

DEFMIL088 Coordinate area and route search, and clearance of explosive ordnance

Release: 1

DEFMIL088 Coordinate area and route search, and clearance of explosive ordnance

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.
	This unit supersedes and is equivalent to DEFCA327 Coordinate area and route search, and clearance of explosive ordnance.
	 Unit code updated Content and formatting updated to comply with the new standards All PC transitioned from passive to active voice PC 1.9 removed

Application

This unit describes the skills required to plan and direct obstacle. Obstacle reduction is the creation of a safe path through an obstacle which may be widened to the boundaries/extremities for the complete removal of the obstacle, and can be accomplished by the use of explosive or non-explosive methods, including the tasking of purpose designed clearance vehicles and plant equipment.

This unit applies to combat engineer personnel who are required to plan and direct high risk search tasks as part of an obstacle reduction to provide an unhindered and safe path in a deployed operational environment.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would lead a team under indirect supervision. They use discretion and judgement, and take responsibility for the quality of their outputs, while performing complex tasks in a broad range of highly unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan area and route clearance	1.1 Interpret and confirm requirements with higher authority as necessary.1.2 Identify resource availability and serviceability and determine
	constraints.
	1.3 Conduct reconnaissance.
	1.4 Develop clearance plan in accordance with design, resources, risks and environmental considerations.
	1.5 Refer problems that cannot be resolved locally to higher authority.
	1.6 Confirm and monitor competence of team members.
	1.7 Brief clearance team.
	1.8 Liaise with outside agencies as required.
2. Supervise area and route	2.1 Direct and supervise clearance team in accordance with the clearance plan.
clearance	2.2 Recognise and respond to unexpected situations that require a quick and decisive response.
	2.3 Check safety signage, lane marking and fencing.
	2.4 Record information throughout operation and report to outside agencies as necessary.
	2.5 Organise and direct support from outside agencies.
	2.6 Provide technical advice to the chain of command or support agencies.
3. Finalise the task	3.1 Notify higher authority that clearance is complete.
	3.2 Conduct post activity analysis and make recommendations.
	3.3 Recondition, replace or return equipment and stores.
	3.4 Complete documentation.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

Approved Page 3 of 4

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA327 Coordinate area and route search, and clearance of explosive ordnance.
