- implement organisational guidelines in a practice or business unit, providing professional services by establishing and documenting:
 - scope of service delivery and compliance requirements
 - administrative procedures, including information flow requirements to support delivery of client service
 - key positions, personnel, job descriptions and authorities within an organisation
- communicate key operational information to staff and clients
- implement and monitor operational guidelines and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the financial practice administrative processes and systems
- identify and describe factors which may affect practice and client service performance
- discuss the integrity of information sourced from a wide range of available information sources
- outline strategies to attain information not readily available within a practice
- outline and evaluate the key features of:
 - financial practice documentation systems, including registry and library processes
 - financial products, and their characteristics and risk profile
 - human resource procedures
 - business development, marketing and advertising processes for the purposes of monitoring outcomes of the practice

- compare and contrast project management processes and techniques
- describe the compliance issues and standards that the practice needs to adhere to, including:
 - relevant legislation and regulations
 - codes of practice and ethical requirements
- outline the key features of office information technology systems and software relevant to the practice
- describe client rights, performance standards and complaint procedures required to be made known to the client and adhered to by the practice.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the practice management field of work and include access to:

- office equipment, technology, software and consumables
- relevant legislation, regulations and codes of practice.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM302 Utilise a knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to access a knowledge management system, use monitoring and review processes to provide feedback and improve own work practices using the system.

This includes a whole range of strategies, methods, activities and techniques used formally and informally by individuals and the organisation (as formalised in a knowledge management system) to identify, collect, organise, store, retrieve, analyse, share and apply knowledge to the work of the organisation.

It applies to individuals who apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of knowledge management to assist in increasing productivity, to improve quality or to recognise the benefits to the organisation through the improved use of knowledge.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

- describe organisational policies and procedures for knowledge management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in knowledge management – information management field of work and include access to:

- office equipment and resources
- examples of information documents found in the workplace
- a knowledge management system (which can be a simulated system to satisfy privacy and confidentiality provisions).

Assessors must satisfy NVR/AQTF assessor requirements.

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of ability to:

- design a new system for the organisation that clearly supports innovation, is innovative and is based on:
 - analysis of the organisation's objectives, current systems, resources and barriers in relation to innovation
 - individual and group techniques with stakeholders to generate, test and evaluate several concepts and options for the new system
- consult with and analyse and integrate feedback from relevant stakeholders to develop a plan for the new system that addresses:
 - the need for external assistance
 - the impact of the new system on people, resources and other organisational practices
 - budget, timelines, responsibilities
 - a communication strategy
 - a learning and development strategy
- trial the new system including taking account of all consultative, coaching and technical issues and review it in relation to its goals for fostering innovation
- open the improvement process to ongoing collaborative input and challenge
- adjust system to reflect evaluation feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how the new system supports innovation in the organisation

- explain the concepts and theories of change management including ways of introducing change in different organisational contexts and change management communication strategies
- explain the concepts and theories of innovation and how these link to innovation in practice
- explain techniques for generating, testing and evaluating concepts and options for new systems
- analyse the technical context in which the system is being developed
- outline the typical ways in which systems may present barriers to innovation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents and
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others
- current industry technology used in the development of systems.

Assessors must satisfy NVR/AQTF assessor requirements.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to maximise opportunities for innovation by:

- establishing procedures and practices that foster innovation including:
 - collaborative work arrangements
 - building team capacity to contribute to innovation
 - providing formal and informal learning opportunities
 - evaluating ideas
 - celebration and promotion of innovation
 - consultation
 - respectful communications and sharing of ideas and feedback
- reinforcing the value of innovation to the vision and objectives of the organisation,
- modelling behaviour including being receptive to ideas, giving constructive advice, evaluating own work, establishing and maintaining relationships based on mutual respect and trust, taking considered risks that provide opportunities for innovation
- evaluating how the physical environment can be enhanced to support innovation and collaboration and collaborating on ideas to make improvements including in the selection of physical resources and equipment, and the design, fit-out and decoration of the workspaces
- making changes to a workspace that will encourage innovation in at least one of
 - design
 - fit-out
 - decoration.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the concepts and theories of innovation and how these link to innovation in practice
- explain the context for innovation in the workplace including core business values, overall objectives, broader environmental context and the need to ensure the value and benefit of innovative ideas and projects
- discuss the factors and tools that can motivate individuals to use creative thinking and apply innovative work practices
- research the legislative framework that impacts on operations in the relevant workplace context
- explain how different approaches to management and leadership can support or hinder innovation
- discuss typical challenges and barriers to innovation within teams and organisations and ways of overcoming these including rewarding and celebrating innovation, coaching and learning, modelling behaviour and managing the physical environment.
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and lodge accurate and appropriate documentation at required stages of legal process
- conduct all duties according to legislative and organisational requirements
- provide assistance to others to achieve joint outcomes when necessary.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline scope of job role in the context of relevant legislation, regulations and codes of practice
- explain relevant court processes
- summarise current corporation law principles
- outline legal processes required in this role
- outline documentation required in corporation law matters
- discuss organisation's required policies and procedures pertinent to this role.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the legal services administration field of work and include access to:

- appropriate legislation and regulations relevant to corporation law and common legal matters
- workplace policies and procedures and reference materials

- background information on courts, their jurisdiction and behavioural requirements
- office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Select and use appropriate technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles

ELEMENT	PERFORMANCE CRITERIA
	1.4 Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1 Identify, open and generate files and records according to task and organisational requirements 2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information 2.3 Use a range of functions to ensure consistency of design and layout 2.4 Operate input devices within designated requirements
3. Produce document	3.1 Complete document production within designated timelines according to organisational requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document to avoid loss of data 3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Make any modifications to document to meet requirements 4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage 4.4 Print and present document according to requirements

BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBWHS201 Contribute to health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others and to respond to emergency incidents. It covers following work health and safety (WHS) and emergency procedures and instructions, implementing WHS requirements and participating in WHS consultative processes.

It applies to individuals who require a basic knowledge of WHS to carry out work in a defined context under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Act has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

- apply WHS Acts, regulations codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks
- identify duty holders
- explain the differences between a hazard and a risk and identify hazards and risks in the organisation
- prepare an action plan to implement a systematic approach to WHS risk management
- prepare positive performance indicators for evaluation of a systematic approach to WHS risk management
- consult effectively with relevant stakeholders.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formal and informal communication and consultation processes, and key personnel related to communication, including duty holders
- explain how the characteristics and composition of the workforce impact on WHS risk and the management of WHS with reference to:
 - communication skills
 - cultural background/diversity
 - gender
 - labour market changes

- language, literacy and numeracy
- structure and organisation of the workforce, for example part time, casual and contract workers, shift rosters, geographical location
- workers with specific needs and limitations
- workplace culture towards alcohol and other drug use
- describe internal and external sources of WHS information and data, and explain how to access these sources
- outline the limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- describe the nature of workplace processes including work flow, planning and control and hazards relevant to the workplace
- describe organisational behaviour and culture as it impacts on WHS, change and the work team
- describe the key features of organisational WHS policies, procedures, processes and systems
- identify other functional areas in the organisation that impact on the management of WHS
- outline the key features of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material
- describe the key principles and/or practices of:
 - a systematic approach to managing WHS
 - duty of care including concepts of causation, foreseeability and prevention
 - incident causation and injury processes
- describe risk analysis and assessment techniques and tools, and their application and limitations
- explain risk, as the effect of uncertainty, on objectives
- explain the duty of persons conducting businesses or undertakings (PCBUs) in regard to risk management under WHS legislation
- describe the sources of occupational disease and their prevention
- describe standard industry controls for hazards
- describe techniques, tools and processes for identifying and controlling health and safety hazards and risks including :
 - hazard and risk checklists
 - hazard hunts
 - job safety analysis
 - manifests and registers including dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk throughs
- describe the key features of the toxicology of hazardous chemicals and potential health effects in the workplace.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant WHS legislation, standards, codes of practice and guidelines
- workplace policies and procedures and documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS504 Manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct work health and safety (WHS) risk management processes.

