 - 4.2 Communicate first aid information with other providers/carers as appropriate to meet their needs and in accordance with workplace procedures
 - 4.3 Calmly provide information to reassure casualty, adopting a communication style to match the casualty's level of consciousness
 - 4.4 Prepare an incident report in line with organisation requirements
 - 4.5 Maintain confidentiality of records and information in line with privacy principles and statutory and/or organisation policies

- 5 Evaluate the incident
 - 5.1 Evaluate management of the incident and where required develop an action plan in consultation with relevant parties
 - 5.2 Participate in debriefing/evaluation in order to improve future operations and address individual's needs
 - 5.3 Formulate and review contingency planning to identify and select alternative management principles and procedures as required

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

Working knowledge of:

legal responsibilities and duty of care, including confidentiality

basic anatomy (skeleton, muscles, joints, bones), physiology and toxicology

ARC Guidelines and/or State/Territory regulations, legislation and policies relating to provision of first aid

procedures for dealing with major and minor accidents in the workplace

infection control principles and procedures, including using standard precautions

how to gain access to and interpret material safety data sheets (MSDSs)

company/organisation standard operating procedures (SOPs)

priorities of management in first aid

occupational health and safety requirements in the provision of first aid.

capabilities of emergency management services

first aiders' skills and limitations

safe storage and handling procedures for pressurised gases

advanced resuscitation techniques as per **HLTFA404A Apply advanced resuscitation techniques**

First aid management procedures in accordance with ARC Guidelines, state/territory regulations, legislation and policies and organisation requirements for conditions identified in the Range Statement and including:

use of AED, oxygen, bronchodilator

spinal care

management of anaphylactic shock reaction

use of analgesic gases

Incident management procedures:

manual handling, hazardous substances, dangerous goods or chemicals

basic triage for a multiple casualty incident
safe access to the casualty
awareness of confined spaces and dangerous places
removal of casualty to safe area, if appropriate
coordinate activities of other first aiders, if applicable

First aid management procedures may also relate to emergency childbirth

Complications and associated methods of management for conditions identified in the Range Statement

State and territory regulatory requirements relating to currency of skill and knowledge

Social issues, especially in particular workplace or community context(s) in which first aid is to be applied, including:

importance of debriefing
need to be culturally aware, sensitive and respectful
confidentiality
own skills and limitations

Awareness of stress management techniques and available support

Safety procedures for the operation of pressurised gases

Essential skills:

Ability to:

Manage specific injuries/illnesses and conditions as identified in the Range Statement for this competency unit

Conduct an initial casualty assessment

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies and industry requirements and respond appropriately to contingencies in line with own skills

Apply advanced resuscitation techniques as per **HLTFA404A Apply advanced resuscitation techniques**

Use a range of first aid equipment as outlined in the Range Statement

Demonstrate the application of first aid principles

Comply with OHS legislation

Provide assistance with self-medication as per subject's own medication regime and in line with State/Territory legislation, regulations and policies and any available

medical/pharmaceutical instructions

Administer medication in line with State/Territory regulations, legislation and policies and any available medical/pharmaceutical instructions

Demonstrate:

safe manual handling

adequate infection control procedures

consideration of the welfare of the casualty

safe storage and handling procedures for pressurised gases

Prepare a written incident report or provide information to enable preparation of an incident report

Interpret and use listed documents

Communicate effectively and assertively and show leadership in an incident

Make prompt and appropriate decisions relating to managing an incident in the workplace

Use literacy and numeracy skills as required to read, interpret and apply guidelines and protocols

Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of first aid knowledge and skills is to be demonstrated in line with state/territory regulations, legislation and policies, ARC and industry guidelines

Method of assessment may include:

Skills in performing first aid procedures are to be assessed through demonstration, with questioning to confirm essential knowledge

Skills may be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre

For assessment purposes, demonstration of skills in CPR procedures requires using a model of the human body (resuscitation manikin) in line with ARC Guidelines

Access and equity considerations:

All workers in the health industry should be aware of access and equity issues in relation to their own area of work

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

Focus on first aid management of specific types of injury

First aid provision under specific constraints or circumstances (eg. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

First aid management must take into account:

Workplace policies and procedures
Industry/site specific regulations, codes etc.
OHS requirements
State and territory workplace health and safety requirements

A hazard is:

A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

Hazards may include:

Physical hazards
Biological hazards
Chemical hazards
Hazards associated with manual handling

Risks may include:

Risks from worksite equipment, machinery and substances
Risks from first aid equipment (oxygen cylinders, AED)
Environmental risks
Exposure to blood and other body substances
Risk of further injury to the casualty
Risks associated with the proximity of other workers and bystanders
Risks from vehicles
Fallen power lines, step and touch potential

Casualty's condition is managed for:

Abdominal injuries

Airway obstruction

Allergic reactions

Altered and loss of consciousness

Bleeding

Burns - thermal, chemical, friction, electrical

Chest pain

Injuries: cold and crush injuries; eye and ear injuries; head, neck and spinal injuries; minor skin injuries; needle stick injuries; soft tissue injuries including sprains, strains, dislocations

Near drowning

Envenomation - snake, spider, insect and marine bites

Environmental conditions such as hypothermia, hyperthermia, dehydration, heat stroke

Fractures

Medical conditions, including cardiac conditions, epilepsy, diabetes, asthma and other respiratory conditions

No signs of life

Pain relief

Poisoning and toxic substances (including chemical contamination)

Respiratory distress

Shock

Seizures

Stroke

Substance misuse - all drugs and alcohol, including illicit drugs

First Aid management skills must include in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements:

Administration of analgesia
CPR
Infection control
AED
Identification and management of anaphylactic shock reaction in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements
Oxygen administration

First aid management must account for:

Location and nature of the workplace
Environmental conditions eg electricity (high or low voltage), biological risks, weather, motor vehicle accidents
Location of emergency services personnel
Number of casualties and potential casualties
Use and availability of first aid equipment, resources and pharmaceuticals
Types of dangers/risks to the casualty and any others in the vicinity of the situation
Confined spaces, subject to industry need

Medications may include in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and industry requirements:

Oxygen
Analgesics
Bronchodilators
Casualty's own medications
Auto-injectors

Resources and equipment are used appropriate to the risk to be met and may include:

Oxygen resuscitation/cylinders
AED
Thermometers
Auto-injectors
Back boards
Stretchers
Soft bag resuscitator
First aid kit
Casualty's medication
Analgesic inhalers
Analgesic gas equipment
Resuscitation mask or barrier
Spacer device
Cervical collars

Information to be documented may include:

Time

Location

Description of injury

First aid management

Fluid intake/output, including fluid loss via:
blood

vomit

faeces

urine

Administration of medication including:

time

date

person administering

dose

Vital signs

Established first aid principles include:

Checking the site for danger to self, the casualty and others and minimising the danger

Checking and maintaining the casualty's airway, breathing and circulation

Unit Sector(s)

HLTFA404A Apply advanced resuscitation techniques

Modification History

Unit Descriptor

This unit deals with the provision of advanced first aid resuscitation techniques, life support, and management of casualty(s), until the arrival of medical or other assistance, and provision of support to other providers

Application of the Unit

Training Package users should ensure implementation is consistent with any specific workplace and/or relevant legislative requirements in relation to first aid, including State/Territory requirements for currency

Application of these skills and knowledge should be contextualised as required to address specific industry, enterprise or workplace requirements and to address specific risks and hazards and associated injuries

Licensing/Regulatory Information

Pre-Requisites

This unit should be assessed after achievement of one of the following related competency units:

HLTFA301B Apply first aid

HLTCPR201A Perform CPR **or**

HLTFA201A Provide emergency life support

In general it is recommended that people using advanced resuscitation techniques have completed **HLTFA301B Apply first aid**

However, it is recognised that some employers require staff to be able to apply advanced resuscitation techniques without requiring this first aid competency

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills

The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements

Elements and Performance Criteria Pre-Content

Elements define the essential outcomes of a unit of competency.

The Performance Criteria specify the level of performance required to demonstrate achievement of the Element. Terms in *italics* are elaborated in the Range Statement.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare resuscitation equipment ready for use	<ul style="list-style-type: none">1.1 Undertake pre-use check of resuscitation equipment in accordance with organisation procedures, manufacturer's instructions, industry standards and regulatory requirements1.2 Diagnose minor equipment faults and rectify within the scope of organisation procedures and manufacturer's instructions1.3 Identify and deal with major faults and defects in accordance with organisation procedures
2 Apply bag and mask resuscitation technique	<ul style="list-style-type: none">2.1 Assemble the bag valve mask resuscitation device2.2 Use the bag valve mask device in the delivery of CPR2.3 Select and use an oropharyngeal airway to maintain a casualty's airway2.4 Rectify issues preventing adequate treatment as they arise
3 Attach and operate an AED	<ul style="list-style-type: none">3.1 Prepare the casualty in accordance with manufacturer's requirements and ARC Guidelines.3.2 Attach the AED and operate in accordance with organisation procedures, manufacturer's guidelines, ARC guidelines and state legislation3.3 Coordinate the operation of the AED with the resuscitation team to minimise interruption to CPR efforts

- 4 Administer oxygen
 - 4.1 Apply the medical and safety precautions associated with storing, handling and administering oxygen
 - 4.2 Select and operate oxygen masks and cannulae in delivery of oxygen therapy
 - 4.3 Provide oxygen to a bag valve mask device
 - 4.4 Provide supplemental oxygen to a breathing casualty
- 5 Operate suction equipment
 - 5.1 Apply medical and safety precautions associated with the provision of manual and oxygen powered suction devices
 - 5.2 Select and operate suction catheters and devices
 - 5.3 Provide suction during the application of advanced resuscitation techniques
- 6 Restore and maintain equipment ready for future use
 - 6.1 Clean, discard, disinfect, replenish and recharge **equipment** in accordance with organisation procedures and manufacturer's instructions
 - 6.2 Diagnose and rectify minor faults within the scope of organisation procedures and manufacturer's instructions
 - 6.3 Identify and deal with major faults and defects in accordance with organisation procedures

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

Working knowledge of:

Legal responsibilities and duty of care, including confidentiality

Basic anatomy (skeleton, muscles, joints, bones), physiology and toxicology as it relates to the provision of advanced first aid resuscitation, including: . relevant organs of the cardio pulmonary system and their operation . basic electrical activity associated with normal and abnormal heart rhythm

ARC Guidelines and/or State/Territory regulations, legislation and policies relating to provision of first aid

Procedures for dealing with major and minor accidents in the workplace

Infection control principles and procedures, including using standard precautions

How to gain access to and interpret material safety data sheets (MSDSs)

Company/organisation standard operating procedures (SOPs)

Priorities of management in first aid

Occupational health and safety requirements in the provision of first aid.

Capabilities of emergency management services

First Aiders' skills and limitations

Safe storage and handling procedures for pressurised gases, oxygen and battery operated equipment

Chain of survival, including:

purpose of bystander CPR

aim and function of Advanced Resuscitation techniques in the Chain of Survival

Benefits of providing oxygen to a casualty and of providing suction during the application of advanced resuscitation techniques

First aid management procedures in accordance with ARC Guidelines, State/Territory regulations, legislation and policies and organisation requirements for equipment and conditions identified in the Range Statement and including:

use of bag valve mask device, AED, oxygen therapy equipment, manual and oxygen powered suction, and oropharyngeal airways

sudden cardiac arrest

collapse, unconsciousness

shock

airway management including foreign body airway obstruction

hypoxia

Incident management procedures:

manual handling, hazardous substances, dangerous goods or chemicals

safe access to the casualty

awareness of confined spaces and dangerous places

removal of casualty to safe area, if appropriate

coordinate activities of other first aiders, if applicable

continued ...

Essential knowledge (contd):

Complications and associated methods of management for conditions identified in the Range Statement

State and territory regulations, or organisation policy requirements relating to currency of skill and knowledge

Social issues, especially in particular workplace or community context(s) in which first aid is to be applied, including:

importance of debriefing

need to be culturally aware, sensitive and respectful

confidentiality

own skills and limitations

awareness of stress management techniques and available support

Essential skills:

Ability to:

Manage specific injuries/illnesses and conditions as identified in the Range Statement for this competency unit

Conduct an initial casualty assessment

Plan an appropriate first aid response in line with established first aid principles, policies and procedures, ARC Guidelines and/or State/Territory regulations, legislation and policies

and industry requirements and respond appropriately to contingencies in line with own skills

Apply appropriate resuscitation techniques, including use of:

oxygen in resuscitation and oxygen therapy

bag valve mask resuscitation device

AED

mechanical and oxygen powered suction devices

oropharyngeal airways

Demonstrate:

assembly of the bag valve mask resuscitation device

effective use of the bag valve mask device on a manikin

selection and use of an oropharyngeal airway

correct selection and operation of oxygen masks and cannulae

provision of oxygen to a bag valve mask device

provision of supplemental oxygen to a breathing patient

correct selection and operation of suction catheters and devices

safe manual handling

adequate infection control procedures

consideration of the welfare of the casualty

safe storage and handling procedures for pressurised gases and battery operated equipment

continued ...

Essential skills (contd):

Ability to:

Incorporate the use of all equipment into effective treatment of illness/injuries specified in the Range Statement

Demonstrate the application of first aid principles

Comply with OHS legislation

Administer oxygen in line with state/territory regulations, legislation and policies and any available medical/pharmaceutical instructions

Prepare a written incident report or provide information to enable preparation of an incident report

Interpret and use listed documents

Communicate effectively and assertively and show leadership in an incident

Make prompt and appropriate decisions relating to managing an incident in the workplace

Use literacy and numeracy skills as required to read, interpret and apply instructions, guidelines and protocols

Call an ambulance and/or medical assistance according to relevant circumstances and report casualty's condition

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects of assessment:

Assessment must include demonstrated evidence of specified Essential Knowledge and Essential Skills identified in this competency unit

Competence should be demonstrated working individually and, where appropriate, as part of a first aid team

Consistency of performance should be demonstrated over the required range of situations relevant to the workplace or community setting

Currency of first aid knowledge and skills is to be demonstrated in line with State/Territory regulations, legislation and policies, ARC and industry guidelines

Method of assessment may include:

Skills in performing advanced resuscitation procedures are to be assessed through demonstration, with questioning to confirm essential knowledge

Skills are to be assessed through simulations, using anatomical models, manikins or in a high fidelity simulation centre

For assessment purposes, demonstration of skills in CPR procedures require using a model of the human body (resuscitation manikin) in line with ARC Guidelines

Access and equity considerations:

All participants undertaking this unit should be aware of access and equity issues in relation to their own area of work or involvement

All workers should develop their ability to work in a culturally diverse environment

In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people

Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement**RANGE STATEMENT**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Contextualisation to address specific requirements may include:

Focus on first aid management of specific types of injury

First aid provision under specific constraints or circumstances (eg. in confined spaces, in maritime work environment or in work environment involving identified risks/hazards)

First aid management must take into account:

Workplace policies and procedures

Industry/site specific regulations, codes etc.

OHS requirements

State and territory workplace health and safety requirements

A hazard is:

A source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these

An AED is:

Automatic External Defibrillator

Semi-automatic External Defibrillator

Hazards may include:

Physical hazards

Biological hazards

Chemical hazards

Hazards associated with manual handling

Risks may include:

Risks from worksite equipment, machinery and substances
Risks from first aid equipment (oxygen cylinders, AED)
Environmental risks
Exposure to blood and other body substances
Risk of further injury to the casualty
Risks associated with the proximity of other workers and bystanders
Risks from vehicles
Fallen power lines, step and touch potential

Casualty's condition is managed for:

Sudden cardiac arrest
Collapse/unconsciousness
Foreign body airway obstruction
No signs of life
Respiratory distress
Shock
Hypoxia

First aid management skills must include in accordance with ARC Guidelines, state/territory regulations, legislation and policies and industry requirements:

CPR
Infection control
AED
Oxygen administration

First aid management must account for:

Location and nature of the workplace
Environmental conditions e.g. electricity (high or low voltage), biological risks, weather, motor vehicle accidents
Location of emergency services personnel
Number of casualties and potential casualties
Use and availability of first aid equipment, resources and pharmaceuticals
Types of dangers/risks to the casualty and any others in the vicinity of the situation
Confined spaces, subject to industry need

Resources and equipment are used appropriate to the risk to be met and may include:

Oxygen therapy equipment (e.g. masks, cannulae and tubing) and cylinders
Bag valve mask resuscitation device
AED
First aid kit
Resuscitation mask or barrier device
Mechanical and oxygen powered suction device
Oropharyngeal airway
Gloves
Razor
Shears
Cleaning wipes or towels

Information to be documented may include:

Time
Location
Description of condition of patient
First aid management
Administration of medication including:
time
date
person administering
dose

Number of electrical shocks attempted
Vital signs

Established first aid principles include:

Checking the site for danger to self, the casualty and others and minimising the danger

Checking and maintaining the casualty's airway, breathing and circulation

Unit Sector(s)

PRMCL04B Maintain a carpeted floor

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency covers the skills and knowledge required for the maintenance of carpeted floors. The unit applies to both manual and mechanical methods of maintaining a carpeted floor. It requires the ability to assess the extent of the cleaning task through understanding client requirements and applying company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently.

Application of the Unit

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|----------------------------------|--|
| 1 Assess area to be cleaned | 1.1 Assess area to be cleaned and review <i>work order</i> in accordance with <i>company requirements</i> and clarify any issues with <i>appropriate person(s)</i>
1.2 Identify <i>hazards</i> and control risks in the work site in accordance with <i>legislative, occupational health and safety (OHS)</i> and <i>company requirements</i>
1.3 Identify type and condition of the <i>carpeted floor</i> through observation in accordance with <i>work order</i> and <i>company requirements</i>
1.4 Identify <i>soil</i> type through observation in accordance with <i>work order</i> and <i>company requirements</i>
1.5 Determine the size and usage pattern of the work site to ensure safety of <i>personnel</i> and efficient use of <i>equipment</i> and <i>chemicals</i>
1.6 Identify and report any pre-existing damage to the <i>appropriate person(s)</i> in accordance with <i>company requirements</i> |
| 2 Select equipment and chemicals | 2.1 Select and use suitable <i>personal protective equipment (PPE)</i> in accordance with <i>manufacturers' specifications, OHS</i> and <i>company requirements</i>
2.2 Select <i>equipment</i> and <i>chemicals</i> appropriate for the <i>work order</i> in accordance with <i>company requirements</i>
2.3 Check operational effectiveness of <i>equipment</i> in accordance with <i>manufacturers' specifications</i> and <i>company requirements</i> |
| 3 Prepare work site | 2.4 Adjust <i>equipment</i> to suit operator's requirements in accordance with <i>manufacturers' specifications</i> and <i>OHS requirements</i>
2.5 Prepare <i>chemicals</i> in accordance with <i>manufacturers' specifications, OHS</i> and <i>company requirements</i>
3.1 Confirm and reassess <i>hazards</i> in the work site and control risks in accordance with <i>legislative, OHS</i> and <i>company requirements</i>
3.2 Remove furniture and fittings that impede the cleaning operation in accordance with <i>work</i> |

ELEMENT**PERFORMANCE CRITERIA**

	<i>order and company requirements</i>
	3.3 Install appropriate <i>signage and barriers</i> to maximise public safety during the cleaning operation in accordance with <i>work order</i> and <i>OHS</i> and <i>company requirements</i>
	3.4 Identify any <i>work restrictions</i> affecting the completion of the <i>work order</i> instructions and advise promptly the <i>appropriate person(s)</i>
4 Clean work site	4.1 Clean <i>carpeted floor</i> using appropriate <i>equipment, PPE, chemicals</i> and <i>cleaning technique(s)</i> in accordance with <i>work order, manufacturers' specifications</i> and <i>OHS</i> and <i>company requirements</i>
	4.2 Identify the need for any follow-up action for spot and stain removal in accordance with the <i>work order</i> and <i>company requirements</i>
	4.3 Conduct all work in accordance with <i>manufacturers' specifications</i> and <i>legislative, OHS</i> and <i>company requirements</i>
5 Tidy work site	5.1 Dispose of all collected <i>soil</i> and <i>waste</i> in accordance with client specifications, <i>work order, manufacturers' specifications</i> and <i>environmental, legislative, OHS</i> and <i>company requirements</i>
	5.2 Replace all furniture and fittings in accordance with client requests, <i>work order</i> and <i>OHS requirements</i>
	5.3 Remove <i>signage and barriers</i> in accordance with <i>work order</i> and <i>OHS</i> and <i>company requirements</i>
6 Clean, safety-check and store equipment and chemicals	6.1 Clean <i>equipment</i> and <i>PPE</i> in accordance with <i>manufacturers' specifications</i> and <i>environmental, OHS</i> and <i>company requirements</i>
	6.2 Safety-check <i>equipment</i> and <i>PPE</i> in accordance with <i>manufacturers' specifications</i> and <i>OHS requirements</i> and record any required maintenance in accordance with <i>company requirements</i>
	6.3 Store and maintain <i>equipment</i> and <i>PPE</i> to allow ready access in accordance with <i>manufacturers' specifications</i> and <i>OHS</i> and <i>company requirements</i>

ELEMENT**PERFORMANCE CRITERIA**

6.4 Store *chemicals* in accordance with
manufacturers' specifications and *OHS* and
company requirements

Required Skills and Knowledge

Refer to Evidence Guide

Evidence Guide

EVIDENCE GUIDE

The evidence guide identifies the requirements to be demonstrated to confirm competence for this unit. Assessment must confirm sufficient ability to use appropriate skills and knowledge to maintain carpeted floors. Assessment of performance should be over a period of time covering all categories within the range statement that are applicable in the working environment.

Critical aspects of competency

- Accurate identification of the type and characteristics of the carpeted floor.
- Compliance with company and legislative requirements.
- Outcomes achieved in relation to customer work order and company requirements.
- Safe and efficient cleaning methods.
- Selection of appropriate cleaning equipment and chemicals.

Knowledge needed to achieve the performance criteria

Knowledge and understanding are essential to apply this unit in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this unit are listed below.

- Types of carpeted floor surfaces and characteristic features.
- Knowledge of the range of cleaning equipment and chemicals.
- Awareness of applicable legislation, regulations, codes of practice and industry advisory standards.
- Awareness of OHS legislation and procedures.
- Communication and negotiation techniques.
- Company management structure and reporting procedures.
- Company procedures and practices.
- Emergency response and evacuation procedures.
- Injury, dangerous occurrence and incident reporting.
- Knowledge of biological and viral control procedures.
- Routes of entry and potential symptoms of exposure from chemicals.

Specific skills needed to achieve the performance criteria

To achieve the performance criteria, some complementary skills are required. These are:

- sweeping
- raking
- vacuuming
- applying correct manual handling techniques
- communicating clearly and concisely using written and verbal modes
- customer service
- handling and disposal of chemicals safely
- handling and disposal of contaminated and toxic waste
- performing the mathematical calculations required for the dilution and mixing of chemicals as specified on product labels
- problem solving
- reading, interpreting and responding appropriately to directions and safety instructions in equipment manuals and MSDS and on chemical labels
- requesting advice or further information

- seeking and receiving feedback
- sourcing, organising and recording information
- working on an individual basis or as part of a team.

Other units of competency that could be assessed with this unit

Competence in this unit may be assessed in conjunction with:

- PRMCC02A Use bonnet cleaning
- PRMCC07A Perform basic stain removal.

Resources required to assess this unit

The following resources should be available:

- access to a suitable work site or venue with carpeted floors
- access to suitable equipment and chemicals
- access to personal protective equipment
- access to equipment operating manuals and MSDS
- work order instructions and work plans
- assessment instruments, including personal planner and assessment record book.

Gaining evidence to assess this unit

For valid and reliable assessment of this unit, the competency should be demonstrated over a period of time and be observed by the assessor.

The competency is to be demonstrated in a range of situations that may include customer/workplace interruptions and involvement in related activities normally experienced in the workplace.

Assessment of competency may be made through practical demonstration in the work environment or in a simulated work environment.

Key competency levels

There are a number of processes that are learnt throughout work and life that are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the key competencies, although others may be added. Information below highlights how these processes are applied in this unit of competency.

- | | | |
|------------------------------|---|---|
| 1 Perform the process | 2 Perform and administer the process | 3 Perform, administer and design the process |
|------------------------------|---|---|

How can communication of ideas and information be applied?	1	Confirm own role and responsibilities with colleagues and supervisors to ensure compliance with work order and company requirements such as OHS.
How can information be collected, analysed and organised ?	1	Collect and analyse information regarding work site in line with company procedures.
How are activities planned and organised ?	1	Organise and prioritise work tasks to meet work order and company requirements.
How can teamwork be applied?	1	Provide support and assistance to team members to complete work tasks within designated timelines and to meet company requirements.
How can the use of mathematical ideas and techniques be applied?	1	Calculate floor area to be cleaned and measure and carry out chemical applications.
How can problem-solving skills be applied?	1	Discuss with management/clients/site managers, supervisors and team members how to help solve problems that may arise.
How can the use of technology be applied?	1	Record data for future use such as stock control.

Range Statement

RANGE STATEMENT

The range statement links the required knowledge and organisational and technical requirements to the workplace context. It describes any contextual variables that will be used or encountered when applying the competency in work situations. It allows for different work practices and work and knowledge requirements as well as for differences between organisations and workplaces. The following variables are listed in alphabetical order and may be present for this particular unit.

Appropriate person(s) may include:

- clients
- colleagues
- managers
- person(s) in control of work site(s)
- supervisors.

Carpeted floors may include:

- carpet:
 - mixed blends

- natural fibres e.g. wool, silk and organic (plant) fibres such as cotton and sisal
- synthetic fibres e.g. nylon, polypropylene and acrylic
- coir matting
- mats and rugs
- synthetic grass.

Chemicals may include:

- acid cleaners
- alkaline cleaners
- neutral cleaners
- solvent cleaners.

Cleaning technique(s) may include:

- hand collection of waste
- raking
- sweeping
- using a dust-pan and brush
- vacuuming.

Company requirements may include:

- access and equity policy, principles and practice
- business and performance plans
- client communication procedures
- client confidentiality procedures
- client service standards
- communication channels and reporting procedures
- company goals, objectives, plans, systems and processes
- company issued identification badge/card/pass
- company policy and procedures
- company service standards
- dress and presentation requirements
- duty of care, code of conduct, code of ethics
- emergency response and evacuation procedures
- maintenance procedures for equipment and PPE
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- OHS policies and procedures
- personnel practices and guidelines
- policies and procedures relating to own role, responsibility and delegation
- quality and continuous improvement processes and standards
- records and information systems and processes
- rights and responsibilities of employees and employers
- training (induction, refresher and new skills) materials
- use of contractors
- work site access security clearance procedures.

Equipment may include:

- accumulation (vacuum dust) bags
- brooms (stiff bristle) e.g. deck fibre or millet
- carpet rake
- dustpan, scoop and brush
- hoses and filters
- vacuum machines:
 - back-mounted units
 - ducted systems
 - floor-based mobile systems
 - mechanical push sweepers
 - wet and dry systems
- vacuum tools:
 - brushes
 - crevice tool
 - floor heads
 - power head
 - upholstery heads
 - variable pile height/adjustable heads.

Hazards may include:

- allergic reactions to chemicals and/or equipment, including latex allergies
- biological waste
- bites and stings
- blood and blood-stained products
- broken glass and other sharp surfaces
- chemical containers and/or decanted chemical storage containers labelled incorrectly
- confined/restricted spaces
- contaminated clothing, chemicals and/or equipment
- damaged or inappropriate equipment
- dust and fibres
- electrical hazards arising from cables, electrical fittings (switches and lights) and untested electrical equipment
- environmental impact
- extremes of heat and temperature
- fatigue
- fire
- gas
- heights
- human waste (faeces, urine, vomit)
- inadequate lighting and ventilation
- infectious and zoonotic diseases e.g. scabies/Q fever
- inhaling chemical fumes
- leaks, spill, splash and spray
- manual handling techniques including awkward and repetitive postures
- mobile/vehicle hazards around plant and vehicles
- moving and/or unguarded machinery and equipment
- noise
- occupational violence and bullying

- poor manual handling techniques
- poor personal hygiene practices
- repetitive motion, force and vibration
- synergistic chemical reactions (hazardous incompatibility or reactivity)
- syringes or other sharps
- ultraviolet light
- underfoot conditions e.g. slippery, uneven and rough surfaces
- unrestricted people access
- waste and waste disposal
- work in isolated/remote environments.

Legislative requirements may include:

- Australian Standards, quality assurance and certification requirements
- award and enterprise agreements
- codes of practice
- national industry standards
- relevant Commonwealth/state/territory legislation and local government regulations that affect company operation:
 - anti-discrimination and diversity
 - availability of chemical registers/manifests
 - chemical controls
 - consumer protection
 - environmental protection issues
 - equal employment opportunity
 - freedom of information
 - industrial equipment certificates of competency or licences
 - industrial relations
 - OHS Acts and regulations
 - privacy
 - trade practices
 - workplace consultative arrangements.

Manufacturers' specifications may include:

- equipment operational manuals
- instructional guides
- material safety data sheets
- other resources supplied by the manufacturer (such as laminated cards notices, wall posters)
- product labels
- safety instructions pre-printed on equipment.

Occupational health and safety* (OHS) requirements may relate to:

- allergic reactions (contact dermatitis, etc)
- communication devices for remote and isolated locations e.g. mobile phone, two-way radio, etc
- dermatotoxicological control and prevention measures
- hazard identification and risk assessment mechanisms
- hazard reporting

- hierarchy of hazard control procedures
- injury, dangerous occurrence and incident reporting requirements
- keeping access ways clear from obstruction
- maintaining clear access ways
- maintenance procedures for equipment and PPE
- national industry standards/codes of practice
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- protection from hazardous substances, noise and dust
- protection of people in the workplace
- routes of entry and potential symptoms of exposure from chemicals
- safety training (induction and refresher)
- ultraviolet light
- up-to-date electrical test and tag compliance
- use of chemicals in accordance with labels
- use, storage and maintenance of equipment in accordance with manufacturers' specifications and equipment operating manuals
- use, storage and maintenance of personal protective equipment and clothing.

** Also known as occupational safety and health or workplace health and safety*

Personal protective equipment (PPE) may include:

- ear muffs/plugs
- gloves - non-permeable
- goggles
- high-visibility vests/clothing
- overalls and other protective clothing
- respirator
- safety glasses
- safety shoes
- splash-proof face masks
- sun protection
- tongs
- ultraviolet protection
- wet-work clothing.

Personnel may include:

- client's staff
- fellow workers (colleagues)
- general public
- venue/facility/building/shopping centre staff/management.

Rights and responsibilities of employees may relate to:

- confidentiality and privacy rights
- duty of care
- knowing the appropriate personnel for reporting purposes
- knowing the location of manuals and/or related documents
- knowing the terms and conditions of own employment
- knowing the workplace procedures

- protection from discrimination and sexual harassment.

Rights and responsibilities of employers may relate to:

- duty of care
- providing a safe environment free from discrimination and sexual harassment (see relevant state and Commonwealth anti-discrimination legislation)
- providing a safe workplace in accordance with OHS legislation, codes of practice, regulations and standards
- providing information and training in work tasks, OHS and other employment related matters
- the right to dismiss you if you (see the Commonwealth *Workplace Relations Act 1996*):
 - are negligent, careless or cause an accident
 - commit a criminal offence
 - commit acts of disloyalty such as revealing confidential information
 - use abusive language.

Signage and barriers may include:

- physical barriers and restraints erected to restrict access to a site
- signs complying with legislative requirements and/or Australian Standards warning of danger and/or adverse conditions including cleaning in progress and hazardous chemicals are in use or present in the work area.

Soil types can be wet or dry and may include:

- beverages (drinks)
- blood
- candle wax
- chewing gum
- food
- glue
- grease/oil
- human waste (faeces, urine, vomit)
- lipstick
- medicine
- mud and dirt
- nail polish
- paint
- shoe polish.

Waste may be either solid or liquid and include:

- chemicals past the expiry date
- disposable vacuum liner bags
- litter
- obsolete equipment
- packaging
- soil
- used or unused chemicals
- used/contaminated personal protective equipment.

Work order information may include:

- access to work site and egress points
- completion times/dates
- insufficient people to complete the work task(s)
- job requirements and tasks
- legislative requirements and local government
- OHS requirements and emergency response procedures
- resource requirements - equipment and chemicals
- specific client requirements e.g. relationships with other activities, dress and presentation requirements
- use of signage and barriers
- work schedules
- working in isolated and remote locations
- work site contact person(s).

Work restrictions may include:

- amount of cleaning anticipated
- client activity
- employee(s) level of literacy and/or communication skills
- faulty or inappropriate equipment
- site hazards
- skills of the work unit/team
- staffing resources
- time limitations.
-

Unit Descriptor

Unit descriptor

This unit of competency covers the skills and knowledge required to clean a wet area and make it free from soil, odour and hazards. Wet areas include bathrooms, toilets and changing rooms. Areas such as swimming pools, kitchens, laundries and clinics generally require specialised cleaning methods.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements, the special characteristics of wet areas, and applying company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently. This unit recognises the importance of paying careful attention to health and safety issues.

|----------------------------------|---|
| 1 Assess area to be cleaned | <ul style="list-style-type: none">1.1 Assess area to be cleaned and review <i>work order</i> in accordance with <i>company requirements</i> and clarify any issues with <i>appropriate person(s)</i>1.2 Identify <i>hazards</i> and control risks in the work site in accordance with <i>legislative, occupational health and safety (OHS)</i> and <i>company requirements</i>1.3 Check the operation and condition of <i>fixtures and fittings</i> and report any pre-existing damage at the work site to the <i>appropriate person(s)</i> in accordance with the <i>work order</i> and <i>company requirements</i>1.4 Identify <i>soil</i> and stain type(s) through observation in accordance with the <i>work order</i> and <i>company requirements</i>1.5 Identify any specific areas that require special attention, including graffiti, in accordance with the <i>work order</i> and <i>company requirements</i>1.6 Determine the size and usage pattern of the work site to ensure the safety of, and the minimisation of disruption to, <i>personnel</i> and the efficient use of cleaning <i>equipment</i> and <i>chemicals</i>1.7 Select the most appropriate <i>cleaning technique(s)</i> for the <i>wet areas</i> in accordance with the <i>work order</i> and <i>company requirements</i> |
| 2 Select equipment and chemicals | <ul style="list-style-type: none">2.1 Select and use suitable <i>personal protective equipment (PPE)</i> in accordance with <i>manufacturers' specifications, OHS</i> and <i>company requirements</i>2.2 Select <i>equipment</i> and <i>chemicals</i> appropriate for the <i>work order</i> in accordance with <i>OHS</i> and <i>company requirements</i>2.3 Check operational effectiveness of <i>equipment</i> in accordance with <i>manufacturers' specifications</i> and <i>company requirements</i>2.4 Adjust <i>equipment</i> to suit operator's requirements in accordance with <i>manufacturers' specifications</i> and <i>OHS requirements</i> |

ELEMENT**PERFORMANCE CRITERIA**

- 2.5 Prepare *chemicals* in accordance with *manufacturers' specifications, OHS and company requirements*
- 3 Prepare work site
- 3.1 Confirm and reassess *hazards* in the work site and control risks in accordance with *legislative, OHS and company requirements*
- 3.2 Install appropriate *signage and barriers* to maximise public safety during the cleaning operation in accordance with *work order and OHS and company requirements*
- 3.3 Identify any *work restrictions* affecting the completion of the *work order* instructions and advise promptly *appropriate person(s)*

ELEMENT**PERFORMANCE CRITERIA**

4 Clean work site

- 4.1 Remove all loose *soil* prior to commencing *surface cleaning* in accordance with *work order* and *OHS* and *company requirements*
- 4.2 Clean all *fixtures and fittings* and *surfaces* using appropriate *equipment, chemicals* and *cleaning technique(s)*
- 4.3 Treat any remaining heavy *soil*, graffiti or stained surfaces or report these to the *appropriate person(s)* for follow-up action in accordance with the *work order* and *company requirements*
- 4.4 Launder soiled items in accordance with the *work order* and *company requirements*

5 Replenish consumables and tidy work site

- 4.5 Conduct all work in accordance with *manufacturers' specifications* and *legislative, OHS* and *company requirements*
- 5.1 Replenish *consumables* in accordance with client requests, *work order* and *company requirements*
- 5.2 Dispose of all collected *soil* and *waste* in accordance with client specifications, *work order, manufacturers' specifications* and *environmental, legislative, OHS* and *company requirements*
- 5.3 Remove signage and barriers in accordance with *work order* and *OHS* and *company requirements*

6 Clean, safety-check and store equipment and chemicals

- 6.1 Clean *equipment* and *PPE* in accordance with *manufacturers' specifications* and *environmental, OHS* and *company requirements*
- 6.2 Safety-check *equipment* and *PPE* in accordance with *manufacturers' specifications* and *OHS requirements* and record any required maintenance in accordance with *company requirements*
- 6.3 Store and maintain *equipment* and *PPE* to allow ready access and re-use in accordance with *manufacturers' specifications* and *OHS* and *company requirements*
- 6.4 Store *chemicals* in accordance with *manufacturers' specifications* and *OHS* and *company requirements*

Required Skills and Knowledge

Refer to Evidence Guide

Evidence Guide

EVIDENCE GUIDE

The evidence guide identifies the requirements to be demonstrated to confirm competence for this unit. Assessment must confirm sufficient ability to use appropriate skills and knowledge to clean a wet area to be free from odours, soil and hazards. Assessment of performance should be over a period of time covering all categories within the range statement that are applicable in the working environment.

Critical aspects of competency

- Accurate identification of the hazards and risks associated with wet areas.
- Accurate identification of the fittings, surfaces and soil types found in wet areas.
- Selection of appropriate cleaning equipment and chemicals.
- Safe and efficient cleaning methods.
- Outcomes achieved in relation to customer work order and company requirements.
- Compliance with company and legislative requirements.

Knowledge needed to achieve the performance criteria

Knowledge and understanding are essential to apply this unit in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this unit are listed below.

- Knowledge of biological and viral control procedures.
- Sterilising procedures.
- Knowledge of the range of cleaning equipment and chemicals.
- Knowledge of the methods for cleaning wet areas.
- Awareness of applicable legislation, regulations, codes of practice and industry advisory standards.
- Awareness of OHS legislation and procedures.
- Communication and negotiation techniques.
- Company management structure and reporting procedures.
- Emergency response and evacuation procedures.
- Injury, dangerous occurrence and incident reporting.
- Routes of entry and potential symptoms of exposure from chemicals.

Specific skills needed to achieve the performance criteria

To achieve the performance criteria, some complementary skills are required. These are:

- accurate identification of soil and stains
- accurate selection of chemicals to suit surface and soil types
- sweeping
- damp wiping
- hosing
- washing walls, ceiling and fittings
- squeegeeing
- mopping
- glass cleaning
- replenishing consumables
- applying correct manual handling techniques
- communicating clearly and concisely using written and verbal modes
- customer service

- handling and disposal of chemicals safely
- handling and disposal of contaminated and toxic waste
- performing the mathematical calculations required for the dilution and mixing of chemicals as specified on product labels
- planning and organising work
- problem solving
- reading, interpreting and responding appropriately to directions and safety instructions in equipment manuals and MSDS and on chemical labels
- requesting advice or further information
- seeking and receiving feedback
- working on an individual basis or as part of a team.

Other units of competency that could be assessed with this unit

Competence in this unit may be assessed in conjunction with

- PRMCL01B Maintain a hard floor surface
- PRMCL02B Restore a hard floor surface
- PRMCL15B Maintain furniture and fittings and room dressing.

Resources required to assess this unit

The following resources should be available:

- access to a suitable wet area venue
- access to suitable equipment and chemicals
- access to personal protective equipment
- access to equipment operating manuals and MSDS
- work order instructions, work plans and schedules
- assessment instruments, including personal planner and assessment record book.

Gaining evidence to assess this unit

For valid and reliable assessment of this unit, the competency should be demonstrated over a period of time and be observed by the assessor.

The competency is to be demonstrated in a range of situations that may include customer/workplace interruptions and involvement in related activities normally experienced in the workplace.

Assessment of competency may be made through practical demonstration in the work environment or in a simulated work environment.

Key competency levels

There are a number of processes that are learnt throughout work and life that are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the key competencies, although others may be added. Information below highlights how these processes are applied in this unit of competency.

- | | | |
|------------------------------|---|---|
| 1 Perform the process | 2 Perform and administer the process | 3 Perform, administer and design the process |
|------------------------------|---|---|

How can communication of ideas and information be applied?	1	Confirm own role and responsibilities with colleagues and supervisors to ensure compliance with work order and company requirements such as OHS.
How can information be collected, analysed and organised ?	1	Collect and analyse information regarding work site in line with company procedures.
How are activities planned and organised ?	1	Organise and prioritise work tasks to meet work order and company requirements.
How can teamwork be applied?	1	Provide support and assistance to team members to complete work tasks within designated timelines and to meet company requirements.
How can the use of mathematical ideas and techniques be applied?	1	Calculate area(s) to be cleaned and measure and carry out chemical applications.
How can problem-solving skills be applied?	1	Discuss with management/clients/site managers, supervisors and team members how to help solve problems that may arise.
How can the use of technology be applied?	1	Record data for future use such as stock control.

Range Statement

RANGE STATEMENT

The range statement links the required knowledge and organisational and technical requirements to the workplace context. It describes any contextual variables that will be used or encountered when applying the competency in work situations. It allows for different work practices and work and knowledge requirements as well as for differences between organisations and workplaces. The following variables are listed in alphabetical order and may be present for this particular unit.

Appropriate person(s) may include:

- clients
- colleagues
- managers
- person(s) in control of work site(s)
- supervisors.

Chemicals may include:

- acid cleaners
- alkaline cleaners

- neutral cleaners
- solvent cleaners.

Cleaning technique(s) may include:

- buffing
- cobwebbing
- dusting
- hosing
- mopping
- polishing
- pre-spraying
- scrubbing
- spot cleaning
- sweeping
- wet wiping
- window cleaning.

Company requirements may include:

- access and equity policy, principles and practice
- business and performance plans
- client communication procedures
- client confidentiality procedures
- client service standards
- communication channels and reporting procedures
- company goals, objectives, plans, systems and processes
- company issued identification badge/card/pass
- company policy and procedures
- company service standards
- dress and presentation requirements
- duty of care, code of conduct, code of ethics
- emergency response and evacuation procedures
- maintenance procedures for equipment and PPE
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- OHS policies and procedures
- personnel practices and guidelines
- policies and procedures relating to own role, responsibility and delegation
- quality and continuous improvement processes and standards
- records and information systems and processes
- rights and responsibilities of employees and employers
- training (induction, refresher and new skills) materials
- use of contractors
- work site access security clearance procedures.

Consumable items may include:

- air fresheners
- bin liners
- cloth towels/tea towels

- deodorant blocks
- hand towels (cloth, rolls, sheets)
- personal toiletries where provided
- soap (liquid or bar forms)
- toilet paper.

Environmental requirements may include:

- clean-up, containment and/or isolation
- company policies and guidelines
- environmental protection agency and government department regulations and guidelines
- hazardous materials handling
- local government regulations/bylaws.

Equipment may include:

- absorbent cleaning cloths
- brooms
- buckets
- cleaning trolley
- damp cloths
- doodle bug
- dry cloths
- hose and nozzle
- lint-free cloths
- long-handled brush and dustpan tongs
- mops
- needle hazard disposal unit
- nylon scourers
- scraper
- scrubbing brush
- scrubbing or polishing machines
- toilet brush
- window squeegee
- wringer buckets.

Fixtures and fittings may include:

- bath
- bidet
- cleaner's sluice
- hand basin
- hand dryer
- mirror
- paper dispenser
- personal items product dispenser
- rack
- rubbish receptacle
- shower
- sink
- soap dispenser
- spa

- tap
- toilet bowl, seat and cistern
- trough
- urinal (trough and wall)
- vanity unit.

Hazards may include:

- allergic reactions to chemicals and/or equipment, including latex allergies
- biological waste
- bites and stings
- blood and blood-stained products
- broken glass and other sharp surfaces
- chemical containers and/or decanted chemical storage containers labelled incorrectly
- confined/restricted spaces
- contaminated clothing, chemicals and/or equipment
- damaged or inappropriate equipment
- dust and fibres
- electrical hazards arising from cables, electrical fittings (switches and lights) and untested electrical equipment
- environmental impact
- extremes of heat and temperature
- fatigue
- fire
- gas
- heights
- human waste (faeces, urine, vomit)
- inadequate lighting and ventilation
- infectious and zoonotic diseases e.g. scabies/Q fever
- inhaling chemical fumes
- leaks, spill, splash and spray
- manual handling techniques including awkward and repetitive postures
- mobile/vehicle hazards around plant and vehicles
- moving and/or unguarded machinery and equipment
- noise
- occupational violence and bullying
- poor manual handling techniques
- poor personal hygiene practices
- repetitive motion, force and vibration
- synergistic chemical reactions (hazardous incompatibility or reactivity)
- syringes or other sharps
- ultraviolet light
- underfoot conditions e.g. slippery, uneven and rough surfaces
- unrestricted people access
- waste and waste disposal
- work in isolated/remote environments.

Legislative requirements may include:

- Australian Standards, quality assurance and certification requirements

- award and enterprise agreements
- codes of practice
- national industry standards
- relevant Commonwealth/state/territory legislation and local government regulations that affect company operation:
 - anti-discrimination and diversity
 - availability of chemical registers/manifests
 - chemical controls
 - consumer protection
 - environmental protection issues
 - equal employment opportunity
 - freedom of information
 - industrial equipment certificates of competency or licences
 - industrial relations
 - OHS Acts and regulations
 - privacy
 - trade practices
 - workplace consultative arrangements.

Manufacturers' specifications may include:

- equipment operational manuals
- instructional guides
- material safety data sheets
- other resources supplied by the manufacturer (such as laminated cards notices, wall posters)
- product labels
- safety instructions pre-printed on equipment.

Occupational health and safety* (OHS) requirements may relate to:

- allergic reactions (contact dermatitis, etc)
- communication devices for remote and isolated locations e.g. mobile phone, two-way radio, etc
- dermatotoxicological control and prevention measures
- hazard identification and risk assessment mechanisms
- hazard reporting
- hierarchy of hazard control procedures
- injury, dangerous occurrence and incident reporting requirements
- keeping access ways clear from obstruction
- maintaining clear access ways
- maintenance procedures for equipment and PPE
- national industry standards/codes of practice
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- protection from hazardous substances, noise and dust
- protection of people in the workplace
- routes of entry and potential symptoms of exposure from chemicals
- safety training (induction and refresher)

- ultraviolet light
- up-to-date electrical test and tag compliance
- use of chemicals in accordance with labels
- use, storage and maintenance of equipment in accordance with manufacturers' specifications and equipment operating manuals
- use, storage and maintenance of personal protective equipment and clothing.

** Also known as occupational safety and health or workplace health and safety*

Personal protective equipment (PPE) may include:

- ear muffs/plugs
- gloves - non-permeable
- goggles
- high-visibility vests/clothing
- overalls and other protective clothing
- respirator
- safety glasses
- safety shoes
- splash-proof face masks
- sun protection
- tongs
- ultraviolet protection
- wet-work clothing.

Personnel may include:

- client's staff
- fellow workers (colleagues)
- general public
- venue/facility/building/shopping centre staff/management.

Rights and responsibilities of employees may relate to:

- confidentiality and privacy rights
- duty of care
- knowing the appropriate personnel for reporting purposes
- knowing the location of manuals and/or related documents
- knowing the terms and conditions of own employment
- knowing the workplace procedures
- protection from discrimination and sexual harassment.

Rights and responsibilities of employers may relate to:

- duty of care
- providing a safe environment free from discrimination and sexual harassment (see relevant state and Commonwealth anti-discrimination legislation)
- providing a safe workplace in accordance with OHS legislation, codes of practice, regulations and standards
- providing information and training in work tasks, OHS and other employment related matters
- the right to dismiss you if you (see the Commonwealth *Workplace Relations Act 1996*):
 - are negligent, careless or cause an accident

- commit a criminal offence
- commit acts of disloyalty such as revealing confidential information
- use abusive language.

Signage and barriers may include:

- physical barriers and restraints erected to restrict access to a site
- signs complying with legislative requirements and/or Australian Standards warning of danger and/or adverse conditions including cleaning in progress and hazardous chemicals are in use or present in the work area.

Soil types can be wet or dry and may include:

- blood
- cobwebs
- dust
- food, food scraps and residue
- grease
- human waste (faeces, urine, vomit)
- litter
- mould and algae
- mud and dirt
- pen, texta, pencil
- rust
- soap scum.

Surfaces may include:

- ceramics and porcelain
- chrome
- concrete
- glass
- laminates
- metal
- painted
- plastic
- stainless steel
- stone
- terracotta
- vinyl.

Waste may be either solid or liquid and include:

- chemicals past the expiry date
- contaminated waste
- liquid waste
- obsolete equipment
- packaging
- soil
- used cleaning cloths
- used containers
- used or unused chemicals
- used/contaminated personal protective equipment.

Wet areas may include:

- bathrooms
- change rooms
- ensuites
- laundries
- pools
- spas
- tea rooms/kitchenettes
- toilets/restrooms
- wash-up areas.

Work order information may include:

- access to work site and egress points
- completion times/dates
- insufficient people to complete the work task(s)
- job requirements and tasks
- legislative requirements and local government
- OHS requirements and emergency response procedures
- resource requirements - equipment and chemicals
- specific client requirements e.g. relationships with other activities, dress and presentation requirements
- use of signage and barriers
- work schedules
- working in isolated and remote locations
- work site contact person(s).

Work restrictions may include:

- amount of cleaning anticipated
- client activity
- employee(s) level of literacy and/or communication skills
- faulty or inappropriate equipment
- site hazards
- skills of the work unit/team
- staffing resources
- time limitations.
-

Unit Sector(s)

Not Applicable

Functional Area:

Functional Area: Elective. Cleaning Operations

PRMCL37A Clean external surfaces

Modification History

Not Applicable

Unit Descriptor

Unit descriptor

This unit of competency covers the skills and knowledge required to clean external surfaces. This unit covers the planned cleaning of external surfaces as well as the spot cleaning of these surfaces in situations where only a part of the surface is soiled and requires immediate attention e.g. graffiti markings. This unit applies to external surfaces less than two metres high. Surfaces requiring cleaning that are above this height require the use of specialised equipment, cleaning techniques and safety procedures. Some external surfaces, such as sandstone and heritage buildings, may be sensitive and require the use of specialised cleaning methods.

The unit requires the ability to assess the extent of the cleaning task through a knowledge of the characteristics of the external surface and the type of surface soiling, and applying an understanding of client requirements and company policies and procedures in order to perform the task. The work may be performed in teams or individually. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently. These work functions would be carried out under direct supervision within company guidelines.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Assess area to be cleaned

- 1.1 Assess area to be cleaned and review *work order* in accordance with *company requirements* and clarify any issues with *appropriate person(s)*
 - 1.2 Identify *hazards* and control risks in the work site in accordance with *legislative, occupational health and safety (OHS)* and *company requirements*
 - 1.3 Identify type and condition of *external surface* through observation in accordance with *work order* and *company requirements*
 - 1.4 Identify *soil* type on *external surface* through observation in accordance with *work order* and *company requirements*
 - 1.5 Identify work site access arrangements in accordance with *work order* and *OHS* and *company requirements*
 - 1.6 Confirm the most appropriate *cleaning technique(s)* in accordance with *work order* and *company requirements*
 - 1.7 Determine the size and usage pattern of the work site to ensure safety of *personnel* and efficient use of *equipment* and *chemicals*
-

ELEMENT	PERFORMANCE CRITERIA
	1.8 Identify and report any pre-existing damage at the work site to the <i>appropriate person(s)</i>
2 Select equipment and chemicals	<p>2.1 Select and use suitable <i>personal protective equipment (PPE)</i> in accordance with <i>manufacturers' specifications, OHS and company requirements</i></p> <p>2.2 Select <i>equipment and chemicals</i> appropriate for the <i>work order</i> in accordance with <i>OHS and company requirements</i></p> <p>2.3 Check operational effectiveness of <i>equipment</i> in accordance with <i>manufacturers' specifications and company requirements</i></p> <p>2.4 Adjust <i>equipment</i> to suit operator's requirements in accordance with <i>manufacturers' specifications and OHS requirements</i></p> <p>2.5 Prepare <i>chemicals</i> in accordance with <i>manufacturers' specifications, OHS and company requirements</i></p>
3 Prepare work site	<p>3.1 Confirm and reassess <i>hazards</i> in the work site and control risks in accordance with <i>legislative, OHS and company requirements</i></p> <p>3.2 Install appropriate <i>signage and barriers</i> to maximise public safety during the cleaning operation in accordance with <i>work order and OHS and company requirements</i></p> <p>3.3 Identify any <i>work restrictions</i> affecting the completion of the <i>work order</i> instructions and advise promptly <i>appropriate person(s)</i></p>
4 Clean work site	<p>4.1 Clean the <i>external surface</i> using appropriate <i>equipment, PPE, chemicals and cleaning technique(s)</i></p> <p>4.2 Conduct all work in accordance with <i>manufacturers' specifications and legislative, OHS and company requirements</i></p>
5 Tidy work site	<p>5.1 Dispose of all collected <i>soil and waste</i> in accordance with client specifications, <i>work order, manufacturers' specifications and environmental, legislative, OHS and company requirements</i></p> <p>5.2 Remove signage and barriers in accordance with <i>work order and OHS and company requirements</i></p>

ELEMENT

6 Clean, safety-check and store equipment

PERFORMANCE CRITERIA

- 6.1 Clean *equipment* and *PPE* in accordance with *manufacturers' specifications* and *environmental, OHS* and *company requirements*
- 6.2 Safety-check *equipment* and *PPE* in accordance with *manufacturers' specifications* and *OHS requirements* and record any required maintenance in accordance with *company requirements*
- 6.3 Store and maintain *equipment* and *PPE* to allow ready access in accordance with *manufacturers' specifications* and *OHS* and *company requirements*
- 6.4 Store chemicals in accordance with *manufacturers' specifications* and *OHS* and *company requirements*

Required Skills and Knowledge

Refer to Evidence Guide

Evidence Guide

EVIDENCE GUIDE

The evidence guide identifies the requirements to be demonstrated to confirm competence for this unit. Assessment must confirm sufficient ability to use appropriate skills and knowledge to clean external surfaces. Assessment of performance should be over a period of time covering all categories within the range statement that are applicable in the working environment.

Critical aspects of competency

- Accurate identification of the type and characteristics of external surfaces and the types of soil.
- Compliance with company and legislative requirements.
- Outcomes achieved in relation to customer work order and company requirements.
- Safe and efficient cleaning methods.
- Selection of appropriate cleaning equipment and chemicals.

Knowledge needed to achieve the performance criteria

Knowledge and understanding are essential to apply this unit in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this unit are listed below.

- Types of external surfaces and their characteristic features.
- Knowledge of the range of cleaning equipment and chemicals suitable for external surfaces.
- Awareness of applicable legislation, regulations, codes of practice and industry advisory standards.
- Awareness of OHS legislation and procedures.
- Communication and negotiation techniques.
- Company management structure and reporting procedures.
- Company procedures and practices.
- Emergency response and evacuation procedures.
- Injury, dangerous occurrence and incident reporting.
- Knowledge of biological and viral control procedures.
- Routes of entry and potential symptoms of exposure from chemicals.

Specific skills needed to achieve the performance criteria

To achieve the performance criteria, some complementary skills are required. These are:

- cleaning techniques for various surface types
- applying correct manual handling techniques
- communicating clearly and concisely using written and verbal modes
- customer service
- handling and disposal of chemicals safely
- handling and disposal of contaminated and toxic waste
- performing the mathematical calculations required for the dilution and mixing of chemicals as specified on product labels
- planning
- problem solving
- reading, interpreting and responding appropriately to directions and safety instructions in equipment manuals and MSDS and on chemical labels

- requesting advice or further information
- seeking and receiving feedback
- sourcing, organising and recording information
- working on an individual basis or as part of a team.

Other units of competency that could be assessed with this unit

Competence in this unit may be assessed in conjunction with PRMCL36B Clean at high levels.

Resources required to assess this unit

The following resources should be available:

- access to a suitable work site or venue with a variety of external surface types and soil types
- access to suitable equipment and chemicals
- access to personal protective equipment
- access to equipment operating manuals and MSDS
- work order instructions, work plans and schedules
- assessment instruments, including personal planner and assessment record book.

Gaining evidence to assess this unit

For valid and reliable assessment of this unit, the competency should be demonstrated over a period of time and be observed by the assessor.

The competency is to be demonstrated in a range of situations that may include customer/workplace interruptions and involvement in related activities normally experienced in the workplace.

Assessment of competency may be made through practical demonstration in the work environment or in a simulated work environment.

Key competency levels

There are a number of processes that are learnt throughout work and life that are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the key competencies, although others may be added. Information below highlights how these processes are applied in this unit of competency.

- | | | |
|------------------------------|---|---|
| 1 Perform the process | 2 Perform and administer the process | 3 Perform, administer and design the process |
|------------------------------|---|---|

How can communication of ideas and information be applied?	1	Confirm own role and responsibilities with colleagues and supervisors to ensure compliance with work order and company requirements such as OHS.
How can information be collected, analysed and organised ?	1	Collect and analyse information regarding work site in line with company procedures.
How are activities planned and organised ?	1	Organise and prioritise work tasks to meet work order and company requirements.
How can teamwork be applied?	1	Provide support and assistance to team members to complete work tasks within designated timelines and to meet company requirements.
How can the use of mathematical ideas and techniques be applied?	1	Calculate surface area to be cleaned and measure and carry out chemical applications.
How can problem-solving skills be applied?	1	Discuss with management/clients/site managers, supervisors and team members how to help solve problems that may arise.
How can the use of technology be applied?	1	Record data for future use such as stock control.

Range Statement

RANGE STATEMENT

The range statement links the required knowledge and organisational and technical requirements to the workplace context. It describes any contextual variables that will be used or encountered when applying the competency in work situations. It allows for different work practices and work and knowledge requirements as well as for differences between organisations and workplaces. The following variables are listed in alphabetical order and may be present for this particular unit.

Appropriate person(s) may include:

- clients
- colleagues
- managers
- person(s) in control of work site(s)
- supervisors.

Chemicals may include:

- acid cleaners
- alkaline cleaners

- neutral cleaners
- solvent cleaners.

Cleaning technique(s) may include:

- hand washing
- pre-spraying
- rinsing
- scraping
- spot cleaning
- squeegeeing.

Company requirements may include:

- access and equity policy, principles and practice
- business and performance plans
- client communication procedures
- client confidentiality procedures
- client service standards
- communication channels and reporting procedures
- company goals, objectives, plans, systems and processes
- company issued identification badge/card/pass
- company policy and procedures
- company service standards
- dress and presentation requirements
- duty of care, code of conduct, code of ethics
- emergency response and evacuation procedures
- maintenance procedures for equipment and PPE
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- OHS policies and procedures
- personnel practices and guidelines
- policies and procedures relating to own role, responsibility and delegation
- quality and continuous improvement processes and standards
- records and information systems and processes
- rights and responsibilities of employees and employers
- training (induction, refresher and new skills) materials
- use of contractors
- work site access security clearance procedures.

Environmental requirements may include:

- clean-up, containment and/or isolation
- company policies and guidelines
- environmental protection agency and government department regulations and guidelines
- hazardous materials handling
- local government regulations/bylaws.

Equipment may include:

- access equipment:

- 'A' framed ladder
- wet area electrical safety connections
- cleaning equipment:
 - bucket
 - cloths
 - extraction units for contaminated waste
 - garbage bin
 - nylon scourer pad
 - scraper
 - scrubbing brush
 - soft bristle brooms
 - spray bottle
 - squeegee
 - water-fed brooms.

External surfaces may include:

- aluminium
- brick
- ceramic
- concrete
- marble
- metal
- polymer resin
- rendered surfaces
- terrazzo
- wood.

Note: External surfaces in some situations, such as heritage sites, are only cleaned by specialists.

Hazards may include:

- allergic reactions to chemicals and/or equipment, including latex allergies
- biological waste
- bites and stings
- blood and blood-stained products
- broken glass and other sharp surfaces
- chemical containers and/or decanted chemical storage containers labelled incorrectly
- confined/restricted spaces
- contaminated clothing, chemicals and/or equipment
- damaged or inappropriate equipment
- dust and fibres
- electrical hazards arising from cables, electrical fittings (switches and lights) and untested electrical equipment
- environmental impact
- extremes of heat and temperature
- fatigue
- fire
- gas
- heights

- human waste (faeces, urine, vomit)
- inadequate lighting and ventilation
- infectious and zoonotic diseases e.g. scabies/Q fever
- inhaling chemical fumes
- leaks, spill, splash and spray
- manual handling techniques including awkward and repetitive postures
- mobile/vehicle hazards around plant and vehicles
- moving and/or unguarded machinery and equipment
- noise
- occupational violence and bullying
- poor manual handling techniques
- poor personal hygiene practices
- repetitive motion, force and vibration
- synergistic chemical reactions (hazardous incompatibility or reactivity)
- syringes or other sharps
- ultraviolet light
- underfoot conditions e.g. slippery, uneven and rough surfaces
- unrestricted people access
- waste and waste disposal
- work in isolated/remote environments.

Legislative requirements may include:

- Australian Standards, quality assurance and certification requirements
- award and enterprise agreements
- codes of practice
- national industry standards
- relevant Commonwealth/state/territory legislation and local government regulations that affect company operation:
 - anti-discrimination and diversity
 - availability of chemical registers/manifests
 - chemical controls
 - consumer protection
 - environmental protection issues
 - equal employment opportunity
 - freedom of information
 - industrial equipment certificates of competency or licences
 - industrial relations
 - OHS Acts and regulations
 - privacy
 - trade practices
 - workplace consultative arrangements.

Manufacturers' specifications may include:

- equipment operational manuals
- instructional guides
- material safety data sheets
- other resources supplied by the manufacturer (such as laminated cards notices, wall posters)

- product labels
- safety instructions pre-printed on equipment.

Occupational health and safety* (OHS) requirements may relate to:

- allergic reactions (contact dermatitis, etc)
- communication devices for remote and isolated locations e.g. mobile phone, two-way radio, etc
- dermatological control and prevention measures
- hazard identification and risk assessment mechanisms
- hazard reporting
- hierarchy of hazard control procedures
- injury, dangerous occurrence and incident reporting requirements
- keeping access ways clear from obstruction
- maintaining clear access ways
- maintenance procedures for equipment and PPE
- national industry standards/codes of practice
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- protection from hazardous substances, noise and dust
- protection of people in the workplace
- routes of entry and potential symptoms of exposure from chemicals
- safety training (induction and refresher)
- ultraviolet light
- up-to-date electrical test and tag compliance
- use of chemicals in accordance with labels
- use, storage and maintenance of equipment in accordance with manufacturers' specifications and equipment operating manuals
- use, storage and maintenance of personal protective equipment and clothing.

** Also known as occupational safety and health or workplace health and safety*

Personal protective equipment (PPE) may include:

- ear muffs/plugs
- gloves - non-permeable
- goggles
- high-visibility vests/clothing
- overalls and other protective clothing
- respirator
- safety glasses
- safety shoes
- splash-proof face masks
- sun protection
- ultraviolet protection
- wet-work clothing.

Personnel may include:

- client's staff
- fellow workers (colleagues)
- general public

- venue/facility/building/shopping centre staff/management.

Rights and responsibilities of employees may relate to:

- confidentiality and privacy rights
- duty of care
- knowing the appropriate personnel for reporting purposes
- knowing the location of manuals and/or related documents
- knowing the terms and conditions of own employment
- knowing the workplace procedures
- protection from discrimination and sexual harassment.

Rights and responsibilities of employers may relate to:

- duty of care
- providing a safe environment free from discrimination and sexual harassment (see relevant state and Commonwealth anti-discrimination legislation)
- providing a safe workplace in accordance with OHS legislation, codes of practice, regulations and standards
- providing information and training in work tasks, OHS and other employment related matters
- the right to dismiss you if you (see the Commonwealth *Workplace Relations Act 1996*):
 - are negligent, careless or cause an accident
 - commit a criminal offence
 - commit acts of disloyalty such as revealing confidential information
 - use abusive language.

Signage and barriers may include:

- physical barriers and restraints erected to restrict access to a site
- signs complying with legislative requirements and/or Australian Standards warning of danger and/or adverse conditions including cleaning in progress and hazardous chemicals are in use or present in the work area.

Soil types may include:

- food and beverage stains
- food grime
- graffiti (ink, texta, paint)
- human waste
- mould and mildew
- mud and soil
- scuff marks.

Waste may be either solid or liquid and include:

- chemicals past the expiry date
- obsolete equipment
- packaging
- soil
- used containers
- used or unused chemicals
- used/contaminated personal protective equipment.

Work order information may include:

- access to work site and egress points
- completion times/dates
- insufficient people to complete the work task(s)
- job requirements and tasks
- legislative requirements and local government
- OHS requirements and emergency response procedures
- resource requirements - equipment and chemicals
- specific client requirements e.g. relationships with other activities, dress and presentation requirements
- use of signage and barriers
- work schedules
- working in isolated and remote locations
- work site contact person(s).

Work restrictions may include:

- amount of cleaning anticipated
- client activity
- employee(s) level of literacy and/or communication skills
- faulty or inappropriate equipment
- site hazards
- skills of the work unit/team
- staffing resources
- time limitations.

Unit Descriptor

Unit descriptor

This unit of competency covers the skills and knowledge required to clean in a food handling area where the work does not involve direct food contact. This unit is not appropriate for a person who has direct contact with food and/or raw materials/ingredients.

This unit is based on the guideline food safety unit GFSWFHAA Carry out work in a food handling area.

Food handling areas include food courts and industrial food processing plants.

The unit requires the ability to assess the extent of the cleaning task through understanding client requirements, the special characteristics of food handling areas, and applying company policies and procedures in order to perform the task. The selection of appropriate equipment, chemicals and methods is essential for performing the task safely and efficiently. This unit recognises the importance of paying careful attention to health and safety issues.

Required Skills and Knowledge

Refer to Evidence Guide

Evidence Guide

EVIDENCE GUIDE

The evidence guide identifies the requirements to be demonstrated to confirm competence for this unit. Assessment must confirm sufficient ability to use appropriate skills and knowledge to clean in a food handling area. Assessment of performance should be over a period of time covering all categories within the range statement that are applicable in the working environment.

Critical aspects of competency

- Access and apply workplace information on food safety policies and procedures relating to own work.
- Accurate identification of the hazards associated with food handling area.
- Accurate identification of the surfaces and soil types found in food handling.
- Compliance with company and legislative requirements.
- Fit and use appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements.
- Identification of food safety hazards in work area.
- Maintain housekeeping standards in the food handling area and dispose of waste to meet food-handling requirements.
- Maintain personal conduct and hygiene to ensure that food safety is not compromised.
- Outcomes achieved in relation to customer work order and company requirements.
- Recognise and report situations or procedures that could compromise food safety.
- Report health conditions and illness as required by workplace food safety procedures.
- Safe and efficient cleaning methods.
- Selection of appropriate cleaning equipment and chemicals.
- Take necessary precautions when moving between or around the workplace and/or from one task to another to minimise risk of food contamination.
- Wear and maintain appropriate clothing and footwear as required by work task to meet food safety procedures.

Knowledge needed to achieve the performance criteria

Knowledge and understanding are essential to apply this unit in the workplace, to transfer the skills to other contexts and to deal with unplanned events. The knowledge requirements for this unit are listed below.

- Access to workplace information on food safety policies and procedures.
- Sources of advice on food safety issues and responsibilities in the workplace.
- Personal hygiene practices, clothing and footwear requirements associated with working in and moving in and between food handling areas and in moving between food handling and non-food handling areas.
- Suitable equipment, chemicals and other chemicals for use in the food handling area, including a knowledge of unsuitable equipment and materials e.g. breakable and/or dirty equipment and materials.
- Types of contamination and prevention methods.
- Cleaning and sanitation requirements.
- Waste collection, recycling and handling procedures.
- Knowledge of the range of cleaning equipment, chemicals and cleaning methods.
- Awareness of applicable legislation, regulations, codes of practice and industry advisory standards.

- Awareness of OHS legislation and procedures.
- Communication and negotiation techniques.
- Company management structure and reporting procedures.
- Company procedures and practices.
- Emergency response and evacuation procedures.
- Injury, dangerous occurrence and incident reporting.
- Knowledge of biological and viral control procedures.
- Routes of entry and potential symptoms of exposure from chemicals.

Specific skills needed to achieve the performance criteria

To achieve the performance criteria, some complementary skills are required. These are:

- accurate identification of soil and stains
- accurate selection of chemicals to suit surface type
- dusting, cleaning, polishing and buffing techniques
- replenishing consumables
- applying correct manual handling techniques
- communicating concisely using written and verbal modes
- customer service
- handling and disposal of chemicals safely
- handling and disposal of contaminated and toxic waste
- performing the mathematical calculations required for the dilution and mixing of chemicals as specified on product labels
- planning
- problem solving and critical analysis
- reading, interpreting and responding appropriately to directions and safety instructions in equipment manuals and MSDS and on chemical labels
- requesting advice or further information
- seeking and receiving feedback
- sourcing, organising and recording information
- working on an individual basis or as part of a team.

Other units of competency that could be assessed with this unit

Competence in this unit may be assessed in conjunction with:

- PRMCL01B Maintain a hard floor surface.

Resources required to assess this unit

The following resources should be available:

- access to a suitable food handling work site or venue
- access to suitable equipment and chemicals
- access to personal protective equipment
- access to equipment operating manuals and MSDS
- access to food safety policies and procedures relevant to the workplace
- work order instructions, work plans and schedules
- assessment instruments, including personal planner and assessment record book.

Gaining evidence to assess this unit

For valid and reliable assessment of this unit, the competency should be demonstrated over a period of time and be observed by the assessor.

The competency is to be demonstrated in a range of situations that may include customer/workplace interruptions and involvement in related activities normally experienced in the workplace.

Assessment of competency may be made through practical demonstration in the work environment or in a simulated work environment.

Key competency levels

There are a number of processes that are learnt throughout work and life that are required in all jobs. They are fundamental processes and generally transferable to other work functions. Some of these are covered by the key competencies, although others may be added. Information below highlights how these processes are applied in this unit of competency.

- | | | |
|------------------------------|---|---|
| 1 Perform the process | 2 Perform and administer the process | 3 Perform, administer and design the process |
|------------------------------|---|---|

How can communication of ideas and information be applied?	1	Confirm own role and responsibilities with colleagues and supervisors to ensure compliance with work order and company requirements such as OHS.
How can information be collected, analysed and organised ?	1	Collect and analyse information regarding work site in line with company procedures.
How are activities planned and organised ?	1	Organise and prioritise work tasks to meet work order and company requirements.
How can teamwork be applied?	1	Provide support and assistance to team members to complete work tasks within designated timelines and to meet company requirements.
How can the use of mathematical ideas and techniques be applied?	1	Calculate area(s) to be cleaned and measure and carry out chemical applications.
How can problem-solving skills be applied?	1	Discuss with management/clients/site managers, supervisors and team members how to help solve problems that may arise.
How can the use of technology be applied?	1	Record data for future use such as stock control.

Range Statement

RANGE STATEMENT

The range statement links the required knowledge and organisational and technical requirements to the workplace context. It describes any contextual variables that will be used or encountered when applying the competency in work situations. It allows for different work practices and work and knowledge requirements as well as for differences between organisations and workplaces. The following variables are listed in alphabetical order and may be present for this particular unit.

Appropriate person(s) may include:

- clients
- colleagues
- managers
- person(s) in control of work site(s)
- supervisors.

Chemicals may include:

- acid cleaners
- alkaline cleaners

- neutral cleaners
- solvent cleaners.

Cleaning technique(s) may include:

- buffing
- damp dusting
- hosing
- mopping
- polishing
- pre-spraying
- scrubbing
- spot cleaning
- sweeping
- wet wiping
- window cleaning.

Company requirements may include:

- access and equity policy, principles and practice
- business and performance plans
- client communication procedures
- client confidentiality procedures
- client service standards
- communication channels and reporting procedures
- company goals, objectives, plans, systems and processes
- company issued identification badge/card/pass
- company policy and procedures
- company service standards
- dress and presentation requirements
- duty of care, code of conduct, code of ethics
- emergency response and evacuation procedures
- maintenance procedures for equipment and PPE
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- OHS policies and procedures
- personnel practices and guidelines
- policies and procedures relating to own role, responsibility and delegation
- quality and continuous improvement processes and standards
- records and information systems and processes
- rights and responsibilities of employees and employers
- training (induction, refresher and new skills) materials
- use of contractors
- work site access security clearance procedures.

Consumables may include:

- air fresheners
- bin liners
- cloth towels/tea towels
- disposable gloves

- hair nets
- hand towels (cloth, rolls and sheets)
- serviettes
- soap (liquid or bar forms).

Contamination hazards include:

- chemical contamination caused by cleaning and sanitation chemicals
- microbiological contamination resulting from cross-contamination when moving into and between food handling areas
- physical contamination caused by metal, glass, plastic and cloths.

Environmental requirements may include:

- clean-up, containment and/or isolation
- company policies and guidelines
- environmental protection agency and government department regulations and guidelines
- hazardous materials handling
- local government regulations/bylaws.

Equipment may include:

- absorbent cleaning cloths
- brooms
- buckets
- cleaning trolley
- damp cloths
- doodle bug
- dry cloths
- hose and nozzle
- lint-free cloths
- long-handled brush and dustpan tongs
- mops
- needle hazard disposal unit
- nylon scourers
- scraper
- scrubbing brush
- scrubbing or polishing machines
- toilet brush
- window squeegee
- wringer buckets.

Food handling areas include:

- dispatching food
- handling food
- inspecting food
- packaging food
- preparing food
- processing
- receiving food
- storing food
- transporting food.

Food safety program identifies the food safety hazards that may be reasonably expected to occur in all food handling operations of a food business and:

- identifies where and how each hazard can be controlled
- describes how the controls are monitored
- describes the corrective actions required if conditions are not met
- specifies the information to be recorded and the procedures to be signed off
- must comply with relevant national, state and industry legislation and regulations
- includes the responsibilities for any person visiting and/or working in a food handling area
- specifies minimum procedures to ensure any person does not:
 - contaminate food
 - have unnecessary contact with ready-to-eat food
 - spit, smoke or use tobacco or similar in a food handling area (refer Food Safety Standard 3.2.2, Clause 17:3 and state regulations/legislation).

Hazards may include:

- allergic reactions to chemicals and/or equipment, including latex allergies
- biological waste
- bites and stings
- blood and blood-stained products
- broken glass and other sharp surfaces
- chemical containers and/or decanted chemical storage containers labelled incorrectly
- confined/restricted spaces
- contaminated clothing, chemicals and/or equipment
- damaged or inappropriate equipment
- dust and fibres
- electrical hazards arising from cables, electrical fittings (switches and lights) and untested electrical equipment
- environmental impact
- extremes of heat and temperature
- fatigue
- fire
- gas
- heights
- human waste (faeces, urine, vomit)
- inadequate lighting and ventilation
- infectious and zoonotic diseases e.g. scabies/Q fever
- inhaling chemical fumes
- leaks, spill, splash and spray
- manual handling techniques including awkward and repetitive postures
- mobile/vehicle hazards around plant and vehicles
- moving and/or unguarded machinery and equipment
- noise
- occupational violence and bullying
- poor manual handling techniques
- poor personal hygiene practices
- repetitive motion, force and vibration
- synergistic chemical reactions (hazardous incompatibility or reactivity)
- syringes or other sharps

- ultraviolet light
- underfoot conditions e.g. slippery, uneven and rough surfaces
- unrestricted people access
- waste and waste disposal
- work in isolated/remote environments.

Legislative requirements may include:

- Australian Standards, quality assurance and certification requirements
- award and enterprise agreements
- codes of practice
- national industry standards
- relevant Commonwealth/state/territory legislation and local government regulations that affect company operation:
 - anti-discrimination and diversity
 - availability of chemical registers/manifests
 - chemical controls
 - consumer protection
 - environmental protection issues
 - equal employment opportunity
 - freedom of information
 - industrial equipment certificates of competency or licences
 - industrial relations
 - OHS Acts and regulations
 - privacy
 - trade practices
 - workplace consultative arrangements.

Manufacturers' specifications may include:

- equipment operational manuals
- instructional guides
- material safety data sheets
- other resources supplied by the manufacturer (such as laminated cards notices, wall posters)
- product labels
- safety instructions pre-printed on equipment.

Occupational health and safety* (OHS) requirements may relate to:

- allergic reactions (contact dermatitis, etc)
- communication devices for remote and isolated locations e.g. mobile phone, two-way radio, etc
- dermatotoxicological control and prevention measures
- hazard identification and risk assessment mechanisms
- hazard reporting
- hierarchy of hazard control procedures
- injury, dangerous occurrence and incident reporting requirements
- keeping access ways clear from obstruction
- maintaining clear access ways
- maintenance procedures for equipment and PPE

- national industry standards/codes of practice
- OHS control procedures (e.g. health and safety plans, job plans, job safety analysis, risk assessments, safe operating practices/procedures, safe work instructions, work method statements, safe system of work statements)
- protection from hazardous substances, noise and dust
- protection of people in the workplace
- routes of entry and potential symptoms of exposure from chemicals
- safety training (induction and refresher)
- ultraviolet light
- up-to-date electrical test and tag compliance
- use of chemicals in accordance with labels
- use, storage and maintenance of equipment in accordance with manufacturers' specifications and equipment operating manuals
- use, storage and maintenance of personal protective equipment and clothing.

** Also known as occupational safety and health or workplace health and safety*

Personal protective equipment (PPE) may include:

- ear muffs/plugs
- gloves - non-permeable
- goggles
- high-visibility vests/clothing
- overalls and other protective clothing
- respirator
- safety glasses
- safety shoes
- splash-proof face masks
- sun protection
- tongs
- ultraviolet protection
- wet-work clothing.

Personnel may include:

- client's staff
- fellow workers (colleagues)
- general public
- venue/facility/building/shopping centre staff/management.

Rights and responsibilities of employees may relate to:

- confidentiality and privacy rights
- duty of care
- knowing the appropriate personnel for reporting purposes
- knowing the location of manuals and/or related documents
- knowing the terms and conditions of own employment
- knowing the workplace procedures
- protection from discrimination and sexual harassment.

Rights and responsibilities of employers may relate to:

- duty of care

- providing a safe environment free from discrimination and sexual harassment (see relevant state and Commonwealth anti-discrimination legislation)
- providing a safe workplace in accordance with OHS legislation, codes of practice, regulations and standards
- providing information and training in work tasks, OHS and other employment related matters
- the right to dismiss you if you (see the Commonwealth *Workplace Relations Act 1996*):
 - are negligent, careless or cause an accident
 - commit a criminal offence
 - commit acts of disloyalty such as revealing confidential information
 - use abusive language.

Signage and barriers may include:

- physical barriers and restraints erected to restrict access to a site
- signs complying with legislative requirements and/or Australian Standards warning of danger and/or adverse conditions including cleaning in progress and hazardous chemicals are in use or present in the work area.

Soil types can be wet or dry and may include:

- blood
- dust
- food, food scraps and residue
- grease
- human waste (faeces, urine, vomit)
- litter
- mould and algae
- mud and dirt
- pen, texta, pencil
- rust
- soap scum
- syringes.

Surfaces may include:

- ceramics and porcelain
- chrome
- concrete
- glass
- laminates
- metal
- painted
- plastic
- stainless steel
- stone
- terracotta
- vinyl.

Waste may be either solid or liquid and include:

- chemicals past the expiry date

- cloths
- contaminated waste
- food leftovers/scraps
- liquid waste
- litter
- obsolete cleaning equipment
- packaging
- soil
- used containers
- used or unused chemicals
- used/contaminated personal protective equipment.

Work order information may include:

- access to work site and egress points
- completion times/dates
- insufficient people to complete the work task(s)
- job requirements and tasks
- legislative requirements and local government
- OHS requirements and emergency response procedures
- resource requirements - equipment and chemicals
- specific client requirements e.g. relationships with other activities, dress and presentation requirements
- use of signage and barriers
- work schedules
- working in isolated and remote locations
- work site contact person(s).

Work restrictions may include:

- amount of cleaning anticipated
- client activity
- employee(s) level of literacy and/or communication skills
- faulty or inappropriate equipment
- site hazards
- skills of the work unit/team
- staffing resources
- time limitations.
-

Employability Skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Work safely in the vicinity of aircraft	<p>1.1 <i>Suitable, visible clothing and protective equipment</i> are used</p> <p>1.2 Appropriate <i>precautions</i> and clearances are followed when operating on or near aircraft movement areas</p> <p>1.3 Any approach to an operating <i>aircraft</i> is made according to the organisation's procedures, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew</p> <p>1.4 Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes</p> <p>1.5 Activities anticipate the typical <i>manoeuvring patterns</i> of aircraft</p> <p>1.6 Any instructions or signals from pilots or staff controlling aircraft are complied with</p> <p>1.7 <i>Site hazards</i> are identified</p>
2. Facilitate safe ground support	<p>2.1 <i>Appropriate precautions</i> are observed when positioning vehicles or equipment close to aircraft</p> <p>2.2 Aircraft design features are respected while boarding, loading or handling aircraft</p> <p>2.3 Instructions from pilots, the organisation's staff coordinating aircraft operations, organisation's procedures and placards are followed during ground support operations</p> <p>2.4 Aircraft loading is supervised by the pilot or flight crew member and complies with the appropriate weight, balance and loading system</p> <p>2.5 Areas are designated and separated according to site features and the specific operations being conducted</p> <p>2.6 Fitting of equipment to an aircraft is conducted under the pilot's supervision and with the appropriate regulatory approvals</p> <p>2.7 Aircraft fuels, oils, and supplies are stored and handled according to regulatory requirements and the organisation's procedures</p> <p>2.8 Any suspected defects or hazards to aircraft or equipment are reported to the pilot or other appropriate supervisor</p>

ELEMENT

PERFORMANCE CRITERIA

2.9 Appropriate aerodrome regulations are complied with

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

Use of specialist aviation support equipment

Required Knowledge

aircraft familiarisation

aerodrome familiarisation

aerodrome working and lighting

aircraft movement characteristics

overview of aircraft performance, operation, loading and refuelling precautions

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in:

compliance with regulatory requirements and the organisation's procedures; identification of hazards, and precautions effected on a consistent, conscious and continuing basis; detailed knowledge of procedures for unusual events

Actions are driven by an overriding concern for safety and quality rather than minimal observance of requirements

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment

Specific resources for assessment

Access to actual or simulated aircraft and aerodrome facilities

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Aircraft may include	aeroplanes helicopters unmanned aerial vehicles other airborne vehicles
Suitable visible clothing and protective equipment may include	high visibility overalls/vests use of lighting or beacons hand, eye, ear and foot protection
Appropriate precautions while manoeuvring may include	fixed wing and helicopter marshalling observing aerodrome limits ground markings/lighting avoidance of obstructions/hazards and navigation aids clearances (radio) advisory instructions light signals
Safety equipment may include	first aid fire extinguisher ear muffs eye goggles protective overalls protective boots respiratory protection signalling devices head protection
Site hazards may include	wires/powerlines/fences live stock native fauna masts/aerials

RANGE STATEMENT

	terrain
	weather conditions
	level of visibility
	public
	trees
	dust
Anticipation of manoeuvring patterns may include	circuit procedures
	take-off, approach and landing characteristics
	ground manoeuvring capabilities
	special procedures (eg. at night or in poor weather conditions)
Protection against hazards may include	hand, eye, ears and foot protection
Operational procedures for approaching aircraft may include	maintaining visibility with pilot or flight crew
	compliance with pilot or flight crew instructions
	compliance with operational placards
Aircraft controllers may include	pilot
	flight crew
	ground support supervisor
	aircraft coordinating personnel

Corequisite Unit/s

Co-requisite Unit/s Nil

SITTTSL007A Receive and process reservations

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to receive and process reservations for a tourism or hospitality product or service offered for sale to agents or direct to the consumer. It requires the ability to determine the availability of the product or service, offer alternatives, accurately record the reservation details and administer the reservation through to finalisation. This unit does not cover specific selling skills required by reservations or call centre staff, nor does it cover the use of a computerised reservation system to manage reservations. These skills are covered by SITTTSL005A Sell tourism products and services and SITTTSL010A Control reservations or operations using a computerised system. No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit describes a key sales function for a diverse range of domestic and international tourism and hospitality products and services. It applies to those tourism operators who act as principal (the supplier) and who receive and process reservations for the supply of their product or service. This would include airlines, car rental companies, hotels, motels, bed and breakfasts or other accommodation providers, tour operators of any type, outbound tour wholesalers and attractions and theme parks. Reservations personnel may be involved in a direct selling role to the consumer but are very often engaged in selling to some sort of tourism industry agent.

Reservations are processed for a particular product or service or for a whole product range and would normally be processed and managed within a computerised system but some small business operators would use a manual system.

This unit applies to those frontline sales personnel who operate with some level of autonomy or under limited supervision and guidance from others and is undertaken by people such as reservations sales agents, reservations consultants, call centre consultants, booking officers and owner-operators of small tourism businesses.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Nil

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Receive reservation request.	<ul style="list-style-type: none">1.1 Determine the availability of the requested reservation and advise this to customer.1.2 Offer alternatives if the requested booking is not available, including waitlist options.1.3 Answer enquiries regarding costs and other product features.
2 Record details of reservation.	<ul style="list-style-type: none">2.1 Accurately record customer details against their reservation in a manner that ensures correct interpretation by others who may access the reservations details.2.2 Check for and make use of customer profile or history, if available, and use information to assist in making the reservation and enhancing customer service.2.3 Clearly record any special requests according to organisation requirements.2.4 Confirm all details of the booking with the customer and ensure that they understand and agree to all details.2.5 File the reservation in a manner that ensures easy access by others and according to organisation

procedures.

- 2.6 Prepare and issue **documents** and other material to the customer according to requirements of the specific reservation.
- 3 Update reservations.
 - 3.1 **Update the financial status of the reservation** accurately and according to organisation procedures.
 - 3.2 Receive, process and record any amendments to or cancellations of reservations according to customer request and organisation procedures.
- 4 Advise others on reservation details.
 - 4.1 Communicate **general and specific customer requirements and reservation details** to appropriate departments and colleagues.
 - 4.2 Compile and provide accurate and relevant reservation statistics on request.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

verbal and written use of the 24-hour clock and ability to translate for customers

verbal and written use of reservation jargon, system and product codes

literacy skills to read and interpret reservation information such as customer files, customer requests and complex product and costing information

writing skills to create customer files and succinctly document complex customer requests and any conditions specifically applicable to reservations

numeracy skills to prepare and present reservation statistics.

The following knowledge must be assessed as part of this unit:

in-depth product knowledge appropriate to the specific industry sector and product being sold

reservations and bookings terminology

relationships between different sectors of the tourism industry that relate to reservations, including sources of reservations

working knowledge of the principles underpinning the particular reservations system in use.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

ability to make accurate reservations according to established systems and procedures and within typical workplace time constraints

ability to receive and process multiple reservations in response to multiple customer requests covering a range of tourism products and services and ideally as a component of integrated work activity

understanding of the different sources of reservations and the industry interrelationships that apply

project or work activities that show the candidates' ability to receive and process reservations within the context of the particular industry sector in which they are working or seeking work; for those undertaking generic pre-employment training, assessment must cover a range of industry contexts to allow for a broad range of vocational outcomes.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills within a fully equipped industry-realistic office environment using appropriate telephones, computers and printers

access to a computerised or manual reservations system currently used by tourism and hospitality industry operators to control the reservations function for the supply of their product or service

use of industry-current reservations documentation.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

direct observation of the candidate receiving and processing reservations

evaluation of integrated activities completed by the candidate, including sourcing information on products, selling products, providing quotations and issuing documents

evaluation of reservations documentation and booking data generated by the candidate

activities to assess ability to process differing types of reservations, including booking, retrieving and amending a series of bookings

written and oral questioning or interview to test knowledge of the principles

underpinning reservations procedures and the relationships between different sectors of the tourism industry

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITTTSL005A Sell tourism products and services

SITTTSL006A Prepare quotations

SITTTSL010A Control reservations or operations using a computerised system.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Customers may be: industry customers, e.g. retail travel
consultants and inbound tour companies or
operators
end users of the service, i.e. the consumer.

Customer details may be recorded using: a computer file
a manual file.

Reservation: may be made by:
phone
facsimile
mail
face-to-face
internet
may be for:
individuals
groups
VIPs
conference delegates.

Customer profiles may include:

- full name and title
- address
- phone, fax, email and other communication methods
- special requirements
- amount of business generated by the customer
- usual method of payment.

Documents issued to customers may include:

- invoices
- credit notes
- receipts
- service vouchers
- confirmation letters
- information packs.

Updating the financial status of the reservation may include:

- receiving, processing and recording payments
- generating and issuing invoices and credit notes for changed reservations
- checking and recording that the reservation has been fully paid.

General and specific customer requirements and reservation details may include:

- special requests
- timing details
- special needs
- payment arrangements
- information of a style of customer, e.g. special interest group or VIP status
- details of other services being used.

Unit Sector(s)

Tourism

Competency field

Tourism Sales and Operations

SITTTSL009A Process travel-related documentation

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to process a range of travel documentation commonly used or issued within the tourism industry. It requires the ability to identify and interpret all documentation requirements and to prepare and despatch documents within designated deadlines.

Travel-related documents can include air tickets. In most States and Territories, organisations that issue air tickets must meet the requirements of relevant state or territory Department or Office of Fair Trading which, in most cases, requires the tourism organisation to hold a travel agents licence. In many cases managers must have formally achieved competence in constructing and ticketing airfares through a registered training organisation that must use this unit as the basis for their training.

Application of the Unit

This unit describes a key operational function for a diverse range of domestic and international tourism and hospitality products and services and applies to the full range of industry sectors. It applies to all organisations where travel and tourism documents are issued to customers or tour delivery staff. Documentation can be administered using a computerised or manual system.

The unit applies to frontline operations personnel who operate with some level of autonomy or under limited supervision and guidance from others. It is undertaken by a diverse range of people such as retail travel consultants, corporate consultants, inbound tour coordinators, visitor information officers, account managers for professional conference organisers, event coordinators, tour guides, tour desk officers and operations coordinators. Some larger organisations such as tour wholesalers support a documentation department staffed by industry entry-level documentation officers or clerks who may require more supervision.

The range of products and services and complexity of documents will vary according to the industry sector. Because of the broad industry application of this unit, it is critical that assessment is contextualised to meet the requirements of the specific industry sector, local tourism industry operations and the particular needs of the job role.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

This unit must be assessed after the following prerequisite unit:
SITTSL002A Access and interpret product information.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Interpret information required for processing of documentation.	<ul style="list-style-type: none">1.1 Identify deadline for preparation and despatch of documents.1.2 Interpret existing reservation data held for the customer to identify all customer details correctly.1.3 Identify and interpret details of specific products and services that have been sold and confirmed to the customer and check prices quoted.1.4 Identify confirmed bookings held for customers and costs quoted by product and service suppliers.1.5 Identify sources of general information required to issue all necessary documents.1.6 Check payment status and take appropriate action.1.7 Check for and report any discrepancies in costs quoted to the customer and actual cost of services and take any follow-up action required to collect shortfall.

- 1.8 Identify any operational documents required by personnel involved in delivering the tourism product.
- 2 Process documentation.
 - 2.1 Prepare complete and accurate **documentation** within designated timeframes.
 - 2.2 Record required details on documentation with accuracy and according to the conditions applicable to the product.
 - 2.3 Make appropriate calculations and record any required costs within documents.
 - 2.4 **Action payment required by the supplier** at the appropriate time according to organisation procedures.
 - 2.5 Check all documentation for accuracy prior to issue and amend as necessary.
 - 2.6 Process, file and despatch **copies of documents** according to organisation and supplier procedures and requirements.
 - 2.7 Despatch documents according to customer and organisation requirements.
 - 2.8 Reissue documentation where appropriate and process any required refunds or additional payments required according to conditions applicable to the product.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

interpretation of customer and operational requirements

interpretation of quotations previously supplied to customer

literacy skills to read and interpret reservation and operational data, read and interpret complex itineraries and product information, and prepare accurate and clearly expressed travel-related documents

numeracy skills to calculate costs quoted to the customer, check payment status of customer files and issue documents with correct monetary value.

