## Application

This unit describes the skills required to conduct trials in an explosive research environment. Explosive trials are normally conducted to select new weapons systems or explosives and are a common component of explosive research. They involve a number of personnel both in their planning and implementation.

This unit applies to those required to prepare and conduct trials in the explosive research environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team with supervising responsibilities, using discretion and judgement and taking responsibility for the quality of their outputs. They would conduct complex tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.