It applies to individuals who manage WHS risks, based on the organisation's WHS management system (WHSMS), WHS information system (WHSIS) and risk-management approach (as covered in BSBWHS503 Contribute to the systematic management of WHS risk). These individuals will work in a range of WHS roles across all industries and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access information and data on hazards and how to manage associated risks
- identify duty holders and legislative requirements for work health and safety (WHS) risk management
- use the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to conduct the following risk management processes:
 - identify hazards and potential hazards
 - assess the associated risks
 - identify control options
 - select suitable options
 - develop and implement a risk control plan
 - evaluate risk controls
- carry out hazard identification and risk management.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the basic principles of workplace incident, injury and disease causation
- explain the meanings of 'hazard' and 'risk' and how they differ
- identify formal and informal communication and consultation processes and key personnel related to communication
- describe how the characteristics and composition of the workforce impact on WHS risk and the management of WHS, including:
 - communication skills
 - cultural background and diversity

- gender
- labour market changes
- language, literacy and numeracy levels of the workforce
- structure and organisation of the workforce, including part-time, casual and contract workers; shift rosters and geographical location
- workers with specific needs and limitations
- workplace culture in relation to alcohol and other drug use
- identify internal and external sources of WHS information and data and how to access them
- explain the limitations of generic hazard identification and risk assessment checklists and risk ranking processes
- outline methods for providing evidence of compliance with WHS legislation
- describe the nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- describe organisational culture as it impacts on the work team
- summarise organisational WHS policies, procedures, processes and systems
- list other functional areas that impact on the management of WHS
- outline the principles and practices of a systematic approach to managing WHS
- outline Commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material and other publications relevant to the organisation
- outline risk management as a duty of persons conducting businesses or undertakings or officers under WHS legislation
- describe the roles and responsibilities of individuals and parties under WHS legislation
- outline standard industry controls for a range of hazards
- identify techniques, tools and processes for identifying health and safety hazards and assessing and controlling the associated risks, including:
 - hazard and risk checklists
 - hazard hunts
 - job safety analyses
 - manifests and registers, including for dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk-throughs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- workplace policies and procedures
- office equipment and resources
- relevant Acts, regulations, codes of practice, standards and guidelines relating to risks found in the workplace

- case studies and, where possible, real situations.

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to managing work health and safety information systems (WHSIS) to support work health and safety (WHS) management. It focuses on systems for gathering, managing and communicating information necessary for WHS management.

It applies to individuals who contribute to the management of a WHSIS. These people will work in a range of WHS roles across all industries and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. Assessment Requirements for BSBWHS507 Contribute to managing WHS information systems

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to contribute to:

- identifying Work Health and Safety Information Systems (WHSIS) legislative and organisational requirements including:
 - duty holders and roles
 - WHS information for effective work health and safety (WHS) management
 - functions and purposes
 - user needs
 - workplace factors
- using the WHSIS including:
 - advising and supporting users
 - gaining feedback for monitoring, evaluation and improvement
- using the WHSIS to support effective WHS management as required by job role including:
 - accessing and reviewing WHS information and data and their sources
 - collecting and recording WHS information and data that addresses legislative and organisational requirements, using appropriate tools
 - meeting external reporting requirements in a timely manner
 - using appropriate analytical techniques to evaluate WHS performance and identify improvement areas
 - regularly reviewing and analysing WHS information and data to ensure legislative and organisational requirements are met
 - recommending improvements in prevention strategies based on information and data
 - communicating WHS information and data according to legislative and organisational requirements
- assisting with monitoring and evaluating the WHSIS, and developing and implementing improvement measures incorporating:

- user participation and consultation, including with regard to frequency, method and scoping of WHSIS review
- identification and actioning of training needs.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information and data relevant to the organisation and its needs (which is a function of the size and nature of the organisation) and to specific hazards in the workplace
- identify commonwealth and state or territory WHS Acts, regulations, codes of practice, standards, guidance material and links to other relevant legislation, including industrial relations, equal employment opportunity, workers' compensation and rehabilitation
- outline due diligence obligations as referred to in WHS Acts, regulations and codes of practice
- list internal and external sources of WHS information and data, and how to access them
- identify key personnel, including change agents, within workplace management structure
- summarise the language, literacy and cultural profile of the work team
- summarise legislative requirements for WHS information and data, and consultation
- describe methods for collecting reliable information and data, commonly encountered problems in collection, and strategies for overcoming these problems
- describe methods for providing evidence of compliance with WHS legislation
- describe the nature of information and data that provide valid and reliable measures of performance of WHS management processes
- outline organisational WHS policies, procedures, processes and systems
- detail the requirements for record keeping that address WHS, privacy and other relevant legislation
- list the requirements for reporting under WHS and other relevant legislation, including obligations for notification and reporting of incidents
- summarise the roles and responsibilities of individuals and parties under WHS legislation
- describe systems for storage and retrieval of information and data.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- reports and sample software for WHS information and data collation and analysis
- relevant Acts, regulations, codes of practice, standards and guidelines
- case studies and, where possible, real situations

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS508 Manage WHS hazards associated with plant

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to effectively manage work health and safety (WHS) hazards and to comply with WHS legislation as it applies to the management or control of plant (not the design, manufacture, supply, installation, construction or commissioning of plant or issuing of licences associated with plant).

It applies to individuals who may provide leadership and guidance to others using managerial and communication skills and who use systematic approaches to identify and resolve issues.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS508 Manage WHS hazards associated with plant

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- manage effective identification of hazards and develop risk control options for the operation of plant as defined in work health and safety (WHS) legislation
- develop, implement, monitor and modify WHS policies and procedures for the operation of plant
- use relevant systems and procedures in the operation and maintenance of plant
- implement general licensing and training requirements associated with plant
- identify, record and report on WHS hazards and assessing risk
- develop and implement risk control options
- communicate in the workplace to:
 - advise people of their rights, obligations and duties
 - consult about policies and procedures
 - identify hazards
 - assess WHS risk
 - advise people about registration, licensing and certification requirements
- use machinery safety control measures to control plant risks, including following registration and licensing requirements
- identify training needs and organise training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the basic principles of incident causation and injury processes
- explain the differences between a hazard and a risk

- identify factors that impact on risk
- explain the hierarchy of control and considerations for choosing between different risk controls
- identify high-risk work licences required for specific plant
- identify internal and external sources of WHS information and data, and explain how to access these sources
- discuss the management of risk associated with plant as a duty of a person conducting a business or undertaking (PCBUs) under WHS legislation
- describe the methods for providing evidence of compliance with WHS legislation
- outline workplace processes (such as work flow, planning and control) and hazards relevant to the workplace
- discuss organisational behaviour and culture as it impacts on WHS, change and work team
- describe the key features of organisational WHS policies, procedures, processes and systems
- identify other functional areas that impact on the management of WHS
- outline key features of plant specific knowledge including:
 - basic physics of fluids under pressure and pressure vessels, and the behaviour of pressurised fluid when pressure is released
 - duties, rights and obligations of individuals and parties specified in WHS legislation
 - hazards associated with plant and systems of work associated with plant
 - industry practices related to permit to work and isolation and tag out systems
 - registration requirements of plant, licensing and certification competencies
- describe the key principles and practices of a systematic approach to managing WHS
- describe the strategies for guarding moving parts in machinery, human factors related to machine guarding, safe design principles, features and limitations
- outline the key features of WHS Acts, regulations, codes of practice and other instruments issued by WHS regulators.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- manufacturers' manuals including specifications and operational information and data
- relevant WHS Acts, regulations, codes of practice, standards, guidelines
- sources of information, data and advice

BSBWHS510 Contribute to implementing emergency procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the implementation of planning and response procedures for emergencies. The focus is on implementation of procedures already developed for short-term emergency responses. It assumes that expert advice will be available in identifying potential emergencies and in formulating response plans.

