**Assessment Requirements for HLTENN022
Contribute to the registration, eligibility
and assessment of donors**

Release: 1

Assessment Requirements for HLTENN022 Contribute to the registration, eligibility and assessment of donors

Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Merged HLTEN521B and HLTEN522C. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Removed pre-requisites. Significant change to knowledge evidence.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken work in adherence with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- registered and assessed 3 people as donors for blood or blood products.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- apheresis – the process of ‘skimming off’ the stem cells from blood to be used for transplant or stored in frozen form until needed
- organisation policy and procedures, including standard operating procedures (SOPs)
- documentation and components of donor declaration form
- importance and potential impact of the quality of the donation, and the reasons for careful selection of donors of blood or blood components including:
 - infectious diseases and their incubation periods
 - age, height and weight
 - health of donor including recent surgery, invasive procedures, immunisations, injury or illness
 - family health history

- frequency of donation
- geographical locations prior to donation which require special consideration
- lifestyle
- medications
- occupational activities that are considered hazardous
- recreational activities that are considered hazardous
- workers compensation
- safety of blood supply
- safety of recipients
- safety of service provided to customers
- safety of staff
- production of a quality product
- types of donations including:
 - plasma
 - platelet
 - red blood cell plasma
- purpose and use of apheresis donations including timeframe requirements
- purpose and use of blood and blood products, including types and functions of infusion and transfusion
- safe disposal, and minimisation of waste of resources resulting from collection of unsuitable donations
- World Health Organisation guidelines including:
 - selection of blood donors
 - international travel and health vaccination requirements
- Australian code of good manufacturing practice for human blood and blood components, human tissues and human cellular therapy products
- Australian Red Cross service – for blood and blood products donations
- monthly index of therapeutic agents (MIMS)
- National Blood Transfusion Committee – safe transfusion practice.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

In addition, assessors must hold current registration as a Registered Nurse with Nursing and Midwifery Board of Australia.
