

**Australian Government**

# **ICA11 Information and Communications Technology Training Package**

**Release: 1.0**

## CONTENTS

<b>ICA11 Information and Communications Technology Training Package.....</b>	<b>14</b>
<b>Imprint .....</b>	<b>14</b>
<b>Training Package Details .....</b>	<b>15</b>
<b>Preliminary Information .....</b>	<b>16</b>
<b>Overview.....</b>	<b>125</b>
<b>Qualifications Framework.....</b>	<b>135</b>
<b>Employability Skills.....</b>	<b>144</b>
<b>Assessment Guidelines.....</b>	<b>149</b>
<b>Competency Standards .....</b>	<b>178</b>
<b>Appendices .....</b>	<b>185</b>
<b>ICA10111 Certificate I in Information, Digital Media and Technology .....</b>	<b>200</b>
<b>ICA20111 Certificate II in Information, Digital Media and Technology.....</b>	<b>203</b>
<b>ICA30111 Certificate III in Information, Digital Media and Technology .....</b>	<b>208</b>
<b>ICA40111 Certificate IV in Information Technology.....</b>	<b>214</b>
<b>ICA40211 Certificate IV in Information Technology Support.....</b>	<b>222</b>
<b>ICA40311 Certificate IV in Web-Based Technologies.....</b>	<b>228</b>
<b>ICA40411 Certificate IV in Information Technology Networking .....</b>	<b>233</b>
<b>ICA40511 Certificate IV in Programming .....</b>	<b>239</b>
<b>ICA40611 Certificate IV in Information Technology Testing .....</b>	<b>244</b>
<b>ICA40711 Certificate IV in Systems Analysis and Design.....</b>	<b>248</b>
<b>ICA40811 Certificate IV in Digital Media Technologies .....</b>	<b>252</b>
<b>ICA40911 Certificate IV in Digital and Interactive Games.....</b>	<b>257</b>
<b>ICA41011 Certificate IV in Computer Systems Technology .....</b>	<b>262</b>
<b>ICA50111 Diploma of Information Technology .....</b>	<b>268</b>
<b>ICA50211 Diploma of Digital and Interactive Games .....</b>	<b>276</b>
<b>ICA50311 Diploma of Information Technology Systems Administration .....</b>	<b>282</b>
<b>ICA50411 Diploma of Information Technology Networking.....</b>	<b>288</b>
<b>ICA50511 Diploma of Database Design and Development.....</b>	<b>294</b>
<b>ICA50611 Diploma of Website Development .....</b>	<b>299</b>
<b>ICA50711 Diploma of Software Development.....</b>	<b>305</b>
<b>ICA50811 Diploma of Systems Analysis and Design.....</b>	<b>310</b>
<b>ICA50911 Diploma of Digital Media Technologies .....</b>	<b>315</b>
<b>ICA60111 Advanced Diploma of Information Technology .....</b>	<b>320</b>
<b>ICA60211 Advanced Diploma of Network Security .....</b>	<b>326</b>
<b>ICA60311 Advanced Diploma of Information Technology Business Analysis .....</b>	<b>333</b>
<b>ICA60411 Advanced Diploma of Information Technology Project Management.....</b>	<b>338</b>
<b>ICA60511 Advanced Diploma of Computer Systems Technology.....</b>	<b>343</b>
<b>ICA70111 Vocational Graduate Certificate in Information Technology and Strategic Management.....</b>	<b>349</b>
<b>ICA70211 Vocational Graduate Certificate in Information Technology Sustainability ..</b>	<b>354</b>
<b>ICASS00001 Application Development Specialist Skill Set.....</b>	<b>362</b>
<b>ICASS00002 Basic Application Development Programmer Skill Set.....</b>	<b>363</b>
<b>ICASS00003 Basic Computer Hardware and System Troubleshooting Skill Set .....</b>	<b>364</b>
<b>ICASS00004 Basic Web Development Specialist Skill Set.....</b>	<b>366</b>
<b>ICASS00005 Certified IT Network Enterprise, Security or Server Administrator Skill Set</b>	<b>367</b>
<b>ICASS00006 Certified Network Associate Technology Specialist Skill Set.....</b>	<b>368</b>
<b>ICASS00007 Certified Network Professional Specialist - Voice Skill Set .....</b>	<b>369</b>
<b>ICASS00008 Certified Network Professional Specialist - Wireless Skill Set.....</b>	<b>370</b>
<b>ICASS00009 Certified Network Professional Specialist Skill Set.....</b>	<b>371</b>

ICASS00010 Certified Networking Technician Skill Set.....	372
ICASS00011 Certified Security and Architect Specialist Skill Set .....	373
ICASS00012 Certified Technician or Technology Specialist - Infrastructure Configuration Skill Set.....	374
ICASS00013 Certified Technology Specialist - Graphical User Interfaces Skill Set.....	375
ICASS00014 Certified Web Design Specialist Skill Set.....	376
ICASS00015 Computing and Application Fundamentals Skill Set .....	377
ICASS00016 Computing Fundamentals Skill Set.....	378
ICASS00017 Digital Literacy - eCitizen Skill Set.....	379
ICASS00018 Digital Literacy Skill Set.....	380
ICASS00019 Hardware Technician Skill Set .....	381
ICASS00020 Internetworking Systems Coordinator-Administrator Skill Set.....	382
ICASS00021 Rich Interactive Content Specialist Skill Set.....	383
ICASS00022 System and Hardware Plus Technician Skill Set.....	384
ICASS00023 System and Network Plus Technician Skill set.....	385
ICASS00024 Virtualisation Specialist Skill Set.....	386
ICASS00025 Visual Communications Specialist Skill Set .....	387
ICASS00026 Website Administration Specialist Skill Set .....	388
ICADBS401A Identify physical database requirements.....	389
ICADBS402A Complete database backup and restore .....	397
ICADBS403A Create basic databases.....	405
ICADBS404A Identify and resolve common database performance problems .....	410
ICADBS407A Monitor physical database implementation .....	418
ICADBS408A Link an RFID system to a database .....	423
ICADBS409A Monitor and administer a database .....	430
ICADBS412A Build a database .....	438
ICADBS501A Monitor and improve knowledge management system .....	446
ICADBS502A Design a database .....	451
ICADBS503A Create a data warehouse.....	459
ICADBS504A Integrate database with a website .....	469
ICADBS601A Build a data warehouse.....	474
ICADBS602A Develop a knowledge management strategy.....	480
ICADBS603A Determine suitability of database functionality and scalability .....	486
ICADMT401A Create visual design components for digital media.....	492
ICADMT402A Produce interactive animation.....	500
ICADMT403A Produce and edit digital images.....	507
ICADMT501A Incorporate and edit digital video .....	515
ICAGAM301A Apply simple modelling techniques.....	523
ICAGAM302A Design and apply simple textures to digital art .....	532
ICAGAM303A Review and apply the principles of animation.....	542
ICAGAM401A Produce an interactive game .....	551
ICAGAM402A Identify and apply principles of games design and game playing .....	563
ICAGAM403A Create design documents for interactive games .....	571
ICAGAM404A Apply artificial intelligence in game development.....	583
ICAGAM405A Write story and content for digital games .....	591
ICAGAM406A Create visual design components for interactive games .....	601
ICAGAM407A Write scripts for interactive games .....	609
ICAGAM408A Use 3-D animation interface and toolsets .....	619
ICAGAM409A Create 3-D characters for interactive games.....	629
ICAGAM410A Develop 3-D components for interactive games.....	638
ICAGAM412A Design interactive media.....	645
ICAGAM413A Design and create 3-D digital models .....	653
ICAGAM414A Create audio for digital games .....	662

ICAGAM415A	Develop simple environments for 3-D games.....	670
ICAGAM416A	Prepare and complete image rendering processes.....	680
ICAGAM417A	Apply digital effects to interactive products.....	688
ICAGAM418A	Use simple modelling for animation.....	694
ICAGAM419A	Build a database to support a computer game .....	706
ICAGAM501A	Create design concepts for digital games and 3-D media.....	717
ICAGAM503A	Create a complex 3-D interactive computer game.....	728
ICAGAM504A	Manage interactive media production.....	741
ICAGAM506A	Create complex code for mobile game devices.....	749
ICAGAM507A	Develop intermediate 3-D software for games and interactive media.....	758
ICAGAM508A	Develop complex 3-D software for games and interactive media.....	766
ICAGAM509A	Design interactive 3-D applications for scientific and mathematical modelling.....	775
ICAGAM510A	Prepare games for different platforms and delivery modes.....	783
ICAGAM511A	Manage testing of games and interactive media.....	790
ICAGAM512A	Create and implement designs for a 3-D games environment.....	799
ICAGAM514A	Design and create models for a 3-D and digital effects environment .....	806
ICAGAM515A	Design and create advanced particles, fluids and bodies for 3-D digital effects.....	815
ICAGAM516A	Animate a 3-D character for digital games.....	827
ICAGAM517A	Produce a digital animation sequence .....	837
ICAGAM518A	Animate physical attributes of models and elements .....	846
ICAGAM519A	Manage technical art and rigging in 3-D animation.....	856
ICAGAM520A	Create and combine 3-D digital games and components .....	865
ICAGAM521A	Create interactive 3-D environments for digital games .....	873
ICAGAM522A	Complete digital editing for the 3-D and digital effects environment .....	886
ICAGAM523A	Collaborate in the design of 3-D game levels and environments.....	895
ICAGAM524A	Integrate multiple data sources into interactive 3-D environments .....	906
ICAGAM525A	Apply digital texturing for the 3-D environment in digital games .....	916
ICAGAM526A	Create complex 3-D characters for games.....	923
ICAGAM527A	Integrate database with online game.....	934
ICAGAM528A	Create games for mobile devices.....	942
ICAGAM529A	Analyse business opportunities in the digital games environment .....	955
ICAGAM530A	Develop and implement physics in a 3-D digital game.....	965
ICAGAM531A	Complete compositing to create elements for the 3-D and digital effects environment.....	974
ICAICT101A	Operate a personal computer .....	983
ICAICT102A	Operate word-processing applications.....	993
ICAICT103A	Use, communicate and search securely on the internet.....	1001
ICAICT104A	Use digital devices .....	1013
ICAICT105A	Operate spreadsheet applications.....	1022
ICAICT106A	Operate presentation packages.....	1030
ICAICT107A	Use personal productivity tools .....	1038
ICAICT108A	Use digital literacy skills to access the internet.....	1044
ICAICT201A	Use computer operating systems and hardware .....	1055
ICAICT202A	Work and communicate effectively in an IT environment.....	1063
ICAICT203A	Operate application software packages .....	1071
ICAICT204A	Operate a digital media technology package .....	1082
ICAICT205A	Design basic organisational documents using computing packages .....	1090
ICAICT206A	Install software applications.....	1095
ICAICT207A	Integrate commercial computing packages.....	1102
ICAICT208A	Operate accounting applications .....	1107
ICAICT209A	Interact with ICT clients .....	1116

ICAICT210A Operate database applications.....	1122
ICAICT211A Identify and use basic current industry-specific technologies.....	1130
ICAICT212A Incorporate Indigenous needs and perspectives into IT environment.....	1136
ICAICT301A Create user documentation .....	1144
ICAICT302A Install and optimise operating system software .....	1151
ICAICT303A Connect internal hardware components.....	1160
ICAICT304A Implement system software changes.....	1171
ICAICT305A Identify and use current industry-specific technologies.....	1179
ICAICT306A Migrate to new technology .....	1186
ICAICT307A Customise packaged software applications for clients .....	1193
ICAICT308A Use advanced features of computer applications .....	1200
ICAICT401A Determine and confirm client business requirements .....	1207
ICAICT402A Determine project specifications and secure client agreement.....	1214
ICAICT403A Apply software development methodologies.....	1220
ICAICT404A Use online learning tools.....	1227
ICAICT405A Develop detailed technical design.....	1233
ICAICT406A Build a graphical user interface.....	1239
ICAICT407A Maintain website information standards .....	1245
ICAICT408A Create technical documentation.....	1253
ICAICT409A Develop macros and templates for clients using standard products.....	1262
ICAICT410A Conduct post-implementation IT system reviews .....	1268
ICAICT411A Select and employ software and hardware testing tools.....	1273
ICAICT412A Coordinate and maintain IT work teams.....	1282
ICAICT413A Relate to clients on a business level.....	1289
ICAICT415A Provide one-to-one instruction .....	1295
ICAICT416A Contribute to the development of strategic plans .....	1302
ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards .....	1307
ICAICT418A Contribute to copyright, ethics and privacy in an IT environment.....	1313
ICAICT419A Work effectively in the digital media industry.....	1321
ICAICT420A Develop client user interface.....	1330
ICAICT421A Connect, maintain and configure hardware components.....	1337
ICAICT422A Participate in IT services.....	1347
ICAICT501A Research and review hardware technology options for organisations.....	1353
ICAICT502A Develop detailed component specifications from project specifications ..	1360
ICAICT503A Validate quality and completeness of system design specifications .....	1366
ICAICT504A Confirm transition strategy for a new system.....	1374
ICAICT505A Determine acceptable developers for projects .....	1381
ICAICT506A Implement process re-engineering strategies.....	1387
ICAICT507A Select new technology models for business .....	1392
ICAICT508A Evaluate vendor products and equipment.....	1398
ICAICT509A Gather data to identify business requirements .....	1404
ICAICT510A Determine appropriate IT strategies and solutions.....	1411
ICAICT511A Match IT needs with the strategic direction of the enterprise.....	1417
ICAICT512A Plan process re-engineering strategies for business .....	1422
ICAICT514A Identify and manage the implementation of current industry-specific technologies .....	1428
ICAICT515A Verify client business requirements.....	1435
ICAICT601A Develop IT strategic and action plans.....	1442
ICAICT602A Develop contracts and manage contracted performance .....	1450
ICAICT603A Manage the use of appropriate development methodologies.....	1455
ICAICT604A Identify and implement business innovation.....	1460
ICAICT605A Implement a knowledge management strategy .....	1466

ICAICT606A Develop communities of practice .....	1472
ICAICT608A Interact with clients on a business level.....	1479
ICAICT609A Lead the evaluation and implementation of current industry-specific technologies .....	1485
ICAICT610A Manage copyright, ethics and privacy in an IT environment.....	1492
ICAICT701A Lead research into identifying new marketplace opportunities .....	1500
ICAICT702A Direct ICT services.....	1505
ICAICT703A Endorse business plan components for a new initiative .....	1513
ICAICT704A Direct ICT in a supply chain .....	1520
ICAICT705A Direct ICT procurement.....	1528
ICAICT706A Direct outsourced ICT services .....	1536
ICAICT707A Direct research and business response to new ICT technology .....	1544
ICAICT708A Direct the development of a knowledge management strategy for a business.....	1556
ICAICT709A Facilitate business analysis .....	1564
ICAICT710A Synchronise IT projects.....	1572
ICAICT711A Manage an information architecture project.....	1578
ICAICT712A Develop a business intelligence framework.....	1584
ICAICT713A Manage IT services .....	1592
ICANWK301A Provide network systems administration.....	1597
ICANWK302A Identify and resolve network problems.....	1604
ICANWK303A Configure and administer a network operating system.....	1611
ICANWK304A Administer network peripherals .....	1622
ICANWK305A Install and manage network protocols .....	1631
ICANWK401A Install and manage a server.....	1637
ICANWK402A Install and configure virtual machines for sustainable ICT .....	1649
ICANWK403A Manage network and data integrity.....	1657
ICANWK404A Install, operate and troubleshoot a small enterprise branch network ..	1665
ICANWK405A Build a small wireless local area network .....	1673
ICANWK406A Install, configure and test network security .....	1681
ICANWK407A Install and configure client-server applications and services .....	1692
ICANWK408A Configure a desktop environment.....	1698
ICANWK409A Create scripts for networking .....	1709
ICANWK410A Install hardware to a network.....	1718
ICANWK411A Deploy software to networked computers .....	1726
ICANWK412A Create network documentation.....	1734
ICANWK414A Create a common gateway interface script .....	1741
ICANWK416A Build security into virtual private networks .....	1748
ICANWK417A Build an enterprise wireless network.....	1755
ICANWK418A Implement backbone technologies in a local area network .....	1765
ICANWK501A Plan, implement and test enterprise communication solutions.....	1770
ICANWK502A Implement secure encryption technologies .....	1778
ICANWK503A Install and maintain valid authentication processes.....	1786
ICANWK504A Design and implement an integrated server solution.....	1794
ICANWK505A Design, build and test a network server.....	1803
ICANWK506A Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network .....	1818
ICANWK507A Install, operate and troubleshoot medium enterprise routers .....	1826
ICANWK508A Install, operate and troubleshoot medium enterprise switches.....	1834
ICANWK509A Design and implement a security perimeter for ICT networks .....	1842
ICANWK510A Develop, implement and evaluate system and application security .....	1850
ICANWK511A Manage network security .....	1856
ICANWK513A Manage system security.....	1864
ICANWK514A Model preferred systems solutions .....	1872

ICANWK515A Develop configuration management protocols .....	1880
ICANWK516A Determine best-fit topology for a local network .....	1889
ICANWK517A Determine best-fit topology for a wide area network .....	1894
ICANWK518A Design an enterprise wireless local area network .....	1899
ICANWK519A Design an IT security framework .....	1908
ICANWK520A Design IT system security controls.....	1916
ICANWK521A Install, configure and test a payment gateway .....	1924
ICANWK522A Build decks using wireless markup language .....	1932
ICANWK524A Install and configure network access storage devices.....	1937
ICANWK525A Configure an enterprise virtual computing environment.....	1946
ICANWK526A Install an enterprise virtual computing environment.....	1953
ICANWK527A Manage an enterprise virtual computing environment.....	1960
ICANWK529A Install and manage complex ICT networks.....	1967
ICANWK531A Configure an internet gateway.....	1978
ICANWK532A Identify and resolve network problems.....	1986
ICANWK601A Design and implement a security system.....	1994
ICANWK602A Plan, configure and test advanced server based security.....	2004
ICANWK603A Plan, configure and test advanced internetwork routing solutions.....	2016
ICANWK604A Plan and configure advanced internetwork switching solutions.....	2024
ICANWK605A Design and configure secure integrated wireless systems .....	2032
ICANWK606A Implement voice applications over secure wireless networks .....	2044
ICANWK607A Design and implement wireless network security.....	2051
ICANWK608A Configure network devices for a secure network infrastructure .....	2061
ICANWK609A Configure and manage intrusion prevention system on network sensors	2069
ICANWK610A Design and build integrated VoIP networks .....	2079
ICANWK611A Configure call processing network elements for secure VoIP networks	2087
ICANWK612A Plan and manage troubleshooting advanced integrated IP networks ...	2098
ICANWK613A Develop plans to manage structured troubleshooting process of enterprise networks .....	2106
ICANWK614A Manage IT security.....	2116
ICAPMG401A Support small scale IT projects .....	2126
ICAPMG501A Manage IT projects.....	2132
ICAPMG601A Establish IT project governance.....	2139
ICAPMG602A Manage IT project initiation .....	2145
ICAPMG603A Manage IT project planning.....	2152
ICAPMG604A Manage IT project delivery .....	2158
ICAPMG605A Manage IT project closure .....	2163
ICAPMG606A Manage IT project quality.....	2168
ICAPMG607A Manage and control IT project risks .....	2174
ICAPMG608A Manage IT project systems implementation.....	2179
ICAPMG609A Plan and direct complex IT projects.....	2186
ICAPRG301A Apply introductory programming techniques .....	2195
ICAPRG401A Maintain open-source code programs .....	2203
ICAPRG402A Apply query language .....	2212
ICAPRG403A Develop data-driven applications .....	2219
ICAPRG404A Test applications .....	2226
ICAPRG405A Automate processes.....	2234
ICAPRG406A Apply introductory object-oriented language skills.....	2239
ICAPRG407A Write script for software applications .....	2245
ICAPRG409A Develop mobile applications .....	2252
ICAPRG410A Build a user interface .....	2259
ICAPRG412A Configure and maintain databases .....	2266
ICAPRG413A Use a library or pre-existing components.....	2273

ICAPRG414A Apply introductory programming skills in another language.....	2278
ICAPRG415A Apply skills in object-oriented design.....	2286
ICAPRG416A Manage a software component reuse library.....	2291
ICAPRG417A Apply mathematical techniques for software development.....	2297
ICAPRG418A Apply intermediate programming skills in another language.....	2302
ICAPRG419A Analyse software requirements.....	2310
ICAPRG425A Use structured query language.....	2318
ICAPRG426A Prepare software development review.....	2327
ICAPRG427A Use XML effectively.....	2334
ICAPRG428A Use regular expressions in programming languages.....	2341
ICAPRG501A Apply advanced object-oriented language skills.....	2347
ICAPRG502A Manage a project using software management tools.....	2353
ICAPRG503A Debug and monitor applications.....	2358
ICAPRG504A Deploy an application to a production environment.....	2365
ICAPRG505A Build advanced user interface.....	2372
ICAPRG506A Design application architecture.....	2379
ICAPRG507A Implement security for applications.....	2384
ICAPRG508A Create mashups.....	2391
ICAPRG509A Build using rapid application development.....	2397
ICAPRG510A Maintain custom software.....	2404
ICAPRG511A Monitor and support data conversion to new IT system.....	2410
ICAPRG512A Prepare for the build phase of an IT system.....	2417
ICAPRG513A Coordinate the build phase of an IT system.....	2424
ICAPRG514A Prepare for software development using rapid application development.....	2431
ICAPRG515A Review developed software.....	2439
ICAPRG516A Develop integration blueprint for IT systems.....	2446
ICAPRG517A Install, test and evaluate pilot version of IT system.....	2453
ICAPRG518A Monitor the system pilot.....	2460
ICAPRG520A Validate an application design against specifications.....	2465
ICAPRG523A Apply advanced programming skills in another language.....	2471
ICAPRG524A Develop high-level object-oriented class specifications.....	2477
ICAPRG525A Build Java applets.....	2482
ICAPRG526A Maintain functionality of legacy code programs.....	2488
ICAPRG527A Apply intermediate object-oriented language skills.....	2495
ICAPRG528A Perform IT data conversion.....	2503
ICAPRG529A Apply testing techniques for software development.....	2510
ICAPRG601A Develop advanced mobile multi-touch applications.....	2517
ICAPRG602A Manage the development of technical solutions from business specifications.....	2525
ICAPRG603A Create cloud computing services.....	2535
ICASAD401A Develop and present feasibility reports.....	2542
ICASAD501A Model data objects.....	2549
ICASAD502A Model data processes.....	2554
ICASAD503A Minimise risk of new technologies to business solutions.....	2559
ICASAD504A Implement quality assurance processes for business solutions.....	2564
ICASAD505A Develop technical requirements for business solutions.....	2572
ICASAD506A Produce a feasibility report.....	2580
ICASAD601A Perform IT-focused enterprise analysis.....	2587
ICASAD602A Conduct knowledge audits.....	2595
ICASAD603A Plan and monitor business analysis activities in an IT environment.....	2600
ICASAD604A Manage and communicate IT solutions.....	2609
ICASAD605A Elicit IT requirements.....	2615
ICASAD606A Analyse stakeholder requirements.....	2620
ICASAD607A Manage assessment and validation of IT solutions.....	2628

ICASAS201A	Maintain inventories for equipment, software and documentation .....	2633
ICASAS202A	Apply problem-solving techniques to routine IT malfunctions .....	2640
ICASAS203A	Connect hardware peripherals .....	2647
ICASAS204A	Record client support requirements .....	2656
ICASAS205A	Maintain IT system integrity .....	2661
ICASAS206A	Detect and protect from spam and destructive software .....	2668
ICASAS207A	Protect and secure information assets .....	2675
ICASAS208A	Maintain IT equipment and consumables .....	2682
ICASAS209A	Connect and use a home-based local wireless network .....	2689
ICASAS301A	Run standard diagnostic tests .....	2697
ICASAS303A	Care for computer hardware .....	2705
ICASAS304A	Provide basic system administration .....	2715
ICASAS305A	Provide IT advice to clients .....	2724
ICASAS306A	Maintain equipment and software .....	2731
ICASAS307A	Install, configure and secure a small office home office network .....	2738
ICASAS401A	Perform unit test for a class .....	2752
ICASAS402A	Implement configuration management strategies .....	2757
ICASAS403A	Review site environmental factors prior to IT system implementation .....	2765
ICASAS404A	Acquire IT system components .....	2771
ICASAS405A	Identify and evaluate IT industry vendor technologies .....	2778
ICASAS406A	Implement and hand over system components .....	2783
ICASAS407A	Conduct pre-installation audit for software installation .....	2789
ICASAS408A	Complete data transition in data migration process .....	2797
ICASAS409A	Manage risks involving ICT systems and technology .....	2802
ICASAS410A	Identify and resolve client IT problems .....	2808
ICASAS411A	Assist with policy development for client support procedures .....	2817
ICASAS412A	Action change requests .....	2822
ICASAS413A	Manage resolution of system faults on a live system .....	2829
ICASAS414A	Evaluate system status .....	2836
ICASAS415A	Optimise IT system performance .....	2844
ICASAS416A	Implement maintenance procedures .....	2852
ICASAS417A	Undertake IT system capacity planning .....	2860
ICASAS418A	Monitor and administer security of an IT system .....	2870
ICASAS419A	Support system software .....	2879
ICASAS420A	Provide first-level remote help-desk support .....	2887
ICASAS421A	Support users and troubleshoot desktop applications .....	2895
ICASAS422A	Scope implementation requirements .....	2900
ICASAS424A	Support different operating systems .....	2905
ICASAS425A	Configure and troubleshoot operating system software .....	2911
ICASAS426A	Locate and troubleshoot IT equipment, system and software faults .....	2923
ICASAS501A	Develop, implement and evaluate an incident response plan .....	2932
ICASAS502A	Establish and maintain client user liaison .....	2938
ICASAS503A	Perform systems tests .....	2946
ICASAS504A	Develop and conduct client acceptance test .....	2954
ICASAS505A	Review and update disaster recovery and contingency plans .....	2960
ICASAS506A	Update IT system operational procedures .....	2969
ICASAS507A	Implement and evaluate systems for regulatory and standards compliance .....	2974
ICASAS509A	Provide client IT support services .....	2979
ICASAS510A	Review and develop IT maintenance strategy .....	2984
ICASAS511A	Prioritise IT change requests .....	2992
ICASAS512A	Review and manage delivery of maintenance services .....	3000
ICASAS513A	Develop detailed test plans .....	3006
ICASAS514A	Perform integration tests .....	3011

ICASAS515A Manage the testing process.....	3020
ICASAS516A Perform stress and load tests on integrated platforms.....	3025
ICASAS517A Use network tools.....	3032
ICASAS518A Install and upgrade operating systems.....	3039
ICASAS601A Implement change-management processes.....	3045
ICASUS701A Plan and manage virtualisation for IT sustainability.....	3053
ICASUS702A Conduct a business case study for integrating sustainability in IT planning and design projects.....	3063
ICASUS703A Research strategies using SAP solutions for sustainable economic and environmental outcomes.....	3073
ICAWEB201A Use social media tools for collaboration and engagement.....	3087
ICAWEB301A Create a simple markup language document.....	3095
ICAWEB302A Build simple websites using commercial programs.....	3100
ICAWEB303A Produce digital images for the web.....	3108
ICAWEB401A Design a website to meet technical requirements.....	3114
ICAWEB402A Confirm accessibility of websites for people with special needs.....	3121
ICAWEB403A Transfer content to a website using commercial packages.....	3129
ICAWEB404A Maintain website performance.....	3137
ICAWEB405A Monitor traffic and compile website traffic reports.....	3145
ICAWEB406A Create website testing procedures.....	3150
ICAWEB407A Conduct operational acceptance tests of websites.....	3155
ICAWEB408A Ensure basic website security.....	3163
ICAWEB409A Develop cascading style sheets.....	3170
ICAWEB410A Apply web authoring tool to convert client data for websites.....	3175
ICAWEB411A Produce basic client-side script for dynamic web pages.....	3184
ICAWEB412A Produce interactive web animation.....	3189
ICAWEB413A Optimise search engines.....	3196
ICAWEB414A Design simple web page layouts.....	3205
ICAWEB415A Produce server-side script for dynamic web pages.....	3210
ICAWEB416A Customise content management system.....	3217
ICAWEB417A Integrate social web technologies.....	3223
ICAWEB418A Use development software and IT tools to build a basic website.....	3229
ICAWEB419A Develop guidelines for uploading information to a website.....	3237
ICAWEB420A Write content for web pages.....	3245
ICAWEB421A Ensure website content meets technical protocols and standards.....	3251
ICAWEB422A Ensure website access and useability.....	3259
ICAWEB423A Ensure dynamic website security.....	3267
ICAWEB424A Evaluate and select a web hosting service.....	3277
ICAWEB425A Apply structured query language to extract and manipulate data.....	3285
ICAWEB429A Create a markup language document to specification.....	3291
ICAWEB501A Build a dynamic website.....	3297
ICAWEB502A Create dynamic web pages.....	3302
ICAWEB503A Create web-based programs.....	3307
ICAWEB504A Build a document using eXtensible markup language.....	3312
ICAWEB505A Develop complex web page layouts.....	3318
ICAWEB506A Develop complex cascading style sheets.....	3323
ICAWEB507A Customise a complex IT content management system.....	3328
ICAWEB508A Develop website information architecture.....	3334
ICAWEB509A Use site server tools for transaction management.....	3342
ICAWEB510A Analyse information and assign meta-tags.....	3349
ICAWEB511A Implement quality assurance process for websites.....	3355
ICAWEB512A Administer business websites and servers.....	3363
ICAWEB515A Implement and use web services.....	3371

## Preliminary Information

### Important Note to Users

Training Packages are not static documents; they are amended periodically to reflect the latest industry practices and are version controlled. It is essential that the latest version is always used.

### Check the version number before commencing training or assessment

This Training Package is Version 1.0 – check whether this is the latest version by going to the National Training Information Service ([www.ntis.gov.au](http://www.ntis.gov.au)) and locating information about the Training Package. Alternatively, contact Innovation and Business Industry Skills Council at <http://www.ibsa.org.au> to confirm the latest version number.

### Explanation of version number conventions

The primary release Training Package is Version 1. When changes are made to a Training Package, sometimes the version number is changed and sometimes it is not, depending on the extent of the change. When a Training Package is reviewed it is considered to be a new Training Package for the purposes of version control, and is Version 1. Do not confuse the version number with the Training Package's national code (which remains the same during its period of endorsement).

### Explanation of the review date

The review date (shown on the title page and in the footer of each page) indicates when the Training Package is expected to be reviewed in the light of changes such as changing technologies and circumstances. The review date is not an expiry date. Endorsed Training Packages and their components remain current until they are reviewed or replaced.

### Version modification history

The version details of this endorsed Training Package are in the table below. The latest information is at the top of the table.

Version	Release Date	Comments
1.0	July 2011	Primary release, replacing ICA05 Information and Communications Training Package.

## History

ICA11 Information and Communications Technology Training Package is a revision of ICA05 Information and Communications Training Package, which was developed by IBSA in November 2005. ICA11 reflects new and revised qualifications and units of competency, as well as the removal of prerequisite units of competency.

The major revisions of this Training Package have been:

- ICA05 v3.0 September 2009 - Addition of two new qualifications and seventeen new units and other minor changes
- ICA05 v2.0 September 2007 - Addition of employability skills and other minor changes
- ICA05 v1.0 November 2005 - Primary release, fully revised replacement for ICA99
- ICA99 - May 1999 - Primary release of initial Training Package.
- 

### Summary of AQF qualifications in ICA11 Information and Communications Technology Training Package

Code	Title
ICA10111	Certificate I in Information, Digital Media and Technology
ICA20111	Certificate II in Information, Digital Media and Technology
ICA30111	Certificate III in Information, Digital Media and Technology
ICA40111	Certificate IV in Information Technology
ICA40211	Certificate IV in Information Technology Support
ICA40311	Certificate IV in Web-Based Technologies
ICA40411	Certificate IV in Information Technology Networking
ICA40511	Certificate IV in Programming
ICA40611	Certificate IV in Information Technology Testing
ICA40711	Certificate IV in Systems Analysis and Design
ICA40811	Certificate IV in Digital Media Technologies
ICA40911	Certificate IV in Digital and Interactive Games
ICA41011	Certificate IV in Computer Systems Technology
ICA50111	Diploma of Information Technology
ICA50211	Diploma of Digital and Interactive Games
ICA50311	Diploma of Information Technology Systems Administration
ICA50411	Diploma of Information Technology Networking
ICA50511	Diploma of Database Design and Development
ICA50611	Diploma of Website Development

Code	Title
ICA50711	Diploma of Software Development
ICA50811	Diploma of Systems Analysis and Design
ICA50911	Diploma of Digital Media Technologies
ICA60111	Advanced Diploma of Information Technology
ICA60211	Advanced Diploma of Network Security
ICA60311	Advanced Diploma of Information Technology Business Analysis
ICA60411	Advanced Diploma of Information Technology Project Management
ICA60511	Advanced Diploma of Computer Systems Technology
ICA70111	Vocational Graduate Certificate in Information Technology and Strategic Management
ICA70211	Vocational Graduate Certificate in Information Technology Sustainability

### Qualifications in this Training Package

Packaging rules for qualifications are clear and consistent and allow a logical progression of skills development between AQF levels. The packaging allows for multiple entry points and progression pathways enabling progression from AQF I through to Advanced Diploma and through to Vocational Graduate Certificate level.

Twenty one of the qualifications are updates from the previous ICA05 Training Package, with each of these qualifications being reviewed for technical currency and restructured to meet the current needs of industry. Seven new qualifications have been developed and one qualification has been upgraded from the Diploma level to the Advanced Diploma level. The qualifications in these categories are listed below:

### Revised qualifications

- ICA10111 Certificate I in Information, Digital Media and Technology
- ICA20111 Certificate II in Information, Digital Media and Technology
- ICA30111 Certificate III in Information, Digital Media and Technology
- ICA40111 Certificate IV in Information Technology
- ICA40211 Certificate IV in Information Technology Support
- ICA40311 Certificate IV in Web-Based Technologies
- ICA40411 Certificate IV in Information Technology Networking
- ICA40511 Certificate IV in Programming
- ICA40611 Certificate IV in Information Technology Testing
- ICA40711 Certificate IV in Systems Analysis and Design

- ICA40811 Certificate IV in Digital Media Technologies
- ICA50111 Diploma of Information Technology
- ICA50311 Diploma of Information Technology Systems Administration
- ICA50411 Diploma of Information Technology Networking
- ICA50511 Diploma of Database Design and Development
- ICA50611 Diploma of Website Development
- ICA50711 Diploma of Software Development
- ICA50811 Diploma of Systems Analysis and Design
- ICA50911 Diploma of Digital Media Technologies
- ICA60111 Advanced Diploma of Information Technology
- ICA60211 Advanced Diploma of Network Security
- ICA60411 Advanced Diploma of Information Technology Project Management

### **New qualifications**

- ICA40911 Certificate IV in Digital and Interactive Games
- ICA41011 Certificate IV in Computer Systems Technology
- ICA50211 Diploma of Digital and Interactive Games
- ICA60311 Advanced Diploma of Information Technology Business Analysis
- ICA60511 Advanced Diploma of Computer Systems Technology
- ICA70111 Vocational Graduate Certificate in Information Technology and Strategic Management
- ICA70211 Vocational Graduate Certificate in Information Technology Sustainability

There is an articulation pathway with a possible Year 12 entry requirement:

- ICA41011 Certificate IV in Computer Systems Technology
- ICA60511 Advanced Diploma of Computer Systems Technology.

The judicious packaging of core and elective units represents great flexibility for participants to cross over from stream to stream with minimal disruptions. This has been possible by minimising the number of core units and allowing greater choice of elective units.

Following the Federal Government announcement on the inclusion of sustainability in all qualifications for 2010, industry feedback was for the inclusion of sustainability in the core of the majority of qualifications and to be available as an elective in the remainder of the qualifications.

The importation of units from Training Packages provides clear support to the information and communications technology qualifications in the area of sustainability, project management, digital media technologies and IT convergence networks.

## **Whole of Industry Qualification Information**

There are 29 qualifications in the Training Package (23 in ICA05), 26 skill sets and 397 units of competency (240 in ICA05). A number of functional areas were identified based on the ICA05 Scoping Report and all ICA05 units were then classified based on those functional areas. All ICA05 units were reviewed, technically updated and incorporated into the relevant qualifications within the Training Package. Where no ICA05 unit or imported unit was available, a new unit was developed. The units were classified into the following functional areas:

A total of 397 units, 186 of which are new, cover the following functional areas:

Function area	Code	Number
Database	DBS	15
Digital media technologies	DMT	4
Game development	GAM	49
General ICT	ICT	85
Networking	NWK	63
IT project management	PMG	11
Programming and software development	PRG	51
Systems administration and support	SAS	58
Systems analysis and design	SAD	14
Sustainability	SUS	3
Web	WEB	44
<b>Total</b>		<b>397</b>

### Summary of Skill Sets in ICA11 Information and Communications Technology Training Package

- Application Development Specialist Skill Set
- Basic Application Development Programmer Skill Set
- Basic Computer Hardware and System Troubleshooting Skill Set
- Basic Web Development Specialist Skill Set
- Certified IT Network Enterprise, Security or Server Administrator Skill Set
- Certified Network Associate Technology Specialist Skill Set
- Certified Network Professional Specialist Skill Set
- Certified Network Professional Specialist – Voice Skill Set

- Certified Network Professional Specialist – Wireless Skill Set
- Certified Networking Technician Skill Set
- Certified Security and Architect Specialist Skill Set
- Certified Technician or Technology Specialist - Infrastructure Configuration Skill Set
- Certified Technology Specialist - Graphical User Interfaces Skill Set
- Certified Web Design Specialist Skill Set
- Computing and Application Fundamentals Skill Set
- Computing Fundamentals Skill Set
- Digital Literacy Skill Set
- Digital Literacy - eCitizen Skill Set
- Hardware Technician Skill Set
- Internetworking Systems Coordinator/Administrator Skill Set
- Rich Interactive Content Specialist Skill Set
- System and Hardware Plus Technician Skill Set
- System and Network Plus Technician Skill Set
- Virtualisation Specialist Skill Set
- Visual Communications Specialist Skill Set
- Website Administration Specialist Skill Set

Skill sets are designed to be available to industry to train participants in a particular skill set. They contain units of competency that will be awarded with a Statement of Attainment and are able to be counted towards a qualification. Where possible, Skill Sets are aligned to a range of vendor training programs that are used as a basis for industry certifications. Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

### **Summary of Units of Competency in ICA11 Information and Communications Technology Training Package and their Pre-Requisite Requirements**

<b>Unit code</b>	<b>Unit title</b>
ICADBS401A	Identify physical database requirements
ICADBS402A	Complete database backup and restore
ICADBS403A	Create basic databases
ICADBS404A	Identify and resolve common database performance problems
ICADBS407A	Monitor physical database implementation
ICADBS408A	Link an RFID system to a database
ICADBS409A	Monitor and administer a database
ICADBS412A	Build a database
ICADBS501A	Monitor and improve knowledge management system

<b>Unit code</b>	<b>Unit title</b>
ICADBS502A	Design a database
ICADBS503A	Create a data warehouse
ICADBS504A	Integrate database with a website
ICADBS601A	Build a data warehouse
ICADBS602A	Develop a knowledge management strategy
ICADBS603A	Determine suitability of database functionality and scalability
ICADMT401A	Create visual design components for digital media
ICADMT402A	Produce interactive animation
ICADMT403A	Produce and edit digital images
ICADMT501A	Incorporate and edit digital video
ICAGAM301A	Apply simple modelling techniques
ICAGAM302A	Design and apply simple textures to digital art
ICAGAM303A	Review and apply the principles of animation
ICAGAM401A	Produce an interactive game
ICAGAM402A	Identify and apply principles of games design and game playing
ICAGAM403A	Create design documents for interactive games
ICAGAM404A	Apply artificial intelligence in game development
ICAGAM405A	Write story and content for digital games
ICAGAM406A	Create visual design components for interactive games
ICAGAM407A	Write scripts for interactive games
ICAGAM408A	Use 3-D animation interface and toolsets
ICAGAM409A	Create 3-D characters for interactive games
ICAGAM410A	Develop 3-D components for interactive games
ICAGAM412A	Design interactive media

<b>Unit code</b>	<b>Unit title</b>
ICAGAM413A	Design and create 3-D digital models
ICAGAM414A	Create audio for digital games
ICAGAM415A	Develop simple environments for 3-D games
ICAGAM416A	Prepare and complete image rendering processes
ICAGAM417A	Apply digital effects to interactive products
ICAGAM418A	Use simple modelling for animation
ICAGAM419A	Build a database to support a computer game
ICAGAM501A	Create design concepts for digital games and 3-D media
ICAGAM503A	Create a complex 3-D interactive computer game
ICAGAM504A	Manage interactive media production
ICAGAM506A	Create complex code for mobile game devices
ICAGAM507A	Develop intermediate 3-D software for games and interactive media
ICAGAM508A	Develop complex 3-D software for games and interactive media
ICAGAM509A	Design interactive 3-D applications for scientific and mathematical modelling
ICAGAM510A	Prepare games for different platforms and delivery modes
ICAGAM511A	Manage testing of games and interactive media
ICAGAM512A	Create and implement designs for a 3-D games environment
ICAGAM514A	Design and create models for a 3-D and digital effects environment
ICAGAM515A	Design and create advanced particles, fluids and bodies for 3-D digital effects
ICAGAM516A	Animate a 3-D character for digital games
ICAGAM517A	Produce a digital animation sequence
ICAGAM518A	Animate physical attributes of models and elements
ICAGAM519A	Manage technical art and rigging in 3-D animation

<b>Unit code</b>	<b>Unit title</b>
ICAGAM520A	Create and combine 3-D digital games and components
ICAGAM521A	Create interactive 3-D environments for digital games
ICAGAM522A	Complete digital editing for the 3-D and digital effects environment
ICAGAM523A	Collaborate in the design of 3-D game levels and environments
ICAGAM524A	Integrate multiple data sources into interactive 3-D environments
ICAGAM525A	Apply digital texturing for the 3-D environment in digital games
ICAGAM526A	Create complex 3-D characters for games
ICAGAM527A	Integrate database with online game
ICAGAM528A	Create games for mobile devices
ICAGAM529A	Analyse business opportunities in the digital games environment
ICAGAM530A	Develop and implement physics in a 3-D digital game
ICAGAM531A	Complete compositing to create elements for the 3-D and digital effects environment
ICAICT101A	Operate a personal computer
ICAICT102A	Operate word-processing applications
ICAICT103A	Use, communicate and search securely on the internet
ICAICT104A	Use digital devices
ICAICT105A	Operate spreadsheet applications
ICAICT106A	Operate presentation packages
ICAICT107A	Use personal productivity tools
ICAICT108A	Use digital literacy skills to access the internet
ICAICT201A	Use computer operating systems and hardware
ICAICT202A	Work and communicate effectively in an IT environment
ICAICT203A	Operate application software packages

<b>Unit code</b>	<b>Unit title</b>
ICAICT204A	Operate a digital media technology package
ICAICT205A	Design basic organisational documents using computing packages
ICAICT206A	Install software applications
ICAICT207A	Integrate commercial computing packages
ICAICT208A	Operate accounting applications
ICAICT209A	Interact with ICT clients
ICAICT210A	Operate database applications
ICAICT211A	Identify and use basic current industry-specific technologies
ICAICT212A	Incorporate Indigenous needs and perspectives into IT environment
ICAICT301A	Create user documentation
ICAICT302A	Install and optimise operating system software
ICAICT303A	Connect internal hardware components
ICAICT304A	Implement system software changes
ICAICT305A	Identify and use current industry-specific technologies
ICAICT306A	Migrate to new technology
ICAICT307A	Customise packaged software applications for clients
ICAICT308A	Use advanced features of computer applications
ICAICT401A	Determine and confirm client business requirements
ICAICT402A	Determine project specifications and secure client agreement
ICAICT403A	Apply software development methodologies
ICAICT404A	Use online learning tools
ICAICT405A	Develop detailed technical design
ICAICT406A	Build a graphical user interface
ICAICT407A	Maintain website information standards

<b>Unit code</b>	<b>Unit title</b>
ICAICT408A	Create technical documentation
ICAICT409A	Develop macros and templates for clients using standard products
ICAICT410A	Conduct post-implementation IT system reviews
ICAICT411A	Select and employ software and hardware testing tools
ICAICT412A	Coordinate and maintain IT work teams
ICAICT413A	Relate to clients on a business level
ICAICT415A	Provide one-to-one instruction
ICAICT416A	Contribute to the development of strategic plans
ICAICT417A	Identify, evaluate and apply current industry-specific technologies to meet industry standards
ICAICT418A	Contribute to copyright, ethics and privacy in an IT environment
ICAICT419A	Work effectively in the digital media industry
ICAICT420A	Develop client user interface
ICAICT421A	Connect, maintain and configure hardware components
ICAICT422A	Participate in IT services
ICAICT501A	Research and review hardware technology options for organisations
ICAICT502A	Develop detailed component specifications from project specifications
ICAICT503A	Validate quality and completeness of system design specifications
ICAICT504A	Confirm transition strategy for a new system
ICAICT505A	Determine acceptable developers for projects
ICAICT506A	Implement process re-engineering strategies
ICAICT507A	Select new technology models for business
ICAICT508A	Evaluate vendor products and equipment
ICAICT509A	Gather data to identify business requirements

<b>Unit code</b>	<b>Unit title</b>
ICAICT510A	Determine appropriate IT strategies and solutions
ICAICT511A	Match IT needs with the strategic direction of the enterprise
ICAICT512A	Plan process re-engineering strategies for business
ICAICT514A	Identify and manage the implementation of current industry-specific technologies
ICAICT515A	Verify client business requirements
ICAICT601A	Develop IT strategic and action plans
ICAICT602A	Develop contracts and manage contracted performance
ICAICT603A	Manage the use of appropriate development methodologies
ICAICT604A	Identify and implement business innovation
ICAICT605A	Implement a knowledge management strategy
ICAICT606A	Develop communities of practice
ICAICT608A	Interact with clients on a business level
ICAICT609A	Lead the evaluation and implementation of current industry-specific technologies
ICAICT610A	Manage copyright, ethics and privacy in an IT environment
ICAICT701A	Lead research into identifying new marketplace opportunities
ICAICT702A	Direct ICT services
ICAICT703A	Endorse business plan components for a new initiative
ICAICT704A	Direct ICT in a supply chain
ICAICT705A	Direct ICT procurement
ICAICT706A	Direct outsourced ICT services
ICAICT707A	Direct research and business response to new ICT technology
ICAICT708A	Direct the development of a knowledge management strategy for a business
ICAICT709A	Facilitate business analysis

<b>Unit code</b>	<b>Unit title</b>
ICAICT710A	Synchronise IT projects
ICAICT711A	Manage an information architecture project
ICAICT712A	Develop a business intelligence framework
ICAICT713A	Manage IT services
ICANWK301A	Provide network systems administration
ICANWK302A	Determine and action network problems
ICANWK303A	Configure and administer a network operating system
ICANWK304A	Administer network peripherals
ICANWK305A	Install and manage network protocols
ICANWK401A	Install and manage a server
ICANWK402A	Install and configure virtual machines for sustainable ICT
ICANWK403A	Manage network and data integrity
ICANWK404A	Install, operate and troubleshoot a small enterprise branch network
ICANWK405A	Build a small wireless local area network
ICANWK406A	Install, configure and test network security
ICANWK407A	Install and configure client-server applications and services
ICANWK408A	Configure a desktop environment
ICANWK409A	Create scripts for networking
ICANWK410A	Install hardware to a network
ICANWK411A	Deploy software to networked computers
ICANWK412A	Create network documentation
ICANWK414A	Create a common gateway interface script
ICANWK416A	Build security into virtual private networks
ICANWK417A	Build an enterprise wireless network

<b>Unit code</b>	<b>Unit title</b>
ICANWK418A	Implement backbone technologies in a local area network
ICANWK501A	Plan, implement and test enterprise communication solutions
ICANWK502A	Implement secure encryption technologies
ICANWK503A	Install and maintain valid authentication processes
ICANWK504A	Design and implement an integrated server solution
ICANWK505A	Design, build and test a network server
ICANWK506A	Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network
ICANWK507A	Install, operate and troubleshoot medium enterprise routers
ICANWK508A	Install, operate and troubleshoot medium enterprise switches
ICANWK509A	Design and implement a security perimeter for ICT networks
ICANWK510A	Develop, implement and evaluate system and application security
ICANWK511A	Manage network security
ICANWK513A	Manage system security
ICANWK514A	Model preferred system solutions
ICANWK515A	Develop configuration management protocols
ICANWK516A	Determine best-fit topology for a local network
ICANWK517A	Determine best-fit topology for a wide area network
ICANWK518A	Design an enterprise wireless local area network
ICANWK519A	Design an IT security framework
ICANWK520A	Design IT system security controls
ICANWK521A	Install, configure and test a payment gateway
ICANWK522A	Build decks using wireless markup language
ICANWK524A	Install and configure network access storage devices

<b>Unit code</b>	<b>Unit title</b>
ICANWK525A	Configure an enterprise virtual computing environment
ICANWK526A	Install an enterprise virtual computing environment
ICANWK527A	Manage an enterprise virtual computing environment
ICANWK529A	Install and manage complex ICT networks
ICANWK531A	Configure an internet gateway
ICANWK532A	Identify and resolve network problems
ICANWK601A	Design and implement a security system
ICANWK602A	Plan, configure and test advanced server based security
ICANWK603A	Plan, configure and test advanced internetwork routing solutions
ICANWK604A	Plan and configure advanced internetwork switching solutions
ICANWK605A	Design and configure secure integrated wireless systems
ICANWK606A	Implement voice applications over secure wireless networks
ICANWK607A	Design and implement wireless network security
ICANWK608A	Configure network devices for a secure network infrastructure
ICANWK609A	Configure and manage intrusion prevention system on network sensors
ICANWK610A	Design and build integrated VoIP networks
ICANWK611A	Configure call processing network elements for secure VoIP networks
ICANWK612A	Plan and manage troubleshooting advanced integrated IP networks
ICANWK613A	Develop plans to manage structured troubleshooting process of enterprise networks
ICANWK614A	Manage IT security
ICAPMG401A	Support small scale IT projects
ICAPMG501A	Manage IT projects
ICAPMG601A	Establish IT project governance

<b>Unit code</b>	<b>Unit title</b>
ICAPMG602A	Manage IT project initiation
ICAPMG603A	Manage IT project planning
ICAPMG604A	Manage IT project delivery
ICAPMG605A	Manage IT project closure
ICAPMG606A	Manage IT project quality
ICAPMG607A	Manage and control IT project risks
ICAPMG608A	Manage IT project systems implementation
ICAPMG609A	Plan and direct complex IT projects
ICAPRG301A	Apply introductory programming techniques
ICAPRG401A	Maintain open-source code programs
ICAPRG402A	Apply query language
ICAPRG403A	Develop data-driven applications
ICAPRG404A	Test applications
ICAPRG405A	Automate processes
ICAPRG406A	Apply introductory object-oriented language skills
ICAPRG407A	Write script for software applications
ICAPRG409A	Develop mobile applications
ICAPRG410A	Build a user interface
ICAPRG412A	Configure and maintain databases
ICAPRG413A	Use a library or pre-existing components
ICAPRG414A	Apply introductory programming skills in another language
ICAPRG415A	Apply skills in object-oriented design
ICAPRG416A	Manage a software component reuse library
ICAPRG417A	Apply mathematical techniques for software development

<b>Unit code</b>	<b>Unit title</b>
ICAPRG418A	Apply intermediate programming skills in another language
ICAPRG419A	Analyse software requirements
ICAPRG425A	Use structured query language
ICAPRG426A	Prepare software development review
ICAPRG427A	Use XML effectively
ICAPRG428A	Use regular expressions in programming languages
ICAPRG501A	Apply advanced object-oriented language skills
ICAPRG502A	Manage a project using software management tools
ICAPRG503A	Debug and monitor applications
ICAPRG504A	Deploy an application to a production environment
ICAPRG505A	Build advanced user interface
ICAPRG506A	Design application architecture
ICAPRG507A	Implement security for applications
ICAPRG508A	Create mashups
ICAPRG509A	Build using rapid application development
ICAPRG510A	Maintain custom software
ICAPRG511A	Monitor and support data conversion to new IT system
ICAPRG512A	Prepare for the build phase of an IT system
ICAPRG513A	Coordinate the build phase of an IT system
ICAPRG514A	Prepare for software development using rapid application development
ICAPRG515A	Review developed software
ICAPRG516A	Develop integration blueprint for IT systems
ICAPRG517A	Install, test and evaluate pilot version of IT system
ICAPRG518A	Monitor the system pilot

<b>Unit code</b>	<b>Unit title</b>
ICAPRG520A	Validate an application design against specifications
ICAPRG523A	Apply advanced programming skills in another language
ICAPRG524A	Develop high-level object-oriented class specifications
ICAPRG525A	Build Java applets
ICAPRG526A	Maintain functionality of legacy code programs
ICAPRG527A	Apply intermediate object-oriented language skills
ICAPRG528A	Perform IT data conversion
ICAPRG529A	Apply testing techniques for software development
ICAPRG601A	Develop advanced mobile multi-touch applications
ICAPRG602A	Manage the development of technical solutions from business specifications
ICAPRG603A	Create cloud computing services
ICASAD401A	Develop and present feasibility reports
ICASAD501A	Model data objects
ICASAD502A	Model data processes
ICASAD503A	Minimise risk of new technologies to business solutions
ICASAD504A	Implement quality assurance processes for business solutions
ICASAD505A	Develop technical requirements for business solutions
ICASAD506A	Produce a feasibility report
ICASAD601A	Perform IT-focused enterprise analysis
ICASAD602A	Conduct knowledge audits
ICASAD603A	Plan and monitor business analysis activities in an IT environment
ICASAD604A	Manage and communicate IT solutions
ICASAD605A	Elicit IT requirements
ICASAD606A	Analyse stakeholder requirements

<b>Unit code</b>	<b>Unit title</b>
ICASAD607A	Manage assessment and validation of IT solutions
ICASAS201A	Maintain inventories for equipment, software and documentation
ICASAS202A	Apply problem-solving techniques to routine IT malfunctions
ICASAS203A	Connect hardware peripherals
ICASAS204A	Record client support requirements
ICASAS205A	Maintain IT system integrity
ICASAS206A	Detect and protect from spam and destructive software
ICASAS207A	Protect and secure information assets
ICASAS208A	Maintain IT equipment and consumables
ICASAS209A	Connect and use a home-based local wireless network
ICASAS301A	Run standard diagnostic tests
ICASAS303A	Care for computer hardware
ICASAS304A	Provide basic system administration
ICASAS305A	Provide IT advice to clients
ICASAS306A	Maintain equipment and software
ICASAS307A	Install, configure and secure a small office home office network
ICASAS401A	Perform unit test for a class
ICASAS402A	Implement configuration management strategies
ICASAS403A	Review site environmental factors prior to IT system implementation
ICASAS404A	Acquire IT system components
ICASAS405A	Identify and evaluate IT industry vendor technologies
ICASAS406A	Implement and hand over system components
ICASAS407A	Conduct pre-installation audit for software installation
ICASAS408A	Complete data transition in data migration process

<b>Unit code</b>	<b>Unit title</b>
ICASAS409A	Manage risks involving ICT systems and technology
ICASAS410A	Identify and resolve client IT problems
ICASAS411A	Assist with policy development for client support procedures
ICASAS412A	Action change requests
ICASAS413A	Manage resolution of system faults on a live system
ICASAS414A	Evaluate system status
ICASAS415A	Optimise IT system performance
ICASAS416A	Implement maintenance procedures
ICASAS417A	Undertake IT system capacity planning
ICASAS418A	Monitor and administer security of an IT system
ICASAS419A	Support system software
ICASAS420A	Provide first-level remote help-desk support
ICASAS421A	Support users and troubleshoot desktop applications
ICASAS422A	Scope implementation requirements
ICASAS424A	Support different operating systems
ICASAS425A	Configure and troubleshoot operating system software
ICASAS426A	Locate and troubleshoot IT equipment, system and software faults
ICASAS501A	Develop, implement and evaluate an incident response plan
ICASAS502A	Establish and maintain client user liaison
ICASAS503A	Perform systems tests
ICASAS504A	Develop and conduct client acceptance test
ICASAS505A	Review and update disaster recovery and contingency plans
ICASAS506A	Update IT system operational procedures
ICASAS507A	Implement and evaluate systems for regulatory and standards compliance

<b>Unit code</b>	<b>Unit title</b>
ICASAS509A	Provide client IT support services
ICASAS510A	Review and develop IT maintenance strategy
ICASAS511A	Prioritise IT change requests
ICASAS512A	Review and manage delivery of maintenance services
ICASAS513A	Develop detailed test plans
ICASAS514A	Perform integration tests
ICASAS515A	Manage the testing process
ICASAS516A	Perform stress and load tests on integrated platforms
ICASAS517A	Use network tools
ICASAS518A	Install and upgrade operating systems
ICASAS601A	Implement change-management processes
ICASUS701A	Plan and manage virtualisation for IT sustainability
ICASUS702A	Conduct a business case study for integrating sustainability in IT planning and design projects
ICASUS703A	Research strategies using SAP solutions for sustainable economic and environmental outcomes
ICAWEB201A	Use social media tools for collaboration and engagement
ICAWEB301A	Create a simple markup language document
ICAWEB302A	Build simple websites using commercial programs
ICAWEB303A	Produce digital images for the web
ICAWEB401A	Design a website to meet technical requirements
ICAWEB402A	Confirm accessibility of websites for people with special needs
ICAWEB403A	Transfer content to a website using commercial packages
ICAWEB404A	Maintain website performance
ICAWEB405A	Monitor traffic and compile website traffic reports

<b>Unit code</b>	<b>Unit title</b>
ICAWEB406A	Create website testing procedures
ICAWEB407A	Conduct operational acceptance tests of websites
ICAWEB408A	Ensure basic website security
ICAWEB409A	Develop cascading style sheets
ICAWEB410A	Apply web authoring tool to convert client data for websites
ICAWEB411A	Produce basic client-side script for dynamic web pages
ICAWEB412A	Produce interactive web animation
ICAWEB413A	Optimise search engines
ICAWEB414A	Design simple web page layouts
ICAWEB415A	Produce server-side script for dynamic web pages
ICAWEB416A	Customise content management system
ICAWEB417A	Integrate social web technologies
ICAWEB418A	Use development software and IT tools to build a basic website
ICAWEB419A	Develop guidelines for uploading information to a website
ICAWEB420A	Write content for web pages
ICAWEB421A	Ensure website content meets technical protocols and standards
ICAWEB422A	Ensure website access and useability
ICAWEB423A	Ensure dynamic website security
ICAWEB424A	Evaluate and select a web hosting service
ICAWEB425A	Apply structured query language to extract and manipulate data
ICAWEB429A	Create a markup language document to specification
ICAWEB501A	Build a dynamic website
ICAWEB502A	Create dynamic web pages
ICAWEB503A	Create web-based programs

Unit code	Unit title
ICAWEB504A	Build a document using eXtensible markup language
ICAWEB505A	Develop complex web page layouts
ICAWEB506A	Develop complex cascading style sheets
ICAWEB507A	Customise a complex IT content management system
ICAWEB508A	Develop website information architecture
ICAWEB509A	Use site server tools for transaction management
ICAWEB510A	Analyse information and assign meta-tags
ICAWEB511A	Implement quality assurance process for websites
ICAWEB512A	Administer business websites and servers
ICAWEB515A	Implement and use web services
ICAWEB516A	Research and apply emerging web technology trends

### Imported Units of Competency in ICA11 Information and Communications Technology Training Package

Unit code	Unit title	Origin
BSBCMM101A	Apply basic communication skills	BSB07 Business Services Training Package
BSBCRT401A	Articulate, present and debate ideas	BSB07 Business Services Training Package
BSBCRT501A	Originate and develop concepts	BSB07 Business Services Training Package
BSBEBU401A	Review and maintain a website	BSB07 Business Services Training Package
BSBEBU501A	Investigate and design e-business solutions	BSB07 Business Services Training Package
BSBINN601B	Manage organisational change	BSB07 Business Services Training Package
BSBIPR301A	Comply with organisational requirements for protection and use of intellectual	BSB07 Business Services

<b>Unit code</b>	<b>Unit title</b>	<b>Origin</b>
	property	Training Package
BSBMGT608C	Manage innovation and continuous improvement	BSB07 Business Services Training Package
BSBOHS201A	Participate in OHS processes	BSB07 Business Services Training Package
BSBOHS302B	Participate effectively in OHS communication and consultative processes	BSB07 Business Services Training Package
BSBOHS402B	Contribute to the implementation of the OHS consultation process	BSB07 Business Services Training Package
BSBOHS509A	Ensure a safe workplace	BSB07 Business Services Training Package
BSBPMG508A	Manage project risk	BSB07 Business Services Training Package
BSBREL701A	Develop and cultivate collaborative partnerships and relationships	BSB07 Business Services Training Package
BSBSUS201A	Participate in environmentally sustainable work practices	BSB07 Business Services Training Package
BSBSUS301A	Implement and monitor environmentally sustainable work practices	BSB07 Business Services Training Package
BSBSUS501A	Develop workplace policy and procedures for sustainability	BSB07 Business Services Training Package
BSBWOR301A	Organise personal work priorities and development	BSB07 Business Services Training Package
BSBWOR404B	Develop work priorities	BSB07 Business Services Training Package
BSBWOR502B	Ensure team effectiveness	BSB07 Business Services Training Package
CPPSEC3009A	Prepare and present evidence in court	CPP07 Property Services Training Package
CPPSEC5003A	Assess security risk management options	CPP07 Property Services Training Package

<b>Unit code</b>	<b>Unit title</b>	<b>Origin</b>
CPPSEC5004A	Prepare security risk management plan	CPP07 Property Services Training Package
CPPSEC5005A	Implement security risk management plan	CPP07 Property Services Training Package
CPPSEC5006A	Determine strategy for the implementation of biometric technology	CPP07 Property Services Training Package
CPPSEC5007A	Assess biometric system	CPP07 Property Services Training Package
CUFANM301A	Create 2D digital animations	CUF07 Screen and Media Training Package
CUFANM302A	Create 3D digital animations	CUF07 Screen and Media Training Package
CUFANM303A	Create 3D digital models	CUF07 Screen and Media Training Package
CUFANM402A	Create digital visual effects	CUF07 Screen and Media Training Package
CUFCAM201A	Assist with a basic camera shoot	CUF07 Screen and Media Training Package
CUFCAM301A	Shoot material for screen productions	CUF07 Screen and Media Training Package
CUFDIG201A	Maintain interactive content	CUF07 Screen and Media Training Package
CUFDIG301A	Prepare video assets	CUF07 Screen and Media Training Package
CUFDIG302A	Author interactive sequences	CUF07 Screen and Media Training Package
CUFDIG303A	Produce and prepare photo images	CUF07 Screen and Media Training Package
CUFDIG304A	Create visual design components	CUF07 Screen and Media Training Package
CUFDIG401A	Author interactive media	CUF07 Screen and Media

<b>Unit code</b>	<b>Unit title</b>	<b>Origin</b>
		Training Package
CUFDIG502A	Design web environments	CUF07 Screen and Media Training Package
CUFDIG503A	Design e-learning resources	CUF07 Screen and Media Training Package
CUFDIG504A	Design games	CUF07 Screen and Media Training Package
CUFDIG507A	Design digital simulations	CUF07 Screen and Media Training Package
CUFPOS201A	Perform basic vision and sound editing	CUF07 Screen and Media Training Package
CUFPOS401A	Edit screen content for fast turnaround	CUF07 Screen and Media Training Package
CUFPOS402A	Manage media assets	CUF07 Screen and Media Training Package
CUFPPM404A	Create storyboards	CUF07 Screen and Media Training Package
CUFSOU204A	Perform basic sound editing	CUF07 Screen and Media Training Package
CUFSOU301A	Prepare audio assets	CUF07 Screen and Media Training Package
CUSSOU302A	Record and mix a basic music demo	CUS09 Music Training Package
CUSSOU403A	Perform advanced sound editing	CUS09 Music Training Package
CUSSOU502A	Produce sound recordings	CUS09 Music Training Package
CUVPHI504A	Investigate and exploit innovative imaging options	CUV03 Visual Arts, Craft and Design Training Package
CUVVSP14B	Apply techniques to produce drawings	CUV03 Visual Arts, Craft and Design Training Package

<b>Unit code</b>	<b>Unit title</b>	<b>Origin</b>
ICPMM321C	Capture a digital image	ICP10 Printing and Graphic Arts Training Package
ICPMM346C	Incorporate video into multimedia presentations	ICP10 Printing and Graphic Arts Training Package
ICTBWN3082A	Perform tests on optical communication system and components	ICT10 Integrated Telecommunications Training Package
ICTBWN3088A	Install optical fibre splitters in fibre distribution hubs	ICT10 Integrated Telecommunications Training Package
ICTBWN3090A	Install lead-in module and cable for fibre to the premises	ICT10 Integrated Telecommunications Training Package
ICTBWN3100A	Work safely with live fibre to test and commission a fibre to the x installation	ICT10 Integrated Telecommunications Training Package
ICTCBL2065A	Splice and terminate optical fibre cable for carriers and service providers	ICT10 Integrated Telecommunications Training Package
ICTCBL2136A	Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule	ICT10 Integrated Telecommunications Training Package
ICTCBL2137A	Install, maintain and modify customer premises communications cabling: ACMA Open Rule	ICT10 Integrated Telecommunications Training Package
ICTCBL2139A	Apply safe technical work practices for cabling registration	ICT10 Integrated Telecommunications Training Package
ICTOPN4116A	Use advanced optical test equipment	ICT10 Integrated Telecommunications Training Package
ICTOPN5119A	Perform acceptance and commissioning tests on optical network	ICT10 Integrated Telecommunications Training Package

<b>Unit code</b>	<b>Unit title</b>	<b>Origin</b>
ICTOPN5120A	Plan for an optical system upgrade and cut over	ICT10 Integrated Telecommunications Training Package
ICTOPN5122A	Test the performance of specialised optical devices	ICT10 Integrated Telecommunications Training Package
ICTOPN5123A	Analyse and integrate specialised optical devices in the network	ICT10 Integrated Telecommunications Training Package
ICTPMG8143A	Manage a telecommunications project	ICT10 Integrated Telecommunications Training Package
ICTPMG8149A	Evaluate and use telecommunications management networks	ICT10 Integrated Telecommunications Training Package
ICTSUS4183A	Install and test renewable energy system for ICT networks	ICT10 Integrated Telecommunications Training Package
ICTSUS4184A	Install and test power saving hardware	ICT10 Integrated Telecommunications Training Package
ICTSUS4185A	Install and test power management software	ICT10 Integrated Telecommunications Training Package
ICTSUS4186A	Install thin client applications for power over ethernet	ICT10 Integrated Telecommunications Training Package
ICTSUS5187A	Implement server virtualisation for a sustainable ICT system	ICT10 Integrated Telecommunications Training Package
ICTSUS6233A	Integrate sustainability in ICT planning and design projects	ICT10 Integrated Telecommunications Training Package
ICTSUS6234A	Establish a business case for sustainability and competitive advantage in ICT projects	ICT10 Integrated Telecommunications Training

<b>Unit code</b>	<b>Unit title</b>	<b>Origin</b>
		Package
ICTSUS7235A	Use ICT to improve sustainability outcomes	ICT10 Integrated Telecommunications Training Package
ICTSUS7236A	Manage improvements in ICT sustainability	ICT10 Integrated Telecommunications Training Package
ICTSUS8237A	Lead applied research in ICT sustainability	ICT10 Integrated Telecommunications Training Package
ICTSUS8238A	Conduct and manage a life cycle assessment for sustainability	ICT10 Integrated Telecommunications Training Package
ICTTEN2140A	Use hand and power tools	ICT10 Integrated Telecommunications Training Package
ICTTEN4081A	Locate, diagnose and rectify faults	ICT10 Integrated Telecommunications Training Package
ICTTEN4198A	Install, configure and test an internet protocol network	ICT10 Integrated Telecommunications Training Package
ICTTEN4199A	Install, configure and test a router	ICT10 Integrated Telecommunications Training Package
ICTTEN4202A	Install and test a radio frequency identification system	ICT10 Integrated Telecommunications Training Package
ICTTEN4210A	Implement and troubleshoot enterprise routers and switches	ICT10 Integrated Telecommunications Training Package
ICTTEN4211A	Design, install and configure an internetwork	ICT10 Integrated Telecommunications Training Package
ICTTEN4213A	Configure and troubleshoot advanced	ICT10 Integrated

<b>Unit code</b>	<b>Unit title</b>	<b>Origin</b>
	network switching	Telecommunications Training Package
ICTTEN5024A	Provide consultancy and technical support in the customer premises equipment sector	ICT10 Integrated Telecommunications Training Package
ICTTEN5168A	Design and implement an enterprise voice over internet protocol and a unified communications network	ICT10 Integrated Telecommunications Training Package
ICTTEN5200A	Install, configure and test a local area network switch	ICT10 Integrated Telecommunications Training Package
ICTTEN5201A	Install, configure and test a server	ICT10 Integrated Telecommunications Training Package
ICTTEN5203A	Dimension and design a radio frequency identification system	ICT10 Integrated Telecommunications Training Package
ICTTEN5204A	Produce technical solutions from business specifications	ICT10 Integrated Telecommunications Training Package
ICTTEN5217A	Plan a wireless mesh network	ICT10 Integrated Telecommunications Training Package
ICTTEN6172A	Design and configure an IP-MPLS network with virtual private network tunnelling	ICT10 Integrated Telecommunications Training Package
ICTTEN6206A	Produce an ICT network architecture design	ICT10 Integrated Telecommunications Training Package
ICTTEN8195A	Evaluate and apply network security	ICT10 Integrated Telecommunications Training Package

## Summary of Mapping

### Summary Mapping of ICA05 Information and Communications Technology Training Package to ICA11 Information and Communications Technology Training Package

#### Mapping to Previous Training Package

#### Mapping of Qualifications Key: E = equivalent, N = not equivalent

Qualification code and title ICA11	Qualification code and title ICA05	Comments	E/N
ICA10111 Certificate I in Information, Digital Media and Technology	ICA10105 Certificate I in Information Technology	ICA10105 replaced by a broader qualification incorporating an expanded digital literacy capacity and greater digital media possibilities.  Outcomes deemed equivalent. Changes in: <ul style="list-style-type: none"> <li>• core units</li> <li>• range of elective choices.</li> </ul>	E
ICA20111 Certificate II in Information, Digital Media and Technology	ICA20105 Certificate II in Information Technology	ICA20105 replaced by a broader qualification incorporating an expanded digital literacy capacity and greater digital media possibilities.  Outcomes deemed equivalent. Changes in: <ul style="list-style-type: none"> <li>• core units</li> <li>• prerequisite requirements removed</li> <li>• range of elective choices.</li> </ul>	E
ICA30111 Certificate III in Information, Digital Media and Technology	ICA30105 Certificate III in Information Technology	ICA30105 core units updated. Outcomes deemed equivalent. Qualification made more flexible. Removal of entry requirements and prerequisites.  Range of specialisations expanded.  Applications, support and network specialisations remain and are equivalent.  Web technologies and digital media technologies specialisations added.	E

<b>Mapping to Previous Training Package</b>			
<b>Mapping of Qualifications Key: E = equivalent, N = not equivalent</b>			
<b>Qualification code and title ICA11</b>	<b>Qualification code and title ICA05</b>	<b>Comments</b>	<b>E/N</b>
ICA40111 Certificate IV in Information Technology	ICA40105 Certificate IV in Information Technology (General)	ICA40105 replaced and changed structurally to enable a wider range of unit uptake.  Outcomes deemed equivalent. Removal of entry requirements and prerequisites.  Restrictions imposed on the number of units able to be taken from each specialist group to ensure non-replication of other specialised qualifications.	E
ICA40211 Certificate IV in Information Technology Support	ICA40205 Certificate IV in Information Technology (Support)	ICA40205 core units updated and reduced.  Outcomes deemed equivalent. Removal of entry requirements and prerequisites.  Qualification made more flexible. Range of specialisations expanded.  Database support (old database) and service desk (old help desk) remain, however units have been updated and/or added to each specialisation.  Network communications and sustainability specialisations have been added.	E
ICA40311 Certificate IV in Web-Based Technologies	ICA40305 Certificate IV in Information Technology (Websites)	ICA40305 core units updated and reduced.  Outcomes deemed equivalent. Removal of entry requirements and prerequisites.  Qualification made more flexible. Administration and design and development (old design) remain,	E

<b>Mapping to Previous Training Package</b>			
<b>Mapping of Qualifications Key: E = equivalent, N = not equivalent</b>			
<b>Qualification code and title ICA11</b>	<b>Qualification code and title ICA05</b>	<b>Comments</b>	<b>E/N</b>
		however units have been updated and/or added to each specialisation.	
ICA40411 Certificate IV in Information Technology Networking	ICA40405 Certificate IV in Information Technology (Networking)	ICA40405 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical content updated.	E
ICA40511 Certificate IV in Programming	ICA40505 Certificate IV in Information Technology (Programming)	ICA40505 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical content updated.	E
ICA40611 Certificate IV in Information Technology Testing	ICA40605 Certificate IV in Information Technology (Testing)	ICA40605 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical content updated.	E
ICA40711 Certificate IV in Systems Analysis and Design	ICA40705 Certificate IV in Information Technology (Systems Analysis & Design)	ICA40705 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical	E

<b>Mapping of Qualifications Key: E = equivalent, N = not equivalent</b>			
<b>Qualification code and title ICA11</b>	<b>Qualification code and title ICA05</b>	<b>Comments</b>	<b>E/N</b>
		content updated.	
ICA40811 Certificate IV in Digital Media Technologies	ICA40805 Certificate IV in Information Technology (Multimedia)	ICA40805 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical content updated. Range of specialisation clusters reduced from seven (with no specialisation requirements) to three, with specialisation now a requirement. Three specialisation groups: <ul style="list-style-type: none"> <li>• web development</li> <li>• programming</li> <li>• interactive media.</li> </ul>	E
ICA40911 Certificate IV in Digital and Interactive Games		New qualification	N/A
ICA41011 Certificate IV in Computer Systems Technology		New qualification	N/A
ICA50111 Diploma of Information Technology	ICA50105 Diploma of Information Technology (General)	ICA50105 updated to enable a wider range of unit uptake. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Restrictions imposed on the number of units able to be taken from each specialist group to ensure non-replication of other specialised qualifications	E

<b>Mapping to Previous Training Package</b>			
<b>Mapping of Qualifications Key: E = equivalent, N = not equivalent</b>			
<b>Qualification code and title ICA11</b>	<b>Qualification code and title ICA05</b>	<b>Comments</b>	<b>E/N</b>
	ICA50205 Diploma of Information Technology (Project Management)	ICA50205 deleted. Specialist area now covered by ICA60411 Advanced Diploma level. Outcomes deemed not equivalent	N

<b>Mapping to Previous Training Package</b>			
<b>Mapping of Qualifications Key: E = equivalent, N = not equivalent</b>			
<b>Qualification code and title ICA11</b>	<b>Qualification code and title ICA05</b>	<b>Comments</b>	<b>E/N</b>
ICA50211 Diploma of Digital and Interactive Games		New qualification	N/A
ICA50311 Diploma of Information Technology Systems Administration	ICA50305 Diploma of Information Technology (Systems Administration)	ICA50305 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical content updated.	E
ICA50411 Diploma of Information Technology Networking	ICA50405 Diploma of Information Technology (Networking)	ICA50405 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical content updated.	E
ICA50511 Diploma of Database Design and Development	ICA50505 Diploma of Information Technology (Database Design and Development)	ICA50505 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical content updated.	E
ICA50611 Diploma of Website Development	ICA50605 Diploma of Information Technology (Website Development)	ICA50605 core units updated and reduced. Outcomes deemed equivalent. Removal of entry requirements and prerequisites. Qualification made more flexible. Elective units added and technical	E

## Overview

### What is a Training Package?

A Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each Training Package:

- provides a consistent and reliable set of components for training, recognising and assessing people's skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training which suits individual and industry requirements
- encourages learning and assessment in a work-related environment which leads to verifiable workplace outcomes.

### How do Training Packages fit within the National Skills Framework?

The National Skills Framework applies nationally, is endorsed by the Ministerial Council for Vocational and Technical Education, and comprises the Australian Quality Training Framework 2010 (AQTF 2010), and Training Packages endorsed by the National Quality Council (NQC).

### How are Training Packages developed?

Training Packages are developed by Industry Skills Councils or enterprises to meet the identified training needs of specific industries or industry sectors. To gain national endorsement of Training Packages, developers must provide evidence of extensive research, consultation and support within the industry area or enterprise.

### How do Training Packages encourage flexibility?

Training Packages describe the skills and knowledge needed to perform effectively in the workplace without prescribing how people should be trained.

Training Packages acknowledge that people can achieve vocational competency in many ways by emphasising what the learner can do, not how or where they learned to do it. For example, some experienced workers might be able to demonstrate competency against the units of competency, and even gain a qualification, without completing a formal training program.

With Training Packages, assessment and training may be conducted at the workplace, off-the-job, at a training organisation, during regular work, or through work experience, work placement, work simulation or any combination of these.

### Who can deliver and assess using Training Packages?

Training and assessment using Training Packages must be conducted by a Registered Training Organisation (RTO) that has the qualifications or specific units of competency on its scope of registration, or that works in partnership with another RTO, as specified in the AQTF 2010.

### Training Package Components

Training Packages are made up of mandatory components endorsed by the NQC, and optional support materials.

## Training Package Endorsed Components

The nationally endorsed components include the Competency Standards, Assessment Guidelines and Qualifications Framework. These form the basis of training and assessment in the Training Package and, as such, they must be used.

### **Competency Standards**

Each unit of competency identifies a discrete workplace requirement and includes the knowledge and skills that underpin competency as well as language, literacy and numeracy; and occupational health and safety requirements. The units of competency must be adhered to in training and assessment to ensure consistency of outcomes.

### **Assessment Guidelines**

The Assessment Guidelines provide an industry framework to ensure all assessments meet industry needs and nationally agreed standards as expressed in the Training Package and the AQTF 2010. The Assessment Guidelines must be followed to ensure the integrity of assessment leading to nationally recognised qualifications.

### **Qualifications Framework**

Each Training Package provides details of those units of competency that must be achieved to award AQF qualifications. The rules around which units of competency can be combined to make up a valid AQF qualification in the Training Package are referred to as the 'packaging rules'. The packaging rules must be followed to ensure the integrity of nationally recognised qualifications issued.

### **Training Package Support Materials**

The endorsed components of Training Packages are complemented and supported by optional support materials that provide for choice in the design of training and assessment to meet the needs of industry and learners.

Training Package support materials can relate to single or multiple units of competency, an industry sector, a qualification or the whole Training Package. They tend to fall into one or more of the categories illustrated below.

Training Package support materials are produced by a range of stakeholders such as RTOs, individual trainers and assessors, private and commercial developers and Government agencies.

## Training Package, Qualification and Unit of Competency Codes

There are agreed conventions for the national codes used for Training Packages and their components. Always use the correct codes, exactly as they appear in the Training Package, **and with the code always before the title.**

### Training Package Codes

Each Training Package has a unique five-character national code assigned when the Training Package is endorsed, for example XYZ08. The first three characters are letters identifying the Training Package industry coverage and the last two characters are numbers identifying the year of endorsement.

### Qualification Codes

Within each Training Package, each qualification has a unique eight-character code, for example XYZ10108. Qualification codes are developed as follows:

- the first three letters identify the Training Package;
- the first number identifies the qualification level (noting that, in the qualification titles themselves, arabic numbers are **not** used);
- the next two numbers identify the position in the sequence of the qualification at that level; and
- the last two numbers identify the year in which the qualification was endorsed. (Where qualifications are added after the initial Training Package endorsement, the last two numbers may differ from other Training Package qualifications as they identify the year in which those particular qualifications were endorsed.)

### Unit of Competency Codes

Within each Training Package, each unit of competency has a unique code. Unit of competency codes are assigned when the Training Package is endorsed, or when new units of competency are added to an existing endorsed Training Package. Unit codes are developed as follows:

- a typical code is made up of 12 characters, normally a mixture of uppercase letters and numbers, as in ICADBS401A;
- the first three characters signify the Training Package – ICA11 Information and Communications Technology Training Package – in the above example and up to eight characters, relating to an industry sector, function or skill area, follow;
- the last character is always a letter and identifies the unit of competency version. An ‘A’ at the end of the code indicates that this is the original unit of competency. ‘B’, or another incremented version identifier means that minor changes have been made. Typically this would mean that wording has changed in the range statement or evidence guide, providing clearer intent; and
- where changes are made that alter the outcome, a new code is assigned and the title is changed.

## Training Package, Qualification and Unit of Competency Titles

There are agreed conventions for titling Training Packages and their components. Always use the correct titles, exactly as they appear in the Training Package, and with the code always placed before the title.

### **Training Package Titles**

The title of each endorsed Training Package is unique and relates the Training Packages broad industry coverage.

### **Qualification Titles**

The title of each endorsed Training Package qualification is unique. Qualification titles use the following sequence:

- first, the qualification is identified as either Certificate I, Certificate II, Certificate III, Certificate IV, Diploma, Advanced Diploma, Vocational Graduate Certificate, or Vocational Graduate Diploma;
- this is followed by the words 'in' for Certificates I to IV, and 'of' for Diploma, Advanced Diploma, Vocational Graduate Certificate and Vocational Graduate Diploma;
- then, the industry descriptor, for example Telecommunications; and
- then, if applicable, the occupational or functional stream in brackets, for example (Computer Systems).

For example: ICA10111 Certificate I in Information, Digital Media and Technology

### **Unit of Competency Titles**

Each unit of competency title is unique. Unit of competency titles describe the competency outcome concisely, and are written in sentence case.

For example: ICADBS401A Identify physical database requirements

## **Introduction to the ICA11 Information and Communications Technology Training Package**

## **Historical and General Information**

There have been two previous versions of ICA Training Package. The first edition, ICA99, was released in May 1999 and was superseded by ICA05, which was released in November 2005.

Over the past few years, ICT industry coverage has expanded to include the convergence of technologies across a number of industry areas, including networking, web development, software development, database integration, sustainability, application implementation, telecommunications, digital and interactive games and digital media technologies. The ICA11 Training Package review project identified a number of new and emerging technology trends in the industry that have occurred since the ICA05 Information and Communications Technology Training Package was developed.

Also, the Federal Government is heavily committed to initiatives, such as the high-speed National Broadband Network (NBN) roll out, the Digital Economy, Digital Education Revolution (DER) computers in schools program, and the implementation of the 'Green ICT' sustainability strategy, all of which will impact on the Information and Communications Technology industry. It was considered critical that ICA05 Information and Communications Technology Training Package be updated, enhanced and refreshed to reflect the technology changes and terminologies that have emerged since the National Quality Council (NQC) endorsed Version 3.0 of ICA05 Training Package in 2009.

The ICA05 Training Package scoping review was undertaken during 2009 with the task of determining how the Training Package could be revised to ensure that its endorsed components are made more industry relevant and sufficiently flexible to better meet the current and anticipated future vocational training and skills recognition needs and requirements of employers, employees and providers.

The report "Scoping Review of the ICA05 Information and Communications Technology Training Package v3" (ICA05 Scoping Report) was completed in December 2009. This report's findings were subsequently taken up in Stage 2 of the ICA05 Training Package Review project which started in March 2010.

## Methodology

The review of ICA05 Information and Communications Technology Training Package was undertaken to ensure it reflects current industry requirements and that it remains technically relevant for future innovations and emerging skill needs.

Key features of the methodology of the review were:

- establishment of a National Project Reference Group (NPRG)
- establishment of an Expert Advisory Panel (EAP) to provide technical advice and support
- establishment of a communications strategy and review of research and industry information through consultation workshops conducted in each state and territory, industry consultation meetings, specific qualification teleconferences and wiki forums
- collection of feedback on draft units of competency and qualifications from a wide range of stakeholders
- establishment of National Expert Working Groups (NEWG) for each key qualification area
- development of draft units of competency and qualifications and loading on to the wiki and the review and feedback register of the IBSA website
- validation of draft units of competency and qualifications at national consultation meetings, NEWG teleconferences and incorporation of stakeholder feedback into final drafts where appropriate
- endorsement of final documentation by EAP and NPRG.

## ICA11 key revisions

The ICA11 Information and Communications Technology Training Package development has resulted in a number of revisions to ICA05 Information and Communications Technology Training Package.

## **Qualifications**

The structure of the qualifications now includes the following benefits for registered training organisations (RTOs) and industry:

- smaller number of core units with better range of elective units allowing for better flexibility of qualification packaging rules to meet industry needs and changes
- inclusion of sustainability units in all qualifications to reflect Federal Government initiatives
- introduction of social web and digital technology skills in the entry-level Certificates I, II and III qualifications to support the inclusion of these technologies into the Training Package
- new unit coding to facilitate easy identification of nominal Australian Qualifications Framework (AQF) level and category (e.g. networking unit at nominal AQF level 4)
- packaging rules that assist industry through qualification requirements that provide a combination of identified elective unit selection and the capability to import non-ICA units.

## **Unit of competency selection**

When an RTO is selecting the elective units of competency for a qualification, some units can be imported from other Training Packages, as outlined in the packaging rules of the individual qualifications. This gives RTOs more flexibility to create innovative programs; better adapted to customer needs, local industry and the changing nature of the industry.

## **Imported units**

Imported units from other Training Packages should be appropriate to the level and integrity of the qualification and to the workplace outcomes the qualification is designed to meet.

## **New technologies**

ICT industry coverage now includes convergence of technologies across a number of industry areas, including networking, web development, software development, database integration, sustainability, application implementation, telecommunications, digital and interactive games and digital media technologies.

The ICA11 Training Package review project identified a number of new and emerging technology trends in the industry. The qualifications and units of competency were reviewed and developed to reflect these changes with a number of focus areas specifically identified, including:

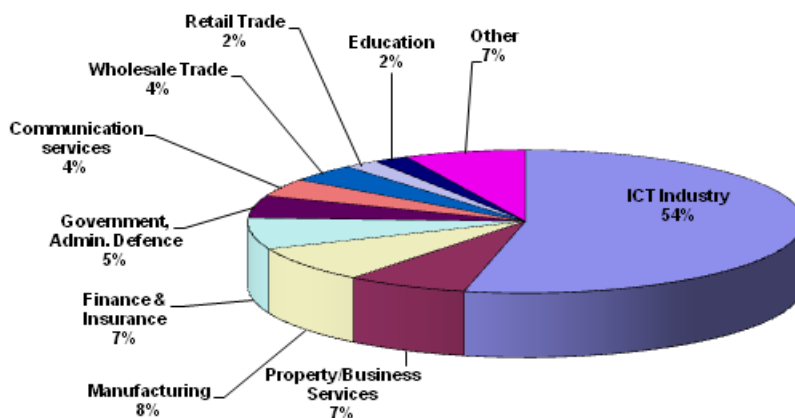

- interactive and digital games

- digital media technologies
- broadband/wireless
- cloud computing
- social web technologies
- mobile devices
- network security
- digital literacy.

## Introduction to the Industry

The ICT industry in Australia is estimated to have generated \$85-\$98 billion in revenue for the year 2008-2009, to have employed some 268,000 people in 2007-2008 and, as of February 2009, to employ a total of 532,500 ICT workers in all industries across Australia. (Source: *ABS Labour Market Survey Feb 2009, ICT Industry logistics CIER 2008 as reported in Australian Computer Society (July 2009). ACS Australian ICT Statistical Compendium 2009. pages 6-7*).

ICT employment and occupations fall across all sectors and industries in Australia. Of the total number of people employed in ICT occupations in 2007-2008 (ABS 2008), just over half (54%) actually fell within what can be classified as the ICT industry division.

*DEEWR 2007, adjusted by CIIER to compensate for ICT industry sector excision as reported in IBSA eScan report; Allen Consulting Group (April 2009). Environmental Scan 2009. IBSA: Melbourne. p. 35.*

ICA11 needs to cater for those seeking a professional career pathway in the ICT industry as well as those seeking the ICT skills to support careers in a myriad of associated industries. It also needs to be acknowledged that information technology and IT workers are spread across many diverse non-ICT industries, with their jobs not recognised in the ICT occupation skills classifications. Indications are that up to 80% of students undertaking ICT qualifications do not progress beyond AQF Certificate III level, but move horizontally with their ICT knowledge and skills into other non-ICT industries.

As with many other sectors, technological convergence is affecting the way people work in the technical industries. The changing nature of the information and communications technology industries over the past decade has resulted in the need to accommodate a variety of changes in the review of ICA11.

The Australian ICT industry has become more of a service industry than a specialised IT focused industry with the result that national ICT career pathways are becoming more vertical than horizontal and are requiring the versatility to incorporate a mix of various ICT skills rather than relying on the historically fixed specialist ICT stream career pathway.

The shift to a more service-focused industry base and the need for flexibility in career pathways for the Australian ICT industry has had a major influence on the development of ICA11. When the ICA Training Package was updated from 1999 to later versions, stand-alone career pathways were created in anticipation of Australia becoming a 'development house' for Asia and the local region. These aspirations simply have not eventuated and the feedback and data from the ICA05 Scoping Report indicate that we are now further away than ever from being a globally competitive, development-oriented IT industry. To clarify this position we can analyse, as an example, the career pathway data for specialist programmers which shows a gradual decline in demand over the past decade. This is not to say such jobs do not exist in niche industry areas or regions, but the national career pathways have now blurred and converged across other sectors both in IT and non-IT areas. "Programming" now needs to be augmented with some other skill sets, such as management, games development, web development; "Software Development" with other skill sets such as helpdesk/service centre support. This scenario relating to increasing skills also holds true for many of the other ICT career pathways.

To fully encompass these industry-identified changes, ICA11 has incorporated both a horizontal and vertical approach to ICT career pathway progression. The ICA11 qualifications have been developed to enable a specialist outcome in the key ICT areas combined with the flexibility to incorporate a diverse range of skill sets so as to provide a wider career pathway outcome.

Medium to small business enterprises are becoming more common in the industry. Due to their cost structures and business requirements, these enterprises need graduates with applied general IT skills rather than with a full specialist qualification. While the need to develop specialist pathways is still critically important, ICA11 needs to also offer the flexibility to cater for broader cross-specialisation skill sets and career pathways.

The combination of the above with the most recent initiatives also detailed above, such as NBN, DER, computers in schools, and green and sustainable IT, is creating major growth in the ICT industry in Australia as well as potentially generating a rising demand for both general and niche specialist IT skills. This situation is also causing a blurring of traditional IT job profiles and formal IT occupational boundaries, with the integration of competencies across IT, telecommunications, digital art and 3D rendering, mobile applications development, data storage, games development and entertainment.

As a result, this has created a significant shift to current ICT technologies including a greater application of:

- networks (using wireless for data and voice) and overlay of broadband
- IP-based communications, broadcasting, switching and transmission
- enhancements to content and network management capabilities
- wireless and mobile systems
- mesh and cloud networks
- green technology requirements
- interactive and digital games development
- digital media technologies
- social web technologies
- network security
- digital literacy.

Consultation on the above included discussions with and input from key industry stakeholders, with the result that the revised qualifications, skill sets and units of competency include, where relevant, many of the areas mentioned above. Furthermore, care was taken to develop the ICA11 units to allow contextualisation, as industry practice adapts to new trends and technologies.

The ICA11 Training Package review also incorporated relevant government initiatives in the areas of sustainability, digital literacy, OHS and language, literacy and numeracy into each of the qualifications as follows:

- sustainability skills units developed in BSB07 Business Services Training Package or ICT10 Integrated Telecommunications Training Package have been embedded in the core or elective groups of each qualification
- language, literacy and numeracy skills have been described appropriately for all competency outcomes
- units of competency covering digital literacy have been incorporated at entry level.

Industry, industry associations and providers have been extensively consulted through national consultation workshops in all states and territories, industry workshops and electronic collaborations. Their advice, suggestions and key recommendations were incorporated as a key component in the development of this Training Package.

The ICA11 Training Package also provides support for movement of skills within and across organisations and sectors. The packaging rules for qualifications are clear and consistent and allow a logical progression of skills development between AQF levels. The Training Package allows for multiple entry points and progression pathways enabling a formal learning progression from AQF 1 through to Advanced Diploma and Vocational Graduate Certificate level.

To increase the flexibility and portability of ICA11 qualifications, units of competency have been imported from the following endorsed Training Packages:

- BSB07 Business Services
- CPP07 Property Services
- CUF07 Screen and Media
- CUV03 Visual Arts, Craft and Design
- CUS09 Music
- CUE03 Entertainment
- ICP10 Printing and Graphic Arts
- ICT10 Integrated Telecommunications.

# Qualifications Framework

## The Australian Qualifications Framework

### What is the Australian Qualifications Framework?

A brief overview of the Australian Qualifications Framework (AQF) follows. For a full explanation of the AQF, see the *AQF Implementation Handbook*.

[http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF\\_Handbook\\_07.pdf](http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf)

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia. In the vocational education and training (VET) sector it assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and Statements of Attainment.

Training Package qualifications in the VET sector must comply with the titles and guidelines of the AQF. Endorsed Training Packages provide a unique title for each AQF qualification which must always be reproduced accurately.

### Qualifications

Training Packages can incorporate the following eight AQF qualifications.

- Certificate I in ...
- Certificate II in ...
- Certificate III in ...
- Certificate IV in ...
- Diploma of ...
- Advanced Diploma of ...
- Vocational Graduate Certificate of ...
- Vocational Graduate Diploma of ...

On completion of the requirements defined in the Training Package, a Registered Training Organisation (RTO) may issue a nationally recognised AQF qualification. Issuance of AQF qualifications must comply with the advice provided in the *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### Statement of Attainment

A Statement of Attainment is issued by a Registered Training Organisation when an individual has completed one or more units of competency from nationally recognised qualification(s)/courses(s). Issuance of Statements of Attainment must comply with the advice provided in the current *AQF Implementation Handbook* and the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

Under the AQTF 2010, RTOs must recognise the achievement of competencies as recorded on a qualification or Statement of Attainment issued by other RTOs. Given this, recognised competencies can progressively build towards a full AQF qualification.

### AQF Guidelines and Learning Outcomes

The *AQF Implementation Handbook* provides a comprehensive guideline for each AQF qualification. A summary of the learning outcome characteristics and their distinguishing features for each VET related AQF qualification is provided below.

## Certificate I

### *Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and skills would prepare a person to perform a defined range of activities most of which may be routine and predictable.

Applications may include a variety of employment related skills including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. They may also include participation in a team or work group.

#### *Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate knowledge by recall in a narrow range of areas;
- demonstrate basic practical skills, such as the use of relevant tools;
- perform a sequence of routine tasks given clear direction
- receive and pass on messages/information.

### **Certificate II**

#### *Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and skills would prepare a person to perform in a range of varied activities or knowledge application where there is a clearly defined range of contexts in which the choice of actions required is usually clear and there is limited complexity in the range of operations to be applied.

Performance of a prescribed range of functions involving known routines and procedures and some accountability for the quality of outcomes.

Applications may include some complex or non-routine activities involving individual responsibility or autonomy and/or collaboration with others as part of a group or team.

#### *Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate basic operational knowledge in a moderate range of areas;
- apply a defined range of skills;
- apply known solutions to a limited range of predictable problems;
- perform a range of tasks where choice between a limited range of options is required;
- assess and record information from varied sources;
- take limited responsibility for own outputs in work and learning.

### **Certificate III**

#### *Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and competencies would cover selecting, adapting and transferring skills and knowledge to new environments and providing technical advice and some leadership in resolution of specified problems. This would be applied across a range of roles in a variety of contexts with some complexity in the extent and choice of options available.

Performance of a defined range of skilled operations, usually within a range of broader related activities involving known routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures and within known time constraints.

Applications may involve some responsibility for others. Participation in teams including group or team co-ordination may be involved.

*Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate some relevant theoretical knowledge
- apply a range of well-developed skills
- apply known solutions to a variety of predictable problems
- perform processes that require a range of well-developed skills where some discretion and judgement is required
- interpret available information, using discretion and judgement
- take responsibility for own outputs in work and learning
- take limited responsibility for the output of others.

**Certificate IV***Characteristics of Learning Outcomes*

Breadth, depth and complexity of knowledge and competencies would cover a broad range of varied activities or application in a wider variety of contexts most of which are complex and non-routine. Leadership and guidance are involved when organising activities of self and others as well as contributing to technical solutions of a non-routine or contingency nature. Performance of a broad range of skilled applications including the requirement to evaluate and analyse current practices, develop new criteria and procedures for performing current practices and provision of some leadership and guidance to others in the application and planning of the skills. Applications involve responsibility for, and limited organisation of, others.

*Distinguishing Features of Learning Outcomes*

Do the competencies enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating some theoretical concepts
- apply solutions to a defined range of unpredictable problems
- identify and apply skill and knowledge areas to a wide variety of contexts, with depth in some areas
- identify, analyse and evaluate information from a variety of sources
- take responsibility for own outputs in relation to specified quality standards
- take limited responsibility for the quantity and quality of the output of others.

**Diploma***Characteristics of Learning Outcomes*

Breadth, depth and complexity covering planning and initiation of alternative approaches to skills or knowledge applications across a broad range of technical and/or management requirements, evaluation and co-ordination.

The self directed application of knowledge and skills, with substantial depth in some areas where judgment is required in planning and selecting appropriate equipment, services and techniques for self and others.

Applications involve participation in development of strategic initiatives as well as personal responsibility and autonomy in performing complex technical operations or organising others. It may include participation in teams including teams concerned with planning and evaluation functions. Group or team co-ordination may be involved.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

#### *Distinguishing Features of Learning Outcomes*

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of a broad knowledge base incorporating theoretical concepts, with substantial depth in some areas
- analyse and plan approaches to technical problems or management requirements
- transfer and apply theoretical concepts and/or technical or creative skills to a range of situations
- evaluate information, using it to forecast for planning or research purposes
- take responsibility for own outputs in relation to broad quantity and quality parameters
- take some responsibility for the achievement of group outcomes.

### **Advanced Diploma**

#### *Characteristics of Learning Outcomes*

Breadth, depth and complexity involving analysis, design, planning, execution and evaluation across a range of technical and/or management functions including development of new criteria or applications or knowledge or procedures.

The application of a significant range of fundamental principles and complex techniques across a wide and often unpredictable variety of contexts in relation to either varied or highly specific functions. Contribution to the development of a broad plan, budget or strategy is involved and accountability and responsibility for self and others in achieving the outcomes is involved.

Applications involve significant judgement in planning, design, technical or leadership/guidance functions related to products, services, operations or procedures.

The degree of emphasis on breadth as against depth of knowledge and skills may vary between qualifications granted at this level.

#### *Distinguishing Features of Learning Outcomes*

Do the competencies or learning outcomes enable an individual with this qualification to:

- demonstrate understanding of specialised knowledge with depth in some areas
- analyse, diagnose, design and execute judgements across a broad range of technical or management functions
- generate ideas through the analysis of information and concepts at an abstract level
- demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills
- demonstrate accountability for personal outputs within broad parameters
- demonstrate accountability for personal and group outcomes within broad parameters.

### **Vocational Graduate Certificate**

#### *Characteristics of competencies or learning outcomes*

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth and complexity involving the initiation, analysis, design, planning, execution and evaluation of technical and management functions in highly varied and highly specialised contexts.
- Applications involve making significant, high-level, independent judgements in major broad or planning, design, operational, technical and management functions in highly varied and specialised contexts. They may include responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

*Distinguishing features of learning outcomes*

- Demonstrate the self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major broad or technical and management functions in highly varied and highly specialised contexts.
- Generate and evaluate ideas through the analysis of information and concepts at an abstract level.
- Demonstrate a command of wide-ranging, highly specialised technical, creative or conceptual skills in complex contexts.
- Demonstrate responsibility and broad-ranging accountability for the structure, management and output of the work or functions of others.

### **Vocational Graduate Diploma**

*Characteristics of competencies or learning outcomes*

- The self-directed development and achievement of broad and specialised areas of knowledge and skills, building on prior knowledge and skills.
- Substantial breadth, depth and complexity involving the initiation, analysis, design, planning, execution and evaluation of major functions, both broad and highly specialised, in highly varied and highly specialised contexts.
- Further specialisation within a systematic and coherent body of knowledge.
- Applications involve making high-level, fully independent, complex judgements in broad planning, design, operational, technical and management functions in highly varied and highly specialised contexts. They may include full responsibility and accountability for all aspects of work and functions of others, including planning, budgeting and strategy development.
- The degree of emphasis on breadth, as opposed to depth, of knowledge and skills may vary between qualifications granted at this level.

*Distinguishing features of learning outcomes*

- Demonstrate the self-directed development and achievement of broad and highly specialised areas of knowledge and skills, building on prior knowledge and skills.
- Initiate, analyse, design, plan, execute and evaluate major functions, both broad and

within highly varied and highly specialised contexts.

- Generate and evaluate complex ideas through the analysis of information and concepts at an abstract level.
- Demonstrate an expert command of wide-ranging, highly specialised, technical, creative or conceptual skills in complex and highly specialised or varied contexts.
- Demonstrate full responsibility and accountability for personal outputs.
- Demonstrate full responsibility and accountability for all aspects of the work or functions of others, including planning, budgeting and strategy.

## **Qualifications and Packaging Rules**

### **Qualification Pathways**

The following pathways charts are provided to show the types of pathways into and from qualifications that are possible with this Training Package. For more information about qualifications and pathways contact Innovation and Business Skills Australia on phone +61 3 9815 7000 or email at [virtual@ibsa.org.au](mailto:virtual@ibsa.org.au).

## Skill Sets

### Definition

Skill sets are defined as single units of competency, or combinations of units of competency from an endorsed Training Package, which link to a licence or regulatory requirement, or defined industry need.

### Wording on Statements of Attainment

Skill sets are a way of publicly identifying logical groupings of units of competency which meet an identified need or industry outcome. Skill sets are not qualifications.

Where skill sets are identified in a Training Package, the Statement of Attainment can set out the competencies a person has achieved in a way that is consistent and clear for employers and others. This is done by including the wording 'these competencies meet *[insert skill set title or identified industry area]* need' on the Statement of Attainment. This wording applies only to skill sets that are formally identified as such in the endorsed Training Package. See the 2010 edition of the AQF Implementation Handbook for advice on wording on Statements of Attainment. [http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF\\_Handbook\\_07.pdf](http://www.aqf.edu.au/Portals/0/Documents/Handbook/AQF_Handbook_07.pdf)

## Skill Sets in this Training Package

This section provides information on Skill Sets within this Training Package, with the following important disclaimer: Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

Where this section is blank, nationally recognised Skill Sets have yet to be identified in this industry.

ICA11 sees the introduction of the following 26 skills sets:

- Application Development Specialist Skill Set
- Basic Application Development Programmer Skill Set
- Basic Computer Hardware and System Troubleshooting Skill Set
- Basic Web Development Specialist Skill Set
- Certified IT Network Enterprise, Security or Server Administrator Skill Set
- Certified Network Associate Technology Specialist Skill Set
- Certified Network Professional Specialist Skill Set
- Certified Network Professional Specialist – Voice Skill Set
- Certified Network Professional Specialist – Wireless Skill Set
- Certified Networking Technician Skill Set
- Certified Security and Architect Specialist Skill Set
- Certified Technician or Technology Specialist - Infrastructure Configuration Skill Set
- Certified Technology Specialist - Graphical User Interfaces Skill Set
- Certified Web Design Specialist Skill Set
- Computing and Application Fundamentals Skill Set
- Computing Fundamentals Skill Set
- Digital Literacy Skill Set
- Digital Literacy - eCitizen Skill Set
- Hardware Technician Skill Set
- Internetworking Systems Coordinator/Administrator Skill Set
- Rich Interactive Content Specialist Skill Set
- System and Hardware Plus Technician Skill Set

- System and Network Plus Technician Skill Set
- Virtualisation Specialist Skill Set
- Visual Communications Specialist Skill Set
- Website Administration Specialist Skill Set

Skill sets are designed to be available to industry to train participants in a particular skill set. They contain units of competency that will be awarded with a Statement of Attainment and are able to be counted towards a qualification. Where possible, Skill Sets are aligned to a range of vendor training programs that are used as a basis for industry certifications. Readers should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements.

## Employability Skills

### Employability Skills replacing Key Competency information from 2006

In May 2005, the approach to incorporate Employability Skills within Training Package qualifications and units of competency was endorsed. As a result, from 2006 Employability Skills will progressively replace Key Competency information in Training Packages.

### Background to Employability Skills

Employability Skills are also sometimes referred to as generic skills, capabilities or Key Competencies. The Employability Skills discussed here build on the Mayer Committee's Key Competencies, which were developed in 1992 and attempted to describe generic competencies for effective participation in work.

The Business Council of Australia (BCA) and the Australian Chamber of Commerce and Industry (ACCI), produced the Employability Skills for the Future report in 2002 in consultation with other peak employer bodies and with funding provided by the Department of Education, Science and Training (DEST) and the Australian National Training Authority (ANTA). Officially released by Dr Nelson (Minister for Education, Science and Training) on 23 May 2002, copies of the report are available from the DEST website at:

[http://www.dest.gov.au/archive/ty/publications/employability\\_skills/index.htm](http://www.dest.gov.au/archive/ty/publications/employability_skills/index.htm).

The report indicated that business and industry now require a broader range of skills than the Mayer Key Competencies Framework and featured an Employability Skills Framework identifying eight Employability Skills:

- Communication
- Teamwork
- Problem solving
- Initiative and enterprise
- Planning and organising
- Self-management
- Learning
- Technology.

The report demonstrated how Employability Skills can be further described for particular occupational and industry contexts by sets of facets. The facets listed in the report are the aspects of the Employability Skills that the sample of employers surveyed identified as being important work skills. These facets were seen by employers as being dependent both in their nature and priority on an enterprise's business activity.

### Employability Skills Framework

The following table contains the Employability Skills facets identified in the report Employability Skills for the Future.

Skill	Facets <i>Aspects of the skill that employers identify as important. The nature and application of these facets will vary depending on industry and job type.</i>
<b>Communication</b> that contributes to productive and harmonious relations	<ul style="list-style-type: none"> <li>• listening and understanding</li> <li>• speaking clearly and directly</li> <li>• writing to the needs of the audience</li> </ul>

across employees and customers	<ul style="list-style-type: none"> <li>• negotiating responsively</li> <li>• reading independently</li> <li>• empathising</li> <li>• using numeracy effectively</li> <li>• understanding the needs of internal and external customers</li> <li>• persuading effectively</li> <li>• establishing and using networks</li> <li>• being assertive</li> <li>• sharing information</li> <li>• speaking and writing in languages other than English</li> </ul>
<b>Teamwork</b> that contributes to productive working relationships and outcomes	<ul style="list-style-type: none"> <li>• working across different ages irrespective of gender, race, religion or political persuasion</li> <li>• working as an individual and as a member of a team</li> <li>• knowing how to define a role as part of the team</li> <li>• applying teamwork to a range of situations e.g. futures planning and crisis problem solving</li> <li>• identifying the strengths of team members</li> <li>• coaching and mentoring skills, including giving feedback</li> </ul>
<b>Problem solving</b> that contributes to productive outcomes	<ul style="list-style-type: none"> <li>• developing creative, innovative and practical solutions</li> <li>• showing independence and initiative in identifying and solving problems</li> <li>• solving problems in teams</li> <li>• applying a range of strategies to problem solving</li> <li>• using mathematics, including budgeting and financial management to solve problems</li> <li>• applying problem-solving strategies across a range of areas</li> <li>• testing assumptions, taking into account the context of data and circumstances</li> <li>• resolving customer concerns in relation to complex project issues</li> </ul>
<b>Initiative and enterprise</b> that contribute to innovative outcomes	<ul style="list-style-type: none"> <li>• adapting to new situations</li> <li>• developing a strategic, creative and long-term vision</li> </ul>

	<ul style="list-style-type: none"> <li>• being creative</li> <li>• identifying opportunities not obvious to others</li> <li>• translating ideas into action</li> <li>• generating a range of options</li> <li>• initiating innovative solutions</li> </ul>
<b>Planning and organising</b> that contribute to long and short-term strategic planning	<ul style="list-style-type: none"> <li>• managing time and priorities - setting time lines, coordinating tasks for self and with others</li> <li>• being resourceful</li> <li>• taking initiative and making decisions</li> <li>• adapting resource allocations to cope with contingencies</li> <li>• establishing clear project goals and deliverables</li> <li>• allocating people and other resources to tasks</li> <li>• planning the use of resources, including time management</li> <li>• participating in continuous improvement and planning processes</li> <li>• developing a vision and a proactive plan to accompany it</li> <li>• predicting - weighing up risk, evaluating alternatives and applying evaluation criteria</li> <li>• collecting, analysing and organising information</li> <li>• understanding basic business systems and their relationships</li> </ul>
<b>Self-management</b> that contributes to employee satisfaction and growth	<ul style="list-style-type: none"> <li>• having a personal vision and goals</li> <li>• evaluating and monitoring own performance</li> <li>• having knowledge and confidence in own ideas and visions</li> <li>• articulating own ideas and visions</li> <li>• taking responsibility</li> </ul>
<b>Learning</b> that contributes to ongoing improvement and expansion in employee and company operations and outcomes	<ul style="list-style-type: none"> <li>• managing own learning</li> <li>• contributing to the learning community at the workplace</li> <li>• using a range of mediums to learn - mentoring, peer support and networking, IT and courses</li> <li>• applying learning to technical issues (e.g. learning about products) and people issues</li> </ul>

	<p>(e.g. interpersonal and cultural aspects of work)</p> <ul style="list-style-type: none"> <li>• having enthusiasm for ongoing learning</li> <li>• being willing to learn in any setting - on and off the job</li> <li>• being open to new ideas and techniques</li> <li>• being prepared to invest time and effort in learning new skills</li> <li>• acknowledging the need to learn in order to accommodate change</li> </ul>
<p><b>Technology</b> that contributes to the effective carrying out of tasks</p>	<ul style="list-style-type: none"> <li>• having a range of basic IT skills</li> <li>• applying IT as a management tool</li> <li>• using IT to organise data</li> <li>• being willing to learn new IT skills</li> <li>• having the OHS knowledge to apply technology</li> <li>• having the appropriate physical capacity</li> </ul>

### Employability Skills Summary

An Employability Skills Summary exists for each qualification. Summaries provide a lens through which to view Employability Skills at the qualification level and capture the key aspects or facets of the Employability Skills that are important to the job roles covered by the qualification. Summaries are designed to assist trainers and assessors to identify and include important industry application of Employability Skills in learning and assessment strategies. The following is important information for trainers and assessors about Employability Skills Summaries.

- Employability Skills Summaries provide examples of how each skill is applicable to the job roles covered by the qualification.
- Employability Skills Summaries contain general information about industry context which is further explained as measurable outcomes of performance in the units of competency in each qualification.
- The detail in each Employability Skills Summary will vary depending on the range of job roles covered by the qualification in question.
- Employability Skills Summaries are not exhaustive lists of qualification requirements or checklists of performance (which are separate assessment tools that should be designed by trainers and assessors after analysis at the unit level).
- Employability Skills Summaries contain information that may also assist in building learners' understanding of industry and workplace expectations.
- 

### Industry Requirements for Employability Skills

ICA11 Information and Communications Training Package seeks to ensure that industry-endorsed employability skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability skills are both explicit and embedded within units of competency. This means that employability skills are:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Package users to identify accurately the performance requirements of each unit with regards to employability skills.

ICA11 Information and Communications Technology Training Package also seeks to ensure that employability skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

# Assessment Guidelines

## Introduction

These Assessment Guidelines provide the endorsed framework for assessment of units of competency in this Training Package. They are designed to ensure that assessment is consistent with the Australian Quality Training Framework (*AQTF Essential Standards for Initial and Continuing Registration*). Assessments against the units of competency in this Training Package must be carried out in accordance with these Assessment Guidelines.

## Assessment System Overview

This section provides an overview of the requirements for assessment when using this Training Package, including a summary of the AQTF requirements; licensing and registration requirements; and assessment pathways.

Quality assessment underpins the credibility of the vocational education and training sector. The Assessment Guidelines of a Training Package are an important tool in supporting quality assessment.

Assessment within the National Skills Framework is the process of collecting evidence and making judgements about whether competency has been achieved to confirm whether an individual can perform to the standards expected in the workplace, as expressed in the relevant endorsed unit of competency.

Assessment must be carried out in accordance with the:

- benchmarks for assessment
- specific industry requirements
- principles of assessment
- rules of evidence
- assessment requirements set out in the AQTF.

## Benchmarks for Assessment

The endorsed units of competency in this Training Package are the benchmarks for assessment. As such, they provide the basis for nationally recognised Australian Qualifications Framework (AQF) qualifications and Statements of Attainment issued by Registered Training Organisations (RTOs).

## Principles of Assessment

All assessments carried out by RTOs are required to demonstrate compliance with the principles of assessment:

- validity
- reliability
- flexibility

- fairness
- sufficiency.

These principles must be addressed in the:

- design, establishment and management of the assessment system for this Training Package
- development of assessment tools, and
- the conduct of assessment.
- 

### *Validity*

Assessment is valid when the process is sound and assesses what it claims to assess. Validity requires that:

- (a) assessment against the units of competency must cover the broad range of skills and knowledge that are essential to competent performance
- (b) assessment of knowledge and skills must be integrated with their practical application judgement of competence must be based on sufficient evidence (that is, evidence gathered on
- (c) a number of occasions and in a range of contexts using different assessment methods). The specific evidence requirements of each unit of competency provide advice on sufficiency

### *Reliability*

Reliability refers to the degree to which evidence presented for assessment is consistently interpreted and results in consistent assessment outcomes. Reliability requires the assessor to have the required competencies in assessment and relevant vocational competencies (or to assess in conjunction with someone who has the vocational competencies). It can only be achieved when assessors share a common interpretation of the assessment requirements of the unit(s) being assessed.

### *Flexibility*

To be flexible, assessment should reflect the candidate's needs; provide for recognition of competencies no matter how, where or when they have been acquired; draw on a range of methods appropriate to the context, competency and the candidate; and support continuous competency development.

### *Fairness*

Fairness in assessment requires consideration of the individual candidate's needs and characteristics, and any reasonable adjustments that need to be applied to take account of them. It requires clear communication between the assessor and the candidate to ensure that the candidate is fully informed about, understands and is able to participate in, the assessment process, and agrees that the process is appropriate. It also includes an opportunity for the person being assessed to challenge the result of the assessment and to be reassessed if necessary.

### *Sufficiency*

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency. Sufficiency is also one of the rules of evidence.

### **Rules of Evidence**

The rules of evidence guide the collection of evidence that address the principles of validity and reliability, guiding the collection of evidence to ensure that it is valid, sufficient, current and authentic.

### *Valid*

Valid evidence must relate directly to the requirements of the unit of competency. In ensuring evidence is valid, assessors must ensure that the evidence collected supports demonstration of the outcomes and performance requirements of the unit of competency together with the knowledge and skills necessary for competent performance. Valid evidence must encapsulate the breadth and depth of the unit of competency, which will necessitate using a number of different assessment methods.

### *Sufficient*

Sufficiency relates to the quality and quantity of evidence assessed. It requires collection of enough appropriate evidence to ensure that all aspects of competency have been satisfied and that competency can be demonstrated repeatedly. Supplementary sources of evidence may be necessary. The specific evidence requirements of each unit of competency provide advice on sufficiency.

### *Current*

In assessment, currency relates to the age of the evidence presented by a candidate to demonstrate that they are still competent. Competency requires demonstration of current performance, so the evidence collected must be from either the present or the very recent past.

### *Authentic*

To accept evidence as authentic, an assessor must be assured that the evidence presented for assessment is the candidate's own work.

## **Assessment Requirements of the Australian Quality Training Framework**

Assessment leading to nationally recognised AQF qualifications and Statements of Attainment in the vocational education and training sector must meet the requirements of the AQTF as expressed in the AQTF 2010 Essential Standards for Registration.

The AQTF 2010 Essential Standards for Initial and Continuing Registration can be downloaded from <[www.training.com.au](http://www.training.com.au)>.

The following points summarise the assessment requirements.

### **Registration of Training Organisations**

Assessment must be conducted by, or on behalf of, an RTO formally registered by a State or Territory Registering Body in accordance with the AQTF. The RTO must have the specific units of competency and/or AQF qualifications on its scope of registration.

### **Quality Training and Assessment**

Each RTO must provide quality training and assessment across all its operations. See the *AQTF 2010 Essential Standards for Initial and Continuing Registration*, Standard 1.

### **Assessor Competency Requirements**

Each person involved in training and assessment must be competent for the functions they perform. See the *AQTF 2010 Essential Standards for Initial and Continuing Registration*, Standard 1 for assessor (and trainer) competency requirements. See also the *AQTF 2010 Users' Guide to the Essential Standards for Registration – Appendix 2*.

### **Assessment Requirements**

The RTOs assessments, including RPL, must meet the requirements of the relevant endorsed Training Package. See the *AQTF 2010 Essential Standards for Initial and Continuing Registration*.

### **Assessment Strategies**

Each RTO must have strategies for training and assessment that meet the requirements of the relevant Training Package or accredited course and are developed in consultation with industry stakeholders. See the *AQTF 2010 Essential Standards for Initial and Continuing Registration*.

### **National Recognition**

Each RTO must recognise the AQF qualifications and Statements of Attainment issued by any other RTO. See the *AQTF 2010 Essential Standards for Initial and Continuing Registration*.

### **Access and Equity and Client Outcomes**

Each RTO must adhere to the principles of access and equity and maximise outcomes for its clients. See the *AQTF 2010 Essential Standards for Initial and Continuing Registration*.

### **Monitoring Assessments**

Training and/or assessment provided on behalf of the RTO must be monitored to ensure that it is in accordance with all aspects of the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **Recording Assessment Outcomes**

Each RTO must manage records to ensure their accuracy and integrity. See the AQTF 2010 *Essential Standards for Initial and Continuing Registration*.

### **Issuing AQF qualifications and Statements of Attainment**

Each RTO must issue AQF qualifications and Statements of Attainment that meet the requirements of the current *AQF Implementation Handbook* and the endorsed Training Packages within the scope of its registration. An AQF qualification is issued once the full requirements for a qualification, as specified in the nationally endorsed Training Package are met. A Statement of Attainment is issued when an individual has completed one or more units of competency from nationally recognised qualification(s)/course(s). See the AQTF and the edition of the *AQF Implementation Handbook* – available on the AQF Council website <[www.aqf.edu.au](http://www.aqf.edu.au)>.

### **Licensing/Registration Requirements**

This section provides information on licensing/registration requirements for this Training Package, with the following important disclaimer:

Licensing and registration requirements that apply to specific industries, and vocational education and training, vary between each State and Territory, and can regularly change. The developers of this Training Package, and DEEWR, consider that the licensing/registration requirements described in this section apply to registered training organisations (RTOs), assessors or candidates with respect to this Training Package. While reasonable care has been taken in its preparation, the developers of this Training Package and DEEWR cannot guarantee it is definitive or accurate at the time of reading; the information is provided in good faith on that basis.

The ICA11 Information and Communications Technology Training Package has minimal licensing/registration requirements. The only units of competency requiring licensing are the following elective units imported from the ICT10 Integrated Telecommunications Training Package into the Certificate IV in Information Technology Support:

- ICTCBL2136A Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule
- ICTCBL2137A Install, maintain and modify customer premises communications cabling: ACMA Open Rule.
- 

If using these units please contact the relevant State or Territory Department(s) to check if the licensing/registration requirements described below still apply, and to check if there are any others with which you must comply. Please refer to the ICT10 Integrated Telecommunications Training Package for further details.

### **Requirements for Assessors**

In order to conduct assessment in these units for statutory licensing or other industry registration requirements, assessors must meet the requirements outlined in the following table, in addition to the AQTF requirements.

LICENCE/ REGISTRATION	JURISDICTION	REQUIREMENTS
Restricted Registration ICTCBL2136A	Australian Communications and Media Authority	Restricted Registered Cabler TITAB registered assessor
Open Registration ICTCBL2137A	Australian Communications and Media Authority	Open Registered Cabler TITAB registered assessor

### Assessor competencies

The AQTF specifies mandatory competency requirements for assessors. For information, Element 1.4 from the AQTF Essential Standards for Registration follows.

- 1.4 Training and assessment are conducted by trainers and assessors who:
- have the necessary training and assessment competencies as determined by the National Quality Council or its successors
  - have the relevant vocational competencies at least to the level being delivered or assessed
  - can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and
  - continue to develop their vocational education and training (VET) knowledge and skills as well as their industry currency and trainer/assessor competence.

### Requirements for RTOs

#### Training and assessment in remote and regional areas

Training and assessing candidates in remote and regional areas present a range of challenges. These include:

- lack of numbers preventing the establishment of traditional class sizes
- physical remoteness of some communities, where access to training facilities is limited
- scarcity of teachers with the required industry experience
- scarcity of physical training resources (e.g. current and emerging technology).
- 

Some options for overcoming these challenges include:

- partnerships between RTOs to establish classes, i.e. programs delivered on a regional rather than local basis
- delivering certain units by distance mode
- partnerships between industry and RTOs to share resources and personnel
- partnerships between schools and RTOs

- use of technology (e.g. email, CDs and internet) and self-paced resources.
- 

### **Assessment in a simulated environment**

Units of competency in the ICA11 Information and Communications Technology Training Package may be assessed in the workplace or in a simulated environment.

The information technology industry involves the use of technologies and processes which have a potentially high impact on customers and a high cost of failure. Normal practice is to protect these technologies and processes from any risk. Therefore assessment of training candidates often cannot be undertaken in normal operating environments.

In response to this, industry practice for many years has been to develop models and simulations on which assessments are conducted. As a result, assessment of candidates for many of the units of competency in the ICA11 Information and Communications Technology Training Package can only be undertaken using simulations. To maintain the integrity of these assessments, RTOs and assessors need to be vigilant in keeping pace with the industry and in checking that assessment simulations accurately reflect workplace activities. RTOs will need regular contact with industry to ensure the currency and validity of assessment simulations.

To assist assessors, the following information provides a framework for conducting assessments in simulated environments.

Simulations must provide opportunities for integrated assessment of competence that includes:

- performing the task (task skills)
- managing a number of tasks (task management skills)
- dealing with workplace irregularities such as unexpected problems, breakdowns and changes in routine (contingency management skills)
- fulfilling the responsibilities and expectations of the job and workplace, including working with others (job/role environment skills)
- transferring competencies to new contexts.
- 

All evidence from simulated activities must result from activities that have taken place in a realistic work environment that replicates the conditions and circumstances in which the candidate will usually be expected to work.

Working conditions should reflect those found in the workplace and include facilities, equipment and materials used in the workplace for the activities being assessed. Most importantly they should also include relationships, constraints and pressures met in the workplace.

Assessment activities must be realistic and reasonable in terms of scale.

Any assessment conducted under simulated conditions must take into consideration what would be typical ambient conditions encountered in the normal workplace as well as reflect the typical workflow involved.

## Workplace simulation criteria

In conducting an assessment using a simulation, assessors should review the process prior to its implementation. The simulation must give the candidate the opportunity to meet three critical criteria. These are:

- quality – the work is of the standard required for entry into the industry
- productivity – the work is performed within a time frame appropriate for entry to the industry
- safety – the work is performed in a manner that meets industry safety standards.
- 

Where assessment simulations meet these criteria, RTOs can be sure that candidates are ‘work ready’ on successful completion of the assessment task.

In addition, the assessment process should be reviewed to ensure that, wherever applicable, it:

- uses facilities and equipment that meet current industry standards
- includes typical customers, including difficult customers and diverse types of customers
- integrates various types of work performance – multiple tasks, prioritisation, service standards and OHS
- requires allocation of time to tasks and deadlines
- measures consistent performance over time
- includes work with others in teams
- requires consideration of budget constraints
- includes use of operational procedures and guidelines.
- 

To further enhance the validity of assessment process using simulation, the assessor should consider:

- assessments covering a range of interconnected units of competency
- use of assessment checklists to assist in identifying critical performance criteria
- use of self assessment, peer assessment and debriefing activities
- use of authentic documentation, e.g. workplace roles, OHS regulations, salary advice, marketing information, procedural manuals, policies, and enterprise bargaining agreements.
- 

## Training and assessment issues for schools

Implementation of ICA11 Information and Communications Technology Training Package within the school sector, while encouraged, needs to ensure the following:

- currency of skills and knowledge of those charged with training and assessing students
- access to industry-current equipment, facilities and training resources so that students acquire a realistic view of the realities and conditions within the workplace
- comprehensive coverage of underpinning skills and knowledge as delineated within the units of competency
- appropriateness of learning and assessment experiences to ensure that these are current and realistic.