This unit applies to individuals with supervisory responsibilities for managing work health and safety (WHS) in the workplace who contribute to the implementation of procedures for responding to emergencies. These people will work in a range of WHS roles across all industries and who apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
---------	----------------------

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Identify potential emergencies	1.1 Apply knowledge of WHS hazards and relevant standards to identify causes of potential emergencies 1.2 Seek input of stakeholders in identifying potential emergencies 1.3 Identify and liaise with appropriate specialist advisors and emergency agencies to identify causes of potential emergencies 1.4 Develop a risk register to identify potential emergencies and their causes
2 Identify options for initial response	2.1 Categorise major types of potential emergencies 2.2 Identify actions required to contain or limit potential emergencies 2.3 Identify actions required to limit impact on personnel, property and the environment 2.4 Identify requirements for liaison with emergency agencies 2.5 Prioritise actions to be taken during emergencies
3 Plan initial response procedures	3.1 Identify resources available and required for immediate response 3.2 Check emergency equipment to ensure serviceability, accessibility, cleanliness and correct location 3.3 Document actions required for a range of major types of emergency, taking account of standards, current industry practice, specialist advice and input by emergency agencies 3.4 Identify training needs and appropriate providers
4 Implement initial response procedures	4.1 Document and display actions for initial response 4.2 Outline own role in emergency response 4.3 Follow appropriate procedures
5 Contribute to post-event activities	5.1 Identify and support other personnel involved in the second response phase 5.2 Make contributions to debriefing processes
6 Monitor emergency response and address deficiencies	6.1 Monitor responses to emergencies for efficiency and timeliness, in consultation with stakeholders and, as appropriate, specialist advisors and agencies 6.2 Document, and promptly and appropriately report, results of monitoring to appropriate persons

ELEMENT	PERFORMANCE CRITERIA
	6.3 Identify areas for organisational and personal improvement and make improvement recommendations based on analysis of response

Assessment Requirements for BSBWHS510 Contribute to implementing emergency procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify potential emergencies and their causes, with input from others, including specialist advisers and emergency agencies and document them in a risk register
- identify and prioritise options for initial response to contain or limit emergencies and their impact, and for liaison with emergency services
- plan initial response procedures including:
 - categorising major types of potential emergencies
 - identifying required resources
 - checking equipment
 - documenting required actions for a range of major types of emergency, with input from others and in keeping with standards and current industry practice
 - identifying training needs and providers
- implement initial response procedures including:
 - documenting and displaying actions required
 - outlining own role
 - following appropriate procedures
- contribute to post-event activities including supporting others and contributing to debriefing
- monitor emergency response and address deficiencies including:
 - consulting
 - documenting and reporting results
 - identifying improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic emergency prevention controls typically installed in a workplace including:
 - emergency alerting systems
 - emergency protection systems
 - smoke alarms, fire alarms and fire extinguishers
 - required safety wear
 - security systems
- describe the enterprise physical site and work areas
- explain enterprise reporting procedures for an emergency
- detail the essential actions of self and others in an emergency
- describe hazards and precautions to be taken during an emergency
- list hazards arising from evacuation
- detail the information needs of emergency response personnel during reporting, arrival and response to an emergency
- identify internal and external sources of work health and safety (WHS) information and data and how to access them
- summarise organisational and workplace WHS policies and procedures
- describe the organisational structure, roles and responsibilities contributing to the implementation of emergency procedures
- describe the powers of safety representatives and other authorised WHS personnel to implement an immediate cease work if an immediate danger to WHS exists
- summarise the principles and priorities for evacuation, checking and accounting for people
- summarise the principles of fire protection and emergency response
- outline relevant Commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material and how it applies to the implementation of emergency procedures
- identify roles and responsibilities of WHS personnel
- give examples of emergency responses typically used in workplaces
- detail the WHS information needs of work unit or work team.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- workplace policies and procedures
- WHS legislation, regulations and codes of practice
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Performance Evidence

Evidence of the ability to:

- manage effective work health and safety (WHS) risk management consultation and participation processes including:
 - identifying those who need to be involved
 - reviewing and improving existing processes
 - ensuring processes are appropriate to the organisation and WHS risks
- arrange for necessary resources during WHS risk management, including:
 - identifying and budgeting for requirements
 - procuring resources and ensuring availability
- review and improve existing WHS risk management processes, including:
 - using workplace information and data
 - consulting with individuals and parties
 - considering effectiveness, current risk controls, lessons learnt from events, changes in the internal and external contexts, emerging risks and performance against indicators
- develop a WHS risk management framework including:
 - using suitable sources of information and data to determine the purposes, objectives, principles and structure
- establish the context for WHS risk management including:
 - identifying duty holders, legislative requirements, impacting individuals, parties and factors
 - defining risk criteria
- assess risks including:
 - identifying hazards
 - undertaking risk analysis and evaluation
 - addressing requirements of WHS legislation, WHS risk assessment and workplace WHS information and data
- control risks including:

- selecting from control options according to outcomes of risk assessment, WHS hazards and risk controls, and WHS legislation
- preparing and implementing risk control measures
- monitor and review the WHS risk management process according to the organisation's WHS management system (WHSMS) requirements
- record the WHS risk management process according to the organisation's WHS information system (WHSIS) requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain different definitions of hazard and risk and how they are used by different individuals and parties
- outline internal and external sources of WHS information and data and how to access them
- identify organisational WHS policies, procedures, processes and systems
- identify other functional areas that impact on the management of WHS
- describe the principles and practices of a systematic approach to managing WHS
- describe the principles of duty of care, including concepts of causation, foreseeability and preventability
- describe the principles of incident causation and injury processes
- list a range of risk analysis and assessment techniques and tools and their application and limitations
- outline relevant and applicable Australian legislation, standards and publications
- define risk as the effect of uncertainty on objectives
- define risk management as a duty of persons conducting businesses or undertakings (PCBUs) or officers under WHS legislation
- give examples of standard industry risk controls for a range of hazards
- outline techniques, tools and processes for identifying health and safety hazards and controlling risks:
 - hazard and risk checklists
 - hazard hunts
 - job safety analyses
 - manifests and registers, including for dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk-throughs
- describe toxicology of hazardous chemicals and potential health effects in the workplace.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- relevant WHS legislation, standards and guidelines
- workplace policies and procedures
- reports from other parties consulted during the approach to WHS risk management
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- evaluate the effectiveness of an organisation's arrangements for identifying work health and safety (WHS) hazards including:
 - comparing them with WHS policies and procedures
 - ensuring inclusion of long-latency and low-frequency/high-consequence hazards
 - ensuring inclusion of risks to persons other than workers
 - reviewing outcomes with specialists
- evaluate the effectiveness of an organisation's arrangements for WHS risk management including:
 - appropriateness of risk assessment tools and processes
 - validity and reliability of outcomes
 - inclusion of all major WHS risks
 - suitability and effectiveness of risk controls
 - the relationship between strategic planning and WHS
- evaluate the effectiveness of the organisation's processes for monitoring WHS including:
 - the quality of information and data
 - management's response to issues
- assess the outcomes of the organisation's arrangements for managing WHS including:
 - assessing whether performance indicators, including positive performance indicators (PPIs), provide a true, reliable and timely effectiveness measure
 - comparing differences between reported performance and evidence gathered
 - evaluating and documenting WHS performance outcomes
 - determining whether arrangements have produced improvement
- assess and report on the organisation's WHS compliance with agreed benchmarks and legislation, including:
 - identifying areas of WHS compliance and non-compliance
 - documenting and reporting outcomes to key stakeholders.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline Commonwealth and state or territory WHS Acts, regulations, codes of practice, standards, guidance material and links to other relevant legislation, including industrial relations, equal employment opportunity, workers' compensation and rehabilitation
- outline the concept of common law duty of care
- describe the development of WHS performance assessment tools including PPIs
- describe ethics related to professional practice
- outline formal and informal communication and consultation processes, and key personnel related to communication
- summarise the language, literacy and cultural profile of the work team
- describe legal liability in relation to providing advice
- summarise the legislative requirements for WHS information and data, and consultation
- outline the limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- list methods for collecting reliable information and data, commonly encountered problems in collection, and strategies for overcoming such problems
- list methods for providing evidence of compliance with WHS legislation
- describe the nature and use of information and data that provide valid and reliable results on performance of WHS management processes (including PPIs) and limitations of other types of measures
- outline the nature of workplace processes (work flow, planning and control) and hazards relevant to the workplace
- describe organisational culture as it impacts on the work team
- summarise organisational WHS policies, procedures, processes and systems
- outline the principles and practices of a systematic approach to managing WHS
- outline the principles of duty of care, including concepts of causation, foreseeability and preventability
- list the principles of effective meetings, including agendas, action planning, chair and secretarial duties, minutes and action items
- list a range of risk analysis and assessment techniques and tools, and their application and limitations
- detail the requirements for recordkeeping that address WHS, privacy and other relevant legislation
- detail the requirements for reporting under WHS and other relevant legislation, including obligations for notification and reporting of incidents
- summarise the requirements under hazard-specific WHS legislation and codes of practice
- describe risk management as a duty of PCBUs or officers under WHS legislation