The following knowledge must be assessed as part of this unit:

procedures and principles underpinning the processing of documentation

documentation types and standard formats used in the tourism industry

basic product knowledge appropriate to the specific industry sector

relationships between different sectors of the tourism industry in relation to requirements for and acceptance of tourism documentation

basic understanding of the negotiated costs, contractual arrangements and preferred supplier arrangements in place.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

ability to interpret and confirm the customer's requirements

ability to identify any documents required by operational or delivery personnel

ability to process and issue accurate tourism documentation

ability to process a range of different tourism product, service or operational documentation for multiple customer, tour or event files and ideally as a component of integrated work activity

understanding of the principles that apply to the processing of any type of documentation

project or work activities that show the candidates' ability to process tourism documentation within the context of the particular industry sector in which they are working or seeking work; for those undertaking generic pre-employment training, assessment must cover a range of industry contexts to allow for a broad range of vocational outcomes

issuing of documentation within typical workplace time constraints and the deadlines determined by the customer and the organisation.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills within a fully equipped industry-realistic office environment using appropriate computers, printers, information programs, publications and software programs currently used in the tourism industry to control documentation functions **or** demonstration within the applicable sales environment for the sector e.g. a conference venue for the Events sector or touring environment for the Guiding and Tour Operations sectors

use of customer and operational file types showing reservations or operational data as the basis for the issuing of documentation

use of industry-current documents, such as itineraries, vouchers and confirmation letters

where assessment covers air documents and tickets, the use of industry-current airline or consolidator documentation, computer data, schedules, tariffs and bulletins outlining rules, conditions and regulations

for air tickets, the use of the full range of International Air Transport Association (IATA) actual or training facsimile air documentation.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

evaluation of integrated activities completed by the candidate, including sourcing information on destinations, selling products, providing quotations and booking supplier services

review of documents processed by the candidate

case studies or project activities to assess candidate's ability to issue different types of documents in different operational circumstances and for varying customer requirements

written and oral questioning or interview to test knowledge of the principles underpinning the issuing of documentation, requirements for various types of documents and relationships between different sectors of the tourism industry

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITTTSL008A Book and coordinate supplier services

SITTTSL010A Control reservations or operations using a computerised system

SITTTSL012B Construct domestic airfares

SITTTSL013B Construct normal international airfares

SITTTSL014B Construct promotional international airfares

SITTTSL015A Construct advanced international airfares.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Documents may be produced:

- manually
- using a computer.

Reservation data for the customer may be:

- a computer file
- a manual file.

Customer details may include:

- name
- age
- special requirements to be noted on documents
- agent's details
- address for delivery of documents
- date required for delivery of documents.

Products and services may be:

domestic
international.

Sources of general information required to issue all necessary documents may include:

timetables
brochures
price schedules
contracts with suppliers
centralised reservations system (CRS)
database of product suppliers and their details
internet sites
visa guides
air travel information such as:
airline schedules and timetables
airline fare manuals
tariffs from airlines
tariffs from consolidators
special bulletins issued by airlines and consolidators.

Documentation:

may include:

air travel documents such as e-tickets,
multi-purpose document (MPD), credit card
charge forms and exchange tickets

accommodation vouchers

bus, coach or other form of transportation
tickets

car hire and motor home vouchers

cruise vouchers

tour vouchers

vouchers for attraction or theme park entry

vouchers for any tourism product or service
meeting or event confirmation letters

delegate information packs

travel insurance documentation

confirmation letters

letters outlining terms, conditions and
liability restrictions

letters advising sources of information
relating to health, safety and regulatory
issues for the customer's attention

product disclosure statements

letter of commission disclosure

confirmation vouchers

commission vouchers

visa and passport forms

visas and passports

travellers cheque requests

passenger itineraries

operational itineraries for crew

briefing notes for crew

passenger lists

rooming lists

sales returns

may be produced for:

a single product or service
multiple products and services making up a complete itinerary
inclusive tours or optional tours
groups
individuals
guests or delegates
one-off touring arrangements
series tours
incentive tours
meetings
conferences.

Actioning payments required by the supplier may involve:

requesting payment from the accounts department, e.g. cheque requisition or purchase order
self-administering the payment:
issuing a miscellaneous charges order
sending payment by cheque or electronic transmission.

Copies of documents may be for:

file
accounts department
operational personnel involved in the delivery of a tour, e.g. tour guide and driver
supplier of the service.

Unit Sector(s)

Tourism

Competency field

Tourism Sales and Operations

SITTTSL010A Control reservations or operations using a computerised system

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use a computerised reservations or operations system to create, maintain and administer bookings for a range of products and services in tourism, hospitality or events. It requires the ability to use the system capabilities to fulfil a range of sales and operational functions.

The unit concentrates on the specific computer skills required to apply many tourism operational functions. This unit does not cover specific core sales and operational skills which are fully covered in other individual units, such as SITTTSL005A Sell tourism products and services, SITTTSL006A Prepare quotations and SITTTSL009A Process travel-related documentation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

This unit describes a key sales and operational function for a diverse range of domestic and international tourism and hospitality products and services and applies to the full range of industry sectors.

These industry sectors use a diverse range of computerised systems to manage reservations, operations and sales administration functions, so the system will vary depending upon the organisation and industry sector.

This unit covers the use of the industry-wide systems known as computerised or centralised reservations system (CRS) and global distribution system (GDS) commonly used by retail travel agencies when booking a suppliers service. It covers systems used by accommodation providers and tour operators when receiving and processing reservations for the supply of their product or service. It also covers other industry-wide systems used

by inbound tour operators, outbound tour wholesalers and meetings and events management organisations. It can equally apply to any organisation-based computerised reservations or operations system.

The unit applies to frontline sales and operations personnel who operate with some level of autonomy or under limited supervision and guidance from others. It is undertaken by a diverse range of people such as retail travel consultants, corporate consultants, inbound tour coordinators, visitor information officers, account managers for professional conference organisers, event coordinators, tour desk officers, operations consultants, reservations sales agents and owner-operators of small tourism businesses.

The range and complexity of products and services and the particular reservations or operations system will vary according to the industry sector. Because of the broad industry application of this unit, it is critical that training and assessment is specifically tailored. Training and assessment programs must be contextualised to meet the requirements of the specific industry sector and specific computerised systems and must allow for learners who have moved from one computer system to another to participate in retraining.

Licensing/Regulatory Information

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Access and manipulate system information.	1.1 Access and interpret system displays. 1.2 Use all system features to access a range of information .
2 Create and process reservations.	2.1 Check availability of required booking according to system functions and requirements. 2.2 Create new reservations containing accurate customer details and full requirements according to system procedures and features. 2.3 Input all customer details in the format required by the computer system. 2.4 Retrieve bookings as required, using the format required by the computer system. 2.5 Make accurate updates and amendments to reservations and store as required. 2.6 Download and print any required reservation details.

- 3 Send and receive communications.
 - 3.1 Create and process accurate communications to **industry colleagues** using the required features of the system.
 - 3.2 Access and interpret communications from industry colleagues at the appropriate time.
- 4 Administer sales and operations functions using the system.
 - 4.1 Use the **system capabilities** to meet the **particular sales or operational need**.
 - 4.2 Use the system capabilities to manage all required **accounting processes that relate to a particular file, customer or reservation**.
 - 4.3 Produce **reports** to meet sales and operational needs.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

basic computer and keyboarding skills

literacy skills to read and interpret complex product information controlled by the system which can include costs, terms and conditions of their sale; read, interpret and use system codes

writing skills to input reservation or operational data accurately

numeracy skills to interpret statistical data within the various reports produced and manage the accounting processes that relate to a particular file, customer or reservation.

The following knowledge must be assessed as part of this unit:

role of computerised reservations and operations systems within the tourism and hospitality industry

range of products and services controlled by the computer system

range of sales, operational and accounting functions that can be controlled by the system

procedures and codes required to enter and exit a system

common computerised reservation and operational entries, including encodes and decodes mandatory fields

requirements for specific formatted entries

procedures for confirming, storing and retrieving reservations or operational data

procedures for amending and cancelling reservations

procedures for sending and receiving messages.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

ability to use the features of a computerised reservations or operations system correctly and efficiently

ability to accurately operate a computer reservations system to make and process bookings in response to multiple customer requests covering a range of tourism products and services, ideally as a component of integrated work activity

ability to use a full range of system administrative capabilities relevant to the job role

project or work activities that show the candidates' ability to operate a computerised reservation or operations system used within the particular industry sector in which they are working or seeking work

completion of reservation or operational activities within typical workplace time constraints.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills within a fully equipped industry-realistic office environment using appropriate computers, printers, information programs and publications

access to a computerised reservations or operations system currently used in the tourism or hospitality industry to control the agent to supplier booking function or an organisation-based computerised reservations system that controls the supplier's reservations or operations function.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

evaluation of integrated activities completed by the candidate, including sourcing information on destinations, accessing product information, selling products, providing quotations and issuing documents and air tickets

direct observation of the candidate using the various features of a computerised reservations or operations system to book, retrieve and amend a series of bookings

case studies to assess ability to complete the booking process using a computerised reservations or operations system for different tourism products, services and customers

use of emulator reservations programs to assess candidate's ability to use all the functions of a computerised reservations system in simulator mode

evaluation of booking data generated by the candidate in response to different customer situations

written and oral questioning or interview to test knowledge of the role of computerised reservations or operations systems within the industry

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

This unit underpins effective performance in a range of sales and operational activities and combined assessment with any related Tourism Sales and Operations units is strongly recommended, for example:

SITTISL001A Operate an online information system

SITTTSL002A Access and interpret product information

SITTTSL006A Prepare quotations

SITTTSL007A Receive and process reservations

SITTTSL008A Book and coordinate supplier services

SITTTSL009A Process travel-related documentation

SITTTSL011A Maintain a product inventory.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

System may be:

industry wide
organisation-specific
CRS
GDS
reservations-based
operations-based.

Information may include:

costs of any tourism product or service, such as tours, hotels and rental cars
airfares
airport taxes
availability of products or services
size of vehicles
touring inclusions
product information
product rules
payment requirements
health
customs and immigration
general industry information.

Reservations:

can be made for the diverse range of products and services offered within the tourism industry, including:

airline seats

hotel rooms and other accommodation

rental cars and other vehicles

transportation

transfers

entertainment

tours

cruises

entrance to attractions or sites

travel insurance

tour guiding services

activities

meals

functions

special items with customer's corporate branding

special events

venue facilities

convention facilities

speaker services

audiovisual services

meeting or event equipment

special event consumable items

food, beverage and catering

may be created for:

groups

individuals

tour guides, crew and other touring personnel

domestic tourists

outbound tourists

inbound tourists

meetings and conference delegates
events attendees.

Updates and amendments to reservations
may involve:

adding additional customers
splitting an existing reservation
cancelling a booking
changing an itinerary by adding or deleting
products or services
changing customer names, if permitted
cross-referencing multiple bookings
entering invoicing details
entering payment details
entering ticketing or voucher details.

Industry colleagues may include:

any product or service supplier with whom
the reservation is being made, such as airline
and rental car company
other organisation departments needing
access to reservations or operations
information.

System capabilities may relate to:

sales management functions
operational management functions.

Particular sales or operational need may include:

providing destination and specific product information and advice

accessing and interpreting product information

selling tourism products to the customer

preparing quotations

constructing airfares

booking and coordinating a supplier service for the customer

issuing customer travel documentation

issuing crew documentation, e.g. operational or technical itineraries

issuing air tickets

organising functions

processing and monitoring meeting or event registrations

purchasing promotional products

hiring special equipment.

Accounting processes that relate to a particular file, customer or reservation may include:

processing financial transactions

issuing invoices

issuing credit notes

managing the receipt of customer payments and refunds

reconciling all financial transactions

managing the application of transaction fees.

Reports may be:

specific to a department
cover the whole organisation
relate to sales generated by individual staff members
accounting reports
sales reports
reservation reports
cost comparisons for various product suppliers
usage rates for various product suppliers
used to negotiate rates
used to determine currency of information held in the system.

Unit Sector(s)

Tourism Sales and Operations

SITTTSL012A Construct domestic airfares

Modification History

Not applicable.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to construct air itineraries and cost airfares correctly for domestic air travel. It requires the ability to interpret airfare information accurately and configure air itineraries that create optimum airfare costs. This unit does not include ticketing which is found in the unit SITTTSL009A Process travel-related documentation.

In most States and Territories, organisations that sell air tickets must meet the requirements of relevant state or territory Department or Office of Fair Trading which, in most cases, requires the tourism organisation to hold a travel agents licence. In many cases managers must have formally achieved competence in constructing airfares through a registered training organisation that must use this unit as the basis for their training.

Application of the Unit

This unit describes a key operational function for the sale of domestic airfares. It applies to tourism industry sectors and organisations where airfares are sold; mainly to retail travel agencies, tour wholesalers and consolidators. The tourism organisation must be accredited with the International Air Transport Association (IATA).

Fare construction would normally be managed within a computerised system but some small business operators may use a manual system.

The unit applies to frontline sales or operations personnel who operate with some level of autonomy or under limited supervision and guidance from others. It is undertaken by a diverse range of people such as retail travel consultants, retail travel agency managers, corporate consultants, ticketing consultants, reservations and operations consultants.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Nil

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Interpret domestic airfare information.	<p>1.1 Identify and access sources of fare information.</p> <p>1.2 Interpret information on air itineraries, fares and fare rules, including airport codes, airline codes, fare types and classes, normal fares, concession fares, promotional fares, taxes, general air travel rules and restrictions and conditions applicable to specific fares.</p>
2 Configure air itineraries and cost domestic airfares.	<p>2.1 Configure air itineraries to create optimum airfare cost.</p> <p>2.2 Configure domestic air itineraries and calculate domestic fare costs accurately and according to enterprise procedures.</p> <p>2.3 Calculate any additional taxes, fees and other charges.</p> <p>2.4 Check the constructed airfare to ensure it has been costed accurately and complies with applicable conditions.</p> <p>2.5 Record full details of the calculated fare.</p>

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

interpretation of fare schedules and other airline or consolidator guidelines

interpretation of rules and conditions applicable to fares

interpretation of current airline and IATA regulations

literacy skills to read and interpret complex airfare schedules, airline and IATA regulations, costings and applicable rules and conditions

numeracy skills to perform complex airfare calculations.

The following knowledge must be assessed as part of this unit:

familiarity with content and format of text-based tariffs and supporting manuals or automated fare systems

encoding and decoding of domestic airport and airline codes

how to access information on different types of current fares and applicable rules and conditions, especially most popular and currently available promotional fares

how to access information on current airline and IATA regulations.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

knowledge of how to access information on the current range of domestic airfares and ability to interpret conditions applicable to specific fares

knowledge of how to construct sector fares, promotional fares and fares incorporating non-stop, direct and connecting services

ability to calculate airfares accurately and according to current airline and IATA regulations and conditions applicable to specific fares

ability to calculate domestic airfares accurately in response to multiple customer requirements covering a range of different air routes

completion of airfare calculations within typical workplace time constraints and deadlines determined by the customer or the organisation.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills using appropriate computers, printers, publications and reservations systems currently used in the tourism industry to assist with airfare calculations

use of industry-current documentation or computer data such as airline, IATA and consolidator schedules, tariffs and bulletins outlining fares, rules, conditions and regulations.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

evaluation of integrated activities completed by the candidate, including sourcing information on destinations, selling products, providing quotations and issuing documents

fare construction activities and case studies to assess ability to construct and cost domestic airfares for different routes and to meet varying customer requirements

review of fare calculation worksheets completed by the candidate

written and oral questioning or interview to test knowledge of rules and conditions applicable to specific fares

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITTISL005A Sell tourism products and services

SITTISL009A Process travel-related documentation.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Sources of fare information may include:

- airline guides
- airline schedules and timetables
- fare manuals
- computerised data
- centralised reservations system (CRS)
- global distribution system (GDS)
- tariffs from airlines
- tariffs from consolidators
- special bulletins issued by airlines and consolidators
- general information from airlines
- internet.

Information on air itineraries:

- non-stop services
- direct and connecting services
- minimum connecting times.

Concession fares may include those for:

- infants
- children
- students
- pensioners
- groups
- seamen
- carers
- military personnel.

Taxes may include:

domestic head tax

noise tax

GST.

Conditions applicable to specific fares may include:

payment deadline

ticketing deadline

extensions to ticketing deadline

cancellation charges

availability of any type of change to the air itinerary

availability of changes to class of travel

amendment fees

baggage allowance

excess baggage charges

restricted articles in baggage

time limits for passenger name records (PNRs).

Configure air itineraries must ensure coverage of the following types of fares:

sector fares

promotional fares

fares incorporating non-stop, direct and connecting services

fares incorporating airport and other taxes.

Calculation of domestic fare costs may be completed:

manually

using a computer.

Fees may include:

service fee
transaction fee
air itinerary preparation fee
loyalty program (e.g. frequent flyer)
redemption fee
courier fee
credit card fee
communication fee.

Record of the calculated airfare may involve use of: manual format
linear format.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Interpret international airfare information.	1.1 Identify and access sources of international fare information .
	1.2 Interpret information on international air itineraries, fares and fare rules .
2 Configure air itineraries and cost international airfares.	2.1 Configure air itineraries to create the optimum airfare cost accurately and according to IATA regulations.
	2.2 Configure international air itineraries and calculate international fare costs accurately and according to IATA regulations.
	2.3 Calculate any additional taxes , special fees and other charges.
	2.4 Check the constructed airfare to ensure it has been costed accurately and complies with applicable conditions.
3 Construct fares incorporating add-ons.	3.1 Correctly interpret add-on tables.
	3.2 Calculate through fares, incorporating add-ons and document according to IATA procedures.
	3.3 Record full details of the calculated international fares.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

interpretation of fare schedules and other airline or consolidator guidelines

interpretation of rules and conditions applicable to fare

interpretation of current airline and IATA regulations

literacy skills to read and interpret complex airfare schedules, airline and IATA regulations, costings and applicable general air travel rules and restrictions

numeracy skills to perform complex airfare calculations.

The following knowledge must be assessed as part of this unit:

familiarity with content and format of text-based tariffs and supporting manuals or automated fare systems

encoding and decoding of airport and airline codes

how to access information on different types of current fares and the applicable rules and conditions

how to access information on current airline and IATA regulations

normal fare construction principles and procedures, including currency and neutral units of construction (NUA) conversion.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

knowledge of how to access information on the current range of international airfares and ability to interpret the conditions applicable to specific fares

ability to calculate airfares accurately and according to current airline and IATA regulations and conditions applicable to specific fares

ability to create practical air itineraries in response to customer requirements

ability to calculate normal international airfares accurately in response to multiple customer requirements covering a range of different air routes

completion of airfare calculations within typical workplace time constraints and deadlines determined by the customer or the organisation.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills using appropriate computers, publications and reservations systems currently used in the tourism industry to assist with airfare quotations

use of industry-current documentation or computer data such as airline, IATA and consolidator schedules, tariffs and bulletins outlining fares, rules, conditions and regulations.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

evaluation of integrated activities completed by the candidate, including sourcing information on destinations, selling products, providing quotations and issuing documents

fare construction activities and case studies to assess ability to construct and cost normal international airfares for different routes and to meet varying customer requirements

review of fare calculation worksheets completed by the candidate

written and oral questioning or interview to test knowledge of general air travel rules and restrictions applicable to normal international airfares

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITTTSL005A Sell tourism products and services

SITTTSL009A Process travel-related documentation

SITTTSL014B Construct promotional international airfares.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Sources of international fare information may include:

- airline guides
- airline schedules and timetables
- fare manuals
- computerised data
- centralised reservations system (CRS)
- global distribution system (GDS)
- tariffs from airlines
- tariffs from consolidators
- special bulletins issued by airlines and consolidators
- general information from airlines
- internet.

Information on international air itineraries, fares and fare rules must include:

- airport codes
- airline codes
- fare types and classes
- IATA areas
- global indicators
- international airline terminology
- IATA terminology and definitions
- normal fares
- concession fares, which may include those for:

Information on international air itineraries, fares and fare rules may include:

non-stop services
direct and connecting services
minimum connecting times
route maps.

Configure air itineraries:

must include coverage of the following types of fares:

sector fares

fares incorporating open-dated travel and surface segments

fares incorporating non-stop, direct and connecting services

fares incorporating intermediate points

fares incorporating airport and other taxes

must include coverage of the following types of calculations and checks:

neutral units of construction (NUA)

local currency fares (LCF)

global indicators (GI)

mileage system:

maximum permitted mileages (MPMs)

ticketed point mileages (TPMs)

extra mileage allowance (EMA)

excess mileage surcharges (EMS)

higher intermediate points (HIPs)

one way backhaul checks (BHA)

circle trip minimum fare checks (CTM).

Calculation of international fare costs may be completed:

manually
using a computer.

Taxes may include:

domestic head tax
noise tax
fuel surcharge
Q surcharge.

Fees may include:

service fee
transaction fee
air itinerary preparation fee
loyalty program (e.g. frequent flyer)
redemption fee
courier fee
credit card fee
communication fee.

1 Construct mixed class fares.	<ul style="list-style-type: none">1.1 Identify options where mixed class combinations are allowed and appropriate to meet customer needs.1.2 Configure air itineraries and calculate mixed class fare costs accurately and in accordance with IATA regulations.
2 Apply minimum checks.	<ul style="list-style-type: none">2.1 Apply minimum checks to appropriate itineraries.2.2 Calculate fares and document according to IATA procedures.
3 Calculate international pre-paid ticket advices.	<ul style="list-style-type: none">3.1 Calculate pre-paid ticket advice for journeys commencing outside the country of sale according to IATA procedures.
4 Apply indirect travel limitation rules.	<ul style="list-style-type: none">4.1 Calculate sectorised journeys and side trips with complete accuracy and document according to IATA procedures.
5 Construct round the world journeys.	<ul style="list-style-type: none">5.1 Identify situations where round the world fares are appropriate to meet the needs of the customer.5.2 Accurately calculate fares and apply round the world minimum checks according to IATA procedures.

- 6 Construct fares for open jaw journeys.
 - 6.1 Identify options where open jaw journeys are allowed and appropriate to meet the needs of the customer.
 - 6.2 Accurately calculate open jaw journey fares according to IATA procedures.
- 7 Apply the pricing unit concept.
 - 7.1 Divide a single or return fare journey into separate pricing units.
 - 7.2 Calculate the lowest combination of fares for a series of pricing units.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

interpretation of fare schedules and other airline or consolidator guidelines

interpretation of rules and conditions applicable to fares

interpretation of current airline and IATA regulations

literacy skills to read and interpret complex airfare schedules, airline and IATA regulations, costings and applicable rules and conditions

numeracy skills to perform complex airfare calculations.

The following knowledge must be assessed as part of this unit:

familiarity with content and format of text-based tariffs and supporting manuals or automated fare systems

encoding and decoding of airport and airline codes

how to access information on the different types of current international fares and the applicable rules and conditions

how to access information on current airline and IATA regulations

advanced fare construction principles and procedures, including currency and neutral units of construction (NUA) conversion.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

knowledge of how to access information on the current range of international airfares and ability to interpret conditions applicable to specific fares

ability to calculate airfares accurately and according to current airline and IATA regulations and conditions applicable to specific fares

ability to apply advanced international airfare rules and procedures

ability to accurately calculate multiple airfares covering range of different air routes, using advanced rules and procedures, and to meet varying customer requirements

completion of airfare calculations within typical workplace time constraints and deadlines determined by the customer or the organisation.

Context of and specific resources for assessment

Assessment must ensure:

demonstration of skills using appropriate computers, printers, publications and reservations systems currently used in the tourism industry to assist with airfare quotations

use of industry-current documentation or computer data such as airline, IATA and consolidator schedules, tariffs and bulletins outlining fares, rules, conditions and regulations.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

fare construction activities and case studies to assess ability to apply advanced fare construction principles to different circumstances and customer requirements

review of fare calculation worksheets completed by the candidate

written and oral questioning or interview to test knowledge of rules and conditions applicable to specific fares

review of portfolios of evidence and third-party workplace reports of on-the-job performance by the candidate.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

SITTTSL005A Sell tourism products and services

SITTTSL009A Process travel-related documentation

SITTTSL013B Construct normal international airfares

SITTTSL014B Construct promotional international airfares.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts. Employability skills embedded in this unit should be assessed holistically with other relevant units that make up the skill set or qualification and in the context of the job role.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording in the performance criteria is detailed below.

Configure air itineraries must include the following types of fares:

through fares incorporating add-ons
mixed class fares
round the world fares
round, circle and open jaw trips
fares incorporating intermediate points
fares incorporating sectorised journeys and side trips
fares incorporating airport taxes and other surcharges, which may include:
domestic head tax
noise tax
fuel surcharge
Q surcharge.

Calculate fares must include coverage of the following types of calculations and checks:

- neutral units of construction (NUA)
- local currency fares (LCF)
- global indicators (GI)
- journeys commencing outside the country of sale
- mileage system:
 - maximum permitted mileages (MPMs)
 - ticketed point mileages (TPMs)
 - extra mileage allowance (EMA)
 - excess mileage surcharges (EMS)
- higher intermediate points (HIPs)
- one way backhaul checks (BHA)
- circle trip minimum fare checks (CTM)
- directional minimum checks (DMA)
- country of payment minimum checks (COP)
- compliance with indirect travel limitations rule
- one way sub-journey check (OSA)
- return sub-journey check (RSA)
- re-routing.

Unit Sector(s)

Tourism

Competency field

Tourism Sales and Operations

TAAASS501B Lead and coordinate assessment systems and services

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competence required to provide leadership in assessment and to coordinate assessment validation and appeals processes.

Application of the Unit

Assessment leadership and coordination involves a complex mix of extending own and others expertise in assessment practice, guiding and leading assessors, monitoring assessment practice and taking responsibility for assessment validation and appeals processes.

This competence also involves developing and/or confirming the assessment strategy for an assessment only pathway. In a learning and assessment pathway, the assessment strategy is determined as part of the learning strategy documentation. In that context, this vocational outcome is addressed in **TAADES501B Design and develop learning strategies**.

This unit also includes coordinating and managing assessment across multiple sites, and managing partnership arrangements for assessment services. These performance outcomes may not be applicable in all workplace contexts, depending on the size, scope and needs of the training and/or assessment organisation.

Where this unit is undertaken as a single unit outside of the TAA50104 Diploma of Training and Assessment, learners must demonstrate competence in the following pre-requisite units:

TAAASS401C Plan and organise assessment

TAAASS402C Assess competence

TAAASS403B Develop assessment tools

TAAASS404B Participate in assessment validation.

Achievement of this unit requires high-level language, literacy skills and cognitive skills in planning, analysis, evaluation and synthesis. This unit also requires leadership skills.

Related competence includes preparing/managing budgets/financial plans, records management, recruitment selection and performance management. These are addressed through a number of relevant imported units from the **BSB01 Business Services Training Package**. These are listed at the end of this unit for possible integrated assessment purposes. The competence specified in this unit is typically required by lead trainers/facilitators/teachers who assess, lead assessors, program/training and/or assessment coordinators, training managers and training consultants.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Develop and extend assessment expertise	<p>1.1 Relevant and current research on assessment is accessed, read and incorporated into own and others' assessment practice</p> <p>1.2 Opportunities to extend assessment expertise are sourced and accessed and new/extended assessment skills and knowledge are incorporated into own and others' assessment practice</p> <p>1.3 A range of assessment methods is demonstrated in assessment practice</p> <p>1.4 Cognitive skills are used to guide and support quality assessment practice and address issues in assessment practice</p> <p>1.5 Ethical standards underpin assessment practice</p> <p>1.6 Reflection is used to explore and extend expertise in assessment</p>
2 Lead assessment activities	<p>2.1 Assessment strategies are developed and confirmed in assessment only pathways</p> <p>2.2 Roles, responsibilities and accountabilities of relevant persons in assessment are discussed and</p>

confirmed

- 2.3 AQTF and organisational requirements relating to the competence of assessors are confirmed and documented
 - 2.4 Where required, **partnership arrangements** are initiated and developed setting out identified roles, responsibilities and services to be provided
 - 2.5 Strategies for communication and networking are established and maintained with and between assessors
 - 2.6 **Leadership skills** are used to provide clear direction, advice and support to assessors
 - 2.7 Professional development needs and opportunities for assessors are identified and recommendations made to relevant personnel
- 3 **Monitor assessment practice**
- 3.1 Assessment practice of assessors is systematically monitored in relation to:
 - how client/candidate needs are being met
 - how effectively and accurately the designated competency standards are being interpreted by assessors as the benchmarks for assessment
 - how the **principles of assessment** are being applied in assessment practice
 - assessors' application of assessment methods and assessment tools
 - how the **rules of evidence** are being applied in gathering evidence
 - whether assessment is being conducted in accord with the **policies and procedures** of the organisation's **assessment system**
 - whether organisational/legal/ethical requirements are being met
 - 3.2 **Individual facilitation techniques** are used to guide and support assessors as they work and to improve assessment practice
 - 3.3 Assessment records are analysed to ensure legal/organisational/ethical requirements are being met and appropriate advice is provided to improve

record keeping arrangements where issues arise

4 **Coordinate assessment validation activities**

- 4.1 Assessment system policies and procedures relating to validation are accessed and interpreted, and **validation** is initiated in line with organisational/legal/ethical requirements
- 4.2 Risk assessment/analysis is undertaken to determine the **purpose, focus and context** of **validation activities**
- 4.3 **Approaches to validation** are considered and determined
- 4.4 Participants in validation are determined and/or confirmed, and **materials and resources** needed for validation activities are organised
- 4.5 Guidance and leadership is provided to direct and support participants throughout the validation process
- 4.6 **Validation documentation** is finalised and processed in accordance with assessment system/legal/organisational procedures and presented to relevant people, within an agreed timeframe
- 4.7 Recommendations from validation processes are identified and forwarded to the appropriate authority

5 **Manage assessment appeals**

- 5.1 Assessment system policies and procedures for assessment appeals are accessed and interpreted
- 5.2 Documented appeal claims are accessed, read and interpreted
- 5.3 Relevant parties to the appeal are interviewed, and negotiation skills are used to achieve resolution prior to formal appeal, where appropriate
- 5.4 Appeal panel is constituted and a timetable is set to hear unresolved claims
- 5.5 Guidance and leadership are provided to panel members and other parties during the appeal process to ensure fairness, equity, verity and relevance

- 5.6 All **documentation relevant to the appeal process** is checked for accuracy and completeness
- 5.7 **Panel decision** is confirmed and recorded in accordance with organisational policy and procedures, and outcomes are communicated to the parties

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competence against this unit candidates must be able to provide evidence that they have undertaken continuous development of own assessment expertise; provided leadership, direction and support to other assessors, including role-modelling good assessment practice; monitored the work of assessors and taken responsibility for initiating, organising and facilitating assessment validation and appeals processes; accurately interpreted the organisation's quality assurance goals and strategies

Evidence Requirements

Required knowledge includes:

competency-based assessment including:

- vocational education and training as a competency-based system
- assessment is criterion referenced/distinction to norm referenced assessment
- criterion used in national VET is endorsed or accredited competency standards defining specifications for performance of work/work functions and skills/knowledge
- reporting of competency-based assessment
- competency standards as the basis of qualifications
- the principles of competency-based assessment
- the structure and application of competency standards
- how to interpret competency standards and other related assessment information to determine the evidence needed to demonstrate competency including:
- the components of competency
- assessment of Employability Skills, dimensions of competency and OHS requirements

Training Package Assessment Guidelines
the qualification level of units

AQTF requirement for assessment
the organisation's assessment system policies
and procedures

different assessment methods, purposes and
applications

appeals mechanisms within the organisation
different types of assessment tools, what
tools work for what types of evidence, what
are well-constructed assessment tools and
why

what are the principles of assessment and
how they guide assessment, validation,
appeals processes

what are the rules of evidence, why are they
important, particularly in a validation context

what is an assessment strategy and
assessment plan and what are the
components of assessment strategies and
assessment plans

what is validation, purpose/focus of carrying
out validation, different approaches to
assessment validation and the critical aspects
of validation

different activities and tools for validation
and their appropriateness to the
purpose/focus

a range of technology and its application to
improve or assist in quality assessment

roles and responsibilities of workplace
trainers/facilitators, assessors and others -
such as vocational experts, workplace
supervisors and support persons - in the
assessment process, including OHS
obligations and duty of care

strategies which ensure the assessment
process is transparent and credible, such as:

identifying common pitfalls or errors that

affect judgement

open/ongoing communication between assessors

self-assessment

networking

professional development activities for assessors

ongoing contact with industry

using assessment panels or teams

conflict resolution techniques

motivating others

team and group roles and processes, such as:

monitoring progress against key goals

leading others

encouraging team contribution

legal, organisational and ethical responsibilities associated with the assessment system, including:

maintaining client privacy and confidentiality

providing accurate information

duty of care under common law

meeting environmental standards

the industrial relations system, industry/workplace relations, and industrial awards/enterprise agreements

compliance with AQTF requirements

copyright and privacy laws in terms of electronic technology

security of information

plagiarism

Training Packages/competency standards/other assessment documentation

licensing requirements

compliance requirements of relevant

Commonwealth and state/territory legislation, including OHS, equal employment opportunity, anti-discrimination and state/territory vocational education and training

Code of Practice for assessors

relevant OHS legislation, codes of practice, standards and guidelines relating to providing assessment advice and guidance

Required skills and attributes include:

analysis and interpretation skills to:

evaluate assessment methods and tools

access and interpret organisation's standards and values

observation skills to:

assess the effectiveness of the organisation's assessment process

distinguish different types of problems, e.g. technical, people and theoretical

technology skills to:

use appropriate equipment and software to systematically monitor assessment process and practice

distribute information

evaluation skills to:

evaluate validation process and determine and implement improvements

determine sampling methods to be used to access information

systematically evaluate personal or others' practice to improve performance or understanding

research skills to:

determine sampling methods to be used to access information

access and analyse relevant documents

use a range of source documents to access information for validation

problem solving skills to:

combine different modes of thinking such as creative and analytic for practical problem solving

anticipate future implications for own and others' decisions

reliably evaluate alternative solutions

literacy skills to:

read, interpret and evaluate policies and procedures to monitor assessment and recognition processes

prepare required documentation and information for those involved in the assessment process

prepare written reports regarding validation outcomes

leadership skills to:

set direction for others

influence and motivate others

guide and support others

manage conflict

make informed decisions and recommendations

schedule validation processes

gain commitment to validation processes and make recommendations to improve processes

communication skills to:

obtain feedback on validation strategy

explain the purpose of reports and other documentation used in the work area

use language to influence others
promote and implement quality standards

individual facilitation techniques:
guide and support assessors one on one

conflict resolution techniques to:
manage difficulties with and between
assessors and between assessors/candidate
and/or assessors/other persons
address appeals situations and process

team and group skills to:
conduct group discussions to gather ideas
recognise different abilities or knowledge
build relationships and networks with
colleagues

attributes, including capacity to encourage,
accept and utilise feedback
awareness and sensitivity to individual
difference and culture

Products that could be used as evidence include:

assessment strategies including quality requirements developed and implemented

documented outcomes of an initiated and facilitated assessment validation process

documented outcomes of an initiated and facilitated assessment appeals process

products and materials organised for validation and appeals processes

analysis of assessment records

risk assessment analysis

Processes that could be used as evidence include:

how opportunities have been provided for assessors to practise and maintain current competence

new and/or extended assessment expertise incorporated into own and others' assessment practice

how support was given to the implementation of quality assurance procedures

leadership, direction and support given to other assessors, including role-modelling of good assessment practice

how improvements were made to assessment and recognition processes

Resource implications for assessment include:

operating assessment system with working assessors and defined assessment system in place including documented policies and procedures for assessment, validation and appeals

access to competency standards and other assessment documentation

access to assessment materials and tools

access to suitable assessment venue/equipment

workplace documentation

cost/time considerations

personnel requirements

The collection of quality evidence requires that:

assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills

a range of appropriate assessment methods/evidence gathering techniques is used to determine competency

evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competence should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

demonstrated continuing development of own assessment expertise

providing leadership, direction and support to other assessors, including role-modelling good assessment practice

monitoring the work of assessors and others involved in carrying out assessments

taking responsibility for initiating, organising and facilitating assessment validation and appeals processes

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAACMQ502B Coordinate training and/or assessment arrangements for apprenticeships/ traineeships

TAACMQ503B Lead and conduct

training and/or assessment evaluations

TAACMQ505B Lead a team to foster innovation

BSBFLM513A Manage budgets and financial plans within work team

BSBFLM514A Manage people

BSBRKG502B Manage and monitor business or records systems

BSBHRM506A Manage recruitment, selection and induction processes

BSBMGT503A Prepare budgets and financial plans

BSBWOR502A Ensure team effectiveness.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Opportunities include:

networking through assessor networks,
communities of practice and membership of
representative organisations
professional and staff development activities
attending forums, conferences, workshops
participating in projects

A range of **assessment methods** includes:

simulations such as hypotheticals,
problem-based exercises and simulated 'real
world' scenarios
structured aural/written questioning
techniques, such as invitation, exploration,
confirmation, investigation and reflection
practical and theoretical tests
workplace projects
structured activities such as role-plays,
presentations, completion of assessment
activity sheets
portfolios
observation
third party feedback
product review

Cognitive skills may include:

analysis skills
synthesis skills
interpretative skills
planning skills
evaluation skills
problem solving skills
critical thinking skills
knowledge transfer skills

Issues may include:

issues and concerns raised by assessors

issues and concerns raised by candidates

issues and concerns raised by others
impacted by the assessment process

assessment system policy and procedure
issues

organisational/legal/ethical issues

Ethical standards include:

following assessment system organisational
policies and procedures

ensuring privacy/confidentiality

demonstrating inclusiveness

following AQTF standards relating to
assessment

ensuring assessment is guided by the
principles of assessment and the rules of
evidence

using Code of Practice for Assessors

duty of care under common law

security of information

confidentiality and privacy requirements

Reflection may include:

asking critical questions about own ability,
for example:

what worked

what did not work

how the session could be improved

reviewing records and journals

critically evaluating personal performance

Assessment strategies are documented
frameworks to guide and structure
assessment arrangements for a vocational
education and training qualification and may
include:

the identification and interpretation of
competency standards for assessment
purposes

the identification and interpretation of related
assessment documentation for assessment
purposes

application of Training Package Assessment
Guidelines

arrangements for recognition of existing
competence (RCC/RPL), including provision

of guidance and assistance to candidates in gathering and evaluating own evidence

determination of assessment methods for identified competency standards

selection of assessment tools for identified competency standards

organisational arrangements for assessment, including physical and human resources, roles and responsibilities, team assessment and partnership arrangements (where relevant)

nominated quality assurance mechanisms

identified risk management strategies

Relevant persons may include:

assessors in own organisation and on site

assessors in own organisation operating in different site/s

assessors of another organisation which is in partnership with own organisation

personnel of own/another organisation who provide vocational/subject matter expertise and who work with the assessor/s in team assessments

other personnel who assist the assessor in collecting evidence of candidate/s competence

other personnel impacted by the assessment process

Partnership arrangements refers to:

collaborative arrangements between a Registered Training Organisation (RTO) and other organisations including other RTOs which enable the partners to share for mutual benefit their resources, effort, time, costs, responsibility and expertise in the provision of training and/or assessment services. These arrangements are regulated by the AQTF Standards for Registered Training Organisations which requires a written agreement between the RTO and each organisation that provides training and/or assessment services on behalf of the RTO.

Leadership skills may include:

techniques for initiating action and directing

decision making

strategies for presenting a confident, assured and unhesitant manner in response to challenging situations

strategies for not accepting unreasonable expectations

maintaining ethical practice and beliefs in the face of opposition

modelling behavioural and personal presentation standards

time management

strategies for acknowledging and respecting the attitudes and beliefs of others

techniques for promoting active and genuine participation

Client/candidate needs may include:

clear information and advice on the assessment process

contextualisation of assessment benchmarks and assessment tools to the assessment environment

timeliness and recognition of readiness for assessment

assessment tools that support integrated assessment

advice, support and guidance from assessor/s on participation and role in the assessment process

reasonable adjustment needs

cultural sensitivity

Principles of assessment guide the assessment process and must address:

validity

reliability

flexibility

fairness

Assessment methods are the particular techniques used to gather evidence and may include:

direct observation, for example:

real work/real time activities at the workplace

work activities in a simulated workplace

environment

structured activities, for example:

simulation exercises/role-plays

projects

presentations

activity sheets

questioning, for example:

written questions, for example, on a computer

interviews

self-assessment

verbal questioning

questionnaires

oral or written examinations (applicable at higher AQF levels)

portfolios, for example:

collections of work samples compiled by the candidate

product with supporting documentation

historical evidence

journal/log book

information about life experience

review of products, for example:

products as a result of a project

work samples/products

third party feedback, for example:

testimonials/reports from employers/supervisors

evidence of training

authenticated prior achievements

Assessment tools contain both the instruments and the procedures for gathering and interpreting evidence in accordance with designated assessment methods and may include:

interview with employer, supervisor, peer
the instruments to be used for gathering evidence such as:
a profile of acceptable performance measures
templates/proformas
specific questions or activities
evidence/observation checklists
checklists for the evaluation of work samples

Rule of evidence include:

candidate self-assessment materials
the procedures, information and instructions for the assessor/candidate relating to the use of assessment instruments and the conditions for assessment
validity of evidence
sufficiency of evidence
currency of evidence
authenticity of evidence

Assessment system policies and procedures may include but are not limited to:

candidate selection
rational and purpose of competency-based assessment
assessment records/data
management/information management
recognition of current
competency/recognition of prior
learning/credit arrangements
assessors - needs, qualifications, maintaining currency
assessment reporting procedures
assessment appeals
candidate grievances/complaints
validation
evaluation/internal audit
costs/resourcing
access and equity/reasonable adjustment

Organisational/legal/ethical requirements
may relate to:

partnership arrangements

links with human resource or industrial relations systems

links with overall quality management system

AQTF standards in assessment/registration

Assessment specifications of Training Packages

state or territory registering body requirements

clauses defining assessment operations in award and enterprise agreements and relevant industrial arrangements

confidentiality and privacy requirements

relevant legislation from all levels of government that affect training and/or assessment operations

occupational health and safety (OHS)

environmental issues

equal opportunity requirements

industrial relations and anti-discrimination

relevant industry codes of practice

reporting procedures for assessment results

certification procedures/requirements

AQF Guidelines

recording and reporting assessment results

maintaining and retrieving assessment information

quality assurance and/or procedures manuals

goals, objectives, plans, systems and processes

organisational policies/guidelines

access and equity principles and practice

ethical standards

collaborative/partnership arrangements

OHS policies, procedures and programs

	quality and continuous improvement processes and standards
	defined resource parameters
Individual facilitation techniques include coaching, mentoring, tutoring matching individuals one on one and may be used to:	identify any gaps in assessor skills/competence
	explain legal/organisational/policy requirements
	clarify assessment issues
	provide encouragement and direction
	provide feedback/advice/guidance
	promote safety in assessment
	problem solve
Validation is:	a process involving assessors working in collaboration to review, compare and evaluate their assessment process and their assessment outcomes, in relation to the same units of competency
Purpose, focus and context of validation activities may be:	part of organisational quality assurance arrangements
	to address an identified area of risk in assessment practice and quality
	to demonstrate compliance with the AQTF Standards for Registered Training Organisations (RTOs)
	to provide evidence for external audit
	to provide evidence for internal audit
	to improve assessment practices
	to evaluate the quality of assessment tools
	to provide professional development
	to increase assessor confidence
	to determine whether different assessors using the same tools collect the same types and levels of evidence
	to determine whether different assessors interpret the same evidence similarly
	to determine whether assessment decisions reflect the rules of evidence

Approaches to validation may include:

- analysing and reviewing assessment tools
- analysing and reviewing collected evidence
- analysing and reviewing assessment decisions/records of assessment outcomes
- examining assessment records
- examining assessment systems
- discussing the assessment process, issues and difficulties in interpretation
- holding interviews with each other or with management, trainers/facilitators, candidates
- analysing client feedback
- observing assessment conduct
- using validation tools
- reviewing and interpreting Assessment Guidelines
- examining assessor qualifications
- analysing appeals processes
- recording evidence of validation processes and outcomes

Materials and resources for validation may include:

- relevant documented assessment strategy
- samples of assessment materials/tools
- copies of relevant competency standards, modules, Training Package Assessment Guidelines and course assessment requirements
- copies of organisational policies and procedures on validation
- copies of relevant AQTF standards
- copies of assessment records (in accord with confidentiality requirements)
- copies of client/candidate feedback
- determining time/availability for validation sessions
- technology requirements
- meeting room/space for conduct of validation

	<ul style="list-style-type: none">copies of occupational health and safety policy, procedures and programscopy of quality and continuous improvement policiescopy of equity policy and procedures
Validation documentation may include:	<ul style="list-style-type: none">report of validation processrecommendations from validation processcopies of materials/resources used in validation processversion control documentation
Assessment appeals:	is a process whereby the candidate, or other interested party, may dispute the assessment decision and seeks a formal review of the decision
Documentation relevant to the appeals process may include:	<ul style="list-style-type: none">candidate's claim for appealdocumented information given to the candidate outlining assessment system, process and requirementsrecords of assessor/meetings with the candidate, discussions and agreements on assessment processcompleted self-assessment toolscompleted assessment tools signed by assessor and/or other persons involved in collecting evidencesupplementary documentation used as evidence by the candidaterecords of assessment outcomesassessor/candidate feedback reportsrecords of appeal hearingsrecords of appeal outcomes
Panel decision may include:	<ul style="list-style-type: none">confirmation of original assessment decisionchange in decision based on evidence presentedreassessment of the candidate

Unit Sector(s)

Not applicable.

Competency Field

Assessment

TAACMQ501B Develop training and/or assessment organisational policies and procedures

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to develop or revise organisational policies and procedures relating to the provision of training and/or assessment services.

Application of the Unit

Training and/or assessment policies and procedures provide guidance and direction to trainers/facilitators, assessors and other personnel on the quality and organisational arrangements for the provision of training and/or assessment services. The development of effective policies and procedures governing training and/or assessment responsibilities is essential for the effective implementation of training and assessment systems.

This unit addresses the processes, skills and knowledge involved in developing the policies and procedures which underpin the operations of training and assessment systems. These policies and procedures can cover a variety of areas including grievances and appeals, risk identification and management, access and equity, and participant enrolment and progress details.

This unit has a specific focus on policies and procedures relating to training and/or assessment, but could equally apply to any organisational context where policies and procedures are developed.

In the **TAA04 Training and Assessment Training Package**, all organisations involved in the provision of vocational education and training are referred to generically as a **training and/or assessment organisation** (refer to the definition provided in the Range Statement).

The competency specified in this unit is typically required by trainers/facilitators, management, human resource personnel and program coordinators.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Gather and analyse information for policy and procedure development	<p>1.1 Specific policies and procedures to be developed are confirmed with relevant personnel, including purpose</p> <p>1.2 Current and relevant organisational/legal requirements are researched to determine focus of policies/procedures</p> <p>1.3 Existing policies and procedures are analysed to identify any gaps/changes required, where relevant</p> <p>1.4 Organisational and external expertise is identified and advice/information is collected and documented through appropriate consultation and communication processes</p> <p>1.5 Reports and other documentation are accessed, read and evaluated for information and guidance</p>
2 Develop the policies and procedures	<p>2.1 Collected data is analysed and synthesised for inclusion into draft policies and procedures</p> <p>2.2 Draft policies and procedures are prepared in accordance with organisational and industry standards</p> <p>2.3 Consultation and communication processes are undertaken to ensure organisational/employee input into the policies and procedures development process</p>

- 2.4 Feedback on draft policies and procedures is collated and analysed, and changes are made as appropriate
- 2.5 Changes to policies and procedures/ introduction to new policies and procedures are communicated to personnel and key stakeholders, and further time is given for final feedback
- 2.6 Final policies and procedures are approved and documented
- 3 **Identify implementation requirements**
 - 3.1 An **implementation plan** is developed to ensure maximum impact of new/modified policies and procedures is achieved
 - 3.2 Personnel involved in implementation of policies and procedures are identified and briefed to ensure consistency in implementation
 - 3.3 **Physical resources and equipment requirements** to support the implementation of new/modified policies and procedures are organised
 - 3.4 **Organisational change processes** are identified to integrate new/modified policies and procedures into the organisation
- 4 **Monitor and review policies and procedures**
 - 4.1 Policies and procedures are reviewed for continuing relevance, operational effectiveness and identification of any gaps
 - 4.2 Personnel and stakeholders are regularly consulted to ensure content of existing policies and procedures is relevant and appropriate
 - 4.3 Outcomes of systemic evaluations are used to update policies and procedures, as required

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have the acquired knowledge of the organisational standards and scope of operations in order to develop new and modify existing policies and procedures that support and guide training and assessment services.

Performance must address research, organisational, consultation and communication skills which maximise input, ownership and acceptance of policies and procedures. Evidence of draft and final policies and procedures is essential.

Evidence Requirements

Required knowledge includes:

- organisational evaluation strategies
- organisational policies and procedures
- continuous improvement processes
- relevant authority compliance requirements and standards for registration of the training and/or assessment organisation (if applicable)
- quality management compliance requirements
- where to access relevant organisational documentation
- all authoritative responsibilities and parameters within the training and/or assessment organisation
- sound knowledge of consultation and communication processes to support and encourage the organisational input into policies and procedures development processes
- implementation processes and their impact on an organisation
- relevant policy, legislation, codes of practice and national standards including Commonwealth and state/territory

legislation, for example:

licensing requirements

security of information

industry/workplace requirements

vocational education and training requirements

duty of care under common law

anti-discrimination including equal opportunity, racial vilification and disability discrimination

industrial awards/enterprise agreements

OHS relating to the development of organisational policies and procedures, including:

sources of information on OHS as it applies to the training and/or assessment organisation

risks that should be addressed by a training and/or assessment organisation

legislative requirements for OHS record keeping and reporting requirements

OHS obligations of the training and/or assessment organisation, the trainer/facilitator, assessor, learner and candidate

requirements for consultation under OHS legislation

Required skills and attributes include:

literacy skills to:

interpret legal requirements

develop organisational policies and procedures

analyse compliance information

analyse information for policy development

interpret information from a range of documents and make judgements about the relevance and applicability of information

language skills to:

communicate ideas and policies and procedures of an organisation

encourage participation across all levels of personnel and clients

seek opinions and elicit feedback from a range of stakeholders

research skills to:

obtain relevant and up-to-date information in order to develop policies and procedures

collect and provide accurate and up-to-date information on RTO registration and compliance, if applicable

skills in evaluating operational effectiveness

interpersonal skills, including:

maintaining appropriate relationships with colleagues and stakeholders

establishing trust

valuing and being open to the opinions of others

working as part of a team

active listening

negotiation skills

capacity to encourage and accept feedback

Products that could be used as evidence include:

developed and finalised policies and procedures

developed implementation plan

developed and implemented consultation and communication processes used to support and encourage personnel input

records of consultation and communication activities

records of review processes

Processes that could be used as evidence

how and what information was researched

include:

and analysed for inclusion in policies and procedures

how and when discussions were held with personnel and clients in relation to obtaining feedback on new/ modified policies and procedures

how existing policies and procedures were analysed to identify any gaps (if relevant)

how review processes were developed and managed to enable regular monitoring of policies and procedures

Resource implications for assessment include:

access to organisational and legal documentation

time

access to human and physical resources

The collection of quality evidence requires that:

assessment must address the scope of this unit and reflect all components of the unit, i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills

a range of appropriate assessment methods/evidence gathering techniques is used to determine competency

evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

the development/modification of a minimum of two different policies and procedures, and must include:

research to underpin content

internal consultation and communication processes used to encourage input and obtain timely feedback

an implementation plan

procedures developed to regularly review and improve quality of policies/procedures

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and**

Assessment Training Package. Suggested units include but are not limited to:

TAADEL504B Lead and coordinate training services

TAACMQ503B Lead and conduct training and/or assessment evaluations

TAACMQ502B Coordinate training and/or assessment arrangements for apprenticeships/ traineeships

TAAASS501B Lead and coordinate assessment systems and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Training and/or assessment organisation refers to:

a Registered Training Organisation (RTO), i.e. an organisation registered to provide recognised training and assessment services; includes TAFE institutes, private commercial colleges/ companies, enterprises, community organisations, group training companies and schools

an organisation working in a partnership arrangement with an RTO to provide recognised training and assessment services

an organisation that provides non-recognised training and assessment services

Relevant personnel refers to:

the person/s responsible for determining which policies and procedures are to be developed

Purpose of policies and procedures may include:

a framework under which the provision of training and/or assessment services is conducted

a mechanism to facilitate continuous improvement within the training and/or assessment organisation

transparency of the training and/or assessment organisation's approach to training and/or assessment services

the identification of roles and responsibilities of key personnel in an organisation

a framework for consultation processes with industry for development of training and/or assessment services

consistency in training and/or assessment services provided

Organisational/legal requirements may include:

customer complaints, grievances and appeals
risk identification and management, including occupational health and safety (OHS)

quality and continuous improvement processes and standards, including validation systems

financial management, including refund policies and systems to protect fees paid in advance (if appropriate)

mutual recognition of qualifications and Statements of Attainment issued by other training and/or assessment organisations

access and equity

client selection, enrolment and induction/orientation

staff recruitment, induction and ongoing development and monitoring

availability of policies and procedures to all personnel and learners/clients/candidates

collaborative/partnership arrangements

confidentiality and privacy requirements

ethical standards

administrative and records management system, for example:

reporting/recording requirements and arrangements

maintenance, retention, archiving, retrieval, storage and security of assessment information

document version control

Organisational and external expertise may include:

auditors

staff of regulatory authorities

training consultants

quality consultants

OHS consultants

	managers/supervisors training coordinators trainers/facilitators, assessors, lead assessors information technology personnel human resources and other advisors on policy and procedural requirements organisational OHS representatives
Consultation and communication processes may include:	structured interviews team meetings focus groups questionnaires informal interactions liaison with stakeholders inclusion of every level of the organisation
Reports and other documentation may include:	reports of training and/or assessment evaluations external auditors reports relevant organisational/industry national standards business and annual reports
Organisational and industry standards may include:	industry standards/benchmarks training and/or assessment organisation standards Australian Quality Training Framework (AQTF) Standards for Registered Training Organisations (RTOs) OHS requirements
An implementation plan may include:	mechanisms for the introduction and promotion of new/modified policies and procedures within the organisation, for example: emails bulletins hard copy manuals briefing and training

OHS committee meetings

staff meetings

mechanisms for the introduction of new/modified policies and procedures to clients/stakeholders

mechanism for involving personnel in the decision making and implementation

mechanisms to facilitate continuous improvement processes

personnel responsible for the implementation process

timelines for and allocation of responsibilities for the introduction of new/modified policies and procedures into the organisation

promotional materials

action plan, timelines and responsibilities for implementation stages

revised policy timelines and further feedback

induction processes that include the discussion of policies and procedures and their use, and orientation kits for personnel involved in training, assessment or client service

Physical resources and equipment requirements may include:

business technology, for example:

computers

hardware

software

other office equipment

Organisational change processes may include:

paper-based or electronic information, for example, Intranet

coaching and mentoring arrangements

identification of 'organisational experts' to assist employees with implementation issues

Unit Sector(s)

Not applicable.

Competency Field

Coordination, Management and Quality

TAACMQ503B Lead and conduct training and/or assessment evaluations

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to lead and conduct training and/or assessment evaluations.

Application of the Unit

Evaluation represents a critical function that forms part of the quality management of the training and/or assessment services provided by a **training and/or assessment organisation** (refer to the Range Statement for a definition). Evaluation can be carried out as a separate and complete activity focusing on an area of risk or need.

Evaluation is also an integral part of many work activities and therefore forms part of the competency of many units represented in the **TAA04 Training and Assessment Training Package**.

In this unit, evaluation represents a discrete competency carried out across a specific area of the organisations training and/or assessment services. Examples might include evaluation of the delivery and assessment for a whole Training Package, or for qualification/s within a Training Package or for a program area, or an evaluation of system components such as evaluation of the training records management system or assessment system.

Evaluation of training and/or assessment services/systems in this context is a systematic and objective process measured against specified criteria using established evaluation methods. The focus of the evaluation may include aspects such as risk, quality/quality improvement, professionalism, efficiency, client satisfaction and compliance with legal requirements. It may take the form of an audit (compliance evaluation), self-assessment process, benchmarking or client-focused evaluation. Evaluation is a critical component of registration requirements under the Australian Quality Training Framework (AQTF).

This unit is designed to address the competency of evaluation of training and/or assessment services and systems by both internal and external evaluators. It is particularly applicable where evaluation/auditing forms only part of a persons work responsibilities.

Where auditing is the main work function, the required competencies are addressed in the following units in the **BSB01 Business Services Training Package**:

BSBAUD501A Initiate a quality audit

BSBAUD502A Prepare to lead a quality audit

BSBAUD503A Lead a quality audit

BSBAUD504A Report on a quality audit.

This unit applies to persons in a training and/or assessment leadership, coordination, consultancy or management position.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify the basis for the evaluation	<p>1.1 The purpose, objectives and scope of the evaluation are determined and confirmed with relevant persons</p> <p>1.2 Previous relevant evaluations are accessed and reviewed, where appropriate</p> <p>1.3 Relevant framework and criteria for conducting the evaluation are identified and interpreted</p> <p>1.4 Appropriate evaluation models/methods are considered and selected in accordance with purpose, scope and operating context, and appropriate instruments are developed</p>
2 Plan evaluation of training and/or assessment services/system	<p>2.1 Specific organisational documentation/information required for the evaluation is sourced and collated</p> <p>2.2 Persons to be involved in the evaluation process are determined, consulted and roles and responsibilities</p>

- are confirmed
- 2.3 **Resources** to perform the evaluation are determined
 - 2.4 A schedule is drawn up outlining timing of the evaluation process
 - 2.5 A **communication strategy** is developed to inform all parties impacted by the evaluation
 - 2.6 A **risk analysis** of factors/issues impacting on evaluation process/outcomes is undertaken
 - 2.7 An **evaluation plan** is written, documented and approved by relevant personnel, where required
- 3 **Conduct evaluation of training and/or assessment services/systems**
- 3.1 Specific organisational documentation/ information relevant to the evaluation focus is analysed in accordance with evaluation criteria, and **key points** are noted
 - 3.2 Relevant persons are interviewed using interview skills/questioning techniques to clarify points and to obtain further relevant information
 - 3.3 Training and/or assessment processes and operating systems are observed to confirm documentary and interview-based evaluation evidence
 - 3.4 Communication and interpersonal skills are used to maintain a **professional focus**
 - 3.5 Records and notes of all evaluation proceedings are documented
- 4 **Determine and report evaluation outcomes**
- 4.1 Records/notes of evaluation process are analysed and information is synthesised to provide the basis for determining evaluation outcomes
 - 4.2 Identified issues are considered and further information is collected, where required
 - 4.3 Evaluation outcomes are determined
 - 4.4 Final report is prepared and filed in accordance with evaluation policy and procedures
 - 4.5 Results of the evaluation outcomes are

communicated to the target audience in a
systematic and timely manner

4.6 Follow-up actions are instigated, where relevant

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have planned and conducted an internal evaluation of a discrete area of service delivery and/or a system component.

The evaluation to be used as evidence must contain the basis for the evaluation, all planning information and documentation relating to the evaluation, and details of the conduct of the evaluation, leading to a sound and objective judgement. Evidence must also contain a report of evaluation outcomes.

Evidence Requirements

Required knowledge includes:

state/territory and Commonwealth legislation, codes of practice and standards, relevant to quality internal auditing, for example:

AQTF Evidence Guide for Registered Training Organisations and Auditors

auditor code of ethics

quality management and quality assurance

Training Packages and accredited courses, and what comprises quality training and assessment services

how training and/or assessment organisations operate

requirements of AS3911:2 and its relationship to conducting audits under the AQTF

compliance with quality management requirements e.g. ISO 9001 2000, Total Quality Management (TQM)

terminology relating to quality evaluation processes

evaluation models/methods e.g. The Kirkpatrick Approach

records management systems of the organisation

other relevant policy, legislation, codes of practice and national standards including Commonwealth and state/territory legislation, for example:

plagiarism

Training Packages/competency standards/other associated criteria

copyright and privacy laws

security of information and confidentiality requirements

duty of care as it relates to coordinating personnel and learning

the industrial relations system, industry/workplace relations, and industrial awards/enterprise agreements

anti-discrimination including equal opportunity, racial vilification and disability discrimination

vocational education and training systems

OHS relating to planning and conducting an evaluation, including:

sources of information on OHS as it applies to the training and/or assessment organisation

risks that should be addressed by a training and/or assessment organisation

legislative requirements for OHS record keeping and reporting requirements

OHS obligations of the training and/or assessment organisation, the trainer/facilitator, assessor, learner and candidate

requirements for consultation under OHS legislation

Required skills and attributes include:

language and literacy skills to:

- interpret AQTF requirements
- develop a quality evaluation plan
- develop a communication strategy
- develop resources to support the evaluation process
- communicate with key stakeholders
- produce and maintain documentation

analysis and interpretation skills to:

- evaluate organisational information management systems, policies and procedures
- select relevant evaluation information and documentation
- identify potential and/or current non-compliance
- access and interpret organisation's standards and values
- analyse records/notes of the evaluation process

research and evaluation skills to evaluate validation processes, and determine and implement improvements to these processes

learning, using and understanding electronic technology

decision making skills, based on evidence

a range of interpersonal and communication skills, including:

- negotiating
- questioning
- listening
- investigative
- diagnostic and analytical

Products that could be used as evidence include:

a completed evaluation plan

documentation developed and used to support the evaluation process e.g. checklist, evaluation observation form

communication strategy

documented risk analysis

records and notes of all evaluation proceedings

final evaluation report

Processes that could be used as evidence include:

how and what organisational information and documentation was gathered and accessed

how and why specific framework and criteria were identified for conducting the evaluation

how evaluation processes and methods were selected and implemented

how training and/or assessment processes were observed

Resource implications for assessment include:

access to previous evaluation reports or outcomes

access to workplace documentation

The collection of quality evidence requires that:

assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills

a range of appropriate assessment methods/evidence gathering techniques is used to determine competency

evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be

Specific evidence requirements must include:

made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

the implemented evaluation plan, covering:
evaluation scope, objectives and outcomes
evaluation schedules/timelines

evaluation processes for gaining evidence

evaluation methods for collecting evidence

feedback and reporting strategies and timelines

contingency plans

reporting procedures including a final report to the chief executive officer/managing director and/or other managers on the training and/or assessment organisation's compliance with the standards for review and ongoing improvement

confidentiality requirements

communication strategy

risk analysis

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAACMQ501B Develop training and/or assessment organisational policies and procedures

TAAASS501B Lead and coordinate assessment systems and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Training and/or assessment organisation refers to:

a Registered Training Organisation (RTO), i.e. an organisation registered to provide recognised training and assessment services; includes TAFE institutes, private commercial colleges/ companies, enterprises, community organisations, group training companies and schools

an organisation working in a partnership arrangement with an RTO to provide recognised training and assessment services

an organisation that provides non-recognised training and assessment services

Purpose and objectives may be to:

evaluate outcomes of a learning or assessment process or product

determine or trial new processes/products

ensure the training and/or assessment management system is operating in accordance with legal/organisational requirements

establish client satisfaction

demonstrate compliance requirements under the AQTF

meet other quality systems requirements

improve training and/or assessment systems and services

ensure learning/assessment strategies and programs are relevant to focus and client needs

determine resource needs

Scope of the evaluation may be the:

whole of training and/or assessment organisation

specific training and/or assessment services

specific training and/or assessment products

specific aspects of training and/or assessment systems

partner organisation arrangements

Relevant persons may include:

senior personnel, for example:

chief executive officer/managing director

other managers

trainers/facilitators/teachers/practitioners

assessors

program managers/training coordinators

product developers/instructional designers

managers/supervisors

specialist trainers/facilitators

information technology support

administration support

stakeholders/clients

personnel responsible for monitoring the training and/or assessment organisation's services

users of training information such as finance personnel, human resource personnel, employers

contract manager

national reporting and recording authorities
e.g. AVETMISS, AQTF

State Training Authority (STA)

private/government funding bodies

union/employee representatives

Framework and criteria may include:

AQTF

Australian Quality Standards e.g. AS/NZS
ISO 9001:2000 quality assurance model

Australian Business Excellence Framework
(ABEF)

organisational standards/framework

Evaluation models/methods may include:

examining organisation's documents and systems, such as:

policies and procedures

student and staff handbooks

relevant components of business plans

trainer/facilitator and assessor qualifications

learning and assessment strategies

examining training/assessment records

examining a sample of student files

analysing resources for delivery and assessment including assessment tools

questioning appropriate personnel to further explore evidence

conducting interviews with management, trainers/ facilitators, assessors, learners, personnel and stakeholders

observing training and/or assessment

services including delivery, assessment practice, learning and/or assessment activities, practicum or supervised teaching/facilitation

determining information flows

completing self-assessment checklist

The Kirkpatrick Approach, for example:

reaction

learning

behaviour

results

survey instruments, for example:

Delphi

questionnaires

diaries

logs

diagnostics

Specific organisational documentation/information may include:

previous evaluation

reports/records/documentation

organisational policies, procedures and guidelines

organisational goals, objectives, plans, systems and processes

relevant components of business plans

learner records

trainer/facilitator and assessor qualifications

assessment tools and assessment strategies

learners/candidate outcomes/results and completion dates

enrolment details, including general learner information

traineeship/apprenticeship records

information management system

requirements and components, including recording and reporting outcomes

written partnership agreements (where relevant)
quality assurance and/or procedures manuals
access and equity principles and practices
ethical standards
collaborative/partnership arrangements
OHS policies, procedures and programs
quality and continuous improvement processes and standards
defined resource parameters
certification systems and documentation
promotional/marketing materials

Resources may include:

documentation to support the evaluation, for example:

current AQTF checklists and tools
evaluation recording templates/checklists and observation checklists/
questionnaires
briefing documents for evaluation team/relevant persons
briefing documents for personnel participating in the evaluation

physical resources, for example:

appropriate interview room/s
appropriate meeting venue

electronic equipment used for recording and reporting requirements
materials/stationery/equipment to support the evaluation processes

Communication strategy may include:	<ul style="list-style-type: none">identification of organisation's communication and reporting channelsmethods for the dissemination and promotion of the evaluation, and evaluation methods and processes to persons and personnelidentification of external communication and networks that can be used as part of the evaluation processregular reporting meetings with persons with specific responsibilities in all areas of the evaluation processprocedures for keeping relevant persons and personnel regularly informed of the evaluation processmethods and timelines for the evaluation processreporting requirements and closure for the evaluation process
Risk analysis may include:	<ul style="list-style-type: none">identification of potential risks and consequent impact on individuals and the training and/or assessment organisationconsideration of the consequence of adverse performancestrategies to manage identified risks and potential consequences
An evaluation plan must include:	<ul style="list-style-type: none">evaluation scope, objectives and outcomesevaluation schedules/timelinesevaluation processes for gaining evidenceevaluation methods for collecting evidencefeedback and reporting strategies and timelinescontingency plansreporting procedures including a final report to the chief executive officer/managing director and/or other managersconfidentiality requirementsresource requirements
Key points may include:	<ul style="list-style-type: none">issues requiring clarification

	discrepancies in organisational documentation
	strengths
	areas of compliance/non-compliance
Professional focus incorporates:	being clear about the purpose, objectives and scope of the evaluation
	remaining objective throughout the evaluation process
	maintaining focus throughout the evaluation

Competency Field

Coordination, Management and Quality

TAACMQ504B Determine and manage scope of training and/or assessment services

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to investigate, determine and manage the scope of training and/or assessment services provided by a training and/or assessment organisation.

Application of the Unit

Determining the scope of training and/or assessment services is a critical strategic, business and organisational function that establishes the focus, breadth and type of training and/or assessment services provided/to be provided by a **training and/or assessment organisation** (refer to the Range Statement for a definition).

This competency requires investigating current and potential scope of training and/or assessment services, recommending appropriate approaches, coordinating legal/organisational requirements, and monitoring the focus and approach.

Where applied in a Registered Training Organisation (RTO) environment this unit includes coordinating the registration process to deliver and/or assess recognised training and/or assessments services in accordance with the Australian Quality Training Framework (AQTF) **Standards for Registered Training Organisations (RTOs).**

The competency specified in this unit is typically required by trainers/facilitators, training coordinators and managers, human resource and quality personnel.

Licensing/Regulatory Information

| 4 Monitor scope of training and/or assessment services | <ul style="list-style-type: none">4.1 Legal/organisational requirements relating to scope are monitored and maintained4.2 The environment is monitored for changes that may impact on scope and advice is provided to relevant persons, as required4.3 Information relating to scope is disseminated to relevant persons and organisations |

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have investigated and determined the scope of training and/or assessment services in an organisation and have coordinated and monitored legal/organisational processes and requirements relevant to the effective scope.

Evidence Requirements

Required knowledge includes:

purposes/needs for training and/or assessment services

relevant legal and organisational requirements and where to access them, for example:

the Australian Quality Training Framework (AQTF) Standards for Registered Training Organisations (RTOs)

relevant STA system for registration

relevant Training Package/s

the industrial relations system, industry/workplace relations, and industrial awards/enterprise agreements

anti-discrimination requirements including equal opportunity, racial vilification and disability discrimination

quality systems

authoritative responsibilities and parameters within the training and/or assessment organisation

types of scope including implications and benefits to the training and/or assessment organisation

types of and how to access potential funding

strategic directions of the training and/or

assessment organisation

existing training and/or assessment services
provided by the organisation

research methodologies

OHS relating to scope including:

risks that should be addressed by a training
and/or assessment organisation

legislative requirements for OHS record
keeping and reporting requirements

OHS obligations of the training and/or
assessment organisation, the
trainer/facilitator, assessor and learner

requirements for consultation under OHS
legislation

Required skills and attributes include:

literacy skills to:

read and interpret state/territory and
organisational policies and procedures

read and interpret legal requirements and
training and/or assessment organisation
standards

analyse information

language skills to:

communicate information

conduct consultations

liaise with appropriate authorities

problem solving skills to:

identify/recognise issues/irregularities

effectively address issues/irregularities

commitment to quality and improvement

research and analysis skills to determine new
business opportunities and recognise industry
trends and directions

cost-benefit analysis skills to determine
capability and viability to extend scope of
training and/or assessment services and

evaluate operational effectiveness
interpersonal skills, including:
maintaining appropriate relationships
internally and with clients/stakeholders
being open to the opinion of others
communicating effectively
listening actively
negotiating

computer/technical skills, for example:
using a range of software programs
using the internet for research
using organisation's information
management system

Products that could be used as evidence include:

analysis of the current scope of the training and/or assessment organisation in terms of focus and scope
analysis of trends and market demand for existing and potential training and/or assessment services
examples of consultation processes used
completed and signed registration documentation
cost-benefit analysis of potential change to scope
documentation of processes used to maintain scope of training and/or assessment services

Processes that could be used as evidence include:

what consultation processes were used to obtain feedback from personnel, current/potential clients and stakeholders, and why
how costs and benefits of proposed services were analysed and calculated
how personnel, material and physical operational requirements were calculated to determine the organisation's capability
how evidence to support the registration documentation was identified and accessed/

	developed
	how internal changes were identified and reported to authorities
	how changes to the vocational education and training industry were sourced and disseminated to personnel, if relevant
	how potential funding was sourced
Resource implications for assessment include:	access to legal and organisational documentation
	time in liaising with a range of relevant personnel
The collection of quality evidence requires that:	assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills
	a range of appropriate assessment methods/evidence gathering techniques is used to determine competency
	evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided
	the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice
	assessment meets the rules of evidence
	a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated
Specific evidence requirements must include:	investigation and evaluation of current scope of training and/or assessment services
	completed analysis to identify market trends
	consultation processes and outcomes with personnel, clients and stakeholders
	research outcomes and recommendations on

the organisation's capacity and requirements to support existing and/or proposed training and/or assessment services

management of legal and organisational documentation

processes/systems for monitoring the scope of training and/or assessment services and dissemination of relevant information

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAACMQ501B Develop training and/or assessment organisational policies and procedures

TAATAS501B Undertake organisational training needs analysis

TAATAS503B Manage contracted work.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Training and/or assessment organisation refers to:

a Registered Training Organisation (RTO), i.e. an organisation registered to provide recognised training and assessment services; includes TAFE institutes, private commercial colleges/companies, enterprises, community organisations, group training companies and schools

an organisation working in a partnership arrangement with an RTO to provide recognised training and assessment services

an organisation that provides non-recognised training and assessment services

Scope refers to:

operational parameters, for example:

single training site

across a number of sites

national/across states/territories

international

operational status, for example:

recognised training and/or assessment services through registration in accordance with the Australian Quality Training Framework (AQTF) **Standards for Registered Training Organisations (RTOs)**

unrecognised/internal/organisational

in partnership arrangement

operational modus operandi, including:

using Training Packages

using accredited courses

using internal benchmarks and programs

using internal/external learning resources
product-based training
a mix of the above

Purpose/s may relate to:

developing work skills and competency
meeting industry skill needs
improving productivity
building organisational capacity
providing internal certification/recognition

providing external certification/recognition
supporting workplace restructuring and
change management
meeting licensing requirements
implementing performance-based systems
developing integrated training/human
resources/ industrial relations
systems/arrangements

Research and analysis may include:	qualitative research quantitative research strengths, weaknesses, opportunities and trends (SWOT) analysis market trend analysis consultations with clients/potential clients using outcomes of organisational training needs analysis
Sources of provision may include:	own training and/or assessment organisation other training and/or assessment organisations able to provide training and/or assessment services in areas addressed by purpose/s consultants product suppliers competitors/potential competitors
Costs may include:	direct/indirect costs of providing training and/or assessment services 'in house' direct costs of outsourcing/using external provider additional personnel/material/equipment/infrastructure required 'organisational culture' costs associated with using internal/external provision
Benefits may include:	direct/indirect benefits of providing training and/or assessment services 'in house' direct benefits of 'outsourcing'/using external provider 'organisational culture' benefits associated with using internal/external provision
Outsourcing may include:	the contracting of a training and/or assessment organisation to provide the training and/or assessment service
Partnering means:	are collaborative arrangements between a Registered Training Organisation (RTO) and other organisations including other RTOs which enable the partners to share for mutual

benefit their resources, effort, time, costs, responsibility and expertise in the provision of training and/or assessment services. These arrangements are regulated by the AQTF Standards for Registered Training Organisations which requires a written agreement between the RTO and each organisation that provides training and/or assessment services on behalf of the RTO.

Funding sources may include:

available organisational funding/budget for training and/or assessment
government funding through RTO's profile
government funding through User Choice
fee-for-service funding
internal/external project funding
industry funding through industry levies

Legal/organisational requirements may include:

registration requirement as defined in the Australian Quality Training Framework (AQTF) **Standards for Registered Training Organisations (RTOs)**
state/territory legislation and regulations governing registration and accreditation
requirements of Training Packages
requirements set by Commonwealth and state/ territory legislation relating to occupational health and safety (OHS); anti-discrimination; workplace/ industrial relations; workers' compensation; apprenticeships/traineeships
requirements set by awards/enterprise bargaining agreements
requirements set by professional associations
requirements set by quality systems
licensing requirements
organisational requirements
defined resource parameters

Relevant documentation may include:

documentation relating to AQTF and state/territory Training Authority (STA)
registration requirements

	documentation relating to funding under User Choice
	documentation relating to Training Contracts
	documentation required by other external authorities relevant to provision of training and/or assessment services
	internal organisational documentation/records
Appropriate authority may refer to:	<p>registration/accreditation branch of STA</p> <p>apprenticeships/traineeships branch of STA</p> <p>internal organisational authority, e.g. appropriate line manager</p>
Issues/irregularities may include:	<p>registration requirements not being met</p> <p>documentation not completed accurately</p> <p>issues with personnel responsible for completing documentation</p> <p>ongoing compliance issues</p> <p>evaluation irregularities</p>
Changes that may impact on scope may include:	<p>changes to AQTF/registration requirements and processes</p> <p>changes to policy and operating environment of vocational education and training</p> <p>changes to personnel/organisational structure</p> <p>changes to current training and/or assessment services</p> <p>changes to policies, procedures and guidelines</p> <p>changes to legal requirements</p>

Unit Sector(s)

Not applicable.

Competency Field

Coordination, Management and Quality

TAACMQ505B Lead a team to foster innovation

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to lead a workplace team in ways that foster innovative work practices.

This unit is based on the generic guideline unit **ICS5 Lead a team to foster innovation**, and has been contextualised to reflect the **TAA04 Training and Assessment Training Package** context.

Application of the Unit

This unit addresses the skills that are needed by individuals who are leading work teams on individual projects or work in general.

It includes the skills and knowledge required to put a team together, from the perspective of innovation. This unit also involves structuring work to ensure innovative processes are being used, and to ensure that personnel have the information and skills to apply **innovation at work skills** (refer to the Range Statement for a definition of this term).

In the context of the vocational education and training environment, the team may be involved in designing a learning program, developing learning products, delivering training or providing other services to learners/clients. The team leader may use innovation skills to lead the team into new and creative ways of training, assessing, developing materials, undertaking projects or supporting clients.

The competency specified in this unit is typically required by lead trainers/facilitators, program/training coordinators and training managers, leaders and supervisors.

This unit could be undertaken in conjunction with **BSBWOR502A Ensure team effectiveness**, which focuses on team leadership.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Provide a model of innovative practice	<p>1.1 The value of innovation to team effectiveness is promoted and reinforced within the organisation through modelling and application</p> <p>1.2 Research is undertaken to extend knowledge and produce examples of the use and benefits of innovative work practices</p> <p>1.3 Examples of how innovation at work skills can be applied in a team context are based on innovation</p>
2 Organise teams to maximise innovation	<p>2.1 The performance requirements for a specific work activity/project/function are analysed</p> <p>2.2 Information is gathered about potential team members and identified strengths and weaknesses are acknowledged</p> <p>2.3 Team members are selected to create the right mix of expertise, skills, knowledge to support an innovative approach to the work activity/project/function</p> <p>2.4 Team roles are assigned to ensure a match between work requirements and individual team members' capacities</p>
3 Organise work to facilitate innovative practices	<p>3.1 The purpose of the team and its responsibilities are communicated in ways that encourage and reinforce team-based innovation</p> <p>3.2 Work is organised to enable the application of innovation at work skills, including time</p> <p>3.3 Work is allocated to ensure the maximum use of</p>

- individual and team skills/knowledge and transfer of skills/knowledge to others
- 4 **Provide guidance and monitor innovation at work practices**
- 4.1 Appropriate **guidance** is provided to team members on the use of innovation at work skills
- 4.2 Team members are encouraged to work collaboratively on **teamwork activities** which use innovation at work skills
- 4.3 Team members are actively **encouraged** to reflect on team activities and to identify opportunities for improvement and innovation
- 4.4 Suggested improvements are positively received and acted upon, where appropriate
- 5 **Review the use of innovation at work skills in a team environment**
- 5.1 The application of innovation at work skills is **reviewed** and outcomes are recorded and presented, as appropriate
- 5.2 Team members are debriefed and feedback from team members is sought to inform future planning
- 5.3 Innovations are **communicated** in appropriate ways
- 5.4 Barriers to using innovation at work skills are documented and recommendations for changes to organisational systems, policies and procedures are made where relevant and appropriate

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have the skills and knowledge to provide leadership to a group or work team in a way which encourages the individual and team application of innovation at work skills for a specific work activity/project/function.

Evidence Requirements

Required knowledge includes:

- innovation at work skills
- leadership qualities
- techniques for evaluating team performance
- group dynamics in a team setting
- the qualities of an effective team member
- adult learning principles
- relevant policy, legislation, codes of practice and national standards including Commonwealth and state/territory legislation, for example:
 - duty of care as it relates to coordinating personnel and learning
 - the industrial relations system, industry/workplace relations, and industrial awards/enterprise agreements
- anti-discrimination including equal opportunity, racial vilification and disability discrimination
- vocational education and training
- occupational health and safety (OHS) relating to leading a team to foster innovation, including:
 - OHS obligations of the training and/or assessment organisation, the trainer/facilitator and learner
- legislative requirements for information and

consultation relevant to safety

elements of an OHS management system as it applies to a training and/or assessment organisation

nature of OHS risks that should be addressed by a training and/or assessment organisation

Required skills and attributes include:

a commitment to innovation

numeracy skills to:

calculate and plan team activities/projects/functions

language and communication skills to:

communicate and promote team-based innovation

use language flexibly to suit audience and purpose, to plan and influence others

establish a supportive environment to encourage risk taking

give and receive feedback

listening skills

application and modelling of innovation at work skills in own work

interpersonal skills

communication and leadership skills

motivational skills

coaching skills

counselling and consoling skills

conflict resolution skills

evaluation skills

matching personnel competency to task requirements

Products that could be used as evidence include:

report on the review of an innovation process, outlining both positive and negative outcomes

examples of innovative work practices implemented within work teams, including

	benefits to the individual, team and organisation
	report on rewarded and promoted innovative ideas that were implemented and used within the organisation
	reports of research on innovative work practices
Processes that could be used as evidence include:	how and why team members were selected to maximise innovative outcomes
	how and when team activity outcomes were discussed with team members
	how and when innovative ideas have been rewarded and encouraged
Resource implications for assessment include:	time constraints
	access to work team and real or simulated work activity/project/function
	access to other personnel
The collection of quality evidence requires that:	assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills
	a range of appropriate assessment methods/evidence gathering techniques is used to determine competency
	evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided
	the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice
	assessment meets the rules of evidence
	a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

selecting a team for a work activity/ project/ function that comprises of the right mix of expertise, knowledge and skills

developing and leading innovative work practices within a team

modelling the application of innovation at work skills

organising work activities/projects/functions to support innovative practices and outcomes

communicating feedback to individuals on effective innovation outcomes on completed work activity/ project/function

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAADEL502B Facilitate action learning projects

TAADEL504B Lead and coordinate training services

TAADES504B Develop and evaluate e-learning resources

TAAASS501B Lead and coordinate assessment systems and services

TAATAS503B Manage contracted work

BSBWOR502A Ensure team effectiveness.

Range Statement

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Innovation at work skills are:

the skills required to develop new ideas or the new use of old ideas. The concept relates to the following six skills, represented in the unit **TAAENV404B Develop innovative ideas at work**:

interpretation

generation

collaboration

representation

reflection

evaluation

Information gathered about team members includes:

work preferences

areas of expertise

vocational skills

past jobs

interests

working styles

lifestyle preferences

Guidance may include:

coaching techniques

mentoring techniques

counselling

skills training

modelling

communication including feedback

Teamwork activities may include:

developing and implementing new ideas for:
products

processes
services
systems
tools
individual and team work practices

Encouragement may include:

supportive communication
allowing follow-through with ideas
providing enough but not too much guidance and structure
providing training and learning opportunities

Reviews may include:

feedback from team members or other personnel
feedback from clients or work-based managers
work related statistics and reports

Communicated innovations may be through:

dissemination of reports, electronically or in hard copy
internal/external presentation
articles in internal/external newsletters

Unit Sector(s)

Not applicable.

Competency Field

Coordination, Management and Quality

TAADEL503B Provide advanced facilitation to support learning

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to integrate and extend delivery and facilitation practices to support learning of a diverse client base operating in a range of contexts within the vocational education and training sector.

Application of the Unit

Advanced facilitation involves the trainer/facilitator creating a conceptual and experiential framework of professional practice that synthesises applied knowledge of learning theories and practical demonstration in a variety of teaching methodologies and delivery practices to suit different learner needs and learning contexts.

Increasing diversity in the vocational education and training sector client base requires high levels of flexibility in teaching/delivery practices that can support both generic and vocationally specific learner and client competency needs, often independent of time and place. This unit of competency draws on the trainer/ facilitators existing competency in delivery and facilitation to develop advanced facilitation skills, knowledge and practice.

Successful achievement of this unit will depend on the trainer/ facilitator having acquired competency across a number of delivery and facilitation methods and modes to support individual and group learning. These competencies are addressed separately in other units in the Delivery and Facilitation field.

Where this unit is undertaken as a single unit outside of the TAA50104B Diploma of Training and Assessment, learners must

demonstrate competency in the following two pre-requisite units:

TAADEL402B Facilitate group-based learning

TAADEL403B Facilitate individual learning

Plus at least one of these units:

TAADEL404B Facilitate work-based learning

TAADEL501B Facilitate e-learning

TAADEL405B Coordinate and facilitate distance-based learning

TAADEL502B Facilitate action learning projects.

This unit is applied in the context of documented learning frameworks, that is, learning strategies/courses/learning programs.

The competency specified in this unit is typically required by trainers/facilitators in environments requiring higher levels of knowledge and skill in practice. Such trainers/facilitators will often have a role supervising/ mentoring other trainers/facilitators.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Develop and extend teaching, facilitation and learning practices	<p>1.1 Knowledge of teaching methodologies, facilitation approaches and learning theories is regularly updated to inform, guide and extend delivery and facilitation practices</p> <p>1.2 This knowledge is synthesised with experiences in teaching and facilitation to support flexibility, innovation and adaptations in differing circumstances</p> <p>1.3 Current vocational competency/subject matter expertise frames the content of teaching, facilitation and learning practices</p> <p>1.4 Ethical standards underpin teaching, facilitation and learning practices</p> <p>1.5 Own practice as a trainer/facilitator is continually evaluated and reflected upon to determine appropriateness of delivery methods</p> <p>1.6 Existing delivery strategies and delivery plans are reviewed for quality and appropriateness and recommendations to revise are made as necessary</p> <p>1.7 Collaborative facilitation models are used to broaden teaching, facilitation and learning skills and knowledge</p>
2 Develop learner independence	<p>2.1 Effective learning experiences are created using appropriate learning theories, principles and inclusive practices</p> <p>2.2 Potential barriers to learning are acknowledged and addressed, where possible, through learner</p>

support and adjustment strategies

- 2.3 **Communication and interpersonal skills** are used effectively to motivate learners
 - 2.4 Facilitation practices extend learners' repertoire of preferred learning styles and enhance learner readiness for new learning
 - 2.5 Facilitation practices progressively transfer responsibility for learning in accordance with learners' readiness
- 3 **Manage learning**
- 3.1 **Learner cues** and feedback are observed and facilitation skills are reviewed, and revised where necessary, to maintain learning momentum
 - 3.2 Activities to develop **meta-cognition skills** and generic skills are integrated into facilitation and learning practices
 - 3.3 Sensitivity related to diversity of culture, learning styles, abilities and experience is modelled
 - 3.4 Explanations of theoretical ideas and principles are linked to learners' existing knowledge and experience using comprehensible language
- 4 **Reflect on teaching, facilitation and learning practices**
- 4.1 Teaching, facilitation and learning practices are examined to explore, test and develop ideas and theories of learning, and the implications of this for ongoing development of trainer/facilitator competency
 - 4.2 **Formal and informal monitoring** is used to collect evidence for reflections on practice
 - 4.3 Feedback from learners, other clients, colleagues and relevant personnel is sought and used to reflect on performance
 - 4.4 **Reflection** is used to explore and extend expertise in delivery and facilitation practices

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they can meet the facilitation and learning requirements of a diverse client base in a range of contexts within the vocational education and training sector.

This will require developing a conceptual and experiential framework of practice based on applied learning theories and involving the selection and use of appropriate delivery methods and delivery modes to facilitate effective learning experiences and increase learner independence. Competency also requires reflecting on experience to improve practice.

Evidence Requirements

Required knowledge includes:

a sound knowledge of learning theories, for example:

learner-centred

theory of instruction

information processing

cognitive learning theory

andragogy

vocational education and training pedagogy

behavioural learning theory

experiential learning theory

different delivery modes and delivery methods and their appropriateness for different learners/learning situations

code of practice and/or ethics relevant to the vocational education and training sector

ways in which Training Packages, accredited curricula and learning resources can be contextualised to meet the needs of individual learners without compromising standards

range of ways in which professional practice

can be adapted to meet the needs and expectations of individual learners in different learning contexts

research methodologies, for example:

action research

analysis of learner feedback

interviews

learning needs of a range of vocational education and training learners

relevant policy, legislation, codes of practice and national standards including Commonwealth and state/territory legislation, for example:

ensuring fairness of learning opportunities

industrial relation awards and other possible barriers to learning

developing competency

licensing

industry/workplace requirements

duty of care

anti-discrimination including equal opportunity, racial vilification and disability discrimination

workplace relations

industrial awards/enterprise agreements

National Reporting System

occupational health and safety (OHS) knowledge relating to the work role, including:

reporting requirements for hazards

safe use and maintenance of relevant equipment

emergency procedures

sources of OHS information

Required skills and attributes include:

skills in a range of delivery methodologies to

meet the needs of diverse learners, for example:

group facilitation

individual facilitation, including coaching/mentoring

work-based learning

e-learning

action learning

flexible delivery

distance-based learning

reflection skills to:

systematically evaluate personal work practices to improve performance

identify gaps in skills or knowledge

ask critical questions about performance, problems, methods used and learner success

communication and interpersonal skills to:

apply active and reflective listening

adapt language to meet learner requirements

listen perceptively to

learners/clients/colleagues

present information and explain concepts clearly

provide sequenced, structured instructions

apply effective questioning techniques and initiate/response

maintain appropriate relationships

establish trust

build rapport

be open to others' opinions

use appropriate body language

interpret the verbal and non-verbal communication of the learners, e.g.

resistance/reluctance, uncertainty, enthusiasm, confusion and body language

observation skills to:

monitor learner progress

monitor group and individual interactions

manage conflict/behavioural difficulties

monitor learner cues re concerns/difficulties in learning

monitor learner readiness for assessment/new areas of learning

language skills to hypothesise, plan and influence others

literacy skills to:

select, read and interpret Training Package/accredited course information

read and interpret information from a range of sources to identify and respond to learner needs, goals, skills and learning styles

research current issues

Products that could be used as evidence include:

course delivery documentation

feedback documentation

statements of participation in relevant professional development activities

notes of professional reading

reports and recommendations regarding delivery strategies or approaches

self-assessment journals or reflections

Processes that could be used as evidence include:

performance-based assessment by supervisor

observation by peers

Resource implications for assessment include:

access to learning environments in which mixed mode delivery takes place

access to multiple groups

sufficient time to use a wide range of learning theories

access to documented learning frameworks

The collection of quality evidence requires

assessment must address the scope of this

that:

unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills

a range of appropriate assessment methods/evidence gathering techniques is used to determine competency

evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

demonstration of the outcomes, performance requirements, skills and knowledge set out in this unit including:

application of learning theories to different practices in different contexts

the selection and use of different teaching and delivery methods applied in different delivery modes which are relevant and appropriate to different learners and their needs

integration of theory and practice in own performance and in supporting the learner's developing competency

strategies to support increasing learner independence

documentation of reflection processes and outcomes

documentary evidence of direct observations of advanced facilitation practice by third

parties such as supervising teachers/trainers, peers, colleagues, learners, other clients

analysis of feedback from a range of sources and reflection on the success of the training delivery

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAADEL405B Coordinate and facilitate distance-based learning

TAADEL501B Facilitate e-learning

TAADEL502B Facilitate action learning projects.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Teaching methodologies, facilitation approaches and learning theories may include:

learner-centred/teacher-centred

learner-directed/teacher-guided

situated learning

constructivist

problem-based

experiential

information processing

behaviourist

cognitive apprenticeship

Ethical standards include:

following organisational policies and Australian Quality Training Framework (AQTF) requirements

duty of care under common law

security of information

confidentiality and privacy requirements

Delivery strategies may include:

the focus of delivery, for example:

groups of varying sizes

groups from single context/from multiple contexts

groups of similar educational/competency levels

groups with divergent educational/competency backgrounds

on individuals

the context of delivery, for example:

in the workplace - work in situ

in a simulated work environment

in the training room/classroom

in specialist environments - e.g. laboratory, computer room

through the World Wide Web

at home

in a community setting

the mode of delivery, for example:

face-to-face

technology-based -

electronic/computer-based/online/audiovisual

experiential

distance resource-based

blended

delivery methods, for example:

lock step/learner-paced/mixed

interactive/participative/collaborative

trainer/facilitator-centred, learner-centred

time and place dependent/independent

demonstration

instruction

presentations

guided facilitation

learning-activity-based

guided work-based

activities/applications/experiences

tutoring

project-based

individual facilitation techniques -

coaching/mentoring

blended delivery methods

Collaborative facilitation may include:	other trainers/facilitators, teachers supervisors colleagues specialist staff associations/bodies representing learner group with specific support needs professional associations government agencies consultants networks
Effective learning experiences may be:	authentic experiences contextualised to the learner modelled to support transferability of learning built on previous experiences or learning based on actual or simulated work tasks and activities relevant to the learning objectives sequenced in complexity inclusive of generic skills appropriate to learners' styles appropriate to learners' profiles/characteristics modelled on inclusive practice
Inclusive practices may include:	demonstrating probity in all areas of responsibility modelling organisational/professional codes of conduct reinforcing ethical conduct in interactions with and between other people showing respect for individual diversity, culture and religion recognising and utilising difference to develop both the individual and organisation demonstrating sensitivity to the

circumstances and background of others
fostering a culture of inclusiveness
new/revised policy directions in vocational
education and training

Potential barriers to learning may include:

physical or intellectual disabilities
linguistic, cultural or ethnic differences
language or communication issues
age
employment status
prior experience in an adult learning
environment
poor educational experiences
health issues
issues arising from gender
psychiatric disabilities
learning problems
English language, literacy and numeracy
needs
workplace culture
location
access to resources

Learner support strategies may include:

providing referrals to internal services such
as language, literacy and numeracy support
unit, individual learning unit
providing referrals to external services such
as community language, literacy and
numeracy program, disability support
service, counselling support
incorporating techniques such as modelling/
demonstrating, chunking,
visual/diagrammatic, opportunities to
practise, peer support, and repetition
drawing on range of resources from first
language, including peer support
ensuring appropriate physical and
communication supports are available
listening to problems and helping within own

area of responsibilities and experience
building underpinning knowledge and skills
using learning resources
providing access to resources, e.g. computers
to access the Internet

Adjustment strategies may include:

engaging most five senses
structuring reflective activities
providing opportunities for practice and
feedback
arranging for physical aids for learners with
disabilities

Communication skills must include:

providing an open, warm communication
style where effective verbal and body
language is used
demonstrating a capacity to communicate
clearly to facilitate learning within the group
and for each individual
using critical listening and questioning
techniques
providing constructive and supportive
feedback
accurately interpreting verbal messages
assisting participants to paraphrase
advice/instructions to the trainer/facilitator
providing clear and concrete options/advice

Interpersonal skills must include:

showing respect for learners'
expertise/backgrounds
demonstrating sensitivity to diversity,
disability, culture, gender and ethnic
backgrounds
modelling facilitation and learning
behaviours
engaging in two-way interaction
encouraging the expression of diverse views
and opinions
negotiating complex discussions by
establishing a supportive environment
using language and concepts appropriate to

Learner cues may include:

cultural differences
accurately interpreting non-verbal messages
level of participation
level of interest
capacity to meet outcomes
disengagement

Meta-cognition skills include:

reflection
interpreting
problem solving
analysing
hypothesising

Formal and informal monitoring may include:

observations
performance-based measures
portfolios
demonstrations
projects
journals

Reflection may include:

asking critical questions about own ability,
for example:
what worked
what did not work
how the delivery session could be improved

reviewing records and journals
critically evaluating personal performance

Unit Sector(s)

Not applicable.

