DEFEXO084 Apply knowledge of explosive chemistry

Release: 2

DEFEXO084 Apply knowledge of explosive chemistry

Modification History

Release 2. Modifications made to Foundation Skills and Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFEO001 Apply knowledge of explosive ordnance chemistry.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 2.1 removed

Application

This unit describes the skills required to analyse and apply knowledge of the chemistry of explosives. The application of the knowledge of explosive chemistry is specific to the work being undertaken by individuals involved within a variety of applications including manufacturing, policy development, technical manual development, platform integration, configuration, staff processes, transport, disposal, trials and inter-operability.

This unit applies to those required to analyse the chemistry of explosives in the context of their work environment and in relation to their workplace functions.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would make high level, fully independent judgements, applying functional knowledge of the chemistry of explosives, analysing complex data and producing specific documents detailing the outcomes of highly specialised technical functions. They would perform sophisticated tasks in a broad range of specialised contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Explosive Ordnance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Access and analyse relevant explosive chemical information

2 Implement recommendations specific to explosives

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Identify the purpose of the required analysis, including the relevance of the chemistry of explosives
- 1.2 Identify and obtain explosives safety, legislative and statutory requirements
- 1.3 Analyse the information obtained to determine the relevance within its application and in the context of the organisation
- 1.4 Formulate outcomes of the analysis and provide recommendations
- 2.1 Establish work being undertaken and apply the relevant recommendations
- 2.2 Assess, review and record effectiveness of the recommendations
- 2.3 Adjust recommendations if required and document for future application

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit supersedes and is equivalent to DEFEO001 Apply knowledge of explosive ordnance chemistry.