- describe the roles and responsibilities, in relation to communication and consultation, for health and safety committees, health and safety representatives, line management, workers and inspectors
- outline sampling methodologies, application and related statistical measures
- list standard industry controls for a range of hazards
- describe techniques, tools and processes for identifying and controlling health and safety hazards and risks:
 - hazard and risk checklists
 - hazard hunts
 - job safety analyses
 - manifests and registers, including for dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk-throughs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- workplace strategic and operational plans, policies and procedures
- WHS information and data
- case studies and, where possible, real situations

Performance Evidence

Evidence of the ability to:

- support and facilitate the implementation of a work health and safety management system (WHSMS) including:
 - determining form, content, purposes and functions
 - consulting and gaining agreement
- develop work health and safety (WHS) policy and commitment to a WHSMS including:
 - communicating requirements
 - developing and implementing an initial review
 - meeting organisational requirements
 - facilitating and supporting consultation and participation
 - documenting and communicating the policy
- develop a WHS plan including:
 - communicating requirements
 - collaborating with others
 - facilitating and supporting consultation and participation
- implement a WHS plan including:
 - communicating requirements
 - facilitating and supporting consultation and participation
 - collaborating to ensure policies, procedures, processes and systems support WHS plan implementation
- measure and evaluate WHS performance including:
 - communicating requirements
 - facilitating and supporting consultation and participation
 - assessing policies, procedures, systems and processes for ability to support WHS plan implementation
- review and improve the WHSMS including:
 - communicating requirements

- facilitating and supporting consultation and participation
- documenting and reporting outcomes and suggested improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of barriers to WHSMS implementation and strategies to overcome them
- describe the nature of information and data that provide valid and reliable measures of WHS performance and WHSMS, including positive performance indicators
- outline relevant Commonwealth and state or territory WHS Acts, regulations, codes of practice, standards, guidance material and other relevant publications
- outline requirements for recordkeeping that address WHS, privacy and other relevant legislation
- describe the structure and functions of a WHSMS
- summarise WHSMS certification and auditing standards, processes and requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- workplace WHS policies and procedures
- relevant Acts, regulations, codes of practice, standards and guidance materials.
- case studies and, where possible, real situations
- interaction with others

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS606 Conduct a WHS audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to conduct an internal work health and safety (WHS) audit or an external WHS audit under the guidance of a lead auditor.

This unit applies to the auditing of a systematic approach to managing WHS, which may or may not be formalised as part of a WHS management system, and can be against internal or external benchmarks. It involves systematic examination against audit criteria to determine conformance to planned arrangements for the management of WHS.

It applies to personnel required to conduct a WHS audit. A WHS audit may be conducted by an individual or by a team and may be concurrent with other management system audits or conducted as a standalone exercise.

This unit does not cover evaluation of the organisation's overall WHS performance, which is addressed in BSBWHS604 Evaluate the WHS performance of organisations.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare for a WHS audit	1.1 Define the scope, objectives and benchmarks of the audit 1.2 Identify and obtain relevant documentation, including preliminary material, on the operation of the organisation 1.3 Identify and arrange resources required to conduct the audit 1.4 Assign timing, schedule and responsibilities for the audit
2 Develop a WHS audit plan	2.1 Ensure nature of information and data collected provides valid and reliable evidence of the systematic approach to managing WHS and risk controls within the context of the organisation 2.2 Include key personnel and stakeholders in sources of evidence 2.3 Ensure information and data collection strategies address issues of security, confidentiality, impartiality and equity 2.4 Include opportunities for corroborating evidence in information- and data collection strategies 2.5 Document audit plan and submit to key personnel and stakeholders for consultation and feedback 2.6 Modify audit plan in relation to feedback from key personnel and stakeholders 2.7 Re submit audit plan to key personnel and stakeholders for comment as appropriate 2.8 Negotiate issues concerning audit plan with key personnel and stakeholders, and amend documents where required
3 Select appropriate WHS audit tools	3.1 Ensure audit tools accurately reflect the criteria of the benchmark, nature of risks, identified relevant information and data types 3.2 Ensure audit tools focus on WHS management processes 3.3 Ensure audit tools can be used with consistent outcomes by all members of the audit team 3.4 Ensure audit tools enable collection of evidence in a timely and efficient manner 3.5 Trial audit tools and modify as required
4 Gather information, data and WHS records	4.1 Consult a broad range of workplace personnel during evidence-gathering activities

ELEMENT	PERFORMANCE CRITERIA
	<p>4.2 Gather information, data and WHS records, compare with the audit plan and identify reasons for discrepancies</p> <p>4.3 Identify and use alternative methods when required information, data and WHS records are not forthcoming using planned methods</p> <p>4.4 Check reliability and validity of information, data and WHS records with a number of sources</p> <p>4.5 Adapt to contingencies as they arise</p>
5 Undertake WHS audit activities	<p>5.1 Undertake preliminary evaluation</p> <p>5.2 Undertake initial meetings and work site familiarisation</p> <p>5.3 Monitor progress of the audit plan with key personnel and stakeholders and/or audit team members to ensure resources are being used as planned, and that audit objectives and audit timelines are being achieved</p> <p>5.4 Progressively document and retain records of information, data and WHS records and findings in an appropriate format</p> <p>5.5 Report promptly the hazards and risks identified during the audit to key personnel and stakeholders and/or person in control of the workplace</p> <p>5.6 Address own health and safety during the audit according to organisational requirements and standards for safe work practices and applicable WHS legislation</p> <p>5.7 Ensure information and data collection and evaluation activities comply with legal requirements and are carried out ethically</p> <p>5.8 Undertake exit meetings with key personnel and stakeholders as appropriate</p>
6 Report on the outcomes of the WHS audit	<p>6.1 Compare results of the evaluation against audit criteria</p> <p>6.2 Consult appropriately on evaluation results and develop summary audit findings and recommendations</p> <p>6.3 Present summary audit findings and recommendations to key personnel and stakeholders at the closing meeting</p> <p>6.4 Present objective evidence with clear and concise findings, including benefits to be achieved by adoption of the audit recommendations</p> <p>6.5 Anticipate possible challenges to the report and prepare further explanations to promote acceptance</p> <p>6.6 Recommend corrective action and follow up processes as required</p>

BSBWHS607 Apply ergonomics to manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to apply the principles, processes and methods of ergonomics to work health and safety (WHS) risk management and to the enhancement of WHS related planning and design activities and processes.

It applies to individuals who manage WHS risks and who need to consider the role ergonomics should play in this process. These individuals will apply advanced practical knowledge to coordinate, facilitate and maintain the WHS program within an organisation. Working with ergonomists may be required as part of this role.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify work health and safety (WHS) hazards and manage associated risks where ergonomics can be applied through:
 - using workplace WHS information
 - using knowledge of ergonomics principles, processes and methods
- use ergonomics principles, processes and methods to address WHS risk management
- apply ergonomics in WHS related planning and design activities including:
 - identifying opportunities for enhancement through ergonomics
 - enhancing activities and evaluating changes
- ensure ergonomics activities are compliant and appropriate including:
 - legislative compliance
 - organisational compliance
 - appropriateness to available resources and own role and capabilities
 - seeking specialist input where necessary and appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- define 'ergonomics' and outline the application domains of ergonomics
- broadly outline the knowledge base, skills, methods, techniques, expertise, roles and functions of ergonomists
- outline ergonomics principles, processes and methods applicable to the management of WHS hazards and risks, and WHS related planning and design activities and processes

- identify ergonomics related content of applicable WHS legislation, regulations, codes of practice and other documents, such as policies, standards, guidance publications and alerts issued by the relevant WHS regulators
- summarise the general principles and processes of ergonomics
- outline the scope and broad content of Australian and international ergonomics standards
- describe systems and systems concepts as used in ergonomics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant WHS legislation, standards, guidelines, information and data
- reports from other parties consulted in developing ergonomics interventions
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS608 Assist with applying occupational hygiene to manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with the application of occupational hygiene principles, knowledge and techniques to manage work health and safety (WHS) risks.