The units of competency provide more detailed guidance for training and assessment purposes, as well as examples relevant to each unit, and schools are encouraged to use these guidelines when planning training and assessment.

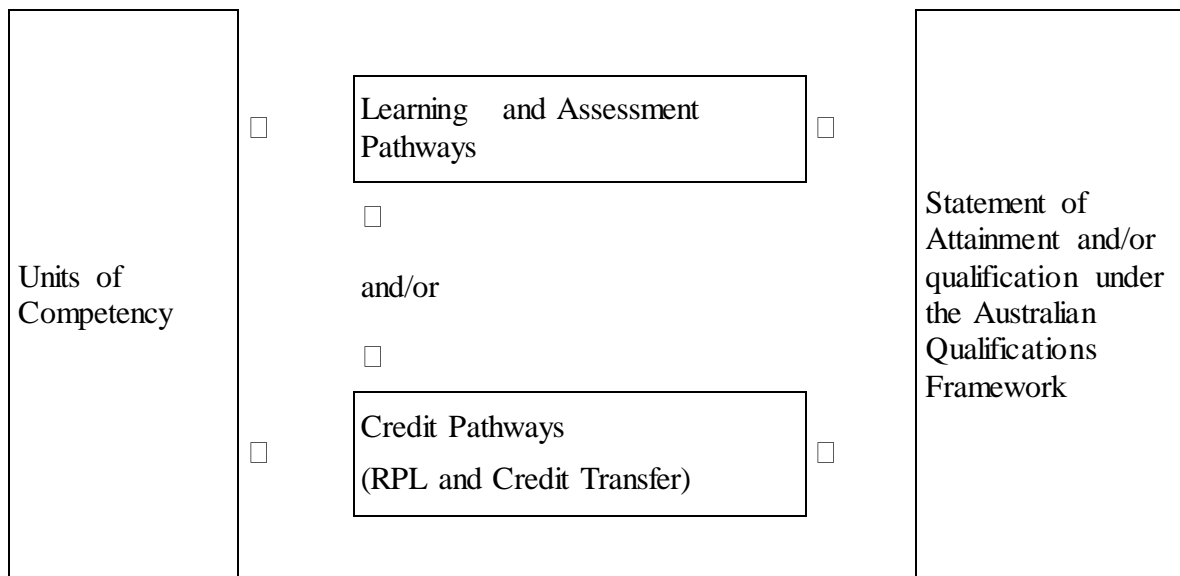

For information on VET in Schools, please refer to Appendix A.

### Pathways

The competencies in this Training Package may be attained in a number of ways including through:

- formal or informal education and training
- experiences in the workplace
- general life experience, and/or
- any combination of the above.

Assessment under this Training Package leading to an AQF qualification or Statement of Attainment may follow a learning and assessment pathway, or a recognition pathway, or a combination of the two as illustrated in the following diagram.

Each of these assessment pathways leads to full recognition of competencies held – the critical issue is that the candidate is competent, not how the competency was acquired. Assessment, by any pathway, must comply with the assessment requirements set out in the Assessment Guidelines of the Training Package, the AQTF and, where relevant, the Australian Qualifications Framework.

### **Learning and Assessment Pathways**

Usually, learning and assessment are integrated, with evidence being collected and feedback provided to the candidate at anytime throughout the learning and assessment process.

Learning and assessment pathways may include structured programs in a variety of contexts using a range of strategies to meet different learner needs. Structured learning and assessment programs could be: group-based, work-based, project-based, self-paced, action learning-based; conducted by distance or e-learning; and/or involve practice and experience in the workplace.

Learning and assessment pathways to suit Australian Apprenticeships have a mix of formal structured training and structured workplace experience with formative assessment activities through which candidates can acquire and demonstrate skills and knowledge from the relevant units of competency.

### **Credit Pathways**

*Credit* is the value assigned for the recognition of equivalence in content between different types of learning and/or qualifications which reduces the volume of learning required to achieve a qualification.

Credit arrangements must be offered by all RTOs that offer Training Package qualifications. Each RTO must have a systematic institutional approach with clear, accessible and transparent policies and procedures.

Competencies already held by individuals can be formally assessed against the units of competency in this Training Package, and should be recognised regardless of how, when or where they were acquired, provided that the learning is relevant to the unit of competency outcomes.

### **Recognition of Prior Learning**

Recognition of Prior Learning (RPL) is an assessment process which determines the credit outcomes of an individual application for credit.

The availability of Recognition of Prior Learning (RPL) provides all potential learners with access to credit opportunities.

The recognition of prior learning pathway is appropriate for candidates who have previously attained skills and knowledge and who, when enrolling in qualifications, seek to shorten the duration of their training and either continue or commence working. This may include the following groups of people:

- existing workers;
- individuals with overseas qualifications;
- recent migrants with established work histories;
- people returning to the workplace; and
- people with disabilities or injuries requiring a change in career.
- 

As with all assessment, RPL assessment should be undertaken by academic or teaching staff with expertise in the subject, content of skills area, as well as knowledge of and expertise in RPL assessment policies and procedures.

Assessment methods used for RPL should provide a range of ways for individuals to demonstrate that they have met the required outcomes and can be granted credit. These might include:

- questioning (oral or written)
- consideration of a portfolio and review of contents
- consideration of third party reports and/or other documentation such as documentation such as articles, reports, project material, papers, testimonials or other products prepared by the RPL applicant that relate to the learning outcomes of the relevant qualification component
- mapping of learning outcomes from prior formal or non-formal learning to the relevant qualification components
- observation of performance, and
- participation in structured assessment activities the individual would normally be required to undertake if they were enrolled in the qualification component/s.
- 

In a Recognition of Prior Learning (RPL) pathway, the candidate provides current, quality evidence of their competency against the relevant unit of competency. This process may be directed by the candidate and verified by the assessor. Where the outcomes of this process indicate that the candidate is competent, structured training is not required. The RPL requirements of the AQTF must be met.

As with all assessment, the assessor must be confident that the evidence indicates that the candidate is currently competent against the endorsed unit of competency. This evidence may take a variety of forms and might include certification, references from past employers, testimonials from clients, work samples and/or observation of the candidate. The onus is on candidates to provide sufficient evidence to satisfy assessors that they currently hold the relevant competencies. In judging evidence, the assessor must ensure that the evidence of prior learning is:

- authentic (the candidate's own work);
- valid (directly related to the current version of the relevant endorsed unit of competency);

- reliable (shows that the candidate consistently meets the endorsed unit of competency);
- current (reflects the candidate's current capacity to perform the aspect of the work covered by the endorsed unit of competency); and
- sufficient (covers the full range of elements in the relevant unit of competency and addresses the four dimensions of competency, namely task skills, task management skills, contingency management skills, and job/role environment skills).

## Credit Transfer

*Credit transfer is a process which provides learners with agreed and consistent credit outcomes based on equivalences in content between matched qualifications.*

This process involves education institutions:

- mapping, comparing and evaluating the extent to which the *defined learning outcomes and assessment requirements* of the *individual components of one qualification* are equivalent to the learning outcomes and assessment requirements of the individual components of another qualification
- making an educational judgment of the credit outcomes to be assigned between the matched components of the two qualifications
- setting out the agreed credit outcomes in a documented arrangement or agreement, and
- publicising the arrangement/agreement and credit available.

## Combination of Pathways

Credit may be awarded on the basis of a combination of credit transfer plus an individual RPL assessment for additional learning. Once credit has been awarded on the basis of RPL, subsequent credit transfer based on these learning outcomes should not include revisiting the RPL assessment but should be based on credit transfer or articulation or other arrangements between providers.

Where candidates for assessment have gained competencies through work and life experience and gaps in their competence are identified, or where they require training in new areas, a combination of pathways may be appropriate.

In such situations, the candidate may undertake an initial assessment to determine their current competency. Once current competency is identified, a structured learning and assessment program ensures that the candidate acquires the required additional competencies identified as gaps.

## Assessor Requirements

This section identifies the specific requirements on the vocational competence and experience for assessors, to ensure that they meet the needs of industry and their obligations under AQTF, and clarifies how others may contribute to the assessment process where one person alone does not hold all the required competencies.

## Assessor Competencies

The AQTF specifies mandatory competency requirements for assessors. For information, Element 1.4 from the AQTF 2007 *Essential Standards for Registration* follows:

- 1.4 Training and assessment are conducted by trainers and assessors who:
- a. have the necessary training and assessment competencies as determined by the National Quality Council or its successors, and
  - b. have the relevant vocational competencies at least to the level being delivered or assessed, and
  - c. can demonstrate current industry skills directly relevant to the training/assessment being undertaken, and
  - d. continue to develop their Vocational Education and Training (VET) knowledge and skills as well as their industry currency and trainer/assessor competence.

\* See AQTF 2010 *Users' Guide to the Essential Standards for Registration* – Appendix 2

## Industry Assessment Contextualisation 1

### **Training and assessment for people with specific needs**

Disability Standards for Education were formed under the Disability Discrimination Act 1992 and were introduced in August 2005. They clarify the obligations of education and training providers to ensure that students who have a disability are able to access and participate in education without experiencing discrimination.

The Department of Education, Employment and Workplace Relations (DEEWR) provides further information in the *Disability Standards for Education 2005 Guidance Notes*, accessible via the DEEWR website ([www.deewr.gov.au/Schooling/DisabilityStandardsforEducation/Documents/Disability\\_Standards\\_Education\\_Guidance\\_Notes\\_pdf.pdf](http://www.deewr.gov.au/Schooling/DisabilityStandardsforEducation/Documents/Disability_Standards_Education_Guidance_Notes_pdf.pdf)).

Good vocational training and assessment are often about making adjustments to what we do to meet the learning support needs of individuals. The information provided in this section is aimed at assisting teachers/trainers to meet the reasonable adjustment needs of people who have a disability.

According to the Australian Bureau of Statistics (ABS), 2003, Survey of Disability, Ageing and Carers (SDAC) in the section on education and employment:

‘In 2003, one in four people (24%) aged 15–64 years with a profound or severe core activity limitation, who were living in households, had completed Year 12. This compares to half (49%) of those without a disability. People with a profound or severe core activity limitation were less likely to have completed a diploma or higher qualification (14%) than those without a disability (28%).’

Employment related findings, for people aged 15–64 years living in households, from the ABS 2003 SDAC include:

- those with a profound level of core-activity limitation had a much lower labour force participation rate (15%) than people without a disability (81%)
- people with a disability who were employed were more likely to work part-time (37%) than those who were employed and did not have a disability (29%)
- people employed in agriculture, forestry and fishing (16%) had a relatively high disability rate compared to the overall rate for those employed (11%).’
- 

Clearly there is much work still to be done to ensure that people who have a disability are able to participate in employment and vocational education and training as fully as possible.

### **What is a disability?**

A disability presents some impairment to everyday activity. Some people with a disability do not have any impairments resulting from their disability. For example, a person who has a hearing impairment which is compensated for by a hearing aid may function without any adjustments. While some people with a disability may have an impairment because of the environment, not the disability itself. For example, hearing loss can be accentuated in a room with loud, competing noise and poor acoustics.

A disability may affect or relate to a range of human functions, including mobility, stamina, lifting ability, memory, vision, hearing, speech, comprehension and mood swings. This may be due to accidents, illnesses or birth.

According to the ABS 2003 SDAC:

‘One in five people in Australia (3,958,300 or 20.0%) had a reported disability. This rate was much the same for males (19.8%) and females (20.1%). Disability was defined as any limitation, restriction or impairment, which has lasted, or is likely to last, for at least six months and restricts everyday activities. Examples range from hearing loss which requires the use of a hearing aid, to difficulty dressing due to arthritis, to advanced dementia requiring constant help and supervision.’

The ABS 2003 SDAC information also tells us that:

‘15.2% (600,300) of people with a disability reported that the cause of their main health condition was accident or injury, 14% (557 300) that it was disease, illness or heredity, and 11% (423,500) that it was "working conditions, work or over-work".’

Health conditions can also be acquired through sporting accidents, repetitive or over-use (through regular or sporting activities), or the daily activities of life.

There are many resources available that provide information on how to adjust training and assessment for someone who has a disability; some of these are listed in the contacts section below.

### **Adjustments in training and assessment**

An open mind, common sense and tailoring to individual circumstances will, as often as not, ensure individuals achieve the standards that employers and training providers expect. Reasonable adjustments need only be that – reasonable. It is about identifying what adjustments might reasonably be made and how they may be put into place.

Training and assessment can be made more appropriate and fairer for a person who has a disability through attitude, preparation and application.

### **Attitude**

The attitude of others is often the greatest barrier for people who have a disability. While most people who have a disability will only ever require minor adjustments to ensure learning is positive, some will require additional support. There are many support agencies that can provide advice, however teachers/trainers may need to take additional time to ensure their teaching/training meets the learning support needs of the individual concerned.

Positive language creates an atmosphere of mutual respect, which is essential to learning. For example, using language that identifies learners as people rather than language that identifies them by one of their characteristics conveys that the person is more important than the characteristic, such as the difference between a ‘person who has an intellectual disability’ and an ‘intellectually disabled person’. A person who has an intellectual disability could also be identified by a range of equally important characteristics – height, age, sporting interests, etc. However, the term ‘intellectually disabled person’ refers to the disability as the major, and often only, defining characteristic.

### **Preparation**

It is important to identify any functional issues arising from the nature and extent of a person’s disability. This can usually be done by discussing such issues with the individual. In most cases, this consultation will identify reasonable adjustment needs which can be put into place. There are many simple things that teachers/trainers can do to make reasonable adjustments to enable individuals who have a disability to succeed in training and assessment. In some cases, professional support may be required.

### **Application**

Once reasonable adjustments have been implemented it is important to monitor and evaluate what has been done to ensure the best environment for continuous learning because:

- adjustments may only need to be temporary – i.e. mechanisms may only need to be in place during an induction period or due to a temporary disability, in which case evaluation will ensure appropriateness without the need for ongoing monitoring
- adjustments may need reinforcing – when adjustments need to be ongoing, monitoring may reinforce patterns of behaviour in order for them to become ‘natural’
- adjustments may need improving – where adjustments are ongoing or substantial, a commitment to continuous improvement is recommended through monitoring.
- 

In most cases an informal discussion with the person concerned may be all that is necessary. However, should adjustments be substantial, or a learner not be acquiring competence at a reasonable rate, a more formal process may be required. This may include:

- performance indicators – training providers, learners and employers should have agreed indicators of performance which can be measured and monitored
- independent support – a third party, independent of the training and/or assessment environment, may need to be involved
- experimentation – if existing adjustments are not proving satisfactory, creative solutions may be needed
- continuing review – formal monitoring is encouraged if adjustments are changed or if substantial adjustments are necessary.
- 

For further information on training and assessment for people with specific needs, the DEEWR website has information about the National Disability Coordination Officer Programme, which ‘provides information, co ordination and referral services for people with a disability interested in or enrolled in post school education and training’ ([www.deewr.gov.au](http://www.deewr.gov.au)).

**Reasonable adjustment**

Below are some of the practical things that can be done as part of providing reasonable adjustment to learners with specific support needs to enable them to undertake training and assessment. Clearly, each case will be different and will need to be discussed with the person and in some cases expert help will be needed, at least in the initial stages.

Type of disability	Reasonable adjustment
Acquired brain injury	<ul style="list-style-type: none"> <li>• Memory aids (posters, notes, etc.)</li> <li>• Reflective listening skills</li> <li>• Stress minimisation</li> <li>• Time and patience</li> </ul>
Hearing impairment	<ul style="list-style-type: none"> <li>• Audio loops for people using hearing aids</li> <li>• Plain English documents</li> <li>• Fire and alarm systems with flashing lights</li> <li>• Sign language interpreters</li> </ul>

Type of disability	Reasonable adjustment
	<ul style="list-style-type: none"> <li>• Telephone typewriters</li> </ul>
Intellectual disability	<ul style="list-style-type: none"> <li>• Additional time</li> <li>• Assessment which is appropriate to the skill (i.e. avoiding written assessment for practical tasks)</li> <li>• Mentors</li> <li>• Plain English documents</li> <li>• Practical learning sessions</li> <li>• Repetition of learning exercises</li> </ul>
Mobility impairment	<ul style="list-style-type: none"> <li>• Access to aids, such as for holding documents</li> <li>• Adjustable tables</li> <li>• Lifting limits</li> <li>• Note-taking support</li> <li>• Verbal rather than written presentations</li> <li>• Personal computers</li> <li>• Wheelchair access</li> </ul>
Psychiatric disability	<ul style="list-style-type: none"> <li>• Identification and avoidance of stresses</li> <li>• Ongoing rather than formal assessments</li> <li>• Reflective listening skills</li> <li>• 'Time-out' breaks in assessment</li> </ul>
Speech impairment	<ul style="list-style-type: none"> <li>• Information summaries</li> <li>• Stress minimisation</li> <li>• Time and patience</li> <li>• Written rather than verbal opportunities</li> </ul>
Vision impairment	<ul style="list-style-type: none"> <li>• Additional writing time for assignments and tests</li> <li>• Audiotapes</li> <li>• Braille translations</li> <li>• Enlarged computer screen images</li> <li>• Enlarged text and images</li> <li>• Good lighting or reading lamps</li> <li>• Guide dog provision</li> <li>• Informing the person before moving furniture</li> <li>• Voice synthesisers on computers</li> </ul>

## Industry Assessment Contextualisation 2

### Assessment for Indigenous organisations

Aboriginal and Torres Strait Islander people have expressed concern about the importance of developing appropriate assessment processes.

There are four main areas of concern:

- diversity
- cultural appropriateness
- community control
- accreditation.
- 

### **Diversity**

The word 'diversity' is used to emphasise the wide range of opinions, aspirations, community circumstances, cultural practices, geographic locations, and social, economic and political conditions that exist throughout Australia and the need to guard against assumptions that all communities are the same.

One approach is to distinguish between remote, rural and urban settings. These settings suggest differences that may be relevant to Aboriginal and Torres Strait Islander organisations, including:

- culture
- language
- history
- social make-up
- geography
- social and economic infrastructure
- economy
- political structure.
- 

These factors suggest that training and assessment, in order to be relevant to the needs of a particular Aboriginal and Torres Strait Islander organisation, should address each situation as unique.

### **Cultural appropriateness**

The word 'culture' is used in a broad sense, it refers to:

- values, social beliefs and customs, such as Aboriginal and Torres Strait Islander law, land, and family and kinship systems
- protocols of behaviour and interaction, such as cultural authority, gender and kinship
- ways of thinking, including preferred learning styles
- language, both English and Aboriginal English
- lifestyles
- local history
- location, including region and place.
-

A particularly important aspect of cultural appropriateness is that of learning styles. There is evidence that Aboriginal and Torres Strait Islander people, both traditional and contemporary, approach learning differently from the Western intellectual tradition, which is relevant to effective training and assessment.

It is understood that Aboriginal and Torres Strait Islander people may:

- learn better in groups than individually
- learn better in the surroundings of their community than in an institutional environment
- prefer oral communication to written forms
- learn on the basis of trial and error in the presence of an experienced person in preference to concept building approaches
- have a highly-developed sense of spatial relations by which they learn; hence stories, maps and pictures would be preferable to oral explanations.
- 

To be effective, it is necessary that training and assessment recognise, adopt and practise appropriate delivery and assessment approaches.

Trainers and assessors who are not Aboriginal or Torres Strait Islanders need information on aspects of Aboriginal and Torres Strait Islander culture. They need to work closely with Aboriginal and Torres Strait Islander people to adopt practices that reflect Aboriginal and Torres Strait Islander approaches. The community should be asked to identify experts to provide information and to assist with assessment of relevant protocols, for example, where required.

There are a number of ways an RTO can establish and maintain culturally appropriate training and assessment practices, including:

- ensuring a high proportion of Aboriginal and Torres Strait Islander participation in all aspects of planning, development, delivery and evaluation
- establishing and maintaining a collaborative relationship with local Aboriginal and Torres Strait Islander communities
- as a mainstream (non-Indigenous) RTO, establishing auspice relationships with Aboriginal and Torres Strait Islander organisations and individuals, including direct and indirect involvement of persons identified as appropriate by the local community
- ensuring ongoing training of non-Aboriginal and Torres Strait Islander staff at all levels of the RTO, delivered by Aboriginal and Torres Strait Islander personnel.

## **Community control**

The term community control is synonymous with such things as self determination and self management, and underpins most community aspirations. It is of fundamental concern to people who see themselves as having been dispossessed by colonisation.

The essence of control is control of decision-making. In order to be able to do this, people need all relevant information, relevant competencies, and recognition of their own structures and processes.

Among other things, Aboriginal and Torres Strait Islander people seek control over their training. It is necessary, therefore, that they participate in meaningful ways in all stages of planning, development, delivery and evaluation. One way to achieve this is for communities to have control of the contract for training initiatives.

It is important that training providers and assessors respect and conform to the practice of community control which underpins this field within the ICA11 Information and Communications Technology Training Package.

### **Accreditation**

Aboriginal and Torres Strait Islander people have said for a long time that their involvement in training has not been formally recognised and that many of the skills they use in managing their organisations and delivering services to their communities have not been valued.

The first issue may have arisen because much of the training that has been delivered to communities has been customised to particular situations, has not been assessed on an individual basis if at all, and has been delivered by unregistered personnel. Secondly, until this time, recognition of current competencies (RCC) has been under-utilised.

Individuals may demonstrate competence in complete units of competency through formal training, informal training or the recognition of current competencies and skills, resulting in qualifications or statements of attainment being awarded.

In the community group setting, an important feature of likely relevance for assessment is that participants may vary with respect to previous education and training experience, which may result in diverse literacy and numeracy issues. However, literacy and numeracy skills are not a barrier to sophisticated thought, and care must be taken not to use assessment strategies that rely on a person having numeracy and literacy skills that are not intrinsically required by the unit of competency being assessed.

A flexible approach to assessment will be required by RTOs in order to meet the requirements of Aboriginal and Torres Strait Islander organisations and individuals under this domain within the ICA11 Information and Communications Technology Training Package.

### **Assessment in Aboriginal and Torres Strait Islander communities**

The guiding principles that underpin assessment include:

- assessment should be transparent, i.e. clearly seen and understood by the candidate and others
- assessment should empower the candidate on the basis of consent, self-assessment and responsibility for the process
- members or prospective members of community management committees should have opportunities to demonstrate their competencies and skills
- activities undertaken by the candidate in a community management role may be used as the context for assessment where possible (known as on-the-job assessment or workplace assessment); there may also be opportunities to include evidence from other relevant situations

- assessment should involve designated community experts working in collaboration with RTO assessors in order to provide appropriate recognition of cultural and community skills and knowledge
- assessments must provide constructive feedback to candidates and support for further competency development
- assessments must provide a statement of attainment or qualification, listing the units of competency achieved
- records of candidate achievement maintained by the RTO must include the statement of attainment, listing the units of competency or qualifications achieved as required by the AQTF 2007
- a record of demonstrated competencies will assist in role clarification and performance appraisals in the workplace.
- 

Given the importance of the assessment to the candidate and community management committees, the assessor must make every effort to ensure that assessment is conducted with the highest level of professionalism and integrity.

Units of competency with cultural content, including the following of local protocols, will require the assessor to have knowledge of these cultural matters. As these matters are often governed by local rules regarding access to such knowledge, only those people with the knowledge can genuinely assess these aspects of the competency or provide guidance on their assessment.

Discussion must take place with the community and agreement must be reached on how these matters are assessed. For non-Aboriginal and Torres Strait Islander RTOs, this will usually mean the use of auspice arrangements with appropriate people or knowledge experts, identified by the community.

It should be noted that for Aboriginal and Torres Strait Islander people being assessed in aspects of competency, they will almost invariably have been attained through life experience. This must also be taken into account in the assessment procedures relating to cultural matters.

Assessors may exercise limited discretion in response to organisational or individual requirements, but any changes must not alter the meaning of the unit of competency or the elements of competency.

Candidates must be informed of the right to access grievance procedures.

## Designing Assessment Tools

This section provides an overview on the use and development of assessment tools.

### Use of Assessment Tools

Assessment tools provide a means of collecting the evidence that assessors use in making judgements about whether candidates have achieved competency.

There is no set format or process for the design, production or development of assessment tools. Assessors may use prepared assessment tools, such as those specifically developed to support this Training Package, or they may develop their own.

### **Using Prepared Assessment Tools**

If using prepared assessment tools, assessors should ensure these relate to the current version of the relevant unit of competency. The current unit of competency can be checked on the National Register <[www.ntis.gov.au](http://www.ntis.gov.au)>.

### **Developing Assessment Tools**

When developing their own assessment tools, assessors must ensure that the tools:

- are benchmarked against the relevant unit or units of competency;
- are reviewed as part of the validation of assessment strategies required under the AQTF; and
- meet the assessment requirements expressed in the AQTF 2010 Essential Standards for Initial and Continuing Registration.

A key reference for assessors developing assessment tools is TAE10 Training and Education Training Package.

### **Language, Literacy and Numeracy**

The design of assessment tools must reflect the language, literacy and numeracy competencies required for the performance of a task in the workplace and not exceed these expectations.

### **Conducting Assessment**

This section details the mandatory assessment requirements and provides information on equity in assessment including reasonable adjustment.

### **Mandatory Assessment Requirements**

Assessments must meet the criteria set out in the AQTF 2010 *Essential Standards for Initial and Continuing Registration*. For information, the mandatory assessment requirements from Standard 1 from the AQTF 2010 *Essential Standards for Initial and Continuing Registration* are as follows:

- 1.5 Assessment, including Recognition of Prior Learning (RPL):
- a. meets the requirements of the relevant Training Package or accredited course
  - b. is conducted in accordance with the principles of assessment and the rules of evidence
  - c. meets workplace and, where relevant, regulatory requirements

d. is systematically validated.

### Assessment of Employability Skills

Employability Skills are integral to workplace competency. As such, they must be considered in the design, customisation, delivery and assessment of vocational education and training programs in an integrated and holistic way, as represented diagrammatically below.

Employability Skills are embedded within each unit of competency, and an Employability Skills Summary is available for each qualification. Training providers must use Employability Skills information in order to design valid and reliable training and assessment strategies. This analysis could include:

- reviewing units of competency to locate relevant Employability Skills and determine how they are applied within the unit
- analysing the Employability Skills Summary for the qualification in which the unit or units are packaged to help clarify relevant industry and workplace contexts and the application of Employability Skills at that qualification outcome
- designing training and assessment to address Employability Skills requirements.
- 

The National Quality Council has endorsed a model for assessing and reporting Employability Skills, which contains further suggestions about good practice strategies in teaching, assessing, learning and reporting Employability Skills. The model is available from <http://www.training.com.au/>.

The endorsed approach includes learners downloading qualification specific Employability Skills Summaries for Training Package qualifications from an online repository at <http://employabilityskills.training.com.au>

For more information on Employability Skills in Innovation and Business Skills Australia's Training Packages go to the Innovation and Business Skills Australia website at <http://www.ibsa.org.au>

Employability Skills are reported on each qualification using the following statement on the qualification testamur: "A summary of the Employability Skills developed through this qualification can be downloaded from <http://employabilityskills.training.com.au> "

### Access and Equity

An individual's access to the assessment process should not be adversely affected by restrictions placed on the location or context of assessment beyond the requirements specified in this Training Package: training and assessment must be bias-free.

Under the rules for their development, Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce. The flexibilities offered by Training Packages should enhance opportunities and potential outcomes for all people so that we can all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

### **Reasonable Adjustments**

It is important that education providers take meaningful, transparent and reasonable steps to consult, consider and implement reasonable adjustments for students with disability.

Under the Disability Standards for Education 2005, education providers must make reasonable adjustments for people with disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While 'reasonable adjustment' and 'unjustifiable hardship' are different concepts and involve different considerations, they both seek to strike a balance between the interests of education providers and the interests of students with and without disability.

An adjustment is any measure or action that a student requires because of their disability, and which has the effect of assisting the student to access and participate in education and training on the same basis as students without a disability. An adjustment is reasonable if it achieves this purpose while taking into account factors such as the nature of the student's disability, the views of the student, the potential effect of the adjustment on the student and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable. There may be more than one adjustment that is reasonable in a given set of circumstances; education providers are required to make adjustments that are reasonable and that do not cause them unjustifiable hardship. The Training Package Guidelines provides more information on reasonable adjustment, including examples of adjustments. Go to <<http://www.deewr.gov.au/tpdh/Pages/home.aspx>>.

### **Further Sources of Information**

The section provides a listing of useful contacts and resources to assist assessors in planning, designing, conducting and reviewing of assessments against this Training Package.

## General Resources

Refer to <http://antapubs.dest.gov.au/publications/search.asp> to locate the following publications.

AQF Implementation Handbook, fourth edition. Australian Qualifications Framework Advisory Board [www.aqf.edu.au](http://www.aqf.edu.au).

Australian Quality Training Framework (AQTF) - for information and resources go to [www.training.com.au](http://www.training.com.au).

AQTF Essential Conditions and Standards. Training organisations must meet these standards in order to deliver and assess nationally recognised training and issue nationally recognised qualifications.

AQTF User's Guide to the Essential Standards for Registration. A Users' Guide for training organisations who must meet these standards in order to deliver and assess nationally recognised training and issue nationally recognised qualifications.

AQTF Standards for Accredited Courses. State and territory accrediting bodies are responsible for accrediting courses. This standard provides a national operating framework and template for the accreditation of courses.

TAE10 Training and Education Training Package. This is available from Innovation and Business Skills Australia (IBSA), the Innovation and Business Industry Skills Council, and can be viewed and components downloaded, from the National Training Information Service (NTIS).

National Training Information Service, an electronic database providing comprehensive information about RTOs, Training Packages and accredited courses ([www.ntis.gov.au](http://www.ntis.gov.au)).

Training Package Development Handbook can be downloaded from [www.deewr.gov.au](http://www.deewr.gov.au).

### **Assessment Resources**

Training Package Assessment Guides – a range of resources to assist RTOs in developing Training Package assessment materials (originally developed by ANTA with funding from the Department of Education, Training and Youth Affairs) and made up of 10 separate titles, as described at the publications page of [www.deewr.gov.au](http://www.deewr.gov.au). Go to [www.resourcegenerator.gov.au](http://www.resourcegenerator.gov.au).

Printed and/or CD versions of the guides can be purchased from Technical and Vocational Education and Training (TVET) Australia Limited. The resource includes the following guides:

- Training Package Assessment Materials Kit
- Assessing Competencies in Higher Qualifications
- Recognition Resource
- Kit to Support Assessor Training
- Candidates Kit: Guide to Assessment in New Apprenticeships
- Assessment Approaches for Small Workplaces
- Assessment Using Partnership Arrangements
- Strategies for ensuring Consistency in Assessment
- Networking for Assessors
- Quality Assurance Guide for Assessment.
- 

An additional guide ‘Delivery and Assessment Strategies’ has been developed to complement these resources.

## Competency Standards

### What is Competency?

The broad concept of industry competency concerns the ability to perform particular tasks and duties to the standard of performance expected in the workplace. Competency requires the application of specified skills, knowledge and attitudes relevant to effective participation in an industry, industry sector or enterprise.

Competency covers all aspects of workplace performance and involves performing individual tasks; managing a range of different tasks; responding to contingencies or breakdowns; and, dealing with the responsibilities of the workplace, including working with others. Workplace competency requires the ability to apply relevant skills, knowledge and attitudes consistently over time and in the required workplace situations and environments. In line with this concept of competency Training Packages focus on what is expected of a competent individual in the workplace as an outcome of learning, rather than focussing on the learning process itself.

Competency standards in Training Packages are determined by industry to meet identified industry skill needs. Competency standards are made up of a number of units of competency each of which describes a key function or role in a particular job function or occupation. Each unit of competency within a Training Package is linked to one or more AQF qualifications.

## **Contextualisation of Units of Competency by RTOs**

Registered Training Organisations (RTOs) may contextualise units of competency in this endorsed Training Package to reflect required local outcomes. Contextualisation could involve additions or amendments to the unit of competency to suit particular delivery methods, learner profiles, specific enterprise equipment requirements, or to otherwise meet local needs. However, the integrity of the overall intended outcome of the unit of competency must be maintained.

Any contextualisation of units of competency in this Training Package must be within the bounds of the following advice:

- RTOs must not remove or add to the number and content of elements and performance criteria.
- RTOs can include specific industry terminology in the range statement.
- Any amendments and additions to the range statement made by RTOs must not diminish the breadth of application of the competency, or reduce its portability.
- RTOs may add detail to the evidence guide in areas such as the critical aspects of evidence or required resources and infrastructure—but only where these expand the breadth of the competency and do not limit its use.

## **Components of Units of Competency**

The components of units of competency are summarised below, in the order in which they appear in each unit of competency.

**Unit Title**

The unit title is a succinct statement of the outcome of the unit of competency. Each unit of competency title is unique, both within and across Training Packages.

**Unit Descriptor**

The unit descriptor broadly communicates the content of the unit of competency and the skill area it addresses. Where units of competency have been contextualised from units of competency from other endorsed Training Packages, summary information is provided. There may also be a brief second paragraph that describes its relationship with other units of competency, and any licensing requirements.

**Employability Skills**

This sub-section contains a statement that the unit contains Employability skills.

**Pre-requisite Units (optional)**

If there are any units of competency that must be completed before the unit, these will be listed.

**Application of the Unit**

This sub-section fleshes out the unit of competency's scope, purpose and operation in different contexts, for example, by showing how it applies in the workplace.

**Competency Field (Optional)**

The competency field either reflects the way the units of competency are categorised in the Training Package or denotes the industry sector, specialisation or function. It is an optional component of the unit of competency.

**Sector (optional)**

The industry sector is a further categorisation of the competency field and identifies the next classification, for example an elective or supervision field.

**Elements of Competency**

The elements of competency are the basic building blocks of the unit of competency. They describe in terms of outcomes the significant functions and tasks that make up the competency.

**Performance Criteria**

The performance criteria specify the required performance in relevant tasks, roles, skills and in the applied knowledge that enables competent performance. They are usually written in passive voice. Critical terms or phrases may be written in bold italics and then defined in range statement, in the order of their appearance in the performance criteria.

### **Required Skills and Knowledge**

The essential skills and knowledge are either identified separately or combined. Knowledge identifies what a person needs to know to perform the work in an informed and effective manner. Skills describe the application of knowledge to situations where understanding is converted into a workplace outcome.

### **Range Statement**

The range statement provides a context for the unit of competency, describing essential operating conditions that may be present with training and assessment, depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts. As applicable, the meanings of key terms used in the performance criteria will also be explained in the range statement.

### **Evidence Guide**

The evidence guide is critical in assessment as it provides information to the Registered Training Organisation (RTO) and assessor about how the described competency may be demonstrated. The evidence guide does this by providing a range of evidence for the assessor to make determinations, and by providing the assessment context. The evidence guide describes:

- conditions under which competency must be assessed including variables such as the assessment environment or necessary equipment;
- relationships with the assessment of any other units of competency;
- suitable methodologies for conducting assessment including the potential for workplace simulation;
- resource implications, for example access to particular equipment, infrastructure or situations;
- how consistency in performance can be assessed over time, various contexts and with a range of evidence; and
- the required underpinning knowledge and skills

### **Employability Skills in Units of Competency**

The detail and application of Employability Skills facets will vary according to the job-role requirements of each industry. In developing Training Packages, industry stakeholders are consulted to identify appropriate facets of Employability Skills which are incorporated into the relevant units of competency and qualifications.

Employability Skills are not a discrete requirement contained in units of competency (as was the case with Key Competencies). Employability Skills are specifically expressed in the context of the work outcomes described in units of competency and will appear in elements, performance criteria, range statements and evidence guides. As a result, users of Training Packages are required to review the entire unit of competency in order to accurately determine Employability Skills requirements.

## How Employability Skills relate to the Key Competencies

The eight nationally agreed Employability Skills now replace the seven Key Competencies in Training Packages. Trainers and assessors who have used Training Packages prior to the introduction of Employability Skills may find the following comparison useful.

Employability Skills	Key Competencies
Communication	Communicating ideas and information
Teamwork	Working with others and in teams
Problem solving	Solving problems Using mathematical ideas and techniques
Initiative and enterprise	
Planning and organising	Collecting, analysing and organising information Planning and organising activities
Self-management	
Learning	
Technology	Using technology

When analysing the above table it is important to consider the relationship and natural overlap of Employability Skills. For example, using technology may involve communication skills and combine the understanding of mathematical concepts.

## Explicitly embedding Employability Skills in units of competency

This Training Package seeks to ensure that industry-endorsed Employability Skills are explicitly embedded in units of competency. The application of each skill and the level of detail included in each part of the unit will vary according to industry requirements and the nature of the unit of competency.

Employability Skills must be both explicit and embedded within units of competency. This means that Employability Skills will be:

- embedded in units of competency as part of the other performance requirements that make up the competency as a whole
- explicitly described within units of competency to enable Training Packages users to identify accurately the performance requirements of each unit with regards to Employability Skills.

This Training Package also seeks to ensure that Employability Skills are well-defined and written into units of competency so that they are apparent, clear and can be delivered and assessed as an essential component of unit work outcomes.

### Examples from this Training Package of employability skills embedded within unit components

Unit component	Example of embedded employability skill
Unit title	Work and communicate effectively in an IT environment
Unit descriptor	This unit describes the performance outcomes, skills and knowledge required to work and communicate effectively within organisational policies and governance arrangements using information technology (IT) systems, equipment and software.
Element	Use positive and varied communication strategies with ICT clients
Performance criteria	<b>Respond appropriately</b> to <i>client</i> and colleague requirements and identify options
Range Statement	<ul style="list-style-type: none"> <li>• <b>Respond appropriately</b> may include: <ul style="list-style-type: none"> <li>• answering enquiries promptly and appropriately</li> <li>• discussing, agreeing and recording supply arrangements with client</li> <li>• recording details in enterprise system</li> <li>• using appropriate questioning and active listening techniques to understand client needs and determine support requirements</li> <li>• using clear, simple and easy to understand language</li> <li>• ensuring responses are comprehensive.</li> </ul> </li> </ul>
Required Skills and	<ul style="list-style-type: none"> <li>• communication skills to: <ul style="list-style-type: none"> <li>• clarify the needs of customers</li> </ul> </li> </ul>

Unit component	Example of embedded employability skill
<b>Knowledge</b>	<ul style="list-style-type: none"> <li>• deliver required level and quality of customer service</li> <li>• relate to people from diverse backgrounds and people with diverse abilities</li> <li>• request advice, receive feedback and work with a team</li> <li>• knowledge:               <ul style="list-style-type: none"> <li>• current industry-accepted hardware and software products, with broad knowledge of features and capabilities</li> </ul> </li> </ul>
<b>Evidence Guide</b>	Evidence of the ability to: <ul style="list-style-type: none"> <li>• process internal and external requests according to organisational policies and requirements</li> <li>• respond promptly to client enquiries and requests from colleagues.</li> </ul>

### Employability Skills Summaries and units of competency

An Employability Skills Summary exists for each qualification. Summaries include broad advice on industry expectations with regard to Employability Skills at the qualification level. Summaries should be used by trainers and assessors to assist in identifying the Employability Skills requirements contained within units of competency.

### Competency Standards - Industry Contextualisation

As indicated elsewhere, RTOs may contextualise units of competency imported from other Training Packages to reflect outcomes relevant to the ICA11 Information and Communications Technology Training Package industry.

The units from the Training Packages detailed above have been imported into these qualifications to support those units which address specific aspects of the ICT industry, such as computer networking and security, project management, small business needs and customer service.

Using 'BSBSUS501A Develop workplace policy and procedures for sustainability' as an example, RTOs could add the development of policies and procedures in sustainability while formulating planning and design specifications to ICT projects.

## Appendices

### Appendix A: VET in Schools

#### What is VET in schools?

Vocational education and training in schools (VETiS) provides for nationally recognised vocational education and training undertaken as part of a senior secondary certificate and based on industry standards.

Successful completion of a VETiS program enables students to gain a nationally-recognised Australian Qualifications Framework (AQF) qualification, usually at the same time as their school-based qualification.

#### How are VET in schools programs structured?

VETiS programs are packaged and delivered in a variety of ways across Australia. There are three main types of delivery arrangements for VETiS programs:

- schools can be a registered training organisation (RTO) in their own right
- school sectoral bodies (such as Boards of Studies or regional offices) can hold RTO status on behalf of a group of schools
- schools can work together in a partnership with an RTO.

#### Appropriate qualifications for VET in schools

IBSA encourages links between schools, businesses and the community, and strongly supports young people combining schooling with VET and workplace learning.

It is essential that all VET qualifications gained through a VETiS program are consistent with the outcomes detailed in the Training Package.

The following qualifications are recommended as most suitable for a VETiS program:

- Certificate II in Information, Digital Media and Technology
- Certificate III in Information, Digital Media and Technology

The AQTF Standards for Registered Training Organisations set out minimum competency standards for staff responsible for the delivery of training and the conducting of assessments; and they ensure that VET specialists have skills and competencies consistent with Training Package requirements. All schools using their own teachers for VET delivery must also be aware of the AQTF requirement for assessors to hold relevant vocational competencies, at least equal to that being delivered and assessed, in addition to teaching and assessment competence.

Schools are encouraged to establish partnerships with industry and effective work placement arrangements to maximise the quality of outcomes for students and industry alike. Recognition of competence gained through voluntary, part-time or vacation work not directly related to the industry focus of the qualification should also be considered.

## **Work placement**

Work placement usually involves students spending an extended period of time in a workplace gaining experience and skills, and undergoing an assessment process related to the attainment of a qualification in a specific occupational field.

An essential feature of school-industry programs is that they involve students spending some time learning in a workplace. In recent years an increasing number of effective structured workplace learning programs have made significant progress towards greater workplace integrity for those industry training programs that are delivered predominantly off-the-job. The implementation of Training Packages means that structured workplace learning must be a consideration for all RTOs, not only schools, in the delivery of training programs.

## **Principles for quality workplace learning**

The Ministerial Council for Education, Early Childhood Development and Youth Affairs (MCEEDYA) endorsed the Principles for Quality Workplace Learning for school students engaged in VET programs throughout Australia. All states and territories apply the principles to their work placement programs, although the nature and extent of work placement programs vary across states and territories.

The broad MCEEDYA principles are documented below.

### ***Quality workplace learning is integrated into a program***

- It operates within a framework which provides the opportunity for all students to access it, though not all students may choose to do so; and
- It operates within the context of vocational courses, which are recognised by industry, are responsive to industry needs and form part of a student's exit credential.

### ***Quality workplace learning is structured***

- It has a clearly articulated and documented purpose;
- There are clearly identified and documented learning outcomes for students within accredited programs, which are linked to post-school qualifications;
- They are of sufficient duration and depth to enable students to acquire a reasonable understanding of the enterprise/industry to demonstrate competence according to industry standards of at least level 1 of the AQF;
- There is a matching between the students' skills and interests and the work placements; and
- Students, teachers and employers are thoroughly prepared beforehand so that the expectations and outcomes of the work placement are clearly understood by all parties.

### ***Quality workplace learning is monitored***

- The learning is coordinated by personnel with appropriate expertise and adequate resources; and
- Support should be made available to students and employers throughout the course of the work placement.

### ***Quality workplace learning is regulated***

- There are clearly stated procedures designed to ensure that:
- Students are protected from moral and physical danger;
- Students work in a non-discriminatory and harassment-free environment;
- Students receive appropriate training and instruction in occupational health and safety;
- Students are not exploited by being continuously engaged in a production or service capacity or used to substitute for the employment of employees and payment of appropriate wages; and
- Students are required to understand the roles and responsibilities of employees in the workplace and are expected to follow the directions of the workplace supervisors and other employees.

### ***Quality workplace learning is assessed***

- The assessment, according to industry standards, is of students' competencies achieved in the workplace which contributes to the overall assessment of the program; and
- There are mechanisms for the recording and reporting of students' competencies.

There is a strong correlation between these MCEEDYA quality principles and the OECD characteristics of high quality learning programs detailed below.

The major 14-country study entitled *From Initial Education to Working Life: Making Transitions Work* by the OECD identified 10 characteristics of high quality workplace learning programs. These are:

1. Work placements that are long enough for real learning to take place.
2. Systematic analysis of the training capacity of the workplace, to see what it can realistically supply.
3. A formal training plan, setting out what has to be taught and learned, and clarifying the work-based and school-based parts of a student's program.
4. Employer involvement in student selection for work placements.
5. The presence of a trained program coordinator, able to liaise between the school and the firm and troubleshoot when problems occur.
6. The use of qualified, highly competent workers as workplace trainers or mentors.
7. Regular face-to-face contact between the coordinators and employers and in-firm supervisors.

8. Monitoring of the students on the job by the program coordinator.
9. The evaluation of student performance against the training plan at the end of the placement, with the evaluation carried out by the job supervisor and coordinator jointly.
10. Deliberate efforts by schools to relate what has been learned at work to students' school-based learning.<sup>1</sup>

Effective work placement is characterised by:

- activities that complement off-the-job learning programs
- clearly articulated and documented purpose
- development of appropriate attitudes towards work
- development of competence in designated industry skills and employability skills
- facility for on-the-job practice of skills acquired in a classroom
- flexibility
- learning in a range of behaviours appropriate to the relevant industry
- opportunities for work-based assessment
- regular and frequent use of current technology and equipment
- relevance to the VET qualification being undertaken
- recognition of student readiness
- support of industry partners.

Beyond the above, a number of other provisions are necessary for a successful work placement program. The credibility of work placements and any resultant recognition of competence requires a degree of 'seriousness' if the outcomes are to be valued by individuals and industry clients of the VET system.

It is suggested that stakeholders involved in the planning and management of work placements carefully consider and implement the following general principles.

1. That the RTO assumes responsibility for finding placements and validating the arrangements.
2. That the workplace has the appropriate resources, tools and staff to conduct the placement, with compliance with any legislative requirements.
3. That there be regular validation by the RTO that the student and assessor, where relevant, are operating according to RTO AQTF standards.
4. That a student on work placement must be covered by injury insurance.
5. That there is a formal contract setting out each party's responsibilities and obligations.
6. That, where possible, the workplace has on site a qualified workplace trainer and assessor in 'direct line' control of the student (to avoid training and assessment by 'proxy').
7. That if the placement is for assessment only then there must be clearly documented assessment tasks specifically related to the unit being assessed and evidence retained to support achievement of competence (for both best practice recording purposes and audit/appeal).

8. That if the placement also includes training, then any 'academic pass' cannot be bestowed prior to the placement as clearly all of the learning components have not been undertaken nor can they be assessed in advance if they have not been learned.
9. That the training be directly related to achievement of competence while recognising the likely acquisition of other skills and knowledge.
10. That where assessment occurs it be clearly related to a unit of competency relevant to the work placement.
11. That where more than one performance criterion (possibly over more than one unit) is being assessed there must be a clearly linked and documented relationship between the assessment and the performance criterion.
12. That the qualifications level be appropriate in context, i.e. if it is advanced programming there must be an advanced programming task observed and assessed.
13. That the actual variables of the performance criterion be documented for audit purposes and for verification of appropriateness of the range of activities in the work placement.

In some state and territory school systems, part-time student work in an appropriate workplace may be used to fulfil work placement requirements and virtual or simulated work placements may also be legitimate.

## Appendices - ICA11 Acronyms

There are a significant number of acronyms in ICA11.

The list below details those where the full term has been provided and others where it has not. IBSA's usual approach is to write the term out in full in first mention in a unit with acronym following. Next mentions in unit are then by acronym only.

<b>ICA11 Acronyms</b>	
AutoVirt	automated virtualisation
AutoMove	Windows service application
AAA	authentication, authorisation and accounting
ACL	access control list
ACSCE	Australian Computer Society Code of Ethics
ADSL	asymmetric digital subscriber line
AES	advanced encryption standard
API	application programming interface

<b>ICA11 Acronyms</b>	
APIPA	automatic private IP addressing
ARIS	architecture of integrated information systems
AS	active server
ASP	active server pages application service providers
AV	audiovisual
AVG	product name
BEA	building environmental assessment
BSD	Berkeley Software Distribution
BSI	business systems integration
CASE	computer-aided software engineering
CGI	common gateway interface
CHAP	challenge handshake authentication protocol
CLI	calling line identification
CMOS	complementary metal oxide semiconductor
COBOL	Common Business-Oriented Language
COM	component object model
CORBA	common object request broker architecture
CPU	central processing unit
CRM	customer relationship management
CSS	cascading style sheet
DAL	data-access layer
DAO	data-access object
DAS	direct attached storage

<b>ICA11 Acronyms</b>	
DBMS	database management system
DCOM	distributed component object model
DES	data encryption standard
DHCP	dynamic host configuration protocol
DHTML	dynamic hypertext markup language
DMZ	demilitarised zone
DNS	domain name system
DOM	document object model
DSL	digital subscriber line
DSMS	data stream management system
DSN	data source name
DTD	document type definition
DXdiag	DirectX Diagnostic Tool
EAN.UCC	European Article Numbering Uniform Code Council
EAP	extensible authentication protocol
EEO	equal employment opportunity
EICAR	European Institute for Computer Antivirus Research
ER	entity relationship
ERP	enterprise resource planning
ext	extended file system
FAT	file allocation table
FDD	floppy disk drive
FTP	file transfer protocol
FTTX	fibre to the 'x'

<b>ICA11 Acronyms</b>	
GNU	GNUs Not Unix
GnuPG	GNU Privacy Guard
GPO	group policy object (Windows)
GPRS	general packet radio service
GSSAPI	Generic Security Services Application Program Interface
GUI	graphical user interface
HDD	hard disk drive
HDLC	high level data link control
HDMI	high <b>definition</b> multimedia interface
HFS+	hierarchical file system +
HSDPA	high-speed downlink packet access
HSDSL	high-speed digital subscriber line
HTML	hypertext markup language
HTTP	hypertext transfer protocol
HTTPS	hypertext transfer protocol secure
IaaS	infrastructure as a service
IDE	integrated development environment
IDS	intrusion detection system
IEC	International Electrotechnical Commission
IEEE	Institute of Electrical and Electronics Engineers
IEF	imaging energy filter
IETF	Internet Engineering Task Force
IM	information management
IMAP	internet message access protocol

<b>ICA11 Acronyms</b>	
IOS	internetwork operating system
IP	internet protocol
IPS	intrusion prevention system
IPSec	internet protocol security
ISDN	integrated services digital network
IRM	Institute of Risk Management
ISDN	integrated services digital network
Isee	integrated software engineering environment
ISA	internet security and acceleration
ISO	International Organization for Standardization
ISP	internet service provider
ITIL	information technology infrastructure library
ITU	International Telecommunications Union
iSCSI	internet small computer systems interface
JSP	Java server pages
KVM	Kernel Virtual Machine
LAN	local area network
LEAP	lightweight extensible authentication protocol
LDAP	lightweight directory access protocol
L2TP	layer 2 tunnelling protocol
MD5	Message Digest Algorithm 5
MIME	multipurpose internet mail extensions
MPLS	multi-protocol label switching
msconfig	Microsoft Configuration Utility

<b>ICA11 Acronyms</b>	
MSIA	Microsoft Software Inventory Analyzer
mSQL	Mini SQL (mSQL)
MS SQL	Microsoft Structured Query Language
MySQL	Proprietary name
NAS	network-attached storage
NetBIOS	networked basic input/output system
NAT	network address translation
NDS	Novell Directory Services
NetBIOS	network basic input/output system
NIC	network interface card
NIS	network information system
NFA	non-deterministic finite automaton
NFS	network file system
NIC	network interface card
NOS	network operating system
NTFD	NTF-based data
NTFS	new technology file system
NTLM	NT LAN Manager
NTP	network time protocol
NTU	network terminating unit
ODBC	open database connection
ODC	open database connection
ODP	open directory project
OECD	Organisation for Economic Cooperation and Development

<b>ICA11 Acronyms</b>	
OIKOS	Organisation name, upper case
OLE	object linking and embedding
OS	operating system
OSI	open system interconnection
PAM	pluggable authentication modules
PAP	password authentication protocol
PATA	parallel advanced technology attachment
PC	personal computer
PCI	peripheral component interconnect
PCMCIA	Personal Computer Memory Card International Association
PDA	personal digital assistant
PGP	pretty good privacy
PHP	Perl hypertext pre-processor
PKI	public key infrastructure
PKM	personal knowledge management
PMBOK	Project Management Body of Knowledge
POP	post office protocol
POSIX NFA	portable operating system interface for Unix NFA
POST	power on self test
PPP	point-to-point protocol
PPPoE	point-to-point protocol over ethernet
PPTP	point-to-point tunnelling protocol
PRINCE2	Projects IN Controlled Environments
PROTOS	Process and Tools (Team)

<b>ICA11 Acronyms</b>	
PWB	ProcessWise Workbench
PSTN	public switched telephone network
QOS	quality of service
RADIUS	<i>remote authentication dial-in user service</i>
RAID	redundant array of inexpensive/independent disks
RAM	random access memory
RDBMS	relational database management system
RFID	radio frequency identification
RHDS	Red Hat Directory Services
RHN	red hat network
RIPv1	routing information protocol
RIS	remote installation services
RRAS	routing and remote access services
RSA	Rivest, Shamir and Adelman
RSTP	rapid spanning tree protocol
SAN	storage area network
SATA	serial advanced technology attachment
SCSI	small computer system interface
SDLC	system development life cycle
SDM	security device manager
SGML	standard generalised markup language
SHTTP	secure hypertext transfer protocol
SE Linux	security enhanced Linux
SEM	search engine marketing

<b>ICA11 Acronyms</b>	
SEO	search engine optimisation
SHA	secure hash algorithm
SIP	session initiation protocol
SLA	service level agreement
SMB	server messages block
SME	small or medium enterprise
SMIME	secure or multipurpose internet mail extensions
SMTP	simple mail transfer protocol
SNMP	simple network management protocol
SOA	service-oriented architecture
SOAP	simple object access protocol
SOCCA	Specification of Coordinated and Cooperative Activities
SOHO	small office home office
SPNEGO	simple and protected GSSAPI negotiation
SQL	structured query language
SQLS	structured query language server
SSH	secure shell
SSID	service set identifier
SSL	secure socket layer
SSPI	Security Support Provider Interface
SSTP	secure socket tunnelling protocol
STP	spanning tree protocol
sxw (lower case)	Sun Xml Writer
TCP	transmission control protocol

<b>ICA11 Acronyms</b>	
TCP/IP	transmission control protocol or internet protocol
TLS	transport layer security
TSIG	Transaction Signature
UAC	User Account Control
UDDI	universal description, discovery and integration
UML	unified modelling language
UPS	uninterruptible power supply
Unix OS	Unix operating system
UN/CEFACT	United Nations Centre for Trade Facilitation and Electronic Business
UPS	uninterruptible power supply
URL	uniform resource locator
USB	universal serial bus
VB	Visual Basic
VBScript	Visual Basic Script (proprietary name)
VLAN	virtual local area network
VLAN SPAN	virtual local area network switched port analyser
VoIP	voice over internet protocol
VPN	virtual private network
VRML	virtual reality modelling language
VSFTP	very secure FTP
VSPAN	VLAN SPAN
W3C	World Wide Web Consortium
WAI	web accessibility initiative
WAN	wide area network

<b>ICA11 Acronyms</b>	
WDS	wireless distribution system
WEP	wired equivalent privacy
wi-fi	wireless system
Wi-Fi Alliance	nonprofit international association
WINS	Windows Internet Naming Service
WiMAX	worldwide interoperability for microwave access
WLANs	wireless local area networks
WPA	wi-fi protected access
WPA2	wi-fi protected access 2
WSUS	windows server update services
WWAN	wireless wide area network
XHTML	eXtensible hypertext markup language
XLT	XMI representation of lexicons and terminologies
XML	eXtensible markup language
XSLT	eXtensible stylesheet language transformations
YUM	Yellow Dog Update Manager

---

<sup>1</sup> OECD, 2000, *From Initial Education to Working Life: Making Transitions Work*. Organisation for Economic Cooperation and Development, Paris.

# ICA10111 Certificate I in Information, Digital Media and Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for individuals to safely perform foundation digital literacy tasks using a personal computer and a range of software applications and digital devices.

### Job roles

This qualification provides foundation digital literacy skills to support a wide range of varying industry occupations.

## Pathways Information

### Pathways into the qualification

This is an entry level qualification.

### Pathways from the qualification

ICA20111 Certificate II in Information, Digital Media and Technology, or a range of other qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

*The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.*

<b>Employability skill</b>	<b>Industry/enterprise requirements for this qualification</b>
Communication	<ul style="list-style-type: none"> <li>communicating with peers and supervisors</li> <li>reading and interpreting basic workplace documents</li> </ul>

## Packaging Rules

**Total number of units = 6**

**4 core units *plus***

**2 elective units**

The elective units consist of:

- up to 2 from the elective units listed below
- up to 1 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate I or II level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICAICT101A Operate a personal computer

ICAICT102A Operate word-processing applications

ICAICT103A Use, communicate and search securely on the internet

ICAICT104A Use digital devices

### Elective units

BSBOHS201A Participate in OHS processes

BSBSUS201A Participate in environmentally sustainable work practices

BSBCMM101A Apply basic communication skills

ICAICT105A Operate spreadsheet applications

ICAICT106A Operate presentation packages

ICAICT107A Use personal productivity tools

ICAICT108A Use digital literacy skills to access the internet

# ICA20111 Certificate II in Information, Digital Media and Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

This entry level qualification provides the foundation skills and knowledge to use information and communications technology (ICT) in any industry.

### Job roles

Possible job titles relevant to this qualification include:

- office assistant
- records assistant
- junior office support.

This qualification provides basic digital literacy skills to support a wide range of varying industry occupations.

## Pathways Information

### Pathways into the qualification

This is an entry level qualification.

### Pathways from the qualification

ICA30111 Certificate III in Information, Digital Media and Technology, or a range of other Certificate III qualifications.

## **Licensing/Regulatory Information**

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## **Entry Requirements**

There are no entry requirements for this qualification.

## Employability Skills Summary

*The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.*

<b>Employability skill</b>	<b>Industry/enterprise requirements for this qualification</b>
Communication	<ul style="list-style-type: none"> <li>• providing client support using verbal and non-verbal communication</li> <li>• reading and writing basic workplace documents and technical manuals</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• reporting identified software faults to appropriate persons</li> <li>• accepting directions and following instructions from supervisor or team leader</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• configuring operating systems to suit the work environment</li> <li>• solving organisational problems by applying technology</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• seeking feedback from users of new or upgraded technology</li> <li>• selecting appropriate software and file formats for an activity</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• identifying work to be completed and then prioritising tasks</li> <li>• planning and organising the selection, manufacture and location of hardware</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• establishing own work schedule and taking responsibility for own outputs in work and learning</li> <li>• following occupational health and safety standards and organisational policies to avoid injury or illness</li> <li>• observing environmentally sustainable work practices</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• acquiring and using new or upgraded technology skills to enhance own learning</li> <li>• keeping up-to-date with current industry-accepted hardware and software products</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting, installing and using computer software and hardware products</li> </ul>

## Packaging Rules

**Total number of units = 14**

**7 core units *plus***

**7 elective units**

The elective units consist of:

- up to 7 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate II or III level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS201A Participate in OHS processes

BSBSUS201A Participate in environmentally sustainable work practices

ICAICT201A Use computer operating systems and hardware

ICAICT202A Work and communicate effectively in an IT environment

ICAICT203A Operate application software packages

ICAICT204A Operate a digital media technology package

ICAWEB201A Use social media tools for collaboration and engagement

### Elective units

CUFCAM201A Assist with a basic camera shoot

CUFDIG201A Maintain interactive content

CUFDIG303A Produce and prepare photo images

CUFPOS201A Perform basic vision and sound editing

CUFSOU204A Perform basic sound editing

ICAICT205A Design basic organisational documents using computing packages

ICAICT206A Install software applications

ICAICT207A Integrate commercial computing packages

ICAICT208A Operate accounting applications

ICAICT209A Interact with ICT clients

ICAICT210A Operate database applications

ICAICT211A Identify and use basic current industry-specific technologies

ICAICT212A Incorporate Indigenous needs and perspectives into IT environment

ICASAS201A Maintain inventories for equipment, software and documentation

ICASAS202A Apply problem-solving techniques to routine IT malfunctions

ICASAS203A Connect hardware peripherals

ICASAS204A Record client support requirements

ICASAS205A Maintain IT system integrity

ICASAS206A Detect and protect from spam and destructive software

ICASAS207A Protect and secure information assets

ICASAS208A Maintain IT equipment and consumables

ICASAS209A Connect and use a home-based local wireless network

ICPMM321C Capture a digital image

# ICA30111 Certificate III in Information, Digital Media and Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in a wide range of general information and communications technology (ICT) technical functions and to achieve a degree of self-sufficiency as an advanced ICT user.

Persons working at this level will support information technology activities in the workplace across a wide range of ICT areas, including technical support, network administration, web technologies, software applications and digital media technologies.

## Job roles

Possible job titles relevant to this qualification include:

- help desk officer
- help desk assistant
- ICT operations support
- ICT user support
- PC support
- technical support.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification may include:

- after achieving ICA20111 Certificate II in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA20111

OR

- with demonstrated vocational experience in a range of work environments using basic information technologies.

### Pathways from the qualification

ICA40111 Certificate IV in Information Technology, or a range of other Certificate IV qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements, except for three elective units ICTCBL2136A, ICTCBL2137A and ICTCBL2139A, which must be undertaken with reference to the regulatory regime of the prevailing statutory authority (currently ACMA). There may be some alignment with industry-standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• liaising with clients to determine requirements and ensure that they are met</li> <li>• interpreting software manual instructions</li> <li>• producing user documents</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• contacting operating system vendors to obtain technical specifications and system requirements</li> <li>• submitting developed user documentation to the target audience for review</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• determining the uses and audience of a simple markup language document</li> <li>• troubleshooting and running diagnostic tests and providing solutions to hardware or software faults</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• assessing and recording information from various sources</li> <li>• identifying and applying skills and knowledge to a wide variety of contexts</li> <li>• investigating and documenting solutions to client problems</li> <li>• customising packaged application software to client requirements</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• planning for the implementation of software changes by seeking technical and client information and organising the process</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• prioritising and taking responsibility for own outputs in working and learning</li> <li>• implementing safe and sustainable work practices</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• adopting and transferring skills and knowledge to new environments</li> <li>• keeping up-to-date with current industry-accepted hardware and software products and services</li> <li>• providing one-to-one instruction for clients about operating system software</li> <li>• reviewing client feedback and identifying areas for improvement</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting, installing and using computer software and hardware products</li> <li>• configuring, optimising and testing system software for a small home office or a small to medium business network</li> </ul>

## Packaging Rules

**Total number of units = 17**

**6 core units *plus***

**11 elective units**

The elective units consist of:

- 5 units from one of the following specialist elective groups:
  - Group A Applications
  - Group B Network administration
  - Group C Support
  - Group D Web technologies
  - Group E Multimedia
- up to 6 from any of the specialist elective groups below or from Group F general elective units below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate III or IV level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS302B Participate effectively in OHS communication and consultative processes

BSBSUS301A Implement and monitor environmentally sustainable work practices

ICAICT202A Work and communicate effectively in an IT environment

ICAICT301A Create user documentation

ICAICT302A Install and optimise operating system software

ICASAS301A Run standard diagnostic tests

### Elective units

#### *Specialist elective units*

#### **Group A Applications**

ICAICT203A Operate application software packages

ICAICT304A Implement system software changes

ICAICT307A Customise packaged software applications for clients

ICAICT308A Use advanced features of computer applications

ICAICT409A Develop macros and templates for clients using standard products

#### **Group B Network administration**

ICANWK301A Provide network systems administration

ICANWK302A Identify and resolve network problems

ICANWK304A Administer network peripherals

ICANWK305A Install and manage network protocols

ICASAS307A Install, configure and secure a small office home office network

#### **Group C Support**

ICAICT303A Connect internal hardware components  
ICASAS303A Care for computer hardware  
ICASAS304A Provide basic system administration  
ICASAS305A Provide IT advice to clients  
ICASAS306A Maintain equipment and software

### **Group D Web technologies**

BSBEBU401A Review and maintain a website  
ICAWEB201A Use social media tools for collaboration and engagement  
ICAWEB301A Create a simple markup language document  
ICAWEB302A Build simple websites using commercial programs  
ICAWEB303A Produce digital images for the web

### **Group E Multimedia**

CUFANM301A Create 2D digital animations  
CUFANM302A Create 3D digital animations  
ICAGAM301A Apply simple modelling techniques  
ICAGAM302A Design and apply simple textures to digital art  
ICAGAM303A Review and apply the principles of animation

### **General elective units**

#### **Group F**

BSBIPR301A Comply with organisational requirements for protection and use of intellectual property  
CUFDIG301A Prepare video assets  
CUFDIG302A Author interactive sequences  
CUFDIG304A Create visual design components  
ICAICT305A Identify and use current industry-specific technologies  
ICAICT306A Migrate to new technology  
ICANWK303A Configure and administer a network operating system  
ICPMM346C Incorporate video into multimedia presentations  
ICAPRG301A Apply introductory programming techniques  
ICTCBL2065A Splice and terminate optical fibre cable for carriers and service providers  
ICTCBL2136A Install, maintain and modify customer premises communications cabling:  
ACMA Restricted Rule  
ICTCBL2137A Install, maintain and modify customer premises communications cabling:  
ACMA Open Rule  
ICTCBL2139A Apply safe technical work practices for cabling registration  
ICTBWN3082A Perform tests on optical communication system and components  
ICTBWN3088A Install optical fibre splitters in fibre distribution hubs  
ICTBWN3090A Install lead-in module and cable for fibre to the premises  
ICTBWN3100A Work safely with live fibre to test and commission a fibre to the x  
installation

# ICA40111 Certificate IV in Information Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in a wide range of general information and communications technology (ICT) technologies and to support small to medium enterprises (SMEs) that require broader rather than more specialised ICT support.

Persons working at this level apply a wide range of knowledge and skills in basic networking, IT support, database development, programming and web development support; working safely and ethically in a sustainable work environment.

## Job roles

Possible job titles relevant to this qualification include:

- computer technician
- customer support
- customer support professional
- information systems operator
- PC support
- systems administrator
- systems support
- technical support
- user support technician
- network operations technician.

## **Pathways Information**

### **Pathways into the qualification**

Preferred pathways for candidates considering this qualification may include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of work environments using a range of information technologies.

### **Pathways from the qualification**

ICA50111 Diploma of Information Technology, or a range of other Diploma qualifications.

## **Licensing/Regulatory Information**

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## **Entry Requirements**

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• liaising with clients to determine requirements and ensure that they are met</li> <li>• interpreting software manual instructions</li> <li>• writing reports and documents</li> <li>• consulting with end users to determine requirement sign-off</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• consulting with work team to review proposed changes against current and future business requirements</li> <li>• establishing and improving work teams in an IT environment</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• determining the uses and audience of a simple markup language document</li> <li>• troubleshooting and running diagnostic tests and providing solutions to hardware or software faults</li> <li>• debugging and writing scripts to solve problems</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• assessing and recording information from various sources</li> <li>• identifying and applying skills and knowledge to a wide variety of contexts</li> <li>• investigating and documenting solutions to client problems</li> <li>• developing new criteria and procedures for performing current practices</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• creating project plans to guide the development of systems methodologies</li> <li>• developing installation plans</li> <li>• preparing feasibility reports that take into account project scope, time, cost, quality, communications and risk management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• prioritising and taking responsibility for own outputs in working and learning</li> <li>• implementing safe and sustainable work practices</li> <li>• taking responsibility for own output in relation to specified quality standards</li> <li>• incorporating into the work environment suitable ethics regarding security, legal, moral and ethical issues</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• adopting and transferring skills and knowledge to new environments</li> </ul>

	<ul style="list-style-type: none"><li>• keeping up-to-date with current industry-accepted hardware and software products and services</li><li>• reviewing client feedback and identifying areas for improvement</li><li>• gathering and organising feedback on draft documentation and client satisfaction</li><li>• maintaining knowledge of tools and software applications and the goods and services provided</li></ul>
Technology	<ul style="list-style-type: none"><li>• selecting, installing and using computer software and hardware products</li><li>• configuring, optimising and testing system software for a small home office or a small to medium business network</li><li>• selecting, sourcing and using appropriate software and tools based on analysis of technical needs</li></ul>

## Packaging Rules

**Total number of units = 20**

**5 core units *plus***

**15 elective units**

The elective units consist of:

- up to 15 from the specialist elective groups below, with a maximum of 5 units from any one group:
  - Group A Networking
  - Group B Programming
  - Group C IT support
  - Group D Web design and development
  - Group E Digital games
  - Group F Digital media technologies
  - Group G Project management
- up to 5 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS302B Participate effectively in OHS communication and consultative processes

BSBSUS301A Implement and monitor environmentally sustainable work practices

ICAICT202A Work and communicate effectively in an IT environment

ICAICT401A Determine and confirm client business requirements

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

### Elective units

#### *Specialist elective units*

#### **Group A Networking**

ICANWK401A Install and manage a server

ICANWK402A Install and configure virtual machines for sustainable ICT

ICANWK403A Manage network and data integrity

ICANWK404A Install, operate and troubleshoot a small enterprise branch network

ICANWK405A Build a small wireless local area network

ICANWK406A Install, configure and test network security

ICANWK407A Install and configure client-server applications and services

ICANWK408A Configure a desktop environment

ICANWK409A Create scripts for networking

ICANWK410A Install hardware to a network

ICANWK411A Deploy software to networked computers

ICANWK412A Create network documentation

ICANWK414A Create a common gateway interface script

ICANWK416A Build security into virtual private networks

ICANWK417A Build an enterprise wireless network  
ICANWK418A Implement backbone technologies in a local area network  
ICASAS307A Install, configure and secure a small office home office network

### **Group B Programming**

ICAICT410A Conduct post-implementation IT system reviews  
ICAICT420A Develop client user interface  
ICAPRG401A Maintain open-source code programs  
ICAPRG402A Apply query language  
ICAPRG403A Develop data-driven applications  
ICAPRG404A Test applications  
ICAPRG405A Automate processes  
ICAPRG406A Apply introductory object-oriented language skills  
ICAPRG407A Write script for software applications  
ICAPRG409A Develop mobile applications  
ICAPRG410A Build a user interface  
ICAPRG412A Configure and maintain databases  
ICAPRG413A Use a library or pre-existing components  
ICAPRG414A Apply introductory programming skills in another language  
ICAPRG415A Apply skills in object-oriented design  
ICAPRG416A Manage a software component reuse library  
ICAPRG417A Apply mathematical techniques for software development  
ICAPRG418A Apply intermediate programming skills in another language  
ICAPRG419A Analyse software requirements  
ICAPRG425A Use structured query language  
ICAPRG426A Prepare software development review  
ICAPRG427A Use XML effectively  
ICAPRG428A Use regular expressions in programming languages

### **Group C IT support**

ICADBS403A Create basic databases  
ICADBS407A Monitor physical database implementation  
ICADBS408A Link an RFID system to a database  
ICADBS503A Create a data warehouse  
ICAICT402A Determine project specifications and secure client agreement  
ICAICT403A Apply software development methodologies  
ICAICT404A Use online learning tools  
ICAICT405A Develop detailed technical design  
ICAICT406A Build a graphical user interface  
ICAICT408A Create technical documentation  
ICAICT411A Select and employ software and hardware testing tools  
ICAICT412A Coordinate and maintain IT work teams  
ICAICT413A Relate to clients on a business level  
ICAICT415A Provide one-to-one instruction  
ICAICT416A Contribute to the development of strategic plans  
ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards  
ICASAD401A Develop and present feasibility reports

ICASAS402A Implement configuration management strategies  
ICASAS403A Review site environmental factors prior to IT system implementation  
ICASAS404A Acquire IT system components  
ICASAS405A Identify and evaluate IT industry vendor technologies  
ICASAS407A Conduct pre-installation audit for software installation  
ICASAS408A Complete data transition in data migration process  
ICASAS409A Manage risks involving ICT systems and technology  
ICASAS410A Identify and resolve client IT problems  
ICASAS411A Assist with policy development for client support procedures  
ICASAS412A Action change requests  
ICASAS413A Manage resolution of system faults on a live system  
ICASAS414A Evaluate system status  
ICASAS415A Optimise IT system performance  
ICASAS416A Implement maintenance procedures  
ICASAS417A Undertake IT system capacity planning  
ICASAS418A Monitor and administer security of an IT system  
ICASAS419A Support system software  
ICASAS420A Provide first-level remote help-desk support  
ICASAS421A Support users and troubleshoot desktop applications  
ICASAS424A Support different operating systems

#### **Group D Web design and development**

ICAICT407A Maintain website information standards  
ICAWEB401A Design a website to meet technical requirements  
ICAWEB402A Confirm accessibility of websites for people with special needs  
ICAWEB403A Transfer content to a website using commercial packages  
ICAWEB404A Maintain website performance  
ICAWEB405A Monitor traffic and compile website traffic reports  
ICAWEB406A Create website testing procedures  
ICAWEB407A Conduct operational acceptance tests of websites  
ICAWEB408A Ensure basic website security  
ICAWEB409A Develop cascading style sheets  
ICAWEB410A Apply web authoring tool to convert client data for websites  
ICAWEB411A Produce basic client-side script for dynamic web pages  
ICAWEB412A Produce interactive web animation  
ICAWEB413A Optimise search engines  
ICAWEB414A Design simple web page layouts  
ICAWEB415A Produce server-side script for dynamic web pages  
ICAWEB416A Customise content management system  
ICAWEB417A Integrate social web technologies  
ICAWEB418A Use development software and IT tools to build a basic website  
ICAWEB419A Develop guidelines for uploading information to a website  
ICAWEB420A Write content for web pages  
ICAWEB421A Ensure website content meets technical protocols and standards  
ICAWEB422A Ensure website access and useability  
ICAWEB423A Ensure dynamic website security  
ICAWEB424A Evaluate and select a web hosting service  
ICAWEB425A Apply structured query language to extract and manipulate data

ICAWEB429A Create a markup language document to specification

### **Group E Digital games**

ICAGAM401A Produce an interactive game  
ICAGAM402A Identify and apply principles of games design and game playing  
ICAGAM403A Create design documents for interactive games  
ICAGAM405A Write story and content for digital games  
ICAGAM406A Create visual design components for interactive games  
ICAGAM407A Write scripts for interactive games  
ICAGAM408A Use 3-D animation interface and toolsets  
ICAGAM409A Create 3-D characters for interactive games  
ICAGAM410A Develop 3-D components for interactive games  
ICAGAM412A Design interactive media  
ICAGAM413A Design and create 3-D digital models  
ICAGAM414A Create audio for digital games  
ICAGAM415A Develop simple environments for 3-D games  
ICAGAM416A Prepare and complete image rendering processes  
ICAGAM417A Apply digital effects to interactive products  
ICAICT419A Work effectively in the digital media industry

### **Group F Digital media technologies**

BSBCRT401A Articulate, present and debate ideas  
CUFANM301A Create 2D digital animations  
CUFANM302A Create 3D digital animations  
CUFANM402A Create digital visual effects  
CUFDIG401A Author interactive media  
CUFPPM404A Create storyboards  
CUFSOU204A Perform basic sound editing  
CUFSOU301A Prepare audio assets  
ICADMT401A Create visual design components for digital media  
ICADMT402A Produce interactive animation  
ICADMT403A Produce and edit digital images

### **Group G Project management**

ICAPMG401A Support small scale IT projects

# ICA40211 Certificate IV in Information Technology Support

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in supporting clients in a range of technical areas. The qualification has a strong information technology base of core units with the potential for inclusion of a range of broader industry-specific units in the areas of service desk, database, sustainability and network support to suit particular needs.

### Job roles

Possible job titles include:

- customer support
- database support
- help desk specialist
- network support technician
- PC support technician
- technical support - sustainability
- user support technician.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of support-related work environments in service desk support, database support, networking support or similar.

### Pathways from the qualification

ICA50311 Diploma of Information Technology Systems Administration, ICA50511 Diploma of Database Design and Development, or a range of other ICA11 Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• analysing, evaluating and presenting information from a variety of sources</li> <li>• documenting technical work in plain English</li> <li>• writing and presenting material (briefs, reports, procedures and documents) to meet system, organisational and client business requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• working collaboratively with team members on small scale IT projects</li> <li>• implementing safe and environmentally sustainable work practices</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• locating and troubleshooting equipment, system and software faults</li> <li>• identifying, testing and resolving system and software faults</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• recognising problems and responding to clients in a timely manner</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• preparing feasibility reports that take into account project scope, time, cost, quality, communications and risk management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own outputs in relation to specified quality standards</li> <li>• working according to the Australian Computer Society Code of Ethics regarding security, legal, moral and ethical issues</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• maintaining knowledge of tools and software applications and the goods and services provided</li> <li>• actively seeking client evaluation and feedback and making improvements</li> <li>• providing one-to-one instruction to clients and users</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and using software and hardware diagnostic tools, including for multimedia contexts and automated testing environments</li> <li>• installing and configuring a small office or home office (SOHO) network</li> <li>• building a database or a small wireless local area network</li> </ul>

## Packaging Rules

**Total number of units = 22**

**8 core units *plus***

**14 elective units**

The elective units consist of:

- 5 from one of the following specialist elective groups:
  - Group A Database support
  - Group B Network communications
  - Group C Service desk
  - Group D Sustainability
- of the remaining units:
  - up to 9 may be from the specialist elective groups below or from Group E general elective units below
  - up to 4 may be from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS402B Contribute to the implementation of the OHS consultation process

BSBSUS301A Implement and monitor environmentally sustainable work practices

ICAICT401A Determine and confirm client business requirements

ICAICT408A Create technical documentation

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICASAS307A Install, configure and secure a small office home office network

ICASAS410A Identify and resolve client IT problems

ICASAS412A Action change requests

### Elective units

#### *Specialist elective units*

#### **Group A Database support**

ICADBS402A Complete database backup and restore

ICADBS404A Identify and resolve common database performance problems

ICADBS409A Monitor and administer a database

ICADBS412A Build a database

ICAPRG425A Use structured query language

#### **Group B Network communications**

ICANWK401A Install and manage a server

ICANWK404A Install, operate and troubleshoot a small enterprise branch network

ICANWK405A Build a small wireless local area network

ICANWK406A Install, configure and test network security

ICANWK408A Configure a desktop environment

**Group C Service desk**

ICAICT421A Connect, maintain and configure hardware components  
ICASAS414A Evaluate system status  
ICASAS421A Support users and troubleshoot desktop applications  
ICASAS425A Configure and troubleshoot operating system software  
ICASAS426A Locate and troubleshoot IT equipment, system and software faults

**Group D Sustainability**

BSBSUS501A Develop workplace policy and procedures for sustainability  
ICTSUS4183A Install and test renewable energy system for ICT networks  
ICTSUS4184A Install and test power saving hardware  
ICTSUS4185A Install and test power management software  
ICTSUS4186A Install thin client applications for power over ethernet

**General elective units****Group E**

BSBCRT401A Articulate, present and debate ideas  
ICADBS401A Identify physical database requirements  
ICADBS403A Create basic databases  
ICAICT413A Relate to clients on a business level  
ICAICT415A Provide one-to-one instruction  
ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards  
ICAICT422A Participate in IT services  
ICANWK409A Create scripts for networking  
ICANWK410A Install hardware to a network  
ICANWK411A Deploy software to networked computers  
ICAPMG401A Support small scale IT projects  
ICAPRG405A Automate processes  
ICASAD401A Develop and present feasibility reports  
ICASAS411A Assist with policy development for client support procedures  
ICASAS413A Manage resolution of system faults on a live system  
ICASAS416A Implement maintenance procedures  
ICASAS420A Provide first-level remote help-desk support  
ICASAS424A Support different operating systems  
ICASAS518A Install and upgrade operating systems  
ICAWEB415A Produce server-side script for dynamic web pages  
ICTCBL2136A Install, maintain and modify customer premises communications cabling:  
ACMA Restricted Rule  
ICTCBL2137A Install, maintain and modify customer premises communications cabling:  
ACMA Open Rule  
ICTCBL2139A Apply safe technical work practices for cabling registration  
ICTOPN4116A Use advanced optical test equipment  
ICTTEN4199A Install, configure and test a router

**Selecting elective units for different outcomes**

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

### ***Practical application plus technician***

Core units plus:

- BSBSUS301A Implement and monitor environmentally sustainable work practices
- ICASAS307A Install, configure and secure a small office home office network
- ICAICT421A Connect, maintain and configure hardware components
- ICASAS425A Configure and troubleshoot operating system software
- ICASAS426A Locate and troubleshoot IT equipment, system and software faults
- ICAICT401A Determine and confirm client business requirements

### ***Practical networking plus technician***

Core units plus:

- ICASAS307A Install, configure and secure a small office home office network
- ICANWK401A Install and manage a server
- ICANWK404A Install, operate and troubleshoot a small enterprise branch network
- ICANWK406A Install, configure and test network security

### ***Certified networking technician***

Core units plus:

- ICANWK404A Install, operate and troubleshoot a small enterprise branch network
- ICANWK405A Build a small wireless local area network
- ICTTEN4199A Install, configure and test a router

## ICA40311 Certificate IV in Web-Based Technologies

### Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Description

This qualification provides an individual with the skills and knowledge to design, develop, build and administer websites using a range of website technologies.

### Job roles

Possible job titles relevant to this include:

- web developer or technical writer
- webmaster assistant
- website coordinator
- website or web support administrator
- assistant web designer.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of web-related work environments in website development, administration or management.

### Pathways from the qualification

ICA50611 Diploma of Website Development, or a range of other Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• consulting with end users and clients before, during and after development of websites to determine their issues and ensure that their needs are met</li> <li>• interpreting technical manuals</li> <li>• documenting and presenting information in a variety of formats and media</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• consulting with work team to review proposed changes against current and future business requirements</li> <li>• establishing and improving work teams in an IT environment</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• determining criteria for writing script for web pages, for example, dynamic functionality and appropriate language</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• developing new criteria and procedures for performing current practices</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• creating project plans to guide the development of systems methodologies</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own output in relation to specified quality standards</li> <li>• meeting ethical standards in the areas of security, legal, moral and ethical practice</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• gathering and organising feedback on draft documentation and client satisfaction</li> <li>• maintaining knowledge of tools and software applications and the goods and services provided</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and using software and hardware tools in a variety of web, database, scripting and multimedia contexts</li> </ul>

## Packaging Rules

**Total number of units = 22**

**8 core units *plus***

**14 elective units**

The elective units consist of:

- 5 from one of the following specialist groups:
  - Group A Administration
  - Group B Design and development
- of the remaining units:
  - up to 9 may be from the specialist elective groups below or from Group C general elective units below
  - up to 4 may be from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS302B Participate effectively in OHS communication and consultative processes

ICAICT401A Determine and confirm client business requirements

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAWEB401A Design a website to meet technical requirements

ICAWEB402A Confirm accessibility of websites for people with special needs

ICAWEB403A Transfer content to a website using commercial packages

ICAWEB424A Evaluate and select a web hosting service

ICAWEB429A Create a markup language document to specification

### Elective units

#### *Specialist elective units*

#### **Group A Administration**

ICAWEB404A Maintain website performance

ICAWEB405A Monitor traffic and compile website traffic reports

ICAWEB406A Create website testing procedures

ICAWEB407A Conduct operational acceptance tests of websites

ICAWEB408A Ensure basic website security

#### **Group B Design and development**

ICADBS403A Create basic databases

ICAWEB409A Develop cascading style sheets

ICAWEB411A Produce basic client-side script for dynamic web pages

ICAWEB415A Produce server-side script for dynamic web pages

ICAWEB425A Apply structured query language to extract and manipulate data

#### *General elective units*

**Group C**

BSBCRT401A Articulate, present and debate ideas

BSBSUS301A Implement and monitor environmentally sustainable work practices

CUFPPM404A Create storyboards

ICAICT403A Apply software development methodologies

ICAICT407A Maintain website information standards

ICAICT408A Create technical documentation

ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards

ICAICT420A Develop client user interface

ICANWK409A Create scripts for networking

ICAPMG401A Support small scale IT projects

ICAPRG405A Automate processes

ICAWEB410A Apply web authoring tool to convert client data for websites

ICAWEB412A Produce interactive web animation

ICAWEB413A Optimise search engines

ICAWEB414A Design simple web page layouts

ICAWEB416A Customise content management system

ICAWEB417A Integrate social web technologies

ICAWEB421A Ensure website content meets technical protocols and standards

## ICA40411 Certificate IV in Information Technology Networking

### Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Description

This qualification provides the skills and knowledge for an individual to install and manage small scale networks, either as an independent network support technician or as part of a team.

### Job roles

Possible job titles relevant to this qualification include:

- network support
- network operations support
- network operations technician
- network technician
- network support technician.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of work environments in a network support role, including administrator, manager, operations analyst, operations engineer/technician, or technician.

### Pathways from the qualification

ICA50411 Diploma of Information Technology Networking, or a range of other ICA Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• writing for business, requiring depth in some areas and analysis and evaluation of information in a defined range of areas</li> <li>• presenting to teams and conducting meetings with clients</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• consulting with work team to review proposed changes against current and future business requirements</li> <li>• establishing and improving work teams in an IT environment</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• debugging code</li> <li>• solving network problems related to the installation of hardware, software and networks</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• developing new criteria and procedures for performing current practices</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• creating project plans to guide the development of systems methodologies</li> <li>• planning and designing different networking configurations</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own output in relation to specified quality standards</li> <li>• meeting ethical standards in the areas of security, legal, moral and ethical practice</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• maintaining knowledge of tools and software applications and the goods and services provided</li> <li>• obtaining client evaluation and feedback</li> <li>• providing instruction to clients and users</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and using software, hardware and networking components and diagnostic tools in a wide range of different environments</li> </ul>

## Packaging Rules

**Total number of units = 17**

**8 core units *plus***

**9 elective units**

The elective units consist of:

- up to 9 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS302B Participate effectively in OHS communication and consultative processes

ICAICT401A Determine and confirm client business requirements

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICANWK401A Install and manage a server

ICANWK402A Install and configure virtual machines for sustainable ICT

ICANWK403A Manage network and data integrity

ICANWK404A Install, operate and troubleshoot a small enterprise branch network

ICTTEN4198A Install, configure and test an internet protocol network

### Elective units

BSBCRT401A Articulate, present and debate ideas

BSBWOR404B Develop work priorities

ICAICT403A Apply software development methodologies

ICAICT408A Create technical documentation

ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards

ICANWK405A Build a small wireless local area network

ICANWK406A Install, configure and test network security

ICANWK407A Install and configure client-server applications and services

ICANWK408A Configure a desktop environment

ICANWK409A Create scripts for networking

ICANWK410A Install hardware to a network

ICANWK411A Deploy software to networked computers

ICANWK412A Create network documentation

ICAPMG401A Support small scale IT projects

ICAPRG425A Use structured query language

ICASAS426A Locate and troubleshoot IT equipment, system and software faults

ICTOPN4116A Use advanced optical test equipment

ICTSUS4183A Install and test renewable energy system for ICT networks

ICTSUS4184A Install and test power saving hardware

ICTSUS4185A Install and test power management software

ICTSUS4186A Install thin client applications for power over ethernet

ICTTEN4199A Install, configure and test a router  
ICTTEN4202A Install and test a radio frequency identification system  
ICTTEN4210A Implement and troubleshoot enterprise routers and switches  
ICTTEN4211A Design, install and configure an internetwork  
ICTTEN5200A Install, configure and test a local area network switch

### **Selecting elective units for different outcomes**

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

#### ***Certified networking technician***

Core units plus:

- ICANWK404A Install, operate and troubleshoot a small enterprise branch network
- ICANWK405A Build a small wireless local area network
- ICTTEN4199A Install, configure and test a router

#### ***Certified technology specialist – graphical user interfaces (GUI)***

Core units plus:

- ICANWK403A Manage network and data integrity
- ICANWK408A Configure a desktop environment

#### ***Certified technician or technology specialist – small server configuration***

Core units plus:

- ICANWK401A Install and manage a server

#### ***Certified IT enterprise, security or server administrator***

Core units plus:

- ICANWK406A Install, configure and test network security
- ICANWK403A Manage network and data integrity

#### ***Certified SQL associate or specialist***

Core units plus:

- ICAPRG425A Use structured query language

## ICA40511 Certificate IV in Programming

### Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Description

This qualification provides the skills and knowledge for an individual to develop basic programming skills in the most commonly used programming languages.

A person with this qualification could work as an assistant programmer in a team of software developers or as a support programmer to more senior programmers or systems analysts.

### Job roles

Possible job titles relevant to this qualification include:

- assistant applications programmer
- assistant programmer
- assistant software developer
- assistant web application programmer
- assistant web developer.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of programming-related work environments in software programming, application programming, web development or similar.

### Pathways from the qualification

ICA50711 Diploma of Software Development, or a range of other Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

*The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.*

<b>Employability skill</b>	<b>Industry/enterprise requirements for this qualification</b>
Communication	<ul style="list-style-type: none"> <li>• documenting technical work in plain English</li> <li>• writing and presenting reports</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• working collaboratively with project team members</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• using an integrated development environment, in particular language debugging facilities, to debug code</li> <li>• analysing software requirements</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• responding to clients in a timely manner</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• preparing feasibility reports that take into account project scope, time, cost, quality, communications and risk management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own outputs in relation to specified quality standards</li> <li>• working according to the Australian Computer Society Code of Ethics regarding security, legal, moral and ethical issues</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• maintaining knowledge of tools and software applications and the goods and services provided</li> <li>• obtaining client evaluation and feedback</li> <li>• providing one-to-one instruction for clients and users</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and using compilers, interpreters and other programming tools to produce program code that meets user requirements</li> </ul>

## Packaging Rules

**Total number of units = 18**

**10 core units *plus***

**8 elective units**

The elective units consist of:

- up to 8 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAPRG402A Apply query language

ICAPRG403A Develop data-driven applications

ICAPRG404A Test applications

ICAPRG405A Automate processes

ICAPRG406A Apply introductory object-oriented language skills

ICAPRG410A Build a user interface

ICAPRG414A Apply introductory programming skills in another language

ICAPRG415A Apply skills in object-oriented design

ICAPRG419A Analyse software requirements

### Elective units

BSBCRT401A Articulate, present and debate ideas

BSBOHS302B Participate effectively in OHS communication and consultative processes

ICADBS403A Create basic databases

ICAICT404A Use online learning tools

ICAICT408A Create technical documentation

ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards

ICAICT420A Develop client user interface

ICAPMG401A Support small scale IT projects

ICAPRG401A Maintain open-source code programs

ICAPRG407A Write script for software applications

ICAPRG409A Develop mobile applications

ICAPRG412A Configure and maintain databases

ICAPRG413A Use a library or pre-existing components

ICAPRG418A Apply intermediate programming skills in another language

ICAPRG427A Use XML effectively

ICAPRG428A Use regular expressions in programming languages

ICAPRG527A Apply intermediate object-oriented language skills

ICASAD401A Develop and present feasibility reports

ICASAD501A Model data objects

## ICASAD502A Model data processes

# ICA40611 Certificate IV in Information Technology Testing

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in a range of ICT positions directly related to testing, either as an assistant tester working mostly independently or as part of a team.

### Job roles

Possible job titles relevant to this qualification include:

- assistant ICT tester
- assistant software or systems tester
- assistant web tester.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of testing environments or similar.

### Pathways from the qualification

ICA50111 Diploma of Information Technology, or a range of other Diploma qualifications.

## **Licensing/Regulatory Information**

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## **Entry Requirements**

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>preparing briefs on client business requirements</li> <li>creating technical documentation in plain English</li> <li>writing and presenting reports on the results of standard diagnostic and troubleshooting tests</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>working collaboratively with team members</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>analysing project design</li> <li>solving technical hardware, software, web and network problems</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>responding to clients in a timely manner</li> <li>identifying, analysing and evaluating information from a variety of sources</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>preparing feasibility reports that take into account project scope, time, cost, quality, communications and risk management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>taking responsibility for own outputs in relation to specified quality standards</li> <li>working according to the Australian Computer Society Code of Ethics regarding security, legal, moral and ethical issues</li> </ul>
Learning	<ul style="list-style-type: none"> <li>maintaining knowledge of tools and software applications and the goods and services provided</li> <li>obtaining client evaluation and feedback</li> <li>providing one-to-one instruction for clients and users</li> </ul>
Technology	<ul style="list-style-type: none"> <li>selecting and using software and hardware diagnostic tools, including for multimedia contexts and automated testing environments</li> </ul>

## Packaging Rules

**Total number of units = 20**

**8 core units *plus***

**12 elective units**

The elective units consist of:

- up to 12 from the elective units listed below
- up to 4 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBSUS301A Implement and monitor environmentally sustainable work practices

ICAICT401A Determine and confirm client business requirements

ICAICT408A Create technical documentation

ICAICT411A Select and employ software and hardware testing tools

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAPMG401A Support small scale IT projects

ICAPRG405A Automate processes

ICASAS301A Run standard diagnostic tests

### Elective units

BSBCRT401A Articulate, present and debate ideas

ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards

ICANWK403A Manage network and data integrity

ICANWK404A Install, operate and troubleshoot a small enterprise branch network

ICANWK501A Plan, implement and test enterprise communication solutions

ICAPRG404A Test applications

ICASAS401A Perform unit test for a class

ICASAS503A Perform systems tests

ICASAS504A Develop and conduct client acceptance test

ICASAS513A Develop detailed test plans

ICASAS514A Perform integration tests

ICASAS515A Manage the testing process

ICASAS516A Perform stress and load tests on integrated platforms

ICAWEB406A Create website testing procedures

ICAWEB407A Conduct operational acceptance tests of websites

ICAWEB423A Ensure dynamic website security

ICTSUS4183A Install and test renewable energy system for ICT networks

ICTTEN4198A Install, configure and test an internet protocol network

## ICA40711 Certificate IV in Systems Analysis and Design

### Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Description

This qualification provides the skills and knowledge for an individual to work as part of a project team to analyse and redesign existing systems to meet client business requirements.

### Job roles

Possible job titles relevant to this qualification include:

- information technology support analyst
- information technology designer
- systems support analyst
- system designer
- operational support analyst
- technical support analyst.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of work environments in an information technology support role.

### Pathways from the qualification

ICA50811 Diploma of Systems Analysis and Design, or a range of other Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>determining and confirming client business expectations and needs</li> <li>documenting system requirements and problems in plain English</li> <li>writing and presenting detailed technical reports</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>organising own work priorities</li> <li>supporting team members with and coordinating project activities</li> <li>scheduling feedback meetings to discuss reports and possible next actions with stakeholders</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>using project planning methodologies to set benchmarks and scope</li> <li>locating, analysing, testing and rectifying faults</li> <li>contributing to the identification of business strategy, vision, goals and objectives</li> <li>confirming that the proposed project will come in on time and within budget</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>responding to clients in a timely manner</li> <li>transferring and applying theoretical concepts and/or technical or creative skills to a range of situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>planning and organising project and team meetings</li> <li>contributing to the development of a strategic plan</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>taking responsibility for own outputs in relation to specified quality standards</li> <li>working according to the Australian Computer Society Code of Ethics regarding security, legal, moral and ethical issues</li> </ul>
Learning	<ul style="list-style-type: none"> <li>maintaining knowledge of tools and software applications and the goods and services provided</li> <li>obtaining client evaluation and feedback</li> </ul>
Technology	<ul style="list-style-type: none"> <li>selecting and using software and hardware diagnostic tools, including for multimedia contexts and automated testing environments</li> </ul>

## Packaging Rules

**Total number of units = 22**

**7 core units *plus***

**15 elective units**

The elective units consist of:

- up to 15 from the elective units listed below
- up to 4 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBSUS301A Implement and monitor environmentally sustainable work practices

ICAICT401A Determine and confirm client business requirements

ICAICT403A Apply software development methodologies

ICAICT405A Develop detailed technical design

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAPRG405A Automate processes

ICASAD401A Develop and present feasibility reports

### Elective units

BSBCRT401A Articulate, present and debate ideas

BSBWOR301A Organise personal work priorities and development

ICADBS401A Identify physical database requirements

ICADBS412A Build a database

ICAICT402A Determine project specifications and secure client agreement

ICAICT408A Create technical documentation

ICAICT411A Select and employ software and hardware testing tools

ICAICT412A Coordinate and maintain IT work teams

ICAICT413A Relate to clients on a business level

ICAICT416A Contribute to the development of strategic plans

ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards

ICAPMG401A Support small scale IT projects

ICAPRG404A Test applications

ICAPRG406A Apply introductory object-oriented language skills

ICAPRG414A Apply introductory programming skills in another language

ICAPRG415A Apply skills in object-oriented design

ICAPRG419A Analyse software requirements

ICAPRG425A Use structured query language

ICTTEN4081A Locate, diagnose and rectify faults

## ICA40811 Certificate IV in Digital Media Technologies

### Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Description

This qualification provides the skills and knowledge for an individual to be competent to design, develop and use digital media technologies as an assistant information and communications technology (ICT) specialist working independently or as part of a larger development team.

### Job roles

Possible job titles relevant to this qualification include:

- assistant animator
- assistant designer
- assistant digital media author
- assistant digital media designer
- assistant digital media developer
- assistant digital media programmer
- assistant web designer
- interaction media developer
- support digital media developer
- support digital media development technician.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- with demonstrated vocational experience in a range of digital media work environments in digital media development, administration or management.

### Pathways from the qualification

ICA50911 Diploma of Digital Media Technologies, or a range of other Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• using plain English communication and literacy skills in relation to analysis, evaluation and presentation of information</li> <li>• documenting work and producing technical reports</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• consulting with work team to review proposed changes against current and future business requirements</li> <li>• working collaboratively with team members in an IT environment</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• analysing digital media technology and software requirements</li> <li>• diagnosing application and software problems and identifying solutions</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• transferring and applying theoretical concepts and/or technical or creative skills to a range of digital media situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• planning and developing a digital media design that meets project specific actions</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own output in relation to specified quality standards</li> <li>• applying environmentally sustainable work practices</li> <li>• meeting copyright, ethical and privacy standards in the areas of security, legal, moral and ethical practice</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• maintaining knowledge of digital media tools and software applications</li> <li>• obtaining client evaluation and feedback</li> <li>• keeping up-to-date and maintaining own competence</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and using software and hardware diagnostic tools for digital media contexts and environments</li> <li>• using digital media tools to design and develop website, online, interactive tools and applications</li> </ul>

## Packaging Rules

**Total number of units = 17**

**7 core units *plus***

**10 elective units**

The elective units consist of:

- 5 units from one of the following specialist groups:
  - Group A Web development
  - Group B Programming
  - Group C Interactive media
- of the remaining units:
  - up to 5 may be from the specialist elective groups below or from Group D general elective units below or elsewhere in ICA11
  - up to 3 may be from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBCRT401A Articulate, present and debate ideas

BSBOHS302B Participate effectively in OHS communication and consultative processes

CUFDIG401A Author interactive media

ICAICT404A Use online learning tools

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT419A Work effectively in the digital media industry

ICAPMG401A Support small scale IT projects

### *Specialist elective units*

#### **Group A Web development**

ICAWEB301A Create a simple markup language document

ICAWEB402A Confirm accessibility of websites for people with special needs

ICAWEB406A Create website testing procedures

ICAWEB407A Conduct operational acceptance tests of websites

ICAWEB409A Develop cascading style sheets

ICAWEB411A Produce basic client-side script for dynamic web pages

ICAWEB412A Produce interactive web animation

ICAWEB414A Design simple web page layouts

ICAWEB415A Produce server-side script for dynamic web pages

ICAWEB421A Ensure website content meets technical protocols and standards

ICAWEB425A Apply structured query language to extract and manipulate data

#### **Group B Programming**

ICAPRG301A Apply introductory programming techniques

ICAPRG402A Apply query language

ICAPRG405A Automate processes  
ICAPRG406A Apply introductory object-oriented language skills  
ICAPRG407A Write script for software applications  
ICAPRG412A Configure and maintain databases  
ICAPRG414A Apply introductory programming skills in another language

**Group C Interactive media**

CUFANM301A Create 2D digital animations  
CUFANM302A Create 3D digital animations  
CUFANM402A Create digital visual effects  
CUFCAM301A Shoot material for screen productions  
CUFPOS401A Edit screen content for fast turnaround  
CUFPOS402A Manage media assets  
CUFPPM404A Create storyboards  
CUFSOU204A Perform basic sound editing  
CUFSOU301A Prepare audio assets  
ICADMT401A Create visual design components for digital media  
ICADMT402A Produce interactive animation  
ICADMT403A Produce and edit digital images  
ICAGAM401A Produce an interactive game  
ICAGAM403A Create design documents for interactive games  
ICAGAM405A Write story and content for digital games  
ICAGAM413A Design and create 3-D digital models

**General elective units****Group D**

ICAICT408A Create technical documentation  
ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards  
BSBSUS301A Implement and monitor environmentally sustainable work practices  
ICADBS412A Build a database

## ICA40911 Certificate IV in Digital and Interactive Games

### Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Description

This qualification provides the skills and knowledge for an individual to be competent in supporting the design, development and programming of basic digital games briefs as part of a larger development team. The qualification has a small suite of core units with an opportunity to select units from specialist groups of electives across the different artistic or programming fields of the industry.

### Job roles

Possible job titles relevant to this qualification include:

- support 2-D/3-D artist
- assistant animator
- assistant designer
- support games developer
- assistant graphic/media designer
- interaction media developer
- support digital media developer
- assistant PC games programmer
- support web designer.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- after achieving a Year 12 certificate and relevant ICT experience equivalent to the following units of competency:
  - ICAICT201A Use computer operating systems and hardware
  - ICAICT202A Work and communicate effectively in an IT environment
  - ICAICT203A Operate application software packages
  - ICAWEB201A Use social media tools for collaboration and engagement

OR

- with demonstrated vocational experience in a range of ICT and games development environments.

### Pathways from the qualification

ICA50211 Diploma of Digital and Interactive Games, or a range of other Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

*The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.*

<b>Employability skill</b>	<b>Industry/enterprise requirements for this qualification</b>
Communication	<ul style="list-style-type: none"> <li>• researching and gathering information on the games industry</li> <li>• documenting work and producing technical reports for games design and development</li> <li>• articulating, presenting and debating ideas for games development</li> <li>• writing scripts, storyboards, content and stories for games</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• working collaboratively with team members</li> <li>• supporting team members and project leader to meet deadlines</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• generating solutions in response to individual and collaborative project tasks</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• producing concept design and documentation/storyboarding</li> <li>• meeting resource implications and requirements</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• developing creative and technical solutions or outcomes in response to presented design briefs and exercises</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• applying safe and sustainable work practices</li> <li>• meeting copyright, ethical and privacy standards in the areas of security, legal, moral and ethical practice</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• maintaining knowledge of digital media tools and software applications</li> <li>• keeping up-to-date and maintaining own competence</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• using a range of 2-D and 3-D games development software and tools to design and produce an interactive game</li> </ul>

## Packaging Rules

**Total number of units = 16**

**4 core units *plus***

**12 elective units**

The elective units consist of:

- 5 units from one of the following specialist elective groups:
  - Group A Design
  - Group B Programming
  - Group C Art
- of the remaining units:
  - up to 7 may be from the specialist elective groups below or from Group D general elective units below or elsewhere in ICA11
  - up to 3 may be from elsewhere in ICA11 or from any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS302B Participate effectively in OHS communication and consultative processes  
ICAGAM401A Produce an interactive game  
ICAICT418A Contribute to copyright, ethics and privacy in an IT environment  
ICAICT419A Work effectively in the digital media industry

### Elective units

#### *Specialist elective units*

#### **Group A Design**

CUFPPM404A Create storyboards  
ICAGAM402A Identify and apply principles of games design and game playing  
ICAGAM403A Create design documents for interactive games  
ICAGAM405A Write story and content for digital games  
ICAGAM406A Create visual design components for interactive games  
ICAGAM407A Write scripts for interactive games

#### **Group B Programming**

ICAGAM404A Apply artificial intelligence in game development  
ICAICT406A Build a graphical user interface  
ICAPRG301A Apply introductory programming techniques  
ICAPRG405A Automate processes  
ICAPRG406A Apply introductory object-oriented language skills  
ICAPRG413A Use a library or pre-existing components  
ICAPRG415A Apply skills in object-oriented design  
ICAPRG417A Apply mathematical techniques for software development  
ICAPRG527A Apply intermediate object-oriented language skills

**Group C Art**

CUFANM301A Create 2D digital animations  
CUFANM302A Create 3D digital animations  
CUFANM303A Create 3D digital models  
CUFANM402A Create digital visual effects  
CUVVSP14B Apply techniques to produce drawings  
ICADMT402A Produce interactive animation  
ICADMT403A Produce and edit digital images  
ICAGAM301A Apply simple modelling techniques  
ICAGAM302A Design and apply simple textures to digital art  
ICAGAM303A Review and apply the principles of animation  
ICAGAM408A Use 3-D animation interface and toolsets  
ICAGAM409A Create 3-D characters for interactive games  
ICAGAM410A Develop 3-D components for interactive games  
ICAGAM412A Design interactive media  
ICAGAM413A Design and create 3-D digital models  
ICAGAM414A Create audio for digital games  
ICAGAM416A Prepare and complete image rendering processes  
ICAGAM417A Apply digital effects to interactive products  
ICAGAM418A Use simple modelling for animation

***General elective units*****Group D**

BSBCRT401A Articulate, present and debate ideas  
ICAICT408A Create technical documentation  
ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards  
ICAICT420A Develop client user interface

# ICA41011 Certificate IV in Computer Systems Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to install and administer simple networks, servers, and client desktop deployments either as an independent information and communications technology (ICT) specialist or as part of a team.

## Job roles

Possible job titles relevant to this qualification include:

- network support administrator
- network operations support
- network operations technician
- network technician
- network support technician
- level 1 help desk support
- desktop deployment technician.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA30111 Certificate III in Information, Digital Media and Technology, or other relevant qualifications or units equivalent to the core of ICA30111

OR

- after achieving a Year 12 certificate and relevant ICT experience equivalent to the following units of competency:
  - ICAICT201A Use computer operating systems and hardware
  - ICAICT202A Work and communicate effectively in an IT environment
  - ICAICT203A Operate application software packages
  - ICAWEB201A Use social media tools for collaboration and engagement

OR

- with demonstrated vocational experience in a range of IT work environments in a network support role, including administrator, manager, operations analyst, operations engineer/technician, or technician.

### Pathways from the qualification

ICA60511 Advanced Diploma of Computer Systems Technology or a range of Diploma or Advanced Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• preparing briefs on client business requirements</li> <li>• creating technical documentation in plain English</li> <li>• writing and presenting reports on the results of standard diagnostic and troubleshooting tests on equipment, system and software faults</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• consulting with work team to review proposed changes against current and future business requirements</li> <li>• establishing and improving work teams in an IT environment</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• applying safe and sustainable work practices</li> <li>• debugging code</li> <li>• solving network problems related to the installation of hardware, software and networks</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• responding to clients in a timely manner on business requirements</li> <li>• developing new criteria and procedures for performing current practices</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• creating project plans to guide the development of systems methodologies</li> <li>• preparing feasibility reports that take into account project scope, time, cost, quality, communications and risk management</li> <li>• planning and designing an intranet</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own output in relation to specified quality standards</li> <li>• meeting copyright, ethical and privacy standards in the areas of security, legal, moral and ethical practice</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• maintaining knowledge of tools and software applications and the goods and services provided</li> <li>• obtaining client evaluation and feedback</li> <li>• providing one-to-one instruction for clients and users</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and using software and hardware diagnostic tools, including multimedia contexts and automated testing environments</li> </ul>

## Packaging Rules

**Total number of units = 20**

**12 core units *plus***

**8 elective units**

The elective units consist of:

- up to 8 from the elective units listed below
- up to 4 from elsewhere in ICA11 or any other Training Package or accredited course at Certificate IV or Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS302B Participate effectively in OHS communication and consultative processes

BSBSUS301A Implement and monitor environmentally sustainable work practices

ICAICT401A Determine and confirm client business requirements

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT421A Connect, maintain and configure hardware components

ICANWK404A Install, operate and troubleshoot a small enterprise branch network

ICANWK405A Build a small wireless local area network

ICAPRG414A Apply introductory programming skills in another language

ICASAS425A Configure and troubleshoot operating system software

ICASAS426A Locate and troubleshoot IT equipment, system and software faults

ICAWEB411A Produce basic client-side script for dynamic web pages

ICTTEN4199A Install, configure and test a router

### Elective units

BSBCRT401A Articulate, present and debate ideas

ICAICT405A Develop detailed technical design

ICAICT408A Create technical documentation

ICAICT412A Coordinate and maintain IT work teams

ICAICT415A Provide one-to-one instruction

ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards

ICANWK401A Install and manage a server

ICANWK402A Install and configure virtual machines for sustainable ICT

ICANWK403A Manage network and data integrity

ICANWK407A Install and configure client-server applications and services

ICANWK408A Configure a desktop environment

ICANWK507A Install, operate and troubleshoot medium enterprise routers

ICAPMG401A Support small scale IT projects

ICAPRG406A Apply introductory object-oriented language skills

ICAPRG409A Develop mobile applications

ICASAS307A Install, configure and secure a small office home office network

ICASAS420A Provide first-level remote help-desk support

ICAWEB414A Design simple web page layouts

ICAWEB415A Produce server-side script for dynamic web pages

ICAWEB425A Apply structured query language to extract and manipulate data

ICAWEB429A Create a markup language document to specification

ICTTEN2140A Use hand and power tools

ICTTEN4198A Install, configure and test an internet protocol network

# ICA50111 Diploma of Information Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to administer and manage information and communications technology (ICT) support in small-to-medium enterprises (SMEs) using a wide range of general ICT technologies.

Persons working at this level provide a broader rather than specialised ICT support function, applying a wide range of higher level technical skills in ICT areas such as networking, IT support, database development, programming and web development.

## Job roles

Possible job titles relevant to this qualification include:

- information systems office manager
- office systems administrator
- IT office manager
- IT systems administrator
- systems manager.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification may include:

- after achieving ICA40111 Certificate IV in Information Technology, or other relevant qualifications or units equivalent to the core of ICA40111

OR

- with demonstrated vocational experience in a range of work environments using a wide range of information technologies.

### Pathways from the qualification

ICA60111 Advanced Diploma of Information Technology or other ICA11 Advanced Diploma qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• liaising with clients to determine requirements and ensure that they are met</li> <li>• analysing, evaluating and presenting information about computer systems and information technology in conjunction with stakeholders</li> <li>• negotiating the provision of goods and services with service and product suppliers</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• establishing and improving work teams in an IT environment</li> <li>• working with a project team to identify business critical functions and the security environment</li> <li>• working with key stakeholders to gather, analyse and report on information</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• determining the uses and audience of a simple markup language document</li> <li>• troubleshooting and running diagnostic tests and providing solutions to hardware or software faults</li> <li>• debugging and writing scripts to solve problems</li> <li>• solving a range of unpredictable problems, for example when validating system design specifications or preparing a disaster recovery plan</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• identifying and applying skills and knowledge to a wide variety of contexts</li> <li>• investigating and documenting solutions to client problems</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> <li>• initiating alternative approaches to problem solving</li> <li>• participating in the development of strategic initiatives</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• creating project plans to guide the development of systems methodologies</li> <li>• identifying problems, planning solutions and validating results using project planning skills to take into account project scope, time, cost, quality, communications, and risk analysis and management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• prioritising and taking responsibility for own outputs in working and learning</li> <li>• implementing safe and sustainable work practices</li> <li>• using personal responsibility and autonomy in performing</li> </ul>

	complex technical operations and organising others
Learning	<ul style="list-style-type: none"><li>• keeping up-to-date with current industry-accepted hardware and software products and services</li><li>• reviewing client feedback and identifying areas for improvement</li><li>• gathering and organising feedback on draft documentation and client satisfaction</li><li>• transferring and applying theoretical concepts, technical information and creative skills in a range of situations</li></ul>
Technology	<ul style="list-style-type: none"><li>• identifying technology needs</li><li>• sourcing, purchasing, using and testing system components</li><li>• applying understanding of conflicts and integration capabilities between diverse pieces of equipment</li></ul>

## Packaging Rules

**Total number of units = 20**

**4 core units *plus***

**16 elective units**

The elective units consist of:

- up to 16 units from the specialist elective groups below, with a maximum of 5 units from any one group:
  - Group A Networking
  - Group B Programming
  - Group C IT support
  - Group D Web design and development
  - Group E Digital games
  - Group F Digital media technologies
  - Group G Project management
- up to 5 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### **Core units**

BSBOHS509A Ensure a safe workplace

BSBSUS501A Develop workplace policy and procedures for sustainability

ICAICT509A Gather data to identify business requirements

ICAICT511A Match IT needs with the strategic direction of the enterprise

### ***Specialist elective units***

#### **Group A Networking**

ICANWK501A Plan, implement and test enterprise communication solutions

ICANWK502A Implement secure encryption technologies

ICANWK503A Install and maintain valid authentication processes

ICANWK504A Design and implement an integrated server solution

ICANWK505A Design, build and test a network server

ICANWK506A Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network

ICANWK507A Install, operate and troubleshoot medium enterprise routers

ICANWK508A Install, operate and troubleshoot medium enterprise switches

ICANWK509A Design and implement a security perimeter for ICT networks

ICANWK510A Develop, implement and evaluate system and application security

ICANWK511A Manage network security

ICANWK513A Manage system security

ICANWK514A Model preferred system solutions

ICANWK515A Develop configuration management protocols

ICANWK516A Determine best-fit topology for a local network

ICANWK517A Determine best-fit topology for a wide area network  
ICANWK518A Design an enterprise wireless local area network  
ICANWK519A Design an IT security framework  
ICANWK520A Design IT system security controls  
ICANWK521A Install, configure and test a payment gateway  
ICANWK522A Build decks using wireless markup language  
ICANWK524A Install and configure network access storage devices  
ICANWK525A Configure an enterprise virtual computing environment  
ICANWK526A Install an enterprise virtual computing environment  
ICANWK527A Manage an enterprise virtual computing environment  
ICANWK529A Install and manage complex ICT networks  
ICANWK531A Configure an internet gateway  
ICANWK532A Identify and resolve network problems  
ICANWK614A Manage IT security

### **Group B Programming**

ICAPRG501A Apply advanced object-oriented language skills  
ICAPRG502A Manage a project using software management tools  
ICAPRG503A Debug and monitor applications  
ICAPRG504A Deploy an application to a production environment  
ICAPRG505A Build advanced user interface  
ICAPRG506A Design application architecture  
ICAPRG507A Implement security for applications  
ICAPRG508A Create mashups  
ICAPRG509A Build using rapid application development  
ICAPRG510A Maintain custom software  
ICAPRG511A Monitor and support data conversion to new IT system  
ICAPRG512A Prepare for the build phase of an IT system  
ICAPRG513A Coordinate the build phase of an IT system  
ICAPRG514A Prepare for software development using rapid application development  
ICAPRG515A Review developed software  
ICAPRG516A Develop integration blueprint for IT systems  
ICAPRG517A Install, test and evaluate pilot version of IT system  
ICAPRG518A Monitor the system pilot  
ICAPRG523A Apply advanced programming skills in another language  
ICAPRG524A Develop high-level object-oriented class specifications  
ICAPRG525A Build Java applets  
ICAPRG526A Maintain functionality of legacy code programs  
ICAPRG527A Apply intermediate object-oriented language skills  
ICAPRG528A Perform IT data conversion  
ICAPRG601A Develop advanced mobile multi-touch applications  
ICASAD501A Model data objects  
ICASAD502A Model data processes  
ICASAD503A Minimise risk of new technologies to business solutions

### **Group C IT support**

ICAICT501A Research and review hardware technology options for organisations  
ICAICT502A Develop detailed component specifications from project specifications

ICAICT503A Validate quality and completeness of system design specifications  
ICAICT504A Confirm transition strategy for a new system  
ICAICT506A Implement process re-engineering strategies  
ICAICT507A Select new technology models for business  
ICAICT510A Determine appropriate IT strategies and solutions  
ICAICT512A Plan process re-engineering strategies for business  
ICAICT514A Identify and manage the implementation of current industry-specific technologies  
ICAICT515A Verify client business requirements  
ICASAD506A Produce a feasibility report  
ICASAS501A Develop, implement and evaluate an incident response plan  
ICASAS502A Establish and maintain client user liaison  
ICASAS503A Perform systems tests  
ICASAS504A Develop and conduct client acceptance test  
ICASAS505A Review and update disaster recovery and contingency plans  
ICASAS506A Update IT system operational procedures  
ICASAS507A Implement and evaluate systems for regulatory and standards compliance  
ICASAS509A Provide client IT support services  
ICASAS510A Review and develop IT maintenance strategy  
ICASAS511A Prioritise IT change requests  
ICASAS512A Review and manage delivery of maintenance services  
ICASAS513A Develop detailed test plans  
ICASAS515A Manage the testing process  
ICASAS517A Use network tools  
ICASAS518A Install and upgrade operating systems

#### **Group D Web design and development**

ICAWEB411A Produce basic client-side script for dynamic web pages  
ICAWEB429A Create a markup language document to specification  
ICAWEB501A Build a dynamic website  
ICAWEB502A Create dynamic web pages  
ICAWEB503A Create web-based programs  
ICAWEB504A Build a document using eXtensible markup language  
ICAWEB505A Develop complex web page layouts  
ICAWEB506A Develop complex cascading style sheets  
ICAWEB507A Customise a complex IT content management system  
ICAWEB508A Develop website information architecture  
ICAWEB509A Use site server tools for transaction management  
ICAWEB510A Analyse information and assign meta-tags  
ICAWEB511A Implement quality assurance process for websites  
ICAWEB512A Administer business websites and servers  
ICAWEB515A Implement and use web services  
ICAWEB516A Research and apply emerging web technology trends

#### **Group E Digital games**

ICAGAM501A Create design concepts for digital games and 3-D media  
ICAGAM503A Create a complex 3-D interactive computer game  
ICAGAM504A Manage interactive media production

ICAGAM506A Create complex code for mobile game devices  
ICAGAM507A Develop intermediate 3-D software for games and interactive media  
ICAGAM508A Develop complex 3-D software for games and interactive media  
ICAGAM509A Design interactive 3-D applications for scientific and mathematical modelling  
ICAGAM510A Prepare games for different platforms and delivery modes  
ICAGAM511A Manage testing of games and interactive media  
ICAGAM512A Create and implement designs for a 3-D games environment  
ICAGAM514A Design and create models for a 3-D and digital effects environment  
ICAGAM515A Design and create advanced particles, fluids and bodies for 3-D digital effects  
ICAGAM516A Animate a 3-D character for digital games  
ICAGAM517A Produce a digital animation sequence  
ICAGAM518A Animate physical attributes of models and elements  
ICAGAM519A Manage technical art and rigging in 3-D animation  
ICAGAM520A Create and combine 3-D digital games and components  
ICAGAM521A Create interactive 3-D environments for digital games  
ICAGAM522A Complete digital editing for the 3-D and digital effects environment  
ICAGAM523A Collaborate in the design of 3-D game levels and environments  
ICAGAM524A Integrate multiple data sources into interactive 3-D environments  
ICAGAM525A Apply digital texturing for the 3-D environment in digital games  
ICAGAM526A Create complex 3-D characters for games  
ICAGAM527A Integrate database with online game  
ICAGAM529A Analyse business opportunities in the digital games environment

### **Group F Digital media technologies**

BSBCRT501A Originate and develop concepts  
CUFDIG502A Design web environments  
CUFDIG503A Design e-learning resources  
CUFDIG507A Design digital simulations  
CUFPOS201A Perform basic vision and sound editing  
CUFPOS401A Edit screen content for fast turnaround  
CUSSOU302A Record and mix a basic music demonstration  
CUSSOU502A Produce sound recordings  
CUVPHI504A Investigate and exploit innovative imaging options  
ICADMT501A Incorporate and edit digital video  
ICAICT406A Build a graphical user interface  
ICAICT419A Work effectively in the digital media industry

### **Group G Project management**

ICAPMG501A Manage IT projects

# ICA50211 Diploma of Digital and Interactive Games

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in a variety of skill areas within the digital and interactive games industry. It provides an opportunity to develop the design, graphic/digital media and programming skills required in the development of digital games briefs, either as a small independent specialist or as part of a larger team. The qualification also provides opportunities to work in new and emerging games genres, such as online game development, mobile device gaming, interactive internet and TV game development.

## Job roles

Possible job titles relevant to this qualification include:

- 2-D/3-D artist
- animator
- designer
- games developer
- graphic/media designer
- interactive digital media developer
- PC games programmer
- mobile games programmer
- web designer.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA40911 Certificate IV in Digital and Interactive Games, or other relevant qualifications or units equivalent to the core of ICA40911

OR

- with demonstrated vocational experience in a range of work environments, such as digital media, games development, animation, graphics design or similar roles.

### Pathways from the qualification

ICA11 Advanced Diploma or Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• communicating with work team members and clients using a variety of media and techniques</li> <li>• communicating central ideas of a message, such as a game concept presentation, in an informative and engaging manner</li> <li>• establishing rapport with clients</li> <li>• interpreting and clarifying game design documents and creative briefs</li> <li>• writing complex technical briefs and reports</li> <li>• interpreting and applying information in user manuals for software applications</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• managing project team members and activities</li> <li>• working with team members in an open and collaborative manner</li> <li>• collaborating with colleagues to develop products or services</li> <li>• seeking feedback from team members and clients on work in progress</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• contributing creative ideas to projects</li> <li>• suggesting ways to improve products</li> <li>• ensuring there is an intuitive and logical flow to the navigation of game interfaces</li> <li>• generating a range of ideas for game products that meet the needs of target users and audiences</li> <li>• thinking laterally when developing ideas</li> <li>• maintaining design integrity</li> <li>• visualising and interpreting creative concepts</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• undertaking background research</li> <li>• preparing and making presentations</li> <li>• managing budgets and projects</li> <li>• planning the development process for and managing the testing of games</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• finding solutions to interactivity challenges</li> <li>• finding solutions to game design problems, such as balancing a game</li> <li>• finding ways to minimise the effect of technical constraints</li> <li>• troubleshooting and solving problems as they arise during the development of products</li> </ul>

Self-management	<ul style="list-style-type: none"><li>• working to deadlines</li><li>• providing appropriate and timely documentation</li><li>• managing and marketing oneself as a freelancer</li><li>• ensuring that workplace practices comply with OHS requirements</li><li>• managing own finances</li></ul>
Learning	<ul style="list-style-type: none"><li>• developing and participating in industry or community networks</li><li>• extending own knowledge and skills through experimentation and practice</li><li>• improving performance/product through self-reflection and revision to incorporate feedback from colleagues or clients</li><li>• keeping up-to-date with industry developments and trends</li><li>• seeking expert advice as required</li></ul>
Technology	<ul style="list-style-type: none"><li>• creating complex games from game design documents and specifications</li><li>• using a range of software applications</li></ul>

## Packaging Rules

**Total number of units = 16**

**5 core units *plus***

**11 elective units**

The elective units consist of:

- 5 from one of the following specialist groups
  - Group A Programming
  - Group B Art
  - Group C Digital media
- of the remaining units:
  - up to 6 may be from the specialist elective groups below or from Group D general elective units below
  - up to 3 may be from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS402B Contribute to the implementation of the OHS consultation process  
ICAGAM501A Create design concepts for digital games and 3-D media  
ICAGAM503A Create a complex 3-D interactive computer game  
ICAGAM523A Collaborate in the design of 3-D game levels and environments  
ICAICT419A Work effectively in the digital media industry

### Elective units

#### *Specialist elective units*

#### **Group A Programming**

ICAGAM419A Build a database to support a computer game  
ICAGAM506A Create complex code for mobile game devices  
ICAGAM507A Develop intermediate 3-D software for games and interactive media  
ICAGAM508A Develop complex 3-D software for games and interactive media  
ICAGAM509A Design interactive 3-D applications for scientific and mathematical modelling  
ICAGAM510A Prepare games for different platforms and delivery modes  
ICAGAM511A Manage testing of games and interactive media  
ICAGAM527A Integrate database with online game  
ICAPRG425A Use structured query language  
ICAPRG501A Apply advanced object-oriented language skills  
ICAPRG515A Review developed software  
ICAPRG523A Apply advanced programming skills in another language  
ICAWEB508A Develop website information architecture

#### **Group B Art**

ICAGAM512A Create and implement designs for a 3-D games environment

ICAGAM514A Design and create models for a 3-D and digital effects environment  
ICAGAM515A Design and create advanced particles, fluids and bodies for 3-D digital effects  
ICAGAM516A Animate a 3-D character for digital games  
ICAGAM517A Produce a digital animation sequence  
ICAGAM518A Animate physical attributes of models and elements  
ICAGAM519A Manage technical art and rigging in 3-D animation  
ICAGAM520A Create and combine 3-D digital games and components  
ICAGAM526A Create complex 3-D characters for games

### **Group C Digital media**

CUFDIG502A Design web environments  
CUFDIG503A Design e-learning resources  
CUFDIG507A Design digital simulations  
CUSSOU403A Perform advanced sound editing  
ICAGAM521A Create interactive 3-D environments for digital games  
ICAGAM522A Complete digital editing for the 3-D and digital effects environment  
ICAGAM524A Integrate multiple data sources into interactive 3-D environments  
ICAGAM525A Apply digital texturing for the 3-D environment in digital games

### ***General elective units***

#### **Group D**

BSBCRT501A Originate and develop concepts  
BSBSUS501A Develop workplace policy and procedures for sustainability  
ICAGAM504A Manage interactive media production  
ICAGAM528A Create games for mobile devices  
ICAGAM529A Analyse business opportunities in the digital games environment  
ICAGAM530A Develop and implement physics in a 3-D digital game  
ICAGAM531A Complete compositing to create elements for the 3-D and digital effects environment  
ICAICT408A Create technical documentation  
ICAICT511A Match IT needs with the strategic direction of the enterprise  
ICAICT514A Identify and manage the implementation of current industry-specific technologies  
ICAPMG501A Manage IT projects  
ICAWEB411A Produce basic client-side script for dynamic web pages  
ICAWEB429A Create a markup language document to specification

# ICA50311 Diploma of Information Technology Systems Administration

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in administering a variety of networked computer systems. The qualification has a strong information technology base of core units with the potential for inclusion of a range of broader industry-specific units in the areas of virtualisation, sustainability and project management to suit particular needs.

