remote setting**

**Release: 1**

## Assessment Requirements for HLTENN032 Apply nursing practice in the rural and remote setting

### Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Removed pre-requisites. Significant changes to the elements and performance criteria. New evidence requirements for assessment, including volume and frequency requirements. Significant change to knowledge evidence.</p> <p>Supersedes HLTEN618C</p>

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken work in accordance with Nursing and Midwifery Board of Australia professional practice standards, codes and guidelines
- worked as part of the multidisciplinary health care team within scope of practice in the Australian rural and remote workplace setting for at least 3 of each of the following situations:
  - emergency situations involving stabilisation and transport
  - non-emergency situations
- responded to the required clinical interventions for 3 people to treat and manage the person's condition, illness or injury as authorised by medical practitioner via communication modes such as phone, video or radio
- conducted 1 activity in workplace with the multidisciplinary health care team that supports improved outcomes of nursing practice in rural and remote contexts
- conducted 1 health education session to engage the community in development and ownership of health programs that meet locally specific health needs.

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- changing demands for services in rural and remote communities in Australia and National E-Health Strategy
- current economic, political and socio-economic factors impacting rural and remote health care including:
  - funding arrangements including federal, State/ Territories and local government that impact availability of health services and health programs
  - expansion of scope of practice for nurses
  - shortage in health workforce
  - ageing population
  - prevalence of chronic disease
  - social disadvantage
- organisations in rural and remote areas and models of healthcare provided including:
  - Consumer Directed Care (CDC)
  - mobile health service
  - Person-Centred Care (PCC)
  - Primary Health Care (PHC)
  - tertiary level care (community or regional hospital)
- nursing practice models used in rural and remote contexts:
  - team nursing or 'shared care' approach
  - total patient care or patient focused care
  - quality-caring model (used in acute care)
  - process engagement or community health nursing (used in chronic disease management)
- assessment tools, techniques, procedures and nursing guidelines used in rural and remote contexts
- remote considerations in the provision of nursing care including:
  - how and when to access emergency response services
  - communication systems, equipment and methods available in remote situations
- emergency situations and the ways in which the care approach may be adjusted in the rural and remote context
- non-emergency situations and the ways in which the care approach may be adjusted in the rural and remote context
- emerging health technologies, their features and how they are used and accessed:
  - Telehealth services
  - mobile health services with specialised diagnostic equipment
  - hospital in the home services
- types of participants in a rural and remote multidisciplinary health care team and their roles:
  - Aboriginal health practitioner
  - community care worker
  - health care assistants

- medical practitioners
- nurse practitioners
- pharmacists
- physiotherapists and occupational therapist
- registered nurses and registered midwives
- social workers
- options for transport may include emergency services using road, air or water
- sources of information on best practice nursing in rural and remote settings
- organisational processes and how they may be adapted and used in rural and remote context such as:
  - risk identification
  - and risk management processes
- community-based health services, public health services, social health care programs and health promotion programs
- community health education – health promotion activities, social media content and interactions, health information literature
- local and community culture including culturally appropriate health promotion activities.

## Assessment Conditions

Skills must have been demonstrated in the workplace with the addition of simulations and scenarios where the full range of contexts and situations cannot be provided in the workplace. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources in line with the Australian Nursing and Midwifery Accreditation Council's Standards including:
  - progressive notes of a de-identified person's medical history
  - risk assessment tools or protocols for rural and remote health environment
  - nursing guidelines and organisation policies and procedures on which the candidate bases the care planning
- modelling of industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition, assessors must hold a current registration as a registered nurse with Nursing and Midwifery Board of Australia.