It includes understanding how occupational hygiene contributes to WHS management, the appropriate application of occupational hygiene knowledge, skills and techniques and working with occupational hygienists and other specialists.

This unit applies to individuals who assist with applying occupational hygiene to manage WHS risks. Individuals who are required to assist with the monitoring of a range of physical agents and/or conditions in the workplace should use BSBWHS409 Assist with workplace monitoring processes.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS608 Assist with applying occupational hygiene to manage WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify work health and safety (WHS) hazards and risks to be addressed by occupational hygiene through:
 - using workplace WHS information
 - using knowledge of occupational hygiene principles, knowledge, skills and techniques
 - identifying situations requiring specialists
- assist with the assessment of identified WHS hazards and risks including:
 - determining sources of exposure
 - identifying and using occupational hygiene equipment and techniques
 - analysing and interpreting results of assessments
 - reporting results, interpretations and recommendations
- assist with the design and implementation of risk controls including:
 - applying the hierarchy of control
 - identifying and advising on remediating problems with existing controls
 - ensuring participation and consultation
 - accessing external sources of information and specialist advice
- assist with monitoring, evaluating and modifying risk controls including:
 - consulting others
 - addressing related training needs
 - making recommendations about future risk controls
- ensure occupational hygiene activities are legislatively and organisationally compliant and appropriate:
 - according to resources, role and capabilities
 - seeking specialist advice as needed.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain common controls for a range of hazards and associated risks, their effectiveness and their limitations
- describe how occupational hygienists work with WHS personnel, individuals and parties in the workplace to control WHS risks
- outline organisational and workplace WHS policies, procedures, processes and systems
- explain key concepts and processes including:
 - occupational hygiene assessments and investigations
 - characteristics of WHS hazards and risks addressed by occupational hygiene, their effects on people and how these effects occur
 - exposure standards, and other standards and guidelines used in occupational hygiene, including their limitations and practical applications
 - how recommendations for occupational hygiene risk controls are developed, implemented and evaluated
 - nature and scope of risk controls, including the hierarchy of control in relation to occupational hygiene
 - occupational hygiene principles, knowledge, skills, techniques and methodologies
 - roles and functions of occupational medicine physicians, other medical doctors and toxicologists
 - sources and routes of exposure of hazards and risks addressed by occupational hygiene
 - training, education, roles, functions and skills of occupational hygienists
 - types, purposes, functions and use of occupational hygiene equipment
 - summarise the requirements for individual training and instruction in the fitting, use, maintenance and storage of a range of personal protective equipment (PPE)
- summarise the requirements for selection and limitations of use of PPE
- define risk management as a duty of persons conducting businesses or undertakings (PCBUs) or officers under WHS legislation
- identify sources of occupational disease and their prevention
- outline WHS Acts, regulations and codes of practice with particular relevance to occupational hygiene
- outline workplace processes, activities, jobs and tasks relevant to occupational hygiene.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant legislation, standards and guidelines

- occupational hygiene equipment that meets relevant standards for function and performance
- relevant workplace policies and procedures
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS609 Advise on the application of safe design principles to control WHS risks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to advise on applying safe design principles to control Work Health and Safety (WHS) risks during a product's life cycle. The central feature of safe design is the application of relevant information and data about human experience, capabilities and behaviour to the design of objects, facilities, procedures and environments that people use.

It applies to individuals who are in a position to provide advice on the application of safe design principles in their organisation, which may be involved in one or more stages of the product life cycle.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- advise on work health and safety (WHS) requirements of design processes including:
 - advising decision makers on responsibilities and legal duties, including WHS risk management, and control for residual WHS risks, at product life cycle stages
 - promoting WHS in design requirements and WHS risk control across product life cycle
 - making available current WHS product design information
 - making available education and training for design phase WHS risk management
 - consulting known and potential users
 - identifying situations where specialists or advisers may be required
- advise on the development of a systematic WHS risk management system for safe design including giving advice on:
 - hazard identification, risk assessment and risk control
 - ensuring risk management includes potential alterations to the product during its life
 - documentation and accessibility of decision making
 - establishment and downstream distribution of a residual risk register
 - monitoring of evolving design
- advise on the principles of WHS risk controls:
 - based on the hierarchy of control
 - ensuring inclusion of fail safe action
- advise on consultation processes in the life cycle of the designed product including giving advice on:
 - consideration of users' needs
 - consultation during concept and design phases in relation to WHS risk management
 - communication of residual life cycle risk
- advise on procurement systems to minimise 'purchased' WHS hazards and risks including giving advice on:

- inclusion of risk management requirement and provision of residual risk information
- inclusion of agreement to carry out a safe design approach in the design brief or draft specifications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic human cognitive and perceptual capabilities and other basic and fundamental factors relevant to the design of human machine interfaces
- outline basic information about relevant psychosocial factors, occupational violence, shift work, repetitive work, awkward postures, lighting, thermal environment and work layout
- outline the basics of anthropometry and biomechanics
- summarise commonwealth and state or territory WHS Acts, regulations and codes of practice and other relevant publications and guidelines relating to information and data, consultation, participation and safe design including:
 - Safe Work Australia, Guidance on the principles of safe design for work
 - Safe Work Australia, Model Code of Practice: Safe design of structures
- give examples of direct and indirect factors that impact on WHS and the environment in the design of products
- outline formal and informal communication and consultation processes and key personnel related to communication
- detail the hierarchy of control and criteria for choosing between different WHS risk controls
- outline internal and external sources of WHS information and data and how to access them
- identify key personnel, including change agents, within workplace management structure
- outline legal liability in relation to providing advice
- describe organisational behaviour and culture as they impact on WHS and on change
- summarise pertinent sections of relevant Australian, and other, standards
- explain risk management and the principles and practices of a systematic approach to managing WHS
- outline the WHS legislative duties of PCBUs or officers who are designers to eliminate hazards at the design stage.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- reports from other parties consulted, in developing appropriate interactions between people involved in the life cycle of the designed product
- relevant legislation, standards, guidelines, research or industry data
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate this unit of competency:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- This unit of competence will be most appropriately assessed in the workplace or in a simulated workplace and under the normal range of workplace conditions
- Assessment may be conducted over one or more occasions and should include all aspects of case planning with a range of clients

Access and equity considerations:

- All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

Context of and specific resources for assessment:

- This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged
- Resources required for assessment include access to:
 - an appropriate workplace where assessment can take place or simulation of realistic workplace setting

Method of assessment:

- Assessment may include observation, questioning and evidence gathered from the workplace environment

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Service inputs may include:

- Formal interventions
- Support services
- Services to clients
- Services to family and carers

Requirements and boundaries of the coordination role may include:

- Providing a central point of contact for the client
- Monitoring overall impact of service interventions
- Facilitating communication
- Monitoring client confusion, concerns and barriers

Communication requirements may include:

- Meetings
- Identifying triggers indicating the need for communication between services
- Defined timeframes

Client confusion, concerns and barriers may include:

- Not understanding the relevance of different service inputs
- Need to provide the same information to multiple services
- Time to commit to service demands
- Not understanding how services compliment each other

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

These include knowledge of:

- Principles and practices of augmentative and alternative communication
- The process for assessing for the use of augmentative and alternative communication
- Understanding of the different levels of communication
- Recognition of communication styles of individuals
- Different communication skills relevant to client group e.g. signing
- Basic knowledge of causes of communication impairment
- Cross cultural communication protocols
- Understanding of the influence of communication on behaviour
- Understanding of the person's communication level and its impact on skill development
- Understanding of the person's communication level and its impact on their active community participation
- Roles and functions of different professionals in the development, implementation and maintenance of augmentative and alternative communication strategies and devices
- Available range of communication aids and their correct use
- Augmentative and alternative communication strategies and their correct use for the person's level of communication
- The total communication environment and the need for consistency
- Role and responsibility as part of a team that supports augmentative and alternative