Competency Field

Delivery and Facilitation

TAADEL504B Lead and coordinate training services

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to lead and coordinate the provision of training services within a training and assessment organisation.

Application of the Unit

Coordinating training services involves overseeing a training and assessment organisations training operations in one or more areas of service delivery.

This competency includes confirming operational parameters for training; developing the training schedule; organising, guiding and supporting the organisations trainers/facilitators; and monitoring the provision of training services (which may include multi-site and partnership arrangements).

Where this unit is undertaken as a single unit outside of the **TAA50104B Diploma of Training and Assessment**, learners must demonstrate competency in the following pre-requisite units:

TAADES402B Design and develop learning programs

TAADES501B Design and develop learning strategies

TAADEL401B Plan and organise group-based delivery

TAADEL402B Facilitate group-based learning.

Achievement of this unit requires high-level language and literacy skills, and cognitive skills in such areas as planning, analysis, evaluation and synthesis as well as leadership skills.

This unit focuses on the coordination of training services only. The coordination of assessment services is addressed in **TAAASS501B Lead and coordinate assessment systems and services**. Systemic evaluations of training services is addressed in **TAAACMQ503B Lead and conduct training and/or assessment evaluations**.

Related competencies, which include preparing/managing budgets/financial plans, records management, recruitment, selection and performance management are addressed through relevant imported units in the Business Services Training Package. These are listed at the end of this unit.

The competency specified in this unit is typically required by lead trainers/facilitators, program/training coordinators and training managers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Organise and arrange training services	<ul style="list-style-type: none">1.1 Documentation relating to scope and legal/organisational requirements for training services is identified, accessed and interpreted1.2 Availability and suitability of relevant trainers/facilitators is identified including across sites1.3 Availability of material and physical requirements is confirmed with relevant personnel within budget specifications1.4 Capacity to provide training services in accordance with scope and legal/organisational requirements is determined and partnership arrangements are developed, organised, agreed and documented as written agreements, where relevant1.5 The training schedule is developed, discussed and agreed with relevant persons

- 2 **Organise and lead training personnel**
 - 2.1 **Quality requirements** relating to the competency of trainers/facilitators are confirmed and documented
 - 2.2 **Communication** and reporting arrangements are determined and agreed
 - 2.3 **Leadership skills** and **coaching and mentoring assistance** is provided to guide and support trainers/facilitators in carrying out their work and **issues/irregularities** are identified and addressed in a timely and appropriate manner
 - 2.4 Opportunities for professional/staff development and internal/external networking are established
- 3 **Monitor training operations**
 - 3.1 The training schedule is monitored and **contingencies** are addressed
 - 3.2 Partnership arrangements are monitored in accordance with written agreements, where relevant
 - 3.3 Training records and reports are monitored to ensure legal/organisational requirements are met
 - 3.4 Feedback from clients and stakeholders is initiated, monitored and addressed
 - 3.5 Outcomes and recommendations of internal/external evaluations of training services are implemented and changes in training services operations are documented and monitored
 - 3.6 Directions for continuous improvement in the provision of training services are identified and reported to relevant persons

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have taken responsibility for the operational parameters for training provision in a specified vocational area/field of training services; provided leadership, direction and support to other trainers/facilitators; and have effectively monitored training services in a training and assessment organisation.

Evidence Requirements

Required knowledge includes:

- relevant legal/organisational requirements for the scope of training services
- organisational policies and procedures relating to the scope of training services
- organisation's quality management systems and processes
- content of relevant Training Packages, competency standards or other organisational benchmarks for training services
- content of relevant documented learning strategies to guide and support the provision of training services
- content of relevant documented learning programs and/or work-based learning pathways to guide and support the provision of training services, where relevant
- how to develop delivery plans, learning activities
- delivery and facilitation methods and practices
- conflict resolution techniques
- coaching and mentoring techniques
- evaluation techniques
- OHS relating to the provision of training services, including:

OHS obligations of the training and assessment organisation, the trainer/facilitator and learner

legislative requirements for information and consultation relevant to safety

elements of an OHS management system as it applies to a training and assessment organisation

nature of OHS risks that should be addressed by a training and assessment organisation

Required skills and attributes include:

language and literacy skills to:

communicate in spoken and written forms with a range of trainers/facilitators and clients in a training context

interpret legal/organisational requirements, policies and procedures

prepare relevant documentation

establish and maintain professional working relationships with colleagues/staff and clients

planning and organisational skills to:

develop training schedules

organise trainers/facilitators

organise material/physical requirements

coaching and mentoring techniques, including how to:

provide encouragement, feedback, advice and guidance

deal with issues/problems

promote safety

analysis and interpretation skills to:

evaluate delivery and facilitation practices

access and interpret organisation's standards and values

determine service provision requirements

observation skills to:

assess the effectiveness of the organisation's provision of training services

distinguish different types of problems, e.g. technical, people and theoretical

problem solving skills to:

combine different modes of thinking such as creative and analytic for practical problem solving

anticipate future implications for own and others' decisions

reliably evaluate alternative solutions

manage continuous improvement processes

leadership skills to:

set direction for others

influence and motivate others

guide and support others

manage conflict

make informed decisions and recommendations

skills to accurately calculate material and physical operational requirements

skills to manage diversity policies and procedures

skills to develop and initiate support systems for trainers/facilitators

Products that could be used as evidence include:

documented operational guidelines

documented training schedules

examples of leadership, support and guidance provided to trainers/facilitators

written partnership agreement/s (where relevant)

analysis of partnership arrangement

	outcomes (if relevant)
	documented actions that address evaluations of training services
Processes that could be used as evidence include:	<p>how information and feedback was analysed to address contingencies and irregularities/issues</p> <p>how partnership arrangements were discussed and agreed upon</p> <p>how trainer/facilitator support and guidance needs were identified and met</p> <p>in the case where coordination and management is across two or more sites, how the consistency of delivery and service was ensured</p>
Resource implications for assessment include:	<p>access to legal/organisational documentation</p> <p>access to operating/simulated training environment</p> <p>access to trainers/facilitators and assessors</p> <p>access to clients</p>
The collection of quality evidence requires that:	<p>assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills</p> <p>a range of appropriate assessment methods/evidence gathering techniques is used to determine competency</p> <p>evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided</p> <p>the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice</p> <p>assessment meets the rules of evidence</p> <p>a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been</p>

Specific evidence requirements must include:

achieved and that consistent performance has been demonstrated

demonstrated performance in coordinating training services in one or more areas of service delivery and which encompasses:

establishing operational parameters and requirements

developing training schedules

providing leadership, support and guidance to trainers/facilitators

reporting on operational arrangements for training services, including advice on future directions

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAAASS501B Lead and coordinate assessment systems and services

TACMQ502B Coordinate training and/or assessment arrangements for apprenticeships/ traineeships

TACMQ503B Lead and conduct training and/or assessment evaluations

TACMQ505B Lead a team to foster innovation

BSBFLM513A Manage budgets and financial plans within work team

BSBFLM514A Manage people

BSBRKG502B Manage and monitor business or records systems

BSBHRM506A Manage recruitment, selection and induction processes

BSBMGT503A Prepare budgets and financial plans

BSBWOR502B Ensure team effectiveness.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Scope of training services refers to:

operational parameters, for example:

single training site

across a number of sites

across states/territories or national

international

operational status, for example:

recognised training and/or assessment services through registration in accordance with Australian Qualification Training Framework (AQTF) **Standards for Registered Training Organisations (RTOs)**

unrecognised/internal/organisational

in partnership arrangement

operational methods, for example:

using Training Packages

using accredited courses

using internal benchmarks and programs

using internal/external learning resources

product-based

Legal/organisational requirements may relate to:

requirements of AQTF relating to training services

specific state or territory registering body requirements

requirements of Training Packages

requirements of accredited courses

apprenticeships/traineeships requirements

Australian Qualifications Framework (AQF)

requirements for the issuance of qualifications/ Statements of Attainment

requirements set by Commonwealth and state and territory legislation relating to occupational health and safety (OHS); anti-discrimination; workplace/industrial relations; workers' compensation

award and enterprise agreements and relevant industrial arrangements

confidentiality and privacy requirements

records and reporting requirements

requirements set by professional associations

requirements set by quality systems

licensing requirements

organisational requirements/policies/procedures

defined resource parameters

ethical standards

Trainers/facilitators refers to:

teachers/trainers/facilitators in own organisation who operate on site

teachers/trainers/facilitators in own organisation operating in different site/s

teachers/trainers/facilitators from another organisation in partnership with own organisation

personnel of own/another organisation who provide vocational/subject matter expertise and who work with the trainers/facilitators

Material and physical requirements may include:

required Training Package/s for training services

documented learning strategies

documented learning programs

learning materials and learning resources

curriculum

organisational competency standards/benchmarks

IT equipment and associated software/hardware

materials and equipment relevant to the unit of competency/subject area being delivered venues

Partnership arrangements are:

collaborative arrangements between a Registered Training Organisation (RTO) and other organisations including other RTOs which enable the partners to share for mutual benefit their resources, effort, time, costs, responsibility and expertise in the provision of training and/or assessment services. These arrangements are regulated by the AQTF Standards for Registered Training Organisations which requires a written agreement between the RTO and each organisation that provides training and/or assessment services on behalf of the RTO.

Written agreements for partnership arrangements may include:

description of the collaborating training and/or assessment organisation/s

objectives and scope of service

the nature of the collaboration including quality assurance, record keeping and maintenance; and issuance of qualifications/Statements of Attainment/organisational internal awards

terms of the agreement, such as the duration of the agreement, financial arrangements

organisation and management of the agreement in terms of allocating of various activities and roles and responsibilities of each organisation in the partnership

a description of equipment, learning materials and facilities contributed by collaborating partners

an outline of communication strategies

a description of who retains the rights to any intellectual property produced

an outline of how and what activities will be promoted

strategies for regular review of objectives of the collaboration, operational processes and any issues

Training schedule relates to:	training services schedule or timetable in a single area of training service or across multiple areas defined by registered scope or organisational scope and may include: annual/biannual/monthly calendar of training qualifications/courses/learning programs/events dates/timetable for specific units/subjects/modules within qualifications/courses/learning programs names/details of training staff to be used details of material/physical requirements confirmation of venues/sites
Relevant persons may include:	chief executive officer / human resource manager training managers training coordinators trainers/facilitators
Quality requirements refers to:	AQTF standards of competency for trainers/facilitators organisational standards/qualifications for trainers/facilitators
Communication may include:	regular guidance, support and direction to trainers/facilitators regular meetings to discuss aspects of training services
Leadership skills may include:	techniques for initiating action and directing decision making strategies for presenting a confident, assured and unhesitant manner in response to challenging situations strategies for responding to unreasonable expectations maintaining ethical practice and beliefs modelling expected behaviour and personal presentation standards time management

Coaching and mentoring assistance includes:

strategies for acknowledging and respecting the attitudes and beliefs of others

techniques for promoting active and genuine participation

identifying any gaps in training/facilitation skills/competency

explaining legal/organisational/policy requirements

clarifying training/facilitation issues

providing encouragement and direction

providing feedback/advice/guidance

promoting safety in training/facilitation

solving problems

Issues/irregularities may include:

competency gaps of trainers/facilitators

difficulties trainers/facilitators have in developing effective group delivery plans/learning activities

difficulties trainers/facilitators have in developing effective work-based learning pathways

difficulties trainers/facilitators may have in managing professional relationships with each other or individual learners

difficulties trainers/facilitators have in being able to address individual learner needs

difficulties trainers/facilitators have in managing learners/learner interactions

technical difficulties especially in an e-learning environment

other trainer performance issues

Contingencies in the training schedule may include:

issues in meeting learning strategy requirements

issues in meeting learning program requirements

issues/gaps in material/physical resource requirements

delivery issues with personnel, e.g. absenteeism

venue difficulties

inadequate provision of records/reports by
trainers/facilitators

meeting contractual obligations

Unit Sector(s)

Not applicable.

Competency Field

Delivery and Facilitation

TAADES501B Design and develop learning strategies

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to design, develop and evaluate learning strategies.

Application of the Unit

Learning strategies document a framework for the learning requirements and the teaching/delivery and assessment arrangements of a vocational education and training qualification. The learning strategy is the umbrella document that outlines the requirements for designing the learning and assessment process at the qualification level.

These requirements include: determining the specific criteria or learning outcomes to be achieved; any recognition and entry requirements (if appropriate); an outline of the areas of learning/content to be addressed; the assessment requirements, the broad sequence of learning, the delivery and assessment methods to be used, the resources required and any other additional information to support a learning and assessment pathway to a qualification. The criteria may already exist if the qualification is part of a Training Package. In this instance the endorsed competency standards packaged within the Training Package qualification constitute the relevant criteria. Alternatively, if the learning strategy takes the form of a course for accreditation, the learning outcomes may need to be developed to reflect an identified industry, enterprise or community need.

This unit addresses the competency requirements for developing a learning strategy relevant to both Training Package qualifications and course-based qualifications.

The learning strategy provides an overview or outline only. Detailed guidance is fleshed out through the content of specific learning programs. Each learning strategy would require development of a number of learning programs, depending on the design approach of the learning strategy.

The competency of developing learning programs is addressed separately in **TAADES402B Design and develop learning programs**.

In a traineeship or apprenticeship context, this unit should be linked directly to **TAACMQ502B Coordinate training and/or assessment arrangements for apprenticeships/ traineeships**, which more closely establishes the learning strategy requirements for that model of training delivery.

The competency specified in this unit is typically required by instructional designers, trainers/facilitators, training consultants and training coordinators/managers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Determine the parameters of the learning strategy	<p>1.1 The purpose of the learning strategy is clarified</p> <p>1.2 The likely target groups and their needs for learning are clarified</p> <p>1.3 The characteristics of the likely target groups are researched and identified</p> <p>1.4 Qualification options for meeting the likely target group needs are researched, and the appropriate option is selected</p> <p>1.5 Consultations are carried out to confirm the parameters of the learning strategy with relevant people</p>
2 Develop the framework for the learning strategy	<p>2.1 The learning strategy design reflects the qualification requirements of the selected qualification</p> <p>2.2 Industry or organisation documentation is analysed to determine additional and supporting requirements</p> <p>2.3 Options for design are researched and analysed, based on likely target groups, their learning needs</p>

- and contexts for delivery
- 2.4 The learning strategy design reflects and is supported by **appropriate learning theories** and **instructional design principles**
 - 2.5 The design approach is determined and broad **content headings** are identified and documented
 - 2.6 Consultations are carried out to confirm the framework
 - 2.7 The review process for the learning strategy is developed
- 3 **Devise the content and structure of the learning strategy**
- 3.1 Each content heading is elaborated and documented to form an overview of content to be addressed
 - 3.2 The content is sequenced to support learning, and overall timelines are determined within **operating constraints**
 - 3.3 Learning strategy outcomes are expressed to reflect both **generic** and specific learning outcomes to be achieved
 - 3.4 **Pathways** are addressed and documented
 - 3.5 **Appropriate delivery** and **assessment strategies** are identified and documented, taking account of the learning parameters, design framework and learning context
 - 3.6 **Operational requirements** are identified and documented
 - 3.7 The completed learning strategy is checked for completeness
- 4 **Review the learning strategy**
- 4.1 The learning strategy is reviewed in collaboration with relevant people against **relevant criteria** prior to and post implementation
 - 4.2 A post-implementation review process is documented which includes **measures** for identifying the effectiveness and quality of the learning strategy
 - 4.3 Recommendations/changes based on outcomes of

the review processes are made, where appropriate, and documented

- 4.4 Modifications are further confirmed with relevant people, where appropriate

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have designed at least two learning strategies.

The learning strategies provided as evidence must: establish the learning context; identify learner and client needs; identify the units or other criteria which best reflect these needs; outline the learning framework which has been designed and sequenced to maximise learning; be logical, innovative and engaging to the learner group; identify the delivery and assessment arrangements; indicate pathways to, from and within the qualification; identify the operational resources needed to deliver the strategy; and provide a review process both before and after implementation.

Evidence Requirements

Required knowledge includes:

Training Packages, including:

range of current and relevant Training Packages

structure and definition of the endorsable components of Training Packages

content of Training Package/s relevant to learning strategy

availability of relevant noted support materials

relevant accredited courses

relationship to the National Reporting System (NRS)

AQTF including:

standards for Registered Training Organisations (RTOs)

standards for State and Territory Registering/Course Accrediting Bodies

AQF including:

key features of each qualification
guidelines for each qualification title
national guidelines on cross-sector links
issuing a qualification guideline for
qualification title of the learning strategy
guidelines on cross-sector qualification
linkages

industry and enterprise knowledge, for
example:

the names of relevant industry associations
and trade unions

the relevant ISC or state/territory authorities

particular industry or enterprise requirements
relevant to the learning strategy

industry licensing arrangements (where
relevant)

particular regulations and guidelines relevant
to the learning strategy, e.g. immigration,
labour market

a general knowledge of the main branches of
adult learning theory, for example:

behavioural learning theory

information processing theory

cognitive learning theory

andragogy

vocational education and training pedagogy

learning principles, for example:

adults have a need to be self-directing

adults have a range of life experience which
they can connect to learning

adults have a need to know why they are
learning something and its benefits

training needs to be learner-centred to
motivate adults

the learning environment encourages

interaction

instructional learning design, including:

presenting material in a logical order and sequence

presenting material in order of increasing difficulty

opportunities for review of material and repetition

the need for learner activity and interactivity

inclusion of a variety of approaches and techniques for presenting information and activities and for encouraging participation by learning

structure of the information is clear, logical

assessment, including:

Training Package Assessment Guidelines requirements

AQTF requirements

the basis and rationale for different assessment methods appropriate to the learning strategy

assessment tool design

appropriate cultural sensitivity, for example:

organisation diversity policies

cultural learning styles, preferences and communication of the indigenous community

cultural learning styles, preferences and communication of other potential target groups

reasonable adjustment principles and practice

sources of information, for example:

National Training Information Service (NTIS)

vocational education and training national bodies - DEST; ISCs; National Centre for

Vocational Education Research (NCVER);
and Australian Qualifications Framework
Advisory Board (AQFAB)

State and Territory Training Authorities
(STAs) and agencies

regulatory agencies

professional associations

relevant policy, legislation, codes of practice
and national standards including
Commonwealth and state/territory
legislation, for example:

security of information

plagiarism

competency standards

licensing

industry/workplace requirements

duty of care under common law

anti-discrimination including equal
opportunity, racial vilification and disability
discrimination

workplace relations

industrial awards/enterprise agreements

relevant OHS knowledge relating to the work
role, and OHS considerations which need to
be included in the learning strategy,
including:

internal policies and procedures to meet OHS
requirements

hazards commonly found in the work
environment to which learning is related

Required skills and attributes:

literacy skills to:

read, interpret and analyse information

develop and revise the content

write the learning strategy in accordance with design requirements

document and record the strategy using appropriate computer software

planning skills to:

set timelines to develop the learning strategy

organise and structure the development process

identify the tasks to be undertaken

identify measures to monitor progress

research skills and techniques to gather and interpret information relevant to the content and development of the learning strategy, for example:

literature and web-based research

interviews

focus groups

communication skills to:

clearly articulate information

collaborate with others on the strategy development

get feedback on the strategy

interpersonal skills to:

manage conflict and problems

negotiate the strategy development

solve problems

Products that could be used as evidence include:

documented learning strategies

documented reviews of learning strategies

	evidence of collaboration that took place during the strategy development
	documentation analysing industry or organisational documentation
	documentation outlining content research
Processes that could be used as evidence include:	how learner characteristics were researched, the methods used and why
	how others were consulted to plan the strategy and why those people were selected
	how Training Package qualification rules were interpreted or how learning outcomes were defined
	how the learning framework was designed and the reasons for the approach adopted
	why the content was sequenced in the proposed order
	how reflection has been built into the learning design process and why it is important
Resource implications for assessment include:	access to industry/organisation documentation
	access to relevant learner information
	access to materials/information to support content outline of learning framework
	time to achieve the unit and meet the evidence requirements
	access to relevant persons
The collection of quality evidence requires that:	assessment must address the scope of this unit and reflect all components of the unit, i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills
	a range of appropriate assessment methods/evidence gathering techniques is used to determine competency
	evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

a minimum of two examples of a learning strategy designed by the candidate with differentiated design structures in each that reflect the specific qualification requirements, client needs and contexts of application

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAADES401B Use Training Packages to meet client needs.

TAACMQ502B Coordinate training and/or assessment arrangements for apprenticeships/ traineeships

TAAASS501B Lead and coordinate assessment systems and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Purpose may be to:

- implement a Training Package qualification
- meet an identified client, industry or community need
- provide learning pathways/career development
- provide for apprenticeship/traineeship qualifications
- settle in Australia
- develop of English language, literacy and numeracy skills
- meet regulatory requirements

A learning strategy may apply to:	<ul style="list-style-type: none"> a nationally endorsed qualification from a Training Package or accredited course a traineeship or apprenticeship a course to be accredited with an AQF qualification outcome
Likely target groups and their needs may include:	<ul style="list-style-type: none"> existing industry/enterprise employees school leavers new entrants to the workforce apprentices/trainees individuals learning new skills/knowledge individuals seeking to upgrade skills/knowledge individuals changing careers unemployed individuals and groups learners who have a disability, or are members of target groups such as Aboriginal and Torres Strait Islander communities recent migrants individuals/groups meeting licensing or other regulatory requirements particular class of visa holder
Characteristics of target groups may include:	<ul style="list-style-type: none"> level and breadth of work experience level and previous experiences of formal education skill/competency profile socio-economic background cultural background and needs age specific physical or psychological needs motivation for learning language, literacy and numeracy needs learning styles and preferences as determined by funding body, e.g. residence and length of time in Australia, length of time unemployed specific levels of English language, literacy

and numeracy skill as determined by initial assessment process

Qualification options may include:

selecting a relevant qualification from an endorsed Training Packages

using the packaging guidelines of the Training Package to determine the final mix of units which form the qualification

selecting appropriate existing accredited courses

developing a new accredited course based on combining endorsed units from different Training Packages or developing new competency standards to meet the identified need

Relevant people may include:

enterprise/industry clients

Industry Skills Councils

state/territory industry training advisory bodies

industry associations/employer bodies

trade unions

professional associations

universities

research agencies

regulatory/licensing authorities

subject or technical specialists/experts

previous clients

people working in the roles targeted by training

government agencies and departments, including:

OHS authorities

Department of Education, Science and Training (DEST)

Department of Immigration and Multicultural and Indigenous Affairs (DIMIA)

Qualification requirements may include:

relevant Training Package qualification or

packaging rules

AQF guidelines for qualifications, including:

key features of each qualification

guidelines for each qualification title

national guidelines on cross-sector linkages

issuing a qualification

Australian Quality Training Framework

(AQTF) Standards for State/Territory

Registering/Course Accrediting Bodies

levels and aspects of communication of the

National Reporting System (NRS)

**Industry or organisation
documentation may include:**

workplace policies and procedures

internal competency specifications

existing training or learner support materials

existing course information/curriculum

industry codes of practice, guidance notes

and other industry information on hazard and
risk control

business and risk management strategies

job descriptions

case studies

regulatory requirements related to the job,
including licensing

outcomes of organisational training needs
analyses

documented research relating to potential
content

contextualisation rules of relevant endorsed
industry Training Package/s

relevant Training Package noted support
materials

Options for design may include:

a learning framework that addresses each
unit of competency separately unit by unit
within the qualification

a learning framework that is based on
clustering units into meaningful
combinations to create an integrated learning

framework for the qualification

a learning framework-based on building
from less complex to more complex
tasks/skills/knowledge learning
objectives/outcomes

a learning framework designed around work
structures, work organisation and work
activities

project-based learning models

a learning framework built around
synthesising knowledge and skill
requirements across the qualification

an articulated approach

combinations of the above

**Appropriate learning theories may
include:**

behaviourist

social learning

discovery learning

cognitive learning theory

constructivist

situational

humanistic

action science

applied learning models

Instructional design principles may include:

presenting material in a logical order and sequence

presenting material in order of increasing difficulty

opportunities for review of material and repetition

the need for learner activity and interactivity

inclusion of a variety of approaches and techniques for presenting information and activities and for encouraging participation by learning

structuring the information effectively

application of adult learning principles

Content headings may separate learning into:

topics

subjects

modules

units

knowledge components

technical skill sets

work activities

the development of specific English language, literacy and numeracy skills

generic skills

Operating constraints may include:

budget

timelines

availability of support materials

nominal hours

human and physical resourcing requirements

occupational health and safety (OHS) requirements

Generic outcomes may include:

spoken and written communication

team work

numeracy

problem solving

planning and organising work

use of technology
self-management
initiative and enterprise
how to learn
OHS

Pathways may include:

entry and exit
prerequisites/co-requisites
access and equity
RPL/RCC arrangements
credit transfer arrangements
articulation with other qualifications

Appropriate delivery strategies may include:

the focus of delivery, for example:
groups of varying sizes
groups from single context/from multiple contexts
groups of similar educational/competency levels/groups with divergent educational/competency backgrounds
individuals

the context of delivery, for example:
in the workplace
in a simulated work environments
in the training room/classroom
in specialist environments - e.g. laboratory, computer room
through the Internet
at home
in a community setting

the mode of delivery, for example:
face-to-face
technology-based -
electronic/computer-based/
online/audiovisual

experiential

distance resource-based

blended

delivery methods, including:

lock step/learner-paced/mixed

interactive/participative/collaborative

trainer/facilitator-centred/learner-centred

time and place dependent/independent

demonstration

instruction

presentations

guided facilitation

learning activity-based

guided work-based

activities/applications/experiences

tutoring

project-based

individual facilitation techniques - coaching/
mentoring

blended delivery methods

Appropriate assessment strategies may include:

the identification and interpretation of competency standards/other criteria for assessment and for validation

application of Training Packages Assessment Guidelines

arrangements for recognition of existing competency (RCC/RPL), including provision of guidance and assistance to candidates in gathering and evaluating evidence

determination of assessment methods for identified competency standards

selection of assessment tools for identified competency standards

organisational arrangements for assessment, including physical and human resources, roles and responsibilities and partnership

	arrangements, where relevant
	nominated quality assurance mechanisms
	identified risk management strategies
Operational requirements may include:	infrastructure including facilities, plant/equipment
	staffing requirements including number of full-time, part-time and sessional trainers/facilitators
	other staffing needs including technical support, specialist and administrative personnel
	copy/ies of relevant Training Package/s
	learning resources
	reference lists
Relevant criteria may include:	Training Package requirements
	accreditation requirements
	curriculum design
	OHS implications for delivering the learning strategy
Measures may include:	learner/participant feedback
	feedback from clients and industry bodies
	enrolments
	completion rates
	Statements of Attainment, competencies achieved, qualifications awarded
	return business
	development of language, literacy and numeracy skills as measured by the National Reporting System (NRS)

Unit Sector(s)

Not applicable.

Competency Field

Learning Design

TAADES502B Design and develop learning resources

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to design and develop resources to support learning.

Application of the Unit

Learning resources are designed to enhance and support the effectiveness of the learning process. They provide guidance, materials, learning and assessment activities, and relevant information that address the competencies/learning outcomes to be achieved by the learner. In the **TAA04 Training and Assessment Training Package**, learning resources are defined as learning materials that have been specifically developed to address a substantive area of teaching/learning and/or assessment guidance and support.

Learning resources may address a whole Training Package, a Training Package or course qualification or a learning program. Learning resources may also take the form of existing equipment, physical materials and physical resources within the learning environment.

Learning resources can take a variety of forms such as facilitation guides, learning guides/participant resources, assessment materials, workplace resources and text books, and may be self-paced or instructor-led. While primarily text and print-based, other mediums such as audio or video learning resources could be developed using this unit. The complexity of the resource will vary depending on its focus, type, audience and technological medium.

Although the range of learning resources may vary, the skills and knowledge required to design and develop them is the same, with instructional design being a critical aspect.

Where a learning resource product is built around an electronic medium, other critical skills, knowledge and outcomes are required. These are addressed through separate units of competency, **TAADES503B Research and design e-learning resources** and **TAADES504B Develop and evaluate e-learning resources**. Co-learning and co-assessment is suggested where competency across all media is required.

Design and development are combined in this unit. In some circumstances the design phase and content development are separated, especially in a large project. However, it is important that competency reflects the whole process.

Depending on the complexity of the resource, extensive consultation and working with others may be required.

This unit can provide a specific application for undertaking the generic unit **TAATAS503B Manage contracted work**.

The competency specified in this unit is typically required by trainers/facilitators, instructional designers, assessors and consultants.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Research and interpret the learning resource requirements	<p>1.1 The brief, focus and type of learning resource is clarified with the client</p> <p>1.2 The likely target audience/s, their learning needs and the learning environment for the resource are researched</p> <p>1.3 The characteristics of the learners/end users of the learning resource are identified</p> <p>1.4 Existing information which may be relevant is gathered, collated and analysed</p> <p>1.5 Ethical and legal considerations are identified and acted upon</p> <p>1.6 A development work plan is written and documented</p>

- 2 **Design the learning resource and plan the content**
 - 2.1 A range of **design options** is generated using a variety of **principles and techniques**
 - 2.2 Time is taken to **reflect** on the designs, identifying the implications of each
 - 2.3 The diversity of learners/end users and their **learning styles** are researched and embedded into the design specifications
 - 2.4 An **outline or prototype** for the learning resource is developed and confirmed with the client
 - 2.5 The **content specifications** of the learning product are analysed and the proposed content is mapped out
 - 2.6 The breadth and depth of the proposed content is determined, in accordance with the design prototype, content specifications and financial constraints
 - 2.7 **Relevant personnel** are identified to support the development phase, if needed
- 3 **Develop the learning resource content**
 - 3.1 Content and content specification is developed in accordance with the agreed design
 - 3.2 Modifications are made to the design and/or content, where necessary, to address changes in project parameters
 - 3.3 **Mechanisms** for reviewing work in progress are established
 - 3.4 Text is clear, concise, grammatically correct and appropriate for the intended audience/s
 - 3.5 Visuals are relevant, instructive and appropriate for the intended audience/s
 - 3.6 The resource is formatted using an appropriate **style guide**
- 4 **Review learning resource prior to implementation**
 - 4.1 Content of the resource is checked to ensure the accuracy and relevance of information against content specifications
 - 4.2 Text, format and visual design are checked for

clarity and focus

- 4.3 An external review is conducted using appropriate **methods**, and feedback is incorporated where relevant
- 4.4 Final draft is reviewed against the brief and other relevant criteria to ensure it meets all requirements prior to delivery to the client
- 5 **Evaluate the design and development process**
 - 5.1 The design and development process is reviewed against appropriate **evaluation criteria**
 - 5.2 Time is taken to reflect and identify areas for improvement
 - 5.3 Identified improvements are documented for future projects

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have designed and developed learning resources.

The learning resources provided as evidence must: clearly identify the target audience; be appropriate to the target group; and be well structured, clear, interesting, appropriate, easy to use, and accessible.

Competency also requires demonstrated ability to research learning resource requirements and content, seek and accept feedback, work effectively with a project team or other experts as required, and critically evaluate own work.

Evidence Requirements

Required knowledge includes:

sound knowledge of the vocational education and training system, including:

relevant terminology

training and assessment processes

Training Packages and competency standards

the Australian Quality Training Framework (AQTF) requirements

the Australian Qualifications Framework (AQF)

instructional design, for example:

planning, analysis, development, synthesis, evaluation

presenting material in a logical order and sequence

opportunities for collaborative learning between learners

navigation tools

presenting material in order of increasing difficulty

opportunities for review of material and

repetition

the need for learner activity and interactivity

inclusion of a variety of approaches and techniques for presenting information and activities and for encouraging participation by learning

structure of the information

ensure learning is embedded in a realistic and relevant context

techniques to engage the learner in learning

visual design principles/techniques, for example:

format

composition

balance

typography

images/graphics

charts/diagrams

research and evaluation techniques, including:

interviews

focus groups

workshops

questionnaires

literature reviews

web research

pilot processes

a general knowledge of the main branches of learning theory, for example:

behavioural learning theory

information processing theory

cognitive learning theory

andragogy

vocational education and training pedagogy

learning principles, including:

adults are autonomous and self-directed

adults have life experience to draw on

adults are goal-oriented

adults need relevance

adults are practical

adults need to be shown respect

cultural awareness

a range of learning approaches and styles of learning resources

different learning styles, including:

activist

reflector

theorist

pragmatist

kinaesthetic

auditory

visual

language, literacy and numeracy (LLN)

issues, for example:

principles and definitions

how to work out the LLN level of likely

users, and LLN requirements of the resource

relevant policy, legislation, codes of practice and national standards including

Commonwealth and state/territory

legislation, for example:

copyright and privacy laws relating to electronic technology

security of information

plagiarism

competency standards

licensing
industry/workplace requirements
duty of care under common law
anti-discrimination including equal
opportunity, racial vilification and disability
discrimination
workplace relations
industrial awards/enterprise agreements

relevant OHS knowledge relating to the work
role, and OHS procedures which need to be
included in the content of the learning
resource

OHS obligations of the training and/or
assessment organisation, the
trainer/facilitator and learner

Required skills and attributes include:

review and analysis skills to:
identify areas for improvement
recognise personal limitations

communication and interpersonal skills to:
collaborate with a range of people
seek feedback from others
be open to feedback and suggestions
maintain a network
listen
negotiate

computer/technical skills, for example:
using a range of software programs
using a range of office equipment

literacy/writing skills, including:
writing from the learner's perspective
writing for different audiences

using plain English and correct grammar
pitching writing to the appropriate level
using an appropriate style
having an eye for detail

time management skills, including keeping to
appropriate timelines

analytical skills to:

identify critical learning points

structure and weight the contents
appropriately

determine appropriateness of feedback

ability to develop a range of learning
activities

research skills to:

find content and relevant information

interview relevant people

solve problems

ask questions

**Products that could be used as evidence
include:**

learning resources developed

letters to relevant personnel seeking
comments and feedback

evaluation forms

minutes of meetings

drafts of resources

feedback received from others

**Processes that could be used as evidence
include:**

how research was undertaken and why

how consultative process was set up

how industry or end user requirements were
established

how resource was evaluated and reviewed

what methods were used to evaluate the
process used for resource development and
why

	ways in which personal skills and efficiency were developed and monitored and why
	how personal workload was managed
Resource implications for assessment include:	research for content of resources
	access to experts for review and consultation
The collection of quality evidence requires that:	assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills
	a range of appropriate assessment methods/evidence gathering techniques is used to determine competency
	evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided
	the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice
	assessment meets the rules of evidence
	a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated
Specific evidence requirements must include:	a complete print-based learning resource product that demonstrates competency in accordance with the specifications of this unit or
	evidence of contributions to a range of learning resources and learning materials that in combination demonstrate competency in accordance with the specifications of this unit
	evidence of transferable application to the development of other learning resources
	designed under the guidelines for Training Package support materials

print-based

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAADES401B Use Training Packages to meet client needs

TAADES402B Design and develop learning programs

TAADES501B Design and develop learning strategies

TAADEL405B Coordinate and facilitate distance-based learning

TAATAS503B Manage contracted work

TAADES503B Research and design e-learning resources

TAADES504B Develop and evaluate e-learning resources.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

The brief of the learning resource may include:

a client proposal
identified gap in the learning product market
a tender
an organisational need

Focus of the learning resource may include:

a whole Training Package
a Training Package
qualification/qualifications
a traineeship/apprenticeship
an accredited course
individual competency
standards/modules/subjects
a non-accredited course
a learning program
a learning resource to support the
introduction/ implementation of new
technology/equipment

Type of learning resource may include:

Training Package noted support materials,
such as:
learner/user guides
trainer/facilitator guides
training guides
example training programs
specific case studies
professional development materials
assessment materials

other published, commercially available
support materials for Training
Packages/courses
organisational learning resources

competency standards as a learning resource

videos

CDs and audio tapes

references and texts

manuals

record/log books

learning resources and learning materials developed under the Workplace English Language and Literacy (WELL) program

learning resources produced in languages other than English as appropriate to target group learners and workplace

The learning resource is:

designed to enhance and support the effectiveness of the learning process. It provides guidance, materials, learning and assessment activities, and relevant information that addresses the competencies/ learning outcomes to be achieved by the learner

Likely target audience/s and learning environment must include:

who the learning resource is for

what the learning resource is designed to do

how the learning resource will be used

where the learning resource will be used

possible mediums to be used

Research may include:

interviews

focus groups

informal discussions

literature reviews

Internet research

evaluations of existing products

questionnaires

workshops

Characteristics of the learners/end users may include:

level of prior experience/knowledge of content area

skill/competency profile

range and response to previous learning

experiences
level of education
socio-economic background, age, gender
current work
work culture
cultural and ethnic background
disability or learning support needs
preferred learning styles
motivation for learning
English language, literacy and numeracy needs

Existing information may include:

industry/end user needs
industry best practice and culture
existing learning resources and learning materials
relevant Training Packages/competency standards
relevant courses, curriculums, modules
workplace procedures, documentation, and requirements
industry coverage
roles and responsibilities of groups and individuals
information from industry experts and advisers

Ethical and legal considerations may include:

contract preparation
meeting contractual requirements
intellectual property
regulatory requirements including occupational health and safety (OHS)
organisational requirements
equity issues and needs
potential legal consequences of false, misleading or incorrect information

Development work plan may include:

timelines and milestones to be achieved

scheduled meetings and focus groups
consultative processes
handover requirements
equipment, learning resources and learning materials needed
industry information/practices
budget
identification of risks/risk management strategies
organisation/industrial politics
access to experts/advisers

Design options may include:

use and extent of practical activity-based content and passive content (reading, interpreting and absorbing information)
use and extent of text-based information and graphical information
level of depth of text-based information and sophistication of language
level of completeness in addressing the focus
options for presenting text-based information e.g. straight text, question and answer, case studies
visual design
sequencing of material
sources of further information/further reading
style guides
visual look

Principles and techniques may include:

instructional design, for example:
presenting material in a logical order and sequence
opportunities for collaborative learning between learners
navigation tools
presenting material in order of increasing difficulty
opportunities for review of material and

repetition

the need for learner activity and interactivity

inclusion of a variety of approaches and techniques for presenting information and activities and for encouraging participation by learning

structure of the information

ensuring learning is embedded in a realistic and relevant context

techniques to engage the learner in learning

creative thinking, for example:

brainstorming

mind mapping

scenario setting

lateral thinking

visual/graphic design, for example:

format

composition

balance

typography

images/graphics

charts/diagrams

research and evaluation, for example:

of other learning resources

up-to-date research on learning

Reflect may include:

asking key questions

discussing details with others, for example:

colleagues

team members

other learning product

developers/instructional designers

the client

supervisor/manager

standing back from work

setting specified times for reflection

reviewing personal skills

Learning styles may include:

theoretical

pragmatic

active

reflective

kinaesthetic

auditory

visual

Outline or prototype may include:	mock-up framework model format specifications
Content specifications may include:	requirements of relevant Training Packages, competency standards/benchmarks OHS requirements work practices and procedures culture and ethics of the learner/end user environment organisational requirements copyright/intellectual property agreements/ acknowledgements
Relevant personnel may include:	subject matter/technical experts industry experts colleagues learners or users industry stakeholders specialist consultants, e.g. language, literacy and numeracy specialists
Mechanisms may include:	verbal or written communication with relevant personnel verbal or written communication with content experts project updates internal/external reviews of drafts
Style guide may include:	fonts - types and sizes line spacing white space icons use of visuals - icons, photographs, pictures, diagrams signposting logos

Methods may include:

DEST Style Guide

client style guide

evaluation by experts

pilot

focus groups

questionnaires

checklists

workshops

telephone interviews

Evaluation criteria may include:

meeting the brief

satisfaction of the client

timeliness

cost

design issues/modifications required

blockages and responses

team effectiveness/cohesion

level of expertise required/available

Unit Sector(s)

Not applicable.

Competency Field

Learning Design

TAAENV501B Maintain and enhance professional practice

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required for individuals to manage their personal professional performance and to take responsibility for their professional development in relation to the provision of training and/or assessment services.

Application of the Unit

This unit addresses the processes required to maintain a high level of professional performance in the vocational education and training field. It includes modelling high standards of performance in accordance with professional standards and procedures, and the processes and outcomes involved in determining professional development needs and participating in associated activities.

This unit is also designed to assist vocational education and training personnel to identify strategies for maintaining currency and to respond to changes in vocational education and training policy and the operating environment.

The competency specified in this unit is typically required by a person involved directly or indirectly in the provision of training/ assessment services in a **training and/or assessment organisation** (refer to the definition provided in the Range Statement).

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Model high standards of performance	<p>1.1 Personal performance is consistent with the organisation's goals and objectives</p> <p>1.2 Appropriate professional techniques and strategies are modelled</p> <p>1.3 Personal work goals and plans reflect individual responsibilities and accountabilities in accordance with organisational/legal requirements</p> <p>1.4 Ethical and inclusive practices are applied in professional practice</p>
2 Determine personal development needs	<p>2.1 Personal knowledge and skills are assessed against units of competency and other relevant benchmarks to determine development needs and priorities</p> <p>2.2 Changes in vocational education and training policy and operating environments are identified and the impact on professional practice and personal development needs is determined</p> <p>2.3 Feedback from colleagues and clients is used to identify personal learning needs/areas of professional development</p> <p>2.4 Future career options are identified</p> <p>2.5 Personal learning needs are documented and updated</p> <p>2.6 Personal development needs are discussed with relevant personnel for inclusion in the professional development plan</p>

- | | |
|---|---|
| 3 Participate in professional development activities | 3.1 Development opportunities suitable to personal learning style/s are selected and used to support continuous learning and maintain currency of professional practice |
| | 3.2 Professional networks are participated in to support continuous learning and to maintain professional practice |
| | 3.3 Own performance and professional competency is continuously improved through engagement in professional development activities |
| | 3.4 Technology is used to maintain regular communication with relevant networks, organisations and individuals |
| 4 Reflect on and evaluate professional practice | 4.1 Developments and trends impacting on professional practice are researched and integrated into work performance |
| | 4.2 Feedback from colleagues/clients is used to identify and introduce improvements in work performance |
| | 4.3 Innovative and responsive approaches for improving professional practice are identified through the use of continuous improvement techniques and processes |
| | 4.4 Records, reports and recommendations for improvement are managed within the organisation's systems and processes |

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that that they have managed their personal professional development. This includes documenting personal learning needs, having input into the professional development plan, in consultation with relevant personnel, participating in relevant industry networks and maintaining currency of professional practice.

Candidates must show that they have participated in relevant industry/professional development events or activities; identified and prioritised individual networking needs; shown how networks have been used to gain information and other support appropriate to workplace or work role; shown how feedback was used to identify further areas for development; used reflection strategies to identify new ways of improving performance; and used technology to access new information.

Evidence Requirements

Required knowledge includes:

- organisational goals/objectives
- organisational processes, procedures and opportunities relating to professional development
- a range of continuous improvement techniques and processes and their application
- social and education trends and changes impacting on the vocational education and training environment, for example:
 - policy changes
 - technological changes
 - cultural changes
 - economical changes
- networks relevant to professional practice
- standards/principles, ethical/inclusive principles and practices
- types and availability of training
- development activities and opportunities

relevant policies, legislation, codes of practice and national standards including national Commonwealth and state/territory legislation for example:

Training Packages, competency standards, other relevant benchmarks

licensing requirements

industry/workplace requirements

duty of care under common law

recording information and confidentiality requirements

anti-discrimination including equal opportunity, racial vilification and disability discrimination

workplace relations

industrial awards/enterprise agreements

National Reporting System

relevant OHS knowledge relating to the work role/work context, and OHS when managing own professional practice and performance

Required skills and attributes include:

reflection skills to:

systematically evaluate personal work practices to improve performance or understanding

reduce or prevent stress

leadership skills to present a professional image

self-evaluation skills to:

identify gaps in skills or knowledge

obtain competencies to meet current and future organisational objectives

research skills to:

keep up with trends in vocational education and training to obtain current information

identify relevant industry affiliations

keep up with trends/changes/developments in the vocational area of competency

communication skills to:

obtain feedback from colleagues and clients

participate in professional networks

consult with colleagues and clients

interpersonal skills to:

participate in industry events and activities

build professional relationships

networking skills to build an industry network

literacy skills to:

document personal learning needs

read and interpret vocational education and training information such as legal/organisational policy documents

complete and maintain records related to professional development

time management skills to:

organise professional development activities

analyse and identify career options

create a balance between work, study, personal and recreation activities

Products that could be used as evidence include:

documented personal learning needs
examples of developments and trends researched
examples of continuous improvement techniques and processes used

Processes that could be used as evidence include:

how organisational ethics and/or practices were accessed and applied within organisational requirements
how and why personal development needs were identified
how feedback was obtained from clients and colleagues and used to improve work performance
how and why professional practice was reflected on and evaluated

Resource implications for assessment include:

relevant organisational/legal documentation
access to relevant benchmarks
access to networks, technology, communication

The collection of quality evidence requires that:

assessment must address the scope of this unit and reflect all components of the unit, i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills
a range of appropriate assessment methods and evidence gathering techniques is used to determine competency
evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided
the evidence collected must relate to a number of performances assessed at different points in time and in a Learning and Assessment Pathway these must be separated by further learning and practice
assessment meets the rules of evidence
a judgement of competency should only be made when the assessor is confident that the

Specific evidence requirements must include:

required outcomes of the unit have been achieved and that consistent performance has been demonstrated

evidence of contribution to professional development plan

evidence of networking and using technology to gain information and other support

evidence of participating in professional development activities and maintaining currency

evidence of incorporating self reflection, feedback obtained from clients/colleagues into professional practice

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAAASS501B Lead and coordinate assessment systems and services

TAACMQ505B Lead a team to foster innovation

TAADEL503B Provide advanced facilitation to support learning.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Training and/or assessment organisation refers to:

a Registered Training Organisation (RTO), i.e. an organisation registered to provide recognised training and assessment services; includes TAFE institutes, private commercial colleges/companies, enterprises, community organisations, group training companies and schools

an organisation working in a partnership arrangement with an RTO to provide recognised training and assessment services

an organisation that provides non-recognised training and assessment services

Organisation's goals and objectives may relate to:

business plan

strategic plan

operational plan/s

organisation's code of conduct

flexibility and client responsiveness

client satisfaction

financial performance

people management

marketing and client service

quality and quality assurance

Professional techniques and strategies may include:

techniques for initiating action and directing decision making

strategies for presenting a confident and assured manner in challenging situations

maintaining ethical practice in the face of opposition

modelling behavioural and personal presentation standards

motivation strategies

time management

Organisational/legal requirements may include:

strategies for acknowledging and respecting the attitudes and beliefs of others

techniques for promoting active participation

customer complaints, grievances and appeals

risk identification and management, including OHS

quality and continuous improvement processes and standards, including validation systems

financial management, including refund policies and systems to protect fees paid in advance (if appropriate)

recognition of qualifications issued by other training and/or assessment organisations

access and equity

client selection, enrolment and induction/orientation

staff recruitment, induction and ongoing development and monitoring

availability of policies and procedures to all personnel and learners/clients

collaborative/partnership arrangements

confidentiality and privacy requirements

ethical standards

defined resource parameters

administrative and records management system, for example:

reporting/recording requirements and arrangements

maintenance, retention, archiving, retrieval, storage and security of assessment information

document version control

Ethical and inclusive practices may include:

demonstrating probity in all areas of responsibility
modelling organisational/professional codes of conduct
reinforcing ethical conduct in interactions with and between other people
showing respect for individual diversity, culture and religion
recognising and utilising difference to develop both the individual and the organisation
demonstrating sensitivity to the circumstances and background of others
fostering a culture of inclusiveness
new/revised policy directions in vocational education and training

Feedback may include:

formal/informal performance appraisals
obtaining comments from supervisors and colleagues
obtaining comments from clients
personal reflective behaviour strategies
routine organisational methods for monitoring service delivery

Relevant personnel may include:	personnel responsible for initiating and approving the professional development plan for employees in the organisation
Professional development plan refers to:	<p>the organisation's professional development plan for each individual staff member, outlining:</p> <ul style="list-style-type: none">work and personal career objectivesidentified areas requiring developmentlearning opportunities/activitiesrelevant work activities/projectslinks to organisational training needs profile
Development opportunities may include:	<ul style="list-style-type: none">undertaking further higher education/VET qualificationundertaking professional development in specific areas of practiceinternal training/development programsrelevant conferences, seminars and workshopsreading relevant journals and literaturenetworking with internal/external colleaguescoaching and/or mentoring
Currency of professional practice may include:	<ul style="list-style-type: none">vocational competency and/or technical expertise in subject matterprofessional practice as a trainer/facilitator, assessor
Professional networks may include:	<p>informal networks with:</p> <ul style="list-style-type: none">other trainers/facilitators, assessorspeople working in industry/vocational areacontacts in vocational education and training <p>formal networks such as:</p> <ul style="list-style-type: none">local/interstate assessor/trainer networksinterest and support groupsregional, specialist and peak associationsprofessional/occupation associations

	communities of practice
Technology may include:	computer-based communication, e.g. email, Internet, Extranet and Intranet facsimile machines telephone video conferencing
Developments and trends may include:	new/revised Training Packages in vocational area of expertise legislative/regulatory changes in vocational area of competency new developments/directions/trends in vocational education and training policy changes in vocational education and training
Continuous improvement techniques and processes may include:	limited and systemic evaluation records review and maintenance self-assessment strategic business/operational planning ongoing education and training team meetings and networking

Competency Field

Learning Environment

TAATAS502B Prepare a tender bid

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to bid for the provision of goods or services through a tender process.

Application of the Unit

This unit addresses the competency of writing a submission or proposal to supply goods or services required by the purchasing organisation through a tender process. It involves researching, preparing and writing a proposal that outlines the suppliers capabilities to meet the tender specifications.

This competency applies to the supplier in a tendering process. The competency of preparing tender documentation as purchaser and overseeing the tendering process is addressed in the purchasing domain of the Business Services Training Package, in particular through the unit of competency **BSBPUR401A Plan purchasing**. The unit **LGACOM409A Prepare tender documentation** from the Local Government Training Package is also of relevance.

In the training and assessment context the provision of tendered services is a critical area of competency applied to funded and contracted services, projects or product development. Competency in this unit requires knowledge and skills in interpreting tender specifications; developing appropriate activities and methodologies to meet those specifications; estimating financial, human and physical resources needs; and preparing a detailed submission that demonstrates and markets the capacity and capability of the supplier to achieve the specified tender requirements.

Competency also includes responsibility for formatting and lodging the final submission to the potential client within designated timelines and requires the application of relevant technology and project tools.

A critical outcome of this unit is a demonstrated capacity to translate the tender specifications into a clearly defined methodology which encompasses innovative ideas and to develop a budget as part of the tender submission.

The development of innovative ideas is addressed as a separate unit in **TAAENV404B Develop innovative ideas at work**. Budgetary and financial management competency is covered in **BSBMGT503A Prepare budgets and financial plans**.

The competency of managing a project is addressed in **TAATAS503B Manage contracted work**.

The competency specified in this unit is typically required by trainers/facilitators, teachers, assessors, training product developers, program coordinators, training consultants, training managers and learning development/human resource personnel.

In other industry contexts, this unit is relevant to any person undertaking this area of work.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Determine tender requirements	<ul style="list-style-type: none">1.1 Tender specifications and/or other relevant documentation are obtained and analysed to establish tender requirements1.2 Viability to undertake required work is assessed against tender specifications and organisational and/or individual operational capacities and capabilities1.3 Risk assessment is conducted on anticipated outcomes in accordance with organisational and legal requirements1.4 All occupational health and safety (OHS) and other relevant legislative requirements are interpreted and allowed for within the parameters of the tender requirements

- 2 Develop tender content
 - 2.1 Options and ideas to address tender requirements are generated using effective thinking skills and knowledge of tender area
 - 2.2 Options and ideas are elaborated and refined, and where feasible, further developed with **relevant persons**
 - 2.3 Specific timelines, stages, activities and deliverables are defined and documented to meet tender requirements
 - 2.4 Physical and human resources required to undertake the specified tender requirements are determined and confirmed with relevant persons, where required, in accordance with organisational requirements
 - 2.5 Financial costings are determined in accordance with organisational requirements, and a proposed budget is prepared, with assistance from **others**, if required
- 3 Prepare tender bid
 - 3.1 **Business technology** is used to present information in a format that markets capabilities
 - 3.2 Specific **tender criteria and conditions** are addressed in writing tender submission/proposal
 - 3.3 Submission/proposal outlines organisational capabilities
 - 3.4 All information is reviewed to ensure accuracy and effectiveness in meeting tender specifications
 - 3.5 Final proposal/submission is proofread, formatted and lodged within designated timelines, and a copy is securely stored in accordance with organisational requirements
 - 3.6 Presentation materials are prepared and presentation made to client to support the bid, where required

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence of the processes used to develop and prepare a detailed proposal/submission in response to a tender which accurately covers the tender requirements.

This evidence must show how the tender specifications were analysed; assessment of organisational viability and risks associated with tender requirements; a detailed methodology and budget; and a final tender proposal/submission which meets all tender criteria and organisational requirements.

Evidence Requirements

Required knowledge includes:

relevant policy, legislation, codes of practice and national standards including Commonwealth, state/ territory legislation, e.g. that related to:

client privacy and confidentiality

provision of accurate information

environmental standards

equal employment opportunities (EEO) and anti-discrimination

OHS roles and responsibilities of employers and employees, trainers/facilitators and assessors, and of the organisation as a training and/or assessment organisation

industries in which the training and/or assessment organisation operates

types of training and assessment projects

tender layout, format and presentation methods

organisational pricing policy and procedures

contingency and risk assessment techniques

key project success factors and typical project pitfalls

evaluation and revision techniques, such as:
asking specific questions
seeking and analysing feedback

Required skills and attributes include:

literacy and communication skills to:
read and interpret relevant information
comply with tender criteria and conditions
provide clear and precise information
receive and interpret feedback on draft submission

prepare required documentation using clear and comprehensible language and layout

tailor submission to requirements

research and evaluation skills to:

evaluate tender requirements to establish project requirements

evaluate viability to provide services and/or products to undertake the project

determine needs of target client group

conduct a risk assessment on anticipated project outcomes

identify and estimate required resources

evaluate feedback for incorporation in submission

identify selection criteria, weightings and selection process

numeracy skills to:

create a detailed budget

prepare a submission for tender

proofreading and editing skills to:

revise, amend and finalise submission

project planning skills to:

plan and schedule activities

	methodically organise work
	work within agreed timeframes and budgetary constraints
	technology skills to:
	use appropriate equipment and software to research and compile information
	use spreadsheets in the preparation of a detailed budget
Products that could be used as evidence include:	<p>prepared quotations and estimates</p> <p>tender proposal/submission</p> <p>feedback received on tender proposal/submission</p> <p>graphic presentations</p>
Processes that could be used as evidence include:	<p>how tender criteria were analysed</p> <p>how resource requirements were identified and estimated</p> <p>how risks were identified and assessed</p> <p>what costing and quoting methods were used</p> <p>how relevant policies or legislative information were reviewed</p> <p>how feedback on tenders was used to improve future tenders</p>
Resource implications for assessment include:	<p>access to real or simulated tender process</p> <p>access to information to prepare tender (relevant documents, research, organisational information)</p> <p>access to people involved in tender process</p> <p>time specifications</p>
The collection of quality evidence requires that:	<p>assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills</p> <p>a range of appropriate assessment methods/evidence gathering techniques is used to determine competency</p>

evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

a detailed tender proposal/submission which addresses:

tender specifications

organisational viability

detailed methodology with identified stages, activities, timelines and deliverables

risk assessment

resource requirements

budget

revision, editing and proofreading following feedback

effective presentation

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAATAS501A Undertake organisational training needs analysis

TAATAS503B Manage contracted work

TAAASS403B Develop assessment tools

TAADES502B Design and develop learning resources

TAADES503B Research and design

e-learningresources

**TAADES504B Develop and evaluate
e-learningresources**

**TAADES505B Research and develop
competencystandards.**

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tender specifications may include:

- simple or detailed explanation of tender requirements
- identification of deliverables
- client group needs
- designated performance standards
- proposed activities to be undertaken
- time and cost parameters
- scope
- quality
- human and physical resource needs
- legal requirements
- consultation, stakeholder involvement
- project management
- insurance requirements
- specific requirements

Viability may include consideration of:

- tender criteria and conditions
- available resources, equipment and supplies
- client group needs
- time constraints
- other projects
- geographical constraints
- skills required for the provision of services
- financial considerations
- compliance with regulations

Risk assessment may include:

- identifying risks in isolation or as part of a broader risk management strategy,
- addressing risks such as:
 - environmental landscape
 - financial/economic loss/failure

damage to property/equipment

professional incompetency

equipment/system failures

OHS

inability to deliver or meet the timelines if selected

Organisational requirements may include:

- quality assurance and/or procedures manuals
- organisational goals, objectives, plans, systems and processes
- organisational policies, procedures and guidelines
- recording and reporting procedures
- industry consultative mechanisms
- business and performance plans
- access and equity principles and practices
- confidentiality requirements
- ethical standards
- collaborative/partnership arrangements
- OHS policies, procedures and programs
- quality and continuous improvement processes and standards
- defined resource parameters

Legal requirements may include:

- Australian Quality Training Framework (AQTF) Standards for Registered Training Organisations (RTOs)
- state or territory registering body requirements
- industrial relations award and enterprise agreements and relevant industrial arrangements
- confidentiality and privacy requirements
- relevant legislation from all levels of government that affects business operations
- OHS legislation
- environmental legislation
- equal opportunity legislation

	industrial relations legislation
	anti-discrimination legislation
	relevant industry codes of practice
Relevant persons may include:	tenderer/potential client
	target client group
	colleagues
	managers, supervisors
	government agencies
	employment agencies
	industry groups
	training and/or assessment coordinators
	industry regulators/licensing authorities
	members of professional associations
	state/territory registering body
	external consultants
Others may include:	accounting/finance personnel
	other persons with broader budgetary experience
Business technology may include:	computers
	database software applications
	graphical presentation software
	word processing software
	project management software
	printers
	email, Internet, Intranet
Specific tender criteria and conditions may include:	eligibility for submission of tender
	special requirements
	selection criteria and weightings
	tender document format
	interview, meeting or presentation of tender
	submission date

Unit Sector(s)

Not applicable.

Competency Field

Training Advisory Services

TAATAS503B Manage contracted work

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to manage work undertaken under contract.

Application of the Unit

This unit addresses the competency of managing externally contracted work as the supplier of goods and/or services. It involves finalising the planning process for contracted projects/services, managing contract performance, monitoring contract requirements and evaluating contract outcomes.

This unit could be applied in a broad range of contexts as well as vocational education and training. In the training and assessment context managing contracted work is a critical area of competency applied to the provision of services, for example, User Choice arrangements, and to training and/or assessment projects which may be related to research or product development.

This competency applies to the supplier of contracted services where the client is the purchaser.

The competency of managing contracts as the purchaser is addressed separately in **PSPPROC602A Direct the management of contracts**, a unit from the Public Sector Training package. The competency of preparing a tender bid to undertake the contracted work is separately addressed in **TAATAS502B Prepare a tender bid**.

Achievement of this unit requires skills in exercising consideration, discretion and judgement using a range of problem solving and decision making techniques.

This unit addresses the competency of managing contracted projects/services when this function represents part of an individual's overall work responsibilities as distinct from being the primary focus of work. In the latter context, users are referred to the units in the project management domain in the **BSB01 Business Services Training Package**.

This unit provides generic competency required of many training and/or assessment personnel that is applied to and can be demonstrated with a number of other units in the **TAA04 Training and Assessment Training Package**. Suggested examples are listed at the end of this unit.

The competency specified in this unit is typically required by trainers/facilitators, assessors, teachers, training product developers, program coordinators, consultants, supervisors and managers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Develop effective planning instruments	<ul style="list-style-type: none">1.1 The contract is negotiated with the client and finalised in accordance with successful tender bid, any negotiated changes to tender specifications and legal/organisational contractual requirements1.2 Strategies for achieving contractual outcomes are developed in consultation with the client and relevant people1.3 Quality assurance goals and strategies are established in consultation with relevant people and in accordance with legal/organisational requirements1.4 A risk management plan to identify, assess and control risks is developed in accordance with legal/organisational requirements1.5 Planning arrangements are documented and presented to the client for sign-off, where required

- 2 Organise resources and support processes
 - 2.1 Financial, physical, material and human resource requirements are organised in accordance with identified needs
 - 2.2 Effective **communication strategies** are established to support project development/service delivery
 - 2.3 **Contingency arrangements** are put in place
- 3 Manage implementation of contractual requirements
 - 3.1 Progress in achieving contractual requirements and outputs is **systematically monitored** and reported to client
 - 3.2 Expenditure and resource usage is monitored and controlled to ensure outcomes are achieved within specified budget parameters
 - 3.3 Issues and difficulties are addressed through application of risk management plan and **relevant skills**
 - 3.4 Quality is monitored to ensure outcomes/outputs meet client requirements
 - 3.5 Contract variations are determined, where necessary, and verified and agreed with client
 - 3.6 Project is completed/service provision wound up in accordance with contract timelines
 - 3.7 Financial audit is organised in accordance with contract requirements
- 4 Evaluate management efficacy
 - 4.1 Established **evaluation methods** are identified and used to evaluate management approach, processes and contract outcomes
 - 4.2 Evaluation findings are documented and presented to relevant people, where required
 - 4.3 Outcomes are reflected upon to identify changes and improvements in managing similar contracts

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit, candidates must be able to provide evidence that they can plan and manage project activities and monitor resource requirements to ensure effective contracted training and/or assessment project/service outcomes.

The developed strategies used as evidence must: highlight effective consultation with a range of individuals to support and ensure achievement of project outcomes; include quality assurance goals and strategies to ensure legal/organisational requirements have been met, a risk management plan to identify potential/real issues and control risks, highlight evaluation techniques used to monitor the project's progress; maintain accurate records and documents and show how the candidate has maintained a broad knowledge of relevant industry practices and policies in relation to vocational education and training.

Evidence Requirements

Required knowledge includes:

project management concepts and principles
contingency and risk analysis techniques
key project success factors and typical project pitfalls
legal and ethical responsibilities, including:
maintaining client privacy and confidentiality
providing accurate information
meeting environmental standards
compliance with relevant Commonwealth and state/territory legislation

project management systems and tools, for example:
critical path method
bar and Gantt charts
program evaluation and review technique (PERT)

quality standards in relation to project management

continuous improvement processes

the vocational education and training environment, for example:

Australian Qualifications Framework (AQF)

Training Packages

organisation's quality systems, such as:

strategic planning processes

issues relating to client satisfaction

recording systems

relevant policy, legislation, codes of practice and national standards including Commonwealth and state/territory legislation, for example:

copyright and privacy laws in terms of electronic technology

security of information

recording information and confidentiality requirements

licensing requirements

vocational education and training requirements

duty of care under common law

anti-discrimination including equal opportunity, racial vilification and disability discrimination

the industrial relations system, industry/workplace relations, and industrial awards/enterprise agreements

OHS relating to management of external projects/services, including:

legislative requirements for information and consultation relevant to safety

elements of an OHS management system as it applies to a training and/or assessment

organisation

nature of OHS risks that should be identified and addressed by a training and/or assessment organisation during the planning stage of the project/service

Required skills and attributes include:

communication and negotiation skills to:
define and monitor objectives of the project team

influence and negotiate project outcomes with key stakeholders

literacy skills to:

interpret organisation's goals for the project
follow clear and detailed instructions

writing skills to:

develop strategies for achieving contractual outcomes

develop quality assurance goals and strategies

develop a risk management plan

prepare written reports on project's progress

technology skills to:

create a project schedule using the critical path method and Gantt chart

use spreadsheets and project management software

communication and negotiation skills to:

consult effectively with a range of individuals to ensure achievement of project outcomes

gain agreement on project processes and timelines

project planning skills to:

schedule activities

integrate scope, resources, accountabilities,
costs and deliverables

work within agreed timeframes and
budgetary constraints

team leadership skills to:

establish and manage effective team
relationships

develop a high performance project team and
assess team performance

time management skills to:

plan, schedule and track project schedule

logically sequence project activities

establish project milestones and use a
milestone chart

numeracy skills to:

create a project budget

forecast predictions

check calculations and outcomes

problem solving skills to:

promptly identify potential barriers to project
outcomes

analyse project risks and establish
contingencies

**Products that could be used as evidence
include:**

strategies for achieving contractual outcomes

risk management plan

quality assurance goals and strategies

documented monitoring and reporting
arrangements

documented roles and responsibilities of
personnel associated with implementation of

	the project
	contingency arrangements
	prepared documentation and/or checklists to support planning and implementation of the project plan
	recommendations for improvement to project processes
Processes that could be used as evidence include:	how work activities were scheduled and agreed
	how and when monitoring of reporting arrangements and expenditure and resource usage were conducted
	how technology was used to monitor project's progress and evaluate project outcomes
	how and when risks were identified and analysed
	how key individuals were consulted
Resource implications for assessment include:	access to competency standards
	access to assessment materials and tools
	access to suitable assessment venue/equipment
	workplace documentation
	cost/time considerations
	personnel requirements
The collection of quality evidence requires that:	assessment must address the scope of this unit and reflect all components of the unit i.e. the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills
	a range of appropriate assessment methods/evidence gathering techniques is used to determine competency
	evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided
	the evidence collected must relate to a number of performances assessed at different

points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

strategies for achieving contractual outcomes

a risk management plan

established quality assurance goals and strategies

implemented communication strategies

contingency arrangements

completed progress reports

monitored and controlled expenditure and resource usage

summary of methods used to evaluate project processes and outcomes

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested units include but are not limited to:

TAATAS501B Undertake organisational training needs analysis

TAATAS502B Prepare a tender bid

TAADES502B Design and develop learning resources

TAADES503B Research and design e-learning resources

TAADES504B Develop and evaluate e-learning resources

TAADES505B Research and develop competency standards

TAAASS403B Develop assessment tools.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Client is the purchaser and may be:

- internal/external
- an enterprise
- a department/division
- an industry sector
- a professional association
- a community organisation
- a government organisation

Relevant people may include:

- other members of the tender team
- industry groups
- program managers trainers/facilitators and assessors/coordinators/senior management
- industry regulators
- members of professional associations
- staff of government departments and organisations
- external consultants
- personnel responsible for monitoring the training and/or assessment organisation's services provision
- users of training information such as finance personnel, human resource personnel, employers
- contract manager
- private/government funding bodies
- union/employee representatives

Quality assurance goals and strategies may include:

- reporting procedures and protocols
- procedures for monitoring and evaluating project outcomes and client satisfaction
- compliance with the Australian Quality Training Framework (AQTF) **Standards for Registered Training Organisations**

(RTOs), where relevant

continuous improvement strategies

reducing risk by anticipating, evaluating and developing strategies for the management of possible problems

a formal structure against which progress can be evaluated

mechanisms for involving a wide variety of interested parties or stakeholders in the project

budgets and timetables which enable the commitment of resources at appropriate points in the project

contingency plans to cater for a change of corporate focus or significant project difficulties

Legal requirements may include:

standards for training and/or assessment organisations

state or territory registering body requirements

industrial relations award and enterprise agreements and relevant industrial arrangements

confidentiality and privacy requirements

scope of registration

relevant legislation from all levels of government that affects business operation

OHS issues

environmental issues

equal opportunity

industrial relations and anti-discrimination

relevant industry codes of practice

Organisational requirements may include:

quality assurance and/or procedures manuals

goals, objectives, plans, systems and processes

legal and organisational policy/guidelines

recording and reporting procedures

business and performance plans
access and equity principles and practices
confidentiality requirements
ethical standards
collaborative/partnership arrangements
OHS policies, procedures and programs

quality and continuous improvement
processes and standards
defined resource parameters

Risk management plan may describe:

the process which will be used to identify, analyse and manage risks, both initially and throughout the life of the project

how often risks will be reviewed, the process for review and who will be involved

who will be responsible for which aspects of risk management

how risk status will be reported and to whom

the initial snapshot of the major risks and current grading

planned strategies for reducing likelihood and seriousness of each risk (mitigation strategies) and who will be responsible for implementing them

Risks to the effective management of the project may include:

competing work demands

technology/equipment breakdowns

workplace hazards, risks and controls

learning resource and learning materials availability

budget constraints

time delays

inadequate active participation in the quality management process by all stakeholders

availability of suitably qualified staff

adherence to the Australian Quality Training Framework (AQTF) **Standards for Registered Training Organisations (RTOs)**

Documented planning may include:

objectives, scope and expected benefits of the project

project management methodology to be used

structure of the project

targets and milestones

budgets and timetables which enable the commitment of resources at appropriate points in the project

contingency plans to cater for changes or significant project difficulties

acquisition strategies
risk management plans, including:
OHS hazards and risks identified
strategies to control the risk
methods of monitoring during the life cycle
of the project/service

project implementation plans
consultation strategies to involve
stakeholders
transition plans
specifications
quality assurance procedures

Communication strategies may include:

client-centred approaches
ongoing liaison with stakeholders
effective reporting arrangements
continuous feedback mechanisms

Contingency arrangements may include:

sub-contracting work
re-determining timelines
re-evaluating risk management strategies
sourcing independent external advice

Systematically monitored may include the:

measurement/achievement of set outcomes
completion of contract phases/requirements
achievement of key tasks/project phases
reviewing/updating of progress reports
reviewing contract requirements

Relevant skills may include:

sound communication skills
sound interpersonal skills
sound time management skills
sound negotiation skills
sound problem solving skills
sound change management skills

Evaluation methods could be qualitative or observation

quantitative and may include:

questionnaires
checklists
interviews
focus groups
expert and peer reviews
cost data analyses

Unit Sector(s)

Competency Field

Training Advisory Services

TAATAS504B Facilitate group processes

Modification History

Not applicable.

Unit Descriptor

This unit specifies the competency required to lead or facilitate group processes to achieve an agreed outcome.

Application of the Unit

Group facilitation is a competency involving the effective management of a group in circumstances where the facilitator provides a pathway for the group to achieve identified and agreed outcomes.

This competency requires high-level communication and interpersonal skills as well as knowledge of various group process techniques and activities to explore and analyse a focus/subject area, maximise group involvement and interaction and develop common/agreed solutions/outcomes.

Group facilitation may be applied in many circumstances including focus groups, workshops, meetings and change processes. Group facilitation can be used to resolve issues, find solutions, collaboratively develop ideas, develop new ways of working and explore problems/issues. It is relevant to community, educational and work situations. The process may be conducted for a client or may be internally focused.

While group facilitation is a clear part of the unit outcomes for **TAADEL402B Facilitate group-based learning**, the facilitation process in that unit is driven by the predetermined competency/learning outcomes to be achieved. In that unit, the facilitation process revolves around ensuring progression towards the desired outcomes.

In this unit, the focus is usually defined but the outcomes derive from the competency of the facilitator in guiding, informing, facilitating and monitoring the group.

The competency specified in this unit is typically required by trainers/facilitators, assessors, consultants, supervisors, managers and leaders.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Establish group objectives and processes	<p>1.1 The focus of the group process is researched, in consultation with the client and other stakeholders, where applicable and group participants are identified</p> <p>1.2 Group input is initiated, confirming objectives</p> <p>1.3 Group process techniques, activities and timelines are planned</p> <p>1.4 Group purpose, processes, expectations and roles of members are discussed, negotiated and agreed to by the group as a whole</p> <p>1.5 Resource requirements are identified and arranged</p> <p>1.6 Recording processes are discussed and agreed by the group and confirmed with the client, where applicable</p> <p>1.7 Appropriate evaluation methods are agreed upon and incorporated into the process to ensure group and client needs are met, where applicable</p>
2 Manage facilitation	<p>2.1 Issues/ideas/perspectives of group members are elicited using identified group process techniques that accurately reflect group member needs</p> <p>2.2 Appropriate facilitation skills are used to explore</p>

- issues/ideas/perspectives in a **supportive environment** that encourages participation and productive contributions from all group members
- 2.3 All interactions with group members reflect sensitivity to **social and cultural differences** and any **individual needs**
 - 2.4 Information is provided which is designed to develop, extend and challenge group perspectives and frames of reference
 - 2.5 Group members' knowledge, expertise and skills are acknowledged and utilised
 - 2.6 Opportunities for group members to contribute additional information, learn from each other and develop knowledge/skills are provided
 - 2.7 Group dynamics are monitored to maintain focus and direction, continuity, engagement, participation and timelines
- 3 Develop **group outcomes**
- 3.1 Proposed **outcomes** are sought from group members
 - 3.2 Proposed outcomes are noted/documented for group to discuss and further develop
 - 3.3 Facilitation skills are used to draw a collective and agreed outcome which responds to individual needs/perspectives
 - 3.4 Outcomes are documented in accordance with agreed client/organisational and group requirements
 - 3.5 Proposed actions arising from agreed outcomes are raised with the group and appropriate steps are taken to initiate these, where appropriate
- 4 Finalise group process
- 4.1 Feedback and reflection are used to identify and implement improvements to future practice in group processes
 - 4.2 Evaluation methods are selected and used to identify effectiveness of group process
 - 4.3 Stakeholders and clients are briefed, if relevant, on issues, developments and outcomes arising from

group process

- 4.4 Records and reports of process and outcomes are documented, distributed and stored in accordance with established reporting requirements of client/organisation

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of Assessment

To demonstrate competency against this unit candidates must be able to provide evidence that they have the communication and interpersonal skills to effectively facilitate group processes by creating an environment that encourages active participation and results in an outcome for the client/stakeholder/organisation.

The evidence must show how candidates can establish objectives; use a variety of facilitation methods and group process techniques to explore the objectives and manage the group; and synthesise contributions to develop an outcome.

Evidence Requirements

Required knowledge includes:

current techniques for group facilitation processes, such as:

demonstrations

explanations

questioning

modelling

scene-setting

interactive/dialogue

problem setting/solving

experiential learning

group work

creative thinking techniques, including:

brainstorming

making associations

visualising

building on associations

telling stories

creative writing

lateral thinking games

mind mapping

drawings

de Bono's Six Thinking Hats

using prompts

a range of media and learning aides that can be used to promote discussion, such as:

graphic computer presentations

flipcharts

access and equity principles and practices, such as:

sensitivity to cultural differences

allowances for reasonable adjustment

instructional design, including:

sequencing information

supporting knowledge development

providing opportunities for practice

evaluation/revision techniques, for example:

seeking feedback

administering evaluation forms

monitoring group's progress against agreed goals

relevant policy, legislation, codes of practice and national standards including

Commonwealth and state/territory

legislation, for example:

competency standards

licensing

industry/workplace requirements

duty of care under common law

recording information and confidentiality requirements

anti-discrimination including equal opportunity, racial vilification and disability

discrimination

workplace relations

industrial awards/enterprise agreements

National Reporting System

OHS relating to the facilitation of group processes, including:

assessment and risk control measures

reporting requirements for hazards

safe use and maintenance of relevant equipment

emergency procedures

sources of OHS information

role of key workplace persons

policies and procedures relevant to the learning environment

Required skills and attributes include:

interpersonal skills to:

establish trust

maintain appropriate relationships

use appropriate body language

actively listen and empathise

notice people's non-verbal cues and signals

resolve conflict

communication skills to:

project voice clearly

give constructive feedback

give clear instructions or directions

clearly explain ideas and opinions

clarify others' ideas

team leading skills to:

offer support and assistance

tactfully direct discussions 'back on track'

ensure everyone feels heard in group discussions

technology skills to:

search electronic information and reference sources

use software packages to produce visual learning aides

document processes/outcomes

use electronic communication methods

integrative thinking skills to:

explore issues from a number of contrasting points of view

synthesise positions/points of view

literacy skills to:

read and interpret relevant information to design and facilitate group processes

prepare required documentation and information for stakeholders

analysis skills to:

evaluate and act on feedback

administrative skills to:

plan and organise meetings

access required resources

Products that could be used as evidence include:

handouts to be given to group members

graphic presentations which have been developed using computer applications

feedback from colleagues and group members on facilitation styles

information passed onto group members regarding the outcomes of the session and any further actions to be undertaken

preparation notes and/or response to client briefing

Processes that could be used as evidence include:

how group session was structured

how feedback on facilitation skills was gathered

how new ideas were put into action

how group members were actively listened to

Resource implications for assessment include:

access to groups of individuals to participate in group process

access to suitable assessment venue and equipment

workplace documentation

cost/time considerations

personnel requirements

The collection of quality evidence requires that:

assessment must address the scope of this unit and reflect all components of the unit i.e.

the Elements, Performance Criteria, Range Statement, Evidence Guide, Employability Skills

a range of appropriate assessment methods/evidence gathering techniques is used to determine competency

evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided

the evidence collected must relate to a number of performances assessed at different points in time and in a learning and assessment pathway these must be separated by further learning and practice

assessment meets the rules of evidence

a judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated

Specific evidence requirements must include:

evidence collected from at least three separate group processes that address different purposes and include different groups of participants with evidence in each process reflecting:

planning

resource requirements

information provided to the group

knowledge, skills and techniques used in facilitation

group responsiveness and activities developed to engage the group

outcomes achieved

evaluation

record/report of process

Integrated assessment means that:

this unit can be assessed alone or as part of an integrated assessment activity involving relevant units in the **TAA04 Training and Assessment Training Package**. Suggested

units include but are not limited to:

TAADEL502B Facilitate action learning projects.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. **Bold italicised** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Focus of the group process may include:

- feedback and advice on product, policy, process, development, change
- research
- planning
- change management/new directions
- informal education
- community action
- special interest causes
- staff development
- industry/community liaison

Clients and other stakeholders may include:

- contracted client
- product developer
- employer/organisation
- government agency/department
- community group/body
- regulatory body
- association
- union
- committee
- management

Group participants may be:

- self-selected/nominated
- randomly selected
- targeted

Group process techniques may include:

- presentations
- demonstrations
- explanations
- questioning
- modelling

	scene-setting
	interactive/dialogue
	problem setting/solving
	experiential learning
	group work
Group activities may be:	formal
	informal
	structured
	semi-structured
	unstructured
Resource requirements may include:	products, policies, procedures
	research information/documentation
	financing
	subject experts
	facilities
	equipment/materials
	written materials/handouts
	administrative support
Evaluation methods may include:	formal or informal feedback mechanisms
	surveys
	conducting interviews
	analysis of qualitative/quantitative data
	questionnaires
	personal, reflective behaviour strategies
	routine organisational methods for
	monitoring service delivery

Facilitation skills may include:

using effective verbal and body language to:
maintain group cohesion
handle difficult situations
manage group activities
manage conflict
maintain focus
create interaction between group participants
manage individual and group engagement and participation
guide discussion
introduce content
obtain outcomes

using a variety of group process techniques
explaining and using a variety of creative thinking techniques

Supportive environment may include:

establishing trust
being open to opinions and ideas
allowing group members to have their say
asking questions of group/individuals
being flexible in approach
using appropriate interpersonal skills
being sensitive to individual differences

Social and cultural differences may include:

language barriers
physical impairment or disability involving hearing, vision, voice, mobility
intellectual impairment or disability
medical condition such as arthritis, epilepsy, diabetes, asthma
learning difficulties
psychiatric or psychological disability
religious and spiritual observances
cultural images/perceptions
age, gender and sexuality

Individual needs may include:

language, literacy, numeracy requirements
provision of personal support services
adaptive technology or special equipment
flexible sessions to allow for fatigue or
administering of medication

physical environment adjustments
time adjustments to suit family needs

Outcomes may:

be derived from exploration of issues
emerge from facilitated group
discussion/activities
be based on information provided to group
and accepted
result from group creative thinking
incorporate expert input
encompass relevant research

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to plan and organise the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system. It also includes the development of simple assessment instruments.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit typically applies to assessors and workplace supervisors with assessment planning responsibilities; and trainers or other assessors responsible for planning assessment, including RPL.</p> <p>The unit is suitable for those with an existing assessment strategy which documents the overall framework for assessment.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine assessment approach	<p>1.1. Identify candidate and confirm <i>purposes and context of assessment/RPL</i> with relevant people according to <i>legal, organisational and ethical requirements</i></p> <p>1.2. Identify and access <i>benchmarks for assessment/RPL</i> and any specific assessment guidelines</p>
2. Prepare the assessment plan	<p>2.1. Determine evidence and <i>types of evidence</i> needed to demonstrate competence, according to the <i>rules of evidence</i></p> <p>2.2. Select <i>assessment methods</i> which will support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3. Document all aspects of the <i>assessment plan</i> and confirm with relevant personnel</p>
3. Develop assessment instruments	<p>3.1. Develop <i>simple assessment instruments</i> to meet target group needs</p> <p>3.2. Analyse <i>available assessment instruments</i> for their suitability for use and modify as required</p> <p>3.3. <i>Map assessment</i> instruments against unit or course requirements</p> <p>3.4. Write clear instructions for candidate about the use of the instruments</p> <p>3.5. Trial draft assessment instruments to validate content and applicability, and record outcomes</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- cognitive interpretation skills to:
 - interpret competency standards and other assessment documentation, including material relating to reasonable adjustment
 - identify opportunities for integrated competency assessment
 - contextualise competency standards to the operating assessment environment, including RPL
 - consider access and equity needs of diverse candidates
- technology skills to use appropriate equipment and software to communicate effectively with others
- research and evaluation skills to:
 - obtain competency standards, assessment tools and other relevant assessment resources
 - research candidate characteristics and any reasonable adjustment needs
 - evaluate feedback, and determine and implement improvements to processes
- literacy skills to read and interpret relevant information to design and facilitate assessment and recognition processes
- communication skills to discuss assessment, including RPL processes with clients and other assessors
- interpersonal skills to:
 - demonstrate sensitivity to access and equity considerations and candidate diversity
 - promote and implement equity, fairness, validity, reliability and flexibility in planning an assessment processes

Required knowledge

- ethical and legal requirements of an assessor
- competency-based assessment, including:
 - work-focused
 - criterion-referenced
 - standards-based
 - evidence-based
- different purposes of assessment and different assessment contexts, including RPL
- how to read and interpret the identified competency standards as the benchmarks for assessment
- how to contextualise competency standards within relevant guidelines
- four principles of assessment and how they guide the assessment process

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none">• purpose and features of evidence, and different types of evidence used in competency-based assessments, including RPL• rules of evidence and how they guide evidence collection• different types of assessment methods, including suitability for collecting various types of evidence• assessment tools and their purpose; different types of tools; relevance of different tools for specific evidence-gathering opportunities

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • plan and organise the assessment process on a minimum of two occasions • collect evidence that demonstrates: <ul style="list-style-type: none"> • documented assessment plans • having covered a range of assessment events • catering for a number of candidates • different competency standards or accredited curricula • an RPL assessment • contextualisation of competency standards and the selected assessment tools, where required • incorporation of reasonable adjustment strategies • development of simple assessment instruments for use in the process • organisational arrangements.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to training products, such as training packages and accredited course documentation.</p>
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Purposes of assessment/ RPL may include:

- recognising current existing competence of candidates
- determining if competence has been achieved following learning
- establishing candidate progress towards achievement of competence
- determining language, literacy and numeracy needs of candidates
- certifying competence through a qualification or Statement of Attainment
- licensing or regulatory requirements.

Context of assessment/ RPL may include:

- environment in which the assessment/RPL will be carried out, including real or simulated workplace
- opportunities for collecting evidence in a number of situations
- relationships between competency standards and:
 - evidence to support RPL
 - work activities in the candidate's workplace
 - learning activities
- who carries out the assessment/RPL.

Organisational, legal and ethical requirements may include:

- assessment system policies and procedures
- assessment strategy requirements
- reporting, recording and retrieval systems for assessment, including RPL
- quality assurance systems
- business and performance plans
- access and equity policies and procedures
- collaborative and partnership arrangements
- defined resource parameters
- mutual recognition arrangements
- industrial relations systems and processes, awards, and enterprise agreements
- Australian Quality Training Framework

RANGE STATEMENT	
	<ul style="list-style-type: none"> • registration scope • human resources policies and procedures • legal requirements, including: <ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements • OHS considerations, including: <ul style="list-style-type: none"> • ensuring OHS requirements are adhered to during the assessment process • identifying and reporting OHS hazards and concerns to relevant personnel.
<i>Benchmarks for assessment/RPL</i> may include:	<ul style="list-style-type: none"> • criterion against which the candidate is assessed or prior learning recognised, which may be: <ul style="list-style-type: none"> • competency standard/unit of competency • assessment criteria of course curricula • performance specifications of an enterprise or industry • product specifications.
<i>Types of evidence</i> may include:	<ul style="list-style-type: none"> • direct • indirect • supplementary.
<i>Rules of evidence</i> ensure that evidence collected is:	<ul style="list-style-type: none"> • valid • sufficient • authentic • reliable.
<i>Assessment methods</i> are the particular techniques used to gather evidence and may include:	<ul style="list-style-type: none"> • direct observation, for example: <ul style="list-style-type: none"> • real work/real time activities at the workplace • work activities in a simulated workplace environment • structured activities, for example: <ul style="list-style-type: none"> • simulation exercises and role-plays • projects • presentations • activity sheets • questioning, for example: <ul style="list-style-type: none"> • written questions, e.g. on a computer • interviews

RANGE STATEMENT	
	<ul style="list-style-type: none"> • self-assessment • verbal questioning • questionnaires • oral or written examinations (applicable at higher AQF levels) • portfolios of evidence, for example: <ul style="list-style-type: none"> • collection of work samples compiled by candidate • product with supporting documentation • historical evidence • journal or log book • information about life experience • review of products, for example: <ul style="list-style-type: none"> • testimonials and reports from employers and supervisors • evidence of training • authenticated prior achievements • interview with employer, supervisor, or peer.
<i>Assessment plan</i> may include:	<ul style="list-style-type: none"> • overall planning document describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
<i>Simple assessment instruments</i> may include:	<ul style="list-style-type: none"> • instruments developed by an assessor as part of formative or summative assessment activities, including: <ul style="list-style-type: none"> • profiles of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for the evaluation of work samples • recognition portfolios • candidate self-assessment materials • instruments developed elsewhere that have been modified by the assessor for use with a particular client group.
<i>Available assessment instruments</i> may include:	<ul style="list-style-type: none"> • commercially available instruments • those created by others inside the registered training organisation.

RANGE STATEMENT

Map assessment means:	<ul style="list-style-type: none"> showing a clear relationship between the evidence and the requirements of the unit.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for assessment	<p>1.1. Interpret assessment plan and confirm organisational, legal and ethical requirements for conducting assessment with relevant people</p> <p>1.2. Access and interpret relevant benchmarks for assessment and nominated assessment tools to confirm the requirements for evidence to be collected</p> <p>1.3. Arrange identified material and physical resource requirements according to assessment system policies and procedures</p> <p>1.4. Organise specialist support required for assessment</p> <p>1.5. Explain, discuss and agree details of the assessment plan with candidate</p>
2. Gather quality evidence	<p>2.1. Use agreed assessment methods and tools to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2. Apply the principles of assessment and rules of evidence in gathering quality evidence</p> <p>2.3. Determine opportunities for evidence gathering in actual or simulated activities through consultation with the candidate and relevant personnel</p> <p>2.4. Determine opportunities for integrated assessment activities and document any changes to assessment instruments where required</p>
3. Support the candidate	<p>3.1. Guide candidates in gathering their own evidence to support recognition of prior learning (RPL)</p> <p>3.2. Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to individual differences and enables two-way feedback</p> <p>3.3. Make decisions on reasonable adjustments with the candidate, based on candidate's needs and characteristics</p> <p>3.4. Access required specialist support in accordance with the assessment plan</p> <p>3.5. Address any OHS risk to person or equipment immediately</p>
4. Make the assessment decision	<p>4.1. Examine collected evidence and evaluate it to ensure that it reflects the evidence required to demonstrate competence</p> <p>4.2. Use judgement to infer whether competence has</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>been demonstrated, based on the available evidence</p> <p>4.3. Make assessment decision in line with agreed assessment procedures and according to agreed assessment plan</p> <p>4.4. Provide clear and constructive feedback to candidate regarding the assessment decision and develop any follow-up action plan required</p>
5. Record and report the assessment decision	<p>5.1. Record assessment outcomes promptly and accurately</p> <p>5.2. Complete and process an assessment report according to agreed assessment procedures</p> <p>5.3. Inform other relevant parties of the assessment decision according to confidentiality conventions</p>
6. Review the assessment process	<p>6.1. Review the assessment process in <i>consultation</i> with relevant people to improve own future practice</p> <p>6.2. Document and record the review according to relevant assessment system policies and procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to:
 - break down competency standards
 - interpret assessment tools and other assessment information, including those used in RPL
 - identify candidate needs
 - make judgements based on assessment of available evidence
- observation skills to:
 - recognise candidate's prior learning
 - determine candidate's performance
 - identify when candidate may need assistance during the assessment processes
- research and evaluation skills to:
 - access required human and material resources for assessment
 - access assessment system policies and procedures
 - access RPL policies and procedures
 - evaluate evidence
 - evaluate assessment process
- cognitive skills to:
 - weigh up the evidence and make a judgement
 - consider and recommend reasonable adjustments
- decision-making skills to:
 - recognise a candidate's prior learning
 - make a decision on a candidate's competence
- literacy skills to:
 - read and interpret relevant information to conduct assessment
 - prepare required documentation and records or reports of assessment outcomes in required format
- communication and interpersonal skills to:
 - explain the assessment, including RPL process
 - give clear and precise instructions
 - ask effective questions
 - provide clarification
 - discuss process with other relevant people
 - give appropriate feedback
 - discuss assessment outcome

REQUIRED SKILLS AND KNOWLEDGE

- use language appropriate to candidate and assessment environment
- establish a working relationship with candidate

Required knowledge

- competency-based assessment, including:
 - vocational education and training as a competency-based system
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - competency standards as the basis of qualifications
 - structure and application of competency standards
 - principles of assessment and how they are applied
 - rules of evidence and how they are applied
 - range of assessment purposes and assessment contexts, including RPL
 - different assessment methods, including suitability for gathering various types of evidence, suitability for content of units, and resource requirements and associated costs
 - reasonable adjustments and when they are applicable
 - types and forms of evidence, including assessment tools that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
 - potential barriers and processes relating to assessment tools and methods
 - assessment system, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations
- relevant policy, legislation, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector, such as:
 - copyright and privacy laws in terms of electronic technology
 - security of information
 - plagiarism
 - training packages and competency standards
 - licensing requirements
 - industry and workplace requirements
 - duty of care under common law
 - recording information and confidentiality requirements
 - anti-discrimination, including equal employment opportunity, racial vilification and disability discrimination
 - workplace relations
 - industrial awards and enterprise agreements
- OHS responsibilities associated with assessing competence, such as:

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none">• requirements for reporting hazards and incidents• emergency procedures• procedures for use of relevant personal protective equipment• safe use and maintenance of relevant equipment• sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • assess competence of a number of candidates within the vocational education and training context against different units of competency or accredited curricula, following the relevant assessment plan • assess at least one candidate for RPL • consider reasonable adjustment and the reasons for decisions in at least one assessment • cover an entire unit of competency and show: <ul style="list-style-type: none"> • the application of different assessment methods and tools involving a range of assessment activities and events • two-way communication and feedback • how judgement was exercised in making the assessment decision • how and when assessment outcomes were recorded and reported • assessment records and reports completed in accordance with assessment system and organisational, legal and ethical requirements • how the assessment process was reviewed.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Assessment plan</i> may include:	<ul style="list-style-type: none"> • overall planning, describing: <ul style="list-style-type: none"> • what is to be assessed • when assessment is to take place • where assessment is to take place • how assessment is to take place.
<i>Benchmarks for assessment:</i>	<ul style="list-style-type: none"> • refer to a criterion against which the candidate is assessed • may be a competency standard/unit of competency, assessment criteria of course curricula, performance specifications, or product specifications.
<i>Assessment tools</i> may include:	<ul style="list-style-type: none"> • both the instrument and the procedures for gathering and interpreting evidence in accordance with designated assessment methods • instruments to be used for gathering evidence, such as: <ul style="list-style-type: none"> • profile of acceptable performance measures • templates and proformas • specific questions or activities • evidence and observation checklists • checklists for evaluating work samples • candidate self-assessment materials • procedures, information and instructions for the assessor and candidate relating to the use of assessment instruments and assessment conditions.
<i>Specialist support</i> may include:	<ul style="list-style-type: none"> • assistance by third party, such as carer or interpreter • support from specialist educator • provision of developed online assessment activities • support for remote or isolated candidates and assessors • support from subject matter or safety experts • advice from regulatory authorities • assessment teams and panels • support from lead assessors • advice from policy development experts.