## Job roles

Possible job titles relevant to this qualification include:

- assistant IT manager
- assistant system manager
- internet/intranet administrator
- internet/intranet systems administrator
- systems administrator.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA40211 Certificate IV in Information Technology Support, or other relevant qualifications or units equivalent to the core of ICA40211.

OR

- with demonstrated vocational experience in a range of systems administration areas, including systems, internet and intranet support or similar.

### Pathways from the qualification

ICA11 Advanced Diploma or Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• identifying, analysing and evaluating information from a variety of sources</li> <li>• using plain English, literacy and communication skills in relation to analysis, evaluation and presentation of information</li> <li>• writing complex technical briefs and reports</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• managing project team members and activities</li> <li>• working collaboratively with team members</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• analysing project design</li> <li>• solving technical hardware, software and network problems</li> <li>• analysing business specifications and administering technical solutions</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• initiating and maintaining client user liaison</li> <li>• involving clients in the development of feasibility studies and strategic business initiatives</li> <li>• anticipating possible disasters and responding with appropriate contingency recovery plans</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• developing plans for sustainability and competitive advantage</li> <li>• preparing feasibility reports that take into account project scope, time, cost, quality, communications and risk management</li> <li>• developing workplace policy for sustainability</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• managing own time and work priorities to plan project and schedule</li> <li>• taking responsibility for own and others' outputs in relation to specified quality standards</li> <li>• managing systems security and testing processes</li> <li>• meeting the Australian Computer Society Code of Ethics regarding security, legal, moral and ethical issues</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• extending own knowledge of tools and software applications and the goods and services provided</li> <li>• devising and implementing client evaluation and feedback methodologies</li> <li>• providing one-to-one liaison for clients and users</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and administering software and hardware diagnostic tools</li> </ul>

## Packaging Rules

**Total number of units = 19**

**10 core units *plus***

**9 elective units**

The elective units consist of:

- up to 9 elective units from the elective units listed below
- up to 4 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBSUS501A Develop workplace policy and procedures for sustainability

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT509A Gather data to identify business requirements

ICANWK513A Manage system security

ICASAS406A Implement and hand over system components

ICASAS502A Establish and maintain client user liaison

ICASAS505A Review and update disaster recovery and contingency plans

ICASAS512A Review and manage delivery of maintenance services

ICASAS515A Manage the testing process

ICTTEN5204A Produce technical solutions from business specifications

### Elective units

ICAICT501A Research and review hardware technology options for organisations

ICAICT511A Match IT needs with the strategic direction of the enterprise

ICAICT515A Verify client business requirements

ICAICT514A Identify and manage the implementation of current industry-specific technologies

ICANWK501A Plan, implement and test enterprise communication solutions

ICANWK502A Implement secure encryption technologies

ICANWK504A Design and implement an integrated server solution

ICANWK505A Design, build and test a network server

ICANWK506A Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network

ICANWK509A Design and implement a security perimeter for ICT networks

ICANWK525A Configure an enterprise virtual computing environment

ICANWK526A Install an enterprise virtual computing environment

ICANWK527A Manage an enterprise virtual computing environment

ICANWK529A Install and manage complex ICT networks

ICANWK531A Configure an internet gateway

ICAPMG501A Manage IT projects

ICASAD506A Produce a feasibility report

ICASAS503A Perform systems tests

ICASAS513A Develop detailed test plans

ICASAS517A Use network tools

ICASAS518A Install and upgrade operating systems

ICTSUS5187A Implement server virtualisation for a sustainable ICT system

ICTSUS6233A Integrate sustainability in ICT planning and design projects

ICTSUS6234A Establish a business case for sustainability and competitive advantage in ICT projects

ICTTEN6206A Produce an ICT network architecture design

# ICA50411 Diploma of Information Technology Networking

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to manage, as an independent ICT specialist or as part of a team, the installation of a range of networks, including internetworking, security and e-business integration.

## Job roles

Possible job titles relevant to this qualification include:

- network administrator
- IT administrator
- IT operations administrator
- network services administrator
- network support coordinator
- network operations analyst
- network security coordinator
- network e-business coordinator.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA40411 Certificate IV in Information Technology Networking, or other relevant qualifications or units equivalent to the core of ICA40411.

OR

- with demonstrated vocational experience in a range of work environments in senior network support roles, including administrator, operations analyst, technician, operations or support coordinator/technician.

### Pathways from the qualification

ICA60211 Advanced Diploma of Network Security, or a range of other ICA11 Advanced Diploma or Vocational Graduate Certificate qualifications, or other relevant higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• applying plain English to written documents and reports</li> <li>• writing complex briefs and reports for businesses, requiring depth of analysis and evaluation of information</li> <li>• conducting meetings and briefing sessions for team members</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• consulting with work team and providing directions to review proposed changes against current and future business requirements</li> <li>• establishing and improving work teams in an IT environment</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• debugging code</li> <li>• solving network problems related to the installation of hardware, software and networks</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• developing new criteria and procedures for performing current practices</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• creating project plans to guide the development of systems methodologies</li> <li>• planning and designing networking structures</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own and others' output in relation to specified quality standards</li> <li>• meeting ethical standards in the areas of security, legal, moral and ethical practice</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• maintaining knowledge of diagnostic tools and software applications and the goods and services provided</li> <li>• obtaining client evaluation and feedback</li> <li>• providing instructions to clients and users</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• selecting and using software, hardware and networking components and diagnostic tools in a wide range of different environments</li> </ul>

## Packaging Rules

**Total number of units = 16**

**5 core units *plus***

**11 elective units**

The elective units consist of:

- up to 11 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT511A Match IT needs with the strategic direction of the enterprise

ICANWK529A Install and manage complex ICT networks

ICTSUS5187A Implement server virtualisation for a sustainable ICT system

ICTTEN6206A Produce an ICT network architecture design

### Elective units

BSBSUS501A Develop workplace policy and procedures for sustainability

ICAICT501A Research and review hardware technology options for organisations

ICAICT509A Gather data to identify business requirements

ICAICT514A Identify and manage the implementation of current industry-specific technologies

ICAICT603A Manage the use of appropriate development methodologies

ICANWK501A Plan, implement and test enterprise communication solutions

ICANWK502A Implement secure encryption technologies

ICANWK503A Install and maintain valid authentication processes

ICANWK504A Design and implement an integrated server solution

ICANWK505A Design, build and test a network server

ICANWK506A Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network

ICANWK507A Install, operate and troubleshoot medium enterprise routers

ICANWK508A Install, operate and troubleshoot medium enterprise switches

ICANWK509A Design and implement a security perimeter for ICT networks

ICANWK510A Develop, implement and evaluate system and application security

ICANWK511A Manage network security

ICANWK513A Manage system security

ICANWK524A Install and configure network access storage devices

ICANWK525A Configure an enterprise virtual computing environment

ICANWK526A Install an enterprise virtual computing environment

ICANWK527A Manage an enterprise virtual computing environment

ICANWK531A Configure an internet gateway

ICAPMG501A Manage IT projects

ICASAD506A Produce a feasibility report  
ICASAS406A Implement and hand over system components  
ICASAS501A Develop, implement and evaluate an incident response plan  
ICASAS502A Establish and maintain client user liaison  
ICASAS503A Perform systems test  
ICASAS505A Review and update disaster recovery and contingency plans  
ICASAS512A Review and manage delivery of maintenance services  
ICASAS515A Manage the testing process  
ICTOPN5119A Perform acceptance and commissioning tests on optical network  
ICTOPN5120A Plan for an optical system upgrade and cut over  
ICTOPN5122A Test the performance of specialised optical devices  
ICTOPN5123A Analyse and integrate specialised optical devices in the network  
ICTSUS6233A Integrate sustainability in ICT planning and design projects  
ICTSUS6234A Establish a business case for sustainability and competitive advantage in ICT projects  
ICTTEN4213A Configure and troubleshoot advanced network switching  
ICTTEN5168A Design and implement an enterprise voice over internet protocol and a unified communications network  
ICTTEN5201A Install, configure and test a server  
ICTTEN5203A Dimension and design a radio frequency identification system  
ICTTEN5204A Produce technical solutions from business specifications  
ICTTEN5217A Plan a wireless mesh network  
ICTTEN6172A Design and configure an IP-MPLS network with virtual private network tunnelling

### **Selecting elective units for different outcomes**

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

#### ***Certified technology specialist – communications technologies***

Core units plus:

- ICANWK501A Plan, implement and test enterprise communication solutions

#### ***Certified technology specialist – network and applications infrastructure***

Core units plus:

- ICANWK505A Design, build and test a network server

#### ***Certified technician or technology specialist – infrastructure configuration***

Core units plus:

- ICANWK505A Design, build and test a network server
- ICANWK503A Install and maintain valid authentication processes

### ***Certified network associate specialist***

Core units plus:

- ICANWK529A Install and manage complex ICT networks
- ICANWK506A Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network
- ICANWK507A Install, operate and troubleshoot medium enterprise routers
- ICANWK508A Install, operate and troubleshoot medium enterprise switches

### ***Certified security and architect specialist***

Core units plus:

- ICANWK529A Install and manage complex ICT networks
- ICANWK503A Install and maintain valid authentication processes
- ICANWK511A Manage network security

### ***Certified technology specialist – internet security***

Core units plus:

- ICANWK509A Design and implement a security perimeter for ICT networks

# ICA50511 Diploma of Database Design and Development

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides skills and knowledge for an individual to be effective in the design and development of ICT database systems. The qualification builds on a base core of design and development competencies with elective choices covering business needs analysis, quality assurance and project management.

### Job roles

Possible job titles relevant to this qualification include:

- assistant database designer
- assistant database developer
- assistant database specialist.

## Pathways Information

### Pathways into the qualification

- after achieving ICA40211 Certificate IV in Information Technology Support, or other relevant qualifications or units equivalent to the core of ICA40211.

OR

- with demonstrated vocational experience in a range of database design and development areas.

### Pathways from the qualification

ICA11 Advanced Diploma or Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## **Licensing/Regulatory Information**

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## **Entry Requirements**

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>articulating complex scenarios in a clear and concise manner relevant to all levels of the organisation</li> <li>documenting information related to database requirements and solutions</li> <li>writing and presenting complex technical reports, with supporting documentation</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>coordinating group and presenting on key project activities</li> <li>reviewing the database with team members and key stakeholders</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>developing controls and contingencies to alleviate security threats</li> <li>taking corrective action on system implementation breakdowns</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>anticipating potential problems and devising solutions</li> <li>conducting research to determine client business requirements</li> <li>integrating sustainability in ICT planning and design projects</li> <li>matching client IT requirements with the strategic direction of the enterprise</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>developing project plans</li> <li>planning for quality controls and contingencies when designing database system</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>managing own time and work priorities against project plan and schedule</li> <li>taking accountability and responsibility for self and others in achieving work outcomes</li> </ul>
Learning	<ul style="list-style-type: none"> <li>keeping up-to-date with current industry-accepted database, web and programming products</li> <li>participating in learning and development opportunities</li> </ul>
Technology	<ul style="list-style-type: none"> <li>coordinating implementation of technology needs</li> <li>assessing the technological capability of various products against architecture requirements and making recommendations on the best IT solution</li> <li>examining current and future ICT capability against a client's future requirements and modelling preferred systems solutions</li> </ul>

## Packaging Rules

**Total number of units = 20**

**9 core units *plus***

**11 elective units**

The elective units consist of:

- up to 11 from the elective units listed below
- up to 4 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICADBS502A Design a database

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT502A Develop detailed component specifications from project specifications

ICANWK514A Model preferred system solutions

ICAPRG425A Use structured query language

ICAPRG509A Build using rapid application development

ICASAD501A Model data objects

ICASAD502A Model data processes

ICTSUS6233A Integrate sustainability in ICT planning and design projects

### Elective units

ICADBS504A Integrate database with a website

ICAICT509A Gather data to identify business requirements

ICAICT511A Match IT needs with the strategic direction of the enterprise

ICAICT514A Identify and manage the implementation of current industry-specific technologies

ICAPMG501A Manage IT projects

ICAPMG606A Manage IT project quality

ICAPRG501A Apply advanced object-oriented language skills

ICAPRG503A Debug and monitor applications

ICAPRG504A Deploy an application to a production environment

ICAPRG505A Build advanced user interface

ICAPRG507A Implement security for applications

ICAPRG511A Monitor and support data conversion to new IT system

ICAPRG514A Prepare for software development using rapid application development

ICAPRG515A Review developed software

ICAPRG523A Apply advanced programming skills in another language

ICASAD506A Produce a feasibility report

ICASAS502A Establish and maintain client user liaison

ICASAS505A Review and update disaster recovery and contingency plans

ICAWEB502A Create dynamic web pages

ICTTEN5204A Produce technical solutions from business specifications

# ICA50611 Diploma of Website Development

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to design, build and manage websites as an independent web developer or as part of a team.

### Job roles

Possible job titles relevant to this qualification include:

- web developer
- web development manager
- web programmer
- website manager
- webmaster
- web administrator
- internet developer.

## Pathways Information

### Pathways into the qualification

- after achieving ICA40311 Certificate IV in Web-Based Technologies, or other relevant qualifications or units equivalent to the core of ICA40311.

OR

- with demonstrated vocational experience in a range of work environments in a website development or management role, such as web developer, web programmer, web manager or equivalent.

### Pathways from the qualification

ICA11 Advanced Diploma or Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

*The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.*

<b>Employability skill</b>	<b>Industry/enterprise requirements for this qualification</b>
Communication	<ul style="list-style-type: none"> <li>communicating concepts and solutions for complex issues to colleagues and clients</li> <li>applying plain English to written documents and reports</li> <li>writing complex reports for business requiring depth of analysis and evaluation of information</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>coordinating groups and teams</li> <li>participating in teams concerned with planning and evaluation functions</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>analysing and planning approaches to technical problems or management requirements</li> <li>developing and implementing risk management plans</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>transferring and applying theoretical concepts and technical or creative skills to a range of situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>planning and documenting a process to design, build and test a dynamic website so that it meets technical requirements and web development standards</li> <li>using project planning skills in relation to project scope, time, cost, quality, communications and risk management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>taking personal responsibility and demonstrating autonomy in performing complex technical operations or organising others</li> </ul>
Learning	<ul style="list-style-type: none"> <li>undertaking awareness training to inform relevant stakeholders</li> </ul>
Technology	<ul style="list-style-type: none"> <li>identifying technology needs</li> <li>sourcing, purchasing, installing, configuring and testing system components, including software and hardware</li> </ul>

## Packaging Rules

**Total number of units = 20**

**8 core units *plus***

**12 elective units**

The elective units consist of:

- up to 12 from the elective units listed below
- up to 4 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBOHS509A Ensure a safe workplace

ICADBS504A Integrate database with a website

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT515A Verify client business requirements

ICAWEB501A Build a dynamic website

ICAWEB502A Create dynamic web pages

ICAWEB503A Create web-based programs

ICAWEB516A Research and apply emerging web technology trends

### Elective units

BSBEBU501A Investigate and design e-business solutions

BSBSUS301A Implement and monitor environmentally sustainable work practices

ICADBS412A Build a database

ICADBS502A Design a database

ICAICT406A Build a graphical user interface

ICAICT503A Validate quality and completeness of system design specifications

ICAICT509A Gather data to identify business requirements

ICAICT511A Match IT needs with the strategic direction of the enterprise

ICAICT514A Identify and manage the implementation of current industry-specific technologies

ICANWK406A Install, configure and test network security

ICANWK514A Model preferred system solutions

ICAPMG501A Manage IT projects

ICAPRG406A Apply introductory object-oriented language skills

ICAPRG413A Use a library or pre-existing components

ICAPRG415A Apply skills in object-oriented design

ICAPRG418A Apply intermediate programming skills in another language

ICAPRG425A Use structured query language

ICAPRG501A Apply advanced object-oriented language skills

ICAPRG503A Debug and monitor applications

ICAPRG504A Deploy an application to a production environment

ICAPRG505A Build advanced user interface

ICAPRG506A Design application architecture  
ICAPRG507A Implement security for applications  
ICAPRG509A Build using rapid application development  
ICAPRG512A Prepare for the build phase of an IT system  
ICAPRG513A Coordinate the build phase of an IT system  
ICAPRG514A Prepare for software development using rapid application development  
ICAPRG515A Review developed software  
ICAPRG523A Apply advanced programming skills in another language  
ICAPRG527A Apply intermediate object-oriented language skills  
ICAPRG601A Develop advanced mobile multi-touch applications  
ICASAD501A Model data objects  
ICASAD502A Model data processes  
ICASAD506A Produce a feasibility report  
ICASAS503A Perform systems tests  
ICASAS504A Develop and conduct client acceptance test  
ICASAS505A Review and update disaster recovery and contingency plans  
ICAWEB504A Build a document using eXtensible markup language  
ICAWEB505A Develop complex web page layouts  
ICAWEB506A Develop complex cascading style sheets  
ICAWEB508A Develop website information architecture  
ICAWEB509A Use site server tools for transaction management  
ICTTEN5204A Produce technical solutions from business specifications

### Selecting elective units for different outcomes

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

#### *Web administration*

Core units plus:

- ICASAS504A Develop and conduct client acceptance test
- ICAWEB508A Develop website information architecture
- ICASAS503A Perform systems tests
- ICASAS505A Review and update disaster recovery and contingency plans
- ICAWEB509A Use site server tools for transaction management
- ICAICT503A Validate quality and completeness of system design specifications

#### **Web design**

Core units plus:

- ICAWEB504A Build a document using eXtensible markup language
- ICAWEB506A Develop complex cascading style sheets
- ICAWEB505A Develop complex web page layouts

## Web programming

Core units plus:

- ICAPRG501A Apply advanced object-oriented language skills
- ICAPRG523A Apply advanced programming skills in another language
- ICAPRG527A Apply intermediate object-oriented language skills
- ICAPRG418A Apply intermediate programming skills in another language
- ICAPRG406A Apply introductory object-oriented language skills
- ICAPRG415A Apply skills in object-oriented design
- ICAICT406A Build a graphical user interface

# ICA50711 Diploma of Software Development

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in programming and software development.

A person with this qualification would create new software products to meet an initial project brief or customise existing software products to meet customer needs.

### Job roles

Possible job titles relevant to this qualification include:

- analyst programmer support
- assistant programming developer
- assistant software applications programmer
- assistant software developer
- database support programmer
- web support programmer.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA40511 Certificate IV in Programming, or other relevant qualifications or units equivalent to the core of ICA40511.

OR

- with demonstrated vocational experience in a range of programming-related work environments in software programming, application programming, web development or similar.

### Pathways from the qualification

ICA11 Advanced Diploma or Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• communicating clear concepts and solutions for complex issues to colleagues and clients</li> <li>• using plain English, literacy and communication skills in relation to analysis, evaluation and presentation of information</li> <li>• writing and presenting complex technical reports with supporting documentation for business</li> <li>• analysing and evaluating information</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• coordinating groups and teams</li> <li>• delegating roles and responsibilities to team members for the implementation of project plans</li> <li>• participating in teams concerned with planning and evaluation functions</li> </ul>
Problem solving	<ul style="list-style-type: none"> <li>• analysing and planning approaches to technical problems or management requirements</li> <li>• determining the system design audit technique or methodology that will be followed</li> <li>• using a debugger to detect logical and coding errors</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• transferring and applying theoretical concepts and technical or creative skills to a range of situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• using project planning skills in relation to project scope, time, cost, quality, communications and risk management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking personal responsibility and autonomy in performing complex technical operations or organising others</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• extending own skills and knowledge of software development tools and applications and the goods and services provided</li> <li>• providing learning and development opportunities for project team members</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• identifying technology needs</li> <li>• sourcing, purchasing, installing, configuring and testing software components, including hardware</li> </ul>

## Packaging Rules

**Total number of units = 16**

**10 core units *plus***

**6 elective units**

The elective units consist of:

- up to 6 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAPRG418A Apply intermediate programming skills in another language

ICAPRG501A Apply advanced object-oriented language skills

ICAPRG502A Manage a project using software management tools

ICAPRG503A Debug and monitor applications

ICAPRG504A Deploy an application to a production environment

ICAPRG520A Validate an application design against specifications

ICAPRG523A Apply advanced programming skills in another language

ICAPRG527A Apply intermediate object-oriented language skills

ICAPRG529A Apply testing techniques for software development

### Elective units

ICAICT403A Apply software development methodologies

ICAICT503A Validate quality and completeness of system design specifications

ICAICT509A Gather data to identify business requirements

ICAICT511A Match IT needs with the strategic direction of the enterprise

ICAICT514A Identify and manage the implementation of current industry-specific technologies

ICANWK514A Model preferred system solutions

ICAPMG501A Manage IT projects

ICAPRG505A Build advanced user interface

ICAPRG506A Design application architecture

ICAPRG507A Implement security for applications

ICAPRG508A Create mashups

ICAPRG509A Build using rapid application development

ICAPRG510A Maintain custom software

ICAPRG512A Prepare for the build phase of an IT system

ICAPRG513A Coordinate the build phase of an IT system

ICAPRG514A Prepare for software development using rapid application development

ICAPRG515A Review developed software

ICAPRG601A Develop advanced mobile multi-touch applications

ICAPRG603A Create cloud computing services

ICASAD501A Model data objects  
ICASAD502A Model data processes  
ICASAD506A Produce a feasibility report  
ICASAS502A Establish and maintain client user liaison

### **Selecting elective units for different outcomes**

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

#### ***Systems design***

Core units plus:

- ICAICT403A Apply software development methodologies
- ICAICT509A Gather data to identify business requirements
- ICAICT511A Match IT needs with the strategic direction of the enterprise
- ICANWK514A Model preferred system solutions

#### ***Programming***

Core units plus:

- ICAPRG505A Build advanced user interface
- ICAPRG506A Design application architecture
- ICAPRG507A Implement security for applications

# ICA50811 Diploma of Systems Analysis and Design

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to determine client business requirements and to support a project team in the analysis and redesign of systems to ensure they meet client needs.

### Job roles

Possible job titles relevant to this qualification include:

- applications architect
- business analyst
- systems analyst
- systems architect
- information technology analyst.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA40711 Certificate IV in Systems Analysis and Design, or other relevant qualifications or units equivalent to the core of ICA40711.

OR

- with demonstrated vocational experience in a range of work environments in senior information technology and/or systems roles, including analyst or design roles.

### Pathways from the qualification

ICA11 Advanced Diploma or Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• communicating concepts and solutions for complex issues to colleagues and clients</li> <li>• using plain English skills in relation to analysis, evaluation and presentation of information</li> <li>• writing and presenting complex technical briefs and reports</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• participating in teams concerned with planning and evaluation functions</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• analysing requirements and devising solutions to technical problems or management issues</li> <li>• holding discussions on quality issues with development staff and establishing agreed actions</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• conducting research to determine client business requirements</li> <li>• integrating sustainability in ICT planning and design projects</li> <li>• matching client IT requirements with the strategic direction of the enterprise</li> <li>• anticipating potential problems and devising solutions</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• managing information technology projects in relation to project scope, time, cost, quality, communications and risk management</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• managing own time and work priorities against project plan and schedule</li> <li>• taking responsibility and exercising autonomy in performing complex technical operations or organising others</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• extending own skills and knowledge of tools and software applications and the goods and services provided</li> <li>• devising and implementing client evaluation and feedback methodologies</li> <li>• providing learning and development opportunities for project team members</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• determining and administering technology needs</li> <li>• sourcing, purchasing, installing, configuring and testing system components, including software and hardware</li> </ul>

## Packaging Rules

**Total number of units = 21**

**9 core units *plus***

**12 elective units**

The elective units consist of:

- up to 12 from the elective units listed below
- up to 4 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICADBS502A Design a database

ICAICT401A Determine and confirm client business requirements

ICAICT403A Apply software development methodologies

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT502A Develop detailed component specifications from project specifications

ICAICT509A Gather data to identify business requirements

ICAICT511A Match IT needs with the strategic direction of the enterprise

ICTSUS6233A Integrate sustainability in ICT planning and design projects

ICTTEN5204A Produce technical solutions from business specifications

### Elective units

ICAICT510A Determine appropriate IT strategies and solutions

ICAICT512A Plan process re-engineering strategies for business

ICAICT514A Identify and manage the implementation of current industry-specific technologies

ICANWK514A Model preferred system solutions

ICAPMG501A Manage IT projects

ICAPRG418A Apply intermediate programming skills in another language

ICAPRG509A Build using rapid application development

ICAPRG514A Prepare for software development using rapid application development

ICAPRG515A Review developed software

ICAPRG518A Monitor the system pilot

ICAPRG524A Develop high-level object-oriented class specifications

ICAPRG527A Apply intermediate object-oriented language skills

ICASAD501A Model data objects

ICASAD502A Model data processes

ICASAS422A Scope implementation requirements

ICASAS502A Establish and maintain client user liaison

ICASAS505A Review and update disaster recovery and contingency plans

ICASAS506A Update IT system operational procedures

ICASAS507A Implement and evaluate systems for regulatory and standards compliance

ICASAS513A Develop detailed test plans

ICTTEN5024A Provide consultancy and technical support in the customer premises equipment sector

### **Selecting elective units for different outcomes**

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

#### *Analyst programmer*

Core units plus:

- ICAPRG418A Apply intermediate programming skills in another language
- ICAPRG527A Apply intermediate object-oriented language skills
- ICAPRG509A Build using rapid application development
- ICAPRG514A Prepare for software development using rapid application development
- ICAPRG524A Develop high-level object-oriented class specifications

#### *System designer*

Core units plus:

- ICANWK514A Model preferred system solutions
- ICASAD501A Model data objects
- ICASAD502A Model data processes

# ICA50911 Diploma of Digital Media Technologies

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in designing, developing and refining digital media technologies as an independent ICT specialist or as part of a team. It provides the opportunity to work in new and emerging digital media technology areas, such as online, and interactive design and development, and with tools and equipment, such as software, Web 2 tools, technologies and mobile devices.

### Job roles

Possible job titles relevant to this qualification include:

- digital media designer
- digital media developer
- digital media developer/engineer
- digital media authoring specialist
- digital media producer.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA40811 Certificate IV in Digital Media Technologies, or other relevant qualifications or units equivalent to the core of ICA40811.

OR

- with demonstrated vocational experience in a range of work environments, such as digital media, games development, animation, graphics design or similar roles.

### Pathways from the qualification

ICA60111 Advanced Diploma of Information Technology or other ICA11 Advanced Diploma or Vocational Graduate qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• communicating concepts and solutions for complex issues to colleagues and clients</li> <li>• using plain English, literacy and communication skills in relation to analysis, evaluation and presentation of information</li> <li>• researching emerging digital media technology trends</li> <li>• generating and presenting ideas and concepts</li> <li>• writing and presenting complex technical reports, with supporting documentation</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• briefing design team members and allocating work roles to facilitate the orderliness and timeliness of the design process</li> <li>• participating in teams concerned with planning and evaluating the production of digital media products</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• making adjustments or recommendations to enhance the design according to the brief and in consultation with the client</li> <li>• transferring and applying theoretical concepts and technical or creative skills to a range of situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• designing the production cycle and project plan for a digital media product</li> <li>• using project planning skills in relation to scope, time, cost, quality, communications and risk management</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• ensuring projects meet client specifications</li> <li>• resolving technical problems by re-designing or amending the brief in consultation with the client</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking personal responsibility and autonomy in performing complex technical operations or organising others</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• investigating and becoming conversant with current privacy legislation</li> <li>• providing learning and development opportunities for the project team</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• determining technology needs, including sourcing, purchasing, installing, configuring and testing digital media components of both software and hardware</li> </ul>

## Packaging Rules

**Total number of units = 18**

**7 core units *plus***

**11 elective units**

The elective units consist of:

- up to 11 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBCRT501A Originate and develop concepts

BSBOHS509A Ensure a safe workplace

ICAGAM504A Manage interactive media production

ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

ICAICT419A Work effectively in the digital media industry

ICAICT515A Verify client business requirements

ICAPMG501A Manage IT projects

### Elective units

CUFDIG502A Design web environments

CUFDIG503A Design e-learning resources

CUFDIG504A Design games

CUFDIG507A Design digital simulations

CUFPOS201A Perform basic vision and sound editing

CUFPOS401A Edit screen content for fast turnaround

CUSSOU302A Record and mix a basic music demo

CUSSOU502A Produce sound recordings

CUVPHI504A Investigate and exploit innovative imaging options

ICADBS504A Integrate database with a website

ICADMT501A Incorporate and edit digital video

ICAGAM507A Develop intermediate 3-D software for games and interactive media

ICAGAM511A Manage testing of games and interactive media

ICAGAM512A Create and implement designs for a 3-D games environment

ICAGAM514A Design and create models for a 3-D and digital effects environment

ICAICT406A Build a graphical user interface

ICAICT511A Match IT needs with the strategic direction of the enterprise

ICAICT514A Identify and manage the implementation of current industry-specific technologies

ICAPRG409A Develop mobile applications

ICAPRG413A Use a library or pre-existing components

ICAPRG418A Apply intermediate programming skills in another language

ICAPRG425A Use structured query language

ICAPRG527A Apply intermediate object-oriented language skills  
ICASAS504A Develop and conduct client acceptance test  
ICAWEB429A Create a markup language document to specification  
ICAWEB501A Build a dynamic website  
ICAWEB516A Research and apply emerging web technology trends

# ICA60111 Advanced Diploma of Information Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides high level information and communications technology (ICT), process improvement and business skills and knowledge to enable an individual to be effective in senior ICT roles within organisations. The qualification builds on a base core of management competencies, with specialist and general elective choices to suit particular ICT and business needs, especially in the areas of knowledge management and systems development.

### Job roles

Possible job titles relevant to this qualification include:

- knowledge management analyst
- knowledge manager
- manager, IT infrastructure solutions
- business development manager
- software manager.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving any ICA11 Diploma qualification or other relevant Diploma.

OR

- with demonstrated vocational experience in a range of work environments in senior information technology or systems roles, including analyst or designer.

### Pathways from the qualification

ICA11 Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>articulating complex scenarios in a clear, concise manner relevant to all levels of an organisation</li> <li>researching, analysing and evaluating information from a range of sources</li> <li>writing and presenting complex reports for specific business purposes using a range of methodologies and media</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>managing group facilitation and presentation skills in relation to transferring and collecting information</li> <li>reviewing strategy with key stakeholders</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>developing controls and contingencies to alleviate security threats</li> <li>taking corrective action on system implementation breakdowns</li> <li>implementing a change management strategy for an organisation</li> <li>managing evolving complex scenarios of access and security</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>developing new strategies, criteria, applications, knowledge and procedures</li> <li>generating innovative ideas through the analysis of multiple sources of information and concepts</li> <li>anticipating and responding to client business needs</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>managing the execution of complex project plans</li> <li>planning for controls and contingencies when designing systems</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>taking accountability and responsibility for self and others in achieving work outcomes</li> <li>taking responsibility for own outputs in relation to broad quantity and quality parameters</li> </ul>
Learning	<ul style="list-style-type: none"> <li>keeping abreast of current industry-accepted practices, and hardware and software products, including broad knowledge of their security features and capabilities</li> <li>engaging in peer professional development activities</li> </ul>
Technology	<ul style="list-style-type: none"> <li>managing implementation of technology needs</li> <li>assessing the technological capability of various products against architecture requirements and deciding on the best IT solution</li> <li>estimating current and future capacity against a client's future</li> </ul>

	requirements and devising and implementing a business strategy to suit
--	--

## Packaging Rules

**Total number of units = 16**

**5 core units *plus***

**11 elective units**

The elective units consist of:

- 5 from one of the following specialist groups:
  - Group A Knowledge management
  - Group B Systems development
- of the remaining units:
  - up to 6 may be from the specialist elective groups below or from Group C general elective units below
  - up to 3 may be from elsewhere in ICA11 or any other Training Package or accredited course at Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

BSBWOR502B Ensure team effectiveness

ICAICT608A Interact with clients on a business level

ICAICT610A Manage copyright, ethics and privacy in an IT environment

ICAPMG609A Plan and direct complex IT projects

ICTSUS6233A Integrate sustainability in ICT planning and design projects

### Elective units

#### *Specialist elective units*

#### **Group A Knowledge management**

ICADBS501A Monitor and improve knowledge management system

ICADBS601A Build a data warehouse

ICADBS602A Develop a knowledge management strategy

ICAICT604A Identify and implement business innovation

ICAICT605A Implement a knowledge management strategy

#### **Group B Systems development**

ICAICT508A Evaluate vendor products and equipment

ICAICT602A Develop contracts and manage contracted performance

ICAPRG603A Create cloud computing services

ICASAD504A Implement quality assurance processes for business solutions

ICASAD505A Develop technical requirements for business solutions

ICASAS601A Implement change-management processes

#### *General elective units*

#### **Group C**

BSBINN601B Manage organisational change

BSBMGT608C Manage innovation and continuous improvement  
ICADBS603A Determine suitability of database functionality and scalability  
ICAICT601A Develop IT strategic and action plans  
ICAICT603A Manage the use of appropriate development methodologies  
ICAICT606A Develop communities of practice  
ICAICT609A Lead the evaluation and implementation of current industry-specific technologies  
ICANWK601A Design and implement a security system  
ICAPMG606A Manage IT project quality  
ICAPRG601A Develop advanced mobile multi-touch applications  
ICAPRG602A Manage the development of technical solutions from business specifications  
ICASAD602A Conduct knowledge audits

# ICA60211 Advanced Diploma of Network Security

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to plan, design, manage and monitor an enterprise information and communications technology (ICT) network as an independent ICT specialist or as part of a team responsible for advanced ICT network security systems. The qualification has a high-level ICT technical base with appropriate security units and the ability to specialise in a number of areas, including voice, wireless, network infrastructure and sustainability.

### Job roles

Possible job titles relevant to this qualification include:

- e-security specialist
- ICT security specialist
- IT security administrator
- IT security analyst
- IT security specialist
- systems/network administrator
- network security analyst
- network security specialist
- network security administrator
- senior network administrator
- systems security analyst.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA50411 Diploma of Information Technology Networking, or other relevant qualifications or units equivalent to the core of ICA50411.

OR

- with documented vocational experience in a range of work environments in senior network support roles, including administrator, operations analyst, technician, operations or support coordinator/technician.

### Pathways from the qualification

ICA11 Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• articulating complex security scenarios in a clear and concise manner relevant to all levels of the organisation</li> <li>• documenting information related to attacks, threats, risks and controls in a security plan</li> <li>• writing complex briefs and reports for business, requiring depth of analysis and evaluation of information</li> <li>• documenting and presenting recommendations for improvement and referring them to appropriate technical specialists</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• managing group facilitation and presentation skills in relation to transferring and collecting information</li> <li>• reviewing the security strategy, with security approved by key stakeholders</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• troubleshooting, developing controls and contingencies to alleviate security threats</li> <li>• taking corrective action on system implementation breakdowns</li> <li>• responding to evolving complex scenarios of security threats</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• anticipating risks and devising contingencies to address them</li> <li>• actively pursuing and implementing new and emerging improvements in ICT sustainability</li> <li>• managing project risks proactively</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• developing security plans</li> <li>• planning for controls and contingencies when designing an IT security framework</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• having accountability and responsibility for self and others in achieving workplace outcomes</li> <li>• taking responsibility for own and others' outputs in relation to broad quantity and quality parameters</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• keeping informed of current industry-accepted hardware and software products, including thorough knowledge of security features and capabilities</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• identifying technology needs</li> <li>• sourcing, purchasing, installing, configuring and testing components, including software and hardware</li> <li>• using technological capability assessment skills involving analysis, diagnosis and evaluation in a range of areas</li> </ul>

	<ul style="list-style-type: none"><li>• estimating current and future capacity requirements and evaluating against client's future requirements</li></ul>
--	---

## Packaging Rules

**Total number of units = 12**

**5 core units *plus***

**7 elective units**

The elective units consist of:

- up to 7 from the elective units listed below
- up to 2 from elsewhere in ICA11 at Diploma or Advanced Diploma level
- up to 2 from any other Training Package or accredited course at Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICANWK502A Implement secure encryption technologies

ICANWK509A Design and implement a security perimeter for ICT networks

ICANWK601A Design and implement a security system

ICANWK602A Plan, configure and test advanced server based security

ICTSUS6233A Integrate sustainability in ICT planning and design projects

### Elective units

BSBPMG508A Manage project risk

CPPSEC5003A Assess security risk management options

CPPSEC5004A Prepare security risk management plan

CPPSEC5005A Implement security risk management plan

CPPSEC5006A Determine strategy for the implementation of biometric technology

CPPSEC5007A Assess biometric system

CPPSEC3009A Prepare and present evidence in court

ICAICT609A Lead the evaluation and implementation of current industry-specific technologies

ICANWK603A Plan, configure and test advanced internetwork routing solutions

ICANWK604A Plan and configure advanced internetwork switching solutions

ICANWK605A Design and configure secure integrated wireless systems

ICANWK606A Implement voice applications over secure wireless networks

ICANWK607A Design and implement wireless network security

ICANWK608A Configure network devices for a secure network infrastructure

ICANWK609A Configure and manage intrusion prevention system on network sensors

ICANWK610A Design and build integrated VoIP networks

ICANWK611A Configure call processing network elements for secure VoIP networks

ICANWK612A Plan and manage troubleshooting advanced integrated IP networks

ICANWK613A Develop plans to manage structured troubleshooting process of enterprise networks

ICTSUS6234A Establish a business case for sustainability and competitive advantage in ICT projects

ICTSUS7235A Use ICT to improve sustainability outcomes

ICTSUS7236A Manage improvements in ICT sustainability

ICTTEN8195A Evaluate and apply network security  
ICTPMG8149A Evaluate and use telecommunications management networks  
ICTPMG8143A Manage a telecommunications project

### **Selecting elective units for different outcomes**

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

#### ***Network security***

Core units plus:

- ICANWK608A Configure network devices for a secure network infrastructure
- ICANWK609A Configure and manage intrusion prevention system on network sensors
- ICANWK612A Plan and manage troubleshooting advanced integrated IP networks

Four additional units from elective units as appropriate to the specific job role.

#### ***Network infrastructure***

Core units plus:

- ICANWK603A Plan, configure and test advanced internetwork routing solutions
- ICANWK604A Plan and configure advanced internetwork switching solutions
- ICANWK612A Plan and manage troubleshooting advanced integrated IP networks

Four additional units from elective units as appropriate to the specific job role.

#### ***Wireless networks***

Core units plus:

- ICANWK605A Design and configure secure integrated wireless systems
- ICANWK606A Implement voice applications over secure wireless networks
- ICANWK607A Design and implement wireless network security
- ICANWK612A Plan and manage troubleshooting advanced integrated IP networks

Three additional units from elective units as appropriate to the specific job role.

#### ***Voice networks***

Core units plus:

- ICANWK610A Design and build integrated VoIP networks

- ICANWK611A Configure call processing network elements for secure VoIP networks
- ICANWK612A Plan and manage troubleshooting advanced integrated IP networks

Four additional units from elective units as appropriate to the specific job role.

# ICA60311 Advanced Diploma of Information Technology Business Analysis

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to be competent in business analysis in an information and communications technology (ICT) environment, either as an independent ICT specialist or as leader of a team. Individuals who complete this qualification will be competent to analyse, identify and coordinate relevant ICT business solutions to meet given organisational goals.

## Job roles

Possible job titles relevant to this qualification include:

- business analyst
- business process analyst
- business systems analyst
- IT business manager
- IT manager
- project manager
- quality assurance manager, IT projects
- requirements analyst
- solution analyst.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving any ICA11 Diploma qualification or other relevant Diploma.

OR

- with demonstrated vocational experience in a range of work environments in senior information technology or systems roles, including analyst or designer.

### Pathways from the qualification

ICA11 Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>articulating complex scenarios in a clear, concise manner relevant to all levels of the organisation</li> <li>documenting information related to projects</li> <li>using report writing skills for business requiring depth in some areas, and analysis and evaluation of information in a defined range of areas</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>managing group facilitation and presentation skills in relation to transferring and collecting information</li> <li>reviewing strategy with security approved key stakeholders</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>developing controls and contingencies to alleviate risks</li> <li>taking corrective action on system implementation breakdowns</li> <li>using problem-solving skills for evolving complex scenarios</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>developing new criteria, applications, knowledge and procedures</li> <li>generating ideas at an abstract level through the analysis of information and concepts</li> <li>identifying and applying skill and knowledge areas to a wide variety of contexts</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>developing plans</li> <li>planning for controls and contingencies when designing an IT frameworks</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>having accountability and responsibility for self and others in achieving workplace outcomes</li> <li>taking responsibility for own outputs in relation to broad quantity and quality parameters</li> </ul>
Learning	<ul style="list-style-type: none"> <li>having knowledge of current industry-accepted hardware and software products</li> </ul>
Technology	<ul style="list-style-type: none"> <li>identifying technology needs</li> <li>sourcing, purchasing, installing, configuring and testing software components, including hardware</li> <li>using technological capability assessment skills involving analysis, diagnosis and evaluation</li> </ul>

## Packaging Rules

**Total number of units = 15**

**9 core units *plus***

**6 elective units**

The elective units consist of:

- up to 6 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package at Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICAICT608A Interact with clients on a business level

ICAICT610A Manage copyright, ethics and privacy in an IT environment

ICAPMG609A Plan and direct complex IT projects

ICASAD601A Perform IT-focused enterprise analysis

ICASAD603A Plan and monitor business analysis activities in an IT environment

ICASAD604A Manage and communicate IT solutions

ICASAD605A Elicit IT requirements

ICASAD606A Analyse stakeholder requirements

ICASAD607A Manage assessment and validation of IT solutions

### Elective units

BSBINN601B Manage organisational change

BSBMGT608C Manage innovation and continuous improvement

BSBWOR502B Ensure team effectiveness

ICAICT601A Develop IT strategic and action plans

ICAICT604A Identify and implement business innovation

ICAICT609A Lead the evaluation and implementation of current industry-specific technologies

ICANWK601A Design and implement a security system

ICAPMG601A Establish IT project governance

ICAPMG603A Manage IT project planning

ICAPMG606A Manage IT project quality

ICAPRG602A Manage the development of technical solutions from business specifications

ICASAD505A Develop technical requirements for business solutions

### Selecting elective units for different outcomes

The following example is designed to assist in the selection of appropriate electives for particular outcomes at this level, but is in no way prescriptive.

### *Business analysis*

Core units plus:

- ICAPMG603A Manage IT project planning
- ICAPRG602A Manage the development of technical solutions from business specifications
- ICASAD505A Develop technical requirements for business solutions

# ICA60411 Advanced Diploma of Information Technology Project Management

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to manage a range of information and communications technology (ICT) projects to meet customer requirements. Projects may cover a wide range of specialities, including software development, hardware procurement and implementation, network analysis and deployment, and web and/or system development.

### Job roles

Possible job titles relevant to this qualification include:

- e-business project manager
- ICT project manager
- IT business manager
- IT manager
- IT procurement manager
- IT program manager
- quality assurance manager, IT projects
- senior project manager.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving any ICA11 Diploma qualification or other relevant Diploma.

OR

- with demonstrated vocational experience in a range of work environments in senior information technology and systems roles, including analyst or designer.

### Pathways from the qualification

ICA11 Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• articulating complex project scenarios in a clear and concise manner relevant to all levels of the organisation</li> <li>• researching, analysing and evaluating information from a range of sources</li> <li>• documenting information related to a project plan</li> <li>• writing and presenting complex reports for specific purposes using a range of methodologies and media</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• managing group facilitation and presentation skills in relation to transferring and collecting information</li> <li>• reviewing and managing project strategy with key stakeholders</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• developing controls and contingencies to alleviate risks to the project</li> <li>• managing corrective action on system implementation breakdowns</li> <li>• managing a strategy for organisational change</li> <li>• planning for and managing potential and evolving threats</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• generating innovative ideas through the analysis of multiple sources of information and concepts</li> <li>• anticipating and responding to client business needs</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• developing project plans and managing IT project quality</li> <li>• planning for controls and contingencies when designing project plans</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• having accountability and responsibility for self and others in achieving work outcomes</li> <li>• taking responsibility for own outputs in relation to broad quantity and quality parameters</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• extending one's knowledge of current industry-accepted hardware and software products and services</li> <li>• participating in learning and development opportunities</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• managing implementation of technical solutions from business specifications</li> <li>• managing implementation of technology needs</li> <li>• managing IT project systems implementation</li> </ul>

## Packaging Rules

**Total number of units = 15**

**6 core units *plus***

**9 elective units**

The elective units consist of:

- up to 9 from the elective units listed below
- up to 3 from elsewhere in ICA11 or any other Training Package or accredited course at Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICAICT610A Manage copyright, ethics and privacy in an IT environment

ICAPMG601A Establish IT project governance

ICAPMG602A Manage IT project initiation

ICAPMG603A Manage IT project planning

ICAPMG604A Manage IT project delivery

ICAPMG605A Manage IT project closure

### Elective units

BSBINN601B Manage organisational change

ICAICT505A Determine acceptable developers for projects

ICAICT509A Gather data to identify business requirements

ICAICT603A Manage the use of appropriate development methodologies

ICAICT608A Interact with clients on a business level

ICAICT609A Lead the evaluation and implementation of current industry-specific technologies

ICAICT713A Manage IT services

ICAPMG606A Manage IT project quality

ICAPMG607A Manage and control IT project risks

ICAPMG608A Manage IT project systems implementation

ICAPRG602A Manage the development of technical solutions from business specifications

ICASAS505A Review and update disaster recovery and contingency plans

ICASAS515A Manage the testing process

### Selecting elective units for different outcomes

The following example is designed to assist in the selection of appropriate electives for particular outcomes at this level, but is in no way prescriptive.

#### *IT project management consultant*

Core units plus:

- ICAPMG606A Manage IT project quality
- ICAPMG607A Manage and control IT project risks
- ICAPMG608A Manage IT project systems implementation
- ICAPRG602A Manage the development of technical solutions from business specifications

# ICA60511 Advanced Diploma of Computer Systems Technology

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to coordinate and administer, as an independent information and communications technology (ICT) specialist or as part of a team, the installation, commissioning and ongoing maintenance of a range of networks, enterprise servers and systems, including internetworking, security and e-business solutions.

### Job roles

Possible job titles relevant to this qualification include:

- network administrator or coordinator
- network engineer
- enterprise systems administrator
- systems developer
- IT administrator or coordinator
- IT operations administrator or coordinator
- network services administrator or coordinator
- administrator or coordinator network support
- network operations analyst
- administrator or coordinator network security
- administrator or coordinator network e-business.

## Pathways Information

### Pathways into the qualification

Preferred pathways for candidates considering this qualification include:

- after achieving ICA41011 Certificate IV in Computer Systems Technology, or other relevant qualifications or units equivalent to the core of ICA41011.

OR

- with demonstrated vocational experience in a range of work environments in senior network support roles, including administrator, operations analyst, technician, operations or support coordinator/technician.

### Pathways from the qualification

ICA11 Vocational Graduate Certificate qualifications or other higher education sector qualifications.

## Licensing/Regulatory Information

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## Entry Requirements

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• articulating complex scenarios in a clear, concise manner relevant to all levels of an organisation</li> <li>• writing and presenting complex reports for specific purposes using a range of methodologies and media</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• consulting with work team to review proposed changes against current and future business requirements</li> <li>• establishing and improving work teams in an IT environment</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• analysing and solving network problems related to the installation of hardware, software and networks</li> <li>• anticipating possible major problems and responding with appropriate contingency recovery plans</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• developing new criteria and procedures for performing current practices</li> <li>• identifying, analysing and evaluating information from a variety of sources</li> <li>• anticipating and responding to client business needs</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• creating project plans to guide the development of systems methodologies</li> <li>• preparing feasibility reports that take into account project scope, time, cost, quality, communications and risk management</li> <li>• planning and designing an intranet</li> <li>• directing and managing the execution of complex IT projects</li> <li>• planning for controls and contingencies when designing systems</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• taking responsibility for own and others' output in relation to specified quality standards</li> <li>• working according to the Australian Computer Society Code of Ethics regarding security, legal, moral and ethical issues</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• keeping abreast of current industry-accepted practices, hardware and software products, including broad knowledge of security features and capabilities</li> <li>• engaging in peer professional development activities</li> <li>• devising and implementing client evaluation and feedback methodologies</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• managing and implementing software and hardware diagnostic</li> </ul>

	<p>tools, including multimedia contexts and automated testing environments</p> <ul style="list-style-type: none"><li>• installing, configuring and administering complex IT networks</li></ul>
--	--

## Packaging Rules

**Total number of units = 18**

**12 core units *plus***

**6 elective units**

The elective units consist of:

- up to 6 from the elective units listed below
- up to 3 from elsewhere in ICA11 at Advanced Diploma level
- up to 3 from any other Training Package or accredited course at Diploma or Advanced Diploma level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### Core units

ICANWK506A Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network

ICANWK507A Install, operate and troubleshoot medium enterprise routers

ICANWK508A Install, operate and troubleshoot medium enterprise switches

ICANWK509A Design and implement a security perimeter for ICT networks

ICANWK529A Install and manage complex ICT networks

ICANWK602A Plan, configure and test advanced server based security

ICANWK607A Design and implement wireless network security

ICAPMG608A Manage IT project systems implementation

ICAPMG609A Plan and direct complex IT projects

ICAPRG527A Apply intermediate object-oriented language skills

ICAWEB501A Build a dynamic website

ICAWEB502A Create dynamic web pages

### Elective units

ICADBS504A Integrate database with a website

ICAICT502A Develop detailed component specifications from project specifications

ICAICT604A Identify and implement business innovation

ICAICT609A Lead the evaluation and implementation of current industry-specific technologies

ICANWK502A Implement secure encryption technologies

ICANWK503A Install and maintain valid authentication processes

ICANWK504A Design and implement an integrated server solution

ICANWK505A Design, build and test a network server

ICANWK524A Install and configure network access storage devices

ICANWK525A Configure an enterprise virtual computing environment

ICANWK526A Install an enterprise virtual computing environment

ICANWK527A Manage an enterprise virtual computing environment

ICANWK603A Plan, configure and test advanced internetwork routing solutions

ICANWK605A Design and configure secure integrated wireless systems

ICANWK610A Design and build integrated VoIP networks

ICANWK611A Configure call processing network elements for secure VoIP networks  
ICANWK612A Plan and manage troubleshooting advanced integrated IP networks  
ICANWK613A Develop plans to manage structured troubleshooting process of enterprise networks  
ICAPRG505A Build advanced user interface  
ICAPRG601A Develop advanced mobile multi-touch applications  
ICAPRG602A Manage the development of technical solutions from business specifications  
ICASAS517A Use network tools

ICAWEB505A Develop complex web page layouts

## ICA70111 Vocational Graduate Certificate in Information Technology and Strategic Management

### Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

This qualification provides skills and knowledge for individuals to lead the analysis, implementation and management of emerging and converging information and communication technologies as they are integrated into the business process to support organisational strategic goals.

### Job roles

Possible job titles relevant to this qualification include:

- information systems manager
- information technology director
- chief information officer
- senior infrastructure delivery manager
- information technology manager
- service delivery manager.

## **Pathways Information**

### **Pathways into the qualification**

Preferred pathways for candidates considering this qualification include:

- after achieving any ICA11 Advanced Diploma or other relevant Advanced Diploma.

OR

- with demonstrated vocational experience in a range of work environments in senior information technology and systems roles, including analyst or designer.

### **Pathways from the qualification**

Other ICA11 Vocational Graduate Certificate qualification or other higher education sector qualifications.

## **Licensing/Regulatory Information**

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## **Entry Requirements**

There are no entry requirements for this qualification.

## Employability Skills Summary

*The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.*

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• writing and presenting high-level strategic and business reports</li> <li>• determining options in discussion with customers to rectify faults</li> <li>• making a complete check of installation against installation plans</li> <li>• reading, interpreting and using equipment or system manuals and specifications and relevant enterprise policy and documentation</li> <li>• conveying information to clients, colleagues and other site personnel</li> <li>• providing feedback to customers on ICT service and equipment</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• assigning roles to team members and leading teams</li> <li>• determining and directing team tasks and goals</li> <li>• recognising and responding positively to conflict within a team</li> <li>• facilitating team members to work with clients</li> <li>• cultivating and enhancing partnerships and relationships with industry</li> <li>• liaising with clients, employer, supervisors, work associates, team members and other contractors</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• ranking causes of problems, working from system-wide impacts to specific impacts</li> <li>• facilitating resolution of diagnosed network security problems to secure the network</li> <li>• developing strategies to overcome identified barriers to installation within time and budget restrictions</li> <li>• directing adjustment and rectification of faults ensuring optimal system operation</li> <li>• determining cable routes, taking into account building services, safety, industry codes and practices, and customer requirements</li> <li>• following up promptly on difficulties and known problem areas</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• prioritising urgent requests and acting according to organisational guidelines</li> <li>• identifying barriers to installation and developing strategies to overcome them within time and budget restrictions</li> </ul>

	<ul style="list-style-type: none"> <li>• adapting plan to suit specific features of site</li> <li>• managing issues and providing solutions within established guidelines</li> <li>• interacting with enterprise personnel, customers and other contractors keeping a customer focus and considering customer needs</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• setting realistic short and long-term career objectives</li> <li>• planning and monitoring projects to meet key dates and milestones</li> <li>• endorsing a business plan and directing research for an ICT innovation</li> <li>• prioritising work according to organisational guidelines</li> <li>• executing a test of network security arrangements</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• complying with all related OHS requirements and work practices</li> <li>• developing installation plans to ensure minimal disruption to the workplace</li> <li>• relating own role to the industry and establishing own work schedule</li> <li>• devising strategies to present a professional image to customers</li> <li>• interpreting and applying relevant regulations and standards</li> </ul>
Learning	<ul style="list-style-type: none"> <li>• relating current or intended role to career objectives in a proactive manner</li> <li>• giving and receiving feedback to meeting team and organisational goals</li> <li>• making clients aware of opportunities that exist for system upgrades, additional services and training</li> <li>• seeking assistance from team members when necessary</li> <li>• providing suitable training and assessment opportunities for work team members</li> <li>• providing training to customers on system, product, product features and facilities</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• ensuring correct and safe use of tools and equipment and adjustments to manufacturer specifications</li> <li>• facilitating convergence of many integrated and emerging technologies</li> <li>• managing the testing and measuring of broadband network infrastructure</li> <li>• directing the procurement, installation and operation of telecommunications equipment and products</li> <li>• directing relevant acceptance testing and analysing results against specified performance criteria</li> </ul>

## Packaging Rules

**Total number of units = 4**

**1 core units *plus***

**3 elective units**

The elective units consist of:

- up to 3 from the elective units listed below
- up to 1 from elsewhere in ICA11 or any other Training Package or accredited course at Vocational Graduate Certificate level or above.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### **Core units**

ICAICT709A Facilitate business analysis

### **Elective units**

BSBREL701A Develop and cultivate collaborative partnerships and relationships

ICAICT701A Lead research into identifying new marketplace opportunities

ICAICT702A Direct ICT services

ICAICT703A Endorse business plan components for a new initiative

ICAICT704A Direct ICT in a supply chain

ICAICT705A Direct ICT procurement

ICAICT706A Direct outsourced ICT services

ICAICT707A Direct research and business response to new ICT technology

ICAICT708A Direct the development of a knowledge management strategy for a business

ICAICT710A Synchronise IT projects

ICAICT711A Manage an information architecture project

ICAICT712A Develop a business intelligence framework

ICAICT713A Manage IT services

ICASUS701A Plan and manage virtualisation for IT sustainability

ICASUS702A Conduct a business case study for integrating sustainability in IT planning and design projects

ICTSUS7235A Use ICT to improve sustainability outcomes

ICTSUS7236A Manage improvements in ICT sustainability

# ICA70211 Vocational Graduate Certificate in Information Technology Sustainability

## Modification History

Release	Comments
Release 1	This Qualification first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

This qualification provides the skills and knowledge for an individual to plan and manage the implementation of sustainability strategies for information and communications technology (ICT) networks and systems, including conducting applied research, developing organisational policy, and devising strategies to meet sustainability targets.

### Job roles

Possible job titles relevant to this qualification include:

- IT sustainability systems consultant
- IT sustainability solutions architect
- IT sustainability project manager
- IT sustainability technology specialist
- IT sustainability business manager
- IT sustainability requirements manager.

## **Pathways Information**

### **Pathways into the qualification**

Preferred pathways for candidates considering this qualification include:

- after achieving any ICA11 or ICT10 Diploma or Advanced Diploma.

OR

- with demonstrated vocational experience in a range of work environments in senior network engineering or ICT roles

### **Pathways from the qualification**

Other ICA11 Vocational Graduate Certificate qualification OR other higher education sector qualifications.

## **Licensing/Regulatory Information**

There is no link between this qualification and licensing, legislative or regulatory requirements. However users should confirm requirements with the relevant federal, state or territory authority. There may be some alignment with industry standard certification competencies.

## **Entry Requirements**

There are no entry requirements for this qualification.

## Employability Skills Summary

The following table contains a summary of the employability skills required by industry for this qualification. The employability skills facets described here are broad industry requirements that may vary depending on qualification packaging options.

Employability skill	Industry/enterprise requirements for this qualification
Communication	<ul style="list-style-type: none"> <li>• conducting research for a business case study to integrate sustainability in ICT projects</li> <li>• discussing options with stakeholders and negotiating for best practice and solutions for the enterprise</li> <li>• producing cost-benefit analyses, business case studies, management plans, executive summaries and justifications for implementing sustainability solutions</li> <li>• conducting applied research studies, writing and presenting high-level reports</li> <li>• reading, interpreting and using equipment or system manuals and specifications and relevant enterprise policy and documentation</li> <li>• interpreting high-level technical information and presenting to general audiences</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• assigning roles to team members and leading teams</li> <li>• directing and managing team activities and goals</li> <li>• recognising and resolving conflict within team</li> <li>• facilitating team members to work with clients to install equipment</li> <li>• liaising with clients, employer, supervisors, work associates, team members and other contractors</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• ranking causes of problems, working from system-wide impacts to specific impacts</li> <li>• managing resolution of diagnosed network problems before and after implementation of sustainability solutions</li> <li>• generating solutions regarding compatibility and interoperability between proposed integrated system and existing system</li> <li>• devising solutions for better grade of service and reliability of new system</li> <li>• managing operations to obtain best solutions for allocated budget</li> <li>• responding promptly to difficulties and known problem areas, as they emerge</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• leading the early adoption of new initiatives and technology</li> <li>• prioritising urgent requests and acting according to organisational guidelines</li> </ul>

	<ul style="list-style-type: none"> <li>identifying barriers to integrating sustainability in ICT planning and design projects and developing strategies to overcome them within time and budget restrictions</li> <li>adapting and modifying operating strategies to suit specific features of site</li> <li>managing issues and providing solutions within established guidelines</li> <li>interacting with enterprise personnel, customers and other contractors, keeping a customer focus and considering customer needs</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>planning and monitoring projects to meet key dates and milestones</li> <li>planning the installation of virtualised systems, taking into account technical, scheduling and financial considerations</li> <li>interpreting design and relating to site characteristics</li> <li>prioritising and scheduling work according to organisational guidelines</li> <li>running a test of network security arrangements</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>assigning realistic short and long-term career objectives</li> <li>prioritising and scheduling work to be completed</li> <li>complying with all related OHS requirements and work practices</li> <li>developing implementation plans to ensure minimal disruption to the workplace</li> <li>relating own role to the industry and establishing own work schedule</li> <li>devising strategies to present a professional image to customers</li> <li>interpreting and applying relevant regulations and standards</li> </ul>
Learning	<ul style="list-style-type: none"> <li>relating current or intended role to career objectives in a positive manner</li> <li>giving and receiving feedback to assist in meeting team and organisational goals</li> <li>making clients aware of opportunities that exist for system upgrades, additional services and training</li> <li>seeking assistance from team members when necessary</li> <li>providing suitable training and assessment opportunities for work team members</li> <li>providing training to customers on virtualised system features and facilities</li> </ul>
Technology	<ul style="list-style-type: none"> <li>facilitating convergence of many integrated and emerging technologies</li> <li>modifying the use of high end machines to optimise operations and performance</li> </ul>

	<ul style="list-style-type: none"><li>• evaluating and implementing virtual machines with minimal disruptions</li><li>• directing testing, and measuring network performance of ICT sustainability</li><li>• using software evaluation and audit tools to improve ICT sustainability</li><li>• directing relevant acceptance tests and analysing results against specified performance criteria</li></ul>
--	---

## Packaging Rules

**Total number of units = 4**

**1 core unit *plus***

**3 elective units**

The elective units consist of:

- up to 3 from the elective units listed below
- up to 1 from elsewhere in ICA11 at Vocational Graduate Certificate level or above
- up to 1 from any other Training Package or accredited course at Vocational Graduate Certificate level.

The elective units chosen must be relevant to the work outcome and meet local industry needs.

### **Core units**

ICASUS702A Conduct a business case study for integrating sustainability in IT planning and design projects

### **Elective units**

BSBREL701A Develop and cultivate collaborative partnerships and relationships

ICAICT706A Direct outsourced ICT services

ICAICT707A Direct research and business response to new ICT technology

ICAICT709A Facilitate business analysis

ICAICT710A Synchronise IT projects

ICASUS701A Plan and manage virtualisation for IT sustainability

ICASUS703A Research strategies using SAP solutions for sustainable economic and environmental outcomes

ICTSUS7235A Use ICT to improve sustainability outcomes

ICTSUS7236A Manage improvements in ICT sustainability

ICTSUS8237A Lead applied research in ICT sustainability

ICTSUS8238A Conduct and manage a life cycle assessment for sustainability

### **Selecting elective units for different outcomes**

The following examples are designed to assist in the selection of appropriate electives for particular outcomes at this level, but are in no way prescriptive.

#### ***IT sustainability systems consultant***

Core units plus:

- ICTSUS7235A Use ICT to improve sustainability outcomes
- ICAICT709A Facilitate business analysis

Plus one additional unit from elective units as appropriate to the specific job role.

### ***IT sustainability solutions architect***

Core units plus:

- ICAICT706A Direct outsourced ICT services
- ICAICT707A Direct research and business response to new ICT technology

Plus one additional unit from elective units as appropriate to the specific job role.

### ***IT sustainability project manager***

Core units plus:

- ICTSUS8238A Conduct and manage a life cycle assessment for sustainability
- ICAICT706A Direct outsourced ICT services
- ICAICT710A Synchronise IT projects
- BSBREL701A Develop and cultivate collaborative partnerships and relationships

### ***IT sustainability technology specialist***

Core units plus:

- ICTSUS7235A Use ICT to improve sustainability outcomes
- ICTSUS8237A Lead applied research in ICT sustainability
- ICTSUS8238A Conduct and manage a life cycle assessment for sustainability

### ***IT Sustainability Business Manager***

Core units plus:

- ICAICT706A Direct outsourced ICT services
- ICAICT707A Direct research and business response to new ICT technology
- ICAICT709A Facilitate business analysis

### ***IT Sustainability Requirements Manager***

Core units plus:

- ICTSUS8237A Lead applied research in ICT sustainability
- ICTSUS8238A Conduct and manage a life cycle assessment for sustainability

Plus one additional unit from elective units as appropriate to the specific job role.

## ICASS00001 Application Development Specialist Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA50711 Diploma of Software Development.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICAPRG501A Apply advanced object-oriented language skills  
 ICAPRG505A Build advanced user interface  
 ICAPRG506A Design application architecture  
 ICAPRG507A Implement security for applications  
 ICAPRG523A Apply advanced programming skills in another language

#### Target Group

This skill set is for persons who are able to work as application programmers and software developers.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in working as a software development specialist.

# ICASS00002 Basic Application Development Programmer Skill Set

## Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

### Pathways Information

This skill set provides credit towards ICA40511 Certificate IV in Programming.

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

ICAPRG406A Apply introductory object-oriented language skills

ICAPRG413A Use a library or pre-existing components

ICAPRG414A Apply introductory programming skills in another language

ICAPRG418A Apply intermediate programming skill in another language

ICAPRG527A Apply intermediate object-oriented language skill

### Target Group

This skill set is for persons who are able to work as basic application programmers.

### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in working as a basic application programmer.

# ICASS00003 Basic Computer Hardware and System Troubleshooting Skill Set

## Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICAll Information and Communications Technology Training Package version 1.0</i>

## Description

### Pathways Information

This skill set provides credit towards ICA20111 Certificate II in Information, Digital Media and Technology.

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

BSBOHS201A Participate in OHS processes  
ICAICT201A Use computer operating system and hardware  
ICASAS201A Maintain inventories for equipment, software and documentation  
ICASAS205A Maintain IT system integrity  
ICASAS206A Detect and protect from spam and destructive software  
ICASAS207A Protect and secure information assets  
ICASAS208A Maintain IT equipment and consumables  
ICASAS209A Connect and use a home-based local wireless network

### Target Group

This skill set is for persons wanting to trouble shoot basic computer hardware and system problems, and work safely across a variety of industries.

## **Suggested words for Statement of Attainment**

These units of competency from ICA11 Information and Communications Technology and BSB07 Business Services Training Packages meet competency requirements for basic computer hardware and system troubleshooting.

## ICASS00004 Basic Web Development Specialist Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA30111 Certificate III in Information, Digital Media and Technology.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

BSBEBU401A Review and maintain a website

ICAWEB302A Build simple websites using commercial programs

ICAWEB403A Transfer content to a website using commercial packages

#### Target Group

This skill set is for persons wanting to develop and maintain a basic website.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology and BSB07 Business Services Training Packages meet competency requirements for skills in developing and maintaining a simple website.

## ICASS00005 Certified IT Network Enterprise, Security or Server Administrator Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA40411 Certificate IV in Information Technology Networking.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICANWK406A Install, configure and test network security  
ICANWK403A Manage network and data integrity

#### Target Group

This skill set is for persons who are able to work as certified IT enterprise, security or server administrators.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in administering security, servers or enterprise networks.

# ICASS00006 Certified Network Associate Technology Specialist Skill Set

## Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Description

### Pathways Information

This skill set provides credit towards ICA50411 Diploma of Information Technology Networking.

### Licensing/Regulatory Information

Not applicable.

### Skill Set Requirements

ICANWK529A Install and manage complex ICT networks

ICANWK506A Configure, verify and troubleshoot WAN links and IP services in a medium enterprise network

ICANWK507A Install, operate and troubleshoot medium enterprise routers

ICANWK508A Install, operate and troubleshoot medium enterprise switches

### Target Group

This skill set is for persons who are able to work as certified network associate technology specialists.

### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for associate level skills in networking.

## ICASS00007 Certified Network Professional Specialist - Voice Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA60211 Advanced Diploma of Network Security.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICANWK605A Design and configure secure integrated wireless systems

ICANWK606A Implement voice applications over secure wireless networks

ICANWK607A Design and implement wireless network security

#### Target Group

This skill set is for persons who are able to work as certified network professional specialists – voice.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in working as a network professional specialising in voice networks.

## ICASS00008 Certified Network Professional Specialist - Wireless Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA60211 Advanced Diploma of Network Security.

This skill set is for persons wanting to gain digital literacy skills in the use of a personal computer, software applications and digital devices.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for digital literacy.

## ICASS00019 Hardware Technician Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA30111 Certificate III in Information, Digital Media and Technology.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICAICT302A Install and optimise operating system software  
 ICAICT303A Connect internal hardware components  
 ICASAS307A Install, configure and secure a small office home office network  
 ICASAS301A Run standard diagnostic tests  
 ICASAS305A Provide IT advice to clients  
 ICASAS306A Maintain equipment and software

#### Target Group

This skill set is for persons who are able to work as hardware technicians, providing support in a range of ICT work areas and activities.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for support skills in hardware, software, operating systems and networks.

## ICASS00020 Internetworking Systems Coordinator-Administrator Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA60511 Advanced Diploma of Computer Systems Technology.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICANWK603A Plan, configure and test advanced internetwork routing solutions  
ICANWK605A Design and configure secure integrated wireless systems  
ICANWK610A Design and build integrated VoIP networks  
ICANWK611A Configure call processing network elements for secure VoIP networks  
ICANWK612A Plan and manage troubleshooting advanced integrated IP networks

#### Target Group

This skill set is for persons who are able to work as an internetworking systems administrator or coordinator.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in working as an internetworking coordinator or administrator.

## ICASS00021 Rich Interactive Content Specialist Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA30111 Certificate III in Information, Digital Media and Technology.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

CUFDIG304A Create visual design components

ICAGAM301A Apply simple modelling techniques

ICAGAM302A Design and apply simple textures to digital art

#### Target Group

This skill set is for persons who are able to work with interactive digital media content.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology and CUF07 Screen and Media Training Packages meet competency requirements for skills in interactive digital media.

## ICASS00022 System and Hardware Plus Technician Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA40211 Certificate IV in Information Technology Support.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

BSBSUS301A Implement and monitor environmentally sustainable work practices  
 ICASAS307A Install, configure and secure a small office home office network  
 ICAICT421A Connect, maintain and configure hardware components  
 ICASAS425A Configure and troubleshoot operating system software  
 ICASAS426A Locate and troubleshoot IT equipment, system and software faults  
 ICAICT401A Determine and confirm client business requirements

#### Target Group

This skill set is for persons who are able to work as a computer system and hardware technician.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology and BSB07 Business Services Training Packages meet competency requirements for support skills in working as a computer system and hardware technician.

## ICASS00023 System and Network Plus Technician Skill set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA40211 Certificate IV in Information Technology Support.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICASAS307A Install, configure and secure a small office home office network

ICANWK401A Install and manage a server

ICANWK404A Install, operate and troubleshoot a small enterprise branch network

ICANWK406A Install, configure and test network security

#### Target Group

This skill set is for persons who are able to work as a computer system and network support technician.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in working as a network technician.

## ICASS00024 Virtualisation Specialist Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA50411 Diploma of Information Technology Networking.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICANWK525A Configure an enterprise virtual computing environment

ICANWK526A Install an enterprise virtual computing environment

ICANWK527A Manage an enterprise virtual computing environment

#### Target Group

This skill set is for persons who are able to work in the area of hardware, software and system virtualisation.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in in developing hardware, software and system virtual networks.

## ICASS00025 Visual Communications Specialist Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA30111 Certificate III in Information, Digital Media and Technology.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

CUFDIG301A Prepare video assets  
CUFDIG304A Create visual design components  
ICAWEB303A Produce digital images for the web

#### Target Group

This skill set is for persons wanting to develop visual content for the web.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology and CUF07 Screen and Media Training Packages meet competency requirements for skills in developing visual components for websites.

## ICASS00026 Website Administration Specialist Skill Set

### Modification History

Release	Comments
Release 1	This Skill Set first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Description

#### Pathways Information

This skill set provides credit towards ICA40311 Certificate IV in Web-Based Technologies.

#### Licensing/Regulatory Information

Not applicable.

#### Skill Set Requirements

ICANWK409A Create scripts for networking  
ICAWEB404A Maintain website performance  
ICAWEB405A Monitor traffic and compile website traffic reports  
ICAWEB406A Create website testing procedures  
ICAWEB407A Conduct operational acceptance tests of websites  
ICAWEB408A Ensure basic website security

#### Target Group

This skill set is for persons who are able to work as website administrators.

#### Suggested words for Statement of Attainment

These units of competency from ICA11 Information and Communications Technology Training Package meet competency requirements for skills in working as a website administrator.

# ICADBS401A Identify physical database requirements

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify the physical requirements of a database, including a data dictionary and security and design specifications.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Application of the Unit

This unit applies to database administrators who are required to plan the building of a database.

It is necessary before designing a database to take into consideration a range of requirements, including current IT architecture and client requirements, the organisation's IT standards especially related to security, and the outcomes of the business-analysis process.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify database scope	<p>1.1 Review <i>requirements</i> of the user and current <i>system architecture</i></p> <p>1.2 Determine <i>database</i> size from requirements and technical specifications</p> <p>1.3 Document database and scope of project</p> <p>1.4 Evaluate several <i>database-management systems</i> against requirements and make appropriate selection</p>
2. Identify database requirements	<p>2.1 Review technical specifications for the database</p> <p>2.2 Identify database tables and relationships</p> <p>2.3 Identify database data dictionary, table attributes and keys</p> <p>2.4 Develop database reports based on <i>acceptance criteria</i> and requirements</p>
3. Identify security requirements	<p>3.1 Review <i>system</i>-security plan</p> <p>3.2 Clarify and confirm chosen database-management system and user security required for the database to ensure database security is aligned to security-system plan</p> <p>3.3 Identify, evaluate and record database performance, recovery and audit trail needs</p>
4. Seek client feedback and approval	<p>4.1 Present database scope, technical requirements and security documentation to user for feedback</p> <p>4.2 Review user feedback and adjust database documentation as required</p> <p>4.3 Present database documentation to user for final approval</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to review user requirements, system architecture and security plan
- communication skills to liaise with user
- literacy skills to:
  - produce database reports
  - review user feedback
- problem-solving skills to develop technical solutions
- technical skills to evaluate, identify and determine database requirements using database modelling.

### Required knowledge

- broad knowledge of:
  - database design
  - general features and capabilities of current industry-accepted hardware and software products
  - quality assurance practices
  - client business domain
  - current principles of databases
  - detailed technical knowledge of database requirements.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse client requirements</li> <li>• identify technical considerations affecting the physical design of a database</li> <li>• produce a security plan for the database.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• user-business requirements</li> <li>• technical documentation defining architecture platform and operating system specifications</li> <li>• database-supplier technical specifications and manuals</li> <li>• data samples</li> <li>• database package</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of the final database, specifying business rules, agreed budget and timeframe</li> <li>• evaluation of documentation, detailing: <ul style="list-style-type: none"> <li>• database directories</li> <li>• calculation of space requirements for tables</li> <li>• additional space requirements</li> <li>• design of node groups</li> <li>• security plan.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Requirements</b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b>User</b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<b>System architecture</b> may include:	<ul style="list-style-type: none"> <li>• configuration: <ul style="list-style-type: none"> <li>• large memory model</li> <li>• requests per second</li> <li>• small memory model</li> </ul> </li> <li>• database software: <ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft Structured Query Language (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase</li> </ul> </li> <li>• operating system: <ul style="list-style-type: none"> <li>• Novell NetWare</li> <li>• multi-user ability</li> <li>• Linux</li> <li>• Mac</li> <li>• Windows.</li> </ul> </li> </ul>
<b>Database</b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases.</li> </ul>
<b>Database-management</b>	<ul style="list-style-type: none"> <li>• distributed or centralised</li> </ul>

<i>systems</i> may include:	<ul style="list-style-type: none"><li>• online</li><li>• partitioned geographically</li><li>• thematically distributed.</li></ul>
<i>Acceptance criteria</i> may include:	<ul style="list-style-type: none"><li>• cost implications</li><li>• logistical considerations</li><li>• technical</li><li>• timeframe.</li></ul>
<i>System</i> may include:	<ul style="list-style-type: none"><li>• application</li><li>• business</li><li>• computers</li><li>• financial system</li><li>• information system</li><li>• management system</li><li>• network</li><li>• software.</li></ul>

## Unit Sector(s)

Database

## ICADBS402A Complete database backup and restore

### Modification History

Version	Comments
ICADBS402A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to back up and restore a database.

### Application of the Unit

This unit applies to experienced technical support personnel, such as help-desk supervisors, IT support technicians, database support technicians and user-support specialists who are responsible for maintaining a backup schedule for one or more databases, and may also need to restore backups to the live system.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Review database architecture to plan backup and recovery</p>	<p>1.1 Examine <i>architecture</i> of <i>database</i> file system</p> <p>1.2 Determine most appropriate methods for <i>backup</i> and recovery</p> <p>1.3 Identify and examine likely or possible risk and failure scenarios</p> <p>1.4 Prepare a backup maintenance schedule</p> <p>1.5 Prepare a contingency plan</p>
<p>2. Determine backup methods appropriate to database requirements</p>	<p>2.1 Evaluate range of backup and restoration methods based on organisational and security <i>standards</i> and on the assessment of likely or possible failure scenarios</p> <p>2.2 Complete full off-line backups according to organisational and security standards with minimal down time</p> <p>2.3 Complete online file backups as determined by organisational and security standards and with minimal down time</p> <p>2.4 Employ disk mirroring and redundant array of inexpensive disks (RAID) hard disk configurations to keep copies of files</p> <p>2.5 Arrange off-site copies of backup files</p>
<p>3. Establish recovery points and disaster-recovery procedures</p>	<p>3.1 Determine database recovery points based on the backup arrangements according to <i>organisational guidelines</i></p> <p>3.2 Test the restore process to ensure that the database can be restored to a given recovery point, with minimal down time</p> <p>3.3 Complete the restoration of the database to the point of failure, without loss of committed transactions</p>
<p>4. Create and deploy standby database</p>	<p>4.1 Create or set up a standby database to meet organisational guidelines</p> <p>4.2 Implement standby database to support critical business functions</p> <p>4.3 Prepare <i>documentation</i> for standby database</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - evaluate a range of backup and restoration methods
  - undertake non-routine work processes
- literacy skills to:
  - prepare documentation
  - read and interpret technical manuals
  - set benchmarks and identified scope
- planning and organisational skills to:
  - develop plans with prioritised tasks
  - minimise disruption to client
- problem-solving skills in non-routine work processes
- research skills for identifying, analysing and evaluating broad features of a particular business domain and best practice in backup and recovery strategies
- technical skills to:
  - run backup process
  - set backup schedule
  - test restore process.

### Required knowledge

- broad knowledge of:
  - diagnostic tools
  - structured query language (SQL)
  - principles of databases
  - tuning methodologies
- detailed knowledge of:
  - backup and recovery methods
  - database administration
  - database security
  - open file backup procedures and restore operations.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <p>determine the most appropriate methods for backup and recovery</p> <ul style="list-style-type: none"> <li>• implement backup and restore procedures with minimum disruption to the business, following contingency plan if necessary.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• documentation standards</li> <li>• backup and recovery policies</li> <li>• sites with a representative range of current industry standard software and diagnostic tools</li> <li>• database package with data</li> <li>• technical records</li> <li>• organisational guidelines</li> <li>• vendor documentation</li> <li>• server and networked personal computer on which to conduct backup and restore procedures</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate performing backup and restore procedures</li> <li>• review of candidate's documentation containing:             <ul style="list-style-type: none"> <li>• planning</li> <li>• backup schedule</li> <li>• contingency plan</li> </ul> </li> <li>• verbal or written questioning to assess candidate's knowledge of:             <ul style="list-style-type: none"> <li>• backup and restore techniques and procedures</li> <li>• risks and failure scenarios that are likely or possible.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate,</p>

	<p>and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Architecture</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• configuration:             <ul style="list-style-type: none"> <li>• large memory model</li> <li>• requests per second</li> <li>• small memory model</li> </ul> </li> <li>• database software:             <ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase</li> </ul> </li> <li>• operating system:             <ul style="list-style-type: none"> <li>• Linux</li> <li>• Mac</li> <li>• multi-user ability</li> <li>• Windows 2000 or above</li> <li>• Novell NetWare 5 or above.</li> </ul> </li> </ul>
<p><b><i>Database</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases.</li> </ul>
<p><b><i>Backup</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• DVD or CD backup</li> <li>• more comprehensive and complex backup facilities across the network or the internet</li> <li>• multiple tape units</li> <li>• single tape units.</li> </ul>
<p><b><i>Standards</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• organisational standards</li> <li>• project standards.</li> </ul>

<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"><li>• communication methods</li><li>• content of emails</li><li>• dispute resolution</li><li>• document procedures and templates</li><li>• downloading information and accessing particular websites</li><li>• financial control mechanisms</li><li>• opening mail with attachments</li><li>• personal use of emails and internet access</li><li>• virus risk.</li></ul>
<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"><li>• audit trails</li><li>• client training</li><li>• ISO, IEC and AS standards</li><li>• maintaining equipment inventory</li><li>• naming standards</li><li>• project management templates and report writing</li><li>• satisfaction reports</li><li>• version control.</li></ul>

## Unit Sector(s)

Database

## ICADBS403A Create basic databases

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design a database to meet a specification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Application of the Unit

This unit applies to database or web designers who need to create a simple database to store information for an online application using a simple entity relational database.

This unit should be used in conjunction with other substantiating units, such as ICAPRG425A Use structured query language for the deployment of a database.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse requirements for the database	1.1 Determine the information that the database is required to hold 1.2 Develop a written requirement report for the functionality of the database 1.3 Complete <b>documentation</b> and submit to <b>appropriate person</b> for approval
2. Use data modelling to design the database to suit requirements	2.1 Design an entity-relationship (ER) diagram to model the relationships between the entities and attributes the database will hold 2.2 Develop the primary and foreign keys to link the entities 2.3 Develop a data dictionary 2.4 Complete documentation and submit to appropriate person for approval
3. Create a database on a web or database server	3.1 Use the appropriate <b>language</b> on a web or database server to create one or more databases 3.2 Use the appropriate language on a web or database server to create tables 3.3 Populate the database fields
4. Test database and debug	4.1 Test the database on the web or database server 4.2 Ensure that the information represented matches the requirements

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse the requirements for the project
  - develop and design a database algorithm to match client requirements
- communication skills to:
  - liaise with the client
  - understand client requirements
- initiative and enterprise skills to:
  - create a database on a hosted service
  - research hosting requirements of the database
- literacy skills to:
  - create the necessary documentation to document code
  - write end user documentation
- planning and organisational skills to:
  - deliver a product that responds to client requirements
  - deliver the product by the due date
- problem-solving skills to:
  - deliver a robust solution to a specific database requirement
  - translate an ER diagram to a database.

### Required knowledge

- basic knowledge of open platforms, including browsers and databases
- creation of entities, attributes and populating fields using both software solutions and script based input
- data-modelling techniques to design a database
- database design, modelling and implementation
- internet operation related to web servers and clients
- naming conventions
- security restrictions on servers, incorporating some theoretical concepts
- best practice communication and accessibility for audiences with special needs.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• research client requirements for a database solution</li> <li>• design a database that meets client requirements</li> <li>• create a database on a web hosting service to meet client requirements by a due date.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• database</li> <li>• database-management system</li> <li>• internet</li> <li>• software for creating ER diagrams</li> <li>• software-development environment</li> <li>• server</li> <li>• web browsers</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to identify knowledge of database design and implementation</li> <li>• direct observation of database design and creation</li> <li>• review of a directed project with specified client requirements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project-management templates</li> <li>• report-writing protocols</li> <li>• version control.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Language</i></b> may include:	<ul style="list-style-type: none"> <li>• Access</li> <li>• Informix</li> <li>• Microsoft Structured Query Language (MS SQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Postgre Structured Query Language (Postgre SQL)</li> <li>• Sybase.</li> </ul>

## Unit Sector(s)

Database

# ICADBS404A Identify and resolve common database performance problems

## Modification History

Version	Comments
ICADBS404A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify and solve common database problems to improve performance.

## Application of the Unit

This unit applies to experienced technical support personnel, such as help-desk supervisors, database support technicians, IT support technicians, and user support specialists who are responsible for maintaining good performance from a database.

Resolving database issues can be complex and take considerable time. The core role in this competency is to take part in common database-performance problem solving.

This unit should be flexible enough to allow for the creation of specialised database programs that are poor in performance so that problem-solving processes can be applied.

There are many open-source database offerings that may provide a suitable code base from which to work.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Diagnose problems	<p>1.1 Determine appropriate database performance <i>diagnostic tool</i> to use based on organisational database requirements and vendor recommendations</p> <p>1.2 Run diagnostic tool to identify issues causing degradation of database <i>performance</i></p> <p>1.3 Determine and record where inappropriate use of database and temporary table spaces occur</p> <p>1.4 Carry out appropriate fixes based on diagnostic results</p>
2. Configure database	<p>2.1 Adopt a distributed files <i>architecture</i> to minimise input and output (I/O) contention</p> <p>2.2 Ensure that database backup procedures are appropriate for method of data storage</p> <p>2.3 Reconfigure rollback segments</p> <p>2.4 Configure the database and test its performance</p>
3. Tune database	<p>3.1 Track the module performance according to specifications</p> <p>3.2 Monitor and tune the efficiency of <i>structured query language</i> (SQL), as required</p> <p>3.3 Monitor and measure the performance of shared pool, blocks and buffers</p> <p>3.4 Detect, identify and resolve contentions that may arise in the real-time operation of the database</p> <p>3.5 Reconfigure the database according to specifications</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - detect, identify and resolve contentions in the real-time operation of the database
  - determine appropriate database performance diagnostic tool to use
- literacy skills to record performance test results
- planning and organisational skills to:
  - ensure that database backup procedures are appropriate for the method of data storage
  - set benchmarks
- problem-solving skills to:
  - carry out appropriate fixes based on diagnostic results
  - detect, identify and resolve contentions in the real-time operation of the database
  - determine where inappropriate use of database and temporary table spaces occur
  - identify issues causing degradation of database performance
- technical skills to:
  - configure the database and test its performance
  - monitor and measure the performance of shared pool, blocks and buffers
  - monitor and tune the efficiency of SQL as required
  - track the module performance according to specifications.

### Required knowledge

- broad knowledge of:
  - principles of database design
  - SQL
- detailed knowledge of:
  - database administration
  - diagnostic tools
  - tuning methodologies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• correctly identify common database problems</li> <li>• select appropriate solutions to solve the problem</li> <li>• implement such solutions to improve database performance.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• diagnostic tools</li> <li>• database operating on a network</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of candidate's documentation of problem resolution</li> <li>• direct observation of the candidate using database tools to solve a database problem</li> <li>• evaluation of database after candidate has resolved issues affecting its performance.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Diagnostic tool</i></b> may include:	<ul style="list-style-type: none"> <li>• server software or may be inbuilt to the server software</li> <li>• software applications external to the database server.</li> </ul>
<b><i>Database</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases.</li> </ul>
<b><i>Performance</i></b> may include:	<ul style="list-style-type: none"> <li>• archiving old records</li> <li>• compacting database files</li> <li>• creating indexes</li> <li>• improvements to response time</li> <li>• latch contention</li> <li>• preventing events causing waits</li> <li>• record or table locking</li> <li>• repairing the database</li> <li>• simultaneous access</li> <li>• splitting database files.</li> </ul>
<b><i>Architecture</i></b> may include:	<ul style="list-style-type: none"> <li>• configuration: <ul style="list-style-type: none"> <li>• large memory model</li> <li>• requests per second</li> <li>• small memory model</li> </ul> </li> <li>• database software: <ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase</li> </ul> </li> <li>• operating system: <ul style="list-style-type: none"> <li>• Linux</li> <li>• Mac</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• multi-user ability</li> <li>• Novell NetWare 5 or above</li> <li>• Windows 2000 or above.</li> </ul>
<i>SQL</i> may include:	<ul style="list-style-type: none"> <li>• ISO/IEC 9075 (1-4,9-11,13,14):2008: <ul style="list-style-type: none"> <li>• ISO/IEC 9075-1:2008 Framework (SQL/Framework)</li> <li>• ISO/IEC 9075-10:2008 Object Language Bindings (SQL/OLB)</li> <li>• ISO/IEC 9075-11:2008 Information and Definition Schemas (SQL/Schemata)</li> <li>• ISO/IEC 9075-13:2008 SQL Routines and Types Using the Java TM Programming Language (SQL/JRT)</li> <li>• ISO/IEC 9075-14:2008 XML-Related Specifications (SQL/XML)</li> <li>• ISO/IEC 9075-2:2008 Foundation (SQL/Foundation)</li> <li>• ISO/IEC 9075-3:2008 Call-Level Interface (SQL/CLI)</li> <li>• ISO/IEC 9075-4:2008 Persistent Stored Modules (SQL/PSM)</li> <li>• ISO/IEC 9075-9:2008 Management of External Data (SQL/MED)</li> </ul> </li> <li>• proprietary extensions: AS/NZS 3968.0:1994/Amdt 1:1996 Information technology - database languages - SQL - definition of data structures and basic operations</li> <li>• SQL:2008.</li> </ul>

## Unit Sector(s)

Database

# ICADBS407A Monitor physical database implementation

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to monitor database performance using database-management system modelling.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Application of the Unit

This unit applies to database support staff who are required to test and scrutinise the operation of a physical database to ensure that it functions as efficiently as possible.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Undertake database management system modelling	1.1 Review <b>database</b> prototype, as appropriate, to determine <b>acceptance criteria</b> and performance standards 1.2 Load test data according to the technical sequence detailed in <b>documentation</b> 1.3 Generate a test schedule for the database of <b>tasks</b> to be performed and results expected
2. Monitor database performance	2.1 Evaluate database performance against acceptance criteria and performance standards 2.2 Identify discrepancies in results when expected outcomes do not meet acceptance criteria 2.3 Identify areas needing enhancement and document changes to be made 2.4 Modify database according to project standards 2.5 Repeat performance testing until expected results are achieved
3. Seek client feedback and sign-off	3.1 Present test results in a document and provide to <b>client</b> for feedback 3.2 Incorporate client change requests as appropriate 3.3 Obtain client sign-off of the monitoring process

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to review database prototype and evaluate performance
- communication skills to liaise with client
- literacy skills to:
  - evaluate technical data
  - present and document feedback
- problem-solving skills to provide a range of technical solutions
- technical skills to use database software.

### Required knowledge

- client business domain
- current industry-accepted hardware and software products
- database design
- database performance standards
- quality assurance practices
- testing and benchmarking processes
- three or more current principles of databases.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify technical considerations affecting implementation of a database</li> <li>• analyse performance issues during implementation of the database.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• database management system (DBMS)</li> <li>• target database prototype</li> <li>• testing and benchmarking software</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of database performance testing</li> <li>• review of candidate's test schedule that documents evidence of discrepancies</li> <li>• evaluation of candidate's documented test results.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Database</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases.</li> </ul>
<b><i>Acceptance criteria</i></b> may include:	<ul style="list-style-type: none"> <li>• cost implications</li> <li>• technical and logistical considerations</li> <li>• timeframe.</li> </ul>
<b><i>Documentation</i></b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• client training</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• maintaining equipment inventory</li> <li>• naming standards</li> <li>• project-management templates and report writing</li> <li>• satisfaction reports</li> <li>• version control.</li> </ul>
<b><i>Tasks</i></b> may include:	<ul style="list-style-type: none"> <li>• activities</li> <li>• function</li> <li>• job</li> <li>• work.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees.</li> </ul>

## Unit Sector(s)

Database

## ICADBS408A Link an RFID system to a database

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to transfer radio frequency identification (RFID) data to a database.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Application of the Unit

This unit applies to individuals in a range of information and communications technology (ICT) areas who are required to maintain RFID data and make it available to an RFID system.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine data mapping and integration requirements	<p>1.1 Identify and document the format of the data from the RFID system, including data schema</p> <p>1.2 Collect required data, target <b>database</b> requirements and implementation details ensuring uniqueness of entries</p>
2. Perform data transition	<p>2.1 Write and test <b>conversion programs</b> and use <b>conversion tools</b></p> <p>2.2 Ensure clean data take-on by converting according to database requirements</p> <p>2.3 Use database adaptors and interfaces for data transition</p>
3. Check data transition	<p>3.1 Verify that data transition has been completed according to requirements</p> <p>3.2 Document programs, procedures and processes according to clients requirements</p> <p>3.3 Provide conversion reports to client for sign-off</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine data objects required, data structures and business requirements
- communication skills to liaise with clients to discuss issues
- literacy skills to generate database and sample reports
- technical skills to:
  - build a database using a commercially available database product, including Microsoft Structured Query Language (MS SQL) Server 7.0, Oracle and Sybase
  - register a data source name (DSN)
  - use appropriate database data formats
  - use appropriate RFID data formats
  - use data conversion programs
  - use hypertext markup language (HTML) or eXtensible markup language (XML)
  - use ISO/IEC standard 15962:2004 as a reference
  - use website administration software and site server utilities.

### Required knowledge

- client database data structures
- client data management and data security policy and procedures
- data analysis, particularly in determining data types and data structures and query and report design
- data source names in use by the organisation
- open database connection (ODC)
- primary files and transaction logs to confirm appropriate database activity
- quality assurance practices
- software tools
- system data requirements
- system's current functionality
- website foundations.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify formats of RFID system output and data fields in database</li> <li>• analyse, write, install and test conversion programs</li> <li>• identify format of data fields of database</li> <li>• write or obtain, and install conversion software</li> <li>• compile entries in database reports.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• conversion tools</li> <li>• database software</li> <li>• networked computers</li> <li>• organisational guidelines</li> <li>• RFID equipment specifications</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate configuring an RFID system and database using a range of equipment in a variety of scenarios</li> <li>• evaluation of candidate's documentation that includes programs, procedures and processes</li> <li>• review of candidate-generated conversion reports.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Database</b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases</li> <li>• software: <ul style="list-style-type: none"> <li>• Access connected to a structured query language (SQL) server</li> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase.</li> </ul> </li> </ul>
<b>Conversion programs</b> may be in:	<ul style="list-style-type: none"> <li>• object-oriented language</li> <li>• procedural programming language.</li> </ul>
<b>Conversion tools</b> may include:	<ul style="list-style-type: none"> <li>• analysis of data quality: <ul style="list-style-type: none"> <li>• QDB or Analyze</li> <li>• WizRule</li> <li>• Unitech Systems Inc</li> </ul> </li> <li>• cleansing data: <ul style="list-style-type: none"> <li>• Integrity</li> <li>• Enterprise or Integrator</li> </ul> </li> <li>• data-mart management</li> <li>• extraction and transformation: <ul style="list-style-type: none"> <li>• Evolutionary Technologies International (ETI) extract</li> <li>• InfoPump, InfoHub, InfoRefiner and InfoSuite</li> <li>• Passport</li> <li>• Warehouse Manager.</li> </ul> </li> </ul>

Database

## ICADBS409A Monitor and administer a database

### Modification History

Version	Comments
ICADBS409A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage, monitor and administer a database.

### Application of the Unit

This unit applies to database support staff who are required to maintain a database, monitoring its performance and access, and administering its security.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Start up a database	<p>1.1 Configure system for <i>database</i> start-up</p> <p>1.2 Monitor database start-up and operation for irregularities</p>
2. Manage database	<p>2.1 Take action to ensure that a data dictionary has been compiled and that data structures are in place</p> <p>2.2 Maintain data integrity constraints according to <i>business requirements</i></p> <p>2.3 Create and design indexes and multiple-field keys according to business requirements</p> <p>2.4 Monitor the locking options chosen for the database</p> <p>2.5 Confirm that recent backups of the database have been stored and that backups can be retrieved as a full working copy</p> <p>2.6 Monitor the data storage space for ongoing viability and resize as needed</p> <p>2.7 Update data according to <i>organisational guidelines</i></p>
3. Manage database access	<p>3.1 Allocate or remove access privileges according to user status</p> <p>3.2 Monitor <i>network server</i> log-in log file for illegal log-in attempts or for security breaches</p> <p>3.3 Manage <i>system</i> resources in the context of database administration</p>
4. Document database maintenance tasks	<p>4.1 Document changes to database start-up procedures</p> <p>4.2 Itemise database management structures</p> <p>4.3 File authorisations for access changes</p> <p>4.4 Detail procedures for monitoring log files</p> <p>4.5 Record procedures to manage systems resources</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine database start-up and operation irregularities
- literacy skills to write technical and business reports
- problem-solving skills to resolve database irregularities
- research skills to identify, analyse and evaluate features of a particular database.

### Required knowledge

- backup and recovery methodologies
- architectural design of relational databases
- database security
- selection and use of appropriate database management tools
- structured query language (SQL)
- tasks involved in database administration
- tuning methodologies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• configure a database start-up</li> <li>• ensure data integrity</li> <li>• monitor data storage requirements for database</li> <li>• update data</li> <li>• update database access.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• live database, preferably on a LAN on which there is a server that offers log-in functionality</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of candidate's database</li> <li>• verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> <li>• database security</li> <li>• database space requirements</li> <li>• function of indexes and data dictionaries</li> <li>• monitoring of database access</li> </ul> </li> <li>• evaluation of candidate's database documentation detailing: <ul style="list-style-type: none"> <li>• start-up and operation irregularities</li> <li>• network server logs of security breaches</li> <li>• maintenance tasks performed, by whom and when.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate</p>

	<p>and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Database</b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages:             <ul style="list-style-type: none"> <li>• DB2</li> <li>• DB4</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft Access</li> <li>• Microsoft Structured Query Language (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Postgre Structured Query Language (Postgre SQL)</li> <li>• Sybase</li> </ul> </li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases.</li> </ul>
<b>Business requirements</b> may include:	<ul style="list-style-type: none"> <li>• customer</li> <li>• inventory</li> <li>• payroll</li> <li>• supplier</li> <li>• tax requirements.</li> </ul>
<b>Organisational guidelines</b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>

<i>System</i> may include:	<ul style="list-style-type: none"><li>• components that run a computer:<ul style="list-style-type: none"><li>• hardware</li><li>• software.</li></ul></li></ul>

## Unit Sector(s)

Database

## ICADBS412A Build a database

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to build and implement a database using an established design.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Application of the Unit

This unit applies to database administrators and designers who are required to build databases.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Confirm database design	<p>1.1 Review <i>database</i> design <i>documentation</i>, including data structures, queries, reports and user interface</p> <p>1.2 Compare database access and security feature design with organisational security plan</p> <p>1.3 Document inconsistencies in database and security design</p>
2. Create prototype	<p>2.1 Develop prototype according to database design</p> <p>2.2 Populate database tables with suitable data, including current business data</p> <p>2.3 Write conversion programs to import data from existing systems</p> <p>2.4 Develop test data to assess database features</p> <p>2.5 Assess functionality of prototype with client, including identifying errors in program code and modifying screens and reports</p> <p>2.6 Incorporate feedback from client into prototype</p> <p>2.7 Obtain client sign-off for the prototype</p>
3. Test database	<p>3.1 Develop implementation plan for the database</p> <p>3.2 Install <i>database management system</i> software on network</p> <p>3.3 Populate database tables with business data</p> <p>3.4 Implement security and access controls</p> <p>3.5 Test database output and security controls and record results</p>
4. Evaluate database	<p>4.1 Review database with client for final approval</p> <p>4.2 Complete database documentation</p> <p>4.3 Identify and document user training <i>requirements</i></p> <p>4.4 Seek and secure client acceptance of database</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to review and detect inconsistencies in database design
- communication skills to liaise with users, particularly during the prototype phase
- literacy skills to:
  - document user-training requirements
  - prepare reports and technical documentation
- planning and organisational skills to:
  - complete tasks within required timeframe
  - complete tasks using organisation's business structures
- problem-solving skills to debug errors in coding
- technical skills to:
  - convert and validate data during implementation
  - encrypt and authenticate database security features
  - install and use proprietary software
  - model data, particularly during the design and development phases
  - program structured query language (SQL), particularly during the development phase.

### Required knowledge

- overview knowledge of:
  - database management system (DBMS) fundamentals related to overall unit of competency, particularly during the design phase
  - OHS principles and responsibilities in regard to self and others while working in an IT environment
- detailed knowledge of:
  - functions and features of databases
  - logical data model, particularly related to developing a prototype
  - object-model design concepts, particularly related to developing data structures, queries, screens and reports
  - object-oriented data model, particularly related to developing a prototype
  - physical design concepts, particularly related to developing a prototype
  - run time facilities related to implementing live database and operation of prototype
  - SQL programming language.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• build and implement a well-structured database that             <ul style="list-style-type: none"> <li>• represents the client's business reality</li> <li>• provides the user with a productive business tool</li> <li>• conforms to the client's standards and structures.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• business requirements and strategy</li> <li>• database design documentation</li> <li>• database software</li> <li>• programming language</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of functions and features of databases and the process of developing a prototype</li> <li>• evaluation of database</li> <li>• review of:             <ul style="list-style-type: none"> <li>• database documentation, including security controls</li> <li>• test data used to test database functionality.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Database</i></b> may include:	<ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Postgre Structured Query Language (Postgre SQL)</li> <li>• Sybase.</li> </ul>
<b><i>Documentation</i></b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project management templates</li> <li>• report writing principles</li> <li>• version control.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• clubs</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees.</li> </ul>
<b><i>Database management system</i></b> may include:	<ul style="list-style-type: none"> <li>• distributed or centralised</li> <li>• online</li> <li>• partitioned geographically</li> <li>• thematically distributed.</li> </ul>
<b><i>Requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>

## Unit Sector(s)

Database

# ICADBS501A Monitor and improve knowledge management system

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to monitor and improve a knowledge management system.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Application of the Unit

This unit applies to knowledge engineers who are required to support and maintain an existing knowledge management system.

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Investigate knowledge management system	1.1 Review structure of existing knowledge management system and develop an understanding of its operation 1.2 Interview <i>clients</i> and staff to determine information <i>requirements</i> 1.3 Identify frequently requested information 1.4 Create a structure for organising <i>information</i> 1.5 Document structure and forward to appropriate person for approval
2. Create knowledge management system	2.1 Retrieve identified information 2.2 Organise information to follow the approved structure 2.3 Document information structure
3. Distribute and monitor knowledge management system documentation	3.1 Distribute knowledge management system documentation to clients and staff 3.2 Gather feedback from clients and staff and incorporate into improving <i>systems and processes</i> 3.3 Monitor use of knowledge management system to determine effectiveness 3.4 Make changes to knowledge management system 3.5 Make knowledge management system documentation available 3.6 Implement and monitor <i>process improvements</i>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate business needs
- communication skills to liaise with clients and team members to elicit information via:
  - interviews, including open and closed interview questions
  - surveys
- literacy skills to write technical reports
- planning and organisational skills to:
  - evaluate client-information needs and match them to appropriate resources
  - plan for short- and long-term capacity
- problem-solving skills to solve problems in existing knowledge management system
- research skills to review and renew business knowledge systems
- technical skills to work with existing knowledge management systems.

### Required knowledge

- overview knowledge of:
  - current practices in the management of information within organisations
  - information sources available within an organisation
- detailed knowledge of:
  - current knowledge management systems
  - database structures and construction
  - procedures for reviewing new systems for organising information.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• monitor existing knowledge management systems</li> <li>• implement strategies to improve a new or existing knowledge management system.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• databases</li> <li>• organisational information requirements</li> <li>• information repositories</li> <li>• current knowledge management systems</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning of candidate to determine knowledge of knowledge management</li> <li>• review of candidate's completed documentation of knowledge management system</li> <li>• evaluation of candidate's improvements to existing knowledge management system.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Clients</i></b> may include:	<ul style="list-style-type: none"> <li>• clubs</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees.</li> </ul>
<b><i>Requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• database</li> <li>• network</li> <li>• people in the organisation</li> <li>• platform</li> <li>• system.</li> </ul>
<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• documents</li> <li>• other output</li> <li>• test pages</li> <li>• web pages.</li> </ul>
<b><i>Systems and processes</i></b> may include:	<ul style="list-style-type: none"> <li>• computer systems (hardware and software)</li> <li>• networks (local, national or international)</li> <li>• workflows, associated routines and operating procedures.</li> </ul>
<b><i>Process improvements</i></b> may include:	<ul style="list-style-type: none"> <li>• improved customer relationships</li> <li>• improved international or domestic competitiveness</li> <li>• improved value-adding</li> <li>• new or improved business processes</li> <li>• new products</li> <li>• reduction of production costs.</li> </ul>

## Unit Sector(s)

Database

## ICADBS502A Design a database

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish client needs and technical requirements and to design a database that meets those requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Application of the Unit

This unit applies to database administrators and designers who are required to design databases.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine database requirements	<p>1.1 Meet with <i>client</i> and conduct a user-needs analysis to determine <i>database</i> functionality</p> <p>1.2 Analyse results of user-needs analysis to identify <i>technical requirements</i></p> <p>1.3 Develop a conceptual model of the database</p> <p>1.4 Submit conceptual model to client for review</p> <p>1.5 Evaluate client feedback and make changes as required</p>
2. Develop logical data model	<p>2.1 Identify attributes and determine data types</p> <p>2.2 Undertake normalisation of attributes</p> <p>2.3 Develop entity relationship diagram to clarify cardinality of relationships</p> <p>2.4 Document attributes, normalised data and entity relationship diagram</p> <p>2.5 Forward <i>documentation</i> to client for confirmation</p>
3. Design data structures	<p>3.1 Confirm primary and foreign keys for tables</p> <p>3.2 Review client business rules</p> <p>3.3 Identify referential integrity constraints</p> <p>3.4 Establish <i>database-management system</i> constraints and incorporate into database design</p> <p>3.5 Develop validation rules for data</p> <p>3.6 Design indexes and develop data dictionary</p> <p>3.7 Document the database design</p>
4. Design queries, screens and reports	<p>4.1 Design user interface for database, including menus, input screens and outputs</p> <p>4.2 Design queries based on <i>requirements</i></p> <p>4.3 Design output reports based on requirements</p> <p>4.4 Compare physical design with conceptual model or user-needs analysis</p> <p>4.5 Incorporate changes as required</p>
5. Design access and security systems	<p>5.1 Review business <i>security plan</i> as basis for commencing access and security design</p> <p>5.2 Design password and access system for database</p> <p>5.3 Identify multiple-user requirements</p>

	5.4 Develop client access profiles using client business model
6. Confirm database design	6.1 Identify database backup and recovery requirements 6.2 Develop and document the database backup and restore procedures 6.3 Submit database and documentation to client for final approval

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine data objects required, data structures and business requirements
- communication skills to liaise with clients
- literacy skills to:
  - produce database documentation
  - produce models
- numeracy skills to calculate field lengths, table and database estimated size
- planning and organisational skills to undertake business analysis
- problem-solving skills to solve normalisation problems
- technical skills to undertake data modelling and structured query language (SQL) programming.

### Required knowledge

- data analysis, particularly in determining data types and data structures and query and report design
- data modelling related to developing the conceptual data model
- data redundancy
- database management system (DBMS) fundamentals, particularly during the design phase
- encryption and authentication as they apply to database security features
- function and features of data types and data structures
- functions and features of databases
- logical design concepts, particularly related to designing data structures, queries screens and reports
- object model design concepts, particularly related to designing data structures, queries, screens and reports
- scalability of databases.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design a well-structured database that represents the client's business reality and provides the user with a productive business tool.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• current industry-accepted database software, network or other system for remote or multi-user access</li> <li>• business requirements</li> <li>• CASE or diagramming software</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• observation of candidate liaising with client</li> <li>• verbal or written questioning to assess candidate's knowledge of:             <ul style="list-style-type: none"> <li>• normalisation</li> <li>• indexing</li> <li>• security models</li> </ul> </li> <li>• review of the final database and associated support documentation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Client</b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b>Database</b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases.</li> </ul>
<b>Technical requirements</b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• database</li> <li>• network</li> <li>• people in the organisation</li> <li>• platform</li> <li>• system.</li> </ul>
<b>Documentation</b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• data dictionaries</li> <li>• entity-relationship diagrams</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project management templates and report writing principles</li> <li>• version control.</li> </ul>
<b>Database management system</b> may include:	<ul style="list-style-type: none"> <li>• distributed or centralised</li> <li>• online</li> <li>• partitioned geographically or thematically distributed.</li> </ul>
<b>Requirements</b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• database</li> <li>• network</li> <li>• people in the organisation</li> <li>• platform</li> <li>• system.</li> </ul>

<i>Security plan</i> may include:	<ul style="list-style-type: none"><li>• authentication</li><li>• authorisation and integrity</li><li>• privacy</li><li>• security objectives of the organisation.</li></ul>
-----------------------------------	---

## Unit Sector(s)

Database

## ICADBS503A Create a data warehouse

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design, develop and implement a data warehouse within an organisation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Application of the Unit

This unit applies to senior database staff who are required to provide data warehouse functionality for their organisation.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify required data and sources	<p>1.1 Identify required organisational data according to enterprise knowledge management strategy</p> <p>1.2 Identify subject areas according to business processes and required enterprise data</p> <p>1.3 Explore the operational data and define warehouse sources and record outcomes</p> <p>1.4 Develop warehouse source specifications according to existing data tables and files</p>
2. Determine warehouse operational steps and processes	<p>2.1 Develop warehouse targets according to business processes and required enterprise data</p> <p>2.2 Identify warehouse agents according to <i>system configuration</i></p> <p>2.3 Identify and develop warehouse steps and processes</p>
3. Design and develop warehouse features	<p>3.1 Design and develop warehouse user interface according to principles of user interface design</p> <p>3.2 Develop and implement warehouse security strategy according to enterprise <i>security plan</i></p> <p>3.3 Identify dimension tables and fact tables according to required enterprise data</p> <p>3.4 Develop warehouse information catalogue according to the enterprise's knowledge management strategy</p>
4. Test and implement data warehouse	<p>4.1 Test data warehouse against business requirements to ensure that iterations meet business objectives</p> <p>4.2 Recommend changes to business processes to ensure compatibility with data warehouse and knowledge management strategy</p> <p>4.3 Implement the data warehouse</p> <p>4.4 Establish an ongoing maintenance schedule to keep the <i>system</i> efficient</p> <p>4.5 Benchmark and document the performance level of the data warehouse</p> <p>4.6 Arrange for <i>users</i> to have ongoing training in the data warehouse</p> <p>4.7 Validate results</p> <p>4.8 Obtain sign-off of the data warehouse</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse business requirements
  - analyse organisation's warehouse requirements and identify appropriate data
  - select the most appropriate data warehouse tool for the organisation's needs
- communication skills to:
  - conduct training
  - liaise with senior management
- literacy skills to:
  - develop policy and procedures
  - develop warehouse information catalogue
  - document performance level of data warehouse
  - produce warehouse documentation
- numeracy skills to conduct cost-benefit analyses of the data warehouse project
- planning and organisational skills to manage the data warehouse project, including deliverables, milestones and work breakdown structure
- problem-solving skills to handle unexpected problems in design, implementation or delivery of data warehouse
- research skills to:
  - be aware of the product range in data warehouses
  - keep informed of the latest activities in data warehouse design and use
- technical skills to:
  - design a suitable user interface
  - develop warehouse source specifications
  - gather and analyse data
  - model steps and processes
  - source data
  - use structured query language (SQL) where appropriate in the data warehousing activity.

### Required knowledge

- functions and features of:
  - data warehousing and data mining
  - dimension tables and fact tables
  - steps and processes, including transformer steps, program steps, SQL steps and user-defined program steps
  - subject areas, warehouse sources and warehouse targets
  - warehouse agents and agent sites
- overview knowledge of:

- business operating systems related to data sources
- decision support systems related to knowledge management strategies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design a data warehouse model that reflects current and future business requirements and the business knowledge management strategy</li> <li>• implement the design.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• business requirements</li> <li>• computers configurable as information servers</li> <li>• enterprise knowledge management strategy</li> <li>• internet connectivity tools</li> <li>• local area network (LAN) with a relational database management system (DBMS)</li> <li>• proxy server software</li> <li>• specialised internet security software</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of candidate's design of a data warehouse</li> <li>• review of candidate's warehouse documentation</li> <li>• verbal or written questioning to assess candidate's knowledge of:             <ul style="list-style-type: none"> <li>• data sources</li> <li>• data warehouses</li> </ul> </li> <li>• direct observation of candidate conducting data warehouse training.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>System configuration</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• configuration, such as:             <ul style="list-style-type: none"> <li>• small memory model</li> <li>• large memory model</li> <li>• requests per second</li> </ul> </li> <li>• database software, such as:             <ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase</li> </ul> </li> <li>• operating systems, such as:             <ul style="list-style-type: none"> <li>• Linux</li> <li>• Mac</li> <li>• multi-user ability</li> <li>• Novell NetWare 5 or above</li> <li>• Windows 2000 or above.</li> </ul> </li> </ul>
<p><b><i>Security plan</i></b> may contain:</p>	<ul style="list-style-type: none"> <li>• alerts</li> <li>• audits</li> <li>• handling theft</li> <li>• privacy</li> <li>• standards, including archival, backup and network</li> <li>• viruses.</li> </ul>
<p><b><i>System</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• application service provider (ASP)</li> <li>• applications</li> <li>• databases</li> <li>• gateways</li> <li>• internet service provider (ISP)</li> <li>• operating systems</li> <li>• servers.</li> </ul>

<i>Users</i> may include:	<ul style="list-style-type: none"><li>• department within the organisation</li><li>• person within a department</li><li>• third party.</li></ul>
---------------------------	--

## Unit Sector(s)

Database

## ICADBS504A Integrate database with a website

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to ensure database is integrated with a website.

### Application of the Unit

This unit applies to web developers who are responsible for creating data-driven web applications.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Connect to database	1.1 Identify site data needs from technical requirements 1.2 Connect to <b>database</b> from web application using a web development <b>language</b>
2. Retrieve data from database and display on web pages	2.1 Retrieve data using structured query language (SQL) 2.2 Display data in the most appropriate control 2.3 Format data so that it is displayed in the most effective way
3. Update database data from user input	3.1 Update existing data stored in the database with <b>user-supplied</b> input 3.2 Insert data in the database with user-supplied input 3.3 Delete data stored in the database 3.4 Include error checking and validation

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify database access points
- communication skills to liaise with clients
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- literacy skills to:
  - follow documented instruction from a supplied guide
  - interpret workplace instructions and other technical documents
- planning and organisational skills to organise the most appropriate solution
- problem-solving skills to:
  - identify and rectify website functional problems
  - identify and resolve bugs in the created code
  - select the most efficient and effective algorithms
- research skills to:
  - find solutions to encountered problems
  - keep up-to-date with industry trends
- technical skills to:
  - apply hypertext transfer protocol (HTTP)
  - apply web programming concepts
  - create hypertext markup language (HTML) or eXtensible hypertext markup language (XHTML) pages
  - create software in a web development language
  - create SQL statements
  - create aesthetically pleasing web pages.

### Required knowledge

- detailed knowledge of:
  - database structure
  - internet technology as it relates to the use of databases
  - programming control structures, object-oriented programming
  - SQL
- web programming concepts, including:
  - authentication and web security
  - HTTP
  - session management
  - stateless programming.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create a web application which accesses a database, displaying and modifying the database data provided by user input.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• requirements documentation</li> <li>• web server</li> <li>• database</li> <li>• web development environment</li> <li>• browsers</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of a web application created to access, display and update data stored in a database</li> <li>• verbal or written questioning to ensure knowledge of the impact of data-driven web applications.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Database</i></b> may include:	<ul style="list-style-type: none"> <li>• Access</li> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase.</li> </ul>
<b><i>Language</i></b> may include:	<ul style="list-style-type: none"> <li>• ASP</li> <li>• ASP.NET</li> <li>• Coldfusion</li> <li>• Perlscript</li> <li>• PHP.</li> </ul>
<b><i>User</i></b> may include:	<ul style="list-style-type: none"> <li>• client</li> <li>• external departments</li> <li>• individuals</li> <li>• internal departments.</li> </ul>

## Unit Sector(s)

Database

## ICADBS601A Build a data warehouse

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design, develop and implement a data warehouse within an organisation.

### Application of the Unit

This unit applies to those managing a knowledge management team, or working in a senior role in such a team. Those with line management responsibility should undertake this role.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Confirm database design	<p>1.1 Review <i>database</i> design <i>document</i>, including data structures, queries, reports and user interface</p> <p>1.2 Compare database access and security feature design with business security plan</p>
2. Identify required data and sources	<p>2.1 Identify required organisational data with reference to enterprise knowledge management strategy</p> <p>2.2 Identify subject areas with reference to business processes and required enterprise data</p> <p>2.3 Explore the operational data and define warehouse sources and record outcomes</p> <p>2.4 Develop warehouse source specifications with reference to existing data tables and files</p>
3. Determine warehouse operational steps and processes	<p>3.1 Develop warehouse targets with reference to business processes and required enterprise data</p> <p>3.2 Identify warehouse agents according to system configuration</p> <p>3.3 Identify and develop warehouse steps and processes</p>
4. Design and develop warehouse features	<p>4.1 Design and develop warehouse user interface with reference to principles of user-interface design</p> <p>4.2 Develop and implement warehouse security strategy according to enterprise security plan</p> <p>4.3 Identify dimension tables and fact tables with reference to required enterprise data</p> <p>4.4 Technology requirements for implementation of the strategy are costed and included in ebusiness budgeting</p> <p>4.5 Develop warehouse information catalogue with reference to the enterprise's knowledge management strategy</p>
5. Test and implement data warehouse	<p>5.1 Test data warehouse against business requirements to ensure that iterations meet business objectives</p> <p>5.2 Recommend changes to business processes to ensure compatibility with data warehouse and knowledge management strategy</p> <p>5.3 Implement the data warehouse</p> <p>5.4 Establish an ongoing maintenance schedule to keep the system efficient</p>

	5.5 Benchmark and document the performance level of the data warehouse
	5.6 Arrange for <i>users</i> to have ongoing training in the data warehouse
	5.7 Validate results
	5.8 Obtain sign-off of the data warehouse

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse business requirements
  - gather and analyse user requirements
- communication skills to liaise with business and technical staff
- literacy skills to prepare reports and technical documentation
- numeracy skills to complete cost-benefit analyses
- planning and organisational skills to manage data-warehouse implementation
- technical skills to:
  - convert and validate data
  - perform data modelling
  - work with databases, including programming languages.

### Required knowledge

- business operating systems related to data sources
- database management system (DBMS) fundamentals to facilitate extraction of data
- decision support systems related to knowledge management strategies
- encryption and authentication as they apply to database security features
- functions and features of dimension tables and fact tables
- installation and use of proprietary software
- logical database model knowledge to facilitate data extraction.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• undertake activities from proposal to implementation stage for a data warehouse model that reflects current and future business requirements and the business knowledge management strategy.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• data in a DBMS</li> <li>• data-warehousing tool</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• written report outlining:             <ul style="list-style-type: none"> <li>• cost-benefit analysis of a data warehouse implementation for a defined organisation</li> <li>• user guide for usage of an implemented data warehouse</li> <li>• technical documentation for an implementation of a data warehouse</li> </ul> </li> <li>• questioning to determine knowledge of relationship between databases and data warehouses</li> <li>• project to implement a data warehouse.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Database</b> may include:	<ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Postgre Structured Query Language (Postgre SQL)</li> <li>• Sybase.</li> </ul>
<b>Document</b> may relate to:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• client training</li> <li>• ISO standards</li> <li>• maintaining equipment inventory</li> <li>• naming standards</li> <li>• project management templates and report writing</li> <li>• satisfaction reports</li> <li>• version control.</li> </ul>
<b>Users</b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>

## Unit Sector(s)

Database

## ICADBS602A Develop a knowledge management strategy

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop a knowledge management strategy for an organisation. It includes analysing existing systems, determining requirements and developing a strategy to meet those requirements.

### Application of the Unit

This unit applies to those managing a knowledge management team, or working in a senior role in such a team. Those with line management responsibility should undertake this role.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Analyse existing knowledge management arrangements</p>	<p>1.1 Identify existing arrangements for the capture and use of knowledge and information from internal and external sources</p> <p>1.2 Distinguish between arrangements for managing knowledge and information management</p> <p>1.3 Understand the importance of <i>knowledge management concepts</i> in the identified organisation</p> <p>1.4 Evaluate the effectiveness of existing procedures and systems in terms of meeting the needs of clients, organisational aims, objectives and standards</p> <p>1.5 Identify improvements in the organisation's strategic use of knowledge and prepare a cost-benefit analysis</p>
<p>2. Evaluate knowledge management options</p>	<p>2.1 Investigate methods for capturing and using the knowledge held by people within a business, and identify and evaluate barriers to their use</p> <p>2.2 Evaluate <i>knowledge management software</i> and make recommendations regarding its usefulness and likely benefit to the organisation</p> <p>2.3 Investigate incentives and reward systems to support knowledge management for their relevance to a business</p> <p>2.4 Determine business non-technical requirements for maintaining and accessing an integrated knowledge database, according to organisational requirements</p>
<p>3. Develop a knowledge-management strategy</p>	<p>3.1 Develop a <i>knowledge management strategy</i> in consultation with staff for the capture and strategic use of organisational knowledge</p> <p>3.2 Design business processes to support knowledge management according to the organisation's knowledge management strategy and budget</p> <p>3.3 Plan an executive support system as part of the knowledge management strategy to improve managerial decision making according to organisational requirements</p> <p>3.4 Cost technology requirements for</p>

	<p>implementation of the strategy and include in knowledge management budgeting</p> <p>3.5 Design or redesign processes for the periodic review of knowledge management within the business to ensure ongoing efficiency and effectiveness</p> <p>3.6 Ensure that the knowledge management strategy meets organisational requirements identified in its overall business plan and knowledge management strategy</p>
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate existing knowledge management initiatives and compare these to corporate needs and directions
- communication skills to liaise with management, technical staff and end users of an organisation
- initiative and enterprise skills to plan strategies
- literacy skills to produce reports and proposals
- numeracy skills to produce a cost-benefit analysis
- planning and organisational skills to plan a strategy to be implemented over time
- research skills to identify appropriate technologies to fit with an organisational requirements.

### Required knowledge

- culture of the business versus traditional business models
- database design concepts
- internal and external sources of information
- legal, ethical and security issues relating to knowledge management
- records-management principles
- relevant government legislation that may affect business operation, especially in regard to OHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- structure of the organisation and its business goals.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• choose a knowledge management option that meets organisational requirements</li> <li>• develop a knowledge management strategy that is able to be implemented</li> <li>• explain the importance of knowledge management in contemporary organisations.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• sample organisations suitable for the implementation of knowledge management, including business plans</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of candidate's written report outlining knowledge management plan and strategy</li> <li>• evaluation of candidate's project setting up first phases of the knowledge management plan.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Knowledge management concepts</i></b> may include:	<ul style="list-style-type: none"> <li>• embedded knowledge</li> <li>• embodied knowledge</li> <li>• explicit knowledge</li> <li>• tacit knowledge.</li> </ul>
<b><i>Knowledge management software</i></b> may include:	<ul style="list-style-type: none"> <li>• non-specialist software features, such as:             <ul style="list-style-type: none"> <li>• meeting software</li> <li>• project software</li> <li>• calendaring software</li> <li>• collaboration software</li> <li>• social software</li> </ul> </li> <li>• specialist knowledge management software, such as:             <ul style="list-style-type: none"> <li>• Lotus Notes</li> <li>• Microsoft SharePoint.</li> </ul> </li> </ul>
<b><i>Knowledge management strategy</i></b> may include:	<ul style="list-style-type: none"> <li>• best practice transfer</li> <li>• collaborative technologies</li> <li>• communities of practice</li> <li>• cross-project learning</li> <li>• expert directories</li> <li>• knowledge mapping</li> <li>• knowledge repositories</li> <li>• rewards (motivation)</li> <li>• social web collaboration sites</li> <li>• storytelling (transference of tacit knowledge).</li> </ul>

## Unit Sector(s)

Database

# ICADBS603A Determine suitability of database functionality and scalability

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify the current and future business requirements for a database.