REQUIRED SKILLS AND KNOWLEDGE

communication

- Task analysis
- Prompting, principles of prompting and fading prompting
- Strategies to create independence
- Reinforcers
- Motivators to learn
- Common de-motivators and blocks
- Understanding of maintenance techniques and generalisation
- Understanding of incidental learning

Essential skills:

It is critical that the candidate demonstrate the ability to:

- Participate in a multi-disciplinary team
- Follow established augmentative and alternative communication strategy interaction guidelines
- Use augmentative and alternative communication strategies and devices
- Respond appropriately to each individual's augmentative and alternative communication strategy
- Identify barriers to effective communication using augmentative and alternative communication strategies/devices
- Monitor effective communication using augmentative and alternative communication strategies/aids
- Use observation skills
- Apply techniques to work with specialists and relevant others
- Use effective communication skills including:
 - development of rapport
 - active listening
 - make reasonable adjustments to own communication techniques to meet individual needs
- Collaborate and network with a variety of personnel in order to achieve learning and development objectives
- Demonstrate appropriate task breakdown
- Apply communication techniques that encourage and motivate
- Use appropriate prompting and application of reinforcers during training session
- Demonstrate appropriate use of incidental learning opportunities

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate this unit of competency:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- The individual being assessed must demonstrate the use of five different strategies/aids used for AAC in a range of different environments
- Assessment of this unit must occur in a real or simulated workplace
Such an environment must provide a typical range of augmentative and alternative communication requirements
- The specific assessment context will be defined by the workplace
- Where, for reasons of safety, space, or access to equipment and resources, assessment takes place away from the workplace, the assessment environment should represent workplace conditions as closely as possible
- The competencies described need to be assessed over time and events, under normal workplace conditions
- Assessment should not require a higher level of communication competency than that required by work responsibilities

Access and equity considerations:

- All workers in community services should be aware of access, equity and human rights issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular

EVIDENCE GUIDE

relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities

Context of and specific resources for assessment:

- This unit can be assessed independently, however holistic assessment practice with other community services units of competency is encouraged
- Resources required for assessment of this unit include access to:
 - a relevant workplace or an appropriately simulated environment where assessment may take place

Method of assessment:

- In cases where the learner does not have the opportunity to cover all relevant aspects in the work environment, the remainder should be assessed through realistic simulations, projects, previous relevant experience or oral questioning on 'What if?' scenarios
- Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on Essential knowledge and skills and consideration of required attitudes
- Where performance is not directly observed and/or is required to be demonstrated over a 'period of time' and/or in a 'number of locations', any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional

RANGE STATEMENT

contexts.

Augmentative and alternative communication includes:

- Augmentative and alternative communication (AAC) is used to increase understanding of spoken language and to augment or supplement expression
- AAC systems comprise communication aids, symbols, strategies and techniques or methods

 - via a keyboard, pointed index finger or switching
- Communication strategies / devices may range from high technology (use of computers and voice output communication devices) through to pointing with a fist to a communication board

Understanding AAC systems may include:

- Choice, selection and use of a symbol system and appropriate communication strategy/device
- Being an effective communication partner by being familiar with a range of AAC strategies/devices
- Being familiar with range of strategies required to implement a system effectively

Assessment tools include:

- Observation checklists such as Checklist of Communication Competence
- Assessment tools specific to the organisation
- Assessment tools specified by the specialist

RANGE STATEMENT

Professionals and other service providers may include:

- Speech pathologist
- Psychologist
- Carer/family
- Education staff
- Support staff
- Occupational therapist

Different strategies and devices may include, but are not limited to:

- Chat books
- Choice making using object symbols
- Choice making using photos or line drawings
- Choice making using real life experiences

Monitoring and review include:

- Observations made by self or others
- Reviewing documentation detailing use of communication strategy/strategies as described in communication support plan
- Informal and formal discussions with client and relevant others regarding effectiveness of communication strategy
- Client planning meetings

Appropriate information may include:

- Essential communication requirements in a specific setting, including:
 - work
 - school
 - home

RANGE STATEMENT

- day service
- shops
- Communication barriers in a specific setting, including:
 - access to communication partners familiar with AAC strategies
 - lack of trained staff
 - lack of awareness by staff
 - noise and environmental distractions
 - lack of privacy and space
 - comfort and positioning requirements

Environmental factors that optimise communication opportunities may include:

- Comfort
- Ready access to communication aids
- An environment that fosters communication

Environmental factors that optimise the use of the communication strategy may include:

- Appropriately trained staff
- Appropriately trained carers
- Consistency across different settings
- Time for communication

Appropriate person may include:

- Speech pathologist
- Psychologist
- Carer/family
- Education staff
- Support staff
- Occupational therapist
- Supervisor
- Disability worker

Other users may include:

- Work
- School
- Home
- Day service
- Shops
- Community services
- Recreational facilities

RANGE STATEMENT

Barriers may include but are not limited to:

- Opportunity barriers (those outside the person) such as policy, practice, attitude, knowledge and skill
- Access barriers (relating to the person) such as linguistic, cognitive, motor and sensory skills
- Note frameworks such as:
 - the 'Participation Model' by Beukelman and Mirenda is used within the AAC community to ascertain barriers in access and opportunity [Ref 'Augmentative and Alternative Communication: Supporting Children and Adults with Complex Communication Needs' David R. Beukelman and Pat Mirenda 2005]

Descriptor

This unit deals with the cultural awareness required for effective communication and cooperation with persons of diverse cultures

Application of the Unit

Application

Work will be within a prescribed range of functions involving known routines and procedures with some accountability for the quality of outcomes

The workplace context may be:

- Specific community
- Community or regional service
- Department of a large institution or organisation
- Specialised service or organisation

Application of this unit should be contextualised to reflect any requirements, issues and practices specific to each workplace

confidence

3.3 Where language barriers exist, make efforts to communicate in the most effective way possible

3.4 Seek assistance from interpreters or other persons as required

4. Resolve cross-cultural misunderstandings

4.1 Identify issues that may cause conflict

4.2 If difficulties or misunderstandings occur, consider the impact of cultural differences

4.3 Make an effort to sensitively resolve differences, taking account of cultural considerations

4.4 Address any difficulties with appropriate people and seek assistance when required

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level required for this unit.

Essential knowledge:

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes knowledge of:

- Availability of resources and assistance within and external to the organisation in relation to cultural diversity issues
- Own cultural conceptions and pre-conceptions and perspective of diverse cultures
- Recognition of cultural diversity in Australian society with many individuals living in many cultures
- Recognition of cultural influences and changing cultural practices in Australia and its impact on diverse communities that make up Australian society
- Recognition of culture as a dynamic social phenomenon

REQUIRED SKILLS AND KNOWLEDGE

- Recognition of culture as a range of social practices and beliefs evolving over time
- Recognition of impact of cultural practices and experiences on personal behaviour, interpersonal relationships, perception and social expectations of others
- Recognition of the unique way individuals may experience a culture and respond to past experiences
- Recognition that the word 'normal' is a value-laden, excluding concept that often precludes acknowledgment of the diversity of people, their life experiences and situations
- The principles of equal employment opportunity, sex, race, disability, anti-discrimination and similar legislation and the implications for work and social practices
- The role and use of language and cultural interpreters

Essential skills:

It is critical that the candidate demonstrate the ability to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the identified work role

This includes the ability to:

- Apply culturally respectful practices in the workplace and to demonstrate respect and inclusiveness of culturally diverse people in all work practices
- Form effective workplace relationships with co-workers and colleagues of diverse backgrounds and cultures
- Participate in identifying and implementing culturally safe work practices
- Respond respectfully and sensitively to cultural beliefs and practices that may cause harm
- Sensitively and respectfully communicate with persons of diverse backgrounds and cultures
- Use basic conflict resolution and negotiation skills
- Use effective strategies to address and eliminate discrimination and bias in the workplace

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate this competency unit:

- The individual being assessed must provide evidence of specified essential knowledge as well as skills
- This unit is most appropriately assessed in the workplace or a simulated workplace environment under the normal range of work conditions
- Assessment should be conducted on more than one occasion to cover a variety of circumstances to establish consistency
- Holistic assessment of this competency unit is encouraged, to ensure application of these skills in conjunction with specific work functions but the unit may be delivered and assessed independently

Access and equity considerations:

- All workers in the health industry should be aware of access and equity issues in relation to their own area of work
- All workers should develop their ability to work in a culturally diverse environment
- In recognition of particular health issues facing Aboriginal and Torres Strait Islander communities, workers should be aware of cultural, historical and current issues impacting on health of Aboriginal and Torres Strait Islander people
- Assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on health of Aboriginal and/or Torres Strait Islander clients and communities

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional

RANGE STATEMENT

contexts.

