DEFSUR001 Catch aquatic animals in a survival situation

Release: 1

DEFSUR001 Catch aquatic animals in a survival situation

Modification History

Release	Comments
1	<p>This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to DEFSU001B Catch aquatic animals in a survival situation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to catch aquatic animals in a survival situation. This includes preparing improvised fishing resources and conducting fishing operations. The individual is not expected to be an expert fisherperson but rather to have sufficient skills and knowledge to obtain, where possible, a measure of sustenance from waterways to increase their chances of survival.

This unit was developed for Defence personnel but may be relevant to others.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would act autonomously, while performing concrete tasks, in a broad range of contexts which may be highly unpredictable.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Survival

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare improvised fishing resources	1.1 Assemble improvised tackle from natural resources and basic survival resources (i.e. wire, fish hooks and fishing line). 1.2 Identify and prepare natural fish-stunning agents. 1.3 Bait tackle using locally acquired insects and animals appropriate to the type of aquatic animal being sought.
2. Conduct fishing operation	2.1 Choose location and timing of fishing operation to optimise the chances of success. 2.2 Apply basic fishing techniques to attract the desired aquatic animal to strike. 2.3 Land hooked aquatic animals. 2.4 Site and enhance tidal pools (includes making use of inlets, natural constrictions) to trap aquatic animals during tidal ranges. 2.5 Handle, dispatch, gut and fillet captured aquatic animals, and remove undesirable/poisonous animals from catch. 2.6 Examine guts to identify animals' preferred diet with the aim of targeting particular species and reinvesting offal and offcuts in ongoing fishing operations. 2.7 Implement techniques for maintaining aquatic animals in fresh condition until required for consumption.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading N/A					Writing N/A					Oral communication N/A					Numeracy N/A				

Performance variables

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFSU001B Catch aquatic animals in a survival situation.
