- CPPSEC5005 Implement security risk management plans.

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

New qualification

Qualification Description

This qualification is for security risk analysts who apply technical security and operations expertise in a risk management environment. Security risk analysts understand the current threat environment and assess risk and advise clients on strategies to ensure the protection of electronic security systems and people and property in crowded places, as defined by *Australia's Strategy for Protecting Crowded Places from Terrorism (2017)*.

Occupational titles may include:

- event security manager
- security risk adviser
- security risk analyst.

This qualification provides occupational specialisations in electronic security and crowded places, and a pathway to further learning and work in security risk management.

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 12 units of competency
 - 5 core units
 - 7 elective units.

Electives are to be chosen as follows:

- all 3 units within Group A or all 3 units within Group B
- up to 4 units within Groups A, B or C not already selected
- up to 2 units may be selected from Group D
- an elective unit may be selected from any Training Package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

Core Units

CPPSEC4003	Assess and advise on client security needs
CPPSEC4006	Conduct security risk assessment of client operations
CPPSEC4007	Identify security threats and assess impact on client operations