- Work practices may relate to:*
- Dealing with persons of diverse gender, sexuality and age
 - Compliance with duty of care policies of the organisation
 - Collection and provision of information
 - Communication
 - Provision of assistance
 - Contact with families and carers
 - Physical contact
 - Care of deceased persons
 - Handling personal belongings
 - Provision of food services

Work practices that are culturally appropriate would be non-discriminatory and free of bias, stereotyping, racism and prejudice.

- Cultural diversity may include:*
- Ethnicity
 - Race
 - Language
 - Cultural norms and values
 - Religion
 - Beliefs and customs
 - Kinship and family structure and relationships
 - Personal history and experience, which may have been traumatic
 - Gender and gender relationships
 - Age
 - Disability
 - Sexuality
 - Special needs

- Communication may be:*
- Verbal
 - Appropriate gestures and facial and physical expressions
 - Posture

RANGE STATEMENT

- Written
- Signage
- Through an interpreter or other person

Strategies to eliminate bias and discrimination may include:

- Cross cultural work teams
- Cross cultural employee representation on committees
- Workplace free of culturally insensitive literature, posters, signage
- Inclusion in decision-making

Unit Descriptor

Unit descriptor

This competency covers the solving of process and other problems, beyond those associated directly with the process unit/equipment, using structured process improvement tools to identify improvements and/or solve problems.

Application of the Unit

Application of this unit

The competency is typically performed by an experienced operator, team leader or supervisor.

Generally the person would be part of a team during the solving of complex or systemic problems and would be expected to perform all parts of this unit and at all times would be liaising and cooperating with other members of the team. This includes:

- using a range of formal problem solving techniques
- identifying and clarifying the nature of the problem
- devising the best solution
- evaluating the solution
- developing an implementation plan to rectify the problem.

This unit does not cover the solving of problems undertaken as part of the operator's normal role which is covered in the relevant operation competency unit.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify the problem.	1.1 Identify variances from normal operating parameters and product quality. 1.2 Define the extent, cause and nature of the problem by observation and investigation. 1.3 State and specify the problem clearly.
2. Determine fundamental cause of problem.	2.1 Identify possible causes based on experience and the use of problem solving tools/analytical techniques. 2.2 Develop possible cause statements. 2.3 Identify fundamental cause.
3. Determine corrective action.	3.1 Consider all possible options for resolution of the problem. 3.2 Consider strengths and weaknesses of possible options. 3.3 Determine corrective action to remove the problem and possible future causes. 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures. 3.5 Develop recommendations for ongoing monitoring

	and testing.
4. Communicate recommendations.	4.1 Prepare report on recommendations. 4.2 Present recommendations to appropriate personnel. 4.3 Follow up recommendations if required.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognise non-standard situations.

This unit of competency includes use of analytical techniques in problem solving such as:

- brainstorming
- fishbone diagrams/cause and effect diagrams
- process logic/process requirements
- logic tree
- similarity/difference analysis
- Pareto analysis
- force field/SWOT analysis
- flow charts
- control charts, runcharts and graphs
- scattergrams.

Action plans to solve problems are prepared including:

- priority requirements
- measurable objectives
- resource requirements
- methods for reaching objectives
- timelines
- coordination and feedback requirements
- safety requirements
- risk assessment
- environmental requirements.

Language, literacy and numeracy requirements

This unit requires the ability to read and interpret typical product specifications, job sheets and material labels as provided to operators.

Writing is required to the level of report writing and completing workplace forms.

Basic numeracy is also required, eg to interpret quality data and graphs.

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Overview of assessment

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is demonstrated in the knowledge and skills defined in this unit. These may include the ability to apply and explain:

- relevant equipment and operational processes
- enterprise policies and procedures
- enterprise goals, targets and measures
- enterprise quality, OHS and environmental requirements
- principles of decision-making strategies and techniques
- enterprise information systems and data collation
- industry codes and standards.

Consistent performance should be demonstrated. For example, look to see that:

- problems are recognised and clarified
- possible causes are identified, based on experience and use of analytical techniques in solving the problem, including:
 - identifying variations
 - identifying cause and effect
 - separating single problems from multiple problems
 - recognising recurring problems.
- fundamental cause of process or equipment faults is determined
- corrective/preventative implementation plans are developed to avoid recurrence of the problem
- implementation plan is presented to relevant personnel.

Assessment method and context

Assessment will occur on the job or in a simulated workplace.

Competence in this unit may be assessed:

- in a situation allowing the generation of evidence of the ability to recognise and respond to problems
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

Specific resources for assessment

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

Range Statement

RANGE STATEMENT

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

Context

The competency unit applies to a wide range of processes and equipment. The process manufacturing technical units of competency include a problem solving element where problems specific to that competency unit are to be resolved. This competency unit is where structured problem solving techniques are to be applied more broadly, or with greater depth/rigour than is implied by the problem solving element of the technical units.

In large plants or manufacturing organisations with multiple processes, it may apply to more than one process if those processes interact with each other. It applies to all operators across all functions.

Procedures

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

Hazards

Typical hazards include leaks, spillages and equipment hazards that can occur during the walk-through of a plant.

Problems

'Anticipate and solve problems' means resolve a wide range of routine and non-routine problems, using product and process knowledge to develop solutions to problems which do not have a known solution/a solution recorded in the procedures.

Typical process and product problems may include:

- non-routine process and quality problems
- equipment selection, availability and failure
- teamwork and work allocation problems
- safety and emergency situations and incidents.

Unit Descriptor

This unit covers the activities required to undertake strategic analysis and detection of corruption or fraudulent activities. It includes hypothesising fraud and corruption situations, initiating projects to test newly identified risk areas, analysing trends in fraud and corruption activities and investigations, recommending courses of action and providing information on recommended actions.

Fraud in the unit title incorporates both *fraud and corruption*.

In practice, anticipating and detecting possible fraud and corruption activity may overlap with other generalist or specialist public sector workplace activities such as acting ethically, promoting compliance with legislation, delivering client services, conducting fraud and corruption risk assessment, etc.

This unit replaces and is equivalent to PSPFRAU502A Anticipate and detect possible fraud activity.