## Application of the Unit

This unit applies to those reviewing and managing databases.

Those with senior operational status or line management responsibility should undertake this role.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine context of business need or problem	1.1 Develop <b>database</b> objectives and identify expected outcomes to be achieved 1.2 <b>Document</b> the database <b>problem</b>
2. Gather information	2.1 Analyse database to identify the business rules, entities and relationships 2.2 Identify existing and proposed business models
3. Determine database functionality	3.1 Document existing database and environment 3.2 Confirm database functionality with <b>client</b>
4. Identify scalability and functionality	4.1 Identify the reserve and long-term capacity of the database 4.2 Identify the implications for the <b>system</b> architecture, data models, data structures, hardware and software 4.3 Identify <b>requirements</b> for scalability 4.4 Compare functionality and scalability features of the database 4.5 Determine and document whether a gap between the features exists
5. Prepare database functionality and scalability report	5.1 Document functionality and scalability of database 5.2 Submit report to client for review

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse business requirements
- communication skills to:
  - elicit information from users
  - liaise with technical and non-technical personnel
- literacy skills to produce reports
- numeracy skills to perform capacity planning
- technical skills to model data processes.

### Required knowledge

- architecture of the network in which the database resides
- Australian Computer Society Code of Ethics
- common system hardware related to client, server and database architecture
- data modelling
- functions and features of databases
- OHS principles and responsibilities in regard to self and others.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>produce a clear statement of business expectations and needs, including critical business requirements</li> <li>examine the scalability and functionality of a database in light of future growth.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>DBMS</li> <li>sample database</li> <li>appropriate learning and assessment support when required</li> <li>modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>review of candidate's written report to: <ul style="list-style-type: none"> <li>explain business expectations and needs</li> <li>document database functionality and scalability</li> </ul> </li> <li>evaluation of candidate's project to assess database functionality and scalability</li> <li>verbal or written questioning to determine candidate's knowledge of business needs and scalability requirements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Database</b> may include:	<ul style="list-style-type: none"> <li>• commercial off-the-shelf (COTS) database packages</li> <li>• object-relational databases</li> <li>• proprietary databases</li> <li>• relational databases.</li> </ul>
<b>Document</b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• standards, such as: <ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO)</li> <li>• International Electrotechnical Commission (IEC)</li> <li>• Australian Standards (AS)</li> <li>• Institute of Electrical and Electronics Engineers (IEEE)</li> <li>• Internet Engineering Task Force (IETF)</li> <li>• naming standards</li> </ul> </li> <li>• project-management templates</li> <li>• report writing principles</li> <li>• version control.</li> </ul>
<b>Problem</b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business need or opportunity</li> <li>• internal business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b>Client</b> may include:	<ul style="list-style-type: none"> <li>• customer</li> <li>• employee</li> <li>• external organisation</li> <li>• individual</li> <li>• internal department.</li> </ul>
<b>System</b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• cabling infrastructure</li> <li>• computers</li> <li>• database</li> <li>• database management system (DBMS)</li> <li>• financial system</li> </ul>

	<ul style="list-style-type: none"><li>• information system</li><li>• management system</li><li>• network equipment</li><li>• software.</li></ul>
<i>Requirements</i> may include:	<ul style="list-style-type: none"><li>• application</li><li>• business</li><li>• network</li><li>• people in the organisation</li><li>• system.</li></ul>

## Unit Sector(s)

Database

# ICADMT401A Create visual design components for digital media

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIT Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create visual design components for interactive media using industry standard authoring tools.

## Application of the Unit

This unit applies to concept artists, web and digital media designers, game designers, animators and other personnel working in the digital media industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify commonly used visual design components for games and interactive media	<p>1.1 Obtain <i>project brief and documents</i></p> <p>1.2 Identify features of visual design components for interactive media</p> <p>1.3 Discuss <i>design considerations</i> for designing an interactive visual design component</p>
2. Identify graphics software packages used for visual design	<p>2.1 Identify and review the range of industry standard <i>graphics software</i> available</p> <p>2.2 Assess the software related to visual design component requirements</p> <p>2.3 Discuss <i>technical specifications</i> for rendering and editing processes</p> <p>2.4 Select graphics software package</p>
3. Use graphics software	<p>3.1 Run graphics software and become familiar with the interface</p> <p>3.2 Create new files and organise a file structure</p> <p>3.3 Learn required tools and features used to create visual design components</p>
4. Create visual design components for an interactive media	<p>4.1 Design the visual components of a basic <i>graphical user interface (GUI)</i> for interactive media</p> <p>4.2 Consider the interactive elements of GUI</p> <p>4.3 Document the design</p> <p>4.4 Use graphics software to create visual design components to be used for the GUI</p>
5. Evaluate implementation	<p>5.1 Demonstrate implementation to relevant <i>personnel</i></p> <p>5.2 Evaluate the usability of design components</p> <p>5.3 Reflect on possible changes to improve the visual design and interactivity of components</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of visual design components
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to graphics requirements
- initiative and enterprise skills to exercise a high level of creative ingenuity in visual design and innovation
- literacy and numeracy skills to:
  - develop technical design documents
  - read briefs, work instructions, and technical and conceptual information
- planning and organisational skills to:
  - establish clear roles and goals to achieve required game development outcomes
  - refer decisions to a higher project authority for review and endorsement
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into visual design components for interactive media
- technical skills to:
  - translate design requirements into specifications
  - use correct file formats.

### Required knowledge

- basic programming techniques
- human resources required in the process of creating visual design components and the technology requirements
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design
- techniques for applying concept development skills
- techniques for applying concept visualisation skills.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• demonstrate original and innovative approaches to the creative development of a GUI</li> <li>• maintain integrity of the design brief</li> <li>• develop concept art and design specifications for splash screens, start screens and game field screens consistent with a design brief</li> <li>• develop technical specifications for visual design components and overall usability.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace experiences</li> <li>• evaluation of design brief detailing interface design components</li> <li>• review of production of visual design components</li> <li>• evaluation of a working GUI with basic functionalities.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Project brief and documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development-environment description</li> <li>• help notes</li> <li>• information design</li> <li>• interactive media design document</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<p><b><i>Design considerations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• cultural context</li> <li>• genre</li> <li>• resource limitations and constraints</li> <li>• target market.</li> </ul>
<p><b><i>Graphics software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D paint</li> <li>• Fireworks</li> <li>• Illustrator</li> <li>• Mudbox</li> <li>• Photoshop</li> <li>• Z Brush.</li> </ul>
<p><b><i>Technical specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• backup procedures</li> <li>• delivery platform</li> <li>• disc or memory space</li> <li>• format for final product</li> <li>• navigation design</li> <li>• pixel size</li> <li>• polygon count</li> <li>• source code and game assets archiving</li> <li>• target market.</li> </ul>

<p><b>Graphical user interface</b> elements may include:</p>	<ul style="list-style-type: none"> <li>• buttons and button clicks</li> <li>• command acknowledgements</li> <li>• edit boxes</li> <li>• file saving and loading</li> <li>• icons</li> <li>• list boxes</li> <li>• markers</li> <li>• menus</li> <li>• options and settings</li> <li>• picture boxes</li> <li>• pointers</li> <li>• radio buttons</li> <li>• scroll bars</li> <li>• shell</li> <li>• splash screens</li> <li>• text boxes</li> <li>• window opening</li> <li>• windows.</li> </ul>
<p><b>Personnel</b> may include:</p>	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion-capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>

## Unit Sector(s)

Digital media technologies

## ICADMT402A Produce interactive animation

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIT Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create animation for a range of applications, including web pages, e-learning, simulations and advertisements.

### Application of the Unit

This unit applies to web designers and digital media designers responsible for creating animations for the web and other media.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse project requirements	<p>1.1 Determine the necessary dynamic functionality of the animation to be included inside a <i>web or other interactive document</i></p> <p>1.2 Determine the appropriate language to achieve that functionality</p> <p>1.3 Determine and evaluate current requirements for the specified application</p>
2. Design animations	<p>2.1 Design the <i>animations</i> to enhance the page and to meet requirements</p> <p>2.2 Design animations to meet specifications for sound and interactive functions</p> <p>2.3 Design animations that will add to the overall professionalism or entertainment value of an application</p>
3. Produce animations	<p>3.1 Produce animations for web pages and other media</p> <p>3.2 Research and experiment with a range of animation techniques for enhancing the user experience</p> <p>3.3 Produce web animations for a website which enhance the overall professionalism or entertainment value of the website</p> <p>3.4 Test and debug scripts against the required functionality and reiterate until correct</p>
4. Publish animations	<p>4.1 Publish animations in acceptable format</p> <p>4.2 Incorporate animations into a hypertext markup language (HTML) page</p> <p>4.3 Complete the documentation and submit to the appropriate person for approval</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine functional requirements
  - identify appropriate design elements to match requirements
- communication skills to:
  - create a user-friendly animation
  - create an animation that markets the message effectively
  - liaise with the client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- learning skills to research encountered problems independently
- literacy skills to:
  - create effective marketing dialogue within the animation
  - follow naming conventions
  - interpret workplace instructions and other technical documents
- planning and organisational skills to determine the most appropriate solution
- problem-solving skills to:
  - determine the best coding level to maximise the number of possible browser viewing
  - identify and rectify animation functional problems, resolve bugs in the code created, and resolve error messages
  - select the most efficient and effective algorithms
- research skills to:
  - find solutions to encountered problems
  - find the solution best suited to client requirements
- technical skills to:
  - apply web programming concepts
  - create HTML or eXtensible hypertext markup (XHTML) pages with embedded animation
  - create animations aesthetically pleasing to look at, interesting, entertaining and interactive.

### Required knowledge

- internet technology to inform the choice of the right scripting type to reach a maximum determined audience
- principles of analysis and design
- principles of marketing
- programming control structures, object-oriented programming:
  - buttons

- scripting to go to URLs
- scripting to jump to different parts of the animation
- scripting using the programming language
- web-animation programming concepts, including:
  - acceptable formats for importing assets
  - component libraries
  - cross-browser issues
  - importing and exporting libraries
  - inserting the published work to an HTML or XHTML page
  - internet animation player statistics
  - masking
  - movements and automated movements
  - publishing the finished work to an acceptable web format
  - shape animation and manipulation
  - symbols
  - text manipulation
  - transparencies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design and create interactive animation following current industry standards</li> <li>• design and create interactive animation to enhance the professionalism and entertainment value of a website.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• development environment</li> <li>• internet access</li> <li>• browsers</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to determine candidate's knowledge regarding: <ul style="list-style-type: none"> <li>• animation techniques</li> <li>• terminology</li> <li>• methods</li> </ul> </li> <li>• evaluation of the effectiveness of a candidate's design and creativeness of the animation in advertisements and website enhancements</li> <li>• review of the candidate's research report of web technology trends, explaining the methods and attributes used and how the animation created enhances the website and entices buyers to click on advertisements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Web or other interactive document</i></b> may include:	<ul style="list-style-type: none"> <li>• previously created and new HTML documents</li> <li>• saved HTML documents.</li> </ul>
<b><i>Animations</i></b> may include:	<ul style="list-style-type: none"> <li>• ActionScript</li> <li>• Silverlight.</li> </ul>

## Unit Sector(s)

Digital media technologies

## ICADMT403A Produce and edit digital images

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce and edit digital images using a range of digital media technologies.

### Application of the Unit

This unit applies to digital media designers in a broad range of technical and managerial functions who are responsible for producing, editing, enhancing and manipulating digital images.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Assess digital camera qualities	<p>1.1 Assess camera software compatibility with hardware systems and select appropriate software for the production</p> <p>1.2 Select a pixel resolution on the camera to achieve the required quality and resolution of outcome</p> <p>1.3 Check the storage capacity of the camera to identify the number of images required to be captured</p> <p>1.4 Assess <i>camera features</i> as suitable to the quality of and use of digital image required</p> <p>1.5 Handle and store lithium batteries according to OHS requirements</p>
2. Photograph an image	<p>2.1 Consider camera features when operating camera to ensure capture of image meets production requirements</p> <p>2.2 Load and operate the camera according to manufacturer specifications and appropriate to the quality of image to be photographed</p> <p>2.3 Capture digital images using designated <i>file formats</i></p>
3. Edit a digital image	<p>3.1 Ensure correct use of <i>digital image software</i>, including entering and exiting the selected software</p> <p>3.2 Create and store digital image files on a computer according to software procedures</p> <p>3.3 Enhance, crop and alter digital images electronically to deliver the required image</p> <p>3.4 Check digital images for suitability and compliance with specifications</p> <p>3.5 Save and retrieve digital images using designated file formats</p> <p>3.6 Assess digital images for the <i>delivery mode</i></p>
4. Incorporate digital images into an interactive sequence	<p>4.1 Create graphics that incorporate the <i>principles of design</i> using digital image software</p> <p>4.2 Edit, enhance, amend and save digital images using digital image software</p> <p>4.3 Combine digital images into a designated <i>interactive sequence</i></p> <p>4.4 Integrate digital images into a designated interactive sequence</p> <p>4.5 Evaluate the outcome for purpose, visual impact and</p>

	effectiveness
--	---------------

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- learning skills to research encountered problems independently
- literacy skills to interpret standards, requirements and equipment operation manuals
- planning and organisational skills to determine the most appropriate solution
- problem-solving skills to anticipate and resolve minor equipment set-up problems
- technical skills to:
  - manage files using standard naming conventions
  - use a digital camera to create well-composed digital images
  - use digital imaging software to edit digital images.

### Required knowledge

- basic knowledge of the features of a range of delivery platforms
- basic photographic techniques
- basic principles of visual design and communication
- copyright and intellectual property
- implications of technology connectivity
- OHS requirements for the use of cameras and computers, and handling and disposing of lithium batteries
- procedures for customer and business liaison
- relevant standards.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• operate a digital camera to capture a range of images</li> <li>• identify and select appropriate tools and procedures required to produce digital images</li> <li>• use digital imaging software to prepare high quality digital images that satisfy a range of customer or business requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• range of resources and equipment, including digital camera and industry standard graphics software</li> <li>• standards and copyright information</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate selecting software and hardware types and identifying standards to meet business requirements</li> <li>• evaluation of photo images prepared on a number of occasions</li> <li>• verbal or written questioning to determine candidate's knowledge regarding: <ul style="list-style-type: none"> <li>• digital imaging techniques</li> <li>• terminology</li> <li>• methods</li> <li>• OHS issues</li> </ul> </li> <li>• evaluation of the effectiveness of a candidate's design and creativeness of digital images for interactive sequences.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b>Camera features</b> may include:</p>	<ul style="list-style-type: none"> <li>• aperture</li> <li>• automatic, program or manual settings</li> <li>• batteries</li> <li>• colour, target and working space</li> <li>• compatibility with hardware and digital imaging software</li> <li>• exposure compensation</li> <li>• file format</li> <li>• flash or fill flash</li> <li>• lens focal lengths, such as wide angle, close-up and telephoto</li> <li>• menu functions</li> <li>• resolution, such as megapixels</li> <li>• shutter speed</li> <li>• size and type of memory cards</li> <li>• subject modes</li> <li>• white balance.</li> </ul>
<p><b>File formats</b> may include:</p>	<ul style="list-style-type: none"> <li>• graphic interchange format (gif)</li> <li>• joint photographic expert group (jpeg)</li> <li>• portable document format (pdf)</li> <li>• picture format (pict)</li> <li>• portable network graphics (png)</li> <li>• photoshop data (psd)</li> <li>• raw (not yet processed)</li> <li>• tagged image file format (tiff).</li> </ul>
<p><b>Digital image software</b> may include a wide range of programs:</p>	<ul style="list-style-type: none"> <li>• Adobe Photoshop</li> <li>• Adobe Photoshop Elements</li> <li>• Adobe Photoshop Lightroom</li> <li>• Apple Aperture</li> <li>• Corel Paint Shop Pro</li> <li>• Corel PhotoPaint</li> <li>• GNU Image Manipulation Program (GIMP and GIMPshop).</li> </ul>
<p><b>Delivery mode</b> may include:</p>	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• games console</li> <li>• internet</li> </ul>

	<ul style="list-style-type: none"> <li>• mobile phones</li> <li>• personal digital assistants (PDAs)</li> <li>• print</li> <li>• video players.</li> </ul>
<i>Principles of design</i> may include:	<ul style="list-style-type: none"> <li>• balance</li> <li>• emphasis</li> <li>• movement</li> <li>• perspective</li> <li>• proportion</li> <li>• scale</li> <li>• unity.</li> </ul>
<i>Interactive sequence</i> may include:	<ul style="list-style-type: none"> <li>• animation</li> <li>• e-commerce</li> <li>• educational product</li> <li>• game</li> <li>• information product</li> <li>• promotional product</li> <li>• training product</li> <li>• website.</li> </ul>

## Unit Sector(s)

Digital media technologies

## ICADMT501A Incorporate and edit digital video

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to incorporate and edit digital video into interactive media presentations.

### Application of the Unit

This unit applies to digital media developers and producers and other personnel working in the digital media industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify and describe formats of digital video	<p>1.1 Determine the distinguishing features and uses of a range of digital video software</p> <p>1.2 Select current <i>video-editing software</i> appropriate to a range of given outcomes</p> <p>1.3 Determine limiting factors of computer hardware on video production for a specified job</p> <p>1.4 Determine differences of image quality and image size required to deliver the desired outcome</p> <p>1.5 Analyse the formats employed to create a given computer video sequence for a specified outcome</p>
2. Design digital video	<p>2.1 Assess and select appropriate digital video software for the job</p> <p>2.2 Use digital video editing software to combine video assets</p> <p>2.3 Control variations in video frame rates as required for the job to be undertaken</p> <p>2.4 Apply time stamping techniques to the video frames appropriate for the job to be undertaken</p> <p>2.5 Save digital video using the appropriate file techniques</p>
3. Edit digital video	<p>3.1 Edit single and multiple video tracks to achieve a defined outcome</p> <p>3.2 Join multiple tracks of digital video according to specifications</p> <p>3.3 Employ <i>digital effects</i> to modify and integrate digital video tracks according to specifications</p> <p>3.4 Apply time encoding to single and multiple edited digital video tracks according to specifications</p> <p>3.5 Insert a video track into an interactive media production according to specifications</p>
4. Present a digital video sequence	<p>4.1 Test digital video and combine with other digital imaging, <i>sound, visual effects</i> and animation to create an <i>interactive media presentation</i></p> <p>4.2 Save the digital media presentation, including video and present to client or customer</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and media to inform implementation of video components
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to liaise with client
- initiative and enterprise skills to provide feedback and recommend the most appropriate technology solutions
- literacy and numeracy skills to:
  - develop technical design documents
  - read briefs, work instructions, and technical and conceptual information
- planning and organisational skills to determine the most appropriate solution
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to find solutions to encountered problems
- technical skills to use correct file formats and video editing and post-production procedures.

### Required knowledge

- contemporary video software
- continuity
- editing conventions
- electronic digital language and other terminology
- montage
- principles of video production and formats
- types of cutting
- video editing and post-production techniques.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• visualise and interpret creative concepts</li> <li>• apply principles of video editing and production techniques</li> <li>• design, compile, edit and test digital interactive media incorporating video.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• practical demonstration, where direct observation may need to occur on more than one occasion to establish consistency of performance</li> <li>• evaluation of projects, reports and logbooks</li> <li>• evaluation of portfolios of evidence that demonstrate the processes used in developing and realising the creative concept.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required</p>

	knowledge.
--	------------

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Video editing software</i></b> may include:	<ul style="list-style-type: none"> <li>• wide range of current programs:             <ul style="list-style-type: none"> <li>• Adobe Premier</li> <li>• Quicktime.</li> </ul> </li> </ul>
<b><i>Digital effects</i></b> may include:	<ul style="list-style-type: none"> <li>• 2-D and 3-D animation</li> <li>• 3-D modelling</li> <li>• graphic images</li> <li>• special effects</li> <li>• titles or text</li> <li>• transitions, such as dissolves, fade-ins, fade-outs, supers and subtitles.</li> </ul>
<b><i>Sound</i></b> may include:	<ul style="list-style-type: none"> <li>• dialogue</li> <li>• music atmospheric</li> <li>• sound effects.</li> </ul>
<b><i>Visual effects</i></b> may include:	<ul style="list-style-type: none"> <li>• colour corrections to modify</li> <li>• digital video effects (DVEs) to move and distort</li> <li>• graphic images</li> <li>• keyers to combine</li> <li>• opticals</li> <li>• production of optical effects</li> <li>• production of titles</li> <li>• special effects</li> <li>• texture generation to add blur</li> <li>• trackers to follow parts of the picture</li> <li>• transitions, such as dissolves, fade-ins, fade-outs, supers and subtitles.</li> </ul>
<b><i>Interactive media presentation</i></b> may include:	<ul style="list-style-type: none"> <li>• animations</li> <li>• aspects or sections of film or video production</li> <li>• commercials</li> <li>• documentary</li> <li>• e-commerce</li> <li>• educational product</li> <li>• feature</li> <li>• game</li> <li>• information product</li> </ul>

	<ul style="list-style-type: none"><li>• live or prerecorded performances</li><li>• live or prerecorded television productions</li><li>• music video</li><li>• promotional product</li><li>• short film and video</li><li>• television production of any type</li><li>• training product.</li></ul>

## Unit Sector(s)

Digital media technologies

## ICAGAM301A Apply simple modelling techniques

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply simple modelling techniques.

### Application of the Unit

This unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Clarify work requirements</p>	<p>1.1 Clarify <i>requirements</i> and <i>purpose</i> for 3-D digital <i>modelling techniques</i> and refer to <i>production documentation</i></p> <p>1.2 Clarify work flow sequences in consultation with <i>relevant personnel</i> to ensure that <i>production</i> schedule deadlines are met</p> <p>1.3 Select <i>software</i> that best suits the type of production and <i>delivery platform</i> for which simple 3-D modelling techniques are being applied</p> <p>1.4 Gather and analyse <i>reference materials</i> to help with application of modelling techniques</p>
<p>2. Apply simple 3-D modelling techniques</p>	<p>2.1 Apply simple 3-D modelling techniques to create 3-D models</p> <p>2.2 Use software features to block out models to determine correct proportions related to reference materials</p> <p>2.3 Manipulate software features to apply basic lighting and shaders as required</p> <p>2.4 Ensure that models' topology allows appropriate deformation, as required</p> <p>2.5 <i>Progressively refine</i> and check <i>integrity</i> of models until they meet design requirements</p> <p>2.6 Submit models to relevant personnel for comment on whether production requirements have been met and make final adjustments as required</p> <p>2.7 Render and output models in required <i>format</i> and submit to relevant personnel by agreed deadlines</p> <p>2.8 Make backup copies of files and complete workplace documentation according to enterprise procedures</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication, teamwork and literacy skills to:
  - complete workplace documentation
  - interpret and clarify written or verbal instructions
  - respond constructively to feedback received from other team members
  - work as a member of a production team, both independently on assignment and under direction
- initiative and creativity skills to design, visualise and create 3-D digital models of a range of inanimate objects using simple 3-D modelling techniques
- self-management and planning skills to:
  - meet deadlines
  - prioritise work tasks
  - seek expert assistance when problems arise
- technical skills to:
  - make backup copies of files and store appropriately
  - manage files and directories using standard naming conventions and version control protocols
  - use industry-current software applications to create 3-D models to specifications.

### Required knowledge

- 3-D digital model design techniques
- 3-D digital modelling techniques
- basic knowledge of the stages in the production process from initial design through to finished product
- features of a range of delivery platforms
- geometry as it applies to the creation of realistic 3-D digital models
- issues and challenges that arise in the context of creating 3-D digital models
- OHS standards as they relate to working for periods of time on computers
- roles and responsibilities of project team members in the relevant industry sector
- scale, form, weight and volume.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design 3-D digital models</li> <li>• create 3-D digital models that:             <ul style="list-style-type: none"> <li>• demonstrate the application of simple 3-D modelling techniques</li> <li>• demonstrate efficient use of geometry and attention to detail</li> <li>• meet design requirements</li> </ul> </li> <li>• work collaboratively with other members of the design and development team</li> <li>• meet deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• direct observation of candidate liaising with client and other members of the production team</li> <li>• verbal or written questioning of issues and challenges that arise in the context of creating 3-D digital models</li> <li>• review of fault-finding exercises</li> <li>• evaluation of reports or logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and</p>

	<p>the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b>Requirements</b> may include:</p>	<ul style="list-style-type: none"> <li>• assets for integration</li> <li>• collaboration with other team members</li> <li>• creative expectations</li> <li>• design specifications</li> <li>• output format</li> <li>• technical specifications</li> <li>• time lines.</li> </ul>
<p><b>Purpose</b> of 3-D digital models may be for:</p>	<ul style="list-style-type: none"> <li>• animations</li> <li>• digital simulations:             <ul style="list-style-type: none"> <li>• architectural models</li> <li>• e-learning resources</li> <li>• demonstration of processes and procedures.</li> </ul> </li> </ul>
<p><b>Modelling techniques</b> may include:</p>	<ul style="list-style-type: none"> <li>• NURBS</li> <li>• polygonal</li> <li>• primitives</li> <li>• sculpt</li> <li>• splines and patches.</li> </ul>
<p><b>Production documentation</b> may include:</p>	<ul style="list-style-type: none"> <li>• animatics</li> <li>• brief</li> <li>• storyboard</li> <li>• technical specifications.</li> </ul>
<p><b>Relevant personnel</b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D designer or concept artist</li> <li>• 3-D modeller</li> <li>• art director</li> <li>• director</li> <li>• head of department</li> <li>• matte painter</li> <li>• other technical or specialist personnel</li> <li>• producer</li> <li>• project manager</li> <li>• storyboard artist</li> <li>• supervisor</li> <li>• technical director.</li> </ul>

<b><i>Production</i></b> may include:	<ul style="list-style-type: none"> <li>• animated productions</li> <li>• commercials</li> <li>• digital media products: <ul style="list-style-type: none"> <li>• e-learning resources</li> <li>• games</li> <li>• simulations</li> <li>• virtual worlds or environments</li> </ul> </li> <li>• documentaries</li> <li>• feature films</li> <li>• filmed events or performances</li> <li>• music video</li> <li>• short films</li> <li>• television productions.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D: <ul style="list-style-type: none"> <li>• Studio Max</li> <li>• Maya</li> <li>• Softimage</li> </ul> </li> <li>• graphics: <ul style="list-style-type: none"> <li>• Illustrator</li> <li>• Photoshop.</li> </ul> </li> </ul>
<b><i>Delivery platform</i></b> may include:	<ul style="list-style-type: none"> <li>• broadcast television</li> <li>• CD</li> <li>• DVD</li> <li>• film</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone</li> <li>• personal digital assistant (PDA)</li> <li>• other digital devices.</li> </ul>
<b><i>Reference materials</i></b> may include:	<ul style="list-style-type: none"> <li>• books</li> <li>• concept drawings and designs</li> <li>• direct observation of actions to be simulated in 3-D models</li> <li>• real object on which models are to be based</li> <li>• still images</li> <li>• videos.</li> </ul>
<b><i>Progressively refine</i></b> may relate to:	<ul style="list-style-type: none"> <li>• achieving required shape</li> <li>• achieving required topology.</li> </ul>
<b><i>Integrity</i></b> may include checking aspects of:	<ul style="list-style-type: none"> <li>• double faces</li> <li>• isolated vertices</li> <li>• pivot points</li> </ul>

	<ul style="list-style-type: none"><li>• resetting transform</li><li>• scale of models relative to other components in final sequences.</li></ul>
<i>Format</i> may include:	<ul style="list-style-type: none"><li>• AVI</li><li>• IFF</li><li>• JPEG</li><li>• MPEG</li><li>• PNG</li><li>• Quicktime</li><li>• Targa</li><li>• TIFF.</li></ul>

## Unit Sector(s)

Game development

## ICAGAM302A Design and apply simple textures to digital art

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and apply simple textures to digital art, including 3-D models.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, modellers, animators and other personnel working in the film, television and game development industries.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Clarify design requirements and plan approach	<p>1.1 Interpret <i>the brief</i> to clarify design, texture generation and delivery requirements in consultation with <i>client</i></p> <p>1.2 Identify <i>design and technical constraints</i></p> <p>1.3 Identify <i>software</i>, media and file formats for digital imagery and texture production and manipulation</p> <p>1.4 Identify sequence of digital texturing activities in production pipeline</p> <p>1.5 Identify production workflow requirements and develop production pipeline to meet client requirements</p>
2. Assess existing textures and shaders for suitability	<p>2.1 Establish underlying surface characteristics of 3-D model to be textured and shaded</p> <p>2.2 Identify basic <i>shaders</i> and <i>textures</i> with surface characteristics</p> <p>2.3 Identify suitable textures from available texture libraries</p> <p>2.4 Select shaders and textures for assignment to model</p> <p>2.5 Confirm selections are consistent with brief and client requirements</p>
3. Determine shader attributes and assign to 3-D model	<p>3.1 Identify and select <i>attributes</i> required to achieve desired effects on 3-D models</p> <p>3.2 Determine and confirm requirements related to lighting and rendering</p> <p>3.3 Use appropriate methods and techniques to achieve a desired shading outcome</p>
4. Acquire new textures	<p>4.1 Identify desired <i>resolution</i> for texture prior to acquisition</p> <p>4.2 Acquire textures from an online library</p> <p>4.3 <i>Capture real-world textures</i> using digital means</p> <p>4.4 Generate texture using <i>art media</i> or digital paint software and save</p> <p>4.5 Ensure resolution of acquired texture meets resolution requirements</p>
5. Generate procedural textures and create texture map	<p>5.1 Assess nature of surface topology</p> <p>5.2 Identify suitable types of 3-D projection</p> <p>5.3 Apply geometry where necessary</p> <p>5.4 Use algorithms to simulate natural patterns where required</p>

	<p>5.5 Determine <i>texture-mapping method</i></p> <p>5.6 Determine <i>projection-mapping method</i></p> <p>5.7 Adjust parameters to achieve desired effects</p>
6. Apply texture to model	<p>6.1 Apply texture to model</p> <p>6.2 Layer and enhance textures to achieve desired effects</p> <p>6.3 Apply lighting to test reaction of textures</p> <p>6.4 Apply textures to lights to achieve specified effects</p> <p>6.5 Adjust textures to achieve final effects</p> <p>6.6 Complete test renders and confirm outcome with client</p>
7. Finalise design	<p>7.1 Present test renders to client for approval</p> <p>7.2 Make technical or design adjustments consistent with feedback and budgetary constraints</p> <p>7.3 Finalise shading and texturing</p> <p>7.4 Save and archive files in agreed formats and repository</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate technical requirements of shading and texturing against resources and timeframes
- communication skills to liaise with project team and clients
- initiative and enterprise skills to:
  - devise efficient and innovative approaches to texturing and shading
  - provide practical support and give feedback to colleagues and management
- literacy skills to read technical documents and specifications
- planning and organisational skills to manage time and resources
- technical skills to use related computer graphics applications.

### Required knowledge

- camera textures and filters to achieve shading and texturing effects
- features of software used for:
  - 3-D modelling
  - appropriate file sizes and formats
  - digital image manipulation
  - lighting
  - rendering
  - scanning
  - scheduling of production activities
  - shading
  - texturing
- how to interpret design, texturing and shading briefs
- digital image capture using cameras and scanners
- shader attributes and their optimisation
- shader and texture mapping and projection
- texturing and shading requirements for games.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• adhere to texturing and shading brief requirements</li> <li>• design and comprehend texturing tasks</li> <li>• use and optimise software components for best performance</li> <li>• adhere to system requirements related to file sizes and formats</li> <li>• store completed file components in an organised manner for further use.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware and software</li> <li>• input device, such as stylist tablet, keyboard and mouse</li> <li>• output device, such as monitor, TV, printer and speakers</li> <li>• models and scenes to be shaded and textured</li> <li>• style shots</li> <li>• rendering briefs or specifications and schedules</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• discussion or written report of the nominated techniques applied to shading and texturing</li> <li>• discussion with learner and observation of the integration of texturing activities into the overall production pipeline</li> <li>• verbal questioning regarding reasons for use of particular hardware and software options</li> <li>• direct observation of the candidate applying shaders and textures</li> <li>• project or work activities that show research and reference sourcing to gain best texturing effect</li> <li>• written and verbal reports or documentation showing research and production plan</li> <li>• review of portfolios of evidence</li> <li>• review of completed textured, shaded and rendered models.</li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>The brief</i></b> may include:	<ul style="list-style-type: none"> <li>• illustrations</li> <li>• storyboards</li> <li>• technical specifications</li> <li>• verbal or written instructions.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D artists</li> <li>• animators</li> <li>• art directors</li> <li>• designers</li> <li>• external clients</li> <li>• modellers</li> <li>• technical directors.</li> </ul>
<b><i>Design and technical constraints</i></b> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• design specifications</li> <li>• file formats for output and end use</li> <li>• technical requirements.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D Studio Max</li> <li>• Animator Pro</li> <li>• AutoCAD</li> <li>• AutoCAD Revit 9</li> <li>• Blender</li> <li>• Bodypaint</li> <li>• Cinema 4D</li> <li>• Combustion</li> <li>• CorelDraw</li> <li>• Deep paint</li> <li>• Electric Image</li> <li>• Form Z</li> <li>• Houdini</li> <li>• Illustrator</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Photoshop</li> <li>• Pixie</li> <li>• POV-Ray</li> </ul>

	<ul style="list-style-type: none"> <li>• Renderman</li> <li>• Rhino</li> <li>• Shake</li> <li>• Soft Image or XSI</li> <li>• Z Brush.</li> </ul>
<i>Shaders</i> may include:	<ul style="list-style-type: none"> <li>• Blinn</li> <li>• cell shaders</li> <li>• Lambert</li> <li>• Phong</li> <li>• realistic shaders</li> <li>• toon shaders.</li> </ul>
<i>Textures</i> may include:	<ul style="list-style-type: none"> <li>• brick</li> <li>• cloth</li> <li>• glass</li> <li>• latex</li> <li>• leather</li> <li>• metal</li> <li>• skin</li> <li>• sky</li> <li>• stone</li> <li>• textiles</li> <li>• wood.</li> </ul>
<i>Attributes</i> may include:	<ul style="list-style-type: none"> <li>• ambient colour</li> <li>• colour</li> <li>• diffusion</li> <li>• incandescence</li> <li>• reflectivity</li> <li>• refraction</li> <li>• specularity</li> <li>• translucence</li> <li>• transparency.</li> </ul>
<i>Resolution</i> may include:	<ul style="list-style-type: none"> <li>• 1024 x 1024 pixels</li> <li>• 128 x 128 pixels</li> <li>• 720 x 720 pixels.</li> </ul>
<i>Capture real-world textures</i> may include:	<ul style="list-style-type: none"> <li>• digital photography</li> <li>• film photography</li> <li>• scanning.</li> </ul>
<i>Art media</i> may include:	<ul style="list-style-type: none"> <li>• acrylic paint</li> <li>• airbrush</li> <li>• charcoal</li> <li>• crayon</li> </ul>

	<ul style="list-style-type: none"><li>• gouache</li><li>• ink</li><li>• ink wash</li><li>• oil paint</li><li>• pen</li><li>• pencil</li><li>• tusche</li><li>• watercolour.</li></ul>
<i>Texture-mapping method</i> may include:	<ul style="list-style-type: none"><li>• bump maps</li><li>• colour mapping</li><li>• displacement maps</li><li>• reflection maps</li><li>• specular mapping</li><li>• transparency maps.</li></ul>
<i>Projection-mapping method</i> may include:	<ul style="list-style-type: none"><li>• cubic</li><li>• cylindrical</li><li>• planar</li><li>• spherical</li><li>• tiling.</li></ul>

## Unit Sector(s)

Game development

# ICAGAM303A Review and apply the principles of animation

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to review and apply the principles of animation.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare traditional animation process and the sequence of its component parts	<p>1.1 Describe the <i>traditional animation process</i> and the principles of animation and its application to producing quality 3-D animation</p> <p>1.2 Describe the uses of the <i>twelve principles of animation</i></p> <p>1.3 Identify components that are essential to producing quality 3-D animation</p>
2. Prepare scene layout and storyboarding techniques	<p>2.1 Describe and demonstrate scene layout techniques used in traditional animation</p> <p>2.2 Describe and demonstrate storyboarding techniques used in traditional animation</p>
3. Nominate appropriate animation keys in a proposed animation sequence	<p>3.1 Describe the key animation process</p> <p>3.2 Produce sample key drawings</p> <p>3.3 Identify the criteria used for the selection of animation keys</p> <p>3.4 Select appropriate animation keys in a proposed animation sequence</p>
4. Create a short animation	<p>4.1 Produce shot animation key drawings</p> <p>4.2 Produce <i>line image</i> recordings of drawings</p> <p>4.3 Create a short animated sequence</p>
5. Apply traditional animation principles to a 3-D animation	<p>5.1 Produce a 3-D animated sequence employing traditional animation principles using <i>3-D modelling and animation software</i></p> <p>5.2 Save and store or archive animated sequence onto appropriate <i>equipment or media</i></p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required animation development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to:
  - undertake research into key animation and traditional animation process
  - use reference material to recreate animations
- self-management skills to manage multimedia-based and paper-based files
- technical skills to:
  - create a 10-second traditionally animated sequence
  - produce concepts drawings
  - propose and source locations of reference material.

### Required knowledge

- analysis of a production brief
- animation keys
- application of traditional animation processes to digital animation
- development and recording of ideas
- filling media and paper-based assets
- principles of animation

- production of 3-D animations
- production of a storyboard
- scene layout and storyboarding processes
- scheduling of production components
- traditional animation process
- OHS requirements for:
  - ergonomics
  - electrical safety
  - materials handling.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use traditional animation processes to create a short animation, using a range of 3-D modelling and animation software.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>Assessment may incorporate a range of methods to assess performance and the application of essential underpinning knowledge, and might include:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning of development of idea</li> <li>• direct observation of candidate using traditional animation processes</li> <li>• review of nominated animation techniques</li> <li>• evaluation of 3-D animation sequence.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Traditional animation process</i></b> may include:	<ul style="list-style-type: none"> <li>• concept creation</li> <li>• key drawings</li> <li>• production planning</li> <li>• research</li> <li>• script development</li> <li>• storyboarding</li> <li>• 'inbetweening' and 'tweening' drawings.</li> </ul>
<b><i>Twelve principles of animation</i></b> include:	<ul style="list-style-type: none"> <li>• anticipation</li> <li>• appeal</li> <li>• arcs</li> <li>• exaggeration</li> <li>• follow through and overlapping action</li> <li>• secondary action</li> <li>• slow in and slow out</li> <li>• solid drawing</li> <li>• squash and stretch</li> <li>• staging</li> <li>• straight ahead action and pose to pose</li> <li>• timing.</li> </ul>
<b><i>Line image</i></b> may include:	<ul style="list-style-type: none"> <li>• software-generated, e.g. Photoshop, Illustrator and Flash</li> <li>• traditionally drawn (pen and ink).</li> </ul>
<b><i>3-D modelling and animation software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• ZBrush.</li> </ul>
<b><i>Equipment or media</i></b> may include:	<ul style="list-style-type: none"> <li>• blu-ray</li> <li>• CD</li> <li>• DVD</li> </ul>

	<ul style="list-style-type: none"><li>• external hard disk, such as universal serial bus (USB) flash drive</li><li>• internal hard disk.</li></ul>

## Unit Sector(s)

Game development

## ICAGAM401A Produce an interactive game

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce an interactive game using an industry standard authoring tool.

### Application of the Unit

This unit applies to game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Identify game component assets</p>	<p>1.1 Obtain <i>project brief and documents</i></p> <p>1.2 Identify <i>game-production assets</i> required to meet creative and production requirements and <i>technical specifications</i></p> <p>1.3 Discuss formats of assets and issues of asset integration and with appropriate <i>personnel</i></p> <p>1.4 Save all digital assets in the appropriate format for inclusion, and store for retrieval</p> <p>1.5 Determine sequence for development of beta version prototype for testing game play</p> <p>1.6 <i>Create a schedule</i> for production and testing</p> <p>1.7 Determine strategies for <i>monitoring production progress</i> against schedule</p>
<p>2. Identify capability of game-engine software and tools and make selection</p>	<p>2.1 Identify and review the range of industry standard <i>game-engine software and development tools</i> available</p> <p>2.2 Assess the software and tools related to specified game concepts and play requirements</p> <p>2.3 Discuss <i>considerations for selection of game-engine software</i> with relevant personnel to ensure selection will meet specified outcomes</p> <p>2.4 Select game-engine software</p>
<p>3. Use game-engine software</p>	<p>3.1 Load game engine, including sound and game play</p> <p>3.2 Create a new file for the specified task and name appropriately</p> <p>3.3 Display and use <i>tools and features of software</i> relevant to the game production process</p> <p>3.4 Create custom code to achieve a unique function</p>
<p>4. Create game-play sequence and prototype</p>	<p>4.1 Import and assemble game-play assets in appropriate sequence according to creative and technical requirements</p> <p>4.2 Create and <i>check game-play elements</i> according to creative and technical requirements</p> <p>4.3 Test and run game-play sequence as a presentation to ensure the sequence meets creative, production and technical requirements</p> <p>4.4 Export to game engine and create prototype</p> <p>4.5 Save file formats and identify for specified purpose</p>

5. Evaluate game prototype	5.1 Demonstrate initial prototype to relevant personnel 5.2 <i>Evaluate</i> against criteria, including achievement of a creative and user-friendly product 5.3 Discuss and agree on required changes 5.4 Assist if required in <i>tests and user trials</i> 5.5 Evaluate feedback from user trials 5.6 Confirm endorsement from relevant personnel to develop prototype into complete product
6. Transform prototype into final proof of concept prototype	6.1 Make necessary changes as indicated by user trials 6.2 Integrate all game elements as required by specifications 6.3 Make final checks to ensure all sequences conform to the navigation design 6.4 Save into specified storage systems

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse documentation and images to inform implementation of game specifications
- communication skills to:
  - check and confirm brief requirements
  - communicate clearly using speech and text
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - give constructive feedback
- literacy and numeracy skills to read briefs, game documentation, scripts, storyboards, scenarios, images, and technical and conceptual information
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
- problem-solving skills to recognise and address quality issues and problems
- teamwork skills to:
  - contribute to and work in a collaborative team
  - realise a unified game-play vision
- technical skills to:
  - resolve basic hardware, software and other technical issues associated with game production
  - use correct file formats and archiving procedures.

### Required knowledge

- basic programming techniques
- capabilities and constraints of game engines
- computer game development, including specific terminology
- current game-play hardware and software products
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply a variety of strategies for game trialling and testing</li> <li>• demonstrate original and innovative approaches to the creative development of a game</li> <li>• implement game development and production strategies</li> <li>• maintain integrity of the design brief and game design document</li> <li>• undertake risk assessment and critical path planning.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• work samples or simulated workplace activities</li> <li>• observation of game production activities</li> <li>• verbal questioning of aspects of game development, including:             <ul style="list-style-type: none"> <li>• capability of game engines and software tools to meet the requirements of the brief</li> <li>• evaluating game prototypes from technical, design and game-play perspectives</li> <li>• game testing and trialling procedures</li> <li>• maintaining integrity of the design brief and game design document</li> <li>• risk assessment and critical path planning</li> <li>• translating design and technical specifications into working game prototypes.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p>

	<p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Project brief and documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• game design document</li> <li>• game-play designs</li> <li>• help notes</li> <li>• information design</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document and review process.</li> </ul>
<p><b><i>Game-production assets</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• current work files</li> <li>• development kits</li> <li>• existing digital product libraries:             <ul style="list-style-type: none"> <li>• character models</li> <li>• environments</li> <li>• motion capture data</li> <li>• sound effects</li> </ul> </li> <li>• game engines, including customised game engines</li> <li>• personnel.</li> </ul>
<p><b><i>Technical specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• backup procedures</li> <li>• delivery platform</li> <li>• difficulty levels</li> <li>• disc or memory space</li> <li>• format for final product</li> <li>• navigation design</li> <li>• pixel size</li> <li>• polygon count</li> <li>• source code and game assets archiving</li> <li>• specifications for phases of game development:             <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> <li>• systems and workplace standards for documentation, including: <ul style="list-style-type: none"> <li>• computer-file management</li> <li>• job lists</li> <li>• progress reports</li> </ul> </li> <li>• target market.</li> </ul>
<b>Personnel</b> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• producers</li> <li>• programmers</li> <li>• project managers</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical directors</li> <li>• writers</li> <li>• other specialist or technical staff.</li> </ul>
<b>Creating a schedule</b> may involve:	<ul style="list-style-type: none"> <li>• allocating work tasks in consultation with other team members</li> <li>• analysing key requirements of the brief</li> <li>• assessing concept viability against resource availability</li> <li>• conducting risk assessment regarding possible issues and constraints and potential solutions</li> <li>• creating an overall project plan and schedule</li> <li>• determining workflow with consideration to available resources</li> <li>• identifying key milestones and associated deliverables: <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> </ul> </li> <li>• identifying stakeholders and devising strategies to meet stakeholder needs</li> <li>• identifying the critical path</li> <li>• researching background information</li> </ul>

<p><b><i>Monitoring production progress</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• setting project objectives against achievable timeframes.</li> <li>• balancing quality and scheduling requirements</li> <li>• coordinating the efforts of development, quality assurance, sales, marketing, public relations and finance</li> <li>• ensuring the timely production of assets to brief requirements, including: <ul style="list-style-type: none"> <li>• animation components</li> <li>• graphic</li> <li>• images</li> <li>• interfaces</li> <li>• text</li> <li>• video</li> </ul> </li> <li>• identifying and applying testing procedures</li> <li>• monitoring workload allocated to individual personnel</li> <li>• progressive game testing to ensure playability</li> <li>• renegotiating variations and schedule slippage ahead of milestone dates</li> <li>• identifying sound and applying contingency strategies.</li> </ul>
<p><b><i>Game-engine software and development tools</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• BigWorld</li> <li>• Dunia</li> <li>• Half life</li> <li>• Jade</li> <li>• Quake</li> <li>• Riot</li> <li>• Scimitar</li> <li>• Unreal.</li> </ul>
<p><b><i>Considerations for selection of game-engine software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• application of code libraries</li> <li>• application of game engine functionality for an interactive game</li> <li>• assessing coding strategy for compliance to brief and for optimal performance of game engine: <ul style="list-style-type: none"> <li>• function testing</li> <li>• test plan development</li> <li>• validating results</li> </ul> </li> <li>• assessing viability of existing code in relation to interaction of game-play elements</li> <li>• assessing strategy for game-play code</li> <li>• basic code writing abilities for customising game engine functions</li> <li>• building</li> <li>• code creation specifically for handling exceptions</li> <li>• code creation strategy for interaction of game-play elements</li> </ul>

	<ul style="list-style-type: none"> <li>• data structures</li> <li>• documentation of code development</li> <li>• environmental models</li> <li>• game engine customising</li> <li>• game platform and game platform logic</li> <li>• integration of custom code into game engines</li> <li>• sound capability</li> <li>• spatial data structures</li> <li>• technical constraints imposed by the architecture of given game engine.</li> </ul>
<b><i>Tools and features of software</i></b> may include:	<ul style="list-style-type: none"> <li>• animation</li> <li>• compilers</li> <li>• debugging software</li> <li>• development software</li> <li>• efficiency</li> <li>• flexible systems suitable for non-programmers</li> <li>• graphics</li> <li>• graphics system design</li> <li>• middleware</li> <li>• operating systems</li> <li>• plug in tools</li> <li>• programming for game integration</li> <li>• rendering</li> <li>• sound</li> <li>• system architecture for real time game environments and simulations</li> <li>• tools for designers and play analysis.</li> </ul>
<b><i>Check game-play elements</i></b> may involve:	<ul style="list-style-type: none"> <li>• chance</li> <li>• fun</li> <li>• logic</li> <li>• playability</li> <li>• rules</li> <li>• skill</li> <li>• strategy.</li> </ul>
<b><i>Create prototype</i></b> may involve:	<ul style="list-style-type: none"> <li>• bug fixing, bug databases, creating stable code bases and game tuning</li> <li>• building flexible systems, configurable by others</li> <li>• code review and test harnesses</li> <li>• designing and implementing tests and incorporating feedback from quality assurance</li> <li>• developing a comprehensive design for all missions and levels, including concept visuals</li> </ul>

	<ul style="list-style-type: none"> <li>• developing a walkthrough for at least one mission or level</li> <li>• developing story synopsis and scripts for each level</li> <li>• knowledge of games as dynamic systems: <ul style="list-style-type: none"> <li>• applying game tuning strategies in light of feedback from actual play</li> <li>• characteristics of a balanced game</li> <li>• working with quality assurance and understanding play-test feedback</li> </ul> </li> <li>• use of appropriate tools and skills for fast, interactive development</li> <li>• user-guide development.</li> </ul>
<i>Evaluate</i> game prototype may involve:	<ul style="list-style-type: none"> <li>• examining and analysing the impact of decisions, after the fact, such as: <ul style="list-style-type: none"> <li>• business decisions</li> <li>• design decisions</li> <li>• methodology and process decisions</li> </ul> </li> <li>• product ‘post-mortems’ reviewing actual use of resources to achieve outcomes against initial project plan and schedule.</li> </ul>
<i>Tests and user trials</i> may involve play test procedures:	<ul style="list-style-type: none"> <li>• determining criteria for measurement of success with a given audience</li> <li>• play testing to monitor player frustration, progress and enjoyment</li> <li>• selecting test subjects</li> <li>• testing game with target market and other diverse populations.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM402A Identify and apply principles of games design and game playing

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify and apply principles of games design and game playing.

## Application of the Unit

This unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse and document methodology relating to various computer game genres	1.1 Review <b><i>game-play elements</i></b> in an example of a chosen or given <b><i>game genre</i></b> 1.2 Identify objectives of play in an example of a chosen or given game genre
2. Interpret consumer demographics for various games products	2.1 Identify the <b><i>target markets</i></b> for various types of games 2.2 Interpret the choices and patterns of buyers and players 2.3 Review social, emotional, and cognitive aspects of contemporary interactive game play
3. Review historical aspects of game-play and game design	3.1 Review and describe the history of the <b><i>games industry</i></b> 3.2 Review game play and design for <b><i>non-computer based games</i></b> 3.3 Review the uses of games in commercial, industrial, education, military training, and therapeutic and assessment contexts
4. Identify industry game-design principles	4.1 <b><i>Research</i></b> and identify current industry <b><i>game-design principles</i></b> 4.2 Identify game-design principles for a chosen or given game
5. Outline the development of a computer game	5.1 Outline game design and play strategies 5.2 Outline <b><i>technical limitations and constraints</i></b> of current hardware and software

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - collect, interpret and communicate in visual and written forms
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
- initiative and enterprise skills to exercise a high level of creative ingenuity in game design and innovation
- literacy and numeracy skills to read briefs, work instructions and technical and conceptual information
- research skills to:
  - analyse quantitative and qualitative data
  - identify relevant information
  - obtain information
  - sort and summarise information
  - undertake practical technical desktop research into game design and game-play principles
  - use a range of sources of materials and information
- technical skills to:
  - develop concepts and use visualisation skills
  - resolve basic hardware, software and other technical issues associated with games production.

### Required knowledge

- procedures and processes for computer game development, including specific terminology
- current game-play hardware and software products
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• differentiate game genres</li> <li>• differentiate game design and play principles.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• verbal questioning concerning aspects of game design and game-play principles, including:             <ul style="list-style-type: none"> <li>• industry standards for game design</li> <li>• game genres</li> <li>• design of non-computer based games</li> <li>• history of games industry.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Game-play elements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• buildings</li> <li>• command</li> <li>• cooperation</li> <li>• core game play</li> <li>• damage states</li> <li>• edge</li> <li>• enemies</li> <li>• fight</li> <li>• game flow</li> <li>• player activity</li> <li>• shoot</li> <li>• special talents:             <ul style="list-style-type: none"> <li>• magic</li> <li>• power</li> </ul> </li> <li>• steer</li> <li>• switches</li> <li>• terrain objects</li> <li>• transportation</li> <li>• transformations</li> <li>• traps</li> <li>• weapons.</li> </ul>
<p><b><i>Game genre</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> </ul>

	<ul style="list-style-type: none"> <li>• massively multi-player online games</li> <li>• massively multi-player online role-playing games</li> <li>• medieval</li> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> <li>• racing shooter</li> <li>• racing simulation</li> <li>• real-time strategy</li> <li>• role-playing games</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> <li>• sports</li> <li>• strategy, including: <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<b>Target markets</b> may include:	<ul style="list-style-type: none"> <li>• age-specific consumer segments: <ul style="list-style-type: none"> <li>• children</li> <li>• adolescents</li> <li>• adults</li> </ul> </li> <li>• educational market segments</li> <li>• gender-specific consumer segments.</li> </ul>
<b>Games industry</b> may include:	<ul style="list-style-type: none"> <li>• Australian games</li> <li>• international games.</li> </ul>
<b>Non-computer based games</b> may include:	<ul style="list-style-type: none"> <li>• board games</li> <li>• card games</li> <li>• non-computerised arcade games, such as Pinball</li> <li>• table-top games.</li> </ul>
<b>Research</b> may include:	<ul style="list-style-type: none"> <li>• contact with industry associations</li> <li>• game play</li> <li>• reading newspapers, books, magazines, conference papers, industry organisation papers, and other references</li> <li>• research on audience, including research on attitudes toward game play from various viewpoints, including cultural, societal, national, and age group</li> <li>• talking and listening to experts</li> <li>• use of the internet</li> <li>• user surveys.</li> </ul>

<i>Game-design principles</i> may include:	<ul style="list-style-type: none"><li>• closed environments</li><li>• complexity management and slow bullets</li><li>• constant positive feedback with sporadic negative feedback</li><li>• discovery and exploration</li><li>• movement versus animation</li><li>• player control</li><li>• third-person presentation</li><li>• use of ‘weenies’</li><li>• use of maps.</li></ul>
<i>Technical limitations and constraints</i> may include:	<ul style="list-style-type: none"><li>• current technology</li><li>• future technology and release date</li><li>• pixels</li><li>• platforms</li><li>• polygon count</li><li>• software capability.</li></ul>

## Unit Sector(s)

Game development

## ICAGAM403A Create design documents for interactive games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create basic design documents for games.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research, create and document game concept	<p>1.1 <b>Research</b>, identify and describe the <b>target market for the game</b></p> <p>1.2 Research, identify and describe <b>game genre</b> and working title</p> <p>1.3 Identify a suitable <b>game platform</b></p> <p>1.4 Identify a suitable <b>game engine</b></p> <p>1.5 Prepare initial <b>concept art</b> to establish look and feel of characters, environment and game play</p>
2. Create and document specifications for game design	<p>2.1 Develop <b>storylines</b> and levels</p> <p>2.2 Develop artwork for <b>characters and environment</b></p> <p>2.3 Describe <b>game-play elements</b></p> <p>2.4 Develop <b>graphical user interface (GUI)</b></p> <p>2.5 Identify suitable <b>sounds and music</b> for game</p>
3. Create and document technical specifications for game	<p>3.1 Determine game mechanics</p> <p>3.2 Finalise platform, game engine and <b>operating system</b></p> <p>3.3 Describe the source and purpose of the <b>code</b> to be used, including level-specific code</p> <p>3.4 Determine <b>game physics</b> and <b>artificial intelligence</b></p> <p>3.5 Determine <b>sound engineering requirements</b></p> <p>3.6 Determine procedures to <b>test game prototype</b></p>
4. Collate game design document	<p>4.1 Explain proposed <b>game features</b> in comparison to existing games</p> <p>4.2 List estimated <b>resources</b> required to develop game</p> <p>4.3 Prepare estimated <b>schedule</b> for game development</p> <p>4.4 Collate design information, estimates and proposals into comprehensive game design document</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- literacy and numeracy skills to:
  - develop game design and technical design documents
  - write instructions for the normal and competent operation and testing of all game features and permutations
- planning and organisational skills to:
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research
- teamwork skills to contribute to and work in a collaborative team
- technology skills to use correct file formats and archiving procedures.

### Required knowledge

- computer game development, including specific terminology
- current game-play hardware and software products
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design
- techniques for applying concept development skills
- techniques for applying concept visualisation skills.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop concept art and design specifications for characters, environments, splash screens, start screens and game field screens consistent with an identified game genre</li> <li>• develop technical specifications for game mechanics, artificial intelligence, physics, sound, game play and overall usability</li> <li>• develop game design documents to required industry standard, consistent with client brief and specifications.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• internet for research purposes</li> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• work samples or simulated workplace activities</li> <li>• observation of game document development activities</li> <li>• verbal questioning concerning aspects of game document development, including: <ul style="list-style-type: none"> <li>• industry standards for concept art</li> <li>• design and technical specification development</li> <li>• game testing and trialling procedures</li> <li>• resources required for game development.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b>Research</b> techniques may include:</p>	<ul style="list-style-type: none"> <li>• conducting surveys and interviews to collect primary data</li> <li>• conducting technical experiments and tests</li> <li>• developing concept sketches</li> <li>• playing games</li> <li>• reviewing literature for suitable storylines</li> <li>• reviewing secondary sources of information in books, journals, newspapers and on the internet</li> <li>• viewing film and performance.</li> </ul>
<p><b>Target market for the game</b> may include:</p>	<ul style="list-style-type: none"> <li>• age-specific consumer segments:             <ul style="list-style-type: none"> <li>• children</li> <li>• adolescents</li> <li>• adults</li> </ul> </li> <li>• educational market segments</li> <li>• gender-specific consumer segments.</li> </ul>
<p><b>Game genre</b> may include:</p>	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> <li>• massively multi-player online game</li> <li>• massively multi-player online role-playing game</li> <li>• medieval</li> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> </ul>

	<ul style="list-style-type: none"> <li>• racing shooter</li> <li>• racing simulation</li> <li>• real-time strategy</li> <li>• role-playing game</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> <li>• sports</li> <li>• strategy, including: <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<i>Game platform</i> may include:	<ul style="list-style-type: none"> <li>• arcade</li> <li>• console platforms: <ul style="list-style-type: none"> <li>• Microsoft Xbox 360</li> <li>• Nintendo DS (hand-held)</li> <li>• Nintendo Wii</li> <li>• Sony PlayStation</li> </ul> </li> <li>• hand-held digital device platforms: <ul style="list-style-type: none"> <li>• Apple IIe, C, C+</li> <li>• Apple IIGS</li> <li>• Blackberry</li> <li>• BREW</li> <li>• Flashlite</li> <li>• J2ME</li> <li>• Java</li> <li>• Palm OS</li> <li>• Sidekick</li> <li>• Symbian</li> <li>• WAP</li> <li>• Windows Mobile</li> </ul> </li> <li>• PC</li> <li>• web.</li> </ul>
<i>Game engine</i> may include:	<ul style="list-style-type: none"> <li>• BigWorld</li> <li>• Blender3D</li> <li>• Dunia</li> <li>• Half Life</li> <li>• Jade</li> <li>• Quake</li> <li>• Riot</li> </ul>

	<ul style="list-style-type: none"> <li>• Scimitar</li> <li>• Second Life</li> <li>• Unreal.</li> </ul>
<b>Concept art</b> may include:	<ul style="list-style-type: none"> <li>• illustrations</li> <li>• models</li> <li>• settings</li> <li>• sketches</li> <li>• storyboards.</li> </ul>
<b>Storylines</b> may involve:	<ul style="list-style-type: none"> <li>• adventure</li> <li>• back-story</li> <li>• cinematics (cut scenes)</li> <li>• heroes journey</li> <li>• key features (edge)</li> <li>• level diagrams</li> <li>• missions</li> <li>• narrative</li> <li>• scripted dialogue</li> <li>• scripts</li> <li>• storyboards.</li> </ul>
<b>Characters and environment</b> may include:	<ul style="list-style-type: none"> <li>• backgrounds</li> <li>• environments</li> <li>• lighting</li> <li>• main characters</li> <li>• scenery</li> <li>• secondary characters</li> <li>• terrain</li> <li>• textures.</li> </ul>
<b>Game-play elements</b> may include:	<ul style="list-style-type: none"> <li>• buildings</li> <li>• command</li> <li>• cooperation</li> <li>• core game play</li> <li>• damage states</li> <li>• edge</li> <li>• enemies</li> <li>• fight</li> <li>• game flow</li> <li>• player activity</li> <li>• shoot</li> <li>• special talents: <ul style="list-style-type: none"> <li>• magic</li> <li>• power</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• steer</li> <li>• switches</li> <li>• terrain objects</li> <li>• transformations</li> <li>• transportation</li> <li>• traps</li> <li>• weapons.</li> </ul>
<b>Graphical user interface</b> elements may include:	<ul style="list-style-type: none"> <li>• buttons and button clicks</li> <li>• command acknowledgements</li> <li>• edit boxes</li> <li>• file saving and loading</li> <li>• icons</li> <li>• list boxes</li> <li>• markers</li> <li>• menus</li> <li>• options and settings</li> <li>• picture boxes</li> <li>• pointers</li> <li>• radio buttons</li> <li>• scroll bars</li> <li>• shell</li> <li>• splash screens</li> <li>• text boxes</li> <li>• window opening</li> <li>• Windows.</li> </ul>
<b>Sounds and music</b> may include:	<ul style="list-style-type: none"> <li>• ambient sounds</li> <li>• cinematic soundtracks</li> <li>• event jingles</li> <li>• intellectual property protection</li> <li>• level themes</li> <li>• musical compositions</li> <li>• radio chatter</li> <li>• situational music</li> <li>• sound effects</li> <li>• voice</li> <li>• wind, rain and storms.</li> </ul>
<b>Operating system</b> may include:	<ul style="list-style-type: none"> <li>• Linux</li> <li>• Macintosh</li> <li>• PC</li> <li>• Unix.</li> </ul>
<b>Code</b> may include:	<ul style="list-style-type: none"> <li>• code libraries</li> </ul>

	<ul style="list-style-type: none"> <li>• code objects</li> <li>• control loop</li> <li>• operating system code.</li> </ul>
<i>Game physics</i> may include:	<ul style="list-style-type: none"> <li>• collision</li> <li>• combat: <ul style="list-style-type: none"> <li>• blood spots</li> <li>• debris</li> <li>• explosions</li> <li>• footprints</li> <li>• salvo</li> <li>• smoke and fire</li> <li>• sparks</li> <li>• water</li> <li>• wreckage</li> </ul> </li> <li>• movement: <ul style="list-style-type: none"> <li>• creaking floors</li> <li>• footfalls</li> <li>• puddle stepping</li> <li>• wading</li> <li>• wind.</li> </ul> </li> </ul>
<i>Artificial intelligence</i> may include:	<ul style="list-style-type: none"> <li>• decisions</li> <li>• movement</li> <li>• pathfinding</li> <li>• reactions</li> <li>• simulated intelligence</li> <li>• situations</li> <li>• statistics</li> <li>• target selection</li> <li>• tests and events for reactionary behaviour.</li> </ul>
<i>Sound engineering requirements</i> may include:	<ul style="list-style-type: none"> <li>• data path</li> <li>• direct memory access (DMA)</li> <li>• file requirements</li> <li>• mixing</li> <li>• multiple channels</li> <li>• sample lengths</li> <li>• sample rates</li> <li>• sound definitions</li> <li>• third-party drivers.</li> </ul>
<i>Testing game prototype</i> may involve play test	<ul style="list-style-type: none"> <li>• determining criteria for measurement of success with a given audience</li> </ul>

procedures, such as:	<ul style="list-style-type: none"> <li>• monitoring player frustration, progress and enjoyment</li> <li>• selecting test subjects</li> <li>• testing game with target market and other diverse populations.</li> </ul>
<i>Game features</i> may include:	<ul style="list-style-type: none"> <li>• edge</li> <li>• fun</li> <li>• originality</li> <li>• playability.</li> </ul>
<i>Resources</i> may include:	<ul style="list-style-type: none"> <li>• game assets (collateral)</li> <li>• hardware</li> <li>• money</li> <li>• personnel</li> <li>• software</li> <li>• time.</li> </ul>
<i>Schedule</i> may include:	<ul style="list-style-type: none"> <li>• allocating work tasks in consultation with other team members</li> <li>• analysing key requirements of the brief</li> <li>• assessing concept viability against resource availability</li> <li>• conducting risk assessment regarding possible issues and constraints and potential solutions</li> <li>• creating an overall project plan and schedule</li> <li>• determining workflow with consideration to available resources</li> <li>• identifying key milestones and associated deliverables: <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> </ul> </li> <li>• identifying stakeholders and devising strategies to meet stakeholder needs</li> <li>• identifying the critical path</li> <li>• researching background information</li> <li>• setting project objectives against achievable timeframes.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM404A Apply artificial intelligence in game development

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to incorporate the principles of artificial intelligence (AI) into a game.

### Application of the Unit

This unit applies to people contributing to the creation of computer-controlled objects in games.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Conduct research on artificial intelligence (AI) strategies</p>	<p>1.1 Describe the <i>terminology</i> involved in AI as it relates to games and the game industry</p> <p>1.2 Identify and analyse the range of AI <i>pathfinding</i> strategies, including appropriate <i>genre and environments</i> and how they influence the design and development</p> <p>1.3 Discuss AI strategies and ideas and collaborate as required with relevant personnel to ensure contribution of a range of ideas and creative solutions to fulfil the requirements of the brief</p> <p>1.4 Organise research and findings for use by relevant personnel throughout the development process, updating as required</p>
<p>2. Design AI strategy for games</p>	<p>2.1 Generate a <i>range of possible goals and actions</i> and <i>other factors</i> in the design of an AI non-player character (NPC)</p> <p>2.2 Select the AI strategies for NPCs for the game design which are technically feasible, respond to the brief and provide creative solutions to all design issues</p> <p>2.3 Continuously reflect on and assess the AI strategies for implications on budget, time line, technical feasibility and suitability for the brief</p>
<p>3. Implement AI strategy</p>	<p>3.1 <i>Implement a pathfinding algorithm</i> in a game</p> <p>3.2 Implement an <i>NPC AI strategy</i> in a game</p>
<p>4. Evaluate game, based on NPC AI</p>	<p>4.1 Review the game design and AI strategies for its fulfilment of the design brief</p> <p>4.2 Discuss and confirm additional requirements or modifications to the game design and undertake any necessary amendments</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse game NPC goals and strategies to suit a game design brief
- literacy skills to read a game design brief
- technical skills to integrate designed AI into a game.

### Required knowledge

- implications of basic pathfinding algorithms on game development
- overview of AI terminology used in the game industry
- development process for creating AI strategies for NPCs in a game.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• demonstrate an understanding of a broad knowledge base of AI strategies</li> <li>• design and implement AI strategies in a game.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• research tools, such as the internet</li> <li>• pathfinding libraries, algorithms or codes</li> <li>• development tools to implement AI strategies</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate discussing and designing AI strategies</li> <li>• verbal or written questioning to assess candidate's knowledge of AI strategies</li> <li>• development of a game involving AI strategies</li> <li>• review of candidate's documented game design.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Terminology</b> may include:	<ul style="list-style-type: none"> <li>• agent systems</li> <li>• AI</li> <li>• decision trees</li> <li>• flocking</li> <li>• fuzzy logic</li> <li>• obstacle avoidance</li> <li>• state machines</li> <li>• steering behaviours.</li> </ul>
<b>Pathfinding</b> may include:	<ul style="list-style-type: none"> <li>• A*</li> <li>• Dijkstra</li> <li>• grid-graph representation</li> <li>• waypoints</li> <li>• navigation mesh</li> <li>• heuristics</li> <li>• path smoothing.</li> </ul>
<b>Genre and environments</b> may include:	<ul style="list-style-type: none"> <li>• 2-D or 3-D</li> <li>• first person shooter</li> <li>• outdoors or indoors</li> <li>• strategy game.</li> </ul>
<b>Range of possible goals and actions</b> may include:	<ul style="list-style-type: none"> <li>• AI states such as hunt, run and search</li> <li>• decision making</li> <li>• who to attack based on game data.</li> </ul>
<b>Other factors</b> may include:	<ul style="list-style-type: none"> <li>• cost versus benefit to implement</li> <li>• emotional responses</li> <li>• realism</li> <li>• suit the design brief, genre and target audience.</li> </ul>
<b>Implementing a path-finding algorithm</b> may include:	<ul style="list-style-type: none"> <li>• code the algorithm</li> <li>• using a library to implement pathfinding</li> <li>• using graphical tools.</li> </ul>
<b>NPC AI strategy</b> may include:	<ul style="list-style-type: none"> <li>• flock</li> <li>• game balancing - help the losing player by attacking the leading player to keep everyone in the game</li> <li>• hunt, chase and flee</li> </ul>

	<ul style="list-style-type: none"><li>• patrol</li><li>• search for object or player.</li></ul>
--	---

## Unit Sector(s)

Game development

## ICAGAM405A Write story and content for digital games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop stories and related content for interactive digital games.

### Application of the Unit

This unit applies to game concept developers, script writers, storyboard artists, game designers and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify and develop storylines with game potential	1.1 Identify potential <i>storylines</i> for game development 1.2 <b><i>Modify and enhance storyline</i></b> to suit game environment 1.3 Determine appropriate <b><i>game genre</i></b>
2. Write plot synopsis and background story	2.1 Determine <b><i>character profiles</i></b> 2.2 Develop <b><i>environment profiles</i></b> consistent with storyline 2.3 Develop <b><i>background story</i></b> 2.4 Develop initial <b><i>plot profile</i></b> 2.5 Develop <b><i>plot synopsis and options</i></b> and link to specific game levels
3. Develop story components	3.1 <b><i>Source initial concept artwork</i></b> 3.2 Develop <b><i>level specifications</i></b> and storylines 3.3 Initiate development of <b><i>storyboards</i></b> showing plot development, cinematic and level outlines
4. Finalise story components for inclusion in the game design brief	4.1 Seek <b><i>feedback</i></b> on story and concept 4.2 Finalise story concept, profiles and other specifications for inclusion in the game design brief

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate narrative concepts and related design requirements to designers and concept artists
  - seek and respond to feedback from target audience representatives, clients and colleagues
- planning and organisational skills to:
  - meet project deadlines
  - organise own time to meet milestones
- research skills to:
  - research and identify appropriate game genres
  - source appropriate textual and visual data to inform storylines
  - source concept artwork
- writing skills to develop:
  - background story, storyline and plot elements for levels
  - character, environment and plot profiles.

### Required knowledge

- budgeting and scheduling considerations for game development
- copyright and intellectual property protection for written narrative and concept graphics
- different story requirements for particular game genres
- role of story writing in game development and the quality of the final product
- research methods used to stay abreast of the latest changes and developments in narrative development for games
- tools and techniques for developing game narrative.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop storylines for games according to current industry standards</li> <li>• develop storylines that are innovative, competitive and apply processes and procedures to facilitate quality script writing</li> <li>• identify the role of narrative development in game development and what this brings to the quality of the final product</li> <li>• seek and respond professionally to feedback on concept and storylines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• range of current computer games across all platforms and genres</li> <li>• range of the latest consoles and hand-held game devices</li> <li>• internet access for research purposes</li> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• work samples or simulated workplace activities</li> <li>• observation of storyline development activities</li> <li>• verbal questioning concerning aspects of narrative development for games, including:             <ul style="list-style-type: none"> <li>• game genres</li> <li>• sources of stories and narrative</li> <li>• sourcing concept graphics</li> <li>• respecting the intellectual property rights of other writers.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where</p>

	<p>appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Storylines</i></b> may originate from:</p>	<ul style="list-style-type: none"> <li>• celebrity activities</li> <li>• comics and graphic novels</li> <li>• cultural traditions</li> <li>• fairytales</li> <li>• film and television</li> <li>• historical events</li> <li>• novels and short stories</li> <li>• performing arts:             <ul style="list-style-type: none"> <li>• ballet</li> <li>• dance</li> <li>• opera</li> </ul> </li> <li>• sporting activities</li> <li>• ‘what if’ scenarios.</li> </ul>
<p><b><i>Modify and enhance storyline</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• background story concept development</li> <li>• creating new stories featuring existing characters</li> <li>• developing storyline from first, second or third person perspective</li> <li>• introducing new characters and settings</li> <li>• modification of plot outcomes</li> <li>• reducing the number of characters</li> <li>• relating the narrative from another point of view.</li> </ul>
<p><b><i>Game genre</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> </ul>

	<ul style="list-style-type: none"> <li>• massively multi-player online game</li> <li>• massively multi-player online role-playing game</li> <li>• medieval</li> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> <li>• racing shooter</li> <li>• racing simulation</li> <li>• real-time strategy</li> <li>• role-playing game</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> <li>• sports</li> <li>• strategy, including: <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<p><i>Character profiles</i> may include:</p>	<ul style="list-style-type: none"> <li>• basic details: <ul style="list-style-type: none"> <li>• age</li> <li>• appearance</li> <li>• clothing and accessory preferences</li> <li>• colour of eyes</li> <li>• gender</li> <li>• hair</li> <li>• languages spoken</li> <li>• location</li> <li>• motivation</li> <li>• names</li> <li>• nationality and race</li> <li>• occupation</li> <li>• preferences for day or night missions</li> <li>• target demographic the character appeals to</li> <li>• weapon choices</li> </ul> </li> <li>• biographies</li> <li>• characteristics of associates and enemies</li> <li>• heroes</li> <li>• main characters</li> <li>• non-player characters</li> <li>• protagonists</li> </ul>

	<ul style="list-style-type: none"> <li>• secondary characters</li> <li>• villains.</li> </ul>
<b><i>Environment profiles</i></b> may include:	<ul style="list-style-type: none"> <li>• alien environments</li> <li>• fantasy environments</li> <li>• foreign environments</li> <li>• historical environments</li> <li>• natural environments, for example: <ul style="list-style-type: none"> <li>• arctic</li> <li>• desert</li> <li>• jungle</li> <li>• mountainous</li> </ul> </li> <li>• post-apocalyptic environments</li> <li>• urban environments.</li> </ul>
<b><i>Background story</i></b> may include:	<ul style="list-style-type: none"> <li>• cinematics (cut scenes)</li> <li>• experiences, events and missions occurring prior to game action that have a bearing on the proposed game narrative.</li> </ul>
<b><i>Plot profile</i></b> may involve:	<ul style="list-style-type: none"> <li>• action</li> <li>• adventure</li> <li>• combat</li> <li>• crime</li> <li>• fantasy</li> <li>• history and background of the environment</li> <li>• missions</li> <li>• murder mystery</li> <li>• premise</li> <li>• psychological</li> <li>• quests</li> <li>• romance</li> <li>• science fiction.</li> </ul>
<b><i>Plot synopsis and options</i></b> may consist of:	<ul style="list-style-type: none"> <li>• choices made by the player that influence the direction of the narrative</li> <li>• concise outlines of story narrative, including: <ul style="list-style-type: none"> <li>• secondary plotlines</li> <li>• character story and motivation</li> <li>• climax or cliffhanger</li> <li>• key interactions along the way</li> <li>• objective of the story</li> <li>• plot profile</li> <li>• resolution - what is gained or lost</li> </ul> </li> <li>• drama outline for cinematics (cut scenes)</li> <li>• executive summary</li> </ul>

	<ul style="list-style-type: none"> <li>• flowcharts</li> <li>• one page synopsis</li> <li>• one paragraph synopsis</li> <li>• one sentence synopsis</li> <li>• pitch version of synopsis.</li> </ul>
<b><i>Sourcing initial concept artwork</i></b> may involve:	<ul style="list-style-type: none"> <li>• knowledge of copyright and intellectual property protection</li> <li>• using visual research techniques to identify exemplary environments, character types and themes consistent with storyline concept</li> <li>• working collaboratively with artist and designers to develop original concepts for characters and environments in formats, such as: <ul style="list-style-type: none"> <li>• 2-D computer graphics</li> <li>• collages</li> <li>• hand rendered illustrations</li> <li>• pencil and ink sketches</li> <li>• physical models.</li> </ul> </li> </ul>
<b><i>Level specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• level-specific components: <ul style="list-style-type: none"> <li>• allies</li> <li>• base building and location</li> <li>• cinematics (cut scenes)</li> <li>• colours</li> <li>• enemies</li> <li>• graphics</li> <li>• health</li> <li>• lighting</li> <li>• non-player characters</li> <li>• resources and their harvesting</li> <li>• sounds and music</li> <li>• weapons</li> </ul> </li> <li>• location</li> <li>• stages</li> <li>• transportation devices: <ul style="list-style-type: none"> <li>• buttons</li> <li>• doors</li> <li>• keys</li> <li>• teleporters</li> <li>• tunnels and passageways.</li> </ul> </li> </ul>
<b><i>Storyboards</i></b> may include:	<ul style="list-style-type: none"> <li>• animatics, such as technical previsualisation</li> <li>• computer-generated illustrations</li> </ul>

	<ul style="list-style-type: none"><li>• existing comic strips, comic books or graphic novels</li><li>• hand-drawn illustrations</li><li>• illustrations or images displayed in sequence for the purpose of previsualising a motion picture, animation, motion graphic or interactive media sequence, including website interactivity</li><li>• photomatic, e.g. photographic storyboard</li><li>• thumbnails.</li></ul>
<b>Feedback</b> may involve:	<ul style="list-style-type: none"><li>• accepting and responding to comment, critique and suggestions from:<ul style="list-style-type: none"><li>• clients</li><li>• colleagues</li><li>• target audience representatives.</li></ul></li></ul>

## Unit Sector(s)

Game development

# ICAGAM406A Create visual design components for interactive games

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create visual design components for games and interactive media using industry standard authoring tools.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify commonly used visual design components for games and interactive media	<p>1.1 Obtain project <i>brief and documents</i></p> <p>1.2 Identify features of visual design components for games and interactive media</p> <p>1.3 Discuss <i>design considerations</i> for designing an interactive visual design component</p>
2. Identify graphics software packages used for visual design	<p>2.1 Identify and review the range of industry standard <i>graphics software</i> available</p> <p>2.2 Assess the software related to visual design component requirements</p> <p>2.3 Discuss <i>technical specifications</i> for rendering and editing processes</p> <p>2.4 Select graphics software package</p>
3. Use graphics software	<p>3.1 Run graphics software and become familiar with the interface</p> <p>3.2 Create new files and organise a file structure</p> <p>3.3 Learn required tools and features used to create visual design components</p>
4. Create visual design components for a game and interactive media	<p>4.1 Design a basic <i>graphical user interface</i> (GUI) for a game and interactive media</p> <p>4.2 Consider the interaction processes of GUI elements</p> <p>4.3 Document the design and necessary programming requirements needed to implement the GUI</p> <p>4.4 Use graphics software to create visual design components to be used for the GUI</p>
5. Evaluate implementation	<p>5.1 Demonstrate implementation to relevant <i>personnel</i></p> <p>5.2 Evaluate the usability of design components</p> <p>5.3 Reflect on possible changes to improve the visual design and interactivity of components</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of visual design components
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to graphics requirements and basic code development
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in game design and innovation
- literacy and numeracy skills to develop game design and technical design documents
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - establish clear roles and goals to achieve required game development outcomes
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical technical desktop research into visual design components for games and interactive media
- technology skills to use correct file formats.

### Required knowledge

- basic programming techniques
- human resources required in the process of creating visual design components and the technology requirements
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design
- techniques for applying concept development skills
- techniques for applying concept visualisation skills.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• demonstrate original and innovative approaches to the creative development of a GUI</li> <li>• implement game development and production strategies</li> <li>• maintain integrity of the design brief</li> <li>• develop concept art and design specifications for splash screens, start screens and game field screens consistent with a design brief</li> <li>• develop technical specifications for visual design components and overall usability</li> <li>• implement a working GUI with basic functionalities.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace experiences</li> <li>• evaluation of design brief detailing interface design components</li> <li>• review of production of visual design components</li> <li>• evaluation of working GUI with basic functionalities.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and</p>

	<p>the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Brief and documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• game design document</li> <li>• game-play designs</li> <li>• help notes</li> <li>• information design</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design and review process.</li> </ul>
<p><b><i>Design considerations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• cultural context</li> <li>• genre</li> <li>• resource limitations and constraints</li> <li>• target market.</li> </ul>
<p><b><i>Graphics software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D paint</li> <li>• Fireworks</li> <li>• Illustrator</li> <li>• Mudbox</li> <li>• Photoshop</li> <li>• Z Brush.</li> </ul>
<p><b><i>Technical specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• backup procedures</li> <li>• delivery platform</li> <li>• disk or memory space</li> <li>• format for final product</li> <li>• navigation design</li> <li>• pixel size</li> <li>• polygon count</li> <li>• source code and game assets archiving</li> <li>• target market.</li> </ul>

<p><b>Graphical user interface</b> elements may include:</p>	<ul style="list-style-type: none"> <li>• buttons and button clicks</li> <li>• command acknowledgements</li> <li>• edit boxes</li> <li>• file saving and loading</li> <li>• icons</li> <li>• list boxes</li> <li>• markers</li> <li>• menus</li> <li>• options and settings</li> <li>• picture boxes</li> <li>• pointers</li> <li>• radio buttons</li> <li>• scroll bars</li> <li>• shell</li> <li>• splash screens</li> <li>• text boxes</li> <li>• window opening</li> <li>• Windows.</li> </ul>
<p><b>Personnel</b> may include:</p>	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM407A Write scripts for interactive games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to write scripts and related content for interactive games.

### Application of the Unit

This unit applies to script writers, concept artists, storyboard artists, designers and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify story components	<p>1.1 Identify <i>creative concepts</i> for script</p> <p>1.2 Identify <i>game genres</i> and <i>story components</i> for script development</p>
2. Develop script components	<p>2.1 Develop script structure consistent with genre and game design brief</p> <p>2.2 Develop script components for main plot and <i>background stories</i> and level or mission stories consistent with genre and game design brief</p>
3. Write draft script	<p>3.1 Write <i>script synopsis</i></p> <p>3.2 Write draft script for main characters and interactions using structure and components previously determined according to the brief</p> <p>3.3 Write draft script for background stories and level/mission stories using previously determined structure and components according to the brief</p> <p>3.4 Develop character and narrator dialogue</p> <p>3.5 Initiate <i>storyboards</i> for draft scripts in required format</p>
4. Review script based on feedback	<p>4.1 Present synopsis and storyboards to client and <i>relevant personnel</i> for <i>feedback</i></p> <p>4.2 Collate and respond to comments and feedback</p> <p>4.3 Revise scripts and storyboards consistent with feedback</p> <p>4.4 Undertake <i>focus testing</i> with intended audience</p>
5. Write final script	<p>5.1 Collate and respond to comments and feedback from focus testing</p> <p>5.2 Rewrite script synopsis where required</p> <p>5.3 Rewrite script or dialogue where required</p> <p>5.4 Initiate revised storyboards where required</p> <p>5.5 Present final script in agreed format to client and colleagues</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to apply creative reasoning to determine the appropriate writing style consistent with the game design brief
- communication skills to:
  - conduct focus testing
  - liaise with personnel, clients and target audience representatives to obtain feedback on scripts
- design and writing skills to write:
  - background stories and level or mission stories consistent with the game design brief
  - character profiles, setting profiles and plot profiles
  - dialogue for scripts
  - script synopses
  - scripts for interactive games
- planning and organisational skills to make timely and efficient modifications to scripts consistent with time lines and client requirements
- technical skills to use file saving, storage and version incrementing protocols.

### Required knowledge

- budgeting and scheduling considerations for game development
- components that drive script narrative and engage the target audience
- copyright and intellectual property requirements in Australia and other markets for proposed game
- focus testing processes and procedures
- game genres and narrative structures
- industry formats for game scripts
- research methods for:
  - keeping abreast of competitors work in developing stories and scripts for games
  - obtaining factual information as a basis for character, location and narrative development
  - sourcing owners of copyright and intellectual property used in the development of games
- script structures and character profiling for interactive games
- script writing techniques and requirements for interactive games
- seeking permission from copyright owners for use of protected elements in scripts
- storyboarding techniques.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• write scripts consistent with game design brief and client requirements</li> <li>• identify the contribution of script writing to narrative development and engaging game play</li> <li>• communicate and liaise with relevant personnel in the development of scripts to meet client and audience requirements and specified quality level.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• reference materials for script writing</li> <li>• internet access for research purposes</li> <li>• range of state of the art computer games across all platforms and genres</li> <li>• range of games consoles and hand-held game devices</li> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• case studies</li> <li>• work samples or simulated workplace activities</li> <li>• observation</li> <li>• verbal questioning, such as an interview</li> <li>• written or interactive computer-based test or quiz</li> <li>• fault-finding exercises</li> <li>• reports or logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p>

	<p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Creative concepts</i></b> may be derived from:</p>	<ul style="list-style-type: none"> <li>• brainstorming</li> <li>• comics</li> <li>• current events</li> <li>• film and television scripts</li> <li>• focus group sessions</li> <li>• game design briefs</li> <li>• global trends</li> <li>• historic events</li> <li>• literature</li> <li>• political activities</li> <li>• re-interpretation of factual events</li> <li>• social phenomena.</li> </ul>
<p><b><i>Game genres</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> <li>• massively multi-player online game</li> <li>• massively multi-player online role-playing game</li> <li>• medieval</li> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> <li>• racing shooter</li> <li>• racing simulation</li> </ul>

	<ul style="list-style-type: none"> <li>• real-time strategy</li> <li>• role-playing game</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> <li>• sports</li> <li>• strategy, including: <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<i>Story components</i> may include:	<ul style="list-style-type: none"> <li>• celebrity activities</li> <li>• character motivations</li> <li>• character profiles</li> <li>• comics and graphic novels</li> <li>• cultural aspects</li> <li>• cultural traditions</li> <li>• environmental aspects or locations of story</li> <li>• fairytales</li> <li>• film and television</li> <li>• historical events</li> <li>• novels and short stories</li> <li>• performing arts: <ul style="list-style-type: none"> <li>• ballet</li> <li>• dance</li> <li>• opera</li> </ul> </li> <li>• sporting activities</li> <li>• 'what if' scenarios.</li> </ul>

<i>Script synopsis</i> may consist of:	<ul style="list-style-type: none"> <li>• concise outlines of story narrative, including: <ul style="list-style-type: none"> <li>• character story and motivation</li> <li>• climax or cliffhanger</li> <li>• key interactions along the way</li> <li>• objective of the story</li> <li>• plot profile</li> <li>• resolution - what is gained or lost</li> <li>• secondary plotlines</li> </ul> </li> <li>• drama outline for cinematics (cut scenes)</li> <li>• executive summary</li> <li>• flowcharts</li> </ul>

	<ul style="list-style-type: none"> <li>• one-page narrative synopsis</li> <li>• one paragraph synopsis</li> <li>• one sentence synopsis</li> <li>• pitch version of synopsis.</li> </ul>
<b>Storyboards</b> may include:	<ul style="list-style-type: none"> <li>• animatics (technical previsualisation)</li> <li>• computer-generated illustrations</li> <li>• existing comic strips, comic books or graphic novels</li> <li>• hand-drawn illustrations</li> <li>• illustrations or images displayed in sequence for the purpose of previsualising a motion picture, animation, motion graphic or interactive media sequence, including website interactivity</li> <li>• photomatic (photographic storyboard)</li> <li>• thumbnails.</li> </ul>
<b>Relevant personnel</b> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other writers</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• other specialist or technical staff.</li> </ul>
<b>Feedback</b> may involve:	<ul style="list-style-type: none"> <li>• seeking, accepting and responding to comment, critique and suggestions from: <ul style="list-style-type: none"> <li>• clients</li> <li>• colleagues</li> <li>• target audience representatives.</li> </ul> </li> </ul>
<b>Focus testing</b> may include:	<ul style="list-style-type: none"> <li>• actively seeking suggestions to improve script and narrative components and provide engaging game play</li> <li>• presenting storyboards and components to colleagues for comment and feedback</li> <li>• presenting storyboards to representatives of the target audience for comment and feedback.</li> </ul>

## **Unit Sector(s)**

Game development

## ICAGAM408A Use 3-D animation interface and toolsets

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use a 3-D package's animation interface and toolsets.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Locate and identify 3-D application navigation controls	<p>1.1 Using chosen <b>3-D modelling and animation software</b>, identify a range of <b>3-D navigation types</b>, including panning, zooming and rotating around the viewport</p> <p>1.2 Identify methods of use for navigation, keyboard hot keys and input procedures to improve user performance</p>
2. Locate and identify 3-D animation toolsets	<p>2.1 Identify <b>common toolsets of 3-D animation software</b></p> <p>2.2 Identify and analyse 3-D application menus and specific category types</p> <p>2.3 Use common 3-D application transformation types</p> <p>2.4 Select and use common 3-D application-specific toolset types</p>
3. Select and clarify appropriate menu categories for requirements	<p>3.1 Associate <b>menu categories</b> as required for specific tasks</p> <p>3.2 Consult with <b>relevant personnel</b> and use application hot keys for superior application interaction</p>
4. Initiate and use application-support materials	<p>4.1 Identify and research the range of <b>reference material</b> available for use in creating 3-D animation and digital effects</p> <p>4.2 Present reference material for use in the 3-D animation process</p> <p>4.3 Identify the native <b>application support procedures</b></p> <p>4.4 Access support documents and help files through hotkey and application menus</p> <p>4.5 In consultation with relevant personnel use support material as required</p>
5. Identify and plan 3-D application import and export procedures	<p>5.1 Discuss with relevant personnel <b>application file-management procedure types</b>, including opening, importing, saving and exporting</p> <p>5.2 Discuss and use application project configuration procedures with relevant personnel</p> <p>5.3 Prepare and create projects as required</p>
6. Identify and use application feedback	<p>6.1 Discuss user application feedback with relevant personnel</p> <p>6.2 Use application feedback to troubleshoot error scenarios as required</p> <p>6.3 Use feedback with inbuilt support documentation as required</p>

7. Customise application interface	7.1 Identify variation of user interface windows and panels configurations 7.2 Use custom interface for specific requirements based on toolset procedural needs
------------------------------------	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in 3-D design and innovation
- technical skills to visualise and develop concepts.

### Required knowledge

- 3-D animation production protocols
- analysis of a production brief
- development and recording of ideas
- filing media assets
- fundamental research principles
- OHS requirements for:
  - ergonomics
  - electrical safety
- principles of design and colour for use in 3-D animation and digital effects environments
- procedures for producing a storyboard and script
- technical constraints that hardware imposes on graphics requirements and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• interact and navigate with 3-D application interface and toolsets</li> <li>• interact with file management procedures</li> <li>• execute and use 3-D application native support</li> <li>• use 3-D application to user feedback</li> <li>• configure custom panel and window configurations.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• plans to source reference materials</li> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of sample workplace activities</li> <li>• evaluation of written or interactive computer-based fault-finding exercises</li> <li>• evaluation of reports and logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>3-D modelling and animation software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• ZBrush.</li> </ul>
<p><b><i>3-D navigation types</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• input procedures</li> <li>• keyboard hotkeys</li> <li>• panning</li> <li>• rotating</li> <li>• zooming.</li> </ul>
<p><b><i>Common toolsets of 3-D animation software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animation</li> <li>• animation curve editors</li> <li>• animation dope sheets</li> <li>• content selection lists</li> <li>• dynamics</li> <li>• modelling</li> <li>• movement</li> <li>• rendering</li> <li>• rotation</li> <li>• scaling</li> <li>• shader or material editors.</li> </ul>
<p><b><i>Menu categories</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animate</li> <li>• assets</li> <li>• colour</li> <li>• create</li> <li>• create UVs</li> <li>• display</li> <li>• edit</li> <li>• edit mesh</li> <li>• edit UVs</li> </ul>

	<ul style="list-style-type: none"> <li>• file</li> <li>• geometry</li> <li>• help</li> <li>• mesh</li> <li>• modify</li> <li>• normals</li> <li>• proxy</li> <li>• window.</li> </ul>
<b><i>Relevant personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• animator</li> <li>• dead-environment designer</li> <li>• designer</li> <li>• effects artist</li> <li>• environment designer</li> <li>• lead animator</li> <li>• lead artist</li> <li>• lead audio</li> <li>• lead designer</li> <li>• modeller</li> <li>• producer</li> <li>• texturer</li> <li>• trainer</li> <li>• VFX supervisor.</li> </ul>
<b><i>Reference material</i></b> may include:	<ul style="list-style-type: none"> <li>• blueprints</li> <li>• developmental drawings</li> <li>• internet research</li> <li>• museum information</li> <li>• orthographic images</li> <li>• photographs</li> <li>• schematics</li> <li>• video footage.</li> </ul>
<b><i>Application support materials</i></b> may include:	<ul style="list-style-type: none"> <li>• help files</li> <li>• reference material</li> <li>• troubleshooting.</li> </ul>
<b><i>Application file-management procedure types</i></b> may include:	<ul style="list-style-type: none"> <li>• exporting</li> <li>• importing</li> <li>• opening</li> <li>• saving.</li> </ul>

## **Unit Sector(s)**

Game development

## ICAGAM409A Create 3-D characters for interactive games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and build 3-D characters for commercial games.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research and analyse characters	<p>1.1 Determine and agree <b><i>character style</i></b> according to <b><i>client requirements</i></b></p> <p>1.2 Determine and agree <b><i>character type</i></b> and <b><i>profile</i></b></p> <p>1.3 Determine and agree <b><i>character role</i></b> and name</p> <p>1.4 Create animations for each of the 3-D models based on a study of the original character's animations</p> <p>1.5 Compare animations with originals for quality</p>
2. Design characters	<p>2.1 Develop <b><i>concept illustration</i></b> for character</p> <p>2.2 Conduct <b><i>focus testing</i></b> of concept illustration with client and representatives of target market audience</p> <p>2.3 Develop <b><i>character schematics</i></b> based on feedback and submit to client for approval</p>
3. Develop character models	<p>3.1 Construct a 3-D character model on a turntable based on character schematics</p> <p>3.2 Construct 3-D costumes, tools and accessories for character model</p> <p>3.3 Shade, texture and light complete character model</p> <p>3.4 Develop animations of key poses and transitions in consultation with animation personnel for approval</p> <p>3.5 Compare 3-D models and animations to original concept illustration for verification of quality and conformity to brief</p> <p>3.6 Submit to client for approval</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with project team and clients
- literacy skills to read technical documents and specifications
- planning and organisational skills to manage time and resources
- research skills to conduct research into character attributes and styles
- technical skills to:
  - create 2-D character schematics to construct industry grade 3-D models
  - create industry grade fully textured animated 3-D game characters using 3-D and 2-D graphics software tools
  - create 3-D characters models that meet agreed target market, technical and design requirements.

### Required knowledge

- advanced features of 3-D software packages to create 3-D character models for games
- how to interpret game design briefs
- methods of 3-D character modelling within technical parameters and constraints of game development
- technical limitations for creation of 3-D character models for games.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use 2-D and 3-D software applications to develop and realise characters for games</li> <li>• develop character designs that comply with games design brief and client requirements</li> <li>• develop character designs that are innovative and competitive with characters in games currently in the marketplace</li> <li>• test responses to character designs for aesthetic suitability with intended audience and act on feedback.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• character reference materials, such as models, illustrations, art and design books, and character photographs</li> <li>• range of state of the art games across all platforms and genres</li> <li>• range of the latest consoles and hand-held game devices</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• discussion or written report of the nominated techniques applied to character design and development</li> <li>• verbal questioning regarding reasons for use of particular hardware and software options</li> <li>• direct observation of the learner undertaking character design activities</li> <li>• project or work activities that demonstrate capacity for research to support character development</li> <li>• review of portfolios of evidence</li> <li>• completed character models on a turntable.</li> </ul>
<b>Guidance information</b>	Holistic assessment with other units relevant to the industry

<b>for assessment</b>	<p>sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
-----------------------	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Character style</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• abstract</li> <li>• caricatured</li> <li>• cartoon-like</li> <li>• comic</li> <li>• cute</li> <li>• exaggerated</li> <li>• highly realistic</li> <li>• hybrid</li> <li>• idealised</li> <li>• robotic</li> <li>• scary</li> <li>• stylised</li> <li>• symbolic.</li> </ul>
<p><b><i>Client requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• design and platform constraints:             <ul style="list-style-type: none"> <li>• 1500 to 3000 polygons</li> <li>• maximum of 40 bones for animation</li> <li>• up to four 256 by 256 texture maps</li> </ul> </li> <li>• game design brief:             <ul style="list-style-type: none"> <li>• draft pencil concept illustrations of the player character and a few of the non-player characters</li> <li>• details of player characters, including:                 <ul style="list-style-type: none"> <li>• control mechanisms</li> <li>• number and types of interaction with other non-player characters</li> <li>• number of animations</li> </ul> </li> <li>• intended audience, genre, platform and control devices</li> <li>• introduction and game overview, including list of special features and selling points</li> <li>• list of all non-player and player characters</li> <li>• other illustrations or graphics that enhance the comprehension of the document</li> <li>• title and cover art</li> </ul> </li> <li>• wants, needs and interest of the target market audience identified for the game.</li> </ul>

<p><i>Character type</i> may include:</p>	<ul style="list-style-type: none"> <li>• alien</li> <li>• animal</li> <li>• anthropomorphised food</li> <li>• anthropomorphised machine</li> <li>• anthropomorphised toy</li> <li>• anthropomorphised vehicle</li> <li>• human</li> <li>• spiritual entity</li> <li>• terrestrial</li> <li>• vegetable.</li> </ul>
<p><i>Character profile</i> may include:</p>	<ul style="list-style-type: none"> <li>• age</li> <li>• aspects of behaviour</li> <li>• change of circumstances, e.g. rich to poor</li> <li>• counterintuitive props and clothing</li> <li>• courage</li> <li>• cowardice</li> <li>• definitive visual cues</li> <li>• exaggerated physical characteristics</li> <li>• fangs</li> <li>• gender</li> <li>• intelligence</li> <li>• interpretive visual cues</li> <li>• mental and emotional attributes and personality traits</li> <li>• motivation or goals</li> <li>• naivety</li> <li>• physical attributes</li> <li>• profession</li> <li>• professional uniforms</li> <li>• props</li> <li>• race</li> <li>• religion</li> <li>• shyness</li> <li>• social butterfly</li> <li>• social status</li> <li>• strength</li> <li>• tools</li> <li>• wheelchairs.</li> </ul>
<p><i>Character role</i> may include:</p>	<ul style="list-style-type: none"> <li>• antagonists</li> <li>• extras</li> <li>• minor characters</li> <li>• objects of desire</li> <li>• partners or sidekicks</li> </ul>

	<ul style="list-style-type: none"> <li>• protagonists</li> <li>• secret agendas</li> <li>• supporting roles.</li> </ul>
<b>Concept illustration</b> may include:	<ul style="list-style-type: none"> <li>• 2-D hand rendered drawing</li> <li>• 2-D or 3-D digital illustration</li> <li>• 2-D sketch</li> <li>• collage or montage</li> <li>• photograph</li> <li>• storyboard.</li> </ul>
<b>Focus testing</b> may include:	<ul style="list-style-type: none"> <li>• analysis and written summary of focus test discussions, outcomes and results</li> <li>• audience perceptions of: <ul style="list-style-type: none"> <li>• age that character appeals to</li> <li>• 'coolness' factor</li> <li>• value of character</li> </ul> </li> <li>• consultation with groups representing target market audience for finished game.</li> </ul>
<b>Character schematics</b> may include:	<ul style="list-style-type: none"> <li>• scaled 2-D Illustrations of front, back, side and top of the character</li> <li>• scaled 2-D illustration to illustrate the character in various action poses, including: <ul style="list-style-type: none"> <li>• greeting, hitting, pushing, pulling and colliding</li> <li>• jumping, crawling, climbing, shooting and rolling</li> <li>• sitting and riding</li> <li>• walking and running</li> </ul> </li> <li>• scaled 2-D sketches of the character face in various expressions: <ul style="list-style-type: none"> <li>• happy, angry, sad and confused</li> <li>• situational responses</li> <li>• viseme set, such as facial expressions while talking</li> </ul> </li> <li>• scale comparison illustrations, including character next to: <ul style="list-style-type: none"> <li>• a building</li> <li>• a vehicle</li> <li>• other characters</li> </ul> </li> <li>• scale or dimension indicators.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM410A Develop 3-D components for interactive games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and create 3-D components within a games environment.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Confirm component requirements within game context	1.1 Identify definition and purpose of <b>3-D components</b> with examples 1.2 Identify context of <b>component design</b> within game design document 1.3 Create list of required components
2. Identify component integration methods within game architecture	2.1 Discuss component <b>format</b> , file extensions and the ramifications of choice 2.2 Establish methods of component loading and usage
3. Establish content creation pipeline	3.1 Finalise required component list 3.2 Discuss hardware and <b>software</b> required for the creation of 3-D components and assets 3.3 Discuss methods of file archiving and naming of components and assets 3.4 Establish deadlines for component creation
4. Integrate components for testing and analysis	4.1 Identify evaluation methods for quality assurance 4.2 Ensure that produced components meet the established quality requirements 4.3 Make changes to components as required by testing and evaluation 4.4 Submit finalised assets with archiving format outlined in assignment brief

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- initiative and enterprise skills to:
  - create components and assets suitable for project theme
  - demonstrate creativity in the production of a consistent, repeatable style between 3-D components
- planning and organisational skills to:
  - establish clear goals and deadlines to achieve project and assignment outcomes
  - meet project deadlines and criteria
- teamwork skills to:
  - contribute as a functioning member of a productive team
  - ensure that individual assets are delivered on time
- technical skills to:
  - resolve basic hardware, software and other technical issues
  - use correct file formats and archiving procedures.

### Required knowledge

- current game hardware and software products
- game-engine architecture and methods used in component importing
- processes and techniques related to:
  - creation of 3-D objects within industry standard modelling software
  - use of industry formats for the development of 3-D models and objects.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• generate 3-D components for games</li> <li>• follow a clearly defined schedule and production pipeline for assets.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities and fault-finding exercises</li> <li>• verbal or written questioning to determine candidate's knowledge of: <ul style="list-style-type: none"> <li>• game-engine architecture and methods used in component importing</li> <li>• current game hardware and software products</li> </ul> </li> <li>• review of reports and logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.

## Unit Sector(s)

Game development

## ICAGAM412A Design interactive media

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and implement technologies relating to human-computer interaction.

### Application of the Unit

The unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Define human-computer hardware interface devices	<p>1.1 Identify <i>standard human-computer interaction devices</i></p> <p>1.2 Identify <i>game-specific human-computer interaction devices</i> and the <i>common controls</i> used in their implementation</p>
2. Research common event handling systems	<p>2.1 Identify and review industry standard event handling systems used in <i>application libraries</i></p> <p>2.2 Create and application, accessing and using technologies and showcasing captured events from hardware devices</p> <p>2.3 Discuss considerations for human-computer interaction device selection</p>
3. Understand commonly used graphical user interface (GUI) widget sets	<p>3.1 Identify <i>common widgets</i> and their usage within an application environment</p> <p>3.2 Identify and review industry standard <i>graphical user interface libraries</i> and their relevancy within game-engine software</p> <p>3.3 Discuss considerations for selection of widgets within a game <i>heads up display</i> (HUD)</p> <p>3.4 Use human-computer interface devices and event handling call-backs in the creation of an application, showcasing captured events with GUI widgets</p>
4. Design a simple media software device	<p>4.1 Discuss and <i>design a prototype</i> for the development of a custom user interface widget to be used within a game heads up display environment</p> <p>4.2 Select GUI software for implementation and discuss ramifications of selection</p>
5. Build and implement a simple media software device	<p>5.1 Integrate all custom widget elements as required by prototype specifications</p> <p>5.2 Make final checks to ensure functionality conforms to the original design</p> <p>5.3 Save into specified storage systems</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - assess suitability of software and hardware technologies within project context
  - discuss suitability of custom widget prototype within project context
  - establish clear advantages, disadvantages and limitations of technologies and their implementation
- planning and organisational skills to:
  - establish clear goals to achieve required software development outcomes
  - meet project deadlines
- research skills to:
  - conduct professional research into software and hardware technologies required for successful completion of project
  - understand and implement efficient design patterns for professional completion of project
- technical skills to:
  - resolve basic hardware, software and other technical issues associated with software production
  - use correct file formats and archiving procedures.

### Required knowledge

- basic programming techniques
- specific terminology used by computer game developers
- technical constraints that hardware imposes on software development, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• explain commonly used hardware and software as it applies to a human-computer interaction environment</li> <li>• develop simple applications using correct methods of hardware event handling</li> <li>• use such technologies within the context of a video game environment</li> <li>• produce a custom control for use within a large project</li> <li>• present a completed project on time.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• verbal or written questioning to confirm knowledge of design processes and methods used to resolve issues and problems</li> <li>• analysis of fault-finding exercises</li> <li>• evaluation of reports and logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Standard human-computer interface devices</i></b> may include:	<ul style="list-style-type: none"> <li>• keyboards</li> <li>• mice</li> <li>• track balls</li> <li>• track pads</li> <li>• web cameras.</li> </ul>
<b><i>Game-specific human-computer interaction devices</i></b> may include:	<ul style="list-style-type: none"> <li>• game pads</li> <li>• gaming keyboards</li> <li>• gaming mice</li> <li>• joysticks.</li> </ul>
<b><i>Common controls</i></b> of devices may include:	<ul style="list-style-type: none"> <li>• analog hats</li> <li>• buttons</li> <li>• digital pads</li> <li>• joysticks</li> <li>• keys.</li> </ul>
<b><i>Application libraries</i></b> may include:	<ul style="list-style-type: none"> <li>• DirectX</li> <li>• Irrlicht</li> <li>• Microsoft Visual Studio</li> <li>• Ogre</li> <li>• OpenGL</li> <li>• Simple DirectMedia Layer (SDL).</li> </ul>
<b><i>Common widgets</i></b> may include:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• check boxes</li> <li>• containers</li> <li>• drop down menus</li> <li>• environments</li> <li>• images</li> <li>• input text boxes</li> <li>• input text fields</li> <li>• labels</li> <li>• radio buttons</li> <li>• scroll bars</li> <li>• tabs</li> <li>• Windows.</li> </ul>

<b>Graphical user interface libraries</b> may include:	<ul style="list-style-type: none"> <li>• Carbon</li> <li>• Cocoa</li> <li>• GLUI</li> <li>• Guichan</li> <li>• Java Swing</li> <li>• Microsoft Foundation Classes</li> <li>• WX Widgets.</li> </ul>
<b>Heads up displays</b> may involve the use of:	<ul style="list-style-type: none"> <li>• chat windows</li> <li>• context menus</li> <li>• dialogue screens</li> <li>• health bars, ammunition bars and mana bars</li> <li>• inventory screens</li> <li>• main menus</li> <li>• objective guides</li> <li>• overhead maps, mini maps and compasses</li> <li>• pause screens.</li> </ul>
<b>Designing a prototype</b> may involve:	<ul style="list-style-type: none"> <li>• defining a clear context in which the custom widget will be implemented in and used for</li> <li>• having a firm knowledge of existing game-engine architecture</li> <li>• prototyping for a specific purpose</li> <li>• researching existing widgets used in existing products.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM413A Design and create 3-D digital models

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and create 3-D models.

### Application of the Unit

The unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Clarify work requirements	<p>1.1 Clarify <i>requirements</i> and <i>purpose</i> for design and creation of 3-D digital models, with reference to <i>production documentation</i></p> <p>1.2 Clarify work flow sequences to ensure that <i>production</i> schedule deadlines are met with <i>relevant personnel</i></p> <p>1.3 Select <i>software</i> that best suits the type of production and <i>delivery platform</i> for which 3-D digital models are being designed and created</p> <p>1.4 Gather and analyse <i>reference materials</i> to help with design and visualisation of 3-D models</p>
2. Design 3-D digital models	<p>2.1 Design and sketch concept drafts of 3-D model</p> <p>2.2 Create concept art of 3-D model</p> <p>2.3 Create prototypes of 3-D model</p>
3. Create 3-D digital models	<p>3.1 Use software features to block out models to determine correct proportions related to reference materials</p> <p>3.2 Manipulate software features to apply basic lighting and shaders as required</p> <p>3.3 Ensure that models' topology allows appropriate deformation, as required</p> <p>3.4 <i>Progressively refine</i> and check <i>integrity</i> of models until they meet design requirements</p> <p>3.5 Submit models to relevant personnel for comment on whether production requirements have been met and make final adjustments as required</p> <p>3.6 Render and output models in required <i>format</i> and submit to relevant personnel by agreed deadlines</p> <p>3.7 Make backup copies of files and complete workplace documentation according to enterprise procedures</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication, teamwork and literacy skills to:
  - complete workplace documentation
  - interpret and clarify written or verbal instructions
  - respond constructively to feedback received from other team members
  - work as a member of a production team, both independently on assignment and under direction
- initiative and creativity skills to design, visualise and create 3-D digital models of a range of inanimate objects
- self-management and planning skills to:
  - meet deadlines
  - prioritise work tasks
  - seek expert assistance when problems arise
- technical skills to:
  - make backup copies of files and store appropriately
  - manage files and directories using standard naming conventions and version control protocols
  - use industry-current software applications to design and create 3-D models to specifications.

### Required knowledge

- 3-D digital model design techniques
- 3-D digital modelling techniques
- basic knowledge of the stages in the production process from initial design through to finished product
- common issues and challenges that arise in the context of designing and creating 3-D digital models
- features of a range of delivery platforms
- geometry as it applies to the design and creation of realistic 3-D digital models
- OHS standards as they relate to working for periods of time on computers
- roles and responsibilities of project team members in the relevant industry sector
- scale, form, weight and volume.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design and create 3-D digital models that:             <ul style="list-style-type: none"> <li>• demonstrate efficient use of geometry and attention to detail</li> <li>• meet creation design parameters</li> </ul> </li> <li>• work collaboratively with development team and meet deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• verbal or written questioning of the candidate's knowledge of the stages in the production process from initial design through to finished product</li> <li>• analysis of fault-finding exercises</li> <li>• evaluation of reports and logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.

## Unit Sector(s)

Game development

## ICAGAM414A Create audio for digital games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce and manipulate audio assets for computer games using a variety of tools.

### Application of the Unit

The unit applies to game musicians, audio technicians, audio programmers and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research and document game audio requirements	<p>1.1 Explain the evolution of audio hardware and <b>audio formats</b></p> <p>1.2 Provide a historical perspective on how audio has become integrated into computer games</p> <p>1.3 Identify current trends and speculate on the future of game audio</p>
2. Research and document the use of audio in computer games	<p>2.1 Identify the different methods for using audio in computer games</p> <p>2.2 Explore the role of music in creating mood and atmosphere</p> <p>2.3 Explain how sound effects and vocals are used within computer games</p>
3. Source existing sound effects, music tracks and voice recordings	<p>3.1 Find sources of sound effects, music tracks and voice recordings</p> <p>3.2 Create and maintain a small collection of audio assets</p> <p>3.3 Identify different audio formats</p> <p>3.4 Differentiate between compressed and uncompressed audio formats</p> <p>3.5 Identify different <b>genres</b> of music</p> <p>3.6 Develop an awareness of audio <b>copyright laws</b> and royalty free audio</p>
4. Record and manipulate audio for a game	<p>4.1 Record character voices, music and sound effects</p> <p>4.2 Develop a sound track for a game using audio editing</p> <p>4.3 Use <b>audio-editing software</b> to rearrange audio samples and apply audio effects</p> <p>4.4 Select appropriate sample format and bit rate</p> <p>4.5 Normalise audio samples to make volume uniform</p> <p>4.6 Trim audio samples</p> <p>4.7 Apply audio effects</p> <p>4.8 Export audio to a suitable format</p>
5. Create sound effects or music for a game	<p>5.1 Identify <b>digital sound waveforms</b></p> <p>5.2 Apply <b>basic music theory</b> to simple <b>music-creation tool</b></p> <p>5.3 Determine suitable musical notation</p>

	<p>5.4 Identify and use musical creation tools</p> <p>5.5 Compose a simple piece of music for a game</p> <p>5.6 Create various sound effects for a game</p>
6. Research audio-programming libraries	<p>6.1 Compare and contrast functional capabilities of <i>audio-programming libraries</i></p> <p>6.2 Explain the use of channels and mixing</p>
7. Integrate sound, music and vocals into a computer game	<p>7.1 Play a mixture of cached and streaming audio sources</p> <p>7.2 Integrate sound effects in response to different events</p> <p>7.3 Incorporate ambient music into sections of the computer game</p> <p>7.4 Locate and play positional audio sources</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate audio concepts and related sound requirements to designers and concept artists
  - seek and respond to feedback from target audience representatives, clients and colleagues
  - technical skills to generate, integrate, manipulate and record digital audio into a game project.

### Required knowledge

- audio-editing tools
- audio formats
- audio-programming libraries
- copyright as it applies to audio recordings
- music theory as it relates to using music-creation tools.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• record sound sources</li> <li>• generate sound effects</li> <li>• compose simple music tracks</li> <li>• manipulate audio assets with suitable tools</li> <li>• use audio programming libraries in a game.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware</li> <li>• microphone and headphone sets</li> <li>• input device, e.g. keyboard and mouse</li> <li>• output device, such as monitor and speakers</li> <li>• digital audio editing software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of audio that has been included in a games project</li> <li>• verbal or written questioning concerning aspects of game audio, including:             <ul style="list-style-type: none"> <li>• evolution of audio hardware and use of audio in computer games</li> <li>• tools and techniques used</li> <li>• capabilities of audio libraries.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.***

<b><i>Audio formats</i></b> may include:	<ul style="list-style-type: none"> <li>• music, such as mp3, ogg, xm, s3m, it, mod and midi</li> <li>• sound effects, such as wav, raw and voc.</li> </ul>
<b><i>Genres</i></b> may include:	<ul style="list-style-type: none"> <li>• dance</li> <li>• jazz</li> <li>• pop</li> <li>• rap</li> <li>• rock</li> <li>• techno</li> <li>• trance.</li> </ul>
<b><i>Copyright laws</i></b> may include:	<ul style="list-style-type: none"> <li>• Australian Copyright Act 1968</li> <li>• international copyright laws.</li> </ul>
<b><i>Audio-editing software</i></b> may include:	<ul style="list-style-type: none"> <li>• Audacity</li> <li>• Music Editor Free</li> <li>• Power Sound Editor</li> <li>• Wavosaur.</li> </ul>
<b><i>Digital sound waveforms</i></b> may include:	<ul style="list-style-type: none"> <li>• noise</li> <li>• pulse</li> <li>• sine</li> <li>• square</li> <li>• triangle.</li> </ul>
<b><i>Basic music theory</i></b> may include:	<ul style="list-style-type: none"> <li>• bass or treble clef</li> <li>• notation, such as semi-quavers and quavers</li> <li>• notes</li> <li>• scales and chords</li> <li>• timing.</li> </ul>
<b><i>Music-creation tools</i></b> may include:	<ul style="list-style-type: none"> <li>• FL Studio</li> <li>• Garage Band</li> <li>• MusicShake.</li> </ul>
<b><i>Audio-programming libraries</i></b> may include:	<ul style="list-style-type: none"> <li>• Audierre</li> <li>• Bass Library</li> <li>• DirectSound</li> <li>• FMOD</li> </ul>

Game development

## ICAGAM415A Develop simple environments for 3-D games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop simple environments for different genres of games.

### Application of the Unit

This unit applies to concept artists, matte painters, game designers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research and analyse brief requirements	<p>1.1 Interpret <i>brief</i> and clarify design requirements in consultation with <i>client</i></p> <p>1.2 Identify <i>design and technical constraints</i> and innovative features of the <i>environments</i></p> <p>1.3 Identify <i>software</i>, media and file formats for digital imagery</p> <p>1.4 Identify production workflow requirements and develop production pipeline to meet client requirements</p>
2. Design and visualise environment	<p>2.1 Develop <i>concept illustration</i> for environment consistent with <i>game genre</i></p> <p>2.2 Conduct <i>focus testing</i> of concept illustration with client and representatives of target market audience</p> <p>2.3 Submit to client for approval and feedback</p> <p>2.4 Make adjustments to concept illustration based on comment and feedback</p>
3. Verify and validate environment	<p>3.1 Create <i>environment prototype</i> according to design brief, guidelines and feedback on concept illustration</p> <p>3.2 Conduct focus testing and seek recommendations for the further enhancement of the environment prototype documented</p> <p>3.3 Make adjustments to environment prototype based on comment and feedback</p> <p>3.4 Submit to client for approval and feedback</p>
4. Develop and evolve environment	<p>4.1 Further enhance environment prototype based on the recommendations generated from focus testing</p> <p>4.2 Submit to client for approval and feedback</p> <p>4.3 Finalise environment design</p> <p>4.4 Save and archive files in agreed formats and repository</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate technical requirements of environment design against resources and timeframes
- communication skills to liaise with project team and clients
- initiative and enterprise skills to:
  - devise efficient and innovative approaches to texturing and shading
  - provide practical support and give feedback to colleagues and management
- literacy skills to read technical documents and specifications
- planning and organisational skills to manage time and resources
- technical skills to:
  - collect, interpret and communicate focus testing results objectively and effectively
  - create environment artwork within style and quality guidelines
  - design and run focus testing
  - exercise a high level of creative ingenuity in environment design and innovation
  - manage environment evolution and change with effective processes and procedures to mitigate risk and improve environment quality
  - use related computer graphics applications
  - visual research skills to source reference materials for the creation of unique environments.

### Required knowledge

- budgeting and scheduling considerations for environment creation in games, with consideration given to human resources
- different environment requirements for different genres of game
- how to interpret environment design briefs
- role and position of interactive environments in commercial game development, game duration and quality
- processes and procedures to facilitate quality and innovation of environment development
- prototyping tools and techniques for commercial environment development in games
- research methods used to stay abreast of the latest developments in game environment design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use 2-D and 3-D software applications to develop and realise characters for games</li> <li>• develop environment designs that comply with games design brief and client requirements</li> <li>• develop environment designs that are innovative and competitive with characters in games currently in the marketplace</li> <li>• test responses to environment designs for aesthetic suitability with intended audience and act on feedback.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware and software</li> <li>• input device, such as stylus tablet, keyboard and mouse</li> <li>• output device, such as monitor, TV, printer and speakers</li> <li>• game design document or specifications</li> <li>• style shots</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• discussion and written report of the nominated techniques applied to environment design and realisation</li> <li>• discussion with learner and observation of the integration of environment design and evolution into the overall production pipeline</li> <li>• verbal questioning regarding reasons for use of particular hardware and software options</li> <li>• project or work activities that show research and reference sourcing of material to inform environment design</li> <li>• written and verbal reports or documentation showing research and production plan</li> <li>• review of portfolios of evidence</li> <li>• completed textured, shaded and rendered exemplars.</li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Brief</i></b> may include:	<ul style="list-style-type: none"> <li>• background stories</li> <li>• descriptions of desired look and feel, i.e. aesthetic style</li> <li>• game design document</li> <li>• game overview, including list of special features and selling points</li> <li>• game walkthroughs</li> <li>• illustrations or graphics that enhance the comprehension of the document</li> <li>• intended audience</li> <li>• list of buildings</li> <li>• list of levels or missions</li> <li>• list of non-player and player characters</li> <li>• list of vehicles</li> <li>• references to existing bodies of graphical user interface (GUI) artwork and styles</li> <li>• references to existing game environments</li> <li>• storyboards</li> <li>• verbal instructions</li> <li>• written instructions.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D artists</li> <li>• animators</li> <li>• art directors</li> <li>• designers</li> <li>• external clients</li> <li>• modellers</li> <li>• technical directors.</li> </ul>
<b><i>Design and technical constraints</i></b> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• design specifications</li> <li>• file formats for output and end use</li> <li>• genre and platform</li> <li>• technical requirements</li> <li>• technical specifications.</li> </ul>
<b><i>Environments</i></b> may include:	<ul style="list-style-type: none"> <li>• exteriors:             <ul style="list-style-type: none"> <li>• alien</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• fantasy</li> <li>• historic</li> <li>• natural</li> <li>• underwater</li> <li>• urban</li> <li>• interiors: <ul style="list-style-type: none"> <li>• building</li> <li>• confined spaces</li> <li>• vehicle.</li> </ul> </li> </ul>
<i>Software</i> may include:	<ul style="list-style-type: none"> <li>• 3-D Studio Max</li> <li>• Animator Pro</li> <li>• AutoCAD</li> <li>• AutoCAD Revit 9</li> <li>• Blender</li> <li>• Bodypaint</li> <li>• Cinema 4D</li> <li>• Combustion</li> <li>• CorelDraw</li> <li>• Deep paint</li> <li>• Electric Image</li> <li>• Form Z</li> <li>• Houdini</li> <li>• Illustrator</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Photoshop</li> <li>• Pixie</li> <li>• POV-Ray</li> <li>• Renderman</li> <li>• Rhino</li> <li>• Shake</li> <li>• Soft Image or XSI</li> <li>• Z Brush.</li> </ul>
<i>Concept illustration</i> may include:	<ul style="list-style-type: none"> <li>• 2-D hand rendered drawing</li> <li>• 2-D or 3-D digital illustration</li> <li>• 2-D sketch</li> <li>• collage or montage</li> <li>• photograph</li> <li>• storyboard.</li> </ul>
<i>Game genre</i> may include:	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> </ul>

	<ul style="list-style-type: none"> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> <li>• massively multi-player online game</li> <li>• massively multi-player online role-playing game</li> <li>• medieval</li> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> <li>• racing shooter</li> <li>• racing simulation</li> <li>• real-time strategy</li> <li>• role-playing game</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> <li>• sports</li> <li>• strategy, including:             <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<p><b><i>Focus testing</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• documentation of high-level focus test objectives</li> <li>• focus test implementation plan (test plan) document to realise focus test objectives and the procedures and processes to be followed</li> <li>• test group members based on test plan, examples of criteria may include:             <ul style="list-style-type: none"> <li>• age</li> <li>• sex</li> <li>• location</li> <li>• other socioeconomic factors</li> </ul> </li> <li>• appropriate environment and facilities for focus testing based on test-plan requirements</li> </ul>

	<ul style="list-style-type: none"><li>• documentation of focus test results according to test plan.</li></ul>
<i>Environment prototype</i> may include:	<ul style="list-style-type: none"><li>• a modelled and textured environment in which characters and objects interact</li><li>• simulated game play, where the camera follows a game character through the environment demonstrating as many of the environment's features as possible</li><li>• simulated fly through, where the camera follows a predetermined path through the environment demonstrating as many of the environment's features as possible.</li></ul>

## Unit Sector(s)

Game development

## ICAGAM416A Prepare and complete image rendering processes

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to prepare for and complete simple rendering processes for 3-D modelling, animation and game development.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse rendering requirements	<p>1.1 Identify <i>equipment and media</i> required for project</p> <p>1.2 Identify the features of rendering <i>software</i> packages used in the film and games industries</p> <p>1.3 Analyse design brief or other reference sources to <i>plan</i> and determine rendering requirements</p>
2. Select a suitable rendering application to achieve desired appearance	<p>2.1 Select rendering software with capability to achieve desired effects within timeframe and budget</p> <p>2.2 Confirm selection is according to the brief, system limitations and requirements</p>
3. Prepare rendering application for desired outcome	<p>3.1 Select and apply appropriate image resolutions, image aspect ratio and pixel ratio</p> <p>3.2 Adjust renderer attributes to obtain desired anti-aliasing</p> <p>3.3 Adjust renderer attributes to obtain other desired visual effects</p>
4. Check render integrity and quality	<p>4.1 Refine render integrity</p> <p>4.2 Re-link any missing images and textures</p> <p>4.3 Test render times for optimising process</p> <p>4.4 Test alpha channels and opacity matts</p> <p>4.5 Test render layers and passes</p>
5. Optimise images for render processes	<p>5.1 Complete <i>pre-rendering optimisation tasks</i></p> <p>5.2 Adjust and refine renderer attributes to optimise render times</p> <p>5.3 Select appropriate file format for output according to the brief</p> <p>5.4 Select appropriate filenames and output destinations</p>
6. Render images and save files appropriately	<p>6.1 Undertake final rendering processes</p> <p>6.2 Store or archive files</p> <p>6.3 Review completed render to ensure compliance with system and brief</p> <p>6.4 Confirm rendering with <i>relevant personnel</i></p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate technical requirements of rendering against resources and timeframes
- communication skills to liaise with project team and clients
- initiative and enterprise skills to:
  - devise efficient and innovative approaches to optimise rendering capacity
  - provide practical support and give feedback to colleagues and management
- literacy skills to read technical documents
- planning and organisational skills to manage time and resources
- technical skills to administer render farm and use related computer graphics applications.