RANGE STATEMENT	
<i>Assessment methods</i> include:	<ul style="list-style-type: none"> • particular techniques used to gather different types of evidence, such as: <ul style="list-style-type: none"> • direct observation • structured activities • oral or written questioning • portfolios of evidence • review of products • third-party feedback.
<i>Individual differences</i> may include:	<ul style="list-style-type: none"> • English language, literacy and numeracy barriers • physical impairment or disability • intellectual impairment or disability • medical condition that may impact on assessment, such as arthritis, epilepsy, diabetes and asthma • learning difficulties • mental or psychological disability • religious and spiritual observances • cultural images and perceptions • age • gender.
<i>Feedback</i> may include:	<ul style="list-style-type: none"> • ensuring assessment/RPL process is understood • ensuring candidate concerns are addressed • enabling questions and answers • confirming outcomes • identifying further evidence to be provided • discussing action plans • confirming gap training needed • providing information regarding available appeal processes • suggesting improvements in evidence gathering and presentation.
<i>Consultation</i> may involve:	<ul style="list-style-type: none"> • moderation with other assessors, or training and assessment coordinators • discussions with client, team leaders, managers, RPL coordinators, supervisors, coaches and mentors • technical and subject experts • English language, literacy and numeracy experts.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for validation	<p>1.1. Discuss and confirm the approach to validation according to defined purposes, context, and relevant <i>assessment system policies and procedures</i></p> <p>1.2. Analyse relevant <i>benchmarks for assessment</i> and agree on the evidence needed to demonstrate competence</p> <p>1.3. Arrange <i>materials</i> for <i>validation activities</i></p>
2. Contribute to validation process	<p>2.1. Demonstrate active <i>participation</i> in validation sessions and activities using appropriate communication skills</p> <p>2.2. Participate in validation sessions and activities by applying the principles of assessment and rules of evidence</p> <p>2.3. Check all documents used in the validation process for accuracy and version control</p>
3. Contribute to validation outcomes	<p>3.1. Collectively discuss validation findings to support improvements in the quality of assessment</p> <p>3.2. Discuss, agree and record recommendations to improve assessment practice</p> <p>3.3. Implement changes to own assessment practice, arising from validation</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- planning skills to participate in validation activities within agreed timeframes
- problem-solving skills to identify information that is inconsistent, ambiguous or contradictory
- evaluation skills to:
 - determine evidence requirements from competency standards
 - review assessment process, methods and tools
 - review collected evidence
- communication skills to share information in validation meetings

Required knowledge

- how to interpret competency standards and other related assessment information to determine the evidence needed to demonstrate competence, including:
 - criterion-referenced assessment as distinct from norm-referenced assessment
 - various reasons for carrying out validation and the different approaches to validation that may be appropriate before, during and after assessment
 - critical aspects of validation, including validation of assessment processes, methods and products
 - relevant OHS legislation, codes of practice, standards and guidelines, impacting on assessment
 - legal and ethical requirements of assessors, particularly in relation to validation activities
- principles of assessment
- rules of evidence

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> actively participate in a minimum of two validation sessions or meetings which, in combination, address the critical aspects of validation using different validation approaches and activities clearly explain purposes of validation and the legal and ethical responsibilities of assessors collate documentation relating to validation process in a logical manner demonstrate communication and liaison with relevant people provide feedback and interpret documentation in validation sessions record contribution to validation findings.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> assessment reports and records other documentation relevant to validation.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine focus of the assessment tool	<p>1.1. Identify target group of candidates, purposes of <i>assessment tool</i>, and <i>contexts</i> in which the tool will be used</p> <p>1.2. Access relevant <i>benchmarks for assessment</i> and interpret them to establish evidence required to demonstrate competence</p> <p>1.3. Identify, access and interpret <i>organisational, legal and ethical requirements</i> and relevant <i>contextualisation guidelines</i></p> <p>1.4. Identify other <i>related documentation</i> to inform assessment tool development</p>
2. Design assessment tool	<p>2.1. Select assessment methods that support the collection of defined evidence, taking into account the context in which the assessment will take place and meeting the principles of assessment</p> <p>2.2. Enable candidates to show or support their claim for recognition of current competency through selected assessment methods</p> <p>2.3. Consider different <i>assessment instruments</i> for the selected assessment methods to generate options for collection of evidence</p> <p>2.4. Consider how the assessment instruments will be administered</p>
3. Develop assessment tool	<p>3.1. Develop specific assessment instruments that address the evidence to be collected</p> <p>3.2. Define and document clear and specific <i>procedures</i> instructing assessor and candidate on the administration and use of the instruments</p> <p>3.3. Consider requirements of <i>assessment system policies and procedures</i> and address storage and retrieval needs, and review, evaluation and version control procedures as part of this process</p>
4. Review and trial assessment tool	<p>4.1. Check draft assessment tools against <i>evaluation criteria</i> and amend as required</p> <p>4.2. Trial assessment tools to validate content and applicability</p> <p>4.3. Collect and document feedback from relevant people involved in trialling</p> <p>4.4. Make amendments to final tool based on analysis of feedback</p>

ELEMENT	PERFORMANCE CRITERIA
	4.5. Appropriately format and file finalised assessment tool according to assessment system policies and procedures and organisational, legal and ethical requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- analysis and interpretation skills to review and evaluate assessment tools
- critical thinking skills to translate the interpreted competency standards and other relevant assessment information into meaningful assessment instruments
- design skills to develop different assessment tool designs
- research and evaluation skills to evaluate assessment tools on the basis of trials and feedback

Required knowledge

- principles of assessment and how they are applied when developing assessment tools
- different types and rules of evidence
- different assessment contexts and relationship to developing assessment tools
- components of competency and dimensions of competency
- contextualisation of competency standards and contextualisation guidelines
- Assessment Guidelines of training packages as relevant to developing assessment tools
- different assessment methods, their purposes and uses
- evaluation methodologies appropriate to the trial and review of assessment tools
- principles of reasonable adjustment
- relevant workplace information, including:
 - organisational policies and procedures
 - workplace tasks and activities
 - standard operating procedures
 - procedures for use of relevant personal protective equipment

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the ability to:

- develop assessment tools that support different assessment methods and address at least three units of competency packaged at different Australian Qualifications Framework (AQF) levels
- develop assessment tools that:
 - include the instruments for collecting evidence, reflecting the principles of assessment and the rules of evidence, and the related instructions to assessor/s and candidates
 - show how the contextual needs of different environments are addressed
- report on the trial and review of the assessment tools, including proposed changes.

Context of and specific resources for assessment

Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.

Assessment must ensure access to:

- training products, such as training packages and accredited course documentation.

Method of assessment

Guidance information for assessment

For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Assessment tool</i> includes:	<ul style="list-style-type: none"> instruments to be used for gathering evidence, including: <ul style="list-style-type: none"> profiles of acceptable performance measures templates and proformas specific questions or activities evidence and observation checklists checklists for the evaluation of work samples recognition portfolios candidate self-assessment materials procedures, information and instructions for the assessor or candidate relating to the use of assessment instruments and the conditions for assessment.
<i>Contexts</i> of assessment/RPL may include:	<ul style="list-style-type: none"> environment in which the assessment/RPL will be carried out, including real or simulated workplace opportunities for collecting evidence in a number of situations relationships between competency standards and evidence to support RPL who carries out the assessment/RPL relationships between competency standards and work activities in the candidate's workplace relationships between competency standards and learning activities.
<i>Benchmarks for assessment:</i>	<ul style="list-style-type: none"> refer to criteria against which the candidate is assessed which may be a unit of competency, assessment criteria of course curricula, performance specifications, or product specifications where the benchmark is one or more units of competency the standards may be contextualised to reflect the immediate operating environment.
<i>Organisational, legal and ethical requirements</i> may include:	<ul style="list-style-type: none"> assessment system policies and procedures industrial relations systems and processes, awards and enterprise agreements licensing and legal ramifications of assessing

RANGE STATEMENT

	<p>competence</p> <ul style="list-style-type: none"> • reporting, recording and retrieval systems for assessment • requirements of training, assessment and validation, including the AQTF Standards for Registered Training Organisations • human resource policies, procedures and legal requirements, including: <ul style="list-style-type: none"> • anti-discrimination • equal employment opportunity • job role, responsibilities and conditions • relevant industry codes of practice • confidentiality and privacy requirements of information relating to completed assessments • OHS considerations, including: <ul style="list-style-type: none"> • ensuring assessment methods and tools incorporate appropriate measures to maintain the health, safety and welfare of candidates • ensuring OHS requirements and specified benchmarks are accounted for within evidence requirements and assessment materials • identifying hazards and relevant risk control procedures associated with the assessment environment.
Contextualisation guidelines relate to:	<ul style="list-style-type: none"> • relevant training package or accredited course contextualisation guidelines.
Related documentation may include:	<ul style="list-style-type: none"> • requirements set out in the Assessment Guidelines of the relevant training packages • information from the competency standards about: <ul style="list-style-type: none"> • resources required for assessment • assessment context • appropriate assessment methods • assessment activities identified in accredited modules derived from the relevant competency standards • assessment activities in support materials related to the relevant competency standards • any requirements of OHS, legislation, codes of practice, standards and guidelines • indicators and levels of competence of the Australian Core Skills Framework • organisational requirements for demonstration of work

RANGE STATEMENT	
	<ul style="list-style-type: none"> performance product specifications.
<i>Assessment instrument</i> may be:	<ul style="list-style-type: none"> profiles of acceptable performance measures templates and proformas specific questions or activities evidence and observation checklists checklists for the evaluation of work samples recognition portfolios candidate self-assessment materials.
<i>Procedures</i> may include:	<ul style="list-style-type: none"> those that guide the application of the instruments, such as: <ul style="list-style-type: none"> instructions for the candidates instructions for administering the assessment tool, including resources needed to conduct assessment and the context for the use of tools guidance for development or review of decision-making process guidance on reasonable adjustments specified variations or restrictions on the tools rules for verifying assessment decisions OHS requirements, for example, identified hazards in the assessment environment and appropriate controls and reporting mechanisms information on access and equity considerations.
<i>Assessment system policies and procedures</i> may include:	<ul style="list-style-type: none"> assessment records, and data and information management recognition of current competency, RPL and credit arrangements assessor needs, qualifications and maintenance of currency assessment reporting procedures assessment appeals candidate grievances and complaints validation evaluation and internal audit costs and resourcing access and equity, and reasonable adjustment partnership arrangements links with human resource or industrial relations systems

RANGE STATEMENT	
	<ul style="list-style-type: none"> links with overall quality management system.
<i>Evaluation criteria</i> may include:	<ul style="list-style-type: none"> effectiveness and relevance to the competency standards whether assessment tool is appropriate to selected assessment methods whether assessment tool is appropriate to target group and assessment context appropriateness of language and literacy for intended audience.

Unit Sector(s)

Unit sector	Assessment

Competency field

Competency field	
------------------	--

Co-requisite units

Co-requisite units		

TAEDEL301A Provide work skill instruction

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.
------------------------	--

Application of the Unit

Application of the unit	This unit supports a wide range of applications across any workplace setting and so can be used by any organisation. Its use is not restricted to training organisations.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Organise instruction and demonstration	1.1. Gather information about <i>learner characteristics</i> and learning needs 1.2. Confirm a <i>safe learning environment</i> 1.3. Gather and check <i>instruction and demonstration objectives</i> and seek assistance if required 1.4. Access and review relevant <i>learning resources</i> and <i>learning materials</i> for suitability and relevance, and seek assistance to interpret the contextual application 1.5. Organise access to necessary equipment or physical resources required for instruction and demonstration 1.6. Notify learners of <i>details</i> regarding the implementation of the learning program and/or delivery plan
2. Conduct instruction and demonstration	2.1. Use interpersonal skills with learners to establish a safe and comfortable learning environment 2.2. Follow the learning program and/or delivery plan to cover all learning objectives 2.3. Brief learners on any <i>OHS procedures</i> and requirements prior to and during training 2.4. Use <i>delivery techniques</i> to structure, pace and enhance learning 2.5. Apply <i>coaching</i> techniques to assist learning 2.6. Use communication skills to provide information, instruct learners and demonstrate relevant work skills 2.7. Provide opportunities for practice during instruction and through work activities 2.8. Provide and discuss feedback on learner performance to support learning
3. Check training performance	3.1. Use <i>measures</i> to ensure learners are acquiring and can use new technical and generic skills and knowledge 3.2. Monitor learner progress and outcomes in consultation with learner 3.3. Review relationship between the trainer/coach and the learner and adjust to suit learner needs
4. Review personal training performance and finalise documentation	4.1. Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement 4.2. Maintain, store and secure learner records according

ELEMENT	PERFORMANCE CRITERIA
	to organisational and legal requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- verbal and non-verbal communication techniques, such as:
 - asking relevant and appropriate questions
 - providing explanations
 - demonstrating
 - using listening skills
 - providing information clearly
- safety skills to implement OHS requirements, by acting and responding safely in order to:
 - identify hazards
 - conduct prestart-up checks if required
 - observe and interpret learner behaviour that may put people at risk
- time-management, skills to:
 - ensure all learning objectives are covered
 - pace learning
- reflection skills in order to:
 - identify areas for improvement
 - maintain personal skill development
- literacy skills to:
 - complete and maintain documentation
 - read and follow learning programs and plans
 - read and analyse learner information
- technology skills to operate audio-visual and technical equipment
- interpersonal skills to:
 - engage, motivate and connect with learners
 - provide constructive feedback
 - maintain appropriate relationships
 - establish trust
 - use appropriate body language
 - maintain humour
 - demonstrate tolerance
 - manage a group
 - recognise and be sensitive to individual difference and diversity
- observation skills to:
 - monitor learner acquisition of new skills, knowledge and competency

REQUIRED SKILLS AND KNOWLEDGE

requirements

- assess learner communication and skills in interacting with others
- identify learner concerns
- recognise learner readiness to take on new skills and tasks

Required knowledge

- learner characteristics and needs
- content and requirements of the relevant learning program and/or delivery plan
- sources and availability of relevant learning resources and learning materials
- content of learning resources and learning materials
- training techniques that enhance learning and when to use them
- introductory knowledge of learning principles and learning styles
- key OHS issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • carry out a minimum of three training sessions, involving demonstrating and instructing particular work skills for different groups; with each session addressing: <ul style="list-style-type: none"> • different learning objectives • a range of techniques and effective communication skills appropriate to the audience.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Learner characteristics</i> may include:	<ul style="list-style-type: none"> • language, literacy and numeracy levels • learning styles • past learning and work experiences • specific needs • workplace culture.
<i>Safe learning environment</i> may include:	<ul style="list-style-type: none"> • exit requirements • personal protective equipment • safe access • safe use of equipment.
<i>Instruction and demonstration objectives</i> may include:	<ul style="list-style-type: none"> • competencies to be achieved • generic and technical skills, which may be: <ul style="list-style-type: none"> • provided by the organisation • developed by a colleague • individual or group objectives • learning outcomes.
<i>Learning resources</i> may include:	<ul style="list-style-type: none"> • any material used to support learning, such as: <ul style="list-style-type: none"> • learner and user guides • trainer and facilitator guides • example training programs • specific case studies • professional development materials • assessment materials • a variety of formats • those produced locally • those acquired from other sources.
<i>Learning materials</i> may include:	<ul style="list-style-type: none"> • handouts for learners • materials sourced from the workplace, e.g. workplace documentation, operating procedures, and specifications.
<i>Details</i> may include:	<ul style="list-style-type: none"> • location and time • outcomes of instruction or demonstration

RANGE STATEMENT	
	<ul style="list-style-type: none"> • reason for instruction or demonstration • who will be attending instruction session.
<i>OHS procedures</i> may include:	<ul style="list-style-type: none"> • emergency procedures • hazards and their means of control • incident reporting • use of personal protective equipment • safe work practices • safety briefings • site-specific safety rules.
<i>Delivery techniques</i> may include:	<ul style="list-style-type: none"> • coaching • demonstration • explanation • group or pair work • providing opportunities to practise skills and solve problems • questions and answers.
<i>Coaching</i> may include:	<ul style="list-style-type: none"> • learning arrangements requiring immediate interaction and feedback • on-the-job instruction and 'buddy' systems • relationships targeting enhanced performance • short-term learning arrangements • working on a one-to-one basis.
<i>Measures</i> may include:	<ul style="list-style-type: none"> • informal review or discussion • learner survey • on-the-job observation • review of peer coaching arrangements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Interpret learning environment and delivery requirements	1.1. Access, read and interpret learning program documentation to determine delivery requirements 1.2. Use available information and documentation to identify group and individual learner needs and learner characteristics 1.3. Identify and assess constraints and risks to delivery 1.4. Confirm personal role and responsibilities in planning and delivering training with relevant personnel
2. Prepare session plans	2.1. Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2. Develop session plans and document these for each segment of the learning program 2.3. Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1. Contextualise existing learning materials to meet the needs of the specific learner group 3.2. Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3. Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1. Conduct each session according to session plan, modified where appropriate to meet learner needs 4.2. Use the diversity of the group as another resource to support learning 4.3. Employ a range of delivery methods as training aids to optimise learner experiences 4.4. Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1. Monitor and document learner progress to ensure outcomes are being achieved and individual learner needs are being met 5.2. Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3. Manage inappropriate behaviour to ensure learning can take place 5.4. Maintain and store learner records according to

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- presentation skills to ensure delivery is engaging and relevant, including:
 - synthesising information and ideas
 - preparing equipment, such as data projectors and computer presentation applications
 - speaking with appropriate tone and pitch
 - using language appropriate to audience
 - encouraging and dealing appropriately with questions
- group facilitation skills to ensure that:
 - every individual has an opportunity for participation and input
 - group cohesion is maintained
 - behaviour that puts others at risk is observed, interpreted and addressed
 - discussion and group interaction are enhanced
- conflict resolution and negotiation skills to:
 - identify critical points, issues, concerns and problems
 - identify options for changing behaviours
- oral communication and language skills to:
 - motivate learners to transfer skills and knowledge
 - engage with the learner
- interpersonal skills to maintain appropriate relationships and ensure inclusivity
- observation skills to monitor individual and group progress

Required knowledge

- introductory knowledge of learning theories
- sound knowledge of learning principles
- sound knowledge of learner styles
- industry area and subject matter of the delivery
- learner group profile, including characteristics and needs of individual learners in the group
- content and requirements of the learning program and/or delivery plan
- different delivery methods and techniques appropriate to face-to-face group delivery
- techniques for the recognition and resolution of inappropriate behaviours
- behaviours in learners that may indicate learner difficulties
- organisational record-management systems and reporting requirements
- evaluation and revision techniques

REQUIRED SKILLS AND KNOWLEDGE

- specific resources, equipment and support services available for learners with special needs
- relevant policy, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the vocational education and training sector
- OHS relating to the facilitation of group-based learning, including:
 - assessment and risk control measures
 - reporting requirements for hazards
 - safe use and maintenance of relevant equipment
 - emergency procedures
 - sources of OHS information
 - role of key workplace persons
- policies and procedures relevant to the learning environment

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. Arrange of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • facilitate group-based learning by preparing and delivering a series of training sessions, including: <ul style="list-style-type: none"> • at least two consecutive sessions, of a duration commensurate with a substantive training session (e.g. 40-60 minutes), that follow one of the learning program designs • at least one session delivered to a different learner group, with evidence of how the characteristics and needs of this group were addressed • identify and respond to diversity and individual needs • access and use documented resources and support personnel to guide inclusive practices.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Learning program documentation</i> may include:	<ul style="list-style-type: none"> • competencies or other benchmarks to be achieved • for each chunk or segment of the learning program: <ul style="list-style-type: none"> • specific learning outcomes derived from the benchmarks • overview of content to be covered • learning resources, learning materials and activities • delivery methods • number and duration of training sessions or classes required, and overall timelines • OHS issues to be addressed in delivery • identification of assessment points to measure learner progress • assessment methods and tools to be used to collect evidence of competency, where assessment is required.
<i>Session plans</i> may include:	<ul style="list-style-type: none"> • outline of objectives and content to be addressed • plan of delivery methods and learning activities to be used within the session • timelines and duration for each learning activity • formative assessment points and opportunities • learning materials required.
<i>Inappropriate behaviour</i> may include:	<ul style="list-style-type: none"> • violent or inappropriate language • verbal or physical abuse or bullying • insensitive verbal or physical behaviour towards other learners or the trainer/facilitator, including cultural, racial, disability or gender-based insensitivities • dominant or overbearing behaviour • disruptive behaviour • non-compliance with safety instructions.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish effective work environment for learning	1.1. Establish and agree upon objectives and scope of the work-based learning 1.2. Analyse work practices and routines to determine their effectiveness in meeting established learning objectives 1.3. Identify and address <i>OHS implications</i> of using work as the basis for learning
2. Develop a work-based learning pathway	2.1. Address <i>contractual requirements</i> and responsibilities for learning at work 2.2. Arrange for integration and monitoring of external learning activities with the <i>work-based learning pathway</i> 2.3. Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1. Identify context for learning and individual's learning style 3.2. Select appropriate technique or process to facilitate learning and explain the basis of the technique to learner 3.3. Develop, document and discuss <i>individualised learning plan</i> with learner 3.4. Access, read and interpret documentation outlining the OHS responsibilities of the various parties in the learning environment 3.5. Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement work-based learning pathway	4.1. Sequence introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.2. Explain objectives of work-based learning and the processes involved to learner 4.3. Encourage learner to take responsibility for learning and to self-reflect 4.4. Develop techniques that facilitate learner's transfer of skills and knowledge
5. Maintain and develop the learning/facilitation	5.1. Prepare for each session 5.2. Structure learning activities to support and reinforce new learning, build on strengths, and identify areas

ELEMENT	PERFORMANCE CRITERIA
relationship	<p>for further development</p> <p>5.3.Observe learner cues and change approaches where necessary to maintain momentum</p> <p>5.4.Practise <i>ethical behaviour</i> at all times</p> <p>5.5.Monitor effectiveness of the learning/facilitation relationship through regular meetings between the parties</p>
6. Close and evaluate the learning/facilitation relationship	<p>6.1.Carry out the closure smoothly, using appropriate interpersonal and communication skills</p> <p>6.2.Seek feedback from learner on the outcomes achieved and value of the relationship</p> <p>6.3.Evaluate and document process, including <i>impact, self evaluation and reflection</i>, and file according to legal and organisational requirements</p>
7. Monitor and review the effectiveness of the work-based learning pathway	<p>7.1.Document work performance and learning achievement and keep records according to organisational requirements</p> <p>7.2.Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used</p> <p>7.3.Recommend improvements to work-based practice in light of the review process</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- oral communication and language skills to:
 - motivate the learner
 - transfer skills and knowledge
- interpersonal skills to maintain appropriate relationships
- observation skills to monitor individual progress
- literacy skills to:
 - read and interpret organisational documents, legal documents and contracts
 - complete and maintain documentation
- organisational skills to provide guidance and feedback to individuals
- communication skills, including:
 - using effective verbal and non-verbal language
 - using critical listening and questioning techniques
 - giving constructive and supportive feedback
 - assisting learners to paraphrase advice or instructions back to the trainer/facilitator
 - providing clear and concrete options and advice
 - using appropriate industry/profession terminology and language
 - ensuring language, literacy and numeracy used is appropriate to learners

Required knowledge

- systems, processes and practices within the organisation where work-based learning is taking place
- operational demands of the work and impact of changes on work roles
- organisational work culture, including industrial relations environment
- systems for identifying skill needs
- introductory knowledge of different learning styles and how to encourage learning in each, for example:
 - visual learners
 - audio learners
 - kinaesthetic learners
 - theoretical learners
- relevant policy, legislation, codes of practice and national standards that may affect training and assessment in the vocational education and training sector
- OHS relating to the work role, including:
 - hazards relating to the industry and specific workplace

REQUIRED SKILLS AND KNOWLEDGE
<ul style="list-style-type: none">• reporting requirements for hazards and incidents• specific procedures for work tasks• safe use and maintenance of relevant equipment• emergency procedures• sources of OHS information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • prepare and facilitate work-based learning • provide evidence of a minimum of two examples of developing work-based learning pathways, that include: <ul style="list-style-type: none"> • identifying needs for learning • analysing work practices, work environment and work activities • organising and allocating work in a way that reflects learning needs and provides effective learning opportunities through work processes • provide a minimum of two examples of a learning facilitation relationship being conducted: <ul style="list-style-type: none"> • with different individuals • demonstrating communication skills and flexibility • demonstrating one or more of the processes or techniques identified.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to information about work activities.</p>
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>OHS implications</i> may include:	<ul style="list-style-type: none"> • OHS obligations • workplace OHS policies and procedures • ensuring work practices, routines and proposed changes do not pose a risk to learners and others.
<i>Contractual requirements</i> may include:	<ul style="list-style-type: none"> • training plans under apprenticeships/traineeships • requirements of government-funded training programs, such as Workplace English Language and Literacy (WELL).
<i>Work-based learning pathway</i> may include:	<ul style="list-style-type: none"> • identifying specific goals for work-based learning • identifying job tasks or activities to be included in learning process • appropriate sequencing of job tasks/activities to reflect learner incremental development • direct guidance and modelling from experienced co-workers and experts • opportunities for practice.
<i>Individualised learning plan</i> may include:	<ul style="list-style-type: none"> • information about individual's learning style, learner characteristics, and the context for learning • clear boundaries and expectations of the learning/facilitation relationship • documented equity or additional support needs for the learner • performance benchmarks to be achieved • activities and processes which together will achieve the benchmarks.
<i>Ethical behaviour</i> includes:	<ul style="list-style-type: none"> • trust • integrity • privacy and confidentiality of the session • following organisational policies • knowing own limitations • having a range of other intervention referrals ready when needed • honesty

RANGE STATEMENT	
	<ul style="list-style-type: none"> • fairness to others.
Impact may be:	<ul style="list-style-type: none"> • successful achievement, rate of achievement, or lack of achievement of identified goals • achievement of other outcomes as a result of the relationship • development of new goals • new or increased motivation to learn • greater capacity to learn • increase in learner's self-confidence.
Self-evaluation and reflection may include:	<ul style="list-style-type: none"> • asking critical questions about: <ul style="list-style-type: none"> • own ability • what worked or didn't work • how the relationship building process could be improved • reviewing records and journals on sessions and critically evaluating own performance • reviewing feedback from learner and identifying critical aspects and areas for improvement.

Unit Sector(s)

Unit sector	Delivery and facilitation
--------------------	---------------------------

Competency field

Competency field	
-------------------------	--

Co-requisite units

Co-requisite units		

TAEDES401A Design and develop learning programs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine the design, outline the content and review its effectiveness.
------------------------	---

Application of the Unit

Application of the unit	This unit typically applies to a trainer or facilitator who designs or develops learning programs. A learning program can be discrete, providing a planned learning approach that relates to specific learning and training needs, or it may form part of the learning design for a qualification.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Define parameters of the learning program	1.1. Clarify <i>purpose</i> and type of learning program with key stakeholders 1.2. Access and confirm the competency standards and <i>other training specifications</i> on which to base the learning program 1.3. Identify language, literacy and numeracy requirements of the program 1.4. Identify and consider characteristics of the target learner group
2. Work within the vocational education and training (VET) policy framework	2.1. Access relevant <i>VET policies</i> and frameworks, and apply to work practices 2.2. Identify changes to training packages and accredited courses and apply these to program development 2.3. Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1. Research, develop and document specific subject matter content according to agreed design options 3.2. Evaluate existing learning resources for content relevance and quality 3.3. Specify assessment requirements of the learning program
4. Design structure of the learning program	4.1. Break the learning content into manageable segments and document timeframe for each segment 4.2. Determine and confirm <i>delivery strategies</i> and required assessment methods and tools 4.3. Document complete learning program in line with organisational requirements 4.4. Review complete program with key stakeholders and adjust as required 4.5. Ensure a safe learning progression by analysing risks in the learning environment and including a risk control plan

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- organisational skills to ensure resources are available and suitable
- evaluation skills to determine the time required for each learning segment and the overall timelines of the learning program
- cognitive skills to develop the learning program content and design its structure
- language and literacy skills to read and interpret a range of documentation, including technical and subject matter documents, references and texts

Required knowledge

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- distinction and relationship between a training package/accredited course, learning strategy and learning program, where linked
- different purposes and focus of learning programs
- sound knowledge of learning principles
- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials and pre-developed learning activities
- methodology relating to developing and documenting new learning activities and related learning materials
- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation that may affect training and assessment in the VET sector
- relevant OHS knowledge relating to the work role, and OHS considerations that need to be included in the learning program

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • design, develop and review learning programs within the VET context • prepare and develop a minimum of two learning programs: <ul style="list-style-type: none"> • that contain differentiated learning program designs to reflect particular needs, contexts and timelines • at least one of which must be based on competency standards or accredited courses and must cover at least one entire unit of competency or accredited course module.
Context of and specific resources for assessment	Evidence must be gathered in the workplace whenever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Purpose</i> may include:	<ul style="list-style-type: none"> • developing vocational competency or vocational skills • developing language, literacy and numeracy skills • developing general education • meeting legislative, licensing and registration requirements, such as OHS requirements.
<i>Other training specifications</i> may include:	<ul style="list-style-type: none"> • curriculum specifications • product specifications • organisational work requirements and training needs • induction needs • language, literacy and numeracy development needs • regulatory and licensing requirements.
<i>Vocational education and training policies</i> may include:	<ul style="list-style-type: none"> • policies and procedures set by national organisations, such as the National Quality Council • Australian Quality Training Framework • other relevant policies.
<i>Delivery strategies</i> may include:	<ul style="list-style-type: none"> • focus of delivery in terms of size and type of group • context of delivery, for example: <ul style="list-style-type: none"> • in the workplace • in a training room • in a community setting • mode of delivery, for example: <ul style="list-style-type: none"> • face-to-face • online • blended delivery mode • delivery methods, for example: <ul style="list-style-type: none"> • lock-step, learner-paced and mixed • interactive, participative and collaborative • blended delivery methods.

Co-requisite units		

TAEDS402A Use training packages and accredited courses to meet client needs

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to use training packages and accredited courses as tools to support industry, organisation and individual competency development needs.
------------------------	---

Application of the Unit

Application of the unit	This unit typically applies to a person working in or with training and/or assessment organisations as an entry-level trainer, teacher, facilitator or assessor. It assumes that the person is working from a pre-defined training product, such as a training package or accredited course, and applying that product to meet client needs.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Select appropriate training package or accredited course	1.1. Confirm training and/or assessment needs of <i>client</i> 1.2. Identify and source training packages and/or accredited courses which could satisfy client needs 1.3. Use training products in line with the <i>training and assessment organisation's quality assurance policies</i> and procedures
2. Analyse and interpret the qualifications framework	2.1. Read and interpret qualification rules 2.2. Review and determine applicable licensing requirements and prerequisites 2.3. Determine suitable electives that meet client needs and job roles
3. Analyse and interpret units of competency and accredited modules	3.1. Select individual unit or accredited module to meet client needs 3.2. Read, analyse and interpret all parts of the unit or accredited module for application to client needs 3.3. Analyse links between unit and/or accredited module to develop effective applications for the client 3.4. Document analysis of unit or accredited module in a clear and accessible manner
4. Contextualise units and modules for client applications	4.1. Use information from the client to <i>contextualise the unit</i> or accredited module to meet client needs 4.2. Use advice on contextualisation produced by the training package developer or course developer to meet client needs
5. Analyse and interpret assessment guidance	5.1. Read, analyse and apply the assessment guidance of the relevant training package or accredited course 5.2. Determine any special requirements for assessment or reasonable adjustment to suit client needs

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to collaborate with others in using training products
- planning skills to develop a structure for a particular application of training packages and accredited courses
- cognitive skills to analyse, interpret and apply the various components of selected training packages and accredited courses
- research skills to analyse and interpret training package and accredited course content to meet client needs

Required knowledge

- Australian Qualifications Framework (AQF) guidelines, including characteristics of AQF qualification levels
- functions and responsibilities of training package developers and course accreditation agencies, and their roles as key vocational education and training (VET) organisations
- dimensions of competency
- format and structure of accredited courses
- format and structure of competency standards
- function of training packages and accredited curriculum as benchmarks in a competency-based VET training and assessment system
- methodology relating to analysing and using competency standards for a range of applications and purposes to meet the needs of a diverse range of VET clients
- language and terminology used in training packages and accredited courses
- parts of training packages that can be contextualised and parts that cannot
- structure of training packages and the role and purpose of each endorsed component
- sources of training package information

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> analyse a training package and or accredited course to examine its component parts, identify relevant units of competency or modules, and contextualise those to meet a specific client need demonstrate a minimum of two examples of analysing training specifications, including at least one training package; the other may be another training package or an accredited course that meets a specific client need.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> training products, such as training packages and accredited course documentation.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Client</i> may include:	<ul style="list-style-type: none"> individual learners candidates for assessment organisations or enterprises with specific training needs.
<i>Training and assessment organisation</i> may include:	<ul style="list-style-type: none"> registered training organisation (RTO) organisation working in a partnership arrangement with an RTO to provide recognised training and assessment services organisation that provides non-recognised training and assessment services.
<i>Quality assurance policies</i> may include:	<ul style="list-style-type: none"> Australian Quality Training Framework requirements as they apply to RTOs organisational internal quality policies and procedures.
<i>Contextualising units:</i>	<ul style="list-style-type: none"> means linking the requirements of the competency standard to the work environment of a particular client or client group may include: <ul style="list-style-type: none"> identifying specific types of tools and equipment relevant to the competency identifying specific organisational policies, procedures, processes and forms relevant to the competency linking organisation-specific terminology to the competency identifying specific people relevant to the competency.

TAELLN401A Address adult language, literacy and numeracy skills

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to recognise the core language, literacy and numeracy (LLN) demands of training and assessment, and to tailor training and assessment to suit individual skill levels, including accessing relevant support resources.
------------------------	--

Application of the Unit

Application of the unit	This unit introduces trainers and assessors to core language, literacy and numeracy issues in training and assessment practice. Competence in this unit does not indicate that a person is a qualified specialist adult language, literacy or numeracy practitioner.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine the core LLN requirements of the training	<p>1.1.Determine <i>core LLN skill</i> requirements of the <i>training specification</i></p> <p>1.2.Determine core LLN requirements of the <i>training context</i></p> <p>1.3.Use <i>validated tools</i> and other sources of information to determine existing core LLN skills of learners</p>
2. Access specialist learning support	<p>2.1.Determine the need for <i>specialist core LLN assistance</i> for the learner, based on evidence collected</p> <p>2.2.Apply appropriate strategies for collaboration with specialist language, literacy and numeracy practitioners</p>
3. Customise program to develop core LLN skills	<p>3.1.Select and customise or develop learning and assessment materials that are appropriate to core LLN skills of training specification, training context and learners</p> <p>3.2.Apply <i>learning support strategies</i> to assist learners to develop required core LLN skills</p> <p>3.3.Continuously monitor and evaluate approaches to determine areas for improvement</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- language, literacy and numeracy skills to:
 - deliver effective training and assessment
 - analyse and apply the Australian Core Skills Framework (ACSF) at a level appropriate to the outcomes of the unit
 - make judgements about the LLN requirements of learner skill levels and training
 - communicate with other professionals about LLN requirements
 - liaise with personnel, including managers or supervisors, from the training and/or assessment organisation
 - liaise with appropriate external authorities
 - interpret a wide range of documents
- self-management and organisational skills to meet the LLN requirements of learners
- interpersonal skills to:
 - encourage learner development
 - demonstrate sensitivity to cultural issues

Required knowledge

- definitions of core LLN skills, according to the ACSF
- methodology for determining skill levels using the ACSF
- national policy on the integration of LLN into training package competencies
- legislation and codes of practice, for example:
 - equal opportunity legislation
 - privacy legislation
 - organisational requirements
- OHS relating to the work role, including:
 - reporting requirements for hazards
 - emergency procedures
 - safe use and maintenance of equipment
 - sources of OHS information
 - OHS obligations of employers and employees, including supervisors

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • address core LLN issues in training and assessment practice on at least two different occasions • provide evidence that includes: <ul style="list-style-type: none"> • documentation setting out activities, resources and individual learning plans for a particular learner • third-party observations of the candidate with a range of learners • documentation of the use of the ACSF to determine LLN level.
Context of and specific resources for assessment	<p>Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.</p> <p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> • specialist LLN practitioners for consultation and verification of approaches • tools based on the ACSF levels • training package support materials.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Core LLN skills</i> include:	<ul style="list-style-type: none"> • core skills, as described by the ACSF • range of learning, reading, writing, oral communication and numeracy skills required to participate in work and the wider community.
<i>Training specification</i> may include:	<ul style="list-style-type: none"> • training package units of competency • learning outcomes from accredited courses with a vocational outcome • non-accredited industry specific learning programs.
<i>Training context</i> describes:	<ul style="list-style-type: none"> • environment in which the training takes place, which may include: <ul style="list-style-type: none"> • work setting • community setting • training organisation.
<i>Validated tools</i> to ascertain LLN levels include:	<ul style="list-style-type: none"> • tools based on the ACSF • information gained from an LLN specialist, including results from prior assessment.
<i>Specialist core LLN assistance</i> can include:	<ul style="list-style-type: none"> • specialist in-house support services • Workplace English Language and Literacy (WELL) program support • specialist consultants • team teaching approaches • mentoring • government and community support services.
<i>Learning support strategies</i> can include:	<ul style="list-style-type: none"> • demonstrating LLN practices to be learned in a workplace context • using plain English appropriate for the learner • using audio recording of texts • using video and/or audio material to support the training • providing simplified explanations of underpinning principles and concepts • providing explanations and examples of text types • ensuring that decision-making responsibilities are shared

RANGE STATEMENT

	<p>with learners</p> <ul style="list-style-type: none"> • encouraging use of learners' personal word lists and dictionaries • mentoring in a learning situation • acknowledging and building on strengths of learners • providing opportunities to discuss, attach importance to, and build on different culturally-based behaviours and values.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Research sustainability skill requirements of an industry area	1.1. Identify sustainability issues and practices in relation to a <i>specific industry</i> area 1.2. Investigate current and emerging practices in relation to sustainability in the specific industry area 1.3. Evaluate various approaches to building these into training practice and processes 1.4. Identify specialist sustainability practitioners and seek advice as required
2. Determine sustainability skills relevant to training	2.1. Analyse and document relevant <i>sustainability skills</i> in the <i>training specification</i> 2.2. Identify <i>potential or implicit sustainability skills</i> in the training specification 2.3. Document these skills as part of the learning and assessment strategy
3. Customise program to incorporate sustainability skills	3.1. Select and customise or develop learning and assessment materials linked to the required sustainability skills and appropriate for the training specification and training context 3.2. Document customised program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - make judgements about the sustainability skill requirements of training
 - communicate with other professionals about sustainability skill requirements
 - liaise with personnel, including managers and supervisors, from the training and assessment organisation
 - analyse a wide range of documents
- self-management and organisational skills to analyse and apply sustainability skills to learning programs
- research skills to analyse training specifications and determine embedded, explicit and implicit sustainability skills

Required knowledge

- definitions of sustainability and different contexts in which a variety of definitions can be used
- training package contents, including industry-specific approaches to identifying sustainability skills within them
- national policy on sustainability, including specific policy in relation to the development of sustainability skills in the vocational education and training sector
- legislation, codes of practice and associated requirements, such as:
 - environmental legislation
 - equal employment opportunity legislation
 - privacy legislation
 - organisational requirements
- OHS relating to the work role, including:
 - reporting requirements for hazards
 - sources of OHS information
 - OHS obligations of employers and employees, including supervisors

Evidence Guide

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must address the scope of this unit and reflect all components of the unit. A range of appropriate assessment methods and evidence-gathering techniques must be used to determine competency. A judgement of competency should only be made when the assessor is confident that the required outcomes of the unit have been achieved and that consistent performance has been demonstrated.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> • identify sustainability skill issues in at least two different training products • provide documentation setting out training products and learning strategies that incorporate sustainability skills • provide outlines of how those sustainability skills are to be incorporated into training and assessment approaches.
Context of and specific resources for assessment	Evidence must be gathered in the workplace wherever possible. Where no workplace is available, a simulated workplace must be provided.
Method of assessment	
Guidance information for assessment	For further information about assessment of this and other TAE units, refer to relevant implementation guidance published on the IBSA website (www.ibsa.org.au).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Specific industry</i> means:	<ul style="list-style-type: none"> a specific industry area or sector area in which the candidate usually trains or assesses.
<i>Sustainability skills</i> include:	<ul style="list-style-type: none"> technical skills, knowledge, values and attitudes needed in the workforce to develop and support sustainable social, economic and environmental outcomes in business, industry and the community, as defined in the National Green Skills Agreement December 2009.
<i>Training specification</i> may include:	<ul style="list-style-type: none"> training package units of competency learning outcomes from accredited courses with a vocational outcome non-accredited industry specific learning programs.
<i>Potential or implicit sustainability skills</i> may include:	<ul style="list-style-type: none"> areas of the training specification where the achievement of the performance criteria has an implied sustainable or green skills context (e.g. increasing fuel efficiency in a performance criteria related to effective use of powered equipment).

Co-requisite units		

TLIA1007C Coordinate goods to bond premises

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to coordinate goods to bond premises in accordance with regulatory and workplace requirements including identifying and listing goods for bonding, arranging transfer of goods to bond store, and preparing and issuing bond lists.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning coordination of goods to bond premises.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the coordination of goods to bond premises as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify and list goods for bonding	<ul style="list-style-type: none">1.1 Goods are listed for bonding when not delivered or collected on completion of agreed storage period1.2 Prior to listing for bonding, inspection is arranged with the Australian Customs Service for goods identified as surplus1.3 Goods left after time advertised for collection are listed for bonding in accordance with workplace policy and Australian Customs Service requirements
2 Arrange transfer of goods to bond store	<ul style="list-style-type: none">2.1 Arrangements for the transfer of goods to bond store are made in accordance with regulatory requirements and workplace procedures2.2 Carrier is notified of storage or yard location, marks and quantity
3 Prepare and issue bond list	<ul style="list-style-type: none">3.1 Bond list is prepared in accordance with workplace requirements and Australian Customs Service regulations3.2 Bond list, endorsed with the relevant information, is issued to carrier

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the coordination of goods to bond premises

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the coordination of goods to bond premises

Focus of operation of work systems, equipment, management and site operating systems for coordination of goods to bond premises

Problems that may occur when coordinating goods to bond premises and appropriate action that can be taken to resolve the problems

Required skills:

Communicate effectively with others when coordinating the delivery of goods to bond premises

Read and comprehend simple statements in English

Read and interpret instructions, procedures and labels relevant to the coordination of goods to bond premises

Complete documentation when coordinating the delivery of goods to bond premises

Work collaboratively with others when coordinating the delivery of goods to bond premises

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems when coordinating the delivery of goods to bond premises in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events when coordinating the delivery of goods to bond premises

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or

damage to goods or equipment

Select and use relevant communications, computing and office equipment when coordinating goods to bond premises

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials
Consultative processes may involve:	other employees and supervisors suppliers, customers and clients bond store representatives relevant authorities and institutions management and union representatives industrial relations and OH&S specialists other maintenance, professional or technical staff
Communication in the work area may include:	phone electronic data interchange (EDI) fax email internet radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used,	company procedures

workplace procedures may include:	enterprise procedures organisational procedures established procedures
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios high visibility clothing
Information/documents may include:	workplace procedures and policies for the coordination of goods to bond store premises supplier and/or client instructions goods identification numbers and codes manifests, bar codes, goods and container identification/serial number agents delivery order and agents program customers clearance quarantine clearance point of MT return/hand-over agreement continuing permission single transaction permissions chief clerks MT delivery program gate pass/VMO clearance stamped bulk run numbers manufacturers specifications for equipment dangerous goods declarations and material safety data sheets (where applicable) relevant legislation, regulations and related documentation including ADG / IMDG Code award, enterprise bargaining agreement, other industrial arrangements relevant Australian standards and certification requirements quality assurance procedures emergency procedures
Applicable regulations and legislation may	relevant codes and regulations pertaining to

include:

the coordination of goods to bond premises

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

IATA Dangerous Goods by Air regulations

Australian and International Explosives Codes

licence, patent or copyright arrangements

water and road use and licence arrangements

export/import/quarantine/bond requirements

marine orders

relevant state/territory OH&S and environmental protection legislation

workplace relations regulations

workers compensation regulations

Unit Sector(s)

Competency Field

A - Handling Cargo/Stock

TLIA107C Secure cargo

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to secure cargo including preparing to secure cargo/containers, lashing and unlash cargo, protecting cargo from weather, and packing and unpacking cargo. It may apply in cargo securing contexts in the stevedoring, transport, distribution and allied industries.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the securing of cargo.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the securing of cargo as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare to secure cargo/containers	<ul style="list-style-type: none">1.1 Work area is prepared and maintained in accordance with the national standards, safety codes and site operating procedures1.2 Unsafe work practices and/or equipment are reported to appropriate personnel1.3 Appropriate protective clothing, equipment and fittings are selected1.4 Formwork is erected where no lashing points exist1.5 Lashing plan is read and interpreted
2 Lash and unlash cargo	<ul style="list-style-type: none">2.1 Work is conducted in accordance with industry standards, statutory requirements, safety codes, site operating requirements and any special requirements of the cargo2.2 Lashing points are identified and appropriate fittings and lashing equipment are used for each lashing point2.3 Cargo is lashed and secured to lashing points ensuring the correct spread of lashings and that lashings are secured, attached and tensioned2.4 Tensioners are securely fastened2.5 When unlashings, fittings are released, disconnected and removed from the cargo2.6 Lashing equipment is placed in designated storage areas or cleared from work area2.7 Lashing/unlashing operations ensure no injury to personnel or damage to machinery or cargo2.8 Lashing is completed in accordance with lashing plan

- 3 **Protect cargo from weather**
 - 3.1 Cargo is covered/uncovered safely ensuring appropriate covering and lashing, no injury to personnel or damage to cargo or equipment
 - 3.2 Work is conducted in accordance with the requirements of national standards, safety codes and site operating procedures
- 4 **Pack and unpack cargo**
 - 4.1 Damaged cargo is identified and reported following enterprise procedures
 - 4.2 Cargo is sorted and stacked prior to packing or after unpacking, ensuring the stack is in the correct location, in accordance with national standards, safety codes, and site operating procedures
 - 4.3 Cargo is identified through the interpretation of marks or numbers
 - 4.4 Tight stow of cargo is maintained
 - 4.5 Cargo is handled ensuring no injury to personnel or damage to cargo or equipment

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Procedures for managing and controlling hazardous situations when carrying out work activities

The marking and numbering systems for cargo

Problems that may occur when securing cargo or freight and appropriate action that can be taken to resolve the problems

Focus of operation of work systems, equipment, management and site operating systems for the securing of cargo or freight

Workplace procedures and policies for the securing of cargo or freight

Australian and international standards, codes and regulations relevant to the securing of cargo or freight including the Australian and International Dangerous Goods Codes

Relevant bond, quarantine or other legislative requirements

Relevant handling and safety codes

Relevant OH&S and environmental procedures and regulations

Required skills:

Communicate effectively with others when securing cargo or freight

Read and interpret instructions, procedures, information and labels relevant to securing cargo or freight

Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels

Interpret and follow operational instructions and prioritise work

Receive, acknowledge and send messages with available communications equipment

Complete documentation related to the securing of cargo or freight

Work collaboratively with others when securing cargo or freight

Adapt appropriately to cultural differences in the workplace, including modes of behaviour

and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify, select and use relevant equipment, processes and procedures when securing cargo or freight

Operate and adapt to differences in cargo handling equipment in accordance with standard operating procedures

Use the lashing and protection equipment

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise :	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments at height in a workbox or workcage
Cargo may include:	goods with specialist requirements, including temperature controlled goods and dangerous goods
Lashing equipment for containers may include:	twistlocks pelican hooks lashing rods (bars) turn handles (keys) bottle screws bridging clamps cones
Securing equipment may include:	chocks racks lashings ropes chains
Covers may include:	rain and dust covers
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances

	movements of equipment, goods and materials
Personnel in work area may include:	workplace personnel site visitors contractors official representatives
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios protective clothing high visibility clothing full arrest safety harness
Communication in the work area may include:	phone radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Information/documents may include:	goods identification numbers and codes manifests, bar codes, and container identification/serial number Australian and international codes of practice and regulations relevant to the securing of cargo Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances operations manuals, job specifications and induction documentation manufacturers specifications for equipment workplace procedures and policies

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Select materials and pack and unwrap products	<ul style="list-style-type: none">1.1 Packaging specifications and order packaging documentation are correctly interpreted1.2 Appropriate packaging technology suitable for the goods to be packed is selected1.3 Packaging materials are identified and matched to specifications1.4 Work plan ensures materials are used economically and that appropriate packaging is used that minimises loss and damage in transit or storage1.5 Work is planned in accordance with OH&S requirements1.6 Completed packed goods are stacked to minimise damage from within and outside
2 Label packaged products/loads	<ul style="list-style-type: none">2.1 Workplace labelling standards are identified2.2 Appropriate goods handling, labelling and other identification symbols are utilised2.3 Invoices and picking slips are attached (where required)2.4 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the packaging of goods including the Australian Dangerous Goods Code (ADG Code)

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the packaging of goods

Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods

Problems that may occur when packaging goods and appropriate action that can be taken to resolve the problems

Documentation requirements for the packaging of goods

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when packaging goods

Read and interpret instructions, procedures and labels relevant to the packaging of goods

Complete documentation related to work activities when packaging goods

Work collaboratively with others when packaging goods

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when packaging goods in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may occur when packaging goods

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of equipment when packaging goods

Check operation of packaging equipment in terms of service schedule and standard operating procedures

Select and use relevant communications, computing equipment and materials when packaging goods

Estimate the size, shape and special requirements of goods and loads

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify workplace procedures and documentation requirements for the receipt of goods	1.1 Workplace procedures for receipt of goods are identified
	1.2 Purpose of documents associated with the receipt of goods is interpreted
	1.3 Workplace documentation requirements for the receipt of goods and reporting of damage are identified
2 Check and inspect goods on arrival and complete workplace documentation	2.1 Procedures for checking of goods in comparison with orders or manifests are identified and followed
	2.2 Discrepancies and/or damaged goods are reported
	2.3 Non-conforming goods are appropriately documented and despatched or stored in accordance with company procedures
3 Unload, unpack and store stock	3.1 Appropriate manual handling techniques and equipment are identified
	3.2 Safe work procedures are used when unloading, unpacking and storing stock
	3.3 Advice on appropriate storage locations and requirements for particular products is sought
	3.4 Goods are unloaded and unpacked in accordance with workplace procedures
	3.5 Assistance from others is sought when required to maintain safe and effective work
	3.6 Directions are followed to store stock in appropriate areas

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the receiving of goods including the ADG Code and relevant bond, quarantine or other legislative requirements

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the receiving of goods

Focus of operation of work systems, equipment, management and site operating systems for the receiving of goods

Problems that may occur when receiving goods and appropriate action that can be taken to resolve the problems

Specifications and standards for the checking and inspection of received goods

Documentation requirements for the receiving of goods

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when receiving goods

Read and comprehend simple statements in English

Read and interpret instructions, procedures, information, labels and signs relevant to receiving goods

Complete documentation related to the receipt of goods

Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels

Work collaboratively with others when receiving goods

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems when receiving goods in accordance

with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events when receiving goods

Apply precautions and required action to minimise, control or eliminate hazards that may exist when receiving goods

TLIA1407C Use product knowledge to complete work operations

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements including identifying products in a subsection of a warehouse or other storage area, examining quality and reporting on products, and using inventory and labelling systems to identify and locate products.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the identification, handling and storage of various categories of products/stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the handling and storage of various types of products/stock as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify products in a subsection of a warehouse or other storage area	<ul style="list-style-type: none">1.1 Products are identified against specified criteria in accordance with workplace procedures1.2 Storage and handling characteristics are identified and applied consistently1.3 Products are described to internal customers identifying features which may affect location, safety or storage requirements
2 Examine quality and report on products	<ul style="list-style-type: none">2.1 Products are inspected in accordance with workplace quality assurance procedures2.2 Workplace procedures are followed to replace, return or dispose of stock/products which are not useable2.3 Non-conforming products are recorded/reported in accordance with workplace procedures
3 Use inventory and labelling systems to identify and locate products	<ul style="list-style-type: none">3.1 Inventory and labelling systems are used to locate products within the workplace3.2 Goods are physically located and identified

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes and regulations relevant to the products being identified, handled, transported, stacked and/or stored as part of work operations

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the identification, handling, stacking and storage of particular categories of products

Focus of operation of work systems, equipment, management and site operating systems for the packaging of goods

Categories or groups of products and the special handling, stacking and storage requirements for each

Purpose and use of cataloguing and labelling systems

Strategies to seek out sources of knowledge of products and use this information to inform work

Types of equipment and storage areas appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods

Documentation requirements including reports and records concerning damaged or contaminated goods

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when handling, transporting and storing products and providing information on products and services

Read and comprehend simple statements in English

Read and interpret instructions, procedures, information and signs relevant to the handling, transporting and storing of products and the provision of information on products and services

Identify containers and goods coding, ADG and IMDG markings and where applicable

emergency information panels

Complete documentation related to work activities

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Adapt to differences in products and services in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Select and use relevant communications, computing and load handling equipment

Estimate the size, shape and special requirements of goods and loads

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external

Labelling systems may include:	batch code
	bar code
	identification numbering systems
	serial numbers
	symbols for safe handling
	ADG and HAZCHEM Codes
Communication in the work area may include:	phone
	electronic data interchange (EDI)
	fax
	email
	internet
	RF systems
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Personal protective equipment may include:	gloves

	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Consultative processes may involve:	other employees and supervisors
	suppliers, customers and clients
	relevant authorities and institutions
	management and union representatives
	industrial relations and OH&S specialists
	other maintenance, professional or technical staff
Hazards in the work area may include:	chemicals
	dangerous or hazardous substances
	movements of equipment, goods and materials
	oil or water on floor
	a fire or explosion
	damaged packaging or pallets
	debris on floor
	faulty racking
	poorly stacked pallets
	faulty equipment
Information/documents may include:	goods identification numbers and codes
	manifests, picking slips, merchandise transfers, stock requisitions and bar codes
	codes of practice and regulations relevant to the identification, handling and stacking of goods
	Australian and international regulations and codes of practice for the handling, stacking and transport of dangerous goods and hazardous substances
	operations manuals, job specifications and induction documentation
	manufacturers specifications for equipment

workplace procedures and policies
supplier and/or client instructions
dangerous goods declarations and material
safety data sheets (where applicable)
award, enterprise bargaining agreement,
other industrial arrangements
relevant Australian standards and
certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may
include:

relevant codes and regulations for the
packaging of goods
Australian and international regulations and
codes of practice for the handling and
transport of dangerous goods and hazardous
substances, including:

Australian and International Dangerous
Goods Codes

Australian and International Explosives
Codes

licence, patent or copyright arrangements
water and road use and licence arrangements
export/import/quarantine/bond requirements
marine orders
relevant state/territory OH&S and
environmental protection legislation
workplace relations regulations
workers compensation regulations

Unit Sector(s)

Competency Field

A - Handling Cargo/Stock

TLIA1507C Complete receival/despatch documentation

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to complete receival/despatch documentation in accordance with regulatory and workplace requirements including analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the completion of receival/despatch documentation.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the completion of receival/despatch documentation as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Analyse order to identify work requirements to fill order	<ul style="list-style-type: none">1.1 Order request documentation is interpreted1.2 Product(s) in order are noted and workplace location(s) are identified1.3 Workplace and product knowledge is used to organise documentation1.4 Required schedules for order movement are identified and noted where required1.5 Special aspects of the order such as dangerous/hazardous goods or temperature controlled goods are identified and information on required documentation procedures and relevant regulatory requirements is identified, accessed and interpreted
2 Follow workplace order documentation processes	<ul style="list-style-type: none">2.1 Workplace procedures for documentation of an order are identified2.2 Workplace documentation is completed in accordance with workplace procedures and any relevant regulatory requirements
3 Finalise documentation	<ul style="list-style-type: none">3.1 Order is checked against schedule and order form3.2 Workplace records are completed, and labels and appropriate documentation are attached in accordance with workplace procedures and any relevant regulatory requirements3.3 Special transportation requirements are identified and conveyed to appropriate personnel3.4 Where applicable, all required documentation requirements for dangerous goods and hazardous materials are completed in accordance with the relevant regulations and codes

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the completion of receival/despatch documentation, including the ADG Code and relevant bond, quarantine or other legislative requirements

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the completion of receival/despatch documentation

Focus of operation of work systems, equipment, management and site operating systems for the receiving and despatch of goods

Problems that may occur when completing receival and despatch documentation and appropriate action that can be taken to resolve the problems

Specifications and standards for the checking and inspection of received and despatched goods

Documentation requirements for the receipt and despatch of goods

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when completing receival and despatch documentation

Read and interpret instructions, procedures and labels relevant to the completion of receival and despatch documentation

Complete receival and despatch documentation

Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels

Work collaboratively with others when completing receival and despatch documentation

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems when completing receipt and despatch documentation in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and use relevant computer, communication and office equipment when completing receipt and despatch documentation

Estimate the size, shape and special requirements of goods and loads

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Received/despatched goods may involve:	special handling and storage requirements, including temperature controlled goods, dangerous goods, explosives and hazardous substances
Problems that may occur when receiving/despatching goods include:	damaged stock damaged pallets or packaging wrong stock error in paperwork poorly stacked stock incorrect quantity
Aspects of goods to be checked when receiving/despatching goods may include:	correct type number condition quality packaging labelling dangerous goods declarations and marking (where applicable)
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and

	materials
	oil or water on floor
	a fire or explosion
	damaged packaging or pallets
	debris on floor
	poorly stacked pallets
	faulty equipment
Consultative processes may involve:	other employees and supervisors
	suppliers, customers and clients
	drivers and agents
	relevant authorities and institutions
	management and union representatives
	industrial relations and OH&S specialists
	other maintenance, professional or technical staff
Communication in the work area may include:	phone
	electronic data interchange (EDI)
	fax
	email
	internet
	RF systems
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Information/documents may include:	goods identification numbers and codes
	manifests, picking slips, merchandise

transfers, stock requisitions and bar codes
codes of practice and regulations relevant to
the receiving of goods

Australian and international regulations and
codes of practice for the handling and
transport of dangerous goods and hazardous
substances

operations manuals, job specifications and
induction documentation

manufacturers specifications for equipment
workplace procedures and policies

supplier and/or client instructions

dangerous goods declarations and material
safety data sheets (where applicable)

award, enterprise bargaining agreement,
other industrial arrangements

relevant Australian standards and
certification requirements

quality assurance procedures

emergency procedures

Applicable regulations and legislation may
include:

relevant codes and regulations for the
receiving of goods

Australian and international regulations and
codes of practice for the handling and
transport of dangerous goods and hazardous
substances, including:

Australian and International Dangerous
Goods Codes

Australian Marine Orders and the
International Maritime Dangerous Goods
Code

IATA Dangerous Goods by Air Regulations

Australian and international explosives codes

licence, patent or copyright arrangements

water and road use and licence arrangements

export/import/quarantine/bond requirements

marine orders

relevant state/territory OH&S and
environmental protection legislation
workplace relations regulations
workers compensation regulations

Unit Sector(s)

Not applicable.

Competency Field

A - Handling Cargo/Stock

TLIA1707C Apply product knowledge to organise work operations

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to apply product knowledge to the organisation of work operations including identifying and categorising products, matching products to locations based on specified criteria, and assisting individuals to solve stock identification and location problems.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the identification, handling and storage of various categories of products/stock.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant regulatory requirements to the organisation of work operations in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify and categorise products	1.1 Products are identified and categorised in terms of specified criteria in accordance with workplace procedures
2 Match products to locations based on specified criteria	2.1 Locations for products are determined based on specified criteria 2.2 Labels, inventory systems and other information sources are used to assist in the identification of products, handling and storage requirements
3 Assist individuals to solve stock identification and location problems	3.1 New stock items are identified and particular product information is brought to the attention of relevant personnel 3.2 Stock queries are predicted and team members assisted to locate and assimilate information relevant to these products 3.3 Personnel are assisted with routine and non-routine stock enquiries with actions taken to update information of products for relevant personnel 3.4 Personnel are encouraged to maintain and build product knowledge through accessing product information and the application of problem solving and information analysis skills
4 Identify appropriate transfer and handling requirements	4.1 Resources used to transfer different products through the storage zones are identified and evaluated 4.2 Work in receipt and despatch areas is supported by identification and reporting of variances 4.3 Stock re-ordering is informed by knowledge of product source, frequency of pick destination (or seasonality) of products and potential for supply problems 4.4 Relevant documentation is completed in accordance with workplace procedures

5 Contribute to continuous improvement

- 5.1 Knowledge of customer requirements is used to determine work design
- 5.2 Potential problems are predicted and notified to appropriate personnel
- 5.3 Opportunities for improvements to own work organisation are identified

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes and regulations relevant to the workplace activities

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies relevant to the application of product knowledge to the organisation of workplace operations

Focus of operation of work systems, equipment, management and site operating systems

Information on various categories or groups of products including their key characteristics and hazards and the special handling, stacking and storage requirements for each

Product sources, destinations and potential problems

Re-ordering procedures and just-in-time planning principles

Requirements for workplace documentation, inventory systems and records

Sources of product information

Strategies to seek out sources of knowledge of products and use this information to inform work

Types of equipment and storage areas appropriate for different types of goods including perishable, fragile, dangerous, composition/state goods

Documentation requirements including reports and records concerning damaged or contaminated goods

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when organising workplace activities

Access, read and interpret product information, policies and regulatory requirements relevant to workplace operations

Complete documentation related to the organisation of work activities

Work collaboratively with others when organising workplace activities

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when organising workplace activities in accordance with regulatory requirements and workplace procedures

Use information on products/stock to determine, plan and organise processes used for receipt, storage, goods movement, despatch, stock levels, re-ordering processes

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in products and services in accordance with standard operating procedures

Organise and monitor the use of personal protective equipment conforming to industry and OH&S standards

Select and use relevant communication, computing and office equipment when organising workplace activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Workplace activities being organised may include but are not limited to:	receival storage goods/stock movement despatch stock levels re-ordering processes
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Goods may involve:	special handling, location, storage and/or packaging requirements, including temperature controlled goods and dangerous goods
Modes of transfer may be:	manual or motorised
Storage types may include but are not limited to:	bin/binning systems rack refrigeration/freezers/cold rooms marked floor space containers racks and racking systems block/stacks pallets
Inventory systems may be:	automated manual

	paper-based
	computerised
	microfiche
Categories or groups of products/stock may include:	small parts
	perishable goods
	overseas export
	dangerous goods
	refrigerated products
	temperature controlled stock
	fragile goods
The characteristics of products/stock may include:	small parts
	toxicity
	flammability
	form
	weight
	size
	state
	perishability
	fragility
	security risk
Labelling systems may include but are not limited to:	batch code

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Participate in stock rotation activities	<ul style="list-style-type: none">1.1 Stock levels are counted against appropriate documentation1.2 Stock levels are recorded and reported1.3 Stocks are replenished, adjusted or rotated following workplace procedures1.4 Stock re-ordering processes are activated when appropriate1.5 Routine and non-routine problems with products or storage systems are reported following workplace procedures
2 Interpret and fill replenishment request	<ul style="list-style-type: none">2.1 Order request documentation is interpreted2.2 Product(s) in order noted and workplace location(s) are identified2.3 Workplace and product knowledge is used to plan sequence of work2.4 Appropriate materials handling equipment is selected in accordance with workplace procedures and timeframes and OH&S regulations2.5 Required schedules for order movement and despatch or storage are identified
3 Complete stock replenishment	<ul style="list-style-type: none">3.1 Products are sorted, assembled and consolidated in the appropriate storage areas3.2 Work is checked in accordance with company procedures3.3 Documentation and records are completed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes and regulations relevant to the replenishment of stock

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the replenishment of stock

Focus of operation of work systems, equipment, management and site operating systems for the replenishment of stock

Principles of operation and functions of stock control systems

Computer records and documentation requirements for the replenishment of stock

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when replenishing stock

Read and comprehend simple statements in English

Read and interpret instructions, procedures and labels relevant to the replenishment of stock

Complete documentation related to the replenishment of stock

Work collaboratively with others when replenishing stock

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when replenishing stock in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or

damage to goods or equipment

Operate and adapt to differences in stock and equipment in accordance with standard operating procedures

Select and use relevant communications, computing and office equipment when replenishing stock

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international standards, codes of practice and regulations relevant to the maintenance of container and cargo records including the Australian and International Dangerous Goods Codes

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the maintenance of container and cargo records

Focus of operation of work systems, equipment, management and site operating systems for the maintenance of container and cargo records

Problems that may occur when maintaining container and cargo records and appropriate action that can be taken to resolve the problems

Relevant handling and safety codes

Site layout and location of reefer units

The marking and numbering systems for cargo

Relevant bond, quarantine or other legislative requirements

Required skills:

Communicate effectively with others when maintaining container and cargo records

Receive, acknowledge and send messages with available communications equipment

Read and interpret instructions, procedures, information and labels relevant to the maintenance of container and cargo records

Interpret and follow operational instructions and prioritise work when maintaining container and cargo records

Identify cargo, container and goods, coding, ADG / IMDG markings and where applicable emergency information panels

Work collaboratively with others when maintaining container and cargo records

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems when maintaining container and cargo records in accordance with regulatory requirements and workplace procedures

Estimate size, shape and special requirements of loads

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Containers/cargo may include:	goods with specialist requirements, including reefer units and containers/cargo containing temperature controlled goods and/or dangerous goods
Information recorded during daily monitoring of reefers may include:	temperatures water meter readings any faults in the operation of the reefer
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods, materials and vehicular traffic
Personnel in work area may include:	workplace personnel site visitors contractors official representatives
Communication in the work area may include:	phone fax email electronic data transfer (EDI) RF systems radio

	oral, aural or signed communications
Personal protective equipment may include:	<ul style="list-style-type: none">glovessafety headwear and footwearsafety glassestwo-way radiosprotective clothinghigh visibility clothing
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	<ul style="list-style-type: none">company proceduresenterprise proceduresorganisational proceduresestablished procedures
Information/documents may include:	<ul style="list-style-type: none">goods identification numbers and codesmanifests, bar codes, and container identification/serial numberAustralian and international codes of practice and regulations relevant to the maintenance of container/cargo recordsAustralian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substancesoperations manuals, job specifications and induction documentationmanufacturers specifications for equipmentworkplace procedures and policiessupplier and/or client instructionsdangerous goods declarations and material safety data sheets (where applicable)award, enterprise bargaining agreement, other industrial arrangementsrelevant Australian standards and certification requirementsquality assurance proceduresemergency procedures
Applicable regulations and legislation may include:	<ul style="list-style-type: none">relevant codes and regulations for the maintenance of container/cargo records

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

IATA Dangerous Goods by Air regulations

Australian and International Explosives Codes

licence, patent or copyright arrangements
water and road use and licence arrangements
export/import/quarantine/bond requirements
marine orders

relevant Australian standards and certification requirements

Competency Field

A - Handling Cargo/Stock

TLIA2207C Participate in stocktakes

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to participate in stocktakes in accordance with workplace requirements including preparing for stocktakes, conducting stocktakes, counting stock, identifying stock discrepancies, and completing all required documentation.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the conduct of a stocktake.

Work is performed under some supervision generally within a team environment. It involves the application of product knowledge and an understanding of relevant workplace procedures and regulatory requirements when participating in stocktakes as part of work activities in the warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for stocktake	<ul style="list-style-type: none">1.1 Goods to be counted and appropriate inventory systems are identified1.2 Required resources including equipment and record keeping systems are identified1.3 Allocated tasks, zones and work requirements are identified1.4 Sequence work role is planned in a time effective manner
2 Stocktake and count stock	<ul style="list-style-type: none">2.1 Stocktaking and cyclical counts are undertaken in accordance with enterprise policies and procedures2.2 Inventory data is interpreted2.3 Inventory data is confirmed to match stock2.4 Stock levels are accurately counted and documented
3 Identify stock discrepancies	<ul style="list-style-type: none">3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented3.2 Products stored in inappropriate storage locations are relocated and stock records adjusted
4 Complete documentation	<ul style="list-style-type: none">4.1 Inventory data is reconciled to match warehouse stock in accordance with company procedures4.2 Workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes and regulations relevant to the conduct of stocktakes

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the conduct of stocktakes

Focus of operation of work systems, equipment, management and site operating systems for the conduct of stocktakes

Workplace processes for records management and the production of stocktake reports

Principles of operation and functions of stocktake systems

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when conducting stocktakes

Read and comprehend simple statements in English

Read and interpret instructions, procedures and labels relevant to the conduct of stocktakes

Complete documentation related to the conduct of stocktakes

Work collaboratively with others when conducting stocktakes

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when conducting stocktakes in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and

environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use relevant communication, computing and office equipment when conducting stocktakes

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify goods requiring temperature control	<ul style="list-style-type: none">1.1 Goods requiring temperature control are identified1.2 Temperature for short- term and long-term storage is selected to match product type1.3 Upper and lower limits for temperature control are identified1.4 Storage separations and co-storage applications are identified for products
2 Monitor temperature	<ul style="list-style-type: none">2.1 Appropriate methods for determining temperature of goods are identified2.2 Storage areas are monitored for temperatures within range for products2.3 Products are monitored to ensure compliance with temperature storage requirements2.4 Short-term storage times are identified for transit goods
3 Identify and rectify problems	<ul style="list-style-type: none">3.1 Implications of incorrect temperature are identified3.2 Damaged goods are identified and appropriate action is undertaken in accordance with enterprise procedures3.3 Causes of out-of-temperature range are identified3.4 Appropriate personnel are notified for problem rectification3.5 Goods handling procedures for maintenance of temperature control are identified and implemented

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes and regulations relevant to the regulation of temperature controlled stock

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the regulation of temperature controlled stock

Focus of operation of work systems, equipment, management and site operating systems for the regulation of temperature controlled stock

Special handling, stacking and storage requirements for temperature controlled stock

Procedures for pre-cooling and snap freezing

Problems that can occur when regulating temperature controlled stock and appropriate action that can be taken

Hazards when regulating and working with temperature controlled stock and appropriate action to control the risks involved

Documentation requirements including reports and records concerning damaged or contaminated goods

Housekeeping standards procedures required in the workplace

Site layout

Required skills:

Communicate effectively with others when regulating temperature controlled stock

Read and comprehend simple statements in English

Read and interpret instructions, procedures and labels relevant to the regulation of temperature controlled stock

Complete documentation related to the regulation of temperature controlled stock

Operate electronic communication equipment to required protocol

Work collaboratively with others when regulating temperature controlled stock

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions when regulating temperature controlled stock in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events when regulating temperature controlled stock

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in stock and equipment in accordance with standard operating procedures

Select and use relevant equipment, processes and procedures

Check refrigeration equipment operation in terms of maintenance schedule and standard operating procedures

Select and implement corrective actions to maintain temperature levels

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites short -term and/or long-term temperature controlled areas
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Procedures for pre-cooling and snap freezing may include:	automated spraying with liquid nitrogen immersion in a very cold refrigerant freezing in moving air at less than -30oC plate freezer with very low refrigerant temperatures
Hazards in the work area may include:	contamination of, or from, materials being handled noise, light, energy sources service lines spills, leakages, ruptures cold pipes and chilling equipment dangerous or hazardous substances movements of equipment, goods and materials dust/vapours oil, water or ice on floor a fire or explosion damaged packaging or pallets

	debris on floor
	faulty racking
	poorly stacked pallets
	faulty equipment
Hazard management is consistent with:	the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Requirements for work may include:	site restrictions and procedures
	use of safety and personal protective equipment
	communications equipment
	specialised lifting and/or handling equipment
	incident/accident breakdown procedures
	additional gear and equipment
	noise restrictions
	hours of operations
	authorities and permits
Communication in the work area may include:	phone
	electronic data interchange (EDI)
	fax
	email
	internet
	radio
	RF systems
	oral, aural or signed communications
Consultative processes may involve:	other employees and supervisors
	suppliers, customers and clients
	relevant authorities and institutions
	management and union representatives
	industrial relations and OH&S specialists
	other maintenance, professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Personal protective equipment may include:

- gloves and protective clothing
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Information/documents may include:

- goods identification numbers and codes
- manifests, picking slips, merchandise transfers, stock requisitions and bar codes
- codes of practice and regulations relevant to the identification, handling and stacking of goods
- operations manuals, job specifications and induction documentation
- manufacturers specifications for equipment
- workplace procedures and policies
- supplier and/or client instructions
- award, enterprise bargaining agreement, other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant codes and regulations for the regulation of temperature controlled goods
- relevant state/territory OH&S and environmental protection legislation
- water and road use and licence arrangements
- export/import/quarantine/bond requirements
- workplace relations regulations
- workers compensation regulations

Unit Sector(s)

Competency Field

A - Handling Cargo/Stock

TLIA3007C Organise cargo for export

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to organise the export of cargo including confirming correct preparation of the consignment, organising the loading of the cargo and processing the documentation.

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice and regulations for the export of cargo.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

Work involves the application of routine freight forwarding principles and procedures to organise cargo for export.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Confirm correct preparation of consignment	<ul style="list-style-type: none">1.1 Consignment is checked to ensure that cargo is consistent with packing specification and is suitable for the type and method of transport1.2 Consignment is checked to ensure that labelling and marking of cargo conforms with domestic and international regulations and workplace requirements and that the packaging of cargo conforms to regulatory requirements and is appropriate for the method of transport1.3 Cargo is checked for dangerous goods or explosives and it is confirmed that, where applicable, packaging and labelling conform with the Australian and International Dangerous Goods or Explosives Codes1.4 Discrepancies in the composition or preparation of the cargo are noted and action is undertaken in accordance with workplace procedures
2 Organise the loading of cargo	<ul style="list-style-type: none">2.1 Handling methods and equipment are selected which are suitable for the goods and transport method2.2 Goods transfer methods between modes of transport are selected where appropriate2.3 Procedures for the loading of cargo are organised in accordance with good practice requirements2.4 Established industry practice is followed in the organisation of the loading of cargo2.5 Employees, equipment and temporary storage areas (if required) are allocated and supervised2.6 Individuals are informed of work requirements, timelines and relevant personal protective equipment2.7 Work processes are monitored to ensure that resources, both human and equipment, are maintained at productive levels and within OH&S

requirements

3 Process documentation

- 3.1 All relevant documentation is consolidated and checked for completion
- 3.2 Dangerous goods declaration is obtained from consignor (if necessary)
- 3.3 Discrepancies in documentation are identified and action is undertaken in accordance with workplace procedures
- 3.4 Documents are filed/stored/forwarded in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Codes of practice and legislative requirements including local and international regulations relevant to the export of cargo

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances

Relevant OH&S and environmental procedures and regulations

Interpretation of client requirements

Procedures for the identification and evaluation of information needed to organise the export of cargo

Procedures for the calculation of weights, volumes and dimensions

Procedures for the reviewing of transport options and availability of carriers

Procedures for liaising with Australian and international contacts

Procedures for batching, dating and numbering

Procedures for the completion of consignment documentation

Problems that may occur when organising the export of cargo and appropriate action that can be taken

Contacts and sources of information/documentation needed when organising the export of cargo

Customer service policies and procedures

Required skills:

Communicate effectively with others when organising the export of cargo

Read and interpret instructions, procedures, information, labels and other documents relevant to the organisation of the export of cargo

Complete documentation related to the organisation of the export of cargo

Work collaboratively with others when organising the export of cargo

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when organising the export of cargo in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may arise when organising the export of cargo

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in cargo and systems in accordance with standard operating procedures

Select and use relevant communications equipment when organising the export of cargo

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Organisation of the cargo for export may include:	movement of equipment, goods, materials and vehicular traffic
Customers may be:	internal or external
Operations may be conducted:	by day or night
Cargo to be exported may include:	dangerous, hazardous, perishable, fragile, packaged goods or in liquid or solid form
Forms of documentation for the export of cargo may include:	packing specifications and lists manifests invoices
Transport modes may include:	air, sea or combinations
Requirements for work may include:	site restrictions and procedures use of safety and personal protective equipment communications equipment specialised lifting and/or handling equipment incident/accident breakdown procedures authorities and permits hours of operations noise restrictions additional gear and equipment
Hazards may include:	hazardous or dangerous materials contamination of, or from, materials being handled noise, light, energy sources stationary and moving machinery, parts or components dust/vapours spills, leakages, ruptures

	service lines
Hazard management is consistent with:	the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Established industry practice when planning procedures for the loading of cargo includes:	<p>available space is used efficiently</p> <p>goods are packed for ease of inspection and to meet delivery and customer requirements</p> <p>goods are secured ensuring no damage to contents</p> <p>weight and volume of consolidated cargo conforms to specifications</p> <p>dangerous goods are labelled in accordance with Australian and International Dangerous Goods Codes</p> <p>dangerous goods are packaged and labelled in accordance with their class and subsidiary risk</p>
Consultative processes may involve:	<p>other employees and supervisors</p> <p>suppliers, potential customers and clients</p> <p>relevant authorities and institutions</p> <p>management and union representatives</p> <p>industrial relations and OH&S specialists</p> <p>other maintenance, professional or technical staff</p>
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	<p>company procedures</p> <p>enterprise procedures</p> <p>organisational procedures</p> <p>established procedures</p>
Information/documentation may include:	<p>Australian and international codes of practice and regulations relevant to export of cargo</p> <p>Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances</p> <p>operations manuals, job specifications and</p>

procedures and induction documentation
Safe Working Limits (SWL) and Working Load Limits (WLL) of transport options
workplace operating procedures and policies
supplier and/or client instructions
Australian and international standards, criteria and certification requirements
communications technology equipment, oral, aural or signed communications
quality assurance procedures
emergency procedures
relevant competency standards and training materials

Applicable procedures and codes may include:

relevant codes and regulations for the export of cargo

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

IATA Dangerous Goods by Air regulations

Australian and International Explosives Codes

relevant international and Australian state/territory road rules and transport regulations

relevant Australian and international standards and certification requirements

international transport regulations, codes and procedures

relevant state/territory OH&S legislation

relevant state/territory environmental protection legislation

Unit Sector(s)

Not applicable.

Competency Field

A - Handling Cargo/Stock

TLIA3107C Consolidate freight

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to consolidate freight including assessing the scope to consolidate freight, combining or consolidating multiple shipments of products into higher volume shipments, and the related preparation of consignment documentation.

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice and regulations for the carriage of freight.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes.

Work involves the application of routine principles and procedures to efficiently and effectively combine and consolidate freight prior to shipment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess scope to consolidate freight	<ul style="list-style-type: none">1.1 Capacity and capability of different transport modes available to the organisation are assessed against proposed task1.2 Individual consignment loads are evaluated to identify relevant information needed to combine or consolidate freight1.3 Information is analysed to determine where opportunities for freight consolidation exist1.4 Packaging requirements for consolidated cargo conform to regulatory requirements1.5 Procedures for the loading of cargo are planned in accordance with established industry practice and Australian Dangerous Goods (ADG) Code1.6 Volumes and dimensions of proposed consolidation are calculated1.7 Proposed consolidation is matched against operational capacity and capability of carrier
2 Prepare consignment documentation	<ul style="list-style-type: none">2.1 Consignment documentation is prepared for consolidated cargo2.2 Labelling and marking requirements of cargo are documented in accordance with domestic and international regulations, ADG Code and workplace requirements2.3 Consignment documentation is completed and filed/stored in accordance with workplace procedures including dangerous goods declaration, where applicable2.4 Freight is consolidated taking into account segregation requirements for dangerous goods, if applicable

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant codes of practice and legislative requirements including local and international freight regulations

Relevant OH&S and environmental procedures and regulations

Procedures for the calculation of volumes and dimensions

Procedures for the identification and evaluation of information needed to facilitate the consolidation of freight

Procedures for planning the loading of freight

Procedures for the completion of consignment documentation

Problems that may occur when consolidating freight and appropriate action that can be taken

Sources of information and documentation needed when consolidating freight

Customer service policies and procedures

Required skills:

Communicate effectively with others when consolidating freight

Read and interpret instructions, procedures, information and labels relevant to the consolidation of freight

Complete documentation related to the consolidation of freight

Operate electronic communication equipment to required protocol

Work collaboratively with others when consolidating freight

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur during the consolidation of freight in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may occur during the consolidation of freight

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in freight and equipment in accordance with standard operating procedures

Select and use required computer and communication equipment when consolidating freight

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Consolidation of freight may include:	<ul style="list-style-type: none">mixed products from multiple areas for shipment to a single customerthe consolidation of smaller shipments
Requirements for work may include:	<ul style="list-style-type: none">freight forwarding protocols and procedurescommunications equipmentworkplace operationsauthorities and permitshours of operationrelevant regulations

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan transport operations	<ul style="list-style-type: none">1.1 Knowledge of product to be freighted and workplace procedures are applied to the analysis of the transportation process1.2 Domestic and international regulations, codes and procedures for the transport of freight are identified1.3 Resources including manual handling equipment, employees competencies, storage areas, goods management equipment and transportation equipment are identified to match the task1.4 Work processes are planned to meet agreed timelines1.5 Types of transportation required for the freight or goods is identified to match customer requirements, freight type and delivery time1.6 Multiple transport modes are identified where applicable1.7 Goods transfer methods between modes of transport are selected where appropriate
2 Organise the transport of freight	<ul style="list-style-type: none">2.1 Employees, equipment and temporary storage areas (if required) are allocated and supervised2.2 Freight is secured ensuring no damage to contents2.3 Handling methods suitable to the goods and transport method are selected2.4 Individuals are informed of work requirements and timelines2.5 Work processes are monitored to ensure that resources, both human and equipment, are maintained at productive levels and according to workplace and OH&S requirements2.6 Discrepancies in freight are noted and action undertaken in accordance with workplace procedures

3 Complete organisational process

- 3.1 Monitoring processes to track the movement of freight are implemented
- 3.2 Reporting requirements are communicated to appropriate personnel
- 3.3 Workplace documents and records are checked for completion and are filed/stored in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Codes of practice and legislative requirements relevant to the organisation of the transport of freight and goods

Relevant OH&S and environmental procedures and regulations

Procedures for the calculation/estimation of weight, volumes and dimensions

Procedures for the identification and evaluation of information needed to facilitate the transport of freight

Procedures for assessing storage and transport requirements and options

Procedures for electing transport/storage equipment and systems

Procedures for organising any required permits

Procedures for coordinating the transfer and storage of goods including multi-modal transport

Procedures for the completion of transport documentation

Problems that may occur when organising the transport of freight and goods and appropriate action that can be taken

Sources of information and documentation needed when organising the transport of freight and goods

Customer service policies and procedures

Required skills:

Communicate effectively with others when organising the transport of freight and goods

Read and interpret instructions, procedures and labels relevant to the organisation of the transport of freight and goods

Interpret and follow operational instructions and prioritise work

Complete documentation related to the organisation of the transport of freight and goods

Work collaboratively with others when organising the transport of freight and goods

Establish effective working relationships with colleagues and clients

Plan own work including prioritisation of work activities, predicting consequences and identifying improvements

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise during the organisation of the transport of freight and goods in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and use communication, computers and systems required for the organisation of the transport of freight and goods

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Confirm customer requirements	<ul style="list-style-type: none">1.1 Customer requirements for the movement of cargo in terms of the nature of goods, the countries of origin and destination, the timescales for collection and delivery and the estimated budget for the transaction are confirmed1.2 Customer priorities for the shipment are confirmed1.3 Decisions on possible routes, taking into account known variables, are undertaken
2 Organise freight arrangements	<ul style="list-style-type: none">2.1 International regulations, codes of practice for the transport of freight are confirmed2.2 Work processes are planned to meet agreed timelines2.3 Transport modes (including multi-modal options) are matched to customer requirements, freight type and delivery times2.4 Availability of selected carrier(s) is checked including modes of transport, scheduled departure dates and times, transfer times and costs for each stage of shipment2.5 Arrangements are made to consolidate freight, where appropriate2.6 Freight carrier(s) booking(s) are confirmed2.7 Transport of freight to selected international carrier is organised
3 Communicate with shipping agents and authorities	<ul style="list-style-type: none">3.1 Freight documentation is checked for accuracy and forwarded as appropriate to shipping agents and authorities3.2 Confirmation of despatch of freight from international carrier is obtained3.3 Arrival of cargo at port of entry is confirmed3.4 Acceptance of freight documentation is confirmed

- 3.5 Payments are authorised
- 3.6 Cargo is on-forwarded from point of entry, where required
- 3.7 Customer is advised that freight has been forwarded to point of destination

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant codes of practice and legislative requirements including local and international freight regulations

Relevant OH&S and environmental procedures and regulations

Procedures for the interpretation of client requirements

Procedures for the identification and evaluation of information needed to organise the international transport of freight

Procedures for calculating volumes and dimensions

Procedures for reviewing transport options and availability of carriers

Procedures for liaising with Australian and international contacts using appropriate technology

Procedures for completing consignment documentation

Problems that may occur when organising the international transport of freight and appropriate action that can be taken

Contacts and sources of information/documentation needed when organising the international transport of freight

Customer service policies and procedures

Required skills:

Communicate effectively with others when organising the international transport of freight

Read and interpret instructions, procedures and labels relevant to the international transport of freight

Complete documentation related to the organisation of the international transport of freight

Work collaboratively with others when organising the international transport of freight

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when organising the international transport of freight in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Use relevant communication and computer equipment and systems when organising the international transport of freight

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Organisational activities may cover movement of:

- equipment
- goods
- materials
- various forms of freight transport

Requirements for work may include:

- freight forwarding protocols and procedures
- communications equipment
- workplace operations
- authorities and permits
- hours of operation
- relevant regulations

Information needed to organise the international transport of freight may include:

- type, capacity and compatibility of cargo
- agreed delivery times and routing schedules
- pick-up and drop-off points
- specified carrier/mode of transport
- agreed cost structure

Forms of transport may include:

- road
- rail
- sea
- air
- local courier

Consultative processes may involve:

- international and domestic agents, suppliers and clients
- relevant authorities and institutions
- other employees and supervisors
- management
- OH&S specialists
- other professional or technical staff

Communications systems may involve:

- telephone

	fax
	email
	electronic data transfer of information
	mail
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Documentation/records may include:	Australian and international codes of practice and regulations relevant to the international transport of freight
	operations manuals, job specifications and procedures and induction documentation
	Safe Working Limits (SWL) and Working Load Limits (WLL) of transport options
	workplace operating procedures and policies
	supplier and/or client instructions
	Australian and International standards, criteria and certification requirements
	communications technology equipment, oral, aural or signed communications
	quality assurance procedures
	emergency procedures
	relevant competency standards and training materials
Applicable procedures and codes may include:	regulations and codes of practice for the international transport of freight
	Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	Australian and international dangerous goods codes
	Australian Marine Orders and the International Maritime Dangerous Goods Code
	IATA Dangerous Goods by Air regulations

Australian and International Explosives Codes

relevant regulations for the import and export of cargo

Australian and international standards and certification requirements

relevant state/territory OH&S legislation

relevant state/territory environmental protection legislation

TLIA507C Check and evaluate records and documentation

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to check and evaluate records and documentation in accordance with regulatory and workplace requirements including checking documentation and analysing and evaluating records.

Application of the Unit

Work must be carried out in compliance with the relevant standards, regulations and workplace requirements concerning the documentation requirements for the local and international transport of cargo and containers.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the checking and evaluation of documentation for the local and international transport of cargo and containers as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Check documentation	<ul style="list-style-type: none">1.1 Documentation is checked to ensure its compliance with regulatory and workplace requirements1.2 Documentation is checked on a regular basis, and the personnel responsible for documentation are advised of deadlines1.3 Use of systems for the maintenance of records complies with regulatory and workplace requirements
2 Analyse and evaluate records	<ul style="list-style-type: none">2.1 Records are analysed to identify unexpected deviations from plans or possible future problems with plant and equipment2.2 Advice is provided to appropriate personnel when problems are identified2.3 Security of records and documentation is maintained at all times with access being granted to authorised personnel in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international standards, codes and regulations relevant to the documentation requirements for the local and international transport of cargo and containers including the Australian and International Dangerous Goods Codes

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for checking and evaluating documentation for the local and/or international transport of cargo and containers

Focus of operation of work systems, equipment, management and site operating systems for checking and evaluating cargo/container transport documentation

Problems that may occur when checking and evaluating documentation and appropriate action that can be taken to resolve the problems

Types of cargo, containers and transport modes and the documentation requirements for each

Site layout, loading/unloading plans and sequence sheets

The marking and numbering systems for cargo

Relevant bond, quarantine or other legislative requirements

Required skills:

Communicate effectively with others when checking and evaluating transport documentation

Read and interpret instructions, procedures and labels relevant to checking and evaluating transport documentation

Receive, acknowledge and send messages with available communications equipment

Identify cargo, container and goods, coding, ADG and IMDG markings and where applicable emergency information panels

Work collaboratively with others when checking and evaluating transport documentation

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions when checking and evaluating transport documentation in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Identify, select and use relevant equipment, processes and procedures when checking and evaluating documentation for the local and/or international transport of cargo and containers

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:	a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments office environments
Cargo/freight may include:	goods with specialist requirements, including temperature controlled goods and dangerous goods
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods, materials and vehicular traffic
Personnel in work area may include:	workplace personnel site visitors contractors official representatives
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios protective clothing high visibility clothing
Communication in the work area may include:	phone fax

	email
	electronic data transfer (EDI)
	RF systems
	radio
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information/documents may include:	goods identification numbers and codes
	manifests, bar codes, and container identification/serial number
	Australian and international codes of practice and regulations relevant to the documentation requirements for the local and/or international transport of cargo and containers
	Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
	operations manuals, job specifications and induction documentation
	manufacturers specifications for equipment
	workplace procedures and policies
	supplier and/or client instructions
	dangerous goods declarations and material safety data sheets (where applicable)
	award, enterprise bargaining agreement, other industrial arrangements
	relevant Australian standards and certification requirements
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may include:	relevant standards, codes and regulations relevant to the documentation requirements for the local and international transport of

cargo and containers

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

IATA Dangerous Goods by Air regulations

Australian and International Explosives Codes

licence, patent or copyright arrangements

water and road use and licence arrangements

export/import/quarantine/bond requirements

marine orders

relevant Australian standards and certification requirements

relevant state/territory OH&S and environmental protection legislation

workplace relations regulations

workers compensation regulations

Competency Field

A - Handling Cargo/Stock

TLIA807C Transfer cargo

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to transfer cargo in accordance with workplace requirements including preparing for the transfer of the load, safely transferring the cargo using appropriate lifting equipment, finalising the transfer, and completing all required documentation.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the transfer of cargo/freight.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements when transferring cargo as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for load transfer	<ul style="list-style-type: none">1.1 Load characteristics are identified to determine any special handling or equipment requirements1.2 Location of load in yard and following transfer method is determined1.3 Pathway for load transfer is established consistent with workplace procedures noting obstacles and any particular safety precautions1.4 Working area is prepared in accordance with the national standards, safety codes, and site operating procedures1.5 Personal protective equipment and other safety equipment is assembled1.6 The Safe Working Load (SWL) or Working Load Limit (WLL) is calculated using formulae for the particular type of lifting equipment1.7 Lifting equipment is checked to determine safe working order for the transfer1.8 Unsafe equipment is reported to appropriate personnel
2 Transfer cargo	<ul style="list-style-type: none">2.1 Cargo is steadied and secured using appropriate devices2.2 Load is lifted and shifted safely following national standards, safety codes and site operating procedures2.3 Load is transferred and set down ensuring no injury to personnel or damage to machinery or cargo
3 Complete transfer	<ul style="list-style-type: none">3.1 Securing arrangements are released from load ensuring no injury to personnel or damage to machinery or cargo3.2 Relevant documentation is completed including reporting of damaged cargo in accordance with workplace reporting requirements

3.3 Equipment is returned to store and work area
returned to normal working condition

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the transfer of cargo/freight including the Australian and International Dangerous Goods Codes

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the transfer of cargo and freight

Focus of operation of work systems, equipment, management and site operating systems for the transfer of cargo and freight

Problems that may occur when transferring cargo/freight and appropriate action that can be taken to resolve the problems

Relevant handling and safety codes

Types of equipment used to transfer loads in terminals/wharves, their applications and procedures and precautions for their use

Requirements for Safe Working Load (SWL) and Working Load Limit (WLL) of load shifting equipment

The marking and numbering systems for cargo

Relevant bond, quarantine or other legislative requirements

Required skills:

Communicate effectively with others when transferring cargo and freight

Read and interpret instructions, procedures, information and signs relevant to the transfer of cargo and freight

Interpret and follow operational instructions and prioritise work when transferring cargo and freight

Complete documentation related to work activities when transferring cargo and freight

Receive, acknowledge and send messages with communications equipment whilst operating load transfer equipment

Work collaboratively with others when transferring cargo and freight

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions when transferring cargo and freight in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may occur when transferring cargo and freight

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of load transfer equipment

Conduct checks on equipment used when transferring cargo and freight in terms of service schedule and standard operating procedures

Identify, select and use relevant equipment, processes and procedures when transferring cargo and freight

Estimate the size, shape and special requirements of loads

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:	a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Cargo/freight may include:	goods with specialist requirements, including temperature controlled goods and dangerous goods
Equipment may include:	appropriate load shifting equipment normally in use at a terminal or wharf (but does not include gantry equipment, boom cranes, dozers or specialised load shifting equipment which are covered by separate competency units)
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods, materials and vehicular traffic
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios protective clothing high visibility clothing
Communication in the work area may include:	phone fax email

	electronic data transfer (EDI)
	RF systems
	radio
	oral, aural or signed communications
Personnel in work area may include:	workplace personnel
	site visitors
	contractors
	official representatives
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information/documents may include:	goods identification numbers and codes
	manifests, bar codes, and container identification/serial number
	Australian and international codes of practice and regulations relevant to the transfer of cargo
	Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
	operations manuals, job specifications and induction documentation
	manufacturers specifications for equipment
	workplace procedures and policies
	supplier and/or client instructions
	dangerous goods declarations and material safety data sheets (where applicable)
	award, enterprise bargaining agreement, other industrial arrangements
	relevant Australian standards and certification requirements
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may	relevant codes and regulations for the

include:

transfer of cargo/freight

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

IATA Dangerous Goods by Air regulations

Australian and International Explosives Codes

TLIB107C Check and assess operational capabilities of equipment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to check and assess the operational capabilities of equipment in accordance with workplace requirements, including inspecting equipment and work area, checking the operational capability of equipment and its safety devices, identifying and assessing the impact of faults on safety and work requirements, and recording and reporting the results of inspection and testing in accordance with workplace procedures and relevant regulatory requirements.

