Perform hazardous action sequences
involving natural elements**

Release: 1

Assessment Requirements for CUAHAZ403 Perform hazardous action sequences involving natural elements

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- review production documentation and consult with relevant personnel in preparation for hazardous action sequences using natural elements
- take visual continuity into account when preparing for sequences
- confirm logistical arrangements and communication protocols for shoots
- check all aspects of locations and equipment for compliance with licensing, safety regulations and industry codes of practice prior to executing sequences
- check camera positions and note visual cues for positioning performers during hazardous action sequences
- abort sequences if testing reveals unacceptable risk levels
- perform background hazardous action sequences using natural elements safely, in line with production requirements
- follow correct procedures for responding to emergency situations in relation to hazardous action sequences using natural elements
- assist with clearing locations at the conclusion of shoots
- contribute to post-sequence evaluations
- use effective verbal, non-verbal and written communication skills.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline roles and responsibilities of film crew and specialist production and location management personnel involved in the execution of hazardous action sequences in screen productions
- identify typical problems of executing hazardous action sequences using natural elements and briefly describe solutions

- outline access procedures and protocols for engaging with emergency and medical services
- describe common hazards related to the use of natural elements in screen productions, and their potential for causing harm
- explain safety issues in relation to the use and position of camera, sound and lighting equipment during hazardous action sequences using natural elements
- outline key aspects of screen production processes in relation to hazardous action sequences using natural elements
- outline safety practices required to remove, isolate or minimise hazards on set
- describe industry safety procedures in relation to transporting and storing production materials
- describe aspects of the Media, Entertainment and Arts Alliance (MEAA) *National Stunt Grading Procedure* that apply to executing hazardous action sequences using natural elements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- an environment that reproduces all elements of a production requiring hazardous action sequences using natural elements
- regulatory information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.