### Required knowledge

- features of software used for:
  - 3-D animation
  - 3-D modelling
  - appropriate file sizes and file formats
  - lighting
  - rendering
  - scheduling of production components
  - shading
  - texturing
- interpreting rendering briefs
- rendering optimisation techniques
- rendering requirements for games
- using computer networks for rendering.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• adhere to rendering brief requirements</li> <li>• design and comprehend rendering tasks</li> <li>• use and optimise render components for best performance</li> <li>• adhere to system requirements related to file sizes and formats</li> <li>• store rendered components in an organised manner for any further use.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware and software</li> <li>• input device, e.g. stylist tablet, keyboard and mouse</li> <li>• output device, such as monitor, TV, printer and speakers</li> <li>• models and scenes to be rendered</li> <li>• style shots</li> <li>• rendering briefs or specifications and schedules</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• discussion and written report of the nominated techniques applied to rendering</li> <li>• discussion with learner and observation of development of a rendering pipeline</li> <li>• verbal questioning regarding reasons for use of hardware and software to produce optimum render process and product</li> <li>• direct observation of the learner using rendering software</li> <li>• project or work activities that show research and reference sourcing to gain best rendered effects</li> <li>• written and verbal reports or documentation showing research and production plan</li> <li>• review of portfolios of evidence</li> <li>• review of completed and rendered image or sequence.</li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Equipment and media</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D animation software</li> <li>• computer workstation</li> <li>• ergonomic furniture</li> <li>• hubs</li> <li>• input device, e.g. stylist tablet, keyboard and mouse</li> <li>• output device, such as monitor, TV, printer and speakers</li> <li>• render farm</li> <li>• render network distribution software</li> <li>• rendering software</li> <li>• switch.</li> </ul>
<p><b><i>Software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D Studio Max</li> <li>• Animator Pro</li> <li>• AutoCAD</li> <li>• AutoCAD Revit 9</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Combustion</li> <li>• CorelDraw</li> <li>• Electric Image</li> <li>• Form Z</li> <li>• Houdini</li> <li>• Illustrator</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Photoshop</li> <li>• Pixie</li> <li>• POV-Ray</li> <li>• Renderman</li> <li>• Rhino</li> <li>• Shake</li> <li>• Soft Image or XSI</li> <li>• Z Brush.</li> </ul>
<p><b><i>Plan</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• lighting</li> <li>• networking</li> </ul>

	<ul style="list-style-type: none"> <li>• production management</li> <li>• production planning</li> <li>• research</li> <li>• shading</li> <li>• team discussions</li> <li>• texturing.</li> </ul>
<i>Pre-rendering optimisations tasks</i> may include:	<ul style="list-style-type: none"> <li>• assessing options with key personnel</li> <li>• deleting unnecessary geometry and components</li> <li>• optimising and refining for best render performance</li> <li>• organisation of output</li> <li>• preparing layer or pass control</li> <li>• preparing opacity mattes and alpha channels</li> <li>• preparing renderer attributes</li> <li>• rendering</li> <li>• selection of most appropriate renderer for specific outcome</li> <li>• testing and diagnosing rendering issues.</li> </ul>
<i>Relevant personnel</i> may include:	<ul style="list-style-type: none"> <li>• animator</li> <li>• designer</li> <li>• modeller</li> <li>• programmer</li> <li>• shading and texture artist</li> <li>• systems support officer</li> <li>• technical director.</li> </ul>

Game development

# ICAGAM417A Apply digital effects to interactive products

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply digital effects to an interactive product.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other relevant personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify and apply an interactive concept map of the production	<p>1.1 Catalogue individual components to be applied to the presentation</p> <p>1.2 Identify and apply an interactive concept map showing components in a logical layout and structure</p> <p>1.3 Prepare an interactive storyboard for the production</p>
2. Identify and apply digital effect components for the production	<p>2.1 Identify method for applying digital effect framework into presentation</p> <p>2.2 Apply framework for the digital effects using industry standard methods</p> <p>2.3 Refine digital effects framework</p> <p>2.4 Ensure framework conforms to <i>project specifications</i></p>
3. Identify and apply digital effect components for inclusion in the presentation	<p>3.1 Identify digital effect components for inclusion</p> <p>3.2 Confirm that digital effect components are in an appropriate format for the framework</p> <p>3.3 Apply digital effect components to framework for inclusion in product presentation</p>
4. Apply all the above components into a functioning and well-designed interactive product	<p>4.1 Apply all <i>media components</i> in authoring environment</p> <p>4.2 Identify necessary digital effects programming to ensure satisfactory results</p> <p>4.3 Identify inconsistencies within digital effects</p> <p>4.4 Review and test the design to ensure it meets the creative and technical requirements of the <i>brief</i></p> <p>4.5 Apply runtime version of presentation for inclusion in product</p> <p>4.6 Ensure that presentation runs satisfactorily on all target platforms</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- literacy and numeracy skills to read and analyse briefs, work instructions, and technical and conceptual information
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into integrating digital effects components
- technical skills to:
  - apply digital effect components to a presentation
  - integrate a framework to incorporate digital effect components into a presentation.

### Required knowledge

- component-based programming skills
- OHS requirements for ergonomics
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design
- techniques for applying concept development skills
- techniques for applying concept visualisation skills
- techniques for applying framework integration skills.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply the principles of effective and creative design and visual communication in order to produce a functioning and well-designed interactive product.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of sample workplace activities</li> <li>• evaluation of written or interactive computer-based fault-finding exercises</li> <li>• evaluation of reports and logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Project specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• access to facilities and resources</li> <li>• budget</li> <li>• deliverables</li> <li>• delivery platform</li> <li>• disc space</li> <li>• milestones</li> <li>• prototyping</li> <li>• technical issues, such as:             <ul style="list-style-type: none"> <li>• testing plan</li> <li>• timeframe.</li> </ul> </li> </ul>
<p><b><i>Media components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• authoring software</li> <li>• computer workstation</li> <li>• ergonomic furniture.</li> </ul>
<p><b><i>Brief</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animation</li> <li>• budget</li> <li>• graphics</li> <li>• images</li> <li>• photographs</li> <li>• sound</li> <li>• technical issues</li> <li>• text</li> <li>• timeframe</li> <li>• video.</li> </ul>

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Clarify animation requirements of models</p>	<p>1.1 Clarify <i>animation</i> requirements and <i>design specifications</i> for the model, in consultation with <i>relevant personnel</i> and according to <i>production documentation</i></p> <p>1.2 Examine the most appropriate <i>animation techniques</i> for the animation to determine which <i>modelling techniques</i> to use</p> <p>1.3 Identify the <i>file format</i> and <i>delivery platform</i> for animated sequences</p> <p>1.4 Identify <i>factors</i> that may influence animation design approach</p> <p>1.5 Clarify work flow sequences, in consultation with relevant personnel, to ensure that production schedule deadlines are met</p>
<p>2. Plan approach</p>	<p>2.1 Research animations, artworks and other creative sources that may inspire visual design ideas</p> <p>2.2 Generate a range of animation ideas that are technically feasible, respond to briefs and provide creative solutions to all design issues</p> <p>2.3 Present animation ideas to relevant personnel using appropriate <i>design techniques</i></p> <p>2.4 Adjust approach to incorporate feedback and agree on final design concepts</p> <p>2.5 Discuss and select <i>animation software</i> with relevant personnel to ensure that animated sequences of the model meet specified outcomes</p> <p>2.6 Analyse <i>audio assets</i> supplied for animations as required</p>
<p>3. Produce animated sequences for review</p>	<p>3.1 Create animations of models using animation and modelling techniques to suit design requirements</p> <p>3.2 Apply basic <i>animation principles, screen principles, visual design principles</i> and <i>communication principles</i></p> <p>3.3 Apply real world camera techniques to virtual cameras used in animation</p> <p>3.4 Render completed animated sequences</p> <p>3.5 Save and store animated sequences using appropriate output file formats, standard naming conventions and version control protocols</p> <p>3.6 Present animated sequences of simple models to relevant personnel for evaluation by agreed deadlines</p>

4. Finalise animated sequences	4.1 Review animated sequences to assess creative solutions to design briefs, appropriateness to users or audience, and technical feasibility 4.2 Discuss and confirm with relevant personnel additional requirements or modifications and complete changes as required
--------------------------------	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication, teamwork and literacy skills to:
  - complete workplace documentation
  - interpret and clarify written or verbal instructions
  - respond constructively to feedback received from other team members
  - work as a member of a production team, both independently on assignment and under direction
- conceptual and creative skills to:
  - generate feasible ideas for animated sequences of models
  - maintain design integrity
  - produce convincing animations incorporating movement and timing
- self-management and planning skills to:
  - meet deadlines
  - prioritise work tasks
  - seek expert assistance when problems arise
- technical skills to:
  - apply the principles of basic screen, visual design and communication to produce animated sequences of models
  - manage files and directories using standard naming conventions and version control protocols
  - output animated sequences in appropriate file formats for a range of delivery platforms
  - use industry-current animation software to develop digitally animated sequences.

### Required knowledge

- basic digital animation techniques
- basic screen principles
- basic knowledge of the stages in the production process from initial design through to finished product
- features of a range of delivery platforms
- issues and challenges that arise in the context of creating simple models for digital animations
- OHS standards as they relate to working for periods of time on computers
- principles of animation
- principles of visual design and communication
- roles and responsibilities of project team members in the relevant industry sector.

## Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create digital animated sequences of a model that:             <ul style="list-style-type: none"> <li>• demonstrate the principles of simple model animation, basic screen, visual design and communication</li> <li>• meet the technical requirements of specific platforms</li> <li>• satisfy the design brief and client requirements</li> </ul> </li> <li>• meet production deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• verbal or written questioning of issues and challenges that arise in the context of creating simple models for digital animations</li> <li>• evaluation of a digital animated sequence of a model.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required</p>

	knowledge.
--	------------

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Animation</i></b> may include:	<ul style="list-style-type: none"> <li>• basic games</li> <li>• buttons</li> <li>• characters</li> <li>• elements</li> <li>• illustrations</li> <li>• logos</li> <li>• models</li> <li>• morphs or blend shapes</li> <li>• panoramas</li> <li>• puzzles</li> <li>• simulated sequences</li> <li>• text</li> <li>• titles and credits.</li> </ul>
<b><i>Design specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• characters and objects</li> <li>• delivery platform</li> <li>• hardware specifications, including memory size (RAM)</li> <li>• key frames</li> <li>• media form</li> <li>• objects</li> <li>• operating system</li> <li>• output file format</li> <li>• output file size</li> <li>• references</li> <li>• samples</li> <li>• script</li> <li>• storyboard</li> <li>• technical specifications, including</li> <li>• version control protocols.</li> </ul>
<b><i>Relevant personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• animation director</li> <li>• audio asset creator</li> <li>• director</li> <li>• graphic artist or designer</li> <li>• instructional designer</li> <li>• lead animator</li> </ul>

	<ul style="list-style-type: none"> <li>• matte painter</li> <li>• modeller</li> <li>• producer</li> <li>• system support personnel</li> <li>• other technical and specialist personnel.</li> </ul>
<b><i>Production documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• animatics</li> <li>• brief</li> <li>• storyboard</li> <li>• technical specifications.</li> </ul>
<b><i>Animation techniques</i></b> may include:	<ul style="list-style-type: none"> <li>• acceleration and deceleration</li> <li>• audio integration</li> <li>• dynamic simulation</li> <li>• hierarchies</li> <li>• hinges and pivot points</li> <li>• hybrid method</li> <li>• key frames</li> <li>• layered animation</li> <li>• looping backgrounds</li> <li>• morphing or object exaggeration</li> <li>• motion capture</li> <li>• motion paths</li> <li>• pose to pose animation</li> <li>• registration points</li> <li>• rotation</li> <li>• scripted animation</li> <li>• speed or motion blur</li> <li>• straight-ahead animation.</li> </ul>
<b><i>Modelling techniques</i></b> may include:	<ul style="list-style-type: none"> <li>• NURBS</li> <li>• polygonal</li> <li>• primitives</li> <li>• sculpt</li> <li>• splines and patches.</li> </ul>
<b><i>File format</i></b> may include:	<ul style="list-style-type: none"> <li>• AAS</li> <li>• ACT</li> <li>• ANI</li> <li>• ANM</li> <li>• ANS</li> <li>• AVI</li> <li>• AWA</li> <li>• AWM</li> <li>• CEL</li> </ul>

	<ul style="list-style-type: none"> <li>• CFT</li> <li>• CMV</li> <li>• DIR or DCR</li> <li>• FLA or SWF</li> <li>• FLC</li> <li>• FLI</li> <li>• FLX</li> <li>• GIF</li> <li>• HTML</li> <li>• IFF</li> <li>• JPEG</li> <li>• LWOB</li> <li>• M3D</li> <li>• MMM</li> <li>• MOV</li> <li>• MPEG</li> <li>• MWF</li> <li>• PNG</li> <li>• QTVR</li> <li>• SEC</li> <li>• TIFF</li> <li>• VAN</li> <li>• VUE.</li> </ul>
<i>Delivery platform</i> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• film</li> <li>• games console</li> <li>• internet</li> <li>• kiosk</li> <li>• mobile phone or device</li> <li>• personal digital assistant (PDA)</li> <li>• video.</li> </ul>
<i>Factors</i> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• purpose of animation</li> <li>• resources</li> <li>• target audience</li> <li>• time lines.</li> </ul>
<i>Design techniques</i> may include:	<ul style="list-style-type: none"> <li>• digitally-generated illustrations of objects and characters</li> <li>• freehand sketches</li> <li>• fully rendered hand-drawn illustrations</li> <li>• story trees</li> </ul>

	<ul style="list-style-type: none"> <li>• storyboards.</li> </ul>
<i>Animation software</i> may include:	<ul style="list-style-type: none"> <li>• 3-D Studio Max</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Motionbuilder</li> <li>• Soft Image, e.g. XSI.</li> </ul>
<i>Audio assets</i> may include:	<ul style="list-style-type: none"> <li>• music</li> <li>• narration</li> <li>• sound effects.</li> </ul>
<i>Animation principles</i> may include:	<ul style="list-style-type: none"> <li>• anticipation</li> <li>• asymmetry in body and facial poses</li> <li>• balanced poses</li> <li>• exaggeration</li> <li>• movement in arcs</li> <li>• overlapping actions and follow-through</li> <li>• pacing or timing</li> <li>• secondary actions</li> <li>• singularity of message</li> <li>• squash and stretch</li> <li>• staging</li> <li>• strong silhouette in poses</li> <li>• weight.</li> </ul>
<i>Screen principles</i> may include:	<ul style="list-style-type: none"> <li>• camera techniques</li> <li>• editing, including basic transitions</li> <li>• framing</li> <li>• lighting</li> <li>• montage</li> <li>• narrative</li> <li>• story-telling</li> <li>• style or genre.</li> </ul>
<i>Visual design principles</i> may include:	<ul style="list-style-type: none"> <li>• balance</li> <li>• composition</li> <li>• emphasis</li> <li>• movement</li> <li>• perspective</li> <li>• proportion</li> <li>• scale</li> <li>• unity.</li> </ul>
<i>Communication</i>	<ul style="list-style-type: none"> <li>• communicating the message</li> </ul>

<i>principles</i> may include:	<ul style="list-style-type: none"><li>• conveying meaning</li><li>• meeting audience requirements</li><li>• using functional components.</li></ul>
--------------------------------	--

## Unit Sector(s)

Game development

## ICAGAM419A Build a database to support a computer game

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to build a database to support a computer game.

### Application of the Unit

This unit applies to game programmers or junior analyst programmers responsible for the development and implementation of a database to support state management for a computer game.

This unit relates to the specific requirements for designing and implementing a relational database required for the management of persisted state of a computer game. The game may be an online or networked game or a stand-alone game where player actions are preserved or persisted between sessions.

This unit does not address specialist programming skills required for games programming which are detailed in other units of competency.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Verify database model</p>	<p>1.1 Verify that <i>game architecture</i> and <i>system implementation requirements</i> have been addressed by the proposed <i>database architecture</i></p> <p>1.2 Correlate <i>data model</i> entities and their attributes with the <i>game artefacts</i> and <i>game design requirements</i></p> <p>1.3 Verify that <i>entity relationships</i> defined in the data model implement game design and game-play rules</p> <p>1.4 Verify estimates of amounts of data storage required and data types defined by the data model</p> <p>1.5 Document design inconsistencies</p> <p>1.6 Review database model and address and correct inconsistencies</p> <p>1.7 Define database test data</p>
<p>2. Create physical database design</p>	<p>2.1 Implement conceptual data model design as a physical database design</p> <p>2.2 Determine default database file size according to the data model storage estimates</p> <p>2.3 Determine game data <i>input and output workload</i> estimates</p> <p>2.4 Determine reliability and performance requirements</p> <p>2.5 Define minimum hardware requirements to support input and output workload and reliability or performance requirements</p> <p>2.6 Configure the database management system to use minimum hardware requirements</p> <p>2.7 Refine and confirm database test data</p>
<p>3. Implement physical database prototype</p>	<p>3.1 Write structured query language (SQL) scripts to create physical database files according to design requirements</p> <p>3.2 Write SQL scripts to create database tables</p> <p>3.3 Implement primary key constraints</p> <p>3.4 Implement foreign key constraints</p> <p>3.5 Define and script stored procedures for selecting, inserting, updating and deleting data</p> <p>3.6 Define and script Insert statements for test data</p> <p>3.7 Execute SQL scripts and database, including test data</p>

4. Test the database and document results	4.1 Document entity integrity tests and results 4.2 Document referential integrity tests and results 4.3 Document input and output performance tests and results 4.4 Document stored procedures tests and results
5. Review, evaluate and correct database performance	5.1 Review test result deficiencies 5.2 Define, evaluate and test deficiencies and ensure corrective measures are implemented 5.3 Implement corrections to database

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse and assess quantitative requirements for data storage and data throughput
  - analyse game architecture and game system implementation requirements in the context of the proposed database architecture
  - assess how well the implementation of the data model maps to the game artefacts, the game-play rules and the game design requirements
- communication skills to:
  - identify and discuss game-play rules with game designers
  - define and describe data throughput requirements and discuss these with game designers
  - negotiate with project managers to determine database implementation resource requirements, project timeframes and deliverables
  - propose data structures to implement game-play functionality and system requirements
- initiative and enterprise skills to:
  - assess proposed database architectures within the context of existing enterprise technologies, infrastructure and industry standards
  - recommend solutions to problems or deficiencies associated with the implementation of the database
- learning skills to:
  - acquire the skills and knowledge required to overcome current limitations in data throughput and query execution times
  - stay at the cutting edge of industry developments, industry standards and innovative applications of relational database management systems to problems of persisting state in computer games
- literacy skills to:
  - document physical design inconsistencies
  - interpret documentation describing game design requirements and game-play rules
  - interpret related game industry standards and associated database management system standards and query language standards
  - write requirement specifications for physical database implementation
- planning and organising skills to:
  - organise resources, documentation and infrastructure elements required for the implementation of a relational or object-oriented database management system
  - plan an effective implementation to a relational or object-oriented database management system
- problem-solving skills to:
  - debug query scripts, identify script errors and resolve all query scripting issues
  - identify and implement solutions to problems with the initial conceptual database model

- identify problems with physical model and implement solutions
- research skills to:
  - enhance knowledge of industry standards and industry trends related to computer game state management techniques and relational or object-oriented database management systems
  - identify and locate sources of information that provide solutions to technical problems
  - identify sources of information and documentation required to build a database to support a computer game
- technical skills to:
  - execute data and query analysis tools and evaluate data input and output performance statistics
  - redefine data structures to improve the efficiency of data throughput
  - use an integrated development environment to build, modify and manipulate relational or object-oriented data structures
  - write code to implement a physical database design.

## Required knowledge

- computer hardware specifications and hardware performance expectations
- creation, use and testing of stored procedures:
  - defining input parameters
  - defining output parameters
- database stress testing and stress testing software
- database testing methodologies
- object-oriented database management systems
- relational database management systems:
  - IBM DB2
  - Microsoft Access
  - Microsoft SQL (MS SQL) server
  - MySQL
  - Oracle
  - Postgre Structured Query Language (Postgre SQL)
- relational database modelling building blocks and theory:
  - attributes
  - entity relationship modelling
  - normalisation of database tables
  - relationship cardinality and connectivity:
    - 1:1
    - 1:M
    - M:N
- SQL, such as:
  - data definition language
  - data manipulation language

- evolution of relational database management systems and their relationship to the flat file, hierarchical and network data storage legacy of games
- important functions of a relational database management system within the context of a computer game, such as:
  - controlling data access for multiple users
  - interpreting data access languages, such as SQL and LINQ
  - interpreting data application programming interfaces (APIs), such as ADO.Net
  - managing data integrity
  - managing disaster recovery and backups
  - managing the data dictionary
  - managing the data storage
  - managing the security requirements of the data
  - transforming and presenting data
- importance of data models
- different types of data models, such as Chen and Crow's Foot models
- relationship between game-play rules and the modelling of the database structure.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• interpret a conceptual database model and create a physical database design from the conceptual model</li> <li>• create a database that allows for the persistence of state data for a computer game</li> <li>• evaluate and improve the performance of a database built to support a computer game.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer aided software engineering and modelling tools</li> <li>• relational or object-oriented database management system</li> <li>• performance testing and analysis software for the selected database management system</li> <li>• game architecture specifications</li> <li>• game design and requirements documentation</li> <li>• client or server hardware and networking infrastructure sufficient to simulate the game architecture specifications</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• written or verbal evaluation of knowledge of data modelling techniques</li> <li>• written or verbal evaluation of knowledge of scripting languages, such as SQL and LINQ</li> <li>• evaluation of the implementation of a conceptual model as a physical model</li> <li>• review of a database created to support a computer game</li> <li>• review of a database performance measurement process and evaluation techniques.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Game architecture</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• networked, persistent games, including massively multi-player online (MMO) games, such as:             <ul style="list-style-type: none"> <li>• World of Warcraft</li> <li>• Second Life implemented in a client (PC), server architecture using web-based protocols</li> </ul> </li> <li>• networked proprietary console game architectures implemented on hardware, such as:             <ul style="list-style-type: none"> <li>• PlayStation</li> <li>• Xbox</li> <li>• Wii</li> <li>• Nintendo</li> <li>• iPod Touch</li> <li>• Zone 40</li> <li>• where game state is persisted between sessions</li> </ul> </li> <li>• non-networked persistent games.</li> </ul>
<p><b><i>System implementation requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• games that persist current game state and consequently must manage an authoritative store of state data using a client-server architecture</li> <li>• non-networked stand-alone games that persist game state between sessions.</li> </ul>
<p><b><i>Database architecture</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• client-server based architectures that use:             <ul style="list-style-type: none"> <li>• relational database management systems</li> <li>• object-oriented database management systems.</li> </ul> </li> </ul>
<p><b><i>Data model</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Chen Entity relationship diagrams</li> <li>• Crow's Foot entity relationship diagrams</li> <li>• data dictionaries</li> <li>• object data models</li> <li>• relational data models.</li> </ul>
<p><b><i>Game artefacts</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• characters</li> <li>• maps</li> <li>• objects, weaponry, machinery and prizes</li> <li>• players</li> <li>• regions, geographical locations and game servers.</li> </ul>

<p><b><i>Game-design requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• design rules and limitations</li> <li>• level customisations and game level design</li> <li>• level definitions</li> <li>• level progression requirements</li> <li>• play rules.</li> </ul>
<p><b><i>Entity relationships</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• assessed and implemented cardinality requirements</li> <li>• assessed and implemented connectivity requirements</li> <li>• consideration of degree of normalisation of tables and referential integrity constraints</li> <li>• consideration of entity integrity constraints.</li> </ul>
<p><b><i>Input and output workload</i></b> may include estimates of:</p>	<ul style="list-style-type: none"> <li>• index read, modify and rebuild rates</li> <li>• number of database transaction log entries generated</li> <li>• number of random disk read writes</li> <li>• number of sequential disk read writes.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM501A Create design concepts for digital games and 3-D media

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create design concepts for digital games and 3-D media.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify and analyse commonly used design concepts for games and 3-D media	<p>1.1 Obtain the project <i>brief and other relevant documents</i></p> <p>1.2 Research and identify commonly used design concepts used in digital games and interactive 3-D media</p> <p>1.3 Analyse and interpret chosen common design concepts used in digital games and interactive 3-D media</p> <p>1.4 Discuss <i>design considerations</i> for designing a digital game or interactive 3-D media concept</p>
2. Identify appropriate software packages used for digital game and 3-D concept design	<p>2.1 Identify and review the appropriate range of <i>industry standard software</i> available to develop with, according to chosen design concepts</p> <p>2.2 Assess the software related to the concept design process requirements</p> <p>2.3 Discuss the <i>technical specifications</i> for the development process</p> <p>2.4 Select the software package</p>
3. Use chosen software package	<p>3.1 Run selected software package and become familiar with the user interface</p> <p>3.2 Create new files and organise and develop a file structure</p> <p>3.3 Learn the required tools and components used to create and develop digital game or interactive 3-D media concept</p>
4. Create and develop concept components for a digital game or interactive media	<p>4.1 Design a <i>heads-up display</i> for a digital game or 3-D interactive media</p> <p>4.2 Consider the specific processes for heads-up display elements</p> <p>4.3 Document the design and necessary programming process and requirements needed to implement the heads-up display</p> <p>4.4 Use chosen software package to create and develop visual design elements and components to be used for the heads-up display</p>
5. Implement design concept into a game or 3-D interactive media	<p>5.1 Load in images required and write <i>code</i> to implement the heads-up display into an existing framework</p> <p>5.2 Write code to demonstrate <i>HUD capabilities</i> with implemented concepts</p>
6. Evaluate implementation	<p>6.1 Demonstrate implementation to <i>relevant personnel</i></p> <p>6.2 Accept <i>feedback</i> to incorporate into final design</p>

	<p>6.3 Assess and refine concept with relevant personnel</p> <p>6.4 Evaluate the usability of concept components</p> <p>6.5 Reflect on possible changes to improve the visual design and capabilities of components</p>
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in game design and innovation
- literacy and numeracy skills to:
  - develop game design and technical design documents
  - write instructions for the normal and competent operation and testing of game features and permutations
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into concept design for digital games and 3-D media
- technical skills to:
  - use correct file formats and archiving procedures
  - resolve basic hardware, software and other technical issues associated with game production.

### Required knowledge

- basic programming techniques

- capabilities and constraints of game engines
- concept development and visualisation skills
- computer game development, including specific terminology
- current game-play hardware and software products
- human resources required in the process of creating a game and their respective skills and technology requirements
- OHS requirements for:
  - ergonomics
  - electrical safety
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• demonstrate original and innovative approaches to the creative development of a game</li> <li>• implement game development and production strategies</li> <li>• maintain integrity of the design brief</li> <li>• develop concept art and design specifications for heads-up displays, splash screens, start screens and game field screens consistent with an identified game genre</li> <li>• develop technical specifications for game mechanics, artificial intelligence, physics, sound, game play and overall usability</li> <li>• implement a working heads-up display with basic functionalities.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of work samples or simulated workplace activities</li> <li>• review of reports and logbooks</li> <li>• evaluation of work samples or simulated workplace activities</li> <li>• direct observation of candidate preparing game documentation during development activities.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and</p>

	<p>the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Brief and other relevant documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• game design document</li> <li>• game-play designs</li> <li>• help notes</li> <li>• information design</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<p><b><i>Design considerations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• cultural context</li> <li>• genre</li> <li>• resource limitations and constraints</li> <li>• target market.</li> </ul>
<p><b><i>Industry standard software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D paint</li> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Illustrator</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Microsoft Visual Studio</li> <li>• Modo</li> <li>• Mudbox</li> <li>• Photoshop</li> <li>• XSI</li> <li>• Z Brush.</li> </ul>
<p><b><i>Technical</i></b></p>	<ul style="list-style-type: none"> <li>• backup procedures</li> </ul>

<p><i>specifications</i> may include:</p>	<ul style="list-style-type: none"> <li>• delivery platform</li> <li>• difficulty levels</li> <li>• disk or memory space</li> <li>• format for final product</li> <li>• navigation design</li> <li>• pixel size</li> <li>• polygon count</li> <li>• specifications for phases of game development: <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> </ul> </li> <li>• systems and workplace standards for documentation, including: <ul style="list-style-type: none"> <li>• computer file management</li> <li>• job lists</li> <li>• progress reports</li> </ul> </li> <li>• source code and game assets archiving</li> <li>• target market.</li> </ul>
<p><i>Heads-up display</i> components may include:</p>	<ul style="list-style-type: none"> <li>• ammo counter</li> <li>• armour bar or counter</li> <li>• buttons for using magic skills and potions</li> <li>• crosshair</li> <li>• enemy indicators</li> <li>• friendly indicators</li> <li>• health bar</li> <li>• mana or magic bar</li> <li>• mini-map</li> <li>• objective points</li> <li>• speedometer</li> <li>• weapon indicator.</li> </ul>
<p><i>Code</i> may involve:</p>	<ul style="list-style-type: none"> <li>• basic interaction with screen elements</li> <li>• displaying components on screen</li> <li>• keyboard presses</li> <li>• loading images</li> <li>• mouse movement.</li> </ul>
<p><i>HUD capabilities</i> may involve:</p>	<ul style="list-style-type: none"> <li>• dynamic changing of components due to conditions (taking damage means reduced health or armour).</li> </ul>
<p><i>Relevant personnel</i> may include:</p>	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> </ul>

	<ul style="list-style-type: none"> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>
<b>Feedback</b> may involve:	<ul style="list-style-type: none"> <li>• accepting and responding to comment, critique and suggestions from: <ul style="list-style-type: none"> <li>• clients</li> <li>• colleagues</li> <li>• target audience representatives.</li> </ul> </li> </ul>

## Unit Sector(s)

Game development

## ICAGAM503A Create a complex 3-D interactive computer game

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create a complex 3-D interactive computer game using industry standard production techniques.

### Application of the Unit

This unit applies to games designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Identify required game assets in a team environment</p>	<p>1.1 Obtain <i>project brief and other relevant documents</i></p> <p>1.2 Identify <i>game-production assets</i> required to meet creative and production requirements and <i>technical specifications</i></p> <p>1.3 Discuss formats of assets and issues of asset integration with appropriate <i>personnel</i></p> <p>1.4 Determine sequence for development of beta-version prototype for testing game play</p> <p>1.5 <i>Create a schedule</i> for production and testing</p> <p>1.6 Determine strategies for <i>monitoring production progress</i> against schedule</p>
<p>2. Identify capability of game-engine software and tools and make selection in a team environment</p>	<p>2.1 Identify and review the range of industry standard <i>game-engine software and development tools</i> available</p> <p>2.2 Assess the software and tools related to specified game concept and play requirements</p> <p>2.3 Discuss <i>considerations for selection of game-engine software</i> with relevant personnel to ensure selection will meet specified outcomes</p> <p>2.4 Select game-engine software and development tools</p>
<p>3. Create or acquire required assets for a game in a team environment</p>	<p>3.1 Establish an environment for a project that supports sharing of project assets produced by team members</p> <p>3.2 Review the <i>attributes of assets</i> required in a game project related to chosen game engine</p> <p>3.3 Create or acquire visual assets for a games project</p> <p>3.4 Customise asset attributes to suit the game design and chosen game engine</p>
<p>4. Use game-engine software and development tools in a team environment</p>	<p>4.1 Collaborate in the use of <i>tools and features of software</i> relevant to the game-production process</p> <p>4.2 Create, modify or access scripts or code to combine assets and achieve agreed project goals</p> <p>4.3 Create and check <i>game-play elements</i> according to creative and technical requirements</p> <p>4.4 Test and run <i>game prototype</i> as a presentation to ensure sequences meet creative, production and technical requirements</p>
<p>5. Evaluate game prototype in a team</p>	<p>5.1 Demonstrate initial prototype to relevant personnel</p> <p>5.2 <i>Evaluate</i> against criteria, including achievement of a</p>

environment	creative and user-friendly product 5.3 Discuss and agree on required changes 5.4 Assist if required in <i>tests and user trials</i> 5.5 Evaluate feedback from user trials 5.6 Confirm endorsement from relevant personnel to develop prototype into complete product
6. Transform prototype into final publication	6.1 Make necessary changes as indicated by user trials 6.2 Integrate all game elements as required by specifications 6.3 Make final checks to ensure all sequences conform to the navigation design 6.4 Assemble final publication for final distribution

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse documentation and images to inform implementation of game specifications
- communication skills to:
  - check and confirm brief requirements
  - communicate clearly using speech and text
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - give constructive feedback
- literacy and numeracy skills to read briefs, game documentation, scripts, storyboards, scenarios, images, and technical and conceptual information
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
- problem-solving skills to recognise and address quality issues and problems
- teamwork skills to:
  - contribute to and work in a collaborative team
  - realise a unified game-play vision
- technical skills to:
  - resolve basic hardware, software and other technical issues associated with game production
  - use file formats and archiving procedures.

### Required knowledge

- basic programming techniques
- capabilities and constraints of game engines
- computer games development, including specific terminology
- current game-play hardware and software products
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply a variety of strategies for game trialling and testing</li> <li>• apply original and innovative approaches to the creative development of a 3-D game</li> <li>• implement game development and production strategies</li> <li>• maintain integrity of the design brief and game design document</li> <li>• undertake risk assessment and critical path planning.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of game production activities</li> <li>• verbal questioning or interview concerning aspects of game development, including:             <ul style="list-style-type: none"> <li>• capability of game engines and software tools to meet the requirements of the brief</li> <li>• evaluating game prototypes from technical, design and game-play perspectives</li> <li>• game testing and trialling procedures</li> <li>• maintaining integrity of the design brief and game design document</li> <li>• risk assessment and critical path planning</li> <li>• translating design and technical specifications into working game prototypes.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where</p>

	<p>appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Project brief and other relevant documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• game design document</li> <li>• game-play designs</li> <li>• help notes</li> <li>• information design</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document and review process.</li> </ul>
<p><b><i>Game-production assets</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• current work files</li> <li>• development kits</li> <li>• existing digital product libraries:             <ul style="list-style-type: none"> <li>• character models</li> <li>• environments</li> <li>• motion capture data</li> <li>• sound effects</li> </ul> </li> <li>• game engines, including customised game engines</li> <li>• personnel.</li> </ul>
<p><b><i>Technical specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• backup procedures</li> <li>• delivery platform</li> <li>• difficulty levels</li> <li>• disc or memory space</li> <li>• format for final product</li> <li>• navigation design</li> <li>• pixel size</li> <li>• polygon count</li> <li>• source code and game assets archiving</li> <li>• specifications for phases of game development:             <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> <li>• systems and workplace standards for documentation, including: <ul style="list-style-type: none"> <li>• computer file management</li> <li>• job lists</li> <li>• progress reports</li> </ul> </li> <li>• target market.</li> </ul>
<b>Personnel</b> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers</li> <li>• other specialist and technical staff.</li> </ul>
<b>Creating a schedule</b> may involve:	<ul style="list-style-type: none"> <li>• allocating work tasks in consultation with other team members</li> <li>• analysing key requirements of the brief</li> <li>• assessing concept viability against resource availability</li> <li>• conducting risk assessment regarding possible issues and constraints and potential solutions</li> <li>• creating an overall project plan and schedule</li> <li>• determining workflow with consideration to available resources</li> <li>• identifying key milestones and associated deliverables: <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> </ul> </li> <li>• identifying stakeholders and devising strategies to meet stakeholder needs</li> <li>• identifying the critical path</li> <li>• researching background information</li> </ul>

<p><b><i>Monitoring production progress</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• setting project objectives against achievable timeframes.</li> <li>• balancing quality and scheduling requirements</li> <li>• coordinating the efforts of development, quality assurance, sales, marketing, public relations and finance</li> <li>• ensuring the timely production of assets to brief requirements, including: <ul style="list-style-type: none"> <li>• animation components</li> <li>• graphic</li> <li>• images</li> <li>• interfaces</li> <li>• text</li> <li>• video</li> </ul> </li> <li>• identifying and applying testing procedures</li> <li>• monitoring workload allocated to individual personnel</li> <li>• progressive game testing to ensure playability</li> <li>• renegotiating variations and schedule slippage ahead of milestone dates</li> <li>• sound identifying and applying contingency strategies.</li> </ul>
<p><b><i>Game-engine software and development tools</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D Studio Max</li> <li>• Bullet</li> <li>• Cinema 4D</li> <li>• Corel Draw</li> <li>• DirectSound</li> <li>• DirectX</li> <li>• FMOD</li> <li>• Irrlicht</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Newton</li> <li>• OGRE</li> <li>• OpenGL</li> <li>• Photoshop.</li> </ul>
<p><b><i>Considerations for selection of game-engine software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• application of code libraries</li> <li>• application of game-engine functionality for an interactive game</li> <li>• assessing coding strategy for compliance to brief and for optimal performance of game engine: <ul style="list-style-type: none"> <li>• function testing</li> <li>• test plan development</li> <li>• validating results</li> </ul> </li> <li>• assessing viability of existing code in relation to interaction of game-play elements</li> </ul>

	<ul style="list-style-type: none"> <li>• assessing strategy for game-play code</li> <li>• basic code writing abilities for customising game-engine functions</li> <li>• building</li> <li>• code creation specifically for handling exceptions</li> <li>• code creation strategy for interaction of game-play elements</li> <li>• data structures</li> <li>• documentation of code development</li> <li>• environmental models</li> <li>• game engine customising</li> <li>• game platform and game platform logic</li> <li>• sound capability</li> <li>• spatial data structures</li> <li>• technical constraints imposed by the architecture of given game engine</li> <li>• integration of custom code into game engines.</li> </ul>
<b><i>Attributes of assets</i></b> may include:	<ul style="list-style-type: none"> <li>• alpha-channel colours or layers</li> <li>• colour bit-depth</li> <li>• dimensions of 2-D artwork</li> <li>• file format compatible with game engine</li> <li>• naming convention</li> <li>• polygon count for 3-D models.</li> </ul>
<b><i>Tools and features of software</i></b> may include:	<ul style="list-style-type: none"> <li>• animation</li> <li>• compilers</li> <li>• debugging software</li> <li>• development software</li> <li>• efficiency</li> <li>• flexible systems suitable for non-programmers</li> <li>• graphics</li> <li>• graphics-system design</li> <li>• middleware</li> <li>• operating systems</li> <li>• plug-in tools</li> <li>• programming for game integration</li> <li>• rendering</li> <li>• sound</li> <li>• system architecture for real-time game environments and simulations</li> <li>• tools for designers and play analysis.</li> </ul>
<b><i>Game-play elements</i></b> may involve:	<ul style="list-style-type: none"> <li>• chance</li> <li>• fun</li> <li>• logic</li> </ul>

	<ul style="list-style-type: none"> <li>• playability</li> <li>• rules</li> <li>• skill</li> <li>• strategy.</li> </ul>
<b><i>Creating game prototype</i></b> may involve:	<ul style="list-style-type: none"> <li>• bug fixing, bug databases, creating stable code bases and game tuning</li> <li>• building flexible systems, configurable by others</li> <li>• code review and test harnesses</li> <li>• designing and implementing tests and incorporating feedback from quality assurance</li> <li>• developing a comprehensive design for all missions and levels, including concept visuals</li> <li>• developing a walkthrough for at least one mission or level</li> <li>• developing story synopsis and scripts for each level</li> <li>• knowledge of games as dynamic systems: <ul style="list-style-type: none"> <li>• applying game tuning strategies in light of feedback from actual play</li> <li>• characteristics of a balanced game</li> <li>• working with quality assurance and understanding play-test feedback</li> </ul> </li> <li>• use of appropriate tools and skills for fast, interactive development</li> <li>• user-guide development.</li> </ul>
<b><i>Evaluating game prototype</i></b> may involve:	<ul style="list-style-type: none"> <li>• examining and analysing the impact of decisions, after the fact: <ul style="list-style-type: none"> <li>• business decisions</li> <li>• design decisions</li> <li>• methodology and process decisions</li> </ul> </li> <li>• product ‘post-mortems’ reviewing actual use of resources to achieve outcomes against initial project plan and schedule.</li> </ul>
<b><i>Tests and user trials</i></b> may involve play test procedures:	<ul style="list-style-type: none"> <li>• determining criteria for measurement of success with a given audience</li> <li>• play testing to monitor player frustration, progress and enjoyment</li> <li>• selecting test subjects</li> <li>• testing game with target market and other diverse populations.</li> </ul>

## **Unit Sector(s)**

Game development

## ICAGAM504A Manage interactive media production

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage interactive media or game production.

### Application of the Unit

This unit applies to people who manage personnel working in the interactive media or game development industry. These people may be concept artists, designers, programmers, animators and others.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Attend to placement of staff for a digital media production	1.1 Undertake work placement of production team 1.2 Ensure punctuality and appropriate dress 1.3 Observe and describe <b><i>workplace culture</i></b> and corporate image
2. Monitor workplace structure and staff responsibilities	2.1 Identify duties carried out by the <b><i>various personnel</i></b> 2.2 Observe lines of reporting and <b><i>communication</i></b> 2.3 Determine responsibilities of own area or department
3. Identify appropriate behaviours and attitude	3.1 Apply communication skills to interact effectively with other staff and clients 3.2 Demonstrate behaviour that reflects the organisational culture
4. Carry out tasks within the range or context specified for the workplace	4.1 Complete set tasks according to instructions and deadlines 4.2 Discuss any problems or concerns with assigned work with supervisor or mentor
5. Report on workplace experience	5.1 Maintain a log book recording daily activities 5.2 Complete a short report of the work experience

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in 3-D design and innovation
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- technical skills to:
  - create 3-D animation and digital effects
  - develop and visualise concepts
  - resolve basic hardware, software and other technical issues associated with game production
  - use correct file formats and archiving procedures.

### Required knowledge

- basic 3-D techniques
- budgeting and scheduling considerations for 3-D design
- capabilities and constraints of 3-D packages
- digital animation development, including specific terminology
- current game-play hardware and software products
- environmental impact and sustainability considerations
- OHS requirements for:

- ergonomics, such as when lifting
- electrical safety
- materials handling
- risk and critical-path management
- technical constraints that hardware imposes on graphics requirements and creative visual design
- production process required to produce a 3-D animation sequence or components
- 3-D animation or digital effects team and the roles and responsibilities of each member.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• adapt behaviour to the workplace culture</li> <li>• understand a company structure and lines of reporting</li> <li>• maintain responsibilities and time management of completing assigned tasks in a real production environment</li> <li>• maintain production scheduling and management</li> <li>• understand the pipeline</li> <li>• demonstrate communication and listening skills.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• workplace where interactive media production may be carried out</li> <li>• organisational guidelines and policies</li> <li>• personnel</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the learner at the workplace</li> <li>• review of written or verbal reports or journals</li> <li>• review of portfolios of work completed at host organisation</li> <li>• discussion with representative of host organisation</li> <li>• review of production schedule.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Workplace culture</i></b> may include:	<ul style="list-style-type: none"> <li>• ability to influence</li> <li>• achievement orientation</li> <li>• collectivism</li> <li>• comfort with ambiguity</li> <li>• individualism</li> <li>• space orientation</li> <li>• time orientation.</li> </ul>
<b><i>Various personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• animator</li> <li>• assistant producer</li> <li>• audio designer</li> <li>• composer</li> <li>• dead-environment designer</li> <li>• designer</li> <li>• director</li> <li>• editor</li> <li>• effects artist</li> <li>• environment designer</li> <li>• lead animator</li> <li>• lead artist</li> <li>• lead audio</li> <li>• lead designer</li> <li>• modeller</li> <li>• producer</li> <li>• production manager</li> <li>• project coordinator</li> <li>• project manager</li> <li>• systems support</li> <li>• texturer</li> <li>• VFX supervisor</li> <li>• writer.</li> </ul>
<b><i>Communication</i></b> may include:	<ul style="list-style-type: none"> <li>• electronic</li> <li>• forms</li> <li>• hierarchy</li> <li>• pin up board</li> </ul>

	<ul style="list-style-type: none"><li>• post-it notes</li><li>• reports</li><li>• taking messages</li><li>• telephone use</li><li>• verbal</li><li>• whiteboards</li><li>• written.</li></ul>

## Unit Sector(s)

Game development

## ICAGAM506A Create complex code for mobile game devices

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create complex code for mobile game devices.

### Application of the Unit

This unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Research and identify appropriate implementations for complex code for mobile game devices</p>	<p>1.1 Obtain or create a mobile game device framework</p> <p>1.2 Identify <i>tools and technology for creating applications for mobile game devices</i></p> <p>1.3 Research and identify appropriate <i>game physics</i> implementation for a <i>mobile game device</i></p> <p>1.4 Research and identify appropriate <i>artificial intelligence</i> (AI) implementation for a mobile game device</p> <p>1.5 Research and identify appropriate <i>shaders</i> for mobile game device</p> <p>1.6 Identify technical limitations and constraints of the mobile device with the game</p>
<p>2. Implement physics code for mobile game devices</p>	<p>2.1 <i>Develop code</i> for simulating velocity and momentum</p> <p>2.2 Develop code for simulating acceleration and gravity</p> <p>2.3 Develop code for simulating frictional effects</p> <p>2.4 Develop code for simulating collisions and collision detection</p> <p>2.5 Implement the code for game physics in the mobile game device</p>
<p>3. Develop and implement artificial intelligence for mobile game devices</p>	<p>3.1 Use finite state machines to model behaviour</p> <p>3.2 Develop pathfinding algorithms</p> <p>3.3 Develop code based on a genetic algorithm</p> <p>3.4 Implement the code for AI in the mobile game device</p>
<p>4. Develop and implement shader for mobile game devices</p>	<p>4.1 Develop code based on shading algorithm</p> <p>4.2 Implement the shading algorithm code in the mobile game device</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
- initiative and enterprise skills to exercise a high level of creative ingenuity in game design and innovation
- learning skills to make improvements based on reviews and feedback
- literacy and numeracy skills to write instructions for the normal and competent operation and testing of all game features and permutations
- management skills to manage teams in order to extract useful feedback
- planning and organisational skills to:
  - balance talent, experience and budget
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
  - refer decisions to a higher project authority for review and endorsement
- problem-solving skills to recognise and address potential quality issues and problems at the design and development stage
- research skills to undertake practical, technical or desktop research into mobile game devices
- self-management skills to manage own work and priorities to meet deadlines
- teamwork skills to:
  - contribute to and work in a collaborative team
  - delegate tasks and responsibility appropriately
  - realise a unified game-play vision
- technical skills to:
  - develop game design and technical design documents
  - resolve basic hardware, software and other technical issues associated with game production
  - translate design requirements into specifications

- use correct file formats and archiving procedures.

## Required knowledge

- basic programming techniques
- budgeting and scheduling considerations for game design
- capabilities and constraints of game engines
- computer game development, including specific terminology
- concept development
- concept visualisation
- current game-play hardware and software products
- environmental impact and sustainability considerations
- human resources required in the process of creating a game and their respective skills and technology requirements
- OHS requirements for:
  - ergonomics
  - electrical safety
  - materials handling
  - physical hazards
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop physics for mobile game devices</li> <li>• develop artificial intelligence for mobile game devices</li> <li>• develop shading algorithm for mobile game devices.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• verbal questioning or interview concerning aspects of game document development, including: <ul style="list-style-type: none"> <li>• industry standards for concept art</li> <li>• design and technical specification development</li> <li>• game testing and trialling procedures</li> <li>• resources required for game development</li> </ul> </li> <li>• assessment of written or interactive computer-based test or quiz</li> <li>• setting and observing fault-finding exercises</li> <li>• evaluation of reports or logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Tools and technology for creating applications for the mobile gaming device</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• compilers</li> <li>• debugging software</li> <li>• development software</li> <li>• efficiency</li> <li>• flexible systems suitable for non-programmers</li> <li>• graphics</li> <li>• graphics system design</li> <li>• integrated development environments</li> <li>• middleware</li> <li>• operating systems</li> <li>• plug in tools</li> <li>• programming for game integration</li> <li>• rendering</li> <li>• sound</li> <li>• system architecture for real time game environments and simulations</li> <li>• tools for designers and play analysis.</li> </ul>
<p><b><i>Game physics</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• collision</li> <li>• combat:             <ul style="list-style-type: none"> <li>• blood spots</li> <li>• debris</li> <li>• explosions</li> <li>• footprints</li> <li>• salvo</li> <li>• smoke and fire</li> <li>• sparks</li> <li>• water</li> <li>• wreckage</li> </ul> </li> <li>• movement:             <ul style="list-style-type: none"> <li>• creaking floors</li> <li>• footfalls</li> <li>• puddle stepping</li> <li>• wading</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• wind.</li> </ul>
<p><i>Mobile game device</i> may include:</p>	<ul style="list-style-type: none"> <li>• mobile phones</li> <li>• personal digital assistants (PDAs)</li> <li>• tablets.</li> </ul>
<p><i>Artificial intelligence</i> may include:</p>	<ul style="list-style-type: none"> <li>• decisions</li> <li>• movement</li> <li>• pathfinding</li> <li>• reactions</li> <li>• simulated intelligence</li> <li>• situations</li> <li>• statistics</li> <li>• target selection</li> <li>• tests and events for reactionary behaviour.</li> </ul>
<p><i>Shaders</i> may include:</p>	<ul style="list-style-type: none"> <li>• Blinn-Phong</li> <li>• Cook-Torrance</li> <li>• Gouraud</li> <li>• Lambert</li> <li>• Oren-Nayar</li> <li>• Phong</li> <li>• Ward anisotropic.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM507A Develop intermediate 3-D software for games and interactive media

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop intermediate 3-D software for games or interactive media.

### Application of the Unit

This unit applies to games programmers working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Build a 3-D application using a provided framework or engine</p>	<p>1.1 Employ <i>integrated development environment</i> facilities to include existing 3-D libraries suitable for games or interactive media production</p> <p>1.2 Use existing library facilities and appropriate <i>language</i> to facilitate <i>configuration of a 3-D environment</i> compatible with a specified platform</p> <p>1.3 Instantiate <i>virtual objects</i> in a simple 3-D environment</p> <p>1.4 Create <i>mesh primitives</i> using 3-D library routines</p> <p>1.5 Generate code to manipulate 3-D objects, including cameras, lights and mesh primitives</p> <p>1.6 Import pre-constructed meshes from persistent storage into a 3-D environment using scripts or library routines</p> <p>1.7 Apply class inheritance to modify or extend existing 3-D class</p> <p>1.8 Select and apply exception handling techniques to ensure program stability in a simple 3-D environment</p>
<p>2. Create a graphical user interface (GUI) for a 3-D environment</p>	<p>2.1 Employ integrated development environment facilities to include existing 3-D compatible GUI controls suitable for games or interactive media production</p> <p>2.2 Combine predefined <i>GUI elements</i> to create a simple interface for a 3-D environment</p> <p>2.3 Modify scripts or code to customise existing GUI elements</p> <p>2.4 Write code that processes events raised by a GUI in a 3-D environment</p> <p>2.5 Create GUI events to modify the configuration of a simple 3-D environment</p>
<p>3. Debug a 3-D application</p>	<p>3.1 Use stand-alone debugging tools or tools provided by an integrated development environment to examine variables and trace running code</p> <p>3.2 Use debugging facilities, such as log windows or files, to detect logical and coding errors</p>
<p>4. Deploy documentation tools</p>	<p>4.1 Investigate and select integrated or third-party <i>documentation</i> tools</p> <p>4.2 Deploy integrated or third-party tools to create and maintain code documentation</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret documentation and images to inform implementation of game specifications
- communication skills to:
  - check and confirm brief requirements
  - communicate clearly using speech and text
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - give constructive feedback
- literacy and numeracy skills to read briefs, game documentation, scripts, storyboards, scenarios, images, and technical and conceptual information
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
- problem-solving skills to recognise and address quality issues and problems
- resolve basic hardware, software and other technical issues associated with games
- teamwork skills to:
  - contribute to and work in a collaborative team
  - realise a unified game-play vision
- technical skills to:
  - build a GUI to interact with a user
  - use correct file formats and archiving procedures
  - use 3-D libraries or frameworks.

### Required knowledge

- 3-D application development
- debugging techniques
- documentation techniques
- object-oriented 3-D programming concepts and language.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create at least one 3-D framework or library that includes an appropriate GUI</li> <li>• create documentation generated by appropriate tools.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• suitable 3-D IT equipment hardware, software and other technical material, such as manuals</li> <li>• 3-D software applications</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of game production activities</li> <li>• verbal questioning or interview concerning aspects of game development, including: <ul style="list-style-type: none"> <li>• capability of game engines and software tools to meet the requirements of the brief</li> <li>• evaluating game prototypes from technical, design and game-play perspectives</li> <li>• game testing and trialling procedures</li> <li>• maintaining integrity of the design brief and game design document</li> <li>• risk assessment and critical path planning</li> <li>• translating design and technical specifications into working game prototypes.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Integrated development environment</i></b> may include:	<ul style="list-style-type: none"> <li>• Code Warrior</li> <li>• Code::Blocks</li> <li>• Eclipse</li> <li>• J-Edit</li> <li>• Visual C++</li> <li>• Visual Studio suite.</li> </ul>
<b><i>Language</i></b> may include:	<ul style="list-style-type: none"> <li>• C#.net</li> <li>• C++</li> <li>• Java</li> <li>• Small Talk</li> <li>• VB.NET.</li> </ul>
<b><i>Configuration of a 3-D environment</i></b> must include:	<ul style="list-style-type: none"> <li>• device selection</li> <li>• game resolution</li> <li>• screen colour depth</li> <li>• output performance, such as:                             <ul style="list-style-type: none"> <li>• anti-aliasing</li> <li>• level of detail</li> <li>• filtering</li> </ul> </li> <li>• caustics and refraction.</li> </ul>
<b><i>Virtual objects</i></b> must include:	<ul style="list-style-type: none"> <li>• cameras</li> <li>• lights</li> <li>• viewports.</li> </ul>
<b><i>Mesh primitives</i></b> may include code generated:	<ul style="list-style-type: none"> <li>• cubes</li> <li>• cylinders</li> <li>• other vertex-based constructs</li> <li>• spheres.</li> </ul>
<b><i>GUI elements</i></b> may include:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• checkboxes</li> <li>• item lists</li> <li>• option buttons</li> <li>• overlay panels</li> <li>• text input fields.</li> </ul>
<b><i>Documentation</i></b> may	<ul style="list-style-type: none"> <li>• architecture documentation</li> </ul>

include:	<ul style="list-style-type: none"><li>• code comments</li><li>• design documents</li><li>• in-code documentation</li><li>• internal module documentation</li><li>• release documents</li><li>• requirement documents</li><li>• test documents</li><li>• user manuals.</li></ul>

Game development

# ICAGAM508A Develop complex 3-D software for games and interactive media

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop complex 3-D software for games or interactive media.

## Application of the Unit

This unit applies to games programmers working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Build complex 3-D applications using multiple frameworks provided or engines</p>	<p>1.1 Employ integrated development environment facilities to include existing <i>3-D, audio and physics libraries</i> suitable for games or interactive media production</p> <p>1.2 <i>Configure a 3-D environment</i> compatible with a specified platform by using existing library facilities and appropriate <i>language</i></p> <p>1.3 Instantiate <i>virtual objects</i> in a complex 3-D environment</p> <p>1.4 Import complex <i>pre-constructed models</i> retrieved from persistent storage into a 3-D environment using scripts or library routines</p> <p>1.5 Use code to <i>animate 3-D objects</i> required by game play</p> <p>1.6 Use code to handle collisions between objects in a 3-D environment</p> <p>1.7 Use code to manipulate the texturing and other attributes of models during run-time execution</p> <p>1.8 Incorporate <i>environmental elements</i> to enhance user experience</p> <p>1.9 Select and use appropriate exception handling techniques to ensure program stability in a complex 3-D environment that uses multiple libraries</p>
<p>2. Create a complex graphical user interface (GUI) for a 3-D environment</p>	<p>2.1 Employ <i>integrated development environment</i> facilities to include existing 3-D compatible GUI controls suitable for complex games or interactive media production</p> <p>2.2 Combine predefined GUI elements to create a complex interface for a 3-D environment</p> <p>2.3 Modify scripts or code to customise existing GUI elements for a complex interface</p> <p>2.4 Write code that processes events raised by a complex GUI in a 3-D environment</p> <p>2.5 Use GUI events to modify the configuration of a complex 3-D environment</p>
<p>3. Debug a complex 3-D application</p>	<p>3.1 Use stand-alone debugging tools or tools provided by an integrated development environment to examine variables and trace running code across multiple libraries</p> <p>3.2 Employ debugging facilities, such as log windows or files to detect logical and coding errors</p>
<p>4. Use documentation</p>	<p>4.1 Identify and choose suitable integrated or third-party</p>

tools	documentation tools 4.2 Create and maintain code <i>documentation</i> for a complex 3-D project using selected integrated or third-party tools
-------	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret documentation and images to inform implementation of game specifications
- communication skills to:
  - check and confirm brief requirements
  - communicate clearly using speech and text
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - give constructive feedback
- literacy and numeracy skills to read briefs, game documentation, scripts, storyboards, scenarios, images, and technical and conceptual information
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
- problem-solving skills to recognise and address quality issues and problems
- teamwork skills to:
  - contribute to and work in a collaborative team
  - realise a unified game-play vision
- technical skills to:
  - implement programming solutions for specified problems
  - resolve basic hardware, software and other technical issues associated with game.

### Required knowledge

- complex 3-D application development
- debugging techniques
- documentation techniques
- object-oriented 3-D programming concepts
- object-oriented 3-D programming language
- techniques for using a GUI to interact with a user
- techniques for using multiple games-oriented libraries.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• employ multiple 3-D frameworks or libraries</li> <li>• build an appropriate GUI to develop complex 3-D applications with documentation generated by appropriate tools.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• suitable 3-D equipment, software and hardware</li> <li>• technical manuals</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of game production activities</li> <li>• verbal questioning or interview concerning aspects of game development, including:             <ul style="list-style-type: none"> <li>• capability of game engines and software tools to meet the requirements of the brief</li> <li>• evaluating game prototypes from technical, design and game-play perspectives</li> <li>• game testing and trialling procedures</li> <li>• maintaining integrity of the design brief and game design document</li> <li>• risk assessment and critical path planning</li> <li>• translating design and technical specifications into working game prototypes.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>3-D, audio and physics libraries</i></b> may include:	<ul style="list-style-type: none"> <li>• bullet</li> <li>• direct sound</li> <li>• directX</li> <li>• FMOD</li> <li>• Irrlicht</li> <li>• newton</li> <li>• OGRE</li> <li>• openGL.</li> </ul>
<b><i>Configure a 3-D environment</i></b> must include:	<ul style="list-style-type: none"> <li>• device selection</li> <li>• game resolution</li> <li>• screen colour depth</li> <li>• output performance such as: <ul style="list-style-type: none"> <li>• anti-aliasing</li> <li>• level of detail</li> <li>• filtering</li> </ul> </li> <li>• caustics and refraction.</li> </ul>
<b><i>Language</i></b> may include:	<ul style="list-style-type: none"> <li>• C#.net</li> <li>• C++</li> <li>• Java</li> <li>• Small Talk</li> <li>• VB.NET.</li> </ul>
<b><i>Virtual objects</i></b> must include:	<ul style="list-style-type: none"> <li>• audio managers</li> <li>• cameras</li> <li>• lights</li> <li>• physics managers</li> <li>• viewports.</li> </ul>
<b><i>Pre-constructed models</i></b> refers to:	<ul style="list-style-type: none"> <li>• 3-D mesh data containing predefined animation sequences that are retrieved from persistent storage using script or code</li> <li>• developed in-house</li> <li>• purchased third party.</li> </ul>
<b><i>Animate</i></b> must include:	<ul style="list-style-type: none"> <li>• animation selection/playback for pre-constructed models</li> <li>• based on user input</li> <li>• driven by code</li> </ul>

	<ul style="list-style-type: none"> <li>• dynamic camera movement as required by game play.</li> </ul>
<b>Objects</b> may include:	<ul style="list-style-type: none"> <li>• cameras</li> <li>• lights</li> <li>• pre-constructed meshes.</li> </ul>
<b>Environmental elements</b> may include:	<ul style="list-style-type: none"> <li>• audio</li> <li>• render filters</li> <li>• simulated physics</li> <li>• tactile feedback.</li> </ul>
<b>Integrated development environment</b> may include:	<ul style="list-style-type: none"> <li>• Code Warrior</li> <li>• Code::Blocks</li> <li>• Eclipse</li> <li>• J-Edit</li> <li>• Visual C++</li> <li>• Visual Studio suite.</li> </ul>
<b>Documentation</b> may include:	<ul style="list-style-type: none"> <li>• architecture documentation</li> <li>• code comments</li> <li>• design documents</li> <li>• in-code documentation</li> <li>• internal module documentation</li> <li>• release documents</li> <li>• requirement documents</li> <li>• test documents</li> <li>• user manuals.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM509A Design interactive 3-D applications for scientific and mathematical modelling

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design interactive 3-D applications for scientific and mathematical modelling.

## Application of the Unit

This unit applies to individuals with object-oriented programming skills working in any industrial context that requires 3-D computer simulation of a well-defined environment, system or set of relationships.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Determine and confirm business expectations and needs</p>	<p>1.1 Apply skills to determine business requirements and verify the accuracy of the information gathered</p> <p>1.2 Determine critical environmental, systemic relationships that require simulation in a 3-D environment</p> <p>1.3 Identify critical <i>data sources</i> required by simulations or modelling</p> <p>1.4 Document critical environmental, systemic relationships and data sources that require simulation in a 3-D environment</p>
<p>2. Design an interactive 3-D application for scientific or mathematical modelling</p>	<p>2.1 Use <i>prototyping tools</i> to provide proof of concept for environmental and systemic relationships</p> <p>2.2 Identify <i>technologies and platforms</i> suitable for the deployment of scientific or mathematical modelling</p> <p>2.3 Apply object-oriented programming principles to design <i>classes and algorithms</i> to support scientific or mathematical modelling in an interactive 3-D environment</p>
<p>3. Design a 3-D environment that simulates a scientific or mathematical model</p>	<p>3.1 Select appropriate visual representation for <i>elements of a 3-D scientific or mathematical model</i></p> <p>3.2 Analyse required interaction between user and a 3-D environment</p> <p>3.3 Design a graphical user interface (GUI) to support required interaction between use and a 3-D environment</p>
<p>4. Develop procedures to test a scientific or mathematical model</p>	<p>4.1 Develop <i>testing procedures</i> and standards that verify modelling integrity</p> <p>4.2 <i>Document</i> testing procedures and standards that verify modelling integrity</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret documentation and images to inform implementation of game specifications
- communication skills to:
  - check and confirm brief requirements
  - communicate clearly using speech and text
  - communicate technical requirements related to software development, graphics requirements, code development and testing procedures to supervisors and other team members
  - give constructive feedback
- literacy and numeracy skills to:
  - document testing procedures
  - read briefs, game documentation, scripts, storyboards, scenarios and images
  - develop technical and conceptual information
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
- problem-solving skills to recognise and address quality issues and problems
- teamwork skills to:
  - contribute to and work in a collaborative team
  - realise a unified vision of the completed project
- technology skills to:
  - design programming solutions for specified problems
  - use a GUI.

### Required knowledge

- documentation techniques
- object-oriented 3-D programming design methodologies
- object-oriented 3-D programming principles
- data sources and business expectations and needs
- techniques for using a GUI to interact with a user
- testing procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• determine business requirements and determine data to be used in a 3-D computer simulation or mathematical modelling application</li> <li>• design an interactive 3-D environment that reflects scientific or mathematical modelling.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• suitable 3-D equipment, software and hardware</li> <li>• technical manuals</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of design activities</li> <li>• verbal questioning or interview concerning aspects of design development, including: <ul style="list-style-type: none"> <li>• capability of engines and software tools to meet the requirements of the brief</li> <li>• evaluating prototypes from technical, design and interactive perspectives</li> <li>• simulation testing and trialling procedures</li> <li>• maintaining integrity of the design brief and design document</li> <li>• risk assessment and critical path planning</li> <li>• translating design and technical specifications into working simulation prototypes.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b>Data sources</b> may include:</p>	<ul style="list-style-type: none"> <li>• analog devices</li> <li>• databases</li> <li>• digital devices</li> <li>• process controllers</li> <li>• spreadsheets</li> <li>• web-based data sources</li> <li>• XML documents.</li> </ul>
<p><b>Prototyping tools</b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D prototyping applications</li> <li>• existing simulation and modelling software</li> <li>• flow chart applications</li> <li>• scientific calculators</li> <li>• spreadsheet applications.</li> </ul>
<p><b>Technologies and platforms</b> may include:</p>	<ul style="list-style-type: none"> <li>• Berkeley Madonna</li> <li>• DeSolve</li> <li>• EMACS</li> <li>• ESS</li> <li>• Maple</li> <li>• Mathematica</li> <li>• MatLab</li> <li>• MMNP</li> <li>• networked computers</li> <li>• R</li> <li>• Stella</li> <li>• Supercomputers.</li> </ul>
<p><b>Classes and algorithms</b> may include:</p>	<ul style="list-style-type: none"> <li>• application of Taylor series as convergent and asymptotic series</li> <li>• Cholesky factorisations</li> <li>• computing derivatives by:             <ul style="list-style-type: none"> <li>• automatic differentiation (AD)</li> <li>• finite differences</li> </ul> </li> <li>• Discrete Fourier transform</li> <li>• graph theoretic suites</li> <li>• high order difference approximations</li> <li>• LU factors with Gaussian elimination</li> </ul>

	<ul style="list-style-type: none"> <li>• methods for integration on a uniform mesh</li> <li>• molecular dynamics</li> <li>• Monte Carlo methods</li> <li>• Newton's method</li> <li>• numerical linear algebra</li> <li>• Runge Kutta method for solving ordinary differential equations</li> <li>• time stepping methods for dynamical systems.</li> </ul>
<p><i>Elements of a 3-D scientific or mathematical model</i> may include:</p>	<ul style="list-style-type: none"> <li>• computer animation</li> <li>• computer simulation</li> <li>• information visualisation</li> <li>• interface technology and perception</li> <li>• surface rendering</li> <li>• volume rendering</li> <li>• volume visualisation.</li> </ul>
<p><i>Testing procedures</i> may include:</p>	<ul style="list-style-type: none"> <li>• expected results</li> <li>• parallel processing</li> <li>• test data.</li> </ul>
<p><i>Document</i> may include:</p>	<ul style="list-style-type: none"> <li>• architecture</li> <li>• design</li> <li>• release</li> <li>• requirement</li> <li>• test</li> <li>• user manuals.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM510A Prepare games for different platforms and delivery modes

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to build, maintain and test games across multiple system platforms.

## Application of the Unit

This unit applies to games programmers and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Produce a game package for multiple platforms	1.1 Research and identify <b>cross-platform installers</b> 1.2 Use an installer to package a game for multiple platforms
2. Develop a cross-platform project	2.1 Identify cross-platform <b>integrated development environment (IDE)</b> 2.2 Identify cross-platform <b>renderer libraries, physics libraries, audio libraries and network libraries</b> 2.3 Source or compile cross-platform libraries 2.4 Compile project for multiple platforms 2.5 Test and maintain cross-platform software project 2.6 Use platform specific <b>input devices</b>
3. Compile a report on cross-platform software development	3.1 Identify and document <b>issues in cross-platform development</b> 3.2 Develop an awareness of cross-platform hardware

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to document and present research results
- learning skills to incorporate results of trialling and testing
- planning skills to:
  - produce distributable packages for multiple platforms
  - undertake risk assessment and critical path planning
- problem-solving skills to:
  - apply a variety of strategies for game trialling and testing
  - recognise and address potential problems while testing cross-platform software
- research skills to identify and source appropriate cross-platform installers
- technical skills to develop and test cross-platform applications.

### Required knowledge

- current cross-platform IDEs
- evaluation techniques for cross-platform development libraries
- research methods for cross-platform development and distribution
- testing procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• produce cross-platform game project</li> <li>• identify and use cross-platform IDE libraries and installers</li> <li>• resolve issues of developing cross-platform games.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• computers running various operating systems</li> <li>• platform-specific hardware</li> <li>• IDEs and libraries</li> <li>• installers for product distribution</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. <i>Input devices</i> may include:	<ul style="list-style-type: none"> <li>• accelerometer</li> <li>• gamepads</li> <li>• gyroscope</li> <li>• keyboard</li> <li>• mice</li> <li>• touch screen</li> <li>• trackpad.</li> </ul>
<i>Issues in cross-platform development</i> may include:	<ul style="list-style-type: none"> <li>• display systems that may vary, such as Nintendo DS</li> <li>• graphical user interfaces (GUIs) that are rendered differently by various platforms</li> <li>• threads implemented differently on various platforms.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM511A Manage testing of games and interactive media

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage the testing of games and interactive media to enable timely product release.

## Application of the Unit

This unit applies to IT personnel who take responsibility for managing testing games and interactive media.

The management of the testing of a product directly impacts on the quality and time lines of delivery to market of a product. Good test management can deliver a quality product. Badly designed products take longer to test but can still be of quality, when partnered with good test management. Well-designed software and good test management go hand in hand to produce quality, timely software products.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Determine quality requirements statement which will enable product release</p>	<p>1.1 Review picture of product in market place to determine high-level requirements provided by product, for expected clients, considering all <i>types of requirements</i></p> <p>1.2 Define a releasable product in terms of <i>outstanding bugs</i>, to enable a <i>limited release</i> and a complete product release</p> <p>1.3 Summarise findings into a product release enabling quality requirements statement</p> <p>1.4 Confirm client and development, agreement on product release enabling quality requirements statement</p>
<p>2. Define test plan to enable testing of required quality as defined by agreed quality requirements statement</p>	<p>2.1 Determine expected <i>test cycles</i>, during the software development life cycle, considering what development methodology is in use and what the quality requirements are for product release</p> <p>2.2 Determine what <i>types of testing</i> will be performed during the test cycles to enable efficiency of processes and confirmation of quality requirements statement</p> <p>2.3 Determine what <i>testing methods</i> will be used to implement testing types defined for defined test cycles</p> <p>2.4 Determine <i>testing technique</i> to be used to determine test cases and analyse results</p> <p>2.5 Perform test cycle until a combination is found that provides an acceptable balance of cost, quality and risk, for upper management and development to agree to</p> <p>2.6 Selection <i>test-support software</i> to enable efficiency in testing and testing management</p> <p>2.7 Define <i>implementation details</i> for agreed testing and team responsible for testing management</p> <p>2.8 Define <i>reporting details</i> for testing throughout product life cycle to enable ongoing management of testing process</p> <p>2.9 Confirm test plan completeness using available <i>completeness techniques</i></p> <p>2.10 Confirm test plan with development and management</p>
<p>3. Install and configure test plan defined test support software</p>	<p>3.1 Install and configure bug tracking process and define bug description fields to maximise efficiency and minimise possibilities of bouncing bugs</p> <p>3.2 Install and configure test case management software</p> <p>3.3 Install and configure test cycle management and reporting software</p>

	3.4 Install and configure automated test tools
4. Manage testing process to enable defined quality requirements	<p>4.1 Manage and report on development of test cases</p> <p>4.2 Manage and report on test cycle status</p> <p>4.3 Manage and report on outstanding bug status</p> <p>4.4 Manage and report on status of product testing related to product release enabling quality requirements statement</p> <p>4.5 Update test plan and schedule to deal with changing development conditions, and ensure management are informed</p> <p>4.6 Manage bugs to ensure efficient bug handling and resolution</p> <p>4.7 Manage test environment, including setup, receipt of test builds and clean-up</p>
5. Finalise testing for release	<p>5.1 Produce testing results for management review prior to release</p> <p>5.2 Manage test product freeze for final release and final test run</p> <p>5.3 Confirm product, release enabling, and quality requirements have been met</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to define test plan details and identify bugs or issues
- communication skills to:
  - determine and define quality requirements statement
  - manage and coordinate testing processes and finalisation of testing
- literacy skills to produce technical documentation and reports
- planning skills to define test plan details
- technical skills to:
  - manage test environment
  - develop test plan details
  - select, install and configure test plan support software.

### Required knowledge

- client requirements for platforms, hardware and software
- client system requirements, both functional and non-functional
- procedures for bug or issue management and identification
- test reporting requirements
- testing techniques, methods, test types, system dissection.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• define quality requirements and an associated test plan for software</li> <li>• install and configure testing support software</li> <li>• manage testing process</li> <li>• identify bugs or issues accurately and concisely</li> <li>• finalise software testing process to enable product release.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• system undergoing development with associated specifications</li> <li>• client requirements (verbal or written) for system quality requirements</li> <li>• testing support software</li> <li>• test environment</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate identifying or finding bugs and issues</li> <li>• review of reports prepared by candidate showing plans and management of testing.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Types of requirements</b> may include:	<ul style="list-style-type: none"> <li>functional, such as audio and visual</li> <li>installation, such as new, upgrades, database and software</li> <li>non-functional, such as performance, load, stress and cultural</li> <li>platform or environment.</li> </ul>
<b>Outstanding bugs</b> may include:	<ul style="list-style-type: none"> <li>defined priorities</li> <li>with or without defined priorities.</li> </ul>
<b>Limited release</b> may include:	<ul style="list-style-type: none"> <li>alpha and beta release options</li> <li>environment-specific release</li> <li>internal or in-house release options</li> <li>external release options</li> <li>platform-specific release.</li> </ul>
<b>Test cycles</b> may include:	<ul style="list-style-type: none"> <li>delivery of testable product to client</li> <li>delivery of testable product to test team</li> <li>in-development tests, such as source-code updates or retrievals from source control, initial implementation complete time, pre-implementation time.</li> </ul>
<b>Types of testing</b> may include:	<ul style="list-style-type: none"> <li>acceptance</li> <li>data functionality</li> <li>functionality</li> <li>graphical user interface (GUI)</li> <li>load</li> <li>performance</li> <li>regression</li> <li>smoke</li> <li>stress</li> <li>unit.</li> </ul>
<b>Testing methods</b> may include:	<ul style="list-style-type: none"> <li>automated, such as coded testing or using automation-tool</li> <li>manual, such as exploratory or testing of specific test cases</li> <li>static and dynamic analysis.</li> </ul>
<b>Testing technique</b> may include:	<ul style="list-style-type: none"> <li>boundary value analysis</li> <li>equivalence</li> <li>way of designing test cases.</li> </ul>
<b>Test-support software</b>	<ul style="list-style-type: none"> <li>bug tracking software</li> </ul>

may include:	<ul style="list-style-type: none"> <li>• test automation software, such as: <ul style="list-style-type: none"> <li>• WinRunner</li> <li>• LoadRunner</li> </ul> </li> <li>• test case-management software, such as Test Director.</li> </ul>
<i>Implementation details</i> and <i>reporting details</i> may include:	<ul style="list-style-type: none"> <li>• communication and interaction levels between departments for cycles, such as development may or may not be approachable during particular processes or cycles</li> <li>• details of all processes and procedures</li> <li>• required documentation repositories, templates, structures and locations.</li> </ul>
<i>Completeness techniques</i> may include:	<ul style="list-style-type: none"> <li>• interdepartmental reviews</li> <li>• intradepartmental reviews</li> <li>• system dissection.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM512A Create and implement designs for a 3-D games environment

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create and implement designs within the context of a 3-D games environment.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify technologies to be used with 3-D games development	1.1 Discuss and decide on 3-D <b>modelling software</b> for production of designs and ramifications of choice 1.2 Discuss and decide on 2-D <b>image-editing software</b> for textures 1.3 Establish 3-D production considerations for available computer hardware
2. Develop design documentation for 3-D effects	2.1 Establish <b>theme</b> for design and determine required modelling assets 2.2 Create file archiving system for the storage of <b>3-D components</b> , models and versions 2.3 Establish project development pipeline and production deadlines to meet assessment dates
3. Develop and create storyboards	3.1 Create storyline for animation 3.2 Develop storyboard that implements storyline document 3.3 Review and finalise storyboard document for implementation
4. Develop and create projects	4.1 Create new document and conduct creation of models as outlined in the production pipeline, theme and storyboard documents 4.2 Archive project as specified by the assignment criteria for submission

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - assess suitability of software and hardware technologies within project context
  - establish clear advantages, disadvantages and limitations of technologies and their implementation
- communication skills to discuss suitability of storyboard design within project context
- planning and organisational skills to:
  - establish clear goals to achieve required software development outcomes
  - meet project deadlines
- technology skills to:
  - resolve basic hardware, software and other technical issues associated with software production
  - use correct file formats and archiving procedures.

### Required knowledge

- concepts of animation techniques
- concepts of digital effects generation
- 2-D and 3-D graphics editing software and their common concepts
- appropriate graphics formats.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create and develop design documents for 3-D animations</li> <li>• follow a project pipeline to produce a 3-D animation product.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of fault-finding exercises</li> <li>• verbal questioning or interview</li> <li>• evaluation of written or interactive computer-based test or quiz</li> <li>• evaluation of reports and logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Modelling software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3D Studio Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Maya.</li> </ul>
<b><i>Image-editing software</i></b> may include:	<ul style="list-style-type: none"> <li>• After Effects</li> <li>• Avid</li> <li>• Combustion</li> <li>• D2 Nuke</li> <li>• Digital Fusion</li> <li>• Final Cut Pro</li> <li>• Flame</li> <li>• Flint</li> <li>• Fusion</li> <li>• Inferno</li> <li>• Inferno</li> <li>• Lustre</li> <li>• Photoshop</li> <li>• Premier</li> <li>• Renderman</li> <li>• Shake.</li> </ul>
<b><i>Theme</i></b> may include:	<ul style="list-style-type: none"> <li>• cyber or steam punk</li> <li>• fantasy</li> <li>• horror</li> <li>• medieval</li> <li>• science fiction.</li> </ul>
<b><i>3-D components</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D landscapes</li> <li>• buildings, walls, houses and other structures</li> <li>• character models</li> <li>• graphical user interface (GUI) widgets</li> <li>• items and collectables</li> <li>• light sources and effects</li> <li>• trees, shrubs and bushes</li> <li>• vehicles.</li> </ul>

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Design and plan a 3-D model</p>	<p>1.1 Research and collect a portfolio of <i>reference material</i></p> <p>1.2 Present portfolio of collected reference material</p> <p>1.3 Use reference material to develop and design a <i>modelling plan</i></p>
<p>2. Use suitable geometry surface for models</p>	<p>2.1 Research different types of geometry to find which choice would be most suitable for 3-D model</p> <p>2.2 Clearly document selected <i>geometry choice</i></p> <p>2.3 Explain, justify and demonstrate reasons for selected geometry choice</p> <p>2.4 Apply selected geometry choice to 3-D model</p> <p>2.5 Make changes where necessary</p>
<p>3. Analyse resource material to construct and apply suitable topology</p>	<p>3.1 Construct and test a topology plan using chosen <i>concept development software</i></p> <p>3.2 Explain or demonstrate reason for choosing particular modelling method</p> <p>3.3 Assess and refine topology plan with client and relevant personnel</p>
<p>4. Construct a 3-D model</p>	<p>4.1 Use modelling plan to construct model in chosen <i>3-D modelling and animation software</i></p> <p>4.2 Build model according to specifications</p> <p>4.3 Present the near finished product to relevant personnel</p> <p>4.4 Accept <i>feedback</i> to incorporate into final design</p> <p>4.5 Assess and refine model with clients and relevant personnel</p> <p>4.6 Compose a <i>report on experience</i> of working on 3-D model</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in 3-D design and innovation
- numeracy skills to interpret technical charts, specifications or diagrams relevant to the construction of a 3-D model
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required 3-D modelling outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake technical research into the proper topology and geometry layout for 3-D models
- technical skills to visualise and develop concepts.

### Required knowledge

- box, edge-loop and patch modelling
- capabilities and restraints of 3-D modelling packages
- copyright laws and regulations
- digital model development, including specific terminology
- geometry surfaces, including NURBS, Sub-D, Polygon and T-splines
- human resources required in the process of creating a 3-D model, and their respective skills and technology requirements

- methods of sourcing and using reference material
- OHS requirements for ergonomics and electrical safety
- scheduling production components
- technical requirements that hardware imposes on graphics development and requirements, and creative visual design
- topology layouts
- key aspects of modelling plan to build models
- uses of storyboards and scripts.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• build advanced models according to plans</li> <li>• use specified geometry surfaces</li> <li>• use complex topology layouts.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the learner using 3-D animation software</li> <li>• review of written and verbal reports or documentation showing modelling plan</li> <li>• review of portfolios of evidence</li> <li>• review of third-party workplace reports of learner skills and performance</li> <li>• review of functional 3-D scene files</li> <li>• evaluation of a completed model.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b>Reference material</b> may include:</p>	<ul style="list-style-type: none"> <li>• blueprints</li> <li>• developmental drawings</li> <li>• internet research</li> <li>• museum information</li> <li>• orthographic images</li> <li>• photographs</li> <li>• schematics</li> <li>• video footage.</li> </ul>
<p><b>Modelling and topology plan</b> may include:</p>	<ul style="list-style-type: none"> <li>• blueprints</li> <li>• concept creation</li> <li>• orthographic images</li> <li>• schematics</li> <li>• time management.</li> </ul>
<p><b>Geometry choice and modelling method</b> may include:</p>	<ul style="list-style-type: none"> <li>• box modelling</li> <li>• edge-loop modelling</li> <li>• NURBS modelling</li> <li>• patch modelling</li> <li>• polygon modelling</li> <li>• sub-division modelling</li> <li>• T-Spline modelling.</li> </ul>
<p><b>Concept development software</b> may include:</p>	<ul style="list-style-type: none"> <li>• Adobe Flash</li> <li>• Adobe Illustrator</li> <li>• ArtGem</li> <li>• ArtRage</li> <li>• Artweaver</li> <li>• Aviary</li> <li>• Corel Draw, Painter, Essentials</li> <li>• Deluxe Paint</li> <li>• GIMP</li> <li>• Grafx</li> <li>• Graphics Gale</li> <li>• ImageForge</li> <li>• Inkscape</li> <li>• Microsoft Paint</li> </ul>

	<ul style="list-style-type: none"> <li>• mtpaint</li> <li>• MyPaint</li> <li>• NeoPaint</li> <li>• Open Canvas</li> <li>• Paint Shop Pro</li> <li>• Paint.NET</li> <li>• Photoshop</li> <li>• Synfig</li> <li>• Ulead PhotoImpact</li> <li>• Ultimate Paint.</li> </ul>
<p><b><i>3-D modelling and animation software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• ZBrush.</li> </ul>
<p><b><i>Feedback</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• accepting and responding to comment, critique and suggestions from:             <ul style="list-style-type: none"> <li>• clients</li> <li>• colleagues</li> <li>• target audience representatives.</li> </ul> </li> </ul>
<p><b><i>Reporting on experience</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• explaining what went wrong</li> <li>• what could be improved, such as:             <ul style="list-style-type: none"> <li>• geometry choice</li> <li>• modelling method</li> <li>• modelling plan</li> <li>• topology plan.</li> </ul> </li> </ul>

## Unit Sector(s)

Game development

## ICAGAM515A Design and create advanced particles, fluids and bodies for 3-D digital effects

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce advanced simulated effects in a 3-D and digital effects environment.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Analyse approaches to design requirements</p>	<p>1.1 Analyse the design requirements for <i>particle systems, fluids</i> and <i>bodies</i> outlined in <i>brief and documents</i></p> <p>1.2 Identify where the <i>advanced simulated effects</i> will fit into the production pipeline</p> <p>1.3 Identify factors that may influence the design approach to creating advanced simulated effects</p>
<p>2. Demonstrate understanding of advanced simulated effects</p>	<p>2.1 Review <i>media</i> and techniques that may inspire simulated effects ideas</p> <p>2.2 Respond to brief and documents and provide solutions to the creation of advanced simulated effects for <i>3-D environments</i></p> <p>2.3 Present design ideas and <i>design considerations</i> with justification of the choice of advanced simulated effects to relevant <i>personnel</i></p>
<p>3. Plan approach to simulated effects</p>	<p>3.1 Adapt and finalise the design according to <i>feedback</i> from relevant personnel</p> <p>3.2 Identify skills and processes required for creating advanced simulated effects systems</p> <p>3.3 Source and gather reference materials and maintain a portfolio of these references</p> <p>3.4 Plan a time line to create the advanced simulated effects</p>
<p>4. Produce particles, fluids and bodies for review</p>	<p>4.1 Use <i>programming languages</i> to create <i>code</i> to assist or produce the advanced simulated effects</p> <p>4.2 Using <i>toolsets, create prototype</i> of advanced simulated effects based on finalised design</p> <p>4.3 Implement physics and forces to the advanced simulated effects to produce the desired outcome</p> <p>4.4 Conduct <i>testing</i></p> <p>4.5 Review results and present created effects to relevant personnel for feedback and discussion about the implementation of the effects in accordance to the requirements of the design</p>
<p>5. Finalise advanced simulated effects</p>	<p>5.1 Adapt the advanced simulated effects and the design if necessary according to feedback</p> <p>5.2 <i>Polish</i> the advanced simulated effects</p> <p>5.3 Present finalised advanced simulation effects in <i>requested form</i>, including pre-production portfolio demonstrating</p>

	project research and development for evaluation and review by the relevant personnel
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse design requirements for particle systems, fluids and bodies
  - interpret briefs, documents and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
- initiative and enterprise skills to exercise a high level of creative ingenuity in advanced 3-D effects and innovation
- literacy and numeracy skills to:
  - develop technical design documents
  - read briefs, work instructions, and technical and conceptual information
  - write instructions for the normal and competent operation and testing of all features and permutations
- management skills to manage teams in order to effectively extract useful feedback
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into advanced effects
- self-management skills to complete assigned tasks
- teamwork skills to:
  - contribute to and work in a collaborative team
  - realise a unified game-play vision
- technical skills to:
  - resolve basic hardware, software and other technical issues associated with 3-D environments
  - translate design requirements into specifications
  - use correct file formats and archiving procedures.

## Required knowledge

- basic programming techniques
- computer game development, including specific terminology
- current game-play hardware and software products
- environmental impact and sustainability considerations
- human resources required in the process of creating a game and their respective skills and technology requirements
- OHS requirements for:
  - ergonomics, such as when lifting
  - electrical safety
  - materials handling
  - physical hazards
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design
- techniques for applying concept development skills
- techniques for applying concept visualisation skills.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• demonstrate knowledge of advanced simulated effects</li> <li>• adapt design according to feedback</li> <li>• develop advanced simulation effects according to a production plan</li> <li>• use appropriate effects, such as particles, fluids and rigid or soft bodies</li> <li>• use programming languages to assist the creation of advanced simulation effects</li> <li>• maintain a portfolio of reference materials</li> <li>• produce a polished and finalised deliverable.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of fault finding</li> <li>• observation of working prototypes</li> <li>• verbal questioning or interview concerning aspects of development, including: <ul style="list-style-type: none"> <li>• creation of advanced simulated effects</li> <li>• design and choice of advanced simulated effects</li> </ul> </li> <li>• review of reports and logbooks</li> <li>• review of working polished deliverable.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Particle systems</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D or 2-D system that simulates effects, such as:             <ul style="list-style-type: none"> <li>• blood</li> <li>• clouds</li> <li>• dust</li> <li>• explosions</li> <li>• falling leaves</li> <li>• fire</li> <li>• fog</li> <li>• fur</li> <li>• grass</li> <li>• hair</li> <li>• light</li> <li>• meteor trails</li> <li>• moving water</li> <li>• rain</li> <li>• snow</li> <li>• sparks</li> <li>• splashing water</li> </ul> </li> <li>• 3-D or 2-D system that creates abstract effects, such as:             <ul style="list-style-type: none"> <li>• glowing trails</li> <li>• magic effects.</li> </ul> </li> </ul>
<p><b><i>Fluids</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D or 2-D simulation of effects, such as:             <ul style="list-style-type: none"> <li>• blood</li> <li>• gas</li> <li>• lava</li> <li>• oil</li> <li>• plasma</li> <li>• water.</li> </ul> </li> </ul>
<p><b><i>Bodies</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• soft or rigid</li> <li>• fluids</li> <li>• primitives</li> <li>• solids.</li> </ul>

<p><b><i>Brief and documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings, such as:             <ul style="list-style-type: none"> <li>• illustrations</li> <li>• models</li> <li>• sketches</li> </ul> </li> <li>• designer notes</li> <li>• development environment description</li> <li>• game design document</li> <li>• game-play designs</li> <li>• help notes</li> <li>• information design</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<p><b><i>Advanced simulated effects</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• fluids</li> <li>• particle systems</li> <li>• rigid bodies</li> <li>• soft bodies.</li> </ul>
<p><b><i>Media</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• designs</li> <li>• games</li> <li>• images</li> <li>• movies</li> <li>• videos.</li> </ul>
<p><b><i>3-D environments</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D animations</li> <li>• 3-D games.</li> </ul>
<p><b><i>Design considerations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• genre</li> <li>• target market</li> <li>• cultural context</li> <li>• resource limitations and constraints.</li> </ul>
<p><b><i>Personnel</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> </ul>

	<ul style="list-style-type: none"> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>
<b>Feedback</b> may involve:	<ul style="list-style-type: none"> <li>• accepting and responding to comment, critique and suggestions from: <ul style="list-style-type: none"> <li>• target audience representatives</li> <li>• clients</li> <li>• colleagues.</li> </ul> </li> </ul>
<b>Programming languages</b> may include:	<ul style="list-style-type: none"> <li>• 3-D software embedded software language</li> <li>• C++</li> <li>• Java</li> <li>• Ruby on Rails.</li> </ul>
<b>Code</b> may include:	<ul style="list-style-type: none"> <li>• code libraries</li> <li>• code objects</li> <li>• control loops</li> <li>• scripts.</li> </ul>
<b>Toolsets</b> may include:	<ul style="list-style-type: none"> <li>• integrated development environments, such as: <ul style="list-style-type: none"> <li>• Code::Blocks</li> <li>• Eclipse</li> <li>• Microsoft Visual Studio</li> <li>• Net Beans</li> </ul> </li> <li>• game assets, such as: <ul style="list-style-type: none"> <li>• current work files</li> <li>• development kits</li> <li>• existing digital product libraries, e.g. character models, environments, motion capture data and sound effects</li> <li>• game engines, including customised game engines</li> </ul> </li> <li>• 3-D modelling and animation software, such as: <ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• Modo</li> <li>• XSI</li> <li>• ZBrush</li> <li>• compositing software, such as:             <ul style="list-style-type: none"> <li>• after effects</li> <li>• digital fusion</li> <li>• flame</li> <li>• nuke</li> <li>• premier</li> <li>• smoke.</li> </ul> </li> </ul>
<i>Creating prototype</i> may involve:	<ul style="list-style-type: none"> <li>• bug fixing, bug databases, creating stable code bases and game tuning</li> <li>• building flexible systems, configurable by others</li> <li>• code review and test harnesses</li> <li>• designing and implementing tests and incorporating feedback from quality assurance</li> <li>• knowledge of games as dynamic systems:             <ul style="list-style-type: none"> <li>• applying advanced simulated effects strategies in light of feedback from relevant personnel</li> <li>• working with quality assurance and understanding test feedback</li> </ul> </li> <li>• use of appropriate tools and skills for fast, interactive development.</li> </ul>
<i>Testing</i> may include:	<ul style="list-style-type: none"> <li>• unit</li> <li>• integration</li> <li>• system.</li> </ul>
<i>Polish</i> may involve enhancing:	<ul style="list-style-type: none"> <li>• game play</li> <li>• graphics</li> <li>• speed.</li> </ul>
<i>Requested form</i> may include:	<ul style="list-style-type: none"> <li>• 3-D application executable</li> <li>• 3-D game executable</li> <li>• 3-D rendered sequence.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM516A Animate a 3-D character for digital games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to animate a 3-D character for digital games.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Determine 3-D character model animation requirements</p>	<p>1.1 Study production documentation animation requirements for 3-D character</p> <p>1.2 Determine the <i>target environments</i> for 3-D digital character animation</p> <p>1.3 Establish required level of detail for 3-D character model animation</p> <p>1.4 Determine work flow sequences to ensure that production schedule deadlines are met</p> <p>1.5 Select <i>software tools</i> that best suit the production pipeline and the target <i>game engine</i> and <i>platform</i> for final export of 3-D digital character modelling and animations</p>
<p>2. Create required animations using a variety of animated tools</p>	<p>2.1 Determine the most efficient animation methodology</p> <p>2.2 Animate first pass, applying animation principles and experimenting with techniques to produce the required movements</p> <p>2.3 Submit first pass for approval to <i>relevant personnel</i></p> <p>2.4 Make adjustments as required and refine animation in passes until storyboard requirements are achieved</p> <p>2.5 Animate facial features with lip-syncing to match audio and design requirements of approved storyboard</p> <p>2.6 Create <i>primary animations</i> as required</p>
<p>3. Finalise animations</p>	<p>3.1 Submit character animations for final check to relevant personnel</p> <p>3.2 Finalise projects according to production procedure</p>
<p>4. Export animations</p>	<p>4.1 Export animation and 3-D character model to required game engine</p> <p>4.2 Test character animations in game engine</p> <p>4.3 Submit final character animations to relevant personnel</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in 3-D design and innovation
- literacy and numeracy skills to develop 3-D design and technical design documents
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- technical skills to:
  - use correct file formats and archiving procedures
  - resolve basic hardware, software and other technical issues associated with game production.

### Required knowledge

- 3-D animation
- 3-D modelling
- anatomy and physical movement
- budgeting and scheduling considerations for game design
- capabilities and constraints of game engines
- client communication

- computer game development, including specific terminology
- current game-play hardware and software products
- environmental impact and sustainability considerations
- graph curve editor
- human resources required in the process of creating a game, and their respective skills and technology requirements
- methods for using reference material
- OHS requirements for:
  - ergonomics
  - electrical safety
- physical attributes to create effects, such as weight and anticipation
- risk and critical path management
- scheduling production components
- shading and texturing
- techniques for applying concept development skills
- techniques for applying concept visualisation skills
- techniques for using storyboard and script production
- time management
- transfer methodology, including rotoscope, hand key and motion capture.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• select correct tools to work with target game engine and platform</li> <li>• apply animation principles</li> <li>• develop an animated character model</li> <li>• export animated character model to game engine</li> <li>• test character animations in game engine.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of nominated techniques applied to selected subject matter</li> <li>• direct observation of the learner using 3-D animation software</li> <li>• review of work activities that show research and reference sourcing to gain best modelling effect</li> <li>• written and verbal reports or documentation showing modelling plan</li> <li>• evaluation of functional animated 3-D character in game engine.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Target environments</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• alien environments</li> <li>• fantasy environments</li> <li>• foreign environments</li> <li>• historical environments</li> <li>• natural environments, for example:             <ul style="list-style-type: none"> <li>• mountainous</li> <li>• jungle</li> <li>• desert</li> <li>• arctic</li> </ul> </li> <li>• post-apocalyptic environments</li> <li>• urban environments.</li> </ul>
<p><b><i>Software tools</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• ZBrush.</li> </ul>
<p><b><i>Game engine</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• BigWorld</li> <li>• Blender3D</li> <li>• game engine custom-built with rendering engine, such as:             <ul style="list-style-type: none"> <li>• OGRE</li> <li>• Irrlicht</li> </ul> </li> <li>• Dunia</li> <li>• Half Life</li> <li>• Jade</li> <li>• Quake</li> <li>• Riot</li> <li>• Scimitar</li> <li>• Second Life</li> <li>• Unreal.</li> </ul>

<p><b>Platform</b> may include:</p>	<ul style="list-style-type: none"> <li>• arcade</li> <li>• console platforms: <ul style="list-style-type: none"> <li>• Microsoft Xbox 360</li> <li>• Nintendo DS (hand-held)</li> <li>• Nintendo Wii</li> <li>• Sony PlayStation</li> </ul> </li> <li>• hand-held digital device platforms: <ul style="list-style-type: none"> <li>• Apple IIe/c/c+</li> <li>• Apple IIGS</li> <li>• Blackberry</li> <li>• BREW</li> <li>• Flashlite</li> <li>• Google Android</li> <li>• Java</li> <li>• J2ME</li> <li>• Palm OS</li> <li>• Sidekick</li> <li>• Symbian</li> <li>• WAP</li> <li>• Windows Mobile</li> </ul> </li> <li>• personal computer (PC)</li> <li>• web.</li> </ul>
<p><b>Relevant personnel</b> may include:</p>	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>
<p><b>Primary animations</b> may include:</p>	<ul style="list-style-type: none"> <li>• attacking</li> <li>• crouching</li> </ul>

	<ul style="list-style-type: none"><li>• defending</li><li>• dying</li><li>• idle</li><li>• jumping</li><li>• running</li><li>• shooting</li><li>• standing</li><li>• throwing</li><li>• walking.</li></ul>
--	--

## Unit Sector(s)

Game development

## ICAGAM517A Produce a digital animation sequence

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce a digital animation sequence for the 3-D and digital effects environment, involving the completion of a digital editing project.

### Application of the Unit

This unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop or source story or concept	<p>1.1 Research ideas for animation sequence</p> <p>1.2 Produce treatment of animation sequence</p>
2. Develop plan and determine components required for animation sequence	<p>2.1 Produce and work according to production plan</p> <p>2.2 Develop a <i>storyboard</i> detailing the 3-D animation</p> <p>2.3 Create concept drawings for 3-D models</p> <p>2.4 Show evidence of reference material used for storyboard and concept drawings</p>
3. Produce animation sequence using 3-D software	<p>3.1 Use the production plan to create animation</p> <p>3.2 Select <i>appropriate frames per second</i> to use for the animation</p> <p>3.3 Use references to create <i>assets</i></p> <p>3.4 Create a 3-D animation project using <i>3-D modelling and animation software</i></p> <p>3.5 Animate components of the 3-D environment to reflect planned animation sequence</p> <p>3.6 Using 3-D modelling and animation software, produce <i>high-end lighting techniques</i></p>
4. Render and finalise 3-D animation sequence	<p>4.1 Select appropriate <i>resolution and aspect ratio</i></p> <p>4.2 Employ 3-D modelling software to render the animated sequence</p> <p>4.3 Review the rendered frames against the initial storyboard concept</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of editing techniques
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in games design and innovation
- literacy and numeracy skills to:
  - develop games design and technical design documents
  - write instructions for the normal and competent operation and testing of all games features and permutations
- management skills to manage teams in order to effectively extract useful feedback
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required games development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into editing for the 3-D environment
- self-management skills to:
  - deliver required tasks without specific guidance
  - prioritise and manage own work against project plan or schedule
- teamwork skills to contribute to and work in a collaborative team
- learning skills to accept peer and client feedback and make improvements
- technical skills to:
  - use correct file formats and archiving procedures
  - resolve basic hardware, software and other technical issues associated with video editing and production

- visualise and develop concepts.

### **Required knowledge**

- digital editing and rendering processes and techniques
- capabilities and constraints of digital editing and rendering software
- human resources required in the process of creating games, and their respective skills and technology requirements
- OHS requirements for:
  - ergonomics, such as lifting
  - electrical safety
  - materials handling
  - physical hazards
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply a variety of strategies in creating an animation sequence using a 3-D environment</li> <li>• develop a finalised frame of the animation in an appropriate resolution.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of a completed animation in frames</li> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of games document development activities</li> <li>• evaluation of storyboard of sequence frames and design concepts</li> <li>• evaluation of a verbal or written report on industry standard animation techniques using 3-D software.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Storyboard</b> may include:	<ul style="list-style-type: none"> <li>• animatics (technical pre-visualisation)</li> <li>• computer-generated illustrations</li> <li>• existing comic strips, comic books and graphic novels</li> <li>• hand-drawn illustrations</li> <li>• illustrations or images displayed in sequence for the purpose of pre-visualising a motion picture, animation, motion graphic or interactive media sequence, including website interactivity</li> <li>• photomatic (photographic storyboard)</li> <li>• thumbnails.</li> </ul>
<b>Appropriate frames per second</b> may include:	<ul style="list-style-type: none"> <li>• 23.976 (NTSC or dslr - Digital Video or Digital TV)</li> <li>• 24p</li> <li>• 25p (PAL)</li> <li>• 29.97 (NTSC)</li> <li>• 30p</li> <li>• 50i</li> <li>• 50p or 60p (HDTV)</li> <li>• 60i</li> <li>• 72p.</li> </ul>
<b>Assets</b> may include:	<ul style="list-style-type: none"> <li>• 3-D models</li> <li>• characters</li> <li>• environments</li> <li>• lighting</li> <li>• shading</li> <li>• textures</li> <li>• UV maps.</li> </ul>
<b>3-D modelling and animation software</b> may include:	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> </ul>

	<ul style="list-style-type: none"> <li>• Z Brush.</li> </ul>
<i>High-end lighting techniques</i> may include:	<ul style="list-style-type: none"> <li>• ambient illumination</li> <li>• global illumination</li> <li>• indirect illumination</li> <li>• refraction</li> <li>• specular illumination</li> <li>• sub-surface scattering.</li> </ul>
<i>Resolution and aspect ratios</i> may include:	<ul style="list-style-type: none"> <li>• 16:9: <ul style="list-style-type: none"> <li>• 854x480</li> <li>• 1280x720 (HD 720)</li> <li>• 1366x768</li> <li>• 1920x1080 (HD 1080)</li> </ul> </li> <li>• 16:10: <ul style="list-style-type: none"> <li>• 320x200</li> <li>• 1280x800</li> <li>• 1440x900</li> <li>• 1680x1050</li> <li>• 1920x1200</li> </ul> </li> <li>• 4:3: <ul style="list-style-type: none"> <li>• 320x240 (QVGA)</li> <li>• 640x480 (VGA)</li> <li>• 768x576 (PAL)</li> <li>• 800x600 (SVGA)</li> <li>• 1024x768</li> <li>• 1280x960</li> <li>• 1400x1050</li> <li>• 1600x1200.</li> </ul> </li> </ul>

## Unit Sector(s)

Game development

# ICAGAM518A Animate physical attributes of models and elements

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to animate appropriate physical attributes of models and elements.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Collect and use reference material	<p>1.1 Create storyboard sequence of required animation</p> <p>1.2 Determine animation attribute sequence of objects as per the storyboard</p> <p>1.3 Select <b>3-D modelling and animation software</b> tools that best suit the type of production and <b>target platform</b> for which 3-D digital animations are being created</p> <p>1.4 Research and gather <b>reference material</b> to inform the animation process</p>
2. Prepare 3-D digital models using a variety of manipulating techniques	<p>2.1 Determine the most efficient animation methodology</p> <p>2.2 Ensure that the models topology allows appropriate deformation of objects and its parts as per storyboard animation brief</p> <p>2.3 Apply a variety of <b>manipulation techniques</b></p> <p>2.4 Progressively refine animation attributes and check integrity of models and elements over time until storyboard requirements are met</p> <p>2.5 Submit pre-models animation to relevant personnel for comment on whether storyboard objectives have been met and make final adjustments as required</p>
3. Create required animations using a variety of animated tools	<p>3.1 Determine the most efficient animation methodology from the required models</p> <p>3.2 Animate object, applying animation principles and techniques to produce the required motions</p> <p>3.3 Submit animation for approval</p> <p>3.4 Make adjustments as required and refine animation in passes until storyboard requirements are achieved</p>
4. Use lighting to evaluate texture, quality and performance	<p>4.1 Use nominal lighting to render component for testing purposes</p> <p>4.2 Test against plan</p> <p>4.3 Continue manipulation process until effect achieved</p>
5. Render 3-D digital model using appropriate render engine	<p>5.1 Evaluate the final render, taking steps to satisfy any further client requirements</p> <p>5.2 Prepare render passes if any</p> <p>5.3 Render component</p> <p>5.4 Present edited material to the relevant personnel as well as <b>brief and documents</b>, including <b>concept art</b> in an appropriate</p>

	format for evaluation
6. Back up work	6.1 Make backup copies of files and complete workplace documentation according to chosen predetermined procedures

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of game specifications
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in 3-D design and innovation
- literacy and numeracy skills to develop 3-D design and technical design documents
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- technical skills to:
  - develop and visualise concepts
  - use correct file formats and archiving procedures
  - resolve basic hardware, software and other technical issues associated with game production.

### Required knowledge

- 3-D animation
- 3-D lighting
- 3-D modelling
- anatomy and physical movement
- budgeting and scheduling considerations for game design
- capabilities and constraints of game engines

- client communication
- computer game development, including specific terminology
- current game-play hardware and software products
- environmental impact and sustainability considerations
- dope sheets
- graph curve editor
- human resources required in the process of creating a game and their respective skills and technology requirements
- methods for using reference material
- OHS requirements for:
  - ergonomics
  - electrical safety
- physical attributes to create effects, such as weight and anticipation
- rendering
- risk and critical path management
- scheduling production components
- shading
- texturing
- techniques for using storyboard and script production
- time management
- transfer methodology, e.g. rotoscope, hand key, motion capture.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use 3-D software toolsets to animate models with correct movement and weight</li> <li>• undertake reference and transfer methods to copy real physical attributes.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal questioning regarding reasons for use of hardware and software to create physical attributes effects</li> <li>• direct observation of the learner using 3-D animation software</li> <li>• review of project or work activities that show research and reference sourcing to gain best physical attributes effects</li> <li>• review of written and verbal reports or documentation showing research and production plan</li> <li>• review of third-party workplace reports of skills and performance of the learner</li> <li>• evaluation of completed rendered image or sequence.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>3-D modelling and animation software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• Z Brush.</li> </ul>
<p><b><i>Target platform</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• arcade</li> <li>• console platforms:             <ul style="list-style-type: none"> <li>• Microsoft Xbox 360</li> <li>• Nintendo DS (hand-held)</li> <li>• Nintendo Wii</li> <li>• Sony PlayStation</li> </ul> </li> <li>• hand-held digital device platforms:             <ul style="list-style-type: none"> <li>• Apple Iie/C/C+</li> <li>• Apple IIGS</li> <li>• Blackberry</li> <li>• BREW</li> <li>• Flashlite</li> <li>• Google Android</li> <li>• J2ME</li> <li>• Java</li> <li>• Palm OS</li> <li>• Sidekick</li> <li>• Symbian</li> <li>• WAP</li> <li>• Windows Mobile</li> </ul> </li> <li>• personal computer (PC)</li> <li>• web.</li> </ul>
<p><b><i>Reference material</i></b></p>	<ul style="list-style-type: none"> <li>• blueprints</li> <li>• developmental drawings</li> </ul>

may include:	<ul style="list-style-type: none"> <li>• internet research</li> <li>• museum information</li> <li>• orthographic images</li> <li>• photographs</li> <li>• schematics</li> <li>• video footage.</li> </ul>
<b><i>Manipulation techniques</i></b> may include:	<ul style="list-style-type: none"> <li>• cloning</li> <li>• deforming</li> <li>• exploding</li> <li>• melting</li> <li>• moving</li> <li>• point and face deformation</li> <li>• rotating</li> <li>• scaling.</li> </ul>
<b><i>Brief and documents</i></b> may include:	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• game design document</li> <li>• game-play designs</li> <li>• help notes</li> <li>• information design</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<b><i>Concept art</i></b> may include:	<ul style="list-style-type: none"> <li>• illustrations</li> <li>• models</li> <li>• settings</li> <li>• sketches</li> <li>• storyboards.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM519A Manage technical art and rigging in 3-D animation

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage technical art and rigging in 3-D animation.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Use reference or source materials to assess rig requirements	<p>1.1 Use <i>production documentation</i> as developed by learners or trainer to determine model rigging requirements</p> <p>1.2 Maintain <i>portfolio of reference</i></p> <p>1.3 Discuss the range of software features available when using various rigging technologies</p>
2. Plan rig suitable for animation/movement	<p>2.1 Analyse inner workings of object to select appropriate skeletal or <i>structural systems</i></p> <p>2.2 Analyse required bones or joints behaviours to select correct orientations</p> <p>2.3 Examine object geometry topologies to select correct bone and joint placement</p> <p>2.4 Analyse critical object movement to select FK or IK requirements or a hybrid solution</p> <p>2.5 Journal results for use at rigging implementation phase</p>
3. Implement character skeleton requirements	<p>3.1 Use <i>3-D software</i> to place bones and joints according to rigging plan</p> <p>3.2 Use 3-D software to orientate bones and joints according to rigging plan</p> <p>3.3 Use 3-D software to construct FK or IK requirements in adherence to rigging plan</p> <p>3.4 Use 3-D software to construct hierarchies and pivotal sets</p> <p>3.5 Trial and refine rotations and movement attributes</p>
4. Employ character movement and implement character attributes and control handles	<p>4.1 Use 3-D software to construct specific driven attributes for manipulation purposes</p> <p>4.2 Use 3-D software to create and place control handles with appropriate attributes</p> <p>4.3 Use 3-D software to link control handles to improve animation procedures</p> <p>4.4 Trial and refine controls and attributes</p> <p>4.5 Negotiate modification where appropriate</p> <p>4.6 Use 3-D software toolsets to skin/bind object geometry to created skeletal systems or mechanical structures</p>
5. Test and refine rig integrity	<p>5.1 Use 3-D software to test and refine object rig interaction</p> <p>5.2 Use 3-D software toolsets to test and refine geometry skeleton systems or mechanical structure interaction</p>

	5.3 Negotiate modification where appropriate
6. Produce animated sequences of rigged object	6.1 Create <b>3-D animations</b> of rigged models using animation and rigged modelling techniques to suit <b>design specifications</b> 6.2 Render completed animated sequences 6.3 Save and store animated sequences using appropriate output file formats, standard naming conventions and version control protocols 6.4 Present 3-D animated sequences of rigged models to <b>relevant personnel</b> for evaluation by agreed deadlines

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with clients
- literacy and numeracy skills to:
  - source and use reference material
  - use a storyboard and script production plan
- planning and organisational skills to schedule production components
- self-management and planning skills to:
  - meet deadlines
  - prioritise work tasks
  - seek expert assistance when problems arise
- technical skills to:
  - manage files and directories using standard naming conventions and version control protocols
  - output 3-D animated sequences in appropriate file formats for a range of delivery platforms
  - use industry-current animation software to develop and manage rigged models in digitally animated sequences.

### Required knowledge

- basic 3-D digital animation techniques
- features of a range of delivery platforms
- geometry topology analysis skills
- identification of physical attributes
- OHS standards as they relate to working for periods of time on computers
- rigged 3-D modelling techniques
- theory of anatomy/structural systems.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design, implement and manage rigs for objects</li> <li>• use and refine skeleton/structural and animation controls for best performance</li> <li>• construct hierarchies to formulate specific controls</li> <li>• combine and refine object geometry to skeletal/structural rigs</li> <li>• creation of 3-D digital animated sequences of a rigged model</li> <li>• meet production deadlines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of case studies</li> <li>• evaluation of work samples</li> <li>• direct observation of candidate working as part of a production team</li> <li>• verbal or written questioning of theory of anatomy and structural systems and how they relate to 3-D animation techniques.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Production documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• animatics</li> <li>• brief</li> <li>• storyboard</li> <li>• technical specifications.</li> </ul>
<b><i>Portfolio of reference</i></b> may include:	<ul style="list-style-type: none"> <li>• mechanical structures</li> <li>• skeletal systems.</li> </ul>
<b><i>Structural systems</i></b> may include:	<ul style="list-style-type: none"> <li>• biped</li> <li>• mechanical</li> <li>• quadruped.</li> </ul>
<b><i>3-D software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• Z Brush.</li> </ul>
<b><i>3-D animations</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D elements</li> <li>• 3-D panoramas</li> <li>• basic games</li> <li>• buttons</li> <li>• characters</li> <li>• illustrations</li> <li>• logos</li> <li>• models</li> <li>• morphs and blend shapes</li> <li>• puzzles</li> <li>• simulated sequences</li> <li>• text</li> <li>• titles and credits.</li> </ul>
<b><i>Design specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• characters and objects</li> <li>• delivery platform</li> </ul>

	<ul style="list-style-type: none"> <li>• hardware specifications, including memory size (RAM)</li> <li>• key frames</li> <li>• media form</li> <li>• objects</li> <li>• operating system</li> <li>• output file format</li> <li>• output file size</li> <li>• references</li> <li>• samples</li> <li>• script</li> <li>• storyboard</li> <li>• technical specifications, including version control protocols.</li> </ul>
<p><i>Relevant personnel</i> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D modeller</li> <li>• 3-D producer</li> <li>• animation director</li> <li>• audio-asset creator</li> <li>• director</li> <li>• graphic artist or designer</li> <li>• instructional designer</li> <li>• lead animator</li> <li>• matte painter</li> <li>• system support personnel</li> <li>• other technical and specialist personnel.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM520A Create and combine 3-D digital games and components

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create and combine 3-D components.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators, modellers, artists and other personnel working in the game development industry.

From specific reference material and established parameters, modellers or artists are called to create moderately complex compound models with current recognised industry software applicable to the animation production process.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine model creation requirements	1.1 Analyse design requirements and <b><i>production documentation</i></b> 1.2 Select <b><i>3-D modelling software tools</i></b> that best suit the type of production for which <b><i>3-D digital models</i></b> are being created
2. Create 3-D digital models using a variety of modelling techniques	2.1 Determine most efficient modelling methodology 2.2 Apply a variety of <b><i>modelling techniques</i></b> 2.3 Create 3-D digital models 2.4 <b><i>Progressively refine</i></b> and check <b><i>integrity</i></b> of models
3. Combine 3-D models to create a scene	3.1 Combine 3-D models to create a scene based on design requirements 3.2 Submit models to relevant <b><i>personnel</i></b> for comment on whether production <b><i>requirements</i></b> have been met and make final adjustments if required
4. Render 3-D digital models using appropriate render engine	4.1 Test rendering scene and adjust settings 4.2 Render final 3-D scene 4.3 Submit final model renders to relevant personnel
5. Back up work	5.1 Make backup copies of files 5.2 Complete workplace documentation according to predetermined procedures

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - interpret briefs, work instructions, and technical and conceptual information
  - analyse documentation and images to inform implementation of game specifications
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to graphics requirements to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in 3-D design and innovation
- literacy and numeracy skills to develop 3-D design and technical design documents
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- technical skills to:
  - use correct file formats and archiving procedures
  - resolve basic hardware, software and other technical issues associated with game production
  - use reference material
  - use storyboard and script production.

### Required knowledge

- basic knowledge of 3-D software interfaces
- anatomy and physical movement
- budgeting and scheduling considerations for game design
- capabilities and constraints of game engines

- client communication
- computer game development, including specific terminology
- current game-play hardware and software products
- environmental impact and sustainability considerations
- graph curve editor
- human resources required in the process of creating a game and their respective skills and technology requirements
- OHS requirements for:
  - electrical safety
  - ergonomics
- physical attributes to create effects, such as weight and anticipation
- risk and critical path management
- scheduling production components
- shading and texturing
- techniques for applying concept development skills
- techniques for applying concept visualisation skills
- time management
- transfer methodology, e.g. rotoscope, hand key and motion capture.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create and combine 3-D components to build a scene</li> <li>• produce final render of the scene.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of the nominated techniques applied to selected subject matter</li> <li>• direct observation of the candidate using 3-D modelling software</li> <li>• review of work activities that show research and reference sourcing to gain best modelling effect</li> <li>• review of written and verbal reports or documentation showing modelling plan</li> <li>• evaluation of portfolios of evidence</li> <li>• evaluation of 3-D scene render.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Unit Sector(s)

Game development

# ICAGAM521A Create interactive 3-D environments for digital games

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create interactive 3-D environments for digital games.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Obtain design documents for the 3-D environment	<p>1.1 Conceptualise design requirements based on <i>project brief and other relevant documents</i></p> <p>1.2 Identify requirements for the design of the <i>3-D environment</i></p> <p>1.3 Discuss <i>design considerations</i> and generate <i>concept art</i> for the final environment design</p> <p>1.4 Fill in any missing requirements</p>
2. Identify software tools that can be used to create 3-D environments	<p>2.1 Identify texturing tools, including <i>painting, shading and texturing software</i></p> <p>2.2 Identify audio tools</p> <p>2.3 Identify <i>3-D modelling and animation software</i> to be used</p>
3. Document and justify the design decisions	<p>3.1 Clearly document design decisions</p> <p>3.2 Explain and justify design decisions</p> <p>3.3 Make changes where necessary</p>
4. Create the 3-D environment	<p>4.1 Implement basic geometry, flow and layout</p> <p>4.2 Separate each section of the environment into key parts and choose a focal point for the environment</p> <p>4.3 Incorporate detail into the focal point of the level</p> <p>4.4 Use the focal points level of detail to set a target for the rest of the environment</p> <p>4.5 Integrate the geometry, texturing and place the models</p> <p>4.6 Carry out a detailed pass of the entire environment</p> <p>4.7 Set up exterior lighting and then interior lighting</p> <p>4.8 Incorporate any sound and particle effects, and perform optimisation if required</p> <p>4.9 Perform a final pass, finalising any elements</p>
5. Present the finished 3-D environment to relevant personnel	<p>5.1 Present the finished 3-D environment to relevant <i>personnel</i></p> <p>5.2 State how the design decisions have met the 3-D environment design requirements</p> <p>5.3 Justify why certain design decision where made</p> <p>5.4 Accept peer <i>feedback</i> and incorporate in final design</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform game specification creation
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate clearly using speech and text
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - contribute to and work in a collaborative team
  - give and receive constructive feedback
  - provide practical advice, support and feedback to colleagues and management
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
  - prioritise work and meet critical milestones and deadlines
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical or desktop research into design requirements and software tools
- technical skills to:
  - realise a unified game-play vision
  - resolve basic hardware, software and other technical issues associated with game production
  - translate design requirements into specifications
  - use correct file formats and archiving procedures
  - visualise and develop concepts.

### Required knowledge

- budgeting and scheduling considerations for game design
- capabilities and constraints of game engines
- computer game development, including specific terminology

- current game-play hardware and software products
- human resources required in the process of creating a game and their respective skills and technology requirements
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• implement design requirements into a working 3-D environment</li> <li>• create interactions between the user and the environment</li> <li>• manage design requirements with technical requirements</li> <li>• deliver a 3-D environment with working interactions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of:             <ul style="list-style-type: none"> <li>• production of a 3-D environment with interactions</li> <li>• response to fault-finding exercises</li> <li>• simulated workplace activities</li> <li>• work samples</li> </ul> </li> <li>• written or verbal questioning to assess knowledge of interactive environments</li> <li>• review of:             <ul style="list-style-type: none"> <li>• logbooks</li> <li>• presentations</li> <li>• reports.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Project brief and other relevant documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer’s notes</li> <li>• development environment description</li> <li>• level design document</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<p><b><i>3-D environment</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• characters and environments, such as:             <ul style="list-style-type: none"> <li>• backgrounds</li> <li>• environments</li> <li>• lighting</li> <li>• scenery</li> <li>• terrain</li> <li>• textures</li> </ul> </li> <li>• environment profiles, such as:             <ul style="list-style-type: none"> <li>• alien</li> <li>• fantasy</li> <li>• foreign</li> <li>• historical</li> <li>• naturalistic:                 <ul style="list-style-type: none"> <li>• arctic</li> <li>• desert</li> <li>• jungle</li> <li>• mountainous</li> </ul> </li> <li>• post-apocalyptic</li> <li>• urban</li> </ul> </li> <li>• game design, such as:             <ul style="list-style-type: none"> <li>• concept illustrations or graphics that enhance the comprehension of the document</li> <li>• design for all level missions</li> </ul> </li> </ul>

	<ul style="list-style-type: none"><li>• game mechanics that affect level design decisions</li><li>• illustrations of level with all significant points of interest</li><li>• introduction and overview (one page synopsis)</li><li>• key selling points, including intended audience, genre and platforms</li><li>• production details</li><li>• scripts required for level</li><li>• synopsis and scripts for each level</li><li>• title and cover art (art must be colour and of a reasonable resolution for high quality printing)</li><li>• walk through for at least one mission or level</li><li>• game genre, such as:<ul style="list-style-type: none"><li>• adventure</li><li>• alternative reality</li><li>• ancient</li><li>• casino</li><li>• cyberpunk</li><li>• educational</li><li>• edutainment</li><li>• fantasy</li><li>• first person shooter</li><li>• flight shooter</li><li>• flight simulation</li><li>• futuristic</li><li>• god simulation</li><li>• massively multi-player online game</li><li>• massively multi-player online role-playing game</li><li>• medieval</li><li>• modern</li><li>• multi-player</li><li>• post-apocalyptic</li><li>• puzzle</li><li>• racing shooter</li><li>• racing simulation</li><li>• real-time strategy</li><li>• role-playing game</li><li>• science fiction</li><li>• side-scrolling shooter</li><li>• single player</li><li>• sports</li></ul></li></ul>
--	---

	<ul style="list-style-type: none"><li>• strategy, including action strategy and turn-based strategy</li><li>• tactical combat</li><li>• game mechanics, such as:<ul style="list-style-type: none"><li>• lists and illustrations of:<ul style="list-style-type: none"><li>• actions of a particular object (object dynamics)</li><li>• environment actions (environment dynamics)</li><li>• game objects organised into classes of object</li><li>• possible environment and object interactions</li><li>• possible object-to-object interactions</li><li>• specific game-play elements that provide uniqueness and key point of difference</li></ul></li><li>• overview of the key factors influencing core game-play experience</li></ul></li><li>• game physics, such as:<ul style="list-style-type: none"><li>• collision</li><li>• combat:<ul style="list-style-type: none"><li>• blood spots</li><li>• debris</li><li>• explosions</li><li>• footprints</li><li>• salvo</li><li>• smoke and fire</li><li>• sparks</li><li>• water</li><li>• wreckage</li></ul></li><li>• movement:<ul style="list-style-type: none"><li>• creaking floors</li><li>• footfalls</li><li>• puddle stepping</li><li>• wading</li><li>• wind</li></ul></li></ul></li><li>• game-play elements, such as:<ul style="list-style-type: none"><li>• buildings</li><li>• game flow</li><li>• switches</li><li>• terrain objects</li><li>• transformations</li><li>• transportation</li><li>• traps</li></ul></li><li>• level specifications, such as:</li></ul>
--	---

	<ul style="list-style-type: none"> <li>• level-specific components: <ul style="list-style-type: none"> <li>• allies</li> <li>• base building and location</li> <li>• cinematic, such as cut scenes</li> <li>• colours</li> <li>• enemies</li> <li>• graphics</li> <li>• health</li> <li>• lighting</li> <li>• non-player characters</li> <li>• resources and their harvesting</li> <li>• sounds and music</li> <li>• weapons</li> </ul> </li> <li>• location</li> <li>• stages</li> <li>• transportation devices: <ul style="list-style-type: none"> <li>• buttons</li> <li>• doors</li> <li>• keys</li> <li>• teleporters</li> <li>• tunnels and passageways.</li> </ul> </li> </ul>
<b><i>Design considerations</i></b> may include:	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• cultural context</li> <li>• genre</li> <li>• resource limitations and constraints</li> <li>• target market.</li> </ul>
<b><i>Concept art</i></b> may include:	<ul style="list-style-type: none"> <li>• illustrations</li> <li>• models</li> <li>• settings</li> <li>• sketches</li> <li>• storyboards.</li> </ul>
<b><i>Painting, shading and texturing software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D paint</li> <li>• Illustrator</li> <li>• Mudbox</li> <li>• Photoshop</li> <li>• ZBrush.</li> </ul>
<b><i>3-D modelling and animation software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> </ul>

	<ul style="list-style-type: none"> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• Z Brush.</li> </ul>
<i>Personnel</i> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>
<i>Feedback</i> may involve:	<ul style="list-style-type: none"> <li>• accepting and responding to comment, critique and suggestions from: <ul style="list-style-type: none"> <li>• clients</li> <li>• colleagues</li> <li>• target audience representatives.</li> </ul> </li> </ul>

## Unit Sector(s)

Game development

## ICAGAM522A Complete digital editing for the 3-D and digital effects environment

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to complete digital editing for the 3-D and digital effects environment, involving the completion of a digital editing project.