Application of the Unit

Work must be carried out in accordance with codes/regulations and workplace requirements relevant to the checking and assessment of the operational capability of equipment.

Safety checks and equipment tests are performed under limited supervision.

Work involves the application of regulatory requirements and workplace procedures to the checking and assessment of the operational capability of equipment in the stevedoring, transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Inspect equipment and work area	<p>1.1 Equipment is inspected prior to start-up in accordance with workplace pre-operational functional safety check procedures and manufacturers specifications</p> <p>1.2 Aspects of equipment/work area found to be outside manufacturers and/or workplace specifications are reported to designated persons for appropriate action</p>
2 Check equipment operational capability	<p>2.1 Equipment and components are tested after start-up in accordance with manufacturers specifications and workplace procedures</p> <p>2.2 Warning systems are all checked for operational effectiveness</p>
3 Identify and assess impact of faults on work requirements	<p>3.1 Faults are identified and assessment made of the potential effect on the operation of the equipment for the required work</p> <p>3.2 Faults that may affect the safe operation of the equipment are reported to the appropriate personnel for rectification</p>
4 Record and report results of inspection and testing	<p>4.1 The results of the inspection and testing are accurately reported in accordance with regulatory requirements, workplace policy and industry guidelines</p> <p>4.2 Records are clear, unambiguous and concisely kept in accordance with workplace policy</p> <p>4.3 Clear reference is made to any items which may affect the future safety of the equipment</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Workplace procedures and policies for the checking and assessing of the operational capability of equipment

Focus of operation of work systems, equipment, management and site operating systems for the checking and assessing of the operational capability of equipment

The characteristics, capabilities and limitations of the equipment

Tools and equipment used during the checking and assessing of the operational capability of equipment and the precautions and procedures that should be followed in their use

Problems that may occur when checking and assessing the operational capability of equipment and appropriate action that can be taken to resolve the problems

Operational safety requirements for the equipment concerned

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when checking and assessing the operational capability of equipment

Read and interpret instructions, procedures, information, labels and signs relevant to the checking and assessing of the operational capability of equipment

Interpret and follow operational instructions and prioritise work

Complete documentation related to the checking and assessing of the operational capability of equipment

Work collaboratively with others when checking and assessing the operational capability of equipment

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Select and use relevant equipment and communications technology when checking and assessing the operational capability of equipment

Service equipment in terms of maintenance schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:	a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Purpose of equipment checking and inspection is to:	ensure it is free from damage, leaks and obstructions that may prejudice safety or limit operational capability
Safety and operational capability checks may be performed:	on a range of equipment used in the stevedoring, transport, warehousing, distribution and/or storage industries
Visual checks may include but are not limited to:	pressure over/under specification fluid leaks temperature over/under specifications cracks, surface or structural faults or other damage tightness of bolts, fixtures and fittings within specifications
Records/results of pre-operation tests may include:	details of faulty equipment or specific components action taken results of testing details of repair and maintenance work to be undertaken
Operational checks may be performed by:	operating/checking the functionality of various pieces of safety and component equipment (where applicable)

Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials a fire or explosion faulty equipment/tools
Consultative processes may involve:	workplace personnel supervisors and managers equipment manufacturers site visitors contractors official representatives
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios high visibility clothing
Communication in the work area may include:	phone fax email internet RF communications barcode readers oral, aural or signed communications
Information/documents may include:	workplace procedures and policies for the checking and assessment of the equipment concerned manufacturers specifications for equipment/tools

equipment identification labels, barcodes and serial numbers

supplier and/or client instructions

relevant OH&S requirements and policies

relevant Australian standards and certification requirements

material safety data sheets where applicable

codes of practice including the National Standards for Manual Handling and the Industry Safety Code

relevant legislation, regulations and related documentation including the ADG Code

award, enterprise bargaining agreement and other industrial arrangements

quality assurance procedures

emergency procedures

Applicable regulations and legislation may include:

relevant standards, codes and regulations pertaining to the checking and operation of the equipment concerned

relevant state/territory OH&S legislation

relevant state/territory environmental protection legislation

licence, patent or copyright arrangements

export/import/quarantine/bond requirements

relevant Australian standards and certification requirements

workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation

workers compensation regulations

Unit Sector(s)

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify scope of operational check	<ul style="list-style-type: none">1.1 Physical condition of equipment is observed1.2 Test procedures and parameters are identified in accordance with workplace procedures and manufacturers specifications1.3 Preliminary observations are recorded1.4 Test procedures are discussed with appropriate staff and necessary permission obtained
2 Plan operational checks	<ul style="list-style-type: none">2.1 Specifications and notes from preliminary observations are checked and areas to be clarified are identified2.2 Sequence of tests is planned noting areas where results and observations should be recorded2.3 Safe area for testing is identified2.4 Arrangements are made for any additional resources (including staff)
3 Check unit through full operating range	<ul style="list-style-type: none">3.1 Test is undertaken observing relevant safety and operational requirements3.2 Results are recorded and findings confirmed
4 Isolate fault and/or formulate recommendations	<ul style="list-style-type: none">4.1 Proposals for equipment repair are recorded based on faults found, cost/time implications and workplace approval systems4.2 Report is explained to relevant workplace personnel including any options and recommendations4.3 Parts are procured and/or repairs undertaken in accordance with enterprise procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant sections of regulatory requirements applicable to the testing of equipment and the isolation of faults

Relevant OH&S and environmental procedures and regulations

Workplace procedures and policies for the testing of equipment and the isolation of faults, including the tagging and reporting of faulty equipment and components

Focus of operation of work systems, equipment, management and site operating systems for the testing of equipment and the isolation of faults

Fault-finding techniques including identification of cost/time effective rectification procedures

Tools, meters, gauges and equipment used during the testing of equipment and the isolation of faults and the precautions and procedures that should be followed in their use

Guidelines relating to the safe use of machinery and equipment including the tagging of unserviceable or damaged items

Faults that may occur with equipment, and appropriate action that can be taken to report and/or rectify the identified faults in the equipment or its components

The characteristics, capabilities and limitations of the equipment

Operational safety requirements for the equipment concerned

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Documentation and record requirements

Required skills:

Communicate effectively with others when testing equipment and isolating faults

Read and comprehend simple statements in English

Read and interpret instructions, procedures, information and signs relevant to the testing of equipment and the isolation of faults

Interpret and follow operational instructions and prioritise work

Complete documentation related to the testing of equipment and the isolation of faults

Operate electronic communication equipment to required protocol

Work collaboratively with others when testing equipment and isolating faults

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when testing equipment and isolating faults in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Adapt to differences in equipment in accordance with standard operating procedures

Select and use relevant meters, gauges, equipment and tools when testing equipment and isolating faults

Select and use required personal protective equipment conforming to industry and OH&S standards

Apply basic mechanical, hydraulic, electrical and electronic principles to testing and fault identification activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Tests and the isolation of faults may be performed:	on a range of equipment used in the stevedoring, transport, warehousing, distribution and/or storage industries
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios high visibility clothing
Tests may include but are not limited to:	tests of operational performance tests as part of routine servicing identification of causes of poor or out-of-specification performance tests following servicing and/or adjustment of equipment
Records/results of tests may include:	details of faulty equipment or specific components details of action taken results of testing and associated recommendations details of repair and maintenance work to be undertaken

Hazards in the work area may include exposure to:

chemicals
dangerous or hazardous substances
movements of equipment, goods and materials
a fire or explosion
faulty equipment/tools

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Consultative processes may involve:

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify and prepare for cleaning	<ul style="list-style-type: none">1.1 Transportation units and facilities are inspected for hygiene and cleanliness on an on-going basis1.2 Customer complaints regarding lack of hygiene and cleanliness within transport units and facilities are investigated1.3 Transport units or areas requiring cleaning and the nature of the material to be cleaned is identified to determine appropriate response1.4 Cleaning procedures are identified and cleaning materials and equipment are organised in accordance with workplace procedures1.5 Areas that require cleaning that breach OH&S regulations or workplace standards are cordoned off to prevent access by staff and customers
2 Clean facility or unit	<ul style="list-style-type: none">2.1 Transportation units and facilities are cleaned or detailed to workplace standards2.2 Cleaning equipment is operated in accordance with OH&S regulations, codes of practice, and workplace procedures2.3 Chemicals are used in accordance with OH&S legislation, codes of practice, policies and procedures2.4 Hazardous and general waste is removed in accordance with OH&S regulations, codes of practice and workplace procedures
3 Identify minor maintenance requirements of transportation units and facilities	<ul style="list-style-type: none">3.1 Transport units and facilities are inspected to identify maintenance requirements3.2 Minor maintenance of the transport units and facilities is conducted in accordance with the workplace policies and procedures3.3 Minor maintenance actions are reported in accordance with workplace procedures

- 3.4 Further maintenance requirements of transport units or facilities are reported in accordance with workplace procedures
- 4 **Complete the work**
 - 4.1 Cordoned off area is re-opened for use when safe for customer access
 - 4.2 Transportation units/facilities cleanliness and appearance is verified prior to the unit being released for service
 - 4.3 Stocks of cleaning equipment are monitored and replenished as required

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to the cleaning of transportation units and facilities for passenger use, including, where relevant, the ADG Code and relevant health and hygiene requirements

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the cleaning of transportation units and facilities for passenger use, including the discharging of waste and the charging of water containers

Focus of operation of work systems, equipment, management and site operating systems for the cleaning of transportation units and facilities for passenger use

Equipment, chemicals and materials used during the cleaning of transportation units and facilities for passenger use, and the precautions and procedures that should be followed in their use

Problems that may occur when cleaning transportation units and facilities and appropriate action that can be taken to resolve the problems

Documentation and record requirements

Communication requirements when cleaning transportation units and facilities, including radio operation

Housekeeping standards procedures required in the workplace

Site layout

Required skills:

Communicate effectively with others when cleaning transportation units and facilities

Read and interpret instructions, procedures, information and signs relevant to the cleaning of transportation units and facilities

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others when cleaning transportation units and facilities

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when cleaning transportation units and facilities in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist when cleaning transportation units and facilities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and safely use relevant equipment and materials when cleaning transportation units and facilities

Select and use required personal protective equipment conforming to industry and OH&S standards

Select, mix and apply appropriate cleaning materials

Handle and store hazardous substances and materials

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:	a range of work environments by day or night
Transportation units may include:	rail carriages, buses, coaches, ferries and other transport units
Cleaning equipment may include:	vacuum cleaner steam cleaners mop and bucket polisher broom hose shampoo unit hovel specialised cleaning unit remote controlled cleaning unit special containers for syringes
Reporting may include:	verbal communication written communication
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances
Facilities could include:	hard floor (internal) soft floor ceiling surfaces and fittings external surfaces hard floor (external) glass surfaces internal surfaces furniture and fittings seats

	hard surfaces (e.g. metal, tiled)
Transportation units may include:	passenger vehicles/carriages/vessels owned leased or hired for which the organisation is responsible for cleaning
Facilities may include:	any premises owned, leased or hired and used by the transport system's internal and external customers
Chemicals include:	all types of active and passive materials/agents used for cleaning within the organisation's transportation units and facilities
Hazardous waste includes:	all materials/agents/items/objects that are identified under the relevant acts, regulations or codes
Equipment used to cordon off areas may include:	portable barriers gate closure warning lights designated tape
Personal protective equipment may include:	gloves safety headwear and footwear high visibility clothing
Consultative processes may involve:	other workplace personnel, supervisors and managers
Communication in the work area may include:	phone radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Information/documents may include:	workplace procedures and policies for the cleaning of transportation units and facilities for passenger use work instructions, inspection reports, work orders, job description, and induction

materials

manufacturers specifications for
equipment/materials

relevant OH&S and environmental
protection requirements and policies

relevant codes of practice including the
National Standards for Manual Handling, the
Industry Safety Code and the ADG Code

relevant health and hygiene legislation,

Unit Sector(s)

Not applicable.

Competency Field

B - Equipment Checking&Maintenance

TLIB2807B Maintain and use hand tools

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to maintain and use hand tools in accordance with workplace requirements, including selecting and using hand tools to complete workplace tasks, maintaining basic hand tools in accordance with manufacturers instructions, and securing and storing hand tools in accordance with workplace procedures.

Application of the Unit

Work must be carried out in accordance with workplace procedures and safeworking codes relevant to the maintenance and use of hand tools.

Work is performed under some supervision, generally within a team environment.

Work involves the application of routine procedures to maintain and use hand tools across a variety of operational workplace contexts.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Select and use hand tools	<p>1.1 Correct tools for work to be carried out are chosen to complete workplace tasks and to ensure efficient and safe working conditions</p> <p>1.2 Appropriate personal safety protection is used to minimise the risk of personal injury</p>
2 Maintain hand tools	<p>2.1 Equipment is cleaned and maintained in accordance with manufacturers specifications and/or local instructions to ensure correct functionality of equipment</p> <p>2.2 Any unserviceable tools are repaired, replaced or reported to relevant personnel to ensure correct functionality</p>
3 Secure and store hand tools	<p>3.1 Tools are transported in a safe, secure, efficient manner to minimise risk of injury to personnel and damage to equipment</p> <p>3.2 Tools are stored and secured according to manufacturers or workplace procedures to prevent damage to, and losses of, equipment</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant sections of state/territory regulations, codes of practice and safe working system requirements

Relevant OH&S and environmental procedures and regulations

Workplace procedures and policies for the use and maintenance of hand tools

Problems that can occur when using and maintaining hand tools and related action that should be taken

Materials used when using and maintaining hand tools and the procedures and precautions for their care, use and storage

Workplace documentation and records requirements

Procedures to be followed in the event of an emergency

Workplace component and material supply system

Required skills:

Communicate effectively with others when maintaining and using hand tools

Read and interpret instructions, procedures, information and signs relevant to the maintenance and use of hand tools

Interpret and follow operational instructions and prioritise work

Complete documentation related to the use and maintenance of hand tools

Operate electronic communication equipment to required protocols

Work both individually and collaboratively with others when maintaining and using hand tools

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions when maintaining and using hand tools in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Identify, select and efficiently and effectively use relevant hand tools and related materials

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Hand tools may include:	those required for operations and maintenance
Operations may be carried out in typical rail transport situations, including:	operations conducted at day or night typical weather conditions in confined spaces, exposed conditions and controlled or open environment
Materials may include:	servicing materials such as lubricants related materials and consumables needed when using tools, e.g. nails, screws, grease, etc.
Safety equipment may include:	high visibility clothing sunscreen and sun glasses insect repellent gloves, safety headwear, mask and footwear portable radios flags and hand lamps safety glasses and hearing protection safety devices
Environmental hazards may include:	leaking oil and fuel inappropriate disposal of fluids in drains or sewerage systems inappropriate disposal of waste and rubbish
Consultative processes may involve:	workplace personnel supervisors and managers customers/clients equipment manufacturers representatives and contractors union representatives industrial relations and OH&S specialists

	other professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established or standard procedures
Contingency processes may relate to:	personal injury tool malfunctions
Operators of mechanised equipment must have:	undertaken training where appropriate, hold the relevant licence, permit or certificate be recognised as competent for the class of machinery being used
Information/records may include:	workplace operational and technical instructions and procedures for the use and care of hand tools relevant regulations including state/territory safety codes of practice and safeworking regulations maintenance checklists and records for the use and servicing of tools tool/equipment manufacturers instructions, specifications and recommended procedures precautions and procedures to be adopted to protect the environment when using and maintaining hand tools OH&S procedures QA plans and procedures data and document control procedures relevant Australian standards and certification requirements emergency procedures award, enterprise bargaining agreement, other industrial arrangements
Applicable regulations and legislation may include:	relevant state/territory regulations, codes of practice and safeworking system requirements

the Code of Practice for the Defined
Interstate Rail Network in situations where
operations are carried out on that network
relevant state/territory OH&S legislation
relevant state/territory environmental
protection legislation
workplace relations regulations including
equal opportunity, equal employment
opportunity and affirmative action legislation
workers compensation regulations

Unit Sector(s)

Not applicable.

Competency Field

B - Equipment Checking&Maintenance

TLIB2907B Use and maintain minor mechanical equipment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to use and maintain minor mechanical equipment in accordance with workplace requirements, including carrying out pre-operation checks on equipment, operating mechanical equipment in accordance with workplace requirements, conducting routine maintenance, and securing and storing equipment in accordance with workplace procedures.

Application of the Unit

Work must be carried out in compliance with workplace procedures and the regulations and safeworking codes of practice relevant to the use and maintenance of minor mechanical equipment.

Work is performed under some supervision, generally within a team environment. It involves the application of routine procedures to use and maintain minor mechanical equipment across a variety of operational contexts.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Carry out pre-operation checks	<ul style="list-style-type: none">1.1 Pre-operational checks are conducted to manufacturers specifications to ensure optimum functionality of equipment1.2 Necessary adjustments to equipment are made to ensure efficient operation, according to manufacturers instructions1.3 Faulty equipment is reported to relevant person to ensure equipment is safe and effective to use
2 Operate mechanical equipment	<ul style="list-style-type: none">2.1 Equipment is operated in accordance with manufacturers or workplace operating instructions to ensure safe and effective operation2.2 Appropriate personal safety protection is used to minimise the risk of injury to operator2.3 Work operational hazards are eliminated or controlled appropriately when using equipment to ensure safeworking conditions2.4 Assisting personnel are given clear instructions about their duties if required to ensure safe and effective working conditions
3 Conduct routine maintenance	<ul style="list-style-type: none">3.1 Equipment is cleaned and maintained in accordance with manufacturers specifications to ensure optimum functionality3.2 Detailed and accurate records are maintained according to workplace procedures
4 Secure and store	<ul style="list-style-type: none">4.1 Equipment is handled and transported in a safe, secure, efficient manner to minimise risk of injury to personnel and damage to equipment4.2 Equipment is stored and secured according to manufacturers or workplace procedures to prevent damage and losses of equipment

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant sections of state and territory codes of practice and safeworking system requirements including the Code of Practice for the Defined Interstate Rail Network in situations where operations are carried out on that network

Relevant OH&S and environmental procedures and regulations

Workplace procedures and policies for the use and maintenance of minor mechanical equipment

Problems that can occur when using and maintaining minor mechanical equipment and related action that should be taken

Tools and equipment used when using and maintaining minor mechanical equipment and the procedures and precautions for their care, use and storage

Workplace documentation and records requirements

Procedures to be followed in the event of an emergency

Workplace component and material supply system

Required skills:

Communicate effectively with others when using and maintaining minor mechanical equipment

Read and interpret instructions, procedures, information and signs relevant to using and maintaining minor mechanical equipment

Interpret and follow operational instructions and prioritise work

Complete documentation related to using and maintaining minor mechanical equipment

Operate electronic communication equipment to required protocol

Work collaboratively with others when using and maintaining minor mechanical equipment

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise

when using and maintaining minor mechanical equipment in accordance with regulatory requirements and workplace procedures

Plan own work including predicting consequences and identifying improvements

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Identify, select and efficiently and effectively use relevant tools and equipment

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of equipment

Service equipment in terms of maintenance schedule and standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Competency Field

B - Equipment Checking&Maintenance

TLIB307C Carry out vehicle servicing and maintenance

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to carry out basic servicing and maintenance of a commercial vehicle, including action to implement vehicle manufacturers specifications for routine checks and maintenance and to ensure that all specified safety requirements are met, and that the vehicle is operational to the requirements of both the workplace and the relevant state/territory roads and traffic authority.

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant roads and traffic authority.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine vehicle checking and maintenance principles and procedures to service and maintain a commercial vehicle across a variety of operational contexts.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Maintain and service the vehicle systems	<ul style="list-style-type: none">1.1 Fluid levels are checked and adjusted following manufacturers specifications and workplace procedures1.2 Air levels are checked and adjusted following manufacturers specifications and workplace procedures1.3 Routine checks are made of vehicle systems and appropriate action is initiated for maintenance where required in accordance with workplace procedures1.4 Appropriate precautions and procedures are followed when servicing/maintaining a vehicle to ensure adequate protection of the environment1.5 OH&S procedures are followed when carrying out routine servicing and maintenance of a vehicle
2 Carry out minor repairs to a vehicle	<ul style="list-style-type: none">2.1 Vehicle components are removed, repaired or replaced and refitted to the vehicle using the correct tools and following manufacturers instructions and workplace procedures2.2 Tyres on vehicle are repaired or replaced following workplace procedures and manufacturers instructions2.3 Worn brakes are identified and action taken in accordance with workplace procedures and manufacturers specifications2.4 The need for more complex maintenance procedures is identified and the problem correctly referred following workplace procedures
3 Diagnose minor vehicle faults and undertake repairs for the safe operation of a vehicle	<ul style="list-style-type: none">3.1 Minor faults in the vehicle systems are identified, diagnosed and repaired following manufacturers specifications and workplace procedures3.2 Identified faults which create a safety hazard are reported and appropriate action is taken to remove

the vehicle from operation pending repair

4 **Complete documentation**

- 4.1 Records of routine servicing, maintenance and repairs are kept in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant 'duty of care' requirements for the routine servicing and maintenance of vehicles

Relevant OH&S and pollution control procedures

Procedures for the checking and routine service and maintenance of a commercial vehicle in accordance with workplace and the manufacturer's requirements and established safety rules and regulations

Problems that may occur during the routine servicing and maintenance of a vehicle and appropriate action and solutions

Recognition and diagnosis of faults and vehicle irregularities

Basic principles of operation of systems on commercial vehicles, including: electrical systems, fuel systems, cooling systems, steering systems, exhaust systems, tyres and brakes

Basic fault finding procedures required during routine servicing and maintenance of vehicles

Procedures required to minimise waste during routine servicing and maintenance

Housekeeping standards required for routine servicing and maintenance

Procedures for the use and maintenance of the materials, tools and parts required for routine servicing and maintenance

Reporting and documentation requirements

Required skills:

Communicate effectively with others when carrying out vehicle servicing and maintenance

Read and interpret instructions, procedures, information and signs relevant to vehicle servicing and maintenance

Interpret and follow operational instructions and prioritise work

Complete documentation related to vehicle servicing and maintenance

Operate electronic communication equipment to required protocol

Work collaboratively with others

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions identified when carrying out vehicle servicing and maintenance in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during vehicle servicing and maintenance

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to vehicle or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of equipment

Service equipment in terms of maintenance schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of vehicle servicing and maintenance

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Maintenance may be carried out in typical road transport situations, including:

operations conducted at day or night
typical weather conditions
in tight or confined spaces, exposed conditions and controlled or open environments
while in a depot, base or warehouse
while in the vehicle on the road
while at a client's workplace

Type of vehicle may include any commercial road transport vehicle including:

light vehicle
heavy vehicle
combination vehicle

Maintenance checks may include:

routine inspections of vehicle systems
checks prior to operations
checks on completion of operations
checks on completion of maintenance activities

Minor routine repairs may include:

replacement of blown globes in vehicle lights
replacement of broken fan belt
replacement of blown fuse
door mirrors
repairs to rear tail-light lens
changing of tyres
repair of tyre punctures
replacement of broken coolant hose

Minor routine servicing may include:

topping-up of water levels
replacement of oils
replacement of air in tyres

Environmental hazards may include:

leaking oil and fuel

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

defective or inappropriately adjusted exhaust systems

inappropriate disposal of vehicle fluids in drains or sewerage systems

company procedures

enterprise procedures

organisational procedures

established procedures

Information/records may include:

workplace routine servicing and maintenance procedures, checklists and instructions

relevant state/territory roads and traffic authority vehicle maintenance regulations

maintenance checklists and records

vehicle manufacturers instructions, specifications and recommended procedures

precautions and procedures to be adopted to protect the environment when servicing and maintaining vehicles

OH&S procedures to be followed when servicing and maintaining vehicles

Applicable regulations and legislation may include:

relevant state/territory roads and traffic authority vehicle maintenance regulations and requirements

relevant state/territory OH&S legislation

relevant state/territory environmental protection legislation

Unit Sector(s)

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Check the vehicle	<ul style="list-style-type: none">1.1 A visual check of the internal and external condition of the vehicle is carried out following workplace procedures1.2 Pre-operational inspections and checks of the vehicle's tyres, suspension, fluid levels and other critical features are carried out to ensure conformance with the requirements of the relevant roads and traffic authority1.3 Associated equipment is tested to ensure it functions correctly to manufacturers specifications1.4 Post start-up and shut-down checks are carried out after engine is started to identify possible engine or electrical problems1.5 Warning systems (instruments and gauges) are checked to ensure they are operational1.6 Where relevant, vehicle monitoring device is logged on/off in accordance with manufacturers instructions and workplace policy
2 Clean vehicle	<ul style="list-style-type: none">2.1 Vehicle and associated equipment is cleaned in accordance with workplace procedures and legislation
3 Complete documentation	<ul style="list-style-type: none">3.1 Basic faults are identified and/or diagnosed and appropriate action is taken to report or remedy them as required by workplace procedures and legislation3.2 Records of inspection are updated and recommended repairs are documented in accordance with workplace policies

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant duty of care requirements for the routine inspection of vehicles

Relevant OH&S and pollution control procedures

Procedures for the routine inspection of a commercial vehicle in accordance with workplace and manufacturers requirements and established safety rules and regulations, including pre-operational checking procedures, visual inspection procedures and warning systems checking procedures

Problems that may occur during the routine inspection of a vehicle and appropriate actions and solutions

Basic principles of operation of systems on commercial vehicles, including electrical systems, fuel systems, cooling systems, steering systems, exhaust systems, tyres, brakes

Reporting and documentation requirements

Required skills:

Communicate effectively with others during the routine inspection of a vehicle

Read and interpret instructions, procedures, information and manuals relevant to the routine inspection of a vehicle

Interpret and follow operational instructions and prioritise work

Complete documentation related to the routine inspection of a vehicle

Operate electronic communication equipment to required protocol

Work collaboratively with others during the routine inspection of a vehicle

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that are identified during the routine inspection of a vehicle in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events that may occur during the routine inspection of a vehicle

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Use cleaning equipment

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Maintenance may be carried out in typical road transport situations, including:

operations conducted at day or night
typical weather conditions
in confined spaces, exposed conditions and controlled or open environment
while in the a depot, base or warehouse
while in the vehicle on the road
while at a client's workplace

Elements and Performance Criteria

Element	Performance Criteria
1 Identify faults and perform routine maintenance	<p>1.1 Trailer faults are identified and diagnosed in accordance with workplace procedures</p> <p>1.2 Trailer components are lubricated in accordance with manufacturers instructions and workplace procedures</p>
2 Carry out repairs on trailers	<p>2.1 Trailer's air/hydraulic brake system is inspected and adjusted, and any required minor maintenance or repairs carried out</p> <p>2.2 Trailer's electrical system is checked for correct operation and any required minor maintenance or repairs carried out</p> <p>2.3 Trailer's suspension and axles are inspected and identified faults repaired and/or reported in accordance with workplace procedures</p> <p>2.4 Trailer's wheels and tyres are inspected, removed, repaired and refitted, as required, in accordance with workplace policy</p>
3 Complete documentation	<p>3.1 Records of routine maintenance and repairs are kept in accordance with workplace procedures</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant duty of care requirements for the routine servicing and maintenance of trailers

Relevant OH&S and pollution control procedures

Procedures for the checking, and routine service and maintenance of a commercial trailer in accordance with workplace and manufacturers requirements and established safety rules and regulations

Problems that may occur during the routine servicing and maintenance of a trailer and appropriate actions and solutions

Recognition and diagnosis of faults and trailer irregularities

Basic principles of operation of systems on commercial trailers, including electrical systems, tyres, brakes and coupling systems

Basic fault finding procedures required during routine servicing and maintenance of trailers

Housekeeping standards required for routine servicing and maintenance

Procedures for the use and maintenance of the materials, tools and parts required for routine servicing and maintenance

Reporting and documentation requirements

Required skills:

Communicate effectively with others during the routine servicing and maintenance of a trailer

Read and interpret instructions, procedures, information and signs relevant to the routine servicing and maintenance of a trailer

Interpret and follow operational instructions and prioritise work

Complete documentation related to the routine servicing and maintenance of a trailer

Operate electronic communication equipment to required protocol

Work collaboratively with others during the routine servicing and maintenance of a trailer

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may be identified during the routine servicing and maintenance of a trailer in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Service trailer and equipment in terms of maintenance schedule and standard operating procedures

Carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Maintenance may be carried out in typical road transport situations, including:

operations conducted at day or night
typical weather conditions
in confined spaces, exposed conditions and controlled or open environment
while in a depot, base or warehouse
while in the vehicle on the road
while at a client's workplace

Trailers may include:

any commercial trailers attached to vehicles used in the Australian transport industry

Maintenance checks may include:

routine inspections of trailer and its systems
checks prior to operations
checks on completion of operations
checks on completion of maintenance activities

Minor routine repairs may include:

the replacement of blown globes in trailer lights
minor repairs to couplings
repairs to rear tail-light lens
changing of tyres
repair of tyre punctures

Minor routine servicing may include:

topping up of water levels
lubrication of trailer components
checking of air in tyres
checking of air/hydraulic brake systems
checking of suspension and axles

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures

Information/records may include:

established procedures

workplace routine servicing and maintenance procedures, checklists and instructions

relevant state/territory roads and traffic authority trailer maintenance regulations

maintenance checklists and records

trailer manufacturers instructions, specifications and recommended procedures

precautions and procedures to be adopted to protect the environment when servicing and maintaining trailers

OH&S procedures to be followed when servicing and maintaining trailers

Applicable regulations and legislation may include:

relevant state/territory roads and traffic authority vehicle maintenance regulations and requirements

relevant state/territory OH&S legislation

relevant state/territory environmental protection legislation

Unit Sector(s)

Not applicable.

Competency Field

B - Equipment Checking&Maintenance

TLIB7307B Clean road tankers

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to clean road tankers in accordance with workplace procedures and OH&S and environmental protection regulations, including preparing for cleaning operations, steam cleaning a tanker, cleaning a tanker using water and detergent, finalising cleaning operations, and completing all required documentation.

Application of the Unit

Work must be carried out in compliance with OH&S and environmental protection regulations and workplace procedures.

Work is performed under some supervision, usually in a team environment. Work involves the application of routine principles and procedures to clean commercial tankers across a variety of operational contexts.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for cleaning operations	<ul style="list-style-type: none">1.1 Vehicle is positioned under gantry in accordance with workplace procedures1.2 Documentation is obtained from the vehicle driver to determine the product which has been previously carried in the tanker1.3 The vehicle keys are taken from the driver to prevent 'accidental drive off' before the cleaning process is completed1.4 Appropriate cleaning process is selected for type of tanker/load in accordance with workplace procedures1.5 Cleaning materials are prepared in accordance with manufacturers instructions and workplace procedures1.6 The required personal protection and safety equipment is selected and used in accordance with regulatory requirements and workplace procedures
2 Steam clean a tanker	<ul style="list-style-type: none">2.1 The vehicle is earthed to prevent sparks and explosions2.2 Valves are opened to allow draining of the wash materials and hoses attached in accordance with manufacturers instructions and workplace procedures2.3 All access points, including vents and washing points, are opened and heat-sensitive auto fill probes removed in accordance with workplace procedures2.4 Where the tank has held oil/diesel, a wash consisting of detergent wash and hot water rinse is carried out followed by the application of steam2.5 Where the tank has only held petrol, a steam clean only is carried out in accordance with workplace procedures

- 2.6 After the wash, the unit is left to drain until liquid ceases to drain from the outlet valves and steam stops leaving the vents on the top of the tank
 - 2.7 All vents and valves are closed and the auto fill probes reconnected
 - 2.8 Plastic seals are placed on valves to signify the completed cleaning of the tanker where required in accordance with workplace procedures
- 3 Clean a tanker using water and detergent**
- 3.1 High pressure water and detergent is used to clean around the top of the tanker vents and hatches to remove dirt and they are rinsed clean with water
 - 3.2 Valves on the outlet manifold are opened and connected with flexible pipes to the waste storage facility or recycling tanks for the tank cleaner
 - 3.3 All hatches are opened and spray balls are placed into the tanks after checking visually for the condition of the tank. Where solid materials are present these are washed out with high pressure water prior to starting the cleaning cycle
 - 3.4 Tank is rinsed then washed with tank wash until waste is clear and then it is recycled into a holding tank for reuse leaving the tankers tank to drain
 - 3.5 Water in the holding tank is topped up and ph tested and solution is replaced if necessary in accordance with workplace procedures
 - 3.6 Tank is rinsed with water in short bursts until the liquid leaving the tank is clear
 - 3.7 Top of tank is hosed off again with water, and spray balls are removed
 - 3.8 The tank is visually checked, through the hatches with the aid of a torch, for cleanliness
 - 3.9 If cleanliness standards have not been achieved, the tanker is rewashed or re-rinsed as required. Hatches are closed
- 3.1 At the conclusion of cleaning operations drainage hoses are removed, manifold checked for cleanliness, and drainage valves closed and sealed
- 0

to indicate completed process in accordance with workplace procedures

4 Complete cleaning operations

- 4.1 Due care is taken to ensure that the disposal of used cleaning materials is in accordance with environmental protection regulations and workplace procedures
- 4.2 Wash water is suitably treated using available water cleaning and separation processes before draining into the sewerage system
- 4.3 Cleaning equipment is cleaned, dried, checked and stored in accordance with workplace procedures
- 4.4 Documentation on the cleaning operations is completed in accordance with workplace procedures and is returned to the driver along with the keys to the vehicle

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant duty of care requirements for the routine cleaning of tankers

Relevant OH&S and pollution control procedures

Procedures for the cleaning of a commercial tanker in accordance with workplace and manufacturers requirements and established safety rules and regulations

Problems that may occur during the routine cleaning of a commercial road tanker and its associated ancillary equipment, and appropriate action and solutions

Processes for the recognition and diagnosis of faults and vehicle/ancillary system irregularities

Hazards that may exist during the cleaning of road tankers and ways of controlling the risks involved

Basic technical knowledge relevant to the cleaning of road tankers

Emergency procedures

Materials identification, handling and storage

Hazardous situations and related personal protection measures

Relevant recording and documentation procedures

Precautions and procedures to dispose of or reprocess cleaning wastes in accordance with environmental protection requirements

Housekeeping standards required for cleaning operations

Required skills:

Communicate effectively with others when cleaning road tankers

Read and interpret instructions, procedures, labels and manuals relevant to the cleaning of road tankers

Interpret and follow operational instructions and prioritise work

Complete documentation related to the cleaning of road tankers

Operate electronic communication equipment to required protocol

Work collaboratively with others when cleaning road tankers

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when cleaning road tankers in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Carry out required cleaning operations

Select and use appropriate cleaning equipment and materials

Minimise waste during cleaning operations

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle may include:	all tankers including those carrying petrol, diesel, oil, milk, wine and other liquid products
Cleaning operations may be carried out in appropriate facilities:	by day or night in typical weather conditions in confined spaces, exposed conditions and controlled or open environment while in the a depot, base or warehouse while at a client's workplace
Cleaning operations may include:	steam cleaning water and detergent cleaning
Equipment and materials may include:	detergents and cleaning chemicals hoses and spray balls steam cleaning equipment waste recycling tanks/equipment cleaning tools
Safety hazards may include but are not limited to:	fire/ignition risk vapours and noxious gases working at heights slippery, wet surfaces steam burns
Environmental hazards may include:	leaking oil and fuel inappropriate disposal of washing fluids in drains or sewerage systems
Depending on work context, safety and protective equipment may include:	high visibility waterproof clothing hearing protection gloves safety glasses, headwear and footwear

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

safety harness for working on top of tankers

company procedures

enterprise procedures

organisational procedures

established procedures

Information/records may include:

workplace tanker cleaning procedures, checklists and instructions for the vehicle, tanks and related ancillary equipment

relevant state/territory roads and traffic authority regulations

ADG Code as it applies to tanker cleaning

material safety data sheets

tanker cleaning checklists and records

tanker manufacturers specifications and recommended procedures

precautions and procedures to be adopted to protect the environment when cleaning tankers

OH&S procedures to be followed when cleaning tankers

emergency procedure manuals

QA plans and document control

conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable regulations and legislation may include:

relevant state/territory roads and traffic authority regulations and requirements

relevant state/territory OH&S legislation

relevant state/territory environmental protection legislation

ADG Code as it applies to the cleaning of tankers

Unit Sector(s)

Not applicable.

Competency Field

B - Equipment Checking&Maintenance

TLIB807C Carry out inspection of trailers

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to carry out an inspection of a commercial trailer, including action to implement trailer manufacturers specifications for routine checks, to clean the trailer, and to ensure that all specified safety requirements are met and that the trailer is operational to the requirements of both the workplace and the relevant state/territory roads and traffic authority.

Application of the Unit

Work must be carried out in compliance with the regulations of the relevant roads and traffic authority concerned with the inspection of commercial trailers.

Work is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine inspection principles and procedures to check a commercial trailer across a variety of operational contexts.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Check the trailer	<ul style="list-style-type: none">1.1 A visual check of the internal and external condition of the trailer is carried out following workplace procedures1.2 Pre-operational inspections and checks of the trailer's brake systems, suspension and axles, electrical systems and wheels and tyres are carried out to ensure conformance with road safety standards1.3 Associated equipment is tested to ensure it functions correctly to manufacturers specification
2 Clean trailer	<ul style="list-style-type: none">2.1 Trailer and associated equipment is cleaned in accordance with workplace procedures and legislation
3 Complete documentation	<ul style="list-style-type: none">3.1 Basic faults are identified and/or diagnosed and appropriate action taken to report or remedy them as required by workplace procedures and legislation3.2 Records of inspection are updated and recommended repairs documented in accordance with workplace policies

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant duty of care requirements for the routine inspection of trailers

Relevant OH&S and pollution control procedures

Procedures for the routine inspection of a commercial trailer in accordance with workplace and manufacturers requirements and established safety rules and regulations including visual inspection procedures and pre-operational checking procedures

Problems that may occur during the routine inspection of a trailer and appropriate actions and solutions

Basic principles of operation of systems on commercial trailers, including electrical systems, tyres, brakes and coupling systems

Reporting and documentation requirements

Required skills:

Communicate effectively with others during the routine inspection of a trailer

Read and interpret instructions, procedures and other information relevant to the routine inspection of a trailer

Interpret and follow operational instructions and prioritise work

Complete documentation related to the routine inspection of a trailer

Work collaboratively with others during the routine inspection of a trailer

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may be identified during the routine inspection of a trailer in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor and check condition of trailer and its equipment in terms of maintenance schedule and standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Maintenance may be carried out in typical road transport situations, including:

operations conducted at day or night
typical weather conditions
in confined spaces, exposed conditions and controlled or open environment
while in a depot, base or warehouse
while in the trailer on the road
while at a client's workplace

Trailers may include:

any commercial trailers attached to vehicles used in the Australian transport industry

Inspection may include:

visual checks of trailer
routine checks of trailer systems
checks in accordance with a trailer inspection schedule

Routine checks may include:

air pressure in tyres
brakes
lights
condition of tyres
suspension
coupling systems

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Information/records may include:

workplace routine inspection procedures, checklists and instructions
relevant state/territory roads and traffic authority trailer maintenance regulations
trailer manufacturers instructions, specifications and recommended procedures

precautions and procedures to be adopted to protect the environment when inspecting, servicing and maintaining trailers

OH&S procedures to be followed when inspecting trailers

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Drive the vehicle	<ul style="list-style-type: none">1.1 Vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage1.3 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving1.4 The vehicle is driven in reverse, maintaining visibility and achieving accurate positioning1.5 Vehicle lights and indicators are used in accordance with traffic regulations and manufacturers instructions1.6 The vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures1.7 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	<ul style="list-style-type: none">2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment, loads and facilities
3 Monitor and maintain vehicle performance	<ul style="list-style-type: none">3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle3.2 Performance and efficiency of vehicle operation is monitored during use

- 3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority
- 3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority

Relevant OH&S and environmental procedures and regulations

Vehicle controls, instruments and indicators and their use

Vehicle handling procedures

Workplace driving and operational instructions

Driving hazards and related defensive driving techniques

Procedures to be followed in the event of a driving emergency

Engine power management and safe driving strategies

Efficient driving techniques

Pre-operational checks carried out on vehicle and related action

Differences between transmission types

Map reading and road navigation techniques

Factors which may cause traffic delays and diversions and related action that can be taken by a driver

Principles of stress management when driving a vehicle

Causes and effects of fatigue on drivers

Factors which increase fatigue-related accidents

Fatigue management strategies including on-road techniques

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when driving a commercial vehicle

Read and interpret instructions, procedures, information and signs relevant to the driving of a commercial vehicle

Interpret and follow operational instructions and prioritise work

Complete documentation related to the driving of a commercial vehicle

Operate electronic communication equipment to required protocol

Work collaboratively with others when driving a commercial vehicle

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when driving a commercial vehicle in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events that may occur when driving a commercial vehicle

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a commercial vehicle

Monitor and anticipate traffic hazards and take appropriate action

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Monitor performance of vehicle and take appropriate action where required

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	<ul style="list-style-type: none">cars and vehicles equal to or less than 4.5 tonnes GVM and seating up to 12 adults, including the driver, and all types of transmission
Driving may be carried out in typical road transport situations, including:	<ul style="list-style-type: none">operations conducted at day or nighttypical weather conditionson the open roadon a private roadwhile at a depot, base or warehousewhile at a client's workplace or work site
Vehicle handling procedures may include:	<ul style="list-style-type: none">starting a vehiclesteering and manoeuvring a vehicleaccelerating and brakingpositioning and stopping a vehiclereversing a vehicleoperating vehicle controls, instruments and indicatorsusing defensive driving techniquesmanaging engine performance

Minor routine repairs may include:	<ul style="list-style-type: none">replacement of blown globes in vehicle lightsreplacement of broken fan beltreplacement of blown fusereplacement of door mirrors

Driving hazards may include (examples only):

repairs to rear tail-light lens
changing of tyres
repair of tyre punctures
replacement of broken coolant hose
wet and iced roads
oil on road
animals and objects on road
fire in vehicle
leaking fuel
faulty brakes
parked vehicles on the road
faulty steering mechanism on vehicle
pedestrians crossing the road
flooded sections of road
windy sections of road
foggy conditions

Factors that can cause traffic delays and diversions may include (examples only):

traffic accidents
flooded sections of road
road damage
bridge/tunnel damage
road works
building construction
emergency situations such as bushfires, building fires, etc.
road closures for special events such as marches, parades, etc.
holiday traffic
road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Documentation/records may include:

state/territory driving licence requirements
state/territory road rules
workplace driving instructions and procedures
vehicle manufacturers instructions, specifications and recommended driving procedures including pre-operational checks of vehicle
emergency procedures
vehicle log book or record book (where required)

Applicable procedures and codes may include:

relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to the class of vehicle
relevant state/territory road rules
relevant state/territory permit regulations and requirements
relevant state/territory OH&S legislation
relevant state/territory fatigue management regulations
relevant state/territory environmental protection legislation

Competency Field

C - Driving Vehicle

TLIC307C Drive medium rigid vehicle

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to drive a medium rigid vehicle safely including systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority.

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to medium rigid vehicles. Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial medium rigid vehicle across a variety of driving contexts.

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority

Relevant OH&S and environmental procedures and regulations

Medium rigid vehicle controls, instruments and indicators and their use

Medium rigid vehicle handling procedures

Procedures to be followed in the event of a driving emergency

Engine power management and safe driving strategies

Efficient driving techniques

Workplace driving and operational instructions

Driving hazards and related defensive driving techniques

Pre-operational checks carried out on vehicle and related action

Differences between transmission types

Principles of operation of air brakes and procedures for their use

Principles of stress management when driving a vehicle

Map reading and road navigation techniques including the use of a GPS device where applicable

Factors which may cause traffic delays and diversions and related action that can be taken by a driver

Causes and effects of fatigue on drivers

Factors which increase fatigue-related accidents

Fatigue management strategies including on-road techniques

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when driving a medium rigid vehicle

Read and interpret instructions, procedures, information and signs relevant to work activities

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others when driving a medium rigid vehicle

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a medium rigid vehicle in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events when driving a medium rigid vehicle

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of equipment

Monitor and anticipate traffic hazards and take appropriate action

Carry out pre-operational checks on a medium rigid vehicle

Check and replenish fluids and carry out lubrication processes in the course of work

activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	all medium rigid vehicles, for example any 2-axle rigid vehicle, including truck and bus greater than 8 tonnes GVM
Driving may be carried out in typical road transport situations, including:	operations conducted at day or night typical weather conditions on the open road on a private road while at a depot, base or warehouse while at a client's workplace or work site
Vehicle handling procedures may include:	starting a vehicle steering and manoeuvring a vehicle accelerating and braking positioning and stopping a vehicle reversing a vehicle operating vehicle controls, instruments and indicators using air brakes using defensive driving techniques managing engine performance
Pre-operational checks may include:	visual check of vehicle checking and topping up of fluid levels checks of tyre pressures checks of operation of vehicle lights and indicators checks of brakes
Minor routine repairs may include:	replacement of blown globes in vehicle lights replacement of broken fan belt replacement of blown fuse replacement of door mirrors

Driving hazards may include (examples only):

repairs to rear tail-light lens
changing of tyres
repair of tyre punctures
replacement of broken coolant hose
wet and iced roads
oil on road
animals and objects on road
fire in vehicle
leaking fuel
faulty brakes
parked vehicles on the road
faulty steering mechanism on vehicle
pedestrians crossing the road
flooded sections of road
windy sections of road
foggy conditions

Factors that can cause traffic delays and diversions may include:

traffic accidents
flooded sections of road
road damage
bridge/tunnel damage
road works
building construction
emergency situations such as bushfires, building fires, etc.
road closures for special events such as marches, parades, etc.
holiday traffic
road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Documentation/records may include:

state/territory medium rigid vehicle driving licence requirements
state/territory road rules
workplace driving instructions and procedures
vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
emergency procedures
vehicle log book or record book (where required)

Applicable procedures and codes may include:

relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to medium rigid vehicles
relevant state/territory road rules
relevant state/territory permit regulations and requirements
relevant state/territory OH&S legislation
relevant state/territory fatigue management regulations
relevant state/territory environmental protection legislation

Unit Sector(s)

Not applicable.

Competency Field

C - Driving Vehicle

TLIC407D Drive heavy rigid vehicle

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to drive a heavy rigid vehicle safely including systematic and efficient control of all vehicle functions, monitoring of traffic and road conditions, management of vehicle condition and performance, and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority.

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to heavy rigid vehicles. Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial heavy rigid vehicle across a variety of driving contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Drive the heavy rigid vehicle	<ul style="list-style-type: none">1.1 The heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective gear selection and smooth transition in gear changes1.4 Braking system of heavy rigid vehicle is managed and operated to ensure effective control of the vehicle under all conditions1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving1.6 The heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning.1.7 The heavy rigid vehicle is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures1.8 Where required, overwidth and overweight permit applications are undertaken in accordance with relevant regulatory requirements1.9 Appropriate procedures are followed in the event

of a driving emergency

2 Monitor traffic and road conditions

- 2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and ensure no injury to people or damage to property, equipment loads and facilities

3 Monitor and maintain vehicle performance

- 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
- 3.2 Performance and efficiency of vehicle operation is monitored during use
- 3.3 Defective or irregular performance or malfunctions are reported to the appropriate authority
- 3.4 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority

Relevant OH&S and environmental procedures and regulations

Heavy rigid vehicle controls, instruments and indicators and their use

Heavy rigid vehicle handling procedures

Procedures to be followed in the event of a driving emergency

Engine power management and safe driving strategies

Efficient driving techniques

Pre-operational checks carried out on heavy rigid vehicle and related action

Differences between transmission types

Principles of operation of air brakes and procedures for their use

Workplace driving and operational instructions

Driving hazards and related defensive driving techniques

Principles of stress management when driving a vehicle

Factors which may cause traffic delays and diversions and related action that can be taken by a driver

Causes and effects of fatigue on drivers

Factors which increase fatigue-related accidents

Fatigue management strategies and on-road techniques

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when driving a commercial heavy rigid vehicle

Read and interpret instructions, procedures, information and signs relevant to when the driving of a commercial heavy rigid vehicle

Interpret and follow operational instructions and prioritise work

Complete documentation related to the driving of a commercial heavy rigid vehicle

Work collaboratively with others when driving a commercial heavy rigid vehicle

Operate electronic communication equipment to required protocol

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a commercial heavy rigid vehicle in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events

Apply precautions and required action to minimise, control or eliminate hazards that may exist when driving a commercial heavy rigid vehicle

Monitor and anticipate traffic hazards and take appropriate action

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of the vehicle and its equipment and take appropriate action where required

Carry out pre-operational checks in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	all heavy rigid vehicles, for example any rigid vehicle with 3 or more axles, including trucks or buses, greater than 8 tonnes GVM
Driving may be carried out in typical road transport situations, including:	operations conducted at day or night typical weather conditions on the open road on a private road while at a depot, base or warehouse while at a client's workplace or work site
Vehicle handling procedures may include:	starting a vehicle steering and manoeuvring a vehicle accelerating and braking positioning and stopping a vehicle reversing a vehicle operating vehicle controls, instruments and indicators using air brakes using defensive driving techniques managing engine performance
Pre-operational checks may include:	visual check of vehicle checking and topping up of fluid levels checks of tyre pressures checks of operation of vehicle lights and indicators checks of brakes
Minor routine repairs may include:	replacement of blown globes in vehicle lights replacement of broken fan belt replacement of blown fuse replacement of door mirrors

Driving hazards may include (examples only):

repairs to rear tail-light lens
changing of tyres
repair of tyre punctures
replacement of broken coolant hose
wet and iced roads
oil on road
animals and objects on road
fire in vehicle
leaking fuel
faulty brakes
parked vehicles on the road
faulty steering mechanism on vehicle
pedestrians crossing the road

 - 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
 - 3.2 Prime mover and trailer are aligned and coupled in accordance with manufacturers instructions and workplace procedures
 - 3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
 - 3.4 Performance and efficiency of vehicle operation is monitored during use
 - 3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority
 - 3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority

Relevant OH&S and environmental procedures and regulations

Heavy combination vehicle controls, instruments and indicators and their use

Heavy combination vehicle handling procedures

Workplace driving and operational instructions

Procedures to be followed in the event of a driving emergency

Engine power management and safe driving strategies

Efficient driving techniques

Pre-operational checks carried out on heavy combination vehicle and related action

Differences between transmission types

Principles of operation of air brakes and procedures for their use

Driving hazards and related defensive driving techniques

Map reading and navigation of the vehicle and related action

Factors which may cause traffic delays and diversions and related action that can be taken by a driver

Principles of stress management when driving a vehicle

Causes and effects of fatigue on drivers

Factors which increase fatigue-related accidents

Fatigue management strategies including on-road techniques

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when driving a heavy combination vehicle

Read and interpret instructions, procedures, information and signs relevant to the driving of a heavy combination vehicle

Interpret and follow operational instructions and prioritise work

Complete documentation related to the driving of a heavy combination vehicle

Operate electronic communication equipment to required protocol

Work collaboratively with others when driving a heavy combination vehicle

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a heavy combination vehicle in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events that may arise when driving a heavy combination vehicle

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor and anticipate traffic hazards and take appropriate action

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Apply map reading and road navigation techniques to the operation of a heavy combination vehicle

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes: all heavy combination vehicles that may be driven on public and private roads and work sites

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes
- checks of coupling equipment

Minor routine repairs may include:

- replacement of blown globes in vehicle lights
- replacement of broken fan belt
- replacement of blown fuse

Driving hazards may include (examples only):

replacement of door mirrors
repairs to rear tail-light lens
changing of tyres
repair of tyre punctures
replacement of broken coolant hose
wet and iced roads
oil on road
animals and objects on road
fire in vehicle
leaking fuel
faulty brakes
parked vehicles on the road
faulty steering mechanism on vehicle
pedestrians crossing the road
flooded sections of road
windy sections of road
foggy conditions
work site hazards including power and service lines, buildings, structures, facilities, underground services, uneven or unstable ground and recently filled trenches, stationary and moving machinery and equipment, hazardous or dangerous materials, noise, light, energy sources, and obstructions

Factors that can cause traffic delays and diversions may include (examples only):

traffic accidents
flooded sections of road
road damage
bridge/tunnel damage
road works
building construction
emergency situations such as bushfires, building fires, etc.
road closures for special events such as marches, parades, sporting events, etc.
holiday traffic

	road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Documentation/records may include:	state/territory heavy combination vehicle driving licence/permit requirements state/territory road rules workplace driving instructions and procedures vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle emergency procedures vehicle log book or record book (where required)
Applicable procedures and codes may include:	relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to heavy combination vehicles relevant state/territory road rules relevant state/territory permit regulations and requirements relevant state/territory OH&S legislation relevant state/territory fatigue management regulations relevant state/territory environmental protection legislation

Unit Sector(s)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Drive the multi-combination vehicle	<ul style="list-style-type: none">1.1 The multi-combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage1.3 Braking system of multi-combination vehicle is managed and operated to ensure effective control of the vehicle under all conditions1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving1.5 The multi-combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning1.6 The multi-combination vehicle is parked, shut down, uncoupled and secured according to manufacturers specifications, traffic regulations and workplace procedures1.7 Appropriate signage, lights and the like are checked for operational effectiveness and for conformity to prescribed traffic regulations1.8 Appropriate procedures are followed in the event of a driving emergency

- 2 **Monitor traffic and road conditions**
 - 2.1 The most efficient and permissible route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
 - 2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities
- 3 **Monitor and maintain vehicle performance**
 - 3.1 Vehicle performance is maintained through pre-operational inspections and checks of the vehicle
 - 3.2 Prime mover, dollies and trailer are aligned and coupled in proper sequence in accordance with manufacturers instructions and workplace procedures
 - 3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm that it is fully operational
 - 3.4 Performance and efficiency of vehicle operation is monitored during use
 - 3.5 Defective or irregular performance or malfunctions are reported to the appropriate authority
 - 3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority

Relevant OH&S and environmental procedures and regulations

Multi-combination vehicle controls, instruments and indicators and their use

Multi-combination vehicle handling procedures

Workplace driving and operational instructions

Engine power management and safe driving strategies

Efficient driving techniques

Pre-operational checks carried out on multi-combination vehicle and related action

Differences between transmission types

Principles of operation of air brakes and procedures for their use

Driving hazards and related defensive driving techniques

Map reading and road navigation techniques

Factors which may cause traffic delays and diversions and related action that can be taken by a driver

Principles of stress management when driving a vehicle

Causes and effects of fatigue on drivers

Factors which increase fatigue-related accidents

Fatigue management strategies including on-road techniques

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when driving a multi-combination vehicle

Read and interpret instructions, procedures, information and signs relevant to the driving of a multi-combination vehicle

Interpret and follow operational instructions and prioritise work

Complete documentation related to the driving of a multi-combination vehicle

Operate electronic communication equipment to required protocol

Work collaboratively with others when driving a multi-combination vehicle

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when driving a multi-combination vehicle in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events when driving a multi-combination vehicle

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a multi-combination vehicle

Monitor and anticipate traffic hazards and take appropriate action

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of vehicle, its trailers and its equipment and take appropriate action where required

Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes: all multi-combination vehicles that may be driven on public and private roads and work sites

Driving may be carried out in typical road transport situations, including:

- operations conducted at day or night
- typical weather conditions
- on the open road
- on a private road
- while at a depot, base or warehouse
- while at a client's workplace or work site

Vehicle handling procedures may include:

- starting a vehicle
- steering and manoeuvring a vehicle
- accelerating and braking
- positioning and stopping a vehicle
- reversing a vehicle
- operating vehicle controls, instruments and indicators
- using air brakes
- using defensive driving techniques
- managing engine performance

Pre-operational checks may include:

- visual check of vehicle
- checking and topping up of fluid levels
- checks of tyre pressures
- checks of operation of vehicle lights and indicators
- checks of brakes
- checks of coupling equipment

Minor routine repairs may include:

- replacement of blown globes in vehicle lights
- replacement of broken fan belt
- replacement of blown fuse

Driving hazards may include (examples only):

replacement of door mirrors
repairs to rear tail-light lens
changing of tyres
repair of tyre punctures
replacement of broken coolant hose
wet and iced roads
oil on road
animals and objects on road
fire in vehicle
leaking fuel
faulty brakes
parked vehicles on the road
faulty steering mechanism on vehicle
pedestrians crossing the road
flooded sections of road
windy sections of road
foggy conditions

Factors that can cause traffic delays and diversions may include (examples only):

traffic accidents
flooded sections of road
road damage
bridge/tunnel damage
road works
building construction
emergency situations such as bushfires, building fires, etc.
road closures for special events such as marches, parades, etc.
holiday traffic
road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures

Documentation/records may include:

established procedures

state/territory multi-combination vehicle
driving licence/permit requirements

state/territory road rules

workplace driving instructions and
procedures

vehicle manufacturers instructions,
specifications and recommended driving
procedures including preoperational checks
of vehicle

emergency procedures

vehicle log book or record book (where
required)

Applicable procedures and codes may
include:

relevant state/territory roads and traffic
authority driving regulations and
licence/permit requirements pertaining to
multi-combination vehicles

relevant state/territory road rules

relevant state/territory OH&S legislation

relevant state/territory fatigue management
regulations

relevant state/territory environmental
protection legislation

Unit Sector(s)

Not applicable.

Competency Field

C - Driving Vehicle

TLIC707C Operate vehicle carrying special loads

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to drive a vehicle carrying a special load safely including compliance with road traffic authority and other relevant government regulations and company policies; and effective management of hazardous situations.

Application of the Unit

Driving must be carried out in compliance with the licence and permit requirements and regulations of the relevant state/territory roads and traffic authority as well as the specific regulatory and permit requirements pertaining to the special load being carried. Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes. Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Carry out pre-operational checks	<p>1.1 The pre-operational checks for the special purpose vehicle and its associated ancillary equipment are carried out in accordance with manufacturers requirements, government regulations and workplace policies and procedures</p> <p>1.2 All faults and defects identified during checks are repaired or reported in accordance with workplace procedures</p>
2 Drive a vehicle carrying special loads	<p>2.1 The vehicle is manoeuvred in accordance with the regulations/permit requirements for the class of vehicle involved and the load being carried</p> <p>2.2 Vehicles carrying explosives or dangerous goods are driven along designated routes in accordance with the relevant codes, relevant government regulations and workplace policies</p> <p>2.3 The load is transported and the vehicle manoeuvred in accordance with any required precautions relating to unusual/special characteristics of the load and/or relevant government regulations pertaining to the special load including the Australian Dangerous Goods Code and the Australian Explosives Code</p> <p>2.4 Signs or indicators are fixed to the vehicle if required</p> <p>2.5 Appropriate procedures are followed for the load concerned in the event of a driving emergency</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority

Where applicable, Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code

Relevant OH&S and environmental procedures and regulations

Vehicle controls, instruments and indicators and their use

Workplace driving and operational instructions

Procedures to be followed in the event of a driving emergency

Engine power management and safe driving strategies

Efficient driving techniques

Pre-operational checks carried out on vehicle and related action

Differences between transmission types

Map reading and road navigation techniques

Factors which may cause traffic delays and diversions and related action that can be taken by a driver

Principles of stress management when driving a vehicle

Causes and effects of fatigue on drivers

Factors which increase fatigue-related accidents

Fatigue management strategies including on-road techniques

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when driving a vehicle designed to carry special loads

Read and interpret instructions, procedures, information and signs relevant to the driving of a vehicle designed to carry special loads

Interpret and follow operational instructions and prioritise work

Complete documentation related to the driving of a vehicle designed to carry special loads

Operate electronic communication equipment to required protocol

Work collaboratively with others when driving a vehicle designed to carry special loads

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when driving a vehicle designed to carry special loads in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events when driving a vehicle designed to carry special loads

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a vehicle designed to carry special loads

Monitor and anticipate traffic hazards and take appropriate action

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of vehicle and its equipment and load and take appropriate action if required

Service vehicle and its equipment in terms of maintenance schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	all vehicles designed to carry special loads, for example concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier, recovery vehicle
Driving may be carried out in typical road transport situations, including:	operations conducted at day or night typical weather conditions on the open road on a private road while at a depot, base or warehouse while at a client's workplace or work site
Vehicle handling procedures may include:	starting a vehicle steering and manoeuvring a vehicle accelerating and braking positioning and stopping a vehicle reversing a vehicle operating vehicle controls, instruments and indicators using defensive driving techniques managing engine performance
Pre-operational checks may include:	visual check of vehicle checking and topping up of fluid levels checks of tyre pressures checks of operation of vehicle lights and indicators checks of brakes
Minor routine repairs may include:	replacement of blown globes in vehicle lights replacement of broken fan belt replacement of blown fuse

	replacement of door mirrors
	repairs to rear tail-light lens
	changing of tyres
	repair of tyre punctures
	replacement of broken coolant hose
Designated routes are:	those that are determined by permit/regulatory requirements for a specific class of load such as explosives or dangerous goods
Driving hazards may include (examples only):	wet and iced roads oil on road animals and objects on road fire in vehicle leaking fuel faulty brakes parked vehicles on the road faulty steering mechanism on vehicle pedestrians crossing the road flooded sections of road windy sections of road foggy conditions
Factors that can cause traffic delays and diversions may include (examples only):	traffic accidents flooded sections of road road damage bridge/tunnel damage road works building construction emergency situations such as bushfires, building fires, etc road closures for special events such as marches, parades, etc holiday traffic road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Documentation/records may include:

state/territory driving licence requirements
state/territory road rules
workplace driving instructions and procedures for drivers of vehicles carrying the specific load concerned
vehicle manufacturers instructions, specifications and recommended driving procedures including preoperational checks of vehicle
procedures/designated routes prescribed by the relevant authority for vehicles carrying the specific loads concerned

Applicable procedures and codes may include:

relevant state/territory roads and traffic authority driving regulations and licence/permit requirements pertaining to the class of vehicle
relevant regulations/permit requirements specific to the load being carried
Australian regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including the Australian Dangerous Goods Code and the Australian Explosives Code
relevant state/territory road rules
relevant state/territory OH&S legislation
relevant state/territory fatigue management regulations
relevant State/Territory environmental protection legislation

Unit Sector(s)

Not applicable.

Competency Field

C - Driving Vehicle

TLIC807C Drive coach/bus

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to drive a passenger coach/bus safely including systematic and efficient control of all coach/bus functions; monitoring of traffic and road conditions; management of coach/bus condition and performance; and effective management of hazardous situations. Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory Road Traffic Authority.

Application of the Unit

Driving must be carried out in compliance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to the driving of a commercial coach/bus.

Driving is performed with limited or minimum supervision, with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

Driving involves the application of routine vehicle driving principles and procedures to maintain the safety and operation of a commercial coach/bus across a variety of driving contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Drive the coach	<ul style="list-style-type: none">1.1 The coach/bus is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturers instructions1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage1.3 Engine operation is maintained within the manufacturer's specified torque range and temperature through effective transmission use1.4 Braking system of coach/bus is managed and operated to ensure effective control of the coach/bus under all conditions1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving1.6 The coach/bus is driven in reverse, maintaining visibility and achieving accurate positioning1.7 The coach/bus is parked, shut down and secured in accordance with manufacturers specifications, traffic regulations and workplace procedures1.8 Appropriate procedures are followed in the event of a driving emergency
2 Monitor traffic and road conditions	<ul style="list-style-type: none">2.1 The most efficient route of travel is taken through monitoring and anticipation of traffic flows and conditions, road standards and other factors likely to cause delays or route deviations2.2 Traffic and road conditions are constantly monitored and acted upon to enable safe operation

and ensure no injury to people or damage to property, equipment, loads and facilities

3 Monitor and maintain coach/bus performance

- 3.1 Coach/bus performance is maintained through pre-operational inspections and checks of the coach/bus and ancillary equipment
- 3.2 Performance and efficiency of coach/bus operation is monitored during use
- 3.3 Defective or irregular performance or malfunctions are repaired or reported to the appropriate authority
- 3.4 Coach/bus records are maintained/updated and information is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant road rules, regulations, permit and licence requirements of the relevant state/territory road traffic authority

Relevant OH&S and environmental procedures and regulations

Coach/bus controls, instruments and indicators and their use

Coach/bus handling procedures

Workplace driving and operational instructions

Driving hazards and related defensive driving techniques

Procedures to be followed in the event of a driving emergency

Engine power management and safe driving strategies

Efficient driving techniques

Pre-operational checks carried out on coaches/buses and related action

Differences between transmission types

Map reading and road navigation techniques

Factors which may cause traffic delays and diversions and related action that can be taken by a driver

Principles of stress management when driving a vehicle

Causes and effects of fatigue on drivers

Factors which increase fatigue-related accidents

Fatigue management strategies including on-road techniques

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when driving a commercial coach or bus

Read and interpret instructions, procedures, information and signs relevant to the driving of a commercial coach or bus

Interpret and follow operational instructions and prioritise work

Complete documentation related to the driving of a commercial coach or bus

Operate electronic communication equipment to required protocol including on-board intercom and communications equipment

Work collaboratively with others when driving a commercial coach or bus

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when driving a commercial coach or bus in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events that may occur when driving a commercial coach or bus

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the driving of a commercial coach or bus

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of coach or bus and its equipment and take appropriate action where required

Service coach or bus and its equipment in terms of maintenance schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Type of vehicle includes:	all coaches and buses relevant to specific licence classifications
Driving may be carried out in typical road transport situations, including:	operations conducted at day or night typical weather conditions on the open road on a private road while at a depot, base or warehouse while at a client's workplace or work site
Vehicle handling procedures may include:	starting a vehicle steering and manoeuvring a vehicle accelerating and braking positioning and stopping a vehicle reversing a vehicle operating vehicle controls, instruments and indicators operating door opening and closing equipment using defensive driving techniques managing engine performance
Pre-operational checks may include:	visual check of vehicle checking and topping up of fluid levels checks of tyre pressures checks of operation of vehicle lights and indicators checks of brakes
Minor routine repairs may include:	replacement of blown globes in vehicle lights replacement of broken fan belt replacement of blown fuse replacement of door mirrors

Driving hazards may include (examples only):

repairs to rear tail-light lens
changing of tyres
repair of tyre punctures
replacement of broken coolant hose
wet and iced roads
oil on road
animals and objects on road
fire in vehicle
leaking fuel
faulty brakes
parked vehicles on the road
faulty steering mechanism on vehicle
pedestrians crossing the road
flooded sections of road
windy sections of road
foggy conditions

Factors that can cause traffic delays and diversions may include (examples only):

traffic accidents
flooded sections of road
road damage
bridge/tunnel damage
road works
building construction
emergency situations such as bushfires, building fires, etc.
road closures for special events such as marches, parades, sporting events, etc.
holiday traffic
road closures for utility works such as electricity, water, sewerage, telecommunications, gas, etc.

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Documentation/records may include:

state/territory coach/bus driving licence requirements
state/territory road rules
workplace driving instructions and procedures
coach/bus manufacturers instructions, specifications and recommended driving procedures including pre-operational checks of coach/bus
emergency procedures
vehicle log book or record book (where required)

Applicable procedures and codes may include:

relevant state/territory roads and traffic authority driving regulations and licence requirements pertaining to coaches/buses
relevant state/territory road rules
relevant state/territory OH&S legislation
relevant state/territory fatigue management regulations
relevant state/territory environmental protection legislation

Unit Sector(s)

Not applicable.

Competency Field

C - Driving Vehicle

TLID1007C Operate a forklift

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to operate a forklift, including checking forklift condition, driving the forklift to fulfil operational requirements, monitoring site conditions, and monitoring and maintaining forklift performance. Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory OH&S authority.

Application of the Unit

Operation of a forklift must be carried out in compliance with the licence requirements and regulations of the relevant state/territory authority.

Operation of a forklift is performed under some supervision, generally within a team environment. It involves the application of routine equipment operation principles and procedures to maintain the safety and operation of a forklift in a variety of operational contexts.

Licensing/Regulatory Information

Refer to Unit Descriptor

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Check forklift condition	<ul style="list-style-type: none">1.1 Condition of forklift is checked for compliance with OH&S and workplace requirements for warning devices, manufacturers specifications and the nature of the load shifting task1.2 Attachments are checked to ensure appropriate adjustment and operation1.3 Mirrors and seats are adjusted for safe operation by the driver1.4 Log books are checked and appropriate workplace documentation is completed in accordance with workplace requirements
2 Drive the forklift	<ul style="list-style-type: none">2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturers instructions2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning2.5 The forklift is parked, shut down and secured in accordance with manufacturers specifications, regulations and workplace procedures
3 Operate a forklift to handle loads	<ul style="list-style-type: none">3.1 The lifting task to be undertaken is appropriately planned and the correct lifting truck and attachments are selected3.2 The load is lifted, carried, lowered and set down in accordance with OH&S legislation, manufacturers specifications and company procedures

- 4 **Monitor site conditions**
 - 4.1 When selecting the most efficient route, hazards and traffic flow are identified and appropriate adjustments are made
 - 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs
- 5 **Monitor and maintain forklift performance**
 - 5.1 Performance and efficiency of vehicle operation is monitored during use
 - 5.2 Defective/irregular performance and malfunctions reported to relevant personnel
 - 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant duty of care requirements pertaining to the operation of a forklift

Relevant OH&S and environmental procedures and regulations

Workplace operating procedures

Forklift controls, instruments and indicators and their use

Forklift handling procedures

Procedures to be followed in the event of an operational emergency

Engine power management and safe operating strategies

Efficient driving techniques

Operating hazards and related defensive driving and hazard control techniques

Pre-operational checks carried out on forklift and related action

Principles of stress management when driving a forklift

Site layout and obstacles

Required skills:

Communicate effectively with others when operating a forklift

Read and interpret instructions, procedures, information and signs relevant to the operation of a forklift

Interpret and follow operational instructions and prioritise work

Complete documentation related to the operation of a forklift

Operate electronic communication equipment to required protocol

Work collaboratively with others when operating a forklift

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events when operating a forklift

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the operation of a forklift

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Identify points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)

Monitor performance of forklift and its equipment and take appropriate action where required

Ensure that a forklift and its equipment are maintained in terms of service schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Types of forklift may include:

counterbalance trucks
reach trucks
pallet trucks

Operations may be carried out in typical forklift operational situations, including:

operations conducted at day or night
typical weather conditions
on the open road
on a private road or worksite
while at a workplace

Customers may be:

internal or external

Workplaces may comprise:

large, medium or small worksites

Work may be conducted in:

restricted spaces
exposed conditions
controlled or open environments

Loads to be shifted may require:

special precautions

Loads to be shifted may be:

irregularly shaped
packaged or unpackaged
labelled or unlabelled
palletted or unpalletted

Hazards in the work area may include exposure to:

chemicals
dangerous or hazardous substances
movements of equipment, goods and materials

Personnel in the work area may include:

workplace personnel
site visitors
contractors
official representatives

Forklift handling procedures may include:	<ul style="list-style-type: none">starting a forkliftsteering and manoeuvring a forkliftaccelerating and brakingpositioning and stopping a forkliftreversing a forkliftoperating forklift controls, instruments and indicatorsusing defensive driving techniquesmanaging engine performance

Competency Field

D - Load Handling

TLID107C Shift materials safely using manual handling methods

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manual handling methods, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the manual lifting and movement of loads.

Work is performed under some supervision generally within a team environment.

Work involves the application of the basic principles for the safe lifting and movement of loads when shifting materials using manual handling methods as part of day-to-day work.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess risks arising from the relocation of the load	<p>1.1 Products, goods or materials to be relocated are identified</p> <p>1.2 Locations for storage are determined and potential routes to be followed are identified</p> <p>1.3 Effect of load relocation on original load base is predicted</p> <p>1.4 Points of balance are estimated</p> <p>1.5 Required clearances are compared to available space and adjustments made</p> <p>1.6 Effects of moving contents which may be loose, liquid, dangerous or hazardous are considered</p> <p>1.7 Potential risks in route(s) which may be followed are considered</p> <p>1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods</p> <p>1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified</p> <p>1.1 Team lifting processes are considered for application</p> <p>1.1 Appropriate personal protective equipment is worn</p>
2 Plan load relocation	<p>2.1 Relocation of the load is planned consistent with the code of practice for manual handling</p> <p>2.2 Process for relocating load is proposed including predicting and planning for potential difficulties</p> <p>2.3 Proposed process is checked against code of practice and workplace procedures for compliance</p>

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and OH&S requirements
- 3.2 Applications appropriate for team relocation of load are identified
- 3.3 Team lifting tasks are coordinated
- 3.4 Planned process and route are followed
- 3.5 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
- 3.6 Relocation is checked to see that it meets work requirements, with any variance(s) reported

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines concerning the manual lifting and movement of loads

Risks when manually lifting and handling materials and goods and related precautions to control the risk, including: the load on the spine during lifting; controlled actions on a movement during lifting; rotation and side movement of the spine during lifting; postures and positions during lifting; work layout; the type, weight and position of the load; frequency of shifting operations; distance over which load is to be shifted; and time allowed for the shifting of the load

Workplace procedures and policies for the handling of furniture and effects

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when manually lifting and handling materials and goods

Read and interpret instructions, procedures and information relevant to the manual lifting and handling of materials and goods

Interpret and follow operational instructions and prioritise work

Work collaboratively with others when manually lifting and handling materials and goods

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when manually lifting and handling materials and goods in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected situations that may occur when manually lifting and handling materials and goods

Apply precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in loads and materials in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Materials to be shifted may include:	goods equipment and tools cleaning materials components and parts of vehicles and equipment such as tyres, batteries, lifting gear, etc. materials used in the course of work such as drums of fuel, raw materials, packaging, etc.
Loads to be shifted may be:	irregularly shaped packaged or unpackaged labelled or unlabelled
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials
Personnel in the work area may include:	workplace personnel site visitors contractors official representatives
Communication in the work area may include:	phone electronic data interchange

	fax
	email
	internet
	radio
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Information/documents may include:	goods identification numbers and codes
	manifests, bar codes, goods and container identification
	manufacturers specifications for equipment/tools
	workplace procedures and policies
	supplier and/or client instructions
	material safety data sheets
	codes of practice including the National Standards for Manual Handling and the Industry Safety Code
	relevant legislation, regulations and related documentation
	award, enterprise bargaining agreement, other industrial arrangements
	standards and certification requirements
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may include:	relevant state/territory OH&S legislation
	relevant state/territory environmental

protection legislation
workplace relations regulations
workers compensation regulations
licence, patent or copyright arrangements
dangerous goods and air freight regulations
export/import/quarantine/bond requirements
marine orders

Competency Field

D - Load Handling

TLID1307C Move materials mechanically using automated equipment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, high level order pickers, conveyor systems, and mechanised pallet movers. This includes selecting appropriate mechanical moving equipment (where relevant), moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation.

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the movement of materials mechanically using automated equipment.

Work is performed under limited or minimum supervision. It involves the application of the basic principles and routine procedures for the safe movement of materials mechanically using automated equipment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Select load moving equipment	<p>1.1 The mechanised handling equipment, the route to be taken and procedures to be used are selected appropriate to the characteristics of the goods</p> <p>1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, OH&S requirements and workplace procedures</p>
2 Move goods	<p>2.1 Goods are moved using the selected materials handling equipment in accordance with occupational health and safety regulations, manufacturers instructions and company procedures</p> <p>2.2 Problems in the movement of goods and materials using the automated equipment are identified and are reported in accordance with workplace procedures</p>
3 Check goods and complete documentation	<p>3.1 Moved goods are inspected for possible damage during transit/movement and appropriate action is taken</p> <p>3.2 All required documentation is completed for the tracking of the moved goods in accordance with company requirements</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to the use of automated equipment to move materials mechanically

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the use of automated equipment to move materials mechanically

Focus of operation of work systems, equipment, management and site operating systems for the use of automated equipment to move materials mechanically

The purpose, characteristics, capabilities, requirements and limitations of the automated materials moving equipment

Problems that may occur during the use of automated equipment to move materials mechanically and appropriate action that can be taken to resolve the problems

Risks when using automated equipment to move materials and related precautions to control the risks

Documentation and record requirements

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when using automated equipment to move materials mechanically

Read and interpret instructions, procedures, information and signs relevant to the use of automated equipment to move materials mechanically

Interpret and follow operational instructions and prioritise work

Complete documentation related to the use of automated equipment to move materials mechanically

Operate electronic communication equipment to required protocol

Work collaboratively with others when using automated equipment to move materials

mechanically

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using automated equipment to move materials mechanically in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of automated equipment and take appropriate action where required

Ensure servicing of automated equipment in terms of maintenance schedule and standard operating procedures

Check and replenish fluids (where applicable) and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The operations may be conducted:	in a range of work environments by day or night in a range of typical weather conditions
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Mechanised equipment may include a range of goods and materials handling equipment such as:	automatic guided vehicle tow motors high level order picker conveyor system mechanised pallet mover
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios high visibility clothing
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials moving and rotating equipment and vehicles
Personnel in the work area may include:	workplace personnel site visitors contractors official representatives

Communication in the work area may include:

phone
electronic data interchange
fax
email
internet
radio
oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Information/documents may include:

goods identification numbers and codes
manifests, bar codes, goods and container identification
manufacturers instructions concerning the use and servicing of automated mechanical equipment
workplace procedures and policies
supplier and/or client instructions
material safety data sheets
codes of practice including the National Standards for Manual Handling and the Industry Safety Code
relevant legislation, regulations and related documentation
award, enterprise bargaining agreement, other industrial arrangements
standards and certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may include:

relevant state/territory OH&S legislation
relevant state/territory environmental protection legislation
workplace relations regulations
workers compensation regulations

ADG Code and regulations

INTRODUCTION

Unit Descriptor	This unit involves the skills and knowledge required to identify and label explosives and dangerous goods, including assessing explosives/dangerous goods, handling explosives/dangerous goods in accordance with regulatory requirements, and labelling explosives/dangerous goods in accordance with regulatory requirements.
Employability Skills	The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.
Application of the Unit	<p>Work must be carried out in compliance with the regulatory requirements of the relevant Australian state/territory authorities concerned with the carriage of explosives and dangerous goods including the Australian Dangerous Goods and Australian Explosives Codes.</p> <p>Work is performed under limited or minimum supervision. It involves the application of standard procedures and regulatory requirements for the identification and labelling of explosives and dangerous goods.</p>
Competency Field	D-Load Handling

ELEMENT

PERFORMANCE CRITERIA

1 Assess explosives/dangerous goods	<p>1.1 Load is checked for dangerous goods/explosives in accordance with the relevant codes and government regulations</p> <p>1.2 Types of dangerous goods and explosives are identified from labels, DG declarations and placarding in accordance with workplace procedures and all required action is taken to ensure compliance with relevant government regulations and ADG/Australian Explosives Codes as applicable</p> <p>1.3 Hazards posed by load are identified from labels and material safety data sheets (MSDS)</p>
2 Handle explosives/dangerous goods	2.1 Identified explosives/dangerous goods and explosives are handled and loaded/unloaded in accordance with regulatory

- s goods requirements, codes, National Load Restraint Guide, and employer policy
- 2.2 Appropriate personal protective equipment is used when handling dangerous goods and explosives in accordance with class, subsidiary risk and MSDS information
- 2.3 Handling of different types of load takes into account the identified hazards posed by the dangerous goods/explosives concerned
- 2.4 When loading/storing dangerous goods/explosives, segregation procedures are followed according to the class and subsidiary risk information
- 3 Label explosives/dangerous goods
- 3.1 All packages/containers are labelled with the class and subsidiary risk in accordance with ADG/Australian Explosives Codes as applicable
- 3.2 A dangerous goods declaration is included with manifest and other shipping documents
- 3.3 Vehicles carrying explosives/dangerous good or explosives are placarded in accordance with ADG/Australian Explosives Codes as applicable
- 4 Complete documentation
- 4.1 All required transport documents are completed in accordance with ADG/Australian Explosives Codes as applicable

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

- | | |
|---------------------|---|
| Required knowledge: | <ul style="list-style-type: none">• Relevant Australian and state/territory regulations and codes pertaining to the identification and labelling of explosives and dangerous goods including the ADG and Australian Explosives Codes• OH&S procedures and guidelines concerning the lifting and movement of loads• Risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk• Workplace procedures and policies for the identification and labelling of explosives• Characteristics of explosives and dangerous goods relevant to handling and transport• Compatibility of various types of explosives and dangerous goods• Site layout and obstacles• Housekeeping standards procedures required in the workplace• |
| Required skills: | <ul style="list-style-type: none">• Communicate effectively with others when loading, unloading and handling explosives and dangerous goods• Read and interpret instructions, procedures, information and signs relevant to the loading, unloading and handling of explosives and dangerous goods• Interpret material safety data sheets, containers and goods coding, IMDG markings and other information describing explosives and dangerous goods including, where applicable, emergency information panels• Interpret and follow operational instructions and prioritise work• Complete documentation related to the loading, unloading and handling of explosives and dangerous goods• Correctly mark/label explosives and dangerous goods• Operate electronic communication equipment to required protocol• Work collaboratively with others when loading, unloading and handling explosives and dangerous goods• Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others• Promptly report and/or rectify any identified problems that may occur when loading, unloading and handling explosives and dangerous goods in accordance with regulatory requirements and workplace procedures• Implement contingency plans for unexpected events that may arise when loading, unloading and handling explosives and dangerous goods• Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading, unloading and handling of explosives and dangerous goods• Monitor work activities in terms of planned schedule |

- Modify activities depending on differing operational contingencies, risk situations and environments
- Apply fatigue management knowledge and techniques
- Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- Operate and adapt to differences in equipment in accordance with standard operating procedures
- Select and use required personal protective equipment conforming to industry and OH&S standards
-

 - Australian Marine Orders and the

International Maritime Dangerous Goods Code

- IATA Dangerous Goods by Air regulations
- Australian and International Explosives Codes
- relevant state/territory environmental protection legislation
- relevant state/territory OH&S legislation

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:
 - the underpinning knowledge and skills
 - relevant legislation and workplace procedures
 - other relevant aspects of the range statement
 -

Context of and specific resources for assessment

- Performance is demonstrated consistently over a period of time and in a suitable range of contexts
 - Resources for assessment include:
 - a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or
 - access to an appropriate range of relevant operational situations in the workplace
 - In both real and simulated environments, access is required to:
 - relevant and appropriate materials and/or equipment, and/or
 - applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
 -

Method of assessment

- Assessment of this unit must be undertaken by a registered training organisation
 - As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests
 - Practical assessment must occur:
 - through appropriately simulated activities at the registered training organisation, and/or
 - in an appropriate range of situations in the workplace

TLID2007C Care for livestock in transit

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to prepare and care for livestock in transit, including making preparations to transport livestock, caring for and controlling livestock in transit, and using appropriate animal husbandry techniques, as required.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and industry codes of practice for the care of livestock in transit.

Work is performed under limited or minimum supervision generally within a team environment. It involves the application of the basic principles and routine procedures to the care of livestock during transit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare to transport livestock	<ul style="list-style-type: none">1.1 Condition, quality and quantity of livestock to be transported is checked prior to transport operation in accordance with client requirements and workplace policy1.2 Any poor quality livestock is identified and reported to specified personnel in accordance with workplace policy1.3 Feed provisions and other requirements for livestock prior to and during transit are identified and organised1.4 Portable stockyards are assembled as required
2 Care for and control livestock in transit	<ul style="list-style-type: none">2.1 Condition of livestock is regularly monitored during loading, transit and unloading and appropriate action is taken in terms of relevant government regulations, workplace policy, and humane and permit requirements2.2 Working dogs and appropriate handling equipment are used to aid the handling of livestock during loading and unloading operations in accordance with regulations and workplace procedures2.3 Required action is taken for the care and well-being of animals in the event of an accident during transit2.4 Distressed stock is handled in an appropriate manner in accordance with government regulations and workplace policies
3 Use animal husbandry techniques	<ul style="list-style-type: none">3.1 Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in terms of relevant government regulations, workplace policy, and humane and permit requirements3.2 Prescribed medication is administered to livestock in accordance with veterinary directions and workplace policy

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulations concerning the care for livestock in transit

OH&S procedures and guidelines concerning the lifting and movement of loads

Risks when caring for livestock during transit and related precautions to control the risk

Workplace procedures and policies for the caring for livestock during transit

Specialised livestock handling equipment and procedures for its use

Insurance rights and responsibilities

Housekeeping standards and procedures when caring for livestock during transit

Methods of securing livestock during transit

Required skills:

Communicate effectively with others when caring for livestock in transit

Read and interpret instructions, procedures and information relevant to the care of livestock in transit

Interpret and follow operational instructions and prioritise work

Complete documentation related to the care of livestock in transit

Work collaboratively with others when caring for livestock in transit

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when caring for livestock in transit in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected events during the care of livestock in transit

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to animals or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Identify and correctly use equipment required to care for livestock during transit

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Livestock being cared for in transit may include any livestock able to be transported, such as:

sheep
cattle
horses
goats
pigs
chickens

Customers may be:

internal or external

Operations may be conducted:

in a range of work environments and weather conditions
by day or night

Work may be conducted in:

restricted spaces
exposed conditions
controlled or open environments
a workplace, warehouse or depot
in a vehicle on the road
at a client's workplace

Handling operations may be carried out both manually and with the aid of working dogs and livestock handling equipment, including:

cattle prods
restraining devices
portable cattle yards

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Personal protective equipment may include:

gloves
safety headwear
safety footwear

Information/documents may include:

industry codes and government regulations

for the care of livestock during transit
workplace documentation
client instructions
workplace procedures and policies for the
care of livestock during transit
codes of practice including the National
Standards for Manual Handling and the
Industry Safety Code
award, enterprise bargaining agreement,
other industrial arrangements
guidelines on livestock husbandry relevant to
the care of livestock during transit
standards and certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may
include:

state/territory mass and loading regulations
Australian and state/territory regulations
relevant to the care of livestock during transit
relevant state/territory environmental
protection legislation
relevant state/territory OH&S legislation

Competency Field

D - Load Handling

TLID207C Shift a load using manually-operated equipment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to shift loads using manually-operated mechanical equipment, including assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation with the aid of the equipment in accordance with the plan.

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations concerning the shifting and movement of loads using manually-operated equipment.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles for the safe shifting of loads using manually-operated equipment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess risks arising from the relocation of the load	<ul style="list-style-type: none">1.1 Products, goods or materials to be relocated are identified1.2 Location for storage is determined1.3 Routes to be followed are identified1.4 Points of balance are estimated1.5 Effect of moving contents which may be loose, liquid, dangerous or hazardous are considered1.6 Potential risks in route(s) which may be followed are considered1.7 Lifting equipment to minimise potential risks is identified1.8 Appropriate personal protective equipment is worn
2 Plan load relocation	<ul style="list-style-type: none">2.1 Load shifting equipment is selected in accordance with workplace procedures2.2 Safe procedures for using lifting equipment are identified, including the calculation of Safe Working Load (SWL) and/or Working Load Limit (WLL) for weight of goods to be moved2.3 Process for relocating load is proposed including predicting and planning for potential difficulties2.4 Proposed process is checked against relevant code of practice and workplace procedures for compliance2.5 Lifting equipment and accessories are checked for safe operation in accordance with manufacturers instructions and workplace procedures
3 Relocate load	<ul style="list-style-type: none">3.1 Any unsafe equipment is reported to appropriate personnel in accordance with workplace procedures3.2 Planned process and route are followed using

equipment within necessary range of limitations

- 3.3 Relocated materials are set down without damage to goods, personnel or equipment and checked for stability
- 3.4 Relocation is checked to see that it meets work requirements, and any variances are reported
- 3.5 Equipment is returned to storage area in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines concerning the use of manually-operated equipment to shift loads

Risks when using manually-operated equipment to shift loads and related precautions to control the risk

Workplace procedures and policies for the shifting of goods and materials using manually-operated equipment

Problems that may arise when using manually-operated equipment to shift loads and actions that should be taken to prevent or solve them

Housekeeping standards procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when using manually-operated equipment to shift loads

Read and interpret instructions, procedures, information and signs relevant to the shifting of loads using manually-operated equipment

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Work collaboratively with others when using manually-operated equipment to shift loads

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when using manually-operated equipment to shift loads in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the shifting of loads using manually-operated equipment

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments

Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials
Personnel in the work area may include:	workplace personnel site visitors contractors official representatives
Communication in the work area may	phone

include:	electronic data interchange fax email internet radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios high visibility clothing
Information/documents may include:	goods identification numbers and codes manifests, bar codes, goods and container identification manufacturers instructions concerning the use and servicing of manually-operated load shifting equipment workplace procedures and policies supplier and/or client instructions material safety data sheets codes of practice including the National Standards for Manual Handling and the Industry Safety Code relevant legislation, regulations and related documentation award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements quality assurance procedures emergency procedures

Applicable regulations and legislation may include:

relevant state/territory OH&S legislation
relevant state/territory environmental protection legislation
workplace relations regulations
workers compensation regulations
licence, patent or copyright arrangements
dangerous goods and air freight regulations
export/import/quarantine/bond requirements
marine orders

TLID407C Load and unload goods/cargo

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to load and unload goods and cargo, including loading and unloading goods, securing and protecting the load and completing all required documentation.

Application of the Unit

Work must be carried out in compliance with the relevant regulations/permit requirements including those of the relevant state/territory roads and traffic authority concerning the loading of goods/cargo.