- 3.4 Discussion with colleagues and other experienced organisational staff is used as additional source of information on trends.
- 3.5 Networks are used to provide useful contacts and information for investigation in accordance with *legislative requirements*.
- 3.6 Performance reports are produced which identify trends in fraud and corruption activities and investigations.
- 4. Recommend course/s of action**
- 4.1 All relevant elements are considered during *evaluation*, prior to recommending course of *action*.
- 4.2 Investigation targets are identified, and suggestions for future areas of investigation are referred to management.
- 4.3 *Recommendations* are made for changes to organisational controls and initiatives to target potential trouble spots.
- 4.4 Data is checked for reliability, and practical recommendations are made providing management with feasible options.
- 4.5 Management issues and concerns are balanced against public interest and political concerns when framing recommendations.
- 4.6 Recommendations are made that balance operational demands against contributions to strategic plan.
- 5. Provide information on recommended actions**
- 5.1 Reports are provided containing suggestions for actions and sufficient supporting information for management to adequately resource future projects.
- 5.2 Advice is provided regarding appropriate controls and initiatives required to address fraud and corruption.
- 5.3 Operational briefings and other presentations are prepared and given as required.
- 5.4 Ad hoc opportunities to explain operational risks are taken advantage of, as they arise.
- 5.5 Information is given in terms that clearly explain the nature of possible risk, with possible solutions outlined.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing trends in fraud and corruption activities and investigations
- hypothesising fraud and corruption situations

- using a range of communication and negotiation styles to suit different audiences and purposes
- undertaking the timely detection of fraud and corruption and the identification of fraud and corruption trends
- effectively utilising staff and other personnel in the investigation of trends
- explaining complex concepts and recommendations relating to risk control
- responding to diversity, including gender and disability
- applying occupational health and safety and environmental procedures in the context of fraud and corruption anticipation and detection

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- agency structure and core business activities
- legislation, policies and procedures relating to anticipation and detection of fraud and corruption activities, including privacy and confidentiality requirements
- agency procedures relating to public interest disclosures, protected disclosures or whistleblowing legislation
- fraud and corruption and how they relate to the specific functions and activities of the organisation, together with an understanding of ethical standards required by the organisation of its staff, contractors and suppliers
- jurisdictional fraud and corruption control requirements
- agency fraud/corruption control plan
- internal and external reporting guidelines
- best practice initiatives in fraud and corruption control
- anti-discrimination and diversity legislation

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit: *Nil*
- *Co-requisite* units that must be assessed with this unit: *Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:

 - PSPFRAU504B Conduct fraud risk assessments
 - PSPFRAU505B Develop fraud control plans

- PSPGOV502B Develop client services
- PSPGOV504B Undertake research and analysis
- PSPLEGN501B Promote compliance with legislation in the public sector
- PSPREG502A Coordinate investigation processes

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- detection of possible fraud and corruption activity in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy and procedures relating to fraud and corruption control, including privacy and confidentiality requirements
- methods for anticipating and detecting possible fraud and corruption activity
- fraud and corruption control guidelines
- fraud investigation standards
- agency procedures relating to public interest disclosures, protected disclosures or whistleblowing legislation
- public sector values and codes of conduct
- case studies and workplace scenarios to capture the range of fraud and corruption situations likely to be encountered

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when anticipating and detecting possible fraud and corruption activity, including coping with difficulties, irregularities and breakdowns in routine
- detection of possible fraud and corruption activity in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people

- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. for various audiences.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- planning, analysis and evaluation relating to fraud and corruption risk assessment
- using a range of communication, consultation and negotiation styles to suit different audiences and purposes
- providing advice on complex documents such as legislation, policy and recommendations relating to fraud and corruption risk control
- differentiating between the inherent risks and the effectiveness of controls in place
- managing contractors if the fraud and corruption risk assessment is outsourced
- responding to diversity, including gender and disability
- applying occupational health and safety and environmental procedures in the context of fraud and corruption risk assessment

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- fraud and corruption and how they relate to the specific functions and activities of the organisation together with an understanding of ethical standards required by the organisation of its staff, contractors and suppliers
- jurisdictional fraud and corruption control requirements
- agency fraud and corruption control policy
- fraud and corruption risk management methodology
- agency structure and core business activities
- current fraud and corruption control plan
- relationship of the risk methodology to the fraud and corruption control strategy
- fraud and corruption risk factors in the organisation
- anti-discrimination and diversity legislation
- legislation, policies and procedures relating to fraud and corruption risk assessment
- Australian and New Zealand standards - AS/NZS 4360:1999 or as revised

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Unit Descriptor

This unit covers planning actions in response to the organisation's fraud/corruption control strategy, either the preparation of a specific fraud/corruption control plan based on a risk assessment or as an extension of the organisation's documentation of its fraud/corruption control strategy. The unit includes identifying areas for action, gaining commitment to the plan, identifying qualitative and quantitative performance indicators, and documenting and disseminating the fraud/corruption control plan.

Fraud in the unit title incorporates both *fraud and corruption*.

In practice, developing fraud control plans may overlap with other generalist or specialist public sector workplace activities such as acting ethically, promoting compliance with legislation, delivering client services, anticipating fraud activity, conducting fraud risk assessments, etc.

This unit replaces and is equivalent to *PSPFRAU505A Develop fraud control plan*.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- identifying areas for action based upon an analysis and synthesis of objectives and information from the fraud/corruption control strategy, the processes established to identify fraud and corruption vulnerability, and agency corporate plans
- planning, analysis and evaluation relating to fraud and corruption risk control
- using a range of communication, consultation and negotiation styles to suit different audiences and purposes
- applying complex documents such as legislation, guidelines and standards
- managing contractors if the fraud/corruption risk assessment is outsourced

- responding to diversity, including gender and disability
- applying occupational health and safety and environmental procedures in the context of fraud and corruption control

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- jurisdictional fraud and corruption control requirements
- agency fraud and corruption control strategy and agency processes to measure fraud and corruption vulnerability
- agency structure and core business activities
- fraud and corruption risk factors in the organisation, agency clients, and any history of fraud and corruption in or against the agency
- the processes established to identify fraud and corruption vulnerability and agency corporate plans
- anti-discrimination and diversity legislation
- legislation, policies and procedures relating to fraud and corruption control

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Unit Descriptor

This unit covers the provision of on-the-job coaching to colleagues. This unit has no parity with National Workplace Trainer standards, but reflects the situation in many workplaces where formal and informal on-the-job coaching is extremely common. It includes preparation for coaching, and provision of and follow-up of coaching.

In practice, the provision of workplace coaching may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, applying government processes, gathering and analysing information, using resources, promoting diversity, conducting awareness sessions, etc.

This unit is one of 4 units of competency in the *Working in Government* Competency Field that deal with coaching/mentoring. Related units are:

Unit Descriptor

This unit covers achievement of operational results and effective working relationships through leadership, feedback and support of individuals in a workgroup that may exist in the workplace, be formed for a special purpose or project, or consist of community members, volunteers, inter-agency members, etc. It includes facilitating commitment to objectives and required standards; contributing to the development of a cooperative, high performance workgroup; giving and receiving feedback on performance; supporting and participating in development activities; and providing leadership, direction and guidance in the workgroup.

In practice, leading a workgroup may overlap with other generalist or specialist public sector work activities such as acting ethically, complying with legislation, providing client service, developing policy, building community relationships, improving workplace legislative performance, providing technical expertise, etc.

This is one of 6 units in the *Working in Government* and *Management* Competency Fields that deal with working with others. Related units are:

- PSPGOV302B Contribute to workgroup activities
- PSPGOV404B Develop and implement work unit plans
- PSPGOV516A Develop and use emotional intelligence
- PSPGOV604A Foster leadership and innovation

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, regulations, policies, procedures and guidelines relating to injury management
- privacy legislation
- freedom of information legislation
- procedures to ensure confidentiality and security of information
- physiology, bio-mechanics and ergonomic principles
- Australian standards relating to workplace assessments
- risk assessment in the context of workplace safety and worker capacity
- safety and ergonomic guidelines
- equal employment opportunity, equity and diversity principles
- public sector legislation such as occupational health and safety and environment in the context of injury management

Skill requirements

Look for evidence that confirms skills in:

- applying legislation, regulations and policies relating to situational workplace assessments
- assessing workplaces
- liaising and negotiating with employers/supervisors for suitable/alternative duties
- reading and applying complex information such as legislation and regulations
- using communication including establishing rapport with a diverse range of people, engaging the injured worker
- applying results to the return to work process
- responding to diversity, including gender and disability
- applying procedures relating to occupational health and safety and environment in the context of injury management

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients
 - PSPGOV406B Gather and analyse information
 - PSPGOV408A Value diversity
 - PSPGOV422A Apply government processes
 - PSPLEGN401A Encourage compliance with legislation in the public sector

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- situational workplace assessments conducted in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, policy, procedures and protocols relating to injury management
- case studies and workplace scenarios to capture the range of situations likely to be encountered when conducting situational workplace assessments

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when conducting situational workplace assessments, including coping with difficulties, irregularities and breakdowns in routine
- situational workplace assessments conducted in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Information may include:

- personnel in the workplace
- workplace dynamics
- type of industry/production
- external demands on employer
- access requirements
- safety
- security