### Application of the Unit

This unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research digital editing techniques and software	1.1 Research industry standard digital editing techniques 1.2 Discuss suitable techniques to apply in various scenarios 1.3 Research available digital <b><i>editing software</i></b> used in the industry 1.4 Identify <b><i>technical limitations and constraints</i></b> of rendering and editing processes
2. Obtain or create 3-D animation sequence	2.1 Obtain or create a 3-D animation sequence in frames 2.2 Obtain or create a <b><i>storyboard</i></b> for the sequence 2.3 Use a suitable naming scheme for the rendered frames and organise the files into a folder structure
3. Apply digital editing techniques	3.1 Edit the rendered frames and any additional graphics into the sequence outlined in the storyboard 3.2 Apply program functions to create and insert graphics, transitions and special effects into the animation 3.3 Implement <b><i>sounds and music</i></b> at appropriate frame locations 3.4 Ensure efficient file management is maintained during the editing process
4. Finalise a digitally edited production	4.1 Use editing software to resolve sound or transition errors 4.2 Evaluate final edit 4.3 Present finalised edit to relevant <b><i>personnel</i></b> in an appropriate video format 4.4 Receive and incorporate <b><i>feedback</i></b>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of editing techniques
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in games design and innovation
- literacy and numeracy skills to:
  - develop games design and technical design documents
  - write instructions for the normal and competent operation and testing of all games features and permutations
- management skills to manage teams in order to effectively extract useful feedback
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required games development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into editing for the 3-D environment
- self-management skills to:
  - deliver required tasks without specific guidance
  - prioritise and manage own work against project plan or schedule
- teamwork skills to contribute to and work in a collaborative team
- technical skills to:
  - resolve basic hardware, software and other technical issues associated with video editing and production
  - use correct file formats and archiving procedures.

## Required knowledge

- digital editing and rendering processes and techniques
- capabilities and constraints of digital editing and rendering software
- human resources required in the process of creating a games and their respective skills and technology requirements
- OHS requirements for:
  - ergonomics
  - electrical safety
  - materials handling
  - physical hazards, including lifting
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply a variety of strategies for editing a sequence using a 3-D environment</li> <li>• develop a finalised edit in appropriate video format.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of a completed animation production delivered in an accessible format</li> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of games document development activities</li> <li>• evaluation of storyboard of sequence frames and design concepts</li> <li>• observation of use of techniques and editing software</li> <li>• evaluation of a verbal or written report on industry standard digital editing techniques and software.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Editing software</i></b> may include:	<ul style="list-style-type: none"> <li>• Final Cut Pro</li> <li>• Premier</li> <li>• Sony Vegas.</li> </ul>
<b><i>Technical limitations and constraints</i></b> may include:	<ul style="list-style-type: none"> <li>• current technology</li> <li>• future technology and release date</li> <li>• pixels</li> <li>• platforms</li> <li>• polygon count</li> <li>• software capability.</li> </ul>
<b><i>Storyboard</i></b> may include:	<ul style="list-style-type: none"> <li>• animatics (technical pre-visualisation)</li> <li>• computer-generated illustrations</li> <li>• existing comic strips, comic books and graphic novels</li> <li>• hand-drawn illustrations</li> <li>• illustrations or images displayed in sequence for the purpose of pre-visualising a motion picture, animation, motion graphic or interactive media sequence, including website interactivity</li> <li>• photomatic (photographic storyboard)</li> <li>• thumbnails.</li> </ul>
<b><i>Sounds and music</i></b> may include:	<ul style="list-style-type: none"> <li>• ambient sounds</li> <li>• cinematic soundtracks</li> <li>• event jingles</li> <li>• intellectual property protection</li> <li>• level themes</li> <li>• musical compositions</li> <li>• radio chatter</li> <li>• situational music</li> <li>• sound effects</li> <li>• voice</li> <li>• wind, rain and storms.</li> </ul>
<b><i>Personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> </ul>

	<ul style="list-style-type: none"> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>
<p><b>Feedback</b> may involve:</p>	<ul style="list-style-type: none"> <li>• accepting and responding to comment, critique and suggestions from:             <ul style="list-style-type: none"> <li>• clients</li> <li>• colleagues</li> <li>• target audience representatives.</li> </ul> </li> </ul>

## Unit Sector(s)

Game development

## ICAGAM523A Collaborate in the design of 3-D game levels and environments

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to work collaboratively with a production team in the design of interactive 3-D environments.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working as part of a team in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research and plan the design process	<p>1.1 Select a project planning methodology</p> <p>1.2 Identify design practices and <i>design considerations</i> in collaboration with other team members</p> <p>1.3 State the stages of the design process using <i>project brief and documents</i></p> <p>1.4 Identify team roles that relate to level creation and design</p> <p>1.5 Plan and implement a design process using time-management principles</p>
2. Conceptualise a 3-D environment design in collaboration with team	<p>2.1 Identify key <i>level specifications</i> and purpose for the 3-D environment</p> <p>2.2 Gather and analyse reference materials in collaboration to help with visualisation of 3-D environment, including <i>environment profiles, game genre, game design</i> and <i>game-play elements</i></p> <p>2.3 Catalogue required objects of the level environment</p> <p>2.4 Identify appropriate <i>3-D modelling and animation software</i> and <i>painting, shading and texturing software</i> that can be used to create the 3-D environment</p> <p>2.5 Document design decisions that are made before and during the design conceptualisation</p> <p>2.6 Produce <i>concept art</i> of the designed environment</p>
3. Present the conceptualised environment to peers	<p>3.1 Present the conceptualised environment to peers and receive <i>feedback</i></p> <p>3.2 State how the design decisions have met the requirements for game-play elements</p> <p>3.3 Justify why certain design decisions were made</p> <p>3.4 Accept peer feedback</p>
4. Refine the design	<p>4.1 Implement quality assurance principles</p> <p>4.2 Incorporate user feedback to modify the design</p> <p>4.3 Finalise the design decision documents in readiness for creating the 3-D environment</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - interpret briefs, work instructions, and technical and conceptual information
  - analyse documentation and images to inform design of environment specifications
- enterprise and initiative skills to visualise and develop the concept
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - contribute to and work in a collaborative team
  - give and receive constructive feedback
  - provide practical advice, support and feedback to colleagues and management
  - realise a unified game-play vision
  - translate design requirements into specifications
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
  - prioritise work and meet critical milestones and deadlines
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical or desktop research into design requirements and software tools
- learning skills to accept peer feedback and make improvements
- technology skills to:
  - use correct file formats and archiving procedures
  - resolve basic hardware, software and other technical issues associated with game production.

### Required knowledge

- budgeting and scheduling considerations for game design
- capabilities and constraints of game engines
- computer game development, including specific terminology

- current game-play hardware and software products
- human resources required in the process of creating a game and their respective skills and technology requirements
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan, collaborate and manage the design process for creating an interactive 3-D environment</li> <li>• incorporate design specifications into actual deliverable</li> <li>• produce and deliver design documents for the production of an interactive 3-D environment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of candidate's work samples, such as 3-D models</li> <li>• observation of candidate working as part of a team</li> <li>• written or verbal questioning to assess candidate's knowledge of interactive 3-D environments</li> <li>• review of:             <ul style="list-style-type: none"> <li>• 3-D design documents</li> <li>• concept art</li> <li>• logbooks</li> <li>• presentations</li> <li>• storyboards</li> <li>• textures.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Design considerations</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• cultural context</li> <li>• genre</li> <li>• resource limitations and constraints</li> <li>• target market.</li> </ul>
<p><b><i>Project brief and documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• level design document</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<p><b><i>Level specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• level-specific components:             <ul style="list-style-type: none"> <li>• allies</li> <li>• base building and location</li> <li>• cinematic (cut scenes)</li> <li>• colours</li> <li>• enemies</li> <li>• graphics</li> <li>• health</li> <li>• lighting</li> <li>• non-player characters</li> <li>• resources and their harvesting</li> <li>• sounds and music</li> <li>• weapons</li> </ul> </li> <li>• location</li> <li>• stages</li> <li>• transportation devices:             <ul style="list-style-type: none"> <li>• buttons</li> <li>• doors</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• keys</li> <li>• teleporters</li> <li>• tunnels and passageways.</li> </ul>
<b><i>Environment profiles</i></b> may include:	<ul style="list-style-type: none"> <li>• alien</li> <li>• fantasy</li> <li>• foreign</li> <li>• historical</li> <li>• naturalistic, for example: <ul style="list-style-type: none"> <li>• arctic</li> <li>• desert</li> <li>• jungle</li> <li>• mountainous</li> </ul> </li> <li>• post-apocalyptic</li> <li>• urban.</li> </ul>
<b><i>Game genre</i></b> may include:	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> <li>• massively multi-player online game</li> <li>• massively multi-player online role-playing game</li> <li>• medieval</li> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> <li>• racing shooter</li> <li>• racing simulation</li> <li>• real-time strategy</li> <li>• role-playing game</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> </ul>

	<ul style="list-style-type: none"> <li>• sports</li> <li>• strategy, including: <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<b><i>Game design</i></b> may include:	<ul style="list-style-type: none"> <li>• concept illustrations or graphics that enhance the comprehension of the document</li> <li>• design for all level missions</li> <li>• game mechanics that affect level design decisions</li> <li>• illustrations of level with all significant points of interest</li> <li>• introduction and overview (one page synopsis)</li> <li>• key selling points, including intended audience, genre and platforms</li> <li>• production details</li> <li>• scripts required for level</li> <li>• synopsis and scripts for each level</li> <li>• title and cover art (art must be colour and of a reasonable resolution for high quality printing)</li> <li>• walk through for at least one mission or level.</li> </ul>
<b><i>Game-play elements</i></b> may include:	<ul style="list-style-type: none"> <li>• buildings</li> <li>• game flow</li> <li>• switches</li> <li>• terrain objects</li> <li>• transportation</li> <li>• transformations</li> <li>• traps.</li> </ul>
<b><i>3-D modelling and animation software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• Z Brush.</li> </ul>
<b><i>Painting, shading and texturing software</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D paint</li> <li>• Illustrator</li> <li>• Mudbox</li> <li>• Photoshop</li> <li>• Z Brush.</li> </ul>
<b><i>Concept art</i></b> may	<ul style="list-style-type: none"> <li>• illustrations</li> </ul>

include:	<ul style="list-style-type: none"><li>• models</li><li>• settings</li><li>• sketches</li><li>• storyboards.</li></ul>
<i>Feedback</i> may involve:	<ul style="list-style-type: none"><li>• accepting and responding to comment, critique and suggestions from:<ul style="list-style-type: none"><li>• clients</li><li>• colleagues</li><li>• target audience representatives.</li></ul></li></ul>

## Unit Sector(s)

Game development

## ICAGAM524A Integrate multiple data sources into interactive 3-D environments

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to integrate multiple data sources into interactive 3-D environments.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Catalogue elements to integrate into the interactive 3-D environment	<p>1.1 Research and identify <b><i>data sources</i></b> that can be integrated into interactive 3-D environments</p> <p>1.2 Identify data sources that will be integrated to suit the environment, <b><i>game design, game genre, game mechanics, game-play elements, and level specifications</i></b></p> <p>1.3 Obtain or create data sources for the interactive 3-D environment</p>
2. Identify tools that can be used to integrate assets	<p>2.1 Identify <b><i>tools and libraries</i></b> for integration of identified elements into the 3-D environment</p> <p>2.2 Review and document how the tools work</p>
3. Integrate sources into the interactive 3-D environment	<p>3.1 <b><i>Create prototypes</i></b> and integrate elements into the interactive 3-D environment using the identified tools</p> <p>3.2 Test the integration of the elements</p> <p>3.3 Ensure the elements' integrity during implementation is maintained</p>
4. Present and evaluate completed 3-D environment with all data sources included	<p>4.1 Present the interactive 3-D environment to appropriate <b><i>personnel</i></b></p> <p>4.2 Review <b><i>feedback</i></b> from presentation</p> <p>4.3 <b><i>Evaluate</i></b> and justify implementation using tools for the data sources</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse multiple data sources to inform integration into interactive 3-D environment
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - catalogue, check and confirm data sources
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate clearly using speech and text
  - communicate technical requirements related to integration tools to supervisors and other team members
  - contribute to and work collaboratively
  - provide practical advice, support and feedback to colleagues and management
- learning skills to accept peer feedback and make improvements
- planning and organisational skills to:
  - refer decisions to a higher project authority for review and endorsement
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
  - prioritise work and meet critical milestones and deadlines
- problem-solving skills to recognise and address potential quality issues and problems at prototype and completed stages
- research skills to undertake practical, technical and desktop research into multiple data sources
- technical skills to:
  - integrate data sources into the 3-D environment
  - resolve basic hardware, software and other technical issues associated with game production
  - use correct file formats and archiving procedures.

### Required knowledge

- budgeting and scheduling considerations
- capabilities and constraints of game engines
- computer game development, including specific terminology
- current game-play hardware and software products
- human resources required in the process of creating a game and their respective skills and technology requirements

- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• integrate multiple data sources into a working interactive 3-D environment</li> <li>• manage design requirements with technical requirements</li> <li>• deliver an interactive 3-D environment with working interactions that implements the external data sources.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of:             <ul style="list-style-type: none"> <li>• response to fault-finding exercises</li> <li>• simulated workplace activities</li> <li>• working interactions of 3-D environments</li> </ul> </li> <li>• written or verbal questioning to evaluate knowledge of:             <ul style="list-style-type: none"> <li>• data sources</li> <li>• interactive 3-D environments</li> <li>• integration</li> </ul> </li> <li>• review of candidate's:             <ul style="list-style-type: none"> <li>• presentations</li> <li>• reports of completed 3-D environment</li> <li>• documentation of 3-D environment specifications.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Data sources</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3-D models</li> <li>• databases</li> <li>• images</li> <li>• music</li> <li>• particle libraries</li> <li>• scripts</li> <li>• sounds</li> <li>• text</li> <li>• textures.</li> </ul>
<p><b><i>Game design</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept illustrations or graphics that enhance the comprehension of the document</li> <li>• design for all level missions</li> <li>• game mechanics that affect level design decisions</li> <li>• illustrations of level with all significant points of interest</li> <li>• introduction and overview (one page synopsis)</li> <li>• key selling points, including intended audience, genre and platforms</li> <li>• production details</li> <li>• scripts required for level</li> <li>• synopsis and scripts for each level</li> <li>• synopsis of level</li> <li>• title and cover art (art must be colour and of a reasonable resolution for high quality printing)</li> <li>• walk through for at least one mission or level.</li> </ul>
<p><b><i>Game genre</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> </ul>

	<ul style="list-style-type: none"> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> <li>• massively multi-player online game</li> <li>• massively multi-player online role-playing game</li> <li>• medieval</li> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> <li>• racing shooter</li> <li>• racing simulation</li> <li>• real-time strategy</li> <li>• role-playing game</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> <li>• sports</li> <li>• strategy, including:             <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<p><b><i>Game mechanics</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• lists and illustrations of:             <ul style="list-style-type: none"> <li>• actions of a particular object (object dynamics)</li> <li>• environment actions (environment dynamics)</li> <li>• game objects organised into classes of object</li> <li>• possible environment and object interactions</li> <li>• possible object-to-object interactions</li> <li>• specific game-play elements that provide uniqueness and key point of difference</li> </ul> </li> <li>• overview of the key factors influencing core game-play experience.</li> </ul>
<p><b><i>Game-play elements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• buildings</li> <li>• game flow</li> <li>• switches</li> <li>• terrain objects</li> <li>• transformations</li> <li>• transportation</li> <li>• traps.</li> </ul>
<p><b><i>Level specifications</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• level-specific components:             <ul style="list-style-type: none"> <li>• allies</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• base building and location</li> <li>• cinematic (cut scenes)</li> <li>• colours</li> <li>• enemies</li> <li>• graphics</li> <li>• health</li> <li>• lighting</li> <li>• non-player characters</li> <li>• resources and their harvesting</li> <li>• sounds and music</li> <li>• weapons</li> <li>• location</li> <li>• stages</li> <li>• transportation devices:             <ul style="list-style-type: none"> <li>• buttons</li> <li>• doors</li> <li>• keys</li> <li>• teleporters</li> <li>• tunnels and passageways.</li> </ul> </li> </ul>
<p><i>Tools and libraries</i> may include:</p>	<ul style="list-style-type: none"> <li>• Audierre</li> <li>• bass library</li> <li>• direct sound</li> <li>• FMOD</li> <li>• image importer libraries</li> <li>• LUA script</li> <li>• Open_AL</li> <li>• particle libraries</li> <li>• particle universe</li> <li>• SDL_Mixer</li> <li>• sound libraries</li> <li>• XML libraries.</li> </ul>
<p><i>Creating prototypes</i> may involve:</p>	<ul style="list-style-type: none"> <li>• developing a comprehensive design for missions and levels, including concept visuals</li> <li>• developing a walkthrough for at least one mission or level</li> <li>• developing story synopsis and scripts for each level</li> <li>• knowledge of games as dynamic systems, such as:             <ul style="list-style-type: none"> <li>• applying game-tuning strategies in light of feedback from actual play</li> <li>• characteristics of a balanced game</li> <li>• working with quality assurance and understanding play-test feedback</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• use of appropriate tools and skills for fast, interactive development.</li> </ul>
<i>Personnel</i> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>
<i>Feedback</i> may involve:	<ul style="list-style-type: none"> <li>• accepting and responding to comment, critique and suggestions from: <ul style="list-style-type: none"> <li>• clients</li> <li>• colleagues</li> <li>• target audience representatives.</li> </ul> </li> </ul>
<i>Evaluate</i> completed 3-D environment may involve:	<ul style="list-style-type: none"> <li>• examining and analysing the impact of decisions, after the fact, such as: <ul style="list-style-type: none"> <li>• integration decisions</li> <li>• methodology and process decisions</li> </ul> </li> <li>• product ‘post-mortems’, reviewing actual use of resources to achieve outcomes against initial project plan and schedule.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM525A Apply digital texturing for the 3-D environment in digital games

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply digital texturing for the 3-D environment in digital games, using industry standard tools.

## Application of the Unit

This unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research common industry practices for texturing a 3-D environment	1.1 Research, identify and describe methods of texture creation and texture mapping 1.2 Choose suitable <b>graphics software</b> to create textures 1.3 Document <b>design considerations</b> for texturing a 3-D environment
2. Create a basic 3-D environment	2.1 Use <b>3-D modelling and animation software</b> 2.2 Create <b>simple 3-D objects</b> 2.3 Place objects in a 3-D environment 2.4 Apply inbuilt lighting effects to the 3-D environment
3. Create multiple textures to apply to the 3-D environment	3.1 Use graphics software 3.2 Apply industry standard methods to create textures 3.3 Create textures to establish look and feel of the 3-D environment
4. Apply multiple texture effects to a 3-D environment	4.1 Load textures into 3-D animation and modelling software 4.2 Apply textures to colour the 3-D objects and environment 4.3 Use <b>texture-mapping techniques</b> to create multiple texture effects for a single 3-D object 4.4 Employ 3-D animation and modelling software to render an image of the 3-D environment

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to inform implementation of digital texturing for the 3-D environment
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - communicate clearly using speech and text
  - communicate technical requirements related to graphics creation
- initiative and enterprise skills to visualise and develop concepts
- literacy and numeracy skills to develop technical design documents
- research skills to undertake practical, technical and desktop research into industry standard methods for creating and applying textures
- self-management skills to:
  - deliver required tasks without specific guidance
  - prioritise and manage own work against project plan or schedule
  - technology skills to use file formats.

### Required knowledge

- capabilities and constraints of graphics software for texturing
- human resources required in the process of creating textures for the 3-D environment and the technology requirements
- methods of texture creation and texture mapping
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• research and select techniques and graphic software tools to create texturing for a 3-D environment</li> <li>• apply digital texturing to create multiple texture effects for a single 3-D object.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of a sample of a 3-D environment with digital texturing applied</li> <li>• evaluation of work samples or simulated workplace activities</li> <li>• observation of use of techniques and texturing software</li> <li>• evaluation of a written or verbal report on industry standards for digital texturing of a 3-D environment</li> <li>• evaluation of sample 2-D textures suitable for a 3-D environment.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Graphics software</b> may include:	<ul style="list-style-type: none"> <li>• 3-D paint</li> <li>• Fireworks</li> <li>• Illustrator</li> <li>• Mudbox</li> <li>• Photoshop</li> <li>• Z Brush.</li> </ul>
<b>Design considerations</b> may include:	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• cultural context</li> <li>• genre</li> <li>• resource limitations and constraints</li> <li>• target market.</li> </ul>
<b>3-D modelling and animation software</b> may include:	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• Z Brush.</li> </ul>
<b>Simple 3-D objects</b> may include:	<ul style="list-style-type: none"> <li>• cube</li> <li>• cylinder</li> <li>• pyramid</li> <li>• sphere</li> <li>• torus.</li> </ul>
<b>Texture-mapping techniques</b> may include:	<ul style="list-style-type: none"> <li>• bump</li> <li>• displacement</li> <li>• light</li> <li>• normal</li> <li>• parallax</li> <li>• UV.</li> </ul>

## **Unit Sector(s)**

Game development

## ICAGAM526A Create complex 3-D characters for games

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create complex 3-D characters for games.

### Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Clarify work requirements	<p>1.1 Identify design requirements based on a <i>project brief and documents</i></p> <p>1.2 Using the design requirements, conceptualise appropriate characters for the <i>game environments, design, level specifications</i> and <i>genre</i></p> <p>1.3 Gather and analyse <i>reference materials</i> to help with design and visualisation of 3-D character models</p> <p>1.4 Fill in any missing requirements</p>
2. Conceptualise 3-D character design	<p>2.1 Document design decisions that are made before and during the design conceptualisation</p> <p>2.2 Outline the key attributes for the character</p> <p>2.3 Discuss <i>design considerations</i> and generate <i>concept art</i> for 3-D characters</p>
3. Identify software tools that can be used to create 3-D characters	<p>3.1 Identify texturing tools, including <i>painting, shading and texturing software</i> and <i>3-D modelling tools</i></p>
4. Create complex 3-D characters	<p>4.1 Create base 3-D character models</p> <p>4.2 Refine and polish the character models to a near finalised state</p> <p>4.3 Create and map textures to apply to the 3-D character models</p> <p>4.4 Refine the textures and apply <i>shaders</i></p> <p>4.5 Check integrity and modify the 3-D characters until they meet design requirements</p> <p>4.6 Present model to relevant personnel</p>
5. Present the finished 3-D characters to relevant personnel	<p>5.1 Present the finished 3-D characters to relevant <i>personnel</i></p> <p>5.2 State how the design decisions have met the 3-D character's design requirements</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - interpret briefs, work instructions, and technical and conceptual information
  - analyse documentation and images to inform design of environment specifications
- initiative and enterprise skills to visualise and develop concepts
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - contribute to and work in a collaborative team
  - give and receive constructive feedback
  - provide practical advice, support and feedback to colleagues and management
  - realise a unified game-play vision
  - translate design requirements into specifications
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
  - prioritise work and meet critical milestones and deadlines
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into design requirements and software tools
- learning skills to accept peer feedback and make improvements
- technical skills to:
  - resolve basic hardware, software and other technical issues associated with game production
  - use correct file formats and archiving procedures.

### Required knowledge

- budgeting and scheduling considerations for game design
- capabilities and constraints of game engines
- computer game development, including specific terminology

- current game-play hardware and software products
- human resources required in the process of creating a game and their respective skills and technology requirements
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan and manage the design process for creating 3-D character models</li> <li>• incorporate design specifications and create complex 3-D character models</li> <li>• produce and deliver documentation showing evidence of concepts creation and design decisions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of candidate's work samples, such as 3-D models or simulated workplace activities</li> <li>• written or verbal questioning to assess candidate's knowledge of interactive 3-D environments</li> <li>• review of:             <ul style="list-style-type: none"> <li>• 3-D design documents</li> <li>• concept art</li> <li>• logbooks</li> <li>• presentations</li> <li>• storyboards</li> <li>• textures.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Project brief and documents</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• level design document</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<p><b><i>Game environments</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• alien</li> <li>• fantasy</li> <li>• foreign</li> <li>• historical</li> <li>• naturalistic, for example:             <ul style="list-style-type: none"> <li>• arctic</li> <li>• desert</li> <li>• jungle</li> <li>• mountainous</li> </ul> </li> <li>• post-apocalyptic</li> <li>• urban.</li> </ul>
<p><b><i>Game design</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• background story:             <ul style="list-style-type: none"> <li>• full motion video (FMV) sequence</li> <li>• storyboard for potential introductory</li> </ul> </li> <li>• concept illustrations or graphics that enhance the comprehension of the document</li> <li>• design for all level missions</li> <li>• game mechanics</li> <li>• illustrations of level with all significant points of interest</li> <li>• introduction and overview (one page synopsis)</li> <li>• key selling points, including intended audience, genre and platforms</li> <li>• production details</li> <li>• scripts required for level</li> </ul>

	<ul style="list-style-type: none"> <li>• synopsis and scripts for each level</li> <li>• title and cover art (art must be colour and of a reasonable resolution for high quality printing)</li> <li>• walk through for at least one mission or level.</li> </ul>
<i>Level specifications</i> may include:	<ul style="list-style-type: none"> <li>• level-specific components: <ul style="list-style-type: none"> <li>• allies</li> <li>• base building and location</li> <li>• cinematic, such as cut scenes</li> <li>• colours</li> <li>• enemies</li> <li>• graphics</li> <li>• health</li> <li>• lighting</li> <li>• non-player characters</li> <li>• resources and their harvesting</li> <li>• sounds and music</li> <li>• weapons</li> </ul> </li> <li>• location</li> <li>• stages</li> <li>• transportation devices: <ul style="list-style-type: none"> <li>• buttons</li> <li>• doors</li> <li>• keys</li> <li>• teleporters</li> <li>• tunnels and passageways.</li> </ul> </li> </ul>
<i>Game genre</i> may include:	<ul style="list-style-type: none"> <li>• adventure</li> <li>• alternative reality</li> <li>• ancient</li> <li>• casino</li> <li>• cyberpunk</li> <li>• educational</li> <li>• edutainment</li> <li>• fantasy</li> <li>• first person shooter</li> <li>• flight shooter</li> <li>• flight simulation</li> <li>• futuristic</li> <li>• god simulation</li> <li>• massively multi-player online game</li> <li>• massively multi-player online role-playing game</li> <li>• medieval</li> </ul>

	<ul style="list-style-type: none"> <li>• modern</li> <li>• multi-player</li> <li>• post-apocalyptic</li> <li>• puzzle</li> <li>• racing shooter</li> <li>• racing simulation</li> <li>• real-time strategy</li> <li>• role-playing game</li> <li>• science fiction</li> <li>• side-scrolling shooter</li> <li>• single player</li> <li>• sports</li> <li>• strategy, including: <ul style="list-style-type: none"> <li>• action strategy</li> <li>• turn-based strategy</li> </ul> </li> <li>• tactical combat.</li> </ul>
<b>Reference materials</b> may include:	<ul style="list-style-type: none"> <li>• 3-D animations</li> <li>• 3-D movies</li> <li>• games</li> <li>• magazines</li> <li>• media</li> <li>• movies</li> <li>• people</li> <li>• TV shows.</li> </ul>
<b>Design considerations</b> may include:	<ul style="list-style-type: none"> <li>• aesthetics</li> <li>• cultural context</li> <li>• genre</li> <li>• resource limitations and constraints</li> <li>• target market.</li> </ul>
<b>Concept art</b> may include:	<ul style="list-style-type: none"> <li>• illustrations</li> <li>• models</li> <li>• settings</li> <li>• sketches</li> <li>• storyboards.</li> </ul>
<b>Painting, shading and texturing software</b> may include:	<ul style="list-style-type: none"> <li>• 3-D paint</li> <li>• Illustrator</li> <li>• Mudbox</li> <li>• Photoshop</li> <li>• Z Brush.</li> </ul>
<b>3-D modelling tools</b> may include:	<ul style="list-style-type: none"> <li>• 3ds Max</li> <li>• Blender</li> </ul>

	<ul style="list-style-type: none"> <li>• Cinema 4D</li> <li>• Houdini</li> <li>• Lightwave</li> <li>• Maya</li> <li>• Modo</li> <li>• XSI</li> <li>• Z Brush.</li> </ul>
<i>Shaders</i> may include:	<ul style="list-style-type: none"> <li>• Art style</li> <li>• Blinn-Phong</li> <li>• Comic</li> <li>• Cook-Torrance</li> <li>• Drawn look</li> <li>• Gouraud</li> <li>• Lambert</li> <li>• Oren-Nayar</li> <li>• Phong</li> <li>• Toon</li> <li>• Ward anisotropic.</li> </ul>
<i>Personnel</i> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• other specialist staff</li> <li>• other technical staff</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM527A Integrate database with online game

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to integrate a database with an online game, where the relationship between the game server and the database server is also considered a client-server relationship on a local area network.

### Application of the Unit

This unit applies to programmers, analyst programmers and game programmers responsible for the development of code to connect a computer game to a database.

### Licensing/Regulatory Information

Not applicable.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Install application programming interfaces (APIs) suitable to the game's data source provider	<p>1.1 Research appropriate APIs</p> <p>1.2 Identify specific APIs as suitable for the game architecture and <i>data source provider</i></p> <p>1.3 Install nominated APIs on game development computers</p>
2. Define and use a connection to the data source	<p>2.1 Define game data source connection parameters</p> <p>2.2 Store connection parameters in <i>external text-based configuration file</i></p> <p>2.3 Open and close connection to the game data source</p>
3. Configure and use connection pooling	<p>3.1 Configure connection pooling in the database management system</p> <p>3.2 Define connection pool parameters for minimum connections, maximum connections and idle connections</p> <p>3.3 Minimise use of database resources through the use of connection pooling</p> <p>3.4 Test and verify use of connection pooling</p>
4. Pass embedded structured query language (SQL) to the database	<p>4.1 Define database connection property</p> <p>4.2 Compose SQL statement or command to be passed to the database</p> <p>4.3 Test, debug and execute the SQL statement</p>
5. Execute a stored procedure on a database	<p>5.1 Call a stored procedure on the database using command callable statement</p> <p>5.2 Define and pass <i>parameters</i> to the stored procedure</p> <p>5.3 Test, debug and execute database stored procedure</p>
6. Modify database data	<p>6.1 Retrieve multi-row multi-column result sets from the database into the game application domain</p> <p>6.2 Insert new records into the database</p> <p>6.3 Update existing database records</p> <p>6.4 Delete existing database records</p>
7. Integrate data from the database with the game application domain	<p>7.1 Integrate data from a <i>forward-only and read-only cursor</i> into the game application domain</p> <p>7.2 Incorporate data from an <i>updateable cursor</i> into the game application domain</p>
8. Test and debug	<p>8.1 Test database integration code</p>

database integration code	8.2 Document test results 8.3 Determine errors and exceptions and document solutions 8.4 Debug all errors and exceptions 8.5 Assess all data modifications in the database and document any errors 8.6 Correct all causes to data modification errors
---------------------------	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse game application domain and game architecture and determine appropriate APIs as prescribed by the selected proprietary or database industry standards
  - determine appropriate connection pooling implementation requirements
  - determine appropriate development environments for the game architecture and database integration functionality
- communication skills to:
  - describe and evaluate data access and data modification architectures with game designers and game architects
  - negotiate game data requirements with project managers, game designers and game architects
  - propose data access and modify functionality to meet the needs of the online game
- initiative and enterprise skills to:
  - assess proposed database integration architectures within the context of existing game development technologies, development infrastructure and game industry standards
  - recommend solutions to difficulties or flaws identified with the integration of the database and the online game
- learning skills to:
  - acquire the skills and knowledge required to integrate a database with an online game
  - ensure the use of leading edge industry developments and industry standards
- literacy skills to:
  - delineate existing game architecture documentation
  - document database integration specifications for an online game
  - interpret and understand industry standards, game architecture standards, and database standards
- planning and organisational skills:
  - organise resources, documentation and infrastructure elements required for the integration of a database with an online game
  - plan the effective integration of a database with an online game
- problem-solving skills to:
  - debug code, identify code bugs and resolve all code exceptions
  - identify and implement solutions to problems with the integration of a database with an online game
  - identify problems with SQL and stored procedures and implement solutions
- research skills to:
  - enhance knowledge of industry standards and trends related to the integration of a database with an online game
  - identify and locate sources of information that provide solutions to technical problems

- identify sources of information and documentation required to plan and implement the integration of a database with an online game
- technical skills to:
  - implement complex code algorithms required for the integration of a database with an online game
  - implement exception handling routines in code
  - improve the efficiency of code by refactoring
  - use an integrated development environment to build database integration code
  - write code to integrate a database with an online game.

## Required knowledge

- relational database theory, including:
  - how to create and test stored procedures
  - how to create 'embedded' SQL and assign parameters in code for filtering
  - how and why tables are related and how relationships between tables are implemented
  - how SQL is used to retrieve data from multiple tables
  - how inserts to tables in parent/child relationships can be implemented using artificial (auto-generated) primary key values
  - how to implement cascading updates and deletes
- game development
- integrated development environments, including:
  - data access APIs and associated classes required for the integration of a database with an online game
  - online help and documentation required for research and debugging code
  - user authentication and authorisation management
- methodologies and techniques required for effective and well-factored object-oriented program (OOP) code, including:
  - class implementation
  - control of logic flow
  - use of collections and lists
  - use of OOP concepts, such as inheritance, encapsulation and overloading
- web development.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• add database functionality to an online game</li> <li>• display and modify the database data provided by game-play input.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• game design specification and requirements documentation</li> <li>• game server</li> <li>• database server</li> <li>• integrated development environment software and hardware</li> <li>• browsers for browser-based games</li> <li>• game consoles for console-based games</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of an online game that can access, display and update game state data stored in a database</li> <li>• verbal and written questioning to assess the knowledge associated with the integration of a database with an online game.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Data source provider</i></b> may include:	<ul style="list-style-type: none"> <li>• DB2</li> <li>• Infomix</li> <li>• Ingres</li> <li>• Microsoft Access</li> <li>• Microsoft SQL (MS SQL) server</li> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Sybase.</li> </ul>
<b><i>External text-based configuration file</i></b> may include:	<ul style="list-style-type: none"> <li>• any text-based file format that will not require re-compilation if properties of the connection to the database change</li> <li>• in ASP.Net, framework the web configuration (web.config) file and machine configuration (machine.config) file</li> <li>• files formatted as eXtensible markup language (XML) files or documents</li> <li>• traditional ASCII-based text files with file extension of .ini.</li> </ul>
<b><i>Parameters</i></b> may include:	<ul style="list-style-type: none"> <li>• data type property appropriate to the data source provider</li> <li>• direction property defining either input or output</li> <li>• value property derived from the actual game play.</li> </ul>
<b><i>Forward-only and read-only cursor</i></b> may include:	<ul style="list-style-type: none"> <li>• data-reader object</li> <li>• forward-only record set</li> <li>• Java forward-only result set.</li> </ul>
<b><i>Updateable cursor</i></b> may include:	<ul style="list-style-type: none"> <li>• data-set object</li> <li>• record-set object</li> <li>• result-set object.</li> </ul>

## Unit Sector(s)

Game development

## ICAGAM528A Create games for mobile devices

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create games for mobile devices.

### Application of the Unit

This unit applies to concept artists, games designers, games programmers, animators and other personnel working in the game development industry.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Research and document mobile gaming device technologies	<p>1.1 Research, identify and describe current <i>mobile devices</i> suitable for games</p> <p>1.2 Identify a suitable mobile device</p> <p>1.3 Identify <i>technical limitations and constraints</i> of the mobile gaming device</p> <p>1.4 Research and identify <i>tools and technology</i> for creating applications for the mobile device</p> <p>1.5 Identify a suitable tool for the mobile gaming device</p> <p>1.6 Research, identify and describe market successful mobile game devices</p>
2. Plan the project	<p>2.1 Create or obtain <i>project brief and documents</i></p> <p>2.2 Identify <i>game production assets</i> required to meet creative and production requirements and <i>technical specifications</i></p> <p>2.3 Define developer roles and skills</p> <p>2.4 Create a <i>schedule</i> for production and testing</p> <p>2.5 Determine strategies for <i>monitoring production progress</i> against schedule</p>
3. Create game assets	<p>3.1 Create graphics assets using</p> <p>3.2 Create music and sound assets</p>
4. Develop game prototype	<p>4.1 <i>Develop game prototype</i> using a <i>programming language</i></p> <p>4.2 Create and <i>check game-play elements</i> according to creative and technical requirements</p> <p>4.3 Test and run game play on mobile device</p> <p>4.4 Identify if the game meets creative, production and technical requirements</p>
5. Evaluate game prototype	<p>5.1 Demonstrate initial prototype to relevant <i>personnel</i></p> <p>5.2 <i>Evaluate</i> against criteria, including achievement of a creative and user-friendly product</p> <p>5.3 Discuss and agree on required changes</p> <p>5.4 Assist if required in <i>tests and user trials</i></p> <p>5.5 Evaluate feedback from user trials</p> <p>5.6 Confirm endorsement from relevant personnel to develop prototype into complete product</p>

6. Transform prototype into final proof of concept prototype	6.1 Make necessary changes as indicated by user trials 6.2 Integrate all game elements as required by specifications 6.3 <i>Polish</i> the game
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate documentation and images to inform implementation of game specifications
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
- initiative and enterprise skills to exercise a high level of creative ingenuity in game design and innovation
- literacy and numeracy skills to:
  - develop game design and technical design documents
  - read briefs, work instructions, and technical and conceptual information
  - write instructions for the normal and competent operation and testing of all game features and permutations
- management skills to coordinate teams in order to effectively extract useful feedback
- planning and organisational skills to:
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research
- teamwork skills to:
  - contribute to and work in a collaborative team
  - realise a unified game-play vision
- technical skills to:
  - resolve basic hardware, software and other technical issues associated with game production
  - translate design requirements into specifications
  - use correct file formats and archiving procedures.

### Required knowledge

- basic programming techniques
- budgeting and scheduling considerations for game design
- computer game development, including specific terminology
- current game-play hardware and software products
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design
- techniques for concept visualisation and development.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• apply a variety of strategies for game trialling and testing</li> <li>• demonstrate original and innovative approaches to the creative development of a game</li> <li>• implement game development and production strategies</li> <li>• maintain integrity of the design brief and game design document</li> <li>• undertake risk assessment and critical path planning</li> <li>• produce a working game on a mobile device.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• evaluation of a working, original game on a mobile device</li> <li>• direct observation of candidate participating in game document development activities</li> <li>• verbal questioning or interview concerning aspects of game development, including: <ul style="list-style-type: none"> <li>• capability of game engines and software tools to meet the requirements of the brief</li> <li>• evaluating game prototypes from technical, design and game-play perspectives</li> <li>• game testing and trialling procedures</li> <li>• maintaining integrity of the design brief and game design document</li> <li>• risk assessment and critical path planning</li> <li>• translating design and technical specifications into working game prototypes.</li> </ul> </li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Mobile devices</i></b> may include:	<ul style="list-style-type: none"> <li>• mobile phones</li> <li>• personal digital assistants (PDAs)</li> <li>• tablets.</li> </ul>
<b><i>Technical limitations and constraints</i></b> may include:	<ul style="list-style-type: none"> <li>• current technology</li> <li>• future technology and release date</li> <li>• graphics capabilities</li> <li>• memory</li> <li>• pixels</li> <li>• platforms</li> <li>• polygon count</li> <li>• processor speed</li> <li>• software capability</li> <li>• storage space.</li> </ul>
<b><i>Tools and technology</i></b> may include:	<ul style="list-style-type: none"> <li>• compilers</li> <li>• debugging software</li> <li>• development software</li> <li>• efficiency</li> <li>• flexible systems suitable for non-programmers</li> <li>• graphics</li> <li>• graphics system design</li> <li>• integrated development environments</li> <li>• middleware</li> <li>• operating systems</li> <li>• plug-in tools</li> <li>• programming for game integration</li> <li>• rendering</li> <li>• sound</li> <li>• system architecture for real time game environments and simulations</li> <li>• tools for designers and play analysis.</li> </ul>
<b><i>Project brief and documents</i></b> may include:	<ul style="list-style-type: none"> <li>• concept drawings</li> <li>• designer's notes</li> <li>• development environment description</li> <li>• game design document</li> </ul>

	<ul style="list-style-type: none"> <li>• game-play designs</li> <li>• help notes</li> <li>• information design</li> <li>• operating manual</li> <li>• storyboard</li> <li>• style and design principles</li> <li>• style and medium</li> <li>• target market information</li> <li>• technical design document</li> <li>• technical design review process.</li> </ul>
<b>Game production assets</b> may include:	<ul style="list-style-type: none"> <li>• current work files</li> <li>• development kits</li> <li>• existing digital product libraries: <ul style="list-style-type: none"> <li>• character models</li> <li>• environments</li> <li>• motion capture data</li> <li>• sound effects</li> </ul> </li> <li>• game engines, including customised game engines</li> <li>• personnel.</li> </ul>
<b>Technical specifications</b> may include:	<ul style="list-style-type: none"> <li>• backup procedures</li> <li>• delivery platform</li> <li>• difficulty levels</li> <li>• disc or memory space</li> <li>• format for final product</li> <li>• navigation design</li> <li>• pixel size</li> <li>• polygon count</li> <li>• specifications for phases of game development: <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> </ul> </li> <li>• systems and workplace standards for documentation, including: <ul style="list-style-type: none"> <li>• computer file management</li> <li>• job lists</li> <li>• progress reports</li> </ul> </li> <li>• source code and game assets archiving</li> <li>• target market.</li> </ul>
<b>Schedule</b> may involve:	<ul style="list-style-type: none"> <li>• allocating work tasks in consultation with other team members</li> <li>• analysing key requirements of the brief</li> </ul>

	<ul style="list-style-type: none"> <li>• assessing concept viability against resource availability</li> <li>• conducting risk assessment regarding possible issues and constraints and potential solutions</li> <li>• creating an overall project plan and schedule</li> <li>• determining workflow with consideration to available resources</li> <li>• identifying key milestones and associated deliverables: <ul style="list-style-type: none"> <li>• alpha version - pre-production</li> <li>• beta version - playable prototype</li> <li>• gold version - completed game</li> <li>• trialling and testing</li> </ul> </li> <li>• identifying stakeholders and devising strategies to meet stakeholder needs</li> <li>• identifying the critical path</li> <li>• researching background information</li> <li>• setting project objectives against achievable timeframes.</li> </ul>
<p><b><i>Monitoring production progress</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• balancing quality and scheduling requirements</li> <li>• coordinating the efforts of development, quality assurance, sales, marketing, public relations and finance</li> <li>• ensuring the timely production of assets to brief requirements, including: <ul style="list-style-type: none"> <li>• animation components</li> <li>• graphic</li> <li>• images</li> <li>• interfaces</li> <li>• text</li> <li>• video</li> </ul> </li> <li>• identifying and applying testing procedures</li> <li>• monitoring workload allocated to individual personnel</li> <li>• progressive game testing to ensure playability</li> <li>• renegotiating variations and schedule slippage ahead of milestone dates</li> <li>• sound identifying and applying contingency strategies.</li> </ul>
<p><b><i>Developing game prototypes</i></b> may involve:</p>	<ul style="list-style-type: none"> <li>• bug fixing, bug databases, creating stable code bases and game tuning</li> <li>• building flexible systems configurable by others</li> <li>• code review and test harnesses</li> <li>• designing and implementing tests and incorporating feedback from quality assurance</li> <li>• developing a comprehensive design for all missions and levels, including concept visuals</li> <li>• developing a walkthrough for at least one mission or level</li> </ul>

	<ul style="list-style-type: none"> <li>• developing story synopsis and scripts for each level</li> <li>• knowledge of games as dynamic systems: <ul style="list-style-type: none"> <li>• applying game tuning strategies in light of feedback from actual play</li> <li>• characteristics of a balanced game</li> <li>• working with quality assurance and understanding play-test feedback</li> </ul> </li> <li>• use of appropriate tools and skills for fast, interactive development</li> <li>• user-guide development.</li> </ul>
<b>Programming language</b> may include:	<ul style="list-style-type: none"> <li>• ActionScript</li> <li>• C</li> <li>• C#</li> <li>• C++</li> <li>• Flash Lite</li> <li>• Java</li> <li>• Object Pascal</li> <li>• Objective-C</li> <li>• Pascal</li> <li>• Python</li> <li>• VB.NET.</li> </ul>
<b>Check game-play elements</b> may involve:	<ul style="list-style-type: none"> <li>• chance</li> <li>• fun</li> <li>• logic</li> <li>• playability</li> <li>• rules</li> <li>• skill</li> <li>• strategy.</li> </ul>
<b>Personnel</b> may include:	<ul style="list-style-type: none"> <li>• animators</li> <li>• concept artists</li> <li>• game-play designers</li> <li>• graphic designers</li> <li>• instructional designers</li> <li>• modellers</li> <li>• motion capture technicians</li> <li>• producers</li> <li>• programmers</li> <li>• project manager</li> <li>• sound engineers</li> <li>• team members</li> <li>• technical director</li> <li>• writers</li> </ul>

	<ul style="list-style-type: none"> <li>• other specialist or technical staff.</li> </ul>
<i>Evaluating</i> game prototypes may involve:	<ul style="list-style-type: none"> <li>• examining and analysing the impact of decisions, after the fact: <ul style="list-style-type: none"> <li>• business decisions</li> <li>• design decisions</li> <li>• methodology and process decisions</li> </ul> </li> <li>• product ‘post-mortems’, reviewing actual use of resources to achieve outcomes against initial project plan and schedule.</li> </ul>
<i>Tests and user trials</i> may involve play test procedures:	<ul style="list-style-type: none"> <li>• determining criteria for measurement of success with a given audience</li> <li>• play testing to monitor player frustration, progress and enjoyment</li> <li>• selecting test subjects</li> <li>• testing game with target market and other diverse populations.</li> </ul>
<i>Polish</i> may involve enhancing:	<ul style="list-style-type: none"> <li>• game play</li> <li>• graphics</li> <li>• user control</li> <li>• user interface.</li> </ul>

## Unit Sector(s)

Game development

# ICAGAM529A Analyse business opportunities in the digital games environment

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse business opportunities in the digital games environment.

## Application of the Unit

This unit applies to concept artists, game designers, games programmers, animators and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Describe the Australian digital games industry and development companies</p>	<p>1.1 Identify the <i>large and small organisations in the Australian digital games industry</i></p> <p>1.2 Identify recent projects undertaken by small and large organisations in the Australian digital games industry</p> <p>1.3 Identify resources required for the production of a digital game in a small business environment</p> <p>1.4 Describe the process of subcontracting various production elements to other small businesses</p>
<p>2. Describe the structure of a game-development team</p>	<p>2.1 Identify the roles of <i>engineers, artists, game designers, producers and additional staff</i></p> <p>2.2 Describe the skills required to occupy each role in a game-development team</p> <p>2.3 Describe the interaction and collaboration between roles</p>
<p>3. Investigate the process of starting an independent game development business</p>	<p>3.1 Identify the <i>major factors involved in starting a small business</i> in the digital games industry</p> <p>3.2 Identify the <i>legal requirements</i> and <i>financial management</i> of operating a small business</p> <p>3.3 Identify the legal protection of the small business operator and the dissolution procedures for a small business</p>
<p>4. Evaluate the role of the Australian government and other organisations related to digital game production</p>	<p>4.1 Identify the role of the <i>Australian government</i> and other organisations affecting the digital games industry</p> <p>4.2 Identify the influence of the Australian government related to game production and marketing</p> <p>4.3 Discuss the effect of rating standards on digital game production and <i>marketing</i></p>
<p>5. Review copyright and intellectual property laws</p>	<p>5.1 Discuss copyright and intellectual property laws related to digital game development</p> <p>5.2 Undertake a review of the current state of national and international copyright pertaining to <i>digital game assets</i></p> <p>5.3 Incorporate the conventions of copyright related to the production of a digital game project</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse documentation and images to the digital games environment
  - interpret briefs, work instructions, and technical and conceptual information
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences
  - communicate technical requirements related to structuring a game development team to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
- literacy and numeracy skills to:
  - document research
  - produce analytical documents
- management skills to manage teams in order to effectively extract useful feedback
- planning and organisational skills to:
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues when creating documentation
- research skills to:
  - undertake practical, technical and desktop research into current business practice in the digital games environment
  - identify crucial components of a digital game development team
- self-management skills to organise research tasks and document findings
- teamwork skills to contribute to and work in a collaborative team
- technical skills to:
  - use correct file formats and archiving procedures
  - resolve basic hardware, software and other technical issues associated with game production.

### Required knowledge

- computer game development, including specific terminology
- current game-play hardware and software products
- environmental impact and sustainability considerations
- human resources required in the process of creating a game and their respective skills and technology requirements
- OHS requirements for:

- ergonomics
- electrical safety
- materials handling
- physical hazards, including lifting
- risk and critical-path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• demonstrate research skills to identify key roles for a game development team</li> <li>• document skills related to business opportunities in the digital games industry</li> <li>• undertake risk assessment and critical path planning</li> <li>• conceptualise a business plan for an independent games development business.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• internet access for research purposes</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of work samples or simulated workplace activities</li> <li>• verbal questioning or interview concerning aspects of game document development, including: <ul style="list-style-type: none"> <li>• industry standards for the game development process</li> <li>• resources required for game development</li> </ul> </li> <li>• evaluation of game documentation related to game development activities.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Large and small organisations in the Australian digital games industry</i></b> may include:	<ul style="list-style-type: none"> <li>• animation production companies</li> <li>• digital effects companies</li> <li>• games and gaming companies</li> <li>• pre- and post-production houses</li> <li>• television stations</li> <li>• training and simulation training organisation.</li> </ul>
<b><i>Engineers</i></b> may include:	<ul style="list-style-type: none"> <li>• game-play programmers</li> <li>• sound engineers</li> <li>• tools programmers.</li> </ul>
<b><i>Artists</i></b> may include:	<ul style="list-style-type: none"> <li>• 3-D modellers</li> <li>• animators</li> <li>• concept artists</li> <li>• lighting artists</li> <li>• motion capture acting</li> <li>• sound designers</li> <li>• texture artists</li> <li>• voice acting.</li> </ul>
<b><i>Game designers</i></b> may include:	<ul style="list-style-type: none"> <li>• game-play designers</li> <li>• level designers</li> <li>• writers.</li> </ul>
<b><i>Additional staff</i></b> may include:	<ul style="list-style-type: none"> <li>• administrative</li> <li>• managers</li> <li>• marketing</li> <li>• technical support.</li> </ul>

<p><b>Major factors involved in starting a small business</b> may include:</p>	<ul style="list-style-type: none"> <li>• business capital and types of finance</li> <li>• business plans: 5 year or 10 year</li> <li>• business structures: sole trader, partnerships, limited partnership, proprietary, and limited company</li> <li>• contingency planning</li> <li>• financial plans</li> <li>• insurance, such as: <ul style="list-style-type: none"> <li>• personal</li> <li>• equipment and contents</li> <li>• public liability</li> </ul> </li> <li>• rationale for starting a small business</li> <li>• registration of a business name</li> <li>• selecting a business location</li> <li>• setting-up procedures for small business.</li> </ul>
<p><b>Legal requirements</b> may include:</p>	<ul style="list-style-type: none"> <li>• copyright and intellectual property legislation</li> <li>• workplace legislation and requirements</li> <li>• acknowledging the authorship of others who have collaborated in project activities</li> <li>• avoiding any types of conflict of interest</li> <li>• being honest about professional experience and capabilities</li> <li>• maintaining a commitment to the development of innovative design work of the highest quality</li> <li>• maintaining confidentiality of all client information</li> <li>• observing safe and healthy working practices at all times and encouraging others to do so</li> <li>• refusing any form of hidden compensation outside agreed contractual arrangements</li> <li>• respecting the work of other designers in fair and open competition.</li> </ul>
<p><b>Financial management</b> may include:</p>	<ul style="list-style-type: none"> <li>• budgets</li> <li>• business confidentiality</li> <li>• business ethics</li> <li>• conflict of interest concerns</li> <li>• financial control systems</li> <li>• record keeping.</li> </ul>
<p><b>Australian government</b> may include:</p>	<ul style="list-style-type: none"> <li>• Australian Taxation Office</li> <li>• NSW Film and Television Office</li> <li>• NSW Government Small Business Services</li> <li>• NSW Office of Fair Trading.</li> </ul>
<p><b>Marketing</b> may include:</p>	<ul style="list-style-type: none"> <li>• game trailers</li> <li>• magazine publications</li> <li>• online reviews</li> </ul>

	<ul style="list-style-type: none"><li>• television advertisements</li><li>• word of mouth.</li></ul>
<i>Digital game assets</i> may include:	<ul style="list-style-type: none"><li>• 2-D art</li><li>• 3-D characters</li><li>• 3-D environments</li><li>• audio</li><li>• concept art</li><li>• game designs</li><li>• game engine</li><li>• textures.</li></ul>

## Unit Sector(s)

Game development

# ICAGAM530A Develop and implement physics in a 3-D digital game

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to integrate a physics and rendering engine into a 3-D digital game.

## Application of the Unit

This unit applies to game engine developers, gameplay programmers and other personnel working in the game development industry.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop a game world system	1.1 <b><i>Develop code</i></b> using a <b><i>programming language</i></b> and create instances of the <b><i>rendering engine</i></b> , the scene manager and <b><i>physics engine's</i></b> world objects 1.2 Constrain the frame rate to a <b><i>desired frame rate</i></b>
2. Develop components to support game world creation using physics	2.1 Create and implement <b><i>game physics system</i></b> 2.2 Implement game object <b><i>primitives</i></b> 2.3 Use or develop a physics debugger to show collision frames
3. Develop an understanding of constraint dynamics	3.1 Generate game objects or physics bodies constrained by <b><i>joints</i></b> 3.2 Build a ragdoll using the <b><i>game physics system</i></b>
4. Develop an understanding of physics interactivity	4.1 Use the game physics system to ray cast the scene 4.2 Implement a player controlled model 4.3 Implement and develop <b><i>game physics system models</i></b>
5. Develop an interactive scene	5.1 Use primitives to build a scene 5.2 Use trigger volumes to fire off events 5.3 Capture collision events with call-backs 5.4 Use a toggle for collision frames
6. Compile a report	6.1 Build class diagrams for all objects 6.2 Describe techniques used to create interactivity 6.3 Describe the objects and when they were used 6.4 Document the libraries used

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - interpret briefs, documents and conceptual information
  - analyse design requirements for game physics systems
- communication skills to:
  - check and confirm design requirements
  - collect, interpret and communicate in visual and written forms effectively for various audiences, including engineers and artists
  - communicate complex designs in a structured format drawn from industry standards, styles and techniques
  - communicate technical requirements related to software development, graphics requirements and code development to supervisors and other team members
  - provide practical advice, support and feedback to colleagues and management
  - translate design requirements into specifications
- initiative and enterprise skills to exercise a high level of creative ingenuity in creating a simulated physics environment with innovation
- literacy and numeracy skills to:
  - develop technical design documents
  - read briefs, work instructions, and technical and conceptual information
  - write instructions for the normal and competent operation and testing of all features and permutations
  - understand basic physics
  - understand game mathematics
- management skills to manage teams in order to effectively extract useful feedback
- planning and organisational skills to:
  - appropriately refer decisions to a higher project authority for review and endorsement
  - balance talent, experience and budget
  - delegate tasks and responsibility appropriately
  - establish clear roles and goals to achieve required game development outcomes
  - meet project deadlines
  - organise equipment and resources to achieve required outcomes
  - organise own time to meet milestones
- problem-solving skills to recognise and address potential quality issues and problems at design development stage
- research skills to undertake practical, technical and desktop research into advanced effects
- self-management skills to complete assigned tasks
- teamwork skills to:
  - realise a unified game-play vision
  - contribute to and work in a collaborative team
- technology skills to:
  - use correct file formats and archiving procedures

- resolve basic hardware, software and other technical issues associated with 3-D game environments.

### **Required knowledge**

- basic programming techniques
- object-orientated language skills
- computer game development, including specific terminology
- current game-play hardware and software products
- environmental impact and sustainability considerations
- human resources required in the process of creating a game and their respective skills and technology requirements
- OHS requirements for:
  - ergonomics
  - electrical safety
  - materials handling
  - physical hazards, including lifting
- risk and critical path management
- technical constraints that hardware imposes on software development, graphics requirements, code development and creative visual design
- techniques for applying concept development skills
- techniques for applying concept visualisation skills.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop an interactive game that implements game physics</li> <li>• identify, evaluate and use a physics library.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer terminal</li> <li>• integrated development environment</li> <li>• word-processing application</li> <li>• the internet</li> <li>• physics libraries</li> <li>• computer hardware, software, games engines and file storage</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of working executable that implements game physics</li> <li>• review of work samples or simulated workplace activities</li> <li>• review of fault-finding exercises</li> <li>• evaluation of reports and logbooks.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required</p>

	knowledge.

## ICAGAM531A Complete compositing to create elements for the 3-D and digital effects environment

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to composite photographic, 3-D and digital effects elements.

### Application of the Unit

This unit applies to compositors, matte painters, concept artists, modellers, animators, game designers, directors and other personnel working in the film, television and game development industries.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Confirm compositing requirements</p>	<p>1.1 Undertake consultation with the client to develop the compositing brief</p> <p>1.2 <i>Plan and schedule</i> compositing work</p> <p>1.3 Identify appropriate <i>software tools, equipment and media</i> for compositing work</p> <p>1.4 Consult with relevant <i>personnel</i> in regard to technical aspects of proposed compositing</p> <p>1.5 Confirm compositing requirements with client prior to work commencement</p>
<p>2. Prepare elements for compositing</p>	<p>2.1 Select resolution and aspect ratio for final composited output</p> <p>2.2 Create digitised <i>elements</i> through non-digital means</p> <p>2.3 Identify and obtain source plates or layers, images and other elements for compositing</p> <p>2.4 Modify or repair elements that are problematic or inconsistent with desired outcomes</p> <p>2.5 Undertake colour correction of plates and elements</p> <p>2.6 Create additional elements where required</p> <p>2.7 Generate mattes</p>
<p>3. Composite images to achieve an integrated result</p>	<p>3.1 Track and stabilise images to be composited</p> <p>3.2 Match cameras, lighting and shadows, and add motion blur as required to finalise composite</p> <p>3.3 Integrate plates, layers or elements in the correct sequence using compositing software</p> <p>3.4 Incorporate grain where required</p> <p>3.5 Present test composites to client for approval</p>
<p>4. Render composited images and save files</p>	<p>4.1 <i>Optimise composited images for rendering</i></p> <p>4.2 Undertake rendering process using efficient levels of resources</p> <p>4.3 Store or archive rendered files in the specified <i>output format</i></p> <p>4.4 Review completed render to ensure quality and compliance with system requirements and client brief</p>
<p>5. Present composite to client for final approval</p>	<p>5.1 Present final composited images for client approval</p> <p>5.2 Make adjustments to composited images where required to meet client requirements</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to communicate and negotiate effectively with suppliers, colleagues and clients
- planning and organisational skills to:
  - manage time and resources
  - optimise equipment and resources to achieve desired technical outcomes
  - prepare hardware and software resources for compositing
- problem-solving skills to solve technical problems associated with compositing
- safety awareness skills to demonstrate safe and healthy workplace practices
- technical skills to:
  - composite a range of elements using computer software
  - efficiently render composited scenes
  - interpret client compositing briefs
  - use advanced computer graphics software
  - use compositing techniques to develop and realise client vision.

### Required knowledge

- 3-D modelling, animation and visual effects development
- aspect ratios for image output
- camera, lighting and shadow matching
- efficient sizes and appropriate formats for composited files
- game development
- post-production scheduling and sequencing
- range of compositing software available
- rendering principles
- safe and healthy workplace practices associated with use of computer applications.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• adhere to design brief requirements</li> <li>• complete compositing tasks to the required level of quality according to the brief</li> <li>• use and refine elements for consistency, best image quality and visual impact</li> <li>• adhere to system requirements related to file size, format and storage for efficient retrieval</li> <li>• apply safe and healthy work methods while undertaking compositing work.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer hardware, software, games engines and file storage</li> <li>• compositing and output briefs</li> <li>• elements to be composited</li> <li>• copyright and intellectual property legislation</li> <li>• OHS legislation and enterprise policy</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• case studies</li> <li>• work samples or simulated workplace activities</li> <li>• observation of the learner observing appropriate and safe work practices, and maintaining and organising their work space</li> <li>• verbal questioning or interview to confirm knowledge of compositing processes, and methods used to resolve issues and problems</li> <li>• informal individual presentations demonstrating progress toward resolving issues arising in a composite</li> <li>• written or interactive computer-based test or quiz</li> <li>• fault-finding exercises</li> <li>• reports and logbooks.</li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Plan and schedule</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• booking facilities</li> <li>• checking availability of resources for compositing</li> <li>• discussions with team members and stakeholders</li> <li>• production or pipeline planning</li> <li>• scheduling and balancing a range of compositing activities to meet client time line</li> <li>• undertaking technical and design research.</li> </ul>
<p><b><i>Software tools</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• After Effects</li> <li>• Avid</li> <li>• Blender</li> <li>• Combustion</li> <li>• D2 Nuke</li> <li>• Digital Fusion</li> <li>• Final Cut Pro</li> <li>• Flame</li> <li>• Flint</li> <li>• Fusion</li> <li>• Illustrator</li> <li>• Inferno</li> <li>• Inferno</li> <li>• Lustre</li> <li>• Photoshop</li> <li>• Premier</li> <li>• Renderman</li> <li>• Shake.</li> </ul>
<p><b><i>Equipment and media</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• compositing software</li> <li>• computer workstation</li> <li>• ergonomic furniture</li> <li>• hubs</li> <li>• input device, such as stylist tablet, keyboard and mouse</li> <li>• output device, such as monitor, TV, printer and speakers</li> <li>• render farm</li> <li>• render network distribution software</li> <li>• rendering software</li> </ul>

	<ul style="list-style-type: none"> <li>• switches.</li> </ul>
<b>Personnel</b> may include:	<ul style="list-style-type: none"> <li>• animator</li> <li>• compositor</li> <li>• designer</li> <li>• director</li> <li>• manager</li> <li>• matte painter</li> <li>• modeller</li> <li>• production assistant</li> <li>• programmer</li> <li>• render wrangler</li> <li>• supervisor</li> <li>• systems administrator</li> <li>• technical director</li> <li>• texturer</li> <li>• visual effects designer.</li> </ul>
<b>Elements</b> may include:	<ul style="list-style-type: none"> <li>• background plates</li> <li>• CGI characters or objects</li> <li>• filmed characters</li> <li>• layers</li> <li>• matte paintings</li> <li>• visual effects.</li> </ul>
<b>Optimisation of composited images for rendering</b> may involve:	<ul style="list-style-type: none"> <li>• assessing options with key personnel</li> <li>• deleting any unnecessary geometry and components</li> <li>• optimising and refining for best render performance</li> <li>• organising output</li> <li>• preparing layer or pass control</li> <li>• preparing opacity mattes and alpha channels</li> <li>• preparing renderer attributes</li> <li>• rendering</li> <li>• selection of most appropriate renderers for specific outcomes</li> <li>• testing and diagnosing rendering issues.</li> </ul>
<b>Output format</b> may include:	<ul style="list-style-type: none"> <li>• 35mm</li> <li>• 65mm</li> <li>• Cinemascope</li> <li>• DVD</li> <li>• HDTV</li> <li>• IMAX</li> <li>• NTSC</li> <li>• PAL</li> <li>• Quicktime</li> </ul>

	<ul style="list-style-type: none"><li>• Super 35.</li></ul>

Game development

## ICAICT101A Operate a personal computer

### Modification History

Version	Comments
ICAICT101A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate a personal computer (PC) in a home or small office environment.

This entry level unit provides the learner with information technology (IT) literacy skills in setting up a personal computer, accessing files with application programs, sending and retrieving emails, using the internet, using peripheral devices, such as printers, scanners, webcams and data projectors, applying basic security procedures and power-management settings, and backing up and shutting down a personal computer.

### Application of the Unit

This unit applies to workers who require the IT literacy skills to operate a personal computer in a small office environment, such as hospitality industry, real estate office, medical centre and school office.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare to use the personal computer	<p>1.1 Identify <i>physical components</i> and associated <i>peripheral devices</i> of the <i>personal computer</i> to become familiar with the available network</p> <p>1.2 Check physical <i>connectivity</i> of devices to ensure correct operation and performance</p> <p>1.3 Boot up and follow <i>procedures</i> to activate the computer</p>
2. Manage computer configurations	<p>2.1 Alter the computer <i>settings</i> to best suit the user</p> <p>2.2 Configure <i>power-management settings</i> to minimise power consumption as an environmentally sustainable measure</p> <p>2.3 Identify <i>operating system</i> and the <i>application programs</i> loaded on the computer to determine computer capability</p> <p>2.4 Conduct basic software installation and removal to improve computer capability</p> <p>2.5 Navigate and manipulate desktop environment to create and customise desktop icons and access application programs</p>
3. Access and use basic application programs	<p>3.1 Open a folder with file documents containing <i>basic office applications</i>, make <i>minor changes</i> and save in a different folder</p> <p>3.2 Send and retrieve a simple email message using the desktop icon to communicate with other parties</p> <p>3.3 Access the internet using the web browser to view and conduct basic web information search</p> <p>3.4 Use firewall and antivirus and malware scans to reduce <i>security risks and threats</i> in the system</p>
4. Access and use basic peripheral devices	<p>4.1 Access external storage devices to retrieve, copy, move and save information in different mediums and locations</p> <p>4.2 Use <i>printer settings</i> on an installed printer to print a document</p> <p>4.3 Access <i>audiovisual (AV) devices</i> to view and play a multimedia file</p>
5. Shut down computer	<p>5.1 Back up important documents and programs to minimise risk of data loss</p> <p>5.2 Save any work to be retained and close open</p>

	application programs 5.3 Shut down computer and switch off any unused peripheral devices
--	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - read and write basic workplace documents
  - seek assistance and expert advice
- literacy skills to interpret user manuals and help functions
- technical skills to:
  - apply basic keyboarding skills
  - apply power-management settings
  - back up and save information
  - input user-access details for accessing a PC
  - install and remove software
  - manage mouse for different applications
  - save and retrieve files to and from various locations
  - send and retrieve emails
  - use peripheral and storage devices
  - use the internet.

### Required knowledge

- basic parts of a computer and various hardware components
- basic software operation and application packages
- basic computer functions, including security functions
- peripheral devices
- storage devices.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use hardware and software</li> <li>• navigate around the desktop</li> <li>• use system features to perform tasks</li> <li>• save results of work.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate learning and assessment support when required</li> <li>• personal computer, including printer, mouse, keyboard and monitor</li> <li>• use of basic software currently used in industry.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of PC operations</li> <li>• direct observation of candidate performing basic PC operations</li> <li>• direct observation of candidate performing a sequence of routine tasks following clear directions.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.

## ICAICT102A Operate word-processing applications

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate word-processing applications and perform basic operations, including creating and formatting documents, creating tables and printing labels.

### Application of the Unit

This unit applies to workers who perform a range of routine tasks in the workplace using fundamental knowledge of word processing under direct supervision or with limited responsibility.

Operating a word-processing application is a core function and essential skill for most businesses.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Apply OHS practices	<p>1.1 Use workplace <i>ergonomic work practices</i> and strategies</p> <p>1.2 Organise work area ensuring an <i>ergonomic work environment</i></p>
2. Create documents	<p>2.1 Open word-processing application, create document and add data according to <i>information requirements</i></p> <p>2.2 Use document templates as required</p> <p>2.3 Use simple <i>formatting tools</i> when creating the document</p> <p>2.4 Save document to directory</p>
3. Customise basic settings to meet page layout conventions	<p>3.1 Adjust page layout to meet information requirements</p> <p>3.2 Open and view different toolbars</p> <p>3.3 Change <i>font format</i> to suit the purpose of the document</p> <p>3.4 Change alignment and line spacing according to document information requirements</p> <p>3.5 Modify margins to suit the purpose of the document</p> <p>3.6 Open and switch between several documents</p>
4. Format documents	<p>4.1 Use <i>formatting features</i> and styles as required</p> <p>4.2 Highlight and copy text from another area in the document or from another active document</p> <p>4.3 Insert headers and footers to incorporate necessary data</p> <p>4.4 Save document in another <i>file format</i></p> <p>4.5 Save and close document to <i>a storage device</i></p>
5. Create tables	<p>5.1 Insert standard table into document</p> <p>5.2 Change cells to meet information requirements</p> <p>5.3 Insert and delete columns and rows as necessary</p> <p>5.4 Use formatting tools according to style requirements</p>
6. Add images	<p>6.1 Insert appropriate <i>images</i> into document and customise as necessary</p> <p>6.2 Position and resize images to meet document formatting needs</p>
7. Print documents	<p>7.1 Preview document in print preview mode</p>

	7.2 Select basic <i>print settings</i>
	7.3 Print document or part of document from printer

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- problem-solving skills to address common operational problems when using word-processing applications
- technical skills to:
  - operate a personal computer (PC)
  - use a keyboard to enter text and numerical data.

### Required knowledge

- formatting styles and their effect on formatting, readability and appearance of documents
- organisational requirements for ergonomics, such as work periods and breaks
- organisational style guide
- purpose, use and function of word-processing software.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• follow OHS requirements</li> <li>• create, open and retrieve documents</li> <li>• customise basic settings</li> <li>• format documents</li> <li>• create tables</li> <li>• add text, objects and images</li> <li>• save and print documents.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• personal computer and printer</li> <li>• word-processing software currently used in industry</li> <li>• documents detailing organisational style guide or policy and OHS requirements</li> <li>• data suitable for use with word-processing packages</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of word-processing operations</li> <li>• direct observation of candidate creating and formatting documents</li> <li>• review of documents prepared by candidate demonstrating word-processing skills, including formatting, tables and images.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Ergonomic work practices</i></b> may include:	<ul style="list-style-type: none"> <li>• pause exercises</li> <li>• personal strategies: <ul style="list-style-type: none"> <li>• chair height</li> <li>• footrests</li> <li>• monitor and keyboard alignment</li> <li>• monitor reflection angle</li> </ul> </li> <li>• task and postural variety.</li> </ul>
<b><i>Ergonomic work environment</i></b> may relate to:	<ul style="list-style-type: none"> <li>• air quality</li> <li>• furniture and storage</li> <li>• lighting</li> <li>• noise</li> <li>• temperature.</li> </ul>
<b><i>Information requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• agendas</li> <li>• letters</li> <li>• memos</li> <li>• minutes</li> <li>• other business documents required by the organisation.</li> </ul>
<b><i>Formatting tools</i></b> may include:	<ul style="list-style-type: none"> <li>• menu commands within the application: <ul style="list-style-type: none"> <li>• borders</li> <li>• copy, cut and paste</li> <li>• help</li> <li>• find and replace</li> <li>• shading</li> <li>• spell check</li> <li>• undo.</li> </ul> </li> </ul>
<b><i>Font format</i></b> may include:	<ul style="list-style-type: none"> <li>• combination of typeface and other attributes: <ul style="list-style-type: none"> <li>• pitch and spacing</li> <li>• size.</li> </ul> </li> </ul>
<b><i>Formatting features</i></b> may include:	<ul style="list-style-type: none"> <li>• bold</li> <li>• hyphenation</li> <li>• italics</li> <li>• underline.</li> </ul>

<i>File format</i> may include:	<ul style="list-style-type: none"><li>• CSV files</li><li>• doc files</li><li>• HTML pages</li><li>• PDF files</li><li>• SXW (star office) files</li><li>• RTF files</li><li>• text files.</li></ul>
<i>Storage device</i> may include:	<ul style="list-style-type: none"><li>• CD</li><li>• DVD</li><li>• external hard drive, including universal serial bus (USB) flash drive</li><li>• internal hard drive</li><li>• web storage space.</li></ul>
<i>Images</i> may include:	<ul style="list-style-type: none"><li>• clip art</li><li>• graphics</li><li>• pictures.</li></ul>
<i>Print settings</i> may include:	<ul style="list-style-type: none"><li>• layout</li><li>• number of copies</li><li>• orientation</li><li>• paper size</li><li>• sides.</li></ul>

## Unit Sector(s)

General ICT

# ICAICT103A Use, communicate and search securely on the internet

## Modification History

Version	Comments
ICAICT103A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to connect to the internet, securely send and receive emails, search the internet using web browsers and interact securely and in a socially responsible manner with a range of different internet sites.

## Application of the Unit

This unit applies to individuals who use business technology to perform a range of routine tasks in the workplace or home office. They use fundamental knowledge of internet connection requirements, email and web browsers to perform tasks under direct supervision or with limited responsibility.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Connect to and access the internet</p>	<p>1.1 Connect to the internet through the existing <i>internet connection</i> and confirm functionality</p> <p>1.2 Open an <i>internet browser</i> and set a home page of personal choice by setting <i>internet options</i></p> <p>1.3 Ensure internet <i>browser software security</i></p> <p>1.4 Adjust the display of the internet browser to suit personal requirements</p> <p>1.5 Modify toolbar to meet user and internet browser needs</p> <p>1.6 Access a particular website, note privacy and other conditions of use and retrieve data</p> <p>1.7 Use <i>socially responsible behaviour</i> when sharing information on the internet</p> <p>1.8 Enter uniform resource locator (URL) in address line of internet browser</p>
<p>2. Use email for communications</p>	<p>2.1 Open email application package, create new email message and add addressees</p> <p>2.2 Compose the text of an email message according to <i>organisational guidelines</i> and spell check and edit text as required</p> <p>2.3 Create and add an automatic signature for the user</p> <p>2.4 Attach <i>files</i> to the email message where required</p> <p>2.5 Determine and set a priority and send the email message</p> <p>2.6 Reply to and forward a received message using available features</p> <p>2.7 Open and save an attachment to the relevant folder</p> <p>2.8 Search for, sort and save email message using available settings</p> <p>2.9 Adjust email accounts to restrict and quarantine possible <i>email security</i> problems</p> <p>2.10 Print an email message as required</p>

3. Search the internet	<p>3.1 Review organisational guidelines on internet access</p> <p>3.2 Open an internet application and locate and access a <b>search engine</b> on the internet and define search expressions based on the data required</p> <p>3.3 Enter appropriate key words into the search engine to locate the desired information</p> <p>3.4 Refine a search depending on outcomes of the original search</p> <p>3.5 Save search expression results and present them in a report according to the information requirements</p> <p>3.6 Create a bookmark within the internet browser or a link for the required web page for the key results</p> <p>3.7 Save the key results in a bookmark folder</p> <p>3.8 Modify the internet browser options for printing and print a web page</p> <p>3.9 Close the internet browser</p>
4. Access and use consumer-specific sites on the internet	<p>4.1 Identify, access and review information-specific sites to gain consumer information</p> <p>4.2 Identify and use <b>internet application sites</b> to lodge details and gain access and information</p> <p>4.3 Access and use online forms on the internet</p>
5. Undertake online transactions	<p>5.1 Access an online transaction site</p> <p>5.2 Ensure security of transaction site</p> <p>5.3 Enter required information into fields on merchant's website</p> <p>5.4 Ensure that pop-up dialog boxes, prompts or feedback mechanisms are completed</p> <p>5.5 Enter, check and make changes to preferred <b>transaction options</b></p> <p>5.6 Complete online transaction</p> <p>5.7 Record and archive receipts according to business processes</p> <p>5.8 Close down and leave transaction process</p>

6. Conduct an advanced search	6.1 Use search tools and advanced search features 6.2 Use <b>Boolean search</b> techniques when required to enhance the search 6.3 Use multiple or meta-search tools with a range of key words 6.4 Use search engines particular to a field of knowledge to refine the outcome 6.5 Access related virtual community sites and newsgroups and note their objectives and operational arrangements 6.6 Conduct a search with domain names to refine the search
7. Use information that has been located	7.1 Cross-reference information found by using several websites to determine accuracy of information obtained 7.2 Check date that website was last updated or properties of website to determine currency of information 7.3 Determine website authority by looking at copyright statements, privacy statements and organisational information 7.4 Save and print information found in different file forms

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
  - undertake online transactions
- literacy skills to:
  - compose email messages
  - interpret user manuals and help functions
  - read and interpret basic online documents
  - read and write basic workplace documents
- problem-solving skills to address common operational problems when using web browsers
- research skills to locate varied sources of information online
- technical skills to use:
  - digital device
  - email applications
  - internet search functions
  - peripheral hardware
  - keyboard to enter text into web browsers and email applications.

### Required knowledge

- basic technical terminology related to reading help files and prompts
- basic knowledge of copyright and privacy statements
- different types of messages that occur, such as:
  - error messages
  - message to install plug-ins
- different types of search engines
- procedures for using email applications
- procedures for evaluating and assessing the authority, reliability and authenticity of information
- internet search functions
- internet speed, traffic loads related to times of accessing the internet
- internet web browsers
- makeup and structure of internet addresses
- organisational guidelines on internet and email use (web etiquette or netiquette)
- different internet search techniques
- web browser update techniques
- use of key words and bookmarks.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• connect to and access the internet</li> <li>• send and receive emails</li> <li>• secure internet access and email communications</li> <li>• use search tools to locate information</li> <li>• research and select appropriate website</li> <li>• undertake online interactions</li> <li>• make an informed assessment of the accuracy, currency, authority and reliability of the site and information located.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC or digital device with internet</li> <li>• search engines currently used in industry</li> <li>• organisational policies on internet usage</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of internet access requirements, email features and search engine attributes</li> <li>• direct observation of candidate accessing the internet, using email, and searching and interacting with consumer sites using advanced search features</li> <li>• direct observation of candidate undertaking online interactions</li> <li>• review of search results, including assessment of the accuracy, currency and reliability of the site and information located.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Internet connection</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• 3G or high-speed downlink packet access (HSDPA) cellular network</li> <li>• 4G cellular network</li> <li>• broadband</li> <li>• cable</li> <li>• dial-up</li> <li>• digital subscriber line (DSL)</li> <li>• fibre to the 'x' (FTTx)</li> <li>• high-speed digital subscriber line (HSDSL)</li> <li>• integrated services digital network (ISDN) network terminating unit (NTU)</li> <li>• satellite</li> <li>• wireless modem</li> <li>• worldwide interoperability for microwave access (WiMAX).</li> </ul>
<p><b><i>Internet browser</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Firefox</li> <li>• Galleon</li> <li>• Google Chrome</li> <li>• Internet Explorer</li> <li>• Konqueror</li> <li>• Lynx</li> <li>• Mozilla</li> <li>• Netscape Navigator</li> <li>• Opera</li> <li>• Phoenix.</li> </ul>
<p><b><i>Internet options</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• configuring:             <ul style="list-style-type: none"> <li>• history</li> <li>• home page</li> <li>• location of temporary files</li> <li>• privacy level</li> <li>• security level</li> <li>• type of connection.</li> </ul> </li> </ul>
<p><b><i>Browser software</i></b></p>	<ul style="list-style-type: none"> <li>• application enabling</li> <li>• cookie handling</li> </ul>

<i>security</i> may include:	<ul style="list-style-type: none"> <li>• pop-up blocking</li> <li>• privacy levels</li> <li>• security zones</li> <li>• trusted sites.</li> </ul>
<i>Socially responsible behaviour</i> may relate to:	<ul style="list-style-type: none"> <li>• not using obscene, profane, lewd, vulgar, rude, inflammatory or threatening language</li> <li>• not publishing information that, if acted upon, could cause damage to property or persons, nor publish deliberately false or defamatory information about a person or organisation</li> <li>• not engaging in personal attacks, including prejudicial or discriminatory attacks, not harass (distress or annoy) another person</li> <li>• not accessing material that is profane, obscene, pornographic or paedophilic, that promotes illegal acts, or that advocates violence or discrimination</li> <li>• not sending inappropriate emails</li> <li>• taking responsibility for protecting personal information by not revealing personal information, including names, addresses, photographs, credit card details and telephone numbers.</li> </ul>
<i>Organisational guidelines</i> may include:	<ul style="list-style-type: none"> <li>• content of emails</li> <li>• downloading information and accessing particular websites</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk (MS Windows OS and Mac OS only).</li> </ul>
<i>Files</i> may include:	<ul style="list-style-type: none"> <li>• email messages</li> <li>• HTML pages</li> <li>• music</li> <li>• PDF files</li> <li>• pictures</li> <li>• text files.</li> </ul>
<i>Email security</i> may relate to:	<ul style="list-style-type: none"> <li>• taking steps to restrict: <ul style="list-style-type: none"> <li>• malware</li> <li>• phishing</li> <li>• spam.</li> </ul> </li> </ul>
<i>Search engine</i> may include:	<ul style="list-style-type: none"> <li>• Alexa Internet</li> <li>• AllTheWeb</li> <li>• AltaVista</li> <li>• Bing</li> <li>• Cuil</li> </ul>

	<ul style="list-style-type: none"> <li>• Excite</li> <li>• Galaxy</li> <li>• GigaBlast</li> <li>• Go.com</li> <li>• Google</li> <li>• HotBot</li> <li>• Live Search</li> <li>• Lycos</li> <li>• search.AOL</li> <li>• specific search engines</li> <li>• Yahoo.</li> </ul>
<b>Internet application sites</b> may include:	<ul style="list-style-type: none"> <li>• consumer: <ul style="list-style-type: none"> <li>• banking</li> <li>• shopping</li> </ul> </li> <li>• education and training</li> <li>• government</li> <li>• health</li> <li>• interest groups</li> <li>• news</li> <li>• travel.</li> </ul>
<b>Transaction options</b> may include:	<ul style="list-style-type: none"> <li>• currency</li> <li>• delivery address</li> <li>• freight</li> <li>• invoice address.</li> </ul>
<b>Boolean search</b> may include terms:	<ul style="list-style-type: none"> <li>• AND</li> <li>• OR</li> <li>• NOT</li> <li>• NAND</li> <li>• NOR</li> <li>• NE</li> <li>• GE</li> <li>• LE</li> <li>• GT</li> <li>• LT.</li> </ul>

## ICAICT104A Use digital devices

### Modification History

Version	Comments
ICAICT104A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use digital devices in a home or small office environment.

### Application of the Unit

This unit applies to workers who require the information technology (IT) literacy skills to use a digital device, such as a digital camera, video camera, or personal digital assistant (PDA) device to support their work in a home office or to work in a small office environment.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Prepare to use the digital device</p>	<p>1.1 Review instruction manual and ensure identified components are available</p> <p>1.2 Identify the <i>physical components</i> of the <i>digital device</i></p> <p>1.3 Boot up and follow <i>access procedures</i> to activate the digital device</p> <p>1.4 Alter the digital device <i>settings</i> to best suit intended use</p> <p>1.5 Configure <i>power-management settings</i> where appropriate to minimise power consumption as an environmentally sustainable measure</p>
<p>2. Set up and use the digital device</p>	<p>2.1 Identify and set the basic operating and menu settings</p> <p>2.2 Navigate and manipulate the screen environment</p> <p>2.3 Customise screen icons and access to applications where applicable</p> <p>2.4 Use the digital device, and save and edit output where applicable</p> <p>2.5 Identify more <i>advanced features</i> available and use as required</p>
<p>3. Access and use basic connectivity devices</p>	<p>3.1 Connect to external digital devices, such as <i>computer devices</i> or <i>storage devices</i>, to retrieve, copy, move and save information</p> <p>3.2 Check physical <i>connectivity</i> of computer devices or storage devices to ensure operation and performance</p> <p>3.3 Connect to a printer either through a computer device or directly and use <i>printer settings</i> and print data</p> <p>3.4 Access <i>audiovisual devices</i> to view and play a multimedia file</p>
<p>4. Shut down digital device</p>	<p>4.1 Save current work and back up important data</p> <p>4.2 Close open programs on the digital device and any computer device or storage device</p> <p>4.3 Shut down digital devices, according to manufacturer instructions</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - read and write basic workplace documents
  - seek assistance and expert advice
- literacy skills to interpret user manuals and help functions
- technical skills to:
  - access and use audiovisual devices
  - apply power-management settings
  - back up and save information
  - connect and use peripheral devices
  - input user access details for accessing a personal computer (PC), possibly a networked environment
  - manage mouse (button usage) for different applications
  - navigate a digital graphical user interface (GUI)
  - save and move files to various locations
  - use a keyboard.

### Required knowledge

- audiovisual devices
- basic security functions
- basic software operation and associated applications
- digital device functions
- digital device settings
- peripheral devices
- storage devices.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use a digital device</li> <li>• use menu features and navigate around a GUI interface</li> <li>• use device features to perform tasks</li> <li>• save results of work.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• digital device</li> <li>• computer device</li> <li>• storage device</li> <li>• printer</li> <li>• use of device-specific application currently used in industry</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of digital device operations</li> <li>• direct observation of candidate performing basic device-relevant practical skills</li> <li>• direct observation of candidate performing a sequence of routine tasks following clear directions.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Physical components</i></b> may include:	<ul style="list-style-type: none"> <li>• attachable keyboard</li> <li>• attachable monitor</li> <li>• batteries</li> <li>• casings</li> <li>• lens</li> <li>• memory card</li> <li>• mouse</li> <li>• stylus pen.</li> </ul>
<b><i>Digital device</i></b> may include:	<ul style="list-style-type: none"> <li>• audiovisual device</li> <li>• digital camera</li> <li>• external memory device</li> <li>• multi-card reader and writer</li> <li>• PDA and MP3 player</li> <li>• Smartphone</li> <li>• tablet</li> <li>• video camera.</li> </ul>
<b><i>Access procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• fingerscan</li> <li>• smartcard</li> <li>• user name and password.</li> </ul>
<b><i>Settings</i></b> may include:	<ul style="list-style-type: none"> <li>• automated versus manual settings</li> <li>• screen settings: <ul style="list-style-type: none"> <li>• brightness</li> <li>• colour</li> <li>• contrast</li> </ul> </li> <li>• shortcut keys or modes</li> <li>• standard versus configured settings.</li> </ul>
<b><i>Power-management settings</i></b> after a period of non-use may include:	<ul style="list-style-type: none"> <li>• automatic power off</li> <li>• hibernation settings</li> <li>• monitor power saver settings.</li> </ul>
<b><i>Advanced features</i></b> may include:	<ul style="list-style-type: none"> <li>• advanced operations</li> <li>• customising standard settings</li> <li>• integrating with other devices.</li> </ul>
<b><i>Computer devices</i></b> may	<ul style="list-style-type: none"> <li>• tablet</li> </ul>

include:	<ul style="list-style-type: none"> <li>• laptop</li> <li>• notebook</li> <li>• PDA</li> <li>• PC.</li> </ul>
<i>Storage devices</i> may include:	<ul style="list-style-type: none"> <li>• disks: <ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• blu-ray</li> </ul> </li> <li>• flash drives</li> <li>• server</li> <li>• solid-state hard drives</li> <li>• virtual devices.</li> </ul>
<i>Connectivity</i> may include:	<ul style="list-style-type: none"> <li>• audiovisual</li> <li>• cable, wireless, infra-red or Bluetooth</li> <li>• internal or via universal serial bus (USB) dongle</li> <li>• network or stand-alone computer</li> <li>• ports: <ul style="list-style-type: none"> <li>• Firewire</li> <li>• high definition multimedia interface (HDMI)</li> <li>• printer</li> <li>• USB.</li> </ul> </li> </ul>
<i>Printer settings</i> may include:	<ul style="list-style-type: none"> <li>• cartridge type</li> <li>• layout</li> <li>• number of copies</li> <li>• orientation</li> <li>• paper size</li> <li>• paper tray.</li> </ul>
<i>Audiovisual devices</i> may include:	<ul style="list-style-type: none"> <li>• data projector</li> <li>• external monitor</li> <li>• headset</li> <li>• microphone</li> <li>• speakers</li> <li>• webcam or digital camera.</li> </ul>

# ICAICT105A Operate spreadsheet applications

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIL Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate spreadsheet applications and perform basic operations, including creating and formatting spreadsheet data, incorporating charts and objects, and customising and printing spreadsheets.

## Application of the Unit

This unit applies to individuals who perform a range of routine tasks in the workplace using a fundamental knowledge of spreadsheets under direct supervision or with limited responsibility.

The use of spreadsheets for business and mathematical applications is widespread. In some cases, spreadsheets can operate as sophisticated computerised ledgers and enable the collation, manipulation and presentation of complex data.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Create spreadsheets	<p>1.1 Open spreadsheet application, create spreadsheet files and enter numbers, text and symbols into cells according to information requirements</p> <p>1.2 Enter <i>simple formulas and functions</i> using cell referencing where required</p> <p>1.3 Correct formulas when error messages occur</p> <p>1.4 Use a range of common tools during spreadsheet development</p> <p>1.5 Edit columns and rows within the spreadsheet</p> <p>1.6 Use the auto-fill function to increment data where required</p> <p>1.7 Save spreadsheet to directory or folder</p>
2. Customise basic settings	<p>2.1 Adjust page <i>layout</i> to meet user requirements or special needs</p> <p>2.2 Open and view different <i>toolbars</i></p> <p>2.3 Change <i>font settings</i> so that they are appropriate for the purpose of the document</p> <p>2.4 Change <i>alignment</i> options and line spacing according to spreadsheet <i>formatting features</i></p> <p>2.5 <i>Format</i> cell to display different styles as required</p> <p>2.6 Modify margin sizes to suit the purpose of the spreadsheets</p> <p>2.7 View multiple spreadsheets concurrently</p>
3. Format spreadsheet	<p>3.1 Use formatting features as required</p> <p>3.2 Copy selected formatting features from another cell in the spreadsheet or from another active spreadsheet</p> <p>3.3 Use <i>formatting tools</i> as required within the spreadsheet</p> <p>3.4 Align information in a selected cell as required</p> <p>3.5 Insert headers and footers using formatting features</p> <p>3.6 Save spreadsheet in another format</p> <p>3.7 Save and close spreadsheet to <i>storage device</i></p>
4. Incorporate object and chart in spreadsheet	<p>4.1 Import an object into an active spreadsheet</p> <p>4.2 Manipulate imported <i>object</i> by using formatting features</p> <p>4.3 Create a chart using selected data in the spreadsheet</p> <p>4.4 Display selected data in a different chart</p> <p>4.5 Modify chart using formatting features</p>

5. Print spreadsheet	5.1 Preview spreadsheet in print preview mode 5.2 Select basic printer options 5.3 Print spreadsheet or selected part of spreadsheet 5.4 Submit the spreadsheet to <i>appropriate person</i> for approval or feedback
----------------------	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- numeracy skills to enter simple formulas into spreadsheet
- problem-solving skills to address common operational problems when using spreadsheet applications
- technical skills to:
  - operate a personal computer (PC)
  - use a keyboard to enter text and numerical data.

### Required knowledge

- basic technical terminology related to reading help files and prompts
- formatting styles and their effect on formatting, readability and appearance of spreadsheets
- log-in procedures relating to accessing a PC
- purpose, use and function of spreadsheet application.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create spreadsheets</li> <li>• customise basic settings</li> <li>• format spreadsheets</li> <li>• create basic formulas</li> <li>• work with objects and charts in spreadsheets</li> <li>• save and print spreadsheets.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC and printer</li> <li>• use of spreadsheet software currently used in industry</li> <li>• documents detailing organisational style guide and policy</li> <li>• documents or information containing data suitable for creating spreadsheets</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of spreadsheet operations</li> <li>• direct observation of candidate creating and formatting spreadsheets</li> <li>• review of spreadsheets, including formatting, formulas, objects and images.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Simple formulas and functions</i></b> may include:	<ul style="list-style-type: none"> <li>• addition</li> <li>• division</li> <li>• multiplication</li> <li>• subtraction</li> <li>• application of the above to a series of cells.</li> </ul>
<b><i>Tools</i></b> may include:	<ul style="list-style-type: none"> <li>• help</li> <li>• search and replace</li> <li>• simple formatting tools</li> <li>• spell check</li> <li>• undo.</li> </ul>
<b><i>Edit</i></b> may relate to:	<ul style="list-style-type: none"> <li>• adding</li> <li>• copying</li> <li>• deleting</li> <li>• moving</li> <li>• pasting</li> <li>• selecting.</li> </ul>
<b><i>Data</i></b> may include:	<ul style="list-style-type: none"> <li>• symbols added to the document</li> <li>• text added to the document.</li> </ul>
<b><i>Layout</i></b> may include:	<ul style="list-style-type: none"> <li>• display modes</li> <li>• orientation</li> <li>• size.</li> </ul>
<b><i>Toolbars</i></b> may contain:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• menus</li> <li>• a combination of both.</li> </ul>
<b><i>Font settings</i></b> may include:	<ul style="list-style-type: none"> <li>• colour</li> <li>• size</li> <li>• type.</li> </ul>
<b><i>Alignment</i></b> may refer to:	<ul style="list-style-type: none"> <li>• centred</li> <li>• justified</li> <li>• left</li> <li>• right.</li> </ul>
<b><i>Formatting features</i></b> may include:	<ul style="list-style-type: none"> <li>• bold</li> <li>• hyphenation</li> </ul>

	<ul style="list-style-type: none"> <li>• italics</li> <li>• underline.</li> </ul>
<i>Format</i> may refer to:	<ul style="list-style-type: none"> <li>• saving the spreadsheet as another type of document: <ul style="list-style-type: none"> <li>• comma separated values or text</li> <li>• HTML</li> <li>• XML.</li> </ul> </li> </ul>
<i>Formatting tools</i> may include:	<ul style="list-style-type: none"> <li>• menu commands within the application: <ul style="list-style-type: none"> <li>• copy</li> <li>• cut</li> <li>• help</li> <li>• paste</li> <li>• search and replace</li> <li>• spell check</li> <li>• undo.</li> </ul> </li> </ul>
<i>Storage device</i> may include:	<ul style="list-style-type: none"> <li>• disks: <ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• blu-ray</li> </ul> </li> <li>• external hard drive, such as universal serial bus (USB) flash drive</li> <li>• internal hard drive</li> <li>• web storage area.</li> </ul>
<i>Object</i> may include:	<ul style="list-style-type: none"> <li>• items that can be inserted into the spreadsheet, such as: <ul style="list-style-type: none"> <li>• other documents</li> <li>• pictures</li> <li>• sound.</li> </ul> </li> </ul>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT106A Operate presentation packages

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIL Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate presentation applications and perform basic operations, including creating, formatting and adding effects to presentations.

### Application of the Unit

This unit applies to individuals employed in a range of work environments who create electronic presentations.

Presentations are an important form of communication and marketing used by organisations to convey information. They may be formal or informal.

An individual demonstrating this competency will be able to present a set range of data in a simple and direct format using a presentation package.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Create presentations	<p>1.1 Open a presentation package application and create a simple design for a presentation according to organisational requirements</p> <p>1.2 Open a blank presentation and add text and graphics</p> <p>1.3 Apply existing styles within a presentation</p> <p>1.4 Use presentation template and slides to create a presentation</p> <p>1.5 Use various <i>tools</i> to improve the look of the presentation</p> <p>1.6 Save presentation to directory</p>
2. Customise basic settings	<p>2.1 Adjust display to meet <i>user requirements</i></p> <p>2.2 Open and view different <i>toolbars</i> to view options</p> <p>2.3 Ensure <i>font settings</i> are appropriate for the purpose of the presentation</p> <p>2.4 View multiple slides at once</p>
3. Format presentations	<p>3.1 Use and incorporate organisational charts and bulleted lists, and modify as required</p> <p>3.2 Add <i>objects</i> and manipulate to meet presentation purposes</p> <p>3.3 Import objects and modify for presentation purposes</p> <p>3.4 Modify slide layout, including text and colours, to meet presentation requirements</p> <p>3.5 Use <i>formatting tools</i> as required within the presentation</p> <p>3.6 Duplicate slides within and across a presentation</p> <p>3.7 Reorder the sequence of slides and delete slides for presentation purposes</p> <p>3.8 Save presentation in another <i>format</i></p> <p>3.9 Save and close presentation to <i>storage device</i></p>
4. Add slide show effects	<p>4.1 Incorporate preset animation and multimedia effects into presentation as required to enhance the presentation</p> <p>4.2 Add slide transition effects to presentation to ensure smooth progression through the presentation</p> <p>4.3 Test presentation for overall effect</p> <p>4.4 Use onscreen navigation tools to start and stop slide show or move between different slides as required</p>
5. Print presentation and notes	<p>5.1 Select appropriate <i>print format</i> for presentation</p> <p>5.2 Select preferred slide orientation</p>

	5.3 Add notes and slide numbers 5.4 Preview slides and run spell check before presentation 5.5 Print the selected slides and submit presentation to <i>appropriate person</i> for feedback
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- problem-solving skills to address common operational problems when operating a presentation package
- technical skills to operate a personal computer (PC).

### Required knowledge

- basic technical terminology to read help files and prompts
- different types of:
  - formal and informal presentations
  - audience types
- effect of design features on readability and appearance of electronic presentations
- presentation pitfalls
- use of suitable presentation effects for different audiences.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• create, format and prepare presentations for distribution and display</li> <li>• customise basic settings</li> <li>• add slide show effects.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC and printer</li> <li>• use of presentation software currently used in industry</li> <li>• documents detailing organisational style guide and policy</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of presentation software functions</li> <li>• direct observation of candidate creating and formatting presentations</li> <li>• review of presentations, including formatting and slide show effects.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Tools</i></b> may include:	<ul style="list-style-type: none"> <li>• available templates</li> <li>• help</li> <li>• search and replace</li> <li>• simple formatting tools</li> <li>• spell check.</li> </ul>
<b><i>User requirements</i></b> may refer to:	<ul style="list-style-type: none"> <li>• appearance and type of: <ul style="list-style-type: none"> <li>• application</li> <li>• computer</li> <li>• desktop</li> <li>• document.</li> </ul> </li> </ul>
<b><i>Toolbars</i></b> can contain:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• menus</li> <li>• a combination of both.</li> </ul>
<b><i>Font settings</i></b> may include:	<ul style="list-style-type: none"> <li>• colour</li> <li>• size</li> <li>• type.</li> </ul>
<b><i>Objects</i></b> may include:	<ul style="list-style-type: none"> <li>• animations</li> <li>• other documents</li> <li>• pictures</li> <li>• sound</li> <li>• tables.</li> </ul>
<b><i>Formatting tools</i></b> may include:	<ul style="list-style-type: none"> <li>• menu commands within the application: <ul style="list-style-type: none"> <li>• copy</li> <li>• cut</li> <li>• help</li> <li>• paste</li> <li>• search and replace</li> <li>• spell check</li> <li>• undo.</li> </ul> </li> </ul>
<b><i>Format</i></b> may include:	<ul style="list-style-type: none"> <li>• saving the presentation as another type of document: <ul style="list-style-type: none"> <li>• comma separated values or text</li> <li>• HTML</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• XML.</li> </ul>
<i>Storage device</i> may include:	<ul style="list-style-type: none"> <li>• disks: <ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• blu-ray</li> </ul> </li> <li>• external hard drive, such as universal serial bus (USB) flash drive</li> <li>• internal hard drive</li> <li>• web storage.</li> </ul>
<i>Print format</i> may include:	<ul style="list-style-type: none"> <li>• colour or black and white</li> <li>• layout</li> <li>• thumbnails</li> <li>• number of copies</li> <li>• quality.</li> </ul>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT107A Use personal productivity tools

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIL Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use the features and components of a personal productivity tool, including personal digital assistants (PDAs) or computerised personal organisers.

### Application of the Unit

This unit applies to individuals who perform a range of routine tasks in the workplace. They use fundamental knowledge and skills to perform tasks using personal productivity tools under direct supervision or with limited responsibility.

Personal productivity tools facilitate communication and personal time management. Email applications, calendars and appointment books are examples of personal productivity tools that facilitate time management.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Use calendar features	<p>1.1 Navigate within the calendar of the <i>personal productivity tool</i> and schedule <i>events and appointments</i></p> <p>1.2 Set a reminder and if necessary customise the reminder</p> <p>1.3 Customise the calendar <i>views</i> and, where necessary, menus and <i>toolbars</i>, and work within different views</p> <p>1.4 Delete events and appointments</p> <p>1.5 Customise the calendar's <i>print options</i> and print the calendar according to format requirements</p>
2. Use contact management	<p>2.1 Create, edit and delete contacts as required, recording information in the appropriate fields</p> <p>2.2 Use <i>contact information</i> for email purposes according to organisational policies related to privacy</p> <p>2.3 Group contacts into categories that are consistent and meaningful</p>
3. Use additional features	<p>3.1 Link activities and contacts when required</p> <p>3.2 Use expense sheets, search facilities, notes and email when appropriate</p> <p>3.3 Integrate the above features with other applications or the calendar and contacts list</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- basic data entry skills to enter data into personal productivity tool
- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and interpret basic workplace documents
- problem-solving skills to address common operational problems when using personal productivity tool.

### Required knowledge

- organisational guidelines regarding:
  - email use
  - internet connection and usage policy
  - web etiquette
- calendar and scheduling tools.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use the calendar of the personal productivity tool to schedule events and appointments</li> <li>• create, edit and delete contacts</li> <li>• use the additional features of a particular personal productivity tool.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PDA</li> <li>• use of organising software currently used in industry</li> <li>• organisational policies on internet usage</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of organisational guidelines on internet and email use and web etiquette</li> <li>• direct observation of candidate scheduling events and appointments using personal productivity tool</li> <li>• review of calendar prepared by candidate according to format requirements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Personal productivity tool</i></b> may include:	<ul style="list-style-type: none"> <li>• applicable personal productivity software applications</li> <li>• hardware: <ul style="list-style-type: none"> <li>• hand-held personal computers (PCs) with various operating systems</li> <li>• high-end mobile phones</li> <li>• PDAs.</li> </ul> </li> </ul>
<b><i>Events and appointments</i></b> may include:	<ul style="list-style-type: none"> <li>• jobs</li> <li>• meetings</li> <li>• visits.</li> </ul>
<b><i>Views</i></b> may include for a calendar:	<ul style="list-style-type: none"> <li>• day to a page</li> <li>• week to a page</li> <li>• month to a page</li> <li>• year to a page.</li> </ul>
<b><i>Toolbars</i></b> may contain:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• menus</li> <li>• a combination of both.</li> </ul>
<b><i>Print options</i></b> may include:	<ul style="list-style-type: none"> <li>• layout</li> <li>• number of copies</li> <li>• orientation</li> <li>• paper size.</li> </ul>
<b><i>Contact information</i></b> may include:	<ul style="list-style-type: none"> <li>• address</li> <li>• email</li> <li>• name</li> <li>• nickname</li> <li>• phone number.</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT108A Use digital literacy skills to access the internet

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to safely and securely use the internet to undertake basic interactive communication.

It involves a working knowledge of current industry standard technologies and the ability to apply these technologies to a number of digital literacy situations.

### Application of the Unit

This unit applies to individuals who locate, organise, understand, evaluate and analyse information using digital technology in the areas of entertainment, communication, internet searching, online participation, networking and commercial transactions.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Operate hardware at a basic level	<p>1.1. Identify <i>hardware components</i> required to connect to the internet</p> <p>1.2 Set up and check physical <i>connectivity of devices</i></p> <p>1.3 Use hardware components in an <i>OHS compliant</i> way</p>
2. Ensure safe and secure online access	<p>2.1 Connect and access <i>relevant internet sites</i></p> <p>2.2 Provide an appropriate level of personal information to maintain privacy and security</p> <p>2.3 Comply with <i>copyright and intellectual property</i> legislation</p> <p>2.4 Ensure an understanding of <i>socially responsible behaviour</i></p> <p>2.5 Assess the legitimacy of online requests to make an informed decision</p> <p>2.6 Interpret and respond to security notifications that display due to <i>browser software security</i> settings or internet use</p> <p>2.7 Assess email status and determine <i>email security</i></p> <p>2.8 Provide appropriate information to manage <i>digital footprint</i></p> <p>2.9 Assess the security of payments</p> <p>2.10 Back up data as required through downloading to an <i>external backup device</i></p>
3. Research and analyse online information	<p>3.1 Identify and use search engines to access <i>relevant internet sites</i></p> <p>3.2 Search and find relevant information or content</p> <p>3.3 Refine search to increase relevance of information or content</p> <p>3.4 Navigate a website to access the information or content required</p> <p>3.5 Assess payment requirements to make sound financial decisions</p> <p>3.6 Analyse the usefulness and accuracy of located information</p>
4. Make transactions and participate online	<p>4.1 Create, register, manage and secure an account</p> <p>4.2 Observe appropriate user protocol online</p> <p>4.3 Make <i>secure transactions and identify methods of internet fraud</i></p> <p>4.4 Identify and invite relevant friends, groups and pages to own website</p>
5. Use applications and	5.1 Use <i>basic application</i> skills

manipulate files	5.2 Incorporate attachments to documents 5.3 Back up files to <i>external storage devices</i> 5.4 Upload relevant components to a website 5.5 Download pictures and videos to an external device
------------------	---

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
  - undertake online transactions
- keyboarding skills to enter text into web browsers and email applications
- literacy skills to:
  - compose email messages
  - read and interpret basic online content
  - read and write at a basic level
- problem-solving skills to address common operational problems when using web browsers
- research skills to locate varied sources of information online
- technical skills to:
  - operate a digital device
  - use email applications
  - use internet search functions
  - use peripheral hardware.

### Required knowledge

- types and basic components of hardware and storage devices
- types of online entertainment
- types of online communication
- basic research and analysis theory
- basic copyright legislation
- digital footprint and basic security, safety and legal issues
- OHS, including basic ergonomics of keyboard and computer use
- types of online participation
- types of online transactions
- device interface
- desk top icons
- basic principles of web browser search engines
- internet
- features of basic applications.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• connect to and access the internet</li> <li>• send and receive emails</li> <li>• secure internet access and email communications</li> <li>• use search tools to locate information or content</li> <li>• research and select appropriate websites</li> <li>• undertake online interactions</li> <li>• make an informed assessment of the accuracy, currency, authority and reliability of the site and information located.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• hardware with internet access</li> <li>• search engines currently used in industry.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• oral or written questioning to assess candidate's knowledge of internet access requirements, email features and security or safety issues</li> <li>• direct observation of candidate accessing the internet, using email, and searching and interacting with consumer sites using correct netiquette</li> <li>• direct observation of candidate undertaking online interactions</li> <li>• review of search results prepared by candidate, including assessment of the accuracy, currency and reliability of the site and information located.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Hardware components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Bluetooth device</li> <li>• fax and modem</li> <li>• keyboard</li> <li>• laptop</li> <li>• mobile phone</li> <li>• monitor</li> <li>• mouse</li> <li>• multimedia kit</li> <li>• personal computer</li> <li>• personal digital assistant (PDA), such as palmtop</li> <li>• printer</li> <li>• scanner</li> <li>• speaker</li> <li>• tape cartridge</li> <li>• universal serial bus (USB) device</li> <li>• wi-fi router.</li> </ul>
<p><b><i>Connectivity of devices</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Bluetooth device</li> <li>• hard drive</li> <li>• keyboard</li> <li>• laptop</li> <li>• mobile phone</li> <li>• modem</li> <li>• mouse</li> <li>• multimedia kit</li> <li>• pen</li> <li>• PDA, such as palmtop</li> <li>• printer</li> <li>• scanner</li> <li>• speaker</li> <li>• tape cartridge</li> <li>• touch pad</li> <li>• USB device</li> <li>• wireless fidelity (wi-fi) router</li> <li>• headphone and microphone</li> </ul>

<p><b><i>OHS compliant</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• web camera.</li> <li>• electrical safety</li> <li>• ergonomics in the workplace: <ul style="list-style-type: none"> <li>• correct posture</li> <li>• style and adjustment of chair</li> <li>• type of desk</li> <li>• type of monitor</li> <li>• working position</li> <li>• length of time in front of computer</li> <li>• lighting level</li> <li>• placement of light fittings</li> <li>• repetitive strain injury (RSI) prevention</li> <li>• safe lifting methods</li> <li>• ventilation</li> </ul> </li> <li>• social problems associated with internet and computing addictions.</li> </ul>
<p><b><i>Relevant internet sites</i></b> may be used for:</p>	<ul style="list-style-type: none"> <li>• entertainment: <ul style="list-style-type: none"> <li>• internet TV</li> <li>• games</li> <li>• videos and podcasts</li> <li>• music</li> </ul> </li> <li>• communication: <ul style="list-style-type: none"> <li>• email</li> <li>• Skype</li> <li>• instant messaging</li> </ul> </li> <li>• finding using and storing information: <ul style="list-style-type: none"> <li>• searching to enhance personal knowledge and interest and to make informed decisions</li> <li>• participating online</li> <li>• online consultation, forum and discussion</li> <li>• posting photos and videos</li> <li>• applying for jobs</li> </ul> </li> <li>• networking and collaboration: <ul style="list-style-type: none"> <li>• social networking</li> <li>• online dating</li> <li>• transactions</li> </ul> </li> <li>• banking</li> <li>• government services, including registrations</li> <li>• buying and selling: <ul style="list-style-type: none"> <li>• travel</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• paying bills</li> <li>• trading shares.</li> </ul>
<b>Copyright and intellectual property</b> may relate to:	<ul style="list-style-type: none"> <li>• copyright infringement legislation</li> <li>• electronic resources usage policies</li> <li>• ethical use of digital technologies</li> <li>• ethical decision making when facing inappropriate acts of technology use.</li> </ul>
<b>Socially responsible behaviour</b> may relate to:	<ul style="list-style-type: none"> <li>• not using obscene, profane, lewd, vulgar, rude, inflammatory or threatening language</li> <li>• not publishing information that, if acted upon, could cause damage to property or persons, nor publish deliberately false or defamatory information about a person or organisation</li> <li>• not engaging in personal attacks, including prejudicial or discriminatory attacks</li> <li>• not harassing, distressing or annoying another person</li> <li>• not accessing material that is profane, obscene or pornographic, that promotes illegal acts, or that advocates violence or discrimination</li> <li>• not sending inappropriate emails</li> <li>• taking responsibility for protecting personal information and not revealing personal information, including names, addresses, photographs, credit card details and telephone numbers.</li> </ul>
<b>Browser software security</b> may include:	<ul style="list-style-type: none"> <li>• application enabling</li> <li>• cookie handling</li> <li>• pop-up blocking</li> <li>• privacy levels</li> <li>• security zones</li> <li>• trusted sites.</li> </ul>
<b>Email security</b> may relate to:	<ul style="list-style-type: none"> <li>• taking steps to restrict: <ul style="list-style-type: none"> <li>• malware</li> <li>• phishing</li> <li>• spam</li> <li>• scams.</li> </ul> </li> </ul>
<b>Digital footprint</b> may include:	<ul style="list-style-type: none"> <li>• tracking of internet usage, such as: <ul style="list-style-type: none"> <li>• system login and logouts</li> <li>• visits to a web page</li> <li>• accessed or created files</li> <li>• email messages</li> <li>• chat messages.</li> </ul> </li> </ul>
<b>External backup</b>	<ul style="list-style-type: none"> <li>• DVDs</li> </ul>

<i>devices</i> may include:	<ul style="list-style-type: none"> <li>• memory cards</li> <li>• memory sticks</li> <li>• USB drives</li> <li>• hard drives.</li> </ul>
<i>Secure transactions</i> may include:	<ul style="list-style-type: none"> <li>• web browser - secure socket layer (SSL)</li> <li>• security verified sites</li> <li>• digital certificates - VeriSign</li> <li>• online payment services - PayPal</li> <li>• stored-value cards</li> <li>• smart cards</li> <li>• point-of-sale devices</li> <li>• digital cash</li> <li>• e-wallets.</li> </ul>
<i>Methods of internet fraud</i> may include:	<ul style="list-style-type: none"> <li>• invalid internet sites</li> <li>• credit card fraud</li> <li>• identification theft</li> <li>• impulse buying strategies.</li> </ul>
<i>Basic applications</i> may include:	<ul style="list-style-type: none"> <li>• databases</li> <li>• email</li> <li>• internet browsers</li> <li>• spreadsheets</li> <li>• system browsers</li> <li>• word processing.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT201A Use computer operating systems and hardware

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIL Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to select, configure and use computer operating systems and basic computer hardware.

### Application of the Unit

This unit applies to workers who require the information and communications technology (ICT) skills to select and install operating system software on to a specific hardware configuration. This includes configuring the operating system to work with a variety of hardware peripherals and types of ICT equipment.

The ability to communicate effectively, simplify and solve technical incompatibility conflicts and problems are key components of this ICT support role.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify operating system and hardware components	<p>1.1 Determine ICT <i>organisational requirements</i> and specifications</p> <p>1.2 Identify and select <i>operating system</i></p> <p>1.3 Identify appropriate <i>external hardware components</i></p> <p>1.4 Identify <i>internal hardware components</i></p>
2. Install and configure operating system and application software with hardware components	<p>2.1 Install and configure operating system to meet organisational requirements</p> <p>2.2 Identify the functions associated with the operating system and associated boot process</p> <p>2.3 Configure <i>power-management settings</i> to minimise power consumption as an environmentally sustainable measure</p> <p>2.4 Use both the graphical user interface and the command line interface to perform basic tasks</p> <p>2.5 Install or upgrade <i>application software</i> onto the operating system and hardware configuration</p> <p>2.6 Determine the relationship between an application program, the operating system and hardware</p> <p>2.7 Identify general differences between the different <i>computer platforms</i> and their respective operating systems</p>
3. Optimise operating system and hardware components	<p>3.1 Optimise operating system using included tools or <i>third-party utilities</i></p> <p>3.2 Customise the graphical user interface</p> <p>3.3 Use techniques unique to the command line interface</p> <p>3.4 Set up and configure external hardware components and check functionality</p> <p>3.5 Install drivers as appropriate and check functionality</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- problem-solving skills to address common operational problems when using computer operating systems and operating computer hardware
- technical skills to:
  - apply user changes for a multi-user operating system
  - configure, use and optimise operating system
  - create users for a multi-user system
  - install and support peripheral devices
  - operate a personal computer (PC)
  - set passwords for different users
  - use PC peripheral hardware.

### Required knowledge

- basic knowledge of current industry-accepted operating system, hardware and software products
- compatibility of an operating system, in respect to other versions
- function of single-user and multi-user operating systems
- interoperability between operating systems
- OHS principles and responsibilities, including ergonomic principles to avoid injury associated with using computer systems.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use an operating system in a variety of scenarios and across functions, including:             <ul style="list-style-type: none"> <li>• scheduling, loading, initiating, and supervising the execution of programs</li> <li>• allocating storage</li> <li>• initiating and controlling input and output operations</li> <li>• handling errors</li> </ul> </li> <li>• identify and install suitable hardware components</li> <li>• install and upgrade application software.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC</li> <li>• use of hardware components</li> <li>• OHS standards and organisational policy and procedures</li> <li>• use of operating system currently used in industry</li> <li>• software configuration guides</li> <li>• documents detailing operating system control panel and configuration data</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of concepts and procedures related to configuring operating systems and application software to different hardware platforms</li> <li>• direct observation of candidate:             <ul style="list-style-type: none"> <li>• setting up, configuring and optimising operating system,</li> <li>• setting up input and output devices and checking functionality</li> <li>• setting up and configuring hardware components.</li> </ul> </li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Organisational requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• maintenance procedures</li> <li>• OHS procedures</li> <li>• security procedures.</li> </ul>
<p><b><i>External hardware components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Bluetooth device</li> <li>• fax</li> <li>• modem</li> <li>• keyboard</li> <li>• laptop</li> <li>• mobile phone</li> <li>• monitor</li> <li>• mouse</li> <li>• multimedia kit</li> <li>• PC</li> <li>• personal digital assistant (PDA), such as palmtop</li> <li>• printer</li> <li>• scanner</li> <li>• speaker</li> <li>• tape cartridge</li> <li>• universal serial bus (USB) device</li> <li>• wi-fi router.</li> </ul>
<p><b><i>Internal hardware components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• cabling</li> <li>• central processing unit (CPU)</li> <li>• memory chip</li> <li>• motherboard</li> <li>• network interface card</li> <li>• sound card</li> <li>• video display card.</li> </ul>
<p><b><i>Power-management settings</i></b> after a period of non-use may include:</p>	<ul style="list-style-type: none"> <li>• automatic power off</li> <li>• hibernation settings</li> <li>• monitor power-saver settings.</li> </ul>
<p><b><i>Application software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• databases</li> <li>• email</li> <li>• internet browsers</li> </ul>

	<ul style="list-style-type: none"><li>• spreadsheets</li><li>• system browsers</li><li>• word processing.</li></ul>
<i>Computer platforms</i> may include:	<ul style="list-style-type: none"><li>• Macintosh</li><li>• PC</li><li>• operating systems used on each.</li></ul>
<i>Third-party utilities</i> may include:	<ul style="list-style-type: none"><li>• backing up data</li><li>• diagnostic tools</li><li>• disk scanning</li><li>• partitioning and defragmenting</li><li>• recovery.</li></ul>

## Unit Sector(s)

General ICT

# ICAICT202A Work and communicate effectively in an IT environment

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to work and communicate effectively within organisational policies and governance arrangements using information technology (IT) systems, equipment and software.

## Application of the Unit

This unit applies to individuals undertaking an information and communications technology (ICT) user-support role in a small office environment.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare to communicate and work effectively within an IT organisation	<p>1.1 Gather input from <b><i>sources of information</i></b> to develop, refine and document the ICT roles and services in an organisation</p> <p>1.2 Develop clear knowledge of <b><i>enterprise policies, procedures and organisational requirements</i></b></p> <p>1.3 Document IT policy and procedures and determine whether they are applied in practice</p> <p>1.4 Determine <b><i>key players</i></b> within the organisation and their role and importance</p>
2. Use positive and varied communication strategies with ICT clients	<p>2.1 Receive requests and enquiries regarding the use of ICT <b><i>equipment, operating systems and software</i></b> from clients and colleagues in a polite and appropriate manner</p> <p>2.2 <b><i>Respond appropriately</i></b> to <b><i>client</i></b> and colleague requirements and identify options</p> <p>2.3 Present <b><i>written information</i></b> and ideas in clear and concise language to ensure the intended meaning is understood</p> <p>2.4 Record information or messages and refer client requests to the <b><i>appropriate person</i></b> according to organisational procedures</p> <p>2.5 Inform client of the progress of their request or enquiry and advise them of the organisational process for answering their request or enquiry</p> <p>2.6 Escalate inquiries that cannot be satisfied immediately</p> <p>2.7 Supply follow-up information to client as required in a timely manner</p> <p>2.8 Accommodate <b><i>cultural differences</i></b> in the workplace</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - clarify the needs of customers
  - deliver required level and quality of customer service
  - relate to people from diverse backgrounds and people with diverse abilities
  - request advice, receive feedback and work with a team
- literacy skills to interpret:
  - relevant organisational policies and governance documentation
  - technical information, such as maintenance requirements for equipment
- planning and organisational skills to plan work priorities and arrangements
- technical skills to:
  - match equipment service requirements with maintenance processes
  - use IT equipment, operating systems and software.

### Required knowledge

- current industry-accepted hardware and software:
  - products, with broad knowledge of features and capabilities
  - product directions
- operational environment:
  - customer base
  - company products
  - services
- organisational policies and procedures that cover:
  - code of conduct
  - mission statement
  - routine work processes
  - systems, management structure and governance arrangements
- principles of EEO and anti-discrimination
- role and positioning of IT within the overall business objectives of the organisation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• process internal and external requests according to organisational policies and requirements</li> <li>• respond promptly to client enquiries and requests from colleagues.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• a workstation</li> <li>• a range of IT equipment, operating systems, software and technical information</li> <li>• organisational policies, procedures and governance documents</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate responding to clients' requests and enquiries relating to the organisation's IT systems, equipment and software</li> <li>• review of candidate's collection of documented written messages and records</li> <li>• verbal or written questioning to assess candidate's knowledge of organisational key roles, and technical capability and requirements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

Sources of information may include:	<ul style="list-style-type: none"> <li>• brochures and pamphlets</li> <li>• campaign briefs</li> <li>• internet and intranet</li> <li>• instruction or product manuals</li> <li>• supervisors and other staff.</li> </ul>
Enterprise policies and procedures may include:	<ul style="list-style-type: none"> <li>• financial and decision-making delegations</li> <li>• referral and escalation paths</li> <li>• scope of the services to be provided.</li> </ul>
Organisational requirements may include:	<ul style="list-style-type: none"> <li>• access and equity principles and practice</li> <li>• business and performance plans</li> <li>• defined resource parameters</li> <li>• ethical standards</li> <li>• goals, objectives, plans, systems and processes</li> <li>• legal and organisational policies, guidelines and requirements</li> <li>• OHS policies, procedures and programs</li> <li>• quality and continuous improvement processes and standards</li> <li>• quality assurance and procedures manual.</li> </ul>
Key players may include:	<ul style="list-style-type: none"> <li>• employer organisations</li> <li>• industry publications and government departments involved in IT industry promotion</li> <li>• IT organisations</li> <li>• IT professional bodies</li> <li>• relevant unions</li> <li>• vendors of IT products and services.</li> </ul>
Equipment may include:	<ul style="list-style-type: none"> <li>• hard drives</li> <li>• hubs</li> <li>• modems and other connectivity devices, such as digital subscriber line (DSL) modems</li> <li>• monitors</li> <li>• personal computers (PCs)</li> <li>• personal digital assistants (PDAs)</li> <li>• printers</li> <li>• switches</li> <li>• workstations</li> </ul>

	<ul style="list-style-type: none"> <li>• other peripheral devices.</li> </ul>
Operating systems may include:	<ul style="list-style-type: none"> <li>• GNU and Linux</li> <li>• Mac OS X</li> <li>• Microsoft Windows</li> <li>• Unix-like operating systems: <ul style="list-style-type: none"> <li>• HP-UX</li> <li>• IBM AIX</li> <li>• Silicon Graphics IRIX</li> <li>• Sun Solaris.</li> </ul> </li> </ul>
Software may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• organisation-specific software.</li> </ul>
Respond appropriately may relate to:	<ul style="list-style-type: none"> <li>• answering enquiries promptly and appropriately</li> <li>• discussing, agreeing and recording supply arrangements with client</li> <li>• recording details in enterprise system</li> <li>• using appropriate questioning and active listening techniques to understand client needs and determine support requirements</li> <li>• using clear, simple and easy to understand language</li> <li>• ensuring responses are comprehensive.</li> </ul>
Client may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• work colleagues.</li> </ul>
Written information may include:	<ul style="list-style-type: none"> <li>• briefing notes</li> <li>• electronic mail</li> <li>• fax</li> <li>• general correspondence</li> <li>• handwritten and printed materials</li> <li>• internal memos</li> <li>• telephone messages.</li> </ul>
Appropriate person may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
Cultural differences may relate to:	<ul style="list-style-type: none"> <li>• content of emails and business documents</li> <li>• customer service</li> <li>• design of templates</li> <li>• policies relating to safety standards</li> <li>• quality</li> <li>• security</li> <li>• the way people interact with each other.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT203A Operate application software packages

### Modification History

Version	Comments
ICAICT203A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify, select and operate three commercial software packages, including a word-processing and a spreadsheet application package.

The unit identifies the requirement to use a word-processing, spreadsheet and third software application package to ensure that the individual develops the skills required to cover a range of basic office software requirements.

### Application of the Unit

This unit applies to information and communications technology (ICT) personnel who need to use several different software applications to produce diverse documents within a small to large office environment.

The ability to use and present a variety of key software application packages is a key component of any ICT business or office environment.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Use appropriate OHS office work practices	<p>1.1 Use safe work practices to ensure <i>ergonomic, work organisation, energy and resource conservation requirements</i> are addressed</p> <p>1.2 Use wrist rests and document holders where appropriate</p> <p>1.3 Use monitor anti-glare and radiation reduction screens where appropriate</p>
2. Use appropriate word-processing software	<p>2.1 Select <i>word-processing software</i> appropriate to perform activity</p> <p>2.2 Identify <i>document</i> purpose, audience and presentation requirements, and clarify with personnel as required</p> <p>2.3 Identify <i>organisational requirements</i> for text-based business documents and design <i>document structure and layout</i> to ensure consistency of style and image</p> <p>2.4 Match document requirements with software functions to provide efficient production of documents</p> <p>2.5 Use <i>technical functions, other data and formatting</i> to finalise documents</p> <p>2.6 Ensure the <i>naming and storing of documents</i> in appropriate directories or folders and the <i>printing</i> of documents to the required specifications</p>
3. Use appropriate spreadsheet software	<p>3.1 Select <i>spreadsheet software</i> appropriate to perform activity</p> <p>3.2 Identify document purpose, audience and presentation requirements, and clarify with personnel as required</p> <p>3.3 Enter <i>simple formulas and functions</i> using cell referencing where required</p> <p>3.4 Customise <i>spreadsheet settings</i> to meet requirements</p> <p>3.5 Ensure the naming and storing of documents in appropriate directories or folders and the printing of documents to the required specifications</p>
4. Use a third application software package	<p>4.1 Select <i>software application package</i> appropriate to perform activity</p> <p>4.2 Identify purpose, audience and presentation requirements, and clarify with personnel as required</p> <p>4.3 Use <i>technical functions, other data and formatting</i> to finalise documents</p>

	4.4 Ensure documents are named and stored in appropriate directories or folders and printed to required specifications
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- numeracy skills to enter simple formulas into spreadsheet
- problem-solving skills to manage applications and use help functions
- technical skills to:
  - operate a personal computer (PC) and printer
  - operate a keyboard to enter text and numerical data
  - use application software packages.