Work is performed under some supervision generally within a team environment. It involves the application of the basic principles, routine procedures and regulatory/permit requirements to the loading and unloading of goods/cargo.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Load and unload goods/cargo	<ul style="list-style-type: none">1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures1.2 Dangerous or hazardous goods are identified and handled in accordance with the Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements1.3 Load is packed/unpacked to make safe and effective use of available spaces1.4 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures1.5 Lifting aids and appliances are selected and used to aid loading procedures in compliance with workplace procedures and safety legislation1.6 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and the balance of the remaining load1.7 Goods requiring special handling and/or documentation are identified and appropriate procedures followed1.8 Relocated material is restacked appropriate for the transport method, safe height, weight loading, size and crushability of the goods
2 Secure and protect load	<ul style="list-style-type: none">2.1 The distribution of the load is checked to ensure that it is even, legal and within safe working capacity2.2 Load is checked to ensure that dangerous goods and hazardous substances are appropriately segregated in accordance with the ADG Code2.3 Load is secured using the correct load restraint and protection equipment for different loads, carrying

and storage conditions

- 2.4 The load is protected in accordance with legal and workplace safety requirements

3 Complete documentation

- 3.1 The load is inspected and checked for security to travel in accordance with relevant regulations/permit requirements and the ADG Code where applicable
- 3.2 All required documentation for the goods is completed in accordance with workplace requirements including the ADG Code where applicable

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant Australian standards and regulations including state/territory mass and loading regulations

National Load Restraint Guide

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances

OH&S procedures and guidelines concerning the lifting and movement of loads

Risks when loading and unloading goods/cargo and related precautions to control the risk

Security awareness requirements when loading and unloading vehicles and in particular the recognition, isolation and reporting of suspicious cargo and goods

Workplace procedures and policies for the loading and unloading of goods/cargo

Housekeeping standards procedures required in the workplace

Methods of securing a load

Site layout and obstacles

Problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve them

Required skills:

Communicate effectively with others when loading and unloading goods and cargo

Read and interpret instructions, procedures, information, signs and labels relevant to the loading and unloading of goods and cargo

Identify containers and goods coding, ADG and IMDG markings and, where applicable, emergency information panels and take appropriate action

Interpret and follow operational instructions and prioritise work

Complete documentation related to the loading and unloading of goods and cargo

Operate electronic communication equipment to required protocol

Estimate the size, shape and special requirements of loads and take appropriate action

Work collaboratively with others when loading and unloading goods and cargo

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when loading and unloading goods and cargo in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unexpected situations that may occur when loading and unloading goods and cargo

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the loading and unloading of goods and cargo

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in cargo and equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Goods/cargo to be loaded or unloaded may:	require special precautions
Loads to be shifted may be:	irregularly shaped packaged or unpackaged labelled or unlabelled palletted or unpalletted
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials
Personnel in the work area may include:	workplace personnel site visitors contractors official representatives
Communication in the work area may include:	phone electronic data interchange fax email internet radio oral, aural or signed communications

Loading operations may be carried out:	manually with the aid of lifting equipment and/or appliances
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses two-way radios high visibility clothing
Information/documents may include:	goods identification numbers and codes, including ADG and IMDG markings and HAZCHEM signs manifests, bar codes, goods and container identification manufacturers specifications for equipment/tools workplace procedures and policies for the loading and unloading of goods/cargo ADG Code and associated regulations supplier and/or client instructions material safety data sheets EPGs and Initial Response Guide (HB76:1998 or equivalent) codes of practice including the National Standards for Manual Handling and the Industry Safety Code award, enterprise bargaining agreement, other industrial arrangements relevant Australian standards and certification requirements quality assurance procedures emergency procedures Load Restraint Guide

Applicable regulations and legislation may include

relevant Australian standards and regulations including state/territory mass and loading regulations

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:

Australian and International Dangerous Goods Codes

Australian Marine Orders and the International Maritime Dangerous Goods Code

IATA Dangerous Goods by Air regulations

Australian and International Explosives Codes

relevant state/territory environmental protection legislation

relevant state/territory OH&S legislation

TLIE107C Present routine workplace information

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to present routine workplace information in accordance with workplace requirements including preparing and presenting routine workplace documents and preparing and delivering oral presentations as part of routine work.

Application of the Unit

Work must be carried out in accordance with workplace requirements concerning the preparation and presentation of routine workplace information.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and relevant regulatory requirements when preparing and presenting routine workplace information as part of work activities in the stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare and present document	<ul style="list-style-type: none">1.1 Purpose of the document is identified1.2 Sources of information are established1.3 Information is collated and presented in a logical order1.4 Document style is selected to match purpose and workplace pro-formas1.5 Language is clear, concise and conveys appropriate information to target audience1.6 Document is checked to ensure that it follows workplace requirements1.7 Completed document is presented to appropriate personnel as required
2 Prepare and deliver oral presentation	<ul style="list-style-type: none">2.1 Purpose of oral presentation is established2.2 Target audience is identified2.3 Information is gathered and sorted2.4 Visual, audio and physical support media are identified or developed, if required, in accordance with workplace procedures2.5 Presentation is trialled and adjusted to suit target audience2.6 Information is presented in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to workplace activities

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for preparing and presenting routine workplace information

Focus of operation of work systems, equipment, management and site operating systems for the preparation and presentation of routine workplace information

Documents, forms, and oral presentations required as part of routine workplace activities

Problems that may occur when preparing and presenting routine workplace information and appropriate action that can be taken to resolve the problems

Required skills:

Communicate effectively with others when preparing and presenting routine workplace information

Read and interpret instructions, procedures and information relevant to the preparation and presentation of routine workplace information

Interpret and follow operational instructions and prioritise work

Complete documentation related to the preparation and presentation of routine workplace information

Receive, acknowledge and send messages with available communications equipment

Work collaboratively with others when preparing and presenting routine workplace information

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when preparing and presenting routine workplace information in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Identify, select and use relevant equipment, processes and procedures when preparing and presenting routine workplace information

Use presentation packages for slides, overhead projector, computer presentations

Modify activities depending on differing operational contingencies and environments

Work systematically with required attention to detail

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Workplace information to be prepared and presented may include:	routine reports, documentation and forms that are required to be completed to instructions, or pro-formas as part of routine job requirements
Reports/forms may be presented:	orally, in writing or via a computer
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods, materials and vehicular traffic
Personal protective equipment needed in the work area may include:	gloves safety headwear and footwear safety glasses two-way radios protective clothing high visibility clothing
Communication in the work area may include:	phone fax email electronic data transfer (EDI) RF systems radio

	oral, aural or signed communications
Consultative processes may involve	staff members management union representatives industrial relations, Occupational Health and Safety specialists other professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Information/documents may include:	goods identification numbers and codes manifests, bar codes, and container identification/serial number Australian and international codes of practice and regulations relevant to workplace activities Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances (where applicable) operations manuals, job specifications and induction documentation manufacturers specifications for equipment workplace procedures and policies supplier and/or client instructions dangerous goods declarations and material safety data sheets (where applicable) award, enterprise bargaining agreement, other industrial arrangements relevant Australian standards and certification requirements quality assurance procedures emergency procedures
Applicable regulations and legislation may include:	relevant codes and regulations for the transfer of cargo/freight

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances (where applicable)

TLIE1207C Consolidate manifest documentation

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to consolidate manifest documentation including the identification of the documentation required and the processing of the information in accordance with workplace procedures.

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice and regulations for the carriage of freight.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of routine principles and procedures to efficiently and effectively consolidate manifest documentation.

Licensing/Regulatory Information

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify required documentation	<ul style="list-style-type: none">1.1 Relevant documentation is collated and checked to ensure all appropriate information has been entered1.2 Omissions/discrepancies are noted and reported in accordance with workplace procedures1.3 Identification codes, manifest codes, details of dangerous goods declarations and pertinent data are entered into record system in accordance with workplace procedures and, where required, statutory requirements1.4 Relevant clearances for the movement of goods/freight are checked and, where appropriate, actions to rectify deficiencies are followed in accordance with workplace procedures
2 Process documentation	<ul style="list-style-type: none">2.1 Files/system are amended including the appending of all relevant data/information2.2 Tracking/monitoring processes are completed and documentation is forwarded in accordance with workplace procedures and, where required, statutory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant codes of practice and legislative requirements including Australian Dangerous Goods Code and relevant freight regulations

Relevant OH&S and environmental procedures and regulations

Workplace procedures to be followed in the consolidation of manifests

Operational procedures for document control

Sources of information/documentation needed when consolidating manifests

Customer service policies and procedures

Required skills:

Communicate effectively with others when consolidating manifest documentation

Read and interpret instructions, procedures, information and labels relevant to the consolidation of manifest documentation

Interpret and follow operational instructions and prioritise work

Complete documentation related to the consolidation process

Work collaboratively with others when consolidating manifest documentation

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when consolidating manifest documentation in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when consolidating manifest documentation

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and

environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

TLIE1307C Apply workplace statistics

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to apply statistical data in the workplace including identifying situations where statistics are used in the workplace, collecting numerical data, processing and presenting data, and interpreting trends and patterns from numerical data.

Application of the Unit

The application of workplace statistics is carried out as an integral part of work operations in the context of the workplace concerned.

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures. This includes the application of established statistical principle

A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify situations where statistics are used in the workplace	1.1 Types of statistical representations of data are identified 1.2 Users of statistical data in the workplace are identified 1.3 Statistical data representations are matched for appropriate workplace applications
2 Collect numerical data	2.1 Purpose of data collection is identified 2.2 Sources of information are established 2.3 Data collection methods are used 2.4 Mathematical processes are used to arrange data 2.5 Data collected is checked for accuracy 2.6 Potential for inaccurate results arising from variables is estimated and described
3 Process and present data	3.1 Data collected is represented in graphs, tables, averages and percentages as required 3.2 Spreadsheets and flowcharts are used to present data
4 Interpret trends and patterns from numerical data	4.1 Non-conforming results outside of the predicted outcome are noted and reasons identified 4.2 Trends or patterns in data are noted 4.3 Possible reasons for trends or patterns are generated 4.4 Potential solutions are identified

- 4.5 Appropriate techniques are used to encourage participation of team/group members to interpret and use statistical data
- 5 **Apply outcomes of statistical analysis to workplace operations**
 - 5.1 Interpreted data is used to identify possible improvements in work processes and organisation
 - 5.2 Appropriate action is initiated to implement identified strategies for the improvement of processes or work organisation in accordance with workplace procedures
 - 5.3 Improvements are statistically monitored and evaluated in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant procedures and duty of care requirements

Relevant OH&S responsibilities

Workplace protocols and procedures for applying workplace statistics within work activities

Focus of operation of recording, reporting and statistical analysis systems and resources

Resource availability including the processing capacity of equipment and software systems for statistical analysis of data

Coaching and mentoring approaches to support team members to develop knowledge and skills in statistical collection, collation and analysis

Workplace business policies and plans including procedures for reporting performance

Required skills:

Communicate effectively with others when applying workplace statistics

Read and interpret instructions, procedures, and technical data relevant to the application of workplace statistics

Interpret and follow operational instructions and prioritise work

Complete documentation related to workplace statistics

Work collaboratively with others when applying workplace statistics

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems related to the application of workplace statistics in accordance with workplace procedures

Select and appropriately apply technology, information systems and procedures to workplace tasks

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	single and multi-site location large, medium and/or small companies
Services, products, risks, work systems and requirements may potentially:	vary across different sections of the workplace
Customer and supplier contact and coordination is:	a requirement of these operations
The key requirement of this unit is to:	interpret the data and provide appropriate, timely information on the outcomes of data analysis to appropriate personnel
Workplace applications of statistical data representations may include (examples only):	monitoring work flow inventory and stock levels customer surveys supplier and market analysis fleet control
Statistics may be generated from	raw data machine generated information complex, dedicated computerised facilities
Personnel in work area may include:	other employees and supervisors customers and suppliers external authorities and agencies management and union representatives industrial relations, Occupational Health and Safety specialists other professional or technical staff, contractors and maintenance personnel
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures

	established procedures
Information/documentation may include:	workplace procedures, policies and instructions
	guidelines relating to minimising risks to the environment and occupational health and safety requirements
	relevant agreements, codes of practice including the national standards for manual handling and the industry safety code
	legislation, regulations and related documentation
	reports of accidents and incidents within regulatory requirements and enterprise procedures
	workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information
	quality assurance procedures
Applicable regulations and legislation may include:	relevant regulations, standards and codes of practice
	relevant Australian and state/territory OH&S legislation
	equal employment legislation and related policies
	environmental protection regulations

TLIE1407C Compile and process export documentation

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to compile and process export documentation including assessing cargo for transport, preparing regulatory and commercial documentation, preparing transport documentation, and coordinating documentation in accordance with requirements.

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice and regulations for the export of freight.

Work is performed under general supervision. It involves the application of routine principles and procedures to compile and process export documentation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess cargo for transport	<p>1.1 Cargo for export is assessed in terms of commodity type and size, fair market value, shipping method, classification and conformity to domestic and foreign export/import requirements</p> <p>1.2 Customer is advised of discrepancies/anomalies and procedures for rectification in accordance with workplace procedures</p>
2 Prepare regulatory and commercial documentation	<p>2.1 Export packing lists are prepared from shipper's instructions including information regarding identifying marks and numbers, weights and measurements and package details</p> <p>2.2 Commercial documents, including invoices, banking and insurance requirements, are processed/prepared in accordance with regulatory and workplace procedures</p> <p>2.3 Lodgement instructions, where applicable, are prepared for forwarding to banking institutions</p> <p>2.4 Regulatory requirements are generated as required</p>
3 Prepare transport documentation	<p>3.1 Interim receipt/forwarding instructions are processed in accordance with shipping line requirements and workplace procedures</p> <p>3.2 Bill of lading/airway bills are obtained from shipping agent/company and processed in accordance with workplace procedures</p> <p>3.3 Additional transport documentation for export is generated/processed as required</p>
4 Coordinate documentation requirements	<p>4.1 Documentation is collated and checked to ensure it is complete and accurate</p> <p>4.2 Procedures for the lodgement of documents, including destination points and required timeframes, are recorded</p> <p>4.3 Export documentation is forwarded in accordance</p>

with workplace procedures and export schedule

- 4.4 Documents are filed/stored in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant agreements, codes of practice and legislative requirements including Australian Dangerous Goods Code and local and international freight regulations

Relevant OH&S and environmental procedures and regulations

Workplace procedures for the compilation and processing of export documentation

Contacts and sources of information/documentation needed when compiling and processing export documentation

Customer service policies and procedures

Documentation requirements of banking institutions, governments and insurance companies

Required skills:

Communicate effectively with others when compiling and processing export documentation

Read and interpret instructions, procedures, information and labels relevant to the compilation and processing of export documentation

Identify, read and interpret the various types of export documentation and their appropriate usage

Interpret and follow operational instructions and prioritise work

Complete and process export documentation

Use relevant communications equipment when organising the international transport of freight

Use relevant computerised systems for communication and document generation

Work collaboratively with others when compiling and processing export documentation

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when compiling and processing export documentation in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when compiling and processing export documentation

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Organisational activities may cover: movement of equipment, goods, materials and various forms of freight transport
may be conducted by day or night

Customers may be: internal or external

Requirements for work may include: site restrictions and procedures
relevant domestic and international regulations
specified loading operations
communications equipment
hours of operation
authorities and permits
incident/accident breakdown procedures

Transport documentation for export may include: bill of lading
airway bills
export wharfage
quarantine documentation
parcel post receipt
commerce markings

Regulatory requirements may involve: export permits and clearances
goods certificates
financial duties

Forms of transport may include: road
rail
sea
air
multi-modal

Forms of documentation include: packing specifications and lists
manifests

	invoices
	drafts
	instructions
	letters
Consultative processes may involve:	other employees and supervisors
	suppliers, potential customers and existing clients
	relevant authorities
	shipping lines
	banking institutions
	other agencies
	management and union representatives
	OH&S specialists
	other maintenance, professional or technical staff
Communications systems may involve:	telephone
	fax
	email
	electronic data transfer of information (EDI)
	mail
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	workplace procedures
	organisational procedures
	established procedures
Documentation/records may include:	operations manuals, job specifications and procedures and induction documentation
	competency standards and training materials
	manufacturers/client specifications, instructions and labelling advice including material safety data sheets
	workplace operating procedures and policies
	supplier and/or client instructions
	Australian and international standards, criteria and certification requirements

	communications technology equipment, oral, aural or signed communications
	OH&S procedures
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may include:	international transport regulations, codes and procedures
	Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:
	Australian and International Dangerous Goods Codes
	Australian Marine Orders and the International Maritime Dangerous Goods Code
	IATA Dangerous Goods by Air regulations
	Australian and International Explosives Codes
	regulations and codes of practice for the import and export of cargo
	relevant Australian and international standards and certification requirements
	relevant state/territory OH&S legislation
	relevant state/territory environmental protection legislation
	other regulations and legislative requirements pertaining to embargos, tariffs, quotas and prohibited goods

Unit Sector(s)

Not applicable.

Competency Field

E - Communication and Calculation

TLIE1807B Maintain freight records

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to maintain freight records in accordance with workplace requirements including the recording of all freight receipts and freight despatch documentation in accordance with workplace procedures and relevant regulatory requirements.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the maintenance of freight records.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the maintenance of freight records as part of work activities in the transport, distribution and/or allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Record freight receipt	<ul style="list-style-type: none">1.1 Freight is identified and consignment/cartnote details are confirmed1.2 Documentation is appropriately actioned, following workplace procedures and legislative requirements1.3 Dangerous goods are identified and appropriate documentation prepared and attached, following workplace procedures and legislative requirements1.4 Freight information is recorded on workplace freight tracking system1.5 Freight is directed for loading or storage as indicated by documentation
2 Record freight despatch	<ul style="list-style-type: none">2.1 Documentation for freight despatch is checked, verified and forwarded in accordance with workplace procedures2.2 Loads not cleared due to incorrect documentation are appropriately processed, according to workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the maintenance of freight records, including the Australian Dangerous Goods Code and relevant bond, quarantine or other legislative requirements

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the international codes and regulations relevant to the maintenance of freight records

Focus of operation of work systems, equipment, management and site operating systems for the maintenance of freight records

Problems that may occur when maintaining freight records and appropriate action that can be taken to resolve the problems

Types of goods and related handling and documentation requirements including dangerous goods and hazardous substances

Documentation requirements for the maintenance of freight records including workplace freight tracking system

Housekeeping standards procedures required in the workplace

Freight transport timetables, yard/terminal facilities, and site layout

Required skills:

Communicate effectively with others when maintaining freight records

Read and interpret instructions, procedures, information and labels relevant to the maintenance of freight records

Interpret and follow operational instructions and prioritise work

Complete documentation related to the maintenance of freight records

Operate electronic communication equipment to required protocol

Work collaboratively with others when maintaining freight records

Adapt appropriately to cultural differences in the workplace, including modes of behaviour

and interactions with others

Promptly report and/or rectify any identified problems that may arise when maintaining freight records in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the maintenance of freight records

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and use relevant computer, communication and office equipment when maintaining freight records

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Freight includes all forms of freight. Some freight may involve:	special handling and storage requirements, including temperature controlled goods, dangerous goods, explosives and hazardous substances
Freight documentation may include a range of data provided on paper and in electronic form relating to freight movement, including:	cartnotes delivery noted internal documentation used for freight tracking special clearances consignment notes dangerous goods certificates and declarations authorised weighbridge certificates list of contents
Freight tracking system includes:	manual and computer-based tracking systems
Hazards in the work area may include:	exposure to chemicals exposure to dangerous or hazardous substances movements of equipment, goods, materials and vehicular traffic
Consultative processes may involve:	other employees and supervisors suppliers, customers and clients

	drivers and agents
	relevant authorities and institutions
	management and union representatives
	industrial relations and OH&S specialists
	other maintenance, professional or technical staff
Communication in the work area may include:	phone
	electronic data interchange (EDI)
	fax
	email
	internet
	RF systems
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Information/documents may include:	goods identification numbers and codes
	manifests, cartnotes, delivery notes, special clearances, consignment notes, authorised weighbridge certificates, and special clearances
	internal documentation used for freight tracking
	codes of practice and regulations relevant to the receiving of goods
	Australian and international regulations and codes of practice for the transport of dangerous goods and hazardous substances
	operations manuals, job specifications and

induction documentation
manufacturers specifications for equipment
workplace procedures and policies
supplier and/or client instructions
dangerous goods declarations and material
safety data sheets (where applicable)
award, enterprise bargaining agreement,
other industrial arrangements
relevant Australian standards and
certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may
include:

relevant codes and regulations for the
maintenance of freight records
Australian and international regulations and
codes of practice for the transport of
dangerous goods and hazardous substances,
including:

Australian and International Dangerous
Goods Codes

Australian Marine Orders and the
International Maritime Dangerous Goods
Code

IATA Dangerous Goods by Air regulations

Australian and International Explosives
Codes

privacy legislation
water and road use and licence arrangements
export/import/quarantine/bond requirements
marine orders
relevant state/territory OH&S and
environmental protection legislation
workplace relations regulations
workers compensation regulations

Unit Sector(s)

Not applicable.

Competency Field

E - Communication and Calculation

TLIE207C Estimate/calculate mass, area and quantify dimensions

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to estimate and calculate mass and area and quantify dimensions of loads as part of work functions in the transport, stevedoring, warehousing, and/or storage sectors. This includes estimating loads to be transported or placed in storage, identifying mass, area and volume limitations of available transport/storage systems and carrying out calculations required to organise load(s) to match identified transport/storage limitations.

Application of the Unit

Work must be carried out in compliance with workplace requirements and any relevant regulations related to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace tasks.

Work is performed under some supervision generally within a team environment. It involves the application of basic mathematical principles and operations to the estimation and/or calculation of mass and area and the quantification of dimensions as part of workplace activities in the transport, stevedoring, warehousing, distributi

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Estimate loads for transport or storage	<ul style="list-style-type: none">1.1 Order forms/work orders are read and requirements are noted1.2 Shape, balance characteristics, dimensions and mass of the load(s) are identified1.3 Area/volume required for storage is estimated1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
2 Estimate load limits of transport and/or storage	<ul style="list-style-type: none">2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures2.2 Capacity of transport and storage systems in terms of mass, area and volume are calculated
3 Organise load	<ul style="list-style-type: none">3.1 Load(s) is restricted to allowable range(s)3.2 Load(s) is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems3.3 Appropriate workplace documentation is completed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to workplace activities

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities including the quantification of dimensions

Basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division

Focus of operation of work systems, equipment, management and site operating systems for the transport and/or storage of goods and stock

Problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities and appropriate action that can be taken to resolve the problems

Documentation requirements for the workplace activities concerned

Required skills:

Communicate effectively with others when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities

Read and interpret instructions, procedures, information and labels relevant to the estimation and/or calculation of mass, area and volumes of loads and transport and storage facilities

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when estimating and/or calculating mass, area and volumes of loads and transport and storage facilities in accordance with workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify, select and use relevant calculators, computing and office equipment when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Estimating/calculation tasks may include:	estimating loads to be transported or placed in storage identifying mass, area and volume limitations of available transport/storage systems carrying out calculations required to organise load(s) to match identified transport/storage limitations calculations and estimations of weights and dimensions of cargo and containers to be shifted, stored or lifted
Calculations may include mathematical operations of addition, subtraction, multiplication and division and may be carried out:	manually with the aid of a calculator with the aid of a computer using appropriate tables and/or charts
Consultative processes may involve:	other employees and supervisors suppliers, customers and clients relevant authorities and institutions management and union representatives industrial relations and OH&S specialists other maintenance, professional or technical staff

Communication in the work area may include:

phone
electronic data interchange (EDI)
fax
email
internet
radio
RF systems
oral, aural or signed communications

Hazards in the work area may include exposure to:

chemicals
dangerous or hazardous substances
movements of equipment, goods and materials

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Information/documents may include:

workplace procedures and policies
operations manuals, job specifications and induction documentation
goods identification numbers and codes
manifests, picking slips, merchandise transfers, stock requisitions and bar codes, goods and container identification/serial number
Australian and international codes of practice and regulations relevant to workplace activities including mass and loading regulations
Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
manufacturers specifications for equipment
supplier and/or client instructions
dangerous goods declarations and material safety data sheets (where applicable)

	award, enterprise bargaining agreement, other industrial arrangements
	relevant Australian standards and certification requirements

Competency Field

E - Communication and Calculation

TLIE307C Participate in basic workplace communication

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to participate effectively in basic workplace communication including communicating information about routine tasks, processes, events or skills, participating in group discussions to achieve appropriate work outcomes, and representing views of a group to others.

Application of the Unit

Communication is carried out as an integral part of routine work in the context of the workplace concerned.

Work is performed under some supervision, generally within a team environment.

Work involves the application of established communication principles and practice and the use of local technical and colloquial language and vocabulary in day-to-day communications.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Communicate information about routine tasks, processes, events or skills	<ul style="list-style-type: none">1.1 An appropriate form of communication is selected and used to meet the purpose required1.2 Effective listening skills are demonstrated1.3 Questions are used to gain additional information and to clarify understanding1.4 Sources of information relevant to the communication are identified1.5 Information is selected and sequenced correctly1.6 Verbal and written reporting is undertaken where required1.7 Communication is undertaken in both familiar and unfamiliar situations and with familiar and unfamiliar individuals and groups
2 Participate in group discussions to achieve appropriate work outcomes	<ul style="list-style-type: none">2.1 Responses are sought and provided to others in the group2.2 Constructive contributions are made in terms of the process involved2.3 Goals or outcomes are communicated and/or recorded
3 Represent views of the group to others	<ul style="list-style-type: none">3.1 Views and opinions of others are interpreted, understood and accurately reflected

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant procedures and duty of care requirements

Relevant OH&S responsibilities

Basic communication techniques including barriers to effective communication and how to overcome them

Basic principles of effective communication

Protocols and procedures for communicating with others using relevant workplace technology

Techniques for communicating effectively with a multilingual persons or persons with a limited ability to speak or understand English

Typical communication problems and appropriate action and solutions

Required skills:

Communicate effectively with others when completing basic work activities

Read and interpret instructions, procedures and information relevant to basic work activities

Interpret and follow operational instructions and prioritise work

Complete documentation related to basic work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others in the course of communication

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems in communication in accordance with workplace procedures

Modify communication activities depending on differing operational contingencies and environments

Work systematically with required attention to detail

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Communication will be that involved in:	in basic routine work functions may occur by day or night in a variety of work contexts
Communication modes may include:	active listening group interaction questioning to obtain information and/or clarify information and understanding routine oral reporting routine written reporting participation in routine meetings in the workplace basic recording of discussions
Communications may involve:	English-speaking persons multilingual staff persons with limited ability to communicate in English
Communication problems may include:	misunderstanding limited ability of others to communicate in English noisy environments or communication channels illegible writing or print use of non-standard vocabulary incorrect assumption that message has been received and/or correctly understood
Personnel in work area may include:	managers supervisors/team leaders workplace personnel visitors

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

contractors
official representatives
company procedures
enterprise procedures
organisational procedures
established procedures

Communication may involve the basic use of a range of communication technology including:

phone
electronic data interchange
fax
email
internet
radio

Information/documentation may include:

workplace procedures, checklists and instructions
goods identification numbers and codes
manifests, bar codes, goods and container identification
manufacturers specifications
workplace policies
supplier and/or client instructions
material safety data sheets
relevant codes of practice including the national standards for manual handling and the industry safety code
legislation, regulations and related documentation
award, enterprise bargaining agreement, other industrial arrangements
standards and certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may include:

relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes
dangerous goods and freight regulations and

codes

relevant Australian and state/territory OH&S
legislation

equal employment legislation and related
policies

environmental protection regulations

TLIE407C Prepare workplace documents

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and any applicable regulations/codes including planning and preparing a simple workplace document such as a letter or report, and gathering relevant information enabling the completion of a workplace form.

Application of the Unit

Work must be carried out in accordance with the workplace requirements concerning the preparation of workplace documents/forms.

Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and the basic principles of report writing to the preparation of workplace documents/forms as part of work activities in the transport, stevedoring, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan workplace document	<ul style="list-style-type: none">1.1 Purpose and audience for the document are identified1.2 Appropriate format for the document is established to meet workplace requirements1.3 Relevant information is identified and selected for inclusion in the document
2 Prepare workplace document	<ul style="list-style-type: none">2.1 A draft of the document is prepared in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary that are appropriate for the reader(s)2.2 Document is edited and presented in a final version appropriate to the task
3 Complete workplace forms	<ul style="list-style-type: none">3.1 Work related form(s) is interpreted to identify information required for its completion3.2 Required information for completion of form is gathered from relevant sources in accordance with workplace procedures3.3 Form(s) is completed in accordance with workplace policy and procedures and any applicable regulations and codes

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the documents and/or forms being prepared

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the completion of documents/forms

Problems that may occur when preparing and completing workplace documents and forms and appropriate action that can be taken to resolve the problems

Equipment and materials required for the completion of documents and forms and instructions and precautions for their use

Conventions for sentence construction, grammar, spelling, style and punctuation

Format and layout of various documents and forms used in workplace activities

Required skills:

Communicate effectively with others when preparing and completing workplace documents and forms

Read, write and comprehend simple statements in English

Read and interpret instructions, procedures, information and labels relevant to the preparation and completion of workplace documents and forms

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Work collaboratively with others when preparing and completing workplace documents and forms

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when preparing and completing workplace documents and forms in accordance with applicable regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Documents and forms may include:	routine written reports on workplace activities, incidents, meeting outcomes, etc. It may also include the gathering of relevant information and the subsequent completion of the various forms and records falling within the occupational responsibility of the person concerned
Communication in the work area may include:	written, oral, aural or signed communications phone electronic data interchange (EDI) fax email internet radio
Hazards in the work area may include:	exposure to chemicals exposure to dangerous or hazardous substances movements of equipment, goods, materials and vehicular traffic
Consultative processes may involve:	other employees and supervisors suppliers, customers and clients relevant authorities and institutions

	management and union representatives industrial relations and OH&S specialists other maintenance, professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Information/documents may include:	goods identification numbers and codes manifests, picking slips, merchandise transfers, stock requisitions and bar codes Australian and international codes of practice and regulations relevant to workplace activities Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances operations manuals, job specifications and induction documentation manufacturers specifications for equipment workplace procedures and policies supplier and/or client instructions dangerous goods declarations and material safety data sheets (where applicable) award, enterprise bargaining agreement, other industrial arrangements relevant Australian standards and certification requirements quality assurance procedures emergency procedures
Applicable regulations and legislation may include:	codes and regulations relevant to workplace documents/forms being prepared Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances (where applicable)

licence, patent or copyright arrangements
water and road use and licence arrangements
export/import/quarantine/bond requirements
marine orders
relevant state/territory OH&S and
environmental protection legislation
workplace relations regulations
workers compensation regulations

Unit Sector(s)

Not applicable.

Competency Field

E - Communication and Calculation

TLIE507C Carry out basic workplace calculations

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to carry out basic routine workplace calculations, including carrying out required mathematical operations, preparing basic estimates of mass, size and volume, and interpreting basic graphical representations of mathematical information. It includes calculations for routine industry-related tasks using manual and electronic processes. It specifically includes the skills and knowledge needed to estimate/calculate manual load shifting requirements.

Application of the Unit

Calculations are carried out as an integral part of routine work in the context of the workplace concerned.

Work is performed under some supervision, generally within a team environment.

Work involves the application of established mathematical principles and techniques in day-to-day work activities.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Carry out calculations	<ul style="list-style-type: none">1.1 Items are counted singly and in batches and sorted numerically, as required in workplace tasks1.2 Calculations needed to complete work tasks are performed using the four basic processes of addition, subtraction, multiplication and division1.3 Calculations involving fractions, percentages and mixed numbers, and using the four basic processes, are performed as required to complete workplace tasks1.4 The functions of a calculator, numeric keypad or computer are used to perform workplace tasks1.5 Numerical information is self-checked and corrected for accuracy
2 Prepare estimates	<ul style="list-style-type: none">2.1 Quantities of materials and resources required to complete a work task are estimated2.2 The time needed to complete a work activity is estimated2.3 Accurate estimates for work completion are made
3 Interpret graphical representations of mathematical information	<ul style="list-style-type: none">3.1 Information represented in symbols, diagrams and pictorial representations is recognised, interpreted and acted upon in workplace tasks

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant procedures and duty of care requirements

Relevant OH&S responsibilities

Basic mathematical operations and techniques

Ways of representing basic mathematical information

Procedures for identifying and using relevant workplace technology when carrying out workplace calculations

Typical mathematical problems and appropriate action and solutions

Required skills:

Communicate effectively with others when carrying out basic workplace calculations

Read and interpret instructions, procedures and information relevant to basic workplace calculations

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others when carrying out basic workplace calculations

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when carrying out basic workplace calculations

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies and environments

Work systematically with required attention to detail

Operate and adapt to differences in equipment in accordance with standard operating

procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Calculations will be those involved in:

- basic routine work functions
- may occur by day or night and in a variety of work contexts

Calculations may involve:

- money
- volume
- weight
- time
- length and distance
- area
- perimeter

Mathematical operations may include:

- multiplication
- division
- addition
- subtraction
- percentages
- fractions

Consultative processes may include:

- staff members
- management
- union representatives
- industrial relations, Occupational Health and Safety specialists
- other professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Calculations may involve the basic use of a range of technology including:

- manual techniques
- calculator

	computer
Information/documentation may include:	workplace procedures, checklists and instructions goods identification numbers and codes manifests, bar codes, goods and container identification manufacturers specifications workplace policies supplier and/or client instructions material safety data sheets relevant codes of practice including the national standards for manual handling and the industry safety code award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements quality assurance procedures
Applicable regulations and legislation may include:	relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes dangerous goods and freight regulations and codes relevant Australian and state/territory OH&S legislation

Unit Sector(s)

Not applicable.

Competency Field

E - Communication and Calculation

TLIE607D Collect, analyse and present workplace data and information

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to collect, analyse and present workplace data and information including identifying required information, analysing and preparing information for use, explaining information, and presenting workplace information to others.

Application of the Unit

Data collection, analysis and presentation is carried out as an integral part of operations in the context of the workplace concerned.

Work is performed under general or limited supervision, generally within a team environment. It involves the application of established principles and practice to the collection, analysis and presentation of information and data as part of workplace operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify required information	<ul style="list-style-type: none">1.1 Purpose of the information/data collection is identified1.2 Sources of information are established1.3 Appropriate information is collected
2 Prepare information for use	<ul style="list-style-type: none">2.1 Information is collated and analysed in accordance with workplace procedures2.2 Processed information is organised and presented in a logical manner2.3 Checks for accuracy are made
3 Explain information	<ul style="list-style-type: none">3.1 Data collection and analysis is explained to others in a way that effectively contributes to the workplace operations3.2 Outcomes of data/information analysis are presented to others using appropriate presentation modes and resources3.3 Questions are answered and appropriate clarifications are given
4 Present workplace information	<ul style="list-style-type: none">4.1 Processed information is forwarded to appropriate personnel in accordance with workplace procedures4.2 Processed information is collated and stored in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant procedures and duty of care requirements

Relevant OH&S responsibilities

Sources of information and data and procedures for processing the information for workplace use

Protocols and procedures for the collection, analysis and presentation of workplace information and data using relevant technology

Presentation and communication techniques including an understanding of barriers to effective communication and how to overcome them

Basic principles of effective presentation and communication of information

Techniques for communicating effectively with a multilingual persons or persons with a limited ability to speak or understand English

Typical presentation and communication problems and appropriate action and solutions

Required skills:

Communicate effectively with others when collecting, analysing and presenting workplace data and information

Read and interpret instructions and procedures relevant to the collection, analysis and presentation of workplace data and information

Interpret and follow operational instructions and prioritise work

Complete documentation related to the collection, analysis and presentation of workplace data and information

Identify and use required communication and presentation technology

Work collaboratively with others when collecting, analysing and presenting workplace data and information

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when collecting, analysing and presenting workplace data and information in accordance with regulatory requirements and workplace procedures

Plan own work including predicting consequences and identifying improvements

Implement contingency plans for unanticipated situations that may arise when collecting, analysing and presenting workplace data and information

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Data collection, analysis and presentation will be:	that required for workplace operations may occur by day or night and in a variety of work contexts
Customers may be:	internal or external
Presentation modes may include:	written documentation oral reports group presentations using appropriate technology completion of standard forms and checklists routine written reporting entry of collected/processed information into a computer participation in workplace discussions
Presentations/communications may involve:	English-speaking persons multilingual staff persons with limited ability to communicate in English
Presentation/communication problems may include:	misunderstanding limited ability of others to communicate in English noisy environments or communications channels illegible writing or print use of non-standard vocabulary incorrect assumption that information has been received and/or correctly understood
Depending on workplace context, consultative processes may involve	managers supervisors/team leaders workplace personnel

clients
private and/or public sector security personnel
police
security consultants
visitors
contractors
official representatives
union representatives
industrial relations
OH&S specialists
other professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Presentation/communication may involve the use of a range of technology, including:

phone
electronic data interchange
fax
email
internet
radio
overhead or computer controlled projector
plain or electronic white board
flip charts
microphone and amplifier
video player and monitor

Information/documentation may include:

workplace procedures, checklists and instructions
operations manuals
induction documentation
competency standards and training materials
job specifications

manufacturers specifications
HAZCHEM and dangerous/hazardous goods codes
goods identification numbers and codes
manifests, bar codes, goods and container identification
manufacturers specifications
workplace policies
supplier and/or client instructions
material safety data sheets
relevant codes of practice including the national standards for manual handling and the industry safety code
legislation, regulations and related documentation
award, enterprise bargaining agreement, other industrial arrangements
standards and certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may include:

relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes
dangerous goods and freight regulations and codes
relevant Australian and state/territory standards and certification requirements
relevant Australian and state/territory OH&S legislation
equal employment legislation and related policies
environmental protection regulations

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify system features	<ul style="list-style-type: none">1.1 System features and control functions are identified1.2 Where relevant, battery and signal levels are monitored1.3 Mobile equipment is set up to optimise communication1.4 Where relevant, channels are selected appropriate to the communication
2 Communicate using communications technology	<ul style="list-style-type: none">2.1 System checks are carried out to confirm communication system is operational in accordance with manufacturers instructions and workplace procedures2.2 Communication system is operated safely in accordance with manufacturers instructions, workplace procedures and (any) regulatory requirements2.3 Telephone and radio security is maintained in accordance with workplace procedures2.4 Where relevant, channel selection is appropriate for the location and type of communication2.5 Messages are transmitted clearly and precisely with due observation of ethics and protocols required of users2.6 Where applicable, PA system is used to communicate with passengers and crew as per standard operating procedures2.7 Where applicable, incoming messages are received and answered promptly and courteously within operating procedures and (any) regulatory requirements2.8 Appropriate protocols and procedures are followed when using communications systems during emergencies

- 2.9 Received messages are interpreted and recorded, where required, in accordance with workplace procedures
 - 2.1 Vocal communication is clear, unambiguous and uses appropriate procedures, language and codes
- 0
- 3 **Maintain communication equipment operational status**
 - 3.1 Equipment is checked and maintained in working order in accordance with workplace procedures
 - 3.2 Minor faults in the communications systems are promptly identified, diagnosed, and repaired or reported in accordance with workplace procedures
- 4 **Complete documentation**
 - 4.1 Appropriate records of communications are maintained in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant procedures and duty of care requirements

Relevant OH&S responsibilities

Protocols and procedures for communicating with others using relevant communication technology including the use of PA systems on passenger vehicles and trains

Procedures and protocols for the use of communication systems during an emergency

Features of various communications systems

Basic communication techniques including barriers to effective communication and how to overcome them

Basic principles of effective communication

Techniques for communicating effectively with a multilingual persons or persons with a limited ability to speak or understand English

Pre-operational checks for communications systems and equipment

Minor routine maintenance procedures for communications equipment

Typical problems that may occur when using communications systems and appropriate action and solutions

Required skills:

Communicate effectively with others using available communications equipment

Read and interpret instructions and procedures relevant to the use of communications equipment

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities when using communications equipment

Identify and use required communication technology

Work collaboratively with others when using communications equipment

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when using communications equipment in accordance with workplace procedures

Implement contingency plans for unanticipated situations that may arise when using communications equipment

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the use of communications equipment

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in communication equipment in accordance with standard operating procedures

Monitor performance of communication equipment and take appropriate action if required

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Use of communication systems will include that required in routine operations and may occur by day or night and in a variety of work contexts, including:

in confined spaces, exposed conditions and controlled or open environments
in a workplace, terminal, warehouse or depot
in a vehicle
on a vessel
on a train
on a worksite
at a client's workplace

Communication systems may include:

fixed phone systems
mobile phone, both on person or hands-free
radios including personal, hand-held or vehicle-mounted, CB, UHF, VHF, SSB, marine
PA systems on passenger vehicles, trains and aircraft

Worksite communication may include:

active listening
two-way conversation
questioning to obtain information and/or clarify information and understanding
routine oral reporting

Communications may involve:

English-speaking persons
multilingual staff
persons with limited ability to communicate in English

Communication problems may include:

misunderstanding
limited ability of others to communicate in English
noisy environments or communications channels
illegible writing or print

	use of non-standard vocabulary
	incorrect assumption that message has been received and/or correctly understood
	not following correct communication protocols and procedures
Communication may be with:	base personnel
	other drivers and workplace personnel
	passengers (where applicable)
	managers
	supervisors/team leaders
	suppliers and clients
	private and/or public sector security personnel
	police and other emergency services personnel
	security consultants
	other professional or technical staff
	local government authorities
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information/documentation may include:	workplace communication procedures, protocols, checklists and instructions
	manufacturers specifications for communications equipment
	goods identification numbers and codes
	manifests, bar codes, goods and container identification
	communication records
	supplier and/or client instructions
	material safety data sheets
	relevant codes of practice including the national standards for manual handling and the industry safety code
	legislation, regulations and related

	documentation
	award, enterprise bargaining agreement, other industrial arrangements
	standards and certification requirements
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may include:	relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes
	dangerous goods and freight regulations and codes
	relevant Australian and state/territory OH&S legislation
	equal employment legislation and related policies
	environmental protection regulations

TLIE807C Process workplace documentation

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to process workplace documentation including planning the documentation to fulfil the identified purpose and completing the documentation in accordance with requirements. Documentation may include forms, logs, diaries and basic hand-written or typed reports. It may also include entry of information into computer-based documents and forms.

Application of the Unit

Processing of workplace documentation is carried out as an integral part of work operations in the context of the workplace concerned.

Work may be performed in team and autonomous working situations. It involves the application of established procedures in the completion of workplace documentation in the course of day-to-day operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan documentation	<p>1.1 Purpose of workplace documentation is identified and confirmed</p> <p>1.2 Information for completion of the workplace documentation is collected, interpreted, analysed and organised as required</p>
2 Complete documentation	<p>2.1 Required documentation is prepared, or forms completed, in accordance with workplace policies and procedures</p> <p>2.2 Information is entered into computer-based documents, where required</p> <p>2.3 Logs or diaries are maintained accurately and in a timely manner in accordance with workplace requirements.</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant procedures and duty of care requirements

Relevant OH&S responsibilities

Protocols and procedures for processing workplace documentation using relevant workplace technology

Requirements for workplace documentation, forms, logs or diaries

Sources of information for the completion of workplace documentation, forms, logs or diaries

Purpose of workplace documentation, forms, logs or diaries

Typical problems in processing of workplace documentation and appropriate action and solutions

Required skills:

Communicate effectively with others when completing and processing workplace documentation, forms, logs or diaries

Read, interpret and organise information needed for the completion and processing of workplace documentation, forms, logs or diaries

Interpret and follow operational instructions and prioritise work

Complete workplace documentation, forms, logs or diaries

Write and/or enter information into computer based documentation systems

Work collaboratively with others when completing and processing workplace documentation, forms, logs or diaries

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when completing and processing workplace documentation, forms, logs or diaries in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the completion and processing of workplace documentation, forms, logs or diaries

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in computing equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Processing of workplace documentation will be that involved in routine work functions and may occur by day or night and in a variety of work contexts, including:

in confined spaces, exposed conditions and controlled or open environments
in a workplace, warehouse or depot
in a vehicle on the road
at a client's workplace

Types of documentation may include:

workplace and on-road transport memos
letters
diaries
logs
checklists
maintenance schedules
workplace forms and standard documents

Documentation and reporting systems will be:

as defined within workplace procedures

Documentation may be received from or sent to:

managers
supervisors/team leaders
other workplace personnel
clients
contractors
union representatives
official representatives

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Documentation may include:

hard copy
computer-based documents and forms
faxes

	email
Information/documentation may include:	<p>workplace procedures, forms, checklists and instructions</p> <p>goods identification numbers and codes</p> <p>manifests, bar codes, goods and container identification</p> <p>manufacturers specifications</p> <p>workplace documentation policies</p> <p>supplier and/or client instructions</p> <p>material safety data sheets</p> <p>relevant codes of practice including the national standards for manual handling and the industry safety code</p> <p>legislation, regulations and related documentation</p> <p>award, enterprise bargaining agreement, other industrial arrangements</p> <p>standards and certification requirements</p> <p>quality assurance procedures</p> <p>emergency procedures</p>

TLIF1007C Apply fatigue management strategies

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to apply fatigue management strategies, including identifying and acting upon signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities.

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable Commonwealth and state/territory legislation and relevant regulations covering the management of fatigue in the workplace.

Work is performed under some supervision generally within a team environment.

It involves the application of the relevant regulations, codes and guidelines of the Commonwealth Government and the state/territory authorities concerning fatigue management during work activities and in particular when operating equipment, vehicles, load shifting equipment, trains, marine vessels and aircraft.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify and act upon signs of fatigue	<p>1.1 Potential causes of fatigue are monitored and action taken to minimise their effects in accordance with company procedures</p> <p>1.2 Personal warning signs of fatigue are recognised and necessary steps are taken in accordance with workplace procedures to ensure that effective work capability and alertness are maintained</p>
2 Implement strategies to minimise fatigue	<p>2.1 Routes and schedules are assessed and planned to minimise fatigue</p> <p>2.2 Factors which increase the risk of fatigue-related accidents and safety incidents are understood and minimised</p> <p>2.3 Strategies to manage fatigue are implemented in accordance with company policy</p> <p>2.4 Lifestyle choices are made which promote the effective long-term management of fatigue</p> <p>2.5 Effective practices in combating fatigue are adopted and applied</p> <p>2.6 Personal fatigue management strategies are communicated to other relevant people</p> <p>2.7 Appropriate counter measures are planned to combat fatigue</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant codes, regulations, permit and licence requirements related to fatigue management

Relevant OH&S regulations as they relate to fatigue

Workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents

Sources of information on fatigue

The risks and hazards created by fatigue in the workplace

How fatigue affects workplace performance

How fatigue contributes to workplace accidents

Ways of recognising fatigue

Strategies and ways of managing fatigue

Causes and effects of fatigue on workers/drivers

Factors which increase fatigue-related accidents

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when applying fatigue management strategies

Read and interpret instructions, procedures, regulations and signs related to fatigue management and apply them to work activities

Recognise symptoms of fatigue and take appropriate action in accordance with fatigue management regulations and workplace procedures

Work collaboratively with others to manage and minimise the effects of fatigue during work activities

Adjust lifestyle patterns to ensure effective fatigue management during work activities

Modify activities and take appropriate initiatives to manage fatigue in the workplace

depending on differing work contexts, risk situations and environments

Apply precautions and required action to minimise and control the effects of fatigue when carrying out own work functions

Adapt to changes in rosters and standard operating procedures as they may relate to fatigue management

Participate in identifying and meeting own learning needs on matters related to fatigue management

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Workplace may include:

any work environment requiring safety critical operational judgements to be made and in particular when operating equipment, vehicles, load shifting equipment, trains, marine vessels and aircraft at night

The need for fatigue management in a range of industry situations including:

operations conducted at all times but particularly at night
typical weather conditions
while working and/or driving at a workplace, depot, base or warehouse
while working and/or driving at a client's workplace or work site
driving a motor vehicle on the open road
driving a motor vehicle on a private road
driving a train, locomotive or motive power unit
operating a marine vessel in coastal or international waters
operating an aircraft
operating load shifting equipment
operating safety critical industrial plant and equipment

Work-related factors that may contribute to fatigue include:

work demands such as: workload, work duration, shift pattern, time of day, frequency and duration of breaks and the type of work (e.g. working in isolation, repetitive tasks and boring, monotonous or under-challenging tasks)
organisational factors such as: work environment (including temperature, ventilation, continual rhythmic vibration from equipment), payment system, trip and work scheduling, and the predictability of work

Worker/operator-related factors that may contribute to fatigue include:

lifestyle factors such as: sleep patterns, alcohol and drug use, quantity and timing of food and drink, and opportunities for relaxation with family and friends

working multiple jobs

personal or biological factors such as: state of mental and/or physical health, inadequate sleep, sleep disorders, emotional stress, family responsibilities, relationship difficulties, inadequate competence to complete work tasks, and circadian rhythms

Responsibilities of individual for fatigue risk management may include:

following the organisation's fatigue management policy and procedures

using time away from work appropriately to rest and recover

checking and ensuring fitness for work

reporting symptoms of fatigue

taking action to minimise risk when symptoms of fatigue are recognised

Depending on the organisation operating procedures may include:

standard operating procedures

company procedures

enterprise procedures

organisational procedures

established procedures

Information and documents may include:

Commonwealth and state/territory regulations and guidelines concerning fatigue management in various transport and workplace situations

workplace instructions and procedures on fatigue management

relevant OH&S regulations and procedures

work schedules and shift rosters

emergency procedures

log book or record book (where required)

records and reports of fatigue-related errors and safety incidents

relevant standards and certification

requirements

quality assurance procedures

Applicable legislation, regulations and codes may include:

relevant regulations and codes of the Commonwealth Government and the state/territory regulatory authorities concerning fatigue management

relevant state/territory road rules

relevant rail industry safe working codes and regulations (where applicable)

relevant state/territory permit regulations and requirements

relevant state/territory OH&S legislation

Unit Sector(s)

Not applicable.

Competency Field

F - Safety Management

TLIF107C Follow occupational health and safety procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to follow and apply OH&S procedures when carrying out work activities, including identifying and following workplace procedures for hazard identification and risk control, contributing to arrangements for the management of occupational health and safety, and completing occupational health and safety records.

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations and procedures. Work is performed under some supervision generally within a team environment. It involves the application of the established OH&S and hazard minimisation principles and procedures to the conduct of workplace activities.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Follow workplace procedures for hazard identification and risk control	<p>1.1 Workplace procedures for dealing with accidents, fire and emergencies are known and followed</p> <p>1.2 Workplace procedures for OH&S and related work instructions for controlling risks in a workplace are accurately followed</p> <p>1.3 Hazards in the workplace are identified and appropriate action is taken to report them and to minimise or eliminate risk to personnel, workplace and the environment</p> <p>1.4 Safety regulations and established workplace safety and hazard control practices and procedures are obtained, interpreted and applied to day-to-day work activities</p> <p>1.5 Where relevant, procedures and precautions necessary for entry into confined spaces in the workplace are correctly followed</p> <p>1.6 Personal protection clothing and equipment is correctly used in accordance with established safety practices and procedures</p> <p>1.7 Established emergency and contingency plans are followed in the event of an emergency</p>
2 Contribute to arrangements for the management of occupational health and safety	<p>2.1 OH&S issues and identified safety hazards are raised with designated personnel in accordance with workplace procedures and relevant OH&S legislation</p> <p>2.2 Contributions to OH&S management in the workplace are made in accordance with workplace procedures and provisions of relevant legislation</p> <p>2.3 OH&S issues are raised with designated personnel in accordance with workplace procedures and relevant OH&S legislation</p> <p>2.4 Participative arrangements for OH&S management in the workplace are contributed to within workplace procedures and scope of responsibilities</p>

and competencies

3 Complete occupational health and safety records

- 3.1 OH&S records for self are completed in accordance with workplace requirements
- 3.2 OH&S records and legal requirements for the maintenance of records of occupational injury and diseases are followed

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines

Risks when using manually-operated equipment to shift loads and related precautions to control the risk

Reporting procedures in regard to unsafe situations, fire hazards, broken or damaged equipment or fittings, sickness and accidents

Location and use of safety alarms, manifests, emergency shut-off systems, emergency communication systems

Signs and signals used for OH&S warnings

Terms used in material safety data sheets (where relevant)

HAZCHEM symbols and implications for safe work and storage

Storage and use of hazardous substances

Handling of broken or damaged equipment

Manual and mechanically assisted lifting and load shifting procedures

Transport requirements for goods within workplace

Emergency and evacuation procedures

Housekeeping standards and procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when following OH&S procedures

Read and comprehend simple statements in English

Read and interpret relevant safety-related information including safety labels, instructions for safe work, relevant material safety data sheets, workplace procedures and codes of practice

Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels

Interpret and follow operational instructions and prioritise work

Complete documentation related to OH&S in the workplace

Operate electronic communication equipment to required protocol

Estimate the size shape and special requirements of loads

Work collaboratively with others when following OH&S procedures

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when following OH&S procedures in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when following OH&S procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The shifting operations may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Workplace hazards may include:	chemicals and other harmful substances movements of equipment, goods, vehicles toxic substances damaged packing material and containers broken and damaged equipment flammable materials and fire hazards lifting practices waste management and disposal extremes in weather conditions lighting levels floor surfaces water hazards traffic flows, vehicle and equipment operation A range of storage areas
Personnel in the work area may include:	workplace personnel site visitors OH&S specialists union representatives contractors official representatives

Participative arrangements may include:	<ul style="list-style-type: none">formal and informal meetings which deal with OH&S issuesworkplace OH&S committeesother committees, for example, consultative, planning and purchasingOH&S representativessuggestions, requests, reports and concerns put forward by staff

TLIF1407C Develop and maintain a safe workplace

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to develop and maintain a safe workplace, including providing and informing personnel about OH&S legislation, codes and standards; planning and implementing safety requirements in accordance with regulations; monitoring, adjusting and reporting safety performance; investigating and reporting non-conformance; and evaluating the OH&S system and related policies, procedures and programs.

Application of the Unit

Work involves discretion and judgement in developing and maintaining a safe workplace. Work is performed under minimum supervision with general guidance on progress and outcomes of work. A range of opportunities may be used to develop awareness and practice of OH&S policies and procedures, to support the development of OH&S and risk management systems, and to encourage the achievement of the organisations OH&S goals and related key performance objectives.

Work generally involves responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan and implement safety requirements	<p>1.1 Health and safety risk assessments are made as part of all production planning exercises</p> <p>1.2 Policy and procedures are developed to implement requirements for a safe workplace</p> <p>1.3 Work practices are planned with colleagues to ensure compliance with workplace and environmental legislation and standards</p> <p>1.4 Safe operating procedures are documented and communicated</p> <p>1.5 Work practices are implemented in accordance with requirements specified in legislation and standards for safe workplaces and environments</p> <p>1.6 Effective induction and supervision is provided to support colleagues in managing their organisational responsibilities</p> <p>1.7 Purchasing policy for the provision of goods and services is informed by OH&S considerations</p>
2 Inform and train personnel on OH&S legislation, codes and standards	<p>2.1 Legislation, standards and the organisation's policies and practices relevant to the creation and maintenance of a safe workplace and environment are made available to individuals/teams</p> <p>2.2 Arrangements are made to provide information in a language, style and format which is understood by colleagues</p> <p>2.3 An OH&S training program is developed and implemented to identify and fulfil employees' OH&S training needs as part of the workplace's general training program</p>

- 2.4 Individuals/teams know their legal responsibility for maintaining a safe workplace and environment
 - 2.5 The implications of an unsafe workplace and environment are clear to all within the workplace
- 3 **Establish and maintain procedures for assessing and controlling safety risks**
 - 3.1 Safety risks presented by identified hazards are correctly assessed in accordance with OH&S legislation and codes of practice
 - 3.2 Activities are monitored to ensure that this procedure is adopted effectively throughout the area of managerial responsibility
 - 3.3 Risk assessment is addressed at the planning, design and evaluation stages of any change within the area of managerial responsibility to ensure that the risk from hazards is not increased
 - 3.4 Measures to control assessed safety risks are developed and implemented in accordance with the hierarchy of control, relevant OH&S legislation, codes of practice and trends identified from the OH&S records system
 - 3.5 Activities are monitored to ensure that the risk control procedure is adopted effectively throughout the area of managerial responsibility
 - 3.6 Risk control is addressed at the planning, design and evaluation stages of any change within the area of managerial responsibility to ensure that adequate risk control measures are included
- 4 **Monitor, adjust and report safety performance**
 - 4.1 Hazards are identified, assessed and prioritised for action
 - 4.2 Controls are selected to minimise risks to health and safety
 - 4.3 Waste recycling, reduction and disposal is carried out within legislative and organisational requirements
 - 4.4 Recommendations for improvements to meet legislation and associated standards are submitted to designated persons/groups
 - 4.5 Individuals/teams are informed of improvements

- and alterations to occupational health and safety procedures in the workplace
- 4.6 Systems, records and reporting procedures are maintained according to legislative requirements
- 5 Evaluate the occupational health and safety system and related policies, procedures and programs**
- 5.1 The effectiveness of the OH&S system and related policies, procedures and programs is assessed according to the workplace's aims with respect to OH&S.
- 5.2 Improvements to the OH&S system are developed and implemented to ensure more effective achievement of the workplace's organisation's aims with respect to OH&S policies and objectives.
- 5.3 Inadequacies in existing risk control measures are identified in accordance with the hierarchy of control, and resources enabling implementation of new measures are sought and/or provided according to appropriate procedures
- 6 Investigate and report non-conformance**
- 6.1 Compliance with OH&S legislation and codes of practice is assessed to ensure that legal OH&S standards are maintained as a minimum
- 6.2 Non-conformance is investigated and dealt with according to legislative requirements
- 6.3 Colleagues are supported to acquire and apply competencies to meet legislative requirements and the associated standards
- 6.4 Changes to operations and practices are implemented to ensure that non-conformance is not repeated
- 7 Establish and maintain a system for OH&S records**
- 7.1 A system for keeping OH&S records is established and monitored to allow identification of patterns of occupational injury and disease within the area of managerial responsibility, including provision for relevant workplace OH&S reports to be submitted to management

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for the management of personal work priorities and professional development

The systems of risk control recognising the significance of OH&S for effective workplace operation

Workplace business policies and plans related to OH&S issues

The significance of other management systems and procedures for OH&S

Hazards and associated safety risks that exist in the workplace

The range of control measures available for these safety risks

Considerations for choosing between different control measures

How to identify when expert advice is needed

Elements of an effective OH&S management system

Principles of risk management

Appropriate links to other management systems, for example contractors, maintenance and purchasing

The role of technical information and experts in designing hazard control measures, monitoring systems and health surveillance procedures

The hierarchy of hazard and risk control measures

Arrangements for participation and consultation over OH&S

Incident and accident investigation arrangements

Training, coaching and mentoring approaches appropriate for use in OH&S training programs

Typical problems that can occur when managing OH&S systems and related action that can

be taken

Required skills:

Communicate effectively with others when establishing a safe workplace

Read and interpret instructions, procedures, information, labels and signs relevant to developing and maintaining a safe workplace

Interpret and follow operational instructions and prioritise work

Complete documentation related to developing and maintaining a safe workplace

Operate electronic communication equipment to required protocol

Work collaboratively with others when developing and maintaining a safe workplace

Analyse the working environment in order to identify hazards, assess safety risks and design and implement appropriate OH&S management systems

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when developing and maintaining a safe workplace in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Plan work activities, including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and appropriately apply technology, information systems and procedures to improve OH&S compliance, information systems and reporting requirements

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S

standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	single and multi-site location large, medium and/or small companies
Services, products, risks, work systems and requirements may:	potentially vary across different sections of the workplace
Operations involve:	internal and external customer/supplier contact and coordination
Work priorities and professional development are:	directed at maximising achievement of the individual in accordance with the enterprises objectives and strategic plans
Workplace hazards may include but are not restricted to:	<ul style="list-style-type: none">moving heavy loads in an unsafe work environmentunsecured machinery, components or repaired equipmentslippery floorswelding equipmentsharp tools and implementspower toolsmoving and rotating machineryflammable liquids, vapours and fuelfaulty machinery, handling equipment and lifting gearusing equipment beyond safe working limitspoor housekeeping proceduresnon-compliance with safe working procedureselectrical wiring and systems, including exposed electrical circuitsworking at heights and in confined spacestoxic gases and substanceschemicals and other harmful substances

	damaged goods, pallets and containers dangerous/hazardous goods
Training activities may include:	attendance at formal education/training programs completion of internal short training programs attendances at relevant conferences, seminars and workshops reading of relevant journals and literature coaching/mentoring on the job workplace training projects
Consultative processes may involve:	OH&S specialists trainers other employees and supervisors management union representatives manufacturers representatives supplier representatives customers/clients other maintenance, professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:	company plans/procedures enterprise plans/procedures organisational plans/procedures established plans/procedures
Information/documentation may include:	workplace OH&S procedures and policies workplace OH&S management system including hazard/safety risk control strategies OH&S training notes and materials journals and work-related literature concerning OH&S competency standards customer/client instructions customer service standards and procedures

workplace products and services information
quality assurance standards and procedures

TLIF1807B Operate firefighting equipment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to operate and check firefighting equipment in accordance with manufacturers instructions and workplace emergency procedures, including identifying and selecting the appropriate equipment, using the firefighting equipment to fight a fire, and checking that the firefighting equipment is operational.

Application of the Unit

Work must be carried out in compliance with the relevant codes of practice, regulations and workplace requirements concerning the operation and checking of firefighting equipment. Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the operation and maintenance of firefighting equipment as part of work activities in the transport, distribution and/or allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Check firefighting equipment	<ul style="list-style-type: none">1.1 Firefighting equipment is checked for serviceability as per manufacturers specifications and regulatory requirements1.2 Non-functioning equipment or equipment which is past its service date is identified and reported to designated personnel for replacement or service
2 Use firefighting equipment	<ul style="list-style-type: none">2.1 Equipment and personal safety equipment used for fighting fires are correctly selected for type of fire in accordance with manufacturers instructions2.2 Fire is controlled using firefighting equipment according to manufacturers instructions and workplace emergency procedures2.3 Equipment is stored safely according to manufacturers instructions and workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian codes of practice, regulations and safeworking systems relevant to the use and checking of firefighting equipment

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the use and checking of firefighting equipment

The chemistry of fire, the effects of different types of material in a fire and the principles underlying the spread of fire and its extinguishment

The different classes of fire, their characteristics and strategies and equipment needed for their extinguishment

Types of firefighting appliances, equipment and systems, their identifying features, principles of operation and the procedures for their use and basic checking of serviceability

Fixed fire prevention and extinguishing installations and their principles of operation

Firefighting techniques, agents and precautions applicable to different classes of fire

Typical problems that can occur with firefighting equipment and operations and appropriate action and solutions

Manufacturers instructions for the checking of firefighting equipment

Required skills:

Communicate effectively with others when fighting fires using firefighting equipment

Read and comprehend simple statements in English

Read and interpret instructions, procedures, regulations, signs and labels relevant to the use of firefighting equipment and apply them to work activities

Interpret and follow operational instructions and prioritise work

Work safely and collaboratively with others when fighting fires using firefighting equipment

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using firefighting equipment in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when using firefighting equipment

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify firefighting activities and take appropriate initiatives depending on limits of responsibility, differing workplace contexts, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify and correctly select, use and carry out basic checks on firefighting equipment relevant to own work functions

Operate and adapt to differences in firefighting equipment and emergency procedures in the workplace

Monitor performance of firefighting equipment and take appropriate action is required

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Types of fires which may occur include:	Classes A, B, C and F in the standard classification of fires
Firefighting equipment, appliances and systems may include:	portable fire extinguishers including foam, water, CO ₂ , dry chemical and wet foam sprinkler systems fire hoses and hydrants fire blankets
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances live electrical circuits movements of equipment, goods, materials, trains and vehicular traffic
Consultative processes may involve:	other employees and supervisors current and potential customers suppliers, customers and clients relevant authorities and institutions management and union representatives industrial relations and OH&S specialists
Communication in the work area may include:	phone electronic data interchange (EDI)

	fax
	email
	internet
	RF systems
	oral, aural or signed communications
Dependent of the type of organisation concerned and the local terminology used, workplace procedures may include:	standard operating procedures
	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	protective clothing
	high visibility clothing
Information documents may include:	workplace fire emergency procedures and policies
	relevant OH&S and environmental protection regulations
	codes of practice and regulations relevant to fire emergencies, including safeworking regulations and local authority regulations and procedures
	Australian regulations and codes of practice for the transport of dangerous goods and hazardous substances
	operations manuals, job specifications and induction documentation
	manufacturers specifications for firefighting equipment
	technical instructions
	electrified territory regulations
	dangerous goods declarations and material safety data sheets (where applicable)
	goods manifest

	award, enterprise bargaining agreement, and other industrial arrangements
	relevant Australian standards and certification requirements
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may include:	relevant codes, regulations and safeworking systems for the use and checking of firefighting equipment
	the Code of Practice for the Defined Interstate Rail Network in situations where fire emergencies occur on that network
	Australian and international regulations and codes of practice for the transport of dangerous goods and hazardous substances
	relevant state/territory OH&S and environmental protection legislation
	workplace relations regulations

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify the housekeeping requirements procedures, and resources of different areas of the workplace	<ul style="list-style-type: none">1.1 Workplace procedures for housekeeping are identified1.2 Equipment and consumables are selected in accordance with work area requirements1.3 Specific requirements for housekeeping activities in different parts of the employees' work area are identified and followed1.4 Requirements for the minor disassembly/reassembly of storage zones are identified (where applicable)
2 Monitor and maintain cleanliness and tidiness in the workplace	<ul style="list-style-type: none">2.1 Initiative is used to continuously monitor the cleanliness and tidiness of the worksites used by the employees2.2 Housekeeping issues are raised with designated personnel in accordance with workplace procedures2.3 Housekeeping equipment and supplies are maintained and stored
3 Complete assigned housekeeping duties	<ul style="list-style-type: none">3.1 Assigned housekeeping duties are conducted following workplace procedures and ensuring that waste is removed3.2 Maintenance requirements of any damaged items are notified to appropriate personnel3.3 Minor disassembly/reassembly of storage zones is conducted within enterprise policies and procedures3.4 Schedules and records for housekeeping duties are maintained3.5 Work areas are checked and meet required workplace standards3.6 Work is carried out following enterprise practices and safe work procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines concerning housekeeping operations

Workplace procedures and policies for the carrying out housekeeping tasks in the workplace

Risks when carrying out housekeeping tasks and related precautions to control the risk

Housekeeping standards required in the workplace

Site layout and obstacles

Application of relevant industrial regulations and requirements

Servicing procedures for housekeeping equipment

Required skills:

Communicate effectively with others when carrying out housekeeping tasks

Read and interpret instructions, procedures, information and signs relevant to housekeeping activities in the workplace

Interpret and follow operational instructions and prioritise work

Complete documentation related to housekeeping in the workplace

Operate electronic communication equipment to required protocol

Work collaboratively with others when carrying out housekeeping tasks

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any problems, faults or malfunctions identified when carrying out housekeeping tasks in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during housekeeping activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Monitor condition and performance of housekeeping tools and equipment

Service housekeeping tools and equipment in terms of servicing schedule and standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The housekeeping tasks may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	tight or restricted spaces exposed conditions controlled or open environments
Housekeeping duties may include:	cleaning returning goods or equipment to storage repacking waste removal maintenance
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and materials
Personnel in the work area may include:	workplace personnel site visitors contractors official representatives
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Depending on workplace context, personal protective equipment may include:	gloves safety headwear and footwear safety glasses

	two-way radios
	high visibility clothing
Information/documents may include:	OH&S and environmental protection regulations
	workplace housekeeping procedures and policies
	codes of practice including the National Standards for Manual Handling and the Industry Safety Code
	material safety data sheets
	policies and procedures for entry and work in confined spaces
	manufacturers instructions concerning the use and servicing of equipment
	supplier and/or client instructions
	emergency procedures
	regulations and policies concerning noise, smoking, work station ergonomics and other critical OH&S issues
	goods identification numbers and codes
	manifests, bar codes, goods and container identification
	relevant legislation, regulations and related documentation
	award, enterprise bargaining agreement, other industrial arrangements
	standards and certification requirements
	quality assurance procedures
Applicable regulations and legislation may include:	relevant state/territory OH&S legislation
	relevant state/territory environmental protection legislation
	workplace relations regulations
	dangerous goods and air freight regulations

Unit Sector(s)

Not applicable.

Competency Field

F - Safety Management

TLIF307C Implement and monitor occupational health and safety procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to implement and monitor OH&S procedures, including accessing information about OH&S and the workplace policies and procedures, implementing and monitoring procedures for identifying and assessing hazards, implementing and monitoring/auditing procedures for controlling risks, planning and supervising housekeeping arrangements, and implementing and monitoring procedures for dealing with hazardous events.

Application of the Unit

Work must be carried out in compliance with the relevant OH&S regulations and procedures. Work is performed under some supervision generally within a team environment. It involves the implementation and monitoring of established OH&S and hazard minimisation policies and procedures in workplace activities.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Access information about OH&S and the workplace policies and procedures	<ul style="list-style-type: none">1.1 Relevant provisions of occupational health and safety legislation and codes of practice are accurately followed1.2 Information on workplace occupational health and safety policies, procedures and programs is stored in a readily accessible location and manner1.3 Information is accurately and clearly explained to the work team1.4 Information about the outcomes of risk identification and control procedures is provided to appropriate personnel
2 Implement and monitor procedures for identifying and assessing hazards	<ul style="list-style-type: none">2.1 Existing and potential hazards in the work area are identified and reported2.2 Identified hazards are assessed in relation to relative risk2.3 Appropriate action is initiated to minimise and control the risks/hazards
3 Implement and monitor procedures for controlling risks	<ul style="list-style-type: none">3.1 Existing risk control measures are implemented, monitored and reviewed3.2 Work procedures to control risks are implemented and adherence to them by the work group is monitored3.3 Required improvements to existing risk control measures are identified, including required resources for implementation, and reported to appropriate personnel3.4 Procedures for monitoring and controlling risks provide for a hierarchy of control
4 Plan and supervise housekeeping arrangements	<ul style="list-style-type: none">4.1 Housekeeping tasks are identified and incorporated in enterprise work roles4.2 Housekeeping equipment is maintained

- 4.3 Team members are allocated housekeeping tasks and supervised
 - 4.4 Housekeeping procedures and practices are planned to conform with environmental and occupational health and safety requirements
- 5 **Implement and monitor procedures for dealing with hazardous events**
 - 5.1 Workplace procedures for dealing with hazardous events are implemented whenever necessary to ensure that prompt control action is taken
 - 5.2 Hazardous events are investigated to identify causes
 - 5.3 Control measures are implemented to prevent recurrence and minimise risks of hazardous events or issues and are referred to designated personnel for implementation

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines

Risks when using manually-operated equipment to shift loads and related precautions to control the risk

Reporting procedures in regard to unsafe situations, fire hazards, broken or damaged equipment or fittings, sickness and accidents

Location and use of safety alarms, manifests, emergency shut-off systems, emergency communication systems

Signs and signals used for OH&S warnings

Terms used in material safety data sheets

HAZCHEM symbols and implications for safe work and storage

Procedures for the storage and use of hazardous substances

Procedures for the storage and use of flammable materials

Manual and mechanically assisted lifting and load shifting procedures

Transport requirements for goods within workplace

Emergency and evacuation procedures

Housekeeping standards and procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when implementing and monitoring compliance with OH&S procedure and policies

Read and interpret instructions, procedures, information and signs relevant to the implementation and monitoring of compliance with OH&S procedure and policies

Identify containers and goods coding, ADG and IMDG markings and, where applicable, emergency information panels

Interpret and follow operational instructions and prioritise work

Complete documentation related to the implementation and monitoring of compliance with OH&S procedure and policies

Operate electronic communication equipment to required protocol

Estimate the size, shape and special requirements of loads

Work collaboratively with others when implementing and monitoring compliance with OH&S procedure and policies

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when implementing and monitoring compliance with OH&S procedure and policies in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when implementing and monitoring compliance with OH&S procedure and policies

Ensure that precautions and required action are taken to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Monitor performance of equipment

Service equipment in terms of maintenance schedule and standard operating procedures

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The implementation and monitoring of OH&S within work operations may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	restricted spaces exposed conditions controlled or open environments
Workplace hazards may include:	chemicals and other harmful substances movements of equipment, goods, vehicles toxic substances damaged packing material and containers broken and damaged equipment inflammable materials and fire hazards lifting practices waste management and disposal extremes in weather conditions lighting levels floor surfaces water hazards traffic flows, vehicle and equipment operation dangerous storage areas violent incidents such as armed robberies
Responsibilities in the implementation/monitoring of OH&S may include:	provision of OH&S information to staff consultation and participation in meetings on OH&S matters emergency procedures and response

	housekeeping
	identifying and minimising workplace hazards
	assessing and controlling OH&S risks
	OH&S training and assessment
	use of personal protective equipment
	keeping of OH&S records
	reporting of OH&S issues and incidents
	resolution of OH&S issues
	checking work area and/or equipment before and during work
	participation in OH&S audits and workplace inspections
Controlling OH&S risks may include	measures to remove the cause of a risk at its source
	consultation with workers and their representatives
	application of the hierarchy of control, namely:
	elimination of the risk
	engineering controls
	administrative controls
	personal protective equipment
Procedures for dealing with hazardous events may include:	evacuation
	chemical containment
	first aid
	accident/safety incident reporting and investigation.
OH&S training may include:	induction training
	specific hazard training
	specific task or equipment training
	emergency and evacuation training
	training as part of broader programs, for example equipment operation
OH&S records may include:	OH&S audits and inspection reports

health surveillance and workplace
environmental monitoring records
records of instruction and training
manufacturers and suppliers information,
including material safety data sheets and
dangerous goods storage lists
hazardous substances registers
maintenance and testing reports
workers compensation and rehabilitation
records
first aid/medical post records.

Personnel in the work area may include:

workplace personnel and management
site visitors
OH&S specialists
union representatives
contractors
official OH&S representatives

Personal protective equipment may include:

gloves
safety headwear and footwear
safety glasses
two-way radios
high visibility clothing

Participative arrangements may include:

formal and informal meetings which deal
with OH&S issues
workplace OH&S committees
other committees, for example, consultative,
planning and purchasing
OH&S representatives
suggestions, requests, reports and concerns
put forward by staff

Designated personnel may include:

workplace personnel
supervisors
team leaders
management

	occupational health and safety personnel other persons authorised or nominated by the organisation
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Information/documents may include:	OH&S regulations, responsibilities and obligations workplace OH&S procedures and policies codes of practice including the National Standards for Manual Handling and the Industry Safety Code material safety data sheets policies and procedures for entry and work in confined spaces manufacturers instructions concerning the use and servicing of equipment supplier and/or client instructions emergency procedures regulations and policies concerning noise, smoking, work station ergonomics and other critical OH&S issues goods identification numbers and codes manifests, bar codes, goods and container identification relevant legislation, regulations and related documentation award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements quality assurance procedures
Applicable regulations and legislation may include:	relevant state/territory OH&S legislation and safety codes, including manual handling, noise, confined spaces, smoking, workplace ergonomics, etc. general duty of care under OH&S legislation

workplace relations regulations
workers compensation regulations
dangerous goods regulations

Unit Sector(s)

Not applicable.

Competency Field

F - Safety Management

TLIF607C Apply accident-emergency procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to apply accident emergency procedures, including responding to an incident, controlling and assisting at an accident or emergency site, finalising accident-emergency processes, and completing records, reports and other required documentation in accordance with regulatory requirements and workplace procedures.

Application of the Unit

Work must be carried out in accordance with OH&S codes/regulations and workplace requirements.

Work is performed under limited supervision. It involves the application of regulatory requirements and workplace procedures when responding to accident/emergencies in the workplace.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Respond to the incident	<ul style="list-style-type: none">1.1 Response to the incident or accident is in accordance with workplace emergency procedures and relevant regulatory requirements1.2 Details of the cause(s) and effects of the incident are identified and reported1.3 Assistance requirements for accidents and emergencies are clarified and reported immediately to the appropriate parties1.4 Requests for assistance are made to relevant personnel and emergency services
2 Control and assist at accident or emergency site	<ul style="list-style-type: none">2.1 Site is controlled and protected until the arrival of authorised personnel2.2 Assistance is provided to injured persons, within the limitations of duty of care and workplace procedures2.3 Relevant authorities at the site are cooperated with and assisted within workplace policies
3 Finalise accident - emergency process and complete records	<ul style="list-style-type: none">3.1 Relevant information is exchanged in accordance with state/territory law and workplace procedures3.2 Documentation and reports are completed and processed in accordance with workplace and relevant regulatory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements applicable in accident/emergency situations

Relevant OH&S and environmental protection policies and procedures

Workplace procedures for accident-emergency response

Workplace emergency, fire and accident procedures

Site layout

Focus of operation of work systems, equipment or management, site and organisational operating and emergency procedures

Typical problems that can occur during a safety incident, accident or emergency and related action that can be taken

Required skills:

Communicate effectively with others when responding to an accident or an emergency

Read and interpret instructions, procedures and information relevant to a response to an accident or an emergency

Interpret and follow operational instructions and prioritise work

Negotiate and resolve issues when responding to an accident or an emergency

Complete documentation related to a response to an accident or an emergency

Operate electronic communication equipment to required protocol

Work collaboratively with others when responding to an accident or an emergency

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may occur when responding to an accident or an emergency

Analyse the working environment in order to identify hazards, assess safety risks and design and implement appropriate OH&S control procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist when responding to an accident or an emergency

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and appropriately apply technology, information systems and policies during a safety incident, accident or emergency

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments even or uneven surfaces wet or dry surfaces
Workplace hazards may include but are not restricted to:	moving heavy loads in an unsafe work environment unsecured machinery, components or repaired equipment slippery floors welding equipment sharp tools and implements power tools moving and rotating machinery flammable liquids, vapours and fuel faulty machinery equipment handling equipment and lifting gear using equipment beyond safe working limits poor housekeeping procedures non-compliance with safe working procedures electrical wiring and systems, including exposed electrical circuits working at heights and in confined spaces toxic gases and substances

	chemicals and other harmful substances
	damaged goods, pallets and containers
	dangerous/hazardous goods
Consultative processes may involve:	OH&S specialists
	trainers
	other employees and supervisors
	management
	union representatives
	manufacturers representatives
	supplier representatives
	customers/clients
	other maintenance, professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:	company plans/procedures
	enterprise plans/procedures
	organisational plans/procedures
	established plans/procedures
Information/documentation may include:	workplace accident-emergency procedures and policies
	workplace OH&S management system including hazard/safety risk control strategies
	OH&S training notes and materials
	journals and work related literature concerning OH&S
	competency standards
	customer/client instructions
	customer service standards and procedures
	workplace products and services information
	quality assurance standards and procedures
	relevant agreements, codes of practice including the national standards for services and operations
	manufacturers/suppliers' specifications, advice, recommended procedures, policies and instructions

Applicable regulations and legislation may include:

workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information

regulations and policies relating to minimising risks to the environment and ensuring compliance with OH&S requirements

emergency procedures

relevant regulations, standards and codes of practice

hazardous substances and dangerous goods codes

relevant Australian and state/territory OH&S legislation including regulations and codes of practice relating to hazards present in the workplace or industry, including:

general duty of care under OH&S legislation and common law

requirements for the maintenance and confidentiality of records of occupational injury and disease

requirements for provision of OH&S information and training

provisions relating to health and safety representatives and/or OH&S committees

provisions relating to OH&S issue resolution

environmental protection regulations

relevant Australian standards and certification requirements including Australian Standard AS 1885.1

Unit Sector(s)

Not applicable.

Competency Field

F - Safety Management

TLIF6307A Administer the implementation of fatigue management strategies

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to administer the implementation of fatigue management strategies, including monitoring the implementation of fatigue management strategies; and recognising breaches of fatigue management policies, procedures and regulations. It also includes developing and assessing staff competence in fatigue management; providing feedback to staff on any shortcomings in their fatigue management skills and knowledge; and reporting to management on the implementation of fatigue management policy.

Application of the Unit

Persons achieving competence in this unit will need to fulfil the requirements of the applicable Commonwealth and state/territory legislation and relevant regulations covering the management of fatigue in the workplace.

Work is performed under limited supervision generally as a team leader or supervisor. It involves the application of relevant regulations and the principles of fatigue management when administering the implementation of an organisations fatigue management strategies during work operations in a defined workplace.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Monitor the implementation of fatigue management strategies	<ul style="list-style-type: none">1.1 Work activities of employees, subcontractors and suppliers in the supply chain of products and services are monitored in accordance with the organisation's fatigue risk management implementation plan1.2 Reviews are undertaken of scheduled versus actual hours of work and where a compliance breach is identified, appropriate action is taken to analyse the reasons concerned and to rectify the situation
2 Recognise breaches of fatigue management policies, procedures and regulations	<ul style="list-style-type: none">2.1 Signs and symptoms of fatigue in employees are identified in accordance with operational procedures2.2 Breaches of fatigue management policies, procedures and regulations in the work activities of employees, subcontractors and suppliers are recognised and reported as per standard procedures2.3 Errors and incidents traceable to non-compliance with fatigue management procedures and regulations are investigated and reported in accordance with operational procedures2.4 Appropriate action is taken in conjunction with employees, subcontractors or suppliers concerned to ensure ongoing and future compliance with the organisation's fatigue management policy and procedures

- 3 Develop and assess staff competence in fatigue management**
 - 3.1 Appropriate training programs and learning resources are developed and provided to ensure that employees understand the organisation's fatigue management policies and procedures and the risks, causes and consequences of fatigue
 - 3.2 Employees are assessed to confirm that they are competent in their understanding of the organisation's fatigue management strategies and can apply them to their day-to-day work activities and responsibilities
 - 3.3 Any deficiencies in the competence of individual employees to apply the organisation's fatigue management strategies to their work activities are identified, and appropriate learning opportunities are provided to the employee to enable her or him to achieve the competence required
- 4 Provide feedback to employees on any shortcomings in fatigue management skills and knowledge**
 - 4.1 Evidence of any shortcomings in an employee's implementation of fatigue management strategies is obtained and interpreted from observation of signs and symptoms of fatigue in their work activities, periodic evaluations of work performance, and assessments of competence carried out as part of training and learning activities
 - 4.2 Employees are provided with feedback on any identified shortcomings in their implementation of fatigue management strategies and appropriate support and counselling is provided on how they might address these shortcomings
 - 4.3 Where appropriate, further learning opportunities and information are provided to the employees to assist them in implementation of organisation's fatigue management strategies in their area of work activity
- 5 Report on the implementation of fatigue management policy**
 - 5.1 Periodic audits of the implementation of fatigue management strategies in the work areas of responsibility are carried out as per standard procedures
 - 5.2 Accidents and safety incidents are investigated and analysed to identify the extent to which fatigue might have been a contributing factor

- 5.3 Reports on the implementation of the organisation's fatigue risk management system are prepared and submitted to designated personnel as per standard procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant codes, regulations, permit and licence requirements related to fatigue management

Relevant OH&S regulations as they relate to fatigue

Organisation's fatigue risk management system as it relates to the operational areas being administered

Organisation's fatigue risk management system and the workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents

Responsibilities of both the organisation and individual employees for the implementation of fatigue management regulations and policies in an organisation including suppliers and sub-contractors in the supply chain of the organisation's services and products

Procedures for the auditing and review of an organisation's fatigue risk management system and related policy and procedures, and for reporting the outcomes of audits

The risks and hazards created by fatigue in the workplace

Causes and consequences of fatigue on both employees and an organisation

How fatigue affects workplace performance

How fatigue contributes to workplace accidents

Ways of recognising fatigue

Strategies and ways of managing fatigue

Factors which increase fatigue-related accidents

Lifestyles which promote the effective long-term management of fatigue

Ways of assisting individuals to assess their own sleep patterns and to evaluate their own fitness for work. This may include information on identifying sleep disorders and obtaining appropriate treatment

Options and resources for providing training and learning opportunities for employees on fatigue management and the implementation of an organisation's fatigue risk management system, including initial induction training, in-depth training on fatigue and fatigue management techniques, remedial training where existing competence is assessed as being

insufficient, and refresher training on fatigue management

Processes and resources for assessing employees' competence in fatigue management

Ways of providing feedback to employees on any identified deficiencies in their competence to implement fatigue management strategies

Required skills:

Communicate effectively with others when implementing the organisation's fatigue risk management system

Read and interpret documentation on an organisation's fatigue risk management system and related policy, instructions, procedures and regulations related to fatigue management and apply them to supervisory activities

Recognise breaches of fatigue management strategies and regulations and take appropriate action in accordance with organisation's fatigue risk management system

Work collaboratively with employees and other management staff others to implement the organisation's fatigue risk management system

Plan and organise training and learning opportunities for employees on fatigue management and the implementation of an organisation's fatigue risk management system

Plan and carry out audits and reviews of an organisation's fatigue risk management system

Modify activities and take appropriate initiatives to administer the implementation of an organisation's fatigue risk management system depending on differing contexts, risk situations and environments

Adapt to any changes in regulations policies and procedures as they may relate to fatigue management

Assist employees to identify their own learning needs on matters related to fatigue management

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Workplace may include:	any work environment requiring safety critical operational judgements to be made and in particular when operating equipment, vehicles, load shifting equipment, trains, marine vessels and aircraft at night
Components of a fatigue risk management system include:	risk management policy documents risk management procedures risk management competence assessment processes risk management training and learning opportunities hazard control system
The need for fatigue management in a range of industry situations including:	operations conducted at all times but particularly at night typical weather conditions while working and/or driving at a workplace, depot, base or warehouse while working and/or driving at a client's workplace or work site driving a motor vehicle on the open road driving a motor vehicle on a private road driving a train, locomotive or motive power unit operating a marine vessel in coastal or international waters operating an aircraft operating load shifting equipment operating safety critical industrial plant and equipment
Work-related factors that may contribute to fatigue include:	work demands such as: workload, work duration, shift pattern, time of day, frequency and duration of breaks and the type of work (e.g. working in isolation, repetitive tasks)

	and boring, monotonous or under-challenging tasks)
	organisational factors such as: work environment (including temperature, ventilation, continual rhythmic vibration from equipment), payment system, trip and work scheduling, and the predictability of work
Worker/operator-related factors that may contribute to fatigue include:	<p>lifestyle factors such as: sleep patterns, alcohol and drug use, quantity and timing of food and drink, and opportunities for relaxation with family and friends</p> <p>working multiple jobs</p> <p>personal or biological factors such as: state of mental and/or physical health, inadequate sleep, sleep disorders, emotional stress, family responsibilities, relationship difficulties, inadequate competence to complete work tasks, and circadian rhythms</p>
Responsibilities of organisation for fatigue risk management may include:	<p>providing support such as: complying with fatigue management regulations, developing and implementing appropriate policy and procedures, providing assessment, training and learning opportunities, and establishing and implementing error and incident reporting systems</p> <p>ensuring work schedules provide adequate opportunity for rest and recovery between shifts</p> <p>assessing work tasks for fatigue related risk and redesigning if necessary</p> <p>managing fatigued employees</p>
Responsibilities of individual for fatigue risk management may include:	<p>following the organisation's fatigue management policy and procedures</p> <p>using time away from work appropriately to rest and recover</p> <p>checking and ensuring fitness for work</p> <p>reporting symptoms of fatigue</p>
Fatigue management competency-based training may include:	initial induction training (incorporating a basic fatigue management component)

	fatigue management awareness training
	in-depth training on fatigue and fatigue management techniques
	remedial training where existing competence is assessed as being insufficient
	refresher training on fatigue management
Depending on the organisation operating procedures may include:	standard operating procedures
	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information and documents may include:	Commonwealth and state/territory regulations and guidelines concerning fatigue management in various transport and workplace situations
	fatigue risk management system documents
	workplace instructions and procedures on fatigue management
	reports of audits of fatigue risk management system
	error and safety incident reports
	relevant OH&S regulations and procedures
	relevant standards and certification requirements
	quality assurance procedures
Applicable legislation, regulations and codes may include:	relevant regulations and codes of the Commonwealth Government and the state/territory roads and traffic authorities concerning fatigue management
	relevant state/territory road rules
	relevant rail industry safe working codes and regulations (where applicable)
	relevant state/territory permit regulations and requirements
	relevant state/territory OH&S legislation

Unit Sector(s)

Not applicable.

Competency Field

F - Safety Management

TLIF6407A Manage fatigue management policy and procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to manage fatigue management policy and procedures in an organisation, including identifying legal requirements, liabilities and responsibilities; establishing and/or improving fatigue management implementation plan and related policy and procedures; and acting appropriately upon reports on the implementation of fatigue management policy and any identified breaches of fatigue management regulations. It also includes ensuring that the operations systems are compliant with fatigue management regulations and policy; planning and organising adequate resources and operational systems; and facilitating the training and assessment of staff on their responsibilities and fatigue management techniques.

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable Commonwealth and state/territory legislation and relevant regulations covering the management of fatigue in the workplace.

