CPP30519 Certificate III in Technical Security

Release 1

CPP30519 Certificate III in Technical Security

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is not equivalent to CPP30507 Certificate III in Technical Security. Changed packaging arrangements. New entry requirements.

Qualification Description

This is a qualification for experienced security technicians who sell, install, repair, service and maintain security equipment and systems that protect people and property, and prevent or minimise loss and damage.

Technicians at this level operate independently and use discretion and judgement to plan and implement client requirements for installation, repair, service and maintenance of security equipment and systems. Occupational titles may include:

- access security technician
- electronic security technician
- security equipment installer
- service technician.

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

All cabling work, including telephone, data, fire and security alarm systems cabling, that connects with the telecommunications network must be performed by a registered cabler or under the direct supervision of a registered cabler as required by the Australian Communications Media Authority (ACMA) cabling provider rules. For further information on cabling registration requirements, check with ACMA.

Entry Requirements

- CPP20307 Certificate II in Technical Security, or
- CPP20319 Certificate II in Technical Security
-

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency
 - 11 core units

- 3 elective units.

An elective unit may be selected from any Training Package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

Core Units

CPPCMN3006	Provide effective client service
CPPSEC3035	Recommend technical security requirements to meet client needs
CPPSEC3036	Program and configure security equipment and systems
CPPSEC3037	Test installed security equipment and systems
CPPSEC3038	Commission and decommission security equipment and systems
CPPSEC3039	Diagnose faults in electronic security equipment and systems
CPPSEC3040	Coordinate installation of security equipment and systems
CPPSEC3041	Conduct routine service of security equipment and systems
CPPSEC3053	Implement measures to secure IP networked security equipment and systems
HLTWHS003	Maintain work health and safety
ICTTEN416	Install, configure and test an internet protocol network

Elective Units

BSBFLM306	Provide workplace information and resourcing plans
BSBFLM312	Contribute to team effectiveness
CPPSEC3024	Install advanced technology security equipment and systems
CPPSEC3025	Diagnose faults in advanced technology security equipment and systems
CPPSEC3042	Diagnose faults in video surveillance systems and equipment
CPPSEC3043	Establish and test electronic monitoring parameters for security equipment and systems

CPPSEC3044	Conduct routine service of electronic locks and locking systems
CPPSEC3045	Assess security equipment and systems to specify required modifications
CPPSEC3046	Develop security system configurations and specifications for client sites
CPPSEC3047	Provide estimate and quote on security system installations
CPPSEC3106	Gather, organise and present security information and documentation