### Required knowledge

- application software packages used by the organisation
- basic technical terminology related to reading help files and responding to system help prompts
- basic knowledge of system usage
- current business practices related to using software to prepare reports
- features and functions of commercial computing packages
- import and export software functions
- linking documents
- OHS principles and responsibilities for ergonomics, such as work periods and breaks
- purpose, use and functions of applications
- use of input and output devices.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• produce workplace documents using a minimum of three different software application packages</li> <li>• open, amend and save files and documents according to organisational requirements</li> <li>• use OHS principles and responsibilities for ergonomics, such as work periods and breaks</li> <li>• use help manuals and online help.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC and printer</li> <li>• use of software currently used in industry</li> <li>• documents detailing organisational style guide and policy</li> <li>• documents or information containing data suitable for developing software application documents</li> <li>• appropriate learning and assessment when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of OHS, application usage for specific tasks, and use of different application functions</li> <li>• direct observation of candidate using a minimum of three different software applications</li> <li>• review of workplace documents prepared by candidate demonstrating a wide range of features from different software application packages.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Ergonomic, work organisation, energy and resource conservation requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• avoiding radiation from computer screens</li> <li>• chair height, seat and back adjustment</li> <li>• document holder</li> <li>• equipment that is reasonably adjusted to meet personal needs, in appropriate circumstances</li> <li>• exercise breaks</li> <li>• footrest</li> <li>• keyboard and mouse position</li> <li>• lighting</li> <li>• mix of repetitive and other activities</li> <li>• noise minimisation</li> <li>• posture</li> <li>• rest periods</li> <li>• screen position</li> <li>• workstation height and layout.</li> </ul>
<p><b><i>Word-processing software</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Apple iWork</li> <li>• Microsoft Word</li> <li>• Open Office.</li> </ul>
<p><b><i>Document</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• captions</li> <li>• different odd and even pages</li> <li>• document protection</li> <li>• drawing</li> <li>• hyperlinks</li> <li>• linked and embedded objects</li> <li>• mail-merge data documents</li> <li>• master documents</li> <li>• MS WordArt</li> <li>• templates.</li> </ul>
<p><b><i>Organisational requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• company colour scheme</li> <li>• company logo</li> <li>• consistent corporate image</li> <li>• content restrictions</li> <li>• established guidelines and procedures for document production</li> </ul>

	<ul style="list-style-type: none"> <li>• house styles</li> <li>• observing copyright legislation</li> <li>• organisation name, time, date, document title and filename in header or footer</li> <li>• templates.</li> </ul>
<p><b><i>Document structure and layout</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• annotated references</li> <li>• borders</li> <li>• boxes</li> <li>• bullet or number lists</li> <li>• captions</li> <li>• colour</li> <li>• columns</li> <li>• consistency with other business documents</li> <li>• cropping</li> <li>• drawing</li> <li>• footnotes</li> <li>• endnotes</li> <li>• graphics</li> <li>• headings</li> <li>• indentations</li> <li>• layout</li> <li>• page numbers</li> <li>• position related to other text</li> <li>• size</li> <li>• spacings</li> <li>• typeface styles and point size.</li> </ul>
<p><b><i>Technical functions, other data and formatting</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• alignment</li> <li>• clip art</li> <li>• comments</li> <li>• data from other software applications</li> <li>• digital photographs</li> <li>• digital signatures</li> <li>• display features</li> <li>• embedding</li> <li>• exporting</li> <li>• fields</li> <li>• fills or shading</li> <li>• formulas</li> <li>• graphics</li> <li>• importing</li> <li>• lines and borders</li> <li>• linking</li> </ul>

	<ul style="list-style-type: none"> <li>• merge cells</li> <li>• page and section breaks</li> <li>• permissions</li> <li>• reviewing</li> <li>• sharing</li> <li>• sort criteria</li> <li>• sorting contents</li> <li>• split cell</li> <li>• table of contents</li> <li>• templates</li> <li>• text direction</li> <li>• versioning.</li> </ul>
<i>Naming and storing documents</i> may include:	<ul style="list-style-type: none"> <li>• authorised access</li> <li>• filenames according to organisational procedure</li> <li>• filenames that are easily identifiable related to the content</li> <li>• file or directory names which identify the operator, author, section and date</li> <li>• filing locations</li> <li>• organisational policy for backing up files and filing hard copies of documents</li> <li>• security</li> <li>• storage in folders and sub-folders</li> <li>• storage on: <ul style="list-style-type: none"> <li>• hard disk drives</li> <li>• CD-ROM</li> <li>• tape backup.</li> </ul> </li> </ul>
<i>Printing</i> may include:	<ul style="list-style-type: none"> <li>• comments</li> <li>• drawing objects</li> <li>• field codes</li> <li>• hidden text</li> <li>• print merge</li> <li>• print to file</li> <li>• to fit a specific number of pages.</li> </ul>
<i>Spreadsheet software</i> may include:	<ul style="list-style-type: none"> <li>• Apple iWorks, such as Numbers</li> <li>• Gnumeric</li> <li>• Microsoft Excel</li> <li>• Open Office.</li> </ul>
<i>Simple formulas and functions</i> may include:	<ul style="list-style-type: none"> <li>• addition</li> <li>• conditional logic</li> <li>• conditional summation</li> </ul>

	<ul style="list-style-type: none"> <li>• division</li> <li>• lookup</li> <li>• multiplication</li> <li>• subtraction</li> <li>• summation</li> <li>• application of the above to a series of cells.</li> </ul>
<i>Spreadsheet settings</i> may include:	<ul style="list-style-type: none"> <li>• cell alignment</li> <li>• charts</li> <li>• font settings</li> <li>• formatting tools</li> <li>• graphics</li> <li>• objects</li> <li>• page layout</li> <li>• print</li> <li>• share</li> <li>• simple formulas and functions</li> <li>• sort</li> <li>• toolbars</li> <li>• views</li> <li>• worksheets.</li> </ul>
<i>Software application package</i> may include:	<ul style="list-style-type: none"> <li>• database</li> <li>• email</li> <li>• graphics</li> <li>• spreadsheet</li> <li>• word processing.</li> </ul>
<i>Technical functions</i> may include:	<ul style="list-style-type: none"> <li>• animations</li> <li>• arranging slides</li> <li>• charts</li> <li>• customising masters</li> <li>• illustrations</li> <li>• linking content</li> <li>• sharing</li> <li>• SmartArt</li> <li>• tables.</li> </ul>

## ICAICT204A Operate a digital media technology package

### Modification History

Version	Comments
ICAICT204A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify, select and use a digital media package and supporting technologies.

### Application of the Unit

This unit applies to information and communications technology people who need to use a digital media package to produce a variety of media rich documents within a small to large office environment.

The ability to incorporate and use digital media for a variety of business presentation purposes is a key component of any business or office environment.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Use appropriate OHS office work practices</p>	<p>1.1 Use safe work practices to ensure <i>ergonomic, work organisation, energy and resource conservation requirements</i> are addressed</p> <p>1.2 Use wrist rests and document holders where appropriate</p> <p>1.3 Use monitor anti-glare and radiation reduction screens where appropriate</p>
<p>2. Identify and select appropriate digital media package</p>	<p>2.1 Identify the basic requirements of a <i>design brief</i>, including user environment</p> <p>2.2 Research and review suitable available <i>digital media packages</i></p> <p>2.3 Select an appropriate digital media package to meet design brief requirements</p>
<p>3. Use digital media package</p>	<p>3.1 Procure or create suitable <i>data</i> to meet requirements of the brief</p> <p>3.2 Manipulate data using digital media package tools</p> <p>3.3 Ensure <i>naming and storing of documents</i> in appropriate <i>file format</i> in directories or folders</p>
<p>4. Review digital media design</p>	<p>4.1 Evaluate design for creative, dramatic and technical quality, file size, and suitability to meet the brief</p> <p>4.2 Test and run any incorporated graphics, video or sound as part of a digital media presentation and present designs in the appropriate format</p> <p>4.3 Review final product against design brief</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic design briefs
- numeracy skills to apply graphical measurements
- problem-solving skills to manage applications and use help functions
- research skills to review and select appropriate digital media packages and technologies
- technical skills to:
  - operate a PC and printer
  - manipulate digital photographs, images, videos and sound
  - use digital media packages
  - use digital media technologies
  - use a keyboard to enter text, data and graphics.

### Required knowledge

- basic principles of visual design
- functions and features of digital media packages and technologies
- graphic design and stylistic language conventions
- OHS principles and responsibilities for ergonomics, such as work periods and breaks
- principles of digital imaging and file formats, video and sound file formats, file management and transfer systems
- vendor product directions in digital media hardware and software
- visualisation and interpreting creative information, scripts (text) and images.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify basic requirements of a design brief</li> <li>• use digital media package to meet organisational requirements</li> <li>• use OHS principles and responsibilities for ergonomics, such as work periods and breaks</li> <li>• use help manuals and online help when appropriate</li> <li>• use digital media technologies to support design brief requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC, printer and digital media technologies</li> <li>• use of digital media package currently used in industry</li> <li>• documents detailing organisational style guide and policy</li> <li>• digital media focused design brief.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of OHS, application usage for specific tasks and use of different digital media technologies</li> <li>• direct observation of candidate using a digital media package</li> <li>• review final digital media product prepared by candidate against design brief.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the</p>

	<p>candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Ergonomic, work organisation, energy and resource conservation requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• avoiding radiation from computer screens</li> <li>• chair height, seat and back adjustment</li> <li>• document holder</li> <li>• equipment that is reasonably adjusted to meet personal needs, in appropriate circumstances</li> <li>• exercise breaks</li> <li>• footrest</li> <li>• keyboard and mouse position</li> <li>• lighting</li> <li>• mix of repetitive and other activities</li> <li>• noise minimisation</li> <li>• posture</li> <li>• rest periods</li> <li>• screen position</li> <li>• workstation height and layout.</li> </ul>
<p><b><i>Design brief</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• approval sign-off</li> <li>• background</li> <li>• budget</li> <li>• deliverables</li> <li>• mandatory elements</li> <li>• objectives</li> <li>• target audience</li> <li>• time line.</li> </ul>
<p><b><i>Digital media</i></b></p>	<ul style="list-style-type: none"> <li>• 3-D computer graphics software</li> </ul>

<b><i>packages</i></b> may include:	<ul style="list-style-type: none"> <li>• animation software</li> <li>• commercial software applications</li> <li>• graphic arts software</li> <li>• hypermedia editing software, such as web development software</li> <li>• image editing software: <ul style="list-style-type: none"> <li>• raster graphics</li> <li>• vector graphics</li> </ul> </li> <li>• music sequencer or score writer</li> <li>• open-source software</li> <li>• organisation-specific software</li> <li>• sound editing software, such as digital-audio editor</li> <li>• video-editing software.</li> </ul>
<b><i>Data</i></b> may include:	<ul style="list-style-type: none"> <li>• graphics</li> <li>• icons</li> <li>• images</li> <li>• screenshots</li> <li>• sound</li> <li>• text</li> <li>• video.</li> </ul>
<b><i>Naming and storing documents</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised access</li> <li>• filenames according to organisational procedure</li> <li>• filenames that are easily identifiable related to the content</li> <li>• file and directory names which identify the operator, author, section, date</li> <li>• filing locations</li> <li>• organisational policy for: <ul style="list-style-type: none"> <li>• backing up files</li> <li>• filing hard copies of documents</li> </ul> </li> <li>• security</li> <li>• storage in folders and sub-folders</li> <li>• storage on hard or floppy disk drives, CD-ROM, tape backup.</li> </ul>
<b><i>File format</i></b> may include:	<ul style="list-style-type: none"> <li>• HTML pages</li> <li>• music</li> <li>• PDF files</li> <li>• pictures</li> <li>• text files</li> <li>• video.</li> </ul>

# ICAICT205A Design basic organisational documents using computing packages

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to produce basic organisational documents using application software within organisational guidelines, procedures and policies.

## Application of the Unit

This unit applies to individuals undertaking the design, creation and presentation of basic documents to meet organisational requirements in a small office environment.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Design documents to meet organisational needs	1.1 Determine basic design guidelines and requirements 1.2 Select appropriate <b><i>application software</i></b> 1.3 Use <b><i>application software</i></b> to design and configure document templates for use in a business environment
2. Use application software to develop documents	2.1 Use <b><i>application software</i></b> as per specifications to develop documents 2.2 Access, retrieve, manipulate and save <b><i>document files</i></b> 2.3 Amend designs according to <b><i>organisational requirements</i></b> 2.4 Store documents for wider access and editing as required
3. Evaluate and incorporate feedback	3.1 Obtain document sign-off from <b><i>appropriate person</i></b> 3.2 Incorporate feedback and update document

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - interact with clients and internal staff
  - provide customer service to internal customers
- literacy and numeracy skills to design, use and develop basic workplace documentation
- technical skills to:
  - undertake basic application troubleshooting
  - use a computer, scanners, laser printers and specific software.

### Required knowledge

- broad knowledge of features of application packages
- current business practices related to preparing organisational documents
- industry standard input and output devices
- OHS principles and responsibilities for ergonomics
- organisational documentation and style guides
- organisational storage and retrieval procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• access and employ a range of features of presentation software applications to produce a workplace document</li> <li>• develop several workplace documents with minimal instruction on their design from end user or supervisor.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• organisational requirements and a template for the documents</li> <li>• personal computer, scanner and laser printer</li> <li>• word-processing facilities</li> <li>• presentation software applications</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate designing and configuring document templates using applications</li> <li>• review of documents prepared by candidate aligning to organisational requirements</li> <li>• verbal or written questioning to assess candidate's knowledge of organisational requirements for documents.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Application software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• communication packages</li> <li>• graphics packages</li> <li>• organisation-specific software</li> <li>• presentation applications</li> <li>• word-processing packages.</li> </ul>
<b><i>Document files</i></b> may include:	<ul style="list-style-type: none"> <li>• database files</li> <li>• email messages</li> <li>• hypertext markup language (HTML) pages</li> <li>• pictures</li> <li>• portable document format (PDF) files</li> <li>• spreadsheet files</li> <li>• Word files.</li> </ul>
<b><i>Organisational requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• consistent corporate image</li> <li>• content restrictions</li> <li>• established guidelines and procedures for document production</li> <li>• house styles</li> <li>• templates.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT206A Install software applications

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to select, install or upgrade basic commercial software applications.

### Application of the Unit

This unit applies to workers who require the information and communications technology (ICT) skills to select, install and upgrade basic commercial software applications within a small to large office environment. Communicating effectively and supporting software application packages are key components of any ICT business or office environment.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine software or software upgrade requirements	<p>1.1 Document <i>client</i> requirements and report to <i>appropriate person</i></p> <p>1.2 Act on instructions to meet client requirements, according to <i>organisational requirements</i></p>
2. Obtain software or software upgrade	<p>2.1 Investigate and select a <i>software application program</i> that best conforms to requirements and organisational policies</p> <p>2.2 Obtain application program under instruction from appropriate <i>person</i></p> <p>2.3 Determine <i>licensing requirements</i> and record, according to organisational guidelines</p> <p>2.4 Ensure target <i>computer</i> conforms to the minimum hardware and <i>operating system</i> requirements of the <i>application program</i></p>
3. Install or upgrade software	<p>3.1 Install new or upgraded <i>software application program</i> according to <i>appropriate person</i> or organisational instructions</p> <p>3.2 Complete the installation process efficiently and effectively to minimise disruption</p> <p>3.3 Carry out testing and acceptance, according to corporate guidelines, paying particular attention to possible <i>effect</i> on other systems</p> <p>3.4 Ensure client requirements are satisfied</p> <p>3.5 Refer outstanding <i>client</i> issues to <i>appropriate person</i> as necessary</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - support software application deployment
- literacy skills to:
  - interpret user manuals and help functions
  - make decisions about licensing requirements
  - read and write basic workplace documents
  - seek assistance and expert advice
- technical skills to:
  - carry out testing
  - upload and install software
  - use computer hardware.

### Required knowledge

- broad general knowledge of:
  - client business domain
  - hardware storage devices
  - input and output devices
  - licensing arrangements and responsibilities
  - operating systems supported by the organisation
  - organisational guidelines for purchasing
  - software application packages
  - software copyright responsibilities.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• install software applications through operating system instructions</li> <li>• configure computer to accept new software or upgrade</li> <li>• carry out testing and acceptance according to corporate guidelines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• PC where software installation may be performed</li> <li>• use of application software currently used in industry</li> <li>• documents detailing organisational testing and acceptance policy and procedures</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's underpinning knowledge of software upgrade requirements, current industry standard application software and acceptance testing procedures</li> <li>• direct observation of candidate upgrading or installing new software.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Organisational requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• corporate purchasing</li> <li>• guidelines</li> <li>• licensing arrangements.</li> </ul>
<b><i>Software application program</i></b> may include:	<ul style="list-style-type: none"> <li>• database programs</li> <li>• email programs</li> <li>• internet browsers</li> <li>• spreadsheets</li> <li>• system browsers</li> <li>• word processing.</li> </ul>
<b><i>Licensing requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• cost of licence</li> <li>• number of licences required</li> <li>• support provided</li> <li>• type of licence.</li> </ul>
<b><i>Computer</i></b> may include:	<ul style="list-style-type: none"> <li>• laptops</li> <li>• servers</li> <li>• workstations.</li> </ul>
<b><i>Operating system</i></b> may include:	<ul style="list-style-type: none"> <li>• Mac OS X</li> <li>• Linux</li> <li>• Windows.</li> </ul>
<b><i>Effect</i></b> may relate to:	<ul style="list-style-type: none"> <li>• data entry</li> <li>• effect on normal business</li> <li>• installation time</li> <li>• problems.</li> </ul>

## **Unit Sector(s)**

General ICT

# ICAICT207A Integrate commercial computing packages

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manipulate, convert and integrate data between two or more different commercial software applications.

## Application of the Unit

This unit applies to information and communications technology (ICT) personnel who need to combine several different software applications to produce an integrated document within a small office or larger similar environment. The integration of software packages and their presentation are key components of any ICT business or office environment.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine work requirements	1.1 Identify the task requirement 1.2 Select appropriate <i>software</i> and file formats to perform required work 1.3 Obtain organisational documentation, such as procedures, manuals and guides and use when appropriate
2. Integrate data across different software application packages	2.1 Create a mailing list using a database, spreadsheet or address book, and merge mailing list with another document 2.2 Use <i>software application package</i> conversion tool to convert data from one <i>format</i> to another to enable additional work on the converted data 2.3 Save data to a new file format 2.4 Import <i>objects</i> from another software application package and modify as required to produce a required outcome 2.5 Export data to another <i>software application package</i> to produce a required outcome 2.6 Create a link between one <i>software application package</i> and another, and use this to update information to a document
3. Save and retrieve data with the aid of help functions	3.1 Save data to <i>disk</i> 3.2 Convert data to a new file <i>format</i> 3.3 Re-access data and check information 3.4 Access user help documentation or other resources for basic difficulties with <i>software application package</i>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- OHS awareness skills:
  - desktop layout
  - keyboard techniques
  - monitor and chair positioning
  - mouse usage
- problem-solving skills to address application management and help function usage issues when using applications
- technical skills to:
  - operate a personal computer (PC) and printer
  - use commercial computing packages
  - use a keyboard to enter text and numerical data
  - link documents.

### Required knowledge

- current business practices related to preparing reports
- features and functions of commercial computing packages
- import and export software functions
- processes for linking documents
- OHS principles and responsibilities for ergonomics
- software packages used by the organisation
- strategies for integrating commercial computing packages
- use of input and output devices.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• select appropriate software and file formats</li> <li>• create mailing list and merge with another document</li> <li>• manipulate, convert and integrate data between commercial application software following organisational procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC and printer</li> <li>• use of software currently used in industry</li> <li>• documents detailing organisational style guide and policy</li> <li>• documents or information containing data suitable for use with multiple computing packages</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of required software applications</li> <li>• direct observation of candidate converting and integrating data between commercial software applications</li> <li>• review of data or documents prepared by candidate demonstrating a wide range of features from integrated packages.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• organisation-specific software.</li> </ul>
<b><i>Software application package</i></b> may include:	<ul style="list-style-type: none"> <li>• database</li> <li>• email</li> <li>• graphics</li> <li>• spreadsheet</li> <li>• Word.</li> </ul>
<b><i>Format</i></b> may include:	<ul style="list-style-type: none"> <li>• saving the document as another type of document, such as: <ul style="list-style-type: none"> <li>• comma separated values</li> <li>• HTML</li> <li>• text</li> <li>• XML.</li> </ul> </li> </ul>
<b><i>Objects</i></b> may include:	<ul style="list-style-type: none"> <li>• graphics</li> <li>• other documents</li> <li>• pictures</li> <li>• sound.</li> </ul>
<b><i>Disk</i></b> may include:	<ul style="list-style-type: none"> <li>• CD, DVD or blu-ray</li> <li>• storage devices: <ul style="list-style-type: none"> <li>• external, such as universal serial bus (USB) flash drive</li> <li>• internal.</li> </ul> </li> </ul>

## Unit Sector(s)

General ICT

## ICAICT208A Operate accounting applications

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate common accounting software packages in order to maintain enterprise financial records.

### Application of the Unit

This unit applies to information and communications technology (ICT) personnel who need to understand and use commercial accounting tools and packages to support the financial area within a small to large office environment. A variety of commercial accounting tools and packages are readily available. A basic knowledge of double-entry accounting and the ability to read financial reports are considered an advantage for this unit.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Customise software	1.1 Select <i>accounting software</i> to meet business requirements 1.2 Load, register and configure accounting software according to <i>operating instructions</i>
2. Create enterprise data	2.1 Establish chart of accounts according to <i>business and legislative requirements</i> 2.2 Create and add data on customers and sales 2.3 Create and add data on suppliers and purchases 2.4 Create and add payroll details 2.5 Create and add inventory details 2.6 Add required or suitable tax codes
3. Record and track transactions	3.1 Generate invoices and track their progress 3.2 Record customer payments and update customer details 3.3 Record and track purchases 3.4 Record payment of wages, <i>allowances</i> , taxation and superannuation 3.5 Update business data as required
4. Save and back up data	4.1 Save accounting data to <i>disk</i> 4.2 Make a regular backup of <i>accounting data</i> and store in a safe location
5. Generate reports	5.1 Reconcile accounts 5.2 Generate and print <i>financial reports</i> based on accounting data 5.3 Check financial reports for errors and discrepancies 5.4 Discuss errors with <i>appropriate person</i> and rectify as required

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- numeracy skills to use mathematical ideas and techniques related to recording and analysing basic financial data
- problem-solving skills to address common operational problems when using accounting applications
- technical skills to operate a personal computer (PC) and peripherals.

### Required knowledge

- basic accounting concepts:
  - assets
  - cost of sales
  - creditors
  - debtors
  - equity
  - expenses
  - income
  - liabilities
- basic accounting devices:
  - accounts
  - chequebook register
  - general ledger
  - invoices
  - purchases
  - sales journals
  - transaction journals
- current legislative requirements relating to enterprise requirements:
  - goods and services tax
  - income tax rates
  - pay as you go
  - superannuation
- features and functions of common accounting reports:
  - balance sheet
  - business activity statements

- chart of accounts
- profit and loss
- features and functions of common accounting software.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• load and configure accounting software</li> <li>• create and maintain enterprise financial records, meeting business and legislative requirements</li> <li>• record and track transactions</li> <li>• back up data</li> <li>• reconcile accounts and generate reports.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of printer and PC with appropriate specifications to run the software</li> <li>• use of industry standard commercial accounting applications</li> <li>• documents detailing business requirements</li> <li>• legislative requirements if required</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>

<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT209A Interact with ICT clients

### Modification History

Version	Comments
ICAICT209A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to provide routine information and communications technology (ICT) client support in a professional manner.

### Application of the Unit

This unit applies to frontline technical support personnel who interact with clients in an ICT support role. Communicating effectively and simplifying technical problems are key components of client support roles.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Deliver support to ICT clients	1.1 Provide support for <b><i>ICT clients</i></b> in a courteous and professional manner according to organisational policy 1.2 Establish and confirm nature of <b><i>client's</i></b> ICT concerns using active listening and questioning 1.3 Maintain <b><i>client</i></b> contact and provide progress information until the problem is resolved
2. Respond to ICT client complaints	2.1 Respond to ICT clients concerns and issues demonstrating a positive, sensitive and helpful attitude 2.2 Escalate and refer <b><i>client</i></b> concerns to <b><i>support person</i></b> if required, explaining the nature of issues involved 2.3 Resolve ICT <b><i>client</i></b> complaint using recommendations from the <b><i>support person</i></b> 2.4 Document and record ICT <b><i>client</i></b> concerns and solutions, according to <b><i>organisational guidelines</i></b>
3. Evaluate received ICT client complaints	3.1 Analyse recent ICT register 3.2 Propose proactive training to appropriate person

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communications skills to:
  - establish and confirm nature of client concerns
  - liaise with clients and ICT support
  - respond to clients from diverse cultural and other backgrounds
- customer-service skills to provide support for clients in a courteous and professional manner
- decision-making skills applied to a limited range of options
- problem-solving skills to resolve client complaints.

### Required knowledge

- current industry-accepted hardware and software products, with broad knowledge of general features and capabilities
- general knowledge of the ICT client business domain and business-critical functions
- general knowledge of organisational systems and working environment
- organisational policies for external and internal client contact.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> <li>• provide routine ICT client support in a professional manner</li> <li>• refer client concerns to support person if required, according to escalation procedures</li> <li>• resolve client complaints</li> <li>• document and record client concerns and solutions, according to organisational guidelines.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• personal computer</li> <li>• relevant organisational guidelines</li> <li>• relevant documentation</li> <li>• site where routine ICT client support may be demonstrated</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate interacting with and providing support for clients</li> <li>• direct observation of candidate escalating client concerns to support person</li> <li>• verbal or written questioning to assess candidate's knowledge of enterprise escalation procedures</li> <li>• review of documentation of client concerns and solutions.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

# ICAICT210A Operate database applications

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate database applications and perform basic operations.

## Application of the Unit

This unit applies to individuals who create and design databases using pre-existing data (e.g. documents, spreadsheet data, and data from database tables) or create new data when creating and manipulating databases and tables.

They may provide administrative support working under direct supervision or with limited responsibility.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Create database	<p>1.1 Open a database application and design a two-table simple relational database incorporating basic <i>design principles</i></p> <p>1.2 Develop a table with fields and <i>attributes</i> according to database usage, as well as user requirements</p> <p>1.3 Create a primary key and establish an index for each table</p> <p>1.4 Modify table layout and field <i>attributes</i> as required</p> <p>1.5 Create a <i>relationship</i> between the two tables</p> <p>1.6 Add and modify data in a table according to information requirements</p> <p>1.7 Add and delete records as required</p> <p>1.8 Save and close down database to <i>storage area</i></p>
2. Customise basic settings	<p>2.1 Adjust <i>page layout</i> to meet user requirements</p> <p>2.2 Open and view different <i>toolbars</i></p> <p>2.3 Format <i>font</i> as appropriate for the purpose of the database entries</p>
3. Create reports	<p>3.1 Design reports to present data in a logical sequence</p> <p>3.2 Modify reports to include or exclude additional requirements</p> <p>3.3 Distribute reports to <i>appropriate person</i> in a suitable format</p>
4. Create forms	<p>4.1 Use a wizard to create a simple form</p> <p>4.2 Open existing database and modify records through a simple form</p> <p>4.3 Rearrange <i>objects</i> within the form to accommodate information requirements</p>
5. Retrieve information	<p>5.1 Access existing database and locate required records</p> <p>5.2 Create simple query and retrieve required information</p> <p>5.3 Develop query with multiple criteria and retrieve required information</p> <p>5.4 Select data and display appropriately</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - interpret user manuals and help functions
  - read and write basic workplace documents
- numeracy skills to create simple queries
- problem-solving skills to address inconsistencies in data and issues in database
- technical skills to create a simple database.

### Required knowledge

- basic database design
- forms, reports and queries for retrieving and displaying information
- relationships between tables (cardinality)
- purpose, use and function of database software.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design and develop a simple database using a standard database package</li> <li>• add data</li> <li>• use queries</li> <li>• create forms and reports.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• use of PC and printer</li> <li>• use of database software currently used in industry</li> <li>• documents detailing organisational style guide and policy</li> <li>• documents or information containing data suitable for creating a database</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of database operations</li> <li>• direct observation of candidate creating and manipulating databases and retrieving information</li> <li>• review of forms and reports prepared that demonstrate database application skills.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Design principles</i></b> may include:	<ul style="list-style-type: none"> <li>• data layout</li> <li>• formatting</li> <li>• naming conventions.</li> </ul>
<b><i>Attributes</i></b> may include:	<ul style="list-style-type: none"> <li>• data type</li> <li>• name</li> <li>• size.</li> </ul>
<b><i>Relationship</i></b> may be:	<ul style="list-style-type: none"> <li>• one-to-one</li> <li>• one-to-many</li> <li>• many-to-many.</li> </ul>
<b><i>Storage area</i></b> may include:	<ul style="list-style-type: none"> <li>• CD</li> <li>• DVD</li> <li>• external hard drive, such as universal serial bus (USB) flash drive</li> <li>• internal hard drive</li> <li>• web area.</li> </ul>
<b><i>Page layout</i></b> may include:	<ul style="list-style-type: none"> <li>• landscape</li> <li>• portrait.</li> </ul>
<b><i>Toolbars</i></b> may contain:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• menus</li> <li>• a combination of both.</li> </ul>
<b><i>Font</i></b> may include:	<ul style="list-style-type: none"> <li>• combination of typeface and other attributes: <ul style="list-style-type: none"> <li>• pitch</li> <li>• size</li> <li>• spacing character</li> <li>• symbol.</li> </ul> </li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Objects</i></b> may include:	<ul style="list-style-type: none"> <li>• buttons</li> <li>• checkboxes</li> <li>• drop down lists</li> <li>• option buttons</li> </ul>

	<ul style="list-style-type: none"><li>• text boxes.</li></ul>

## Unit Sector(s)

General ICT

## ICAICT211A Identify and use basic current industry-specific technologies

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use industry-specific technologies to meet identified industry standards.

### Application of the Unit

This unit applies to individuals engaged in basic ongoing review and research in order to identify and apply industry technologies or techniques to improve aspects of the organisation's activities. The unit provides evidence of the application of basic industry-enabling technologies.

The unit emphasises the importance of constantly reviewing and demonstrating work processes, skills and techniques to ensure that the quality of the entire business process is maintained at the highest level possible through the appropriate application of industry-specific technologies.

### Licensing/Regulatory Information

Users should confirm licensing, legislative, regulatory, or certification requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare to use basic industry-specific technologies	1.1 Identify technologies specific to an <b><i>industry sector</i></b> 1.2 Acquire and use the <b><i>industry-specific technologies</i></b> 1.3 Identify, classify and use industry-specific technologies for the benefit of the organisation
2. Use basic industry-specific technologies to assist in solving organisational problems	2.1 Conduct testing of industry-specific technologies 2.2 Use features and functions of industry-specific technologies within an organisational context 2.3 Demonstrate depth of knowledge of enabling technologies to an accepted industry standard 2.4 Access and use <b><i>sources of information</i></b> relating to the industry-specific technologies
3. Evaluate performance of basic industry-specific technology	3.1 Evaluate industry-specific technologies for performance, usability and benefit to the organisation 3.2 Determine <b><i>environmental considerations</i></b> involved when using the technology 3.3 Seek <b><i>feedback</i></b> from users where appropriate

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
  - seek feedback from users
- basic research skills to locate appropriate sources of information regarding industry-specific technology
- literacy skills to interpret technical documentation, equipment manuals and specifications
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - identify features of the industry-specific technology
  - test and evaluate the industry-specific technology
  - use the industry-specific technology.

### Required knowledge

- broad awareness of current technology trends, directions in IT and specifically of the major industry technology standards used in the specified area
- broad knowledge of vendor product directions
- current industry hardware and software products, with broad knowledge of general features and capabilities and their application
- information-gathering techniques.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify basic new and emerging industry-specific technologies</li> <li>• use basic features and functions of identified industry-specific technologies to an industry standard.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where industry-specific technologies may be used</li> <li>• industry-specific technologies currently used in industry</li> <li>• documents detailing OHS standards, environmental guidelines and organisational requirements.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess knowledge of features and functions of industry-specific technologies</li> <li>• direct observation using basic industry-specific technologies</li> <li>• simulation of industry-specific uses of the basic industry-specific technologies.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Industry sector</i></b> may include:	<ul style="list-style-type: none"> <li>• business services or information worker</li> <li>• information and communications technology</li> <li>• telecommunication.</li> </ul>
<b><i>Industry-specific technologies</i></b> may include:	<ul style="list-style-type: none"> <li>• vendor-specific: <ul style="list-style-type: none"> <li>• hardware</li> <li>• integrated services</li> <li>• internet access</li> <li>• mobile communication devices</li> <li>• networks</li> <li>• peripherals</li> <li>• software.</li> </ul> </li> </ul>
<b><i>Sources of information</i></b> may include:	<ul style="list-style-type: none"> <li>• appliances</li> <li>• software</li> <li>• technical connections guidance and other outputs supplied by vendors and manufacturers</li> <li>• documents</li> <li>• test pages</li> <li>• vendor and manufacturer guidance regarding requisite depth of knowledge of industry-specific technologies</li> <li>• web pages.</li> </ul>
<b><i>Environmental considerations</i></b> may include:	<ul style="list-style-type: none"> <li>• correct disposal by an authorised body of redundant hardware: <ul style="list-style-type: none"> <li>• circuit boards</li> <li>• hard drives</li> <li>• motherboards</li> </ul> </li> <li>• recycling</li> <li>• safe disposal of packaging: <ul style="list-style-type: none"> <li>• cardboard</li> <li>• paper</li> <li>• plastic</li> <li>• polystyrene.</li> </ul> </li> </ul>
<b><i>Feedback</i></b> may include:	<ul style="list-style-type: none"> <li>• competency skill level</li> <li>• industry-validated demonstration of competency through</li> </ul>

	<p>certification</p> <ul style="list-style-type: none"><li>• interviews</li><li>• meetings.</li></ul>

## Unit Sector(s)

General ICT

# ICAICT212A Incorporate Indigenous needs and perspectives into IT environment

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use information technology (IT) to meet the specific needs of Indigenous learners.

Note: delivery and assessment against this unit of competency must comply with Indigenous community protocols and guidelines and be supported by Elders or custodians of Country.

## Application of the Unit

This unit applies to people working with Indigenous people and communities requiring the information and communications technology (ICT) skills to use the communication technologies, software applications and hardware solutions being used, and to research and discuss possible alternative IT solutions.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify the use of IT systems in the Indigenous community	<p>1.1 Identify local community organisations, including <b><i>Indigenous community organisations</i></b> and other <b><i>relevant Indigenous and related agencies</i></b>, that use IT</p> <p>1.2 Determine specific <b><i>Indigenous learning styles</i></b> and <b><i>knowledge systems</i></b> that impact on the use of IT in an Indigenous community</p> <p>1.3 Identify the most common <b><i>communication technologies, software applications</i></b> and <b><i>hardware solutions</i></b> used in the local community</p> <p>1.4 Describe the use of IT in local community organisations, including Indigenous community organisations and other relevant bodies</p>
2. Identify and use specific IT resources relevant to Indigenous people	<p>2.1 Identify a range of methods of accessing Indigenous and non-Indigenous electronic resources for research and learning</p> <p>2.2 Identify and access relevant <b><i>Indigenous and IT websites</i></b> and other online resources</p> <p>2.3 Following community consultation, discuss and compare the relevance of a range of Indigenous websites to Indigenous communities</p>
3. Identify appropriate IT resources to meet the needs of Indigenous people and communities	<p>3.1 Use the most common local communication technologies, software applications and hardware solutions</p> <p>3.2 Research and identify possible alternative communication technologies, software applications and hardware solutions</p> <p>3.3 Discuss most appropriate IT resources with local Indigenous community, to meet Indigenous individual and community needs</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- basic research skills to identify alternative communication, software and hardware solutions
- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
- literacy skills to:
  - read and write at a basic level
  - use computer or online help functions
- problem-solving skills to address basic computer problems
- technical skills to:
  - access and use the internet
  - operate a personal computer (PC)
  - use basic application packages
  - use PC peripheral hardware.

### Required knowledge

- basic knowledge of operating system, hardware and software products
- ergonomic principles to avoid back, wrist and eye strain
- OHS principles and responsibilities relating to IT specific to Indigenous community customs and practices.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify common communication technologies, software applications and hardware solutions used in the local Indigenous community</li> <li>• identify specific Indigenous customs and practices that impact on the use of IT within the community</li> <li>• use current communication technologies, software applications and hardware solutions</li> <li>• identify and discuss possible alternative IT solutions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• PC</li> <li>• relevant hardware components</li> <li>• OHS standards and organisational policies and procedures</li> <li>• relevant software applications</li> <li>• common communication technologies</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal questioning of candidate to assess knowledge of common communication technologies, software applications and hardware solutions used in the local Indigenous community</li> <li>• direct observation of candidate using common communication technologies, software applications and hardware solutions used in the local Indigenous community.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Indigenous community organisations</i></b> may include:	<ul style="list-style-type: none"> <li>• Aboriginal businesses</li> <li>• Aboriginal Land Councils</li> <li>• educational groups</li> <li>• Indigenous Coordination Centres (ICC)</li> <li>• multi-purpose centres</li> <li>• Tribal Councils.</li> </ul>
<b><i>Relevant Indigenous and related agencies</i></b> may include:	<ul style="list-style-type: none"> <li>• Australian Bureau of Statistics</li> <li>• Centrelink</li> <li>• Department of Housing</li> <li>• education</li> <li>• government departments</li> <li>• internet providers.</li> </ul>
<b><i>Indigenous learning styles</i></b> are generally characterised by cultural learning practices, including:	<ul style="list-style-type: none"> <li>• emphasis on looking, listening and learning</li> <li>• learning independently or in a family group</li> <li>• observation, imitation and participation</li> <li>• practical exercises</li> <li>• privately or in small groups</li> <li>• ensuring collective progression</li> <li>• using procedural questions</li> <li>• visual interpretation.</li> </ul>
<b><i>Indigenous knowledge systems</i></b> may include:	<ul style="list-style-type: none"> <li>• being only available according to gender</li> <li>• being only available according to societal roles</li> <li>• ceremony</li> <li>• expression through cultural practices</li> <li>• knowledge of astronomy</li> <li>• lore or law</li> <li>• being maintained via Dreaming and creation stories</li> <li>• oral language transference</li> <li>• organisation through relationship and kinship ties</li> <li>• sacred and secret sites</li> <li>• social relationships</li> <li>• specific detail of Country</li> <li>• the Dreaming</li> <li>• ways that knowledge is maintained, such as through</li> </ul>

	gatherings.
<b>Communication technologies</b> may include:	<ul style="list-style-type: none"> <li>• cable connections</li> <li>• internet service provider (ISP) connection properties</li> <li>• satellite connections</li> <li>• wireless system (wi-fi), such as a combination of: <ul style="list-style-type: none"> <li>• digital subscriber line (DSL) modems</li> <li>• wi-fi network cards</li> <li>• wireless routers.</li> </ul> </li> </ul>
<b>Software applications</b> may include:	<ul style="list-style-type: none"> <li>• databases</li> <li>• email</li> <li>• graphics packages</li> <li>• internet browsers</li> <li>• spreadsheets</li> <li>• system browsers</li> <li>• word-processing.</li> </ul>
<b>Hardware solutions</b> may include:	<ul style="list-style-type: none"> <li>• Bluetooth device</li> <li>• fax and modem</li> <li>• keyboard</li> <li>• laptop</li> <li>• mobile phone</li> <li>• monitor</li> <li>• mouse</li> <li>• multimedia kit</li> <li>• PC</li> <li>• personal digital assistant (PDA), such as palmtop</li> <li>• printer</li> <li>• scanner</li> <li>• speaker</li> <li>• tape cartridge</li> <li>• universal serial bus (USB) device</li> <li>• wi-fi router.</li> </ul>
<b>Indigenous and IT websites</b> may include:	<ul style="list-style-type: none"> <li>• Aboriginal Affairs NSW Department of Human Services</li> <li>• Australian Apprenticeship Training Information Service</li> <li>• Australian Computer Society, ICT careers portal</li> <li>• Australian PC Authority</li> <li>• Department of Education, Employment and Workplace Relations, Indigenous portal</li> <li>• Department of Education, Employment and Workplace Relations, training skills for Indigenous students</li> <li>• Indigenous portal - Australian government services for Indigenous people</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT301A Create user documentation

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create user documentation that is clear to the target audience and easy to navigate.

### Application of the Unit

This unit applies to individuals in a range of information and communications technology (ICT) areas who are required to provide documentation to users of their system.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine documentation standards and requirements	1.1 Determine <b>documentation</b> requirements 1.2 Investigate documentation and industry <b>standards</b> for requirements and determine appropriate application to <b>user documentation</b> 1.3 Design documentation templates using appropriate software and obtain approval from <b>appropriate person</b>
2. Produce user documentation	2.1 Conduct a review of the subject system, program, network or application in order to understand its functionality 2.2 Gather existing technical, design or user specifications and supporting documentation 2.3 Create user documentation based on template to record the operation of the subject system, program, network or application
3. Review and obtain sign-off	3.1 Submit user documentation to target audience for review 3.2 Gather and analyse feedback 3.3 Make changes to user documentation 3.4 Submit user documentation to appropriate person for approval

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to interact with clients and internal staff
- literacy skills to:
  - identify content
  - write content
- research skills to:
  - analyse audience needs
  - identify target audiences
- technical skills to:
  - determine appropriate content, formats and styles
  - select and use appropriate software and tools.

### Required knowledge

- content features, including clarity and readability
- document design, web design and usability
- functions and features of templates and style guides
- instructional design principles.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to create user documentation that:</p> <ul style="list-style-type: none"> <li>• meets business requirements</li> <li>• caters for a diverse readership</li> <li>• is clear to the target audience</li> <li>• is easy to navigate.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• documentation standards</li> <li>• software tools for effecting documentation</li> <li>• information about system, platform, network or application being documented</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate producing documents for users using appropriate software</li> <li>• review of candidate's changes to user documentation based on user feedback</li> <li>• verbal or written questioning to assess candidate's knowledge of functionality of the system.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• design specifications</li> <li>• electronic copy</li> <li>• internet and intranet</li> <li>• online help</li> <li>• training materials in either hard copy</li> <li>• user manuals and procedure manuals.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• organisational standards</li> <li>• project standards</li> <li>• policy relating to cataloguing, sign-off, storage, distribution and revision.</li> </ul>
<b><i>User documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• brochures</li> <li>• help references</li> <li>• online help</li> <li>• project specifications</li> <li>• reports</li> <li>• training materials and self-paced tutorials</li> <li>• user guides</li> <li>• user manuals.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• graphics packages</li> <li>• help file creation software</li> <li>• multimedia authoring tools</li> <li>• organisation-specific software</li> <li>• presentation applications</li> <li>• word-processing packages.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT302A Install and optimise operating system software

### Modification History

Version	Comments
ICAICT302A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit defines the performance outcomes, skills and knowledge required to install operating system (OS) software and to make adjustments as a means of optimising the system to accommodate business and client needs.

### Application of the Unit

This unit applies to individuals in a technical support role who are required to identify the most suitable OS to meet organisational requirements. The unit develops the ability to install, configure and optimise the OS to identified vendor specifications.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine function of operating system	<p>1.1 Identify and demonstrate understanding of the purposes of <i>operating system</i></p> <p>1.2 Distinguish between batch system, real-time system, multi-tasking system</p> <p>1.3 Compare and contrast different operating systems and their features</p> <p>1.4 Identify and demonstrate knowledge of the basic functions of operating system, including file system, memory management, process scheduling</p> <p>1.5 Identify and demonstrate management of virtual memory</p>
2. Obtain operating system	<p>2.1 Contact operating system vendors to obtain technical specifications and system requirements</p> <p>2.2 Identify the process and steps required to install and configure the operating system using <i>installation components</i></p> <p>2.3 Document adjustment recommendations and provide to <i>appropriate person</i></p> <p>2.4 Determine and apply knowledge of licensing, hardware and security requirements</p>
3. Install, configure and optimise operating system	<p>3.1 Install, configure and test operating system using installation components and <i>boot-utility options</i></p> <p>3.2 Use the relevant <i>operating system user interface</i> to correctly configure the installation</p> <p>3.3 Optimise the system to meet <i>organisational requirements</i></p> <p>3.4 Document the system according to organisational requirements</p> <p>3.5 Install the operating system with minimal disruption to <i>client</i> or users</p>
4. Provide instruction to meet new software requirements	<p>4.1 Provide one-to-one instruction about changes to the client or users as required</p> <p>4.2 Obtain client evaluation about new system to ensure requirements are met, using appropriate <i>feedback mechanism</i></p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - liaise with people working across different levels and in different contexts, such as operating system vendors and clients
- literacy skills to:
  - interpret technical computer installation manuals
  - obtain written and verbal feedback from clients
  - present information, such as the use of diagnostic tools
  - provide verbal instructions to client
- technical skills to:
  - install and configure operating system software
  - write instructions for clients.

### Required knowledge

- current industry-accepted hardware and software products
- functions and features of operating systems used by the organisation
- installation and configuration of systems software
- architecture of current technical systems
- deployment of current organisational systems
- organisational requirements for operating system software
- prerequisites for system software installation
- set-up and configuration procedures
- software packages supported by the organisation
- system's current functionality
- system's diagnostic software
- vendor specifications and requirements for installation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• install, configure and test an operating system to improve system performance with minimum disruption to clients.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• personal computer where installation may be performed</li> <li>• OS software and technical documentation</li> <li>• organisational documentation</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate: <ul style="list-style-type: none"> <li>• questioning team members, supervisors and clients</li> <li>• installing and testing an operating system</li> </ul> </li> <li>• review of candidate's practical assignments and reports.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Operating system</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Linux:             <ul style="list-style-type: none"> <li>• Debian</li> <li>• Fedora</li> <li>• Google Chrome OS</li> <li>• Kubuntu</li> <li>• Linux Mint</li> <li>• Red Hat</li> <li>• Ubuntu</li> </ul> </li> <li>• Mac OS X</li> <li>• Microsoft Windows:             <ul style="list-style-type: none"> <li>• Windows 2000</li> <li>• Windows XP (32 bit versus 64 bit)</li> <li>• Windows Vista (32 bit versus 64 bit)</li> <li>• Windows 7 (32 bit versus 64 bit)</li> </ul> </li> <li>• mobile operating systems:             <ul style="list-style-type: none"> <li>• Android</li> <li>• Blackberry</li> <li>• iPhone</li> <li>• Palm</li> <li>• Symbian</li> <li>• Windows Phone 7 series.</li> </ul> </li> </ul>
<p><b><i>Installation components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• configure power management:             <ul style="list-style-type: none"> <li>• hibernate</li> <li>• sleep timers</li> <li>• standby</li> <li>• suspend</li> <li>• wake on local area network (LAN)</li> </ul> </li> <li>• demonstrate safe removal of peripherals</li> <li>• device manager:             <ul style="list-style-type: none"> <li>• driver signing</li> <li>• install and update devices drivers</li> <li>• verify</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• directory structures: <ul style="list-style-type: none"> <li>• create folders</li> <li>• navigate directory structures</li> </ul> </li> <li>• disk preparation order: <ul style="list-style-type: none"> <li>• format drive</li> <li>• partition</li> <li>• start installation</li> </ul> </li> <li>• files: <ul style="list-style-type: none"> <li>• attributes</li> <li>• creation</li> <li>• extensions</li> <li>• permissions</li> </ul> </li> <li>• file systems, such as FAT32 versus new technology file system (NTFS)</li> <li>• installation methods: <ul style="list-style-type: none"> <li>• boot media, such as DVD, CD, floppy or universal serial bus (USB)</li> <li>• factory recovery partition</li> <li>• install from image</li> <li>• network installation</li> <li>• recover CD</li> </ul> </li> <li>• operating system installation options: <ul style="list-style-type: none"> <li>• file system type</li> <li>• network configuration</li> <li>• repair install</li> </ul> </li> <li>• user data migration - user state migration tool (USMT)</li> <li>• verification of hardware compatibility and minimum requirements</li> <li>• virtual memory.</li> </ul>
<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b>Boot-utility options</b> may include:	<ul style="list-style-type: none"> <li>• automated system recovery (ASR)</li> <li>• boot options</li> <li>• boot to restore point</li> <li>• disk boot order or device priority</li> <li>• emergency repair disk (ERD)</li> <li>• recovery console</li> <li>• recovery options</li> <li>• safe mode</li> <li>• types of boot devices (disk, network, USB).</li> </ul>

<p><b><i>Operating system user interface</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• Windows-adopting interface to undertake similar tasks with chosen operating system: <ul style="list-style-type: none"> <li>• administrative tools, such as performance monitor, event viewer, services and computer management</li> <li>• command prompt utilities, such as ipconfig, Ping and Telnet</li> <li>• control panel</li> <li>• location of basic network settings between OS versions</li> <li>• MMC</li> <li>• my computer</li> <li>• my network places or home group</li> <li>• run line utilities: <ul style="list-style-type: none"> <li>• cmd</li> <li>• direct diagnostics (DXdiag)</li> <li>• msconfig</li> <li>• MSINFO32</li> <li>• REGEDIT</li> </ul> </li> <li>• start menu</li> <li>• task bar or systray</li> <li>• task manager</li> <li>• Windows Explorer - Libraries in Windows 7.</li> </ul> </li> </ul>
<p><b><i>Organisational requirements</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• availability of system to be optimised</li> <li>• client support documentation</li> <li>• in-house or vendor</li> <li>• contracting arrangements relating to IT purchasing</li> <li>• IT policy and procedures relating to service levels and installation</li> <li>• level of complexity of technical manuals.</li> </ul>
<p><b><i>Client</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person with special needs</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<p><b><i>Feedback mechanism</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• interview</li> <li>• meeting</li> <li>• questionnaire</li> <li>• survey.</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT303A Connect internal hardware components

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIT Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to modify and connect system hardware components according to client and user requirements.

### Application of the Unit

This unit applies to support technicians who modify and connect system components. Ensuring the integrity of the system after the operation is critical in the context of minimising client disruption and need for continuing desktop operation.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify, categorise and distinguish between the different types of internal hardware components	<p>1.1 Identify and categorise the different <i>internal hardware components</i></p> <p>1.2 Explain the purpose and characteristics of the different internal hardware component categories</p> <p>1.3 Distinguish between the different types of devices within each internal hardware component category</p>
2. Determine components required	<p>2.1 Identify and clarify user internal hardware component requirements according to <i>organisational guidelines</i></p> <p>2.2 Organise and record user component requirements, pass on to <i>appropriate person</i> for evaluation and vendor selection</p>
3. Obtain components	<p>3.1 Contact vendors to obtain technical specifications for the proposed components</p> <p>3.2 Assess the options and provide recommendations to the appropriate person for final analysis</p> <p>3.3 Obtain components to prepare for installation</p>
4. Install components	<p>4.1 Develop plans, with prioritised tasks and contingency arrangements, for the installation of selected components with minimum disruption to <i>clients</i></p> <p>4.2 Liaise with appropriate person to obtain approval for the plans</p> <p>4.3 Install and configure components according to plan, installation procedures and <i>organisational requirements</i></p> <p>4.4 Test components for error-free performance, using available technology</p> <p>4.5 Identify and resolve identified problems</p> <p>4.6 Test and enhance system performance, using knowledge of the system, to meet organisational benchmarks</p> <p>4.7 Document the installation and configuration process according to organisation guidelines</p>
5. Evaluate modified system	<p>5.1 Collect client or user feedback and analyse against client requirements</p> <p>5.2 Correct identified shortcomings in the system and record actions</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - consult with peers and supervisors, and internal and external clients
  - interpret technical computer installation manuals
  - interpret user manuals and help functions
- literacy skills to:
  - organise resources for one-to-one instruction
  - plan, prioritise and organise work
  - write technical reports and maintain records
- planning and organisational skills to address technical issues
- problem-solving skills to anticipate and respond to a range of driver-related errors that may arise
- technical skills to:
  - comprehend how the operating system will communicate with the installed component
  - install components
  - test components using available technology
  - test system performance.

### Required knowledge

- areas of the operating system relevant to configuration and testing
- current industry-accepted hardware and software products
- environmental considerations in e-waste disposal
- organisational guidelines and organisational requirements with regard to safety, recycling and component installation
- system's diagnostic software and current functionality
- vendor specifications and requirements for component installation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify and categorise the different types of internal hardware components</li> <li>• modify system's hardware to meet client requirements</li> <li>• plan the modification and connect internal hardware components according to vendor and technical specifications</li> <li>• install components across a variety of situations and account for unexpected contingencies.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• personal computer and internal hardware components for installation</li> <li>• current industry standard performance testing software</li> <li>• documents detailing organisational guidelines and requirements</li> <li>• technical manuals and tools</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul> <p>Note: The careful planning and promotion of hardware upgrades and changes are critical to the effective support of business functions. Hardware modifications need to be risk managed similar to other business processes. The effective management and execution of the component maintenance and replacement process may significantly determine the amount of downtime a company encounters.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of system diagnostic software and system functionality</li> <li>• direct observation of candidate connecting internal hardware components</li> <li>• evaluation of client requirements and candidate's final recommendations</li> <li>• review of candidate's written notes.</li> </ul>

	<p>Note: Evidence for assessment from industry or vendor-certified training may be presented for the whole or part of this unit depending on the range of variables and performance criteria.</p>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Internal hardware components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• adapter card components:             <ul style="list-style-type: none"> <li>• communications:                 <ul style="list-style-type: none"> <li>• modem</li> <li>• network interface card (NIC)</li> </ul> </li> <li>• I/O:                 <ul style="list-style-type: none"> <li>• parallel</li> <li>• small computer system interface (SCSI)</li> <li>• serial</li> <li>• universal serial bus (USB)</li> </ul> </li> <li>• multimedia:                 <ul style="list-style-type: none"> <li>• capture cards</li> <li>• sound card</li> <li>• TV tuner cards</li> </ul> </li> <li>• video:                 <ul style="list-style-type: none"> <li>• AGP</li> <li>• peripheral component interconnect (PCI)</li> <li>• PCIe</li> </ul> </li> </ul> </li> <li>• cooling system components:             <ul style="list-style-type: none"> <li>• CPU and case fans</li> <li>• heat sinks</li> <li>• liquid cooling systems</li> <li>• thermal compound</li> </ul> </li> <li>• CPU components and features:             <ul style="list-style-type: none"> <li>• 32 bit versus 64 bit</li> <li>• hyper threading</li> <li>• identify CPU types:                 <ul style="list-style-type: none"> <li>• AMD</li> <li>• Intel</li> </ul> </li> <li>• multi-core:                 <ul style="list-style-type: none"> <li>• dual core</li> <li>• quad core</li> <li>• triple core</li> </ul> </li> </ul> </li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT304A Implement system software changes

### Modification History

Version	Comments
ICAICT304A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement system software changes and to hand over the modified system to the client's operational area.

### Application of the Unit

This unit applies to those working in support roles who are required to update operating systems on client computers with the latest technology fixes.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine system changes required	<p>1.1 Determine and record required changes to <i>system</i></p> <p>1.2 Ensure that documentary evidence exists to support changes and evaluate changes required</p> <p>1.3 Complete <i>documentation</i> required according to maintenance methodologies</p> <p>1.4 Clarify and confirm the nature of the changes with the <i>client</i></p> <p>1.5 Obtain technical data from reliable sources and request other resources that may be required to complete the changes</p>
2. Carry out system changes	<p>2.1 Plan the procedure to effect intended changes</p> <p>2.2 Consult with colleagues and <i>users</i> involved in the proposed changes and agree a mutually acceptable timeline and method of implementation</p> <p>2.3 Copy initialisation or configuration files prior to implementation</p> <p>2.4 Create a roll-back path in the event of failure</p> <p>2.5 Ensure that changes required in <i>software</i> are made according to project or <i>organisational guidelines</i></p> <p>2.6 Test and verify that the changes have been made according to implementation guides and <i>organisational standards</i></p>
3. Present changes to client	<p>3.1 Demonstrate changes to the client and explain the impact of these changes</p> <p>3.2 Work towards making these changes acceptable to the client if changes are rejected, or making further modifications if required</p> <p>3.3 Update documentation and repositories according to standards and update modifications made to the change-management system</p>
4. Perform handover to client	<p>4.1 Update documentation and client procedures to reflect changes made</p> <p>4.2 Secure sign-off of acceptance documents by client</p> <p>4.3 Facilitate handover of modified system to client's operational area</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - consult with colleagues and users
  - evaluate client user requirements
- literacy skills to:
  - interpret organisational guidelines and standards
  - interpret policy and procedures
  - interpret technical manuals
  - write documentation and client procedures
- planning and organisational skills to:
  - effect intended changes
  - prioritise and organise own work
  - technical skills to install and configure system software.

### Required knowledge

- business scheduling requirements
- change control procedures
- client business domain
- current industry-accepted hardware and software products
- emerging standards for data and voice communications
- system's current functionality
- features of system under modification
- organisational policy and procedures with regard to system changes
- vendor software services with regard to system changes.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• evaluate, document and implement changes to the system with minimum disruption to the system and client users.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• computer</li> <li>• system software currently used in industry</li> <li>• technical manuals and tools</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of the system's functionality</li> <li>• direct observation of candidate implementing software change</li> <li>• evaluation of candidate's change process and updated modifications</li> <li>• review reports prepared by candidate, including log books and test results.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>System</i></b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• computers</li> <li>• financial system</li> <li>• information system</li> <li>• management system</li> <li>• mobile equipment</li> <li>• network</li> <li>• software.</li> </ul>
<b><i>Documentation</i></b> for version control may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• client training</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• maintaining equipment inventory</li> <li>• naming standards</li> <li>• project-management templates and report writing</li> <li>• satisfaction reports</li> <li>• version control.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• customer</li> <li>• external organisation</li> <li>• individual</li> <li>• internal department</li> <li>• internal employee.</li> </ul>
<b><i>Users</i></b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<b><i>Implementation</i></b> may include:	<ul style="list-style-type: none"> <li>• formulating methods for standby operations or contingency plans</li> <li>• implementing the entire system.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• in-house or customised software</li> <li>• organisation-specific software</li> <li>• packaged software.</li> </ul>

<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• making voice or video calls</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>
<b><i>Organisational standards</i></b> may include:	<ul style="list-style-type: none"> <li>• communication with stakeholders</li> <li>• dispute resolution and modification procedures</li> <li>• formal procedures that must be adhered to, such as check points and sign-offs with documented procedures and templates</li> <li>• implementation of financial control mechanisms</li> <li>• processes for determining size and cost.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT305A Identify and use current industry-specific technologies

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use specific industry technologies to meet identified industry standards.

The unit emphasises the importance of constantly reviewing and demonstrating work processes, skills and techniques to ensure that the quality of the entire business process is maintained at the highest level possible through the appropriate application of industry-specific technologies.

## Application of the Unit

This unit applies to individuals engaged in ongoing review and research in order to identify and apply industry technologies or techniques to improve aspects of the organisation's activities.

## Licensing/Regulatory Information

Users should confirm licensing, legislative, regulatory, or certification requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare to use industry-specific technologies	1.1 Identify technologies specific to an <b><i>industry sector</i></b> 1.2 Acquire and use the <b><i>industry-specific technologies</i></b> 1.3 Identify, classify and use industry-specific technologies where appropriate, for the benefit of the organisation
2. Use industry-specific technology to assist in solving organisational problems	2.1 Conduct testing of industry-specific technology 2.2 Use features and functions of industry-specific technology within an organisational context 2.3 Demonstrate depth of knowledge of the enabling technologies to an accepted industry standard 2.4 Access and use <b><i>sources of information</i></b> relating to the industry-specific technology
3. Evaluate industry-specific technology performance	3.1 Evaluate industry-specific technology for performance, usability and benefit to the organisation 3.2 Determine <b><i>environmental considerations</i></b> involved with using the technology 3.3 Seek <b><i>feedback</i></b> from users, where appropriate

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- basic research skills to locate appropriate sources of information regarding industry-specific technology
- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
  - seek feedback from users
- literacy skills to interpret technical documentation, equipment manuals and specifications
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - identify features of industry-specific technology
  - test and evaluate industry-specific technology
  - use industry-specific technology.

### Required knowledge

- broad awareness of current technology trends, directions in IT and specifically of the major industry technology standards used in the specified IT area
- vendor product directions relating to specified IT area
- current industry hardware and software products, with broad knowledge of their general features, capabilities and application
- information-gathering techniques.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify new and emerging industry-specific technologies</li> <li>• use features and functions of identified industry-specific technologies to an industry standard level.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where industry-specific technologies may be used</li> <li>• industry-specific technologies currently used in industry</li> <li>• documents detailing OHS standards, environmental guidelines and organisational requirements</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of features and functions of industry-specific technologies</li> <li>• direct observation of candidate using industry-specific technologies</li> <li>• simulation of industry-specific uses of the industry specific technologies.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Industry sector</i></b> may include:	<ul style="list-style-type: none"> <li>• business services or information worker</li> <li>• information and communication technology</li> <li>• telecommunication.</li> </ul>
<b><i>Industry-specific technologies</i></b> may include vendor-specific:	<ul style="list-style-type: none"> <li>• hardware</li> <li>• integrated services</li> <li>• internet access</li> <li>• mobile-communication devices</li> <li>• networks</li> <li>• peripherals</li> <li>• software.</li> </ul>
<b><i>Sources of information</i></b> may include:	<ul style="list-style-type: none"> <li>• appliances software and technical connections guidance and other outputs supplied by vendors and manufacturers</li> <li>• documents</li> <li>• test pages</li> <li>• vendor and manufacturer guidance regarding requisite depth of knowledge of industry-specific technologies</li> <li>• web pages.</li> </ul>
<b><i>Environmental considerations</i></b> may include:	<ul style="list-style-type: none"> <li>• correct disposal by an authorised body of redundant hardware: <ul style="list-style-type: none"> <li>• circuit boards</li> <li>• hard drives</li> <li>• motherboards</li> </ul> </li> <li>• recycling</li> <li>• safe disposal of packaging: <ul style="list-style-type: none"> <li>• cardboard</li> <li>• paper</li> <li>• plastic</li> <li>• polystyrene.</li> </ul> </li> </ul>
<b><i>Feedback</i></b> may include:	<ul style="list-style-type: none"> <li>• competency skill level</li> <li>• industry-validated demonstration of competency through certifications</li> <li>• interviews</li> <li>• meetings.</li> </ul>

## ICAICT306A Migrate to new technology

### Modification History

Version	Comments
ICAICT306A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use upgraded technology. It includes testing and evaluating new technologies to improve the organisation's performance.

### Application of the Unit

This unit applies to individuals engaged in ongoing review and research in order to identify and apply new technology or techniques to improve aspects of the organisation's activities. The unit emphasises the importance of constantly reviewing work processes, skills and techniques to ensure that the quality of the entire business process is maintained at the highest level possible through the appropriate application of new technology.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare to use new technology	1.1 Review organisation's goals and activities 1.2 Research new operational technologies that will advance the organisation's goals and activities 1.3 Prepare evaluation checklist 1.4 Evaluate and select the most appropriate technologies 1.5 Acquire selected <b>technology</b> 1.6 Identify and use new or upgraded <b>equipment</b> where appropriate, for the benefit of the organisation
2. Use technology to assist in solving organisational problems	2.1 Conduct testing of new or upgraded equipment 2.2 Use features and functions of new or upgraded equipment and <b>software</b> within the organisation 2.3 Access and use <b>sources of information</b> relating to new or upgraded equipment
3. Evaluate new or upgraded technology performance	3.1 Evaluate new or upgraded equipment for performance and usability against <b>OHS standards</b> and evaluation criteria 3.2 Determine <b>environmental considerations</b> from new or upgraded equipment 3.3 Seek <b>feedback</b> from users, where appropriate 3.4 Document new technology in a method consistent with organisation's guidelines

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate features and functions of new equipment and software
- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
  - seek feedback from users
- literacy skills to interpret technical documentation, equipment manuals and specifications
- planning and organisational skills to prioritise and monitor own work
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- research skills to locate appropriate sources of information regarding IT and new technologies
- technical skills to:
  - assist in the decision-making process
  - identify features of new technologies
  - test and evaluate new software and equipment.

### Required knowledge

- current technology trends and directions in IT:
  - hardware
  - new developments
  - new protocols
  - services
  - software
- current industry hardware and software products, with broad knowledge of general features and capabilities
- information-gathering techniques
- vendor product directions relating to specified technology.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify new and emerging technology in IT</li> <li>• conduct testing and evaluate new equipment for the benefit of the organisation</li> <li>• use features and functions of new technologies, including software and equipment.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where new technology may be used</li> <li>• new equipment and software currently used in industry</li> <li>• documents detailing OHS standards, environmental guidelines and organisational requirements</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of features and functions of new technology</li> <li>• direct observation of candidate using new technology</li> <li>• review of evaluation prepared by candidate evaluating upgraded technology performance</li> <li>• evaluation of currency of appropriate technology.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.

## Custom Content Section

Not applicable.

# ICAICT307A Customise packaged software applications for clients

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse, design, implement and review the customisation of packaged software applications, using simple programming constructs.

## Application of the Unit

This unit applies to individuals who focus on analysing the range of software-based activities in the workplace, in order to improve the processes involved.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Analyse customisation requirements	<p>1.1 Determine <i>client</i> requirements and document these in a requirement specifications file in line with <i>organisational requirements</i></p> <p>1.2 Confirm that projected specifications meet client requirements</p> <p>1.3 Determine required level of <i>documentation</i> necessary to meet client requirements</p>
2. Develop customisation	<p>2.1 Design <i>software applications</i>, taking into account <i>system</i> limitations and client needs</p> <p>2.2 Customise software applications using simple programming constructs, conforming to organisational requirements</p> <p>2.3 Obtain feedback from the client following client testing of the customised software applications</p> <p>2.4 Make further changes to software applications to meet client requirements</p> <p>2.5 Document the changes</p>
3. Provide support for customised application	<p>3.1 Produce documentation for client</p> <p>3.2 Produce help-desk documentation for ongoing support</p> <p>3.3 Obtain clients' evaluation and feedback to ensure that their requirements have been met</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse customisation requirements
- communication skills to:
  - communicate with clients
  - convey and clarify complex information
  - seek assistance and expert advice
- literacy skills to interpret technical documentation, equipment manuals and specifications
- planning and organisational skills to prioritise and monitor own work
- problem-solving skills to solve operational problems as they arise
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- research skills to locate appropriate sources of information regarding IT and new technologies
- technical skills to:
  - analyse and interpret technical aspects of implementation
  - customise applications
  - identify if new features are useful or desirable
  - operate software applications
  - use simple programming constructs.

### Required knowledge

- current industry-accepted hardware and software products, including their general features and capabilities
- functions and features of software applications suitable for client
- functions and features of the operating system (OS)
- IT structure and system infrastructure
- organisational OHS requirements relating to working with computer software
- organisational policy and procedures relating to customising software
- organisational security procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify and document client requirements to customise software applications</li> <li>• design software applications</li> <li>• analyse, implement and review customised software applications</li> <li>• produce documentation for client.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where software applications may be customised</li> <li>• use of customisable software applications currently used in industry</li> <li>• client requirements documentation</li> <li>• organisational requirements</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of a software package and how to modify it, using its built-in structures</li> <li>• direct observation of candidate modifying software applications to meet client requirements</li> <li>• review of: <ul style="list-style-type: none"> <li>• help-desk documentation prepared by candidate for ongoing support</li> <li>• feedback from client to ensure requirements have been met.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Client</b> may include:	<ul style="list-style-type: none"> <li>• employee</li> <li>• external organisation</li> <li>• individual</li> <li>• internal department.</li> </ul>
<b>Organisational requirements</b> may relate to:	<ul style="list-style-type: none"> <li>• preventative maintenance and diagnostic policy</li> <li>• problem solution processes</li> <li>• roles and technical responsibilities in the IT department</li> <li>• vendor and product service level support agreements</li> <li>• work environment.</li> </ul>
<b>Documentation</b> may refer to:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• client training</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• maintaining equipment inventory</li> <li>• naming standards</li> <li>• project-management templates and report writing</li> <li>• satisfaction reports</li> <li>• version control.</li> </ul>
<b>Software applications</b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications and organisation-specific software:             <ul style="list-style-type: none"> <li>• communication packages</li> <li>• database</li> <li>• graphic</li> <li>• presentation functionalities</li> <li>• spreadsheet</li> <li>• word-processing</li> </ul> </li> <li>• presentation applications contained in:             <ul style="list-style-type: none"> <li>• Claris Works</li> <li>• Lotus Suite</li> <li>• Microsoft Office</li> <li>• Star Office</li> <li>• other similar applications.</li> </ul> </li> </ul>

<i>System</i> may include:	<ul style="list-style-type: none"><li>• application</li><li>• business</li><li>• computers</li><li>• financial system</li><li>• information system</li><li>• management system</li><li>• network</li><li>• software.</li></ul>

General ICT

## ICAICT308A Use advanced features of computer applications

### Modification History

Version	Comments
ICAICT308A	This version first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use computer applications employing advanced features. It involves manipulating data and accessing support resources to solve routine problems.

### Application of the Unit

This unit applies to individuals who are expert users or advanced users and capable of tutoring colleagues in the use of commercial applications.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Manipulate data	<p>1.1 Employ <b><i>advanced features</i></b> of <b><i>applications</i></b> in the preparation and presentation of data</p> <p>1.2 Transfer data between applications, linking and embedding related data files as required</p> <p>1.3 Create and employ <b><i>objects</i></b>, macros and templates for routine activities</p> <p>1.4 Use shortcuts and features to increase personal productivity</p>
2. Access and use support resources	<p>2.1 Solve routine problems using support resources</p> <p>2.2 Use online help to overcome difficulties with applications</p> <p>2.3 Solve problems with manuals and training booklets</p> <p>2.4 Access and apply technical support for <b><i>system</i></b> problems, using troubleshooting results and alert messages</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with supervisors and peers
  - seek assistance and expert advice
  - use online help
- literacy skills to interpret technical documentation, equipment manuals and specifications
- planning and organisational skills to prioritise and monitor own work
- problem-solving skills to solve operational problems as they arise
- research skills to source support resources to solve routine problems
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - apply technical support for system problems
  - operate software applications
  - use applications features
  - use online help.

### Required knowledge

- basic knowledge of operating systems software and system tools
- vendor product directions in computer applications
- vendor applications and their features.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use at least three computer applications employing advanced features and import and export capacities for efficiency and productivity purposes</li> <li>• solve routine problems using support resources.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where advanced features of computer applications may be used</li> <li>• computer applications currently used in industry</li> <li>• documents or information containing data suitable to demonstrate advanced features of computer applications</li> <li>• support resources, including online, manuals and training booklets</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> <li>• support resources, including online, manuals and training booklets</li> <li>• advanced features of a number of computer applications</li> </ul> </li> <li>• direct observation of candidate: <ul style="list-style-type: none"> <li>• manipulating data between applications</li> <li>• creating and employing objects, macros and templates.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p>

	<p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Custom Content Section

Not applicable.

## ICAICT401A Determine and confirm client business requirements

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to determine client business requirements and verify the accuracy of the information gathered.

### Application of the Unit

This unit applies to information technology (IT) personnel who are required to gather information to determine business system requirements to meet client expectations and needs.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine context of business need or problem	<p>1.1 Establish the business <b><i>problem</i></b> to be investigated, including determining <b><i>system</i></b> boundaries, scope and the development methodology to be used</p> <p>1.2 Choose <b><i>information-gathering method</i></b> and develop questions appropriate to business problem</p> <p>1.3 Develop objectives and identify expected outcomes to be achieved</p> <p>1.4 Document the business problem</p> <p>1.5 Submit <b><i>documentation</i></b> to <b><i>appropriate person</i></b> for substantiation</p>
2. Gather information	<p>2.1 Use chosen information-gathering method to identify <b><i>clients</i></b> of the system and problems they encounter</p> <p>2.2 Record client responses</p> <p>2.3 Analyse gathered information to identify new <b><i>system requirements</i></b> and establish problem specifications</p> <p>2.4 Document system requirements and problems</p> <p>2.5 Analyse physical requirements and identify changes required to implement new systems</p>
3. Confirm system specifications	<p>3.1 Check documentation to ensure it meets client business needs</p> <p>3.2 Submit documentation to the client for verification of accuracy and approval</p> <p>3.3 Make changes to the documentation as necessary and indicated by the client</p> <p>3.4 Submit documentation to client for final approval or sign-off</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - collect and present information
  - liaise and negotiate with internal and external personnel
  - participate in teams
- initiative and enterprise skills to identify, analyse and evaluate information from a variety of sources
- literacy skills to:
  - gather, analyse and evaluate information
  - prepare documentation
- problem-solving skills to:
  - participate in the development of strategic initiatives and contribute to solutions
  - troubleshoot common system problems
- research skills to specify, analyse and evaluate broad features of a particular business domain
- technical skills to provide current advice on systems and data-gathering products.

### Required knowledge

- data-gathering techniques
- detailed knowledge in areas related to client business
- functional organisational charts and their interpretation
- physical requirements of the client's business, taking into account current system functionality, geography, environment, client user and cost constraints
- products related to data capture
- role of stakeholders and the degree of stakeholder involvement.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use investigative techniques to interview and document</li> <li>• produce a clear statement of business expectations and needs, including critical business requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• current business needs</li> <li>• a client expectations brief</li> <li>• business objectives</li> <li>• systems, data gathering and appropriate software products</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate documenting a business problem</li> <li>• verbal or written questioning to assess candidate's knowledge of techniques for gathering, analysing and documenting information</li> <li>• review of documented system specifications developed by candidate for approval by client.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Problem</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• system.</li> </ul>
<b><i>System</i></b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• cabling infrastructure</li> <li>• computers</li> <li>• financial information</li> <li>• management</li> <li>• network equipment</li> <li>• software.</li> </ul>
<b><i>Information-gathering method</i></b> may include:	<ul style="list-style-type: none"> <li>• focus groups or observation</li> <li>• interviews</li> <li>• physical-site surveys</li> <li>• questionnaires</li> <li>• surveys</li> <li>• vendor offerings.</li> </ul>
<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• standards: <ul style="list-style-type: none"> <li>• Australian Standards (AS)</li> <li>• Institute of Electrical and Electronics Engineers (IEEE)</li> <li>• International Electrotechnical Commission (IEC)</li> <li>• International Organization for Standardization (ISO)</li> <li>• Internet Engineering Task Force (IETF)</li> <li>• naming</li> </ul> </li> <li>• project management templates</li> <li>• report writing principles</li> <li>• version control.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

<i>Clients</i> may include:	<ul style="list-style-type: none"><li>• customers</li><li>• employees</li><li>• external organisations</li><li>• individuals</li><li>• internal departments.</li></ul>
<i>System requirements</i> may include:	<ul style="list-style-type: none"><li>• client user</li><li>• cost constraints</li><li>• environment</li><li>• geography</li><li>• system functionality.</li></ul>

## Unit Sector(s)

General ICT

# ICAICT402A Determine project specifications and secure client agreement

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop agreed acceptance criteria for a particular project.

## Application of the Unit

This unit applies to those involved in development or maintenance work in a variety of IT areas who are responsible for securing client sign-off to projects.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine milestones and quality attributes with client	<p>Interview <i>client</i> to determine <i>project</i> deliverables and <i>acceptance criteria</i></p> <p>Document project milestones and associated deliverables in measurable terms, taking into account <i>constraints</i></p> <p>Determine and document criteria to evaluate each deliverable</p> <p>Negotiate quality standards with client and document</p> <p>Confirm project direction with <i>appropriate person</i></p>
2. Formulate metrics and milestones	<p>Define the units of measurement (metrics) that will be used in the project, including consideration of project milestones, timeframe and costs</p> <p>Schedule the measurement of project milestones and associated deliverables</p> <p>Document the process for analysing variances and their impact on the project</p> <p>Schedule quality reviews into project plan</p>
3. Obtain client agreement to acceptance criteria	<p>Obtain client agreement for project delivery dates</p> <p>Communicate acceptance criteria clearly and coherently to the client</p> <p>Obtain client agreement to acceptance criteria and anticipated timeframes for the project</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - undertake function point
  - determine the metrics process in line with client requirements
- communication skills to:
  - facilitate groups
  - liaise and negotiate with clients and team members
  - present, transfer and collect information and gain consensus
- literacy skills to deal with clients and team members
- planning and organisational skills to:
  - participate in the development of strategic initiatives
  - undertake risk management
  - undertake scoping, timeframe, cost, and quality of a project
  - determine communications for a project
- research skills to specify, analyse and evaluate broad features of a particular business domain and best practice in system development methodologies
- technical skills to formulate system development and milestones.

### Required knowledge

- detailed knowledge of:
  - client business area
  - project planning methodologies and tools
  - quality processes
  - system development plans
  - technical tools and their use relating to task list, such as when formulating metrics and milestones
  - theory and purpose of metrics.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop acceptance criteria for a project</li> <li>• document this according to organisational standards</li> <li>• present this document to stakeholders and obtain approval.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• client requirements</li> <li>• technical specifications</li> <li>• organisational and process goals</li> <li>• critical business requirements</li> <li>• predefined high-level acceptance criteria</li> <li>• project deliverables</li> <li>• future organisational business processes</li> <li>• test plan</li> <li>• project-budget timeframe.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate performing review of quality attributes</li> <li>• verbal or written questioning to assess candidate's knowledge of formulating metrics and milestones</li> <li>• review of candidate's acceptance criteria and timeframes for approval by client.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Project</i></b> may include:	<ul style="list-style-type: none"> <li>• business improvement process</li> <li>• ebusiness solution involving the total organisation or part of the organisation</li> <li>• systems-only change</li> <li>• total organisational change.</li> </ul>
<b><i>Acceptance criteria</i></b> may include:	<ul style="list-style-type: none"> <li>• cost implications</li> <li>• logistical considerations</li> <li>• technical</li> <li>• timeframe.</li> </ul>
<b><i>Constraints</i></b> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• hardware</li> <li>• legal constraints</li> <li>• policy</li> <li>• resource</li> <li>• software</li> <li>• time.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT403A Apply software development methodologies

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply traditional and non-traditional systems development methodologies.

### Application of the Unit

This unit applies to those working in a senior development role in a range of information and communications technology (ICT) areas who choose and apply appropriate development methodologies.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine and select appropriate methodology for a given activity	1.1 Determine and define subject activity 1.2 Define criteria for selection of development <b>methodology</b> 1.3 Review and evaluate a range of <b>traditional and non-traditional system development methodologies</b> 1.4 Select appropriate system development methodology to suit the activity
2. Apply the selected development methodology	2.1 Create an initial <b>project</b> plan to guide developmental processes 2.2 Identify appropriate <b>task types</b> according to development methodology 2.3 Clearly describe and articulate task types 2.4 Define appropriate <b>control structures</b> that need to be created during task type execution 2.5 Associate each task type with a set of <b>input and output</b> parameters
3. Adjust project to suit appropriate methodology	3.1 Identify resources to support methodology selection 3.2 Apply appropriate methodology to solve tasks 3.3 Monitor project flow and record effectiveness against project plan 3.4 Review and document opportunities for improvement, lessons learned and recommendations for future projects 3.5 Submit results to <b>appropriate person</b> for approval

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse the benefits of one methodology over another
- communication skills to:
  - gain consensus on concepts when planning the application of the methodology to the project
  - present information
- literacy skills to:
  - prepare reports required by development methodology
  - write business reports
- planning and organisational skills to:
  - develop project plan
  - manage system development
- problem-solving skills to select development methodology suitable to a client business context
- technical skills to evaluate development methodologies.

### Required knowledge

- client business domain and organisational requirements
- current project requirements
- role of stakeholders and the degree of stakeholder involvement in the development process
- two or more current industry development methodologies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop a project plan</li> <li>• apply a methodology to a project</li> <li>• produce documentation as required by the chosen methodology.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• design specifications and current methodologies</li> <li>• organisational standards for documentation and version control</li> <li>• detailed user requirements document, including model and scope</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate conducting the stages of a development methodology within the scope of a project</li> <li>• verbal or written questioning to assess candidate's knowledge of a variety of system development methodologies and their application to a systems project</li> <li>• review of supporting documentation produced by candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Methodology</i></b> may include:	<ul style="list-style-type: none"> <li>• traditional methodology</li> <li>• non-traditional methodology.</li> </ul>
<b><i>Traditional system development methodologies</i></b> may include:	<ul style="list-style-type: none"> <li>• design methodology</li> <li>• structured systems analysis</li> <li>• system development life cycle.</li> </ul>
<b><i>Non-traditional system development methodologies</i></b> may include:	<ul style="list-style-type: none"> <li>• multi-view</li> <li>• object-oriented analysis and design</li> <li>• prototyping</li> <li>• soft system methodology.</li> </ul>
<b><i>Project</i></b> may include:	<ul style="list-style-type: none"> <li>• business improvement process</li> <li>• ebusiness solution involving the total organisation or part of the organisation</li> <li>• systems-only change</li> <li>• total organisational change.</li> </ul>
<b><i>Task types</i></b> may include:	<ul style="list-style-type: none"> <li>• development process activities</li> <li>• cultural</li> <li>• organisational</li> <li>• procedural.</li> </ul>
<b><i>Control structures</i></b> may include:	<ul style="list-style-type: none"> <li>• acceptance criteria</li> <li>• inspection</li> <li>• review process</li> <li>• test plans.</li> </ul>
<b><i>Input and output</i></b> may include:	<ul style="list-style-type: none"> <li>• pre-conditional options, such as a check to confirm that inputs fulfil specific requirements</li> <li>• post-conditional options, such as a check that outputs have met quality requirements.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT404A Use online learning tools

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to use the internet as a resource to acquire knowledge and skills to meet client requirements.

### Application of the Unit

This unit applies to those who use the internet to maintain currency of workplace skills. This unit applies to those who use the internet to maintain currency of workplace skills.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify learning requirements	1.1 Identify <i>learning requirements</i> and skill gaps 1.2 Seek advice from <i>relevant personnel</i> on learning requirements and skill gaps 1.3 Identify opportunities for undertaking <i>learning development activities</i> 1.4 Develop learning plan
2. Research learning tools available online	2.1 Identify existing <i>online learning tools</i> 2.2 Research and evaluate other relevant online learning tools
3. Undertake learning	3.1 Implement learning plan 3.2 Identify opportunities in the workplace to apply new learning 3.3 Follow coaching or mentoring advice in work activities
4. Monitor learning effectiveness	4.1 Determine suitable assessment mode 4.2 Review outcomes of assessment 4.3 Undertake <i>peer assessment</i> 4.4 Assess <i>feedback</i> from peer assessment, individuals and colleagues 4.5 Identify further learning requirements

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - determine learning requirements and skill gaps
  - review assessment outcomes
- communication skills to:
  - give and receive feedback
  - seek advice
- learning skills to undertake online learning
- literacy skills to interpret online information about training requirements, company policies and procedures
- planning and organisational skills to organise learning-related activities
- research skills to find online learning tools
- technical skills to:
  - access the internet
  - use a web browser.

### Required knowledge

- basic knowledge of:
  - current and future industry trends
  - legislation and statutory requirements
  - online training tools
  - principles and techniques of measuring performance and self-assessment
  - relevant competency standards and assessment processes
  - organisational training policies, plans and procedures
- overview knowledge of:
  - methods to identify and prioritise required learning needs
  - systems and processes to direct required learning.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use online learning tools to gain knowledge and skills to meet client requirements</li> <li>• maintain currency of skills within the workplace.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• the internet to use online learning tools</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning on knowledge of online learning tools</li> <li>• review of candidate's development plan outlining learning requirements.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Learning requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• learning due to new software or upgrades</li> <li>• maintaining currency of skills within industry.</li> </ul>
<b><i>Relevant personnel</i></b> may include:	<ul style="list-style-type: none"> <li>• coach or mentor</li> <li>• external consultants, teachers or trainers</li> <li>• peers, work colleagues, team or enterprise</li> <li>• supervisor or training manager</li> <li>• training development officer or assessor.</li> </ul>
<b><i>Learning development activities</i></b> may include:	<ul style="list-style-type: none"> <li>• career planning and development</li> <li>• coaching, mentoring or supervision</li> <li>• formal internal or external training provision</li> <li>• informal internal training provision</li> <li>• personal study</li> <li>• work experience, exchange or opportunities</li> <li>• workplace skills assessment.</li> </ul>
<b><i>Online learning tools</i></b> may include:	<ul style="list-style-type: none"> <li>• bookmarking systems</li> <li>• content management systems (CMS) and annotation systems</li> <li>• knowledge-based repositories</li> <li>• networked learning</li> <li>• online books and manuals</li> <li>• online tutorials</li> <li>• weblogs (blogs), wikis, podcasting, syndicated feeds and collaboration tools.</li> </ul>
<b><i>Assessment</i></b> may include:	<ul style="list-style-type: none"> <li>• offline exams</li> <li>• online exams.</li> </ul>
<b><i>Peer assessment</i></b> may include:	<ul style="list-style-type: none"> <li>• external assessment</li> <li>• review of outcomes.</li> </ul>
<b><i>Feedback</i></b> may include:	<ul style="list-style-type: none"> <li>• formal and informal performance appraisals</li> <li>• obtaining comments from clients, supervisors and colleagues</li> <li>• online feedback results</li> <li>• receiving guidance, technical support and information to assist performance</li> <li>• workplace assessment.</li> </ul>

Release 1	This Unit first released with <i>ICAIT Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to assist in the development of a detailed technical design.

### Application of the Unit

This unit applies to individuals performing systems design tasks who are required to review and update technical design documents.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Assist in selecting technical design features	1.1 Select and revise design model based on iteration and design changes 1.2 Incorporate outstanding design points according to <b><i>acceptance criteria</i></b> 1.3 Distribute reports identifying changes and implications to <b><i>appropriate person</i></b> for review
2. Contribute to design review	2.1 Compare design against <b><i>requirements</i></b> and fix as necessary 2.2 Confirm design with appropriate person 2.3 Use <b><i>feedback mechanisms</i></b> to gather information on design changes from <b><i>client</i></b> 2.4 Incorporate design changes where required
3. Contribute to development of program specifications	3.1 Implement modules by incremental development techniques 3.2 Identify user authority for each module 3.3 Prepare detailed specifications of module implementation for each module that will not be incrementally built 3.4 Prepare documentation according to requirements of the <b><i>project</i></b>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with client when:
  - transferring and collecting information
  - presenting information and gaining consensus on concepts
- literacy skills to prepare technical documentation
- problem-solving skills to:
  - develop algorithms
  - participate in the development of strategic initiatives
  - revise the design model
- technical skills to incorporate required changes to model.

### Required knowledge

- client business domain and client's critical business functions and processes
- current various life cycle options
- design fundamentals and refinement
- design quality metrics.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• design and prepare a clear and best-fit technical design for a set project, incorporating:             <ul style="list-style-type: none"> <li>• changes to design model based on user requirements</li> <li>• detailed specification of modules</li> <li>• updated documentation to reflect changes.</li> </ul> </li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• requirements model</li> <li>• business requirements</li> <li>• project deliverables</li> <li>• acceptance criteria</li> <li>• current information technology (IT) blueprint</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of the principles of technical designs</li> <li>• review of project documentation, particularly including design model and module specifications</li> <li>• review of client-feedback mechanisms.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Acceptance criteria</i></b> may include:	<ul style="list-style-type: none"> <li>• cost implications</li> <li>• logistical considerations</li> <li>• technical</li> <li>• timeframe.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Feedback mechanisms</i></b> may include:	<ul style="list-style-type: none"> <li>• interviews</li> <li>• meetings</li> <li>• questionnaires</li> <li>• surveys.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• clubs</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees.</li> </ul>
<b><i>Project</i></b> may include:	<ul style="list-style-type: none"> <li>• business improvement process</li> <li>• business involved in a total organisational change</li> <li>• ebusiness solution involving the total organisation or part of the organisation</li> <li>• systems-only change.</li> </ul>

# ICAICT406A Build a graphical user interface

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design, build and test a graphical user interface (GUI) to specification.

## Application of the Unit

This unit applies to programmers in a variety of fields who are required to develop the system's graphical interface with users.

GUIs take commands from input devices and expect the underlying operating system (OS) to carry out a function.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine specification of GUI	1.1 Review GUI <b>requirements</b> 1.2 Review organisational <b>standards</b> for GUI 1.3 Determine the back-end for interfacing with the GUI 1.4 Determine the functionality of the GUI, including back-end interface 1.5 Determine the <b>application development language</b> for writing the GUI 1.6 Determine type and level of <b>documentation</b> required
2. Design GUI to specification	2.1 Design the GUI incorporating the required functionality 2.2 Document design outcomes
3. Build GUI to specification	3.1 Build the GUI with the required functionality in the determined language, using the toolkit's classes or widgets, containers and other pertinent features
4. Test and document GUI to meet specification	4.1 Test GUI for overall functionality according to requirements 4.2 Iterate GUI design or build until test results meet requirements 4.3 Produce technical documentation for the GUI

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with clients
- literacy skills to:
  - produce GUI documentation
  - understand requirements, documents and standards
- problem-solving skills to solve programming problems that may arise
- technical skills to:
  - debug the programming language where appropriate
  - program using the specified programming language
  - use a range of software packages
  - use a workstation
  - use appropriate languages during GUI development.

### Required knowledge

- detailed knowledge of:
  - object-oriented programming concepts
  - system properties
- features of application programming interface (API)
- issues relating to copyright and intellectual property
- overview knowledge of Australian Computer Society Code of Ethics
- relevant commonwealth and state privacy and information access legislation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• build a GUI to requirements</li> <li>• demonstrate a GUI in concept and compiled form, using a development tool to assist GUI construction</li> <li>• provide appropriate documentation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• GUI requirements</li> <li>• organisational standards</li> <li>• development environment.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of programming concepts and system properties</li> <li>• evaluation of GUI completed by candidate</li> <li>• review of documentation produced by candidate for GUI.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Requirements</b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b>Standards</b> may include:	<ul style="list-style-type: none"> <li>• industry recommendations</li> <li>• organisational standards.</li> </ul>
<b>Application development language</b> may include:	<ul style="list-style-type: none"> <li>• Codemesh</li> <li>• Eclipse (open source)</li> <li>• EMACS</li> <li>• EPP</li> <li>• eXtensible pre-processor kit</li> <li>• GTK2</li> <li>• Java 2 SDK</li> <li>• Java Runner</li> <li>• JBuilder 3.5, Visual Age 3.0</li> <li>• Netscape Directory SDK for Java: Source Code, Borland Enterprise Studio for Java</li> <li>• QT and KDevelop</li> <li>• Visual Basic</li> <li>• Visual C++</li> <li>• Visual J++.</li> </ul>
<b>Documentation</b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• client training</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• maintaining equipment inventory</li> <li>• naming standards</li> <li>• project management templates and report writing</li> <li>• satisfaction reports</li> <li>• version control.</li> </ul>

## ICAICT407A Maintain website information standards

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish and maintain the accuracy and usability of information stored on client websites.

### Application of the Unit

This unit applies to individuals working in the web area who are required to ensure that information on client websites is clear and accurate.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Prepare and publish organisational content and information required by industry for website</p>	<p>1.1 Validate organisational information and seek approval prior to uploading to a website</p> <p>1.2 Ensure specific <i>details</i> of the organisation are made available on the website</p> <p>1.3 Ensure privacy, security and liability statements are correctly displayed on the website and conform to <i>legislative requirements</i> and <i>web development standards</i></p> <p>1.4 Develop and make available <i>organisational information</i></p>
<p>2. Provide navigation links and payment information</p>	<p>2.1 Ensure website users have navigation links to access appropriate information regardless of where they are located within the website</p> <p>2.2 List various payment options on the website</p>
<p>3. Ensure disclosure of policies and services</p>	<p>3.1 Present a clear website statement outlining <i>charges</i></p> <p>3.2 Present <i>warranty information</i> on appropriate screen, prior to finalising orders</p> <p>3.3 Provide <i>after-sales support</i> and services information and direct website user to its location</p> <p>3.4 Ensure website contains policies regarding cancellations, returns and refunds, and associated conditions</p>
<p>4. Communicate product or service conditions and notifications</p>	<p>4.1 Ensure appropriate screens display limitations and legislative restrictions on who or where goods and services will be sold or shipped to</p> <p>4.2 Ensure the website provides facilities to confirm orders and cancellations as quickly as possible</p> <p>4.3 Ensure website provides facilities to communicate to client with minimum delay, details of orders, hold-ups or errors with ordered or cancelled goods or services, information about changed costs or adjustments, and expected date of arrival</p>
<p>5. Ensure customer service support</p>	<p>5.1 Explain service <i>standards</i> and make them available to all potential and current website users</p> <p>5.2 Ensure website users have a method for providing feedback on aspects of information held on the website</p> <p>5.3 Ensure acknowledgements of complaints are transmitted to website users lodging complaints, with a description of what will take place within the organisation to address issues raised</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to collect and evaluate organisational information for web publication
- communication skills to liaise and negotiate with colleagues and clients
- literacy skills to:
  - document information for websites
  - interpret and write organisational policy
  - interpret legislative and standards requirements
- technical skills to:
  - analyse websites
  - archive information
  - publish on a website
  - write hypertext markup language (HTML) code.

### Required knowledge

- consumer protection legislation
- content features, including clarity and readability
- document design, web design and usability
- electronic commerce modelling language
- information architecture
- instructional design principles
- obligations of merchants and service providers
- organisational requirements
- privacy legislation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• evaluate and analyse current practices</li> <li>• interpret organisation, legislative and industry requirements</li> <li>• develop policy</li> <li>• provide a site accessible to a variety of customers via electronic communication</li> <li>• ensure that information meets all the requirements for an effective and efficient e-commerce interaction.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• range of organisational policies, procedures and guidelines</li> <li>• customer service manuals and general data</li> <li>• appropriate organisational structures</li> <li>• information standards for legislative and organisational requirements</li> <li>• software and web development tools</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate publishing various items of information on a site</li> <li>• verbal or written questioning to assess candidate's knowledge of client and user requirements regarding product/service conditions and notifications</li> <li>• review of site navigation, links, and site copyright and general information.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Details</b> may include:	<ul style="list-style-type: none"> <li>• contact details</li> <li>• physical address</li> <li>• virtual details for online communications</li> <li>• web presence information.</li> </ul>
<b>Legislative requirements</b> may include:	<ul style="list-style-type: none"> <li>• copyright</li> <li>• liability statements</li> <li>• privacy legislation.</li> </ul>
<b>Web development standards</b> may include:	<ul style="list-style-type: none"> <li>• Authoring Tool Accessibility Guidelines (ATAG)</li> <li>• User Agent Accessibility Guidelines (UAAG)</li> <li>• Web Content Accessibility Guidelines (WCAG).</li> </ul>
<b>Organisational information</b> may include:	<ul style="list-style-type: none"> <li>• copyright notice on website if required</li> <li>• information to notify the website user of which country the website is located in</li> <li>• information with regard to licences or qualifications or memberships needed by potential users of the website</li> <li>• local laws applicable to transactions that may be conducted</li> <li>• notation on website indicating when the site was last updated</li> <li>• policy on how information gathered on website users by the website will be handled.</li> </ul>
<b>Charges</b> may include:	<ul style="list-style-type: none"> <li>• product or service costs</li> <li>• shipping and handling charges and taxes to the customer prior to finalising orders.</li> </ul>
<b>Warranty information</b> may include:	<ul style="list-style-type: none"> <li>• length of warranty</li> <li>• time limits on warranty coverage</li> <li>• what is covered</li> <li>• what is not covered</li> <li>• who administers the warranty.</li> </ul>
<b>After-sales support</b> may include:	<ul style="list-style-type: none"> <li>• duration of service and support</li> <li>• nature of service and support</li> <li>• under what circumstances it is provided or made available</li> <li>• who is responsible for it.</li> </ul>
<b>Standards</b> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> </ul>

	<ul style="list-style-type: none"><li>• organisational standards</li><li>• project standards.</li></ul>

## Unit Sector(s)

General ICT

## ICAICT408A Create technical documentation

### Modification History

Version	Comments
ICAICT408A	This version first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create technical documentation that is clear to the target audience and easy to navigate.

### Application of the Unit

This unit applies to technical writers, designers, developers and support staff who are required to produce technical support documents of their work.

Technical documentation provides a record of the functionality and processing of a system, program, network or application. The technical documentation should document how the system, program, network or application is structured, how it works and changes that have been made to it.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify and analyse documentation requirements and client needs	<p>1.1 Consult with <i>client</i> to identify documentation <i>requirements</i></p> <p>1.2 Interpret and evaluate documentation requirements and confirm details with client</p> <p>1.3 Investigate industry and <i>documentation standards</i> for requirements</p> <p>1.4 Define and document the scope of work to be produced</p> <p>1.5 Consult with client to validate and confirm the scope of work</p>
2. Design documentation	<p>2.1 Identify information requirements with reference to layout and document structure</p> <p>2.2 Create document templates and style guides consistent with information requirements</p> <p>2.3 Conduct a review of the <i>system</i> in order to understand its functionality</p> <p>2.4 Extract content that meets information requirements according to copyright restrictions</p> <p>2.5 Develop the structure of the <i>technical documentation</i> giving focus to the flow of information, style, tone and <i>content</i> format</p> <p>2.6 Validate the technical documentation structure with the client</p>
3. Develop documentation	<p>3.1 Write technical documentation based on the template and scope of work using the information gathered</p> <p>3.2 Translate technical terminology into plain English where appropriate</p> <p>3.3 Apply content format and style according to documentation standards and templates</p>
4. Evaluate and edit documentation	<p>4.1 Submit technical documentation to <i>appropriate person</i> for review</p> <p>4.2 Gather and analyse feedback</p> <p>4.3 Incorporate alterations into the technical documentation</p> <p>4.4 Edit the technical documentation for technical and grammatical accuracy</p>
5. Prepare documentation for publication	<p>5.1 Check that the completed technical documentation meets client requirements and scope of work</p> <p>5.2 Submit the technical documentation to appropriate person for approval</p> <p>5.3 Prepare the technical documentation for publication and</p>

	distribution using appropriate <i>channels</i>
--	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to interact with clients and staff
- literacy skills to:
  - identify content
  - interpret standards and industry requirements
  - write content
- research skills to:
  - analyse audience needs
  - identify target audiences
- technical skills to:
  - determine appropriate content, formats and styles
  - use word-processing software and multimedia authoring tools.

### Required knowledge

- content features, such as clarity and readability
- document design, web design and usability
- functions and features of templates and style guides
- instructional design principles
- organisational policies, procedures and standards that cover document design.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• establish customer needs</li> <li>• design and develop technical documentation, such as system, procedures, training material and user guides, incorporating appropriate standards</li> <li>• update document with client feedback</li> <li>• prepare documentation for publication.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• technical specifications</li> <li>• documentation standards</li> <li>• organisational resources and documentation</li> <li>• information about system, platform, network or application being documented</li> <li>• relevant standards</li> <li>• appropriate word-processing software</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate reviewing a system to establish its functionality</li> <li>• verbal or written questioning to assess candidate's knowledge of copyright and other requirements relating to technical content</li> <li>• review of technical documentation developed by candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees.</li> </ul>
<b><i>Requirements</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• organisational policies</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Documentation standards</i></b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS)</li> <li>• naming conventions</li> <li>• organisational standards</li> <li>• policy relating to: <ul style="list-style-type: none"> <li>• distribution</li> <li>• revision</li> <li>• sign-off</li> <li>• storage</li> </ul> </li> <li>• project-management templates and report-writing principles</li> <li>• version control.</li> </ul>
<b><i>System</i></b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• computers</li> <li>• financial</li> <li>• information</li> <li>• management</li> <li>• network</li> <li>• software.</li> </ul>
<b><i>Technical documentation</i></b> may	<ul style="list-style-type: none"> <li>• brochures</li> <li>• help references</li> </ul>

include:	<ul style="list-style-type: none"> <li>• online help</li> <li>• operational procedures</li> <li>• reports</li> <li>• self-paced tutorials</li> <li>• system design</li> <li>• system functionality</li> <li>• system or project specifications</li> <li>• technical manuals</li> <li>• training materials</li> <li>• user guides.</li> </ul>
<i>Content</i> may include:	<ul style="list-style-type: none"> <li>• information and interactive features: <ul style="list-style-type: none"> <li>• background articles</li> <li>• company information</li> <li>• copyright and disclaimer notices</li> <li>• customer only information</li> <li>• customer-specific information</li> <li>• error messages</li> <li>• feedback mechanisms</li> <li>• forms</li> <li>• frequently asked questions</li> <li>• hyperlink titles</li> <li>• instructions</li> <li>• product information</li> <li>• ratings or rankings</li> <li>• testimonials</li> <li>• quotes from reviews</li> <li>• reference pages</li> <li>• site map</li> <li>• what's new.</li> </ul> </li> </ul>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

# ICAICT409A Develop macros and templates for clients using standard products

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop macros and templates for clients using industry-recognised software applications.

## Application of the Unit

This unit applies to persons working in an office environment in which documents play a major role in communication and business activity.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine macro or template requirement	1.1 Determine <i>client</i> requirements, ensuring they are in line with <i>organisational guidelines</i> 1.2 Develop macro or template specification 1.3 Confirm that macro or template specification meets client's needs and operational guidelines 1.4 Determine <i>documentation</i> requirements
2. Develop macro or template for client	2.1 Develop macro or template to specification using industry-recognised <i>software applications</i> 2.2 Demonstrate macro or template to client and obtain feedback 2.3 Amend macro or template, as required by client 2.4 Update macro or template specification
3. Provide client support for macro or template	3.1 Document support and instruction requirements 3.2 Provide documentation to client help desk for future support

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to troubleshoot the operation of macros
- communication skills to:
  - demonstrate application to client and obtain feedback
  - liaise with clients
- literacy skills to:
  - document instructions
  - interpret software manual instructions
- technical skills to employ macros, such as creating a particular keyboard key combination for each macro or by assigning it to a custom button on a toolbar.

### Required knowledge

- features and functions of particular categories of commercial computing packages, in particular procedures for:
  - creating macros and using default templates supplied by the software application package
  - creating new macros and templates
- functions and features of the operating system
- features and functions of software and hardware supported by the organisation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>develop a variety of macros and templates using at least two industry-recognised application packages.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>documents detailing organisational style guide and policies</li> <li>personal computer where software installation may be performed</li> <li>internet connection</li> <li>networked computers</li> <li>server and workstation hardware and software</li> <li>style guides and design brief</li> <li>technical documentation and installation manuals</li> <li>use of software currently used in industry</li> <li>appropriate learning and assessment support when required</li> <li>modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>verbal or written questioning to assess candidate's knowledge of procedures for creating macros and using default templates</li> <li>direct observation of candidate demonstrating macro and template use</li> <li>review of the candidate's documentation</li> <li>evaluation of candidate's help-desk support provided to the client.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employee</li> <li>• external organisation</li> <li>• individual</li> <li>• internal department.</li> </ul>
<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• content of emails</li> <li>• downloading information and accessing particular websites</li> <li>• opening mail with attachments</li> <li>• personal use of email and internet access</li> <li>• virus risk.</li> </ul>
<b><i>Documentation</i></b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project management templates</li> <li>• report writing protocols</li> <li>• version control.</li> </ul>
<b><i>Software applications</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial software applications</li> <li>• communication packages</li> <li>• database</li> <li>• graphic</li> <li>• organisation-specific software</li> <li>• presentation functionalities</li> <li>• spreadsheet</li> <li>• word-processing.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT410A Conduct post-implementation IT system reviews

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to plan and execute an IT system review following implementation at a point where the system has been operational for some time.

## Application of the Unit

This unit applies to in a range of information and communications technology (ICT) development roles required to review the success of a project with a view to contributing to best practice for future projects.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Schedule review	1.1 Review <b><i>organisational guidelines</i></b> and criteria procedures to identify system implementation results 1.2 Convert the review process into specific criteria 1.3 Contact the <b><i>appropriate person</i></b> to schedule timing and venue of review 1.4 Prepare work schedule for the review based on organisation guidelines and identify action, items and staff involved 1.5 Contact appropriate vendor and other organisations, regarding support or service commitments
2. Carry out review	2.1 Explain the purpose of the review to <b><i>stakeholders</i></b> 2.2 Use techniques to obtain data on the areas under review
3. Document and publish results	3.1 Document and record information relating to the system review 3.2 Distribute review results and related documentation to stakeholders 3.3 Gather feedback from stakeholders about review document 3.4 Schedule additional meetings to discuss review findings with stakeholders 3.5 Finalise recommendations and action items from the review and distribute to appropriate person

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to obtain data on areas under review
- communication skills to liaise with stakeholders, vendors and other organisations
- literacy skills to:
  - review organisational guidelines
  - write accurate case notes
- planning and organisational skills to:
  - conduct meetings
  - prepare work schedule and organise staff
- problem-solving skills to resolve issues relating to system review
- technical skills to discuss system software and hardware issues with stakeholders.

### Required knowledge

- client business domain
- current industry-accepted hardware and software products
- implementation process and issues
- review techniques
- specific project concerned
- role of stakeholders and the degree of stakeholder involvement in a review.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• plan a review of the system after the implementation has been completed and has been operational for some time</li> <li>• carry out this review</li> <li>• document the results.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• personal computer (PC) where software installation may be performed</li> <li>• use of software currently used in industry</li> <li>• documents detailing organisational style guide or policies</li> <li>• server and workstation hardware and software</li> <li>• internet connection</li> <li>• operational system and specifications</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of purpose of post-implementation reviews</li> <li>• direct observation of candidate facilitating meetings</li> <li>• evaluation of candidate's documented system review.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsor</li> <li>• user.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT411A Select and employ software and hardware testing tools

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICA11 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to select and use software and hardware diagnostic and testing tools.

## Application of the Unit

This unit applies to individuals in a wide range of information and communications technology (ICT) areas who are required to test software and hardware.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish process operational requirements	<p>1.1 Identify process <i>requirements</i> ensuring they are accurate, complete, prioritised, and have functionality, and reference appropriate method or media types</p> <p>1.2 Identify conflicting or overlapping requirements</p> <p>1.3 Document and validate functional requirements of the <i>client</i></p> <p>1.4 Identify and validate available resources and budget</p>
2. Select hardware and software for processing function	<p>2.1 Identify and evaluate relevant <i>hardware</i> and <i>software</i> tools with reference to functional requirements</p> <p>2.2 Identify and analyse relevant products and <i>equipment</i> interdependencies with reference to functional requirements and <i>system architecture</i></p> <p>2.3 Identify and document appropriate tools, including their limitations for the required use and industry <i>standards</i></p> <p>2.4 Select and acquire tools according to purchasing policies</p>
3. Configure and test hardware and software	<p>3.1 Install and configure appropriate hardware and software tools according to vendor guidelines with reference to system architecture and client functionality requirements</p> <p>3.2 Configure system architecture for optimal usage</p> <p>3.3 Prepare, schedule and execute tests and record outcomes</p> <p>3.4 Track errors, and interpret and correct them</p> <p>3.5 Make changes to the tested hardware or software based on test results</p> <p>3.6 Document the hardware and software configuration according to requirements</p>
4. Use and validate software and hardware	<p>4.1 Provide appropriate training of client with reference to guides, instructions and vendor materials</p> <p>4.2 Use hardware and software according to vendor guidelines</p> <p>4.3 Validate hardware and software performance with reference to client functional requirements</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse:
  - customisation requirements
  - hardware and software functional requirements
- communication skills to:
  - communicate with vendors
  - convey and clarify complex information
  - seek assistance and expert advice
- literacy skills to:
  - accurately summarise and document information
  - interpret technical documentation, equipment manuals and specifications
- planning and organisational skills to:
  - organise and assess importance and relevance of product information
  - prioritise and monitor own work
- problem-solving skills to solve operational problems as they arise
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- research skills to locate key sources of information
- technical skills to:
  - analyse and interpret technical aspects of implementation
  - develop creative solutions and demonstrate automating process capability
  - identify the conflicts and integration capabilities between diverse equipment
  - integrate multiple items of data and reconcile conflicting information
  - predict outcomes and results of selection of tools.

### Required knowledge

- batch scripting of nominated automating software routines
- broad general knowledge of the client business domain
- broad knowledge of vendor product directions
- current industry-accepted hardware and software products, and their features and capabilities
- functions and features of:
  - development tools, including animation development tools
  - development package automating options
  - third-party tools for automating a range of software applications
  - media management tools
  - technologies
- interaction between relevant hardware and software products
- basic design principles of each media type as required.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• evaluate hardware and software that meet functional requirements</li> <li>• select and use the correct automating tools</li> <li>• develop an automating process that produces an outcome that is measurable and meets specified requirements</li> <li>• install, configure and document hardware and software according to vendor guidelines</li> <li>• validate hardware and software performance against client requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where automated processing may be carried out</li> <li>• hardware and software currently used in industry</li> <li>• a range of automating vendor products currently used in industry</li> <li>• client requirements documentation</li> <li>• organisational requirements.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of:             <ul style="list-style-type: none"> <li>• client domain</li> <li>• hardware and software to be tested</li> <li>• automated processes</li> </ul> </li> <li>• direct observation of candidate installing, configuring and testing hardware and software tools according to vendor guidelines</li> <li>• review of documentation prepared by candidate outlining:             <ul style="list-style-type: none"> <li>• hardware and software configuration</li> <li>• tests to be carried out</li> <li>• evaluation of test results.</li> </ul> </li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Requirements</b> may be related to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b>Client</b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b>Hardware</b> may include:	<ul style="list-style-type: none"> <li>• modems and other connectivity devices, such as digital subscriber line (DSL) modems</li> <li>• networks</li> <li>• personal computers</li> <li>• remote sites</li> <li>• servers</li> <li>• workstations.</li> </ul>
<b>Software</b> may include:	<ul style="list-style-type: none"> <li>• commercial applications</li> <li>• customised</li> <li>• in-house</li> <li>• organisation-specific</li> <li>• packaged.</li> </ul>
<b>Equipment</b> may include:	<ul style="list-style-type: none"> <li>• other peripherals or stand-alone units</li> <li>• personal computers</li> <li>• workstations.</li> </ul>
<b>System architecture</b> may include:	<ul style="list-style-type: none"> <li>• configuration: <ul style="list-style-type: none"> <li>• large memory model</li> <li>• requests per second</li> <li>• small memory model</li> </ul> </li> <li>• database software: <ul style="list-style-type: none"> <li>• DB2</li> <li>• Informix</li> <li>• Ingres</li> <li>• Microsoft Structured Query Language Server (SQLS)</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• Mini SQL (mSQL)</li> <li>• MySQL</li> <li>• Oracle</li> <li>• Postgre Structured Query Language (Postgre SQL)</li> <li>• Sybase</li> <li>• operating systems: <ul style="list-style-type: none"> <li>• Linux</li> <li>• Mac</li> <li>• multi-user ability</li> <li>• Novell NetWare</li> <li>• Windows.</li> </ul> </li> </ul>
<i>Standards</i> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• organisational standards</li> <li>• project standards.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT412A Coordinate and maintain IT work teams

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to establish and improve work teams and their performance in an information technology (IT) environment.

### Application of the Unit

This unit applies to those employed in a range of information and communications technology (ICT) roles who are required to manage teams.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish team	<p>1.1 Select and identify suitable <i>team members</i> for a particular project or <i>problem</i></p> <p>1.2 Secure agreement from appropriate persons for release of team members</p> <p>1.3 Identify the type of work <i>team</i></p> <p>1.4 Determine time allocation for team members to suit <i>team operations</i> or nature of the project or problem</p> <p>1.5 Define team and individual responsibilities</p> <p>1.6 Define how team performance will be measured</p>
2. Coordinate team	<p>2.1 Clarify and plan <i>tasks</i> in consultation with team</p> <p>2.2 Allocate tasks appropriately</p> <p>2.3 Determine and apply motivational factors</p> <p>2.4 Represent the team at meetings</p> <p>2.5 Work with team members to manage interpersonal conflict</p>
3. Conduct team activities and review team performance	<p>3.1 Regularly review team performance against objectives and take corrective action where necessary</p> <p>3.2 Regularly communicate with the team on policies, plans and other matters affecting the team</p> <p>3.3 Seek the input of team members during the decision-making process</p> <p>3.4 Consult the team regarding proposed workplace changes and improvements to processes</p> <p>3.5 Recognise team and individual achievement</p> <p>3.6 Validate team objectives against targets</p> <p>3.7 Determine ongoing nature of the team and either disband, select new objective, incorporate new team members or change team profile</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to analyse, evaluate and present information
- initiative and enterprise skills to deal with interpersonal conflict
- literacy skills to communicate in writing within the team
- planning and organisational skills to:
  - clarify and plan team tasks
  - ensure effective team operation
  - ensure efficient use of human resources
- problem-solving skills to:
  - analyse, diagnose, evaluate and develop new criteria, knowledge and procedures
  - develop team building initiatives.

### Required knowledge

- business planning process relevant to the development of IT business solutions, such as when delegating responsibility and authority
- change-management systems
- client business domain
- conflict-resolution practices
- current business practices relating to preparing reports
- current industry-accepted hardware and software products, general features and capabilities
- information-gathering techniques
- OHS requirements relating to work safety, environmental factors and ergonomic considerations
- principles of equal employment opportunity (EEO) and anti-discrimination
- quality assurance practices, such as when coordinating a team
- vendor product directions.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• coordinate teams to meet objectives</li> <li>• prioritise work schedules to meet organisational guidelines</li> <li>• provide leadership and guidance to others in the application and planning of project tasks.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• team members</li> <li>• organisational policies and operational planning documentation</li> <li>• current industry products and services</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate clarifying and planning tasks in consultation with team</li> <li>• review of candidate's written validation of team objectives against targets</li> <li>• verbal or written questioning to assess candidate's knowledge of:             <ul style="list-style-type: none"> <li>• industry products and services</li> <li>• team-building skills</li> <li>• conflict-resolution skills</li> <li>• time-management skills.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Team members</i></b> may include:	<ul style="list-style-type: none"> <li>• differences in language, literacy and numeracy skills</li> <li>• peers</li> <li>• people from a range of social, cultural or ethnic backgrounds</li> <li>• people from outside the organisation</li> <li>• supervisors and other members of the organisation.</li> </ul>
<b><i>Problem</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business need or opportunity that must be addressed</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Team</i></b> may include:	<ul style="list-style-type: none"> <li>• formal or informal</li> <li>• interdepartmental</li> <li>• organisational</li> <li>• temporary or ongoing</li> <li>• workgroup based.</li> </ul>
<b><i>Team operations</i></b> may include:	<ul style="list-style-type: none"> <li>• autonomy and responsibility of the team</li> <li>• communication style of team members</li> <li>• degree of delegation authorised</li> <li>• team dynamics</li> <li>• leadership style of team leader</li> <li>• life of the team</li> <li>• responsibility of team members</li> <li>• size and diversity of team.</li> </ul>
<b><i>Tasks</i></b> may include:	<ul style="list-style-type: none"> <li>• functions</li> <li>• specific projects</li> <li>• work activities.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT413A Relate to clients on a business level

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to formulate and implement service level agreements (SLAs).

### Application of the Unit

This unit applies to individuals in a wide range of information and communications technology (ICT) areas who are required to deal with client supporting issues, including those arising from SLAs.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare for development of SLA	<p>1.1 Research organisational service standards, values and culture in order to understand the organisational environment</p> <p>1.2 Investigate and document the goods and services provided by the organisation</p> <p>1.3 Review current <i>SLAs</i> if appropriate</p>
2. Develop SLA for consultation	<p>2.1 Research <i>client</i> service needs and preferred level of service</p> <p>2.2 Determine the level of service to be provided to the client</p> <p>2.3 Develop a draft SLA for the client that incorporates quality, time, target performance and cost specifications</p>
3. Negotiate client support service	<p>3.1 Conduct a session with the client and present the draft SLA in a clear, concise and comprehensive manner</p> <p>3.2 Present proposed cost and timeframes to the client</p> <p>3.3 Negotiate terms with client and record alterations if required</p> <p>3.4 Clarify areas of uncertainty or disagreement</p> <p>3.5 Document terms of service negotiated with client, and refer document to <i>appropriate person</i> for approval and feedback</p>
4. Monitor, adjust and implement procedures to maintain client focus	<p>4.1 Assess progress in achieving client support service targets, using organisational <i>systems</i> and procedures</p> <p>4.2 Gather client feedback to improve the provision of client support services where appropriate</p> <p>4.3 Make adjustments to client support service based on client feedback and in line with <i>organisational guidelines</i></p> <p>4.4 Document changes to SLA and report changes to appropriate person</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - facilitate and make presentations
  - liaise and negotiate with clients
- literacy skills to:
  - analyse and evaluate information
  - prepare general information and papers
- problem-solving skills to develop solutions unique to a client.

### Required knowledge

- business practices, including:
  - change management
  - information-gathering techniques
  - planning process, including development of IT business solutions
  - preparation of reports
- current industry-accepted hardware and software products, including:
  - general features and capabilities
  - vendor product directions
- legal principles of commercial contracts and service level agreements
- organisational policies, plans and procedures, including contracting
- theoretical concepts relating to negotiation and business relationships.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• negotiate client support service provision</li> <li>• formulate and implement service level agreements</li> <li>• meet client requirements for support service within quality, time, target performance and cost parameters.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• organisational policies, procedures and SLAs for the IT industry</li> <li>• contexts for negotiating SLAs and contracts</li> <li>• current IT hardware and software products.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate's presentation of a draft service level agreement</li> <li>• review of candidate's documented terms of service as negotiated with a client</li> <li>• verbal and written questioning to assess candidate's knowledge of business practices, such as change management and planning processes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>SLAs</i></b> may include:	<ul style="list-style-type: none"> <li>• consideration of business processes and requirements, clearly specified and quantified service levels, and evaluation or audit of service levels</li> <li>• SLAs for many different infrastructure services, including communications carriers, internet service providers (ISPs), active server pages (ASPs) and for vendor products</li> <li>• workload and performance considerations</li> <li>• expectations regarding servicing, penalties and charge back to business units.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• internal departments</li> <li>• individuals</li> <li>• internal employees.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Systems</i></b> may include:	<ul style="list-style-type: none"> <li>• hardware and software components that run a computer.</li> </ul>
<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT415A Provide one-to-one instruction

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to convey technical information to an individual client for their specific use.

### Application of the Unit

This unit applies to personnel in a range of IT areas who are responsible for instructing others on an individual basis.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine client needs	1.1 Meet with <i>client</i> to determine <i>learning needs</i> and type of one-to-one <i>instruction</i> required 1.2 Decide upon <i>actions</i> for delivery of one-to-one instruction
2. Organise instruction resources	2.1 Determine the resources required to perform the instruction 2.2 Prepare the instruction plan 2.3 Acquire the resources according to <i>organisational guidelines</i> and prepare the resources for the instruction session 2.4 Provide client with details of instruction plan
3. Provide appropriate instruction	3.1 Provide instruction session to client, using identified instructions 3.2 Document the instruction session according to organisational guidelines 3.3 Refer <i>further instruction requirements</i> or training needs to <i>appropriate person</i> as required
4. Obtain client feedback	4.1 Create or obtain an evaluation and feedback form or other feedback mechanism according to organisational guidelines 4.2 Obtain client evaluation and feedback to ensure the <i>requirements</i> of the client are met 4.3 Review client feedback and discuss suggestions with appropriate person

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - convey and clarify complex information
  - effectively question and listen when conveying and clarifying information
  - investigate and assess client needs
  - provide one-to-one instruction to client
  - review feedback with client and appropriate person
- literacy skills to:
  - develop reports
  - document:
    - additional requirements
    - amount of technical support the client may require
    - solutions
    - support issues affecting the client
  - interpret technical manuals
- planning and organisational skills to:
  - develop an instruction plan
  - incorporate time management for self and others
  - organise resources for the instruction session
- problem-solving skills to:
  - anticipate and respond to a range of issues when delivering one-to-one instruction
  - develop and refine delivery strategies.

### Required knowledge

- broad knowledge of:
  - escalation procedures
  - general features and capabilities of current industry-accepted hardware and software products
  - operating system (OS) functions and basic features
- hardware and software supported by the organisation
- in-house or vendor support available
- IT terminology
- security and network guidelines and procedures
- sources and availability of technical and organisational systems
- telephone, fax and online functions and procedures
- work group procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>determine the instruction required by client</li> <li>acquire and prepare associated resources</li> <li>demonstrate empathy and understanding of the learner and accommodate different cultures</li> <li>convey technical information to individual clients for their specific use in a clear, concise and coherent manner</li> <li>explain the meaning of technical jargon.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>client requirements either directly or through a peer or supervisor</li> <li>appropriate learning and assessment support when required</li> <li>modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>direct observation of candidate undertaking one-to-one instruction</li> <li>review of instruction plan prepared by candidate</li> <li>verbal or written questioning to assess candidate's knowledge of techniques for conveying technical information to an individual client.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Learning needs</i></b> may include:	<ul style="list-style-type: none"> <li>• electronic</li> <li>• group participation</li> <li>• presentation via different means</li> <li>• reading</li> <li>• self-directed learning</li> <li>• self-paced.</li> </ul>
<b><i>Instruction</i></b> may include:	<ul style="list-style-type: none"> <li>• advice and support on a one-to-one basis</li> <li>• guidance on hardware supported by the organisation: <ul style="list-style-type: none"> <li>• formatting of disks</li> <li>• printers</li> <li>• reconfiguration of printers</li> <li>• setting of screen resolution</li> <li>• use of scanners</li> </ul> </li> <li>• guidance on software applications supported by the organisation: <ul style="list-style-type: none"> <li>• creating graphs</li> <li>• formatting spreadsheet</li> <li>• setting up word-processing document for printing</li> <li>• using a browser</li> <li>• using an email system</li> </ul> </li> <li>• provision of client documentation and manuals.</li> </ul>
<b><i>Actions</i></b> may include:	<ul style="list-style-type: none"> <li>• number of sessions expected</li> <li>• session duration</li> <li>• time and location of instruction</li> <li>• type of instruction requested.</li> </ul>
<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> </ul>

	<ul style="list-style-type: none"> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• use of email and internet access</li> <li>• virus risk.</li> </ul>
<i>Further instruction requirements</i> may include:	<ul style="list-style-type: none"> <li>• active listening to client and other employees</li> <li>• handover to information and communications technology (ICT) technical expert area</li> <li>• on-site instruction</li> <li>• policy and procedures relating to IT training</li> <li>• questions and answers.</li> </ul>
<i>Appropriate person</i> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• help-desk person</li> <li>• subject-matter expert</li> <li>• supervisor.</li> </ul>
<i>Requirements</i> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT416A Contribute to the development of strategic plans

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to participate in the planning process and to contribute to the development of a strategic plan.

### Application of the Unit

This unit applies to senior information and communications technology (ICT) staff who are required to provide input to strategic plans.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Plan for strategy	<p>1.1 Participate in planning committee and clarify roles of people involved in process</p> <p>1.2 Participate in identifying issues that planning process should address</p> <p>1.3 Identify <b>information</b> that must be collected</p>
2. Investigate the current environment	<p>2.1 Investigate mission and vision statements of the organisation</p> <p>2.2 Investigate current internal and external environment of the organisation</p>
3. Participate in feedback session	<p>3.1 Identify most important issues facing the organisation, using information gathered</p> <p>3.2 Undertake a review session with <b>appropriate persons</b> to confirm issues identified</p> <p>3.3 Identify <b>objectives</b> and strategies for the organisation</p>
4. Finalise and validate plan	<p>4.1 Create a written plan to document mission, vision, issues, objectives and strategies of organisation</p> <p>4.2 Submit written plan to appropriate persons for approval</p> <p>4.3 Review feedback and make alterations where appropriate</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret, analyse and evaluate data
- communication skills to liaise with internal and external personnel during negotiation and feedback sessions
- literacy skills to:
  - prepare presentation materials in plain English
  - write a strategic plan, including issues and objectives of the organisation
- negotiation skills to relate to other team members in a defined range of predictable problems during the analysis process
- planning and organisational skills to:
  - confirm that the proposed project will come in on time and within budget
  - contribute to the identification of business strategy, vision, goals and objectives
  - set benchmarks and identify scope:
- problem-solving skills for problems arising during the development of a strategic plan
- research skills to identify, analyse and evaluate broad features of a particular business domain.