Work is performed under minimum supervision generally as a manager. It involves the application of relevant regulations and the principles of fatigue management to the management of an organisations fatigue management policies and procedures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify or confirm fatigue management legal requirements and responsibilities	<p>1.1 Current legal requirements, liabilities and responsibilities for effective fatigue management within the organisation are identified and interpreted</p> <p>1.2 Any existing fatigue management plans, policies and procedures are obtained and reviewed</p> <p>1.3 Internal risks concerning the potential effects of fatigue are identified or confirmed and reviewed</p> <p>1.4 External risks within the supply chain of the organisation's services and/or products concerning the potential effects of fatigue are identified or confirmed and reviewed in accordance with regulations on fatigue management and the related chain of responsibility</p>
2 Establish and improve fatigue management policy and procedures	<p>2.1 A fatigue risk management system implementation plan for the organisation is developed or reviewed and improved</p> <p>2.2 The fatigue risk management policy and procedures for the organisation are developed or reviewed and improved in conjunction with relevant personnel</p> <p>2.3 Feedback is obtained from key stakeholders both within and outside of the organisation on the implementation plan and the related policy and procedures</p> <p>2.4 Appropriate adjustments are made to the plan, policy and procedures based on the feedback received</p>

- 2.5 Managerial approval for the fatigue risk management system implementation plan and the related policy and procedures is obtained in accordance with organisational procedures
 - 2.6 The fatigue risk management system implementation plan and the related policy and procedures are distributed and presented to relevant personnel in the organisation for implementation
- 3 **Act upon reports on the implementation of fatigue management policy**
 - 3.1 Reports from designated personnel on the implementation of the organisation's fatigue risk management system implementation plan and the related policy and procedures are received and interpreted
 - 3.2 Accidents and safety incidents are reviewed and/or investigated and analysed to identify the extent to which fatigue might have been a contributing factor
 - 3.3 Information provided in the reports indicating that fatigue management policy and procedures are not being correctly implemented is analysed and an appropriate managerial response and related action is initiated
 - 3.4 Opportunities for improvements to the organisation's fatigue risk management system implementation plan and its related policy and procedures are identified and appropriate action is taken to make the necessary adjustments
- 4 **Act upon identified breaches of fatigue management regulations**
 - 4.1 Identified or reported breaches of fatigue management policy are investigated in accordance with organisational procedures and regulatory requirements
 - 4.2 Action is taken to ensure that internal and/or external personnel who may have contributed to any breach of fatigue management policy are provided with appropriate feedback and information to avoid any recurrence of the breakdown in planned fatigue management processes
 - 4.3 Where organisational procedures or culture is found to have contributed to a breach in fatigue management policy, appropriate action is taken to

- improve the procedures or address the culture in ways that aim to avoid any recurrence of the breakdown in planned fatigue management processes
- 4.4 A report on any breaches of fatigue management policy is prepared and submitted to designated personnel as per organisational procedures together with details of action taken to prevent a recurrence
- 5 Ensure that operations systems are compliant with fatigue management regulations and policy**
- 5.1 All operations systems and standard operating procedures are reviewed in terms of their compliance with the organisation's fatigue management regulations and policy
- 5.2 Where necessary, changes are made to operations systems and standard operating procedures to ensure that they are compliant
- 5.3 In accordance with the principles of 'chain of responsibility', appropriate discussions are held with relevant personnel in supplier or subcontractor companies in the organisation's supply chain to ensure their operation's systems and standard operating procedures are compliant with the fatigue management regulations and policy
- 6 Plan and organise adequate resources and operational systems**
- 6.1 Organisational budgets and resource allocation strategies are planned to provide adequate resources for the implementation of the organisation's fatigue risk management system
- 6.2 Periodic reviews are undertaken of budgetary and resource allocation arrangements as they relate to the implementation of the organisation's fatigue risk management systems and appropriate improvements are made if required
- 7 Facilitate the training and assessment of staff on fatigue management policy and procedures**
- 7.1 Organisational training systems are planned to provide competency-based on the job and off the job training and assessment opportunities as detailed in the organisation's strategic plan
- 7.2 Team leaders and supervisory and training staff are provided with adequate opportunities to develop the required expertise to contribute to the organisation's fatigue management training and assessment activities

- 7.3 Periodic reviews are undertaken of fatigue management training systems and appropriate improvements are made if required

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant legislation, regulations, permit and licence requirements related to fatigue management

Relevant OH&S regulations as they relate to fatigue

Components of a fatigue risk management system and policies and procedures related to fatigue management, and the control of factors that can contribute to fatigue and fatigue-related accidents

Responsibilities of both an organisation and individual employees for the implementation of fatigue management regulations and policies, including requirements agreed with suppliers and sub-contractors in the supply chain of the organisation's services and products

Procedures for the auditing and review of an organisation's fatigue risk management system and related policy and procedures, and for the reporting of the outcomes of audits

Budgetary and resource requirements for the implementation of an organisation's fatigue risk management system

Processes and resources for assessing employees' competence in fatigue management

Systems for auditing of the effectiveness and efficacy of an organisation's fatigue risk management strategies, policies and procedures

Strategies for ensuring that the investigation and analysis of errors, safety incidents and accidents identify the extent to which fatigue is a contributing factor

Options and resources for providing training and learning opportunities for employees on fatigue management and the implementation of an organisation's fatigue risk management system, including initial induction training, in-depth training on fatigue and fatigue management techniques, remedial training where existing competence is assessed as being insufficient, and refresher training on fatigue management

Sources of information on fatigue

The risks and hazards created by fatigue in the workplace

How fatigue affects workplace performance

How fatigue contributes to workplace accidents

Ways of recognising fatigue

Fatigue reduction and proofing strategies available to an organisation that can minimise the risk of errors and safety incidents due to fatigue such as assigning low risk tasks to periods when fatigue risk is higher

Causes and effects of fatigue on employees

Strategies and ways to manage fatigue

Factors which increase fatigue-related errors and accidents

Lifestyles which promote the effective long-term management of fatigue

Required skills:

Communicate effectively with others when implementing the organisations's fatigue risk management system

Read and interpret documentation on fatigue management legislation and the organisation's fatigue risk management system and apply them to management activities

Recognise breaches of fatigue management strategies and regulations and take appropriate action in accordance with organisation's fatigue risk management system

Work collaboratively with employees and other management staff others to implement the organisation's fatigue risk management system

Plan and organise budgetary requirements and resource allocation for the implementation of an organisation's fatigue risk management system

Organise audits and reviews of an organisation's fatigue risk management system

Modify activities and take appropriate initiatives to manage the implementation of an organisation's fatigue risk management system depending on differing contexts, risk situations and environments

Adapt to any changes in legislation and regulations as they may relate to fatigue management

Facilitate systems that assist employees to identify their own learning needs on matters related to fatigue management

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Workplace may include:	any work environment requiring safety critical operational judgements to be made and in particular when operating equipment, vehicles, load shifting equipment, trains, marine vessels and aircraft at night
Components of a fatigue risk management system include:	risk management policy documents risk management procedures risk management competence assessment processes risk management training and learning opportunities hazard control system
The need for fatigue management in a range of industry situations including:	operations conducted at all times but particularly at night typical weather conditions while working and/or driving at a workplace, depot, base or warehouse while working and/or driving at a client's workplace or work site driving a motor vehicle on the open road driving a motor vehicle on a private road driving a train, locomotive or motive power unit operating a marine vessel in coastal or international waters operating an aircraft operating load shifting equipment operating safety critical industrial plant and equipment
Work-related factors that may contribute to fatigue include:	work demands such as: workload, work duration, shift pattern, time of day, frequency and duration of breaks and the type of work (e.g. working in isolation, repetitive tasks)

	and boring, monotonous or under-challenging tasks)
	organisational factors such as: work environment (including temperature, ventilation, continual rhythmic vibration from equipment), payment system, trip and work scheduling, and the predictability of work
Worker/operator-related factors that may contribute to fatigue include:	<p>lifestyle factors such as: sleep patterns, alcohol and drug use, quantity and timing of food and drink, and opportunities for relaxation with family and friends</p> <p>working multiple jobs</p> <p>personal or biological factors such as: state of mental and/or physical health, inadequate sleep, sleep disorders, emotional stress, family responsibilities, relationship difficulties, inadequate competence to complete work tasks, and circadian rhythms</p>
Responsibilities of organisation for fatigue risk management may include:	<p>providing support such as: complying with fatigue management regulations, developing and implementing appropriate policy and procedures, providing assessment, training and learning opportunities, and establishing and implementing error and incident reporting systems</p> <p>ensuring work schedules provide adequate opportunity for rest and recovery between shifts</p> <p>assessing work tasks for fatigue related risk and redesigning if necessary</p> <p>managing fatigued employees</p>
Responsibilities of individual for fatigue risk management may include:	<p>following the organisation's fatigue management policy and procedures</p> <p>using time away from work appropriately to rest and recover</p> <p>checking and ensuring fitness for work</p> <p>reporting symptoms of fatigue</p>
Fatigue management competency-based training may include:	initial induction training (incorporating a basic fatigue management component)

	fatigue management awareness training
	in-depth training on fatigue and fatigue management techniques
	remedial training where existing competence is assessed as being insufficient
	refresher training on fatigue management
Depending on the organisation, operating procedures may include:	standard operating procedures
	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information and documents may include:	Commonwealth and state/territory regulations and guidelines concerning fatigue management in various transport and workplace situations
	fatigue risk management system documents
	workplace instructions and procedures on fatigue management
	reports of audits of fatigue risk management system
	error and safety incident reports
	relevant OH&S regulations and procedures
	relevant standards and certification requirements
	quality assurance procedures
Applicable legislation, regulations and codes may include:	relevant regulations and codes of the Commonwealth Government and the state/territory regulatory authorities concerning fatigue management
	relevant state/territory road rules
	relevant rail industry safe working codes and regulations (where applicable)
	relevant state/territory permit regulations and requirements
	relevant state/territory OH&S legislation

Unit Sector(s)

Not applicable.

Competency Field

F - Safety Management

TLIF707C Implement and coordinate accident-emergency procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to implement and coordinate accident-emergency procedures, including responding to the incident, conducting on-site activities, and completing follow-up actions.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace procedures concerning action to be taken in the event of an emergency, fire or accident. Work is performed under some supervision generally within a team environment. It involves the application of the basic emergency response principles to the implementation of accident-emergency procedures including the provision of assistance ranging from simple injuries to the application of life support systems.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Respond to the incident	<ul style="list-style-type: none">1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed1.2 Immediate coordination requirements are identified and actioned in accordance with organisation procedures1.3 Travel to the incident site is by the shortest, fastest, legal means and routes
2 Coordinate on-site activities	<ul style="list-style-type: none">2.1 Control of site activities is assumed on arrival and the operator and other authorities present are informed of this action2.2 Assistance is provided to clients and operators within the limitations of duty of care and organisation requirements2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, following enterprise procedures2.4 Assistance is provided to relevant authorities within legal and policy limitations
3 Complete follow-up actions	<ul style="list-style-type: none">3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisation procedures3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with enterprise policies and procedures3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies

Risks and hazards in the workplace and related precautions to control the risk

Workplace procedures and policies for responding to accident/emergency situations

Types of accidents and emergencies that can occur in a workplace and the appropriate action to be taken in each case

Types of emergency equipment in the workplace and instructions for its use

Site layout and obstacles

Means to control and organise the accident scene, provide practical assistance and cooperate with others at the scene

Focus of operation of work systems, equipment, management and site operating systems

Required skills:

Communicate effectively with others when implementing and coordinating accident and emergency procedures

Read and interpret instructions, procedures, information and signs relevant to the implementation and coordination of accident and emergency procedures

Identify containers and goods coding, ADG and IMDG markings and where applicable emergency information panels

Interpret and follow operational instructions and prioritise work

Complete documentation related to the implementation and coordination of accident and emergency procedures

Operate electronic communication equipment to required protocol

Work collaboratively with others when implementing and coordinating accident and emergency procedures

Adapt appropriately to cultural differences in the workplace, including modes of behaviour

and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when implementing and coordinating accident and emergency procedures in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may occur when implementing and coordinating accident and emergency procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify, select and use emergency equipment, processes and procedures

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted: in a range of work environments and weather conditions

by day or night

Customers may be: internal or external

Workplaces may comprise: large, medium or small worksites

Work may be conducted in: restricted spaces
exposed conditions
controlled or open environments

Action to be taken in the event of an accident-emergency may include: identifying and following established emergency procedures
assessing the nature and extent of the emergency
rendering assistance and first aid
isolating and coordinating safety of the scene
alerting relevant organisational personnel and emergency services
recording relevant information and reporting on accident/emergency situation in accordance with regulatory and workplace requirements

Emergency equipment may include: first aid kit
fire extinguishers
fire hose
fire blanket
resuscitation equipment

Hazards in the work area may include: exposure to chemicals
exposure to dangerous or hazardous substances
movements of equipment, goods and materials

	accidents involving chemicals, toxic substances and other harmful substances
	accidents involving equipment and vehicles
	explosion and/or fire
	personal accidents including lifting injuries
	waste management and disposal
	violent incidents such as armed robberies
Consultative processes may include:	workplace personnel and management
	designated workplace emergency officers
	emergency services personnel including ambulance, police, fire services, etc.
	union representatives
	industrial relations and OH&S specialists
	other professional or technical staff
	site visitors
	contractors
	official representatives
Communication in the work area may include:	phone
	electronic data interchange
	fax
	email
	internet
	radio
	oral, aural or signed communications
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
	breathing apparatus
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures

	established procedures
Information/documents may include:	workplace emergency/fire/accident procedures
	workplace procedures for the use of emergency equipment and personal protection equipment
	first aid instructions and procedures
	manufacturers instructions concerning the use and servicing of equipment
	manifests, bar codes, goods and container identification goods identification numbers and codes
	material safety data sheets
	codes of practice including the Dangerous Goods Code
	IMDG code markings, HAZCHEM codes and where applicable emergency information panels
	relevant legislation, regulations and related documentation related to emergency response situations
	award, enterprise bargaining agreement, other industrial arrangements
	relevant Australian standards and certification requirements
	quality assurance procedures
	supplier and/or client advice on the hazards involved with goods or cargo
Applicable regulations and legislation may include:	relevant state/territory OH&S legislation
	relevant state/territory environmental protection legislation
	emergency procedures regulations
	dangerous goods and hazardous goods regulations
	relevant Australian standards and certification including Australian Standard AS 2865 - Safe Working in a Confined Space Code
	workplace relations regulations

workers compensation regulations

Unit Sector(s)

F - Safety Management

TLIF907C Conduct cleaning operations in enclosed spaces

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to conduct cleaning operations in enclosed spaces, including identifying cleaning risks, planning cleaning operations, and cleaning the required enclosed space in accordance with operational requirements.

Application of the Unit

Work must be carried out in accordance with regulations and procedures for conducting cleaning operations in enclosed spaces.

Work is performed under some supervision generally within a team environment. It involves the application of established safety procedures and regulatory requirements to the conduct of cleaning operations in enclosed spaces.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify risks and plan operation	<ul style="list-style-type: none">1.1 Requirements for the cleaning operation are assessed1.2 Potential risks or hazards to self, the environment or others are identified1.3 Relevant information including workplace procedures and safety codes are identified and read1.4 Cleaning and personal protective equipment and consumables are identified1.5 Requirements are assembled in accordance with national standards, safety codes and workplace procedures1.6 Work is planned identifying critical parameters of the work
2 Clean required enclosed space	<ul style="list-style-type: none">2.1 Unauthorised persons are removed from the work area2.2 Engineering and personal safety equipment is used2.3 Unwanted labels are removed2.4 Cleaning products, where used, are mixed in accordance with manufacturers and workplace instructions2.5 Containers are swept out and washed so that mud, grime and any residue from products stored in the containers are removed2.6 Security of chemicals and equipment is maintained2.7 Run-off is contained and wastes are disposed of in accordance with local laws and workplace procedures2.8 Relevant documentation is completed2.9 Equipment used for the process is checked and stored

- 2.1 Worksite is checked and returned to operational
- 0 status

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S regulations, codes and guidelines concerning cleaning operations in enclosed spaces including Australian Standard AS 2865 - Safe Working in a Confined Space Code

Workplace procedures and policies for carrying out cleaning operations in enclosed spaces

Risks when carrying out cleaning operations in enclosed spaces and related precautions to control the risk

Procedures for carrying out tests for contaminant gases in enclosed spaces prior to performing cleaning operations

Site layout and obstacles

Application of relevant industrial regulations and requirements

Maintenance procedures for cleaning equipment

Required skills:

Communicate effectively with others when conducting cleaning procedures in enclosed spaces

Read and interpret instructions, procedures, information and signs relevant to cleaning procedures in enclosed spaces

Identify container and goods coding, ADG and IMDG markings and where applicable emergency information panels

Interpret and follow operational instructions and prioritise work

Complete documentation related to cleaning procedures in enclosed spaces

Operate electronic communication equipment to required protocol

Work collaboratively with others when conducting cleaning procedures in enclosed spaces

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may

occur when conducting cleaning procedures in enclosed spaces in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events that may arise when conducting cleaning procedures in enclosed spaces

Apply precautions and required action to minimise, control or eliminate hazards that may exist during cleaning procedures in enclosed spaces

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify and correctly use equipment, cleaning materials, processes and procedures for carrying out cleaning operations in enclosed spaces

Identify, select and use emergency equipment, processes and procedures

Operate and adapt to differences in equipment in accordance with standard operating procedures

Follow routine servicing procedures for cleaning tools and equipment

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The housekeeping tasks may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted:	in confined restricted enclosed spaces
Focus of cleaning operations may include:	containers tanks other enclosed spaces
Hazards in the work area may include exposure to:	chemicals dangerous or hazardous substances toxic gas movements of equipment, goods and materials
Critical parameters for cleaning operations in enclosed spaces include:	workplace personnel sequence of operations precautions for self, others and work area relevant workplace procedures to be followed emergency precautions, tests and procedures evacuation and rescue procedures
Personnel in the work area may include:	other workplace personnel and managers site visitors contractors official representatives including OH&S specialists
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures

Depending on workplace context, personal protective equipment may include:

organisational procedures
established procedures
gloves
safety headwear and footwear
safety glasses
two-way radios
high visibility clothing
breathing apparatus

Information documents may include:

workplace procedures and policies for cleaning operations including those in confined spaces
OH&S and environmental protection regulations
relevant codes of practice including the National Standards for Manual Handling and the Industry Safety Code
material safety data sheets
policies and procedures for entry and work in confined spaces
manufacturers instructions concerning the use and servicing of equipment
supplier and/or client instructions
emergency procedures
goods identification numbers and codes
manifests, bar codes, goods and container identification
award, enterprise bargaining agreement, other industrial arrangements
standards and certification requirements, specifically Australian Standard AS 2865 - Safe Working in a Confined Space
quality assurance procedures

Applicable regulations and legislation may include:

relevant state/territory OH&S legislation and regulations pertaining to cleaning operations and working in confined spaces
relevant state/territory environmental protection legislation

relevant Australian standards and
certification including Australian Standard
AS 2865 - Safe Working in a Confined
Space Code

workplace relations regulations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Contribute to determination of appropriate work roles	<p>1.1 Work roles of each group member are identified based on information and instructions about objectives, performance requirements and procedures</p> <p>1.2 Contributions are made to assist in the determination of the appropriate roles and responsibilities for the successful completion of the activity</p>
2 Contribute to the planning of the activity	<p>2.1 Suggestions and information are provided as appropriate to contribute to the planning of the activity and the associated procedures</p>
3 Work with others	<p>3.1 Forms of communication appropriate to the activity are used</p> <p>3.2 Assistance in the completion of the activities is requested where appropriate</p> <p>3.3 Contributions to the achievement of a required outcome are made</p> <p>3.4 Work is undertaken in accordance with specified procedures on an individual and shared basis as appropriate</p> <p>3.5 Problems are discussed and resolved where possible through agreed and accepted processes</p> <p>3.6 Suggestions for improvements to processes are made and discussed within the team</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant workplace standards and procedures and duty of care requirements

Relevant OH&S and environmental protection procedures and responsibilities

Workplace structures and the roles and responsibilities of team/group members

Basic principles of teamwork

Typical misunderstandings and problems that can occur in the workplace and appropriate ways of dealing with them

Focus of operation of work systems, equipment or management, site and organisational operating procedures

Required skills:

Communicate effectively with others when completing work activities

Read and interpret instructions, procedures, information and signs relevant to working with others as a team

Interpret and follow operational instructions and prioritise work within the team

Operate electronic communication equipment to required protocol when communicating with others in the workplace

Work collaboratively with others

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified misunderstandings and problems that can occur in the workplace and appropriate ways of dealing with them in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist when working with others in a work environment

Monitor team activities in terms of planned schedule

Modify team activities depending on differing operational contingencies, risk situations and

environments

Adapt to any differences in language and culture in accordance with standard operating procedures

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work:	involves basic routine work operations carried out in collaboration with others may occur by day or night may be in a variety of work contexts
Customers may be:	internal or external
Enterprises may comprise:	large, medium or small worksites
Work colleagues may include:	English-speaking persons multilingual staff persons with limited ability to communicate in English persons from a range of cultural backgrounds
Personnel in work area may include:	managers supervisors/team leaders workplace personnel visitors contractors official representatives
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Communication may involve the basic use of a range of communication technology including:	phone electronic data interchange (EDI) fax email internet radio

Information/documentation may include:

- workplace procedures, checklists and instructions
- goods identification numbers and codes
- manifests, bar codes, goods and container identification
- manufacturers specifications
- workplace policies
- supplier and/or client instructions
- material safety data sheets
- relevant codes of practice including the national standards for manual handling and the industry safety code
- legislation, regulations and related documentation
- award, enterprise bargaining agreement, other industrial arrangements
- standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant regulations, standards and codes of practice, including the national standards for manual handling and industry safety codes
- dangerous goods and freight regulations and codes
- relevant Australian and state/territory OH&S legislation
- equal employment legislation and related policies
- environmental protection regulations

TLIG207C Lead a work team or group

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to lead a work team or group including participating in team/group planning, managing and developing team/group performance, participating in and facilitating the work team/group in its achievement of workplace tasks, and documenting and reviewing work team/group performance.

Application of the Unit

Work is carried out in accordance with workplace procedures and relevant regulations.
Work is performed under some supervision, generally within a team environment.
Work involves the application of established procedures to the provision of leadership within a work team or group.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.
Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Participate in team/group planning	<p>1.1 Requirements of a team/group task are identified and clarified in conjunction with other team or group members to ensure appropriate interpretation of specifications and in accordance with enterprise requirements</p> <p>1.2 Task is interpreted and relevant steps are identified in conjunction with other team/group members to ensure efficient conduct of work to meet specifications and enterprise requirements</p> <p>1.3 Steps are planned in conjunction with the work of other personnel to allow achievement of practical outcomes according to enterprise and/or manufacturers procedures</p>
2 Manage and develop team/group performance	<p>2.1 Task activities are assigned to team/group members based on their areas of competence and expertise and their availability</p> <p>2.2 Team/group members are advised on symptoms and effects of fatigue, drugs and alcohol, safe lifting techniques and other Occupational Health and Safety policies</p> <p>2.3 Performance measures and requirements are agreed upon between team/group members in accordance with enterprise procedures</p>
3 Participate in and facilitate the work team/group	<p>3.1 Work activity is organised and carried out with other involved team/group members and personnel using relevant communication processes to ensure safe, unambiguous and appropriate sequencing of tasks</p> <p>3.2 Individuals and teams/groups are actively encouraged to take individual and joint responsibility</p>

- 4 **Document and review work team/group tasks**
- 4.1 All necessary documentation related to job planning and progress is completed and recorded in accordance with statutory, manufacturers and enterprise requirements
 - 4.2 The outcomes of the team's/group's task activities are compared with the planned objectives, task instructions and specifications to ensure all requirements have been met

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for leading work teams

Techniques to encourage appropriate participation of team/group members

Coaching and mentoring approaches

Workplace policies and plans including procedures for training and development

Principles, duty of care and obligations within the chains of responsibility in the transport industry

Strategies to implement continuous improvement processes

Typical problems that can occur when leading a work team and related appropriate action that can be taken

Required skills:

Communicate effectively with others when leading a work team

Read and interpret instructions, procedures and information relevant to team leadership and team activities

Negotiate and work effectively with team members

Interpret and follow operational instructions and prioritise work

Complete documentation related to team leadership and team activities

Operate electronic communication equipment to required protocol

Provide leadership and encouragement to team members

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when leading a work

team in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may arise when leading a work team

Apply precautions and required action to minimise, control or eliminate hazards that may exist during team activities

Plan team activities, including predicting consequences and identifying improvements

Monitor team activities in terms of planned schedule

Modify team activities depending on differing operational contingencies, risk situations and environments

Ensure application of fatigue management knowledge and techniques

Operate and adapt to any differences in language and culture amongst team members

Identify and recommend improvements to services, resource allocation and use

Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

TLIG607C Facilitate work teams

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to lead and facilitate work teams, including participating and providing leadership in team planning, developing team commitment and cooperation, managing and developing team performance, and participating in and facilitating the work of work teams/groups.

Application of the Unit

Work is performed under minimum supervision with general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in the facilitation of work teams or groups.

A range of opportunities may be used to develop the workplace and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations goals and key performance objectives. Work involves responsibility for facilitating and encouraging the work of work teams/groups and the provision of leadership to others in the establishment and achievement of team objectives.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Participate in team planning	<ul style="list-style-type: none">1.1 The team establishes clearly defined goals, purpose, roles, responsibilities and accountabilities within the organisation's goals and objectives1.2 The team performance plan contributes to the organisation's business plan, policies and practices1.3 The team agrees to processes to monitor and adjust its performance within the organisation's continuous improvement policies1.4 The team includes in its plans ways in which it can benefit from the diversity of its membership
2 Develop team commitment and cooperation	<ul style="list-style-type: none">2.1 The team uses open communication processes to obtain and share information2.2 The team encourages and exploits innovation and initiative2.3 Support is provided to the team to develop mutual concern and camaraderie
3 Manage and develop team performance	<ul style="list-style-type: none">3.1 The team is supported in making decisions within agreed roles and responsibilities3.2 The results achieved by the team contribute positively to the organisation's business plans3.3 Team and individual competencies are monitored regularly to confirm that the team is able to achieve goals3.4 Mentoring and coaching supports team members to enhance personal and collective knowledge and skills

- 3.5 Delegates' performance is monitored to confirm that they have completed the relevant delegation(s)/assignment(s)
- 4 **Encourage and facilitate the work of teams**
 - 4.1 Team effectiveness is encouraged and enhanced through active participation in team activities and communication processes
 - 4.2 Individuals and teams are actively encouraged to take individual and joint responsibility for actions
 - 4.3 The team receives support to identify and resolve problems which impede performance

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant and regulatory and code requirements

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for the facilitation of work teams

Mechanisms to encourage team decision making, and reward and support team achievement

Coaching and mentoring approaches to support team members to share knowledge and skills

Workplace policies and plans including procedures for training and assessment

Strategies to implement continuous improvement processes

Typical problems that can occur when facilitating work teams, and related appropriate action that can be taken

Principles, duty of care and obligations within the chains of responsibility in the transport industry

Required skills:

Communicate effectively with others when facilitating the operation of work teams

Read and interpret instructions, procedures, information and signs relevant to work team functions and management

Interpret and follow operational instructions and prioritise work

Negotiate and work effectively with others

Complete documentation related to team activities and organisation

Operate electronic communication equipment to required protocol

Lead and encourage others

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when facilitating the operation of work teams in accordance with workplace procedures

Ensure implementation of contingency plans for unplanned events that may occur during team activities

Identify improvements to services, resource allocation and use

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Ensure implementation of fatigue management policies and procedures

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

TLIG707B Work in a socially diverse environment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to work in a socially diverse environment, including the development and application of the cultural awareness that is required by all people working in the transport and distribution industries. It includes the cultural awareness required for serving customers and working with colleagues from diverse backgrounds.

Application of the Unit

Work must be carried out in accordance with workplace procedures and relevant anti-discrimination and equal employment opportunity regulations.

Work is performed with limited or minimum supervision, with some accountability and responsibility for self and others in achieving the prescribed outcomes. It involves the application of communication principles and problem-solving techniques to facilitate work in a socially diverse environment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Communicate with customers and colleagues from diverse backgrounds	<ul style="list-style-type: none">1.1 Customers and colleagues from all cultural groups are valued and treated with respect and sensitivity1.2 Verbal and non-verbal communication takes account of cultural differences1.3 Where language barriers exist, efforts are made to communicate through use of gestures or simple words in the other person's language1.4 Assistance from colleagues, reference books or outside organisations is obtained when required
2 Deal with cross-cultural misunderstandings	<ul style="list-style-type: none">2.1 Issues which may cause conflict or misunderstanding in the workplace are identified2.2 Difficulties are addressed with the appropriate people and assistance is sought from team leaders2.3 When difficulties or misunderstandings occur, possible cultural differences are considered2.4 Efforts are made to resolve the misunderstanding, taking account of cultural considerations2.5 Issues and problems are referred to the appropriate team leader/supervisor for follow-up

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Principles of equal employment opportunity (EEO) and anti-discrimination legislation as they apply to individual employees

Recognition of the different cultural groups in Australian society

Basic knowledge of the culture of Australia's indigenous and non-indigenous peoples

Recognition of various international customer groups (as appropriate to the sector and individual workplace)

Principles that underpin cultural awareness

Knowledge of what it means to be 'culturally aware'

Typical cross-cultural misunderstandings and problems that can occur in the workplace and appropriate ways of dealing with them

Required skills:

Communicate effectively with others when working in a socially diverse environment

Read and interpret instructions, procedures, information and signs relevant to working in a socially diverse environment

Interpret and follow operational instructions and prioritise work

Complete documentation related to working in a socially diverse environment

Work collaboratively with others in a socially diverse environment

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when working in a socially diverse environment in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Cultural differences may include but are not limited to those of the following nature (examples only):

- race
- language
- special needs
- disabilities
- family-structure
- age
- sexual preference

Possible cultural differences may include but are not limited to:

- language spoken
- forms of address
- levels of formality/informality
- non-verbal behaviour
- work ethics
- personal grooming
- family obligations
- recognised holidays
- special needs
- product preferences

Attempts to overcome language barriers may be made to:

- meet and greet/farewell customers
- give simple directions
- give simple instructions
- answer simple enquiries
- prepare for, serve and assist customers
- describe goods and services

Outside organisations may include but are not limited to:

- interpretative services
- diplomatic services
- local cultural organisations
- appropriate government agencies
- educational institutions

Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:

company plans/procedures
enterprise plans/procedures
organisational plans/procedures
established plans/procedures

Information/documents may include:

workplace procedures
guideline documents on cultural differences and how to deal with them
documents that provide information on equal employment opportunity principles and obligations and anti-discrimination regulations

Applicable legislation may include:

Australian and state/territory anti-discrimination legislation
Australian and state/territory equal opportunity legislation

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Plan to meet internal and external customer requirements	<p>1.1 The needs of customers are researched, understood and assessed, and taken into account in the planning of the company's products and services</p> <p>1.2 Provision is made in plans to achieve the quality, time and costs specifications agreed with customers</p>
2 Ensure delivery of quality service	<p>2.1 Individual/team performance consistently meets quality, safety, resource and delivery standards</p> <p>2.2 Coaching and mentoring assists colleagues overcome difficulty in meeting customer service standards</p> <p>2.3 Delivery of services and products is coordinated and managed to ensure it effectively and efficiently meets agreed quality standards</p>
3 Monitor, adjust and report customer service	<p>3.1 Company's systems are used to monitor progress in achieving product/service targets and standards</p> <p>3.2 Customer feedback is sought and used to improve the provision of products/services</p> <p>3.3 Decisions to overcome identified problems with products/services are made in consultation with relevant individuals/groups</p> <p>3.4 Adjustments/recommendations (as required) are made to products/services</p> <p>3.5 Those who have a role in products/services planning and delivery are informed of changes</p> <p>3.6 Records, reports and recommendations are managed within the company's systems and processes</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant Australian and state and territory standards, regulations and codes of practice

OH&S procedures and guidelines relevant to workplace operations

Risks involved in workplace operations and related precautions to control the risk

Workplace procedures and policies for the coordination of quality customer service in workplace operations

Customer and market characteristics

The role of customer service in company profitability

Requirements of workplace systems and operations and relevant equipment

Required skills:

Communicate effectively with others when coordinating quality customer service

Read and interpret instructions, procedures, information and signs relevant to the coordination of quality customer service

Interpret and follow operational instructions and prioritise work

Complete documentation related to the coordination of quality customer service

Operate electronic communication equipment to required protocol

Work collaboratively with others when coordinating quality customer service

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when coordinating quality customer service in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when coordinating quality customer service

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply relevant agreements, codes of practice or other legislative requirements to work processes

Identify and correctly use equipment, processes and procedures

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	in a range of work environments and weather conditions by day or night
Customers may be:	internal or external
Operations may be undertaken:	on- or off-base site or workplace
Coordination of workplace policies for the provision of customer service may include:	level of service provision scheduling of operations delivery of services
Consultative processes may involve:	clients other employees and supervisors management union representatives industrial relations and OH&S specialists other professional or technical staff local government authorities
Hazards may include:	vehicular traffic and pedestrians uneven ground, steps, road surfaces dust and vapours hazardous or dangerous materials humidity, air temperature and radiant heat light including UV noise
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established procedures
Communication in the work area may	fixed phone

include:	mobile phone fax email internet radio oral, aural or signed communications
Information/documents may include:	operations manuals induction documentation competency standards and training materials manufacturers specifications for relevant equipment Dangerous Goods Code, Explosives Code, HAZCHEM codes and other regulations pertaining to the delivery of mail workplace procedures and policies for the preparation of mail for delivery supplier and/or client instructions award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements customer service and quality assurance standards and procedures emergency procedures
Applicable regulations and legislation may include:	state/territory roads and traffic authority road rule and licence requirements Australian Dangerous Goods Code, Explosives Code, HAZCHEM codes, and other relevant regulations pertaining to the delivery of mail relevant state/territory environmental protection legislation relevant state/territory OH&S legislation

Unit Descriptor

This unit involves the skills and knowledge required to apply routine customer service skills to relevant workplace operations including dealing with customer inquiries, monitoring customer satisfaction and taking appropriate action to satisfy customer needs.

Application of the Unit

Work must be carried out in accordance with workplace standards and procedures for the provision of customer service.

Work is performed under supervision. It involves the application of established routine customer service principles and procedures to day-to-day interactions with internal and external customers during workplace operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Deal with customer inquiries	<ul style="list-style-type: none">1.1 Customer inquiries are dealt with courteously and efficiently both by phone and face to face1.2 Questions are used to clarify the customer's needs or concerns1.3 Assistance from other staff is sought when a customer's inquiry cannot be fully answered1.4 Knowledge of products, services and/or operations is used to answer customer queries or to respond to customers' needs1.5 Customer inquiries and associated action are recorded and reported in accordance with workplace procedures
2 Monitor customer satisfaction	<ul style="list-style-type: none">2.1 Customer is greeted cordially in accordance with workplace procedures2.2 Customer requirements are dealt with according to workplace procedures2.3 Special needs are addressed within workplace policies2.4 Appropriate feedback is provided to managers and internal and/or external customers

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant duty of care responsibilities

Relevant OH&S and environmental procedures and regulations

Workplace procedures relevant to work activities

Customer service policies and procedures

Products and/or services provided by the workplace concerned

Types of operations carried out in the workplace concerned

Sources of information and documentation needed for workplace operations

Required skills:

Communicate effectively with others when providing customer service, including the use of telephone techniques

Effectively use interpersonal skills

Effectively handle customer queries and complaints

Read and interpret instructions, procedures, information and labels relevant to the provision of customer service

Interpret and follow operational instructions and prioritise work

Complete documentation related to the provision of customer service

Write simple reports and records of inquiries

Operate electronic communication equipment to required protocol

Work collaboratively with others when providing customer service

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when providing customer service in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies and environments

Work systematically with required attention to detail

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Customer service is provided:	in all areas of transport, distribution and storage including the provision of a range of services and/or the collection, movement, storage and delivery of equipment, goods, materials and various forms of freight
Workplace activities may be conducted:	by day or night in any weather conditions
Customers may be:	internal or external
Requirements for work may include:	site restrictions and procedures relevant domestic and international regulations security procedures communications equipment hours of operation authorities and permits use of safety and personal protective equipment
Consultative processes may involve:	existing and potential customers/clients other employees and supervisors suppliers manufacturers relevant authorities management union representatives OH&S specialists other maintenance, professional or technical staff
Communications systems may involve:	face-to-face conversation telephone

	fax
	email
	electronic data transfer of information (EDI)
	mail
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	workplace procedures
	organisational procedures
	established procedures
Documentation/records may include:	workplace procedures and customer service standards
	job specifications
	operations manuals and instructions
	induction documentation
	competency standards and training materials
	manufacturers specifications, instructions and advice including material safety data sheets
	workplace operating procedures and policies
	supplier and/or client instructions
	relevant Australian and international regulations, codes, standards and certification requirements
	OH&S procedures
	quality assurance procedures
	emergency procedures
	customer service manuals
Applicable regulations and legislation may include:	relevant state/territory and international regulations, codes and procedures
	relevant Australian and international standards and certification requirements
	dangerous goods and hazardous substances codes and regulations
	relevant state/territory OH&S legislation
	relevant state/territory environmental protection legislation

relevant anti-discrimination legislation

relevant privacy and confidentiality
legislation

relevant freedom of information
requirements

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Recognise opportunities to promote products and services	<ul style="list-style-type: none">1.1 Products and services available for on-selling from the enterprise are identified1.2 Technical specifications and application(s) of products and services are identified1.3 Applicability of products and or services are matched to particular clients or client groups1.4 Features of products and services (including technical specifications) are explained in relation to customer requirements or potential requirements1.5 Where appropriate, clients are referred to expert personnel or services
2 Establish and maintain contact with clients	<ul style="list-style-type: none">2.1 Communication with clients is established and maintained to develop a professional relationship2.2 Clients are informed of the full range of business products2.3 Follow-up contacts with clients are made on client request and in accordance with enterprise policy
3 Negotiate sales	<ul style="list-style-type: none">3.1 Potential sales opportunities are recognised and acted upon3.2 Negotiations with clients maintain enterprise professional standards and client satisfaction
4 Close sales	<ul style="list-style-type: none">4.1 Documentation of the agreement is completed in accordance with enterprise policy, incorporating any special requirements4.2 Contact with customers is maintained until sale is completed4.3 After-sales service is provided in accordance with enterprise procedures and statutory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory requirements

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for the marketing of services and products to clients

Relevant workplace business marketing policies and practices, including requirements for the maintenance of security and confidentiality

Strategies to implement continuous improvement processes

Focus of operation of marketing systems and resources

Typical problems that can occur when marketing services and products to clients and related appropriate action that can be taken

Required skills:

Communicate effectively with others when marketing services and products to clients

Negotiate and work effectively with others

Read and interpret instructions, procedures and information relevant to the marketing of services and products to clients

Interpret and follow operational instructions and prioritise work

Complete documentation related to the marketing of services and products to clients

Operate electronic communication equipment to required protocol

Work collaboratively with others when marketing services and products to clients

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when marketing services and products to clients in accordance with regulatory requirements and workplace procedures

Plan work activities, including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Identify improvements to services, resource allocation and use

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	single and multi-site locations large, medium and/or small companies
Services, products, risks, work systems and requirements may:	potentially vary across different sections of the workplace
Operations involve:	internal and external customer contact and coordination
Products may be:	existing or potential
Consultative processes may involve:	existing and potential customers/clients other employees and supervisors suppliers manufacturers relevant authorities management union representatives OH&S specialists other maintenance, professional or technical staff
Communications systems may involve:	face-to-face conversation telephone fax email electronic data transfer of information (EDI) mail
Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:	company plans/procedures enterprise plans/procedures organisational plans/procedures established plans/procedures
Information/documentation may include:	workplace procedures for the marketing of

services and products

current and potential customer/client instructions and assessed requirements

customer service standards and procedures

workplace products and services information

quality assurance standards and procedures

relevant agreements, codes of practice including the national standards for services and operations

manufacturers/suppliers specifications, advice, recommended procedures, policies and instructions

workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information

legislation, regulations and related documentation relevant to business operations

regulations and policies relating to minimising risks to the environment and ensuring compliance with OH&S requirements

Applicable regulations and legislation may include:

relevant regulations, standards and codes of practice

trading regulations relevant to business operations

relevant Australian and state/territory OH&S legislation

environmental protection regulations

hazardous substances and dangerous goods codes

relevant Australian standards and certification requirements

licence, patent or copyright arrangements

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Establish effective communication with customers	<p>1.1 All customers are greeted in a polite and friendly manner, and formal and informal communication styles are applied as appropriate</p> <p>1.2 All communications with customers are conducted in a manner which is consistent with organisation's policy</p>
2 Identify and assess the needs and expectations of different customers	<p>2.1 Individual customer needs and expectations are identified so that appropriate products and services may be provided</p> <p>2.2 Customers with special needs are identified and appropriate attention is given to ensure that their requirements are satisfied</p> <p>2.3 Limitations to service provision are identified, communicated to customers, and checked for understanding</p>
3 Provide the identified customer requirement	<p>3.1 All needs and reasonable requests of customers are met in a consistent and timely manner</p> <p>3.2 Customer dissatisfaction is promptly recognised and appropriate steps are taken to restore goodwill</p> <p>3.3 Anticipated problems are correctly identified and monitored and action is taken to minimise their effects on customer satisfaction</p> <p>3.4 Opportunities to enhance the quality of service are taken whenever possible</p> <p>3.5 Information regarding both anticipated and unanticipated problems and delays is promptly communicated to customers</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory regulations and requirements pertaining to revenue protection

Relevant OH&S and environmental protection procedures and guidelines

Details of on-board services provided to customers

Organisation's transport services

Procedures for the use of communications equipment

Fare structures

Concessional privileges

Timetables

Organisational policies and procedures

Customer service requirements

Services for customers with disabilities

Typical problems that can occur when providing on-board services to customers and related appropriate action that can be taken to prevent or solve them

Required skills:

Communicate effectively with others when providing on-board services to customers

Handle and resolve conflict and grievance situations that may arise during the provision of on-board services to customers

Read and interpret instructions, procedures, information and signs relevant to the provision of on-board services to customers

Interpret and follow operational instructions and prioritise work

Complete documentation related to the provision of on-board services to customers

Operate electronic communication equipment to required protocol

Work collaboratively with others when providing on-board services to customers

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when providing on-board services to customers in accordance with workplace procedures

Implement contingency plans for unanticipated situations that may arise when providing on-board services to customers

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the provision of on-board services to customers

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Complete transactions and revenue protection activities during the provision of on-board services to customers

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:

- in restricted spaces or exposed conditions or controlled or open environments
- in a range of weather conditions
- by day or night

Equipment may include:

- use in restricted spaces or exposed conditions or controlled or open environments
- office equipment
- communication equipment
- computer software

On-board service applies to:

- all long distance rail/coach/bus trips
- all points of customer contact before, during and after the journey
- all internal, external and potential customers

Customers with special needs include:

- international visitors
- pregnant women
- the elderly
- physically and/or mentally disabled persons
- children travelling alone or under supervision

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- workplace policies and procedures
- customer requests
- customer service standards and procedures
- competency standards and training materials
- quality assurance procedures

Applicable regulations and legislation may include:

security and emergency procedures

relevant state/territory transport regulations

relevant state/territory OH&S regulations and legislation

relevant state/territory environmental protection legislation

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for internal audit	<ul style="list-style-type: none">1.1 Benchmarks for the quality audit are established/identified1.2 Procedures required to be audited are identified and implications of non-conformance estimated1.3 Technical and/or calibration requirements for audits are noted and (where necessary) appropriate support personnel are identified1.4 Production schedules are examined to identify appropriate schedule for audit
2 Schedule internal audit	<ul style="list-style-type: none">2.1 Audit timings are planned to ensure that relevant procedures are conducted within workplace agreed time intervals and timeframes2.2 Audit frequency is adjusted based on importance of activities to the business unit, process or workplace changes or customer feedback2.3 Contact is made with appropriate personnel and relevant appointments for the audit are made
3 Conduct audit and document findings	<ul style="list-style-type: none">3.1 Methods for the conduct of the audit are established and confirmed3.2 Observations and interviews are conducted with (any) required approved third party3.3 Documentation of observations and interview responses is completed
4 Report audit results	<ul style="list-style-type: none">4.1 Audit results are discussed with personnel associated with the procedures or standards audit4.2 Audit reports indicate compliances noted

4.3 Non-compliance reports indicate location, relevant standard or procedure, and supporting evidence

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulations, codes of practice and legislative requirements including the Australian Dangerous Goods Code where applicable

Relevant OH&S and environmental protection procedures and regulations

Workplace procedures for the conduct of internal quality audits

Problems that may occur during the conduct of internal quality audits and action that can be taken to resolve or report the problems

Risks and hazards related to the conduct of internal quality audits and ways of controlling the risks involved

Focus of operation of work systems, resources, management and workplace operating systems

Equipment applications, capacities, configurations, safety hazards and control mechanisms

Enterprise business policies and plans including procedures for identification of non-compliance and best practice

Application of relevant Australian Standards and certification requirements

Quality procedures and implementation strategies

Resource availability including the competencies of individuals in the team/group

Understanding and knowledge of the application of current competencies within functional activity

Coaching and mentoring approaches to support team members to share knowledge and skills

Relevant workplace documentation procedures

Required skills:

Communicate effectively with others when conducting internal quality audits

Read and interpret instructions, procedures, information and signs relevant to the conduct of internal quality audits

Interpret and follow operational instructions and prioritise work

Complete documentation related to the conduct of internal quality audits

Operate electronic communication equipment to required protocol

Provide leadership to others

Work collaboratively with others when conducting internal quality audits

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any problems, faults or malfunctions that may be identified when conducting internal quality audits in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may arise when conducting internal quality audits

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the conduct of internal quality audits

Plan and organise activities

Monitor work activities in terms of planned schedule

Modify activities to cater for variations in workplace contexts and environment

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and apply appropriate application of technology, information systems and procedures

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be undertaken: in various work environments in the sections of the warehousing, storage, transport and distribution industries

Customers may be: internal or external

Operations may be conducted: by day or night

The workplace environment may involve: twenty-four hour operation
single and multi-site location
large, medium and small workplaces

Audits may cover: aspects of services, products, risks, work systems and workplace

Quality audits may be conducted: as part of enterprise, site or licence requirements

Audits may be conducted: alone or in conjunction with other staff from the enterprise
using external personnel

Hazards may include: confined spaces
hazardous or dangerous materials/goods
contamination of, or from, goods/materials being transported/stored
fire/explosions
noise, light, energy sources
stationary and moving machinery, parts or components
moving vehicles

Communication in the work area may include: phone
electronic data interchange (EDI)
fax
email

	internet
	RF communications
	barcode readers
	oral, aural or signed communications
Requirements for work may include:	site restrictions and procedures
	use of safety and personal protective equipment
	systems and facilities for controlling storage environments
	specialised lifting and/or handling equipment
	incident/accident breakdown procedures
	additional gear and equipment
	noise restrictions
	hours of operations
	authorities and permits
	communications equipment
Hazard management is consistent with:	the principle of hierarchy of control with elimination, substitution, isolation and engineering control measures being selected before safe working practices and personal protective equipment
Consultative processes may involve:	other employees and supervisors
	suppliers, potential customers and existing clients
	relevant authorities and institutions
	government instrumentalities and
	emergency services
	management and union representatives
	industrial relations and OH&S specialists
	other maintenance, professional or technical staff
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures

Information/documentation may include:	<p>Australian and international codes of practice and regulations relevant to workplace activities, including the ADG Code where applicable</p> <p>workplace operating procedures and policies</p> <p>supplier and/or client instructions</p> <p>operations manuals, job specifications and procedures and induction documentation</p> <p>manufacturers specifications for equipment and environmental control systems</p> <p>suppliers handling and storage advice</p> <p>quality and customer service standards and procedures</p> <p>material safety data sheets</p> <p>Safe Working Limits (SWL) and Working Load Limits (WLL) of load shifting equipment and storage facilities</p> <p>relevant Australian and International standards, criteria and certification requirements</p> <p>communications technology equipment, oral, aural or signed communications</p> <p>emergency procedures</p> <p>relevant competency standards and training materials</p> <p>QA plans, data and document control</p> <p>conditions of service, legislation and industrial agreements including workplace agreements and awards</p>
Applicable procedures and codes may include:	<p>relevant codes and regulations including ADG Code where applicable</p> <p>relevant Australian and international standards and certification requirements</p> <p>relevant state/territory OH&S and environmental protection legislation in terms of duties of employers, employees, suppliers and contractors</p> <p>licence, patent or copyright arrangements</p> <p>relevant workplace relations legislation</p>

relevant workers compensation legislation
equal opportunity, equal employment
opportunity and affirmative action legislation

TLIK107C Use infotechnology devices and computer applications in the workplace

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to use infotechnology devices and computer applications in the workplace including identifying computer equipment and systems, setting up and shutting down equipment for use, and inputting, retrieving and presenting files/data in accordance with work requirements.

Application of the Unit

Work must be carried out in accordance with the relevant OH&S regulations and workplace procedures concerning the use of computer equipment in the workplace.

Work is performed under some supervision, generally within a team environment.

Work involves the application of routine procedures for the use of computers for information management in the transport and distribution industry.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify infotechnology/computer equipment and systems	<p>1.1 Types of computerised equipment used in the work area are identified</p> <p>1.2 Functions of equipment, component parts and accessories are identified</p> <p>1.3 Applications for workplace activities of the different infotechnology systems and related software are interpreted</p> <p>1.4 Routine faults in operating systems, software applications and operator errors are identified</p> <p>1.5 Sources of information on rectifying faults and operating equipment, systems and application are identified</p>
2 Set up and shut down equipment for use	<p>2.1 Work station equipment is adjusted to meet ergonomic requirements and appropriate posture is used</p> <p>2.2 Computer is booted, logged on and checked where required for viruses</p> <p>2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturers guidelines</p> <p>2.4 Operating manuals and/or help screens for infotechnology equipment and software are used to inform work practices</p> <p>2.5 Software packages and accessories for required application are selected and accessed</p> <p>2.6 Required file and/or data to be accessed is identified</p> <p>2.7 Files/data are saved prior to shut-down</p> <p>2.8 Shut-down procedures for files, applications and equipment are followed</p>

- 3 **Input, store, retrieve and present files/data**
 - 3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader or other system
 - 3.2 Accurate input is confirmed
 - 3.3 Files are created and/or saved in accordance with workplace procedures
 - 3.4 Data is manipulated to suit work requirements and checked for accuracy
 - 3.5 Appropriate printers are accessed and print-preview facilities used
 - 3.6 Files are transferred from drive to drive within workplace policies and guidelines
 - 3.7 Saved files are accessed through relevant directories
 - 3.8 Information and disk(s) are stored where appropriate
 - 3.9 Information is presented using computerised projection facilities where required
- 4 **Implement workplace procedures for management and security of data**
 - 4.1 Security procedures are followed as required
 - 4.2 Information systems are managed in accordance with workplace procedures and manufacturers guidelines
 - 4.3 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines concerning the use of computer equipment in the workplace

OH&S risks and hazards when using computer equipment for work tasks, and ways of controlling the risks/hazards

Workplace procedures for the use of computer equipment and application software appropriate for work role

Typical problems that can occur when using infotechnology devices and computer applications in the workplace and related appropriate action that can be taken to prevent or solve them

Housekeeping standards and procedures required in the workplace

Workplace or site layout

Required skills:

Communicate effectively with others when using infotechnology devices and computer applications in the workplace

Read and interpret instructions, procedures, information and manuals relevant to the use of infotechnology devices and computer applications in the workplace

Interpret and follow operational instructions and prioritise work

Complete electronic documentation through the use of infotechnology devices and computer applications in the workplace

Identify and use computer equipment, software, processes and procedures required within the context of the job

Work collaboratively with others when using infotechnology devices and computer applications in the workplace

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may arise when using infotechnology devices and computer applications in the workplace in

accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may arise when using infotechnology devices and computer applications in the workplace including the use of security and backup software and procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices and computer applications in the workplace

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Adapt to differences in software and equipment in accordance with standard operating procedures

Maintain eye-hand coordination

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The operations may be conducted:	in a range of work environments by day or night in a range of typical weather conditions
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Work may be conducted:	in a range of work contexts
Infotechnology/computer equipment may include:	keyboards monitors bar code readers printers central processors networks (including intranet and internet) CD-ROM drives floppy disk drives radio frequency devices computer driven projectors
Computer applications may include:	word processors inventory control and stock management systems electronic data interchange (EDI) systems information databases and storage systems invoicing and payment systems manifests control systems work organisation systems internet browsers computerised presentation software

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Apply occupational health and safety principles	<ul style="list-style-type: none">1.1 Information on OH&S requirements when using keyboard/keypad devices is accessed and interpreted1.2 Posture and ergonomic settings of chair and workstation are adjusted following OH&S guidelines1.3 OH&S guidelines on the use of periods of rest and exercise are followed when using computer keyboards, calculators or other data entry devices using keyboards or keypads
2 Enter data	<ul style="list-style-type: none">2.1 Text and numeric data are entered into a computer, calculator or other data entry device using a keyboard or keypad as part of workplace tasks2.2 Entered information is checked and corrected using a keyboard or keypad

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S procedures and guidelines concerning the use of computer equipment in the workplace, including recommended posture, ergonomic settings of chair and work station, and the use of periods of rest and exercise

OH&S risks and hazards when using computer equipment for work tasks, and ways of controlling the risks/hazards

Procedures for the use of keyboards and computer equipment in the workplace

Typical problems that can occur when using keyboards to enter data and related appropriate action that can be taken to prevent or solve them

Housekeeping standards and procedures required in the workplace

Site layout

Required skills:

Read and interpret instructions, procedures, information and manuals relevant to the use of keyboards to enter data

Interpret and follow operational instructions and prioritise work

Operate electronic infotechnology and computer equipment to required protocol

Work collaboratively with others when using keyboards to enter data

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions that may occur when using keyboards to enter data in accordance with workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that exist when using keyboards to enter data

Work systematically with required attention to detail without injury to self

Apply fatigue management knowledge and techniques

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Operate and adapt to differences in keyboards, software and computer equipment in accordance with standard operating procedures

Maintain eye-hand coordination

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The operations may be conducted:	in a range of work environments by day or night in a range of typical weather conditions
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Keyboards/keypads may be used in a range of work contexts, including	in the workplace, warehouse or depot in the business office in a vehicle on the road at a client's workplace
Keyboards/keypads may be used on a range of infotechnology equipment, including:	computers cash registers calculators electronic typewriters various forms of data entry devices
Keyboard skills may be required to enter data via a range of work-based computer applications including:	word processors inventory control and stock management systems electronic data interchange (EDI) systems information databases and storage systems invoicing and payment systems manifests control systems work organisation systems internet browsers computerised presentation software
Personnel in the work area may include:	workplace personnel site visitors contractors

TLIL1007C Assess and confirm customer transport requirements

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to assess and confirm customer freight transport requirements, including assessing the goods/stock to be transported, determining the transit needs and any special requirements, confirming requirements with the customer and completing all required documentation.

Application of the Unit

Work involves discretion and judgement for self and others in assessing and confirming customer freight transport requirements. It is performed under minimum supervision with general guidance on progress and outcomes of work.

A range of opportunities may be used to develop the workplace and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations goals and key performance objectives.

Work involves responsibility for the assessing and confirming customer freight transport requirements and the provision of leadership of others either individually or in teams.

Element	Performance Criteria
1 Assess goods/stock to be transported	<ul style="list-style-type: none">1.1 Customer service parameters are followed in accordance with workplace procedures1.2 In consultation with customer key characteristics of the goods/stock to be transported are determined1.3 Regulatory and/or specific requirements for load shipment are identified1.4 Specific load handling characteristics/requirements are identified1.5 Task requirements are matched to workplace capability and operational focus
2 Determine transit requirements	<ul style="list-style-type: none">2.1 Applicable transportation modes are matched for customers geographic location, load packaging characteristics, quantity of goods to be transported and any special requirements2.2 Required pick-up and destination point(s) are identified and assessed for safe access and operation2.3 Specified transit times and routes are identified and agreed with customer2.4 Transportation mode(s) are determined with customer with regard to load characteristics, transit requirements and cost-effectiveness2.5 Risk assessment of transport service is undertaken in accordance with workplace policy and procedures
3 Complete documentation	<ul style="list-style-type: none">3.1 Decisions for proceeding with task are undertaken or referred in accordance with workplace procedures and within scope of authority3.2 Parameters of service requirements for the workplace and customer are documented3.3 Quotations for services/specifications are itemised and documented

3.4 Legislative, insurance or specific conditions for
load transport are recorded

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant and regulatory and code requirements including mass and load regulations

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for the assessing and confirming customer transport requirements

Strategies to implement continuous improvement processes

Focus of operation of customer service and quotation/specification systems and resources

Typical problems that can occur when assessing and confirming customer transport requirements and related appropriate action that can be taken

Required skills:

Communicate effectively with others when assessing and confirming customer transport requirements

Negotiate with others when assessing and confirming customer transport requirements

Read and interpret instructions, procedures, information and signs relevant to the assessment and confirmation of customer transport requirements

Interpret and follow operational instructions and prioritise work

Complete documentation related to the assessment and confirmation of customer transport requirements

Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Work collaboratively with others when assessing and confirming customer transport requirements

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when assessing and confirming customer transport requirements in accordance with regulatory requirements and workplace procedures

Plan work activities, including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	single and multi-site locations large, medium and small companies
Services, products, risks, work systems and requirements may:	potentially vary across different sections of the workplace
Operations involve:	internal and external customer contact and coordination
Consignments may be:	single and multi-site locations palletised containerised packaged or loose in gas, liquid or solid form
Special freight transport requirements may involve:	single and multi-site locations temperature controlled stock live stock dangerous goods hazardous substances specific security arrangements oversized/overmassed loads
Decision to provide service to customer is:	undertaken within scope of authority
Decisions should reflect:	the scope of the organisation to undertake the task and/or to outsource some or all of the task
Key characteristics of the goods/stock to be transported may include the:	type of goods to be transported load characteristics including perishability, spoilage, fragility, compatibility packing and stowing requirements for load aggregate size and capacity of load to be transported

Consultative processes may involve:	existing and potential customers/clients other employees and supervisors suppliers manufacturers relevant authorities management union representatives OH&S specialists other maintenance, professional or technical staff
Communications systems may involve:	face-to-face conversation telephone fax email electronic data transfer of information (EDI) mail
Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:	company plans/procedures enterprise plans/procedures organisational plans/procedures established plans/procedures
Information/documentation may include:	workplace procedures and policies customer service standards and procedures supplier and/or client instructions workplace products and services information quality assurance standards and procedures regulations and policies relating to minimising risks to the environment and ensuring compliance with OH&S requirements manufacturers/suppliers specifications, advice, recommended procedures, policies and instructions Dangerous Goods Codes and related regulations and documentation including material safety data sheets

	relevant agreements, codes of practice including the national standards for services and operations
	reports of accidents and incidents
	workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information
	legislation, regulations and related documentation relevant to workplace operations
Applicable regulations and legislation may include:	relevant regulations, standards and codes of practice
	trading regulations relevant to business operations
	relevant Australian and state/territory OH&S legislation
	environmental protection regulations
	hazardous substances and dangerous goods codes
	relevant Australian standards and certification requirements
	licence, patent or copyright arrangements

TLIL107C Complete workplace orientation/induction procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to complete workplace orientation and induction procedures when commencing a new work role, including identifying major areas of the workplace in terms of functions, organisational structures and occupations, and organising and accepting responsibility for own workload. It also includes the application of ethical practices in work activities, receiving and acting constructively on personal feedback, participating in the identification and meeting of ones own learning needs, and planning and organising a personal daily routine.

Application of the Unit

Workplace orientation/induction is completed to enable a worker to enter and participate in the work activities of a workplace. Orientation and induction activities will be in accordance with the regulatory requirements and operational policies and procedures for the workplace concerned.

Work is performed under some supervision, generally within a team environment.

Work involves the development of the basic skills and knowledge to participate safely and effectively in workplace activities.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify major areas of the workplace in terms of functions, organisational structures and occupations	<ul style="list-style-type: none">1.1 The layout of the workplace, the flow of materials and goods where relevant and the work activities conducted in each work area are identified1.2 Organisational structure of the workplace and the relationship of structure to each occupation and classification grouping is outlined1.3 The types of facilities in the workplace, their purpose and (any) risk factors attached to them are identified1.4 Equipment and technology used in the workplace are outlined in terms of function and physical characteristics1.5 Individual responsibilities under industrial agreements are identified and acted on in the conduct of assigned duties1.6 Key internal and external customers and the workplace areas that serve them are identified1.7 Workplace hazards are identified and related hazard minimisation procedures followed1.8 Relevant personal protective equipment (PPE) is identified and correctly used in accordance with regulations and workplace requirements1.9 Workplace emergency procedures are identified and followed in real and simulated emergency situations

- | | |
|--|--|
| 2 Organise and accept responsibility for own workload | <ul style="list-style-type: none">2.1 Priorities and deadlines are established in consultation with others (as appropriate) and recorded2.2 Work activities are planned and progress of work is communicated to others whose personal work plans and timelines may be affected2.3 Work is completed to the standard expected in the workplace and in accordance with any guidelines, directions or instructions2.4 Variations and difficulties affecting work requirements are identified through regular reviews and action is taken to report these issues to supervisory staff2.5 Additional support to improve work is communicated clearly to appropriate personnel |
| 3 Apply ethical practices | <ul style="list-style-type: none">3.1 Workplace procedures, regulations and legislation appropriate to the position are identified and followed3.2 Commitments and undertakings to clients, colleagues and supervisors are met3.3 Required confidentiality is maintained3.4 Appropriate codes of acceptable and ethical work practices are applied3.5 Workplace security policies are identified including the relationship to personal job role |
| 4 Receive and act constructively on personal feedback | <ul style="list-style-type: none">4.1 Suggestions on ways to improve work are sought regularly from appropriate personnel4.2 Feedback is acted upon as required to improve work performance |
| 5 Participate in identifying and meeting own learning needs | <ul style="list-style-type: none">5.1 Operations of the workplace, workplace equipment and focus of endeavour are identified5.2 Organisational structure, career paths and training opportunities appropriate to the enterprise are identified5.3 Steps are taken, in consultation with appropriate personnel, to identify own learning needs through |

assessment and planning for future work requirements

- 5.4 Appropriate opportunities to learn and develop required competencies are undertaken including establishing networks and working relationships with others

6 Plan and organise a personal daily routine

- 6.1 Daily routine is planned to take into account rosters, industrial agreements and workplace procedures
- 6.2 Clarification of requirements of tasks is sought when appropriate
- 6.3 Achievable time and other performance measures are agreed
- 6.4 Tasks are completed with variations to plan identified and reported

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Workplace procedures and standards and duty of care requirements including OH&S and environmental protection responsibilities

Conditions of service including: employer and employee obligations under award, employment contract, OH&S and other regulations in relation to engagement, working times and conditions, and dismissal and discipline arrangements

Workplace structures and the roles and responsibilities of team/group members

Site or workplace layout

Emergency procedures

Basic workplace documentation and record keeping procedures and requirements

Customer service standards and procedures

Workplace hazards and related hazard minimisation procedures

Personal protective equipment and instructions for its use

Required skills:

Communicate effectively with others when completing workplace orientation and induction procedures

Read and interpret instructions, procedures, information and signs relevant to work activities

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others when completing workplace orientation and induction procedures

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify workplace products and services and their features

Identify and correctly use equipment, processes and procedures

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work will involve:	basic routine work functions in a variety of relevant work contexts
Customers may be:	internal or external
Operations may be conducted:	by day or night in enclosed spaces in exposed conditions in controlled or open environments
Hazards may include:	vehicular traffic and pedestrians uneven ground, steps, road surfaces dust and vapours hazardous or dangerous materials humidity, air temperature and radiant heat light including UV noise
Consultative processes may involve:	clients managers supervisors/team leaders workplace personnel visitors contractors official representatives union representatives industrial relations and OH&S specialists other professional or technical staff local government authorities
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures

established procedures

Communication may involve the basic use of phone
a range of communication technology
including:

electronic data interchange (EDI)

fax

email

internet

radio

Personal protective equipment may include:

gloves

safety headwear and footwear

sunscreen, sunglasses and safety glasses

two-way radios

high visibility clothing

Information/documentation may include:

workplace procedures, checklists and instructions

operations manuals

induction/orientation documentation

competency standards and training materials

job specification, site/workplace map and details of organisation structure

conditions of service, relevant legislation, regulations and related documentation

award, enterprise bargaining agreement, other industrial arrangements

relevant codes of practice including the national standards for manual handling and the industry safety code

supplier and/or client instructions

manifests, bar codes, goods and container identification

goods identification numbers and codes

manufacturers specifications

material safety data sheets

relevant Australian standards and certification requirements

quality assurance procedures

Applicable regulations and legislation may include:

emergency procedures

relevant regulations, standards and codes of practice, including the Australian standards for manual handling and industry safety codes

dangerous goods and freight regulations and codes

relevant Australian and state/territory OH&S legislation

equal employment legislation and related policies

environmental protection regulations

licensing requirements for driving and carrying particular classes of goods

workplace relations legislation

workers compensation legislation

TLIL307C Conduct induction process

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to conduct an induction process to introduce a new employee to a workplace, including outlining the relationship between the employee and the company, establishing and explaining the requirements of position, and completing relevant workplace documentation.

Application of the Unit

Work involves the planning, coordination and conduct of an induction program to prepare workers to enter and participate in the work activities of a workplace. Orientation/induction activities are in accordance with relevant regulatory requirements and operational policies and procedures for the workplace concerned.

Work is performed under some supervision, generally within a team environment.

Work involves the application of basic routine coaching and instruction principles and procedures to conduct an induction program for new workers and trainees commencing employment in the workplace.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Outline the relationship between employee and the company	<ul style="list-style-type: none">1.1 Employee is greeted and introduced to key personnel and areas in the workplace1.2 Workplace objectives, operating systems and workplace structures are explained1.3 The relationship between the employee's position and the workplace structure and objectives is identified1.4 Required OH&S, workplace procedures and employment conditions are described1.5 Sources of information and assistance for the employee are identified1.6 Emergency procedures are explained
2 Establish requirements of position	<ul style="list-style-type: none">2.1 Job role, responsibilities and reporting relationships are explained2.2 Immediate work colleagues are introduced2.3 Workplace facilities and layout are shown to the employee and flow of work/materials/goods and functions carried out in the areas are explained2.4 Initial training in relevant OH&S, equipment and work systems is provided in accordance with workplace procedures2.5 Employee rights and responsibilities in terms of equal employment opportunity, sexual harassment and anti-discrimination are explained2.6 Training opportunities are organised for the development of the individuals job role2.7 Workplace expectations of work functions and outputs are clarified2.8 Opportunities for the employee to clarify concerns and ask questions are provided

3 Complete relevant workplace documentation

- 3.1 Workplace personnel records are completed in accordance with workplace requirements
- 3.2 Tax declaration and other relevant documentation are checked for compliance with requirements
- 3.3 Employee is requested to provide any additional information needed and notes are taken of any additional actions required
- 3.4 Workplace-specific documentation (if applicable) is submitted to appropriate personnel in accordance with workplace requirements
- 3.5 Requirements of Territory/State/Commonwealth legislation on equal employment opportunity, sexual harassment and anti-discrimination are fulfilled

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Workplace induction procedures and documentation requirements

Instructional methods and resources required to conduct an induction program

Conditions of service of employees

Workplace structures and the roles and responsibilities of employees

Site or workplace layout

Emergency procedures and related equipment

Workplace documentation and record keeping procedures and requirements

Customer service standards and procedures

Workplace hazards and related hazard minimisation procedures

Personal protective equipment and instructions for its use

Required skills:

Communicate effectively with others when conducting an induction process for relevant personnel

Read and interpret instructions, procedures, information and signs relevant to the conduct of an induction process for relevant personnel

Interpret and follow operational instructions and prioritise work

Complete documentation related to the conduct of an induction process

Operate electronic communication equipment to required protocol

Work collaboratively with others when conducting an induction process for relevant personnel

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when conducting an

induction process for employees and contractors in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the conduct of an induction process

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify and correctly use instruction equipment, processes and procedures

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Monitor attendance records	<ul style="list-style-type: none">1.1 Hours worked, as recorded for each employee, are accessed, checked and documented on a prescribed time basis1.2 Employee record cards or other daily time records showing hours absent are followed up to ensure authorised absences are accurately recorded1.3 Employee daily time records showing additional hours worked are followed up to determine whether additional payments are authorised1.4 Unauthorised absences are notified to appropriate personnel on a timely basis to ensure follow-up action is initiated1.5 Employee attendance sheets are received, checked and processed to ensure accurate employee records are maintained
2 Process attendance records	<ul style="list-style-type: none">2.1 Unexplained absences are identified, confirmed and appropriate personnel are notified for follow-up action2.2 Timesheets, or equivalent, are checked and forwarded to payroll department for costing purposes2.3 Employee record cards or other identification system requirements are checked and redistributed on a timely basis

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations and codes of practice relevant to the monitoring and processing of attendance records

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the monitoring and processing of attendance records

Focus of operation of work systems, equipment, management and site operating systems for the monitoring and processing of attendance records

Elements of human resources systems relevant to the monitoring and processing of attendance records, including: workplace's timekeeping practices, conditions of employment, labour/costing practices, industrial agreements and awards, auditing requirements, payroll practices and procedures, personnel records requirements, and computer based personnel recording systems

Problems that may occur when monitoring and processing attendance records and appropriate action that can be taken to resolve the problems

Documentation and reporting requirements for the monitoring and processing of attendance records including computer based personnel recording systems

Required skills:

Communicate effectively with others when monitoring and processing attendance records

Read and interpret instructions, procedures and information relevant to work activities

Interpret conditions of employment and industrial agreements and awards

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Conduct simple calculations required when monitoring and processing attendance records

Work collaboratively with others when monitoring and processing attendance records

Adapt appropriately to cultural differences in the workplace, including modes of behaviour

and interactions with others

Promptly report and/or rectify any problems identified when monitoring and processing attendance records in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies and environments

Work systematically with required attention to detail

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use relevant computer, communication and office equipment required when monitoring and processing attendance records

Select and use required personal protective equipment conforming to industry and OH&S standards

Element	Performance Criteria
1 Identify and communicate agreed employment equity direction	<ul style="list-style-type: none">1.1 Employment equity information and policy requirements are identified for the workplace1.2 Employment equity information is disseminated to ensure relevant requirements are considered in decisions made within the workplace1.3 Advice is provided to assist with consistent interpretation of employment equity information1.4 Negotiations are undertaken with management to ensure equity principles are incorporated throughout the workplace1.5 Interpretation and advice are provided on legislative requirements, workplace objectives and constraints, and human resource management practices
2 Respond to enquiries regarding employment equity	<ul style="list-style-type: none">2.1 Arrangements are made to ensure advice on employment equity can be provided to personnel within necessary timeframes2.2 Enquiries are analysed to identify necessary information required to respond sufficiently2.3 Sources of information are identified and accessed to formulate response2.4 Responses are communicated clearly and appropriately and understanding of the response is checked
3 Implement employment equity strategies	<ul style="list-style-type: none">3.1 Strategies are developed to implement policies and objectives3.2 Measures are identified which reflect the success of

- strategies developed and suitable data collected
- 4 Contribute to policy development**
- 4.1 Consultation is regularly undertaken with stakeholders on policy development
- 4.2 Advice is provided concerning the employment equity implications of policy
- 5 Evaluate and report**
- 5.1 Data used to measure employment equity policy performance is collected and statistically analysed
- 5.2 Annual and other reports are produced on employment equity policy performance
- 5.3 Results of employment equity strategies and performances are conveyed in a timely and appropriate way to relevant individuals and groups

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to equal employment equity

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the implementation of equal employment equity strategies

Focus of operation of work systems, equipment, management and site operating systems for the implementation of equal employment equity strategies

Elements of workplace operations relevant to the implementation of equal employment equity strategies, including: training and social justice policies and procedures, workplace organisational structure, workplace human resource policies and practices, job description and specifications, referral processes, workplace standards and delegations, quality management, work area business plans, and industrial awards and enterprise agreements

Problems that may occur when implementing equal employment equity strategies and appropriate action that can be taken to resolve the problems

Documentation and reporting requirements for the implementation of equal employment equity strategies

Required skills:

Communicate effectively with others when implementing equal employment equity strategies

Counsel and negotiate with employees on employment equity matters

Read and interpret instructions, procedures, employment equity policies, conditions of employment and industrial agreements and awards relevant the implementation of equal employment equity strategies

Interpret and follow operational instructions and prioritise work

Complete documentation related to the implementation of equal employment equity strategies

Work collaboratively with others when implementing equal employment equity strategies

Adapt appropriately to cultural differences in the workplace, including modes of behaviour

and interactions with others

Promptly report and/or rectify any problems identified when implementing equal employment equity strategies in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies and environments

Work systematically with required attention to detail

Select and use relevant computer, communication and office equipment required when implementing equal employment equity strategies

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Workplaces may comprise:	large, medium or small worksites
Recording mechanisms/systems may include:	paper-based systems electronic systems
Work organisation procedures and practices may include:	security procedures payroll systems industrial relations policies and agreements superannuation procedures dispatching and collecting procedures employment policies
Consultative processes may involve:	employees supervisors and managers official representatives relevant authorities and institutions union representatives industrial relations and OH&S specialists
Communication in the work area may include:	phone electronic data interchange (EDI) fax email internet RF systems oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures

Information/documents may include:

established procedures

regulatory requirements relevant to employment equity

workplace procedures and policies for the implementation of equal employment equity strategies

operations manuals, job specifications and induction documentation

manufacturers specifications for office equipment

conditions of service, award, enterprise bargaining agreement, and other industrial arrangements

relevant Australian standards and certification requirements

quality assurance procedures

Applicable regulations and legislation may include:

workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation

relevant state/territory privacy legislation

freedom of information legislation

relevant state/territory OH&S and environmental protection legislation

Unit Sector(s)

Competency Field

L - Resource Management

TLIL3307B Promote effective workplace practice

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to promote effective workplace practice, including contributing positively to the work team environment, observing and promoting work safety procedures, maintaining and promoting the well being of workplace team(s), and participating in competency development activities.

Application of the Unit

Work must be carried out in accordance with the regulatory and workplace requirements relevant to the promotion of effective workplace practice.

Work is performed individually, but the ability to work within a team environment may be required. It involves the application of workplace procedures and relevant regulatory and code requirements to the promotion of effective workplace practice as part of work activities in the rail transport and/or allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Contribute positively to the work team environment	<p>1.1 Workplace objectives are identified, interpreted and positively promoted to associated personnel and/or work team members</p> <p>1.2 Communications with associated personnel and/or work team members are effectively established</p> <p>1.3 Disputes are resolved through effective negotiation with the relevant individuals or groups</p> <p>1.4 Quality assurance measures are maintained, systems improvement suggestions are encouraged, and proposals submitted to relevant authorities</p>
2 Observe and promote work safety procedures	<p>2.1 Relevant statutory and workplace requirements for Occupational Health and Safety are communicated to all personnel and implemented at all worksites</p> <p>2.2 Accidents and injuries are reported and investigated in accordance with workplace policy</p> <p>2.3 Potential hazards and safety risks are identified, investigated and recommendations for preventative action referred to appropriate authorities</p> <p>2.4 Training in programs of Occupational Health and Safety and First Aid are implemented</p>
3 Maintain and promote well being of team	<p>3.1 Prescribed medical and physical fitness criteria are promoted and maintained within the work environment</p> <p>3.2 Situations threatening safety arising from physical/psychological incompatibility with the work environment are identified and resolved</p>
4 Participate in competency development	<p>4.1 Competencies required for work are identified, attained and maintained</p> <p>4.2 Personal development and other competency development programs are accessed and undertaken</p> <p>4.3 Competency deficiencies in personnel are</p>

identified and remedial action, including counselling, is initiated where necessary

- 4.4 Workplace trainer and assessor requirements are identified and satisfied

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations and codes of practice relevant to the workplace practices

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the promotion of effective work practices

Focus of operation of work systems, equipment, management and site operating systems

Elements of workplace operations relevant to effective work practice, including: workplace corporate plans, goals and objectives and industrial relations, communication and negotiation techniques and the benefits, advantages and disadvantages associated with them, group work practices and group dynamics, corporate customer service objectives, workplace procedures related to recording of customer enquiries and actions, dispute settlement processes, workplace OH&S and physical fitness requirements and related first-aid policies, and competencies and skills required for workplace career path levels,

Problems that may occur during work activities and appropriate action that can be taken to resolve the problems,

Documentation and reporting requirements in the workplace

Required skills:

Communicate effectively with customers, associated personnel and all work team members when completing work activities

Read and interpret instructions, procedures, information and workplace publications relevant to work activities

Interpret statistics related to workloads and quality assurance measures

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Lead and coordinate the activities of multi-disciplinary work teams or specialist work groups

Apply principles of time management

Counsel personnel on work related issues

Settle disputes through face-to-face and group-based negotiation

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems, faults or malfunctions in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Coordinate the promotion of safe work practices, competency enhancement and work practice improvements throughout the work groups

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Work at heights or in confined spaces as required by the job

Maintain the required level of physical fitness in team members

Check and replenish fluids and carry out lubrication processes in the course of work activities

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Workplaces may comprise:	large, medium or small worksites
Work environment may be:	in a depot, a worksite or a store, either as an individual, a team leader or a coordinator
Work may involve exposure to:	chemicals dangerous or hazardous substances movements of equipment, goods and vehicular traffic
Equipment may include:	customer information workplace procedures quality assurance policy relevant OH&S guidelines relevant competency guidelines
Consultative processes may involve:	employees, supervisors and managers customers suppliers and contractors industrial relations and OH&S specialists
Communication in the work area may include:	phone electronic data interchange (EDI) fax email internet RF systems oral, aural or signed communications
Personal protective equipment may include:	gloves safety headwear and footwear

	safety glasses
	two-way radios
	high visibility clothing
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify operating requirements	<ul style="list-style-type: none">1.1 Transport timetables and running times for each line or service are identified and kept updated within roster operations1.2 Transport running times are identified for each line or service to ensure all crewing requirements are planned1.3 Set working or work tasks to be performed are identified for each transport service1.4 Contingency plans covering operational problems are identified and impact on crewing needs analysed
2 Identify tasks and responsibilities and work requirements	<ul style="list-style-type: none">2.1 Support activities, where required to facilitate transport arrival and activities, are identified to ensure all crewing requirements are planned2.2 Set workings or required work tasks in support activities are identified
3 Establish work rosters	<ul style="list-style-type: none">3.1 Rosters are developed to cover all work requirements with regard to relevant industrial/workplace conditions, absenteeism levels and planned leave3.2 Rosters are arranged to allow sufficient flexibility to allow contingency plans to be implemented3.3 Rosters are circulated in accordance with workplace policies and procedures for review by affected personnel3.4 Relevant OH&S requirements are identified and addressed in the rosters developed3.5 Relevant safeworking systems and requirements are identified and addressed in the rosters developed

4 Finalise work rosters

- 4.1 Feedback from personnel associated with rosters is addressed and acceptable modifications agreed
- 4.2 Final rosters are documented and distributed to ensure work requirements are accurately communicated

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations, safeworking systems and codes of practice relevant to the development of rosters

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for development of rosters

Focus of operation of work systems, equipment, management and site operating systems for the development of rosters

Elements of operations relevant to the development of rosters, including: embarkation and disembarkation requirements; equipment capacities and limitations; passenger service needs; personnel capabilities; requirements for absentee coverage; safeworking systems and requirements; station, interchange and terminal operations; support services; and transport services offered by the organisation

Problems that may occur when developing rosters and appropriate action that can be taken to resolve the problems

Documentation and reporting requirements for the developing of rosters, including computer-based systems

Required skills:

Communicate effectively with others when developing rosters

Read and interpret instructions, procedures and information relevant to the development of rosters

Interpret set workings and combined set workings

Interpret transport timetables and service details

Interpret and follow operational instructions and prioritise work

Complete documentation related to the development of rosters

Operate electronic communication equipment to required protocol

Work collaboratively with others when developing rosters

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when developing rosters in accordance with workplace procedures

Interpret conditions of employment and industrial agreements and awards

Prepare roster documentation in line with workplace format

Allocate suitably qualified personnel to tasks

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and use relevant computer/communication/office equipment required when developing rosters

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted in:	in a range of work environments by day or night
Work rosters may cover:	long distance passenger services urban passenger services long distance freight services short distance freight services maintenance vehicle operations
Staff covered by work rosters may include:	driving and driving support crews shunting and marshalling crews terminal personnel freight handling personnel station personnel interchange personnel transit officers security officers revenue collection officers passenger assist/customer service personnel yard support personnel crew transport personnel transport control centre personnel traffic officers
Changes to planned services may include:	changes in demand response to emergencies
Real time issues may include:	absenteeism additional support services due to injury emergencies
Support activities may include:	shunting and marshalling

- freight loading and unloading
- luggage loading and unloading
- vehicle loading and unloading
- station support activities
- interchange support activities
- crew transport
- training personnel
- revenue processing
- operations control

Contingency plans may include:

- non-availability of rolling stock
- additional services
- non-availability of personnel
- non-availability of material handling equipment
- non-availability of freight handling equipment
- late arrival or cancellation of services

Work outcomes or set workings may apply to:

- transport crews
- personnel required for support activities
- transport control personnel
- transport planning personnel

Communication in the work area may include:

- phone
- electronic data interchange (EDI)
- fax
- email
- internet
- RF systems
- oral, aural or signed communications

Personal protective equipment may include:

- gloves
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Information/documents may include:

- regulatory and/or code requirements relevant to the development of rosters
- workplace procedures and policies for the development of rosters
- work rosters
- transport graphs
- hard copy documentation
- safe working forms
- dangerous goods manifest
- operations manuals, job specifications and induction documentation
- manufacturers specifications for office equipment
- conditions of service, award, enterprise bargaining agreement, and other industrial arrangements
- relevant Australian standards and certification requirements
- quality assurance procedures
- emergency procedures

Applicable regulations and legislation may include:

- relevant state/territory regulations, safeworking systems and codes of practice relevant to the development of rosters, including the ADG Code and the Code of Practice for the Defined Interstate Rail Network in situations where the trains are operating on that network
- relevant state/territory privacy legislation
- relevant state/territory OH&S and environmental protection legislation
- state, federal or Territory award legislation
- workplace relations regulations including equal opportunity, equal employment

opportunity and affirmative action legislation

TLIL507D Apply conflict/grievance resolution strategies

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to apply conflict resolution strategies to resolve grievances that may occur in the course of work, including identifying potential conflict situations, implementing appropriate conflict resolution strategies, and using effective interpersonal skills. Grievances and conflict situations may include those between employees in the workplace, between employees and managers, as well as grievances that might be raised by customers.

Application of the Unit

Work involves discretion and judgement for self and others in management and resolution of conflicts and grievances both internal and external to the workplace.

Work is performed under minimum supervision with general guidance on progress and outcomes of work. It involves application of conflict/grievance resolution strategies in conflict situations that may arise amongst personnel both internal to and external to the workplace.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify potential conflict situations	1.1 Signs, stages and possible causes of conflict/grievance are identified
2 Implement conflict resolution strategies	2.1 Factors and issues relevant to conflict/grievance are clarified
	2.2 Strategies for dealing with conflict/grievance situations are developed
	2.3 Options for resolution of the conflict/grievance are identified which allow for constructive responses to be negotiated and enable established relationships to continue
	2.4 Strategies are implemented for the resolution of the source of conflict
	2.5 Outcomes of the process are monitored to ensure objectives continue to be met
3 Use effective interpersonal skills	3.1 Effective verbal and non-verbal communication is used during negotiations, including body language, questioning, language style, active listening and reflection
	3.2 Feedback is given assertively and received non-defensively during negotiations

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant and regulatory and code requirements

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for the identification and resolution of conflicts/grievances

Relevant workplace business marketing policies and practices, including requirements for the maintenance of security and confidentiality

Signs, stages and possible causes of conflict in the workplace

Options for constructive responses to typical conflict/grievance situations

Typical problems that can occur when applying conflict/grievance resolution strategies and related appropriate action that can be taken

Required skills:

Communicate effectively with others when applying conflict and grievance resolution strategies

Negotiate effectively with others when applying conflict and grievance resolution strategies

Read and interpret instructions, procedures, information and signs relevant to the application of conflict and grievance resolution strategies

Interpret and follow operational instructions and prioritise work

Gather, record and convey simple and routine work-related information

Complete documentation related to the application of conflict and grievance resolution strategies

Operate electronic communication equipment to required protocol

Identify existing and potential conflicts/grievances

Participate in small informal work groups

Apply interpersonal skills

Work collaboratively with others when applying conflict and grievance resolution strategies

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when applying conflict and grievance resolution strategies in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Work systematically with required attention to detail

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	single and multi-site locations large, medium and small companies
Services, products, risks, work systems and requirements may:	potentially vary across different sections of the workplace
Operations involve:	internal and external customer contact and coordination
Conflicts/grievances may arise at all levels of the organisation in a range of possible situations including:	amongst internal personnel between internal personnel and external personnel such as customers, suppliers, contractors, equipment manufacturers, etc. between external personnel and the organisation between internal personnel and management
Consultative processes may involve:	other employees and supervisors management customers/clients suppliers of goods/materials manufacturers of equipment contractors relevant authorities union representatives OH&S specialists other maintenance, professional or technical staff
Communications systems may involve:	face-to-face conversations and meetings telephone fax email mail

Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:

company plans/procedures
enterprise plans/procedures
organisational plans/procedures
established plans/procedures

Information/documentation may include:

workplace procedures for the resolution of conflicts/grievances
records of action to resolve conflicts/grievances and documentation of agreements reached
job specifications
conditions of service, relevant legislation, regulations and related documentation
award, enterprise bargaining agreement, workers compensation, and other industrial arrangements
relevant codes of practice including the national standards for manual handling and the industry safety code
supplier and/or client instructions
manifests, bar codes, goods and container identification
goods identification numbers and codes
manufacturers specifications
material safety data sheets
relevant Australian standards and certification requirements
quality assurance procedures
emergency procedures

Applicable regulations and legislation may include:

relevant regulations, standards and codes of practice
trading regulations relevant to business operations
relevant Australian and state/territory OH&S legislation
environmental protection regulations
hazardous substances and dangerous goods codes

relevant Australian standards and
certification requirements
licence, patent or copyright arrangements

TLIL807C Complete routine administrative tasks

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to complete routine administrative activities in a transport, warehousing, distribution and/or storage workplace, including receiving and distributing incoming mail, receiving and despatching outgoing mail, filing documents, and receiving and relaying written and oral messages.

Application of the Unit

Work must be carried out in accordance with the relevant regulations and workplace procedures.

Work is performed under supervision. It involves the application of the basic principles and routine procedures to complete routine administrative tasks in a transport, warehousing, distribution and/or storage organisation.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Receive and distribute incoming mail	<ul style="list-style-type: none">1.1 Incoming mail is checked and registered to ensure accuracy of records1.2 Urgent and confidential mail is identified and distributed to the addressee promptly1.3 Mail is sorted and despatched to nominated person/location1.4 Damaged, suspicious or missing items are recorded and where necessary reported in accordance with workplace procedures
2 Receive and despatch outgoing mail	<ul style="list-style-type: none">2.1 Outgoing mail is collected from required sections of the organisation, checked and sorted to ensure all items are correctly prepared for despatch2.2 Mail items are collated, recorded in the register (where applicable) and correctly despatched to meet designated timelines
3 File documents	<ul style="list-style-type: none">3.1 Documents are classified, sorted and filed in accordance with workplace procedures3.2 Classification uncertainties are referred to other personnel in accordance with workplace procedures3.3 Documents are identified and retrieved3.4 Specified files/records are located within designated timelines3.5 Located files are extracted from system and despatched to the nominated person3.6 Security and confidentiality procedures are followed
4 Receive and relay written and oral messages	<ul style="list-style-type: none">4.1 Messages are received and accurately recorded4.2 Areas of uncertainty are clarified with conveyor of the message

4.3 Messages are relayed to the nominated person
within designated timelines

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory regulations

OH&S procedures and guidelines relevant to administrative operations

Hazards in routine administrative operations in the workplace and related precautions to control the risk

Workplace procedures and policies for the completion of routine administrative tasks

Housekeeping standards and procedures required in the workplace

Requirements of work systems operations and relevant equipment

Typical problems that can occur when completing routine administrative tasks and appropriate action that can be taken to prevent or solve them

Equipment, methods and strategies used in the routine administration operations

Required skills:

Communicate effectively with others when completing routine administrative tasks

Read and interpret simple instructions, procedures and information relevant to the completion of routine administrative tasks

Interpret and follow operational instructions and prioritise work

Complete documentation related to routine administrative tasks

Operate electronic communication equipment to required protocol

Work collaboratively with others when completing routine administrative tasks

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when completing routine administrative tasks in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted: in a range of work environments and weather conditions

by day or night

Customers may be: internal or external

Mail items may include: company procedures

bulk quantities

single items

letters

facsimiles

emails

Receival and despatch processes for internal and external mail/documents/messages follow: workplace processes and procedures

Requirements for work may include: workplace procedures

site restrictions and procedures

use of safety and personal protective equipment

communications equipment

hours of operations

security procedures

relevant regulations

Consultative processes may involve: potential customers and existing clients

other employees and supervisors

management

union representatives

industrial relations, Occupational Health and Safety specialists

other professional or technical staff

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

- company procedures
- enterprise procedures
- organisational procedures
- established procedures

Communication in the work area may include:

- fixed phone
- mobile phone
- fax
- email
- internet
- radio
- oral, aural or signed communications

Depending on workplace context, personal protective equipment may include:

- gloves
- safety headwear and footwear
- sunglasses and UV protection
- two-way radios
- high visibility clothing

Information documents may include:

- workplace procedures and policies for the completion of routine administrative tasks associated with courier and delivery operations
- operations manuals
- job specifications
- induction documentation
- competency standards and training materials
- manufacturers clients specifications, instructions and labelling advice including material safety data sheets
- Dangerous Goods Code, Explosives Code, HAZCHEM codes and other regulations pertaining to the delivery of mail courier items
- supplier and/or client instructions
- international transport regulations, codes and procedures
- Australian and international standards,

	criteria and certification requirements
	award, enterprise bargaining agreement, other industrial arrangements
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may include:	state/territory roads and traffic authority road rule and licence requirements
	Australian Dangerous Goods Code, Explosives Code, HAZCHEM codes, and other relevant regulations pertaining to the delivery of mail courier operations
	relevant Australian and international standards, criteria and certification requirements
	relevant state/territory environmental protection legislation
	relevant state/territory OH&S legislation

TLIL907C Manage personal work priorities and professional development

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to manage personal work priorities and own professional development, including managing own qualities, goals, plans and performance; setting and meeting own work priorities; and developing and maintaining own professional competence.

Application of the Unit

Work is performed under minimum supervision with general guidance on progress and outcomes of work. It involves discretion and judgement in managing personal work priorities and professional development.

A range of opportunities may be used to develop the workplace and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations goals and key performance objectives. Work generally involves responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

Licensing/Regulatory Information

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Manage self	<ul style="list-style-type: none">1.1 Personal qualities and performance serve as a role model in the workplace1.2 Personal goals and plans reflect the organisation's plans and personal roles, responsibilities and accountabilities1.3 Action is taken to achieve and extend personal goals beyond those planned1.4 Consistent personal performance is maintained in varying work conditions and work contexts
2 Set and meet own work priorities	<ul style="list-style-type: none">2.1 Competing demands are prioritised to achieve personal, team and the organisation's goals and objectives2.2 Technology is used efficiently and effectively to manage work priorities and commitments
3 Develop and maintain professional competence	<ul style="list-style-type: none">3.1 Personal knowledge and skills are assessed against competency standards to determine development needs and priorities3.2 Feedback from clients and colleagues is used to identify and develop ways to improve competence3.3 Management development opportunities suitable to personal learning style(s) are selected and used to develop competence3.4 Participation in professional networks and associations enhances personal knowledge, skills and relationships3.5 New skills are identified and developed to achieve and maintain a competitive edge

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for the management of personal work priorities and professional development

Competencies required to increase participation in the planning and development of the organisation

Appropriate learning methods to maintain current competence or develop new competencies

Resource availability including the competencies of individuals in the team/group

Coaching and mentoring approaches to support team members to share knowledge and skills

Workplace business policies and plans including procedures for undertaking professional development

Typical problems that can occur when managing personal work priorities and professional development and related action that can be taken

Required skills:

Communicate effectively with others when managing personal work priorities and professional development

Read and interpret instructions, procedures, information and signs relevant to the management of personal work priorities and professional development

Interpret and follow operational instructions and prioritise work

Complete documentation related to the management of personal work priorities and professional development

Operate electronic communication equipment to required protocol

Work collaboratively with others when managing personal work priorities and professional development

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when managing personal work priorities and professional development in accordance with workplace procedures

Plan work activities, including predicting consequences and identifying improvements

Take advantage of learning opportunities both in the workplace and within training programs and workshops

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply fatigue management knowledge and techniques

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

TLIO1107C Provide revenue protection measures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to provide revenue protection measures during transport operations, including preparing for revenue protection activities and implementing revenue protection procedures.

Application of the Unit

Work must be carried out in compliance with the relevant regulations related to the protection of transport revenue.

