Assessment Requirements for CPCCSH3010 Prepare shop floors for new coverings

Assessment Requirements for CPCCSH3010 Prepare shop floors for new coverings

Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

New unit of competency.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must remove four of the floor coverings listed in the range of conditions and:

- clear and clean the exposed surface
- test and apply primers and cementitious compounds to patch and smooth the surface ready for the application of new shop floor coverings.

A minimum of 10 square metres of floor covering is to be cleared, cleaned and primed for each of the above four floor coverings selected.

In doing the above work, the person must:

- interpret and confirm job requirements
- apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- follow work instructions, operating procedures and inspection processes to:
    - minimise the risk of injury to self or others
    - prevent damage to goods, equipment and products
    - maintain required production output and product quality
- complete measurements, calculate area, and estimate material requirements
- interpret scales and symbols on simple floor plans
- correctly use equipment, processes and procedures to remove floor coverings
- follow safety procedures relevant to preparing floors for new coverings
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- state or territory work health and safety (WHS) legislation, regulations, standards and codes of practice relevant to removing floor coverings and floor smoothing techniques, including:
    - AS/NZS 2455.1 Textile floor coverings – Installation practice – General
    - AS 1884 Floor coverings – Resilient sheet and tiles – Installation practices
- organisational and site standards, requirements, policies and procedures for removing existing floor coverings and using floor smoothing techniques
- environmental protection requirements relevant to preparing floors for new coverings
- established communication channels and protocols to follow during above work
- relevant problem identification and resolution to apply during above work
- types of tools and equipment and procedures for their safe use, operation and maintenance
- characteristics of materials used for floors, and products used for preparing floor surfaces
- set-up and operation of equipment used when preparing floors for new coverings
- procedures for recording, reporting and maintaining workplace records and information
- characteristics of, and techniques for fixing, floor coverings
- workplace safety system requirements relating to removing floor coverings and applying floor smoothing compounds.

Assessment Conditions

Suitable assessment of performance requires:

- equipment and tools:
    - as listed in the range of conditions
- physical conditions:
    - retail space with floor area to be prepared for new floor covering
- relationships with team members and supervisor:
    - work may be completed as part of a team, under supervision
- relationship with client:
    - consultation with the client is required
- specifications:
    - AS/NZS 2455.1 Textile floor coverings – Installation practice – General
    - AS 1884 Floor coverings – Resilient sheet and tiles – Installation practices
    - as listed in job requirements in the range of conditions
    - manufacturer specifications
    - job safety analyses (JSA)
    - safe work method statements (SWMS)
    - safety data sheets (SDS)
- timeframe:
    - according to job requirements.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.
