Assessment Requirements for FWPFIR2001 Follow fire prevention procedures

Release: 1

Assessment Requirements for FWPFIR2001 Follow fire prevention procedures

Modification History

Release	Comments
Release 1	This version released with Forest and Wood Products Training Package Version 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed each of the following fire prevention tasks while undertaking routine work activities in a daily forestry operation:

- checked serviceability of personal protective equipment and firefighting equipment
- identified potential ignition sources for the operation and followed workplace procedures to minimise fire risks
- checked fire weather information and warnings and assessed potential impacts/risks on forestry operations
- participated in routine fire risk reduction measures including site housekeeping practices and followed fire prevention safety signs and symbols during the work activities.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- basic features of fire risk management plan
- fire weather and impacts/risks on forestry operations
- fire weather warnings, including requirements of Fire Permit Periods and Total Fire Ban
- work practices designed to eliminate or minimise the risk of fire
- elements of fire
- fire hazards in the workplace
- fire prevention safety signs and symbols
- type and use of personal protective and firefighting equipment
- workplace housekeeping procedures designed to eliminate or minimise the risk of fire
- maintenance procedures designed to eliminate or minimise the risk of fire
- work practices designed to eliminate or minimise the risk of fire
- signs of fire

- procedures for safe handling, use, transport and storage of flammable liquids and gases in the workplace
- procedures for recording and reporting fire risk and incidents.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a forest or wood products work environment or an environment that accurately represents workplace conditions
- resources, equipment, and materials:
 - personal protective clothing
 - firefighting equipment and materials
 - fire prevention signs and symbols
 - fire weather warnings
 - tools and equipment required for housekeeping, fuel modification or reduction and other routine fire risk reduction activities
- specifications:
 - fire risk management plan
 - workplace fire prevention and emergency procedures
 - workplace housekeeping and maintenance procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