Work is performed under some supervision, generally within a team environment. It involves the application of routine procedures and regulatory requirements to the provision of revenue protection measures.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for revenue protection activities	<ul style="list-style-type: none">1.1 Strategies to check customer ticketing are planned1.2 Resources to implement ticket checks are arranged to suit anticipated passengers numbers1.3 Queuing systems and barriers are set up to ensure ticket checks are comprehensive1.4 Staff are allocated to planned activities according to organisation procedures and policy1.5 Staff are briefed on strategies for checking customers' tickets
2 Implement revenue protection procedures	<ul style="list-style-type: none">2.1 Ticket checks are conducted against organisational requirements2.2 Fares are collected or infringement notices are issued2.3 Use of concession, special and privilege passes is monitored for compliance with organisational policies

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory regulations and requirements pertaining to revenue protection

Relevant OH&S and environmental protection procedures and guidelines

Organisational policies and procedures

Risks and hazards when providing revenue protection within a transport system and related precautions to control the risk

Organisation's transport services

Complementary transport services

Fare structures

Concessional privileges

Timetables

Typical problems that can occur when providing revenue protection measures and appropriate action that can be taken to prevent or solve them

Customer service requirements

Required skills:

Communicate effectively with others when providing revenue protection measures

Resolve conflict situations

Read and interpret instructions, procedures and information relevant to the provision of revenue protection measures

Interpret and follow operational instructions and prioritise work

Complete documentation related to the provision of revenue protection measures

Operate electronic communication equipment to required protocol

Calculate fares

Work collaboratively with others when providing revenue protection measures

Deploy staff

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when providing revenue protection measures in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may arise when providing revenue protection measures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the provision of revenue protection measures

Monitor work activities in terms of planned schedule

Manage stress

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Operate barriers

Validate tickets

Apply basic mechanical skills

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Monitor passenger behaviour	<ul style="list-style-type: none">1.1 Facilities and transportation units under surveillance are regularly monitored to identify and record inappropriate behaviour1.2 Potential problem situations are quickly identified and steps taken to defuse the situation in accordance with agreed procedures1.3 Incidents which breach legislation are identified and appropriate action is taken1.4 Surveillance equipment is operated within legal and workplace parameters
2 Identify and resolve disruptive/unlawful activity	<ul style="list-style-type: none">2.1 The nature of disruptive or unlawful behaviour is accurately assessed and, if possible, conflict is resolved using relevant conflict resolution strategies2.2 Procedures are followed to isolate the offender(s) and minimise disruption to other passengers where appropriate2.3 Assistance is sought from other staff and external support services where necessary2.4 The situation is resolved and follow-up action is implemented according to the appropriate workplace rules, regulations and guidelines
3 Take action to control unlawful behaviour	<ul style="list-style-type: none">3.1 Assistance is sought from other staff and external support services where necessary3.2 The nature of the offence and the consequences of the behaviour are clearly communicated to the offender3.3 Staff involvement in the apprehension of offenders is undertaken within legal and workplace parameters

4 Report and document incident(s)

- 4.1 Incidents are reported using the appropriate document format in accordance with workplace policies and procedures
- 4.2 All documentation is drafted in accordance with workplace rules, regulations and guidelines

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory regulations and requirements pertaining to the management of disruptive and unlawful behaviour on transport systems

Relevant OH&S and environmental protection procedures and guidelines

Risks and hazards when managing disruptive behaviour on a transport system and related precautions to control the risk

Transport services provided

Procedures for the management of disruptive and unlawful behaviour

Legal and workplace parameters with regard to unlawful behaviour

By-laws and service rules as they apply to disruptive behaviour on transport systems

Common law as it applies to disruptive and unlawful behaviour on transport systems

Customer service requirements

Typical problems that can occur when managing disruptive and unlawful behaviour on transport systems and appropriate action that can be taken to prevent or solve them

Required skills:

Communicate and negotiate effectively with others when managing disruptive and unlawful behaviour on transport systems

Resolve conflict situations

Read and interpret instructions, procedures, guidelines and information relevant to the management of disruptive and unlawful behaviour on transport systems

Interpret and follow operational instructions and prioritise work

Complete documentation related to work activities

Operate electronic communication equipment to required protocol

Work collaboratively with others when managing disruptive and unlawful behaviour on transport systems

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when managing disruptive and unlawful behaviour on transport systems in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may arise when managing disruptive and unlawful behaviour on transport systems

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the management of disruptive and unlawful behaviour on transport systems

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify and correctly use equipment, processes and procedures

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted in: in a range of work environments and weather conditions

by day or night

Customers may be: internal or external

Facilities and transportation units may include: stations/interchanges/stops

carriages

buses/coaches

amenities

depots/other transport facilities

cafeterias

toilets

ticket offices

Problems may include arguments

hostilities

fare evasion

verbal abuse

physical abuse

graffiti

lack of compliance with no smoking signs

lack of compliance with transport regulations

drunken behaviour

Equipment may include: video/audio equipment

security services (internal or external)

warning lighting

security mirrors

alarms

Contingency processes may involve: notification of external agencies where necessary e.g. police, security guards etc.

	assistance from other staff if necessary
Customer safety surveillance may include:	foot patrol automatic camera monitoring local and remote monitoring vehicle patrol
Consultative processes may involve:	customers private and public sector security personnel police security consultants other employees and supervisors management
Communication in the work area may include:	mobile and fixed phones radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures workplace procedures established procedures
Personal protective equipment may include:	gloves safety headwear and footwear firearms two-way radios
Information/documents may include:	workplace procedures, regulations, guidelines practices and policies job specifications organisation insurance requirements reports of incidents documentation and records of security breaches conflict resolution documentation relevant manufacturers specifications for equipment used competency standards and training materials

codes of practice and regulations concerning transport security

award, enterprise bargaining agreement, other industrial arrangements

standards and certification requirements

quality assurance procedures

emergency response procedures

rules and regulations in regard to disruptive/unlawful behaviour

Applicable regulations and legislation may include:

state/territory OH&S regulations and legislation concerning transport security

relevant Australian Standards and certification requirements

relevant state/territory privacy legislation

relevant state/territory firearms legislation

licensing and permits for firearms and security occupations

relevant state/territory road rules and traffic acts

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Assess security requirements	<ul style="list-style-type: none">1.1 Adequacy of insurance cover is determined1.2 Adequacy of physical protection over assets and facilities is determined1.3 Methods to improve security requirements are assessed and recommended1.4 Breakdowns/breaches of security are recorded and reported
2 Develop and implement security programs	<ul style="list-style-type: none">2.1 Staff are consulted regularly regarding security programs2.2 Improvements to security procedures are documented, trialed, refined and implemented2.3 Input is given to assist in the preparation of coronial reports and enquires2.4 Statements are gathered and reports prepared which assist in the issuance of summonses
3 Monitor and evaluate security programs	<ul style="list-style-type: none">3.1 Reports and statements produced where security has broken down or has been breached, are analysed and conclusions documented3.2 Security procedures are regularly monitored to ensure their implementation3.3 Security systems are regularly tested and evaluated to ensure operational effectiveness

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory regulations and requirements pertaining to the administration of the security of assets and facilities in the transport and distribution industry

Relevant OH&S and environmental protection procedures and guidelines

Risks and hazards when administering the security of assets and facilities, and related precautions to control the risk

Relevant operational procedures for accessing, storing, using and securing resources

Stock handling procedures

Basic financial procedures

Relevant operational procedures relating to the administration of the security of assets and facilities

Types and levels of insurance cover

Risk management policies

Reporting procedures

Corporate organisation chart

Basic legal rights and responsibilities

Typical problems that can occur when administering the security of assets and facilities and appropriate action that can be taken to prevent or solve them

Required skills:

Communicate and negotiate effectively with others when administering the security of assets and facilities

Read and interpret instructions, procedures, information and signs relevant to the administration of the security of assets and facilities

Interpret and follow operational instructions and prioritise work

Complete documentation and records related to the administration of the security of assets

and facilities

Operate electronic communication equipment to required protocol

Gather, collate and present data when administering the security of assets and facilities

Work collaboratively with others when administering the security of assets and facilities

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when administering the security of assets and facilities in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when administering the security of assets and facilities

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Audit the security of assets and facilities

Select and use appropriate computer and office equipment when administering the security of assets and facilities

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	in a range of work environments and weather conditions by day or night
Customers may be:	internal or external
Equipment may include:	insurance notes and information organisation security procedures documentation of physical protection facilities security programs
Coding identification of assets may include:	stocktakes assets register (coded and labelled) monitoring insurance requirements
Regular insurance assessments may include:	conditions of insurance insurance assessment of premises monitoring insurance requirements
Work organisation procedures and practices may include:	financial/administrative procedures security procedures
Consultative processes may involve:	private and public sector security personnel police security consultants other employees and supervisors management
Communication in the work area may include:	mobile and fixed phones radio oral, aural or signed communications
Consultative processes may involve:	private and public sector security personnel police

	security consultants other employees and supervisors management
Communication in the work area may include:	mobile and fixed phones radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures workplace procedures established procedures
Information/documents may include:	workplace procedures, regulations, guidelines practices and policies organisation security reports coronial reports and enquiries event statements summonses assets register organisation insurance requirements relevant manufacturers specifications and guidelines codes of practice and regulations concerning transport and distribution assets job specifications competency standards and training materials award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements quality assurance procedures emergency response procedures
Applicable regulations and legislation may include:	state/territory OH&S regulations and legislation concerning transport and distribution assets relevant Australian Standards and certification requirements

relevant state/territory insurance legislation

relevant state/territory legislation relevant to
asset security

Competency Field

O - Security

TLIO1607B Apply and monitor workplace security procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to apply and monitor security procedures in workplaces in the postal, warehousing, stevedoring, transport, distribution and allied industries in accordance with workplace and regulatory requirements. This includes checking and monitoring personnel and goods entering the worksite, carrying out surveillance of work areas, dealing with security incidents and emergencies, and completing required reports and surveillance documentation.

Application of the Unit

Work must be carried out in compliance with the regulations and workplace requirements pertaining to the security procedures in the workplace.

Work is performed under some supervision, generally within a team environment.

Work involves the application of workplace procedures and regulatory requirements to security operations as part of work activities in the postal, warehousing, stevedoring, transport, distribution and allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Check and monitor personnel and goods entering the existing worksite	<p>1.1 The entry and/or exit of personnel and vehicles are checked in accordance with workplace operational procedures and statutory authority regulations to prevent improper entry or unlawful removal of goods and cargo</p> <p>1.2 Potential breaches of security which may cause goods to be at risk are observed and reported promptly to designated personnel in accordance with workplace procedures</p>
2 Carry out surveillance of work areas	<p>2.1 Surveillance of work areas is in accordance with workplace procedures and regulatory requirements</p> <p>2.2 Breaches of security are identified and action is initiated and/or the incident reported in accordance with workplace procedures and regulatory requirements</p>
3 Deal and write reports on security incidents emergencies	<p>3.1 Security incidents/emergencies are dealt with in accordance with regulations and site operational procedures</p> <p>3.2 Appropriate police/security/emergency services are contacted, if required, in accordance with workplace procedures</p> <p>3.3 Written reports of incidents/emergencies communicate intended message in accordance with workplace requirements</p>
4 Complete required documentation	<p>4.1 Surveillance documentation and reports are completed and files despatched in accordance with workplace procedures and regulatory requirements</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to the security arrangements during the transfer of cargo, freight and mail

Relevant OH&S and environmental protection procedures and guidelines

Workplace security procedures and policies when transferring cargo/freight/mail

Focus of operation of work systems, equipment, management and site operating systems for the secure transfer of cargo/freight/mail

Security problems that may occur when transferring cargo, freight and mail and appropriate action that can be taken to resolve or avoid the problems

Site layout and operating procedures

Types of hazardous cargo and special handling procedures

The marking and numbering systems for cargo/freight/mail

Relevant bond, quarantine or other legislative requirements

Required skills:

Communicate effectively with others when applying and monitoring security procedures for cargo, freight and mail

Read and interpret instructions, procedures and information relevant to the security of cargo, freight and mail

Interpret and follow operational instructions and prioritise work

Complete documentation related to the security of cargo, freight and mail

Receive, acknowledge and send messages with available communications equipment

Work collaboratively with others when applying and monitoring security procedures for cargo, freight and mail

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when applying and monitoring security procedures for cargo, freight and mail in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may arise when applying and monitoring security procedures for cargo, freight and mail

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Plan own work including predicting consequences and identifying improvements.

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify, select and use relevant equipment, processes and procedures when maintaining security during the transfer of cargo, freight and mail

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Workplaces may comprise:	large, medium or small worksites
Customers may be:	internal or external
Work may be conducted in:	limited or restricted spaces exposed conditions controlled or open environments
Hazards may include:	vehicular traffic and pedestrians dust and vapours chemicals and hazardous or other dangerous materials humidity, air temperature lighting conditions movements of equipment, goods, and materials noise
Security procedures for high value goods may include:	identification codes/marks/numbers identified and recorded goods to be secured are tallied storage location matches product characteristics including fire risks, weather damage or requirements workplace reporting of shortages and damage
Recording procedures for the receipt/delivery of cargo/freight/mail etc. may include:	carrier and vehicle registration cargo/freight/mail, including marks/numbers/identification codes cargo/freight/mail documentation number of pallets gate pass and time of exit

Documentation may include:

export receipt advice
customs clearance
gate pass/VMO clearance

Depending on workplace context, authorised personnel seeking entry to terminal/wharf/workplace may include:

carriers
customs
officers of the Australian Quarantine and Inspection Service
port authority
shipping agents
employees of related industries
work crews
union representatives
contractors
site visitors
contractors
official representatives

Personal protective equipment may include:

gloves
safety headwear and footwear
safety glasses
two-way radios
protective clothing
high visibility clothing

Communication in the work area may include:

phone
fax
email
electronic data transfer (EDI)
RF systems
radio
oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures

	established procedures
Surveillance areas may include:	<p>buildings, gates and perimeter fence</p> <p>personnel and property are authorised to be in a secured area</p> <p>customers, visitors and contractors are safe</p> <p>monies, premises and equipment are secure</p>
Information/documents may include:	<p>workplace policies, operating procedures and practices</p> <p>goods identification numbers and codes</p> <p>manifests, consignment notes, bar codes, and container identification/serial number</p> <p>Australian and international codes of practice and regulations relevant to the secure transfer of cargo/freight/mail/parcels including ADG Code</p> <p>dangerous goods declarations and material safety data sheets (where applicable)</p> <p>quality assurance procedures</p> <p>induction documentation</p> <p>competency standards and training materials</p> <p>job specifications and procedures</p> <p>award, enterprise bargaining agreement or other industrial arrangements</p> <p>codes of practice, including national standards for manual handling and the industry safety code</p> <p>supplier and or/client instructions'</p> <p>HAZCHEM chart/MSDS</p> <p>safety observation feedback program</p> <p>emergency procedures</p>
Applicable regulations and legislation may include:	<p>relevant codes and regulations for the transfer of cargo/freight/mail</p> <p>Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances, including:</p> <p>Australian and International Dangerous</p>

Goods Codes

Australian Marine Orders and the
International Maritime Dangerous Goods
Code

IATA Dangerous Goods by Air regulations

water and road use and licence arrangements

export/import/quarantine/bond requirements

marine orders

relevant state/territory OH&S and
environmental protection legislation

workplace relations regulations

workers compensation regulations

equal opportunity, equal employment
opportunity and affirmative action legislation

Unit Sector(s)

Not applicable.

Competency Field

O - Security

TLIO207D Follow security procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to follow security procedures in the transport and logistics industries, including checking and maintaining the security of any goods and cargo; ensuring the security of any passengers, workplace personnel and visitors; identifying and reporting any security threats or situations; and completing all required security records.

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable security regulations and the relevant sections of a transport organisations workplace security program and procedures.

Work is performed under some supervision generally within a team environment. It involves the application of an organisations workplace security program and procedures and regulatory requirements to ensure that appropriate security procedures are followed when carrying out work activities in the transport, distribution, logistics and allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Maintain security of goods and cargo (where applicable)	<p>1.1 Where applicable, goods and cargo are secured within specified locations, transport vehicles, vessels or aircraft as per workplace security procedures and applicable security regulations</p> <p>1.2 Seals, tamper proof packaging, locks and other security measures on goods or cargo are checked and maintained as per workplace security procedures</p> <p>1.3 Signs of pillaging, theft and interference are recognised and reported</p> <p>1.4 Signs of suspicious goods and cargo are recognised and reported promptly to designated personnel</p> <p>1.5 Any breaches of security requirements are reported promptly to designated personnel as per workplace security procedures</p>
2 Maintain security of passengers, workplace personnel and visitors (where applicable)	<p>2.1 Where applicable, security checks of passengers, workplace personnel and visitors are carried out as per workplace security program and procedures and within limits of role and responsibilities</p> <p>2.2 Precautions and measures aimed at protecting the security of passengers, workplace personnel and visitors are followed as per workplace security requirements and applicable security regulations</p> <p>2.3 Signs of security threats are recognised and investigated as per workplace security requirements</p> <p>2.4 Signs of suspicious behaviour of passengers or other personnel are recognised and reported promptly to designated personnel</p> <p>2.5 Any breaches of security requirements for passengers, workplace personnel and visitors are reported promptly to designated personnel in accordance with workplace procedures</p>

- 3 Identify a security threat or situation**
 - 3.1 Security threat or situation is promptly identified and assessed and response is prioritised in accordance with the workplace security program and procedures
 - 3.2 Implications of the security threat or situation are evaluated in accordance with workplace security program and procedures
 - 3.3 Relevant personnel are alerted to the security threat or situation as required within workplace security procedures and program
 - 3.4 Communications are maintained with relevant personnel to determine appropriate course of action
- 4 Respond to a security threat or situation**
 - 4.1 Response to an identified security threat or situation is in accordance with workplace security procedures, received instructions, regulatory requirements and emergency response plan where relevant
 - 4.2 Security threats or incidents are handled appropriately in accordance with established response plan and within limits of responsibility and duty of care
 - 4.3 Responsibilities are fulfilled in accordance with the workplace security program and regulatory requirements
 - 4.4 Assistance is provided in controlling the site both prior to and following arrival of security and/or emergency services
 - 4.5 In the case of a security threat or emergency, assistance is provided to other staff and emergency services personnel conducting an initial survey of the scene
 - 4.6 Directions of the controlling security/emergency authority are followed and all possible assistance is provided in response to those directions
- 5 Maintain security records**
 - 5.1 Records of security checks and precautions are kept as per workplace procedures
 - 5.2 Reports of security incidents or threats are completed in accordance with workplace

requirements and applicable security requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Applicable transport security legislation including relevant international, national, state and territory acts, regulations codes and/or guidelines

Relevant workplace security program and policies and procedures for responding to security threats, situations and emergencies

Relevant quarantine and bond regulations and requirements

Relevant OH&S and environmental protection procedures and guidelines

Security threats and incidents that may occur in transport, logistics and allied industries, and related roles and responsibilities of personnel when reporting them and responding to them

Applicable measures for the securing of transport terminals, storage facilities, vehicles, trains, aircraft and/or vessels

Signs of pillaging, theft and interference with goods, cargo and mail

Signs of suspicious behaviour of passengers and other personnel

Precautions and procedures aimed at protecting the security of passengers, workplace personnel and visitors

Focus of operation of work systems, equipment, management and site operating systems when carrying out operations in the transport and logistics industries

Security problems that may occur when carrying out operations in the transport and logistics industries and action that can be taken to address and resolve the problems

Relevant documentation and reporting requirements

Layout of worksite, vehicle, vessel, train or aircraft and operating procedures

Procedures for operating any electronic communications equipment with required protocol

Required skills:

Communicate effectively with others when following security procedures

Read and interpret instructions, procedures, applicable regulatory requirements, labels, markings, ID cards and other information relevant to workplace security in the transport and

logistics industries

Complete required documentation and reports related to security procedures

Work collaboratively with others when following security procedures

Identify and solve and/or report problems that arise when following security procedures

Modify activities depending on differing workplace contexts, risk situations and environments

Adapt to differences in equipment, facilities, cargo and passengers

Apply procedures for security checks and precautions as per limits of role and responsibilities

Recognise signs of pillage, theft and interference with goods, cargo and mail

Recognise signs of security threats and situations

Promptly report and/or rectify any identified problems that may arise when following security procedures in accordance with regulatory requirements and workplace procedures

Follow security threat/incident response plan and procedures

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and use relevant communications and other equipment required when following security procedures

Select and use required personal protective clothing and equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Transport and logistics enterprises may involve:

warehousing and distribution
road transport
rail transport
aviation
maritime
freight forwarding and customs broking
multimodal transport and logistics

Work may be conducted:

in a range of work environments by day or night, including in large, medium or small transport terminals and storage facilities and on vehicles, trains, aircraft and vessels

Security procedures may be aimed at preventing or identifying:

persons trespassing on security zones and restricted areas
carriage or storage of prohibited goods
the carriage of improvised explosive devices in cargo and mail
smuggling of goods
pillage, theft and interference with cargo, goods and mail
acts or threats of terrorism
hijacking of a vehicle, train, aircraft or vessel
extortion
assault
fraud
vandalism and graffiti

Security measures may include:

security guards at access points and gates to secured areas
locked doors, gates and fences
use of personal electronic access cards
recording of carrier and vehicle registration

	details at gates and checkpoints
	bag check points
	escorts for visitors in restricted areas
	access control into and out of restricted security areas
	use of ID cards
	video surveillance equipment
	X-ray screening of baggage, cargo and goods
	ETD screening of passengers, baggage, cargo and goods
	screening of passengers using handheld and walk through magnetometers
Communication in the work area may include:	phone
	radio
	fax
	email
	electronic data transfer (EDI)
	internet
	oral, aural or signed communications
Personal protection equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Depending on the organisation concerned workplace procedures may be called:	standard operating procedures
	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information and documents may include:	Australian transport security legislation and regulations
	Australian and international codes of practice and regulations relevant to the secure transport of passengers and the transfer and

storage of cargo and goods

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances

workplace security program and related policies and procedures

workplace standard operating procedures and policies

signs and instructions pertaining to security matters

operations manuals, job specifications and induction documentation

manufacturers specifications for equipment tickets, labels, manifests, bar codes, and container identification/serial numbers (as applicable)

supplier and/or client instructions

dangerous goods declarations and material safety data sheets (where applicable)

Applicable legislation, regulations and codes may include:

Australian transport security legislation and regulations

Australian and international codes of practice and regulations relevant to the secure transport of passengers and the transfer and storage of cargo and goods

Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances

export/import/quarantine/bond regulations

relevant state/territory OH&S legislation

Unit Sector(s)

TLIO707C Undertake emergency response action to a security threat

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to undertake emergency action to a potential security threat, including selecting emergency actions to be applied, maintaining communications, and reporting the incident in accordance with established procedures.

Application of the Unit

Work must be carried out in compliance with the relevant sections of the regulations of the relevant state/territory authorities concerned with the secure delivery of valuables, secured products, documents and materials.

Work is performed under general or limited supervision. It involves the application of the basic security principles, routine procedures and regulatory requirements to undertake appropriate emergency response action to a security threat.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Select emergency actions to be applied	<ul style="list-style-type: none">1.1 Threats or potential threats are recognised1.2 Where able, agency/branch/base and/or police are alerted to potential security threat with all relevant details and requests for supportive action being detailed1.3 Range of emergency actions are identified and analysed1.4 Security threat and appropriate emergency plans are matched1.5 Emergency actions are invoked in accordance with emergency procedures and in consideration of own safety, members of the public and the consignment1.6 Emergency actions are modified consistent with changes within the emergency environment
2 Maintain communications	<ul style="list-style-type: none">2.1 Communication is maintained with agency/branch/base and relevant agencies/personnel in accordance with enterprise and emergency procedures2.2 Information is conveyed in a clear, concise and accurate manner
3 Report incident	<ul style="list-style-type: none">3.1 Reporting arrangements are completed according to enterprise procedures3.2 Police or other emergency services are provided with reports as required

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory permit and licence regulations and requirements

Relevant OH&S procedures and guidelines

Risks and hazards when transferring cash-in-transit and related precautions to control security threats

Operational procedures for identification of security threats and undertaking emergency response

Contingency planning relating to managing and controlling security threats

Requirements for approved work procedures and relevant equipment

Housekeeping standards procedures required in the workplace

Typical problems that can occur when undertaking emergency response action to a security threat and appropriate action that can be taken to prevent or solve them

Required skills:

Communicate effectively with others when undertaking emergency response action to a security threat

Read and interpret instructions, procedures, information and signs relevant to emergency response action to a security threat

Interpret and follow operational instructions and prioritise work

Complete documentation related to emergency response action to a security threat

Operate electronic communication equipment to required protocol

Work collaboratively with others when undertaking emergency response action to a security threat

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when undertaking emergency response action to a security threat in accordance with regulatory requirements

and workplace procedures

Implement contingency plans for unanticipated situations that may occur when undertaking emergency response action to a security threat

Apply precautions and required action to minimise, control or eliminate hazards that may exist during emergency response action to a security threat

Apply relevant agreements, codes of practice or other legislative requirements

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify and correctly use equipment, processes and procedures

Adapt to differences in equipment in accordance with standard operating procedures

Safely use correct manual handling techniques

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Operations may be conducted:	in a range of work environments and weather conditions by day or night
Customers may be:	internal or external
Hazards may include:	vehicular and pedestrian traffic firearm handling persons with felonious intent uneven ground, steps, road surfaces dust and vapours hazardous or dangerous materials humidity, air temperature
Consultative processes may involve:	clients private security personnel public sector security personnel police security consultants other employees and supervisors management other professional or technical staff
Incidents may include:	actual or potential breaches of security arrangements
Emergency actions are undertaken within:	workplace policy and procedures
Communication may include:	mobile and fixed phones radio oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures

	organisational procedures
	established procedures
Personal protective equipment may include:	gloves

TLIP107C Develop plans to meet customer and organisation needs

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to develop plans to meet customer and organisation needs, including contributing to strategic planning, analysing market needs, contributing to business documentation, and communicating on planning matters with other members of the organisation.

Application of the Unit

Work is performed under limited or minimum supervision with general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in developing plans to meet customer and organisation needs.

A range of opportunities may be used to develop the workplace and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations goals and key performance objectives. Work involves responsibility for the development of work plans and the provision of leadership of others either individually or in teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Contribute to strategic planning	<p>1.1 A contribution is made to a shared vision and values for the workplace by assisting the examination of future opportunities and directions and their use in the shaping of business goals and objectives</p> <p>1.2 A contribution is made to strategic planning by assisting in the investigation of the business environment of the workplace</p>
2 Analyse market needs	<p>2.1 Customer needs are researched and the outcomes analysed and interpreted to establish business options and opportunities</p> <p>2.2 Opportunities are identified for product and service enhancement through an analysis of existing and potential market opportunities and the development of strategies to strengthen the workplace's market focus in suitable directions</p>
3 Contribute to business documentation	<p>3.1 Contributions are made to the preparation of the workplace's business plans/budgets</p> <p>3.2 All workplace insurance needs are identified and suitable cover taken out</p>
4 Communicate to other members of the organisation	<p>4.1 The outcomes of the planning process are communicated to appropriate persons in the organisation and feedback mechanisms used to ensure continuous improvement of the planning process and outcomes</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements

Relevant OH&S and environmental protection policies and procedures

Workplace protocols and procedures for the development of plans to meet customer and organisation needs, including: strategic planning, tactical planning and quality improvement of services/operations/products

Relevant workplace business management policies and practices, including requirements for the maintenance of security and confidentiality

Insurance requirements relevant to business operations

Focus of operation of business planning systems and resources

Resource availability including the processing capacity of equipment and software systems for planning activities

Typical problems that can occur when developing plans to meet customer and organisation needs and related appropriate action that can be taken

Required skills:

Communicate and negotiate effectively with others when developing plans to meet customer and organisation needs

Read and interpret instructions, procedures, information and signs relevant to the development of plans to meet customer and organisation needs

Interpret and follow operational instructions and prioritise work

Survey and assess organisation and customer requirements

Complete documentation related to the development of plans to meet customer and organisation needs

Operate electronic communication equipment to required protocol

Work collaboratively with others when developing plans to meet customer and organisation needs

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when developing plans to meet customer and organisation needs in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when developing plans to meet customer and organisation needs

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and appropriately apply technology, information systems and procedures to complete workplace tasks

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	single and multi-site locations large, medium and small companies
Services, products, risks, work systems and requirements may:	potentially vary across different sections of the workplace
Operations involve:	internal and external customer contact and coordination
Plans may include:	operational plans marketing plans financial plans
Consultative processes may involve:	other employees and supervisors customers and suppliers management and union representatives industrial relations and OH&S specialists other professional or technical staff, contractors and maintenance personnel
Depending on the type of organisation concerned and the local terminology used, workplace plans/procedures may include:	company plans/procedures enterprise plans/procedures organisational plans/procedures established plans/procedures
Information/documentation may include:	procedures for the development of workplace plans and budgets customer/client instructions and assessed requirements legislation, regulations and related documentation relevant to business operations regulations and policies relating to minimising risks to the environment and ensuring compliance with OH&S requirements

insurance requirements

relevant agreements, codes of practice
including the National Standards for Services
and Operations

manufacturers/suppliers specifications,
advice, recommended procedures, policies
and instructions

reports of accidents and incidents within
regulatory requirements and workplace
procedures

workplace guidelines on appropriate
workplace language and communication
strategies and interpretation of relevant
information

quality assurance procedures

Applicable regulations and legislation may
include:

relevant regulations, standards and codes of
practice

relevant Australian and state/territory OH&S
legislation

equal employment legislation and related
policies

environmental protection regulations

hazardous substances and dangerous goods
codes

relevant Australian standards and
certification requirements

licence, patent or copyright arrangements

taxation and trading regulations relevant to
business operations

relevant insurance regulations

 - 4.1 Individuals/teams are involved in the preparation of operational plans in ways which use their contribution effectively and gains their support for the outcomes
 - 4.2 Operational plans are prepared and presented in accordance with the workplace's guidelines and requirements
- 5 **Prepare resource proposals**
 - 5.1 Resource planning data is collected in consultation with colleagues, including those who have a specialist role in resource management
 - 5.2 Estimates of resource needs and utilisation reflects the workplaces business plans and customer and supplier requirements
 - 5.3 Proposals to secure resources are supported by clearly presented submissions describing realistic options, benefits, costs and outcomes

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements

Relevant OH&S and environmental protection responsibilities, policies and procedures

Workplace protocols and procedures for the management of workplace information

Workplace business policies and plans as they relate to financial reporting and information system management and improvement

Focus of operation of recording, reporting and statistical analysis systems and resources

Resource availability including the processing capacity of equipment and software systems for statistical analysis of data

Typical problems that can occur with the management of workplace information and related appropriate action that can be taken

Required skills:

Communicate effectively with others when managing workplace information

Read and interpret instructions and procedures relevant to the management of workplace information

Interpret and follow operational instructions and prioritise work

Complete documentation related to the management of workplace information

Operate electronic communication equipment to required protocol

Work collaboratively with others when managing workplace information

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise during the management of workplace information in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unplanned events

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and efficiently use information management systems and technologies

Select and appropriately apply technology, information systems and procedures to workplace tasks

Adapt to differences in equipment in accordance with standard operating procedures

TLIP707C Contribute to the development of a workplace learning environment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to contribute to the development of a workplace learning environment in accordance with workplace procedures. This includes creating learning opportunities, facilitating and promoting learning, and monitoring and improving learning effectiveness.

Application of the Unit

Work must be carried out in compliance with the relevant Australian regulations, standards and codes of practice.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplaces goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Create learning opportunities	<ul style="list-style-type: none">1.1 Workplace environments which facilitate learning are developed and supported1.2 Learning plans are developed as an integral part of individual/team performance plans1.3 Learning plans reflect the diversity of needs and learning opportunities of individual employees and the enterprise1.4 Individual/team access to, and participation in, learning opportunities is facilitated including both formal and informal learning opportunities1.5 Negotiation with training and development specialists results in the planning and provision of learning which enhances the operation of the workplace
2 Facilitate and promote learning	<ul style="list-style-type: none">2.1 Workplace activities are used as opportunities for learning2.2 Coaching and mentoring contributes effectively to development of workplace knowledge, skills and attitudes2.3 The benefits of learning are shared with others in the team/workplace2.4 Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards
3 Monitor and improve learning effectiveness	<ul style="list-style-type: none">3.1 Feedback from individuals/teams is used to identify and introduce improvements in future learning arrangements3.2 Adjustments negotiated with training and

development specialists result in improvements to the efficiency and effectiveness of learning

- 3.3 Records and reports of competency are documented and maintained within the workplace systems and procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulations, codes of practice and legislative requirements

Relevant OH&S and environmental protection procedures and regulations

Workplace policies and processes for the development of a workplace learning environment

Problems that may occur during the development of a workplace learning environment and action that can be taken to report or resolve the problems

Business policies and plans including training and assessment

Focus of operation of work systems, resources, management and workplace operating systems

The application of current competencies within functional activity

Application of relevant assessment guidelines and endorsed competency standards appropriate for the workplace

Resource availability including the competencies of individuals in the team/group

Quality and customer service standards, policies and procedures

Relevant workplace documentation procedures

Required skills:

Communicate effectively with others when developing a workplace learning environment

Read and interpret competency standards, job specifications, training and assessment instructions and materials relevant to the development of a workplace learning environment

Prioritise work and coordinate self and others in relation to workplace learning opportunities and activities

Complete documentation related to developing a workplace learning environment

Operate electronic communication equipment to required protocol

Provide leadership and work collaboratively with others when developing a workplace learning environment

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise during the development of a workplace learning environment in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Plan and organise learning opportunities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Apply relevant assessment guidelines and endorsed competency standards appropriate for the workplace

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and apply appropriate technology, learning and assessment resources, information systems and procedures

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Learning activities may be:	provided in various work environments in the warehousing, storage, transport and distribution industries
This unit operates in an environment where:	workplace structures support workplace learning
Customers may be:	internal or external
Operations may be conducted:	by day or night
The workplace environment may involve:	twenty-four hour operation single and multi-site locations large, medium and small workplaces
Workplace learning environment may involve:	both internal and external competency-based learning opportunities structured and non-structured learning opportunities workplace on-the-job coaching and mentoring opportunities for the recognition of skills and knowledge gained through previous learning and experience
Consultative and learning processes may involve:	employees, supervisors and managers training providers and assessors relevant authorities, government departments and institutions industrial relations and OH&S specialists other professional or technical staff
Communications systems may involve:	fixed and mobile telephone radio fax email

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

electronic data transfer of information
mail and internal memo

company procedures
enterprise procedures
organisational procedures
established procedures

Documentation/records may include:

codes of practice and regulations relevant to workplace operations

workplace procedures and policies for creation of a workplace learning environment

training manuals, job specifications and procedures and induction documentation

TLIQ1007B Maintain customer credit accounts and services

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to maintain customer credit accounts and services in accordance with workplace requirements, including establishing and maintaining customer credit accounts and services, and maintaining a customer information system.

Application of the Unit

Work must be carried out in compliance with the relevant regulations and workplace requirements concerning the maintenance of customer credit accounts and services. Work is performed under some supervision generally within a team environment. It involves the application of workplace procedures and regulatory requirements to the maintenance of customer credit accounts and services as part of work activities in the transport, distribution and/or allied industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Establish and maintain customer credit accounts and services	<ul style="list-style-type: none">1.1 Lines of credit and other credit facilities are established and communicated to customers1.2 Payment schedules by customers are monitored1.3 Debtors are regularly identified and listed to initiate follow-up action1.4 Debt recovery procedures are initiated and if unsuccessful approval is sought to write off bad debts
2 Maintain customer information system	<ul style="list-style-type: none">2.1 Status of credit accounts is conveyed to customers on a regular basis.2.2 Statistical returns displaying actual against anticipated performance are prepared2.3 Database information regarding products and services sales on credit is maintained2.4 Customer queries are dealt with promptly and courteously2.5 Security of database and data integrity is maintained

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Australian and international codes and regulations relevant to freight services, including the Australian Dangerous Goods Code and relevant bond, quarantine or other legislative requirements

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the maintenance of customer credit accounts and services

Focus of operation of work systems, equipment, management and site operating systems for the maintenance of customer credit accounts and services

Problems that may occur when maintaining customer credit accounts and services and appropriate action that can be taken to resolve the problems

Information on relevant aspects of credit services, including: credit services offered by the workplace, credit account systems, credit ratings and limits and credit approval policies and procedures

Documentation requirements for the maintenance of customer credit accounts and services

Instruments of payment including letters of credit, cheques, promissory notes, bank drafts, etc.

Required skills:

Communicate, negotiate and liaise effectively with others when maintaining customer credit accounts and services

Read and interpret instructions, procedures and information relevant to the maintenance of customer credit accounts and services

Interpret and follow operational instructions and prioritise work

Complete documentation related to the maintenance of customer credit accounts and services

Work collaboratively with others when maintaining customer credit accounts and services

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when maintaining customer credit accounts and services in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and use relevant computer and communication/office equipment

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Customers include:	all other rail and freight authorities private businesses government bodies members of the public as well as internal customers
Equipment used may include:	computer intercom system facsimile machine calculator telephone answering machine photocopier
Consultative processes may involve:	other employees and supervisors current and potential customers suppliers, customers and clients relevant authorities and institutions management and union representatives industrial relations and OH&S specialists
Communication in the work area may include:	phone electronic data interchange (EDI) fax email internet

	RF systems
	oral, aural or signed communications
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information/documents may include:	codes of practice and regulations concerning the operation of credit accounts and services
	customer requests and works orders
	workplace procedures and policies including accounting procedures, credit approval procedures, office organisation procedures, record keeping, credit limits, and levels of credit authority
	operations manuals, job specifications and induction documentation
	manufacturers specifications for office equipment
	documentation and forms used for credit services
	supplier and/or client instructions
	award, enterprise bargaining agreement, other industrial arrangements
	relevant Australian standards and certification requirements
	quality assurance procedures
	emergency procedures
Applicable regulations and legislation may include:	relevant codes and regulations for the provision of credit services
	privacy legislation
	conditions of credit extension policies and

related government legislation
audit and financial legislation
relevant state/territory OH&S and
environmental protection legislation
workplace relations regulations
workers compensation regulations

TLIQ107D Conduct financial transactions

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to conduct direct financial transactions as part of courier operations, including operating point of sale equipment, transacting sales, clearing register, and maintaining sales documents.

Application of the Unit

Work must be carried out in compliance with relevant codes and regulations concerned with the conduct of direct financial transactions during the collection and delivery of valuables, secured products, documents and materials.

Work is performed under general supervision. It involves the application of the basic financial transaction principles, routine procedures and regulatory requirements to conduct direct financial transactions as part of courier operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Operate point of sale equipment	<ul style="list-style-type: none">1.1 Point of sale equipment is operated and maintained in line with manufacturers specifications and workplace procedures1.2 Procedure for opening the sales equipment or register is followed1.3 Adequate change is maintained for use in transactions1.4 Sales equipment/register is closed off in accordance with workplace cash security procedures
2 Transact sale	<ul style="list-style-type: none">2.1 Amount owing is calculated and customer advised2.2 In the case of cash transactions, amount tendered is checked and the correct change is calculated and given
3 Clear register	<ul style="list-style-type: none">3.1 Sales equipment/register is cleared and cash is transferred at required times in accordance with workplace policy3.2 Cheques, credit and other non-cash transactions are handled in accordance with workplace policy and procedures3.3 Due security is maintained when handling cash in accordance with workplace security procedures
4 Maintain sales documents	<ul style="list-style-type: none">4.1 Records are completed for all transactions including 'refunds' and 'no sales'4.2 Adequate supplies of dockets, vouchers and point of sale documents are maintained4.3 Debtor transactions are processed in line with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant state and territory regulations and requirements related to the conduct of transactions within courier operations

Relevant OH&S procedures and guidelines

Risks and hazards when carrying out transactions and related precautions to control security threats

Operational procedures for the conduct of direct financial transactions with customers in the courier industry

Contingency planning relating to managing and controlling security threats

Implications of credit and financial institution codes of practice

Requirements of courier work systems, operations and relevant equipment

Typical problems that can occur when conducting financial transactions and appropriate action that can be taken to prevent or solve them

Required skills:

Communicate effectively with others when conducting financial transactions

Read and interpret instructions, procedures and information relevant to the conduct of financial transactions

Interpret and follow operational instructions and prioritise work

Complete documentation related to the conduct of financial transactions

Operate electronic communication equipment to required protocol

Work collaboratively with others when conducting financial transactions

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when conducting financial transactions in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during the conduct of financial transactions

Plan own work including predicting consequences and identifying improvements

Apply relevant agreements, codes of practice or other legislative requirements

Monitor work activities in terms of planned schedule

Modify activities depending on differing workplace contexts, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify and correctly use transaction equipment, processes and procedures

Adapt to differences in equipment in accordance with standard operating procedures

Safely use correct manual handling techniques

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for financial transactions	<p>1.1 Float, goods and services are prepared in accordance with workplace policies and procedures</p> <p>1.2 Point of sale is established to meet workplace requirements and standards</p>
2 Promote products and services	<p>2.1 Strategies to promote products and services are developed in accordance with workplace policies and procedures</p> <p>2.2 Strategies to promote products and services are implemented in accordance with workplace procedures</p>
3 Sell products or services	<p>3.1 Product knowledge is applied when answering customer inquiries</p> <p>3.2 Sales transactions are conducted in a courteous manner to the customer's satisfaction</p> <p>3.3 The price is correctly calculated and charged and the correct change and receipt is issued</p>
4 Process refunds	<p>4.1 Claim for refund is substantiated in accordance with company procedures</p> <p>4.2 Refund claim application processes are completed to ensure transaction details are recorded</p> <p>4.3 The customer refund is correctly calculated and issued in a courteous manner</p>
5 Reconcile financial transactions	<p>5.1 The value of money and vouchers issued and refunded are calculated to enable reconciliation against total sales to validate cash on hand</p> <p>5.2 Money, goods, service entitlements and reconciliation documents are secured in accordance with workplace requirements</p>

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations and codes of practice relevant when selling products and services

Relevant OH&S procedures and guidelines

Workplace procedures and policies for selling products and services

Overview of the tourism industry and franchising arrangements

Australian and international transport industry guidelines

Workplace products and services

Applicable insurance and public liability

Relevant consumer laws and trade practice requirements

Transport system fare structure and schedules

Advertising policies

Equipment and materials used when selling products and services, and procedures and precautions that should be followed in their use

Problems that may occur when selling products and services and appropriate action that can be taken to resolve the problems

Documentation and record requirements

Communication and negotiation requirements when selling products and services

Required skills:

Communicate and negotiate effectively with others when selling products and services

Network with others in travel agencies and sales outlets

Read and interpret instructions, procedures and product information relevant to the sale of products and services

Interpret and follow operational instructions and prioritise work

Complete documentation and entry of data related to the sale of products and services

Work collaboratively with others when selling products and services

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems or objections that may arise when selling products and services in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies and environments

Work systematically with required attention to detail

Carry out research activities required when selling products and services

Market and promote products and services

Create promotional layouts

Select and use relevant office and communications equipment and materials when selling products and services

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

3 Rectify discrepancies as directed	<ul style="list-style-type: none">3.1 Correct and authorised invoices are processed for payment and, where required, entered into financial records3.2 Creditor enquiries are resolved within scope of authority or referred to other personnel in accordance with workplace procedures
4 Prepare invoices for debtors	<ul style="list-style-type: none">4.1 Preparatory calculations are performed to produce accurate invoices4.2 Relevant documentation is completed to ensure accuracy of contents4.3 Invoices are distributed to nominated personnel for verification prior to despatch

- 4.4 Verified invoices are despatched within designated timelines
 - 4.5 Verified figures are entered into financial journals
 - 4.6 Documents are filed for auditing purposes and, if required, follow-up action
- 5 **Prepare and process banking documents**
 - 5.1 Financial transactions are listed on deposit forms in accordance with financial institution's requirements
 - 5.2 Pay-in documentation is balanced with all financial calculations
 - 5.3 Financial institution deposit totals are balanced with internal records
 - 5.4 Deposits are lodged with the financial institution

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant financial regulations, codes and procedures including pertinent taxation documentation requirements

Relevant OH&S and environmental procedures and regulations

Workplace procedures for the preparing and processing of financial documents

Contacts and sources of information/documentation needed for the preparation and processing of financial documents

Customer service policies and procedures

Documentation requirements of banking institutions, governments and other relevant agencies

Typical problems that can occur when preparing and processing financial documents and appropriate action that can be taken to prevent or solve them

Required skills:

Communicate effectively with others when preparing and processing financial documents

Read and interpret instructions, procedure and information relevant to the preparation and processing of financial documents

Interpret and follow operational instructions and prioritise work

Complete documentation related to the preparation and processing of financial documents

Operate electronic communication equipment to required protocol

Perform required calculations both manually and with the aid of relevant equipment and calculators

Work collaboratively with others when preparing and processing financial documents

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when preparing and processing financial documents in accordance with regulatory requirements and workplace

procedures

Implement contingency plans for unanticipated situations that may occur when preparing and processing financial documents

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail

Select and use relevant equipment when preparing and processing financial documents, including the use of an appropriate range of office equipment, computer systems and financial software packages

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

TLIR107C Monitor supplier performance

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to monitor the performance of contracted suppliers of goods/materials/services including administering the supplier contract, assessing for conformity to contracted requirements, and completing all required documentation concerning the contract.

Application of the Unit

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in monitoring supplier performance. This includes the application of workplace procedures to specified workplace operations to monitor and report on the performance of supply contractors.

A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations goals and key performance objectives by the work area and the individuals and teams within it.

Work involves responsibility for resource coordination and allocation and the provision of leadership of others either individually or in teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Administer supplier contract	<ul style="list-style-type: none">1.1 Procedures for the receipt of supplied goods/materials/services are documented and implemented within the workplace1.2 Supplied goods/material/services are assessed for conformity to contracted requirements including price, quantity, quality and delivery schedules1.3 Non-conformance of supplier with contracted requirements is accurately detailed1.4 Actions to rectify non-conformance are undertaken in accordance with enterprise procedures and within scope of authority1.5 Issues of non-conformance beyond scope of authority are referred to designated personnel in accordance with enterprise operating procedures
2 Complete documentation	<ul style="list-style-type: none">2.1 Annotations and performance assessment/evaluations are completed and appended to supplier file2.2 Action taken in regard to non-conformance of contracted requirements is documented and appended to supplier file2.3 System records are maintained and updated in accordance with enterprise information management system and, where applicable, regulatory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements

Relevant OH&S responsibilities and procedures

Workplace protocols and procedures for monitoring the performance of supply contractors

Workplace contract performance and dispute resolution policies and procedures

Workplace business policies and plans as they relate to supply contracts, including procedures for maintenance of confidentiality

Focus of operation of recording, reporting and statistical analysis systems and resources

Resource availability including the processing capacity of equipment and software systems for statistical analysis of data

Typical problems that can occur with supply contracts and related appropriate action that can be taken

Required skills:

Communicate effectively with others when monitoring supplier performance

Read and interpret instructions, procedures and information relevant to the monitoring of supplier performance

Interpret and follow operational instructions and prioritise work

Complete documentation related to the monitoring of supplier performance

Operate electronic communication equipment to required protocol

Work collaboratively with others when monitoring supplier performance

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when monitoring supplier performance in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail

Select and appropriately apply technology, information systems and procedures when monitoring supplier performance

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

The workplace environment may involve twenty-four hour operation and may include:	single and multi-site location large, medium or small companies
Services, products, risks, work systems and requirements may:	potentially vary across different sections of the workplace
Operations involve:	customer and supplier contact and coordination
The key requirement of this unit is to:	interpret the data and provide appropriate, timely information on the outcomes of data analysis to appropriate personnel
Contracts may be:	for singular or continuous supply
Document/data interchange may be:	electronic paper-based
Suppliers may include:	domestic and international contractors corporations government agencies
Contract non-conformance must be:	demonstrable
Relevant regulations/legislation may be related to:	contract disputation confidentiality goods regulatory requirements probity
Consultative processes may involve:	other employees and supervisors customers and suppliers management and union representatives industrial relations, occupational health and safety specialists other professional or technical staff, contractors and maintenance personnel
Depending on the type of organisation	company procedures

concerned and the local terminology used, workplace procedures may include:

enterprise procedures
organisational procedures
established procedures

Information/documentation may include:

relevant supply contracts and agreements
quality or enterprise work specifications and procedures
manufacturers specifications and/or suppliers handling and storage advice, workplace procedures, policies and instructions
guidelines relating to minimising risks to the environment and occupational health and safety requirements
supplier and/or client instructions
material safety data sheets
relevant agreements, codes of practice including the national standards for manual handling and the industry safety code
legislation, regulations and related documentation, including regulations related to hazardous substances, dangerous goods and environment protection
reports of accidents and incidents within regulatory requirements and enterprise procedures
workplace guidelines on appropriate workplace language and communication strategies and interpretation of relevant information
quality assurance procedures

Applicable regulations and legislation may include:

relevant regulations, standards and codes of practice
relevant Australian and state/territory OH&S legislation
equal employment legislation and related policies
environmental protection regulations
hazardous substances and dangerous goods codes
relevant Australian standards and

certification requirements

licence, patent or copyright arrangements

Unit Sector(s)

Competency Field

R - Contract Procurement

TLIR207C Source goods/services and evaluate contractors

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to source goods/materials/services and evaluate contractors including analysing supply requirements, and evaluating and selecting appropriate potential contractor(s).

Application of the Unit

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures. This includes the application of established workplace procedures to source goods and to evaluate potential contractors.

A range of opportunities may be used to develop the work area and to support the development of work systems and innovative strategies to deal with contingencies and to encourage the achievement of the organisations goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Analyse supply requirements	<ul style="list-style-type: none">1.1 Purpose and specifications of required goods/services are identified1.2 Criteria to evaluate potential or existing contractor performance is established1.3 Quantities of required goods/services are determined1.4 Frequency of ordering/requesting of goods/services is identified
2 Evaluate potential contractors	<ul style="list-style-type: none">2.1 Contractors of requested goods/materials/services are identified2.2 Comparative costings for goods/materials/services are obtained2.3 Contractors' ability to provide a consistent level of performance on repeat jobs is assessed2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures2.5 A prioritised contractor shortlist is established based on the capacity of contractors to provide a cost competitive quality service2.6 The outcomes of the contractor selection process are documented including recommendations for actioning agreements/contracts with selected contractors2.7 Information and data generated during the selection process is filed and maintained in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant regulatory and code requirements

Relevant OH&S responsibilities and procedures

Workplace policies, procedures and protocols for the sourcing and supply of goods/services, and the evaluation of potential supply contractors

Workplace grievance and disputation handling policies and procedures

Workplace business policies and plans as they relate to supply contracts, including procedures for maintenance of confidentiality

Focus of operation of recording, reporting and statistical analysis systems and resources

Resource availability including the processing capacity of equipment and software systems for statistical analysis of data

Typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

Required skills:

Communicate and negotiate effectively with others when sourcing goods and services and evaluating contractors

Read and interpret instructions, procedures and information and signs relevant to the sourcing of goods and services and the evaluation of contractors

Interpret and follow operational instructions and prioritise work

Complete documentation related to the sourcing of goods and services and the evaluation of contractors

Operate electronic communication equipment to required protocol

Work collaboratively with others when sourcing goods and services and evaluating contractors

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when sourcing goods and services and evaluating contractors in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and appropriately apply technology, information systems and procedures to workplace tasks

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

R - Contract Procurement

TLIR307C Negotiate a contract

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to contract transport and distribution services in accordance with relevant regulatory requirements and workplace procedures. This includes negotiating the contract with a contractor, finalising the contract negotiations, and completing all enterprise contract requirements.

Application of the Unit

Work must be carried out in compliance with the relevant regulations, standards, legal requirements and codes of practice.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplaces goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and who provide leadership of others individually or in teams.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Negotiate contract with contractor	<p>1.1 Requirements of the contract are clearly documented and understood by the relevant parties</p> <p>1.2 Areas of ambiguity or concern are clarified and resolved</p> <p>1.3 Negotiations are undertaken with selected contractor for the contracting of required goods/services on a 'without prejudice' basis</p> <p>1.4 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor including the determination of key performance indicators</p> <p>1.5 Alternative contractors are negotiated with if agreement is unable to be reached with preferred contractor</p> <p>1.6 Contract negotiations conform to established workplace requirements and relevant legislation</p>
2 Complete contract negotiations	<p>2.1 Contract documentation is drafted in accordance with relevant legislation, workplace procedures and negotiated conditions of service and supply</p> <p>2.2 Technical support in the drafting of contracts is accessed where required</p> <p>2.3 Contract documentation is signed and exchanged between the relevant parties</p>
3 Complete enterprise contract requirements	<p>3.1 Documentation systems are established to ensure traceability of orders and financial transactions</p> <p>3.2 Workplace systems that require interaction with contractors are identified and actioned</p>

- 3.3 Quality assurance procedures for supplied goods/services are initiated
- 3.4 Contract and ancillary documentation is completed and stored in accordance with workplace procedures and, where applicable, regulatory requirements

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations, codes of practice and legal requirements relevant to contractual arrangements

Relevant OH&S and environmental protection procedures and regulations

Workplace procedures for the negotiation of a contract

Problems that may occur during the negotiation of a contract and action that can be taken to report or resolve the problems

Risks that may exist when negotiating a contract and ways of controlling the risks involved

Focus of operation supply arrangements, resources, management and workplace operating systems

Applicable aspects of contract law

Processes for contract formulation and negotiation

Workplace business policies and plans including procedures for maintenance of confidentiality

Equipment applications, capacities, and configurations

Resource availability including the competencies of individuals in the team/group

Relevant contract documentation requirements

Required skills:

Communicate effectively with others when negotiating a contract

Read and interpret instructions, procedures, information and regulatory requirements relevant to the negotiation of a contract

Prioritise work and coordinate self and others in relation to workplace activities

Complete documentation related to the negotiation of a contract

Operate electronic communication equipment to required protocol

Provide leadership and work collaboratively with others when negotiating a contract

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may arise when negotiating a contract in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract

Plan and organise work activities

Monitor work activities in terms of planned schedule

Modify activities to cater for variations in workplace contexts and environment

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and apply appropriate technology and information systems

Adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

TLIT107C Capture records into a records keeping system

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to capture records into a records keeping system in accordance with workplace requirements including identifying records to be captured and registering the identified records.

Application of the Unit

Work must be carried out in accordance with regulations and workplace requirements relevant to a record management process.

Work is generally performed under some supervision, within a team/group environment. It involves the application of regulatory requirements and workplace procedures to capture records into a records management system in the transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify records to be captured	<ul style="list-style-type: none">1.1 Material identified and classified for registration is sorted in accordance with records keeping system procedures1.2 Activity documented by the record is identified from the elements of the record in accordance with organisational procedures1.3 Area or action officer to which the record needs to go is identified from elements of the record and staff list in accordance with organisational procedures1.4 Any material which cannot be readily identified is referred to the appropriate authority in accordance with organisational procedures
2 Register the record	<ul style="list-style-type: none">2.1 Unique identifier is selected for record in accordance with organisational procedures and records keeping system rules2.2 Record is registered into records keeping system with title, description, details of record creator, immediate location and any other control information to fulfil the system requirements in accordance with organisational procedures2.3 Access and security status are recorded in accordance with organisational procedures and records keeping system rules2.4 Disposal status of the record is recorded in accordance with records keeping system rules and organisational procedures2.5 Record is forwarded to its appropriate location, which is recorded, in accordance with the system rules and organisational procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to the capturing of records as part of a records management process

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the capturing of records into a records management system including policies on confidentiality and security of information and records

Focus of operation of work systems, equipment, management and site operating systems for the capturing of records into a records management system

Problems that may occur when capturing records and appropriate action that can be taken to resolve the problems

Operational workflow within a records management system

Types of equipment used in the capturing of records into a records management system and the precautions and procedures that should be followed in their use

Housekeeping standards and procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when capturing records

Read and interpret instructions, procedures and information relevant to the capturing of records

Interpret and follow operational instructions and prioritise work

Complete documentation related to the capturing of records

Operate electronic communication equipment to required protocol

Work collaboratively with others when capturing records

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when capturing

records in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Use a range of information technology devices including computers, radio frequency devices, electronic data exchange systems, etc.

Maintain security and confidentiality of material

Identify, select and efficiently and effectively use equipment for the capturing of records into a records management system

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Workplace environment may include movement of:	equipment goods products materials vehicular traffic
Records may include:	a simple records series (single disposal class in disposal authority) a number of simple series; form-based records (e.g. financial or personnel transactions with limited range of activities in the records) action that is either complete or includes sentencing that may be part of the capture process media that is paper-based, electronic or other format
The record capturing process is:	conducted as part of records management activities with the operator using discretion and judgement within established procedures
Operating environment may include:	operating under supervision working as a team effort working solo a sentencing process encompassing review with team procedures ensuring consistency
Hazards in the work area may include:	height and reach implications of storage facilities

dust, chemicals and vapours
stationary and moving equipment, parts and materials
noise, light, energy sources
electrical equipment
humidity, air temperature, radiant heat
pests
debris on floor
faulty racking
poorly stacked records or boxes
faulty equipment

Personal protective equipment may include:

gloves
safety headwear and footwear
safety glasses
protective clothing
high visibility clothing

OH&S requirements include:

manual handling
protective clothing
elimination/control of hazards
machine isolation
machine guarding

Communication in the work area may include:

phone
fax
email/internet
RF systems
electronic data interchange (EDI)
barcode readers
oral, aural or signed communications

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established or standard procedures

Consultative processes may involve:	workplace personnel including supervisors and managers customers/clients suppliers and contractors union representatives industrial relations and OH&S specialists other professional or technical staff
Information/documents may include:	job specifications and workplace operating procedures Australian or international standards pertaining to records management storage specifications and requirements manufacturers specifications for equipment/tools supplier and/or client instructions codes of practice including the National Standards for Manual Handling and the Industry Safety Code relevant regulations including the requirements for confidentiality and security of information award, enterprise bargaining agreement, other industrial arrangements relevant standards and certification requirements emergency procedures quality assurance standards for records management
Applicable regulations and legislation may include:	relevant codes and regulations pertaining to records management relevant Australian Standards relating to records management relevant state/territory OH&S legislation relevant state/territory environmental protection legislation privacy and confidentiality legislation and regulations

freedom of Information regulations
workplace relations regulations including
equal opportunity, equal employment
opportunity and affirmative action legislation
workers compensation regulations

TLIT207C Document a records system

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to document a records system in accordance with workplace requirements. It includes identifying records creators and their accountability requirements; locating records creators in their organisational structure; identifying the activities/function documented by the records; analysing and describing the record keeping system to identify the series; describing the links between record keeping series; describing the anomalies to the normal order of the series; and documenting the records series and its relationships over time.

Application of the Unit

Work must be carried out in accordance with regulations and workplace requirements relevant to a records management process.

Work is generally performed under some supervision, within a team/group environment. It involves the application of regulatory requirements and workplace procedures to document a records system in the transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify the records creators and their accountability requirements	<p>1.1 The creating organisation is identified as a public or private entity and likely sources of information about the creator are identified and assessed as relevant</p> <p>1.2 The record creator is identified by establishing who or what part of an organisation created the records</p> <p>1.3 Where there is more than one creator over time, all the creators are located in their organisational and chronological context</p> <p>1.4 The accountability requirements and functional responsibilities of the records creators are identified from available information sources</p> <p>1.5 Sources of information used in the research are identified as authentic and copies kept in accordance with organisational record keeping practice</p>
2 Locate the records creators in their organisational structure	<p>2.1 The nature of the jurisdiction governing the organisation is identified and described</p> <p>2.2 The location and context of the records creators are described in their organisational structure and context</p>
3 Identify the activities/function documented by the records	<p>3.1 The actions/activities which the records are generated by, or documented, are identified</p> <p>3.2 The boundaries of the activities are identified from the records and checked against a functional analysis of the organisation</p> <p>3.3 The records are matched to the functions for which the records creators are responsible</p> <p>3.4 Date-ranges for the records are determined from the records, supplemented where necessary from external sources</p> <p>3.5 Changes to the activities/function are documented</p>

- over the time period of the records
- 4 **Analyse and describe the record keeping system in which the records are created to identify the series**
 - 4.1 Elements of the record keeping system(s) are identified from the records and documented
 - 4.2 The records series is/are identified and documented in accordance with organisational standards and procedures
 - 4.3 The history and context of the records system is documented in accordance with organisational standards and procedures
 - 5 **Describe the links between record keeping series**
 - 5.1 Related record series which make up the records series system are identified from analysis of the available source information and the records themselves
 - 5.2 Predecessor and subsequent records series are described to place the series in its chronological context
 - 5.3 Anomalies to the normal order of the series are described
 - 6 **Describe the anomalies to the normal order of the series**
 - 6.1 Anomalies which have occurred over time to the systemic order of the series are identified from analysis of the available source information and the records themselves
 - 6.2 Any anomalies to the systemic order of the series are described and corrected in the way the records are maintained in accordance with organisational procedures
 - 6.3 Where they are identifiable, the causes of the anomalies which have occurred over time are described
 - 7 **Document the records series and its relationships over time**
 - 7.1 Documentation is complete, including all available information and analysis results

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to the documentation of a records system as part of a records management process

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the documentation of a records system including policies on confidentiality and security of information and records

Focus of operation of work systems, equipment, management and site operating systems for the documentation of a records system

Problems that may occur when documenting a records system and appropriate action that can be taken to resolve the problems

Operational workflow within a records management system

Types of equipment used in the documentation of a records system and the precautions and procedures that should be followed in their use

Housekeeping standards and procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when documenting a records system

Read and interpret instructions, procedures, information and signs relevant to documenting a records system

Interpret and follow operational instructions and prioritise work

Work collaboratively with others when documenting a records system

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when documenting a records system in accordance with regulatory requirements and workplace procedures

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Use a range of information technology devices including computers, radio frequency devices, electronic data exchange systems, etc.

Maintain security and confidentiality of material

Identify, select and efficiently and effectively use equipment for the documentation of a records system

Operate and adapt to differences in equipment in accordance with standard operating procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Workplace environment may include movement of:	equipment goods products materials vehicular traffic
Records may be:	paper- or electronically-based
Storage requirements may include records in various modes such as:	paper-based computer disks and reels CD-ROM microfiche film audio
Record system documentation may include but is not limited to:	the administrative and functional context over time the identity of the creators the links to other related series the record keeping system
Records may range from:	single series to multiple series in a system complexity of records creating context (multiple changes over time) complexity of system including anomalies and exception to system rules multiplicity of activities date-range and size of records series

	in various formats including paper, electronic storage media, structured; free text, graphic
Hazards in the work area may include exposure to:	height and reach implications of storage facilities dust and vapours stationary and moving equipment, parts and materials noise, light, energy sources electrical equipment humidity, air temperature, radiant heat debris on floor faulty racking poorly stacked records or boxes faulty equipment
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses protective clothing high visibility clothing
OH&S requirements include:	manual handling protective clothing elimination/control of hazards machine isolation machine guarding
Communication in the work area may include:	phone fax email/internet barcode readers electronic data interchange (EDI) RF systems oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used,	company procedures enterprise procedures

workplace procedures may include:	organisational procedures established or standard procedures
Consultative processes may involve:	workplace personnel including supervisors and managers customers/clients suppliers and contractors union representatives industrial relations and OH&S specialists other professional or technical staff
Information/documents may include:	job specifications and workplace operating procedures relevant Australian or international standards pertaining to records management storage specifications and requirements manufacturers specifications for equipment/tools supplier and/or client instructions codes of practice including the National Standards for Manual Handling and the Industry Safety Code relevant regulations including the security and confidentiality requirements award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements emergency procedures quality assurance standards for records management
Applicable regulations and legislation may include:	relevant codes and regulations pertaining to records management relevant Australian Standards relating to records management relevant state/territory OH&S legislation relevant state/territory environmental protection legislation privacy and confidentiality legislation and

regulations

freedom of information regulations

workplace relations regulations including
equal opportunity, equal employment
opportunity and affirmative action legislation

workers compensation regulations

Unit Sector(s)

Competency Field

T - Records

TLIT307C Identify and classify records to be captured

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to identify and classify records to be captured in accordance with workplace requirements including identifying records to be captured, classifying records, and registering records.

Application of the Unit

Work must be carried out in accordance with regulations and workplace requirements relevant to a records management process.

Work is generally performed under some supervision, within a team/group environment. It involves the application of regulatory requirements and workplace procedures to identify and classify records to be captured as part of record management processes in the transport, warehousing, distribution and/or storage industries.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify records to be captured	<ul style="list-style-type: none">1.1 Incoming material is categorised in accordance with organisational procedures for records which are to be captured1.2 Storage for records including specific environmental conditions and accessibility requirements are noted and actioned as required1.3 Activity documented by the record is identified from the elements of the record in accordance with organisational procedures1.4 Area or action officer to which the record needs to go is identified from elements of the record or its content and staff list, in accordance with organisational procedures1.5 Incoming material is assessed against organisational checklist to identify what material needs to be captured1.6 Material which does not need to be registered is dealt with in accordance with organisational procedures1.7 Where required by organisational procedures, the format/media of the record is modified in accordance with organisational requirements and procedures
2 Classify the record	<ul style="list-style-type: none">2.1 The identified transaction/action/activity documented by the record is matched to the organisation's classification scheme2.2 The full classification of the record is selected in accordance with the system rules and organisational procedures2.3 The classified record is linked to other records in the system in accordance with the system rules and organisational procedures2.4 Indexing points (cross-reference terms) are selected for the record in accordance with the system rules

and organisational procedures

3 Register the record

- 3.1 Unique identifier is selected for record in accordance with organisational procedures and record keeping system rules
- 3.2 Record is registered into record keeping system with title, description, details of record creator, immediate location and any other control information to fulfil the system requirements in accordance with organisational procedures
- 3.3 Access and security status are determined in accordance with organisational procedures and documented in accordance with record keeping system rules
- 3.4 Disposal status of the record is determined and recorded in accordance with the record keeping system rules and organisational procedures
- 3.5 Record is forwarded to its appropriate location, which is recorded in accordance with the system rules and organisational procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to the identification and classification of records to be captured as part of a records management process

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the identification and classification of records to be captured including policies on privacy, confidentiality and security of information and records

Focus of operation of work systems, equipment, management and site operating systems for the identification and classification of records to be captured as part of a records management process

Problems that may occur with the identification and classification of records to be captured and appropriate action that can be taken to resolve the problems

Operational workflow within a records management system

Types of equipment used in the identification and classification of records to be captured and the precautions and procedures that should be followed in their use

Housekeeping standards and procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when identifying and classifying records to be captured

Read and interpret instructions, procedures and information relevant to the identification and classification of records to be captured

Interpret and follow operational instructions and prioritise work

Complete documentation related to the identification and classification of records to be captured

Operate electronic communication equipment to required protocol

Work collaboratively with others when identifying and classifying records to be captured

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when identifying and classifying records to be captured in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail

Use a range of information technology devices including computers, radio frequency devices, electronic data exchange systems, etc.

Maintain security and confidentiality of material

Identify, select and efficiently and effectively use equipment and consumables for the identification and classification of records to be captured

Adapt to differences in equipment in accordance with standard operating procedures

Use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Workplace environment may include movement of:	equipment goods products materials vehicular traffic
Records may be:	electronic paper-based microform graphic mainframe or PC-based applications
Storage requirements may include records in various modes such as:	paper-based computer disks and reels CD-ROM microfiche film audio
The record identification and classification process is:	conducted as part of records management activities with the operator using discretion and judgement within established procedures
Access status of records may be:	confidential high security (restricted) open
Records may be registered (captured) into:	current records systems

	archival control systems
	business systems
	storage facilities systems
Storage may be:	centralised or decentralised
	off-line or off-site
	in-house or out-sourced
	commercial storage service or government repository
	CD storage
	imaging systems
	microform
	audio-visual/multimedia formats with special storage requirements (temperature controlled, dust-free, strict air-conditioning specifications)
Hazards in the work area may include:	height and reach implications of storage facilities
	dust and vapours
	stationary and moving equipment, parts and materials
	noise, light, energy sources
	electrical equipment
	humidity, air temperature, radiant heat
	debris on floor
	faulty racking
	poorly stacked records or boxes
	faulty equipment
OH&S requirements include:	manual handling
	protective clothing
	elimination/control of hazards
	machine isolation
	machine guarding
Communication in the work area may include:	phone
	fax

	email/internet
	electronic data interchange (EDI)
	RF systems
	barcode readers
	oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established or standard procedures
Consultative processes may involve:	workplace personnel including supervisors and managers
	customers/clients
	suppliers and contractors
	union representatives
	industrial relations and OH&S specialists
	other professional or technical staff
Personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	protective clothing
	high visibility clothing
Information/documents may include:	job specifications and workplace operating procedures
	relevant Australian or international standards pertaining to records management
	storage specifications and requirements
	manufacturers specifications for equipment/tools
	supplier and/or client instructions
	codes of practice including the National Standards for Manual Handling and the Industry Safety Code
	relevant regulations including the privacy and confidentiality requirements
	award, enterprise bargaining agreement,

other industrial arrangements
standards and certification requirements
emergency procedures
quality assurance standards for records
management

Applicable regulations and legislation may include:

relevant codes and regulations pertaining to records management
relevant Australian Standards relating to records management
relevant state/territory OH&S legislation
relevant state/territory environmental protection legislation
privacy and confidentiality legislation and regulations
freedom of information regulations
workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation
workers compensation regulations

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Track record	<ul style="list-style-type: none">1.1 Unique identifier of record to be located is determined from request or instructions1.2 Location of record is obtained from records system in accordance with records system rules and organisational procedures1.3 History of record location is obtained from records system in accordance with records system rules and organisational procedures1.4 Information about record is obtained from records system in accordance with records system rules and organisational procedures1.5 Information about the record is updated and amended in accordance with organisational procedures1.6 All transactions on the records system are completed within the designated timeframe
2 Conduct a file audit	<ul style="list-style-type: none">2.1 Files are physically located with action officer and in storage areas in accordance with supervisor's instructions2.2 Discrepancies between nominal and actual record locations are identified2.3 Supervisor is clearly/specifically informed/notified of any discrepancies and/or issue2.4 Unacceptable record keeping practices are observed and noted during the audit activities in accordance with organisational procedures2.5 Information about any anomalous record is updated and amended in accordance with organisational procedures2.6 Reconciliation statement is prepared and forwarded to supervisor in accordance with organisational procedures and records system procedures

- 3 **Prepare reports from records system**
 - 3.1 Reports are prepared from system in accordance with supervisor's instructions or requests
 - 3.2 Reports are prepared in accordance with workplace procedures and records system procedures
 - 3.3 All reports from the records system are prepared within the designated timeframe
- 4 **Prepare staff lists**
 - 4.1 Staff and user lists are checked and updated to accord with the current locations and designations of organisational staff members in accordance with supervisor's instructions
 - 4.2 Staff and user lists are duplicated and circulated to all those requiring copies in accordance with supervisor's instructions
- 5 **Implement disaster recovery procedures**
 - 5.1 Policies and procedures are identified for disaster recovery
 - 5.2 Recovery actions are undertaken in accordance with workplace procedures and scope of authority
 - 5.3 Appropriate personnel are informed of actions taken in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to the maintenance of control of records as part of a records management process

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the maintenance of control of records including policies on confidentiality and security of information and records

Focus of operation of work systems, equipment, management and site operating systems for the maintenance of control of records as part of a records management process

Problems that may occur with the maintenance of control of records and appropriate action that can be taken to resolve the problems

Operational workflow within a records management system

Types of equipment used in the maintenance of control of records and the precautions and procedures that should be followed in their use

Housekeeping standards and procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when maintaining control of records

Read and interpret instructions, procedures and information relevant to the maintenance of control of records

Interpret and follow operational instructions and prioritise work

Complete documentation related to the maintenance of control of records

Operate electronic communication equipment to required protocol

Work collaboratively with others when maintaining control of records

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when maintaining control of records in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail

Use a range of information technology devices including computers, radio frequency devices, electronic data exchange systems, etc.

Maintain security and confidentiality of material

Identify, select and efficiently and effectively use equipment for the maintenance of control of records

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Workplace environment may include movement of:	equipment goods products materials vehicular traffic
Records may be:	paper- or electronically-based
Storage requirements may include records in various modes such as:	paper-based computer disks and reels CD-ROM microfiche film audio
The record control process is:	conducted as part of records management activities with the operator using discretion and judgement within established procedures
Record information to be updated may come from:	supervisor user file transfer slips action officers results of file audit requests
Standard reports prepared from the record keeping system may include:	statistics resubmits for following day

	over due action reports
	daily correspondence
Those requiring copies of staff/user lists may include:	managers of record keeping areas
	those undertaking classification and capture
OH&S requirements include:	manual handling
	protective clothing
	elimination/control of hazards
Communication in the work area may include:	phone
	fax
	email/internet
	electronic data interchange (EDI)
	RF systems
	barcode readers

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify range of records required	<ul style="list-style-type: none">1.1 The specific information required by the user is identified from interpretation of the user's request and clarified where initial request is unclear1.2 Range of records likely to contain the information required by the user is identified from analysis of the request1.3 The availability of the required records is accessed using appropriate finding aids and record keeping system1.4 Where the information required exceeds the staff member's ability to meet the request, the user is referred to an appropriate colleague or external organisation
2 Gather required records	<ul style="list-style-type: none">2.1 Range of records likely to contain the information required by the user is obtained and analysed for the required information content2.2 Information is extracted, where required, and information is prepared in line with the request2.3 Specific records satisfying the requirements of the user are gathered together in accordance with organisational procedures2.4 Records are tracked to record change in location and use by the requesting user in accordance with the record keeping system rules and organisational procedures2.5 Any obstacles to obtaining specific records within the specified time are explained to the user and a revised timeline agreed
3 Interpret and administer access rules and procedures	<ul style="list-style-type: none">3.1 Person requesting the record is identified and access rules and procedures category are confirmed in accordance with organisational procedures3.2 Access restriction rules and guidelines are applied to the records requested and to match the access

category of the user

- 3.3 Where access restriction rules and guidelines prevent access to the user, the decision is recorded and the user is informed of their rights to a review of the decision
 - 3.4 Where partial restriction to access is determined, the portions of the records or information which must be restricted are identified and documented, together with the basis of the restriction
- 4 Provide the information in response to users' requests**
- 4.1 Where appropriate, specific records, or portions thereof, information and/or records are protected to prevent access, in accordance with access rules and organisational procedures
 - 4.2 Requested information is prepared for the user in an appropriate format and in accordance with the initial request and organisational procedures
 - 4.3 All access rules, record preservation requirements, specified timelines and occupational health and safety guidelines are adhered to
 - 4.4 The records retrieved and used to provide information are documented according to the system rules and organisational procedures

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Regulations relevant to the provision of information from or about records as part of a records management process

Relevant OH&S and environmental protection procedures and guidelines

Workplace procedures and policies for the provision of information from or about records including policies on confidentiality and security of information and records

Focus of operation of work systems, equipment, management and site operating systems for the provision of information from or about records as part of a records management process

Problems that may occur when providing information from or about records and appropriate action that can be taken to resolve the problems

Operational workflow within a records management system

Types of equipment used in the provision of information from or about records and the precautions and procedures that should be followed in their use

Housekeeping standards and procedures required in the workplace

Site layout and obstacles

Required skills:

Communicate effectively with others when providing information from or about records

Read and interpret instructions and procedures relevant to the provision of information from or about records

Interpret and follow operational instructions and prioritise work

Complete documentation related to the provision of information from or about records

Operate electronic communication equipment to required protocol

Work collaboratively with others when providing information from or about records

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any identified problems that may occur when providing information from or about records in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Plan own work including predicting consequences and identifying improvements

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Identify, select and efficiently and effectively use equipment for the provision of information from or about records

Use a range of information technology devices including computers, radio frequency devices, electronic data exchange systems, etc.

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Maintain security and confidentiality of material

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be conducted:	in a range of work environments by day or night
Customers may be:	internal or external
Workplaces may comprise:	large, medium or small worksites
Workplace environment may include movement of:	equipment goods products materials vehicular traffic
Records may be:	paper- or electronically-based
Storage requirements may include records in various modes such as:	paper-based computer disks and reels CD-ROM microfiche film audio
The information service is conducted as part of:	records management activities with the operator using discretion and judgement within established procedures. Boundaries of requests under freedom of information legislation and precedents may need to be considered. Interpretation of access clearances and privacy restrictions for records within particular levels of access and associated security releases may be required
Appropriate format for provision of information may include:	original copy of original hard or soft copy of original digital

	permission to view information/record
Hazards in the work area may include:	height and reach implications of storage facilities dust and vapours stationary and moving equipment, parts and materials noise, light, energy sources electrical equipment humidity, air temperature, radiant heat debris on floor faulty racking poorly stacked records or boxes faulty equipment
Personal protective equipment may include:	gloves safety headwear and footwear safety glasses protective clothing high visibility clothing
OH&S requirements include:	manual handling protective clothing elimination/control of hazards
Communication in the work area may include:	phone fax email/internet electronic data interchange (EDI) RF systems barcode readers oral, aural or signed communications
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures enterprise procedures organisational procedures established or standard procedures

Consultative processes may involve:	workplace personnel including supervisors and managers customers/clients suppliers and contractors union representatives industrial relations and OH&S specialists other professional or technical staff
Information/documents may include:	job specifications and workplace operating procedures relevant Australian or international standards pertaining to records management storage specifications and requirements manufacturers specifications for equipment/tools supplier and/or client instructions codes of practice including the National Standards for Manual Handling and the Industry Safety Code relevant regulations including the privacy, confidentiality, access and security requirements award, enterprise bargaining agreement, other industrial arrangements standards and certification requirements emergency procedures quality assurance standards for records management
Applicable regulations and legislation may include:	relevant codes and regulations pertaining to records management relevant Australian Standards relating to records management relevant state/territory OH&S legislation relevant state/territory environmental protection legislation privacy and confidentiality legislation and regulations freedom of information regulations

workplace relations regulations including
equal opportunity, equal employment
opportunity and affirmative action legislation
workers compensation regulations

Unit Sector(s)

Competency Field

T - Records

TLIU107B Implement and monitor environmental protection policies and procedures

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to implement and monitor environmental protection policies and procedures including accessing relevant information concerning environmental protection regulations and procedures, and implementing and monitoring procedures concerning environmental hazards, related control procedures, environmental training arrangements, and required records and documentation.

Application of the Unit

Persons achieving competence in this unit will need to fulfil the applicable legislated rail safety requirements including acts and regulations from each state and territory together with any nationally approved compliance codes and/or guidelines.

Work is performed under some supervision generally within a team environment. It involves the application of the environmental protection principles and regulations to implement and monitor environmental protection policies and procedures during the course of workplace operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Access information concerning environmental protection regulations and procedures	<p>1.1 Relevant provisions of environmental legislation and codes of practice are accurately followed</p> <p>1.2 Information on workplace environmental policies, procedures and programs is stored in a readily accessible location and manner</p> <p>1.3 Information is accurately and clearly explained to the work team and updated according to change in workplace policy</p> <p>1.4 Information about the outcomes of environmental risk identification and control procedures is provided to the appropriate personnel</p>
2 Implement and monitor procedures concerning environmental hazards	<p>2.1 Existing and potential environmental hazards in the workplace are identified and reported</p> <p>2.2 Identified hazards are assessed in relation to relevant environmental protection policies</p> <p>2.3 Workplace procedures for dealing with hazardous events are implemented wherever necessary to ensure that prompt control action is taken</p> <p>2.4 Hazardous events are investigated to identify causes, and control measures are implemented to prevent recurrence and minimise risks of such events</p>
3 Implement and monitor environmental control procedures	<p>3.1 Existing environmental protection measures are implemented, monitored and reviewed</p> <p>3.2 Work procedures to protect environment are implemented and adherence to them by the work group is monitored</p>

- 3.3 Required improvements to existing control measures are identified, including required resources for implementation, and reported to appropriate personnel

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Applicable legislated rail safety requirements including acts and regulations from each state and territory together with any nationally approved compliance codes and/or guidelines

Workplace procedures and guidelines for implementing and monitoring environmental protection

Environmental risks associated with workplace operations and related precautions to control the risk

Environmental protection standards required in the workplace

Workplace environmental hazards and related hazard control measures

Workplace reporting and recording processes and procedures

Hierarchy of control principles for environmental risks (including preferred models for risk elimination, engineering controls, administrative controls and specific environmental protection techniques)

Equipment and resources required when implementing and monitoring environmental protection and instructions for their use

Problems that can occur when implementing and monitoring environmental protection procedures

Significance of EEO principles and practice for environmental management

Literacy levels and communication skills of those supervised

Relevant management systems and procedures for environmental management

Organisational structure and site layout

Required skills:

Communicate effectively with others both orally and in writing when implementing and monitoring environmental protection procedures

Counsel, advise and inform others on environmental protection matters

Read and interpret instructions, procedures, information and signs relevant to the

implementation and monitoring of environmental protection procedures

Interpret and follow operational instructions and prioritise work

Complete documentation related to the implementation and monitoring of environmental protection procedures

Operate electronic communication equipment to required protocol

Provide leadership and work collaboratively with others when implementing and monitoring environmental protection procedures

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Recognise potential environmental risks and ways of minimising them

Promptly report and/or rectify any identified problems that may occur when implementing and monitoring environmental protection procedures in accordance with regulatory requirements and workplace procedures

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Carry out training needs analysis relevant to workplace requirements

Identify and correctly use equipment and vehicles in accordance with environmental protection regulations and guidelines

Operate and adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Implementation and monitoring of environmental protection policies and procedures may occur: in a range of work environments by day or night

Customers may be: internal or external

Workplaces may comprise: large, medium or small worksites in the transport, warehousing, distribution and/or storage industries

Workplace procedures for dealing with hazardous events may include:

- inspection and housekeeping
- training and assessment
- maintenance including plant and equipment
- purchasing
- evacuation
- hazardous substance containment
- operational instruction
- environmental information including incident and management practices
- consultation
- specific hazardous materials policies and procedures
- counselling and disciplinary processes
- risk assessment and control
- first aid
- internal and external auditing

Environment may include:

- indoor
- outdoor
- marine
- atmospheric

Environmental protection requirements may be obtained from:

- environmental hazard reports
- risk control procedures

	workplace personnel and management
	relevant legislation
Environmental hazards may include:	exhaust fumes
	oils and lubricants
	gas
	smoke
	chemicals and detergents
	rubbish
	noise
	wastes
Servicing requirements may be obtained from:	customer requests
	works orders
	freight requirements
	workplace personnel
Depending on workplace context, personal protective equipment may include:	gloves
	safety headwear and footwear
	safety glasses
	two-way radios
	high visibility clothing
Personnel in the work area may include:	workplace personnel including supervisors and management
	site visitors
	contractors
	official representatives
Support services can include:	loading/unloading requirements
	load security/protection
	receipt personnel
	special vehicle access/parking
Promotional activities may include:	public relations activities
	press releases
	open days
	in-house newsletters

	publications
	advertising programs
	seminars
	promotional briefings
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Information/documents may include:	applicable legislated rail safety requirements including acts and regulations from each state and territory together with any nationally approved compliance codes and/or guidelines
	OH&S and environmental protection regulations
	workplace housekeeping procedures and policies
	codes of practice for environmental protection
	material safety data sheets
	policies and procedures for entry and work in confined spaces
	manufacturers instructions concerning the use and servicing of equipment
	supplier and/or client instructions
	emergency procedures
	regulations and policies concerning noise, waste disposal/reprocessing, handling of dangerous goods/hazardous substances and other environmental protection issues
	goods identification numbers and codes
	manifests, bar codes, goods and container identification
	relevant legislation, regulations and related documentation
	award, enterprise bargaining agreement, other industrial arrangements

Applicable regulations and legislation may include:

standards and certification requirements

quality assurance procedures

applicable legislated rail safety requirements including acts and regulations from each state and territory together with any nationally approved compliance codes and/or guidelines

relevant state/territory OH&S legislation

ADG Code

workplace relations regulations including equal opportunity, equal employment opportunity and affirmative action legislation

workers compensation regulations

Unit Sector(s)

Not applicable.

Competency Field

U - Environment

TLIU607B Conduct environmental audits

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to conduct an environmental audit in accordance with relevant environmental protection regulatory requirements and workplace procedures. This includes preparing for an environmental audit, scheduling an internal audit, conducting an environmental audit, documenting the findings, and reporting on the environmental audit results.

Application of the Unit

Work must be carried out in compliance with the relevant Australian regulations, standards and codes of practice.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within workplace policy and procedures.

A range of opportunities may be used to develop the work area and to support the development of work systems, innovative strategies to deal with contingencies and to encourage the achievement of the workplaces goals and key performance objectives by the work area and the individuals and teams within it.

The unit generally applies to those with responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Prepare for environmental audit	<ul style="list-style-type: none">1.1 Relevant legislation, authority and enterprise requirements pertinent to the operations of the workplace are identified and followed1.2 Practices and facilities required to be audited are identified and implications of non-conformance established1.3 Technical and/or calibration requirements for audits are noted and, where necessary, appropriate support personnel are identified1.4 Work schedules are investigated to identify appropriate schedule for audit
2 Schedule internal audit	<ul style="list-style-type: none">2.1 Audit timings are planned to ensure that relevant procedures are conducted within workplace agreed time intervals and timeframes2.2 Audit frequency is adjusted to ensure minimal disruption to the workplace2.3 Contact is made with appropriate personnel and appointments for the audit are made
3 Conduct environmental audit and document findings	<ul style="list-style-type: none">3.1 Operational procedures and assessment methods for the environmental audit are confirmed with affected personnel3.2 Observations and interviews are conducted with (any) required approved third party3.3 Documentation of observations and interview responses is completed

- 4 **Report environmental audit results**
 - 4.1 Outcomes of the audit process are compared to workplace procedures
 - 4.2 Audit results are discussed with relevant personnel
 - 4.3 Reports of non-compliance are documented including options for environmental system improvements
 - 4.4 Reports are forwarded to appropriate personnel for action

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant OH&S and environmental protection procedures and regulations, including the ADG Code where applicable

Workplace processes for the conduct of an environmental audit

Problems that may occur during the conduct of an environmental audit and action that can be taken to report or resolve the problems

Hazards that may exist in the conduct of an environmental audit and ways of controlling the risks involved

Focus of operation of workplace in relation to potential environmental risks and control/prevention measures

Environmental risk management and control procedures

Audit procedures and compliance implementation strategies

Regulatory and guidance material on environmental safety

Workplace business policies and plans including procedures for identification of non-compliance and best practice

Equipment applications, capacities, configurations, safety hazards and control

Application of relevant Australian Standards and associated certification requirements

Resource availability including the competencies of individuals in the team or group

Relevant workplace documentation procedures

Required skills:

Communicate effectively with others when conducting an environmental audit

Read and interpret instructions, technical data, regulatory requirements and workplace policies and procedures relevant to the conduct of an environmental audit

Interpret and follow operational instructions and prioritise work

Complete documentation related to the conduct of an environmental audit

Operate electronic communication equipment to required protocol

Provide leadership and work collaboratively with others when conducting an environmental audit

Adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others

Promptly report and/or rectify any problems identified when conducting an environmental audit in accordance with regulatory requirements and workplace procedures

Apply precautions and required action to minimise, control or eliminate hazards that may exist during work activities

Plan and organise environmental audit activities

Monitor work activities in terms of planned schedule

Modify activities to cater for variations in workplace contexts and environment

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Select and apply appropriate technology, information systems and procedures

Adapt to differences in equipment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Work may be undertaken:	in various work environments in the warehousing, storage, transport and distribution industries
Customers may be:	internal or external
Operations may be conducted:	by day or night in all weather conditions
The workplace environment may involve:	twenty-four hour operation single and multi-site location large, medium and small workplaces
Services, products, risks, work systems and requirements potentially vary:	in different sectors of the warehousing, storage, transport and distribution industries
Environmental audits may be conducted:	as part of enterprise or site specific procedures
Audits may be conducted:	alone or in conjunction with other staff from the enterprise or external contractors
Audits may involve:	movement of processed materials, dangerous goods, hazardous substances, waste disposal, run-offs, etc.
Consultative processes may involve:	employees, supervisors and managers customers and suppliers relevant environmental authorities and local government departments representatives of other enterprises and organisations related to the international transfer of freight industrial relations and OH&S specialists other professional, maintenance or technical staff
Communications systems may involve:	fixed or mobile telephone radio

	fax
	email
	electronic data transfer of information
	mail, forms and internal memos
Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:	company procedures
	enterprise procedures
	organisational procedures
	established procedures
Documentation/records may include:	environmental codes of practice and regulations relevant to workplace activities
	regulations and codes of practice for the handling, storage and transport of dangerous goods and hazardous substances, including the ADG Code where applicable
	workplace operating procedures, instructions and policies relevant to environmental protection
	operations manuals, job specifications and procedures and induction documentation
	local government environmental protection policies and guidelines
	supplier and/or client instructions
	relevant Australian Standards, criteria and certification requirements
	manufacturers specifications and/or suppliers handling and storage advice
	material safety data sheets
	communications technology equipment and oral, aural or signed communications
	quality assurance standards and procedures
	emergency procedures
	relevant competency standards and training materials
	QA plans, data and document control
	conditions of service, legislation and industrial agreements including workplace agreements and awards

Applicable procedures and codes may include:

relevant state/territory and local government environmental protection legislation and regulations

Australian and international regulations and codes of practice for the handling and transfer of dangerous goods and hazardous substances

relevant Australian and international standards and certification requirements

relevant state/territory OH&S legislation

relevant licence or permit requirements and associated regulations

relevant workplace relations legislation

relevant workers compensation legislation

equal opportunity, equal employment opportunity and affirmative action legislation

Unit Sector(s)

Not applicable.

Competency Field

U - Environment

TLIU707B Care for the environment

Modification History

Not applicable.

Unit Descriptor

This unit involves the skills and knowledge required to care for the environment when operating and maintaining equipment and/or vehicles including minimising the effects of pollution during operations, minimising the effects of pollution during maintenance, and transporting and handling environmentally hazardous materials safely and in accordance with environmental protection regulations and guidelines.

Application of the Unit

Work must be carried out in accordance with relevant state/territory environmental protection regulations and workplace procedures.

Work is performed under some supervision generally within a team environment. It involves the application of the basic environmental protection principles and regulations to the operation and maintenance of equipment and vehicles during the course of workplace operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this competency is packaged will assist in identifying employability skill requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Minimise the effects of pollution during operations	<p>1.1 Precautions are taken to ensure spilt fuel, lubricants and chemicals do not pollute the environment</p> <p>1.2 Equipment and vehicles are operated efficiently to minimise pollution of the air environment through excessive exhaust emissions</p> <p>1.3 Unnecessary running of engines/equipment is avoided to minimise pollution of the air environment</p> <p>1.4 Worksites are kept clean and tidy during work operations and the disposal of waste is in accordance with environmental regulations and workplace procedures</p>
2 Minimise the effects of pollution during maintenance	<p>2.1 Routine checks are conducted or organised to ensure emission control equipment on equipment/vehicle is operating correctly</p> <p>2.2 Suitable precautions are taken during the cleaning of equipment/vehicles not to pollute the environment</p> <p>2.3 Care is taken during services and maintenance operations to implement housekeeping procedures and environmental protection precautions and procedures</p> <p>2.4 Rubbish is deposited in designated rubbish disposal bins</p>
3 Transport/handle environmentally hazardous materials safely	<p>3.1 Material safety data sheets are completed in accordance with government regulations and workplace requirements</p> <p>3.2 Waste and effluent is disposed of in accordance with government regulations and government policy</p> <p>3.3 Environmentally hazardous materials are handled and moved in accordance with relevant regulations, workplace procedures and guidelines aimed at</p>

minimising the risk of environmental pollution

- 3.4 Routes for vehicles carrying hazardous and noxious loads are planned to minimise the risk to the environment in the event of accident or spillage

Required Skills and Knowledge

REQUIRED KNOWLEDGE AND SKILLS

This describes the essential knowledge and skills and their level required for this unit.

Required knowledge:

Relevant environmental protection regulations

Workplace procedures and guidelines for the care of the environment during workplace operations

Environmental risks when carrying out workplace operations and related precautions to control the risk

Environmental protection standards required in the workplace

Site layout including location of rubbish disposal bins

Application of relevant environmental protection regulations and requirements

Service and maintenance procedures and checklists for equipment and vehicles

Procedures and processes for waste and effluent regulation where applicable

Environmental hazards and toxicity of materials typically carried in loads

Emission control checking requirements for vehicles and relevant equipment

Typical problems that can occur when caring for the environment and appropriate action that can be taken to prevent or solve them

Required skills:

Communicate effectively with others when caring for the environment

Read and interpret instructions, procedures and information relevant to the care of the environment

Interpret and follow operational instructions and prioritise work

Complete documentation related to the care of the environment

Operate electronic communication equipment to required protocol

Work collaboratively with others when caring for the environment

Adapt appropriately to cultural differences in the workplace, including modes of behaviour

and interactions with others

Promptly report and/or rectify any identified problems that may arise when caring for the environment in accordance with regulatory requirements and workplace procedures

Implement contingency plans for unanticipated situations that may occur when caring for the environment

Monitor work activities in terms of planned schedule

Modify activities depending on differing operational contingencies, risk situations and environments

Work systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Recognise potential pollution risks and ways of minimising them

Identify and correctly use equipment and vehicles in accordance with environmental protection regulations and guidelines

Follow routine service and maintenance procedures for equipment and vehicles

Adapt to differences in equipment and operating environment in accordance with standard operating procedures

Select and use required personal protective equipment conforming to industry and OH&S standards

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required knowledge and skills, the range statement and the assessment guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria of this unit and include demonstration of applying:

the underpinning knowledge and skills

relevant legislation and workplace procedures

other relevant aspects of the range statement

Context of and specific resources for assessment

Performance is demonstrated consistently over a period of time and in a suitable range of contexts

Resources for assessment include:

a range of relevant exercises, case studies and other simulated practical and knowledge assessment, and/or

access to an appropriate range of relevant operational situations in the workplace

In both real and simulated environments, access is required to:

relevant and appropriate materials and/or equipment, and/or

applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

Method of assessment

Assessment of this unit must be undertaken by a registered training organisation

As a minimum, assessment of knowledge must be conducted through appropriate written/oral tests

Practical assessment must occur:

through appropriately simulated activities at the registered training organisation, and/or

in an appropriate range of situations in the workplace

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance.

Care for the environment may be conducted: in a range of work environments by day or night:

Customers may be: internal or external

Workplaces may comprise: large, medium or small worksites in the transport, warehousing, distribution and/or storage industries

Environment may include: indoor
outdoor
marine
atmospheric

Pollutants may include: exhaust fumes
oils and lubricants
gas
smoke
chemicals and detergents
rubbish
noise
wastes

Equipment/vehicles may include: motor vehicles, trucks and motorcycles
fixed equipment emitting exhaust fumes/gases
rail locomotives and motive power units
marine vessels
forklifts, cranes and load shifting equipment

Personnel in the work area may include: workplace personnel
site visitors
contractors
official representatives

Depending on the type of organisation concerned and the local terminology used, workplace procedures may include:

company procedures
enterprise procedures
organisational procedures
established procedures

Depending on workplace context, personal protective equipment may include:

gloves
safety headwear and footwear
safety glasses
two-way radios
high visibility clothing

Information/documents may include:

OH&S and environmental protection regulations
workplace housekeeping procedures and policies
codes of practice for environmental protection
material safety data sheets
policies and procedures for entry and work in confined spaces
manufacturers instructions concerning the use and servicing of equipment
supplier and/or client instructions
emergency procedures
regulations and policies concerning noise, waste disposal/reprocessing, handling of dangerous goods/hazardous substances and other environmental protection issues
goods identification numbers and codes
manifests, bar codes, goods and container identification
relevant legislation, regulations and related documentation
award, enterprise bargaining agreement, other industrial arrangements
standards and certification requirements
quality assurance procedures

Applicable regulations and legislation may

relevant state/territory environmental

include:

protection legislation