### Required knowledge

- basic knowledge of:
  - information-gathering techniques
  - quality assurance practices
- components of the business planning process relevant to the development of strategic plans
- current business practices in preparing reports, particularly for contributing to the development of a strategic plan that identifies:
  - final expected results
  - details how these results will be achieved.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify criteria and issues for planning process</li> <li>• undertake feedback session to identify issues, goals and outcomes that meet stakeholder requirements</li> <li>• create a written plan documenting objectives and strategies of organisation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site and personnel where a strategic business plan may be developed</li> <li>• detailed information relating to current needs and project requirements of business</li> <li>• client expectations brief</li> <li>• business mission, vision statements and objectives</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of business planning processes when developing strategic plans</li> <li>• direct observation of candidate conducting feedback sessions</li> <li>• review of plan prepared by candidate outlining the issues, objectives and strategies for the organisation.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Information</i></b> may include:	<ul style="list-style-type: none"> <li>• client user</li> <li>• competitors</li> <li>• cost constraints</li> <li>• environment</li> <li>• geography</li> <li>• system functionality.</li> </ul>
<b><i>Appropriate persons</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Objectives</i></b> may be contained in:	<ul style="list-style-type: none"> <li>• business planning document</li> <li>• business strategy</li> <li>• client expectations brief.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT417A Identify, evaluate and apply current industry-specific technologies to meet industry standards

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify, evaluate and apply industry-specific technologies to meet identified industry standards.

### Application of the Unit

This unit applies to individuals engaged in ongoing review and research in order to identify, evaluate and apply industry technologies or techniques to improve aspects of the organisation's activities. The unit provides evidence of the application of industry-enabling technologies.

The unit emphasises the importance of constantly reviewing and demonstrating work processes, skills and techniques to ensure that the quality of the entire business process is maintained at the highest level possible through the appropriate application of industry-specific technologies.

### Licensing/Regulatory Information

Users should confirm licensing, legislative, regulatory, or certification requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare to identify and evaluate industry-specific technologies	1.1 Identify technologies specific to an <b>industry sector</b> 1.2 Acquire <b>industry-specific technologies</b> 1.3 Identify, classify and use industry-specific technologies for the benefit of the organisation
2. Apply industry-specific technology to assist in solving organisational problems	2.1 Conduct testing of industry-specific technologies 2.2 Apply features and functions of industry-specific technologies to provide a suitable solution to an identified problem 2.3 Demonstrate depth of knowledge of enabling technologies to an accepted industry standard 2.4 Access and use <b>sources of information</b> relating to the industry-specific technologies
3. Review and evaluate industry-specific technology performance	3.1 Review and evaluate industry-specific technologies for performance, usability and benefit to the organisation 3.2 Determine <b>environmental considerations</b> involved with using the technologies 3.3 Seek <b>feedback</b> from users where appropriate

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate with peers and supervisors
  - seek assistance and expert advice
  - seek feedback from users
- literacy skills to interpret technical documentation, equipment manuals and specifications
- research skills to locate appropriate sources of information regarding industry-specific technologies
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - identify features of the industry-specific technologies
  - test and evaluate the industry-specific technologies
  - use the industry-specific technologies.

### Required knowledge

- awareness of current technology trends, directions in IT and the major industry technology standards used in the area
- vendor product directions
- current industry hardware and software products, and their general features, capabilities and application
- information-gathering techniques.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify new and emerging industry-specific technologies</li> <li>• apply and evaluate features and functions of identified industry-specific technologies to an industry standard.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where industry-specific technologies may be used</li> <li>• industry-specific technologies currently used in industry</li> <li>• documents detailing OHS standards, environmental guidelines and organisational requirements.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of features and functions of industry-specific technologies</li> <li>• direct observation of candidate using industry-specific technologies</li> <li>• simulation of uses of industry-specific technologies.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Industry sector</i></b> may include:	<ul style="list-style-type: none"> <li>• business services or information worker</li> <li>• information and communications technology</li> <li>• telecommunication.</li> </ul>
<b><i>Industry-specific technologies</i></b> may include:	<ul style="list-style-type: none"> <li>• vendor specific:                         <ul style="list-style-type: none"> <li>• hardware</li> <li>• integrated services</li> <li>• internet access</li> <li>• mobile communication devices</li> <li>• networks</li> <li>• peripherals</li> <li>• software.</li> </ul> </li> </ul>
<b><i>Sources of information</i></b> may include:	<ul style="list-style-type: none"> <li>• appliances software and technical connections guidance and other outputs supplied by vendors and manufacturers</li> <li>• documents</li> <li>• test pages</li> <li>• vendor and manufacturer guidance regarding requisite depth of knowledge of industry-specific technologies</li> <li>• web pages.</li> </ul>
<b><i>Environmental considerations</i></b> may include:	<ul style="list-style-type: none"> <li>• correct disposal by an authorised body of redundant hardware:                         <ul style="list-style-type: none"> <li>• circuit boards</li> <li>• hard drives</li> <li>• motherboards</li> </ul> </li> <li>• recycling</li> <li>• safe disposal of packaging:                         <ul style="list-style-type: none"> <li>• cardboard</li> <li>• paper</li> <li>• plastic</li> <li>• polystyrene.</li> </ul> </li> </ul>
<b><i>Feedback</i></b> may include:	<ul style="list-style-type: none"> <li>• competency skill level</li> <li>• industry-validated demonstration of competency through certification</li> <li>• interviews</li> </ul>

	<ul style="list-style-type: none"><li>• meetings.</li></ul>

## Unit Sector(s)

General ICT

# ICAICT418A Contribute to copyright, ethics and privacy in an IT environment

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to maintain professional and ethical conduct as well as to ensure that personal information of stakeholders is handled in a confidential and professional manner when dealing with stakeholders in an information technology (IT) environment.

## Application of the Unit

This unit applies to IT personnel who are required to gather information to determine the organisation's code of ethics, and protect and maintain privacy policies and system security.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Protect intellectual property	<p>1.1 Identify current <i>legislation and standards</i> relating to intellectual property and copyright</p> <p>1.2 Investigate current organisational copyright policy</p> <p>1.3 Adhere to organisational policy and current legislation in work practices</p>
2. Contribute to copyright policy	<p>2.1 Contribute to the creation or updating of the organisation's copyright policy and procedures to align with legislation and industry standards</p> <p>2.2 Distribute new or revised policy and procedures to stakeholders</p>
3. Protect rights of stakeholders	<p>3.1 Identify and document the relevance of legislation and standards to organisational outcomes</p> <p>3.2 Investigate and review organisational <i>privacy policy</i> and procedures</p> <p>3.3 Investigate and review organisational code of ethics</p> <p>3.4 Determine the integrity, confidentiality, security and availability of information as required by organisational policy</p> <p>3.5 Maintain confidentiality and proprietary rights of <i>stakeholder</i> interests</p>
4. Contribute to privacy policy	<p>4.1 Contribute to the creation or updating of the organisational privacy policy and procedures to align with privacy legislation</p> <p>4.2 Distribute new or revised policy and procedures to stakeholders</p> <p>4.3 Implement new work procedures and collect feedback from stakeholders</p> <p>4.4 Ensure the integrity, confidentiality, security and availability of information as required by organisational policy</p>
5. Maintain privacy policy	<p>5.1 Review work practices to ensure application of privacy policy and procedures</p> <p>5.2 Maintain the integrity, confidentiality, and availability of information as required by organisational privacy policy</p> <p>5.3 Review work practices to ensure system security according to organisational privacy policy</p>
6. Contribute to creation of ethics code	<p>6.1 Assist in developing or updating a code of ethics to align with legislation and standards for the organisation</p> <p>6.2 Distribute the new ethics code to stakeholders and collect</p>

	<p>feedback</p> <p>6.3 Implement new ethical work procedures and collect feedback</p> <p>6.4 Review ethical work practices and feedback to ensure application of the code</p>
7. Maintain ethics code	<p>7.1 Perform regular checks to ensure stakeholders understand and are continuing to apply the code of ethics in the workplace</p> <p>7.2 Establish a review and grievance procedure to enable confidential reporting of any ethical issues</p> <p>7.3 Interview and regularly follow up with stakeholders to ensure they are receiving consistent and appropriate service in dealing with the code of ethics</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with internal and external personnel on ethical and privacy, operational and business-related matters
- learning skills to update personal ethical and privacy knowledge through professional development
- literacy skills to apply standards and legislation to policy and procedure development and monitoring
- planning and organisational skills to plan, prioritise and monitor own work
- research skills to gain and maintain current industry privacy and ethical information
- technical skills to perform application and system security and storage management.

### Required knowledge

- Australian Computer Society Code of Ethics
- federal and state or territory legislation and policy relevant to an IT environment relating to:
  - access and equity
  - copyright and intellectual property
  - OHS
  - privacy
- organisational communication processes and procedures
- organisational requirements for customer service
- server operating systems
- system security procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse legislation and standards relating to professional conduct and privacy in the IT industry</li> <li>• contribute to the development of a code of ethics and monitor the workplace to ensure code of ethics is being applied and is appropriate</li> <li>• contribute to the development of a privacy policy and monitor the workplace to ensure the policy is being applied and is appropriate.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• relevant organisational policies, legislation and standards documentation</li> <li>• industry codes of practice</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate monitoring continuity of computing services and information flow to ensure the protection of stakeholder interests</li> <li>• review of candidate's documented code of ethics and privacy policy</li> <li>• verbal or written questioning to assess candidate's provision of some leadership and guidance to others in the implementation of ethical conduct in business relationships</li> <li>• verbal or written questioning to assess candidate's ability to provide guidance to others in the operation and management of privacy policies in business relationships.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Legislation and standards</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• access and equity</li> <li>• confidentiality requirements</li> <li>• copyright laws</li> <li>• defamation laws</li> <li>• industry codes of practice, such as Australian Computer Society Code of Ethics</li> <li>• industry standards</li> <li>• intellectual property</li> <li>• international standards</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS)</li> <li>• legal and regulatory policies affecting ebusiness</li> <li>• OECD Guidelines for Consumer Protection in the Context of Electronic Commerce</li> <li>• OHS</li> <li>• organisational standards</li> <li>• privacy legislation</li> <li>• project standards.</li> </ul>
<p><b><i>Privacy policy</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• access of personal information</li> <li>• disclosure of personal information</li> <li>• gathering of personal information</li> <li>• organisation standards and practices</li> <li>• quality of personal information</li> <li>• security of personal information</li> <li>• sensitivity of personal information</li> <li>• storage of personal information</li> <li>• use of personal information.</li> </ul>
<p><b><i>Stakeholders</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• colleagues</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees</li> <li>• external organisations</li> </ul>

	<ul style="list-style-type: none"><li>• clients</li><li>• project manager</li><li>• supervisor</li><li>• users.</li></ul>

## Unit Sector(s)

General ICT

## ICAICT419A Work effectively in the digital media industry

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to work effectively as an individual or in a team environment in the digital media industries.

### Application of the Unit

This unit applies to persons who use digital media technologies to work in the industry as digital media designers, developers, programmers, contractors or digital media authoring specialists.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Communicate effectively with others	1.1 Research and analyse <b>information sources and data</b> related to the digital media industry 1.2 Engage with <b>key players</b> in the organisation using a range of <b>communication tools and media</b> 1.3 Plan and develop a <b>communication strategy</b> for an enterprise or workplace and clients 1.4 Prepare <b>reports</b> in a variety of formats and media
2. Perform own work effectively	2.1 Develop a <b>work plan and schedule</b> 2.2 Respond to requests and resolve <b>client queries and issues</b> as they arise 2.3 Apply <b>legislative and regulatory requirements</b> 2.4 Apply industry <b>codes of practice and guidelines</b>
3. Review own communication and work effectiveness and make improvements	3.1 Seek and respond positively to comments and feedback from <b>peers and clients</b> using evaluation techniques 3.2 Review own communication strategies and practices and make continuous <b>improvements</b> 3.3 Review own work plan and schedule against <b>milestones or key performance indicators</b> (KPIs) and make improvements 3.4 Undertake <b>training and professional development</b> activities 3.5 Participate in <b>discussions and forums</b> and generate ideas for improvement

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - clarify the needs of clients
  - relate to people from diverse backgrounds
  - request advice, receive feedback and work with a team
  - work as a member of a digital media team, both independently on assignment and under direction
  - write reports
- initiative and enterprise in generating ideas for improving communication and work
- literacy skills to interrogate and interpret:
  - broad research material and technical manuals
  - organisational policies and governance documentation
  - technical information, such as maintenance requirements for equipment
- planning and organisational skills to plan and schedule personnel and work priorities
- problem-solving skills to distinguish between issues that can be resolved by delegation or referral to a supervisor
- self-management skills to:
  - balance the need for personal efficiency with the needs of others and work requirements
  - maintain own industry knowledge and competence
  - make decisions at own level of responsibility
  - modify work plan and prioritise work tasks
  - organise own time to meet milestones
  - work within deadlines
- technical skills to use IT equipment, operating systems and interactive digital media software.

### Required knowledge

- current industry-accepted hardware and software digital media products, with sound knowledge of their features and capabilities
- OHS standards as they apply to working in the digital media industries
- operational environment, including customer base, company products and services
- organisational:
  - code of conduct and values that are consistent with the organisational mission
  - policy and procedures
  - systems, management structure and governance arrangements
- principles of equal employment opportunity (EEO) and anti-discrimination
- role and positioning of digital media within the overall business objectives of the organisation

- sound grasp of:
  - digital media terminology
  - roles and responsibilities of personnel in the relevant sector of the digital media industries
- vendor product directions.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse information and communicate effectively using a range of media and formats</li> <li>• perform according to work plan and organisational requirements and values</li> <li>• apply requirements of legislation and regulations</li> <li>• review and implement improvements to own work and communication.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• range of current industry information</li> <li>• appropriate IT equipment and technology to research and analyse industry information</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct questioning combined with review of portfolios of evidence and third-party workplace reports of on-the-job performance</li> <li>• observation of the candidate participating in workplace meetings</li> <li>• evaluation of written reports or verbal questioning to test knowledge as listed in the required skills and knowledge section of this unit</li> <li>• evaluation of case studies to assess ability to apply knowledge to different industry contexts and situations.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><b><i>Information sources and data</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• electronic and print media, such as news, reviews, articles and technical publications</li> <li>• employee and industry association representatives</li> <li>• events, such as industry functions, conferences, trade fairs, community activities, expositions, exhibitions, festivals and social events</li> <li>• government bodies and associated publications</li> <li>• induction kits</li> <li>• instruction or product manuals</li> <li>• internet and intranet</li> <li>• libraries</li> <li>• peak copyright organisations</li> <li>• personal observations and experience</li> <li>• policy and procedures manuals</li> <li>• reference books, industry information sheets, magazines and journals discussions with current industry practitioners, colleagues and community groups</li> <li>• retail and wholesale suppliers of products and services</li> <li>• training programs, seminars, conferences, symposiums, workshops and other professional development opportunities</li> <li>• unions and union publications (newsletters, magazines, bulletins and letters) and other sources of industrial relations information.</li> </ul>
<p><b><i>Key players</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• digital media organisations</li> <li>• employer organisations</li> <li>• government departments</li> <li>• IT professional bodies</li> <li>• unions</li> <li>• vendors of digital media products and services.</li> </ul>
<p><b><i>Communication tools and media</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• email</li> <li>• fax</li> <li>• mobile devices</li> <li>• phone</li> <li>• web.</li> </ul>
<p><b><i>Communication</i></b></p>	<ul style="list-style-type: none"> <li>• distribution lists</li> </ul>

<i>strategy</i> may include:	<ul style="list-style-type: none"> <li>• frequency and mode of communication</li> <li>• key messages</li> <li>• key stakeholders</li> <li>• purpose</li> <li>• ways of communication.</li> </ul>
<i>Reports</i> may include various formats and styles:	<ul style="list-style-type: none"> <li>• briefing notes</li> <li>• electronic mail</li> <li>• fax</li> <li>• general correspondence</li> <li>• handwritten and printed materials</li> <li>• internal memos</li> <li>• telephone messages.</li> </ul>
<i>Work plan and schedule</i> may include:	<ul style="list-style-type: none"> <li>• activities plan or schedule</li> <li>• diary</li> <li>• log book</li> <li>• electronic or paper-based project plan</li> <li>• tasks list.</li> </ul>
<i>Client queries and issues</i> may include:	<ul style="list-style-type: none"> <li>• disputes needing resolution</li> <li>• points of clarification</li> <li>• requests for information.</li> </ul>
<i>Legislative and regulatory requirements</i> may include current, legislation, regulations, codes of practice (federal and state) and policy relating to:	<ul style="list-style-type: none"> <li>• anti-discrimination and equal employment opportunity</li> <li>• business compliance</li> <li>• copyright</li> <li>• environmental issues</li> <li>• insurance</li> <li>• OHS</li> <li>• plagiarism</li> <li>• privacy and confidentiality</li> <li>• quality assurance</li> <li>• taxation</li> <li>• workplace and industrial relations.</li> </ul>
<i>Codes of practice and guidelines</i> may include:	<ul style="list-style-type: none"> <li>• Australian content standards</li> <li>• industry guidelines relating to the digital media.</li> </ul>
<i>Peers and clients</i> may include:	<ul style="list-style-type: none"> <li>• contractors</li> <li>• employees</li> <li>• external organisations and agencies</li> <li>• individuals</li> <li>• internal departments</li> <li>• supervisors</li> <li>• technical staff</li> <li>• work colleagues.</li> </ul>

<i>Improvements</i> may include:	<ul style="list-style-type: none"> <li>• acknowledging feedback and comments</li> <li>• coaching, mentoring and supervising informal conversation with peers, supervisor and clients</li> <li>• personal study</li> <li>• self-evaluation</li> <li>• use of formal evaluation tools, such as discussion, survey or interview to determine effectiveness or satisfaction.</li> </ul>
<i>Milestones or key performance indicators</i> may include:	<ul style="list-style-type: none"> <li>• performance appraisal with line supervisor</li> <li>• review of key performance indicators against key project milestones</li> <li>• review of performance against specified times for completion of key activities or tasks.</li> </ul>
<i>Training and professional development</i> may include:	<ul style="list-style-type: none"> <li>• attendance at forums and workshops (online or face to face)</li> <li>• coaching and mentoring</li> <li>• completion of internal and external training programs</li> <li>• personal study, such as journals, and technical, policy and procedures manuals.</li> </ul>
<i>Discussions and forums</i> may include:	<ul style="list-style-type: none"> <li>• online discussion forums</li> <li>• performance appraisal processes</li> <li>• planning days</li> <li>• project briefing and debriefing sessions</li> <li>• seminars and workshops</li> <li>• staff meetings.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT420A Develop client user interface

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to design and document a client user interface that integrates with front end applications.

### Application of the Unit

This unit applies to software designers and developers who are required to build a screen that will integrate between users and applications.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare design for interface	<p>1.1 Review <b>requirements</b> and other <b>documentation</b> to determine <b>user</b> needs</p> <p>1.2 Investigate <b>system environment</b> to determine the impact of user interface design</p> <p>1.3 Review <b>organisational goals</b> to ensure consistency with organisational styles</p> <p>1.4 Define data query and report formats for the user interface design where appropriate</p> <p>1.5 Document needs and findings and obtain approval for the proposed interface from the <b>appropriate person</b></p>
2. Design and document user interface	<p>2.1 Design menu structures according to requirements and <b>acceptance criteria</b> and following <b>design principles</b></p> <p>2.2 Design screen dialogues according to requirements and acceptance criteria and following design principles</p> <p>2.3 Design batch procedures where appropriate to technical specifications and acceptance criteria</p> <p>2.4 Design online help and tutorials for the prototype following design principles</p> <p>2.5 Document prototype according to organisational goals</p> <p>2.6 Submit prototype to appropriate person for sign-off</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - liaise and negotiate with clients and staff
  - present information
- literacy skills to:
  - analyse and evaluate information
  - develop online help and tutorials
  - write business reports
- technical skills to:
  - design and document user interface, including screen dialogues and batch procedures
  - prepare and review technical documentation.

### Required knowledge

- client business area
- current industry design principles
- current industry-accepted hardware and software products, including broad knowledge of general features and capabilities
- current industry-accepted user interfaces, including broad knowledge of general features and capabilities
- front-end systems
- web design principles.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• determine impact of user interface design in the system environment and identify appropriate data query and report formats</li> <li>• design menu structures according to design principles</li> <li>• design screen dialogues in line with requirements and acceptance criteria</li> <li>• design batch procedures</li> <li>• develop online help and tutorials for prototype.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• design specifications</li> <li>• organisational standards for documentation and version control</li> <li>• project management process and hierarchy</li> <li>• usability test plan</li> <li>• agreed usability metrics</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate defining data query and report formats for the user interface design based on analysis of requirements</li> <li>• verbal or written questioning to assess candidate's knowledge of requirements for designing online help and tutorials</li> <li>• review of candidate's user interface prototype.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the</p>

	<p>work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Requirements</b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b>Documentation</b> may involve:	<ul style="list-style-type: none"> <li>• business performance data</li> <li>• business policies customer feedback</li> <li>• business strategic plans</li> <li>• change-management plans</li> <li>• current systems design plans</li> <li>• project management plans.</li> </ul>
<b>User</b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<b>System environment</b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• computers</li> <li>• financial system</li> <li>• information system</li> <li>• management system</li> <li>• network</li> <li>• software.</li> </ul>
<b>Organisational goals</b> may include:	<ul style="list-style-type: none"> <li>• preventative maintenance and diagnostic policy</li> <li>• problem solution processes</li> <li>• roles and technical responsibilities in the IT department</li> <li>• vendor and product service level support agreements</li> <li>• work environment.</li> </ul>
<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b>Acceptance criteria</b> may include:	<ul style="list-style-type: none"> <li>• cost implications</li> <li>• logistical considerations</li> <li>• technical</li> </ul>

	<ul style="list-style-type: none"><li>• timeframe.</li></ul>
<i>Design principles</i> may include:	<ul style="list-style-type: none"><li>• consistency</li><li>• ease of learning</li><li>• familiarity</li><li>• flexibility</li><li>• invisible technology</li><li>• product compatibility</li><li>• protection</li><li>• responsiveness</li><li>• robustness</li><li>• simplicity</li><li>• task compatibility</li><li>• user compatibility</li><li>• workflow compatibility.</li></ul>

## Unit Sector(s)

General ICT

# ICAICT421A Connect, maintain and configure hardware components

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to install, configure and maintain personal computer devices, including mobile devices according to client and user requirements. It provides an understanding of different types of available hardware components and peripherals, and gives an insight into their interconnectivity.

## Application of the Unit

This unit applies to support technicians who set up, modify and connect system components.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify hardware components	<p>1.1 Identify different types of <i>personal computer devices</i></p> <p>1.2 Identify and categorise the different <i>personal computer components</i>, including <i>mobile personal computer components</i></p> <p>1.3 Explain the purpose and characteristics of the different personal computer component categories</p> <p>1.4 Distinguish between the different types of devices within each personal computer component category</p>
2. Identify types of peripheral hardware components	<p>2.1 Identify and categorise the different <i>peripheral hardware components</i></p> <p>2.2 Explain the purpose and characteristics of the different peripheral hardware components</p> <p>2.3 Distinguish between the different types of devices within each peripheral hardware component category</p>
3. Install and configure personal computer components	<p>3.1 Install and configure personal computer components</p> <p>3.2 Install and configure mobile personal computer components</p> <p>3.3 Develop plans, with prioritised tasks and contingency arrangements, for the installation and configuration of selected components with minimum disruption to <i>clients</i></p> <p>3.4 Liaise with appropriate person to obtain approval for the plans</p> <p>3.5 Install and configure components according to plan, installation procedures and <i>organisational requirements</i></p> <p>3.6 Use appropriate <i>testing tools</i> to test components for error-free performance</p> <p>3.7 Identify and resolve identified problems</p> <p>3.8 Test and enhance system performance, using knowledge of the system, to meet organisational benchmarks</p> <p>3.9 Document the installation and configuration process according to organisation guidelines</p> <p>3.10 Develop and document a maintenance plan and schedule based on vendor specifications for the installed components</p>
4. Install and configure print devices	<p>4.1 Install and configure <i>print devices</i></p> <p>4.2 Detect and identify common <i>printer issues</i></p> <p>4.3 Undertake <i>printer issue resolution</i> to meet client requirements</p>
5. Evaluate modified	<p>5.1 Collect client or user feedback and analyse against client</p>

system	requirements 5.2 Correct identified shortcomings in the system and record actions
--------	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - consult with peers, supervisors and internal and external clients
  - interpret technical computer installation manuals
  - interpret user manuals and help functions
- literacy skills to:
  - organise resources for one-to-one instruction
  - read technical manuals
- planning and organisational skills to:
  - address technical issues
  - plan activities, including milestones
- problem-solving skills to anticipate and respond to a range of driver-related errors that may arise
- technical skills to:
  - comprehend how the operating system will communicate with the installed component
  - install components
  - test components using available technology
  - test system performance
  - write technical reports and maintain records.

### Required knowledge

- environmental considerations in e-waste disposal
- systems diagnostic software
- areas of the operating system related to configuration and testing
- current industry-accepted hardware and software products
- organisational guidelines
- organisational requirements
- system's current functionality
- vendor specifications and requirements for component installation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify and categorise the different types of hardware, internal hardware and peripheral hardware components</li> <li>• install components across a variety of situations and account for unexpected contingencies</li> <li>• modify system's hardware, internal hardware and peripheral hardware components to meet client requirements</li> <li>• plan the modification and connection hardware, internal hardware and peripheral hardware components according to vendor and technical specifications</li> <li>• test components and rectify identified problems.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• hardware, internal hardware and peripheral hardware components for installation and configuration</li> <li>• use of current industry standard performance testing software</li> <li>• documents detailing organisational guidelines and requirements</li> <li>• technical manuals and tools</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of systems diagnostic software and systems functionality</li> <li>• direct observation of candidate: <ul style="list-style-type: none"> <li>• connecting hardware, internal hardware and peripheral hardware components</li> <li>• testing components and rectifying identified problems</li> </ul> </li> <li>• evaluation of client requirements and candidate's final recommendations</li> <li>• review of candidate's written notes.</li> </ul>
<b>Guidance information</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where</p>

<b>for assessment</b>	<p>appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
-----------------------	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Personal computer devices</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• iPad (or similar)</li> <li>• laptop</li> <li>• notebook</li> <li>• personal digital assistant (PDA)</li> <li>• personal computer (Mac or PC)</li> <li>• server</li> <li>• workstation.</li> </ul>
<p><b><i>Personal computer components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• cooling systems:             <ul style="list-style-type: none"> <li>• case fans</li> <li>• CPU fans</li> <li>• heat sinks</li> <li>• thermal compound</li> </ul> </li> <li>• memory:             <ul style="list-style-type: none"> <li>• adapter cards</li> <li>• capture cards (TV and video)</li> <li>• graphics cards</li> <li>• I/O cards:                 <ul style="list-style-type: none"> <li>• Firewire</li> <li>• parallel</li> <li>• serial</li> <li>• universal serial bus (USB)</li> </ul> </li> <li>• media reader</li> <li>• sound cards</li> <li>• storage controllers:                 <ul style="list-style-type: none"> <li>• eSATA cards</li> <li>• redundant array of inexpensive or independent disks (RAID) cards (RAID array - levels 0,1,5)</li> </ul> </li> <li>• wired and wireless network cards</li> </ul> </li> <li>• motherboards:             <ul style="list-style-type: none"> <li>• advanced network basic input/output system (BIOS) settings</li> <li>• bus speeds</li> <li>• chipsets</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• complementary metal oxide semiconductor (CMOS) battery</li> <li>• expansion slots</li> <li>• firmware updates</li> <li>• front panel connectors</li> <li>• I/O ports</li> <li>• jumper settings</li> <li>• memory slots</li> <li>• socket types</li> <li>• sound, video, USB 1.1, USB 2.0, serial, IEEE 1394 or Firewire, parallel, NIC, modem, PS/2</li> <li>• power supplies: <ul style="list-style-type: none"> <li>• connector types and quantity</li> <li>• output voltage</li> <li>• wattages and capacity</li> </ul> </li> <li>• processors: <ul style="list-style-type: none"> <li>• 32bit versus 64bit</li> <li>• cache</li> <li>• front side bus</li> <li>• number of cores</li> <li>• power consumption</li> <li>• socket types</li> <li>• speed</li> </ul> </li> <li>• storage devices: <ul style="list-style-type: none"> <li>• CD, DVD, RW or blu-ray</li> <li>• external</li> <li>• floppy disk drive (FDD)</li> <li>• hard disk drive (HDD): <ul style="list-style-type: none"> <li>• parallel advanced technology attachment (PATA)</li> <li>• serial advanced technology attachment (SATA)</li> <li>• solid state</li> </ul> </li> <li>• optical drives</li> <li>• removable.</li> </ul> </li> </ul>
<p><b><i>Mobile personal computer components</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• components of the LCD, including inverter, screen and video card</li> <li>• communication connections: <ul style="list-style-type: none"> <li>• Bluetooth</li> <li>• cellular wireless area network (WAN)</li> <li>• ethernet</li> <li>• infra-red</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>• modem</li> <li>• expansion devices: <ul style="list-style-type: none"> <li>• docking station</li> <li>• peripheral component interconnect (PCI) express cards</li> <li>• Personal Computer Memory Card International Association (PCMCIA) cards</li> </ul> </li> <li>• hard drive and memory</li> <li>• input devices: <ul style="list-style-type: none"> <li>• function keys</li> <li>• point devices, such as touch pad, point stick or track point</li> <li>• stylus or digitiser</li> </ul> </li> <li>• internal laptop expansion slot types</li> <li>• keyboard, processor, plastics, pointer devices, heat sinks, fans, system board, CMOS battery, and speakers</li> <li>• power and electrical input devices: <ul style="list-style-type: none"> <li>• auto-switching</li> <li>• batteries</li> <li>• fixed input power supplies</li> </ul> </li> <li>• wireless cards and video card.</li> </ul>
<b>Peripheral hardware components</b> may include:	<ul style="list-style-type: none"> <li>• input devices: <ul style="list-style-type: none"> <li>• bar code reader</li> <li>• biometric devices</li> <li>• keyboard</li> <li>• KVM switch</li> <li>• mouse</li> <li>• multimedia, such as web and digital cameras, MIDI, microphones</li> <li>• touch screen</li> </ul> </li> <li>• output devices: <ul style="list-style-type: none"> <li>• printers</li> <li>• screen</li> <li>• speakers</li> </ul> </li> <li>• printer consumables</li> <li>• printer drivers (compatibility).</li> </ul>
<b>Clients</b> may include:	<ul style="list-style-type: none"> <li>• department within the organisation</li> <li>• person within a department</li> <li>• third party.</li> </ul>
<b>Organisational requirements</b> may include:	<ul style="list-style-type: none"> <li>• how and what the organisation wants in regard to work environment</li> <li>• preventative maintenance and diagnostic policy</li> </ul>

	<ul style="list-style-type: none"> <li>• problem solution processes</li> <li>• roles and technical responsibilities in the IT department</li> <li>• vendor and product service level support agreements.</li> </ul>
<i>Testing tools</i> may include:	<ul style="list-style-type: none"> <li>• anti-static pad and wrist strap</li> <li>• cable testers</li> <li>• extension magnet</li> <li>• loop back plugs</li> <li>• multi-meter</li> <li>• power supply tester</li> <li>• specialty hardware or tools.</li> </ul>
<i>Print devices</i> may include:	<ul style="list-style-type: none"> <li>• impact</li> <li>• inkjet</li> <li>• laser</li> <li>• local versus network printers</li> <li>• thermal.</li> </ul>
<i>Printer issues</i> may include:	<ul style="list-style-type: none"> <li>• blank paper</li> <li>• error codes</li> <li>• garbage printout</li> <li>• ghosted image</li> <li>• lines and smearing</li> <li>• no connectivity</li> <li>• out of memory error</li> <li>• paper jams.</li> </ul>
<i>Printer issue resolution</i> may include:	<ul style="list-style-type: none"> <li>• clean printer</li> <li>• clear paper jam</li> <li>• install maintenance kit (reset page count)</li> <li>• power cycle</li> <li>• replace drum</li> <li>• replace fuser</li> <li>• set IP on printer.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT422A Participate in IT services

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply the principles of service management when working in an information technology (IT) service desk environment.

### Application of the Unit

This unit applies to individuals who work in IT service roles and are responsible for providing IT service desk support.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Prepare to work on a service desk	1.1 Identify principles of service desk <b>quality</b> 1.2 Apply <b>concepts and terminology</b> associated with a <b>service desk environment</b> 1.3 Use appropriate <b>service principles</b>
2. Support a service desk	2.1 Use <b>service desk systems</b> to open a new service call 2.2 Inform customer of the progress of the call using service principles 2.3 Escalate a service desk call following service principles 2.4 Implement service desk closure principles 2.5 Seek user feedback following closure of a service desk call
3. Apply continuous improvement to service desk	3.1 Review <b>service desk records</b> 3.2 Plan methods of improving performance 3.3 Document proposed improvements and submit to appropriate person

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with internal and external personnel on technical, operational and business-related matters
- literacy skills to:
  - document service desk
  - read and interpret enterprise procedures, manuals and specifications
- planning and organisational skills to plan, prioritise and monitor own work
- problem-solving and contingency-management skills to adapt procedures to local requirements and reconfigure depending on differing operational contingencies, risk situations and environments
- research skills to research industry best practice
- technical skills to advise on a range of IT support procedures.

### Required knowledge

- detailed knowledge of:
  - enterprise escalation policy and procedures
  - industry best practice in IT service desk support
- overview knowledge of:
  - basic technical terminology in relation to service management
  - legislation, codes of practice and other formal agreements that directly impact on resolution processes
  - quality assurance of processes and procedures relating to service desk
  - service management relating to service desk.
  -

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Evidence of the ability to: <ul style="list-style-type: none"> <li>• follow procedures and processes to provide service desk support</li> <li>• plan and document strategies to improve service desk performance.</li> </ul>

<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• IT service desk environment</li> <li>• current service logs and procedures</li> <li>• service desk software</li> <li>• customer contact technologies currently used in industry</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of service management and quality processes</li> <li>• review of candidate's documented service management processes</li> <li>• evaluation of candidate's service management procedures.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Quality</b> may include:	<ul style="list-style-type: none"> <li>• capability maturity model integration (CMMI)</li> <li>• ISO standard 17025/IEC standard 20000.</li> </ul>
<b>Concepts and terminology</b> may include:	<ul style="list-style-type: none"> <li>• alert</li> <li>• availability</li> <li>• business case</li> <li>• catalogue</li> <li>• change types (normal, standard and emergency)</li> <li>• configuration management system</li> <li>• contract</li> <li>• definitive media library (DML)</li> <li>• event</li> <li>• impact, urgency and priority</li> <li>• incident</li> <li>• known error</li> <li>• known error database (KEDB)</li> <li>• operational level agreement (OLA)</li> <li>• release and release policy</li> <li>• resources, capabilities and assets</li> <li>• risk</li> <li>• service assets</li> <li>• service catalogue</li> <li>• service change</li> <li>• service design package</li> <li>• service knowledge management system (SKMS)</li> <li>• service level agreement (SLA)</li> <li>• service portfolio</li> <li>• service provider</li> <li>• service request</li> <li>• supplier</li> <li>• utility and warranty</li> <li>• workaround.</li> </ul>
<b>Service desk environment</b> may include:	<ul style="list-style-type: none"> <li>• call centre</li> <li>• help desk</li> <li>• local, central or virtual service desk.</li> </ul>

<p><i>Service principles</i> may include:</p>	<ul style="list-style-type: none"> <li>• communication by keeping the customer informed of progress and advising on workarounds</li> <li>• data integrity</li> <li>• ease of use for customers</li> <li>• incident control using life cycle management of all service requests</li> <li>• single point of contact (SPOC) and not necessarily the first point of contact (FPOC)</li> <li>• single point of entry</li> <li>• single point of exit</li> <li>• streamlined communication channels.</li> </ul>
<p><i>Service desk systems</i> may include:</p>	<ul style="list-style-type: none"> <li>• Acacia Help Desk</li> <li>• Aegis Service Desk</li> <li>• Control-F1</li> <li>• Giva Inc.</li> <li>• HelpMaster Pro</li> <li>• HelpTrac</li> <li>• Internet Software Sciences</li> <li>• iTrack</li> <li>• LBE Help Desk Software</li> <li>• NetHelpDesk</li> <li>• NetKeeper</li> <li>• Numara Trackit</li> <li>• the BridgeTrak Suite.</li> </ul>
<p><i>Service desk records</i> may include:</p>	<ul style="list-style-type: none"> <li>• calls on specific problems</li> <li>• calls solved by specific staff</li> <li>• length of open calls.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT501A Research and review hardware technology options for organisations

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes skills and knowledge to apply research skills when reviewing hardware solutions, as part of an analysis of emerging technology.

## Application of the Unit

This unit applies to senior staff in a variety of information and communications technology (ICT) roles who are required to select new technology for their organisation and review the efficacy of existing technologies.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine organisational needs	1.1 Establish organisational needs and selection criteria for new technology 1.2 Review strategic goals and determine future requirements 1.3 Assess physical infrastructure and financial parameters against strategic goals
2. Research vendors, suppliers and IT industry specialists	2.1 Determine suitable suppliers and vendors 2.2 Source information from suppliers and vendors 2.3 Assess vendor information against <b><i>industry standards</i></b> 2.4 Review emerging standards and applications for compatibility with supplier and vendor information
3. Evaluate and report on hardware technology options	3.1 Review and test <b><i>hardware</i></b> to identify suitability for organisational requirements 3.2 Identify possible <b><i>project risks</i></b> associated with identified hardware 3.3 Document findings in a report and present to <b><i>appropriate person</i></b>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - convey complex and abstract concepts and information
  - liaise with customers, vendors and suppliers
  - participate in teams and contribute to solutions and goals
  - present information, such as the results of testing new technology and proposals to move in new directions
- literacy skills to:
  - interpret industry standards
  - interpret technical information from vendors and suppliers
- numeracy skills to calculate cost and consider financial information
- planning and organisational skills to:
  - estimate scope, time, cost and quality
  - plan communications and risk management
  - investigate new technology for new roles in the workplace
- problem-solving skills to develop new approaches with new technology
- research skills to:
  - analyse and evaluate information
  - develop reports and summary findings
  - gain and maintain relevant and current technical product knowledge
- technical skills to:
  - assess technical information against industry standards
  - review and test hardware.

### Required knowledge

- business planning process relevant to the development of data and voice integration and remote access business solutions
- client business needs that can be satisfied by the provision of IT products and services
- current business practices in preparing reports
- current industry and technology information sources
- current industry-accepted hardware, cabling and software products, including broad knowledge of general features and capabilities, with particular reference to emerging trends and product design
- equipment performance benchmarking
- industry networks, key individuals and organisations within the IT industry
- information-gathering techniques
- quality assurance practices, to promote reliable investigation processes
- vendor product directions:
  - access and security products

- next generation networks
- self-configuring asymmetric digital subscriber line (ADSL) or cable modem-router-switch for the small office home office (SOHO) market
- wireless standards.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse and plan approaches to technical problems or management requirements</li> <li>• access and convey conceptual information regarding emerging technology in relation to organisational needs</li> <li>• evaluate information, using it to forecast for planning or research purposes</li> <li>• recommend technology options.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to site with:</p> <ul style="list-style-type: none"> <li>• network or computer layout documentation and premises plans</li> <li>• network components</li> <li>• equipment specifications</li> <li>• organisational guidelines</li> <li>• business plan or model</li> <li>• journals of industry and professional associations</li> <li>• relevant standards.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of reports completed by the candidate recommending technology change</li> <li>• verbal or written questioning to assess candidate's ability to apply technical knowledge in the preliminary analysis of emerging technology according to organisational requirements or practices.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and</p>

	<p>the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Industry standards</b> may include:	<ul style="list-style-type: none"> <li>• review of software and hardware currently used in the industry, which can be obtained from:                             <ul style="list-style-type: none"> <li>• conferences</li> <li>• industry publications and websites</li> <li>• professional groups:                                     <ul style="list-style-type: none"> <li>• ICT groups</li> <li>• Sector-specific.</li> </ul> </li> </ul> </li> </ul>
<b>Hardware</b> may include:	<ul style="list-style-type: none"> <li>• cabling infrastructure</li> <li>• internet access</li> <li>• modems and other connectivity devices</li> <li>• networks</li> <li>• personal computers</li> <li>• remote sites</li> <li>• servers</li> <li>• wireless networks</li> <li>• workstations.</li> </ul>
<b>Project risks</b> may include:	<ul style="list-style-type: none"> <li>• variations in locating and obtaining hardware influenced by changes in:                             <ul style="list-style-type: none"> <li>• scope</li> <li>• time</li> <li>• cost</li> <li>• quality.</li> </ul> </li> </ul>
<b>Appropriate person</b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT502A Develop detailed component specifications from project specifications

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse requirements of the project specifications in order to produce a set of high-level component specifications.

### Application of the Unit

This unit applies to systems designers who are required to produce component specifications for programmers.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop components	1.1 Document behaviour scenarios according to <b>documentation standards</b> 1.2 Identify or develop components according to <b>project specifications</b> 1.3 Prepare diagrams according to <b>standards</b>
2. Prepare schema	2.1 Analyse and document component connectivity 2.2 Identify and incorporate data flow iteration 2.3 Prepare component action diagrams according to standards
3. Prepare component model	3.1 Describe roles and responsibilities 3.2 Review and update functional <b>requirements</b> 3.3 Specify interface components and component relationships 3.4 Prepare interaction diagrams according to standards
4. Iterate and review model	4.1 Conduct walk-through of current model and review functionality 4.2 Identify relationships to ensure integration of model 4.3 Review class service requirements 4.4 Prepare initial test criteria 4.5 Implement process for incremental testing

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse the domain model
- communication skills to liaise with technical and operational staff
- literacy skills to interpret standards and organisational requirements
- problem-solving skills to resolve issues when components are identified or developed within project specifications
- planning and organisational skills to:
  - scope project
  - estimate time, cost, quality, communications and risk-management issues
- research skills to:
  - identify information sources for a cost-benefit analysis
  - specify, analyse and evaluate broad features of a particular business domain and best practice in program development
- technical skills to produce sequential diagrams.

### Required knowledge

- appropriate design tools and their use
- configuration management
- key features of a cost-benefit analysis
- current industry-accepted design methodologies and hardware and software products, including broad knowledge of general features and capabilities
- data-modelling techniques
- program development methodologies
- quality assurance practices for preparing component model
- relevant standards and organisational policies
- current system functionality for analysing components.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify components relevant to the project requirements</li> <li>• document component connectivity and relationships</li> <li>• document component interface requirements.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• technical specifications</li> <li>• organisational and process goals</li> <li>• standards for model development</li> <li>• computer-aided software engineering (CASE) tools</li> <li>• project deliverables</li> <li>• test plan</li> <li>• project budget</li> <li>• outcomes of the business-analysis process</li> <li>• appropriate software and hardware</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate: <ul style="list-style-type: none"> <li>• preparing component action diagrams</li> <li>• conducting walk-through of models against specifications</li> <li>• using CASE tools</li> </ul> </li> <li>• verbal or written questioning to assess candidate's knowledge of interoperability between components</li> <li>• review of developed model.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level,</p>

	<p>language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Documentation standards</b> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS)</li> <li>• organisational and project policy related to: <ul style="list-style-type: none"> <li>• sign-off</li> <li>• storage</li> <li>• distribution</li> <li>• revision.</li> </ul> </li> </ul>
<b>Project specifications</b> may include:	<ul style="list-style-type: none"> <li>• current system functionality</li> <li>• technical requirements</li> <li>• user problem statement.</li> </ul>
<b>Standards</b> may include:	<ul style="list-style-type: none"> <li>• ISO, IEC and AS standards</li> <li>• organisational standards</li> <li>• project standards.</li> </ul>
<b>Requirements</b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT503A Validate quality and completeness of system design specifications

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to check the system specifications against outcomes and quality standards.

## Application of the Unit

This unit applies to individuals working as system designers who are required to validate system design specifications to ensure that they meet the required organisational audit standards.

System quality may refer to the network system, a program or a project.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine audit criteria	<p>1.1 Investigate the <i>system</i> or product for which the quality audit is being performed to understand its functionality</p> <p>1.2 Determine the objectives to be achieved by the quality audit</p> <p>1.3 Determine the scope of the quality audit</p> <p>1.4 Develop a list of audit criteria and <i>quality benchmarks</i></p> <p>1.5 Develop a <i>metric</i> to classify the audit criteria</p> <p>1.6 Determine the audit technique or methodology to be followed</p> <p>1.7 Examine and detail the resources available to carry out the audit</p> <p>1.8 Document the objectives, scope, criteria, technique and resources in an audit plan</p>
2. Audit aspects of the final system	<p>2.1 Use the audit criteria to collect evidence about the functionality and quality of the final system, including <i>documentation</i></p> <p>2.2 Use a checklist to monitor audit progress</p> <p>2.3 Document audit outcomes as the audit progresses</p>
3. Review and confirm contract and specifications	<p>3.1 Review system contract against audit outcomes</p> <p>3.2 Compare system functionality against audit outcomes and system contract</p> <p>3.3 Identify items of non-compliance where audit outcomes do not meet performance targets or fall short of contract <i>requirements</i></p> <p>3.4 Review system procedures for corrective action</p> <p>3.5 Document items of non-compliance and proposed corrective action</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - liaise with internal and external personnel on technical and operational matters
  - present information
- literacy skills to:
  - analyse and evaluate information
  - write reports
- planning and organisational skills to conduct quality audit when reviewing system against contract areas
- problem-solving skills to draft acceptance criteria
- technical skills to:
  - create appropriate metrics
  - explore functionality of the system being tested.

### Required knowledge

- acceptance criteria
- detailed design principles and specification standards
- fault tolerance technologies
- quality audits
- quality levels, both generally and as required by the organisation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• determine audit criteria and conduct audit</li> <li>• review system procedures for non-compliance</li> <li>• specify corrective actions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• audit tools</li> <li>• documentation guidelines</li> <li>• relevant standards and benchmarks</li> <li>• service level agreement (SLA)</li> <li>• archive policy</li> <li>• acceptance criteria</li> <li>• IT security specifications</li> <li>• live system, including database, system files and designed interface</li> <li>• technical specifications of system.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate undertaking an audit</li> <li>• verbal or written questioning to assess candidate's knowledge of requirements for identifying audit criteria</li> <li>• review of documented items of non-compliance and proposed corrective action prepared by candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking</p>

	<p>background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>System</i></b> may include:	<ul style="list-style-type: none"> <li>• active server page (ASP)</li> <li>• applications</li> <li>• databases</li> <li>• gateways</li> <li>• internet service provider (ISP)</li> <li>• operating system</li> <li>• servers.</li> </ul>
<b><i>Quality benchmarks</i></b> may include:	<ul style="list-style-type: none"> <li>• benchmarks that cover:             <ul style="list-style-type: none"> <li>• cost savings</li> <li>• performance</li> <li>• quality</li> <li>• technical matters</li> </ul> </li> <li>• relevant quality standards:             <ul style="list-style-type: none"> <li>• AS3925.1-1994 Software quality assurance - plans</li> <li>• NZS14102:1998 Information technology guideline for evaluation and selection of CASE tools</li> <li>• AS/NZS4258:1994 Software user documentation process</li> <li>• AS/NZS ISO/IEC 12207:1997 Information technology - Software life cycle processes.</li> </ul> </li> </ul>
<b><i>Metric</i></b> may include:	<ul style="list-style-type: none"> <li>• capacity</li> <li>• input</li> <li>• output</li> <li>• performance</li> <li>• quality</li> <li>• value metrics.</li> </ul>
<b><i>Documentation</i></b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project management templates</li> <li>• report writing principles</li> <li>• version control.</li> </ul>

<b>Requirements</b> may refer to:	<ul style="list-style-type: none"><li>• application</li><li>• business</li><li>• network</li><li>• people in the organisation</li><li>• system.</li></ul>

## Unit Sector(s)

General ICT

## ICAICT504A Confirm transition strategy for a new system

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to confirm a transition strategy to a new system, based on the revised system design and newly developed change-management plan.

### Application of the Unit

This unit applies to staff in a range of information and communications technology (ICT) positions who are required to plan for a transition to a new system, whether that be websites, networks or software.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Confirm delivery and acceptance plan	1.1 Confirm phased delivery with the <b><i>client</i></b> and <b><i>project team</i></b> 1.2 Confirm method of acceptance and <b><i>acceptance criteria</i></b> 1.3 Confirm that acceptance test plan is in place and agreed
2. Confirm data take-up plan	2.1 Identify the data source for each <b><i>database</i></b> 2.2 Analyse possible integrity <b><i>constraints</i></b> 2.3 Design the data conversion workflow, taking into consideration data validation, data clean-up and data loading 2.4 Identify interface <b><i>requirements</i></b> , data take-up method, complexity and effort required 2.5 Develop required data conversion contingencies and confirm with <b><i>appropriate person</i></b>
3. Confirm cutover plan	3.1 Agree on the conversion window in operational timescale with appropriate person 3.2 Plan and confirm parallel running with appropriate person 3.3 Confirm approval of dependencies with appropriate person 3.4 Confirm approval of fall-back options with appropriate person 3.5 Confirm approval of checkpoints, tests and responsibilities with appropriate person 3.6 Confirm approval of resources, tasks and timescales with appropriate person

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret system transition plans
- communication skills to liaise with client and technical staff to ensure requirements are known and can be met within timeframes
- literacy skills to interpret technical specifications and related documentation
- planning and organisational skills to manage data transition and data storage planning
- research skills to specify, analyse and evaluate broad features of a particular business domain and best practice in data transition
- technical skills to:
  - analyse data
  - design data conversion workflow
  - identify data source for each database.

### Required knowledge

- conversion strategies
- current business practices related to transition strategies
- cut-over strategies
- post-converging strategies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• refine the transition strategy in the light of technical information and change-management plans</li> <li>• confirm acceptance plan</li> <li>• develop a data take-up plan</li> <li>• confirm cutover plan.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• IT specifications</li> <li>• change-management plan</li> <li>• acceptance test plan</li> <li>• IT security assurance specifications</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate developing required data conversion contingencies</li> <li>• verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> <li>• interpreting software specifications</li> <li>• cut over and test network equipment.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined</p>

	with targeted questioning to assess required knowledge.
--	---

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Project team</i></b> may include:	<ul style="list-style-type: none"> <li>• different businesses working in partnership</li> <li>• individual business analysts</li> <li>• solution developers and business clients working together</li> <li>• third-party solution developers working together.</li> </ul>
<b><i>Acceptance criteria</i></b> may include:	<ul style="list-style-type: none"> <li>• cost implications</li> <li>• logistical considerations</li> <li>• technical</li> <li>• timeframe.</li> </ul>
<b><i>Database</i></b> may include:	<ul style="list-style-type: none"> <li>• object-relational databases</li> <li>• proprietary databases and commercial off-the-shelf (COTS) database packages</li> <li>• relational databases.</li> </ul>
<b><i>Constraints</i></b> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• hardware</li> <li>• legal constraints</li> <li>• policy</li> <li>• resource</li> <li>• software</li> <li>• time.</li> </ul>
<b><i>Requirements</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT505A Determine acceptable developers for projects

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to ensure that development projects are contracted to developers who are credible and able to accomplish the task within the confines of the mutually agreed parameters of the project. The process involves analysis and recording of objective evidence across a broad range of technical and managerial operations.

### Application of the Unit

This unit applies to the process of identifying appropriate organisations to develop and maintain organisational systems. Special care is taken to ensure appropriate solutions providers have the skills, depth of capability and support to undertake the required tasks.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Specify development requirements	1.1 Prepare and document clear <i>specifications</i> for the <i>project</i> 1.2 Submit specifications to <i>appropriate person</i> for sign-off and authority to contract <i>developers</i> 1.3 Prepare request for tender document if appropriate, using specifications 1.4 Prepare and document agreed selection guidelines
2. Identify potential developers	2.1 Investigate potential developers in line with <i>organisational guidelines</i> 2.2 Request development quotes from potential developers 2.3 Assess submitted quotes against selection guidelines and make a shortlist of potential developers, where appropriate
3. Select a potential developer	3.1 Assess the capability of developers to do the project work 3.2 Confirm that potential developers understand the scope of the work to be undertaken 3.3 Conduct a <i>due diligence</i> check where appropriate and assess the quality of developers 3.4 Select appropriate developers using <i>selection criteria</i> 3.5 Inform developers of their selection according to organisational guidelines
4. Sign off the selection process	4.1 Prepare contract for signing according to enterprise procedures 4.2 Sign contract and prepare developers to commence work according to contract

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to determine:
  - business requirements or specifications
  - selection criteria
  - technical requirements or specifications
- communication skills to liaise with:
  - business units, managers and other staff or users
  - contract developers
  - project team members
  - technical staff and service providers
- literacy skills to:
  - prepare contracts
  - write technical specifications and requirements
- numeracy skills to make judgements about quotes from potential developers
- problem-solving skills to plan and manage:
  - contract developers
  - project
  - project team members
- technical skills to navigate on the web.

### Required knowledge

- basic knowledge of processes and procedures relating to:
  - business liaison
  - business negotiation
- overview knowledge of:
  - Australian Computer Society Code of Ethics
  - industry and ecommerce standards.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• systematically select professional and skilled providers and developers who can complete the required development project.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• business plan</li> <li>• procurement policies</li> <li>• selection policies.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate identifying and selecting potential developers</li> <li>• review of selection process documents such as ranked assessments, tendering guidelines, and selection criteria prepared by candidate.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Specifications</i></b> may include:	<ul style="list-style-type: none"> <li>• business case</li> <li>• business requirement specifications</li> <li>• project plan</li> <li>• request for information (RFI)</li> <li>• request for proposal (RFP)</li> <li>• request for tender and invitation to tender</li> <li>• technical and system specification</li> <li>• use of case statements.</li> </ul>
<b><i>Project</i></b> may include:	<ul style="list-style-type: none"> <li>• business improvement process</li> <li>• ebusiness solution involving the total organisation or part of the organisation</li> <li>• systems-only change</li> <li>• total organisational change.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Developers</i></b> may include:	<ul style="list-style-type: none"> <li>• internal or external sources of expertise:             <ul style="list-style-type: none"> <li>• analysts or programmers</li> <li>• consultants</li> <li>• contractors</li> <li>• employees</li> <li>• solution providers.</li> </ul> </li> </ul>
<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>
<b><i>Due diligence</i></b> may include:	<ul style="list-style-type: none"> <li>• checking for vendor certification</li> <li>• checking membership of professional bodies</li> </ul>

	<ul style="list-style-type: none"> <li>• checking developer's website and their 'seal of trust' credentials</li> <li>• checking with appropriate quality and industry bodies</li> <li>• conducting a check of reputation in the industry</li> <li>• identifying the work of the developer to be employed</li> <li>• obtaining referees of previous clients.</li> </ul>
<i>Selection criteria</i> may include:	<ul style="list-style-type: none"> <li>• registration of interest</li> <li>• RFI</li> <li>• RFP</li> <li>• involving: <ul style="list-style-type: none"> <li>• advertising to the open market</li> <li>• cold calling</li> <li>• existing relationships</li> <li>• extending an existing relationship</li> <li>• getting recommendation from someone trusted</li> <li>• identifying a well-designed ebusiness site and finding the developers</li> <li>• online searching</li> <li>• preferred supplier lists</li> <li>• responding to advertisements.</li> </ul> </li> </ul>

## Unit Sector(s)

General ICT

## ICAICT506A Implement process re-engineering strategies

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to consider a variety of potential process re-engineering strategies and to make appropriate selections for implementation in an organisation.

### Application of the Unit

This unit applies to senior information and communications technology (ICT) staff who are required to implement system re design.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop process re-engineering strategies	1.1 Research and determine target process for re-engineering action 1.2 Develop process re-engineering plan 1.3 Determine and document strategic importance of process 1.4 Establish and document performance standards and benchmarks for new process 1.5 Seek feedback and suggestions from <i>client</i> on proposed process re-engineering
2. Implement process re-engineering strategies	2.1 Compare suggestions with process re-engineering plan to determine suitability for <i>business requirements</i> 2.2 Incorporate suggestions where appropriate 2.3 Implement new process into business structure and leave sufficient scope for changing capacity or upgrades
3. Monitor organisational context	3.1 Monitor new process to measure performance levels 3.2 Determine and document the benefits of the new process to the business 3.3 Identify and document training needs for staff 3.4 Analyse the cultural and political impact of the new process 3.5 Document the new process and disseminate information to <i>appropriate person</i>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate cultural and political impact of the new process
- communication skills to:
  - liaise with the client
  - undertake market research and testing, using focus groups
- literacy skills to:
  - interpret business requirements
  - write technical documents and training needs document
- learning skills to provide instruction to staff
- planning and organisational skills to develop the process re-engineering plan
- problem-solving skills to undertake risk analysis
- research skills to determine target process for re-engineering.

### Required knowledge

- business case preparation
- copyright and intellectual property
- impact of the new process on the organisation
- organisational strategy
- procedures relating to consulting internally and externally.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• implement re-engineering process that supports organisational objectives, taking into account the complex interdependencies between organisational and external components.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• process re-engineering plan</li> <li>• analysis software</li> <li>• ebusiness models</li> <li>• modelling software</li> <li>• organisational strategy</li> <li>• organisational structure and culture</li> <li>• personal computer</li> <li>• stakeholder analysis.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of process re-engineering</li> <li>• review of candidate's implementation plan.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required</p>

	knowledge.
--	------------

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that maybe present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Business requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT507A Select new technology models for business

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify opportunities for using new technology to support and enable efficient models of business.

### Application of the Unit

This unit applies to senior information and communications technology (ICT) staff in a range of areas who are required to research innovative approaches to meeting business requirements.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Identify processes to be improved by the application of a new business model</p>	<p>1.1 Map existing process flow against relevant performance <i>standards</i> in order to identify areas that may need improvement</p> <p>1.2 Outline emerging models and processes</p> <p>1.3 Identify changes in the technological, <i>client</i> and supply chain environment</p> <p>1.4 Document changes identified and submit to <i>appropriate person</i> for review</p>
<p>2. Appraise existing models</p>	<p>2.1 Analyse existing business models in use</p> <p>2.2 Investigate business models in use in other similar businesses</p> <p>2.3 Identify and determine relevance of business models in use and under development in other industry sectors</p> <p>2.4 Map existing models in other parts of business supply chain</p>
<p>3. Research new business models</p>	<p>3.1 Investigate new business models to establish opportunities for improvement</p> <p>3.2 Evaluate opportunities against <i>business requirements</i></p> <p>3.3 Prioritise and document identified opportunities</p>
<p>4. Select the appropriate model</p>	<p>4.1 Select a business model that improves the business processes</p> <p>4.2 Develop performance benchmarks to measure the effectiveness of the chosen business model</p> <p>4.3 Model new business process or model and collaborate with other businesses</p> <p>4.4 Document the proposed business model according to business procedures</p> <p>4.5 Forward appropriate document to appropriate person for sign-off</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to analyse current business models
- initiative and enterprise skills to develop new methods of doing business
- literacy skills to:
  - deal with complex ideas and concepts
  - document benchmarking standards
- numeracy skills to develop cost-benefit analyses
- problem-solving skills to use data obtained from modelling to support decision making
- technical skills to:
  - conduct prototyping
  - design technical models
  - evaluate models.

### Required knowledge

- benchmark selection and development
- business process design
- business-to-business and business-to-customer interface and liaison
- copyright and intellectual property
- current technical environment
- determination of the impact of technological change
- electronic commerce modelling language (ECML)
- environmental scanning
- interpretation of design specifications
- modelling
- value and supply chain management
- website architecture.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify new approaches to using technology or new technology to enable efficient models of business</li> <li>• determine the appropriate focus of the selected business model in order to achieve the desired performance improvement</li> <li>• document the new business model.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• business systems</li> <li>• analysis software</li> <li>• modelling software</li> <li>• business requirements</li> <li>• current industry news, forums, lists and chat rooms</li> <li>• user analysis</li> <li>• supply and value chain analysis.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of current business processes and modelling</li> <li>• review of reports prepared by candidate showing proposed new business model.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• organisational standards</li> <li>• project standards.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Business requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• customer</li> <li>• inventory</li> <li>• payroll</li> <li>• supplier</li> <li>• tax requirements of the organisation.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT508A Evaluate vendor products and equipment

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to evaluate and test a range of vendor products and equipment against a client's business requirements.

### Application of the Unit

This unit applies to individuals in a range of information and communications technology (ICT) areas who are required to assess hardware and software products.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish business requirements	<p>1.1 Identify and prioritise <i>business requirements</i></p> <p>1.2 Identify conflicting or overlapping business requirements</p> <p>1.3 Specify budget and available resources</p> <p>1.4 Validate business requirements, budget and resource needs with <i>client</i></p>
2. Identify vendor products and equipment	<p>2.1 Investigate a representative range of vendor products and equipment</p> <p>2.2 Identify and document interdependencies</p> <p>2.3 Specify and document technical alternatives available to the business</p> <p>2.4 Determine and document availability of products and equipment</p> <p>2.5 Ensure vendor products and equipment meet Australian or other <i>standards</i></p>
3. Test vendor products and services	<p>3.1 Develop valid and reliable test regime with appropriate measurements</p> <p>3.2 Establish test environment, including calibrated measuring equipment</p> <p>3.3 Undertake testing of products or equipment and document results</p> <p>3.4 Undertake revised testing where initial tests are inconclusive or where alternative product configuration may meet business requirements</p>
4. Evaluate vendor products, services and equipment	<p>4.1 <i>Rate</i> vendor products for quality, performance and support</p> <p>4.2 Rate vendor products for fit with client needs</p> <p>4.3 Establish product limitations, performance, integration capabilities and costs and compare with established business requirements</p> <p>4.4 Prepare cost-benefit analysis</p>
5. Prepare evaluation report	<p>5.1 Document product information in order of preference</p> <p>5.2 Recommend preferred product, including the reasoning behind recommendations</p> <p>5.3 Prepare a report containing <i>solution</i> details</p> <p>5.4 Submit report to client for approval</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to compare and contrast similar products from different vendors
- communication skills to effectively communicate with vendors
- literacy skills to identify key sources of product information, summarise and document technical information
- numeracy skills to compare prices on different products.

### Required knowledge

- broad knowledge of:
  - Australian Computer Society Code of Ethics
  - client business domain
  - copyright and intellectual property
  - current industry-accepted hardware and software products, including their general features and capabilities
- detailed knowledge of current and future technical systems
- features and function of relevant hardware components and software products and the interaction between these
- vendor product and international standards.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• evaluate a range of vendor products and equipment against a client's functional requirements</li> <li>• choose the most appropriate products</li> <li>• document the selected items and selection rationale.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• client functional requirements</li> <li>• hardware and software specifications from vendors</li> <li>• test procedures and activities.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of client business domain and appropriate selection criteria</li> <li>• review of reports prepared by candidate showing selected items and selection rationale.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Business requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• people in the organisation</li> <li>• system.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Standards</i></b> may include:	<ul style="list-style-type: none"> <li>• Australian Standards (AS)</li> <li>• Institute of Electrical and Electronics Engineers (IEEE)</li> <li>• International Electrotechnical Commission (IEC)</li> <li>• International Organization for Standardization (ISO)</li> <li>• International Telecommunications Union (ITU)</li> <li>• Internet Engineering Task Force (IETF)</li> <li>• organisational</li> <li>• project.</li> </ul>
<b><i>Rate</i></b> process may include:	<ul style="list-style-type: none"> <li>• evaluation of: <ul style="list-style-type: none"> <li>• customer testimonies</li> <li>• support documents.</li> </ul> </li> </ul>
<b><i>Solution</i></b> may include:	<ul style="list-style-type: none"> <li>• hardware upgrades</li> <li>• implementing a new system</li> <li>• new hardware</li> <li>• new software</li> <li>• software upgrades</li> <li>• user training.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT509A Gather data to identify business requirements

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify, analyse and document business requirements.

### Application of the Unit

This unit applies to systems analyst developers and project team leaders and managers responsible for gathering data to identify business requirements.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify key information sources	1.1 Identify information repositories across the business 1.2 Review current <b><i>organisational documentation</i></b> 1.3 Develop critical questions to elicit information from key stakeholders using a mixture of open and closed questions
2. Gather data	2.1 Use a wide range of <b><i>information-gathering techniques</i></b> 2.2 Review reports and other data sources for business information 2.3 Confirm <b><i>business-critical factors</i></b> relating to current and future directions of the organisation with <b><i>stakeholders</i></b>
3. Prepare data analysis for review	3.1 Analyse group and individual responses to clearly define business priorities 3.2 <b><i>Document</i></b> data analysis for review according to organisational standards

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to identify business requirements
- communication skills to transfer and collect information and gain consensus on concepts
- literacy skills to document and communicate analysis findings
- planning and organisational skills to gather data within a set timeframe
- problem-solving skills to develop strategic initiatives
- research skills to specify, analyse and evaluate broad features of a particular business domain and best practice in system development.

### Required knowledge

- overview knowledge of:
  - client business domain, so that the business need is understood by project team and client
  - current industry-accepted hardware and software products, general features and capabilities
  - role of stakeholders and the degree of stakeholder involvement
  - quality assurance practices (e.g. when planning the requirements phase)
- detailed knowledge of system's current hardware, software and communication functionality.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• document business requirements based on business strategy and current and future directions</li> <li>• facilitate client stakeholders to reach a consensus position.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• project brief</li> <li>• business documentation</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of data-gathering techniques</li> <li>• direct observation of candidate conducting interviews and focus groups</li> <li>• evolution of system-requirement specifications based on data gathered</li> <li>• evaluation of software prototype based on data gathered</li> <li>• evaluation of unified modelling language (UML) diagrams to represent the analysis of the data gathered.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<p><b><i>Organisational documentation</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• annual reports</li> <li>• brochures</li> <li>• business forms</li> <li>• current systems</li> <li>• facilitated group sessions or discussion groups</li> <li>• financial statements</li> <li>• performance reports</li> <li>• policy documents</li> <li>• website.</li> </ul>
<p><b><i>Information-gathering techniques</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• interviews</li> <li>• observation</li> <li>• questionnaires</li> <li>• surveys.</li> </ul>
<p><b><i>Business-critical factors</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• customer confidence</li> <li>• customer demographics</li> <li>• data knowledge and management</li> <li>• expectations</li> <li>• response times</li> <li>• scalability</li> <li>• security</li> <li>• traffic.</li> </ul>
<p><b><i>Stakeholders</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsor</li> <li>• user.</li> </ul>
<p><b><i>Document</i></b> may include:</p>	<ul style="list-style-type: none"> <li>• business requirement specifications</li> <li>• textual documentation, such as system-requirement specifications</li> <li>• case diagrams</li> <li>• wireframes.</li> </ul>

## **Unit Sector(s)**

General ICT

## ICAICT510A Determine appropriate IT strategies and solutions

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to determine the best IT solution during the initial planning phase. It involves defining the basic goals of the solution and providing the basis for a high-level project work plan.

### Application of the Unit

This unit applies to IT personnel who participate in the development of strategic initiatives. They may participate in teams, including teams concerned with planning and evaluation functions. Group or team coordination may also be involved.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Evaluate IT needs of the organisation	<p>1.1 Conduct an analysis process that determines the organisation's current needs and projected IT requirements</p> <p>1.2 Review organisational environment and relevant industry changes and trends</p> <p>1.3 Determine IT goals, objectives and future requirements</p> <p>1.4 Prepare information for <b><i>appropriate person</i></b> to determine scope with top-level management</p>
2. Contribute to the development of the project goals and objectives	<p>2.1 Determine project scope according to agreed brief</p> <p>2.2 Align the project goals with the IT goals of the organisation</p> <p>2.3 Determine the impact that system or changes will have on the organisation</p> <p>2.4 Document project, goals and impact of changes according to requirements</p>
3. Determine best IT systems solution	<p>3.1 Evaluate a range of IT systems solutions according to project goals</p> <p>3.2 Define the high-level <b><i>hardware, software</i></b> and communications environment necessary for the proposed systems solution</p> <p>3.3 Develop a <b><i>feasibility</i></b> study and a cost-benefit analysis of the proposed solution</p> <p>3.4 Ensure that the proposed solution aligns with the organisation's strategic plan</p> <p>3.5 Forward feasibility study and cost-benefit analysis document to appropriate person for approval and sign-off</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret, analyse and evaluate current needs and project IT requirements of the organisation
- communication skills to negotiate with other team members during the planning process
- literacy skills to write reports according to organisational requirements
- numeracy skills to develop a cost-benefit analysis
- project planning skills to set benchmarks and identify scope to contribute to a high-level project work plan
- research skills to:
  - analyse and evaluate broad features of a particular business domain
  - identify best practice in system development
  - identify business continuity impact
  - identify business objectives and future requirements
- technical skills to:
  - evaluate a range of IT systems solutions
  - define hardware and software for systems solution
  - identify the best IT systems solution and define the basic goals of the system.

### Required knowledge

- broad knowledge of two or more current industry systems development methodologies
- components of the business planning process relevant to the development of IT business solutions
- current business practices to:
  - prepare reports and facilitate group interview processes
  - identify and recommend IT solutions following quality assurance practices
- current industry-accepted hardware and software products, with broad knowledge of general features and capabilities of technology
- feasibility and cost-benefit analysis and identifying information sources for a cost-benefit analysis
- role and degree of stakeholder involvement in the development of the IT strategy
- specific client business requirements in relation to proposed IT solutions.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse organisation's current needs and projected IT requirements</li> <li>• determine the impact of system changes on the organisation</li> <li>• evaluate and recommend IT strategies and systems solutions to meet business objectives</li> <li>• develop a feasibility study and cost-benefit analysis of proposed solution.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where IT strategies and solutions may be developed</li> <li>• detailed information relating to current needs and project requirements of the business</li> <li>• outcomes of the business-analysis process</li> <li>• client expectations brief</li> <li>• business risks and objectives</li> <li>• range of IT business solutions.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of IT systems solutions</li> <li>• direct observation of candidate conducting feedback sessions</li> <li>• review of: <ul style="list-style-type: none"> <li>• documentation prepared by candidate outlining the best IT systems solutions for the organisation</li> <li>• feasibility study and cost-benefit analysis of proposed solution developed by candidate.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally</p>

	<p>appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	---

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Hardware</i></b> may include:	<ul style="list-style-type: none"> <li>• modems or other connectivity device, including digital subscriber line (DSL) modems</li> <li>• networks</li> <li>• personal computers</li> <li>• remote sites</li> <li>• servers</li> <li>• workstations.</li> </ul>
<b><i>Software</i></b> may include:	<ul style="list-style-type: none"> <li>• commercial</li> <li>• customised software</li> <li>• in-house</li> <li>• packaged.</li> </ul>
<b><i>Feasibility</i></b> may include:	<ul style="list-style-type: none"> <li>• economic</li> <li>• operational</li> <li>• schedule</li> <li>• technical.</li> </ul>

General ICT

# ICAICT511A Match IT needs with the strategic direction of the enterprise

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI11 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to ensure information technology (IT) services meet current and future internal operational enterprise requirements.

## Application of the Unit

This unit applies to system administrators who maintain and support critical infrastructure for commercial and business objectives in small to medium-sized organisations.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Evaluate current business strategy	<p>1.1 Analyse the current strategic plan of the organisation to understand the industry environment and current organisational goals</p> <p>1.2 Compare information related to current operational practices and the strategic plan to determine possible IT gaps and improvement opportunities</p> <p>1.3 Report information regarding the effect of IT developments to an <b><i>appropriate person</i></b></p>
2. Evaluate effect of changes	<p>2.1 Review information on current IT systems supported by the organisation</p> <p>2.2 Compare and document advantages and disadvantages of current and proposed IT systems</p> <p>2.3 Determine the objectives and implications of introducing changes</p> <p>2.4 Document findings and forward to appropriate person for feedback</p>
3. Develop action plans	<p>3.1 Develop plans to implement proposed changes, according to <b><i>organisational policy and procedures</i></b></p> <p>3.2 Document action plans, ensuring that standards, targets and implementation methods are detailed</p> <p>3.3 Forward documentation to appropriate person for feedback and approval</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - compare advantages and disadvantages of current and proposed IT systems
  - evaluate effect of IT changes
  - determine possible IT client support gaps
  - review objectives and performance measures
- communication skills to:
  - negotiate with other team members during the planning process
  - report effect of IT development to appropriate person
- literacy skills to:
  - document recommendations and develop action plans
  - organise and present information according to business report writing requirements
- planning and time-management skills to:
  - plan client-support service delivery within quality, time and cost parameters
  - manage client-support services
- research skills to:
  - identify business objectives and future requirements
  - source basic information from readily available sources.

### Required knowledge

- analysis and planning approaches to technical problems or management requirements, taking into account the hardware platform used by the organisation, and network and security guidelines
- current system functionality to forecast for planning
- operating systems supported by the organisation to forecast for planning
- possible competing and complementary internal and external operating environments
- technology and product directions for evaluating and forecasting vendor and technology trends.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• access and analyse relevant information on changes to technology and resources</li> <li>• analyse strategic plans to determine future technology needs</li> <li>• monitor resource use and cost-efficiency, and effectiveness of technology</li> <li>• develop and document action plan detailing standards, targets and implementation methods.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where IT needs and strategic directions of the enterprise may be coordinated</li> <li>• detailed information relating to business strategic plan</li> <li>• outcomes of the business-analysis process</li> <li>• budget constraints</li> <li>• timeframe for the strategic plan</li> <li>• business risks and objectives</li> <li>• information on a range of IT business solutions</li> <li>• appropriate learning and assessment support when required.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of analysis and planning methodologies in an IT environment</li> <li>• review of documentation prepared by candidate detailing findings of evaluation of proposed IT systems</li> <li>• review of action plan prepared by candidate, detailing standards, targets and implementation methods.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p>

	<p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>
<b><i>Organisational policy and procedures</i></b> may include:	<ul style="list-style-type: none"> <li>• operational</li> <li>• financial</li> <li>• legal</li> <li>• human relations</li> <li>• internal and external operating environments.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT512A Plan process re-engineering strategies for business

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to select a process to be re-engineered, to plan for its re-engineering, and to understand the strategic, organisational and change context in which it is to be re-engineered.

### Application of the Unit

This unit applies to those working in senior positions in the knowledge management or systems development field who are required to evaluate existing systems with a view to redesigning them.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

Not applicable.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Select the process to be re-engineered	<p>1.1 Identify major processes that require re-engineering</p> <p>1.2 Identify boundaries, <i>stakeholders</i> and strategic importance of each process</p> <p>1.3 Prioritise each process according to its level of <i>performance</i></p> <p>1.4 Select a process to re-engineer and document decision-making process</p>
2. Identify the strategic context	<p>2.1 Determine the purpose of the selected process, and where it fits into the business strategy</p> <p>2.2 Evaluate the scope of the process, including stakeholder and strategic impact</p> <p>2.3 Identify potential risks</p> <p>2.4 Define the broad objectives of the new process</p> <p>2.5 Model the new process, taking into account <i>client</i> expectations, cooperation across boundaries and process flow</p> <p>2.6 Analyse changes to organisational structures, <i>technical requirements</i>, training needs, cultural and political impact and communication channels</p> <p>2.7 Document new process and impact of changes</p>
3. Design the new process	<p>3.1 Develop key performance indicators and implementation responsibilities for the new process</p> <p>3.2 Communicate information to <i>appropriate person</i></p> <p>3.3 Prepare a process re-engineering plan to document stages</p> <p>3.4 Submit process re-engineering plan to appropriate person for sign-off</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - analyse changes to:
    - communication channels
    - cultural and political impact
    - organisational structures
    - technical requirements
    - training needs
  - evaluate the scope of the project
- communication skills to liaise and negotiate with stakeholders
- literacy skills to:
  - document stages of implementation
  - write re-engineering plans
- planning and time-management skills to prioritise each process according to level of performance
- research skills to identify:
  - boundaries and stakeholders
  - major processes for re-engineering
- technical skills to:
  - develop a training needs analysis
  - develop key performance indicators for benchmarking
  - manage the change-management process.

### Required knowledge

- copyright and intellectual property
- ecommerce standards
- industry standards
- organisational development and structure
- organisational strategy
- stakeholder liaison and negotiation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify a process to be re-engineered</li> <li>• prepare an analysis, documenting the impact of changes to the organisation</li> <li>• plan the re-engineering of the process in a manner that supports the strategic, organisational and change context of the process to be re-engineered</li> <li>• design the new process, including key performance indicators and implementation responsibilities.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure:</p> <ul style="list-style-type: none"> <li>• access to: <ul style="list-style-type: none"> <li>• organisational structure and culture</li> <li>• organisational strategy</li> <li>• stakeholder analysis</li> <li>• ebusiness models</li> </ul> </li> <li>• use of: <ul style="list-style-type: none"> <li>• personal computer</li> <li>• analysis software and modelling software currently used in industry.</li> </ul> </li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of: <ul style="list-style-type: none"> <li>• benchmarking and change-management processes</li> <li>• process re-engineering</li> </ul> </li> <li>• review of documentation prepared by candidate analysing the impact of process re-engineering changes to the organisation</li> <li>• review of the process re-engineering plan prepared by candidate, detailing key performance indicators</li> </ul>

	and implementation responsibilities.
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsors</li> <li>• users.</li> </ul>
<b><i>Performance</i></b> may include:	<ul style="list-style-type: none"> <li>• financial or profitability measurements and selection decisions based on:             <ul style="list-style-type: none"> <li>• strategic importance of the process</li> <li>• worst performance.</li> </ul> </li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Technical requirements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• database</li> <li>• network</li> <li>• people in the organisation</li> <li>• platform</li> <li>• system.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT514A Identify and manage the implementation of current industry-specific technologies

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify and manage the implementation of specific industry technologies to meet identified industry standards.

This unit covers the skills required to demonstrate and constantly review work processes that ensure that the quality of the business process is maintained at the highest level possible through the appropriate application of industry-specific technologies.

Users should confirm licensing, legislative, regulatory, or certification requirements with the relevant federal, state or territory authority.

## Application of the Unit

This unit applies to individuals engaged in ongoing review and research in order to identify, manage and evaluate the implementation of industry technologies or techniques to improve aspects of the organisation's activities. The unit provides evidence of the application of industry enabling technologies.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

### Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

### Elements and Performance Criteria

1. Analyse and plan the implementation of industry-specific technologies	1.1 Identify technologies specific to an <b><i>industry sector</i></b> 1.2 Acquire <b><i>industry-specific technologies</i></b> and analyse their relevance to organisational requirements 1.3 Plan the implementation of industry-specific technologies, where appropriate, for the benefit of the organisation
2. Manage the application of industry-specific technology to assist in solving specific organisational problems	2.1 Manage the testing of industry-specific technology 2.2 Manage the implementation of specific features and functions of industry-specific technology to provide a suitable solution to an identified problem 2.3 Demonstrate depth of knowledge of enabling technologies to an accepted industry standard 2.4 Access and use <b><i>sources of information</i></b> relating to the industry-specific technology
3. Review, analyse and evaluate industry-specific technology performance	3.1 Analyse implementation of the industry-specific technology for performance and usability 3.2 Review and evaluate the benefits to the organisation 3.3 Determine <b><i>environmental considerations</i></b> involved with using the technology 3.4 Seek <b><i>feedback</i></b> from users, where appropriate

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - communicate at a high level with peers and supervisors
  - seek assistance and expert advice
  - seek feedback from users
- literacy skills to interpret technical documentation, equipment manuals and specifications
- high-level research skills to locate appropriate sources of information regarding industry-specific technology
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - apply the industry-specific technology
  - identify features of the industry-specific technology
  - test and evaluate the industry-specific technology.

### Required knowledge

- high-level knowledge of:
  - vendor-product directions
  - current technology trends, directions in IT and specifically of the major industry technology standards used in the specified area
  - information-gathering techniques
- in-depth knowledge of current industry hardware and software products, including their general features, capabilities and application.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• manage the implementation of new and emerging industry-specific technologies</li> <li>• analyse and critically evaluate features and functions of identified industry-specific technologies to an industry standard.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where industry-specific technologies may be used</li> <li>• industry-specific technologies currently used in industry</li> <li>• documents detailing OHS standards, environmental guidelines and organisational requirements.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of features and functions of industry-specific technologies</li> <li>• direct observation of candidate managing the implementation of industry-specific technologies</li> <li>• simulation of industry-specific uses of the industry-specific technologies.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required</p>

	knowledge.
--	------------

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Industry sector</b> may include:	<ul style="list-style-type: none"> <li>• business services or information worker</li> <li>• information and communication technology</li> <li>• telecommunication.</li> </ul>
<b>Industry-specific technologies</b> may include:	<ul style="list-style-type: none"> <li>• vendor specific:             <ul style="list-style-type: none"> <li>• hardware</li> <li>• integrated services</li> <li>• internet access</li> <li>• mobile communication devices</li> <li>• networks</li> <li>• peripherals</li> <li>• software.</li> </ul> </li> </ul>
<b>Sources of information</b> may include:	<ul style="list-style-type: none"> <li>• appliances software and technical connections guidance and other outputs supplied by vendors and manufacturers</li> <li>• documents</li> <li>• test pages</li> <li>• vendor and manufacturer guidance regarding requisite depth of knowledge of industry-specific technologies</li> <li>• web pages.</li> </ul>
<b>Environmental considerations</b> may include:	<ul style="list-style-type: none"> <li>• correct disposal by an authorised body of redundant hardware:             <ul style="list-style-type: none"> <li>• circuit boards</li> <li>• hard drives</li> <li>• motherboards</li> </ul> </li> <li>• recycling</li> <li>• safe packaging disposal of:             <ul style="list-style-type: none"> <li>• cardboard</li> <li>• paper</li> <li>• plastic</li> <li>• polystyrene.</li> </ul> </li> </ul>
<b>Feedback</b> may include:	<ul style="list-style-type: none"> <li>• competency skill level</li> <li>• industry validated demonstration of competency through certification</li> <li>• interviews</li> </ul>

	<ul style="list-style-type: none"><li>• meetings.</li></ul>

## Unit Sector(s)

General ICT

## ICAICT515A Verify client business requirements

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to deal with clients at a senior level, to identify their business requirements and verify the accuracy of the information gathered.

### Application of the Unit

This unit applies to senior information and communications technology (ICT) personnel who liaise with senior client staff to initiate projects.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish business relationship	1.1 Identify organisational structure, culture and politics in relation to support requirements 1.2 Identify organisational stakeholders 1.3 Develop business relationship with <b>client</b> across the appropriate number of organisational units 1.4 Schedule regular liaison to manage relationship
2. Determine context of business need or problem	2.1 Work with client to define the business <b>problem</b> to be investigated 2.2 Establish <b>system</b> boundaries and scope 2.3 Manage the preparation of appropriate information gathering 2.4 Ensure that project objectives and outcomes are documented 2.5 Work with client to substantiate <b>documentation</b>
3. Analyse new information	3.1 Supervise information gathering from identified clients of the system 3.2 Analyse gathered client responses 3.3 Analyse new <b>system requirements</b> 3.4 Ensure that new system requirements and problems are documented
4. Confirm system specifications	4.1 Review documentation 4.2 Work with client to verify system specifications, updating documentation as required 4.3 Obtain final approval and sign-off from client

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - collect and present information
  - liaise and negotiate with internal and external personnel
  - manage teams
- initiative and enterprise skills to identify, analyse and evaluate information from a variety of sources
- literacy skills to:
  - gather, analyse and evaluate information
  - prepare documentation
- problem-solving skills to:
  - participate in the development of strategic initiatives and contribute to solutions
  - troubleshoot common system problems
- research skills to specify, analyse and evaluate broad features of a particular business domain
- technical skills to provide current advice on systems and data-gathering products.

### Required knowledge

- data-gathering techniques
- detailed knowledge of client business to enable informed IT product provision
- products related to data capture
- role of stakeholders and the degree of stakeholder involvement.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• use techniques of investigation, interview and document</li> <li>• produce a clear statement of business expectations and needs, including critical business requirements</li> <li>• manage staff contributions.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• current business needs</li> <li>• client expectations brief</li> <li>• business objectives</li> <li>• systems, data gathering and appropriate software products</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate documenting a business problem</li> <li>• verbal or written questioning to assess candidate's knowledge of techniques for gathering, analysing and documenting information</li> <li>• review of documented system specifications developed by candidate for approval by client.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• ICT company</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees</li> <li>• service industry.</li> </ul>
<b><i>Problem</i></b> may refer to:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• network</li> <li>• system.</li> </ul>
<b><i>System</i></b> may include:	<ul style="list-style-type: none"> <li>• application</li> <li>• business</li> <li>• cabling infrastructure</li> <li>• computers</li> <li>• financial system</li> <li>• information system</li> <li>• management system</li> <li>• network equipment</li> <li>• software.</li> </ul>
<b><i>Documentation</i></b> may include:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC), Institute of Electrical and Electronics Engineers (IEEE), Internet Engineering Task Force (IETF) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project-management templates</li> <li>• report-writing principles</li> <li>• version control.</li> </ul>
<b><i>System requirements</i></b> may include:	<ul style="list-style-type: none"> <li>• client user</li> <li>• cost constraints</li> <li>• environment</li> <li>• geography</li> <li>• system functionality.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT601A Develop IT strategic and action plans

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to create strategic and action plans in alignment with organisational IT goals and strategies.

### Application of the Unit

This unit applies to senior information and communications technology (ICT) staff who are required to develop strategies for organisations, as well as action plans for their implementation.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Develop and communicate mission and vision statement	<p>1.1 Develop a mission statement for the organisation that states the purpose, values and business activities</p> <p>1.2 Develop a vision statement for the organisation that describes its future operation and success</p> <p>1.3 Develop the mission and vision statements in active consultation with team members and management</p> <p>1.4 Document mission and vision statements</p> <p>1.5 Communicate mission and vision statement to <i>stakeholders</i> and other authorities in the organisation</p>
2. Examine organisational environment	<p>2.1 Assess the current internal situation of the organisation, taking into account its strengths and weaknesses</p> <p>2.2 Assess the external environment of the organisation, taking into account opportunities and threats</p> <p>2.3 Determine trends and developments impacting on the strategic direction of organisation</p> <p>2.4 Determine critical issues facing the organisation</p> <p>2.5 Document strengths, weaknesses, opportunities, threats and critical issues facing the organisation in the <i>strategic plan</i></p>
3. Set objectives and targets	<p>3.1 Use critical issues to develop objectives and targets for the organisation after active consultation with team members and management</p> <p>3.2 Develop strategies that meet organisational objectives and reflect overall organisational mission and values</p> <p>3.3 Ensure strategies are obtainable, realistic and able to meet basic mission critical parameters</p> <p>3.4 Determine constraints associated with the strategies and objectives developed</p> <p>3.5 Include strategies, objectives and constraints in strategic plan <i>documentation</i></p>
4. Develop action plans	<p>4.1 Develop <i>action plans</i> for the strategies and objectives in consultation with team members and management</p> <p>4.2 Check that action plans have clear, comprehensive and concise details</p> <p>4.3 Check that action plans are adhered to</p> <p>4.4 Include action plans in strategic plan documentation</p>
5. Review and	5.1 Review strategic plan with stakeholders and management

implement strategic plan	5.2 Incorporate changes and improvements as recommended 5.3 Implement action plans as set out in the strategic plan 5.4 Review and evaluate success of strategic plan after action plans have been implemented
--------------------------	--

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to assess:
  - opportunities and threats to the organisation
  - strengths and weaknesses of the organisation
- communication skills to:
  - facilitate groups to collect information and gain consensus when developing mission statements, strategies, objectives and targets
  - liaise with development team, sponsors and users
- literacy skills to:
  - develop action plans
  - document strategies, objectives and constraints
- planning and time-management skills to develop and implement strategic plan
- problem-solving skills to address and analyse specific customer requirements
- research skills to:
  - identify critical issues facing the organisation
  - identify trends and developments
- technical skills to:
  - develop objectives and targets for the organisation
  - use forecasting techniques for planning purposes, particularly for evaluating internal and external operating environments related to current and future IT requirements.

### Required knowledge

- analysis and planning approaches to technical problems and management requirements, relating to:
  - network and IT security guidelines of the organisation
  - organisational values and purpose:
    - developing action plans
    - monitoring strategic directions
    - setting objectives and targets
  - hardware platform used by the organisation
- broad knowledge of technology and product directions for evaluating and forecasting vendor and technology trends
- methods for evaluating:
  - current system functionality to forecast for planning, particularly with regard to IT trends and developments
  - internal and external operating environments to forecast for planning
  - operating systems supported by the organisation to forecast for planning.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• develop mission and vision statements in consultation with team members and management</li> <li>• evaluate and document strengths, weaknesses, opportunities, threats and critical issues facing the organisation</li> <li>• develop strategic directions and action plans determined by the strategic alignment of IT directions with organisational goals</li> <li>• review strategic plan and incorporate changes and improvements</li> <li>• implement action plans</li> <li>• evaluate strategic plans following implementation.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• detailed information relating to business strategic plan</li> <li>• budget and time constraints</li> <li>• business objectives</li> <li>• business risks</li> <li>• information on a range of IT business solutions</li> <li>• outcomes of the business-analysis process</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate undertaking strategic planning tasks</li> <li>• review of data gathered, reports and project plans prepared for developing the action and strategic plans</li> <li>• verbal or written questioning to assess knowledge of planning approaches to technical problems.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p>

	<p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsors</li> <li>• users.</li> </ul>
<b><i>Strategic plan</i></b> may relate to:	<ul style="list-style-type: none"> <li>• components from separate disciplines:             <ul style="list-style-type: none"> <li>• human resources</li> <li>• IT</li> </ul> </li> <li>• organisational strategic plan</li> <li>• stand-alone document.</li> </ul>
<b><i>Documentation</i></b> may follow:	<ul style="list-style-type: none"> <li>• audit trails</li> <li>• International Organization for Standardization (ISO), International Electrotechnical Commission (IEC) and Australian Standards (AS) standards</li> <li>• naming standards</li> <li>• project management templates</li> <li>• report writing principles</li> <li>• version control.</li> </ul>
<b><i>Action plans</i></b> may relate to:	<ul style="list-style-type: none"> <li>• operational aspects</li> <li>• financial aspects</li> <li>• human relations</li> <li>• internal and external operating environments</li> <li>• legal aspects</li> <li>• risks.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT602A Develop contracts and manage contracted performance

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIL Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to negotiate and document contractual arrangements between clients, vendors and service providers and to monitor and manage performance against agreed contractual obligations.

## Application of the Unit

This unit applies to information and communications technology (ICT) staff working in a range of areas who are required to contract both staff and suppliers.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Establish contract	1.1 Determine <b><i>boundaries of the contract</i></b> 1.2 Document contract details and provide a copy to the <b><i>client</i></b> and vendor for review 1.3 Obtain client and vendor feedback to clarify problems and misunderstandings 1.4 Facilitate negotiations to resolve problems and misunderstandings 1.5 Seek agreement from <b><i>stakeholders</i></b>
2. Monitor contract	2.1 Monitor performance against contractual obligations to ensure desired level of quality is maintained 2.2 Ascertain client satisfaction with contractual performance 2.3 Identify and take action to address unsatisfactory performance 2.4 Provide recommendations for contractual variations, if required 2.5 Forward recommendations to the <b><i>appropriate person</i></b> for approval

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to:
  - identify service expectations and boundaries of service provision
  - review objectives and performance measures against contract outcomes
- communication skills to:
  - negotiate contract equipment and services when providing client support
  - obtain feedback and clarify problems
  - present and facilitate groups to transfer and collect information, gain consensus on concepts and gain the trust and confidence of colleagues, clients and suppliers
- initiative and enterprise skills to plan use of resources to achieve contract obligations
- literacy skills to:
  - organise and present information
  - prepare information on client support performance outcomes and agreed quality standards
  - write business reports
- numeracy skills to monitor the finances related to contracts
- planning and organisational skills to:
  - plan the management of services
  - monitor satisfactory service
- technical skills to:
  - identify and take action to address unsatisfactory performance
  - monitor the service performance.

### Required knowledge

- analysis and planning approaches to technical problems or management requirements, taking into account organisational values and purpose in the context of formulating client support contracts
- broad knowledge of methods for evaluating and forecasting vendor and technology trends
- contracting requirements related to IT
- IT purchasing of equipment and services, such as negotiating extensive client support contracts
- industry standards in relation to service and product agreements.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to negotiate and formulate extensive client support contracts by:</p> <ul style="list-style-type: none"> <li>• accessing and analysing relevant information on resources and budgets</li> <li>• analysing current and future client support requirements</li> <li>• monitoring resource use, cost efficiency and effectiveness against contractual obligations</li> </ul> <p>reviewing objectives and performance measures.</p>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• detailed information relating to business strategic plan</li> <li>• budget constraints</li> <li>• timeframe for the strategic plan</li> <li>• business objectives</li> <li>• information on a range of IT business solutions</li> <li>• outcomes of a business-analysis process.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of contract prepared by the candidate meeting client requirements for service delivery within time and cost parameters</li> <li>• direct observation of candidate monitoring contract performance, including action taken to address unsatisfactory performance</li> <li>• verbal or written questioning to assess candidate's knowledge of:             <ul style="list-style-type: none"> <li>• analysis and planning approaches to technical problems</li> <li>• contracting in the IT area.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p>

	<p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Boundaries of the contract</i></b> may include:	<ul style="list-style-type: none"> <li>• budget</li> <li>• organisational policy</li> <li>• resources</li> <li>• time constraints.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• employees</li> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments.</li> </ul>
<b><i>Stakeholders</i></b> may include:	<ul style="list-style-type: none"> <li>• development team</li> <li>• project team</li> <li>• sponsors</li> <li>• users.</li> </ul>
<b><i>Appropriate person</i></b> may include:	<ul style="list-style-type: none"> <li>• authorised business representative</li> <li>• client</li> <li>• supervisor.</li> </ul>

## Unit Sector(s)

General ICT

# ICAICT603A Manage the use of appropriate development methodologies

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to nominate the most appropriate methodology from traditional and non-traditional systems development methodologies for use by a team.

## Application of the Unit

This unit applies to information and communications technology (ICT) managers employed in a range of work environments who are required to select the most appropriate development methodologies for their team.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Determine and select appropriate methodology for a given activity	1.1 Determine and define subject activity 1.2 Define criteria for selection of development <b>methodology</b> 1.3 Review and evaluate with project leader a range of <b>traditional and non-traditional system-development methodologies</b> 1.4 Select appropriate system development methodology to suit the activity 1.5 Brief project team on selected methodology
2. Direct the use of the selected development methodology	2.1 Review the initial project plan to guide developmental processes 2.2 Review the identification of appropriate <b>task types</b> according to development methodology 2.3 Review the description and articulation of task types 2.4 Review the definition of appropriate <b>control structures</b> that need to be created during task type execution 2.5 Review the identification of resources to support methodology selection 2.6 Monitor the application of appropriate methodology to solve tasks 2.7 Monitor the project flow and effectiveness of use of methodology against project plan 2.8 Review the documented opportunities for improvement, lessons learned and recommendations for future projects

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - gain consensus on concepts when planning the application of the methodology to the project
  - present information
- literacy skills to:
  - prepare reports required by development methodology
  - write business reports
- planning and organisational skills to:
  - manage system development
  - review and manage project plan
- problem-solving skills to select a suitable development methodology for a client
- technical skills to:
  - apply appropriate methodology to solve tasks
  - determine unique characteristics and qualities to be used
  - evaluate development methodologies
  - review a range of traditional and non-traditional system development methodologies.

### Required knowledge

- client business domain and organisational requirements
- life cycle maintenance of a live system, network or website
- role of stakeholders and the degree of stakeholder involvement in the development process
- technology involved to develop each methodology
- two or more current industry development methodologies.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• manage a project team</li> <li>• review a project plan</li> <li>• supervise the application of a methodology to a project</li> <li>• evaluate a range of development methodologies and their application to a project or scenario</li> <li>• review documentation as required by the chosen methodology.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• design specifications and current methodologies</li> <li>• organisational standards for documentation and version control</li> <li>• detailed user-requirements document, including model and scope</li> <li>• project plan.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate reviewing the stages of a development methodology within the scope of a project</li> <li>• verbal or written questioning to assess candidate's knowledge of a variety of system development methodologies and their application to a systems project</li> <li>• evaluation of candidate's review of supporting documentation produced by project team.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p>

	<p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
--	--

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b>Methodology</b> may include:	<ul style="list-style-type: none"> <li>• traditional</li> <li>• non-traditional.</li> </ul>
<b>Traditional system-development methodologies</b> may include:	<ul style="list-style-type: none"> <li>• design methodology</li> <li>• project life cycle</li> <li>• structured systems analysis.</li> </ul>
<b>Non-traditional system-development methodologies</b> may include:	<ul style="list-style-type: none"> <li>• object-oriented analysis and design</li> <li>• prototyping</li> <li>• soft system methodology</li> <li>• version control.</li> </ul>
<b>Task types</b> may relate to:	<ul style="list-style-type: none"> <li>• fixed unit</li> <li>• fixed duration</li> <li>• fixed work.</li> </ul>
<b>Control structures</b> may include:	<ul style="list-style-type: none"> <li>• a review process</li> <li>• acceptance criteria</li> <li>• inspection</li> <li>• test plans.</li> </ul>

## Unit Sector(s)

General ICT

## ICAICT604A Identify and implement business innovation

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to analyse traditional business processes to identify and implement business opportunities for innovation and reform.

### Application of the Unit

This unit applies to those managing a knowledge management or systems development team, or working in a senior role in such a team. Those with line management responsibility would undertake this role.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Compare the business with competitor businesses</p>	<p>1.1 Investigate information on business markets, customers and methods of doing business</p> <p>1.2 Analyse and compare the current market for the business and the customer base with typical business markets and customers</p> <p>1.3 Analyse and contrast current business relationships, business processes and methods of doing business with e-facilitated businesses</p>
<p>2. Identify business opportunities for innovation and reform</p>	<p>2.1 Investigate innovation and reform of <i>aspects of the business</i> through business strategies</p> <p>2.2 Assess opportunities for their compatibility with business goals and objectives, and conduct a cost-benefit analysis for each</p> <p>2.3 Evaluate the degree of likely change and the ramifications for the business and its culture for each opportunity</p> <p>2.4 Conduct a risk management analysis and formulate a plan for dealing with contingencies according to organisational requirements</p> <p>2.5 Rank opportunities in terms of their viability and applicability to the organisation</p> <p>2.6 Include opportunities for innovation in the organisation's business strategy and prioritise them for implementation</p>
<p>3. Implement innovation</p>	<p>3.1 Redesign aspects of the business in an innovative manner using online technologies according to the organisation's business strategy</p> <p>3.2 Integrate innovation into the business and monitor to gauge usefulness and maximise implementation</p> <p>3.3 Review business innovation in consultation with users and make recommendations for improvement or further innovation</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate opportunities
- communication skills to liaise with management, technical staff and end users of an organisation
- initiative and enterprise skills to plan innovations in line with business strategies
- literacy skills to produce reports and proposals
- numeracy skills to produce a cost-benefit analysis
- planning and organisational skills to plan a strategy to be implemented over time
- research skills to identify appropriate technologies to fit with an organisation's requirements.

### Required knowledge

- culture of the business versus traditional business models
- internal and external sources of information
- legal, ethical and security issues relating to business strategies
- records-management principles
- relevant legislation from levels of government that effect business operation, especially regarding OHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- structure of the business.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• explain the organisation's strategic directions</li> <li>• develop innovations to assist the business</li> <li>• produce a cost-benefit analysis of suggested innovations</li> <li>• develop an implementation plan for such innovations.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• a range of business documents covering vision, mission statements and strategic directions</li> <li>• site where business opportunities for innovation may be implemented.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of candidate's written reports outlining:             <ul style="list-style-type: none"> <li>• number of business innovations</li> <li>• cost-benefit analysis and recommendations</li> </ul> </li> <li>• evaluation of candidate's project plan to implement an innovation</li> <li>• verbal and written questioning to determine candidate's knowledge of:             <ul style="list-style-type: none"> <li>• organisation's strategic directions</li> <li>• cost-benefit analysis.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p>

	In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.

## Unit Sector(s)

General ICT

## ICAICT605A Implement a knowledge management strategy

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to implement a knowledge management strategy for an ebusiness through technology and cultural change.

### Application of the Unit

This unit applies to those managing a knowledge management team, or working in a senior role in such a team. Those with line management responsibility would undertake this role.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

<p>1. Implement knowledge management system and procedures</p>	<p>1.1 Foster a culture of sharing knowledge within the business through a system of formal and informal incentives and rewards</p> <p>1.2 Implement policy and procedures for capturing knowledge within the organisation according to the business knowledge management strategy, and integrate this knowledge into existing business processes to change the enterprise processes</p> <p>1.3 Model methods of contributing to the organisation's knowledge management system, and provide learning and development opportunities for staff to assist them to contribute and provide feedback</p> <p>1.4 Provide coaching, mentoring and ongoing support to staff in accessing and using the organisation's knowledge management system according to the business knowledge management strategy</p> <p>1.5 Manage protection and security of knowledge or information and levels of access according to organisational requirements</p>
<p>2. Maintain business knowledge base</p>	<p>2.1 Monitor input procedures to ensure that sources are tapped and knowledge is captured according to the business knowledge management strategy, and to ensure the effectiveness of accurate <i>data capture</i></p> <p>2.2 Collect and analyse data on access and use of the knowledge management system to determine the organisation's strategic use of knowledge</p> <p>2.3 Implement contingency measures to address shortfalls in the knowledge management system and procedures, according to level of responsibility and authority</p>
<p>3. Review knowledge management system and procedures</p>	<p>3.1 Evaluate the knowledge management system and procedures to ensure they are meeting the needs of clients, organisational aims, objectives and standards</p> <p>3.2 Periodically review the organisational knowledge content for accuracy and currency to ensure that it remains in line with organisational requirements</p> <p>3.3 Identify improvements to the system and to the organisation's strategic use of knowledge in consultation with users and prepare a cost-benefit analysis with recommendations</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate existing knowledge management initiatives and compare these to corporate needs and directions
- communication skills to liaise with management, technical staff and end users of an organisation
- initiative and enterprise skills to plan strategies
- literacy skills to produce reports and proposals
- numeracy skills to produce a cost-benefit analysis
- planning and organisational skills to plan a strategy to be implemented over time
- research skills to identify appropriate technologies to fit with an organisation's requirements.

### Required knowledge

- culture of the business versus traditional business models
- database design concepts
- internal and external sources of information
- legal, ethical and security issues relating to knowledge management
- records management principles
- relevant legislation from levels of government that effect business operation, especially regarding OHS and environmental issues, equal opportunity, industrial relations and anti-discrimination
- structure of the business.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• explain the importance of knowledge management in contemporary organisations</li> <li>• encourage culture change in the management of knowledge</li> <li>• review and improve systems and procedures.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• sample organisations suitable for the implementation of knowledge management, including business plans</li> <li>• existing knowledge management strategy.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• review of candidate's written report outlining a knowledge management implementation plan</li> <li>• evaluation of setting up project's first phases of the knowledge management plan</li> <li>• verbal and written questioning to determine candidate's knowledge of culture change.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

*The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Data capture</i></b> may include:	<ul style="list-style-type: none"><li>• ensuring effectiveness of accurate data capture</li><li>• minimisation of inefficient processing</li><li>• using open standards:<ul style="list-style-type: none"><li>• European Article Numbering Uniform Code Council (EAN.UCC) product code</li><li>• United Nations Electronic Data Interchange for Administration Commerce and Transport (UN/EDIFACT).</li></ul></li></ul>

General ICT

## ICAICT606A Develop communities of practice

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify areas that would benefit from communities of practice, and to develop such communities.

### Application of the Unit

This unit applies to information and communications technology (ICT) management who are responsible for teams and their production.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Identify requirement for community of practice	1.1 Map <b><i>organisational knowledge</i></b> 1.2 Identify existing informal communities of practice (CoPs) 1.3 Identify situations where staff will benefit from closer cooperation across organisational boundaries 1.4 Identify those in disparate areas that share work goals
2. Devise spaces for involvement	2.1 Enable electronic meeting spaces 2.2 Enable <b><i>shared storage areas</i></b> , both public and private 2.3 Enable <b><i>group mailing</i></b> capability 2.4 Enable other appropriate technical facilitators
3. Invite participation	3.1 Publicise <b><i>collaborative tools</i></b> 3.2 Invite staff in areas identified above to group events, such as training and conferences 3.3 Allow new groups to coalesce spontaneously 3.4 Accept different levels of participation
4. Assist evolution of community	4.1 Facilitate regular contact within CoP 4.2 Enable evolution of CoP, including the disbanding of a CoP where its purpose has been achieved

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to interpret knowledge map
- communication skills to:
  - present information
  - provide advice to colleagues and staff
- initiative and enterprise skills to:
  - engage staff in new ways of working
  - identify areas in need of communities of practice
- literacy skills to:
  - interpret technical documentation
  - write reports
- learning skills to develop new ways of encouraging collaboration
- problem-solving skills to develop strategic initiatives related to testing the operation and consistency of the total system.

### Required knowledge

- detailed knowledge of the organisation
- general knowledge of:
  - communications enabling technology
  - group dynamics
  - presentation and marketing
  - training.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify appropriate areas for CoP</li> <li>• manage the provision of enabling software</li> <li>• facilitate the development of CoP.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• organisational structure, goals and knowledge</li> <li>• site where CoP may be developed.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to determine candidate's knowledge of:             <ul style="list-style-type: none"> <li>• purpose and aims of CoP</li> <li>• evolution of CoP</li> <li>• required functionality of enabling software</li> </ul> </li> <li>• evaluation of candidate's nominated facilitating technology</li> <li>• review of candidate's CoP proposal, specifically related to:             <ul style="list-style-type: none"> <li>• methods to identify projected CoP</li> <li>• proposed activities to initiate and encourage the CoP</li> <li>• specified enabling software to facilitate the CoP.</li> </ul> </li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be</p>

	combined with targeted questioning to assess required knowledge.
--	--

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b><i>Organisational knowledge</i></b> may include:	<ul style="list-style-type: none"> <li>• functions of individual business units</li> <li>• knowledge contained within individual business units</li> <li>• mission statement</li> <li>• strategic goals</li> <li>• structure.</li> </ul>
<b><i>Shared storage areas</i></b> may include:	<ul style="list-style-type: none"> <li>• local computerised storage areas</li> <li>• remote computerised storage areas.</li> </ul>
<b><i>Group mailing capability</i></b> may include:	<ul style="list-style-type: none"> <li>• ability to send email to group members</li> <li>• add, delete and update capability.</li> </ul>
<b><i>Collaborative tools</i></b> may include:	<ul style="list-style-type: none"> <li>• @Task</li> <li>• Access Grid</li> <li>• Alfresco</li> <li>• Atmail</li> <li>• blogs</li> <li>• Citadel</li> <li>• Drupal Framework</li> <li>• eGroupWare</li> <li>• eXo</li> <li>• Group-Office</li> <li>• Jumper 2.0</li> <li>• KnowledgeTree</li> <li>• Lotus Live</li> <li>• Microsoft SharePoint</li> <li>• OBM Groupware</li> <li>• OpenGroupware.org</li> <li>• Simple Groupware</li> <li>• Tiki Wiki CMS Groupware</li> <li>• Tonido Workspace</li> <li>• wikis</li> <li>• WorkConnect.</li> </ul>

## ICAICT608A Interact with clients on a business level

### Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

### Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to interact with clients at a management level.

### Application of the Unit

This unit applies to management personnel in a range of information and communications technology (ICT) areas who are responsible for maintaining client relationships.

### Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

### Pre-Requisites

Not applicable.

### Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Review client's business domain	1.1 Research organisational service standards, values and culture to understand the organisational environment 1.2 Investigate and document the goods and services provided by the organisation 1.3 Review current <b><i>service level agreements</i></b> (SLAs) if appropriate
2. Develop new business with client	2.1 Research <b><i>client</i></b> service needs and preferred level of service 2.2 Research opportunities for new business with client 2.3 Develop draft proposals to cover these new initiatives
3. Negotiate new business initiatives	3.1 Conduct a session with the client to present the new opportunities 3.2 Present proposals to the client in a clear, concise and comprehensive manner 3.3 Present proposed cost and timeframes to the client 3.4 Negotiate the terms with the client and record alterations if required 3.5 Clarify areas of uncertainty or disagreement 3.6 Document the agreement negotiated with the client
4. Monitor, adjust and implement procedures to maintain client focus	4.1 Assess progress in achieving new client initiatives 4.2 Gather client feedback to improve the proposals 4.3 Adjust the service provided to the client based on client feedback and in line with <b><i>organisational guidelines</i></b> 4.4 Document changes to new provisions

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to:
  - facilitate and make presentations
  - liaise and negotiate with clients
- enterprise and initiative skills to identify new opportunities
- literacy skills to:
  - analyse and evaluate information
  - prepare general information and papers
  - problem-solving skills to develop solutions unique to a client.

### Required knowledge

- business practices, including:
  - change management
  - information-gathering techniques
  - planning process, including development of IT business solutions
  - preparation of reports
- current industry-accepted hardware and software products, including:
  - general features and capabilities
  - vendor product directions
- legal principles of commercial contracts and SLAs
- organisational policies, plans and procedures, including contracting
- theoretical concepts relating to negotiation and business relationships.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• identify possible new business initiatives</li> <li>• propose new business to the client</li> <li>• formulate and implement new business</li> <li>• meet client requirements for support service within quality, time, target performance and cost parameters.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• organisational policies, procedures and SLAs for the IT industry</li> <li>• contexts for negotiating agreements and contracts</li> <li>• current IT hardware and software products.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate's presentation of a new business initiative</li> <li>• review of candidate's documented terms of service as negotiated with a client</li> <li>• verbal and written questioning to assess candidate's knowledge of business practices, such as change management and planning processes.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required</p>

	knowledge.

Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.*

<b><i>Service level agreements</i></b> may relate to:	<ul style="list-style-type: none"> <li>• charge back to business units</li> <li>• consideration of business processes and requirements</li> <li>• clearly specified and quantified service levels</li> <li>• different infrastructure services: <ul style="list-style-type: none"> <li>• active server pages (ASPs)</li> <li>• communications carriers</li> <li>• internet service providers (ISPs)</li> <li>• vendor products</li> </ul> </li> <li>• evaluation or audit of service levels</li> <li>• expectations regarding servicing</li> <li>• penalties</li> <li>• workload and performance considerations.</li> </ul>
<b><i>Client</i></b> may include:	<ul style="list-style-type: none"> <li>• external organisations</li> <li>• individuals</li> <li>• internal departments</li> <li>• internal employees.</li> </ul>
<b><i>Organisational guidelines</i></b> may include:	<ul style="list-style-type: none"> <li>• communication methods</li> <li>• content of emails</li> <li>• dispute resolution</li> <li>• document procedures and templates</li> <li>• downloading information and accessing particular websites</li> <li>• financial control mechanisms</li> <li>• opening mail with attachments</li> <li>• personal use of emails and internet access</li> <li>• virus risk.</li> </ul>

## **Unit Sector(s)**

General ICT

# ICAICT609A Lead the evaluation and implementation of current industry-specific technologies

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to lead the identification, management and implementation of specific industry technologies to meet identified industry standards.

## Application of the Unit

This unit applies to individuals engaged in ongoing review and research to lead the identification, management and evaluation of the implementation of industry technologies or techniques to improve aspects of the organisation's activities. The unit provides evidence of the application of industry-enabling technologies.

## Licensing/Regulatory Information

Users should confirm licensing, legislative, regulatory, or certification requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Lead the implementation of industry-specific technologies	<p>1.1 Identify technologies specific to an <b><i>industry sector</i></b></p> <p>1.2 Determine the relevance of <b><i>industry-specific technologies</i></b> to the organisational requirements</p> <p>1.3 Plan the implementation of industry-specific technologies where appropriate, for the benefit of the organisation</p>
2. Direct the application of industry-specific technologies to assist in solving specific organisational problems	<p>2.1 Lead the management of the testing of industry-specific technology</p> <p>2.2 Direct the implementation of specific features and functions of industry-specific technologies to provide a suitable solution to an identified problem</p> <p>2.3 Demonstrate depth of knowledge of enabling technologies to an accepted industry standard</p> <p>2.4 Access and use <b><i>sources of information</i></b> relating to the industry-specific technologies</p>
3. Lead the review, analysis and evaluation of the industry-specific technology performance	<p>3.1 Lead the analysis of the implementation of the industry-specific technologies for performance and usability</p> <p>3.2 Analyse, review and evaluate the benefits to the organisation</p> <p>3.3 Determine <b><i>environmental considerations</i></b> involved with using the technology</p> <p>3.4 Seek <b><i>feedback</i></b> from users, where appropriate</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to communicate at a high level with peers and supervisors, such as technical personnel for expert advice
- high-level research skills to locate appropriate sources of information regarding industry-specific technology
- literacy skills to:
  - interpret technical documentation, equipment manuals and specifications
  - write detailed reports
- safety awareness skills to work systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- technical skills to:
  - analyse, test and evaluate the industry-specific technologies
  - identify features of the industry-specific technologies
  - lead the application of industry-specific technologies.

### Required knowledge

- high-level knowledge of:
  - vendor product directions
  - current technology trends, directions in IT and the major industry technology standards used in the specified area
  - information-gathering techniques
- in-depth knowledge of current industry hardware and software products, including their general features, capabilities and application.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• lead the implementation of new and emerging industry-specific technologies</li> <li>• undertake analysis and critically evaluate features and functions of identified industry-specific technologies to an in-depth industry standard.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• site where industry-specific technologies may be used</li> <li>• industry-specific technologies currently used in industry</li> <li>• documents detailing OHS standards, environmental guidelines and organisational requirements.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• verbal or written questioning to assess candidate's knowledge of features and functions of industry-specific technologies</li> <li>• direct observation of candidate leading the implementation of industry-specific technologies</li> <li>• simulation of uses of the industry-specific technologies.</li> </ul>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<b>Industry sector</b> may include:	<ul style="list-style-type: none"> <li>• business services or information worker</li> <li>• information and communication technology</li> <li>• telecommunication.</li> </ul>
<b>Industry-specific technologies</b> may include:	<ul style="list-style-type: none"> <li>• vendor specific: <ul style="list-style-type: none"> <li>• hardware</li> <li>• integrated services</li> <li>• internet access</li> <li>• mobile communication devices</li> <li>• networks</li> <li>• peripherals</li> <li>• software.</li> </ul> </li> </ul>
<b>Sources of information</b> may include:	<ul style="list-style-type: none"> <li>• appliances software and technical connections guidance and other outputs supplied by vendors and manufacturers</li> <li>• documents</li> <li>• test pages</li> <li>• vendor and manufacturer guidance regarding requisite depth of knowledge of industry-specific technologies</li> <li>• web pages.</li> </ul>
<b>Environmental considerations</b> may include:	<ul style="list-style-type: none"> <li>• correct disposal by an authorised body of redundant hardware: <ul style="list-style-type: none"> <li>• circuit boards</li> <li>• hard drives</li> <li>• motherboards</li> </ul> </li> <li>• recycling</li> <li>• safe disposal of packaging: <ul style="list-style-type: none"> <li>• cardboard</li> <li>• paper</li> <li>• plastic</li> <li>• polystyrene.</li> </ul> </li> </ul>
<b>Feedback</b> may include:	<ul style="list-style-type: none"> <li>• competency skill level</li> <li>• industry validated demonstration of competency through certification</li> <li>• interviews</li> </ul>

	<ul style="list-style-type: none"><li>• meetings.</li></ul>

## Unit Sector(s)

General ICT

# ICAICT610A Manage copyright, ethics and privacy in an IT environment

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAIT Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage the issues of copyright, professional and ethical conduct in team, as well as to ensure that personal information of stakeholders is handled in a confidential and professional manner when dealing with stakeholders.

## Application of the Unit

This unit applies to IT personnel who are required to gather information to determine the organisation's code of ethics, and protect and maintain privacy policies and system security.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

<b>Element</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Manage adherence to copyright regulations	<p>1.1 Review current Australian copyright law, in particular its relationship to information technology (IT)</p> <p>1.2 Ensure that team members are aware of Australian copyright law and how it affects their work</p> <p>1.3 Institute measures to ensure that copyright is not breached</p> <p>1.4 Institute regular reviews to ensure organisational copyright requirements are up-to-date and team members are adhering to these requirements</p> <p>1.5 Distribute updated versions if required</p>
2. Manage ethical behaviour	<p>2.1 Review appropriate <i>code of ethics</i>, both organisational and IT-specific</p> <p>2.2 Acquaint team members with ethical requirements</p> <p>2.3 Institute regular reviews of team member's ethical work practices and feedback to ensure correct application of the code</p> <p>2.4 Ensure that <i>stakeholders</i> are aware of ethics code, and adjust appropriately following stakeholder feedback</p> <p>2.5 Institute regular reviews of stakeholder understanding and application of code of ethics</p> <p>2.6 Establish a review and grievance procedure to enable confidential reporting of ethical issues</p> <p>2.7 Institute regular reviews of code of ethics, updating and distributing as required</p>
3. Manage privacy	<p>3.1 Institute a regular review of the relevance of <i>legislation and standards</i> to organisational outcomes, the organisation's <i>privacy policy</i> and procedures, and the work practices of team members with regard to these requirements</p> <p>3.2 Determine and ensure the integrity, confidentiality, security and availability of information as required by the organisational policy</p> <p>3.3 Ensure continued confidentiality and proprietary rights of stakeholders' interests</p> <p>3.4 Contribute to the creation or updating of the organisation's privacy policy and procedures to align with privacy legislation</p> <p>3.5 Distribute new or revised policy and procedures to stakeholders</p> <p>3.6 Implement new work procedures and collect feedback from stakeholders</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- communication skills to liaise with internal and external personnel on ethical and privacy, operational and business-related matters
- learning skills to update personal ethical and privacy knowledge through professional development
- literacy skills to apply standards and legislation to policy and procedure development and monitoring
- planning and organisational skills to plan, prioritise and monitor own work
- research skills to gain and maintain relevant and current industry privacy and ethical information
- technical skills to perform application and system security and storage management.

### Required knowledge

- Australian Computer Society Code of Ethics
- federal and state or territory legislation and policy relevant to an IT environment relating to:
  - access and equity
  - copyright and intellectual property
  - OHS
  - privacy
- organisational communication processes and procedures
- organisational requirements for customer service
- system security procedures.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• analyse legislation and standards related to copyright, professional conduct and privacy in the IT industry</li> <li>• contribute to the development of a code of ethics and monitor the workplace to ensure code of ethics is being applied and is appropriate</li> <li>• contribute to the development of a privacy policy and monitor the workplace to ensure the policy is being applied and is appropriate</li> <li>• ensure the adherence to copyright, ethics and privacy in a team.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• relevant organisational policies</li> <li>• legislation and standards documentation</li> <li>• industry codes of practice</li> <li>• appropriate learning and assessment support when required</li> <li>• modified equipment for people with special needs.</li> </ul>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of candidate:             <ul style="list-style-type: none"> <li>• ensuring continuity of IT services and information flow to ensure protection of stakeholders' interests</li> <li>• instructing and directing the adherence of a team to these professional practices</li> </ul> </li> <li>• review of candidate's documented code of ethics and privacy policy</li> <li>• verbal or written questioning to assess candidate's:             <ul style="list-style-type: none"> <li>• provision of leadership and guidance to others in the implementation of ethical conduct in business relationships</li> <li>• provision of guidance to others in the operation and management of privacy policies in business relationships</li> <li>• provision of guidance to others in the copyright area.</li> </ul> </li> </ul>

<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>

## Unit Sector(s)

General ICT

# ICAICT701A Lead research into identifying new marketplace opportunities

## Modification History

Release	Comments
Release 1	This Unit first released with <i>ICAI1 Information and Communications Technology Training Package version 1.0</i>

## Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to lead the work involved in researching, evaluating and recommending new organisational initiatives based on perceived marketplace opportunities.

## Application of the Unit

Strategic business analysts in medium to large organisations apply the skills and knowledge in this unit to enhance organisational competitiveness by identifying and establishing new initiatives and transformational change based on researched marketplace opportunities.

## Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement but users should confirm requirements with the relevant federal, state or territory authority.

## Pre-Requisites

Not applicable.

## Employability Skills Information

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Element	Performance Criteria
<i>Elements describe the essential outcomes of a unit of competency.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.</i>

## Elements and Performance Criteria

1. Direct research into organisation's business domain	<p>1.1 Research sectors in the relevant industry for trends that may yield viable business opportunities</p> <p>1.2 Research business initiatives undertaken by competitor organisations to address the same or similar opportunities and analyse resources required to undertake such initiatives or project opportunities</p> <p>1.3 Identify strategies for realising the identified business initiatives, including sub-contracting of suitable elements where applicable</p> <p>1.4 Research legal, environmental and <i>social implications</i> of identified initiatives</p>
2. Evaluate new business initiatives	<p>2.1 Initiate and oversee <i>market research</i> for potentially viable identified business opportunities</p> <p>2.2 Gauge the likely impacts of candidate new initiatives on the business enterprise, including specific legal, financial and transformational implications</p> <p>2.3 Evaluate <i>delivery strategies</i> for anticipated products or services stemming from candidate initiatives</p>
3. Explore feasibility of the new initiatives	<p>3.1 Formulate selection criteria based on strategic business objectives</p> <p>3.2 Facilitate a feasibility study, including cost-benefit analysis</p> <p>3.3 Select most feasible option against selection criteria</p> <p>3.4 Recommend preferred initiative</p>

## Required Skills and Knowledge

*This section describes the skills and knowledge required for this unit.*

### Required skills

- analytical skills to evaluate relevant industry sectors and market sensitivities
- communication skills to liaise with clients and stakeholders at relevant levels of management
- initiative, planning and organisational skills to:
  - coordinate new initiatives and cross-divisional projects, including potential business acquisitions

  - proactively seek out new market opportunities
- literacy skills to develop presentations and documents for executive management
- numeracy skills to:
  - create and manage budgets
  - present the results of financial analysis and financial modelling
  - review and appraise a financial business case
- problem-solving skills to identify and resolve problems quickly
- research skills to:
  - conduct research, collect and synthesise complex data
  - scan market research results and make decisions based on them
- technical and negotiation skills to direct and coordinate IT and business architecture change.

### Required knowledge

- analysis methods and tools, including:
  - affinity diagrams
  - competition matrix
  - decision trees
  - mind maps
  - risk assessment
  - SWOT analysis
  - value chain
- contracts and procurement
- identifying government and non-government governing bodies in the relevant industry
- legal, ethical and security issues relating to research of competitive business opportunities, including the laws related to patents and copyright
- organisational structure, policies and procedures
- relevant government legislation that affects business operation.

## Evidence Guide

*The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.*

<b>Overview of assessment</b>	
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• conduct research into trends for a specified industry sector and identify potential business opportunities</li> <li>• undertake market research and report on the viability and related implications of a selected business opportunity</li> <li>• develop and present a feasibility report, including cost-benefit analysis, justifying recommendations for a proposed new business initiative.</li> </ul>
<b>Context of and specific resources for assessment</b>	<p>Assessment must ensure access to:</p> <ul style="list-style-type: none"> <li>• appropriate resources to allow research to be conducted into industry trends, which may include access to commercial research house libraries via memorandum of understanding or other arrangements</li> <li>• opportunity to conduct meaningful market research on potential business opportunities</li> <li>• simulated or real executive level management teams for presentation of proposals and feedback.</li> </ul> <p>Where applicable, physical resources should include equipment modified for people with special needs.</p>
<b>Method of assessment</b>	<p>A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:</p> <ul style="list-style-type: none"> <li>• direct observation of the candidate carrying out the required work</li> <li>• verbal or written questioning to assess required knowledge and skills</li> <li>• review of reports and proposals prepared by the candidate and feedback from executive team presentations</li> <li>• a portfolio of the work undertaken.</li> </ul> <p>Note: The preferred assessment method is through a workplace project or through a simulated medium to large enterprise workplace.</p>
<b>Guidance information for assessment</b>	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, where</p>

	<p>appropriate.</p> <p>Assessment processes and techniques must be culturally appropriate, and suitable to the communication skill level, language, literacy and numeracy capacity of the candidate and the work being performed.</p> <p>Indigenous people and other people from a non-English speaking background may need additional support.</p> <p>In cases where practical assessment is used it should be combined with targeted questioning to assess required knowledge.</p>
